

# 554th Knowledge Seekers Workshop September 5, 2024

(Quick Index 17 pp, Introduction, Topic Index , Proofing done ; Need to do; Key Phrases, Words) (Auto transcription from Elias)

3 Layers Inner Middle Outer; Skin - Outer P - Middle STP - Inner STM; Structure of U; Everything from 2 M fields; Denied ourselves understanding; Create ourselves in Space - no Prophets; Our decision to be peaceful; New D in Flight session - KF control Middle layer - emotion of STP; Group transmutation meet in Space; 2 different sets dreams - half of brain active; Transmutation failed - need whole brain; Explain graphs; Have to build up strength to transmute; Write down fears addictions - observe changes; Control emotions in STM - STP - P - learn to be all 3; All roads end up in Creator - right field strength; KF system provide strength; All Creation same - difference in field strength; Carry Ethos of Mitra; Systems have emotions; Preparing for full transmutation; Pain Pens & STM not MaGrav - different structure diversity of fields; Stars created from seeds - like STM - not random; Takes billions of years to create - knowledge and systems in minutes; Solar Flare April 2023 - Massive download M fields - change Earth - floods in deserts; Added M field strength - being change; Crude oil never finish - Life created in Atlantic & S China Sea; Salts from metals and non-metals; Hawking & Einstein stole from others - Black Hole - Leuven University; Iran has more T than Plasma; Americans stole atomic bomb from British; Future Queen; Planet has Soul - like humans - emotions; Desert line - inclination - equator; Australia from US; Maps false; Equator line like lights on UFO; Vertical planets; Planet hoping Venus to Earth; Musk - no capacity - wants to dictate; Americans setup Ayatollahs - history of Iran; Leaders weak character; TV and Internet, religions - control people - not understand Creation; Only solution Daughter of Mitra - new generation; Make everybody transmute; Flight session testimony - Soul expanded - bleeding stopped; About Mr. Keshe life; Not too old.

## Topic Index

Micro in the Macro; Nothing different than what we see outside - physical world; Everything made from 2 M fields; Combination of "withholding" (protecting from outside) & "holding in" - middle place to accommodate each other - gives us whole structure of U; It's all done the same way; 3 Layers of skin - Outer - Middle - Inner; Outer is P; Middle is STP; Inner is STM; Inner holds the emotion of STM; No difference between structure of skin and inner structure of Creation; Denied ourselves to understand Knowledge of Creation - our fault; Scientists only understand physical matter state; Those who came - introduced knowledge of inner world were abused - became abusers; We live in Space as creators of ourselves; Transmute from Earth to another place in U - manifest ourselves through interaction of fields of our Soul's plasma with its environment - it's our decision how we will behave - as predator or lover; Coexist as a Being of peace; Decision by our intuition; What we will expect it to be - our perceptions; Start new D in Monthly Flight session - September 20th; We'll do something that has never been done before; We'll work with all 3 layers; But KF will control environment of manifestation; We'll allow expansion of Soul, or inner Energy; Systems will control it; We'll be in that middle layer - decide where you'll collectively manifest; That's why you have been

brought here; We'll be that emotion in Middle layer; You'll be able to see each other in that place; We control the emotion; Give picture of place - collectively manifest; Our instructions by love of Creator - presence of enjoying to be; We'll control the emotion; Complete transmutation collectively by March - show in Washington; Two phases of sleep during night - 2 different sets of dreams - because half of brain active other repairing itself; During transmutation other half is holding you back - why wake up when dog barks - that part of brain is fully active; To transmute need both sides otherwise physical attachments prevent transmutation; Why most of you have failed to complete full transmutation; Why you get disturbed by noises; Talks about graphs; Graphs help us to manage transmutation closely - flat green line - means you are already out; In transmutation you have to slowly build up your strength - first from chair to chair - then travel; Build up your trust then P can take it; You need to practice; For September 20th write down all your illnesses, fears, addictions, joys, pleasures - what ties you up to this planet - become aware of it; We'll control Middle layer; Monitor illnesses and fears for 7 days - observe change; Joy increases; Do with sincerity - will achieve; Couples try to feel each other's presence during the transmutation time; Emotion drives transmutation - way U works; Man needs to become Universal entity; Condition of P - 3 layers of skin; Outer, Middle, and Inner; No need for Prophets - responsible for your own self; Create trust that you can transmute; Make connection between 3 layers; We made these sessions so you come to this point; STM - essence of creation of Creator within - manifest anywhere in U; Creator manifests Itself in any position in existence; I made man in the image of Myself - because I am within the man itself; P is afraid - why we hang on to it - why we kill - wars - etc; Not aware of what is inside us; Always told - Soul is a dream - not real; P is barrier for man; Comprehend your Soul - emotion, STP; Emotion of STM - same as emotion in P; Learn to be in all 3 of STM, STP, and P - transmute across U; All the tracks to travel on are already laid out - jump on track and go; All roads end up in Creator; Universal Fields take you to any destination - even Creator - find right field strength to connect to Creation - within all of us; Emotion in STM and P are same; If you gain access to STP - you can control where you want to go; September session - very powerful - learn to transmute by yourself - through your own strength; We'll help with strength of fields of our system; STP is between P and STM - diminish separation between them; Too soon to achieve - January or February; Understand common denominator between STP and STM; Exist in both D of Soul and P; New way for man to exist; Next is to connect to Creator; Understand way World of Creation truly is - not what humans have taught you; Become part of Universal Community with your own Universal understanding of Totality; Have to train to transmute in March - group will meet together in U; See yourself manifest in D of P and return back; Every single one of you has capability to be aware of P environment and U; There are no differences on all levels of Creation - only field strength differences; More field strength you gather - deeper, stronger, and closer to understanding process of Creation of U; Carry Ethos of Mitra - never fail; Think Good - emotion; Do Good - manifestation - do no harm to others; Act Good; Then easy to transmute wherever you wish; November session - show systems physically connected - have emotion; In March - no D of physicality; Please fully understand teaching of today - preparing you for full transmutation - you'll be in charge - we'll create process.

Pain Pens or STM cannot be used to rotate Gans water instead of MaGrav - totally different thing; MaGrav creates different diversity of fields; Lot to learn about MaGravs; No request to create Sun; Seed was destined to manifest itself as a balanced field strength - randomly done; Only specific fields that match in field strength will gather together - create Sun; What do in lab in few minutes takes U billions of years; Now we have knowledge; KF teachings have made possible; Requires a Soul seed - otherwise impossible; A field has to meet & interact with another field of same strength; Our Sun took billions of years to create; In fetus - Liver created from fields of mother's liver - has to match - body gathers fields; Womb of Galaxy creates condition in a particular place - has to be Soul for it at that strength; STM is a seed at a given strength and position in U - gets nourished - absorbs fields; Seed of STM grown on village of Earth; More about solar flare on April 2023 - Earth connected directly to Sun - download huge M fields; Changes in environment since last April - elevated physical structure in Soul of planet; Showing itself in disaster conditions and weather changes - not Global Warming; Physical structure of Earth has changed; Teaches how crude oil made on planet - never diminish; Salt means the connection of metals to a non-metals - how created; Main places Life created on planet - East of Atlantic & North China Sea; Fe dust blows over Congo into Atlantic right combination of salinity creates life with blood circulation; Same as CO2 Gans Box; Also leads to weather disturbances, hurricanes; Fossil Fuel theory fallacy - because of our ignorance; Same fallacies in science by Stephen Hawking and Einstein - we are ignorant of Knowledge of Creation; More details about how Hawking stole KF work - listened all the time to KSW - changed his Black Holes theory - but couldn't explain it; Hawking despised by scientists around him; Proof on Leuven University website; Iran has advanced T weapons defy physics; Plasma T only one of them; Many advanced T in world; They don't want these things to come out; KS saved diplomats who turned against KF; That's the way human's are; Global change in flick of finger; They have do it themselves; KF influences politics - Iran changed from war to peace talks with Americans; Americans stole atomic bomb from British - British lady chemist changed history of mankind; One day I'll tell you what Iran did with America; Future Queen of England - worth 3.9 billion - steal from others; Going on for past 2,000 years; Testimonial August transmutation - colon cancer - internally bleeding; Expanded STM over P felt it - bleeding stopped - 12 days; Expand Soul - body repair itself - Soul was happy with changes; System changed specifically for Soul to expand over whole P; Earth has Soul - energy center - can't exist central control; Earth decides on its own; Humans have temper tantrums - Earth has earthquakes and hurricanes - controls position of Moon; We are so physical - we don't want to understand; Sun has different organs too; Skin takes 28 days change cells - Billions of years for planets to return back to Sun; Look at everything without attachment - discover emotion behind process; Key is the emotion; Sun is cause of what happens on Earth - provides fields; Last April download - change psychology of man over next 10 to 30 years; Example of changing strength of magnet; Exactly what happened to Earth - received additional energy; Energy is M fields in motion; Fields entering North Pole become filtering - South Pole changes absorption - already seen environmental changes - scientists not aware; Planet's internal energy has changed - just coincidental - change planets position in solar system; Doesn't have to be harsh before it gets beautiful; Angle of tilt of earth will change - more back to center;

Change equatorial line; Teaching on desert line of planet related to tilt of planet; Australia with desert originally next to New York; Maps they show us are wrong; Desert line is in line with inclination angle of Earth; Huge rains in Dubai - snow in Saudi Arabia - floods in African Sahara - since April 2023 download; Scientists make false maps - creates problems for us to understand our own planet; Desert line part of plasmatic field structure of spherical shape; Equator line is same as band of lights on true UFOs; Hopes Iranians will show Americans their UFO; Top half higher than bottom half; Earth's continents actually go other way - inclination to inclination line of planet; Creates 4 seasons; KF has built a system to prove it; Sun has transferred its emotion to Earth - energized planet; Nothing to do with Global Warming; Vertical planets don't have problem on equator line; Lucky not pushed out of our orbit; Scientists don't have holistic knowledge; Man educated by illiterate people like Stephen Hawking and Einstein - not allowed to think correctly; He comes from U has Knowledge; Changing angle of rotation of planet - create specific kind of intelligence; Humans behavior will change; Is it part of God's plan?; Realities of physical life - call it anything you like; Every living thing on planet has been magnetically elevated; Was it a helping hand to bring peace?; God never created war - Man did to show his power - Man's weakness; KF influences politics - Iran steps back from war - start peace talks; Open Iranian embassy in US in 2025; The changes are going to happen - cannot be stopped; Maybe 4 seasons will become 2; Hopping from one planet to another as get closer into Sun. Planets - receive higher energy - become enlightened; About Creator pulling strings - it's all part of Him; Get enlightened by MaGrav; Anybody can join Monthly Flight sessions at any time - becoming more intense; I have accepted the responsibility - we have to stay with it - create a condition for World Peace - end all wars; First thing is to bring all religions (to a unified point) - finish 90% of wars; Other 10% is from greed; Talks about Musk - came from broken home in South Africa - became scientist - now politician - wants to dictate what others have to do; He himself has no capacity of anything - just some imaginary money; Waiting for Iranian officials to give permission for November Conference in Isfahan; Changes of new Iranian President; Ayatollahs - despised people in Iran - brought so much hardship; History how Americans brought Ayatollah Khomeini back to Iran from France - agreed to destroy Iranian nuclear industry - he did; Then betrayed Americans later; Iran is not a monarchy - stay a democracy; Crazy guy coming up in US - released from prison; World of politics - about who is going to be strongest; Bad behavior of leaders due to weakness in character; Because of religions - don't teach reality; Other problem is people trained by television - now Internet taking over; Example they created Obama to be nice guy - more people killed under him - more deported - manufactured and sold more weapons - supported genocides - wars; Golden hair guy has no ethics; Americans have to pay with their Soul for all the killing; Change future by teaching children correctly; World leaders don't care what happens; Only solution is birth of "Daughter of Mitra" - born by the Soul - then P have no attachments to body; Transmutation - learn wealth means nothing; Make everybody transmute - change; Your Soul has to be pure to be accepted by Soul of UFO; Why Space is a peaceful place - man doesn't understand; No doors on UFOs - control through your peacefulness; About people who make the UFO - Soul brought them - not KS; Have pure Soul to enter building; Mr. Keshe tells about his life; Humble family in Iran - during teenager time touched by beauty of Zoroaster - felt sincerity of the love - taught Ethos of Mitra; English are harsh

people; All this had to be to become what it is today; The company to spread T report to him - concerned about his age of 66; I'll be here long after his great-great-grandchildren have gone - but we can't tell them; At 66 I am just starting.

## **Introduction to 554 KSW - 3 Layer Structure of U - Key to Transmutation is Middle/STP/Emotion - Massive M Fields/Change - Soul Expansion - Desert Line - True UFO - How Life Created**

To prepare for the upcoming transmutation Knowledge Seekers (KS) have to understand how the Universe (U) is structured. Everything is made out of the interaction of two M fields and there is nothing more than that. It's that simple. Two fields interact and if they have matching strength then they can create a plasma. And all plasmas are structured on the basis of the Three Layers. The Outer layer keeps other things from coming inside. It protects the Inner layer, which keeps or 'holds' the plasma in. The Middle layer is the gap in-between the Inner and Outer. It's a kind of "no man's land" that doesn't belong to either one, and yet both use it. It's a place of transition between the outside and inside worlds. This is the essence of how everything is structured in the U.

The best example of this is the 3 layers of the skin of the man. The outer layer is what interacts with the physical world and what others see as the body of the man. We call it the physicality (P). The inner layer contains and holds the inner emotion and we call it the Soul of the Man (STM). The middle layer is in-between and holds the emotion of the Soul of the Physicality (STP), which also has the salt content and through its emotion creates the P. The middle layer is very important for transmutation. In the September Flight session Mr. Keshe said that through the KF systems they will be able to control the emotion in the middle layer and the destination where all the KS will transmute to as a group. They will make the decisions. But this is only temporary to help train KS to be able to transmute on their own. They need to build up their confidence and practice step by step. First they should try to move their P from one chair to another in the same room and really feel it happening and then see it with their eyes. After they gain trust in their own abilities they can start traveling the U.

In the same way the STM has emotion so does the P also have emotion. If we can learn to be in all 3 of the STM, STP, and P then we can transmute anywhere. And when we gain access to the emotion of the STP then we'll be able to control the transmutation. By practicing in the KF systems we'll learn to diminish the separation between the 3.

One of the reasons KS cannot transmute is because half of the brain is still active and that holds us back to Earth. We have two phases of sleep and two sets of dreams and this is because the body has dual pairs of organs. So while one side rests and repairs itself during the sleep the other side remains active and aware. This is why when we hear a noise like the dog barking at night we wake up. This is part of the evolutionary development of the human body. During the time humans lived nomadically like other animals we always had to be alert and awake immediately in time of danger. Now we live in buildings with security alarms and we don't really need that, but we haven't understood how to change the structure through our emotions. He said, now when we dream we only

travel with half of our brain, the other half remains active with the body. So we have to learn how to take both sides of the brain with us during the transmutation.

Another way that he is helping us to transmute is that before the next Flight session we should write down all our fears, illnesses, addictions, pleasures and the things that hold us to this planet. In a way, it's a time to become aware of our inner world and to slow down and get in touch with our purpose in life. During the session he will ask us about them, and then after the session we should continue to observe ourselves for 7 days and see what changes in our life. If we do this sincerely we will begin to trust ourselves more and lose the fear of letting go of the P, which will make the transmutation easier. The sense is that this will be a very powerful session because it is time for us as humans to breakthrough our fears and not wanting to know the truth about Creation. Those who will participate will need some quiet time afterwards to absorb what they experienced and to integrate it into their lives. And by having a direct experience of the transmutation, especially when the group is taken somewhere, it will help us to feel the strength we have inside us to become independent. It's interesting that there is a knowledge and technology that allows one to control the middle layer, which is the emotion of the STP, and if we can access this we'll be able to control where we want to go. When we are out traveling on the Universal Fields, they can also take us to the Creator, if that is what we want. But we have to find the right field strength to make that connection. And we all have equal access to this. We do not need Prophets, we already have the capability within us. As usual, it comes back to the emotions.

When we ponder about the emotions, if we are honest with ourselves we quickly realize how little we know about them. Thoughts and feelings constantly pass through us and the ones that we identify with take us over. But we really don't know where they come from, or why they are coming to us. The major reason for this is that we are constantly distracted with everything going on we don't have, or we don't want to take the time to reflect on them. He also taught us before, that the parts of our being of the P, STP and STM each have their own emotions. But the strange thing is that they all seem to be bunched up together, and maybe we don't think it is even possible to sort them out. Most of the daily struggle to survive becomes the main thoughts and feelings of the P. And on the other side are the higher ideas of loving others unconditionally and the universal principles of living correctly, which I understand to be of the STM. It seems that the religions have hijacked these ideas and they have made us to feel that they control them. But in reality they have brought them down into the lowest level of P, and together with them, they have brought most of humanity. The higher ideas that are free from the dogmas of the religions I think of as spirituality. And spiritual people, even if they are religious are universal and accepting of everybody. Again I consider these thoughts and feelings to be of the STM, and they really are opposite to the P at this time in human development. Somewhere in the middle is the STP, but what kind of thoughts and feelings come from this level? We know that the STP is the essence of all the Souls of the Cells of the body and it is a collective feeling centered around the heart and when humans speak about "spirit" they are referring to this Soul and not the STM. And there are different levels of groups that are a subset of the STP, like with the organs. It has never really been taught how all this fits together. When we start transmuting we should also

gain understanding of all of our Souls. He said, we all have the capability to understand the physical environment and the universal environment. Our society educated us on how to orientate ourselves in terms of the physical dimension of the Earth's environment. But who will teach us about the universal environment? Or doesn't the STM already have this knowledge? There is a very deep meaning in what he said, but we'll have to wait until we get more light.

It's very difficult and almost impossible for the fields of the U to come together and randomly create a star. Space is so vast that for matching field strengths to find each other it is virtually impossible. It's through the Knowledge of Creation that plasmas are created like seeds to attract similar fields. Now we can understand why he continually says, that Earth is a nursery of the STM that will become seeds to create new stars in the U and begin new cycles of life. Our Sun took billions of years to gather the little plasmas from all over the U, it did not spontaneously get created out of the fields by itself. I wonder at what point does a star begin to emit light and does it remain invisible until that time? Then the only stars we see in the night sky would be the ones that are emitting M fields that are visible to the amino acid (AA) strength of our eyes.

A liver in the growing fetus is not just created to be there. The womb of the Mother is like a Galaxy and it has to create a place for the liver, but first a Soul is created and then it starts pulling all the fields that match to it, and it grows that way. It sounds like it gets the seed or a copy of the field strength from the liver of the mother. Then he said it fits into the wish of that process. This is where the emotion comes in and it must be a combination of the mothers love and the child's desire to exist, among other field interactions.

In the past Mr. Keshe said that the crude oil deep under Earth was like high density M fields and when humans took it out of the ground and burnt and converted it to gases, it changed the density of the M fields of the planet. And this has effected our orbit around the Sun. He did not go further into this teaching, instead he talked about how crude oil is made on this planet and that it will never diminish and it is connected to how life on this planet is created. For the conditions of life and creation of a blood circulation we need Fe, Cu, and Zn and saltwater. This basically is the setup we have in our CO2 Gans Boxes. The emotion must come from the Soul of the Planet, but also the Soul of the Creator (STC), but what part is the plasma from the Nano materials? Could it be the magma of the core of the planet under the ocean? There are two major locations for the creation of life on this planet and both have a source of Fe. Iron dust from Congo blows into the East Atlantic and the mountains behind the North China Sea provides Fe through its annual runoff into the ocean. There is an important hint about the creation of salt, which is also needed for transmutation. He said, salt is created from the combination of the metals with non-metals in both the atmosphere and in the oceans where there is a lot of Calcium (Ca). I hope he will teach us more about salt, because this is a key to Creation. Wherever we put two different metals together and if there is a little current we get salt forming, like on the battery terminals of our cars. And we get lots of salt clumps forming on top of the metals in our Cup of Life, and also around and outside the Cup itself. These are clearly formed out of the fields. But it is not clear how.

