

# **Inertia/Emotion - Nationalistic Feelings from Environment - Sense of Emotion - Change Planet through 'Soul of Planet' Become Plasmas - Spiral**

## **Introduction to 547 KSW**

Note: Not checked by KF interpretation by KS of KF Brazil

In this workshop there is a lot about how our Souls and emotions interact with the different fields of the environment including Inertia to create our behavior both individually and as a group. There is a lot to sort out in this teaching and different field interactions, so one has to pay very close attention. I will do my best to try to bring some of it out. One could also call this a teaching about Inertia. Last week we learned that when the planet was forming and after the Soul or gravity in the center was formed, it interacted with the fields of the environment and the central star of the solar system, in our case the Sun, to manifest a matter state surface of the planet, which then created the Inertia of the planet. If you remember he said, in matter state we call it Inertia, but for the Soul of the Man (STM) we call it emotion. So I understand it as Inertia is also emotion. And for years Mr. Keshe would only tell us that the fields coming in contact with the Earth interacted with Inertia and became the matter state like the elements. I always wondered what was this magical Inertia, that has the information to create everything on the planet. I assumed that it had to be the desire to exist and experience life, or in our case what we call the physical dimension (D). So whenever the word Inertia is used I always try to relate it back to a feeling or desire to exist and experience life. But it also has all the information to create what is needed for that experience. And as we are finding out, M fields are not just some lines drawn on a paper, they contain and always contain the Knowledge of Creation and remain connected to the Source, even if we cannot see those connections. This is something to 'bear in mind' as we go through the teachings and talk a lot about Inertia.

He mentioned the "Aura" because that is the indicator of our exchange of fields with the environment. The fields going out and coming in, interact at the boundary of the skin to create light in a different field strength than what our eyes can see. This is to let us know that our interaction with the environment is a living one, we are not totally isolated inside our skin. And we change along with the interaction of our fields with the environment.

Then he wanted us to think about where our national identities come from and why people who come from a particular geographical location have similar behavior traits, beliefs, and feelings. We may think it only has to do with our education and how we were conditioned as a child to believe and behave in a certain way. He made it clear that these nationalistic traits come from our interaction with the fields of the environment. An environment has a particular M field strength we call Inertia which is also an emotion. Because remember emotions are field strengths created from the interactions of a Soul and a Soul of Physicality (STP). In this case it's the Soul of the Planet and the STP of the

Planet. There are different intensities of field strength around the planet due to other factors and that's why the Inertia is not all the same. Then he said, the emotions of the individual and environment interact, mix together and create a common denominator Soul. This common denominator Soul becomes our national tendencies. For example, there is a common denominator Soul known as, being Brazilian. One way we can directly experience this is, if we have been out of the country in a foreign land for a long time. Then one day we happen to meet another Brazilian, we can observe how excited we get to talk to them about Brazil. We can experience it as a very clear emotion. To summarize, the STM has its own interactions with the geographical Inertia and that also interacts with the STP and it becomes the behavior of the different races on the planet. This is also related to why races adopt a certain religion.

As we start transmuting into Space it's important to understand how these different Inertia's will effect us through our emotions and how we relate to the new environment. Then he gave the example of the mistake of manifesting as a lamb among hungry lions. If we find ourselves in an environment that is opposite to us, we have to learn how to connect to the fields of the emotion of that opposition and find a balance with it to manifest and survive. He said, human's don't know this (emotion) of Compromise, and that's why we have war, but in Space they don't have war. They have reached the level of intelligence that they can comprehend part of the Knowledge of Creation, so they can adapt, adjust and position their plasmas in respect to each other. And this is why they don't have religions, which on this planet for the most part are concepts people are programmed with, or they accept without truly understanding their deeper meaning and the essence of what the religion is pointing to. And sure enough there will be some Fundamentalist preacher of any religion that will want to "convert the Heathens" in Space to their own limited understanding of reality. This won't work because the planet you are trying to go to will not allow your Soul to manifest there, and your own Soul won't allow you to transmute. Before we reach the point of transmutation the human race has to elevate itself to understand the Knowledge of Creation, then there won't be any proselytizing of religions in Space to create "Star Wars." People think that they freely chose to be part of a religion, but it could be due to the field strength of an Inertia that interacted with the individuals STM and STP and connected them to a common denominator Soul of a particular religion that gave them an emotion to become part of that group.

