

**No One can Stop Change - Soul Passports - Declares  
One Nation - 24 hrs before Mayhem - Work as  
Collective - No "Bad" Souls - More Dimensions to  
Explore  
Introduction to 549 KSW**

Note: Not checked by KF interpretation by KS of KF Brazil

The main teaching today was to prepare us for the ultimate release of the Plasma Technology in the very near future. It's important for us as Knowledge Seekers (KS) to have the right understanding and right attitude to be able to help in this process. And part of this is spreading the knowledge through the new Youtube channel that is being setup up primarily for this purpose. As he said last week, the governments do not want to talk to KF, because they don't want a change in their status and power. Through the Youtube channel we'll focus solely on the technology part of the teachings like the creation of 129 Tesla, which is the strongest M field ever created on this planet. And also the basic teachings of what a plasma is and how it works, MaGrav, and the work we have done in Agriculture using the technology (T). This will be an easy and focused way to teach newcomers about the plasma. And at the same time there will be live updates on the current tests going on with the new systems to prepare for the November Conference in Iran where the spaceship will be made from the fields.

As far as the release of the T is concerned, there is no way that anybody can stop it. Even the greatest power on this planet cannot stop it. This was very encouraging and to help us understand he said, this change on Earth has been planned a long time ago, and the power behind the change is not coming from Earth, so they can't do anything about it, except create problems for themselves and others. Having said this, it doesn't mean we are going to have an easy time about it. Mr. Keshe has received death threats from two of the world's leading nations, that he should not proceed with his plans to release the T, as they take it as a threat to themselves. I am assuming this is from one organization known as the "Company" and the other that starts with an M. Mr. Keshe replied in such a calm and certain way, "we take the threats seriously, but there is not much we can do about it." The Change has to come, one way or the other. With all the odds stacked on the other side in physicality (P) the only way to release the T is to do it 'en masse.' When the time comes us as KS will have to spread it around the Internet as much as we can, because if he shows the 'Lift and Motion' on the Youtube channel they will take it down. So we have to prepare for this and start making mailing lists of the people we want to see the T. The old system can only remain in place if everyone continues to agree to remain ignorant. Mostly this is done through fear, lies, and the biggest is keeping the knowledge from people. At the right moment we have to break through this veil.

We are not going to do this just through words. He will release another form of the technology that we can make ourselves and it will help us to do Transmutation and

physical Transfer. It will be easier to make than the MaGrav, and maybe something similar to the Cup of Life, which we all could make easily and we spread it quickly. The interesting point is that he said, people will come to his T not through its beauty but through fear of their own demise. And this is what happened with the Cup of Life, and most probably millions of people were effected by it throughout the planet. Then when the fear was gone, they lost interest. This is why we have to educate the people more, and this is the purpose of the Youtube channel. It will be focused and easy to follow, which will allow millions to pass through it quickly and understand what change is about to happen, and then become part of it. We need a mass movement to bring the change and it has to spread quickly like a wildfire. He said, if it goes right we'll have 24 hours before we start seeing the mayhem. For this to happen that new system will have to be very easy to make and be powerful enough to initiate the change. And if it doesn't happen in those first 24 hours, then they will wipe it totally off the Internet. It's not as simple as that. And remember the powers that are involved have ways to handle even the most difficult situation in the background. I think most of this will be handled in the background so we need to keep our faith and hope alive and want to make the change in ourselves.

There is another aspect that we have to be aware of and we have seen this before on this planet during the French, Russian, and other revolutions, and recently the Iranian Revolution. And that is, when the ruling class of the population is suppressing and oppressing in one way or another the majority of the people, then when they finally get released they have all the pent up frustrations of the injustices they went through. And during their suffering they were always wishing to have what the rich have. Part of the psychological control of the masses is to taunt them with the luxuries of the rich on TV, to make them work harder to get more money, but then to block the system so they can never reach to that level. When a poor working person drives a big pickup truck they are subconsciously deceived into thinking they are an important person, but they barely have enough money to feed their family. There are other ways that the masses are distracted from understanding their true condition through Internet, TV, movies and other things. The moment we release the T this façade will break down and many will want to "settle the scores." This is one of the biggest reasons Mr. Keshe keeps delaying the release of the T. He has to make Mankind mature enough to try to bypass this phase. The only way seems to be the elevation of the Soul of the Man (STM). He then made a distinction, by saying there won't be any destruction with the T. But the dangerous part seems to be the pent up frustrations in humans, and they lack the knowledge and ability to understand and control it. This is another thing we have to work on as we get closer and closer to the time.