An Australian KS gave his testimony about the August Flight session. This is not a Health Unit, but way back in the Manchester Conference Mr. Keshe read his graph and asked him if he had cancer. He didn't know, except he had already been bleeding through his intestine regularly. This man is very courageous because he has been bleeding for months and months and yet he is not afraid, and doesn't go and confirm it with the doctors. And before the August Flight test he had been bleeding everyday and feeling weak, and in his mind he resigned and accepted his possible death. In the second hour of his flight he felt the expansion of his Soul, the sensation was like he had been blown up (like a balloon), and that he was inside his Soul, and it stayed like that for maybe 5 minutes. After that his bleeding stopped and he feels really good inside. It's been 12 days and no bleeding and he describes it like a miracle.

But the thing is, this was a gift given to him from the outside. Now his job is to integrate it, and make it his own experience. And I believe that if he doesn't do his inner work, then it will just be another wonderful experience he had. I have met people in their 60's who have had these wonderful spiritual experiences when they teenagers, but they chose to spend their life making money and they said to themselves, when I retire then I'll have time to work on myself. But guess what? They waited too long and They spent 40 years training their mind the wrong way and the spiritual life was too hard, so they ended up with nothing. The same goes for us as KS. And Mr. Keshe made a subtle comment about this in this workshop. There are no shortcuts. In the end we have to discover our Soul for ourselves.

Mr. Keshe said he changed the systems specifically for this to happen. I believe he meant for the Soul to expand over the whole body and not just the brain. He makes subtle distinctions about these things and we don't have the knowledge to understand what he means. For example, a lot of people say they feel the expansion of the Soul, and they describe it differently. Maybe the Soul only expands to fill the skull and that gives a particular kind of experience. Maybe when the Soul expands out of the body through the eye socket and travels the U it does so without effecting the P. But in this case, the KS specifically stated that 'felt' the Soul expand over his body and he was inside it for some time. It was a physical expansion. Later Mr. Keshe explained that when the Soul expands over the P, then it can repair the body and everything will be brought into balance. The KS gave confirmation that KF has reached this level of development in the T and he said, this new level will be added around the world. And finally, if the Soul expands to do the repair, then why can't it feed the body too, then we don't have to kill.

In this workshop he talked a lot more about the Solar Flare that happened on Sunday April 23, 2023. There are many aspects to it and you can study it carefully. He calls it the "kiss of the Mother" when our Sun downloaded a massive amount of M fields into the North Pole. Because the Earth rotates it means everything on the planet received the M fields and there will be changes, exactly what changes and how far reaching they will be remains to be seen in the future. But we have already seen the effect on the deserts with snow in Saudi Arabia, floods in the African Sahara, and more. He said it is just coincidental, but it happens to coincide with the changes we are trying to bring to the

Earth. Isn't this what KF systems do with us, they increase our M field strength but in certain spectrums. And these solar flares carry a spectrum of M fields and this will elevate even the animals in the oceans. We hope the added fields will bring more knowledge, love and peace to especially the humans on the planet.

He showed a picture of the desert line of the planet and strangely enough Australia which is way down in the South Seas has a desert line on it that looks like it should fit into Africa. In fact he said, Australia used to be next to New York and if we put it back there, and squeeze the continents together we'll see the missing piece of the Sahara desert. A few weeks ago we talked about how the scientists purposely draw the maps wrong to make Europe and American look much larger than they really are. Today he added that the angle of the continents are also drawn wrong, but he didn't go further on it. We know the angle of tilt is 23.5 degrees and is the cause for the 4 seasons. The way I understood it was that the desert line matches the angle of tilt. There is a specific reason for that and why the planet needs to have deserts. I think it has to do with the M field circulations of a spherical plasma. At the central line, which I think he means the equator, the fields are strong and go inwards to complete the circulation. This is the same with a UFO and why they have a band of lights around where the upper and lower half meet. A true UFO has to have that band of lights because of the field circulation. It seemed like he was implying that the Iranian UFO has this band of lights, whereas the American ones don't. And he hopes that the Iranians will show the Americans their UFO.

Our behavior in the U was a big topic today. What does it mean to be free to misbehave? First of all our Soul won't allow us to transmute if we don't have the right intention. And somehow we think that we will automatically behave the correct way. Then why does he spend so much time and energy trying to teach us about ethics, morality, and the Ethos of Mitra? Once he said, if we go into Space with the wrong intention it's suicide, because we won't be allowed to exist. The way man behaves on this planet will not be allowed in the U. These warnings do not apply to Children of Mitra and children of the Man made through the Soul. Because their Souls are made first and then if they want, then they can manifest different physicality's. These warnings are for us who are born in physicality and are part of this transition generation. We are not enlightened but we can have enlightened ideas and behavior. Unless we reach total and complete enlightenment, we still can fall back into our animal behavior of Earth. This plasma technology is for us and not the future generations, they will automatically access it through their Soul.

The situation with the current controllers of the world, and the world leaders they put into power sounds pretty hopeless. As he said, they just don't care what they do, what the consequences are, or who suffers. The Western religions have put God as a mysticism somewhere up in the sky, and they have failed to teach by example, that what you do to others, comes back to you. And the people now get their education from the television and Internet, which are controlled in the background to create more confusion. The transmutation process that KF is getting close to completing can definitely enlighten the Soul with the fields of the U, but would the Soul of the leaders even allow them to enter the systems. In the end Mr. Keshe said the only solution is for the birth of the "Daughter of Mitra." Those born from Soul will have no attachments to the physicality, and their

body will just be there. In this case it will be a tool to be used by the Soul to experience the physical dimension and not the controller of the STM by imprisoning it in the brain of the man.

At the end of the workshop Mr. Keshe told of his origins in a humble Iranian family. Later when he experienced the bigger world he discovered just how fortunate he was to be raised in purity of innocent hearts. In his teenager years he was taught and experienced the Ethos of Mitra with the Zoroastrians. Thousands of years ago the founding essence of the religions was Zoroaster who was an Aryan. It was the Aryan Rishi's who wrote the Veda's, which are the oldest religious texts in the world. Then they kept dividing and splitting and getting more and more confused, until we have reached what we have today. What seemed to impress Mr. Keshe most was the experience of sincere love. And now he is taking humanity back to the essence of Zoroaster, which is the Knowledge of Creation.

### **Other Topics:**

Iran has stated it has weapons so advanced they defy physics. Mr. Keshe said, that the space plasma technology he has provided them is only one of the technologies they have. The American are 'scared to death' that they will show the new T in public. Mr. Keshe wants them to start working together for world peace. He foresees opening of the Iranian embassy in Washington in 2025;

American citizens will have to pay with their Soul for all the wars and killing they allowed their government to do. Because American's believe they have freely chosen their leaders, they are responsible for them. Living in denial of the truth will not balance the fields. The balance will come in a way that one day they'll understand;

KF influences world politics unknown to the public;

God never created war. Man created it for himself to show his power;

We can hop from one planet to another as we get closer to returning back to the Sun;

The MaGrav can give enlightenment if you know how to use it;

Thanks for listening.

## **Quick Index**

(What you don't understand in Macro you'll find the understanding of it in Micro, and vice versa. Nothing in the World of Creation is different than what we see (outside in the physical world). It's all made from the simplicity of two things, two Magnetic (M) fields. The 2 M fields interact and push each other away, or they come together. It's only two fields, there is nothing else. If it is only one field, then we don't know if it is interacting, or if it is coming or going. Everything in the World of Creation works on the two fields, and the combination of how they withhold, or what they hold in. And somewhere in-

between they accommodate each other to hold in, or to withhold, and this gives us the whole structure of the Universe (U). There is no other way in the U that the M fields interact and work in a different way, (it's all done the same way)).

(An example of to "withhold" or to "hold in," and ?? do something in-between that the two (fields) manage to (create a) space gap with each other, and accommodate each other is the skin of the man. This is the best example of it. The outer layer of skin withholds, or doesn't allow things to come in. The inner layer holds everything in. This is the structure of the body and what's inside it. And the middle layer is in-between and understands what is happening outside and inside and accommodates. And whatever doesn't fit it, holds).

(The outside is cold and inside warm. (When the emotions or feelings want to feel warm then it needs warmth from outside to accommodate the wish of the inside. There is a need for heating to feel the warmth. (?? If we don't like the (cold) touch then we withhold the touch and move our hand away from the other, because the emotion of the inner side has to be accepted by both (??) . (?? The outer of the physicality (P) is the skin. Then there is the Soul of Physicality (STP), which is the interaction of all the fields within the body, the middle layer. And the inner layer is the Soul of the Man (STM), or the energy center which holds what is inside, the Creator. The Creator is within us. It's how we feel and react (?? to the environment), and how we interact with P. (We don't damage, but we protect so (?? the body to be able to carry out His wishes))). (In summary the Inner layer is the STM, Middle layer the STP, and the Outer layer the P).

(There is no difference between the structure of the skin and the (?? inner structure of Creation. The same structure applies to every dimension (D) (of Creation). By understanding and developing the science of the knowledge of the interaction of the fields, we'll bring in a new way of thinking, and adapting ourselves to understand the Knowledge of Creation. It won't matter whether we are on Earth, in deep Space, a Galaxy, in another Universe, or another dimension).

(It's our fault that we denied ourselves to understand the Knowledge of Creation. In a way, all of our scientists have only been 'physical matter state' scientists. They only deal with the P. And those who came to introduce to us knowledge of the inner world were abused, and (then they) became abusers of the same knowledge. When we live in Space we are the Creator of ourselves. We are the Prophet of ourselves. We are the manifestation of ourselves. When we transmute from Earth to another position in the U it is the interaction of the fields of the plasma energy of our Soul with its environment that decides how we will manifest ourselves in that place. (And when we manifest there it will be our decision as to how we will behave. Will we be a predator, or a lover? Will we coexist as a Being of peace? The decision is ours by our intuition. It's what we will expect it to be. How we feel at the point of manifestation is how we perceive our own existence in that environment. (No matter where we manifest ourselves in the D of P of the time, place and position (TPP) it's for us to be peaceful in the new D of existence))).

(In the Monthly Flight session on Friday September 20th we'll bring you to a totally new dimension. It is for you to decide. We'll do something that has never been done before. In

the last session of August (some) went through a transformation, (and brought it into the physical D). In September we will bring you in a dimension that considers all three layers (of the skin). But this we at KF will control the environment of (your) manifestation. We'll allow the expansion of the inner Soul, or inner Energy. We have setup the systems to control it. We'll be in that middle layer. It is us who will decide how you collectively as Knowledge Seekers (KS) will manifest yourselves).

(It's like we'll take you sightseeing and we want all of you to see that statue. That's why you have been brought here. In transmutation you'll learn how to control, and we'll learn with you, how you learn from yourself. What does this mean? This means that the system will bring every single one of you to one position. We will decide and not you. We will be that emotion in the Middle layer. We'll decide on your inner strength, and manifestation of that strength. (Maybe we'll ask one of you to manifest yourself on the Moon). How would you manifest yourself? Would the others in your team see you, the way you wanted to manifest yourself? (If you wanted to be a dog, sorry, dogs cannot exist on the Moon, there is no energy or air to breath))).

(We will bring you to be able to see each other in that place. (We'll set a destination and you'll all travel to that place. We'll try to give you all the chance to transmute. But we'll dictate what we want you to see, through the emotion of the system).

(We'll give you pictures of certain places in the U and you'll be expected to manifest yourself at that TPP as a collective team. You have had enough experiences of (transmuting), trusting, accepting. We'll be that Middle layer. And you'll be inside an emotion, a new manifestation of P as a group. And most of you are already familiar with each other, even though you have never met before. We'll be in control at the point of manifestation, because of the way we set our system up. In a way, we are like the reduction in the strength of the M fields of the blood around the brain, which allows the Soul to travel and for you to manifest yourself in the TPP. But this time, before you go to sleep, we will tell you where to meet, and we want to know if you arrived. Our instructions aren't by words alone, they come (from) the love of the Creator. They come by the presence of enjoying to be, and to be collectively. We'll see how many of you will be able to see each other. Because we will control the (main) emotion)).

(We have until March to complete the transmutation collectively so that it can be shown in Washington. The whole purpose of understanding this, is to understand another step in your own physical life. (?? When you expand your Soul during your dream and if you hear a noise by your bed like a dog barking, now you (are that noise). And this time you are in control of the D of the fields. ?? You receive the information of how and where to go from the outside, and how to manifest yourself in that TPP)).

(Most of you have probably experienced this when you go through two phases of (sleep) during the night. You have two different sets of dreams. What's the reason for it? And if you understand the reason, then you'll understand the next step of how to transmute. Let me explain in a very simple way, then most of you will find out where you have failed to complete the transmutation. You have the brain and the two ears, and during sleep one

side rests while the other functions. When you go through transmutation, or dream, one of the dream sessions are weaker than the other. That's because it's repairing itself and is on a low level (of functioning). If it is on a high level then it can create a lot of problems. The other side is in full active mode. So when you dream you actually travel with only half of the brain. The other half is holding you back. That is why when the dog barks you wake up. Because this (part of the brain is fully active. (This is a protection we have created for ourselves, that one side should always be awake))).

(To go through transmutation you have (to do it with both sides of the brain, so that you don't have any physical attachments to bring you back). This is why most of you have failed to complete the full transmutation. Because you remain always alert with the other half of the brain. This is why most of you cannot transmute. This is why you still hear the cough of the guy who is on your team and why you get disturbed by it. When all of you collectively reach this point, we'll see a flatter spike on the graph. Your Souls stay close and flat to the central line of the graph. (When you are in the D of P the line goes up and down).

(When we run our flight systems and are within the space of the plasma of the reactors, ?? we get a flat line, it means it's total plasma condition and we are inside the Soul structure. (When you transmute, the STP, P and STM are all gone, it's just a flat line. We can't do anything. You are not with us. You have (left the P). At that point, we know it's you, and we can tell you where to go, through the Soul of emotion)).

(The graphs help us to manage the transmutation closely. When the green line is flat it means you are already out. ... more about graphs ..)

(With transmutation you have to slowly build up your strength. Don't go too far in the beginning. Build up your trust then your physicality can take it. (In the beginning try to move from one chair to another in the same room. Then go from one side of the room to the other. And after that you can go from one room to another, then go for longer trips. You need to practice)).

(For September 20th write down all your illnesses, fears, addictions, joys, pleasures. And write down exactly what makes you tied up to this planet, that you are aware of it. In the middle of the session we'll stop and you can go back and look at your list and see what has happened. Then try to transmute from one chair to another. We will control the Middle layer while you are training to transmute. Maybe you think you have transmuted. You have to build up the trust in yourself that you can manifest yourself from one chair to another. Write down all your illnesses and after the session check on them. Monitor them for 7 days and all your fears. Then you'll understand the purpose of transmutation in the D of P of the man. See how much of your fears and physical problems change. And how much the pleasures you enjoy increase. The next session is about you increasing trust in yourself. We built our systems to accommodate the Middle layer and gradually you'll learn).

(If you do this with sincerity and trust in yourself then you'll achieve it. If you're a couple, try to see if you can feel each other's presence during the transmutation time. (It's through the love and the desire of the couple to want to be with each other, it's that emotion which drives the transmutation). This is the way the structure works. You do it for yourself and not for us. This is the way the U works. Man needs to become a Universal entity).

(In the condition of P we have 3 layers of skin, Outer, Middle, and Inner. The Inner represents what we need inside. The Outer represents what the outside needs you to be, to be a part of us in your Middle layer. In transmutation, (see drawing) the P sits here, the physicality of the STM (?? STP), and the STM. And inside is the Creator. As long as you live and work as you do today, in this layer, you live a physical life. When you understand the emotion of the Creation, and the reason for man's being, then you'll sit on this end. You'll understand how your emotion affects your physical existence, the STP. And when you understand how you convey and understand the World of Creation of yourself, you come to this dimension. So you can travel from there to there directly).

(There is no need for Prophets, because you're responsible for your own self. We have to create trust that we can transmute. (We need to create a connection between the 3 layers)).

(This is why we created these sessions and brought you to this point. There has to be more purpose to the Soul than just sitting there. It has to protect and be connected to something. That connection is what protects its Totality, the essence of the creation of the Creator is within it. Once you understand this, you can manifest yourself anywhere in the U, because you'll be dealing with the center. As the Creator manifests Itself in any position in existence, in all positions and dimensions. I made man in the image of Myself, because I am within the man itself).

(The P is afraid and that's why we want to hang on to it, and that's how come we have reached this point today with all the killing, wars, all the things we do, the animosities and everything else. It's because we are not aware of what is inside us. We were always told (that the Soul is a dream and it's imagination and not real). This is where we start and then we dictate the TPP. Your D of existence in physicality is a barrier for man, he needs to understand that he doesn't need Jumbo Jets, rockets, and (matter state) space technology. He doesn't need all the things he has created in the dimension of P, because unfortunately you cannot (use a rocket to get to your Soul). Instead, you have to understand and comprehend it. And then you have to understand about the emotion, the STP and the STM. The emotion inside the Soul is the same (as the emotion in) the dimension of physicality).

(If you learn how to ?? (be in all 3 of the STM, STP, and P, then in the D of energy, or the Soul you can transmute across the U. All the tracks to travel on are already laid out. You just jump on a track and go. As they say, all roads end up in Rome. All the roads of Creation end up in the Creator. If you understand this principle of Creation, then you can travel on the fields of the U. The Universal Fields will take you to any destination, even the Creator. It depends (on whether or not you find the right field strength to connect to

the Creation, which is within all of us). The emotion in the D of the Soul and P are the same. (If you gain access to the STP, then you can control it and go where you want)).

(This is part of what we'll do in the September session. I think by the time we finish the September session, many of you will need a lot of (time) (?? to comprehend what happened to you in the 2 hours of that session. The purpose of this session is for you to learn that you can do this by yourself through your own strength. We'll help you with the strength of the fields of our system, and through what we can control, we'll manage to diminish the separation between the STP, which is between the P and STM)).

(But it is too soon for you to achieve this, maybe by January or February. It will take a few more sessions to bring you to this, and to understand (about) the STP and the STM. And understand that the Totality is a common denominator between the two. Then you can exist both in dimensions of the Soul and P. This will become a new way for man to exist. Then the next barrier for man to understand is the connection to the Creator. (When you understand the World of Creation, the way it truly is, and not the way the humans have taught you, then you'll become part of the Universal Community with your own Universal understanding of the Totality)).

(In March we cannot just say, now we want you to transmute. We have to train you over the next few months. (Then a group of you will be able to meet at the same TPP. In the teachings over the next few months we'll try to bring you to understand this. We'll have sessions where you'll all go through the transmutation process, but which one of you will be able to see themselves manifest (in the D of P and then return back?))

(If you comprehended what was taught today, then you'll understand that every single one of you has the capability and understanding to be aware of what's going on in your environments of the P and the Universe. This will start the new journey for man).

(There are no differences on all levels of Creation, except for the field strength. And the more field strength you gather, the deeper, stronger, and closer you can become to understanding the process of Creation of the Universe. When you carry the Ethos of Mitra, you can never fail. (Then to Think Good, will be your emotion. And to Do Good, will be your manifestation at the point of arrival, and you won't do any harm to anyone and you'll find peace within yourself and the environment you manifest in. It won't matter who is there in that environment. You will feel safe to manifest yourself, and then you'll Act Good, because you won't harm anyone. Then it will be easy to come back, (and transmute wherever you wish)).

(In the November session we'll show you systems that are physically connected. (These physical connections of the systems will have emotion). In March, you'll learn about the systems that have total energy, and no dimension of physicality. Please fully understand the teaching of today, because we are preparing you, and especially those who will attend the sessions, for full transmutation. You will be in charge, (but we'll create the dimension of the process)).

## End of Quick Index Part 1 - 554 KSW

(Pain Pens cannot be used to rotate Gans water instead of the MaGrav, it's a totally different thing. Nor can you consider yourself as a MaGrav. The MaGrav structure inherently creates a different field dimension and a diversity of fields. It cannot be repeated in a dynamic system. It's a stable and continuously contained system that cannot be replicated. It's very special. There is a lot to learn with MaGravs).

(There never was a request to create our Sun. It doesn't work that way. A seed was destined to manifest itself as a balanced field strength. It's randomly done. You can do an experiment with a table of magnets. Use spherical magnets and spread them around, then take a tiny magnet ball and throw it amongst them and do it repeatedly. See if it ends up in the same area each time. He used to do this. Because if you are that tiny magnet and the table of magnets are the conditions of the structure of the U, it decides where you'll fit in. You can see which universal gravity pulls you to it, because it matches yours. You can see how they accommodate you. The table of magnets is like a galaxy and inside are all the particles, each one being a solar system. All the magnets on the table don't connect with all the particles in your tiny magnet. Only specific ones that match your field strength. This is how it works. Our Sun is here because of how its field strength got created and interacts with the others in the Galaxy).

