

552nd Knowledge Seekers Workshop August 22, 2024

(Quick Index 18 pp, Introduction, Topic Index, Proofing done ; Need to do; Key Phrases, Words) (Auto transcription from Elias)

No religion in Space; Can't convert others to own religion; earth forced conversions; Beings in U already believe in Creator - more advanced than humans; Emotion of Belief - creates religion - nationalism racism - have to wash out all before transmutation; All have Soul - not exclusive to Man; Goal of religion - know Creator - don't need religions; Convert animals before slaughter; Each individual has to understand; Prejudices blocking Transmutation; Manifest spaceship in Iran - pure Soul; Why can't transmute prejudices; Have to clean emotions; 2 new KF Products Flagpole & Pole; Teaching on Menopause & Parkinson's - related; Psychosomatic illnesses; Change psychosocial structure of humans; Create body through emotions; Have children age 90; Emotions dictate salinity; Belgium license - court; Most diseases caused by emotions & psychology; Offer help to NASA; Perfect Soul & P for Space; What went wrong on Earth - fix; Enlightenment; Revolutions by CIA; Ukrainian president selling weapons; Gaza war about oil; responsible for own survival in Space; Use emotions of STM; Earth too harsh; Test for Alzheimer's; KS share experiences with transmutation; Cosmic Ray Bundles & KF Glasses - expand Soul through eyes; Fibromyalgia - repair through transmutation; Graphs German group most disciplined; Trust yourself

Topic Index

Earth is only bunch of M fields - Soul free from P; Can't convert other Beings in U to your religion - they already believe in Creator - know more; Religions convert animal before killing; Forced conversions on Earth; Need to respect others belief; Belief creates very strong emotion - connected to P - creates prejudices; greatest weakness for man in transmutation; Have to become aware of; Emotion of belief used to create religions - nationalism - separate man from each other; We all breath same air; Biggest problem for man last 10,000 years - belief systems he created; Each race created own Gods, Prophets - separated in religions; Beings on other planets have own Soul connection to Creator; Soul not exclusivity to man on Earth; Gift of Totality of Creation; Lack knowledge to understand; They all have emotion and understanding of Creator - not exclusive to mankind; Cannot convert others in Space to own religion; Maybe they already reached Knowledge of Creator - what you only dream of; In transmutation Soul should reach purity - understand Totality - get washed of dogmas of religions; All Beings of U have Emotion of Belief about Creator - otherwise wouldn't exist; Transmutation - only believe in Creator without any religion; Goal of religions - to know Creator; When mature - meet all creatures of Creator - not convert; They elevate your Soul to see Creator; Do animals have Prophets; Solitude of cage - forest - underground - ocean matured them to understand Creation; Same way man meditates in forest; We are behind animals; Have to solve this dilemma before transmutation; Need clarity about Emotion of Belief; Not about changing religions; Have to understand essence individually; Comprehend own prejudices - due to Emotion of Belief; Lack of understanding Creation; Problem for man - believes he is only one who is right - his religion is only one - his country is best - on and

on; In Space - this idea - downfall of humanity; Our nuclear warheads compared to knowledge - is like matchstick against submachine gun - still think we are most powerful nation; This emotion - wash from thinking of man before goes to Space; Emotion of Soul and P connected and within - I made man in the image of Myself - I carry emotion you carry; Work of transmutation - to understand STP - so don't convert emotion of being the best; Emotions have to be sorted before transmute; Independent investigation of the truth about yourself - belief's - not be prejudiced; Accept you are part of Totality; You are not the center of everything - accommodate bigger structure; Not be able to transmute until handle prejudices; If caused death of another not be able to enter Spaceship in Iran; You have excluded yourself through your conduct; System has Soul and emotions - not a manmade machine; Universal system with Universal Laws - every citizen of U can live within - find sanctuary; Has no religion - purity of understanding of Soul of Creator (STC); No religions in Space; Universal belief - oneness of Creator; Vastness and beauty of Space - humbles you - accept Creator; Made up Superpower - more guns and nuclear bombs - really only superior in stupidity and ignorance; No race in U carries these kind of ideas; If you are not able to transmute - look where you are entangled - prejudices - walls you have built around yourself - look at emotions which create nationalism, religions, etc; This is why you cannot transmute - cannot have emotions and ideas that separate you from others in Space; Your Soul is aware of your weakness - saves you from demise - Thy shall not commit suicide; Soul won't let you go; In structure of STP you're still racist - feelings of being superior - religion, skin color, nation, etc; Spaceship in Iran have a Soul - created same way as you; Created itself out of its own Soul structure - fields of U; It's Soul is pure - cannot harm; In Monthly Flight sessions - KS look at what "baggage" you are carrying - solve it; Emotional prejudices - can't fly; Understand yourself - don't blame others; Consider yourself as part of U; Be mature enough to leave shackles of this planet; Cannot transmute - emotions hold you back - prejudices - thinking you are center of everything; You put up barrier - feel as part of Existence; Shocked by flight system in Iran; All can go in - can accommodate whole nation; How many will be pure enough to get inside; Punished for not taking care your prejudices - like in school sit in corner; Not allowed to go outside in Space and play with everybody else; My dearest human beings - close your eyes and look through your Soul - see the whole U is next to you; Try to understand purity of emotion of belonging; I have given you the most beautiful vehicle - key to drive - clean up your prejudices and emotions created by them; Car will drive on its own; When leave planet as STM - fall in love with Creator and his Creation; Don't become arrogant with emotions and prejudices - of being better than others; Be glad to be part of whole structure; This is why I cannot transmute many of you - have to wash off prejudices of religions, etc; Understand and take steps to be ready; Only you can fix yourself; You are Prophet unto yourself; Day of Judgment - everyday - no heaven or hell; Hell is being kept away from the other children of Creator; You are locked up on this planet - others playing - not at that field strength to see; Confirmed this in last week's Flight session - saw prejudices holding you back; Biggest punishment for man - emotion of religion and racism - he punishes himself; If carry to another planet - your doomsday - I cannot send you outside - you'll kill yourself; You deny to yourself that you're not prejudice - but we see it on graphs; Have to understand to overcome it; Gained a lot of knowledge in last week's session about behavior of STM; Put you in small groups - easier to monitor; One group almost got to full transmutation; I have brought you everything -

you have to understand how to use it; Emotions of hate, (me and mine), racism, nationalism, and the emotions of religion, all have to be understood, handled and not denied; Otherwise can't get into the Craft.

Part 2

Flight session Saturday for 7 people; 2 new products 'Flagpole' and 'Poles' - for future development; Cycle of life problems; Long teaching n menopause and Parkinson's; Twin Systems will change psychosocial structure; Physical accidents - prostate cancer, enlargement of prostate, Parkinson, Alzheimer's, cancer of breasts, ovaries, and womb; Cause is emotions - sort out; Lead to adultery - mistresses, prostitution, other social problems related to sexual rejection, and depression; Give more power into your hands as individuals - control own lives; These products are not medicine; Create an environmental condition - change ourselves; Change psychosocial structure of humans; About psychosomatic illnesses - create through our emotions - without knowing it - MS, ALS, Alzheimer's, Depression; Emotions and thoughts cause body to shut down and die; Products do not change RNA or DNA - or anything in evolution; We create our own body through emotions - M fields interactions - don't wait for evolution; Can't go into Space as cripples - power within us - change physical structure; Emotional problems have to resolve internally - before transmute - otherwise carry problem into space - die of prostate cancer; Menopause is related to Parkinson's in husband - occur together; Menopause in women - evolution thousands years ago - no children age 30; women through emotion stopped menstruation for survival; Emotions and hormones part of Inertia structure of body - in conjunction with salinity - changes body; Change social structure of yourself; Society accepted men will have no libido at age 50 - not true; 80 year old men - sexual strength of teenager; Use Knowledge to change RNA; Go to Space for thousands of years - need correct knowledge; Today have Social Security - nation supports child - women secure - have children age 90; Live in Soul - repair body - live thousands of years; Emotions dictate salinity of body - how cancers start - prostate & breast; New T bring back into balance; Get addicted to sex - emotional interaction - rewarded like circus horse; KF is Space organization - understand everything to live in Space; Take STM and P in perfect condition; Bring T directly into hands of people - not suffer; Epileptic attacks; Licensed through Naturopathica - Alternative Medicine Authorities in Belgium; Falsely charged in Belgium Courts; Most diseases caused by emotions and psychology - we can repair; Transition time to stop killing; KF Apps feed and everything - social structure for humanity; Wrote to NASA - KF T can help astronauts stuck in space; We're spreading too much knowledge around the world; KS have always supported us; Larger scale collaboration; Have to perfect both Soul and P for Space; Has to be room to expand into - otherwise infinity of nothing; Why planet kills - what went wrong; Even if son brought up perfect - other conditions can't control - no one to blame for Earth's problems; Sun is perfect - Earth went through certain conditions - created the problems it has now; No killing on other planets in our solar system - different life forms; Life not temperature and pressure dependent - not exclusive to this planet; We became mischievous children due to structure in center of this planet; They're here now to correct; Not caused by U Community - structure in center of planet; Solve in rest of U also; Teach through essence of emotion to whole U; We are Universal

Teachers; The more of you who transmute - more will understand; Souls in Space increase exponentially every second; Not everybody will transmute together - only if they want to; How beautiful it is on the other side; Enlightenment can happen any second - no time and place - whole population could do it; How revolutions happen; 85% of revolutions since 1970's have been initiated by CIA; President of Ukraine one of richest men - selling American weapons to other countries - keeps war going; Venezuela richest oil nation - slave to other nations; Biggest oil field in Middle East in Palestine - reason for war in Gaza; When traveling with Soul - don't have P sensations; Leave solar system - M fields different - can't manifest same body; Transmute and manifest body from local environment; You're responsible to understand Knowledge for survival - keep your fields together; Spacesuit won't help - fields cross it; Scientists believe plasma needs high temperature; Belgium tested saw Fluorine and crystal structure - because Iranian said he was using nuclear materials - he's a terrorist; Because he wouldn't give T; I paid heavily for man's stupidity - but man will pay more heavily for his own guilt; Stupidity of scientists brought man to be more attached to planet; Immediately know how to use emotion of STM - don't need to learn it; P will follow where Soul leads; 2 new KF products will touch your life without your knowing - change you; New social psychosomatic structures - enjoy life beyond imagination; Feel pleasures of life; Bring peace - whole point for T; Too much work to come back to Earth - planet is too harsh; Different reasons for couples not wanting children - can't make general statement - depends on country; Products are set for individual use - but partner in the fields - will effect; Will see amazing things with these Twin Systems; Further talk about Alzheimer's and psychosomatic illnesses; Test whether T good for Alzheimer's - sing song from wedding; Tells some personal stories of working with people with Alzheimer's in Belgium; If doesn't work keep searching for correct field strength - T is correct; KS tries transmutation on own - pushing P too hard; KS tells experience in Friday session; Learn how to use your intention and emotion; KS expands her Soul - travel to different places; Secret to transmutation is giving, not taking; Thy shall not steal - dealing with plasma; We expand Soul through headphones; Draws skull Ca too strong for Soul to pass through; Soul expands through eye sockets or ears; Why Soul cannot expand during waking state; Secret in body; Cosmic Ray Bundle headphones & KF Glasses open channel for your Soul to expand (eyes and ears holes); Have to see where you are going when traveling span of U - create a line of access; But don't get lost on the way; With 2 new products - Twin Gans's - food intake should change & behavior; Fibromyalgia - self-inflicting psychosomatic condition - abuse from childhood memorized in different points on body - takes energy from body - handle pain- tired all the time; Fibromyalgia can be repaired through transmutation - expand Soul over whole body - energy balance comes back; No bribes; Transmutation is emotion of wish - wanting to give - not to take; Takers are thieves go nowhere; Discusses graphs of last Friday session; Large number in Group 4 went through a full transmutation; Can't stay more than 2 minutes; Best is German group - disciplined - using Cosmic Ray Bundles & KF Glasses had most amazing results - create different kinds of field; Could see Soul expanding out through eye sockets; Have to trust yourself - take next step.

Introduction to 552 KSW - Emotion of Belief - From Menopause to Parkinson's - Sex - We Weren't Sabotaged

The first half of today's teaching was about the "Emotion of Belief," which to some of us might sound a little strange. But if we stop and think about it, it's not. Perhaps it's where we combine the thoughts of the mind with the feelings of the heart, and when these two get mixed up with each other in the wrong way, we have many problems. Mr. Keshe said that this has been the biggest cause of man's problems especially during the past 10,000 years. That about covers our entire history according to what scholars believe and teach in school. And they confirm it with the archeological finds that they allow to be made public. This was the time when the Ice Age was receding and man moved from being mainly "Hunters and Gatherers" and started agriculture and settled in villages and eventually cities. I am trying to understand this in terms of human development. In the time of being Hunters and Gatherers man formed tribes to live together for survival and safety reasons. We don't have evidence that humans at that time were very intellectual as we are today. As the groups stayed together long enough they needed a structure to bring social stability and control, and out of this need came the sharing of common beliefs. As villages and cities developed, then beliefs became more important and as the Knowledge of Creation was not known by the man, the belief structure was used to gather people together in groups, but in actuality, it ended up separating people more from each other. Then came the religions and the wars, and the city-states, states, and finally different nations. In a way, our evolution has been one of creating divisions throughout all of these thousands of years. The main cause of this development is because we didn't have an understanding of how life is created, what is its purpose, and how the Universe (U) works. Therefore, humans compensated by creating ideas to believe in, and they put their emotions behind them. There have been people and leaders throughout history who have tried to bring forth a unifying belief for mankind, but man and his rulers have never accepted it. And now through the work of Mr. Keshe and the KF Teachings, and the introduction of new technology (T) humanity is about to enter into a phase of learning to think of himself as part of the total structure of the Earth and eventually the Creation.

If we can look objectively at the current situation with humanity and ask ourselves what is the root of the problem. First of all we don't have enough knowledge to understand Creation. And secondly understanding knowledge is relative to our ability and desire to understand. So what is true for you is not necessarily true for me. Therefore fundamentally the structure is set to have a hierarchy of levels of understanding. And this is where the point of abuse comes in, because whoever controls the knowledge, controls the people. If we look really deeply we see that the ones who got into control understood not to allow the whole truth to be told. We see this so clearly throughout all of the nation's today. But it is not just a matter of learning words and saying, "I understand." It doesn't work that way. There is a developmental process man has to go through where he integrates the knowledge with practical experience of life and there is an emotion behind it. In today's world if you want to find out the truth about life, you have to find it out yourself by separating from the herd and going inwards. So in one way, Earth is a perfect training ground for Souls that want to reach higher levels. However, the problems we have are the killing and enslaving of others. So what we just described is the current situation with the physicality (P) and the Soul of Physicality (STP) of the Man.

In a way, we could say that the Emotion of Belief was created in these conditions and became something negative, in that it solidified the ideas of being separate and superior and with the emotions acting as a glue. And we have ended up with the STM trapped inside the brain and encaged within a STP that is fixated on certain ideas. If there can be such a thing, it could be considered a negative form of love. To the STP it feels it is receiving love from maintaining belief in its ideas. No matter how much you reason and try to enlighten people with fixed ideas, you cannot reach them. They are totally locked into their concept. An extreme example of this were the "Hitler Youth." Young boys were trained and indoctrinated with the ideas of Hitler and they would die before they would give up their belief. This is an extreme example of the abuse of the Emotion of Belief, and sometimes it feels like the whole planet has this extreme belief about the matter state and that it is the only reality.

All of us have different Emotions of Belief because that's how we are trained to relate to the world around us, through ideas. The problem is that we tend to get stuck on the ideas and refuse to grow and expand. This is what he calls, being prejudiced. We tend to think of prejudiced as only feeling superior about ones race. It's much farther reaching than that. It includes any ideas that make us feel better than others and the biggest one is religion, and the ideas include ones family or tribe, nation, versions of science, and whatever kind of ideas humans can come up with to think of themselves as being better than the others. And these kind of ideas have feelings attached to them and we are usually not aware of them, or the damage they cause to a balanced life experience.

We have reached the point where these Emotions of Belief are blocking further development of the transmutation. If these issues are left unresolved in the STP, then when we re-manifest ourselves in the new environment they will resurface. This is one of the reasons Knowledge Seekers (KS) are not able to transmute, because they are carrying this "baggage." It's up to us to go within ourselves and find out what prejudices we have, and especially the ones we vehemently deny having. One of the ways of doing this is through "Independent Investigation of the Truth," about ourselves, our beliefs, and what we understand about life. We have to understand how we were conditioned to think and respond to life. Some of these prejudices can be buried very deep within us without us knowing. But when we go in the system it will show up on the graph. The Soul knows what the P hides. All this comes out of the fact that we were purposely trained to be ignorant of the Knowledge of Creation. In the future our children will be trained right from the start about what life is, and how Creation works. We'll celebrate our differences in how we chose to manifest our P, and not use that as a way to feel superior and better than others. The beauty of Creation is in its diversity and the ability to share love with all forms of life, even ones that don't move like us. This will prepare us for living in Space.

The reason the U is a peaceful place is because it will not accept thoughts at the field strength of being superior, racism, hatred, egoism, I am the center of everything and I want to have my own way. These thoughts and feelings are kept out. If they develop somewhere then those beings are treated like a virus and isolated from the whole. This is why the Earth is quarantined from the rest of the Universal Community (UC).

This also explains why there are no religions in Space. A belief in something comes about when we don't understand or don't have the knowledge of it. Then we just believe in an idea about it and it becomes a mysticism. This is why last week Mr. Keshe told many stories about Islam and how they had to force people to convert to their religion through the sword. And in the 'old days' in Iran the only education you needed was to learn the Koran. His relatives were sent to Mullahs who only memorized the words and didn't know the meaning. But the goal of the religion should be that the individual comes to know and love the Creator, whom he is a part of. If we know the Creator and the Knowledge of Creation, then we don't need religions, because we have already achieved its goal. This kind of knowledge brings unity among all beings and we call it, Universal Knowledge. When we attain this knowledge we become part of the UC because we can live in peace and enjoy each others presence. Compare this with Earth made religions, which divide people and create wars and destruction. All of these concepts and wrong understandings have to be washed out of the human's RNA before he will be allowed to transmute and become part of the UC.

In the same way, the spaceship that will be created out of the fields of the U in Iran will be a pure Soul from the Universal Fields. To enter that spaceship will be the same as when we enter into the Universe. Those who can enter this spaceship will have accepted the elevation of their Soul. He said, even the whole nation of Iran could fit into that one spaceship if they are pure enough in their intention and Soul. He has given us the most beautiful vehicle but the key to drive it is to clear away all the prejudices we have and the emotions they created. Then we'll fall in love with the beauty of the Creator and Creation.

In the first hour of the second part of the teaching Mr. Keshe gave a lot of information about the 2 new products released from the KF but you will need to decipher it. I will try to summarize it as best I can. The names of the products are as follows. For menopause and the female it's called "Twinity Pause Gans," and the male counter part is "Twinity Flagpole Gans." These are not medicine but they change the environment, allowing for the body to change in reaction to the environmental change. Modern science says that menopause ranges from ages 45 to 55, but then some women were starting at 35 so they gave that the name "pre-menopause." This is when menstruation stops and women can no longer bear a child, and we know it as having moods swings, hormone changes, and hot flashes, but that is about the extent of the knowledge. And during this period women don't want to have sex and this effects the male and leads to other kinds of psychological and behavioral changes. Since science is very limited in understanding about emotions and life, they ignore this part. Mr. Keshe is calling the broad range of psychological, emotional, and behavioral changes, the psychosocial structure. He has observed that during this period of menopause humans go through a huge amount of suffering because they don't understand how Creation works and have become victims to natural processes of the interaction of the M fields. In this teaching he is giving us the background of the problem and what we can do to change. This will need to be handled before we go into Space, otherwise we'll be sending cripples out into the U.

It's important to know that it is not the fault of the women that they go into menopause, and we can't blame the man for not being able to handle suddenly being cut off from his

vitality. And ignorance and denial of the process makes it a thousand times worse. Having the menopause at this age started thousands of years ago when the living conditions were completely different. When humans were hunters and gatherers there was no stability for raising children. If the father went off hunting and didn't come back, what was the mother to do? At that time the woman through her emotion stopped the menstrual cycle at around age 35 for survival reasons. This got written into the RNA or what we call genetics and it has been fixed there for all these thousands of years. We didn't know or we ignored the fact that we have the power to change our RNA through our emotions.

When the wife goes into menopause what is the man going to do? This is where the social part comes in. If the man cannot express his sexuality at home then he might become adulterous, have mistresses, turn to prostitution, and other social problems related to his feelings of sexual rejection at home. This is where the Parkinson's come in. For the men who still love their wife and want to remain faithful to the marriage and the family, they might turn to masturbation. It's going to be hard for people to understand how you get from masturbation to Parkinson's. I realize that it is too difficult to explain this. You might be able to understand it a little through the knowledge of Traditional Chinese Medicine (TCM). They teach that the Yin is female energy, water, and other things, and the Yang is the male energy, fire and other things. These 2 Principles interact and create what we call life. When a man and woman have sex and if there is love, then these two energies interact and create a blissful experience as the Qi flows through both bodies and brings a balance between the two. The semen is the essence of the body, or what they call, "Jing." In the female, Jing is creating new life in her womb. When the male gives his semen he loses his Jing, but the female keeps her Jing within her own body. Even if the male loses his Jing, and if there is love between the two, he will receive energy back from the female. Now just imagine what happens if the female is not there? The Yin becomes deficient. In TCM diseases like Parkinson's are categorized as Yin Deficiency. The myelin sheath, which is Yin, around the nerves has deteriorated and cannot hold the nerve impulses and you get the shaking. Through Plasma Science it can be explained through emotions, and how the M fields interact to manifest P.