Another aspect of this teaching was about how we are going to perceive things and be able to understand our environment in Space. On Earth we have the 5 senses of sight, sound, touch, taste, and smell through which we have become dependent on to perceive and live in our environment. These senses were created specifically for Earth and most probably we won't use of them in Space. So what are we going to do? This is why he has been explaining about the different Inertias and emotions how their fields influence our manifestation of physicality (P) and to function we need to be aware of them to work with them. In Space we use something he calls, the "Sense of Emotion," which is a new sense that collectively works with the senses of the environment, individuality of the STM, and the STP. This is difficult for us to understand because we have handicapped ourselves with sight and sound as being the "stamp of reality." We say, if we can't see it,

then we don't believe it. This is a huge handicap for living in Space. He said in Space there are many different senses and emotions that we don't know about. And when we encounter the Sense of Emotion, we call it a "Sixth Sense," but then people just ignore what it is pointing to. By giving it a name, we put it aside and think of it as a "figment of our imagination." In a way, we protect the limited boundaries of our small world. But the Sixth Sense is real and through it we are interacting with other Souls, and other emotions, and other interactions we haven't become aware of yet. To transmute we need to develop our ability to use the Sense of Emotion to manifest, survive and interact with beings and environments. For example, when members of the Universal Community manifest themselves on Earth they adapt to our physical senses, but they keep their Sense of Emotion, which is needed for life in Space when they leave this planet.

I am sure we have met people who are very sensitive, and we may have noticed that they behave differently in the environment we are together with them in. For example, take Mr. Keshe, those who have been close with him say, that he is totally aware of the whole environment that he is in. He senses the whole thing, from the people to the animals, and the weather, landscape and whatever else may be there that we would not be aware of. He is totally alive and part of his environment and his Sense of Emotion is active. You cannot fool him by thinking you can hide behind a façade, he sees right through it. He may not say anything, but he is completely aware. And this is what we have to develop in ourselves. Maybe we could say that the Sense of Emotion takes in all the different fields that are interacting in an environment, and through this sense we can interact back with them, just like we do with the 5 senses on Earth. If we have developed the Sense of Emotion, then it becomes an additional tool in our Earth life.

Understanding Inertia is very important for life in the U. We need to educate ourselves in these new dimensions of senses and not limit our thinking to just the senses of the physical body, and to be open to the knowledge of existence, and learn how to collaborate and cooperate with the different Inertia's of an environment. We should understand that there are many different types of Inertia, and not all Inertia's lead to manifestation of P in the matter state. Inertia of the emotion and Inertia of the senses are different. They do not have a material manifestation of themselves and remain as 'energy in motion.' They are M fields but they don't have the strength to be able to manifest P in the environment they are in so they remain in an energy form, or they can be in a physical or liquid form. One example of this is when we see a ball of light moving around in the sky. It is an entity with a Soul and it remains in the Inertia of Light.

If we can comprehend the Sense of Emotion and create the essence of the love for the Creator, then through our emotions we can go within the center of the Soul of the Creator (STC) Itself. There is no need for an intermediary between us and our Creator. It's about what fields we can understand and are able to release, so that we can interact and decide our position in respect to our Creator. It's up to us, it is not forced on us. He compared it to our relationship with our Mother and how we interact with her. The more love and care we shower on her the more she wants to show us love back with cuddles and kisses. When we make an effort to love, then that increases the inner emotion of love between us. So the more we love God, the more God loves us back. But regardless of how we

behave God still loves us. And there is no difference between the Mother and the Creator. The Mother is in the dimension of P and the Creator is in the dimension of the emotion of the fields. The part that touched my emotion was when he said, the Mother created our physical body, but it was the Creator who created our Soul. In the infinity of Creation and the division of the fields, the Creator still comes down into our tiny existence and gives us our Soul. Therefore, we must be directly connected to the Creator. This gave the most hope, and understanding that it is a matter of opening up to that knowledge and living it. And he said, it's not that we have to change something, rather it's that we have to stop denying what is already within us.

