

Suicide Forbidden both P and STM - All Souls Connected - Situation with the T - Truth about E=MC2 Introduction to 550 KSW

Note: Not checked by KF interpretation by KS of KF Brazil

The whole first part of the teaching is about why suicide is forbidden in Creation and it includes not only the physicality (P), but termination of the Soul of the Man (STM). It's about a 30 minute teaching that goes through different layers of understanding about the Soul and its relation to the Totality of existence and with every other Soul or plasma in the Universe (U), and there are different aspects of how it functions. It's best to listen to it many times, but I will try to summarize what I understood and share it with you.

In a way, our life in the U begins when our STM matures enough that it can take birth as an individual Soul. It takes approximately 9 months to mature the human physicality in the womb of the Mother and then it takes birth. We observe the pregnancy time and we accept this as a fact. However, it was a surprise when Mr. Keshe first taught us that the length of our human lifespan is the time it takes for the STM to mature to become an individual and free Soul, or free plasma. Because our Ego and Soul of Physicality (STP) do not really know the existence of the Soul, so it's not a suitable instrument to be able to measure the maturity of the Soul and then make a decision to terminate the physical life. The main reason suicide of the P is forbidden is because the STM has not yet reached its maturity and if we quit the process early it remains in an incomplete state.

A Knowledge Seeker (KS) asked what happens to these Souls when the P is terminated early? His reply was, they become wanderers of Space. It's like they cut off their roots. Then he said, it was not really that, but more that they have diverted their energy and don't have the connection to the other Souls, and that's why they wander. The 'glue' that connects the Souls together is not there for them. When I think back to someone I know who committed suicide their life seemed to always be troubled and they had great difficulty to cope with conditions. Of course, then we wonder how to help them. He said, because our Amino Acid matches to theirs, our prayers will create a field in the dimension (D) of their Soul. It won't jump them up out of what they are in, but it will help them to find the strength and confirmation of their existence and eventually they'll become balanced. This kind of problem is best handled in life, but our society denies the Soul and Knowledge of Creation. Hopefully, with the release of the Plasma technology (T) this will change.

It's interesting that they finally put a 'death code' in the original patents of the KF, but it is in a hidden form. It's not clear if this is only for ending of the physical life or also of the STM. Ending of the physicality mainly effects the person as well as the family and friends. It's forbidden to end the P even on the deathbed. One has to go to full completion so the Soul gets matured and begins its life in the U. This is for the physical dimension.

In the D of the Soul it's much different. First of all he said the Soul doesn't belong to us, it's part of a bigger structure. So it is not ours that we can do with it what we want. And as it is connected to every plasma in the U they all will be effected by the termination of the Soul. It's like moving a tiny magnet on a table of magnets, all have to move and readjust. We can think of it more as, MaGrav positioning where the M and G fields of each plasma come to balance with each other. The knowledge to understand this is far deeper then just repositioning the fields a little bit. For example, the plasma of our Soul also feeds other Souls and they come to depend on our energy. We are part of a bigger structure even though we may think that we are alone in our little corner, and can do what we want with ourselves. What I understand is that if we were able to terminate our STM that would create a contraction in the fields and it could end the life of other Souls or at least damage them. That's why he said several times today thy shall not kill or steal, because we would be taking energy away from others who need it.

The idea of being connected to everything is something we should think more deeply about. Many of the spiritual traditions call salvation, or 'liberation of the Soul,' as a freedom from having to exist in the physical dimension, and some religions promise Heaven as a goal. But Mr. Keshe is teaching something very different. He is saying that liberation of the STM means our Soul expands and we connect to everything. This is the point he says we are given the 'gift of life.' This is something very different than what many of us are expecting. Maybe we think of liberation as a kind of a blissful state for ourselves to do whatever we like and there will be no more suffering. Instead, he is preparing us to serve the Creation, by us becoming an interconnecting point to share our energy with other Souls. In a way, our Soul becomes the 'glue' that connects and holds other Souls together. This is the same as the Satellite Soul Program he brought out years ago. Maybe it's something we'll all do naturally when our Souls elevate. It's not to be thought of as a 'sacrifice,' rather it's a gift of love to share oneself for others to enjoy the pleasure of existence and to be that interconnecting point. In a world where everybody is fighting to find their own personal space this may not sound too enticing. But if we have been fortunate to meet someone who is a natural giver, we can feel that they are living in another dimension then ours and it always feels good to be in their presence. And there might even be a little wish inside to want to be like them. Now we are starting to understand that this is a common way Souls exist in the U. And one of the ways to get out of the darkness of suicidal thoughts is to give and think of others before oneself.