In Mr. Keshe's research he discovered that 7 to 10 years after the wife goes into menopause, the husband starts developing Parkinson's. When he said, look at what shakes in a man with Parkinson's, the image of Mohammad Ali came immediately to my mind. Try to find a video of him in a wheelchair when he had Parkinson's and observe what is shaking and you will put the two together. I love Mohammad Ali and the other changes he fought for in society, and not what he did in the ring. Now we humans are having the opportunity to change our suffering into a balanced, happy, and peaceful life, and we need to do this before we join our Universal Family. We don't want them to suffer the horrendous conditions we are suffering on this planet by infecting them with the M fields of the emotions we haven't dealt with.

A KS was strongly implying to Mr. Keshe that the UC purposely and mischievously put a grain of dust into the formation of the Sun and that it has caused us all the problems on Earth. Mr. Keshe did not deny or confirm this speculation. Instead he educated us that the

Sun is perfect and that the problems arose because the Earth went through certain conditions that lead to our situation and that the cause is due to the internal structure in the center of the planet. The proof for this is that we don't see this killing situation on Mars, Jupiter and the other planets. We don't recognize that kind of life, but he does, and he said they all have life within them. The problem occurred here on the planet during its formation. But last week he implied that we inherited these characteristics of killing from the plasma that created our Sun and it was passed on through the RNA and emotions. Maybe it was a combination of dormant characteristics and the conditions created during the formation of the planet. Whatever the cause it doesn't matter, because now they are here to help us resolve our condition and become peaceful. When they flip the "electron" of what causes us to kill, then if there are other planets in the U with the same characteristics, they will flip also and the whole U will be healed, because we are all connected by a common denominator field strength.

He has discussed Fibromyalgia before, but this time he said the abuse gets memorized in points in the body and they take away so many calories from the normal bodily function and that's why the people are tired all the time. They can never catch up with the energy drain from all these old emotions that were never resolved. If we can learn to expand the STM over the physicality then all these points can be elevated together and there will be an increase in the persons overall energy.

He explained more about how the STM is trapped inside the skull. The M field strength of the Ca and the thickness of the bone keeps the Soul from going out, and the blood flow in the eyes and ears keeps the Soul from going out those orifices in the daytime. This is where the Cosmic Ray Bundles and the KF Glasses come in. They allow the STM to pass through the eyes and ears. And he showed proof of this with the German group from the last Friday Flight session. Most of the group was using those devices and they all had amazing experiences. If you are serious about transmuting those systems would be a must to have.

Other Topics:

All Beings of the U have the 'Emotion of Belief' about the Creator, otherwise they wouldn't exist;

If you all knew how beautiful it is on the other side you would commit suicide now.

Thanks for listening.

Quick Index

(We are back here again in this little box we call planet Earth and we are all under one roof. This roof exists for us as long we live, are attached it, or we walk on its surface. Once we finish attachment to this embodiment of what is only a bunch of magnetic (M) fields we call Earth, then we'll have a new dimension (D) in our Soul, which is free from our physicality (P). Then we can manifest ourselves in one point or another as a pack of

energy (somewhere in the Universe (U)). But as we carry some physical D Inertia of the mixture of the Soul of the Man (STM), maybe as we are passing through the clouds we hit some matter state and our Soul interacts with those fields and we end manifesting ourselves in that cloud and have to stop there (for awhile)).

(An interesting dilemma that could only happen to mankind, is what if he by mistake entered an environment at a certain position in the U, where he ended up in the gravitational (G) field of a planet where some of its citizens as energy packs happened to be. What would be the reaction of the man? If by accident you transmuted and due to the Inertia of the field strength of your Soul, you ended up somewhere you didn't want to be, but your energy got transferred, and now you are a being at that place. Let's say there are 6 of you who happened to be together and you landed in that place).

(In Man's world you created a word for God, Creator, or whatever. But on that planet what belief would those people have? What do they believe in? (Unfortunately, man doesn't yet believe in the unity of the Creation and Creator, and instead he has made all of these divisions for himself of race, religion, and whatever. And the amazing thing is how we have (forced) others on this planet to change to, and believe what we believe in. We don't respect what they believe in themselves). Belief creates an emotion, and the emotion of a belief is very strong, because it is connected with the P and (creates) prejudices. If we understand this, then when we transmute, this will be one of the greatest weaknesses of the man in the D of the physicality. (We have to become aware of this and how it will effect what we are doing, and what is about to happen to us)).

(The emotion of belief has been used to create religions, nationalism, and has produced all sorts of things to separate the man from each other. For example, if we are Russian and from Moscow, then we create a surname for the people from this area. Then we say we are doctors that work in a hospital, and we keep dividing ourselves more and more into separate distinctions. We forget about belonging to the whole of (humanity). Because if you are Russian in Russia you don't need to say that you are Russian and make all these other distinctions to identify yourself. The human race has not yet learned how to consider itself to be part of the Totality of the human race, and that we belong to the totality of the planet Earth. We all breath the same air at the same time. And everyday at 1,600 km/hr we come back to the same point, because as the Earth rotates at that speed, the Americans breath the air for awhile and then it's my turn to breath it. We both breathe in and out the same air and give and take something for it, and the rest of it).

(The biggest cause of man's problems, especially in past 10,000 years, has been the development of his belief (systems). This has created a lot of problem in a different ways. What does this mean? The biggest cause of conflict is that each race and division of humanity has made up their own Gods, Prophets and the rest of it. We have separated ourselves as Jews, Christians, Muslims, and then further to Suni's and Shia Moslems. And the Christians have become Catholics and Protestants. And we have all the different sects of Judaism. Then there are the peoples of Tibet, South America, and Africa and they all have their own Gods and Prophets).

(Now back to the planet where 6 of you transmuted into by mistake. Let's say you do not know about each other's religion, or path's of belief, but all of you are hungry. And let's say, (we bring a citizen of the planet into the room you are in, that looks like a chicken. It's the only resource of energy you will have for your physical body to relieve its hunger. You all reach the point that you feel you have to eat the chicken. In the D of P, as a man, you will have a dilemma in space. Does this chicken have a religion, or does it believe in the Creator? The beings of this planet have a Soul connection to the Creator. A Soul is not the exclusivity of the man on Earth. It's a gift to the Totality of Creation across the U. So this chicken has no religion, but it has a Soul, and a belief, but we lack the knowledge and understanding of it. We think only we have these things. The chicken feels the pain, and has fear the same way we do. It walks and moves around the same way we do. It has emotion and understanding of the Creator. These things are not exclusive of mankind).

(The 6 men from Earth with different beliefs take 6 of the chickens and slaughter them the way they do on Earth. This is not known in the West, but the Moslems and the Jews first convert the chicken to their own religion through their prayers and chants and then they feel they have the right to kill and eat it. The reason they do this is because they are taking the Soul of the Chicken to become a part of them. So for them that Soul has to be converted to their belief system. It's because they don't respect that the chicken has its own understanding about the Creator in its own way. They have a God like we do. They believe in a Creator who created them. But since you are physically stronger (and have weapons to kill), you convert them to your belief system. Isn't this exactly what the Muslims did when they went across Iran (and half of Asia)? They gave the people the option to confess their God or have their head cut off. There is no difference between an Iranian man and that chicken in Space. If the chicken won't confess then he's beheaded. This is how they add another Muslim to their world).

(So the Muslim and the Jew converted the chicken so they could kill and eat it. But for the Christian it didn't matter because they don't think about those things. For them, everything in the world belongs to them. They don't worry about adding the Soul to theirs. Humans through their physical strength and their emotion made the animals to join their religions. Then they felt it was okay to consume their energy).

(When humans go to Space are they going to start converting other races to their own religions? What path of belief are you are going to preach to them? Is there any sanity in believing that we are the only ones who believe in what created us. Maybe some of the creatures on that planet have already reached the Knowledge of the Creator, and they know what you only dream to know. Would you try to convert the citizens of another planet to your path of belief? Or, has your Soul, in reaching the D of purity in the transmutation, has come to understand the Totality of (The Knowledge), and it has washed the dogmas of religions out of you. (?? All the Beings of the U have the Emotion of Belief about (the Creator, otherwise they wouldn't exist.))

(When Man starts transmutation would he lose his (separate) belief and only believe in the Creator Himself, without any religion? (The main goal of the religions was to reach this point of knowing the Creator. So when man knows Him does he need the religions,

which are a lower level). The belief in religions are the cause of wars, division, and killing on this planet. When you mature to understand, then when you meet all the creatures of the Creator, you won't need to be thinking about converting them to your religion).

(What if they tell you to your face, that they elevated your Soul to see the Creator. Would you still believe in all these fairytales the man has made up? Do animals go to Churches or do they have Prophets? Or, due to their solitude of staying in a cage all the time, or in the woods, underground, in the ocean, or wherever, that solitude has matured them to understand (about Creation). In the same way when the man goes into solitude to (pray and meditate to mature). (?? All the creatures can understand the process of Creation and everything else)).

(Do the animals have a Prophet? Or through the process of life, they come to understand (the Knowledge)? It's us who are behind them and we have to catch up. You will have to solve this dilemma before (doing the) transmutation. You need clarity in the D of the Emotion of Belief. (We are not talking about people going from one religion to another like Muhammad Ali and the others. Today I am a Christian and tomorrow I become a Moslem and everything else). (We need to understand the essence of this individually and by ourselves. We have to comprehend the prejudices we have created due to the Emotion of (Belief). Because it's due to a lack of understanding the process of Creation)).

(The biggest problem for man are the other things he has been fed under the banner of religion, like making war, and believing that he is the only one who is right. He thinks his religion is the only right one, or his country is the best one, and on and on. When you go to Space will you think your planet is the only one, and the rest of it. This will be the downfall of humanity in Space when we transmute in the physical D. If we compare our nuclear warheads to the knowledge of those who travel the span of the U, it's like a matchstick thrown at someone with a submachine gun. And yet we still think we are the most powerful nation. We are the most powerful whatever. And this emotion has to be washed away from the essence of the thinking and living of the man before he departs to Space. Because remember, the emotion of the Soul, and emotion of the P are connected and within. I made man in the image of Myself. So, it's "Me," the Soul who created you. I carry the emotion you carry).

(This is part of the work of the transmutation. You have to understand this in the D of the Soul of Physicality (STP), so that when you transmute and convert the physical part, it does not carry the emotion of thinking you are the best, you are unique and you eat whatever you like, or that you can destroy whatever you like. This is part of the work of the emotion. And in the world of the man this emotion has a different D and different strength. All of these things have to be sorted out and understood by the man before he takes the step to transmute. It's called independent investigation of the truth about yourself, and about what you believe and understand, and not to be prejudiced. (You have to accept that you are part of the Totality). And when you manifest yourself in the STP in another D that you will believe in the Totality, and not believe in exclusivity. (You have

to understand that you are not the center of everything, but are part of the structure and you accommodate the bigger structure)).

(Then when you transmute to another place you won't be trying to convert the people to your religion. You might think this dilemma is irrelevant for you today, but you will not be able to transmute until you handle your own prejudices about yourself, your partner, the citizens of the place where you live, the animals, nations and about the planet).

(As I said, no president, no world leader who has caused the death of others will be able to enter into the flight system you will see in Iran. The system has not excluded you, rather you have excluded yourself through your conduct. The system has a Soul and emotions. Those emotions are not that, it's a manmade machine going to Space. We have created a universal system with Universal Laws and every citizen of the U can live within it, and find sanctuary in it. It has no religion and you enter it with the purity of the understanding of the Soul of the Creator (STC). There are no religions in Space. (Rather you could say, the belief of the U is in the Creator and our way of being is the oneness of the Creator)).

(There are no banks, churches, or other religions in Space. As one matures and understands then they become part of the work of the U. (They are not citizens of Earth anymore, they belong to the whole U. They belong to the vastness and beauty of it, and that will bring you to be humble. It brings you to accept the D of the beauty of the Creator. So, if these things don't exist in Space, then why are we fighting for them on this planet. In the present time we have found a new way to divide, we call it being a Superpower. But it's only power is to have more guns and nuclear bombs and they support those who give them what they want. Then we say they are the Superpowers. But really they are superior in stupidity and ignorance. No race in the Universe carries these kind of ideas)). (They have purposely projected these ideas into Sci-Fi movies about Space so that you will think everywhere else is just like Earth).

(Those of you who try but are not able to transmute, you have to find out in yourself where you are entangled. Look deeply into your prejudices and the wall you have built around yourself not to be able to see the other side. Look at the emotions which you create of nationalism, religion, and all the other things. This is the cause why you cannot transmute. Because you cannot have these emotions and ideas that separate in Space. In essence, your Soul is aware of your weakness and if you go to Space with these it will mean your demise. "Thy shall not commit suicide." Therefore, your Soul cannot take you into the dimension of the Universe when it's aware, that in the structure of the STP you're still racist. Or you have feelings of being superior in religion, or skin color, nation, or whatever else it might be (that separates you from others)).

(The reason this has to be sorted is because when we build a Craft, that Craft will have a Soul that is created through the same process as you. It's not made of matter state aluminum panels and there are no control panels. It will create itself out of its own Soul structure, out of the fields of the Universe that we have made available for it to use to manifest itself. It's Soul is pure and not tainted with the desire and emotion of the

physicality of the man. It cannot accept you. I cannot harm you. It cannot harm those who are in it and it is protecting).

(For Knowledge Seekers (KS) who participate in the Monthly Flight sessions on Fridays, if you can't get anywhere, then sit back and look, and ask yourself what have you not solved in yourself. What "baggage" are you carrying that is holding you back? The more emotional prejudices you carry, the heavier your baggage becomes for you to be able to get 'onboard.' It's like when you go to the airport and they say you're only allowed 20 kilos, and if you have 40 then you can't go. When you have excess emotions the fields of them will hold you back in the physical dimension. In the world of Transmutation it's the emotions that can hold you back).

(You have to understand this, otherwise, you'll start blaming everybody else why you can't go. You'll look for something wrong with the others or say the system doesn't work, but the truth is you have shackled yourself to the emotion of your beliefs. In the writings of Bahá'u'lláh it says, Earth is one planet, and mankind are its citizens. When you consider yourself as a citizen of this planet, instead of being an American, Jew, or all the rest of them, this is the time when you can open the doors of the U to mankind and yourself. The Earth is but one country and mankind are its citizens. When you understand the process of Creation, and you understand that it is you who is holding yourself back, then you can make the next step. Then you'll understand that you are not a Christian, Jew, Muslim, father, and the rest of it. Instead you are a Soul member of this planet. And in that dimension it means you provide and give to the others. It does not matter who takes, (you provide unconditionally). Then you will be mature enough to leave the shackles of this planet).

(This is why many of you cannot transmute. You go through the process step by step, but then the emotions hold you back. It's your emotions of your prejudices and the emotion of you thinking that you are the center of everything. You think you are the most important thing (in Creation). Whereas, if you would have learnt that you are part of the whole structure then you would have started to transmute. A few kilometers away from this 'Blue Planet' there are no banks, churches, religions for the ones who live outside the Earth. Why has man done this to create so much mayhem and keep himself shackled to this planet?)

(When ?? you're limited to the emotion of seeing (only) physicality, and where you do not feel the existence of the Creator, then our transmutation system cannot take you. It's you who has put the barrier up. It's for you to understand and allow your physical life and the Soul to coexist as one. Then they can truly live in both dimensions of traveling the depth of the U with Universal Energies, and living as mankind on this planet. This is what you will have to understand).

(You will be shocked when you see the flight system in Iran. We'll let all of you go in. One system can accommodate the whole of the Iranian nation. But I wonder how many will be able to get inside, because (it won't allow you in if you are still carrying your prejudices. You have to solve that problem first. In a way, you are punished for not

taking care of it). It's like in school when you do something wrong, the teacher sends you to the corner and makes you stay there until you understand your mistake. At this moment, mankind has cornered himself in the schoolhouse of the education of the Universe and this is your punishment. Actually, you are punishing yourself. You are not allowed to go outside in Space and play with everybody else. (And since you don't understand, then you turn your back on the truth and pretend that there is nothing else out there in Space. You think you are the only citizens of the Universe. So you started to build the most horrendous machinery to look for other life in the U. And because you don't know how to look and you don't see anything, then you say to yourself that you have confirmed there is no other life in the U)).

(My dearest human beings, close your eyes and look through your Soul, then you will see that the whole Universe is next to you. It's your own ignorance of understanding and your behavior. Try to understand the purity of the emotion of belonging, that is what has brought you to this point. You have decided through your prejudices and through your lack of understanding the process of Creation, to isolate yourself. Nevertheless, you keep looking for other life. I have given you the most beautiful vehicle, but the only thing you don't have to drive it, is the key. The 'key' is clearing up your (prejudices and the emotions created by them. You also have to clear everything that created those emotions). Then you'll find out that the car will drive on its own. It will take you anywhere you like. When you leave this planet in the D of the STM, then you'll be left to fall in love with the Creator and his Creation. (And you should not become arrogant with the emotions and prejudices of being better than the others. You shouldn't think, I'm a man and I know everything because I come from the Blue Planet. Rather think, I'm a man and I am glad to be part of the whole structure of Creation. Where is my place to fit in?))

(Now you understand why I cannot transmute many of you. Because you have to go into the shower and wash off the prejudices of religion to start with, which is the cause of most of your problem. Then wash the prejudices of color, race, and anything else).

(I hope you understand and take the steps to be ready for that time when it comes. You need to be ready to go, so that you don't fall down flat on your face, because you haven't understood what your problem is. Try to understand what we just spoke about and find a remedy to that condition, because the only one who knows (how to do it) is you. You are the Prophet unto yourself, you are the 'Day of Judgment,' and that day of judgment is everyday. (And there is no heaven or hell. Your hell is being kept away from the other children (of the Creator) to play and be part of. You are locked up on this planet, while the other citizens of the Universe are playing. And because you are not at that field strength to see, and because you have done wrong to yourself, you don't see it)).

(This is where we are right now and I (confirmed it in last week's Flight session). I looked in and I could see the dimension of the prejudices. The prejudice to be from Earth, to be physical, and having the fear of not letting go of the P. And with that comes the prejudices. The structure of it is clearly seen on the graphs. If you remember when I sat the KS in front of the system, then I knew he was there to kill me in the Cinzano. That

proved to be correct. Because I saw the field of the emotion on the oscilloscope. Emotion is a frequency, and it has a strength in the dimension of physicality and you can see it).

(In the graph of one of the groups the emotion appeared so strong that it was frightening. This will be the cause of problems in the future. We don't want this (emotion to go with you in the Space, because you'll be (isolated until you understand, and that could be thousands of years, 20 generations)). (Maybe you won't understand, but if your children or grandchildren understand, then the Space will be open to you. The Space, or the Universe is part of what you are. You are in the part of Universe. It's you who cannot open the door and go outside to play).

(The biggest punishment for man is, has been, and will be the emotion of religion and racism. (Because he punishes himself for having it, but denies it to himself). If you have it on another planet, it will be your doomsday. Therefore, I cannot send you outside when I know you are going to kill yourself. (?? We have these prejudices even in the same nation and same religion. We do it with the same psychology and physiology of the same strength, and the same understanding. This is what you have to understand)).

(We see this on our graphs when you go through the systems. We see the emotion of what I call belonging. This emotion of prejudice is so powerful that it overrides every other emotion. You can try to lie to yourself and say you are not prejudice, but we see (the bruises on you from being beaten up by it. Because you played with the wrong religion, and the wrong race. I know that feeling, I've been there. But it is you who has to understand it (to overcome it)).

(If you have managed to handle this, then when we put on another transmutation next month we will see the first departures. Last week's session brought us a lot of knowledge on the behavior of the STM. Now we have broken you down into small groups, so that we can monitor you more closely. Only one group out of all the groups almost got to the full transmutation. And only two people just about achieved transmutation. Now you understand. I have brought you everything, it's you who has to understand how to use it, so that it brings you the pleasure of being a part of it. Do not blame the others, because you haven't understood yourself. The emotions of hate, (me and mine), racism, nationalism, and the emotions of religion, all have to be understood, handled and not denied. Otherwise, you won't be able to get in the Craft).

(There is one problem, there won't be any refunds. You only have the fun, if you manage to clear out the emotions you have created for yourself. Now you understand where we are and how much, or how little you need to do).

End of Quick Index Part 1 - 552 KSW

(We will hold another session on Saturday with about 7 people. KF has launched two new products called, 'Flagpole' and 'Poles.' It's a trial and we released it for future development, and partially to sort out a very big problem in the cycle of the life of the man, which I touched on in last weeks Teaching about menopause and Parkinson's. There

will only be a limited number of this material available). These Twin Systems will change the psychosocial structure.

(Mr. Keshe calls these diseases physical accidents like prostate cancer, enlargement of the prostate, Parkinson, Alzheimer's, cancer of breasts, ovaries, and womb, and these accidents go on and on. The science of today has not understood and only looks at the physicality (P) part like the medicines used and not the emotions which in a majority of cases are the cause. They don't know how to repair this damage, but only focus on repairing the P).

(These physical accidents are bringing about other psychological and social changes that are not being related to these conditions or are being ignored. For example, they can lead to adultery in any shape or form, mistresses, prostitution, other social problems related to (sexual) rejection, and depression. But our psychologists and scientists have never understood the process and what effects it has on other parts of the individual. KF is introducing these new products to help change these conditions and to give more power into your hands as individuals to control your own lives).

(These products are not medicine, instead they create an environmental condition (that allows for us to change ourselves). The scientists have said that the causes of some of these diseases are due to the past history of our existence, and has become part of the genes, RNA and DNA. But in fact it's not. (?? It's created through the emotions and that has a direct effect on changing the P). With the expansion of the knowledge we can move and shift the changes made by our ancestors that gave rise to these conditions). (This is the first time KF is introducing something that can change the psychosocial structure of humans).