(What KS are doing in the lab in a few minutes takes the U billions of years to do. It's because we have the knowledge of it now. The teachings over the past years have made this possible. It takes billions of years for Universe to create these kind of things. But without the seed of the Soul, it would be more or less impossible, (for the fields to meet up and create). A field has to interact with another field, and this interaction has a minute M field environment, which starts to grow and other fields of the same strength are connected to it and they start being pulled to it. This is what makes our Sun. Mankind hasn't been educated to the true process of the creation of the U. Our Sun took billions of years to create and it did it one little step at a time).

(For example, the liver doesn't just get processed in the fetus. A condition is created and this allows the fields which fit into the liver to be attracted there. This is decided by the liver of the mother, and then it is manifested in the fetus, it attracts the fields and it grows).

(It's the same in the U, you have to wait for the fields to come. The womb of the Galaxy creates a condition in a particular place, and there is a Soul for it, and a field energy, which is available at that strength. It fits into the wish (of that) process. Very few, if any, stars have spontaneously been created by the interaction of the fields on their own. You need to have a seed, and that starts the process to attract the fields, and then you get a plant. The STM is one such seed, at a given strength and position in the U. Then it gets nourished because it can absorb the fields. Once you germinate the first seed, the rest (come right in). The seed of the STM is grown on the village of Earth, in the global warming structure of the Soul).

(Last week he spoke about the solar flare that happened in April 2023 when the Earth connected directly to the Sun for a fraction of a second. We kept our atmospheric connection, but we lost the M field strength. There have been environmental changes since last April. The fields received have elevated the physical structure in the Soul of this planet and it has changed. The continuous shielding of the atmosphere was gone (?? for a short time and we received massive energy, which got absorbed partially by the body (of the planet) and partially it went to the center of the planet). It's now showing itself in disaster conditions and weather changes. (?? There is a new structure getting set up). (They are trying to say it is due to Global Warming, but (it's due to) changes in the physical structure of Earth. Since last April you can mark the changes in a drastic way. It's because of this surge of energy which was received by the inner physical structure of the planet. We'll have to wait and see the outcome. We have already seen floods and other things)).

(The KS tried to say these disasters are from the depletion of crude oil, which shields the inner planet from fields. (It might be that Mr. Keshe understood the question in a different way, because he started saying that the crude oil will never diminish because of how the planet is structured through the fields. Then he went on to teach about it. He wrote a paper about how crude oil is produced a long time ago. The crude oil will never finish, as long as we have the oceans, moisture, and salt moisture, and salt. In chemistry salt means the connection of the Iron and metals to a non-metal. This is what we call salt. This is how the salts are created. (?? Salts are created through the metals in the ocean and atmosphere, together with non-metals like Calcium and whatever else is in the oceans). We have Zinc and Copper. (The talk about the oil finishing was a fallacy made up by the oil industry to mislead the people about the prices)). (The fields get absorbed in the oceans and they go deep in (and make the oil)).

((The KS compared the oil to the brain matter which he said diffuses the rays as we absorb them). Mr. Keshe said, no, it's a selective job. There are certain field strengths that match the Zinc, Cu, and Fe in the ocean. If the field strength and energy matches with the Iron, then you create the first cycle of life which can have a blood circulation. We see this in the East of the Atlantic and the North China Sea. These are the two bedrocks of life on this planet, which is Iron based. He has explained this before. The deserts in central Africa and Sahara blow Fe dust over the Congo and into the Atlantic, and with the right combination of salinity creates (?? ). It's the same as what you do in your CO2 Gans Box. They create an instant condition of protein (AA), which connects to Calcium in the ocean, and a cycle of life (starts). The same thing occurs in the North China Sea, because there is mountain range full of Fe that gets washed into the oceans annually. This leads to creation of life. That's why we have a huge life presence in East Coast of Africa, and this leads to the next generation of weather disturbances, hurricanes and the rest of it).

(There will never be shortage of oil on this planet. It's impossible. They came up with this "fossil fuel" theory and everybody bought it. This is not the way oil is created on this planet. (If you watch videos from the Oil Crisis you see hundreds and hundreds of super oil tankers lined up in the Persian Gulf. This goes on daily. Could there have been that many dinosaurs? Because of our ignorance we have to believe what they want to tell us)).

(These same kind of fallacies have been started in the world of science by Stephen Hawking and Einstein, and we believe it because we are ignorant of the Knowledge of Creation. It's good if you listen to the original recording because he goes into much more detail about how Hawking stole KF work. He used to listen all the time to KSW. Hawking had his own theory of Black Holes as "eating machines" that scared everybody and the controlled Media hyped up everywhere. After Mr. Keshe submitted his paper on Black Holes to the Royal Society they refused to publish it and gave it to Hawking, and he changed his theory and said the ideas were his. But he was never able to explain them. The KS acted very surprised to hear these things. And it's because all of us in a way, believe what we are told. It's very hard to believe that the deception goes so deep into all of society. Einstein also stole his ideas from different people. He used to work in a patent office and he read the patents, and rejected the ones he wanted for himself. A KS asked why legal action wasn't taken. Mr. Keshe did send his Books and papers to Cambridge University, and the most they could do was to be ashamed of it coming into public. But Hawking was despised by scientists around him. Somebody used the words, the "Thief of Baghdad." And many scientists left Cambridge because of him. You can find out more proof on the Leuven University website).

Q: Iran has stated it has weapons so advanced they defy physics. My question is, is Iran playing a psychological card to scare its adversaries? Or, and has Iran weaponized plasma technology? If not, what technology are they using to defy physics on a military level?

K- (There is a video about this on Iranian television, but it needs translation. Iran has a number of advanced technologies. Plasma Technology is only one of them and they are very open about it on their national television. We are one of the space technologies. (If all of the different technologies across this planet by different nations were put together for peaceful purposes and not to harm others, then this planet would be a heaven in the Universe)).

(But, there are those who don't want these things to come out. They see them as an obstacle to create their own private beautiful life. The CEO of the Apple said something before he died that brings this home, if only humanity could understand his words. He said, you can't take anything with you. ("During the time of the Virus" we helped many politicians and diplomats, and ambassadors, but after their life was saved some of them turned against the KF and become our biggest enemies. Mr. Keshe tells different stories about this you can read on your own). (The KS said, it doesn't make sense why they would turn against the one who saved them. He replied, that's the way human's are)).

Q: How long do you think it's going to be before there is a global change?

K- At the moment, it can happen with a flick of finger.

Q: Then why don't you flick your finger?

K- As I said before, if we do it, they will say, it was done by him. When they do it themselves, then they (will accept it).

(Mr. Keshe again talks about how he influenced the Iranian government to suddenly make the change from being annihilated by American bombs, to now start talking peace and exchange of technology. Last week he received in writing from Iran, your wishes has been done, what you asked from the Iranian government. We influence world politics directly and it's about the fifth time we've showed it. We are nuclear physicists and we know the power of the technology we delivered to Iran. And they know what they will lose if we move out. The public only sees 5% of the KF technology. There have been other scientists who influence their nations. Einstein gave the okay for the Americans to us the bomb. He always said it was his biggest regret).

(The true story is that the Americans stole the atomic bomb from the British. And he tells an interesting history of the bomb. The missing piece was using the centrifuge, and that came from a British lady chemist. She changed the history of mankind. On our new Youtube channel we say in the Introduction video, when we discovered atomic and nuclear, with it came the wars and destruction. But with the Plasma Science we'll find peace. The Americans are scared to their bones, if Iran shows the new space technology, the weapons technology that they have in their hands. One day I'll tell you what Iran did with America to make this recent change).

(He goes on to talk about the future Queen of England, and how she's worth 3.9 billion. It means for next 200 years she has learned how to steal from the others to become the richest and hold on to what she's been given). (This has been going on for the past 2,000 years).

(Nick from Australia gives his testimony of the August 24th transmutation Flight Session. Basically, he had colon cancer and was internally bleeding for many weeks. In the Manchester Conference Mr. Keshe recognized cancer on the graph when he was in the system. In August he had been bleeding regularly before the Flight. He went through the expansion of the Soul, which he describes for us, and when he came back to his body, and bleeding has stopped. It has been that way for 12 days now. Specifically he said, in the second hour he felt himself expand, like blowing up (a balloon) he just expanded and it he stayed like that for maybe 5 minutes. That's it, there was nothing else. It sounds like it was a physical sensation of expanding and then later the bleeding stopped on its own. People should not get confused, the KF Flight System is not a Health Unit, it just so happened that he expanded his Soul and the body repaired itself. Mr. Keshe replied, I hope you find peace with it. And that's all it matters. He said, he understood).

(The KS expanded his Soul and the body repaired itself. It was the way the body wanted to be, (the Soul was happy with the changes). We changed the systems for last month's Flight for the Soul to expand over the body. This is the first time we brought the D of P into play by addition of a new structure. We expect to see (these changes) right across the world. This is why the Wellness Center in Germany is running tests. But you have to be open and accept it, (and receive it). (It's not just expanding the Soul through the head, it's

now going through whole physicality. It brings everything into balance. And this man is a prime examples of it). (This was done remotely through the system as Nick was 10,000 miles away in Australia, and only using a headset. The time for evolution in science and technology has come. The new change in the systems should give this kind of result to us all the time. Now we're supporting the Soul and the P. When you have the feeling that your Soul has done the repair, then it is also the Soul who feeds me, so why should I kill for it?

Q: Does the Earth have a Soul, an energy center and emotional fields, or something like humans?

K- Of course it has. (If you exist, then you have to have a central control which collectively controls everything. It's the same with the Sun. We call it the Soul, but scientifically it's a central control that dictates everything else. It tells (the arm and legs what to do and all of that. It dictates where we want to go. The Earth decides on its own direction and dimension, and ?? what we'll become. We humans call it psychosomatic when we use our mind to create something physical, like for example, Alzheimer's. The Earth is a repetition of the same. In humans we have temper tantrums, where with the Earth it has earthquakes and hurricanes. It controls the position of its Moon. It has to have an understanding of it. We are so physical, that we don't want to understand. (The Sun has different organs too, with different functions to control what needs to be done, and how to move and replace them. In humans it takes 28 days to change the cells of the skin. It takes the Sun so many billions of years for the planets on the outer boundary of the solar system to make its way back to the Sun and get recycled, and then new planets go back out again. It does it with precision. We only look at what we like to, and not the whole picture. If we look at everything without attachment with the desire to understand then we can discover that there is a process and an emotion behind everything. The key position is the emotion).

Q: And does it get affected by the sufferings and injustices on Earth?

K- It cannot .. It's the cause of it. (I think he means the Sun is the cause of what happens on Earth because it provides the fields and perhaps the emotion).

(He hopes that what was downloaded last April (helps the Earth). (It was a huge energy and it will have effects. We'll have to wait and see over the next 10 to 30 years how it has changed the psychology of the man).

(One way you can understand the change is to take a magnet and stick it to a metal and feel how strong it is. Then heat it with a torch and you will see that the same magnet has become weak. Then put it in a magnet making machines and turn up the voltage to 3,000 volts. This is how they make magnets. Then when you stick it back onto the same metal it will feel very strong. The machine aligned and added field strength to it. This is exactly what happened to the Earth. We have received additional energy. In KF we call this, "Energy is M fields in motion." The Earth has received huge amounts of M fields from the Sun which were directly absorbed on the North Pole. When fields enter the North

Pole they become filtering, and on the South Pole the absorption changes. We've already seen the environmental changes, but, the world of science is not aware of it).

(The internal energy of the planet has changed. It forces the South Pole to cool more. It forces the internal structure to release more (energy) to compensate for what is coming in. It will definitely affect us. The Earth's condition will change because of this rapid and strong reception of M fields we received. And this is just coincidental. It's just coincidental). (This will change the position of the other planets in our solar system). (It doesn't have to be harsh before it gets beautiful)).

(The Earth has to compensate for whatever change happens. What will it do to the angle of the tilt of the earth over the next 200 year? Would it go more back to the center, than flipping towards the 90 degrees? This could be one of the effects of this encounter. We will see changes in the equatorial line of the Earth). (Would this change be that we receive new energies so that we don't need to kill for energy?))

(Mr. Keshe gave a very interesting teaching on how the desert line of the planet has changed and is related to the tilt of the planet. He showed a picture that highlights all the deserts in the world. Then he said that Australia, which is mostly desert originally was up next to New York in the US. Over millions of years it traveled a very long way south. When you put Australia back to New York then you see that it fits with the desert line that goes right across the planet about at the level of the equator. The maps they show us of the earth are wrong. Then he draws the inclination of the Earth, which gives us the 4 season. Listen to this part of the teaching more carefully. The desert line of the planet is in line with the inclination angle of the Earth. The central line is where the field transfers are strong and there is an inward circulation of the fields. In fact, if he could tilt this picture and make it in line with the inclination of the earth, you would see that they are parallel to each other. It rides exactly on equator line. Then you can understand what effects the energy we received last year will have on this line. It passes over countries like Saudi Arabia, the central line of the African continent, and Middle East. We have had unusually huge rains in Dubai, snow in Saudi Arabia, floods in the African Sahara. All this has happened since the April 2023 download. What energy has changed inside the planetary system?)

(The scientists who make these false maps are creating a problem for us to understand our own planet. We do not understand the true physiology and the emotion of the planet and the energy it receives).

(The event has changed the energy level of the planet and where there was no rain, now there'll be a lot of rain. Because ?? the equator line has been moved above the rain line. We need to have the desert line for the (well being of the planet. Therefore, when the line moves some places will have to become desert. This is a specific characteristics of the plasmatic field structure of a spherical shape, and you cannot change it)).

(He talks about the equator line being the same as the heat line, in I think plasma reactors. The equator line is the same as the band of lights we see on true UFOs. He hopes the

Iranians will show the Americans the structure of their UFO. The top half of the UFO is higher than the bottom half. Where the two halves come together is the same as the equator line on the earth. And it gives that band of lights on the UFO. The bridge between the 2 halves is like a control between the intake and the outtake. Fake UFOs don't have this line).

(On Earth our continents actually go the other way, which he draws. It's an inclination to the line of the inclination of the planet, which creates the 4 seasons. What they have drawn for us as continents is all rubbish. (They have drawn the continents wrong on all the globes and maps of the Earth). We know what we are saying is correct, because we have built a system that will prove it. They only talk about theory. We talk about the facts, and we have the flight system. This is one of the criterion, not all of it).

(The Sun has transferred its emotion to the Earth. The kiss of the mother. Now we see the love of the child. It has energized the planet. Since last year Earth has moved slightly away from the Sun, because the energy of the center magnets has gotten stronger, so the distance has changed. The change of distance creates a new environmental condition. It has nothing to do with Global Warming. Our scientists don't understand the science of Creation, and they come up with any rubbish they like).

(Planets that don't have a tilt and are vertical, don't have this problem on the equator line. Because they stay on that line, that pattern stays. The inclination of Earth has created the 4 seasons, and so it's vulnerable to changes. And the planet got charged last year, like when you charge a magnet, it has more strength. In the Law of Physics of the Plasma, the stronger always gives to the weaker. We are the weaker, we are a minute structure and we received a huge amount of energy. We were lucky that we were not pushed out of our orbit of the Sun by hundreds of thousands of kilometers).

(Our scientists don't have holistic knowledge. I do. I come from it. It's my birthright. We see it and we have copied it in the systems we build. Man has been educated by illiterate people like Stephen Hawking and Einstein and they do not allow man to think correctly. When the planet rotates vertically without any tilt in the angle, the life conditions are homogeneous and you don't get the variety. It doesn't mean that it is lifeless. It's a different kind of life. If you change the angle of rotation of the planet, directly the other way, then on Earth it will create a specific kind of intelligence).

(With the energy we received last year, the angle of rotation of the Earth has changed. Last week I told you that I hold my heart into what happened. (We think the angle of rotation has moved directly the other way. The changes we are seeing has nothing to do with Global Warming, but people who have no knowledge are now saying, it is Global Warming. On Sunday April 23rd 2023, you can find the image of the solar flare on the Internet. They show a picture of the M field at the North Pole. There is a huge red line representing the M field received. A strong magma blew the magnetic field protection off the Earth from a higher level, and that fed the planet Earth).

Q: Will the behavior of humans change?

K- It should do.

Q: Is it part of God's plan?

K- (These are the realities of the physical life. You can attach it to anything you like. But understand our Soul is also a plasma. And because of these energy changes, we will change also. We have to change, as we already received the M fields. That huge amount of M fields came to us while we were rotating, so everything on the planet received it. Every single living thing on this planet has been magnetically elevated. Would we become more knowledgeable? Are we ready to receive this new knowledge? Was this a coincidence? Or was it to give us a helping hand for bringing peace? Does the Sun have a Soul and wanted to create that condition, so her child doesn't suffer anymore? You can read it a thousand different ways).

Q: Can we say the plan of God is to have peace and service everywhere?

K- God never created war. (Man created it for himself to show his power. It's Man's weakness, and not God's hand. It depends on who and what you can influence. We might be in a position to influence our child, family, workplace, nation, or whatever. Some weeks ago I made my point clear to the Iranian leadership, we do not go to war, refrain from it. I invited the Iranian leadership to start the peace talks with the Americans again. Just before Ayatollah Khamenei announced the new peace talks they were ready to take revenge, which would have benefited no one in Iran. We would have lost everything. Two and a half thousand years of culture would have been wasted. Those people don't care where they drop the bombs. We advised and gave from our Soul and we touched their Soul. It's not just a word. Now you will see what will happen. We'll see how the situation changes over the next 6 to 12 months. As I said before, Iran will open an embassy in the United States in 2025. That's our wish and our hope, and we'll achieve it). Becoming a man of peace needs a lot of patience. A man of war can press a button anytime.

(A KS was asking if people are going to experience this transmutation and transportation even if they are not participating. And Mr. Keshe's answer was like, what do you think, you won the Lottery, and now you don't have to do anything. Or now you are doing whatever you like, without helping the others. And now you think you are just going to benefit from a Cosmic Event and take a "free ride."? The changes are going to happen and it cannot be stopped).

(This "rain" of M fields has rained upon all of us and because it has a M field spectrum even the fish in the ocean are effected. It will change us. Would it elevate us? We have to wait and see, because it's part of the structure. The people from the Northern Hemisphere who were closer to the center of it received most of the fields for a longer time. How will they be effected? Would they become more aggressive or change to become more peaceful? We have to wait and see). (Would the culture of a nation change, because they

all received the fields and they all got elevated? This kind of rain your skin cannot stop. It's plasmatic and M and it goes right through you. You have no choice but to receive it). Maybe four seasons will become two seasons across the planet. Don't blame everything on Global Warming, because you're ignorant to understand exactly what is happening).

(Mr. Keshe talks about hopping from one planet to another as we go closer into the Sun. Planets that get closer to the Sun receive more fields or higher energy and their citizens became enlightened and understand more. In distance from the Sun it goes Mercury, Venus, Earth, and then Mars. (?? Will the beings of Venus jump onto Earth as it moves closer?) (Would we find buildings from civilizations on Venus that would show that people used to live their? Maybe we'll find life beneath the surface? Millions of years ago man used to live like mice in holes under the surface. (?? Will Mankind hop to the next planet?))

Q: Who pulls the strings in the U?

K- Nobody, (it goes by field strength of the interactions).

Q: Where is the Creator?

K- The guy who started the strings is still sitting there. We call Him God. He's still watching what He does. He's sitting there and when He moves His finger, He sees how many galaxies will hit each other. Most probably He's still playing His game. But we are part of that game. We are connected to that game. It's the game of Creation, it's not a game of man. We are part of that process).

Enjoy the MaGrav, I hope it gives you enlightenment, and not just heat.

(Anybody can join the Monthly Flight sessions, they are not exclusive and you can join at any time. These sessions will get much more intense by the end of this year and the beginning of next year. They will be more powerful. We have a responsibility, and I accepted that responsibility, and we have to stay with it. We have to create a condition for World Peace and to end all the wars. It doesn't come so easy. We have to bring the point of change. The first thing is to bring all these religious things to one point, then 90% of the wars will finish. The other 10%, is from the greed of the man, because he wants to have more and he creates wars to get more).