Today Mr. Keshe announced the establishment of 'One Nation' policy for this planet. This means the whole planet will begin to think of itself as One Nation, One Race, and One Planet. To carry out this wish he established the Universal Council, which is responsible for overseeing the planet and how we will interact with the Universal Community, some people call them "Aliens." And the Earth Council was established to oversee all the things that have to do with the functioning of the planet internally. The Keshe Coin was setup to replace the current monetary system. When all the citizens will be able to transmute to wherever and whenever they like, the borders between countries will not be

needed anymore. Nevertheless, we need to have a way to identify each other, so the passport will be replaced with the "Soul-port." All the data on us will be kept in the plasma of our Soul. It cannot be 'hacked' into or stolen by anybody we don't allow. Thus this information cannot be abused. It will require new types of memory to store data, and the development of plasma computers. He called it, "Plasma Data Technology" and hopes the governments will accept it. And KF will create a database for all the citizens of this planet. Therefore, when we transmute we don't have to carry documents with us, they will already be present in our Soul. And when we travel in Space, the Plasma Data will not only identify us as being from Earth, but it will also connect us back to Earth. So from wherever we are in the U we can always come back to Earth, if it still exists. What's interesting is that this data is kept as a dynamic plasma between the emotions of the STM and STP. I can't imagine what that would be like. Maybe once we embed the STP within the STM a permanent M field structure will be created at the same time and always remain with us. Perhaps this is somehow different than when a STM is on its own, as the way we now separate from the STP at death. It also means that we cannot hide anywhere in the U. But the only people that need to hide are people who do wrong things and have a criminal mentality. In P sometimes we like to avoid certain people. But in the plasma state we don't have to hide or pretend, because the MaGrav positioning of the plasmas is based on the field strength of our true emotion. We will live a transparent and honest life, and not a false life like sometimes we have to do in this physical dimension when others don't understand us, or we don't understand ourselves.

This is being said because of the upcoming conferences and especially the one in Washington DC, where he will ask KS to transmute into the conference and not to bring a passport or visa. It's for us to understand that these are all ideas made up, with the purpose of controlling others, and subconsciously planting seeds in our minds of who is superior over the rest. We were educated with these values and then we accepted them for ourselves. This is why he said on maps that they portray Africa and Asia as being smaller than they actually are, and America and Europe as being bigger. If you look at a video that shows the true size, it is shocking how tiny Europe and America are compared to Africa and even South America. If you feel it in your 'guts' then you'll understand a lot. The strange part is that we allow it, and what is especially disturbing, is that our so-called educators are 'in on the game,' and go along with it. All of these hidden programs inside us that create control and divisions among people, races and religions are functioning in the background of our minds. To prepare for transmutation and bringing equality to our planet, means we have to break into these unknown programs and become aware of them, so that we can let them go. Most likely the initial stages of transmutation are going to bring a big shock to a lot of us unless we do this inner work to expose the true feelings of our Soul.

When asked about the timeline and when the change is expected to happen, he replied, that it is not a time like that. Instead, it has to do with the release and then the subsequent acceptance and use of the plasma technology. So as more and more people make the new devices and we start transmuting all over the place, then One Nation will automatically be established. Obviously, to be able to transmute is also like saying, our Souls have elevated. The transfer of the P will also be part of it, but it's not clear how that will fit in.

I imagine that we'll start seeing people appearing and disappearing all around us. Humans are such, that if one person starts transmuting, the others will want to do it too. Everything that spreads around this planet works this way. As this spreads, the leaders and governments will understand that humanity wants the change, and they either change with it, or they will be gone. They will be gone very soon regardless.

The other thing that we don't really understand much is that Mankind actually works as a collective. The word and concept of "collective" got a "bad rap" during the Anticomunist times in America and Europe. So instead of neighbors sharing for example, their lawnmower, they each had to be a 'competitive individual' and go out and buy their own. And the Business World loved it. But the reality is, that we actually work as a collective. The human mind is a collective of all our minds. We only tell ourselves we think our own thoughts. To think our own thoughts, we probably first have to be enlightened to our Soul. Our body is a collective of billions of cells. If we start to deeply look around we'll see that all of Creation works as a collective. The Totality of Creation, or what we call the Creator, is a collective of countless individual Souls or plasmas. I think we talked about the Divine Individual before, it's an individual, but it feels connected to the collective of all the Souls in Creation. It's not just terminology, but understanding the essence of the Knowledge of Creation.

The main message of today's teaching is the establishment of One Nation government for this planet. As we all start transmuting, it means we won't be ignorant victims, or slaves to the hidden Ruling Class anymore. Each of us will be responsible for our Thoughts, Speech, and Actions and will live the Ethos of the Universe and we'll govern this planet ourselves as a collective of the STM. And we won't let anybody deceive us into thinking that one color of the skin is superior to another, or one race can rule over another through development of weapons, together with lies and deception that everybody has accepted as the truth. But it is a false truth that has made our world a living hell, where the only way to survive is to keep distracted and busy all the time and to have superficial and false relationships with each other. Now the Guardians of the Creation have stepped in to help us bring this change. Because in Space we cannot have these feelings of being superior to others. In fact he said, when the humans think that the color of the skin, or the path of a belief in God, or wealth makes one person superior to another, then it is better that Man doesn't exist. This is not how he was created. And when he first started teaching us over 10 years ago he said, in regards to what to do with Earth, there were only two choices, either we quickly push it back into its Mother the Sun, or we bring the transformation. Luckily, they chose the second, to transform humanity to become part of the Universal Community.