(These conditions have been talked about a lot in the past by Mr. Keshe and you can find them all over the teachings. I will try to summarize this as best I can. The diseases we are talking about are psychosomatic in that we create them through our emotions, and we usually do it without knowing it. These include MS, ALS (he calls it ILS), Alzheimer's, Depression, and other diseases that have a major psychological component to them. These conditions are created through our thoughts and emotions. For example, in ALS something happens and we make a decision that we can't take it anymore and we want to die. This is where the emotions and thoughts cause the body to gradually shut down and die. And usually the person is unconscious of the cause or in total denial of it).

(The new products do not change the RNA or DNA, or anything else in evolution. Instead, we are starting a revolution in how we want to make our body. We can change our body through our emotions and the M fields interactions. We don't have to wait for evolution. In this way we become responsible for ourselves and how we live our lives. We can't go into Space as cripples, we have to be strong in ourselves and know that we have the power within us to change our physical structure or any diseases that may arise while we are in Space. We don't take doctors into Space. That's another reason for introducing these products).

(If these emotional problems have not been resolved internally and we transmute, then we'll carry for example, the prostate cancer with us in Space. Then in deep Space when these emotions surface we could die of prostate cancer. That's why we have to resolve them here on Earth before we become travelers of the U).

(Mr. Keshe now starts to talk about the pre-menopause and menopause condition and how they are related to Parkinson's in the husband. These two conditions occur together for a married couple, and generally when the wife goes into menopause and doesn't want to have sex this will effect the husband. If the husband wants to preserve the relationship and remain faithful to the wife, then he will start to masturbate and this will lead to the development of Parkinson's. It's not just the masturbation by itself, it's related to the complexity of the interaction of the energy fields of the body and the emotions. Mr. Keshe has laid out the facts in such a perfect way that we can easily see the connection. But the doctors don't want to make this connection, because they don't accept the validity of the Knowledge of Creation and the interaction of the M fields, which the emotions are part of. Therefore, if you are really interested in this subject please study the material more carefully. I will only give a brief summary, you'll have to make the connections yourself).

(Menopause in women came about because of the way thousands of years ago human society was structured and the conditions were such that at around 20 to 30 years of age there was no stability to raise children. Therefore, women through their emotion and survival needed put a stop to menstruation at a young age, and that got written into the RNA. With the Plasma Science we know that all this can be changed and these new products are part of that process).

(The emotions and hormones are part of the Inertia structure of the P. On Earth, Inertia gives the structure to matter state manifestation of the planet such as stone, iron, and the rest of it. The body has its own fields of Inertia, which comes from its emotion, and its understanding of what is needed, in conjunction with the salinity. This is how we can change ourselves through our emotions).

(These are not medicine, and we are not in a medicine game. These are for you to change the social structure of yourself. Generally, society has accepted that men will have no libido at the age of 50 to 60. But the truth is at 80 years old men can have the same sexual strength and behavior as an 18 year old. The same with the women. The sexual behavior of men and women got set in the RNA thousands of years ago when the conditions demanded it for survival. Now the conditions don't demand it, but the man never understood the Knowledge of Creation to be able to update the conditions we want the body to have for modern life. This shows the importance of the KF teachings on Plasma Science for humanity. And when we go to Space it will be for thousands of years, not just a week or two. So we need to have all the correct knowledge).

(In today's world we have Social Security in many nations and the nations are setting themselves to provide for the children when the family can't do it. Like in Europe for example. So women can feel secure to have children even at the age of 90, if she so

desires. With the technology (T) women through their emotion can extend the age of menopause to much later, or get rid of it altogether, because it won't be needed).

(Now that we are learning to live in the D of the Soul, we can repair (our body and live for thousands of years). During that time we may fall in love and want to create a love child with our partner. So we can't have menopause occurring at age 35 when we are 700 years old. But in that case we could also create the Children of the Soul, which is actually a better option). (A woman should have the pleasures of life from beginning to the end. The same for the man. Couples can enjoy each others physical presence throughout their entire lifespan).

(Emotions dictate the salinity of the body and that's where all these cancers start, whether it's prostate for men, or breast cancer for women. The new T will bring this back into balance. This was tested in Belgium 20 years ago. When the woman goes into menopause the research shows that the man gets Parkinson's about 7 years later).

(He talked about how we get addicted to sex because it's an emotional interaction. We get rewarded in the same way they train circus horses with blocks of sugar. The adrenaline is a drug and we get addicted to it).

(As a Space organization we have to understand everything to live in Space. We have to be able to take the STM and the P in perfect condition into Space. Earth cannot become a burial ground to bring the dead P of the man back to).

(We want to bring these kind of technologies directly into the hands of people. We should not have to suffer from these conditions).

(With epileptic attacks, 99% of it comes from the person inside. Unless, it's created by misalignment of the electric currents in the brain).

(He tells his experience in Belgium where he has a license through Naturopathica, from the Alternative Medicine Authorities in Belgium. He has the right to practice and create health related machines in Belgium. When he was falsely charged in Belgium Courts by the King, his lawyers weren't allowed to bring in this evidence, which would have thrown the case out. His lawyers were threatened if they do).

(Most of our diseases are caused by our emotions and psychology. With the Plasma Science we can repair the cause. This is the reason we launched these new products and they will change the course of humanity).

(We have to go through this physical structure until we can get humanity to stop killing. We are in a transition time. KF has the Apps for all of these things. KF is structuring the totality of the social structure for humanity).

(He wrote to the head of NASA that KF has a technology to help the astronauts who are stuck in space. We are suffering very much, because we're spreading too much

(knowledge around the world). The KS have always supported us. It's a pleasure to be able to release this new structure and I hope we'll bring the change we are hoping for. Then we'll see a larger scale collaboration. I hope you understood what this means. These are social structures which brings the physicality of peace and that's what we are here to do. We want to prepare man for Space in every dimension. We have to perfect both the Soul and P).

Q: Are the Souls of entity's inclusive of both the Totality of Souls existing within the Unicose, and outside it?

K- We are within a structure, so it's a reaction. That's exactly it.

(But if you want to blow up a balloon there has to be room for it to blow up into. Newton's explained it as field forces. If when you push and there is a reaction to push back, that's your limitation. Otherwise you can keep growing until you have resistance. He explained it as opposite and equal forces. Otherwise it would be an infinity of nothing).

Q: (This KS thinks that the Universal Community was mischievous and placed a cosmic grain of dust while the Sun manifested itself and this has caused all our problems on Earth, and he wants to know if it has happened other places in U).

K- (If you bring up your son perfectly and because of the environment your son becomes mischievous, or does something wrong, or something good, is it your fault? Or is it because of the conditions of the environment? And how much of it can you correct, or encourage?)

(The Sun is perfect, but because the Earth went through (certain) conditions, it has created the problems it has now. The living things on other planets and structures (in our solar system) don't kill the way the man does, and they still absorb energy. We don't see any trees or animals on Mars, Jupiter and the rest of them. But there are lives living on all of them and within them. We have proof of it. We find life in the deepest and darkest places on Earth like in the oceans. They live in complete societies or whatever you call them. They have a structure and follow rules and they exist. There is life even in the center of the magma in volcanic eruptions).

(Up until a decade or two ago we believed life was temperature and pressure dependent, but it's not. Now we have the physical evidence. How come life exists on Moon, Mars, and other places. It's not exclusive to this planet. We became mischievous children due to the structure in the center of this planet. Nobody has been here to correct it. Now we are here to correct it. But we are doing so the child understands the problem and he can sort it out, and not by punishing the child to sort it out. We have patience and we'll wait until the child understands and changes. It has happened before on other planets. It's not the U Community that has caused it. It's was cause by the structure in the center of the planet. Understand that if you turn an electron here, another electron turns over there. So when

we twitch the structure to correct humanity, if there is anything else in the U that needs correction it will turn too, because they're all connected to a common denominator).

(We don't teach just for the man, we teach through the essence of the emotion, so that the whole Universe understands. We are Universal Teachers. Man listens to the words, but the Universe listens through the plasma direction and dimension. It's all very simple once you understand it. The more of you who transmute, the more of you who will understand. And if you understand this, then you don't need a religion to kill for in Space, because those beings are innocent and they already believe in the Creator).

Q: Is there a need to increase the number of Souls in Space?

K- The Souls in Space increase exponentially every second. (The Space is so vast, that for Souls to (become a seed they need very good ?? conditions to become a star and start a new cycle. Think about how many humans died today, and how many cows, animals, plants and all the other beings who died today). Where do all these Souls go? They don't even become a speck of dust in the total structure of the Universe).

(Earth is not the only place where there is life. And where there is a life, there are progressive developments in the central structure, or what we call the Soul. Even in the space of the U there is a limitation of the collection of fields. They always change. They always come to another. Look at your Gans bottle on a daily basis and you will see that it changes all the time through interaction and balancing of the M fields).

Q: When a certain number of people on planet Earth transmute, will all the beings also transmute to a new dimension?

K- No, just because you want to go to your auntie's house doesn't mean everybody else in the family wants to go.

R: Maybe it'll start a stampede if they knew there was ice cream or something.

K- Maybe. If you knew how beautiful it is on the other side, the whole human race will commit suicide today. (But it should come out of the maturity of understanding and not the greed for the ice cream).

(Enlightenment can happen any second, it has no time and place. The whole population could do it, because man has the habit of doing things together. This is how revolutions happen).

R: Bangladesh is an example of the process that happened very rapidly.

K- (It has happened in many countries where the people change in one night. Sometimes the Americans push it by supplying weapons. Some people do it on their own. According to statistics, 85% of the revolution since the 1970's have been initiated by the CIA. And 90% of the world leaders who died by revolutions, the guns were provided by the CIA.

It's a strange statistic. For most African presidents who have been assassinated, it was pre-organized by CIA. In fact, all of them, and they have documents to prove it. You can see it by watching who benefits by the killing).

R: Some of the rebel groups in Africa, apparently, are sponsored by Ukraine. They've been given weapons by Ukraine.

K- (Yeah, because the more guns the Americans give Ukraine, the more they sell to others. The President of Ukraine has become one of the richest men on this planet. He's joined multi-billionaires, because he gets his money through (selling weapons that are supposed to be used in Ukraine. That's why he keeps dragging the war on)).

(Venezuela is the richest nation for oil with the most reserves. And yet it is still under the slavery of other Nations. The whole problem in Gaza is not Hamas. That's only the excuse. We all know that inside the territorial waters on the coast of Palestine they have found one of the biggest oil fields in the Middle East, which can supply Western Europe for 30 years. The Palestinians were just about to start drilling when they started this war. The Palestinians were going to get 50% of it, now it's down to 25%. So the truth is this war is about that oil. And the reason they demolish Palestine is because then they have to pay the Israelis and Americans to rebuild it). (These are the things they don't want you to know).

Q: When we are traveling in Space will we feel the same sensations that we do on Earth, or does our Soul feel different sensations? How does it feel different pressures and temperatures?

K- (When you travel in the D of the Soul, which is a plasma you don't have these sensations. And once we leave our solar system the M fields will be at a different strength. This means we won't be able to have for example, our liver and we would die, because the strength will be different. Then the only way you can live is to go through transmutation and manifest yourself according to the local conditions. Maybe your liver has to be made of gold. This is why we teach you so deeply about transmutation and the Soul, or Central Energy. You have to understand the totality of the knowledge).

(You are responsible to understand the Knowledge and for your own survival and to keep the total integrity of your fields together. Nobody else but you is responsible. A spacesuit won't help you because the fields cross it. So, you have to learn about transmutation. If you want to exist, you have to understand the environment. And you decide where and how you want to exist).

(One of the biggest problems KF has with the scientists is that they all believe that a plasma needs a high temperature. When we say it's at room they don't believe it. This happened with the company in Belgium when we let them run some test on our material. They saw Fluorine and a crystal structure, and then because I am Iranian they said I was using nuclear materials and that I am a terrorist. They did this because I wouldn't give them the technology. So they made me to be a terrorist, because there was Fluorine in the

Coca-Cola bottle that we showed everywhere on the Internet. So now according to the Belgium's you are all terrorists and they want to put you into prison. I've made terrorists out of all of you KS when you made your first Gans's).

(I paid heavily for the stupidity of the man, but man will pay more heavily for his own guilt. The company wouldn't give me the report. They said, No, you can't have it, because you are producing, what you call it, SP3, and that can only be done with Gamma radiation and nuclear material. So now the Coca-Cola bottle is a nuclear bomb because it produces Fluorine and the others. The stupidity of the scientists has brought (man to be more attached to this planet and nothing else).

Q: The STM has different emotions than that of the STP on Earth. When in Space, how do we learn to use the magnetic fields of the emotions of the STM?

K- (You'll immediately know how. (Your Soul will know how to do it). It's the same when you came out of the womb of your mother, right away you knew how to breathe. It's part of your life, you don't need to learn it. You cannot exist without it. You'll learn to work with fields and exist by interaction of the field strength. The P will follow where the Soul leads. It's a natural process, don't worry).

(When you work with these two new KF products it will touch your life without your knowing, and you'll see how much you have changed. Those of you who go through the process with these new the "social psychosomatic" structures will enjoy life beyond imagination, because you'll appreciate it. You'll remember how you were, and what you have gained from them. You'll feel the pleasure of life and how it changes your partner, children, and your environment. They will bring peace and that's the whole point to understanding the T. Man will become peaceful even in time of adversities).

Q: Months ago you told us that 90% of the Souls of the people who die no longer wish to return to Earth. Is it related with the fact that a high number of couples in the world, do not want to have children?

K- (No, it's just too much work being back. When you're enjoying yourself on holiday, why would you want to come back and work? Life on this planet is too harsh. It's so good out in the D of the Soul and that's why they don't come and visit you, you have to go and visit them, like when you dream, you go to them. That's how bad it is to come back in the physical dimension. There are too many problems).

(If you look at the statistics there are different reasons for couples not wanting children. You can't make a general statement, it depends on the country. He tells about his experience in China where more girls want to stay single because there aren't many competent boys to marry, and secondly they want to keep their freedom. In the West they used to use the reason of nuclear war, but that doesn't work anymore).

Q: If one partner uses the new products and not the other, will there still be positive changes?

K- (Yes, for the person who uses it, because we set them individually, but at the same time they still have a connection with each other. These are in a way, psychosomatic to a person. But when you use these kind of interactions, due to the close proximity of the relationship, the partner will still get some of the fields. The bigger plasma always feeds the smaller one and you always create that connection. It's not a medicine that you take. It changes of the fields in the body and you're always in touch with your partner. We have seen amazing things with these Twin Systems).

(He talks further about Alzheimer's and psychosomatic illnesses. There is one test you can do to see if the person will respond to the system. You ask them to sing a song from when they were married or like a Beatles song from long ago. If they can remember some of it, then there is a good chance they will respond to the systems. They use specific Gans's not CO2 and the UBESUS (Universal Body Enhancement Spaceship Units) units will be equipped to answer this with Alzheimer's in a much more rapid way).

(Mr. Keshe tells a couple of personal stories of working with people with Alzheimer's in Belgium. In one case the person totally recovered but then pretended to relapse. He got used to the attention, or what he calls, "Kingship," and he could abuse his caregivers. The success rate is 100% with epilepsy, but we have to watch for problems when the person wants to still get the attention. If we don't get it to work right away it's not that the technology doesn't work, it means we haven't understood the method of getting to it. (We need to find the right field strength). This is not a medicine that it doesn't work on you. The technology fits everything. It's just you have to find out the right field strength and how to move it).

(A KS tells his experience working with the fields and says he feels like he can almost transmute, but something is missing. He is just not able to understand what condition he has to create within himself to transmute. Instead of answering him Mr. Keshe asks some KS who were in the Friday session to tell their experience since they have been through it in the session with Mr. Keshe).

(In answer to the KS he said, as long as you are trying to control it with your thoughts in the D of physicality, then you're still playing within yourself at the matter state level. You have to learn how to use your intention and emotion to bring you to that position. It's not thinking, there is a very big difference).

(A KS tells her experience in the Friday session. It seems that she was able to expand her Soul and travel to different places by thinking about them. But she doesn't do it by thought. She feels it, and trusts and goes there. (But it is the place she was desiring to go to, or you could say thinking about).

(The KS with the question says he understood something. He was trying to expand the plasma by pulling rays into his brain, and then pushing or squeezing them).

(Mr. Keshe replied that he was doing the same thing the guy in Italy did, who was trying to move the cup with his thoughts, forcefully. The secret of transmutation is giving, not taking. You cannot catch a fish, if you don't throw a bait out. Do you understand?)

Q: You mean that I have to expand the field until it connects to another field?

K- In a way, yes.

(But thy shall not steal. You are dealing with plasma and the reality of Creation. When you pull the plasma into yourself, you're taking it from somewhere which you are not supposed to, because you don't have a connection at that time. The secret of transmutation is to expand. That's why you put on the headphones and we expand your energy field. We don't use the headphones to compress your energy so that it explodes).

(It's the way you go to sleep. When you go to sleep you usually connect to the part of the skull where there is no Calcium like the openings of the eyes, ears, and nostrils. (It's the same kind of fields that connect you to the senses. In your sleep you go to grandma's and smell the food she used to make 30 years before she died. This is why we have introduced the KF Glasses, it allows dimensional field opening).

(It's very hard for the field of the Soul to go through the Ca skull bone, because the brain is made of Ca and it's thickened in the skull. The only passage left is through the eyes and ears. The new systems connect to the emotions of the STM and the P. This allows the expansion of the Soul. Instead of a needle hole, we use the huge hole of something like the eye socket. We take off the limitation).

(If you understand about the physiology of the man, then you understand why your Soul cannot expand during the waking state. There is a secret in the body of the man. He draws on a Whiteboard about the blood flows in the skull. There are two strong veins on the sides of the head that create too large of a M field for the Soul to go out during the waking state. The blood has Amino Acid and is Ca based. The eyes and ears use a huge amount of blood, so all the holes are closed and you're continuously breathing at high speed during the waking state. Once you go to sleep, this lowers and weakens and it opens a hole for the Soul to go out and the expansion comes, and you dream).

(With the Cosmic Ray Bundle headphones and the KF Glasses we open the channels for your Soul to expand. If you know how to control the blood flow in the head then you can open the cage yourself. But it doesn't come by pushing it. Understand how to collaborate with the Soul. The minute you said, that you were pushing the fields to try to expand them, it means you haven't understood the principle of transmutation).

(When you are traveling the span of the U you have to see where you are going. You create a line and that line gives you access to go (on). This is how you see the light of the stars. I don't know why KS don't understand this. You don't need to push it, you need to understand it, and then accept that you have the capability to do it. Have confidence that you understand the world of Creation and now you can drive to another place in the U.

But don't get lost on the way. One day mankind will realize what a gift we have given him).

(It's my understanding that when Mr. Keshe told the KS, thy shall not steal, it means if he goes to see the dead grandmother he already has a connection through the Soul to her. So he wouldn't be stealing. But if he forces himself on people from Planet Zeus that's different. Having the "bait" means he's already has a relationship with the grandmother).

(When you use the two new products, or the new Twin Gans's, you're food intake should change. It's not a diet thing. It's because you won't have all that anxiety from subconscious pains, suffering, emotions, and other things that use a lot of calories. You should see a change in behavior, because now the emotion of the Soul is satisfied).

(We see the same structure with people who have Fibromyalgia, because it's a self-inflicting psychosomatic condition. He explains again how the abuse from childhood creates different points on the body where the pain gets in a way, memorized. And all these points use energy and that adds up in calories, that the body has to feed. The result is you are tired all the time because internally you can't catch up with the energy the body needs. They remain continuously in the memory. Then you don't have the strength to walk or work. (The new technology handles these emotions and you start getting your energy back)).

(Fibromyalgia can be repaired through transmutation. When you expand the Soul it covers the whole physicality and the energy balance comes back. (All the points that are holding the abuse get satisfied. This is also why you can be fed through transmutation)).

(There was a case where one of the top managers of one of the certification institutions who was working on KF products wanted help. His wife couldn't get pregnant and he tried to bribe Mr. Keshe for the certification. Mr. Keshe outright refused bribery, and said after the certification he would help him. The man's wife ended up getting pregnant. We should always stay with the Ethos).

(For Transmutation it's the emotion of the wish, and wanting to give, and not to take. As long as you take, you're a thief and you'll go nowhere. The more you want to take and possess, the heavier you become. Then how can you transmute?)

(The last part of the workshop is about interpreting the graphs from last Fridays session. When everyone sits close to the central line it means you are in transmutation. It's totally focused to the center. A large number in Group 4 went through a full transmutation. KS have only been able to stay in that state for 2 minutes they still have not expanded it to 10 minutes. (The group that used the Cosmic Ray Bundles and the KF Glasses had the most amazing results. They created a totally different kind of fields. They were extremely balanced all the way through. The German speaking group is very disciplined and we see amazing work coming out of their group. We know the whole group has transmuted).

(This is the beauty of developing such a sophisticated structure of emotion control and understanding. You have to open your Soul, then P obeys, and we see it again and again. (When you use the CR Bundles and Glasses you create a 3 dimensional condition of the Soul on the graphs. He could see the Soul expanding out through the eye sockets, like what was discussed earlier)).

You have to get trust in yourself so that we can take the next step.

SUMMARY:

ENGLISH TRANSCRIPTION

(:11)

K- Thank you very much. Good morning, good day to you, as usual, whatever and whenever you listen to these series of Knowledge Seekers programs from Keshe Foundation Spaceship Institute. We are back here again in the little box of planet Earth. We are all in the one roof. And this roof is for us as long we are, or we live, or we are attached, or we walk the surface of this planet. Once we finish attachment to this embodiment of what we call, (:12) a bunch of magnetic (M) fields we call Earth, then we have a new dimension, we know our Soul is free from our physicality (P). And then we manifest ourselves in one point or another as a pack of energy, maybe our Soul interacts with the field which is, carries some physical dimension Inertia of the mixture of the Soul of the Man (STM), and we manifest ourselves. We are ?? manifest ourselves, because that's what happened, on the way ?? we're going through, we hit a cloud and we had to stop.