It may sound like a contradiction to say that there has never been and there never shall be a suicide of the Soul in the cycle of the Creation of the Creator. Maybe it's a higher dimension of understanding that doesn't make sense in our D. The death code is there, but we can't use it. We have the possibility to terminate the cycle of our Soul, but it has never been done, and will never be done. Even the Creator witnesses all the horrors in the U but He never terminates them. It doesn't mean He doesn't do anything about it. When problems are discovered then He sends out emanations of Himself, or should we say His Pure M Fields to create a plasma that will manifest physicality in that particular dimension to find a solution. Isn't this what research scientists do when they create something new and have problems, they try to find a solution. And this is the beauty and the process of life. Perhaps humanity was an experiment to see if a physical being could

amalgamate with a Soul and become a Divine Individual. But the point is that we are all connected and responsible for each other. If one part does something it effects all the rest. And he did say, if one Soul would terminate itself, it would start a process that would bring demise to all the rest.

If we stay correct in our conduct then we will never even have the wish for suicide. But when our STP is living a selfish life then it can fall into a deep depressed state and think it can never be happy again. But the truth is it doesn't know what experiences are 'just around the corner' and waiting to happen in its life that could completely change it. We need to learn how to tolerate the ups and downs of life. Mr. Keshe shared his personal experience of how he comes to rely on other Souls to help when problems arise around his work trying to change humanity. This is a secret of Creation and we too have other Souls that are there to help us when things get hard. We have to learn how to call upon them and receive their gifts. Another reason to stay with life is because we can become part of another life right up to the last seconds of our own life and suicide would be a huge loss for the development of our Soul.

The reason this is being taught now is because when we start transmuting all over the Universe, it's almost certain we are going to land somewhere in the wrong place that we didn't want to be. Then what we will do? If we start to become lonely and feel hopeless, suicidal thoughts could enter our mind and that would not be good. He said he will teach us how to handle such situations in the August Flight Session. It might be a good idea not to miss that one. The main thing is to not start panicking and losing our composure. This is when we need to turn inwards and connect to the Soul, and the energy fields that created us. We can use these fields to manifest again on Earth. Or if that fails, we can have a strong wish to be home, and that will bring us home, like Dorothy in the Wizard of Oz - "there is no place like home."

During transmutation it is the emotions that dictate the position of the STM. So if we are in danger or don't like where we are it is our emotions that will take us out. We want to be happy with what we are doing and where we are going, and also have a giving attitude. He explained to us before that the Soul is naturally generous, if we connect to that feeling of generosity that will also bring trust in the Soul. The emotions are the most important part of existence. A man without emotions is not alive. And a Soul without emotions doesn't exist. And then he introduced us to the concept of the 'Emotion of Existence.' What I understand that to be, is the love for life one feels just in the presence of our own Soul without having to do or be anything. There is a feeling of just being alive, not in the sense of being a body, but just existing. Some call it, "I Am," but I experienced as a real feeling. There is an unexplainable inner joy in that experience and automatically you want to share it with everyone. I think that's what he means by, giving to everyone so that they find their own existence. And this is how the Creator behaves, and somehow it gets embedded in every Soul that is ever created. In the background of this is detachment, and that means we are not trying to force our way on others. We give, and they remain free in themselves to receive it. And if they receive it then it grows into Creation. If we have the detachment then we understand we are part of the Creation and not all of it, and we accommodate others and don't try to control them. Then we become

open for the expansion of the fields, which is giving, and that automatically creates the condition for us to receive, and this is how we sustain our life in the U. And as we keep giving, we will start receiving according to our wish, and then we can create the fields and dimension to manifest those wishes.

We feed our Soul through our emotions. The emotions we generate become like the 20% of the food we eat to create the seeds to attract the 80% from the U. We can get all the energy we need to live and to create through our emotions. As long as there is an emotion, there will be life. And as long as there is life, there will be respect for that existence. Thy shall not kill, not even ones own Soul. As we become travelers of the U we have to abide by the Laws of the Creator, which is embedded in the RNA & DNA of every creature of the Creation. In the dimension of physicality people like to say they are philanthropists. In the U we don't need those kind of concepts, because all the Souls are connected and they have this knowledge built into their existence. And all Souls are automatically aware of each others emotions, therefore you cannot steal or kill in the D of the Soul. Love and generosity are the nature of the Soul. Finally, he said something about having the 'Emotion of Responsibility' that is directly connected to the Creator and does not come from the man.

When Mr. Keshe started criticizing Einstein, whom they forced into being one of our heroes for his theory of $E=MC^2$, it created a kind of shock inside. Today he explained in detail why this formula has created such a problem for human scientists to accept the Plasma Science. First let's understand what $E=MC^2$ means. Energy is equal to the Mass times the Constant Speed of Light squared, and they say this is for the whole U. They also are assuming that light is only a photon and has a mass. For this discussion let just say that they are correct, but it is only for a M field that enters the Earth's atmosphere and becomes a photon. Saying that this equation with all its assumptions applies to the whole U, blocks man from learning the Knowledge of Creation and becoming a traveler of the U. This equation teaches everyone that only the matter state is real, and the Energy state, or D of the Soul does not exist.