With this teaching on Inertia and emotion Mr. Keshe has opened up a new possibility for bringing the Change in a faster but harsher way to humanity. Instead of working with Inertia, we work with the "Soul of the Planet," and then we change the emotion of humanity to be that of One Nation. It's my understanding that just like the geographical fields of Inertia interact with the STM and STP to create religions, we can do the same for the entire planet, by changing the fields of the Inertia of the planet, to create a Sense of Emotion of being One Planet, One Race. But there is more involved in it. First of all what does he mean by, 'instead of working with Inertia?' I take that to mean working with the Gans's to increase the MG field strength of the planet to change the Man that way, which will be long and drawn out. In the new way, the STM, through the essence of Emotion will interact with the 'Soul of the Planet' and then everybody would function as a plasma and would interact through MaGrav positioning. If we all function as plasma then we wouldn't kill another plasma, instead we'll adjust and reposition like they do in the U. He did say there is a technology that can create the fields of Inertia. It's not clear how this would work. If we only use the Gans's we would remain identified as physical bodies, and bodies, the way we are trained don't reposition. It gives us more to think about.

To go through the Transmutation process we have to develop the Sense of Emotion, maybe that's like saying becoming enlightened. And as more and more of us transmute it will create an Inertia that will benefit everyone on the planet. The others will automatically reach this same level of understanding as we have, but without having to go through the same process we did. Like the Pioneers we will create the road for them to travel on. It will be easier for them. The whole Universe will go through the same changes that are occurring on Earth. Those born in the new cycle will not have to go through what the Man has gone through over the past billions of years trying to develop his intellect to be able to understand the Knowledge of Creation. The new Beings born will have the Sense of Emotion right from the point of inception and they will have a mature environment to grow in. This is exactly the opposite of what Man has now. They will still grow and develop and the level they attain will be up to them and how they achieve it. They won't have to start at the 'rock bottom' or the hell life we are living now, by not knowing our Soul. This then is the dawning of the New Age as was promised in all the scriptures. After all, these are the same ones who wrote those scriptures to begin with. We are so fortunate to be part of this turning point in the Universe, even though it is a difficult time. Soon the day will come and we'll be happy to be a part of it.

If humans have existed on this planet for millions of years, but our recorded history only goes back 5,000 years then there is a huge gap of time that is not accounted for. Different cultures speak of the different ages and cycles of existence, but for the most part we don't know how to make use of this information, or what to do with it. When a KS asked about the Aboriginal people of Australia and how they use the spiral in their culture and people could do things similar to transmutation, Mr. Keshe replied, that we are not the only ones with the knowledge. But the difference is that we are making it into a technology that everybody can use. This is what makes all the difference and the ability to change the planet. Then he gave a teaching on the spiral and how it symbolizes the way Creation is created and is a symbol for the plasma. He expanded the knowledge beyond the single line spiral by adding another line in between the existing line. This splits the spiral into two sides and at every point the plasma has to maintain the balance between both sides like the Yin and Yang. I understood that every point along the spiral is a specific field strength of the plasma that we can use for something. So if we reach a certain point on the spiral then we can use the fields to manifest a certain level of physicality. For example, Earth at the moment has a particular field strength of physical manifestation and when we elevate we'll go deeper inside the spiral. If we learn the Knowledge of Creation and reach maturity then there is a shortcut instead of having to travel the full length of the spiral. All we have to do is to jump across the lines and go straight to the center. That way we can reach the center or the Creator faster. As a Universal Teacher Mr. Keshe has that knowledge. He said there is no restriction on what field strength we can access. Rather we limit ourselves with our own ability to understand. This is also why when Mr. Keshe teaches it is for the whole U as he is not limited by the strength of his fields. For example, in the past the number of people we could reach was the strength of our physical voice. Today we have access to the Internet and can reach the whole planet. Our strength of fields has increased, but we still haven't matured in our intelligence to be able to use it in the right way. This again shows how everything is related to the interaction of the fields.