But, something is very interesting and it is important, and this a dilemma for the mankind only. The best way I can describe it is, you enter an environment, you enter the room. Happens to be in certain positions in the Universe. And what is that, what about if somebody comes in, another energy pack which got a gravitational field of the environment as citizens of the planet. What would be the reaction of the man? You have transmuted and by pure luck, due to the Inertia of field strength of your Soul. This is not where you wanted to be, but your energy is transferred, you are a being in that position. Now let's say, four or five of you, happen to be together and you land in this space, in this room. (:14) In the world of the man we have created the word God, the Creator, whatever. But, what belief would these people have? What do they believe in? The interesting part ... is for man to understand the unity of the Creation, Creator. And not the division of the man which he have made for himself. Race, religion, or whatever. And it is amazing how on this planet we have changed, and we change. And we change other lives to ?? fit what we have come to believe, in respect of what they believe in. Because

belief creates emotion. Emotion of a belief is very strong, because it is connected with the physicality and prejudices. And if we understand this in the dimension (D) of the physicality of the man, and when we transmute, knowing the condition of the weakness, this is one of the biggest weaknesses in man, then we are aware of what it is, what we are doing and what is about to happen to us.

The emotion of belief has been used to create religions, has been used to create nationalism, has been produced to create all sort of anything which separates us to be. (:16) We are Russian, we are from Moscow, we are living in this area, we are such a surname, we are doctors, we work in the hospital, we ?? go from the bigger, and bigger and bigger we forget about the rest, because if you are Russian you don't need to say that you are Russian and the rest of it, to be identified. Human race has not learned to be Totality. We are human race, we belong to the totality of this planet. We all breath the same air at the same time, and every time 1,600 km I come back to the same point. You American guy, just breath the air, now it is my turn, I am taking something, you take something ?? out there, the breath and the rest of it.

But the most important thing which has been the cause of man's problem, especially in past 10,000 years, is the process of his belief. And this is what is kicked a lot of problem in a different dimension. What does this mean? I will give you an example. We bring a Jew, a Christian, a Muslim, a Suni, a Shia Moslem, we bring a Catholic. We bring different sects of Judaism, somebody from Tibet, something from South America, their own Gods, they all have their own prophets. And somebody from Africa with their own prophets.

We bring, let's say, six, seven of you in one room. (:18) You do not know about each other's religion, you do not know about the path of belief. You're all hungry. We bring into this room, a chicken. Each one of you gets one chicken. Live, breathing, and the only resources for you, in the physical body of a man, at a point of hunger, is to eat that chicken. There are two questions to ask. If you understand what is about to come, then you understand the dilemma when you appear in the space, in dimension of physicality. Does this chicken have a religion? Do these six, seven chickens we brought in, believe in Creator? They have a Soul, they have a connection. Soul is not exclusivity of man. Is gift for Totality of the Creator, across the Universe (U). Now, we gave these chickens to these people who just walked in, and chickens walked in, that's the only food. Which chicken is Christian? Which chicken is Muslim? Is it a Sunni or a Shia? Is it Catholic or Protestants? Is it ?? Espenazi or another sect of Judaism? Is it something else and something else? The chicken has no religion, but the chicken has a Soul, so it has a belief, it's our lack of understanding that is only us. (:20) The chicken feels the pain, chicken has the fear, the same as we do, walks, the same way you walk. So he has an emotion, he has a understanding of the Creator. He understands this. It's not exclusive of man.

It's the same as those guys who appeared when you, by accident, landed in the room or in the space, in the space, and they are there. They walk in, then you walk in. Do they have a religion? Or do you see them as a food? But the next step in emotion of the belief is, you're all hungry. Let's say the Shia guy gets hungry first. He decides to slaughter the

chicken to eat. He's a Muslim. He says the Islamic prayer and makes the chicken Muslim. That's the only way he can eat it, by the rules of it. That's why you pray, that's why you become a Muslim, that's why you're a Shia. In a way, you take the Soul, so that Soul has to become part of you, because you didn't respect his Soul to understand, I have a God like you, I believe in the Creator who's created me, But you're stronger, so you convert him. Isn't this exactly what the Muslims did when they went across Iran? Across the Middle East? You say a word, you say, "I shalla .. Muhammad Rasulullah" or we cut your head. This, there was no difference between an Iranian man and a chicken. (:22) But chicken cannot say, so beheaded, that he becomes a Muslim in another world.

Now we have a Muslim chicken, we can eat. So you have converted it in (by) force. The Jewish guy was hungry, he does the same with the chicken. But this time he says a prayer in Judaism, now we have chicken who are no religion, now become a Jewish chicken. The Christian guy eats, doesn't matter what, because it is there, I don't think about it, it's all mine. I don't need to ?? tank the Soul, whatever. So, we have made religious animals in the dimension of our strength, of our emotion, of the belief, to be able to accept, to consume another energy.

Would you do the same, when one of you is Christian, one Muslim, one Jew, one Catholic, one Sunni, whatever, you're all friends, now you go and you land in this space, and these creatures of the Planet come in. Which faith of God you are going to preach them? Is there any sanity in believing that we are the only one that believes in who created us. Maybe some of those in the room with you, have already reached the Knowledge of the Creator, that they know what you dream to know. (:24) Would you lot try to convert, so called citizens of another planet, to the path of your belief? To make a Jew out of them, Christian out of them, a Muslim out of them and the rest of them. Or, has your Soul, in reaching the dimension of purity of the transmutation, as you understand the totality of it, has washed with this dogma of religion. Emotion of belief to the same thing as we all created things in the Universe, believe it because otherwise we won't exist because of it.

Then it comes, one big point. Would man lose his inhibition in whatever belief if he has, as when you transmute, you only believe in the Creator and no religion. Because this religions are the path to, supposed to get to know him. When you get to that point, when you reach that point, do you need all these caboodles, which is the cause of wars, division, killing on this Planet? Then, when you mature to that point, when you understand this, when you meet with these creatures of Creator, loads of chickens, but chickens from planet Zeus. Are you trying or would you try to convert them into the Jewish, to the Muslim, to Christianity? And if they tell you in your face, "I take you, I elevate your Soul to see the Creator." (:26) Would you still believe in all these, what I call, fairy tales? Did the chickens go to a mosque or synagogue or a, what you call it, church? Do other animals go to a place, do they have a Prophet? Or, due to the solitude, staying in a cage for all the time, staying in the woods and whatever, or underground, or in ocean, that solitude has matured man, the way our people in solitude have matured, understood the process of Creation and everything else.

Then the question comes, do the animals have a Prophet? Or through the process of life, they already understand that process? It's us who's behind them, not us ahead of them. And this is the dilemma which you have to solve before take the banner of transmutation. Clarity in what we call the dimension of the emotion. Emotion of belief. Not, I go from one thing, I'm today Christian, I convert to Muslim, (:28) tomorrow, like Muhammad Ali and the others, and then go and today, tomorrow I become a Jew and ?? everything else. We need to understand this individually by ourselves. We need to comprehend the prejudices we have created due to the emotion of, because of lack of understanding the process of Creation.

One of the biggest thing for the man is the things which has been fed under the banner of the religion emphasize war, belief that I'm the only one who's right. I'm the only one, my religion is the only one, my country is the only one, blah, blah, when you go to space, my planet is the only one and the rest of it. And this is the downfall of humanity in the space, in transmutation of physical dimension. Our nuclear warheads, our missiles, compared to the knowledge of those who travel the span of the Universe, is like a match, thrown at someone with a submachine gun. A matchstick. And we still think we are the most powerful nation. We are the most powerful whatever. (:30) And this emotion has to be washed away from the essence of the thinking, living of the man, before he departs. Because remember, emotion of the Soul and emotion of the physicality are connected and within. I made man in the image of Myself. So, is Me Soul who created you, I carry the emotion you carry.

Then if you understand this, this is part of the work of the transmutation. You have to understand it in the dimension of the Soul of the Physicality (STP), that when you transmute it, when you convert it, that converted physical, does not carry the emotion of, understanding of, "I'm the best, I'm unique and I can eat what I like." "I can destroy what I like." This is part of the work of the emotion. And in the world of the man, this emotion has different dimension, different strength. And all these have to be sorted, has to be understood by the man, before he takes that step to transmute. Independent investigation of the truth about yourself, about what I believe, what I understand, and not to be prejudiced in accepting the Totality that I am part of. (:32) I manifest myself in the STP in another dimension where I transmute, that I believe in Totality, not exclusivity. And how far I can be part of the structure which accommodates a bigger structure. And not for me to be the center of the structure.

Then, when you manifest on the other side, and the six of you, and six of them, none of you tries to beat them, become a Christian, become a Muslim. Judaism is good and if you think you can dominate it, they are my food, but I convert them to Islam before I eat them. This dilemma is yours and to you might be irrelevant today, but you will not be able to transmute until you handle your own prejudices of yours, about yourself, about your partner, about the citizens of the place you live, about the animals, about the nations and about the planet.

The flight system which you see, as I said, no president, no world leader, who has caused the death of the others, will enter into these systems. You have created the separation by

your conduct. You have not been excluded by the structure. The structure has a Soul, the structure has a emotion, and that emotion is not the emotion of, (:34) "I am system belonging, made by man, and I go to Space, I'm a man-machine." As I wrote to one of our Knowledge Seekers (KS), we're creating this Universal System, because we use the Universal Laws, that every citizen of Universe can live within it, find sanctuary in it. Has no religion, has no churches, has no mosques, because when you enter with the purity of the understanding of the Soul of the Creator (STC), there is no religion in the Space. Our religion is belief in the Creator. Our religion is based on oneness of the Creator.

Then, as I said before, as there are no banks in the Space, there are no churches in the Space, and no other religions in the Space. As one matures to understand and becomes part of the work of the Universe, and not the citizens of this land of Earth, you see globally, you see the whole of the Universe. The vastness of it, the beauty of it, will bring you to be humble. It brings you to accept the dimension of the beauty of the Creator. So, if we don't have banks, if we don't have religions in the Space, if we don't have mosques and churches and synagogues, why are we fighting on this planet for money and religions, and killing each other as the Christians, the Jews, the Muslims and the rest? And nowadays, we have found a new structure. (:36) Super power, the only power. I have more guns, I have more aircraft carriers, I have more nuclear, and I support who I like to get what I like, and I'm the super power. Superiority, stupidity and ignorance, is a gift of man. And no race in the Universe carries this.

Now you understand. Those of you who come and try to transmute, and you cannot transmute, you find yourself entangled, sit back and take another brick of the wall, of the wall of prejudices, of the wall which you built, not to be able to see the other side. And emotion which you create, of nationalism, religion-ism and everything else, is the cause that you cannot transmute, because you cannot do. In essence your Soul is aware of your weakness, that this weakness outside can end to your demise. "Thy shall not commit suicide." Your Soul cannot take you to the dimension of the Universe, when it's aware that in the structure of the STP you're racist. You're religious racist, you're skin racist, you are national racist, whatever you have.

The reason this has to be sorted is very simple. When we build a craft, that craft has a Soul, is created through the same process as you. There is no Aluminum panels, there is no control panels. (:38) There is no structure that you control, or you build. It has created itself out of the work of its own Soul structure, out of the field of the Universe, what we made available for it to manifest itself. And that Soul is pure, is not tainted with the desire and emotion of the physicality of the man. Cannot accept you. Cannot harm you. Cannot harm those who are in it and is protecting.

If you Knowledge Seekers understand, many of you have been going on in these trips of the, what we call, Friday sessions, and can't get anywhere, sit back, where, what I have not ?? solved for myself. What baggage do I carry which is holding me back? The more emotional prejudices you carry, the heavier your baggage to get on the board. You go to the airport, they say you're allowed 20 kilos, or you have 40. You can't go. You have excess baggage, excess emotion. The emotion and the fields of it, is what is holding you

back, in the physical dimension, is the weight. In the world of the Transmutation is the emotion. (:40)

You have to understand this. Otherwise, you blame everybody that I cannot go, it is something wrong with them. The system doesn't work. Because it's you who has shackled yourself to the emotion of your belief. It's in the writing of Bahá'u'lláh, he says, "Earth is one planet, and mankind its citizens." When you become the citizens of this planet, not being American, Jew, and the rest, then is the time when you can open the doors of the Universe to mankind, to yourself. The Earth is but one country and mankind its citizens. And if you understand the process of the Creation, if you understand it's you who is holding you back, then you understand the next step. Then, you understand where you went wrong, when you're human, you're a Christian, you're a Jew, you're a Muslim, you're a father, you are American, you're British, and you're still a Soul member of this planet. (:42) And in that dimension, it means you provide, you give. Does not matter who takes, as you have provided it. Then you're mature enough to leave the shackles of this planet.

Then you understand, why many of you cannot fly, many of you cannot transmute. You go through the process, in so many step by step, you've been all the way, but the emotion which holds you back, is your emotion of your prejudices. And the emotion of you being the center. You are the most important thing. Where if you learn that you are part of the structure, and the importance of you is only to you, then you start transmuting. In a way, as I said once you be vaccinated, you cannot give the disease to anyone else. You cannot go to another position and make the aliens Jewish, Muslim, or you cannot behead them to become. And then you understand, as I said before, if few kilometers away from this blue house, (:44) there is no banks and no churches and no religion for the rest of the citizens who will live outside it, why man has created this to create so much mayhem, keep himself shackled to this.

This is where our transmutation system cannot take you. You're limited to emotion of seeing physicality's, where you do not feel the existence of the Creator. It's you who's put the barrier up, and it's you who has to understand it, to allow his physical life and the Soul to be one coexistence, that they truly can live in both dimensions of the Universal energies, Universal depth of the travels, and as mankind on this planet. This is what you will understand.

When you see the flight system that we will show in Iran, you will be shocked. We let you all go in. It can accommodate the whole of Iranian nation in one system. But I wonder how many will be able to get in. Because they have not understood the prejudices still stays. When you don't solve that problem, you cannot go, you are punished. It's like it's in the classroom, you do something wrong, the teacher sends you to the corner, stay there till you understand your mistake. And at this moment, mankind has cornered themselves in the school of education of the Universe. And this is your punishment. (:46) You're punishing yourself for not being able to go outside and play. And everybody else is playing. And because you have not understood, you turn your back, there is nothing there. We are alone, we are the only citizens of the Universe, we are looking for life,

we've built the most horrendous machinery to look down and find some composition to confirm life, because you are the only one.

My dearest human being, close your eyes, look through your Soul, the whole of Universe is next to you, it's your own ignorance of understanding of behavior, understanding the purity of the emotion of the belonging, that has brought you to this point. You have decided through your prejudices, through the lack of understanding the process of Creation, to isolate yourself, and you're still looking for. As I said many times, I have given you the most beautiful vehicle. The only thing you don't have to drive it, is the key. And the key is clearing up your emotion, from everything which creates that dimension of emotion. Then you find out, the car will drive on its way. it will take you anywhere you like. When you leave this Planet, in the dimension of the STM, you're left to fall in love with the Creator and his Creation. Not to become another one with the emotion of the prejudices, to be separated, "I'm a man, I know everything, I come from planet Blue." (:48) ?? Whereas, "I'm a man, and I'm glad to be part of the structure of the Creation. Where is my place?"

Now you understand, why I cannot transmit many of you. Because, you have to go into that shower, and wash the prejudice of the religion to start with, which is the cause of most of your problem. The color, the race, and anything else. And ?? spend the child and one child to another child and the rest of it.

I hope you understand. And I hope you take steps to be ready for that time when it comes, you are ready to go, that you don't fall down flat, because you have not understood your problem. Understand this, just understand what is spoken about. Try to remedy the condition and situation, because the only one who knows it, is you. You are the Prophet unto yourself, you are the 'Day of Judgment,' and that day of judgment is every day, is not the heaven or hell. Your hell is being kept away from the children to play, to be part of, to be locked up in this planet, where the citizens of the Universe are playing. And because you are not as strength, because you done wrong to yourself, you don't see. (:50)

This is the position, and I saw this in the flight system of last week. I looked in and I could see the dimension of the prejudices. Prejudice to be on the Earth, to be physical, to having the fear of not letting the physicality go. And with that comes prejudices. where you can see clearly on the structure of the graphs we get. You remember I told you when I sat the Knowledge Seeker in front of the system, I knew he's there to kill me in the Cinzano and it proved to be correct. Because I saw the field of the emotion on the oscilloscope on the system. Emotion is a frequency, it has a strength in the dimension of physicality and you can see it.

And it's so strong, in one of the groups this was so strong, this emotion of being that it is frightening. And this will be, what will be the cause of problem in the future. We don't want this to go into space. You're cornered in the corner, stand till you understand, be it a thousand years, ten thousand years, twenty generations. You don't understand, if your children understand or children of children understand, then the Space is open. (:52) The

Space, the Universe is part of what you are. You are in the part of Universe. It's you who cannot open the door and go outside to play.

The biggest punishment for man is, has been, and it'll be the emotion of religion, the emotion of racism. If you have that on another planet, it's doomsday for you. And I cannot send you outside ?? where you're going to kill yourself. We even do it in the same nation. We do it within the same religion. We do it with the same psychology and physiology of the same strength, the same understanding. This is what you have to understand.

And this, what we see on the dimension of the graphs in front of us, in the processes that you go through. The emotion of what I call belonging, the emotion of prejudice is so powerful that overrides every other emotion. You can lie to yourself, I'm not, but we see you have bruises from (being) beating up, (:54) because you played with the wrong religion, with the wrong race. I know that feeling, I've been there. It's you who has to understand it.

Then, when we put on another transmutation next month, if you have managed to handle this, you will see your first departure. Last week trial brought a lot of knowledge on the behavior of the STM. Now we have broken you down to small groups, we can monitor. Only one group, nearly got to transmutation, full transmutation. One group out of all the groups of last week. And only two people, just about achieve a transmutation. Now you understand. I have brought you everything, it's you who have to understand how to use it, that it brings you pleasure to be part of. And not blame others, because you haven't understood what you have. Emotion of hate, emotion of me, emotion of racism, emotion of nationalism, emotion of religion, (:56) All has to be understood, handled and not denied, because you won't be able to get in the Craft.

There is one problem, there is no refunds. You only have the fun, if you manage to clear out what you have created for yourself. Now you understand, where we are and how much, little you need to do. How much, little you need to do. We go for a break, when we come back and we try to answer any questions. Ricky, if you can take us.

>> BREAK >> 552 KSW August 22, 2024 (1:02).

K- Yes. There are a couple of things which has come up. We would like to bring a couple of points forward. Last Friday session, one or two people missed the session, for whatever reason, they thought it's this week or last week. And for this reason we have to go through the process. So we are setting up a session for maybe tomorrow, or not tomorrow, Saturday or Sunday. If any of you would like to, because we like about 6, 7 people in each group, because it gives us a more structured way to work. 6 to 8 people is the best way for us to do. If you want to join it, just go in the website and complete the process today. This session could be two or three hours, and because it's one hour, when you partially be in the others, it could be slightly different than last week. But there's going to be an additional session because of this, the, what you call it, the people who could not make it, or it was a mistake in understanding the time. So there's an extra session, maybe Saturday, maybe Sunday, that we inform if you want to be part of, you can register straight away.

The other point is that Keshe Foundation has launched two new products. We call it a 'Flagpole' and 'Poles.' (1:04) This is a trial for us and we have had success with this process. It's part of the water, what you call it, dilution system and what you use with the systems which you have. And this is primarily released for two, three reasons. And partially is for what we call the development, the future development. And partially to sort out a very big problem in the cycle of the life of the man. I touched on this last week a little bit. We will provide a limited number of this material. And then, it'll be stopped. We already had good response from the Knowledge Seekers. But, you have to understand the science of, which brings man to this position, that, processes needed to be brought in, to change the condition.

The science of today has misunderstood this. The science, scientists of today, only look at what medicine, what we can do, what operation we can bring in, to, in a way, repair the damage after the accident. These accidents are prostate cancers, these accidents is enlargement of the prostate, these accidents are Parkinson, these accidents are Alzheimer's, These accidents are the cancer of womb, these accidents are cancer of ovaries, these accidents are breast cancers, these accidents goes on and on. (1:06) These are the physical accidents.

What are the psychological and social accidents of these changes, which brings us to this point? Adultery in any shape or form. Mistresses, prostitution, other social problem with this, rejection, depression. But, mankind, our physicians, our scientists, our psychologists, have never understood the process. They just try to find a solution, for bits of the same thing, which is crushed and then, it might help. We introduced this process, to stop that process. To at least, to put it in your hand and change the condition for yourself and nobody else. These are not medicine, these are environmental creation of the condition that you, every single human being, man or a woman, due to the past history of our existence, has accepted and in accepting has become what we call, part of the genes. Part

of our RNA and DNA, but in fact it's not, is what we have not accepted as part of the change. And now with the development and expansion of the knowledge we can move it, it's already shifting itself. So, if it's shifting itself, because of the change of the psychosocial structure, (1:08) why can't we bring it to be there all the time?

And, these are the very first time we are introducing psychosocial, ?? somatic structures like this. To understand, to start, to stop, or be part that I have a say in it. It's got nothing to do with my ancestors 10,000 years ago, which has become my RNA. You, by decision, get the ALS, because you made a decision. By decision you get MS subconsciously, psychosomatic. By decision, you become Alzheimer's. Now, with the knowledge of what we understand, and what man becomes part of the Universal Community, and the structure of the new science and technology, I want to change the 10,000 or 20,000 trends, which has become part of me. For me, the way they change it for me, I want to change it back to, in a position for my children. We can decide to commit suicide, we decide to get the ALS, we can decide to change the structure of DNA, RNA of us, for our future generation and ourselves.

And this new product, these two new products, we have never put such a detailed explanation into a product. Because, you have to understand, we are not changing the RNA, we are not changing the DNA, we are not changing anything in evolution, but we start a revolution in the structure of physicality of ourselves. (1:10) That, by the knowledge we change the dimension of the energy fields, that it changes for the next generation. These, what I call, social psychosomatic technology, we will introduce more and more of. You are responsible for yourself, you are responsible what to do.