(I watched the life of the Tesla car guy with interest. He was a boy who had nothing and came from a broken home, then suddenly he became a scientist, and now he's a politician, dictating what other men need to do. But he himself has no capacity of anything. Just because they somehow got more of this imaginary money in the bank they think they have a right to be decision makers. We saw this with the computer guy, Microsoft. The KF technology will destroy this guy totally, because we won't need rockets to go to Space and we don't need to run cars on batteries. Everything will be touched in the next 5 years, and it'll be the end of it. I wonder how they're going to pay for disposing of these batteries. There will be a backlash when the new technologies come out. These people

will have to clean it up, because they made all the money from it. And filing "Chapter 11" for bankruptcy won't help them. They cannot stop the emergence of the new technologies. And these people from the backwaters of South Africa, cannot be the decision makers about what will happen to the mothers holding their child).

(We are still waiting for the Iranian officials to give permission for the November Conference in Isfahan. A lot has changed in Iran with the new President. He explains more about it. He talks about the Ayatollahs and how they are the most despised people in Iran, because they've brought so much hardship. Then he goes into the history again how the Americans setup Ayatollah Khomeini while he was in France to be brought back to Iran. He told us before that Khomeini agreed to destroy the Iranian nuclear industry for the Americans, which he did. Then he betrayed the Americans later. In a way, Americans are responsible for what they setup in Iran today. And later Iranian opportunists jumped in and created more problems. The new President is trying to reverse the clock back 30 years and start fresh negotiations with the Americans. The doctors of Khamenei expect him to die within next two years from cancer. Iran is not a monarchy, it will stay a democracy).

(Let's see what the new Man brings. Then we have another crazy guy coming up in the United States. They put him in prison, and (now they want to make him president again). This is part of the problem in the world of politics. It's about who is going to be the strongest? But when we all become equal, then we won't fight for it, then we'll see a different position. Okay, so you want to have billionaires, or whatever. But we need to have a basic standard of living that everybody can enjoy life).

Q: I never understood why a man needs others to bow to him. I still find it hard to understand why these entities need to control others instead of just letting go. And then having everything they could ever desire.

K- (It's due to weakness in their character. That's all). (Because of how the religions teach, these people don't believe that they are responsible for their own behavior and they will have to balance it through their Soul. These people have no idea about this. Their religions put God somewhere up in the sky, (so they are disconnected from reality and life)).

(The other problem is that people are trained by what's on television. And since the new generation doesn't watch TV, they took over the Internet. (And now it has gotten worse, because people don't believe the Internet is controlled. For example, everybody believes that Mr. Obama is a nice guy. But they don't know that under his rule more bullets were shot and more people were killed during his time. Americans don't know that Trump actually only deported a fraction of the number of people Obama deported. More than 3 million people were deported during his administration. Because of the control we only know him as a nice guy. He created more war, sold more weapons, supported genocides, but we only know him as a nice guy. We believe in the image that they made of him. And now this golden hair guy has no ethics. What will be the future? Because all the Americans have to pay with their Soul for the guns their nation makes. The money you

worked so hard for to pay taxes, made those guns to kill someone, like a child in Afghanistan. The American citizens have to pay for it. They are paying through their children, the diseases they get, and everything else that goes wrong in their society. You choose your leaders, so you're responsible for it. You choose the soldiers and the gunman to do these things, and you're responsible for it).

(The way to change the future is through teaching the children correctly so they mature and can make the change. The world leaders don't care. They really don't care about what they do. But once they know they are responsible for it, then they will care).

(I think the only solution is the birth of the "Daughter of Mitra." She will be born by the Soul, and not the physicality. Then the physicality will have no attachments to the body of the man. It will just be there).

(When people start transmuting they will directly experience that the wealth of this planet means nothing. All possessions of this planet are worth nothing. Maybe we should put everybody into transmutation and then have certificates that you have transmuted at least 3 times to different places in the U. Then we could make it compulsory that all the world leaders and all the richest men on the planet have to go through transmutation over the next few months, then there would be a change. We could send them to planet Zeus where they'll end up as a dust. Then when they come back, would they be changed? But would their Soul allow them to go? That's their biggest problem, not ours. It's the same as the UFO, your Soul has to be pure to be accepted by the Soul of that system. It's not an engine anymore where you board and give a ticket. It's bought by your Soul, not by the body. This is why Space is a peaceful place, but man doesn't understand).

(There are no doors on these UFOs. The people building them will tell you that there are no doors. The only controls they have is through your peacefulness in connection with the system. They go in and out of these systems but they don't see it. (Does that mean the system at this point is invisible?) If you bring a person with the wrong intention into the building, you will see how they get hammered with it. Then you'll understand the real dimension of the system. This gives a false sense of security to our team. Because they're all peaceful).

(I said to myself, do they know how pure a Soul they carry, to be in here? They are literally in tons of MaGravs, Gans's, and everything else. Whatever (issues) they had outside, gets washed when they come inside the building. (It's so quiet you don't even hear a mouse, and everybody does their job. There are no higher positions or possessions, like I am somebody. The target is to complete the system of light, complete the technology. They are not Knowledge Seekers, but they are more knowledgeable than the KS. Their Soul has been touched, and that's why they are there. They are changing the course of humanity. And they are pure Souls, they haven't come there by accident. Once we had a rogue guy, he kicked himself out. It was his own decision. They don't even know about the teachings. They're not KS, but they understand the essence of what (has to be done). I don't let anybody into the lab, because I know the consequences of it. There

are no doors on these Spaceships. The only key is the dimension of the strength of the Soul. You cannot cover it up. It has to be inside you and part of you).

A KS asked Mr. Keshe to say something about his life, where he comes from.

(I don't know anymore. I come from a very humble family in Iran, extremely humble. Then the more I live, the more I find out how humble my parents (really were and the rest of it). I had a great pleasure to be educated in a different way by the hands of beautiful people like Zoroastrians. They say your life gets shaped during the teenager time. My early teenager years were touched by the beauty of Zoroaster. I felt the love, and the sincerity of the love in going to a high school that taught the Ethos of Mitra. And then the rest of it comes. When I went to England I saw how harsh these people live. And when my brother arrived in 1976 to London, and as we drove through the best part of London he said, take me back, this is a village, this is so backwards. (In Iran we lived in the beauty and love of an ancient culture of truth. And our people love each other). In London we became foreigners and everything else, and learned a lot (about life). The lessons actually brought me more into the depths of the teachings of Mitra. I fell in love with the most beautiful women on this planet, and unfortunately could not get married to them. The rest is history, and then you realize why it goes this way, step by step, step by step. At 50 I looked back and said to myself, (it had to happen this way), because otherwise I wouldn't have reached to what I'm doing now. It was part of the structure to make me ready to do what I came here to do. This is where it is today).

(Let me read you a report I received last week, which brought a lot of joy. This is from one of the most powerful organizations in the world, assessing the work of the KF. Part of the conclusion was that, Mr. Keshe is 66 years old and he is more or less in old age. What happens if he's not here or becomes incapacitated through illness? And I said to myself, how am I going to answer this guy? (I) came to one conclusion, that I'll be here long after his great-great-grandchildren have gone. But we can't tell them that, because they won't understand. At 66 I am just starting).

## **KEY-PHRASES:**

## **SUMMARY:**

## **ENGLISH TRANSCRIPTION**

(:19)

K- Yes. Thank you very much. Good morning, good day to you, as usual, wherever and whenever you listen to these series of Knowledge Seekers from Keshe Foundation Spaceship Institute. We are back again to learn a little bit more, to teach a little bit more, to share the Knowledge of Creation.

Something which is very important, and as we said, what you don't find in macro you find in micro, and what you don't find in micro you find in macro. Nothing in the World of Creation is different than what we see. (:20) The simplicity of two things, two Magnetic (M) fields, they interact and push each other away, they interact and they come together. It's only two fields, there is nothing else. If it is one, we don't know if it is interacting, or if it is coming or going. So, everything in the World of Creation works on these two, and the combination of how they withhold, or a combination of what they hold in. And somewhere in between they accommodate each other to hold in, and to withhold, and this gives the whole structure of the Universe (U). There is no other way in the Universe that the Magnetic fields interaction works any different.

Example of this, to "withhold" and to "hold in" and something in between that the two manage to space gap each other, accommodating each other. Skin of the man is the best example of it. You have an outer skin, which withholds anything to come in, does not allow. Then you have an inner skin, which holds everything in, which is a structure of the body of the man and what is inside it. And you have a layer in between, we call, middle layer, which accommodates to understand what's happening outside, to understand what is happening inside, and somewhere in-between whatever doesn't fit, I hold. (:22)

What is outside is cold, what is inside is warm. The emotion, the feeling, would like to feel warm. I need warmth from outside to accommodate the wish of the inside, there is a need for heating, there is a need for warmth. I don't like the touch, I want to withhold that touch. I move my hand away from you because the emotion of the inner side has to be accepted by both. The other dimension of this is, you have the skin of the man, the outer bound of the physicality (P) of the man is that outer side. Then you have, the what we call, the Soul of the Physicality (STP) the interaction of all the fields within the structure, the middle layer. And the inner layer, which is the Soul of the Man (STM), the energy center of the man which holds what is inside the Creator. How we feel, how we react, how we interact in dimension of physicality, the inner side, we always said, the Creator is within us. This is what we protect, not to damage, to carry out His wishes.

Then you see there is no difference between the structure of the skin of the man with the evolution of the science of the inner man's structure of Creation. And this applies to every dimension (D). (:24) If we understand this, if we develop the science of the knowledge of the interaction of the fields, this brings us to a new way of thinking, new way of adapting ourselves that we understand the Knowledge of the Creation, does not matter where we are. On Earth, in deep Space, in a Galaxy, in another Universe dimension.

So we understand, all the science, what we have, in a way, denied ourselves, and we have covered it on the every aspects of the ignorance of the Knowledge of Creation, has been our fault. In a way our scientists all have been 'physical' scientists. They dealt with the physicality. And those who came to introduce to us to the dimension of the inner side, were abused and became abusers of the same knowledge. But, in the Space you are the Creator of yourself, in the Space you are the Prophet of yourself, in the Space you are the

manifestation of yourself. When you transmute from Earth to another position in the Universe, it is you, in interaction of the fields of the structure of inside, which is the plasma of the energy of your, whatever you call it, Soul, its in interaction with its environment decides what you create to manifest yourself as. And then how you behave in that dimension, as a predator, a lover, (:26), a co-exister, a Being of peace. All it is your intuition. All it is your decision. All it is what you expect it to be. How you feel at the point of manifestation is how we perceive our existence in that environment. At the same time we have to understand, if we use this energy in a peaceful manner, understand that does not matter where we manifest ourselves in the dimension of the physicality of time, space and position. Then this gives you a new dimension of existence.

In the September trial of Keshe Foundation on Friday 20th, we will bring you to a totally new dimension. It is for you to decide. This has never been done. The group last week, last session in, what we call, August, went through a transformation, those who understood and connected to, in a physical dimension. In the Session of September we bring you in dimension which considers all three layers. With the exception that we, as Keshe Foundation controls the environment of manifestation. We allow the expansion of the inner Soul, the expansion of the inner energy. (:28) And with the systems we set up we control it. This Session of September is us being in that middle layer. It is us deciding how collectively you as Knowledge Seekers (KS) manifest yourselves.

In a way we take you on a bus journey and we take you to a sightseeing position, and we want all of you to see that statue. That's why you have been brought here. In a way, in transmutation you learn how to control, and we learn with you, how you learn from yourself. What does this mean? This means, the systems in the coming session on Friday will bring every single one of you to one position we decide, not you. We are the emotion within the middle layer, we decide on your inner strength, and we decide on the manifestation of the strength. Would it be if we ask one of you to manifest yourself in a dimension of position on the Moon. How would you manifest? Would the others in your team will see you as the manifestation of what you want to manifest yourself as? Sorry, dogs cannot exist on the Moon, there is no energy, there is no air to breath. (:30)

We will bring it to the point to see each other in that point and position. Don't forget, you travel to depth of space, you are all going to see a mountain range together. How do you travel to? You are all within the structure of this planet. We try to give you the, what we call, the chance of transmutation. But we dictate what we want you to see, through the emotion of the system. Through manifestation of the ?? world, and the space and time.

In the Friday Session of this month you will be given pictures of certain points in the Universe, and you are expected to manifest yourself in that time, and place and position, as a collective team. You had enough experiences of going, trusting, accepting. This Session of September is us being that middle layer. It's you inside an emotion, a new manifestation of physicality as a group, as a team. You had two or three sessions with each other, you are familiar who is in your team. You have never met before. But at the point of manifestation, the way we set our system up, we control you. In a way we are that reduction in the strength of the fields of the blood, which allows the Soul to travel to

manifest yourself in time, and position. But this time, before you go to sleep, we tell all of you, we meet at such a point, such a destination, and we want to know if you can arrive. (:32) The instruction doesn't come by words alone, the instruction comes with the love of the Creator. It comes by the presence of enjoying to be, to see collectively, and how many of you will you see each other. Because we control that central emotion.

The system ?? who fly ?? through transmutation is in the verge of its total completion in the next two months. We have till March to complete it, that collectively it can be shown in Washington. The whole purpose of understanding this, is to understand another step in your own physical life. You are asleep, you are in the state of the expansion of the Soul dreaming about whatever. And there is a noise in the physical side of your body. A dog barks, something falls on the floor, somebody calls you. Now you understand, you are that caller. But this time you know where you are, you control with the dimension of the fields. The outside call tells you where to go, how to do, and how to manifest yourself in that time and position.

You all know this, or you most probably have experienced this. (:34) Most of you who go through two phases of resting during the night, you have two sets of , different dreams. What's the reason? And if you understand that reason, you understand the next step of why you as Knowledge Seekers are finding how to transmute. Let me explain in a very simple system, in a very simple way, and then you find out most of you where you have failed to complete the transmutation. If you look at the structure of the body of the man, in his brain. And this your two ears. Understanding the cycle of the sleep of the man, that during the sleep one side or the other, rests. The interesting point is that when you go through the dimension of what we call, transmutation, or a dimension of your sleep that you call it a dream, one of these sessions is weaker, because it's on the repair, low level, high level can create a lot of problem. And the other side, part 2, is a full active mode. So when you dream you actually travel with the half of the brain. (:36) The other half is holding you back. That is why when the cat "meows" and the dog barks you wake up. Because this Chap (brain) is fully active. It's part of the protection we have created.

Those of you who want to go through transmutation you have to make it ?? both, that there is no physical attachment to bring you back. And this is why most of you have failed to complete the full transmutation. Because you stay always alert, the other half too, is still on duty. And this is why most of you cannot transmute. This is why you still hear the cough of the guy who is on your team. That's why you get disturbed by it. And when you collectively, all number of you, manage to reach that point, we see a flatter spike (on the graph). Because when we see, we've shown you this, if this is the central line of the graph, your Soul stays close to it and flat. But what we see, we've seen, you've seen before we have shown you, we see this thing from you on a dimension of the physicality (Goes up and down). (:38)

When we run our reactors, when we run our flight system, when we are within the space of the plasma of the reactor, this is the characteristics we see. Flat line, means total plasma condition, means we are inside the Soul structure. And I've shown you before, we

see the physicality jumping like mad, in every dimension and position possible, as you see on the green line. And when it settles and becomes near enough, which means you're on the flight team. You are in transmutation, which means the STP and the physicality of the man and the STM are all gone. ?? It is just flat ?? we are there. We can't do anything. You are not with us. You have bypassed the boundary of the physicality of your structure. Then at that point, we know it's you, we can tell you where to go, through the Soul of emotion.

Then you understand why we use these graphs, why we operate with these things so closely, because we understand what it means to us. That flat green line, which we've shown you, reaches the dimension of interaction of the Soul, it means you are already out. But why do we see the yellow line and the purple line fluctuating everywhere, and sometimes then becoming to a very, very straight line, too often parallel to each other? When we get this, in the plasma condition, you mean you are not within the structure of the ?? This is the time when you can actually cut the position, (:40) increase the dimension of the STP into the dimension of the Soul, and manifest yourself anywhere in the Universe.

When you look at the graph lines, because we start showing you these graph lines quite clearly in the past few sessions, is that when we see the change of the, what I call here, I use the brown line on the top. This is your Soul still in control. When we see both on the same line, but the gray jumps up, means you're ready to manifest yourself in the position where you are.

A lot of you, when you go through this session of transmission, you expect to find yourself in another position, and I went there, blah, blah, blah. Don't go too far. When you start learning, do you try to do a marathon from the beginning to the end? No, you do one kilometer running. Then you do two kilometers running. You build the stamina. You build the trust my physicality can take. Try to move from one chair to another. Try to move from one side of the room to another. Try to manifest yourself from one room in another. And then go for the long trips. You need to practice. And some of you Knowledge Seekers do. (:42)

In the coming session of the September 20th, write down all your illnesses. Write down all your fears. Write down all your addictions. Write down all your joys. Write down all your pleasures. Write down exactly what makes you tied up to this planet, that you're aware of it. And then come into the session. Mid-session, we stop the session. And you go back and look at your list. Which one of them have you ticked, yes, yes, yes. Which one of them have you ticked, no, no, no. Move to the other chair in the room. And try to move back on the first chair, to see if you manage to satisfy. You arrived, what was your wish, now physically. Try to get physically that wish back to where it started.

We control, we are the middle layer. Training you to transmute, even up to now you thought you transmuted. Those .. very easy, but you have to build it up, the trust in you that I can manifest myself from chair to chair. Write down all your illnesses. (:44) And after the session, check on them. Diabetic, dementia, pain in the arm, whatever, and

monitor for 7 days. All your fears, monitor for 7 days. And then, you'll understand the purpose of transmutation in the dimension of physicality of the man. How much of your fears changes? How much of your physical problem changes? How much the pleasures you enjoy increases? Because the session of September, it's the next step in the dimension of increasing the trust in you with yourself. We ?? are that middle layer to accommodate. In our systems we built we accommodate that part. But gradually you learn.

If you do this with sincerity, if you do this with the trust in yourself you achieve it. If you remember there is a video somewhere where we run these sessions in Austria, in Linz. We had a couple, one of them literally went from one system to one across the room, because it was ?? the room, I didn't have to go anywhere. And the couple felt and sat next to each other, with each other. That was because the other one who was scared, didn't have to go anywhere, was in the room where they both felt safe. (:46) If you're a couple, try to see, if you can feel each other, presence of each other, holding each other, in transmutation time. This is the way the structure works. The way, as I said before, how you change things for yourself and not for us. This is the way, if you understood the totality, how the Universe works. Man needs to become that Universal entity.

In the condition of the physicality you have your three layers of skin, your outer skin, your middle skin and you have your inner. Where inner is a representative of what inside needs. Outer is representative of what outside needs you to be, to be part of us in your middle layer. In the dimension of man in transmutation, the physicality of the man sits here, the physicality of the STM and the STM. And inside is the Creator. As long as you live and work as you do today, in this layer, you live a physical life. When you understand the emotion of the Creation, the reason for man's being, you'll sit on this end. (:48) You'll understand how your emotion affects your physical existence, STP. And when you understand how you convey and understand the World of Creation of yourself, you come to this dimension. So you can travel from there to there directly.

The inner circle, the inner ring, the inner part is the Soul of the Creation. But here is the STM, and the existence of physicality. There is no need for Prophets, because you, you're responsible for your own, has no, what we call, profits in it. The most important part, in the whole lot, is this section. If we can create that trust, if we can create that position, in the sessions of the coming up, you learn more or less how to get in touch. And then, in the dimension of position and time, create that connection between the three.

Now you understand, why we created these sessions, why we brought this into this point. What is the purpose of the Soul if it's just in there? It has to protect something, it has to be connected to something. (:50) And that connection, that what it protects in its Totality, in essence, is the essence of the creation of the Creator, which is within it.

And once you get to this, once you understand this, you can manifest yourself anywhere in the Universe, at any point and place and position, because you'll be dealing with the center. As the Creator manifests itself in any position in existence, all positions dimensions. I made man in the image of Myself, because I am within the man itself.

The fear of physicality we want to hang on to, has kept us to this point we are today. With all the killing, with all the wars, with all the things we do, animosities and everything else, because we are not aware of this, what is inside us. We (were) always told this is a dream, and I showed you in the other picture, how this is you, how this is the beginning, this is how you dictate the time, place and position. Your dimension of existence, in the dimension of physicality, has been the barrier for man to understand he does not need Jumbo Jets, man does not need the rocket, Space Technology, man doesn't need the rest of what is created in dimension of physicality, because unfortunately you cannot bullet your physicality inside you to your Soul. You have to understand it, you have to comprehend it. (:52) And then you have to understand what I told you from the beginning of the time of teaching, which has been, and if you understood it, as I said to you, the emotion, the STP. The Soul, the emotion what's within the Soul, is the same what is in the dimension of physicality.