For all of the KS who participated in the July Flight Session, you automatically qualify to be part of the Washington Conference in March 2025. This is the time he expects humanity will be ready for the change and it doesn't matter at all what happens on Earth, politically, socially, or whatever. It will have no effect on what is about to happen. By this statement I understand that all of the KS were able to transmute through their Soul in that session. These KS are one of the keys to the transformation of Earth. Nevertheless, Mr. Keshe made it clear they have to be willing and want to do it. And that there is

nothing to fear. The American government cannot arrest them, because they are the fields of the Soul, and they will have only empty handcuffs on the floor. But this is so insignificant. The main thing is the love, joy, and the gratitude of being able to serve the Creator and the Creation in such a beautiful way. I hope the participants understand what gift they have been given and will find the courage to follow their Soul and do their part to bring this change. And if it makes you feel safer, you can bring your passport and visa. But Mr. Keshe is offering a higher dimension for those who feel strong enough within themselves. They can proudly tell the authorities that they are with the KF Transmutation Program and they have all the documentation of who they are. If their presence is disturbing them they can disappear in an instant. The point is to be strong in oneself and know what you represent, then you'll have no fear. Just by having no fear you will throw the authorities off balance, because they are used to governing by fear. It's something to strive for.

At the end Mr. Keshe gave a short Soul teaching about how it will go after death with those who have a criminal mentality. In the D of physicality we talk about 'the other side' because from physicality's point of view we don't know the Soul so we consider there are two dimensions of the Soul and physicality. But from the point of view of the Soul there is only one D and we all exist together in it, and each Soul has all the information about Creation, that's why we know everything about everybody else, and they know about us. It's a transparent existence of truth and honesty. Some Souls decide to manifest a P, but that is only a temporary existence and then they come back to the D of the Soul.

At death the STM receives all the energy gathered by the STP and separates to be born as a new Soul somewhere in the U according to the M field strength it has gathered through correct living in the D of physicality. Today he expanded a little on what it means to be a dust. Those with criminal mentality and behavior become a dust floating around the Cosmos, they are isolated and don't belong to anything. But it's not just that you are a dust and everything is fine, because that's simply the level of your thinking process. No, no, it is far worse than that, it's a tortuous existence. The example, he gave is like being born without being able to use your arms and legs. Your Soul looks out your eyes and sees everybody else moving around and doing things, but you can't because your arms and legs don't work. Think back to when you were sick and watched everybody else having fun, but you couldn't join in, and how bad that felt. In a way, the Soul is conscious of its existence and sees everything happening, but it cannot participate in the joy. Most likely a criminal mind would not be enlightened, or what is called, being aware of itself. It is still conscious, but there is a clear distinction, that it is not self-conscious. Sometimes you can see this in animals that are not self-aware and humans that haven't reached that level of development. As we said before, the religions were not totally wrong, and maybe their job was to warn humanity that the wrong attitude and bad behavior will lead to a "hellish" life later. It's not to make people afraid, but for us to take responsibility for how we live our life. And he gave us another tool. He said, we can use the Transmutation process to check to see how we are living and where our Soul will end up. And then to ask to have a glimpse of how it is to be with the Soul of the Creator. That way we can compare what our decisions are leading us to. This will give us time to change our life.

The way I understand it is that in the past, Mr. Keshe said the Soul itself is perfect. So when we talk about "bad Souls" there is a very clear distinction between the Soul itself and the life it identifies itself with. We know that, that identification is temporary, because when we identify with the Creator we join back to the Creator. This is where Mr. Keshe replied in a very subtle way. He said, "it'll be the life of the STM who's done wrong." Again this is my understanding, he said the "life of the Soul," and not the Soul itself. The STM is made from M fields that come directly from the Creator so its essence is perfect.

Right now we only know about the Soul and the physicality, but he said there are more dimensions than just these two. It's interesting because we only talk about going to Heaven after leaving Earth and nothing else. Now he has opened the door into an eternal life that is beyond Heaven even. But we first we have to understand these two dimensions, then he can teach us about others.

While we are talking about dimensions, the reason this change cannot be stopped is because it is coming from a higher dimension. And the beings on this planet are from this dimension, and cannot match the field strength of a higher dimension. It's like what we discussed before, that we are one plasma inside another plasma, and on and on. And the reason the STM can repair the physicality is because it is in another dimension and the added energy comes from that dimension. We have a lot to learn about how Souls function.

Other Topics:

Mr. Keshe used this opportunity to tell us about his successor. He is a high level person that owns a big woodland and manages the nature and is a hunter;

There is a way to finance the government without taxation and they do this on other planets in the Universe;

Thanks for listening.