Because, if I can get this sorted, for me to make you a citizen of the Universe becomes very easy. I can explain to you the details of it. If you transmute in the body of the man, if you transmute in the... or transfer in the shape of the man, you still die in Deep Space, because of prostate cancer. Because of breast cancer. I want to sort it out, before you die in Space, because of the same thing. And you have to do it, not me. We just show you and gradually bring these things in.

The next two, three weeks we will introduce more of this structure, that you understand. We touch the structure on the dimension of physicality, or Soul, or God knows whatever, it's not our job. It's you who does it, we provide you the structure to understand. Let me explain to you why these two items are, what it does, and how you got trapped into it, and how you are the cause of most of the problems of you, because your ancestors changed your genes. And what we say is genetic. (1:12) How come genetically you cannot change it for the future? We've done it with the rice, we've done it with the wheat, we've done it with other things. Why can't we do it in man? And this is the whole structure of the new line of products which come out.

When we do it in limited numbers, you have to write back to us, what you see, what you feel. And you will be living with this for most probably the rest of your life. Because you change it for yourself. In a way, for the first time in the science of man, we allow your body to create, by your decision, the hormones which you decide into what to be.

You have to understand, emotion and the hormones are part of the Inertia structure of the physicality of the man. On Earth, Inertia gives the structure to a stone, to iron. Body of the man has his own Inertia of field, which comes from its emotion. And, it comes from understanding of what is needed, in conjunction with salinity. Now you have that choice to change. And you feel the change, you understand the change, and you change yourself because of it.

These are not medicine, we are not in a medicine game. These are social structure of you for yourself. Let me explain to you what this means. You ladies have accepted and doctors tells us, and the scientist tells us, scientific papers tells us, women go into menopause around any time 30, 35, 40. (1:14) And, now we have a new terminology in the past few decades, 'pre-menopause'. Which means, body's getting ready to switch off. And then that switch off, brings out a commotion to the body, that a lot of things you were used to, from age of 12, 13, 14, 15, till 30, 35, cannot be. Because of what psychologically we have accepted, that after age of so and so, we can't have children. You women triggered this. And then you blame men for it. You do it subconsciously. 99% of the men's Parkinson, in a certain category, Men prostate problems, in certain category. Men behavior of adultery, in categories. Is not blame on the women, but the ancestral DNA changes, brings a condition that men take that path. And we have found all excuses for it. "Oh, when the man became 40, they start playing, oh, blah, blah." "When the man gets to 50, 55, they start getting Parkinson." "The man at age of 50 to 60 doesn't have the libido for it." "The man can have a libido on the same strength of the sexual behavior at 80, as he was 18." The same with the women. But, we have changed it.

And we need to adjust this, that when you go into Space as a passengers of the Universe, because you are not going for seven days trip, you are going for thousands of years, you handle it, that it's not there. (1:16) It's no use sending bunch of cripples into Space. Let's, let's understand what this is. You ladies, naturally, in the past as I explained, because you were the 'hunters and gatherers,' men brought, provided and the women looked after the home. Man died outside, there is nobody to look after child at home. And, when you get older, it's harder to find men who look after old women. You naturally, the way as, the same as the way, guy created himself with ALS to end his life, you decided to close down your production, reproduction part. Which was correct, which was there, there was nothing to support. Women in, maybe 5 or 6 hundred thousand years ago, some women went into menopause in 19, 20. Because, when they got married or when they were, they had the first child at the age of 8, 9, a child was already 10, the man would not make it with diseases, with wars or whatever, to be there. So, it was no use to produce anymore.

With a more comfortable time in past 2,000 years or whatever, women are pushing this line. Now, as I said last week, we have a social parenthood, Social Security, we pay for the child, we educate the child, we provide the clothing for the child. If the father is not there, if the father is there, it'll be a better life. If he's not there, collectively, men and women of the country, look after the child. We call it Social Security, we call it child benefit. So, your women feel a little bit better, if he's not there, I still get the support, the

child can grow. (1:18) You're pushing it, further and further down the line (extending the age of Menopause).

But, at this moment of time, when you decide, your ancestors decided 30 must be the maximum, because then I'm too old to look, to go to work, if something happens to the man, to look after, you brought switch exactly the same as ALS, but this time is localized, it's targeted. You don't commit suicide, you don't get on a wheelchair, but you bring the 'wheelchair' of what you say, "No sex, we are British." Harmonically (hormones), the body gets to start using, getting the information to bring the body into what we call, "dry land", into a position that there cannot be pains of growing up a child, feeding it, looking after it. You had that from the age of 20, 19 till 35, 40.

Now you go, your hormones or your body ?? or structure of emotion, of survival, creates energies, now doctors call it a hormone, to change the physicality. In the ALS, you paralyze yourself. In the hormone, in menopause, you paralyze your reproduction line that is not there. The question is very simple, why shouldn't it be there? If now you learn to live in the dimension of the Soul, and repair, and come back and live a life of thousands of years, what happened after 500 days you fall in love with somebody that you want to reproduce? Sorry, 470 years ago I gone through menopause. Cannot be done. So let's create the Children of the Soul. (1:20)

A woman should have a pleasure of life, from beginning to the end. The same for the man. Then, what happened to you? You put the switch on, sorry, Madam, sorry, I do apologize, but the husband who you had, the man you married, the man you had a relationship from age of 18, 20, now you're 35, 40, is still with you. You put a brake on, not him. He's still sexually active, he still enjoys the presence of you. But, I have a headache tonight, my hormones are up and down. What does a man do? How much rejection will it take? Looks outside to satisfy the, what he was created for, to reproduce. Because now he has lost a partner. We are not like certain birds, that when the partner dies, the man (male) stays alone. And when you get to this age of menopause, you already have children, he has a commitment. But, you cannot clap with one hand. The other hand has decided not to be there, because of the hormone change or whatever. What does he do? He finds a mistress to satisfy that part. With it comes new emotions. What does he do? He still loves you, he still wants to be part of you, "But I'm not going out, maybe I go out." He masturbates. He creates the emotion of the love he had with you, he triggers Parkinson. Look why most of the men have a right hand Parkinson. 99% of it goes back to menopause of the wife. (1:22)

Putting a stress creates problems with the prostate, which the essence of the creation of life comes from ?? woman. Deeper inside, with the pressures, creates a prostate cancer. Emotion dictates the salinity of the body of the man in where the problem is. Why do you get cancer of breast when you have a problem with your man on the right side, and with your daughter or mother on the left side? Different emotions has different characteristics of salinity, different production of material, in different parts, due to the field strength.

Your menopause, your creation of new hormones, now changing, you are trapped in it. What does it do? You change the emotion that I cannot reproduce, my man is playing outside the house, or he wants and I'm not there, bringing creation of problems, you get an ovary and a womb cancer and the rest of it. So you see, reproduction, the essence of our creation, because, becomes the demise of our lives and our partner. But, no doctor, no scientific structure has ever explained this, for us to understand. We are the creator of our own problem, without knowing, and because in the past, nobody was, no social security structure, we brought our own security in, we put lock and key on it. And the lock and key of the body is to change the structure.

With this technology, with what we are introducing, is to bring this into balance. (1:24) And it's you who have to tell us how much you balance. Why should man at age of 60 or whatever, cannot get any more erection, because he knows there is no partner, so what's the use of wasting energy? Why can't he still not using a Viagra, not using prostitution, be an active till he's 80, 90, the same as the other partner? Why can't we bring a condition that it pushes the boundary beyond 70, 80? And we don't wait for our great, great, great, great, great grandchildren to see the benefit of the evolution. Where now the knowledge is there, we could be part of it. And we set the scene that they never see this.

When we tested these, 20 years ago nearly, for the first time, when people used to come to the clinic in the, what you call it, in Belgium, that was the first time we saw women in their seventies and eighties coming back after two months, three months after using the (Gans) waters, telling me that, "Mr. Keshe there is a problem, I'm getting my cycle back, and this is a problem." I said, "No, you're now back at 18, because that essence of psychosomatic social structure which you had, you have resolved." Then we had to look into how these systems we provide in Belgium, leads to this creation of social structure change of, what we call, emotion.

And then, when it became three, when it became ten, when it became more or less, a lot of women who drank the water, got to this point, we had to look in, which part of the system brings this situation? Why do we hit this matter? (1:26) Why we are more successful in the women in 70 and 80 and 60, than women which are 25 and 30 when we tried? And then we saw the pattern, we understood the Knowledge of the Creation. How man has created this structure for himself.

When you see yourself not full, when you see, I cannot, I have a problem, I have a headache, I don't feel like interacting with my partner. The partner comes up with thousands of solutions, reasons. You stop the car, not him. Till a year ago, two years ago, it was a pleasure, three, four times a week that we enjoy each other. Now, just once a month, just for him to be 'off my back.' This is where the change we want to see. How social structure in the family, how the social structure in the house, inside the man, inside the relationship, changes.

This new introduction of materials is a change of life. And very soon, you will see these things on the everyday part of what we call, social structure. We are here to prepare Man that we don't have the problems of in Space. You go husband and wife, you go through

menopause, the poor chap has to look for a alien's woman, and they don't have the systems we have to pleasure being with each other. (1:28) Then you cause us problem there.

So, we're trying to bring a process as part of the technology (T) as a whole, to overhaul the system, in man's understanding, he can live thousands of years, he can manifest himself with physicality everywhere, doesn't have to be worried about everything else. But, this problem has to be sorted here, because you put, with the cancer of the womb, with the cancer of prostate, with the cancer of testicles, with the cancer of breast, limitation on your life. In a way, your ancestors have given you a life sentence. They didn't have the pleasure of the supermarket, they didn't have the pleasure of, no need hunting and gathering, the hunting comes with the planes, the best bananas from Africa into Europe, the best, God knows, pineapples from other side of the world. The whole human race is providing for the child you create, because if he says, "I want banana." Supermarket, supermarket gets it from Africa or from Caribbean. So, in a way we have become social parenthood. In a larger scale.

But, we have to sort out the little ones, which are the breaking lines. We introduced these structures as part of changing, preparing man for Space, in Deep Space, for long trips. We can't take you to the Moon and you have a... going through the cycle of the menopause and then die at the age of 40, because of the ovary cancer or womb cancer. (1:30) You should be able to live a perfect life, even in a physical condition, 200, 300 years. These are step by step introducing to bring that change.

You suffer from pre-menopause, you suffer from menopause, you suffer from everything else, you have a problem as a partner, you run into problem, these are not Viagra, these are not sex machines, or material, these are social structure psychosomatic systems which we are introducing, you'll see the change. There should be no love life, there should be no changes in the hormone, that it brings these changes. Part of the materials has been introduced since last two weeks, three weeks ago, and these new ones are the social structure changing structure, what we call, materials.

You suffer from all the depression, all the anxieties, all the problems with your pre-menopause, you are in menopause, you're 80 years old, you can change it. And this is the time and the position to do. And then we want to know what it brought. Change the depression, change the anxiety, change the cycle. You don't have the problems which so-called menopause, pre-menopause, I'm already 20 years gone down the line. I'm 80 but I'm as happy, socially acceptable, as (if) I am 18. I'm 20, I'm 30. The same for the man and the woman. (1:32) When you read the text of this material, you understand somebody wrote to us, the text of both of them are the same. You made a mistake. I said, God, love of God, it's the same for everyone, man or a woman. And we have to understand it's the first time, is to handle both. They are two different materials, but handle the both in effecting the love, the care you give your children. Why should a child become a... from a divorced family, because of the hormone and because the guy does not have the place of pleasure, home, he plays outside? Or why should you have a father who has a... gets a Parkinson? You stand in front of a man with a Parkinson, and look at

what shakes. And go through the mind, when a man plays home with the other wife, he has to imagine the pleasure the wife used to give. He has to replicate the taste, the texture. He wants to be faithful. He gives himself a Parkinson, because his repetition lock. And then, once gets locked, part of the brain gets stuck to it, changes the characteristics of the brain. We do a MRI, it shows Parkinson's, some things have changed. Did you ask when it started? How many of you been with us? The first thing I ask when you say, "Parkinson, I have a Alzheimer's." I ask one question, "Is your wife alive?" "How old is she?" Do you know when she went through menopause? Mark it, seven years, seven years, seven years, seven years.

It cannot be coincidental that all the category of man who get Parkinson's, all fit within seven, ten years bracket. From the day the menopause, pre-menopause of the wife hits him. (1:34) Unless we have a clock. Social structure has never looked at this. As structure we take in man to the Space of the Universe, we have to fix some of the physicality problems, which has started through social structure of life. And man controls this, every human has a control over this.

And we introduce in next couple of weeks, another set of materials. Addiction. Why we get addicted to, even the emotional interaction, we call it sex? Why do we get the rewards? We are literally like that horse in a circus, where it does something, it comes back, it gets that block of sugar. The creation of system in us, is that few second of pleasure, that ?? adrenaline is a drug. It's an addiction, we are addicted to it, and the more we do it, the more addicted, we get addicted to it. It depends on the strength of it.

Now you understand, as a Space organization, as a structure, as some kind of understanding, we have to understand everything. We have to be able to take the STM in perfection, as we take physicality of the man in perfection. Earth cannot become the burial ground of physicality of the man. You die on the Moon, we send you back home. Sorry, this is not Jerusalem, this is not Mecca, this is not your country that when you die you'll be sent back. (1:36) You're millions of kilometers, thousands of years away from Earth. Earth cannot become the burying ground of short term death. We are not soldiers dying in the battlefield that they repatriate the body back to the country. We are human beings, we have the right to enjoy the pleasure of the Creation.

You ladies, through your past, your thousands of years of ancestry, have brought this psychosomatic, that you all get, what I call, ALS. At the ages of so and so, you call it menopause. There's no difference between the two conditions. And there is a way to sort too. First of all, you are pushing it back. If we came from 20 menopause, now to 35, 40 and 50, we see menopause now in 55, 60, so you control it, you are pushing it. So, why can't we push it out all together?

And this is what we have introduced these in, because there is a structural, that it'll come into massive, large, what we call, trials, that then it becomes as a standard product, as a standard thing, that every woman, man in the world can rely on. This is not to just change, is to bring the change. And these materials, you will see more and more, (1:38) always psychosomatic, we told you, now we bring social psychosomatic, which means,

when you use it, your partner feels the same. You're connected through the same structure. This is why we put a man and a woman. And then you report back to us. We've seen the results. We know exactly what should come in. But now, it's a larger scale. You supported us with other trials. But this time, you see the benefit. You see the pleasures of it. You see the changes of it.

And we want to bring these kind of technologies directly in the hand of people. Why should I go through pains of menopause where I can still play the game and be part of it and see the body accepts the change of social structure? You sit, you watch all the men who start playing at the age of 40, they say, they call and say, men at 40 start playing, you never look. Sorry madam, the wife has gone into pre-menopause or menopause, active life, now zero life. sorry, you are two cars running next to each other, busy motorway, you decide to brake, the guy is still going. You crash, he has no reason to crash, unless he brakes to see what happened to him, he crashes himself with a Parkinson, and a cancer, and a prostate problem and the rest of it.

We understand this structure. And it's time, science to bring this in line. You don't need to suffer from womb cancer, you don't need to suffer from other cases. (1:40) There are so many diseases in man, is connected to the evolution of what our ancestors decided to happen to our women, because somebody didn't feel good. At the age of 30, "I don't want to carry a child, I have a child, I wish I never had a child." Goes into it, becomes your menopause. Because, the great, great, great, great, great, great, great, great, great, grandmother, at the age of 35 got pregnant, and doesn't want it to happen. At age of 18, an actress doesn't get what she wants, she wishes, she gets ?? ALS and dies because of it. The choice has to be a woman's choice, and not, on our ancestors. And this new technology, evolution, give us that chance. We need to try, we need to bring it in, to perfect it for our next generation, that our daughter, our granddaughters, our grandsons, do not get cancers, depressions and Parkinson's. We are responsible for it, the knowledge is here, we have to try.

And this is the reason we introduced, now you understand the cycle of diseases, which comes out of the disease of our ancestors, we call it menopause, pre-menopause. Emotion brings change of physicality, change of physicality brings to an end, a high fast running car into a stop, and the partner stays on the race car. When you bicycle with your partner together, down the hill, and you're both going fast, you both enjoy together. If you decide to stop, it's you which crashes, but the guy's still going, till he find out, "Oh, he's not there." By the time he finds out, he ends up with different cancers and problems. (1:42) He crashes his car. This is one of the biggest problems, and you look how we got used to it. Parkinson, he's got Parkinson with Alzheimer's.

Why do we get Alzheimer's? Because we don't want to remember, we cut off the memory spoken outside, but inside we burn with it. That's all it is, it's another psychosomatic, it's another ALS. With ALS physically we go paralyzed. With the Alzheimer's, we close the brain side of the man, what we call interaction. Our doctors have not even understood the reason for this.

In next few months, we introduce materials specifically, for change in psychosomatic of what you call, finding the right word, what it would announce it, you would understand, why you get epileptic attacks. 99% of epilepsy comes from the person inside. Unless, it's created by ?? misalignment of the electric currents in the brain. We have all these experiences. We have tested so much. When I got the permission from the Naturopathica in Belgium, was because I was opening this door heavily, and they didn't want to. Belgian government didn't want for people to be found cure for. They tagged me as a criminal, but I found the answer to many, many diseases. To psychosomatic, and they were answering me.

When I was given the Naturopathica certificate to be able to produce the machines and give it to the people and doctors, never came out in the court, this guy has a license by Naturopathica, Alternative Medicine Authorities in Belgium. Because I found the process of Creation. What creates what? How important emotions are. When I was invited to a seminar of 40, 50 people, in a park, in a remote part of Belgium, on a Saturday. I went there, there was a piano on a stand, and they told me, "Can you explain your technology?" I thought this was another conference, I, you know, they sold the ticket. When I finished explaining to 50, 60 doctors in the room, I didn't know they are doctors, they introduced themselves to me, who they are. One of the Knowledge Seekers who arranged this, became Knowledge Seekers, is one of your listeners, he knows what I'm talking about. He organized it, he did a lot of work for this. And then I was told in that meeting, that we are doctors, we heard you're doing this, we wanted to hear ourselves. You have discovered a new way, and we want to give you protection. They went and they paid quarter of a million extra to insurance companies to cover my technology, as a part of Naturopathica insurance. So, I didn't need to do anything criminal, I was covered. Did the Belgium ever brought in to court my lawyer? They said, "If you show this paper, he goes, he loses his license as a lawyer." That's how they got a false conviction. And now you know why. (1:46)

All our diseases, most of our diseases are caused by our emotion and psychology. What we see as afterwards is the accident after. It's the car which you don't repair the brakes, you see the crash everyday, you end up in the garage, the back, the front, the light hits the wall, you hit somebody. Change the brake, you have no accident. Understand why your brake keep on breaking down, and change the line of the brake that you transmit the information, you don't get accidents, you don't need to repair. And this is the reason we launched these new lines. To change the course of humanity by men who understand, men as a Human, man or a woman.

Then you understand. Then, you see, you love your partner, but he's suffering next to you. He ends up with a Parkinson. Go back, see when did the Parkinson start. Look when your menopause started, your pre-menopause started. You change because you can't satisfy the other. You came up with everything, they said mood swing and the rest of it. It's you not, psychologically, not being able to satisfy the pleasure we had, now it ends up with this. Do you like to give cancer your daughter? Why don't you look that this is what I decided, to delay, to bring the end to my sexual life, now has come part of my daughter, and my daughter because of it gets cancer. Because it changes the structure of the

emotion and the salt in the body of her. (1:48) Because she has a slightly different, what you call, structure of the fields than me. So, we have to understand the process.

Our knowledge is not targeted, our knowledge is holistic, totality. What do we need to do before menopause? When you're 18, when you're 9, when you get your first menstruation, how to build it up to the point that it's a confidence, not only in physical, but in social structure and what we call, psychology. That you push this, not when you see the first sign of menopause, you push it to the point that the menopause never comes, till you decide. Menopause is a natural, contraceptive, which your grand-ancestors have put in your pocket. Because, they couldn't have a man who could feed them, the hunter was gone. Now, the hunter is the whole of humanity. You walk into the supermarket, you see a steak from Australia, you see banana from Africa, you see, you want such and such a thing from South America. You go in the shop, the child wants a banana, the father died ten weeks ago, two years ago, you don't say, "No, I don't have money." With such a Social Security, the guy in Africa got paid for it, is to satisfy, to guarantee the survival of your child, to be a perfect child, without needs.

We have to go through this physical structure, till we get humanity not to kill. (1:50) We are in a transition time. And when we come to the point, that we can transfer all these energies, needs of the man, on the, what I call, 'App Life', that you can App it, you get a banana, and it's free, because nobody manufactured the banana, nobody grew the banana, there is no, what you call, plantation anywhere, because we understood the emotion, essence of the banana, and we made it in a system and you have it.

Now you understand, how the structure of the life changes. And how Keshe Foundation is structuring the totality in the social structure of the humanity. Not only to take it into Space. As I said, when we took the first flight, "Okay, you moved, what next?" The food and the rest. Now we take you to a transmutation, now we have the capability to take you beyond. I don't want bunch of sick people traveling.

I wrote to the head of NASA, last week, the week before, that Keshe Foundation has a technology, if your astronauts, two of them are stranded there. Now, they said, "They're going to be there up to 8 months, because we can't bring them down." "They're going to run out of food, if one of them has a ?? stroke." They can't get anything to them. I offered the Keshe Foundation Technology directly to the heads of NASA. They read it, because I see them, because the flash comes on, they read. Keshe Technology, for Space through Cosmic Rays, through the mobile phones which you join, is available to your astronauts. Our technology is in the hand of the Americans, if you need to save two lives. The way we did in Italy, at the earthquake. (1:52) We gave the factory open to the nation. If you don't understand to use it, it's there. NASA needs it, it's there. You run any of these two the couple who have a stroke or whatever, they can't get to them. They come to us, "Can you see what you can do?" We work both sides, with you as a people, and behind, with the governments, with the other structures, and now we are becoming very good at it.