And if you learn how to cross this ?? too, you learn how to go from to. In the dimension of physicality you get on a donkey, in the dimension of the energy, what you call, the Soul, you have the transmutation which is already laid out across the Universe. You just need to jump on the track of it. And then you understand the true Roman saying, "All the roads ends up in Rome." All the roads of the Creation ends up with the Creator, if you understand this principle of Creation. You travel in the dimension of the jets in your physicality, you travel on the dimension of field of the Universe, Universal fields, to get to the point of destination, even the Creator. Depends if you find that strength, which is within all of us, to connect to dimension of the Creation. And this is what I always said, the emotion in the dimension of the Soul and the emotion in the dimension of physicality is the same. And if you recognize this, you have access to the STP. And then you control it where you want.

And this is part of the work of the, what we call, September session. (:54) I think by the time we close the September session, many of you need a lot of ?? rest, and a lot of understanding, and a lot of comprehension, what happened to you in that two hours in that session. What you did to yourself, and what you learned from your own doing, is the purpose of September. If through the strength of the fields of our system, through what we control, we manage to diminish this, in a way, there is no separation between the STP which is inside between the physicality of the man and the STM.

This for you to achieve is too soon, maybe in, I don't know what we call, January, February, in two, three more sessions we bring you this, to understand in a way that the STP and the STM, and understanding of the Totality, is a common denominator between the two. Then you can exist both in dimension of physicality and energy, and then you understand this become a new way for man to exist, because the next barrier for man to understand is this barrier, which is condition of what we call, the connection to the Creator. (:56) To understand the World of Creation, when you understand the World of Creation in its true way, not the human way of God knows what they've already been taught, then you become part of that Universal Community of your own Universal understanding, the Totality.

And we cannot come into March and say, "Now we want to transmute." We have to train you in next few months, then you do the transmutation, as the song says, "Meet at the same time, same place." In the coming time, and in the following teachings to come in the next few weeks and months, we'll try to bring you to understand this. We bring sessions in, that in the sessions you all go through the transmutation process, but which one of you will see manifest themselves and back?

If you understood this, if you comprehend what was taught today, in the very simple way that you understand it, then you understand every single one of you has the capability, has the understanding to be aware of what's going on in your environment of physicality and then in the environment of Universe. And then, the new process of the journey for man starts.

There is no difference in all levels of the creation, except the field strength. (:58) And the more strength you gather, the deeper, the stronger, the closer you can be, become, to understand the process of the Creation of the Universe. And if you carry the Ethos of Mitra, you can never fail. Think good, which that thing is your emotion. Then you do good, which means your manifestation point of arrival, there is no harm done. You find peace within yourself, within your environment and with the structure you manifest itself in, does not matter who is there. And then, as you feel safe, then you manifest yourself, you act good, because you don't do anything to harm the other, and you find out it's easy to come back, easy to transmute.

In the session in November, we show you systems are physically connected. You still have the physical connection of the systems which have emotion. And then, in March, you'll learn about the systems which have total energy, and no dimension of physicality. Understand the teaching of today, please, fully. Because we are preparing you, especially those of you who attend the sessions, for the full transmutation, where you are in charge, and we create the dimension of the process. We go for a break and we come back, and if there are any questions, we try to answer. (1:00)

**>> BREAK >>** 554 KSW September 05, 2024 (1:05).

K- These are the shops which are now selling the Keshe Foundation products in Germany, Austria and Switzerland. And if any of you would like to follow up with this, you're quite welcome to negotiate with the Keshe Foundation team on exclusivity of the Keshe products. And as we add new products in coming time, with our cooperation with China, that will be added to, to a number of things, as they grow. These are physical shops, you can physically go to them and pick up your stuff, or buy stuff, or link to them to... for different activities of the Keshe Foundation to do. (1:06) And they have access to all the possibilities, you can buy the different policies which Keshe Foundation has and the rest of it.

There is something, I just received a message from the Keshe Foundation team. For a long time we did not have the stock of pillows in our, physically in our warehouse in Linz in Austria. All three types of pillows which were, what you call, were not there for some time, are back in on sale, all the three sizes, and again it's a limited stock. And once this depletes, that'll be the end of this range of products with the pillows for different sizes.

Just those of you who had to join us for the September session, please complete here in next week or so, that we can allocate and then we can structure how, which group we'll set up. We most probably add additional group into this, which will be the Chinese group, and those who are in China can go to the new Director of the Keshe Foundation, Chao, and organize your sessions, there will be one specific session for the Chinese community, because some of the Chinese have a problem with the Zoom. We'll operate that through the Chinese WeChat system, for them to be able to join the transmutation, what you call it, set ups. The same goes for, what we call, with Middle East on Iran. You still go through the Iranian channel to Yousef, and we organize one session for the Iranians if they want to get from Iran. (1:08) This allows us to be able to do a much easier job right across.

You who had joined and came through the Keshe Foundation process with Dr. Kern and the others on the Wellness side, you ?? ... ?? for new sessions, depending on Dr. Kern's decision on how we do, to upgrade and put you through sessions with the new system which is coming into operation. It's advancement in technology. And Dr. Kern will call you or make contact with you to join new sessions for maybe two weeks, three weeks, or six weeks again to bring you more improvement to what you agreed on when you went through before for whatever condition it was.

We will wait and see if and how we structure our, what we call, the work in Iran for the conference. And we are still waiting for authorization of Iranian government officials, like you were telling us, this week, next week. And now, hopefully, next week we'll receive it. And then once we receive that authorization, we can take steps for the Iranian conference and presentation. If there are any questions, we try to address.

Q: ... In regards to store products, there was a question in their webinar chat, here from George, who asks, in his second question, he wants to know if people with metal implants could use the Twinity products, and if they could be processed in the German Austrian health centers.

K- The Wellness Center in Germany handles and we, (1:10) you can do that directly through Dr. Kern. Austria is not available anymore, the only Wellness Center which we keep running, it'll be in Germany and you have to go through Dr. Kern and depends where it is and what part it is and how the system will react.

R: So would that be through the email we see on the screen?

K- Yes.

R: For the German community?

K- No, no, no, no. That is a shop. That's a retail shop in Germany. You go to...

R: Oh, ok. Sorry.

K- You go to the usual, what you call it, the Wellness Center in Germany is different. Or if you go to [info@keshe.foundation](mailto:info@keshe.foundation), they'll put you through, or they transfer your email to the Wellness center in Germany. Then they look after everything else. And in the coming time, those Dr. Kern and what you call the Wellness side, they have started a new trial. Some of you already know regarding they are looking at cancer conditions and the rest. That avenue they've opened with the new research and development. But you have to speak with them, and is testing the new dimensions in the work of what they do with their system. They look at all the cancer cases possible.

Any other question?

Q: ... Hello Mr. Keshe, last week you gave us some hints, how to create plasma water using the MaGrav unit. (1:12) For those who don't have a MaGrav unit, can they use a Pain Pen instead? Thank you.

K- No. Pain Pens are totally different thing than the MaGrav system.

Q: Okay. Then there was another question that came up in our Plasma group, or a suggestion from Mark in particular, that can we consider ourselves as a MaGrav, and spin the Gans water above ourselves, or in a circular motion? Does that count? Or is it only those that have a MaGrav that can do that experiment?

K- The MaGrav is a totally different thing. MaGrav is totally different. You have to understand, MaGrav by structure, inherently creates a different field dimension. They create a very, very much diversity in totality of the fields which they create. It cannot be repeated in a dynamic system. It's a stable system, is a continuous contained system. and cannot be replicated. It's a very special, (1:14) if you learn about the MaGravs, completely, the way they were set up to be. You'll understand the position and condition they create.

Any other question?

R: I see Mark put the other email address, the office@de.kfwellness.center. Was that other email address that we were looking for?

K- Yes, that goes directly to the Wellness Center in Germany.

R: Yeah. Great, thank you Mark for that.

K- As I said, they're considering, they are working on all cancer cases, for the new structure which is set up for them.

Any other question?

Q: ... Mr. Keshe, when the request was given to the Universe for the necessary field strengths to manifest our Sun. The request was put out by the Soul of the Universe, the collective Soul of the Universe, or another Soul, and or group of Souls? Thank you.  
(1:16)

K- Never was a request, goes anywhere, it's not a request and we receive it, it's not a post box. It's the position, the system or the seed, has been destined to manifest itself as a balanced field strength.

Q: So it's literally...

K- It's just a random position, random structure.

Q: Oh, okay.

K- You see, the whole is, the whole thing is, is not that... I'm going to rephrase it and it's much easier to understand. It's like, you manufacture a car, ready to go, and say, who wants it, where do you want to take it? But this time, who wants it, where do you want to take it? By the design of the car is already destined, where it's going to go and who's going to get.

And it's... this is a very interesting way, if you can understand it, if Knowledge Seekers can repeat it. You put a series of magnets, balls, on a table. And chop, or take a very tiny spherical magnet. And hold it a distance, let's say, half a meter or meter away from the table of magnets, all magnets on the table, and release it. And you see if the small ball repetitively end up in the same or near in the same area. This is a very nice experiment I used to do. (1:18) Because it shows you're that little magnet, and a condition of the structure of Universe decides where you fit in. Which Universal gravity pulls you to, because it matches with yours? And then where does it accommodate you? And look at those balls on the table. That's a galaxy. And inside these galaxies are all particles, which each one is a solar system. And then if you can open that particle inside, and make it to a dust, and repeat again with the same magnet, small magnet, and see which of those,

which part this magnet gets attracted to. It's not that the whole magnets in that ball connect with the tiny magnets which you released. It's a specific one, because the strength is equal to, and attracts it. That's why it goes to that.

Q: So because of the... so the manifestation of our Sun, the... it's a result of the cumulative, through strength of the Universe, interacting and that's just one of the outputs of it.

K- Yeah. It's that field strength of where it came, created, fits to and it comes together. We... we produce, sometimes I write to our Knowledge Seekers and teams we work with. (1:20) I write to them and say, "What you do here, it takes maybe 1 billion, 10 billion years, for the Universe to create the condition you do within a few minutes, because you have the knowledge of." The teaching over past years has made this possible. A lot of things you Knowledge Seekers just talk about or do, and to you is just, you know, just a walk down the park. Takes billions of years for Universe to create.

Without this seed of the Soul, it's more or less impossibilities, for to meet, to create. A field has to interact with another field. That this interaction with its minute magnetic field environment. That that minute magnetic field environment grows, and the other fields of the same strength are connected to, that gather and then gather and gather, that makes the Sun. We haven't been educated with the true process of the creation of Universe. You talk about the Sun, as it's there, so it's like a piece of cake, it just came out of the oven and it's there. For the Sun to be what it is today, has taken billions of years, step at a time, little by little, little by little, little by little. And then, the process of creation has come...

I explained this to you before, maybe you understand it. To create a process of, let's say, a liver in the body of a... in, what you call it, a fetus. (1:22) The brain, the body of, or what they call, the amalgamation of the cells, don't go and process it there. They create a condition that, that condition allows any fields which fits into the liver, which decided by the liver of the mother, is manifested in it. And then, that allows it to grow, because it attracts fields.

It's the same in the Universe. To wait for the fields to come, the womb of the Galaxy creates a condition that this place can accommodate something, and there is a Soul for it, which or a field energy, which is available to that strength, and fit in the wish within the process. Very few, very few, if any, stars or systems, ever been created by the interaction of the fields on their own. In a way, you have the seed, they drop you in, and then it grows, you get a plant. The STM is that seed. At a given strength, in a given position in the Universe, then it nourishes because it can absorb. Once you germinate the first seed, the rest is normal. And that seed comes, grown in the village of the Earth, in the, what you call it, global warming structure of the Soul.

Last week, I spoke about what happened in last year with the planet Earth. How we connected directly to the Sun for a fraction of time. Where, even though we had the atmospheric connection, (1:24) but we lost the field strength of, or strength, hardly connected to the Sun. We had the direct line. If you look at environmental changes since

last April, you understand the change, the fields which have received elevation of the, what we call, physical structure in the Soul of this planet has changed. That continuously shielding of the atmosphere wasn't there, it was gone. And in that time, massive energy arrived. That energy which is absorbed by the body partially and partially goes to the center of the planet, now is showing itself in disaster conditions and the change of the weather. Even now we see again new structure setting.

They keep on talking about global warming, but the changes in the physical structure of the Earth, and you start marking it in a drastic way, is, since last May, is because of this surge of energy which has been received by inner physical structure of the planet (Solar Flare in April 2023). And I said, "We have to wait and see." Now we had, we see the floods, we see other things.

Q: So the depletion of crude oil, that has contributed to these disasters, because it's not shielding the fields from...

K- No, crude oil, crude oil, crude oil will never diminish on this planet. Read the paper I've written time ago. As long as we have the oceans, as long as we have the moisture and the salt moisture, as long as we have what we call, the salt. You know what the salt means in the world of chemistry? It's a connection of the Iron, metal, to a non-metal. Which, what we call the salt. That connect, that, that what, that what's, how the salts are created, what we call the salt. As long as there are metals in the ocean, there are metals in the atmosphere, and as long as we have non-metallic, Calcium, whatever, in the oceans of the planet, and we have the Zinc and the Copper, are the, what we call, the talk that the oil will finish, is a fallacy.

Q: Yeah .. ... But it acts as a shield, doesn't it?

K- No, it gets absorbed in the ocean and it goes deep in. It's the field of ?? ocean.

Q: Is the oil, like, is the oil for the Earth similar to our brain matter for the brain, where it's a, kind of diffuses the rays as we absorb them?

K- No, it's selective job. You see, you have certain fields which matches with the Zinc in the ocean. You have certain fields which matches with the Copper in the ocean. If the field strength and energy matches with the Iron, you create the first cycle of life which can have what we call, blood circulation. Yeah? And we see this, we see that in the... we see that in the East of Atlantic and we see it in the North China Sea. (1:28) These are the two bedrocks of life on this planet which is Iron based.

So, it's very simple, we have huge... I've explained this in another teaching years ago, the central Sahara or desert in central Africa, with the wind, annual winds which comes, which blows the iron dust over Congo and into the Atlantic, and with the right combination of the salinity of the Atlantic, creates, that what you do in your boxes, in your, what you call it, CO2 production boxes and the rest of it. They create instant condition of the protein, then it starts with connection to the Calcium in the ocean, the

cycle of life. We have the same thing in North China Sea, because we have a mountain range, which is full with Iron, in annual corrosion, this Iron gets into the ocean, and leads to the creation, that's why we have a huge life presence in East Coast of Africa, and this leads to the next generation of what we call, the weather disturbances and hurricanes and the rest of it, which is partly connected to this.

And if you understand this, then you understand, there is never, ever, as long as this, the deserts of North China Sea, Iron ?? world, exists, there shall never be shortage of oil on this planet. Impossibilities. They came up with this fossil fuel and everybody else bought it, but this is not the way oil is created in this, on this planet. (1:30) Somebody came up with a theory and everybody jumped on it, because they like dinosaurs.

It's the same as what we saw with the crooked guy, Stephen Hawking. Stephen Hawking did the same, came up with this Black Hole theory, and he went on. And then when he received the paper, he changed his mind. There is something very important for you, knowledge seekers, in the history of the Keshe Foundation. Maybe you know, maybe you don't. When we published the Book number 3, The Origin of the Universe, as you heard in the Intro, because it came to my mind when we were listening to the Intro just now, the Book number 3, the Book number 2 was published early 2010, 2011. In 2011, in about August, we knew Book number 3 is in completion. And, bless his Soul, Dirk Laureyssen said, "They run two books in one year, it's pressurizing it, you want to do nine books. If you do two now, we do two in 20, what you call it, 13, we do two books in 2015, then we cover." So, Book number 4 was written for 2013 and it was ready to go. Just before I escaped out of Belgium, before they attempted to kill me by the Belgian government. It was in his hand, I went to his house, I said, what you call it, give me everything you have on Book four. He said, "I haven't, I've read it 3-4 times, I'm ready to do the artwork with it." I said, "No, download clean." And I sat with him, he cleaned his computer, everything and everything else. That was Book number 4.

When we released Book number 3, The Origin of the Universe, (1:32) we knew about May, June, the book was complete. So we applied for its, what you call it, ?? ISVN number. And we announced that to the... because there are a lot of people wanting these books, that the book will be published in a presentation, will be released in a presentation on 21st of October in ?? Leuven University. The Knowledge Seekers from Belgium took a lot of pictures, there's a lot of videos and pictures of this presentation, it's not just a talk. The connection through the Keshe Foundation, Leuven University, whatever, management or whatever, gave us a lecture, 2-300 Knowledge Seekers came, more, whatever, and we presented the book to public on 21st Friday. And then suddenly, during the... just before presentation, those who were connected to University, they told me that they are taking the signs of the... you presenting this book, off everywhere in the campus, that people don't know where to go. So, they went out, showing people where the conference is. We delayed it by half an hour, what I took to get people. I couldn't understand why people gave us the Hall, and the Leuven University suddenly came up with this, devious job. But, anyway, we showed the book, "The Origin of the Universe", in that conference, and it was pub... what you call, released that day. We sold hundreds, thousands of book, a lot of Knowledge Seekers just bought there.

And then we found out on the following Monday, after the weekend, why? Mr. Stephen Hawking, knowing the book is getting ?? written that day, with his devious connections, asked to give a lecture, he asked the authorities in the University, "I want to give a lecture in Leuven University" and they gave him 24, 25, 26 he comes to Belgium, And on 25th he presents his speech, he wants to give a new talk. (1:34) The title of his talk, the title of his speech was, "The Origin of Universe". I give you the link, you can post it, and a to of you can go and see how devious the Belgians and Hawking are, or he's dead anyway. And, then you understand how these things are set up, how fallacies are changed. Stephen Hawking did nothing but, what you call it, following Keshe Foundation. In... He sat with all the teachings like you, from 2010. And he gathered the knowledge and he gave two, three lectures, which is copy of the teaching of the Keshe Foundation, but he changed it to his name. I send you... I send Rick, he can post it, you can go, this is a public knowledge, about Stephen Hawking giving a lecture. Rick, you can put this up, they can see. In Leuven University, on the 25th. And I give you the link on the... Rick I posted it for you. You see how devious this guy has been. One of the most devious scientists we ever knew. And if he's done this to us, imagine how many things he's stolen from other Knowledge Seekers around the world, other scientists. His name will be shamed too.

This is on Internet, I don't know if it can be published, but that's... (1:36) It's on the Internet, and if you read it, open the link, it tells you, Stephen Hawking, giving a lecture in 2015, Leuven University, and I put a second link on, which he actually, title of his speech is the, "Origin of Universe", the title of the book. And then we realize, why, Leuven University on Friday was taking all our signs off. And this is, this is K.V. Leuven University talk. And the title of his speech is "The Origin of Universe", you can see the title. And this is how these misguided people who were brought up, have done this around and they created so much problem for the World of Science.

Why did the British bring Stephen Hawking to the front? He is dumb, he's deaf, so (he) cannot say anything, so we can build him what we like. Because the American's had the Einstein. You understand? So, and then he went to give other lectures, copy of the Keshe Foundation teaching. First of all, he took the Black Hole paper, and he went to Dublin. He became so there because he couldn't find out, meaning he could cover everything up. He came close to the home to give a lecture on the same title. I can do what I like, I'm a crooked bastard. And this is the way they work. And now you see in public how these people are. Stephen Hawking, wherever he came up with the new knowledge, he stole from somebody. (1:38) Einstein did the same.

Q: Really?

K- Yes. Einstein...

Q: Einstein.

K- Einstein took a lot of knowledge from the people who was sent, they went to discuss with him, and then he took (their knowledge) ... There is a number of things you can find out, Einstein is not his.

Q: Wow.

K- Look, the last two, three lectures of Stephen Hawking and Knowledge Seekers go back four or five months before that lecture, listen to the Keshe Foundation teaching. The cycle of the Creation in the Universe, isn't it what we thought (taught) in those days?

R: Didn't Einstein have access to all the patents? He... that was part of his job, was scrutinizing patents, and so he would borrow some of his ideas through that means?