A KS asked a question about giving unconditional love to an abuser, and then wondered why they continue to be abusive. The reason it is a tough question to answer, is because everybody is at a different level of understanding and maturity of Soul. When we are young and haven't felt the reality of life's conditions, then we can idealistically think that we just love everybody and they will love us back. It doesn't actually work that way, but it does in a way, but it is too difficult to explain here, and the individual has to work it out through their journey of self-realization. We are in a sea of field interactions and it depends on how we are conditioned to view the world and how others are, and how we interact together. These things are best learned if we have the proper guidance while growing up. So we'll leave it at that. Then Mr. Keshe said, it is very easy to understand, and he gave the advice of a wise man, who wrote, give as much love to people as they deserve, and anything more or anything less will create problems for them. And then he added, when love is one-sided it becomes a point of abuse. But if the love is equal, you can give the other a little bit more, then see if they give a little bit more in return, and then you can build up a loving relationship. This part of the answer is for a person at a different level of maturity than the first part. The final advice was to be wise in love and

understand there are different kinds of love. And that wisdom will come from wanting to understand ourselves in a deeper way and working at it.

In the past he talked about "Beautiful People" who have multiple Souls in one body. But we think of these as complete Souls and not just the influence of different fields. When Mr. Keshe was asked about this he answered by saying, we are created out of the fields of our parents, but there are other fields that become a part of us, and we become a part of them. He compared it to the air we breathe, and how it has been breathed by millions of other beings on this planet before us. So in a way, we are an amalgamation of countless fields, and we share everything with everybody else on this planet. In this way we are already One Nation, but we don't really comprehend what that means. We learned recently that every plasma is made up of fields with the same strength from another part of the U and we always remain connected to them and are also fed by them. The more we learn about the truth of our creation, then the less important the personal individual seems to be. We are actually an integral part of the entire planet, which is part of the solar system, and all the way back to the Creator. And one day this Knowledge of Creation will be the center of our life.

In this same note, the Children of Mitra are created by the Soul and come from the totality of the Creation of the U. In that way, they contain all the beauties of Creation, they don't cheat or do any bad things and they are natural givers. When they walk around and people see them, they just fall in love with them. Whereas Children of the Man are created from the emotion of the Man, and the Children of Mitra are created from the emotion of the U, which is pure love for Itself, which is all of Creation. When I heard this it reminded me of the story of Ram and Laksman of India. When they walked around the city all the people felt the beauty of their Soul and feel in love with them. So the knowledge is already on the Earth, but now through KF we are making it into a technology that everybody can become their true Self.

The other thing Mr. Keshe said, is that the Change is here and now. We are in it, whether we like it or not. But the faster we mature the more we can take advantage of it. Learning to feel the Sense of Emotion is part of the next step we have to enter into. This got started in the last Friday session when the Knowledge Seekers did not put the headphones on the ear. They have started to learn how to rely on their Soul for orientation into their environment and not the physical senses of the Man. This will open the door faster for the Transmutation.

Other Topics:

The 3 new products released by KF are called a Twinity System. They are not Gans's but are part of the new developments of the T. And these are the final batches of the Cosmic Rays material.

The Soul does not suffer and pain does not exist at that level. It is only in the D of P;

KF will make a move that KS would never expect us to make. The Man needs a little kick to get him going.

Thanks for listening.