We are suffering very much, because we're spreading too much. But, always been there. When the need was there, you Knowledge Seekers supported us. You have to understand.

These are new cycle of the materials, which there is no regulation, and nobody has ever brought social material. This is a social psychosomatic structure. What I use, changes my husband. What my husband uses, changes me. With us, we bring the love and care to the family and the children. Children don't have to worry, mother is going to die of the womb cancer. Children don't have to sit and watch father having a Parkinson. These are social structures we bring in and this is part of it. Bringing peace, bringing social awareness of each other's existence. This is confined to a family, this is more or less a family structure process. (1:54) And the pleasure of life becomes in the family. It's not for your next door neighbor, unless you're playing with the next door neighbor.

It's a pleasure to be able to release this new structure. And I hope we bring that change in which we are hoping for. And then we'll see it in a larger scale through collaboration with the people who we are collaborating on this side of the technology.

I hope you understood and I hope you understand what this means. If you are going, if you are in, or you passed it, or your partner is suffering with, because of now you understand, could be, don't blame him, don't blame yourself, blame your ancestors for this. It's not my fault, but I can do something about it. And that's why we put this out. And we put in a very limited, because it's got another stage to it, which is coming up very short. Send it back to us, your emotion change, your respect for your partner, the courses of the family. The changes in a lot of other behaviors. Even yourself, walking away from depression, walking from anxiety. There is no reason, as we say in English, "Sorry, I have a headache tonight." Is, "I have a headache to bring us together to be a bond family." This is a change. Headache of enjoying, than headache of separating. And those of you who go with this, please write to us. (1:56) Those of you who see a part of this structure, you're responsible for next generation and generation after. Bring those who can, and they tell us and the same with the other system ?? (you tell).

These are social structure, which brings physicality of peace and that's what we are here for to do. Prepare man for a space in every dimension. In the first session I spoke about the emotion of whatever, Here, the division comes ocean within the family, within the house, within oneself, from his own physicality. All has to be perfected on both sides. You have the first part for the Soul, you have the second part for your physicality. When you see how technology and the knowledge of teaching, gradually is coming together, preparing man for that eventual transmutation.

Are there any questions?

R: Thank you Mr. Keshe. We have a hand up with Dmitry, but before we get to that, I'd like to ask a couple of the practical questions in the Youtube here, from Mick Yale, who says, "Is this new production able to cancel an action on a part of the body, such as prostate, committed by a person other than yourself?"

K- Prostate and these things has to be understood the reason of. And, in a way, these are not medicines, these are not their cure. This technology is to change the psychology of the creation of the problem, which is the foundation of the problem. (1:58) And we have

seen those who've gone through the initial trials, reporting to us how they felt, what they've done, what is changing in life. And in some cases, gives us some results. This is why a very limited number of this has put out. And we follow you very closely. And follow the instruction, as part of the structure, that how to use it, what you need to add to it, and you are in command of the structure.

Will it change? How much will change? Let us know, then we perfect the art. Then we can create conditions for better, better what we call, steps, to bring better changes. These are specific, these are not cure, we are not selling medicine. We are not selling what you call it, Viagra. These are psychos... social psychosomatic systems. Once you use it, you'll understand. How closer you feel to your partner. It's an interaction in the dimension of the emotion. And, it's a natural process. It's not that you get a shot. The way it's structured, is we do 24 hours a day. Day and night, week in, week out. The way your hormone changes is with you, 24 hours a day, day and night. You have to work parallel with, to be able to change the condition. Not add shots here and there, it's a headache, I give it a shot, the headache comes back. (2:00)

Any other question?

R: Okay, let's go to our hand up with Dmitri. Could you go ahead please?

Q: Can you hear me okay?

Q: ... Mr. Keshe, I have two questions. You've actually answered a couple of my questions, so I'm only left with two of them. My first question, the Soul of entity is inclusive of both the Totality of Souls existing within the Magnetosphere of the Unicoise, but also includes the Totality of Souls external to the Magnetosphere of the Unicoise. Is that correct?

K- We are within a structure, so it's a reaction. That's exactly it. As I always said, you cannot blow a balloon up, if there is no room for it to grow. So, there must be a room for it. You understand? So, where... and then we go back in the dimension of physicality, what beautiful Newton's understanding of the field forces. When you push, if there is a reaction to push you back, that's your limitation. Otherwise you can grow into, till you see the resistance. Opposite and equal force, as we call it, as Newton explained it. So, we show this in the Unicoise, but it must be something there that, is stronger than us, (2:02) or in the way it's positioned, that, maybe even in different angle, creates us to have a dimension of physicality, a borderline. So yes, must be, otherwise it'll be infinity of nothing.

Q: Hmm, yeah. Okay. Thank you Mr. Keshe. My second question. Our mischievous Universal Family, that placed the ?? uncalled for Cosmic grain of dust in the manifestation of our Sun. Have they implemented actions like this in previous and or post frames of motion of the manifestation of our Sun?

K- I don't understand.

Q: A mischievous universal family, they placed a Cosmic ?? grain of dust in the manifestation of our Sun, which it wasn't called for, and it's the reason why we have so many problems on this planet. Because of the field strength. Have they done this before? That's the question. Have they done this before to other solar systems in the Unicose?

K- Done what?

Q: The Cosmic grain of dust in the manifestation of the Sun that was not required, that has caused perpetual problems and will continue to cause problems, unless it is processed.

K- You see, you see there is, there is two things to understand fully. If your son, as a child, not Sun as a Sun in the center of the Solar System, you bring him up perfect, (2:04) but in the process of environment he lives in, he become mischievous, or he does something wrong, or he does something good. Is that your fault? Or the condition of the environment? And how much of it can you correct? And how much of it can you encourage?

The Sun is perfect. The Earth through the conditions gone through, has created this condition. The living things on other planets and structures, don't kill the way the man does, they absorb energy. We don't see any trees, we don't see any animals on Mars, on Jupiter and the rest of it. But they all have lives living on them. All within them. We have proof of it. We find life in the deepest ocean, in the darkest places, a full society, community of life, whatever we call them. They have a structure, they follow rules and they exist. Even in the volcanic eruptions, in the center of the magma, we see life.

So, life is not physical temperature, what you call, pressure dependent as what we believe, till a decade or two ago. Now we have physical evidence. So, how come life exists on Mars, on Moon, or whatever else, is not exclusive of this planet, we don't see trees, we don't see cows running, they don't need the Oxygen. Due to structure of this planet, we become that mischievous child. And nobody has been there to correct it. Now we are here to correct it, by the child understanding the problem to sort it out, then punishing the child to sort it out. (2:06) And we have patience, we can wait till the child understands and changes. But the child must...

Q: What if this happens again then?

K- It has happened before.

Q: All the suffering is a result of that Cosmic grain of dust being there that was not called for.

K- No, it's the structure of the center of this planet which has caused it. But you have to understand very simple principle. You will see it, always said, if you turn an electron here, another electron turns to, which is the minutest part we understand in the world of

present science. So when we twitch the structure of the humanity correction, if there is anything else in the Universe, because they're all connected to a common denominator, they twitch too.

Q: So when we stop killing each other, the mischievous nature of our mischievous Universal family is going to twitch and possibly become in line with the rest of the Unicose and not pose a problem again?

K- If there is any, yes.

Q: All right, thank you very much for answering my question, sir.

K- If there is, this is why in all the teachings, we make you understand now, we don't teach for the man, we teach through the essence of the emotion, that the whole Universe understands. We are Universal Teachers. Now you understand. Man listens to the word. The Universe listens through the plasma direction and dimension. Very simple. Once you understand it, the more of you transmute, the more you understand. As I said in the first part of the teaching, if you understand this, you don't need a religion to kill in the Space for, (2:08) the chicken is innocent, because he already believes in the Creator. you understand

R: ... Mr. Keshe you talked about the expansion of the Universe, briefly there. There is a question from Claudia, in our Plasma Reactor group yesterday. And she's asking, "Is there a need to increase the Souls in Space?"

K- The Souls in Space increase exponentially, every second. The Space is so vast, that Souls to be the seed, need a very good opportunity to become a star, to start a cycle. You've got to understand, very simple, if you have the dimension of understanding, how many men, or humans died today? How many cows do we slaughtered today? How many chickens we do? How many animals died today? How many trees we destroy? How many plants we eat? How many carrots we chop? Where do all these Souls go? They don't even become a speck of dust in the total structure of the Universe.

As I said, Earth is not the only place where there is a life. (2:10) And where there is a life, there is a progressive development of what we call, central structure, what we call the Soul. And there is, even in the space of the universe, the limitation of the collection of fields. They always change. They always come to another. The best example of this is, if you want to understand it, put your Gans bottles, two or three of them, take a picture of them, next to each other, far away from each other, and every day take a picture. See how the color changes. It's not the same color as yesterday. They give fields, they take fields. You see, you mark some Gans's if you can, and see where they are tomorrow. You haven't touched it, you haven't done anything to it. It does it by itself according to the balance of the Magnetic (M) fields. And this is what we need to understand.

Any other question?

R: Claudia had another question. "When a certain number of people on Planet Earth transmute, will all the beings on Planet Earth also transmute to a new dimension?"

K- No, just because you want to go to auntie's house doesn't mean everybody else wants to go in the family.

R: Maybe it'll start a stampede if they knew there was ice cream or something.

K- Maybe. As I always said, "If you knew how beautiful is the other side, you all human race will commit suicide today." (2:12) But, that comes out of the maturity of understanding. Not the greed for the ice cream to run.

R: Can that maturity of understanding occur virtually overnight?

K- It can happen any second, enlightenment has no time and place.

R: I mean, would that include vast numbers of the population, that at once, perhaps on Earth?

K- Yes, we have that habit of doing it. We have a habit, we change. How does the revolutions come in?

R: I was going to say, in Bangladesh, we kind of have an example of process that happened very rapidly?

K- It happened in many countries. It would... This is where the revolutions come people, one night change, and sometime Americans push it with a gun somewhere, but the rest of it, some people do it on their own. According to statistics, 85% of the revolution since 1970's, is initiated by CIA. And 90% of the world leaders who died by revolution, the gun was provided by CIA. It's a strange, huh, statistic? Most of them, African presidents who have died by assassination, all was pre-organized by CIA. All of them, they have documents, they have proven it. You have to, you have to watch, when you watch politics. Who does it, for what benefit.

R: Some of the rebel groups in Africa, apparently, are sponsored by Ukraine. They've been given weapons by Ukraine. (2:14)

K- Yeah, because the more they say they use guns in Ukraine, the more Americans give them, the more money they get by selling it.

K- ... The President of Ukraine is become one of the richest man on this planet. He's joined multi-billionaires by money he gets and the money he's gained through this Ukrainian war. The more he drags it, the more money he'll get.

You got to understand, the richest nation on this planet for oil, with the most reserve, is Venezuela. Venezuela has more oil in it, than putting a few countries together. We have a

very oil rich country called Kazakhstan, but it's a landlocked. So, it's still under cover of slavery of the other Nations, who allow them to try, what you call it, to sell oil to, very limited. But Venezuela doesn't have that. And, this is the same. Why do they keep on changing rules, and rulers in Venezuela and all the thing? We talk about, but Venezuela is one of the most richest, oil rich country in the world. Naturally so. And what do they do? Americans keep on producing revolutions, because they want to control the oil.

The, as I said before, the assassination of the, the guy in Iran, a few weeks ago. What's the reason for it? The whole of the problem of Gaza is not Hamas. This excuse, why it was ready to go. We all know on the coast of Palestine, inside the territorial water, they have found one of the biggest, richest oil fields in the world, in Middle East, which can supply the Western Europe, they say, for 30 years. (2:16) Palestinians were just about to start drilling. Palestinians would have become richer than the Swiss and the Austrians. Capital per head. Just doing nothing, sitting at home, having the oil revenue from it. You'll see, they start drilling in next 12 months. Once they finish, then the Israelis point is, we go 50-50. 50% for the Palestinians, 50% for us, then we give Palestine a state of its own. This Gaza War of today, is for the oil offshore.

We've seen this, look at Gambia. Gambia was one of the poorest nations in Africa. Off Georgia Island, they have found a lot of oil, mainly sold to the Chinese. And you go and see the country, we were there. I had hotels and all sorts of things in 1990's in Gambia. I traveled frequently. Now you go and see the Gambia today. Oil brings a lot of corruption, oil brings a lot of conditions.

And this Gaza, what we see in Gaza is literally oil rich offshore, which they have found, and the Germans are pushing for it. And British want to have a ?? large share of it. That's why Britain's Foreign Secretary always spends a lot of time in Palestine and in Israel, pushing the war, till they get what they want in contract. They're actually talking to give 25% to the Palestinians, 25% to the Israelis, 50% between German and British, of the revenue, which has got nothing to do with them. (2:18) And, these Palestinian leaders, they want more. And, the part of this war is because of this oil revenue reserve, which they've found in Palestine. And the reason they demolish it, is because Palestinians, whatever they earn from their share, have to pay to the Israelis to build their whole structure back for them. It's a constructional contract between Israel and America. Every few years we destroy their Gaza and their God knows West Bank. The only source of getting material is by the engineers from Israel, so they become the supplier. It's a very good business to work. I've been there and I know exactly what I think of the situation.

Any other questions?

R: Yes, we have a couple of traveling into Space questions, from one from Claudia and one from Gail. I'll read Claudia's first. She says, "When we are traveling into Space, while here on Earth we have our sensations, but in Space how would our Soul feel these different sensations? Like different pressures and different temperatures?"

K- In the dimension of the Plasma we don't have this, when you travel in dimension of the Soul. In... one of the things man very soon learns, in going to Space, with the Moon or maybe Mars, you'll be lucky. But, in... beyond the Solar System, you're very unlucky, you can't land on certain planets, because the land looks the same as composition material here. (2:20) But, the field strength is different. So, sorry you lose half of your liver. Doesn't matter you wear a space suit or not. Because the strength of the magnetic field of your liver matches the environment, it's not there. So you are dead.

The only way you can go and live is go through transmutation and then convert to what can exist in that condition. Maybe your liver has to be made of gold, in a, what you call it, liquid or flexible dimension. Liver with protein of today, sorry, just matches with the environment, it's not there anymore, sorry, dead. This is why we teach so deeply about transmutation. This is why the teaching is so deep and is going deeper on this. You call it a Soul, we call it Central Energy. This is what, how you understand. been, we speak it, but understanding of it is different totally.

So, you have to understand, you need, you have to understand the new technology, the new science of your own creation. It's been there all the time with you, but you didn't know. Now you know, you gave it every name possible. But you never knew, you are in charge of it. You are responsible for it. You are responsible for the survival of your integral and total integrity of the fields of your creation. Nobody else.

So, you're not aware of it. You cannot go to Space, sorry, you land on the Moon, of another planet, (2:22) of another Solar System, and in that Moon, unfortunately Calcium doesn't exist magnetic field of. You are mush on the floor. Even in the spacesuit, because the fields crosses the spacesuit. So, you need to learn transmutation.

<< Farsi Language >> Means, if you don't want to be embarrassed, you better be the same as others. If you want to exist, you have to understand the environment. So, you decide.

We have shown, and this is one of the biggest problem with the scientists, today with Keshe Foundation, they are used to a Plasma, because of the false technology in the matter state, high temperature, this, that. He said, "No, it's a room temperature." It cannot be, Plasma needs a high temperature." We call it the cold Plasma, we call it room. It cannot be what you do, it needs it. This is what happened to us, as I said before, with the company in Belgium. When they tested the first couple of thing, they saw Fluorine and what you call, the crystal structure, said, "He is, because he's Iranian, He uses nuclear material and he's a terrorist." Because I wouldn't give the... Because I didn't give the technology to Belgium, I became a terrorist, because I... all of you now produce Fluorine in the Coca-Cola bottle. You're all terrorists now. Belgium wants you into prison. I've made terrorists out of all of you Knowledge Seekers when you made your first Gans's.

Because you don't understand, get your Nano plates to the people who can... They tell you how much Fluorine and the Crystal structures you produce. I paid heavily for the stupidity of the man, (2:24) but man will pay heavier for their own guilt. When I asked for the paper from the company in Belgium, they said, "No you can't have it because you

are producing, what you call it, SP3, and only can be done with Gamma radiation and nuclear material." Coca-Cola now is a nuclear bomb, because it produces Fluorine and the others. The stupidity of the scientists has brought ?? crypticity of the man in attachment to this Planet, nothing else.

Any other question?

R: Okay, from Gail, who says, "The STM has different emotions than that of the STP on Earth. When in Space, how do we learn to use the magnetic fields of the emotions of the STM?"

K- It's you. You'll know immediately. The way when he came out of the womb of the mother, you knew how to breathe, you'll learn that as part of your breathing, it's part of your life, you don't learn it, you can not exist. You learn to work with fields, you learn to exist by interaction of the field strength. And the physicality follows, because that's the only way it communicates, or is interacting with the, what you call, the life of the man. The dimension of the Soul. Don't worry about it, it's just like a natural process.

R: Well, can, can you learn before you get there? I mean, it's like swimming, can you learn to move your arms before you dive into the pool, sort of thing? (2:26)

K- You already know it, but you're not aware of it. When it comes to it, do you jump on the street, from the pavement into the asphalt, just because you know how you dive in a swimming pool. Everything in its own place, the minute you come to that point, the Soul knows, it just flips. It is... you have a fear of unknown, but it's known to your internal structure, you have this in you. You know some, if you get, let's say, get attacked, you run like a rabbit, and you say, "I didn't know I have this thing with me, I could run away from the earthquake or the building falling." You don't know till you have it.

It's the same with these materials, you do not know till it's touched, and you see how much you have changed, and then you say, "Oh, this was me." But because it came so naturally and you accepted it, it made me of today. Those of you who go through the process with this new the social psychosomatic structure, you will enjoy life beyond imagination, because you appreciate it, because you know what you lost and what you gained. Does not matter about the age, or the place, or whatever. Even if you went, you just go back how you used to be when you were 30, 40, before pre-menopause and menopause, and before you get a Parkinson and the rest of it and whatever. And then you see the emotion now, you're 70, 80 years old. The pleasure of life, and then how that pleasure changes to your partner, to your children, to your environment. (2:28) And brings peace and that's the whole concept, to understanding of the technology, to bring peace, that the man become man of peace, even in time of adversities.

Any other question?

R: From Gerhard in our Q&A here, says, "Good morning Mr. Keshe and to all Knowledge Seekers. Who is the father of Mitra's child?"

K- Pass. Next question.

R: Okay. From Lisbeth, "Thank you for your love that you give us, and knowledge. Months ago you told us that 90% of the Souls of the people who die no longer wish to return to Earth. It maybe it has a relationship with the fact that a high number of couples in the world, do not want to have children? Some regions and countries have become old with concern about the future of these populations."

K- No, it's just too much work being back. When you're enjoying yourself on holiday, why do you want to come back and work? Life on this Planet is too harsh, it's too much work. Too much work. This is, I said this to one, someone and maybe you understand it. There's so good outside, that they don't come and visit you. You dream about them, you go to them. That's how bad it is to come back in a physical dimension. It's too much hard work, it's too much problems. (2:30)

R: So is that related to the number of couples in the world who don't want to have children? Is that directly related to that or is that a separate issue?

K- Not really. If you look at statistics... I watched these statistics, I watched a lot of... I read a lot of research papers in conclusion of... The majority of, depends country by country, is not general. A lot of couples in certain countries don't have, don't want children, for many, many reasons which they made up for themselves, to confirm they exist. And they find the same kind of mentality, so they both confirm they exist to each other.

We see this in China. In China, more girls want to stay single. Because, there are no competent boys to do, and secondly now they have a freedom. Then when they get married, most of the Chinese couples, or well educated, Next two, three months wages are already spent, because they become spent. They are more important than creating a child to be important to them. And this comes out of one child family principle. They were, they... You have to understand, you have mother and father, you have the two grandparents from the father side, two grandparents from mother side, and you are the only child. Six Souls, six physicality, looked after one little cat. (2:32) And anything you want, doesn't matter you're a peasant or a doctor's child, is provided for you. You have two servants, 24 hours a day, at your service. Selfishness. And then they can't get this from another partner, another man or a woman. So, they become self-centered, they are more important than them.

Then you go to the West, in the West we have a different reason. Why people don't want to get, have children. The cost of living, I have to work on top, there's nobody to look after because, there's no mom and dad in, like in China. Chinese parents are going through the second birth of child, the grandchildren is theirs. The parents give the birth and, "Papa, you grow it up." In the West, the financial position, condition, has created, "I want to have time, enjoy and pleasure, so why should we bring a child?" "It's going to be a third world war, and why should we bring somebody to serve?" It's excuses we make.

I have a very good example of this. In 1980's, there was a lot of, if you were in our time, that is going to be a World War III and all this hype which was going with the Russia and China and the rest of it. And I have a highly educated sister and my brother-in-law, the professors and the specialist doctors, they're coming out of University, both highly educated, and their motto was, "We don't want children, because by 1985 it's going to be a war, and this, because the hype was created." (2:34) And, my sister had a child, 1985. I said, "Excuse me, what happened to the world war?" She said, "I love to have a child, doesn't matter the war or not, it's my responsibility to look after it." The hype is what they bring us. And what we believe in, and then we just build it up. Or nowadays it's much easier to go to a disco, go to a pub, go to a restaurant, come home late, spend the money on the clothing and the car and everything else. There's nothing left to bring a child up. And this is the problem of this, many couples don't want children, because of, "I am more important, or excuse, I can't secure the future."

Any other question?

R: A question with the new products. From Antonio in the Q&A, "If one partner uses it and not the other, will there still be positive changes?"