K- He didn't borrow, he took it from the people and he rejected the patents.

R: Yes. It would be more in the line of stealing than borrowing in that case.

K- Exactly, like Stephen Hawking.

Q: Why was there no legal action taken against him?

K- We sent the book, if you read Book number 2, on the front, where the creation of Black Hole is, we send the book to his lawyer and his office. Cambridge was ashamed to have this coming in public. The world of science, scientists around him, he was one of the most despised people in the University. When I went to Cambridge to meet him, somebody used the word "Thief of Baghdad." (1:40) He said, there is no difference between him and what you call, "Thief of Baghdad." Many scientists in Cambridge left because of him.

I don't know if you know it or not, But the seat of Einstein now is held by an Iranian physicist. And he is now one of those, what they call, they are promoting a lot about him. And it's the same right across. In the past few months I had a, by coincidence, total by coincidence, came across a guy who said he is connected to a guy who, or his partner with a guy who has won a Nobel Prize, which is part of the Keshe Foundation work. And I said to the guy, this is our job and we have all the details, references, the guys been on the website and done that and for it he gets a Nobel Prize. We asked to meet him and when he found out he refused any contacts.

So what the scientists do, how they put in, it has to be, what do you call it, people like this, it has to be taken with a 'pinch of salt.' Stephen Hawking from 2004, spent all his time and life, more or less, around what he learned, and he found out that whatever it is, he covered himself with a shirt, but you see this is on there. The presentation of the Keshe Foundation is on 21st of October, in Friday, in Leuven University. (1:42) He appears on the 25th, giving a lecture on the same title. You got the book and you see the title, This is from Leuven University website. The guy is a crook. The face pose with the action exactly the same.

Any other question?

Q: If I just ask one more question Mr. Keshe. I've got quite a few here, but I'll save them till next week. My last question this week. Iran has stated it has weapons so advanced they defy physics. My question is, is Iran playing a psychological card to scare its adversaries? Or, and has Iran weaponized plasma technology? If not, what technology are they using to defy physics on a military level? Thank you.

K- There is a video on Iranian television. Needs translation to English if you want to listen. Iran has a number of advanced technologies. And one of them is Plasma Technology. And they are very open about it. It's on national television. I cannot play it here to show it to you. But those who know, they know it. We are one of the technologies for the Space. And ... the technologies we have across this planet by different nations, if they are put aside and used in a peaceful way, not in a harmful way, this planet will be heaven in the Universe. (1:44)

Q: That's inevitable.

K- But, there are those who don't want it to be there. There are those who see that the obstacle in them having a beautiful life. The CEO of the Apple said something before he dies. A few days before he dies. And that brings home, if people, humanity, understand his word. That you can't take nothing with you. You can't take nothing with you. And it's the way people are and how they change. And it's amazing how they use the position and the time when they need it, and how they turn their back on it when they walk away or they manage to get away with it. ..

And during the Corona, we can take this picture of break please. During the Corona, we helped many politicians, we helped diplomats. I was working more or less around the clock, some of the Knowledge Seekers know, with different ambassadors, different people, stuff, different part of the world. We helped a lot of people.

Q: Why have they not showed their appreciation to you for your help? .. ?? Plasma Science in their country ..

K- Let me, let me explain... Let me explain to you. There are two things, which is good, it's not bad. First of all, I'm Iranian. And at the moment, to be Iranian and to be scientist is a criminal offense. (1:46) It's worse than being a drug trafficker, till the America changes. And then by the time I die and this comes out, says, " the guy was here, we covered him, we covered everything else." But that's not irrelevant. But it goes the same way. During the Corona, the head of Iran Parliament security man, who was responsible for the whole of the nation's security and the Parliament, member of the Parliament, had a Corona. He was on the deathbed. He had a few hours left. The Iranian officials approached us, and one of our Knowledge Seekers, he said, Mr. Keshe, we have to get to him. He's very powerful man in Iran. He went with the Gans's, I said, "I stay on line." Because he is one of the most, he's the head of Parliamentary Security, what you call it,

Police Security, whatever it is. These are very powerful people. And I said, "I stay with you, you go in." He went to the room, he said, "Mr. Keshe, I feel I'm getting it from you, I'm going to die." I said, "Just stay with him." Just, he sat with him, he gave him the Gans's and everything, and 24 hours later, he had no Corona, he left. And then he became the biggest enemy of the Keshe Foundation. And our guy...

Q: No way, really?

K- Yeah, yes. And our guy, actually nearly died. He caught a Corona from him, he had a very strong strength of it. And he went home with a young child. And he was dying in the bathroom. I stayed with him three days, every day. We helped to save the guy. And then when he came out, he became one of the biggest headaches for us in the Parliament.

Q: It's unbelievable. (1:48)

K- No, no, it's the way it is. We... Knowledge Seekers are here. I think he can .. say by himself. One of the top Iranian ambassadors in Africa, they got him on a plane with his son, with Corona. They took him into a hotel and locked him up, to die. I appealed to Knowledge Seekers in Africa, and they went, even one cross the nation, they got it to the pilots. And these packages arrived at the same time. And we... they couldn't carry packages. The pilots took it in the... because they knew it was going somewhere. They took it into the, what you call it, cockpit. And we couldn't get to the guy in the... in the hotel. We arranged, and it was arranged by the fire brigade, who were the only people who could approach aircrafts at that time, given to the fire brigade. The Iranian officials went from the embassy to the fire brigade, took it to the ambassador. He was an ambassador for that country, he was ambassador for somebody, on flight he was caught with Corona, they were testing his ?? station. We saved his life. He was there, he was in a critical condition. He came out. Then we became his biggest enemy.

Q: What?

K- Yeah. Within 24 hours, we got him out, because the Iranian government wanted him out of the scene, back into Iran. This is how it works.

Q: It doesn't make sense though.

K- It's humans, it's humans.

Q: Save someone's life and they attack you.

K- This is the way it's humans. It is humans. And that's why... (1:50)

Q: How long do you think it's going to be, how long do you think it's going to be before there is a global change in this field strength that humans have that create to manifest situations like that?

K- At the moment, it can happen with a flick of finger.

Q: Then why don't you flick your finger?

K- I said before, if you do it, it was done by him. When they do it, they do it themselves, they don't look back.

Q: Right.

K- As I said, you know, listen to 4 weeks ago teaching, what you heard about what I said to the Iranian government, they sit on the line, every session of Keshe Foundation's listened by them thoroughly. And I gave the advantage of negotiating with Americans, than going to the war to destroy the whole of Iran, clearly, to the Iranian leadership. And, we heard last week, last Thursday, that Iran changed its position, there are going to be war, they're... Instead of attacking all these, attack Israel, blah, blah, suddenly changed, we go to nuclear negotiation. Why? Why did Iran suddenly out of ?? tech? Who is behind 5+1 nuclear negotiation? Keshe Foundation? Is the pressure we put up? Have you stood still how much we influence? What attacking, the guy get killed in Iran and everything else, and suddenly Ayatollah Khamenei instructs that we go for nuclear negotiation. "Hello .. ?" You could step back. Why do we use, why we go in negotiating with the Americans? We pressurize, (1:52) we put new ideas, we influence and we get our influence. And then on Thursday last week, I received a writing, "Your wishes has been done, what you asked from the Iranian government." I have it in writing.

We influence. And when you influence, what do they have to share with the Americans? Keshe Foundation Technology, in weapon defense. We show you what we have. Let them decide, it doesn't matter, as long as now, Iran didn't get destroyed, the way what the Americans were planning, you have to understand the gravity of what was setting up three weeks ago. All these naval forces, aircraft carriers, in every direction, what would have been? Two and a half thousand history of Iran would have gone. And all that terrible things which was planned, every power station in our region, "It took us two and a half thousand to build this nation, why should we lose it on one Arab guy?" We are Iranian, I... you said, you heard, I said, "I change my passport." Iran, the last ?? dream of Iran is, "MTK changes his passport to American, Chinese or another nation." Because with me goes technology and those countries are not, as Iran has dealt with me, remote. The technology will be used against Iran, and that will not happen. We influence world of politics so directly, it's the third, fourth, fifth time we showed it.

You go back two weeks ago, the pressure Iran's going to go, Ayatollah Khamenei has ordered its ?? arms, how come suddenly, we go suddenly negotiating nuclear? Because we are nuclear physicists, we know the power of technology we delivered to Iran. And they know, we move, they gone. (1:54) You see only 5% of the Keshe Foundation technology on the surface. And we are not the only one. There are other scientists who have the same kind of influence on their nations. Like Einstein did on Americans. He gave the ok to bomb.

Q: Did he really?

K- Yes. He said he always said it was his biggest regret.

Q: Oh, wow.

K- That's... read about his life story. That was in his life story, biggest regret. But it was his regret. The history of the nuclear bomb, how American got to it, the atomic bomb, is stealing it from the British. They didn't have that. I'm a nuclear physicist, I know the history of it. Americans, Australians, British, French, were all working together in England with the Canadians to develop a nuclear, something that could stop Hitler. Americans were with them all the time. They were literally heading the group. One English secretary, who was a chemist, a woman, in a meeting being with the British head of negotiation with all the research with Americans in this group of people, she said, why are you doing it the hard way? Do it the right way. And she suggested using the centrifuge, what we do in the chemistry to separate particles. That's how centrifuge proliferation has come to the nuclear industry. This is the brainchild of a lady from chemistry. I think she's from one of the universities in London. (1:56) But because of the war, everybody tried to help. By the way, she became secretary to the guy who was the head of the group of the, what you call it, nuclear development, atomic bomb development in England.

When Americans found out this, they can do it. They escaped. And they went and within a few weeks, they made the atomic bomb. This is why the French, the Germans-- sorry, the French, the British, the Canadians all have access to this nuclear. Because they developed it together. Americans escaped, and they came out a few weeks later with the atomic bomb. And this is a game changer. And because of one woman, the whole history of mankind with atomic ??. This is why in the new website you put, when we found atomic and nuclear, we saw devastation and destruction. With plasma, we find peace. Americans are scared to their bone if Iran shows the new space technology, weapon technology they're in hand of. And Americans...

Q: Do you think ?? if Iran did that?

K- One day I'll tell you what Iran did with America.

Q: The suffering that is happening on this planet, the wars that's been going on.

K- One day, one day, ... I reveal what exactly happened between Iran and America, and why it has come to this point, and why we went through the revolution. Then we understand. It's... you got to... let me explain to you something. (1:58) The future Queen of England, she is very young at the moment, at this age of young age, ?? she hasn't even reached a teenage, she's worth 3.9 billion. It means for next 150 years, 200 years, this girl is learned how to steal from the rest to become the richest and hold on to what she's given. The Queen who died, she gave all the crown jewels, all the personal jewelry of hers, worth over 100 million, to this single girl, to the future Queen of England. Yes.

Q: I thought that the crown jewels and stuff were buried with her.

K- No. All her personal jewels have been given to this young girl, future Queen.

Q: Wow.

K- Yep, it's 130 million, roughly. It's personal assets, it's not a national asset. And then there are people who, from now, are set to look after this future Queen to come. She most probably become a Queen in late 40s, 50s, if that, maybe 60s. And the people work in that structure for next time. When she comes into power, the already next generation of abuse of nations are set.

Q: That's not going to happen.

K- That's how it has worked for the past 2,000 years.

Q: The change is here, it's not going to happen. I'll bet my Soul on that. (2:00)

K- You got to realize, all the European Royal Families still holding to their assets in nations before they became non-royal.

Q: What do you mean they became non-royal?

K- A lot of European countries don't have king and queens anymore. They are democracy.

Q: Oh right, yeah.

K- But the royal families held on to all the assets.

Any other question?

Q: ... My name's Nick from Sydney, Australia. And I'd just like to make a testimony of the 24th transmutation test last month.

K- Hi, Nick. How are you?

Q: Yeah, hello, Mr. Keshe. Good, good to see you.

K- Are you sure you want to go out with this?

Q: Well, I was going to say it last week, but I thought I'd wait another seven days just to make sure, make an honest assessment of it, an opinion.

K- Okay.

Q: Would you like me to tell it or?

K- Go ahead, we know the situation and thanks for that. Go ahead.

Q: No worries. So what happened, I did the transmutation test on the 24th and I actually had a feeling that I was drawn to it, to be honest. I did have a medical condition the last two months, where I was really bleeding a lot internally. (2:02) So when I went to the restroom, it was very, very heavy. And this happened about... I started bleeding internally about 4 years ago, but it just was on and off. And now I've had a lot of hits, accidents in my life, so I've always soldiered on, you know, and ... and really not, and really just try to ... exercise myself and eat properly and just try to see if it goes. But ... I know two years ago, when I went to the Manchester, London, the Plasma Space Traveler Group, and I did the... and I went on the headphones, the Iranian units, Cosmic Ray units. I know Mr. Keshe called the team and they he said, "Please give me a graph of what happens when they're on the units." Now when my graph came, Mr. Keshe told me a bit about it and he actually noticed something, he said, "Do you have cancer?" And I said, "Well, I'm not sure Mr. Keshe, but I do have something wrong with me." And... I don't know if you remember that, but that's what you told me, from the graphs, from those Cosmic Ray Uranium units that you got. And... so what happened, I kept on, every now and then the bleeding was... start and stop. But for some reason, the last two months, it was really, really bad and... all the signs turned out, when I read about the signs that I had in there, That was colon cancer.

So what happened, I just, I said to myself, "Well, it is what it is." And I knew it was pretty bad, so I said to myself, "Just go as long as I can with it, and then if I need hospitalization at the end, and whatever happens, you know, I'll do it." But I was hoping it would go. (2:04) So one month, you know, full on bleeding. It was not really pain, but it was just every time going to the restroom, it was just a lot of blood. Second month the same thing and then that's when the transmutation test on the 24th happened. So I said to myself, "One more month if it happens then I'll go and I'll go and you know, I'll have to go in." So, but I remember the just before the one week before the transmutation test I was getting very tired. So I was more tired than unusual, so I knew that bleeding was... I was losing a lot of blood.

Anyway, I did the transmutation test, so... About... I think it was about the second hour, I felt myself just expand, like blow up and just expand, but it stayed there. And I can't remember how long I was there for but it felt like I was there maybe five minutes, maybe more. And then the test ended in that. But what happened, I felt good, I went to sleep. When I woke up on this next morning, usual, the bleeding completely stopped. And I was thinking, you know, first time in two months, maybe I think, is it the transmutation test? Is it, you know. This, and so the second day, third day, fourth day, nothing at all. Now it's been 12 days, my bleeding has completely stopped, like a miracle. Now, the next day when I woke up too, I was really energized and really happy. I was not bleeding for the next three days, really, really happy, really energized and really, really positive about like it was like a big breakthrough for me. I like I was I knew something about that test and

how I expanded. (2:06) To me it felt like my Soul expanded and I was inside it. So because I was inside it my Soul was bringing everything into perfection, but my Soul like gave me more time in it I just like I needed more time the Soul, my Soul needed more time on this to learn So I'm not sure if it's completely gone or whatever. I had the cancer, but there's no blood at all. I feel perfect condition Very healthy. I've been going to the gym and I'm actually doing more at the gym than I what I was doing before and Yeah, I just like to say thank you Mr. Keshe that was a real like a miracle for me and Yeah, the last few months of it's been really hard I've been going through a lot and then and having to deal with that was it was pretty messy, but I was amazed that how your technology works and to hear it is a different thing, but to go through it and then to witness that and to feel and you know, even when I got to the restroom now. There's still no blood and I was it's I'm still amazed to be honest, even though it's 12 days later So, thank you very much. Mr. Keshe for that

K- You're welcome. I hope you find peace with it. And that's all it matters.

Q: Okay. I understand.

K- That's all it matters.

Q: Yeah.

K- As you said, when I saw your graph in Manchester, it was clear you have a cancer. But we don't promote these kind of things, when even though it's there. Because as I said...

Q: You told me in a way, you said, "Do you...", you actually said, "Do you have cancer?" You know? You said it that way.

K- Yeah, because we see things on the graphs, when you're... when you work with it so long, we see things you don't understand. (2:08) And as you explained with the expansion of the Soul, you reach to repair the body, the way the body wants to be, the way the structure's going to be, and this is the... we have proof of it. And you got to understand, on the 24th, we changed the system to what is now, and that's what we said, to expand the body to cover the physicality. Up to now, in transmutations, we always dealt with the Soul. For the first time, we brought in the dimension of physicality into play by addition of new, what you call it, positioning structure. And we expect to see this right across the world. This is why now the Wellness Center in Germany is running this test, that if it is, we can help. But you have to be open to it, to accept it, to be there. I wish you all the best. And I hope it brings you peace.

Q: Mr. Keshe, like, honestly for two months I was really bleeding a lot and, it was, I was not in any pain, but just seeing it and that, it, it makes you worry. And... I was still doing things, you know, like normal things and that, but, to do that transmutation test and the next day just stop, I was blown away, I was just, for, for it, for once I think, "Oh, maybe don't." You know, I was thinking to myself, "Oh, maybe it's just coincidence." But then

the next day, next day, nothing, nothing, nothing, and 12 days straight. Then, you know, then I realized that the expansion and that, how I was in the middle of my Soul, brought everything back to where my Soul wanted it, to give me more time. So...

K- This is what I always we said, (2:10) when the man understands, this whole expanding in all dimensions, It's not just going through your head, but expanding through physicality. It brings everything into balance. And you're one of the prime examples of it. But it's a development in technology now. As we said, the German center is ready for this. Dr. Kern and the people who work with him, who use this knowledge to help and to bring more support to those who want to support themselves.

Q: You know, it's amazing. It's... I feel really good. My energy level and my confidence, it's really lifted me up. So, and I feel really balanced inside. And not only that, a couple of days later, I actually did the Wellness program. It just came up by coincidence. So I did that too. And I felt really good when I did that. It even balanced me more out. And so...

K- Did you do that under the insurance policy, the Wellness Policy agreement, the second one?

Q: Yeah, the Wellness. I'm not sure. I did it with Dr. Kern.

K- Yeah, but it's part of the contract, you have two times a year to do the session.

Q: That's right, exactly right, yes.

K- This is to guarantee Wellness with the system. This is... Knowledge Seekers who don't know, Keshe Foundation provides these policies that two times a year you join a session, to, for these kind of conditions that you bring back. It's just that leveling everything inside.

Q: And that's what I felt, I felt really balanced inside and in harmony once I finished that. And I was very lucky they both came together. (2:12) Like I did the 24th, my bleeding completely stopped and then a few days later I was just very lucky that that came in, Mr. Kern said, "Oh, you're ready for that?" And that came in and I've just been really, really good in perfect condition, perfect, my health is perfect. I feel it's perfect anyway.

K- Thank you very much. I hope you stay that way.

Q: Yeah, I will.

K- Yeah, I understand. Thank you very much for coming in... That's a live testimonial.

I have to explain that the new Keshe Foundation technology expansion knowledge is in line with what we said, that when you expand the Soul in dimension of physicality, it's the job of the Soul to feed and to put the physicality in balance, in position that the Soul

is happy with. And we've seen, this is not... We try to keep away from these things and publicity or bring it out, but when individuals like... in explaining themselves, is a biggest testimonial for what it is and how technology is developed. Thank you very much.

If you listen to what Nick said two years ago, what I told him in Manchester, and if you remember, in 2014, in the Cinzano, I saw the behavior of the guy, I said, "He's here to kill me." Again, by the graphs. Then you understand, once man become knowledgeable how to understand the terms of use of these systems, understand how to interpret, you're more or less 100% on target. (2:14) And you can, in a way, judge it yourself. And what will be, it will be, it shall be. And it comes through the Soul, it comes through the understanding, inner understanding inside.

But you've got to understand, the system is in Germany, and Nick is in Australia, 10,000 miles away, and only using a headset. The time for evolution in science and technology has come. And it's getting better, because we understand more of it, and our team have to understand most of it, that the knowledge can expand. And we've seen this in many, many directions, and the new change in the structure of the system, should give this kind of results to us all the time. Now we're supporting the Soul and the physicality, and interesting the day we did the change, has brought the change. And the feeling that your Soul has done the repair, this is where you have to believe, "It's the Soul who feeds me, why should I kill?" "I need the energy, why should I kill for it?" "I'm in danger physically, inside I've done damage, why should I do it?" The body repairs itself. Thank you very much.

Any other question?