So what is the truth about Energy and the Speed of Light. Months ago he told us that from the point of Creation, Energy is M fields in motion. When the first fields move they create their own energy. And the fields do not have Mass. It's the same with X-rays. All the fields are part of the motion of Creation. We cannot measure a Mass or a size anywhere in the D of the Creation. When the plasma manifests physicality to confirm its existence, then it becomes matter. We feel the fields of the Creator, He doesn't hit us with a block of concrete, that's a local experience. In simple terms it means there is only M fields, which are themselves energy. And the experience of matter state happens when the M fields become plasmas and they want to manifest physicality. It simple comes from the desire to confirm ones existence. This is only a temporary state and in our ignorance we pretend that the temporary state is eternal and the only reality.

So what about this speed of light and stars being so many millions of light years away. It's all fallacy from an arrogant and confused mind that believes it knows everything, and nobody else exists in the U except me. Light only occurs when there is a rubbing of the

fields. The reason a Black Hole is black, is because the field interactions are not strong enough to emit light. The M fields coming from the Sun are transparent until they rub with the Earth's fields and become the daylight. This will be hard for the physical mind to accept, but the speed is according to the emotion given, and it is unlimited. There is no limitation on the speed. The light we see from the stars is occurring instantaneously. In the formula $E=MC^2$, the C^2 is actually the lowest speed in the U, it goes up from C^2 to C^{1000} and on and on. There is no limitation because there is no resistance from other fields. From this we should understand that there are different dimensions, we know the D of P and the D of the Soul or Energy. If we learn to accept both then we can become space travelers.

Mr. Keshe talked in a very candid way regarding the situation with the release of the technology (T). We have already reached the level that we can feed everyone on the planet through the KF Food App which people can access online and we could even do it over the radio stations. All the tests have been done and it is proven to work. It is also being used in Palestine to feed those who were open to it and the 105 Knowledge Seekers who cheated to get on the system. This is the reason why not much has been done with the agricultural development in the past couple of years, because when we have the T to give the energy directly to the people why should we pursue the Gans's and other things to increase livestock and crop production. And where does it lead? In the end we are going to kill them and take their energy. It is better to feed the man directly through the fields, then there will be no killing. The other dilemma is that, as Mr. Keshe is giving the T he would be held responsible for the killing of those animals and 'Vertical People.' As we said early, it's not only the one who shoots the gun, but also those who made it possible for them to kill. All will have to pay with their Souls to balance the fields. This is one part of the situation we are facing now. And the other part is that the multinationals and governments will not let the new T come out because they want to keep making their money. They have no real concern about the suffering of humanity as they do everything possible to stop the change from happening. The solution lies in implementing a One Nation Policy where all countries will receive the knowledge equally and the release of the T has to be done quickly, so that one nation doesn't become superior to another and try to continue to force its will on the others. The KF needs a lot of financial support especially from the KS, who gave a 'deaf ear' to his call for help last week.

A KS came to understand that the main process is the expansion of the STM over the STP and encapsulating the P. This is elevation of the Soul and at this point all the energies can be released to the body to bring it into balance. Mr. Keshe said that the Cosmic Ray Bundles were made especially for the expansion of the Soul and communicating with it. But how we interpret it is up to us. We interact with the system by creating a Twinity between our Soul and the system. The CR Bundles connect us to the full spectrum of the fields of the U. And one of the ways it will communicate with us is through our dreams. If we understand that, then we won't throw away our opportunity by saying, it was just a dream. In a way, the CR Bundles provide that 20% which attracts the energies of the U to feed our Soul, which then feeds the P. The system itself provides the primary Twinity, but we can use other systems like the KF Glasses to create an additional Twinity, and this will create a condition for transmutation. These systems are a

help for us to train and then eventually we be able to use our own Soul. He said, a KS has already started doing this, and the door is open for us to join in.

Book number 8 is about the creation of M fields, which come from the Creator. And he said of himself, because we come from the Creator we know about the M fields. But humanity is not yet ready to understand this knowledge and he doesn't want to end up 'on the stick.' A man tried to teach mankind about truth and ended up on the cross two thousand years ago. It appears we haven't changed much since then, only we use more hidden tactics. The Books have been written according to what man can understand and what would be of benefit to him. We have to keep up the hard work of trying to learn and grow. He has a reason for finishing the Books in Belgium, because they don't stand intimidation from the man's kings. As the King who made the man is with us. One day we'll understand.

Other Topics:

A huge amount of knowledge has been given, but we gave the end result at the beginning and that's why KS have trouble understanding the basics of plasma. We had to speed up understanding of the Soul so we can start transmutation;

If the Ayatollahs continue with their plans to destroy Iran, then he will give up his Iranian passport. They cannot use the T for aggression against another nation;

We can use Transmutation to see if we are living our life correctly, and if not, then we might still have time to change it before the separation;

Later he will teach us how to make clothes from the fields;

The love for Creation is embedded in all the Souls

Thanks for listening.