K- Yes, for the person who uses it, because there are, them set individually, but at the same time, they have a connection with each other. These are in a way, psychosomatic to a person. But you have to understand something very simple. When you use these kind of interactions, due to close proximity of relationship, you always give some. You always, you know we say, (2:36) "You put a little one, you plant it and then ... The bigger one feeds the smaller one." You always create that connection. It's not a medicine you take to yourself, it's change of the fields in the body and you're always, you're in touch with your partner. It's amazing, we... data we have, if we tell you the things we have seen, is incredible what these Twin Systems in other researches are showing.

Any other question?

R: We had a question from Malcolm, whether all Alzheimer's and dementia is psychosomatic. I think you answered that earlier...

K- Partially. If you, if you, I give you a very golden key, because we can't reach all of you, to assess. If you have somebody with Alzheimer's, this is scientific research data we know, it's not something that comes through Keshe Foundation itself. We... I developed it in a much better, deeper way and it's correct. You ask the person who has Alzheimer's one question, And then that question tells you, if there is a chance of recovery. Then you have to assess the depth of the Alzheimer's once you get your answer. Ask one question, "Can you sing me a song?" No, I don't know any songs, I don't know any music, any songs. (2:38) Can you sing me a song? If you're most probably your father or your mother and they went through a natural process of marriage in past 40, 50 years, ask them second question, if they say they know. Ask them, "Can you sing me the song or the

music which was played on your wedding day?" If both parents are sitting next to each other, and you ask that question, if he says, "I don't remember", the other partner does, ask them to ?? hum it. If anyone with Alzheimer's can even make the noise of the music, 99% you have a chance of recovery.

To what extent, is how you use the structure of the materials and the fields to bring it back, and it doesn't go with CO2 and the rest of it. It's a specific material you have to use for Alzheimer's. The UBESUS (Universal Body Enhancement Spaceship Units) unit will be equipped to answer this with Alzheimer's in a much rapid way, due to the development of knowledge that we can transfer technology from the old type to the new type. It's new development, which needs to be adjusted.

But, if you have Alzheimer's person, ask one question. And always try, if it's still the partner, the wife, whatever, alive, to have present. But if you know you've been told about it, ask them the question. They try to wiggle around it in a way. I've seen tens of cases like this. (2:40) You say, "Oh, do you know Beatles?" "Yes." "Can you sing one of their songs?" "Oh, I know, but I cannot, I can't remember." And you start singing 'Yellow Submarine' and just hum it, and see if they go, "hmm" with you. 99%, if they start humming with you, recovery is 100%. It can be, but to what extent, you can play with it.

But, you have another problem with these people with Alzheimer's, is, they receive a recovery, you have to catch them. Because, when you have Alzheimer's, you're treated two way, you are ignored and put aside, or all the time they come and pay you attention. Depends on what you call attention to the person. Somebody gets a lot of attention if you say to them, "Hello" once a day. Somebody gets attention when you say to them, 100 times "hello" today. To them is too much attention. And, they sit on the seat of 'kingship.'

We had a case, the father of one of the well-known doctors. And the father-in-law, one of the .. he used to be the accountants of the Keshe Foundation, a very well-known reputable charter accountant. I don't know if he's still alive or not. The daughter said she had the placard of the Keshe Foundation in her office, saying, natural, what you call it, certified by Naturopathica, that it was Mehran Keshe, and Keshe Foundation can do this. We have this certificate. You most probably find it on the Internet. And he said, she said to me, you know you're helping me with all these cases. Can I ask if you can help my mom, my dad? (2:42) I said, why not? She said, can I bring him, come home, we meet at home, because he, my mom feels better at home. She doesn't like, doesn't want to come here. And, we met at their home. They live in a beautiful part of Belgium, very nice. And, the first time I met the father, he was sitting on the chair, he wouldn't move. And, she said to me, "What do you think, after you done your thing?" I said, "He's recoverable, he can recover quite a lot, if we use... you are a doctor, you accept the supervision, and then we do it together and we see."

After a very short while, they brought a bike, riding in this pebble stone road, which it was built, it was in a protective area of the city. And, he... she said, "We go for a walk with him." I thought, "That's very strange." It's the first time I saw, after second, third time, after two, three months, that we go for a walk, we went for a walk. And as we

walking, she said to me, "Do you know, this is the first time he start walking after 15 years?" I said, "What?" She said, "He, because of the Parkinson's and Alzheimer's, he could not walk." That's why every time he was... he came, he was sitting on the chair. And, she was so proud, she said, "This is the biggest gift you could ever give me." "My father and my mother walking with us." It was very slow steps. Then, he start cycling. (2:44) They went to Holland, he start recovering.

But before to get to that point, how that position came was, the guy was still claiming he cannot walk at home. And he would sit on the chair waiting for everything to be done for him, because for 15 years she did, the mother did, they were all in their seventies. But the mother knew, how come he walks with my daughter in the street, but when he comes home he doesn't do anything, and he was totally paralyzed. She says, "I'll go, I'm going to set him up." We didn't know this, she told us after she did it. She says to him, "I'm going next door neighbors, I'll be an hour or two." She goes round the house, goes in the back garden, looking through the curtain. She sets it up. The guy gets up, makes himself, going for a water, goes to toilet, and she watches it. When she's out, he's out of the room, she comes and says, "How come you playing game with me?" "What's your problem?" Because, he pretended, now he recovered, that he could walk. And he pretended, he has Alzheimer's, he can't remember. He remembered where the tea was, he remembered how to make a cup of tea for himself, wash the plates and everything, put aside that he doesn't show. And every time she went out, apparently he was doing this, but she never noticed it. She puts the television and watches it and everything else. So, he changed because of that.

But after about six months or so, I was talking to the daughter for other cases, because we used to meet every now and then. She said, "Can you come to a meeting, my husband, who's a very well known ??, (2:46) he's organized a seminar for you to explain this, that we can bring this into the market. There, there are accountants and there are financial people who want to support." When... it was a beautiful office, very prestigious office. And, they said, "If you wait till the people come, and then you come into the room, that'll be better." We're sitting in the kitchen, and the guy was sitting there, and the doctor said to me, "Mr. Keshe, I'm ashamed to have you here, because whatever you did was temporarily, and it's disaster. And I don't even know how, especially in past week or two, to bring you here, but because we organized it, just explain to them that what it is. And we bring it to an end, because what we saw with our father was temporary, and the rest of it." I said, "What's the problem?" He cannot talk anymore, he doesn't walk anymore. And it was very shocking to me to listen to hear to this, because I knew this is impossibility, once the repair is done, it stays. When this number of, what you call, financial people, bankers and institutions, in the conference room of the guy we talked to and everything, she said, "My father has to leave this, the lady." And so, we... it was like a open hall. And, the mother stood up and the father hanging to her, shaking, you know, like nothing works and everything else. I noticed there is something wrong. The guy was so busy pretending to control everything, and he knew today was his show, because if it doesn't work, you know, then he can abuse the whole family. (2:48) I saw him, how can I say, dragging and hanging on the woman, very bad. I just grabbed the mother and I pulled her back, and we all watched him going. And all the counselors, the bankers, they walked

behind us. This guy opened the door, went all the way to the car, from all the way from the door of the office, to the pavement, to the car, and he was standing there, and the mother said, "How long do you want to cheat us?" "I've been in the office and you walked all the way yourself, and at home you say you can't do anything."

The doctor had to apologize to the people that, for the conduct of the father. And I said to her, "There is no use for us to collaborate anymore, because when you don't believe in what you have, and you get played by your father, there is no use to work."

People who get Alzheimer's, 90% who remember music, can recover with this technology, in the hand of the doctors. We are providers of the technology, not providers of the service I'm looking at. And I've seen this a few times with the Alzheimer's people. I've seen this with the MS people. They recover from their position, but 'kingship,' ADHD is more important, "I'm more important than my illness, because then I don't need to do anything." Ask some of the Alzheimer's one question, and if they don't, they can't remember, give them a hint. The music of that time, they enjoyed. (2:50) Usually, all the people know a song from Beatles. All the people know their National Anthem. And you start humming, and then they start humming. And if you hear that, the recovery is quite possible, 99% through this technology.

There is another kind of Alzheimer's, which comes through solidification of the brain cells. That is with the new development in technology, possible to handle. We'll learn that one through Corona. As I said, clinical trials in one of the leading countries, in nations in the world, has started. And all these will be handled through one of the most reputable companies in the world. And we are just provider of the knowledge and the technology and they are paying for all the expenses of, and everything else of, to get it through the certification and registration and the rest of it. They have accepted, because they are shocked in what this technology has done, to preliminary trials, step by step we grow it up.

In Alzheimer's, one of the handful, couple of handful of the cases, conditions which has been accepted. These trials have already started with this organization. They're in the medical field and they know what they're doing. In Alzheimer's, we announce it when it's completed, we announce it when... we can literally walk people with Alzheimer's, you need to train the doctors how to handle it. (2:52) The aftermath of Alzheimer's, you know in the... in the present matter state technology, when you take a medicine, they say it has a side effect. The side effect of people with Alzheimer's and that kind of condition, is abuse of the trust and ADHD. Because, they don't want to, what you call...

<< audio cut >>

R: Hello Mr. Keshe, I think he's cut out there briefly, just ...

K- ... System cut off.

The biggest problem, side effect of the new technology, is not physical, is not psychological, is the seat of control. They are so used to everything done for them, now they have to do it themselves. And they don't want to do it, because now I sit, I get served. And, if you catch them and bring them back, slowly, slowly, they'll do.

We had a case where the lady was a Alzheimer's for a long time. She came with her daughter and her husband. She was the patient of the same doctor lady with the father. They came to the surgery of her and she loved pancake. But she didn't know how to make pancake. Alzheimer's has taken everything away, she didn't even know how to walk, how to put clothes on. (2:54) We did a test, as I said, with the music, with her. And she just could remember a little thingy song. I said, "We can work on this." And about a few months later, after we went through the post and everything, the husband, there was an accident or something, had to be taken to hospital for long term. She was home alone. She could not wait for the daughter or the... to come to go look after her child and come to that house to look after the mother, because of the father. The mother start paying all the electricity bills, everything she knew. The day before accident, I can't remember anything. The husband had to do everything for her. They abuse the process, you have to watch it, you have to mark it.

It's the same with epilepsy. People with epilepsy are one of the biggest abusers of control, once you get them out of this system. Success rate with epilepsy, with this technology, is 100%. The process, we've been through with the people, but slowly, slowly, these will be introduced by this International company, and spread across the hospitals and world of medicine, because now we are stepping back from it. We're just the supervisors, in providing the facility for the trials.

And you see it, there's the... I've seen beautiful things with this technology. But unfortunately, the greed of a king or... (2:56) and his entourage, brought the Keshe Foundation to this position, but they'll pay for it in time. Alzheimer's, you get them to sing a song, get them to the point to remember. If they go, "mmm, mmm", you sing a song, they try to follow you, 99%, 90% you can, using the technology on the edge, which I know exactly how it works, there is a huge success, you get 80, 90% of everything back.

You got to remember, when you look at Naomi, even with the brain, as Giovanni said many times, "The doctors told us, it's like putting a mixer in the brain for ten minutes." We brought everything back, including the memory, and all the emotions. And if somebody who's got a piece of the brain, and total damage, can get that, if you understand the science of the Creation, like we do, you can get everything back, but if we don't get it back, it's not that the technology doesn't work, it means we haven't understood the method of getting to it.

It's not a medicine that this medicine doesn't work on me, there's something wrong with it. This suit fits everything. It's just you have to find out which button you need to put and how to move it. You'll find a solution for it.

We need, I think we have room for four more people for Saturday or Sunday session for the transmutation, if anybody wants to join us. Go on the website and register please. It's really very nice because it's very, what you call, private. (2:58)

Any other question?

R: Okay, we have a question in the webinar chat from 369, who says, "Can you explain?" And says, "For this specific instance, there are many others, but I just want to know about this one. In Space, when you go or are brought somewhere by others to interact with others, there is a sort of void or empty space, separating other beings from you, while others are in front of you. You can see them, they look different, and some talk to you mind to mind. What is this place? Is it some sort of meeting place, or like a Space Station stopover place, or what?"

K- Can you repeat?

R: Yeah, it's a little hard to understand, but in basically, he's saying, in Space, when you are brought somewhere by others to interact with others, or when you go to Space, there's a sort of void or empty Space, separating other beings from you, while others are in front of you. You can see them, they look different, and some talk to you mind to mind. What is this place? Is it some sort of meeting place, or like a Space Station stopover place, or what? I think you could probably give your answer, that you weren't there at the time. So, you don't know.

K- You got a very good, you learned. That's good. (3:00)

Okay, any other questions, shall we call it the day? We're nearly going in three hours.

R: Yeah, Ivan is coming in at the very end, once again here, and says he has a question regarding the transmutation. Would you like to take a question from Ivan?

K- Oh yes, no problem. I'm waiting for Jalal to pop out somewhere now.

R: For who, pardon me?

K- Jalal usually pops out the last.

Q: ... Good morning to everybody, I'm sorry I'm late, just overslept. Hi Mr. Keshe, so I was practicing a lot in the transmutation and I'm able to achieve a condition, but I cannot achieve this transmutation. I feel that I'm very near, I just don't understand the condition that I have to achieve within me in order to go to that place. Basically what I do is that I'm pulling very softly the fields into my spinal cord and within my brain like really, really soft. I until I feel that the tube is full and then I feel that once I pull the energy is going from the center outside to the body and I continue to do that for like five minutes and then I take very deep breath a couple of times and I try to pull it very strong to the center and this brings a feeling of coldness like really, really everything within the body

gets very cold and then I can feel the pulsation within the lungs, (3:02) the heart, and everything starts to pull like it's together. And in that condition, I managed to project my mind within the array within the spinal cord, I think. And if I think to experience an emotion within a magnetic field, I can just think that I want to experience it and I'm there. And that was very weird. Like, example, I was trying to experience what is love, and I feel the field expanding, like, almost the whole room. And then I was like, I want to experience freedom, and the field crashed back to me, like, really strong to the center, something like that. However, I was speaking with some of the Knowledge Seekers in the Plasma Group, and they say that when they transmute, they feel this push from the top of the head, and they can do it. I'm just not able to understand what condition I have to create within me, in order to keep this transmutation.

K- Something I wanted to ask, is any of you, you join us on the Friday sessions?

Q: Me, no. I joined on Wednesday and I ask them how, about their experience for the Friday session.

K- Are there any of Knowledge Seekers who join us on Friday sessions, would like to talk about their experience? If you are there and you want to, can you raise your hand and we give you the microphone? That people understand what transmutation means, because you've been there many times. (3:04) If any of you wants to speak and explain what you feel and what you go through, please.

R: Ok, Mehrnaz says a hand up here, and she's somewhat a veteran, I guess you could say.

K- Yes, she is more or less in... There are many people who are present, and they've been in most or some of the sessions. How do you feel? Where do you go? What do you do in these sessions? Because we don't interfere. We try to, we wanted to interfere last week, but what came out in the first few minutes, what we saw on the system, was before or after not to interfere. And let's see what they do. It's just you have to learn to fly. It's like your mother brings her chicks up, and then it brings them to the edge of the, what you call it, the nest, and just leave them for them to take off when they are ready. Most of the Knowledge Seekers are in that stage, who join in sessions. It's just that they have to learn, So they explain to us what they feel.

Mehrnaz, do you want to explain? You have to... You've got to understand the difference between this. Mehrnaz, can you wait one second, please? You have to understand, as long as you control it with the thought in the dimension of physicality, you're still playing within yourself with, with the matter state of the condition. You have to learn that intention and emotion should bring you to that position. Not thinking, it's a very big difference. Would you like to tell us, Mehrnaz, because you attend all these sessions?

Q: Yes, thank you very much. (3:06) I think I don't use, I don't need to use the body or the brain or the spinal, mental. I can use my thoughts to direct it to places I want, and I

chose to put it on some parts of my life, which I couldn't get in. And amazingly, it gives me like a flashlight, and I can easily go to that place and get enlightened about the how and things like that. And that's very, that's at the moment. And then when there is a time, then I go around, if you want, universe or whatever, And I try to find a Soul available between those I like. And when they... when we had much time I did that, and I could be in front of a saint, Virgin Mary, but not bodily image, but just the Soul image, energy image. But, but with the lines I could see the person and it was tall and she was... then I talked to her. So that was when I really had time and I had finished with the personal things I want to enlighten about. And I don't, I just, I'm just free as you said, to go where I want. And I trust, and I think that with your, you help us to expand our Soul. And getting more and more strong, like the last time was strong. (3:08) And it's very easy, it becomes very easy to, if you want to, in ??to travel. So, it's, it's just a Soul who is working for me. It's just a Soul who gets free to go. And I feel, as you said, learning more, kind of learn how to do it, how to, I kind of trust more and more, and just the pleasure of visiting your, deciding, as you said, you are the captain of your Soul. So, I use it as the ... yeah, just expansion of the Soul, to permit me to get out of normal situation.

K- Thank you very much.

Q: ... Thank you, I think that we speak about different things, because when I was speaking with the other guys, that achieve this transmutation is almost that you are providing the vehicle when they put these headphones on and you just project some ray and they are just achieving the condition. It's like they are in a car but you are driving so they just go in the car. They don't know how to drive it without these headphones. I'm not able to understand how to get to that condition, so I can actually go in the car and I can drive without these headphones. Like, I was trying to expand the Plasma by pulling a rays into my brain, and then in the same time pushing a little bit, so I can squeeze it. (3:10)

K- You are doing the thing which the guy was doing in Italy, putting a cup and trying to force it by forcing, looking at it and pushing his head. Secret of transmutation is giving, not taking. You cannot catch a fish, if you don't throw a bait out. You understand?

Q: You mean that I have to expand the field until it connects to another field?

K- In a way, yes.

Thy shall not steal. You are dealing with the plasma. You're dealing with the reality of the Creation. When you go take everything in, you're taking from somewhere which you are not supposed to, or not a connection at that time. The secret of transmutation is to expand. That's why we put the headphones, we expand your energy field. We don't use the headphones to compress your energy that it explodes. It's not a Tokamak nuclear Plasma reactor. You understand?

It's the way you go to sleep. The way you go to sleep, you see the difference, I explain to you something to understand the structure of these headphones. That's why they are so important. When you go to sleep, your condition is that, you usually connect to where

there is no Calcium. Your ears and your eyes. You have your nostrils. (3:12) The same kind of fields you connect to, which brings you the senses. You go to grandma in your sleep and you smell the food she used to make, 30 years before she died. You understand? Senses, specifically, directionally, have to go out, to come in. This is why we have introduced the eye, what you call it, goggles. People who use it, they understand. It allows opening, it allows dimensional field opening, not to the Soul.

Where you have a skull, it's very hard for the field of the Soul to go through it, because the brain is made of structure of Calcium and then it's thickened by a dam which is called the skull. The only passage left is through the eyes and the ear. With the new system, which we brought in, especially last week, we connected to the emotion of the STM and the physicality of the man. And, this allows the expansion, in a way if it was a needle hole, now we make it a huge hole. We take the limitation off.

You got to understand a very simple system. If you understand about the physiology of the man, why your Soul cannot, or doesn't get a chance to go expand, during your waking time. When you sleep, when you're alive, when you walk, when you talk, there is a secret in the body of the man, that, as I say, (3:14) if doctors knew what we know, they would... First of all, they have to oppose it, because it doesn't go according to what they've been taught.

(I'm trying to get hold of the whiteboard. Let me just get a whiteboard and tell you what I'm talking about. You have... Why I ended up in this again? I'm back in the old board, Rick. Can you give me the whiteboard please?)

R: Okay. Just a second here.

K ... You have your skull. You have your point of your jaws and you have your two eyes, and you have your hole with your nostrils. The problem with the man is this thing. Very thin blood flow. (3:16) Very strong, two strong veins on the side of the arteries, which they go to the brain, to the head. This blood flow, which is mesh flowing, is the reason, you cannot dream during the daytime. Because this blood, in its Amino Acid, has a Calcium base. This is a solid Calcium, the skull of the man. Your eyes uses huge amount of blood, and your ears continuously does. So, all the holes are closed, you're continuously breathing high speed during your awake time. Once you go to sleep, this weakens. This guy does not have the power he used to have, to suck everything in here. So, you open the channels, for the, what we call, energies which are held here, to be able to go out, to interact. So, the expansion comes, sometimes you say, "I'm daydreaming", sometimes you are walking and, or you're sitting down or whatever, and you start, you called, "I was dreaming", is just because this blood pressure force has changed. So, you go into the state that the Soul can move out, can expand.

Our system is this, up to now you had the headphones, we opened these for you. We gave the Glasses out, the new Glasses are totally different design when they come out, (3:18) when we start putting them out. If you had the old Glasses with the new Glasses, you will feel the difference, they're totally different composition, but the old Glasses still do. So, we are in a way, changing the blood flow in this area, and changing the blood flow in this

area. In a way, we create a condition that the 'Chap' can go out, can connect, and that's why this system work. Because, the blood flow is still there, you're awake, you're still thinking and everything else, skull is still there. We change the field area of field forces, field strength change. But, in a way that allows the Soul to change, to interact.

And that's why we're promoting these. With the people who use the headphones of Apple or whatever, we do the same. But we send a different message in a different structure to this. The Headphones with the Unit, Hand Unit, are already connected to the Keshe Foundation Research Center. We don't even need the earphones, we don't, but we always put it there, because it helps to go a step further. We don't position those of you who've been with us, the headphones, the remote headphones, anymore on the ear, because we touched the emotion of the Soul. We create a condition. You are the player. I give you a racing car and a track. It's you how you drive on that track and how you race it. (3:20)

If you know how to control this blood flow, you can open the cage yourself, you don't need it. And doesn't come by pushing it. Pushing it is job of man. Understanding to collaborate with it, is the job of the man who understands how to work with his Soul. The minute you said, "I push it in and then try to expand it," it means you haven't understood the principle of the transmutation. We open these systems to expand, we don't compress it to explode. This is not a fusion, bring it in, crushing it, that they get energy out of it. That's a habit of man. Space is opposite.