R: I might mention that there's the 94th public meeting for testimonials coming up ... on ... what is the date again? Just let me check here. The 9th, Monday the 9th coming up. (2:16) And, that starts at the 8 PM Central European time. And that's a great way for people to unveil some of their testimonials of the Plasma Technology and in a way, by sharing that experience, It's a way of paying back for receiving that technology and experience as well. So, I highly recommend it if somebody has... it can be a small thing that's occurred, some insights, or it can be some major trans... mutation or transformation that's occurred. And... so that's the public meeting for testimonials on Monday, September 9th. Okay.

Q: ... Well my question, my question is, well you said that Earth has a Soul, so it has an energy center, does Earth has emotional fields, or something like humans? (2:18) Or something with same values of, wrong?

K- Of course it has. If you exist, you have to have a central control which collectively controls everything. And of course it does. The same as the Sun does. We call it the Soul, or scientifically, it's a central control that dictates everything else. We dictate where our arm is, where our leg is, we dictate where we want to go. The Earth decides on its own direction and dimension, and how we have now become... We call our behavior psychosomatic, we do such a thing, this is what you call it, Alzheimer's, we do something

else, this is Parkinson, we do behave something else, you're autistic. But, because it's repetition of doing the same. Earth is the same, creates hurricane, we call it the Earth, ?? condition, we call it the earthquakes. We do... it doesn't like it, it shakes and creates tantrums, we call it the earthquakes and the rest of it.

But in a way, yes, it has a control. It controls as it's arm strength, the position of its Moon. It has to have a understanding of it. We are so physical, we don't want to understand. If you look at it, the best one is the Sun. It has different organs, different parts, do different functions, and controls on when they need to be, and how to move them, how to replace them. It takes us 28 days to change the cell of the skin, because it has to be. It takes, (2:20) what you call it, the Sun, so many billion years for the planet which is on the outer boundary, as it does functions, everything else, to come back and recycle and go back out again. And it does it with precision. We only look at the dimension of what we would like to, and then, what you call it, in one frame. But... and then we look at everything else without attachment to understanding. There is a process behind it, there's an emotion behind it. And this is what the, the key position is, the emotion.

Q: And does it get affected by the, for example, sufferings and injustice on Earth?

K- It cannot, it's the cause of it. It's (the Earth is) the cause of it. One of my wishes, one of my hopes is, and I'm watching it, what was downloaded, what was received by Earth last year in a direct contact? Up to now, it's pushing it away. That cuddle, that kiss, that connection for a short time at a certain strength, because don't forget, the atmosphere of the Earth still managed to handle the lower strengths, or other strengths which was covering. In that period of time, even though it was handling, it couldn't handle the strong direct, which it literally came through. And when you receive that kind of energy, it has effects.

Has it changed the psychology of the man, which we will see in the next 10, 20 years, 30 years? Has it changed the environment, this download of huge energy? (2:22) The biggest thing which we have to watch, which I think is the major effect of it, within the next 200 to 500 years, we should see repositioning of the Earth. In a way, I explain to you very easy, scientifically. You get a magnet and stick it on the metal and feel the strength of it. Take the magnet away and put it in a hot water or put it in a... fire it. Get a torch and fire at it for a few minutes. And try to put that magnet back on the same metal. You see it doesn't attach. It's gone, it's lost its power. Now, put the magnet back in one of these magnet machines and increase the voltage to 3,000 volts, for example. I don't know if you know how they make magnets. And take that piece out again and stick it on the same metal. You'll see that the strength of it is much harder, much stronger than what you had originally. Because it has been changed, more aligned fields. And so, it's received more energy than what it had, even it lost some of it.

It's exactly what happened to the Earth. We have received additional energy. Additional energy in Keshe Foundation terminology, magnetic fields in motion. We have received huge amount of magnetic fields from the Earth, directly absorbed in the polar system of

the Earth, on the North. Which means the filtering has changed. If it's a South, absorption changes. (2:24) If it's a North, it's filtering which changes. So, how much energy has actually gone in, and how much the filtering energy has changed? Would that effect, what we've seen, the environmental, immediate, outside, we see changes, we clearly see changes, due to this effect. But, world of science is not aware of it.

If you Knowledge Seekers start going, taking (thinking) back, what things has happened since May of last year, April of last year, then you see, things are different. The energy, internal energy has changed. The environmental energy Earth produces from North Pole has changed. This forces the South to cool more. This forces the internal structure to release more to compensate for what is coming in too. So this is going to have an effect on us, 100%, 100%. The Earth's condition will change because of this rapid, strong, what you call, fields which we receive. And this is just coincidental. Just coincidental.

Q: Yes and they are saying that the at the Judgment Day at the end of the time, symbolically, at this day there would be the horrible earthquakes which shattered mountains and things like that. And does it have to do with the behavior of humans regarding humans, animals, etc.?

K- Yes, it will change. It will change a lot of things. It will change a lot. (2:26) But then, what does this new dimension will bring a change of position? With that change of position, the rest of the satellites of the, what do you call it, the Solar System have to adjust themselves to it, it will have a profound effect. Yes, it does.

Q: So we have to wait for the harsh days in front of us?

K- Why harsh days, but not beautiful days?

Q: No, before it changes to beautiful.

K- No, not really. Look at the... You see, whatever happens, we have to compensate, whatever happens. One of the most important thing for me to watch with this is, would the degree of the angle of the Earth in next 100, 200 year changes more back to the center than flipping towards the 90 degrees? This could be one of the effects of this encounter. And with that, we will see changes in the equatorial line of the Earth. We see the changes.

I was explaining this recently to someone. Let me explain. Let me see if I have the picture. Because this was part of another discussion. I have to check something. If I have the picture, you'll understand even how our deserts are. And if this line has changed because of the interaction, this will create a change for us. (2:28) And would that bring new energies that we don't need to kill for, or to be part of to kill for? Let me... I have found the picture. This was something I was discussing with one of the Knowledge Seekers and then you will understand what it means. Let me see. I have to share. Photo. Share. Photo. Because our world of science, our scientists don't understand. And then

you'll understand a lot of things. This picture was made very recently for educational purposes, for our knowledge.

This is the, what do you call it, the Sahara pattern of this planet. You got to understand, if you take Australia and put it back in where it should be, it fits just on the side of the west of what you call east of New York, into that gap. If you take Australia, all of the continent, and literally shift it up to where it is, take it across the Indian Ocean, and fit it into the side of the New York, and then bring the planetary system together, you see that Sahara part sits as part of this alignment. (2:30) And then you understand exactly where it comes from. But this Sahara, what you call desert line, why is it there? If you put America, what you call, Australia, into America, you see it's an extension of the African extension. It's part of that extension. In a way, I cannot draw a line on it. I wish I could.

Then, the geographical pictures they show us is so wrong. Put this in the angle of the inclination of the planet Earth, which gives us the 4 seasons, in an angle shape, then you see this. The line of the deserts of the planet Earth is in line with the inclination angle of the Earth. This is where the field transfer is strong in the central line, where we have the circulation of the fields inwards. In fact, if I could tilt this picture in line with the, what you call, the planetary line of the inclination, you see it's parallel. And it rides exactly on equator line. Then you understand, this, what we received as energy, what effect it's going to have on this line. (2:32) See the countries it passes, Saudi Arabia, Africa, the central line of the African continent desert. And you see it passes, if I expand it, it passes Middle East. Have we seen huge rains in Dubai? Haven't seen, haven't we seen snow in Saudi? Are we seeing flood in Africa today? On the Sahara land? How come all this happened since this incident? what energy has changed inside the planetary system. And we're seeing floods in Australia. Because magnetic field strength is about the same, because it came from there. Inside, it's the same fields absorbed. Doesn't matter where you are.

Our, what we call, scientists who make these maps in such a false way they've done, gives us that this problem. Creates us not to understand the true physiology and the emotion of the planet and the energy it receives. If I could play and put this angle of the inclination exactly the way it is, and put Australia back the way it should be (Along New York), because it came from there, stuck to it, it's part of it, then you understand, there is a big change about to come. Doesn't matter who makes what claim. If you could... (2:34) Let me play a game on this, and I'll tell you how. Just one second.

<< Mr. Keshe tries to rotate the picture on the screen. >>

K- ... So... Then you understand, did this interaction of the Earth brought a change to us? And then it changes the emotion of the planetary system. I cannot tilt it, it's unfortunately, I cannot tilt the picture. And then you understand the whole cycle that's... from what we see today, in the changes of the... geographical changes, has come since this incident. Which means the planet has received the energy, it's changing its position, it's changing its energy level, and where there was no rain, now there'll be a lot of rain. (2:36) Because now it's moved to the equator line, below the, what you call, above the rain line. Then we

start seeing other parts which were not desert, coming into the line. because we have to have this desert. This is the specific characteristics of the spherical shape, plasmatic fields structure, you cannot change it.

And you see, I was explaining this to one of our Knowledge Seekers, extending the knowledge, you will understand what I mean. If, remember this picture, where the desert is, where the desert line is? If you take this desert line, where it is, you see a heat line. We have the same structure. We see it because we have the systems. We have, we developed the systems, and I hope the Iranian will show it to the Americans. If you look at the structure of a UFO, why do we have this conversion of the bigger dip on the top than the bottom, higher curvature? Very simple. Because we have plasma technology reactor structure inside the system, the bottom line, how we dictate it, will create that desert line, the red line I showed you. But here, with the dimension of the, because we control the bridge between the intake and the outtake, will give you the lights you see on all the UFOs in the center line which shine. This is the, on the Earth, we see the equator line. (2:38) We see the desert line.

In the Universal flight system, we handle that energy which is... it needs to come in, it's part of the process, you cannot change it. We convert it to the light you see on the side of UFOs. Why do you have that rotating light all the time? Why is it at the time when it is a bend? So, we know and we understand it, our scientists are not knowledgeable, they don't understand, but when you make a physical system, system like we do. You see this. It's the property of it. You cannot do, you cannot just go and tie up the two ends. .. You have to allow the field flow back into the system. And that field flow creates condition of current. And that current, by using the right structure, becomes light on your central line around. When you say UFO, when they tell you, show us UFOs, for me as a man of the Space, I know exactly which one is fake.

And on Earth, our planetary system, our, what you call it, the continents are shown that way. Actually, our continents are this way. It's a inclination to the line of the inclination of the planet, which creates the 4 seasons. This is all rubbish. (They have drawn the continents wrong on all the globes and maps of Earth). And we know that is correct, because we have a system. We built a system. We know the system. They talk about theory. We talk about the facts, because we have this. And you can't have, you cannot speak about it, unless you built it, you have it, then you can talk about it. (2:40) Then even you understand, look at the, all the UFO pictures.

And then this is one of the criterion of it, not all of it. This is not that you can make a copy of it and put it there. And, people like this Romanian, Mexican, American (Triangular UFO patented by US using Star Formation), patent they put in, they can't get this ?? To work ?? and the guy... because the guy doesn't even understand the principle of it.

But, if you understand, then you see, does the emotion of the Sun transfers to Earth and what it's going to do? The mother has kissed the child. Now we see the love of the child. It has energized the planet. One of the, one of the things we see with this last year, what I

call, 'the kiss of the mother', is that we have moved slightly away from the Sun. Because the energy of the center magnets got stronger, so the distance has changed. And change of distance creates new environmental condition. Nothing to do with the global warming. Our scientists don't understand the science of creation, then they come up with any rubbish they like.

This is no difference between the structure of the UFO and the structure of the Universal systems. We all have the same problem on the equator line. (2:42) You don't see it on the planetary system, which are as vertical, because that stays on that line. That pattern stays. You look at all the planetary system. They don't have that inclination. So everywhere is the same. That inclination of the planet Earth has created 4 seasons, and so it's vulnerable to changes. And when you get charged, it's what I told you. You get a magnet and put it at 3,000 (volts), and put it back in, you see, oh, it's stronger than before. I cannot pull it off the metal. Now, this is what happened. We received a charge. Law of the physics of the plasma, the stronger always gives to the weaker. We are the weaker, we are a minute structure and we receive the huge amount. We were lucky that we were not pushed out of our orbit of the Sun by hundreds of thousands of kilometers. Or ?? instead, it's handling it to keep the position, and it brings the changes.

This new phenomenon we've seen with Mecca snow, with Dubai rains, with the floods in North Africa, with the Sahara desert, problems in Australia and the others, nothing to do with Global Warming, whatsoever. And then, because our scientists are not collective scientists, they don't see the whole holistic structure of the work of the planet, the Universe, and everything else. I do. I come from it. It's my birthright. We see it. We copy it in the system. We see it.

When you change position of going through a plasma, you have to feed... our education is wrong. (2:44) The way man has been educated by illiterate people like Stephen Hawking and Einstein, does not allow man to think correct. The process is very simple. You rotate on your axis, you have homogeneous condition. This creates different kind of life. It doesn't mean it's lifeless. If you change the position of the angle of the planet, directly the other way, you see it totally, there are planetary systems (that) work this way. It creates a specific kind of intelligence. When you put the system like Earth this way, then you get what we have.

And now we receive energy, this angle has changed. And this is what I... if you remember last week, I told you, I hold my heart into what happened. This is a present kind, we think it has moved to this direction. Where this is the, what you call, the 100% position, vertical position. When you change that, when you receive the energy, that's why I gave you the example of the magnets and the magnet machine. We will see these changes. Nothing to do with Global, but people who have no knowledge now say, "Oh, Global Warming has brought this." Did you listen? Rick, can you go back on the condition of the connection of the Earth magnetic field? I think it's April of... It's April the 13th of 2023, if I'm correct. Or is it May 23? Go on the Internet, bring it back and see what the scientists say, what happened to Earth. (2:46)

R: Yeah, I do have some other pictures here from an interesting article about the Cosmic Rays and the interaction with the Earth's Magnetosphere. And they show a diagram of the Earth and the continents and the magnetic field. Let me get that up so I can...

K- Yeah, but go... stick to... let's... let's do what I'm trying to explain. Go and see what happened when the Earth's magnetic field and Sun connected, Unified. We receive the huge energy. Our scientists don't understand this. They're ignorant to it and they come with everything else. Maybe this has solved the Global Warming problem which they talk about the CO2. This is not having... We call it, the Indians always say, << foreign language >>. Half a doctor is always a problem. Our scientists are so specialized, they see their own tip of their own nose. They don't see the whole creation. And then you see how the magma reached the planet Earth. How that strong magma blew the magnetic field protection of the Earth from the higher level, and that fed the planet Earth. There are pictures we... I don't know, don't cross the line of claims that it's not authorized to use, Rick. Be careful in what pictures we use, please.

R: It should be fine with... NASA is okay with sharing their, their images usually, so it shouldn't be a problem there.

K- Yeah, so, in that magma blow up in early, what you call it, spring of last year, has brought a new condition. We understand it. Now they're reporting massive rains in the desert of North Africa. Yes, it was expected. We saw it in Dubai last year, flooded the city. (2:48) And somebody claims, I made it and I created it. Hot air. Look at the Saudi. How come they have snow in Mecca? The condition through absorption of huge field from magma of the Sun, early last year, will bring changes. I'm watching it. It's charged. It has to react. It's a magnetic field. And this bring new conditions. We have to monitor.

And what happens in Australian desert, you'll be in line with what happens to the rest of the, what you call it, desert line of the planet Earth. Because it comes from there. It's confirmation that Australia was attached to that part of the continent. How it disappeared, how it moved is different. Fits into position directly. And then, if you bring the continents together, you see it's part of the desert equator line of the inclination of the planet.

Q: Maybe the behavior of humans would change?

K- Should do, should do.

Q: Is it part of the plan of God?

K- These are the, these are the realities of the physical life. You can attach it to anything you like. But when you understand it, you understand our Soul is a plasma as well, And because of these changes and energy we will change. (2:50) We have to change, we already received it. Because of such a huge amount of fields which has come to us, and we were rotating, we all received it. Every single living things on this planet has been, what I call, magnetically elevated, put it that way. Would that bring us to become more knowledgeable? Are we ready to receive the new knowledge? Was this a coincidence? Or

was it to give a helping hand, for bringing that position of peace? Does the Sun have a Soul and wanted to create that condition, that his child does not suffer anymore and he added to it? How do you want to read to it? I can bring it to you in a thousand different ways.

Q: Can we say the plan of God is to have peace and service everywhere?

K- God never created the war, it's the man who has created it for himself, to show his power. It's Man's weakness, not God's hand. It depends how you influence, how you can influence, how you can be there to influence. We are in the position, we can influence our child, we are in the position we can influence our work, we are in the influence, we can influence a Nation, we have a influence, we can change what happens on this planet. But that's how and the way it is.

When I made my point clear to the Iranian leadership, we do not go to war, refrain from it. I invited the Iranian leadership back, talk to the Americans. When Ayatollah Khamenei came out with it, they were ready to take revenge, revenge was in the benefit of no one for Iran. (2:52) We would have lost everything. Two and a half thousand years of, what I call, culture would have gone. These people are, they don't care where they drop the bombs. ?? , anywhere else. We advise, we give from our Soul and we touch their Soul. It's not just a word. And we see, step back, everybody was waiting Iran, etc. And now you see in the next 6-12 months how we change the situation to. As I said, Iran will open an embassy in the United States in 2025. That's our wish and our hope, that we achieve.

Q: Thank you very much, sir. Thank you.

K- Becoming a man of peace needs a lot of patience. Man of war can press any button, anytime.

Any other question?

Q: ... Hello Mr. Keshe, thank you for a beautiful teaching as usual. Very informative and I'm sure many people have understood much more of the plasma. You sort of explained, as you always do, on a Soul level, the questions that come to me, you already explained them before I can ask them. So...

K- Yes.

Q: Yeah. So...

K Have we ever stopped you asking questions?

Q: No. No, because this is a human nature Mr. Keshe, you know this. And it's not until we go into another condition, the Universal Council and things, then, then the condition changes. But as a Human being based, (2:54) we're always going to have these limitations, these conversations. So can I ask? So would you would, with all the

knowledge and everything that's been shared and all the technology you've given out, and we know this is from a very high source, a very high field strength. Would the people that are going through the transmutations, this is a very long process. I know we're in the testing phase and people have said this and we're experiencing or the Knowledge Seekers are experiencing many things. For humanity to go through this, have you just explained what's going to happen on a larger scale? Has this already taken place with this cosmic event?

K- What do you mean?

Q: So, people are going to be going from point A to point B. You're teaching this transmutation and transportation. So you just talk about spaceships, transportation. And many times you've spoken about people will not even be able to go into the ships unless they reach a certain elevation, a certain humbleness and peacefulness. So many people will not get to experience this or will they with what's just happened with this cosmic event?

K- You think you hit the jackpot?

Q: No I don't.

K- I do what I'd like and then I wait, you know, there'll be a cosmic event and I just jump it. There's going to be changes, there's no difference, there is no... We cannot stop this process. When...

Let me explain to you in another way. (2:56) Due to interaction of the magnetic field of the plasma of the Sun on the Earth, what happened? It happened exactly the same as the rain comes. When the rain comes, when you have a storm, it rains on everything, on the tree, on the cat, on the man, on the car, on the floor, on the ground, on the rabbit in the rabbit hole. Everybody gets that rain. It might be a cold rain, you freeze, maybe it energizes you from inside. It might be a warm rain, and say, "Oh my God, what a pleasure." When we receive this extension of the energy from the Sun, if you remember, we had that aurora which came all the way, they could see it in further down lines up to God knows where, a lot of people were witness to it. There is no difference between the aurora and the rain from the sky. This is the magnetic fields which we receive. And we all received it. Most of us who were in it, we received it. And there is not all visible. Some of this invisible, because it's an attract, creates light, but it's there.

So, this, this event has rained upon all of us. And the beauty of it is, because it's got a magnetic field spectrum, it rains upon even the fish in the ocean. And then, it has an effect on us, it will change us. Would it elevate us? We have to see, because it's part of the structure. Would the people from Northern Hemisphere, closer to the, what you call, the polar level, like in Denmark and others, (2:58) who were more, received most of it, or they were longer time in it, would they change? Would they become more aggressive? Or would they change to become more peaceful? We have to wait and see. Or, was it so sustainable long that man has totally switched from peaceful to aggression? Psycho...

social, physical, what you call, somatic of this event, will be understood maybe in a hundred years. If people understand to connect it the right way.