Traveling the span of the Universe, you have to see where you are going, you create a line and the line gives you access to go. This is how you see the light of the stars. I don't know why you, Knowledge Seekers don't understand this. You don't need to push it, you need to understand it. And then understanding it, accepting that I have the capability, I have the understanding to understand the world of Creation. Now I can drive, I can go in a further city. Before I had a bike, only the next village possible. I bought a car now I can go to the next town, I can go to the next country. Now you have a tool, you can go to another planet, you can go to another end of the world, what you call it. But you have to understand the process and don't get lost on the way. (3:22) One day, mankind will realize what a gift we have given.

Any other question?

Q: Can I say something also, if you permit?

K- Yeah.

Q: Sometimes we can use these experiences to connect ourselves by ourselves, without going through the machine. An example, when we had the program of eating with Creator, we experienced the moments we could eat Chinese food, etc. for example. And, that feeling, we get it. And, sometimes, another time, when we are in, at the table, and we don't want to eat of that thing in front of us, just we can, at least at the time, we can connect ourselves without the machine, to that feeling of that ?? rays, or whatever. And then, we, we don't feel like eating. I don't know how, how long it would last, but it, it has

been, I have done that also, and it worked. It, I think, to, the exercises of Soul connection at 9 PM, helps us to relax and connect our Souls, use our Souls to go out, use our Soul, or use our emotions. Or even in the Wednesday with the Brazilian group, this emotion of Soul connection, guides the person to have a touch of what it is, (3:24) the Soul which can go out and get directed to some place. Thank you.

K- Thank you very much. Are there any other Knowledge Seekers who would like to share with us? Any of their experiences? They are very shy, they always stay behind that's ...

Q: I just want to say thank you because this brings a very different perspective to the table. I never looked at it in this way before.

K- You cannot fish without throwing a catch. What do you call it, a bait. You cannot take ?? till you go out. And it says, "Thy shall not steal." So when you go to concentrate to bring it in, you don't know what you're going to get, depends somebody from a planet Zeus, going to be sending you a link which you don't have no connection to. But when you throw a bait, because it's your wish to see the mother, or go somewhere, or grandfather, you already say, I'm here. Would you like, can we talk?

Those of you who will use this new Twin Gans's, you'll come to one realization. And that is, your intake of food changes. Your limitation of eating changes. Because, it's not because it's a diet thing, it's just because you lose a lot of anxiety, a lot of subconscious pains, suffering, emotion, goes. And when that goes, you don't need the energy for it. So, you will see a change even in your eating habit. We, we have a good structure of this, we know what it is. (3:26) And, you will see change of behavior, because now the Soul, the emotion is satisfied. And we would like to know all this when you use it. And as one said, "I found myself after 40 years, who I used to be and I enjoyed to be, and menopause changed my life. And I'm getting it back.

And it's the same with the people with the Fibromyalgia, we see the same structure. There's no difference, because Fibromyalgia is a self-inflicting psychosomatic. The people which go through the process of the, what you call...

(If I can get a black, I'll explain to you. You see, when you have... I better clean this up, then I can show you something in a different way).

When you have a Fibromyalgia, this is your body, I'm not very good at it, except the way it is, this is your body, not mine, mine is much uglier than this. And this is the head.

When you have a Fibromyalgia, places you were abused, places where you hit the abuse, when you were abused, are scattered around your body. They are in different places.

They sit, depends how you have been abused. When I test a person, I can tell you if they've been psychologically, verbally or physically been abused, because it's the way it works. Body hides in a specific way in certain things. When you are abused, and you hide the knife, you know, it's like somebody hit you and you cover yourself, you cover yourself, the pain for nobody to see, in points in the body. (3:28) But the body doesn't forget. So, this point of abuse here, is there for years to come. It's been wounded, but it doesn't heal, because continuously it's in the memory.

To keep this pain in this position, you use 2 calorie a day. Abuses is continuous. You have two, three hundred points in your body, which are all injured, each one uses 2 calorie a day. Just to keep the pain, to remind you, this is it don't let it happen, this has happened, this is your fault, the rest of it. So, psychological pressure, plus the point of the pain, uses about 3 calories a day, let's say. Now, you have 200 of them. You've been raped by the uncle 200 times, he's touched you the wrong way. The mother shouted at you, abused you psychologically for 10 years, you have 200 of them. So, you have 200 by 3 calories, that's 600 calories. Average person, let's say, needs a woman, 1500 calories a day, let's say. You, first of all, because of the pressures, you might eat a lot or you might let ?? up. You need 2,100 calories, because you have to cover these pains. Now, not only you don't have the 600, now you are at 1,500. Plus, as you don't have that 1,500 to start with, you're in a dilemma, and your dilemma is very simple. Your dilemma is, you take 1,600 - 1,500 calorie a day, (3:30) yeah, minus 600, you're left with 900 calories. So you're short.

What does this bring you? You don't have the strength to work. You don't have the strength to walk. Because you're short of the calorie the body is taking. And the more you take, the more points needs to be fed. And all this, can you bring the picture down, please? Then you cannot reach these points. With the new technology, we handle this guy here. So, first thing is, you don't have three calories short. You are two calories short. So, in the first weeks, you are 200 less needed. So now you have, sorry, put it down here. Now you're short by 400, so now you have 1100 calories a day to work with.

As we change the process and the body starts repairing itself through the process of the psychosomatic condition, you are literally gaining slowly everything back. So, what you eat and what you are left with is 1500. You live a normal life, you are not short of energy. Because, psychologically, the repair has been done. And, because it's psychologically is done, it's like a cancer, (3:32) it's like ALS, it's like a menopause. You sort out the psychology, the physicality has no boss to instruct it, because they lost the boss. The line of connection of the depression, control, is gone. So, in a way, it doesn't exist anymore. And, this is how it works. This is why there is no medicine, in the today's time (they can't treat it today). And they say, "When you take MRI you see the Fibromyalgia cases sometimes, when you see Parkinson's." Of course you see, because this change in the brain creates effects and it shows itself. And then you have a body which was...

You can do, you can repair, what you call it, Fibromyalgia, through the transmutation. Because, when you expand the Soul, it covers the whole physicality, and the energy balance comes in. And because you have expanded it, the Soul has a zero point reference. And what happens, voila, you come to the point, these lines take out what is the cause of. This is why I say you felt this, you can feed your Soul with transmutation, by expansion of the Soul, you can feed yourself food and medicine, you don't need the mouth. And you see it, those of you who use this new social psychosomatic materials, you will see how you change. (3:34) How your behavior towards your partner changes, how your partner's behavior with you changes.

We have cases on the trial that they had to the conditions of the womb, which pregnancy was impossible. And within three months, after 10-15 years of marriage, and a lot of trials, the lady is pregnant. We tried it second time, it's answers, we tried it the fourth time, he answered. But, we had to create a material for it. And, we walked into many cases like this.

In one of the top managers of one of the institutions, which was supposed to certify one of our products, to be allowed, to be done, after testing. He pulled me outside his office, he said, "Mr. Keshe, what you are doing is amazing, I know I understand it, but I have a problem." I said, "What's your problem?" He said, "I've been married for 10 years, my wife and I, we tried everything, and in my culture, it's a stigma if you can't get pregnant. And my wife has these problems. If you can help me, your certificate is ready, I'll sign it for you." I said, "I don't give a bribe, you issue my certificate, I help you." He said, "I take your word, because I've seen in the test, we know what it is." Two months later, I went to his office to see him, for another job of certification, he said, "Mr. Keshe, I'm a father, my wife is pregnant." I said, "The problem is not the physicality, psychologically you brighten yourself."

And, till the world of science understand the importance of emotion and psychology in all diseases of the man, (3:36) we still will be in a pharmaceutical game. But the thing is, because we use the fields, there is no technology for fields. We don't use material, we create the fields, and that fields brings the condition of the emotion, what the body wants.

And now, even doctors who work with us, gradually start understanding. It's the wish, not to have the pain, creates a condition to create materials, which creates that wish. And this is something you have to understand as Knowledge Seekers when you go through Transmutation. It's the emotion of the wish, emotion of the wanting to give, not to take. As long as you take, you're a thief, nowhere to go. You get heavy. The more you want to take, the more you want to possess, the more you want to have, to be able to go out, the heavier you get. You fill your pockets with more sand. How do you want to jump when you're heavy?

Any other question? Shall we call it the day?

R: Well, you were asking for people for, to respond about their experiences with the transmutation sessions, and Andreas put a hand up. I wonder if we could maybe hear, hear from him?

<< Knowledge Seeker have problem to open his microphone >> (3:38)

R: We have Nikolai with a hand up as well, but I think maybe we should wrap things up Mr. Keshe?

K- Let's see what Nikolai has to say and then we close.

R: And we also had a question in the Q&A from Mark, but it sounds like that question will need some time, And perhaps should be directed to the next Knowledge Seekers Workshop. There, Nikolai, you should be able to speak there now.

Q: Good morning everybody. Thank you for taking the jump in Jalal question. I just wanted to share perhaps a little bit of my experience in the last two transmutation sessions. And the first one was very interesting for me. I had a moment where I was basically in a state where I had to know what was happening in a way. I didn't know how to be at the beginning. And I thought, ah, right. In order to receive love, I have to give love. (3:40) And so I sat in my position and I imagined the love of my mother, of my father, of my friends, of a lady that I was seeing or not seeing or a friend. And then I had the love of just dogs. I love dogs. And so I had a few dogs as a child. And I had this feeling of, "Wow, dogs are just so wonderful. I love dogs. And I opened my eyes and there was a little dog that had just found its way directly in front of me and sat with its head just in the same direction as mine but looking away from me. And I opened my eyes and I was surprised to see the dog there. And as I went to pet the dog, my hand brushed its field, and it just looked very surprised and ran away, as if it was shocked that it had been drawn to me for no reason. And the friend of mine that I was having a romantic relation, but the beginning of something perhaps, she was drawn-- and we were in the same place-- and she was drawn to try to find me. And she was asking people where I might be. And someone said, "Oh, you know, maybe in the kitchen." And as she came into the kitchen, she was relieved to find that I wasn't there. And she sat down on the couch and looked out the window and I was sitting cross-legged right outside the window. And this really freaked her out because she didn't enjoy being moved, if that makes sense. And I didn't know that's what was happening. I was just enjoying my love of all of the different parts of creation. (3:42) And in the last session, last week's session, I had the experience of going back and forth between the physicality, wanting to do something, and then remembering, ah, right, there's nothing to do physically, and then relaxing into that other state. And this repeated again and again and again throughout the session. My physicality wanted to be confirmed by...

K- Which group were you in?

Q: The group where you came in at the end and told us something... I think group three.

K- I always tell something. Group three. Okay, let me look at the data on group three. Just carry on talking, let me see what we see on the, what you call it, on the system with the group three.

Q: You showed us the chart at the end.

K- Yes, but I have to... So we get several charts to...

Q: Ah, you do that all the time, okay. No problem.

K- From the processes we get a lot of... We continuously monitor, that's how, if you notice, on the microphone, certain microphone goes out or we close you down and we bring you back up. You see your headphones is not connected. So, we... it's a everlasting, continuous work. This is... During the sessions you go through, we are visual, continuously monitoring different things, what we are looking for. Group 3... Group 3... Let me see. I have to find what relates to Group 3.

Q: Okay, in my experience in the session, I had this back and forth between wanting to go and do something with my physicality, heal my intestines or some pain in my foot or something in my arm or whatever. (3:44) And then I would go, "Wait a minute, that's not what you're here for. Relax, you don't need to do this." And then it would come this depth for some time. I didn't imagine anything. I didn't see anything visual. And then it would come back, and the mind would come in and say, hey, it would be really great to go and do this thing, or whatever. And again, I would, no, no, right, ok, that's what this is again. And it cycled through. And right at the end, I decided, my physicality decided to do something and look inside and visualize something. And that felt good to the ego, that I realized later what was happening. But yeah, that was my experience, it was an ebb, like a back and forth.

K- Yeah, I'm just trying to ascertain something. I'm looking from one of the graphs of you lot. You lot jumped a lot. And... but the beauty of it is, your Soul, the connection with your inner energies, is amazingly centralized. And, in that group where you are, we see a lot of cutting off, and starting again. You are not the only one, or you triggered that, and everybody else has gone with it. This is, I'll show you a graph, you understand what I'm talking about, because we have all your graphs totally monitored.

Q: I took a screenshot of it, if you'd like I can send it to you.

K- No, no, let me show you something else. I have a, I have a very... This is for Group C, and then I show you for Group 4 as well, the picture you'll see the difference. (3:46) Now I have to go back in the Zoom, just one second. This what you tell me going in and out, we could see, and I'll show you how we see it, and then you understand it. Can I share please, Rick?

R: Okay, let me ... just stop the sharing here.

K- ... No, let me put it in a sequence, I want to put it in. Then you can see it. The graph we showed you is, one of the graphs, what we said. But it's interesting for us, this is how you became. If you look at this graph, you see the green is your Soul, a strength field of your transmutation. You all sit very close to the central line, means you are in transmutation. It's totally focused to the center. Yeah? And then, what you see, what we saw, is this. Somebody or couple of people in your group, keeps on jumping out and coming back in. You see, you see the shape, the Soul picks up, it's not on a straight line. And then the physicality and the STP follows, into a bigger peak. (3:48) You could not bring in your group, in part, the Soul to concentrate. And a lot of you went through this system in the number three.

But what is interesting, when you see in the group four. Group 4 went through a full transmutation, a large number of them. The groups were small this time, so we could monitor very closely. You see the Soul is totally concentrated. And you see the STP is about, which means, plus the physicality, all of you, some people jumped out, they come back in and then they jump, they get a fear. Maximum concentration with all the groups is less than a minute and a half. You lot jump, you get scared like chicken when you go too far.

When we bring all three lines together, the blue line doesn't come, it's nothing to do with your work. Blue line is our system background we collect, in information of what we want to know. But, you see how concentrated this group is, this is group 4. And they all achieved transmutation, all of you, because it's so, so concentrated. But, as you said, you kept on jumping in and out, this is your graph, I mean, we could see it, that's why, when we see these conditions, we switch off certain system, or we block all of you, that you cannot communicate, to bring you back to order. And it's very, you see it back here, there is uncertainty in this, in this graph. You, you lot in that position could not, because this is your graph again in another time and position. (3:50) Physicality sits above the balance line. And so, it's a continuously, and it's uncertainty jumping in. And it just needs one of you to trigger the rest. The data we're collecting on the small groups, is amazing what gives us and what we can control.

This span is about two, two sec, two minutes. You Knowledge Seekers have not managed to expand it to six and ten minutes. Then, those of you who join us on Saturday, if you want to register today, straight away, because we have to organize things in the background. Saturday two o'clock, we want just very few people, because we know these people will, what will do, you are Knowledge Seekers, you've already been with us, we've seen in the background. And, there is two groups, group number two, which we always keep the same more as group people together. Group number two are extremely, extremely different than the rest of you and the group three. And this, just I want to just check, tell you something. I have to go out of here. When you look at the people in Group two, they all are, (3:52) some of them are extremely on the edge of, what you call, transmutation. And when you look at the graphs of Group two, you see huge difference, huge difference with rest of the other Groups. And it is amazing how this group has become.

First of all, the group has a, what you call it, they have the Eyes (KF Glasses with the Cosmic Ray Bundles), and they have the Glasses and some... some... they have the Headsets with the Unit. And they create a totally different kind of fields. And they become... we see this group as a group which will extend the what you call, the work. And you see them extremely balanced all the way through. We know, we see who jumps in and who jumps out, because you got your microphones with control on this end. And the minute they get disturbed, immediately they go back to their work. We, we see the Soul disturbances, we see the noise disturbances. That's why we broke it down to small groups. And, what you see, it's very interesting, (3:54) that we are shortening the number of people in certain groups, the people we would like to see, that are ready for next phase

of transmutation. It's... I show you what this means. Somebody disturbs, they go back straight away, back in again. And they start where they left it. And, they are very good in, what you call, positioning themselves back from disturbances. They don't let the Soul level changes. I'm sharing a picture, have you frozen a picture?

R: No.

K- ... Okay. You see this is group two, and it's very interesting. With your group, you disturb continuously. In this group, they get disturbed, and it's one noise, one person who disturbs. And you see, how quickly they go back to transmission and position. You see the green line is above, it's a total Soul transmutation. Physicality has no control, and they keep on doing it. And you see it on both graphs. It's green sits up. This group is so fine, it is... They're all Germans, very, very... more German speaking. And they are amazing in their work. But there are systems in this group. (3:56) Both the Glasses and the Hand Unit. And you see it. We know the whole team has transmuted. And what they, what we received from them back, confirms it. Soul is in position, Soul totally controls everything. The STP sits outside of the physicality, which means physicality has no existence. If these people can switch one second, they can be where they are. Because physicality is trapped in a way, between the STP and the STM. Green is the STM, purple is the STP, and yellow sits right in the middle. And sometime in this test, I deliberately change position of the system, to see how good are these people, how much can they come back, and they come back again. You see them. With rigor, we want to stay, don't move us, whoever pushes, we don't take and you see it.

And this is the beauty with developing such a sophisticated structure of emotion control or understanding. You have to give your Soul open, then your physicality obeys, and you see it again and again. This group two is amazing in how they do it. They are very, very constant, they are very extremely... I call them the German group, because it's very easy to put it. Systematic, everything is followed to the point. (3:58) It's nice to know, anybody in Group two, if they want to explain to us, how they felt, it's amazing how, what we see in their work.

Let me explain to you why you have two sections, you have a white line, I think I explained it before. On the left side, we see the, if you look at your face, between the chin and the forehead, vertically. On the right side, this side, you see from ear to ear. So, when we put this together, we get a three-dimensional condition of the Soul. If the Soul is expanding through the ear, or is the Soul expanding through the eyes? Here, you see in this one, it's expansion of the eye. The Soul is looking for a vision. Here, we see the expansion through the vision and the hearing. So, this is how we know somebody coughs or make a noise, disturbs and they come back in. But you see the expansion of the Soul. Very, very strong. So...

<< Audio of Mr. Keshe cuts >> (4:00)

K- (4:02) Hello yes, I am here. How long have I been in silence to you?

R: Well, it's been a couple of minutes I would say.

K- Okay, okay, what I brought you back here, you see this is Group 2. Group 2 is highly professional. They have become the perfect, they are perfecting the art of transmutation. If you look, you see here, the green is the line of the interaction of the field in the STM. Yellow is the physicality. And when you come to this side, you see the green and the purple are on either side of the physicality. Which means in this point, in this one and a half minutes, all the participants have gone through a transmutation. Because the STP, the purple line is below, it means the Soul is in control. If you look at this graph, you see two side of the line. The left side to the double line here, and to the right side of the double line. Left of the double line, tells us if you are transmuting through your eyes. (4:04) The one on the right, tells us if you are transmuting through your, what you call, ears. And how much of these two are connected?

You have... When you see both side, when I explain to you. You see the right side is on the green, is on the top. And then you come on the left side, you see the green is on the top. Means the sphere has been created, you are out totally in the Soul, as a sphere. The eyes, as I said, this graph, this side, shows transmutation through the eye, through the vertical side of the body. This side shows the horizontal. When you put it together, it gives you a three-dimensional, what you call it, picture, of what you lot are doing.

And this group, Group 2, you see them, it's amazing. One of them decides to run with the Soul. And you see how the physicality says, "No, expand itself." Somebody is panicking in this group. And then, in doing it, it returns back and you see the green goes down... I don't let you go, I'm not sure if I can come back if I go. And then immediately come back to the balance. Somehow, you see the same again. Every time the Soul tries to go off, physicality holds on. This shows, in this group there is somebody who's afraid. In this group, there are Eye and the Headphones in this group. Which means there is a full control. And you see it here, how simply you see the beautiful structure of it. The blue line is nothing to do with you. Blue line is part of our system.

But, when they go and they want to go, the physicality panics, takes over, and then you see, the Soul says, "No, I control." (4:06) And you see to... This is about 2 minutes span of the system. We watch you, if you are transmuting through your eyes, or you're transmuting through your ears. When you have these two both, if you look at them both side the same, it means you are totally have expanded, a spherically out of physicality. Especially when you see here, this tells us, "I'm out, I'm in control. Physicality does not count, I cover." Then you can transmute, then you can go anywhere you like, as long as you don't panic.

On the Saturday session, we start at 2 o'clock, any of you join us, plus the people who missed, we're going to try a new dimension in transmutation. It's the same 2 or 3 hours, but pushing the boundaries of the transmutation. You see, in the other picture I showed you, how you keep on jumping in and out, there is no stability. Because somebody in the other Group 3, goes, panics, whatever, you all come back and then we have to wait. We see it sometimes, we wait 5 minutes, till the balance comes back, till you lot settle down.

But, this is real, this is what happened and we can show you, continuously, how you as a group are. Group 2, totally German, fully in control, most of them Germans, and disciplined. And they do fantastic things, they do... we get their reports. They do amazing things. (4:08) Some of them are in the elevation of the Soul, they want... they don't want to go anywhere. They just enjoy being able to be part of the Universe. "I don't need to go, but I'm enjoying it."

I hope you enjoyed today and I hope, as I said, as we learn the way we taught you with the Gans's and with the MaGravs and the other things, you slowly start learning about yourself. And then, in private sessions you can go into a full expansion. We can tell you, can you come back, can you sit there ?? We try, try to bring that in. But you have to get the trust in yourself that we can take it to the next step.

Thank you very much Rick for today. And I hope we see you next week. And if any of you wants to join us for Saturday session, please register straight away today that we open on Saturday at 2 o'clock. This is not advertised anywhere. We will not promote it anywhere. Just go to the session where you do for the week, weekly session. Just charge for there and say it is for Saturday. We know it's for this Saturday. Thank you very much.