Would the culture of a nation changes, because they all received this, they all elevated, or did they got rid of part they didn't want in that process? It just rained in and it took away. This rain wasn't just visual, this... it wasn't just that your skin... It's the only rain that your skin cannot stop, it's a magnetic, plasmatic and it goes right through you, you get it. No choice. In what kind of behavior this change will bring, we have to watch. We've seen the physical change. I explained to you, no one ever knew this. In past half an hour I explained to you the equator line, the desert line, and how it happens, and I showed you, you want to play, we show you the UFO and then you see, "Ooh, it is that way."

Q: Mr. Keshe may I ask, sorry to stop you, sorry I didn't mean to interrupt, sorry.

K- There's a line of equator of the physical line they want to show and there's the line of equator of the magnetic field. The deserts are on equator line of magnetic field pressure, which is different. (3:00) And that's why we see the deserts on our line, that's why we see everything else in the line. And this is something you cannot change. Would this change bring deviation? And the change of deviation, it means the four seasons become two seasons. Across this planet. We have to wait and observe the event of last April. Over a century. And don't blame everything on the Global Warming, because you're ignorant to understand exactly what happens.

Q: As you said Mr. Keshe, that's an ignorance of not having the knowledge. And you've superseded this with Universal knowledge. So, as the... May I ask you another question then? So, as the Earth is rotating, and is being pulled gravitationally towards the Sun, the sun has a certain field strength of peace, of an energy of peace. The magnetic rays from the sun, when they magnetically penetrate the earth, it gives us warmth on a physical level because the physicality, the rubbing together of fields, creates that friction, and we feel the warmth. The emotional warmth from the Sun, is affected on a plasmatic level. Is humanity, are the birds and the bees, and all the Souls that are present, are they receiving that emotional support system?

K- It's not the support, it's the reality of fact. There is something very interesting, I call it the hopping system. (3:02) The planetary system ahead of us, has reached closer to the Sun, received the higher energy. Citizens became enlightened, understood more. Maybe like us, going through the process of maturity, as we are human races today. And they matured enough that they could understand, sitting on this planet, living 10,000, 20,000 years or a million years, we are getting sucked in. Are we going to go in, or are we all jumping the ship? And did that jumping was next step near to them, was planet Earth coming in line with. And now that we are maturing, and as we're going to the, toward the Sun we receive a higher order field strength, as it happened last year. Would we get all educated, all things, and we all become child of the Earth, and we don't, we just belong to the next planet which is coming in. When the condition and the environment is right, we hop on it.

The one in front of us, is desert. Would, if we get a chance to go to it, and going the one behind us, would we find civilization, buildings, and everything else that it shows people used to live on this planet? Would we find life beneath the surface? that after so much, the surface heat of the Sun was, now if you go 100 kilometers, 20 kilometers below, the knowledge got to that point, (3:04) is the civilization which gone in, instead of topping up. Didn't this happen to man? We were mammals, like a mouse, hiding everywhere from dinosaurs. One accident brought the condition now, that we are in, and we came out and see what is made of, and suddenly became the... ?? of the mousy guy, become the ?? mouchy guy.

And, what is a historical event waiting for this race on this planet? Because it's... it's inevitable, we are getting pulled into the center. Getting food, getting closer, you get warmer, you get to see a higher strength. That higher strength bring you higher education, higher knowledge, higher intellect. Would that intellect then be used? Isn't maybe this is the reason we are here at this point, because the intellect of the man is that much that we can bring that? But don't we, it's not a one day job tomorrow. One million years of man, which is a fraction of nothing of the Universal life. And do we hop along like a grasshopper to the next planet? When it's ready we go, we are just waiting. Waiting for two things, the planet get ready with the water and the God knows what, and for us to get educated, understand more that when we hop we can start living there.

Q: So Mr. Keshe, the plasma of another sun, that's magnetically, or let's say gravitationally pulling in our Sun. (3:06)

K- Always does. We are part of the game of magnetic fields, the whole of the Universes.

Q: Who's pulling the strings?

K- Nobody, field strength.

Q: Where is the Creator ?? ?

K- The guy who started the string is still sitting there called God. He's still watching what he does, does. He's sitting there, let me move this finger, see how many galaxies will hit each other. Most probably he's still playing his game. But we are part of that game. We are connected to that game.

Q: The games that we play Mr. Keshe...

K- It's a game of Creation, it's not a game of man. And we are part of that process. We are not exclusive, we are inclusive, all of us plus all the others in this Creation. But this, this lot can make noise, call it a voice, and they talk, and they can express their... what they feel inside, called humans.

Q: Just, Mr. Keshe, sorry I keep asking more questions, but... I'm actually sat between three MaGravs, and...

K- God help you.

Q: Yeah, God help me. And two of them, I recently put on a glass dome, and they were handmade, it's something I bought from the Internet, handmade glass domes with a base. But as soon as I put them on I've noticed I get very, in between them it gets very hot, physically hot.

K- Did you buy this from China?

Q: No, these systems were made by a very beautiful Knowledge Seeker, Knowledge Seekers I think, but the glass, this has come from the Internet, ?? I don't know. But the actual, the MaGravs, one is from the Foundation, and two of them are from, (3:08) built from others within the Foundation, who have much knowledge. And they are definitely creating very beautiful fields.

K- Enjoy it.

Q: Yes, thank you.

K- Enjoy it.

Q: Yeah, will do.

K- Enjoy it, and I hope it gives you enlightenment, not just the heat.

Q: Yeah. No, no. It's... So Mr. Keshe, the transmutation you spoke about on the 20th, that process, for people that's not been involved, how would they get involved so that they could be part of it? At this stage even?

K- It's just involved. It's not exclusivity that whoever wasn't in, up to now, cannot join.

Q: So it's still open to anybody?

K- It's open to anyone. You can join in and just join the session. These sessions will get much, much more intense in end of this year and beginning of next year. And in a more, more powerful way.

We have a responsibility, and I accepted that responsibility, and we have to stay with it. We have to create a condition for World Peace, we have to create a condition of end of wars. And it doesn't come so easy, it doesn't matter what you see on the International arena. But it's... it's the point of change, it needs to bring and it has to be. (3:10) First thing is you have to bring all these religious things to one point. And then you see 90% of the wars finishes. Then you have to bring the other 1%, which is the greed of the man, which wants to have more and create wars. And then we see the next of it. And we see how human changes.

I watched the life of this guy, Tesla guy, very, very with a interest. The boy who had nothing comes from a broken home, and then suddenly becomes a scientist, now he's become a politician, dictating what other men need to do. Has no capacity of anything. And it's very interesting how these people, with a few digits in the imaginary thing, called 'bank', now they become decision makers. We saw this with the thermal, with the other one, brought the computers, Microsoft, and now this guy. And the Keshe Foundation technology will destroy this guy totally. Because, we don't need to go into Space with rocket. We don't need to run cars on the batteries. We don't need, need, don't need, don't need. Everything is touched in the next 5 years, it'll be the end of it. I wonder how they're going to pay for these batteries to be destroyed. You'll see the backlash when the new technologies come out. These people have to clean up because they got the benefit of it. Chapter 11 (filing bankruptcy) will not help them. And is... they cannot stop the emergence of the new technologies. And these people, from backwaters of South Africa, cannot be the decision maker of which mother holds the child. (3:12)

Q: So Mr. Keshe, is the Iranian conference, and what you've spoken about before, where you will get to show some of the participants some certain field applications. Is this still ongoing or is this taking...

K- It's still ongoing, we are waiting for the permission of entry. They told us two weeks ago, because of the situation with the elections, and the President dying, now we are waiting for inspection. Last week they told us, they tell us, this week now we are waiting for it. Because in... we cannot go into Iran without the permission of the government. You all need visas to go in. They have to organize every detail for you to go in, and every detail safely, all... we can show the system technologies. The Iranian government, the Ayatollah Khamenei's office, and the Iranian military has to guarantee our safety and permission. Then we start moving. This should have been done, this accident, the guy got killed, and then the elections have delayed it. I wasn't... We are not expecting a president to be killed. And now we have to play their game. We have to wait till they have the new board. This guy is bringing new dimensions into the Iranian life and politics in a beautiful way. And we have to see how much it changes. The... Actually it's much, much better to go to Iran now with this, than it was when we announced it. Social structure has changed, brought a lot of peace to people. And we have to wait and see. We're dealing with a very knowledgeable, the most educated President, world leader at the moment, today. And he's using it wisely.

Q: How will it affect them directly Mr. Keshe, as a physical Soul? (3:14)

K- A lot. When you receive a blessing, you're blessed. You see, most of these people in Iran, Ayatollahs and the rest, are cursed. If you were in Iranian culture. They are the most despised people, because they've brought so much hardship. Just because they want to say something. "Well couldn't we talk with the Americans, let's come in and make them nuclear together?" We have a knowledge, why do we have to go to sanction, because of a knowledge? This is what we could never understand. But now we have a President, he's on the verge of a lot of things. We know Ayatollah Khamenei is critically ill, on the

cancer list. Would he survive his term? Would he go? Would he bring the nation together? It's a lot of things, but in past two, three weeks, he's brought huge changes in. It's brought Iran back 30 years. You see how much more he can pull back, and with the negotiations, how much we can open up.

We... the whole thing was handled the wrong way, because of the beginning was promised the wrong way. If you understand the culture of the revolution, you... Ayatollah Khomeini guaranteed to the Americans, they... when he went to South of France, American were ten, hundred meters away from him. They rented a house, hundred meters away from his house. And there was a daily contact, directly. They negotiated that if Khomeini comes, they bring this, he promised America. American organized ?? to bring him to Iran. When he arrived, .... (broken up ??). And it's taken us 20 years to get this. This is the biggest problem we have with Americans, It was Khomeini in south of France promised the Americans, "Take me back in, I become a leader, you all come in with all the promises, and we open doors with Americans." And worst thing he did, he went the reverse of it, he cheated to them. (3:16) This is what physically happened. And from then on, opportunists jumped in.

Now this guy (new president) is taking us back, to go to back position. Americans brought him (Khomeini) to power and they cannot (could not) get rid of them. So, American have to solve it themselves again with new negotiations. This is why we negotiate, we're trying to sort out what the promises, lied to, in the past, brings back. And then, why should we not share the technology? The beauty of a knowledge is when you share it. Not to make it. Those advanced scientist technologies are locked up, because somebody cheated 40 years ago, and what he promised, and okay, they wanted to take what they wanted from. It would have been totally different. Now we're trying to go back to negotiate and bring things back to some sort of normality. Khamenei dies within next two years, maximum, according to the doctors? He has advanced cancer. But a nation shouldn't die with it, and it's not a monarchy. It stays as a democracy. And this is what we have, we have to keep the nation ?? . It's the same with every other part of the world. These people...

Q: Healing from within Mr. Keshe.

K- Pardon?

Q: Healing from within.

K- Yeah, but you have to heal a nation from within, which is very hard after 50 years of everything else. After 50 years...

Q: It only takes one though Mr. Keshe. It takes one man to stand and realize.

K- Now we have a man, let's see what he does, we give him all our support. He's the same line as us, in changing the small part of this planet for 80 million. But let's see what it brings. Because we have another crazy guy coming up in United States. We see what

happens. (3:18) They put him in prison and then we have others, and they change and renege. This is part of the problem of world politics. Is who is going to be strongest? When we become all equal, we are all the same in it, we don't fight for it, then we see it's a different position. And this is what we strive to bring that point of position. Not a possession. That we are all... Okay, you can be billionaires, millionaires, whatever. But, there is a line for everybody to live. And, there's a line for everybody to have a equal term line of life (comfortable standard of living for everyone).

Q: I never understood, sorry Mr. Keshe. I never understood that, that a man would need others to bow to him, or whatever it is, whatever energy transfer they require from the others. When we all know if you're a nice person, if you just give and it's in a loving way and it's like a father and mother giving to the child. That this plasma creates beauty. I still find it hard why these entities, why these Souls feel the need to control instead of just letting go. And then having everything they could ever desire.

K- Weakness. Weakness in character. That's all.

Q: Yet they lead many Souls, and they're responsible for those Souls. And the energy transfer back... (3:20)

K- They... they... this is a problem. When you listen to the teaching you understand, you're responsible for your Soul. These people have no idea about... It's ?? the fault ?? of the churches and the mosques and the rest, that they put these things somewhere in the air, and it's there and it's nothing (They put God up in Heaven). They don't understand, it's part of you, you nourish it. And then we'll see what people do.

It's a... Today's image is what the television has made us. And a lot of new generation don't look at the television. They go on the Internet. Internet's got worse, because now they try to influence it. Let... let's... let me explain something. Then if you understand how media has affected us, we don't think. We all know Mr. Obama as a nice guy. We had to negotiate with him because of 5+1 in Iran and the rest of it. I sat with his ambassadors and his consuls in Belgium. But how many people know that more bullets were shot. More people were killed during the time of Obama. How many Americans know that today Trump actually deported a fraction of the number of people Obama deported? Obama deported more than 3 million people during his administration. You divide 350, sorry, 3 million by 8 years. (3:22) And then divided by 365 days. Hundreds and hundreds every day were deported. But we know him as a nice guy.

He created more war. He sold more arms. He genocides, he's supported, but we know him as a nice guy. Because he's the image he gave us, the image they made around him. Now we see with this guy, golden hair guy, he has no ethics. What will be the future? Because your nation made the guns, you have to pay for it. The money you worked to pay taxes to make those guns to kill someone, that a child killed in Afghanistan, you American citizens pay for it, with your children, with your diseases, with your everything else which goes wrong in your society. You choose leaders, you're responsible for it. You

choose soldiers, you're responsible for it. You choose the gunman to do, you're responsible for it.

It's how you bring, you perceive, and how is made for us to see. It's a belief we have, and it's the way we do. And the way we mature our children. (3:24) And it's the way we change our future with the way we understand, and how we bring that change. They don't care. They really, really don't care. But once they know they are responsible for it, they will care.

Q: Do they really not know that, Mr. Keshe? They really don't understand that they're responsible for it? And I think that's where it comes into this one.

K- No, you see, the problem with the world leaders, I've known many of them. I've eaten with many world political and government leaders in my lifetime, long before the Keshe Foundation. Yeltsin said, "Keshe has slept in more Presidential Suites than I have as a President of Russia." To one of my friends he says, "He goes everywhere in Kazakhstan and in Russia, he's given the Presidential Suite, and he travels everywhere, I don't get a chance, he sleeps in more beds than I do, and he carries more things than I do."

But when you speak to them, they're all the same. They only see themselves, they become self-centered. Those Knowledge Seekers from Sierra Leone, speak to them, who know. When I went to Sierra Leone some years ago, I was a guest of the president. And the President, I had to go to South Sierra Leonean University to give a lecture. And in the chancellor's building, his private residence, there is an extension for the president, where he goes there once a year when it's a graduation time. He stays there one night. It's too far from the center. And then he goes back. Nobody stays in that apartment of President. (3:26) When I went to South Sierra Leone, I was with a ?? ambassador to EU. He was my, what you call it, whatever you call it, from the President. And next to the Presidential Suite, there's a suite for his bodyguard and the driver. We were sitting, having a dinner with the Chancellor. And he said, "I'll take you to your suite." And I said, "The ambassador is with me." He said, "The ambassador sleeps in the driver's room." I said, "How come?" He said, "Ambassador says, 'President has made a call to me directly, that Mr. Keshe sleeps in the bed, I sleep in the presidential suite, presidential bed.'" I said, "It's impossible." Anyway, I stayed in the room and I went to the driver's, bodyguard's room, and I was sitting with the, what you call it, the ambassador. He said, "Mehran, he loves you so much, that me as his ambassador, who's a minister in his Cabinet, has to sleep in his driver's room. We are so much valued by the nation."

The bed doesn't change the man. Man should know what's inside. And these people lose that position and place. And this is how you should be, you should be humble enough, but these people, all these things, touches them, and changes them. And when it hits them, they don't know how to handle it. There's a story about Obama. When his term was finished, he... we saw, what you call it, the Trump coming in. Trump brought him a gift, if you see it, he just threw the gifts on the grass of the White House, in the back, directly in front of him. (3:28) But, when all the razzmatazz dies, that he is... you know, his term in the office was finished, his every furniture was moved, it was symbolical that he

comes, he... they welcome him (welcomes the new president) and he goes. The, what you call it, the entourage, police, where you think of the President, was parked, sitting in front of the White House. Him and Michelle Obama go down together and says, "No, no, no, no, your car is at the back of the two, it's one car for you there." He says, it's the time when he realized he has no more power. By always being carried by the, what you call it, military. Now he was sent to the back of the queue, with just handing over the door. And, they don't realize their power is short term, till they actually hit them. And Michelle Obama somewhere talks about it, that how, how it was, us with all the bodyguards and going directly to the presidential car. Now we're told, "No, there is a car in the back somewhere for you, it's there waiting."

Let's move on.

Q: Sorry, Mr. Keshe. Mr. Keshe, thank you very much for opening that and explaining that. It's important. I know it's hard, but it's important that Knowledge Seekers and the general beings and Souls that are listening come to understand these things. It's an open discussion, that transparency that we need throughout humanity. There must be many other civilizations have gone through this and reached a certain point of, you know, when a civilization starts to eat itself like a cancer, it starts to fold back in like the Earth going back into the sun. (3:30) It's all plasma. So it's a natural decay process, because it started in the wrong way. The seed was never correct. The intention was set from the very outset, wasn't in line with the creation. So it created a seed, a plasma that didn't fit. And then that grows and then everything from that seed becomes incorrect. So how do the seed, how do we humbly, you know, get the seed back into a peaceful condition of balance?

K- I don't know. I think the only solution is the birth of the "Daughter of Mitra," being born by the Soul, not by physicality. Where the physicality has no attachment to the body of the man. It's just there.

You see, what is interesting, which will come to all of you who transmute. And then you understand the value of life. You are the richest man on this planet. You're the poorest on this planet. But you manage to understand, or you come to be able to transmute, transfer your energy. On this planet, you carry billionaires, and God knows what, the mansions. And it's the beauty of it that these people, when transmute, they come on the planet Zeus, we don't have these things. They might appear as a dog. They might appear as a cat. They might appear as a stone. And then they realize, whatever they have possessions in, back on Earth, doesn't change anything here, has no value here. The interesting point is, when they come back, if they transmute back, would they change? (3:32)

This is the way we heard from our friend about his cancer. The enlightenment inside brings what the wish of the life is. Or this enlightenment comes to them that when they come to Earth, they realize they're nothing. All the possessions is nothing. Or we put everybody into transmutation. We have to have a certificate of three transmutation that you go to different positions in the Universe, and then you can have your wealth. And would anybody will bother about having the wealth when you see the beauty of the Space?

If we make it compulsory in the next few months that all the world leaders have to go through all the richest men, and go through a transmutation, and then, as I said in ?? 2014 (?? 2024), we dictate where you go, we send you to planet Zeus and there you are just a dust. When they come back, would they be still the same as they are? Or they learn that they're actually nothing? All these things they do to each other.

But the biggest problem is, would their Soul allow to go? That's their biggest problem, not ours. Their biggest problem. Because it's the same as the UFO, what we call the Spaceships. Your Soul has to be pure to be accepted by the Soul of the system. It's not an engine anymore to run and you board and you give a ticket. It's bought by your Soul, not by ?? the body. Then you understand why the Space is a place of peace, and man doesn't understand.

There are no doors into these UFOs. You speak to our Knowledge Seekers who are building it, they tell you, we have no entrance, the only entrance, the only control comes through the peaceful, in connection with the system. (3:34) Those who are building this system, they tell you. They are in and out of it, they don't... The team working with them is in and out of it, they don't see. You bring a person with the wrong intention in that building, you will see how they get hammered with it. Then you understand the real dimension of the system. And this gives a false sense of security to our team. Because they're all peaceful when you go into the labs. Oh, God. There is no animosity. There is no hardship, that you know, I'm better than this. They work, they all collectively do things, and they pass.

And I... I was there very recently, and I looked, they don't see what I see, what I look for. And I said, "Do they know how pure Soul they carry here?" Because, they're literally in tons and tons of, what you call it, MaGravs and Gans's and everything else. Whatever they had outside, it gets washed when they come inside. And, you don't hear a mouse, but everybody does their job, and there is no position, and the ?? possession, who I am, is just target, is to complete the system of light, complete the technology. They are not Knowledge Seekers, but they are more knowledgeable than the Knowledge Seekers, but the Soul is touched, they're there. And when I was standing next to them, I said, "I wish they knew what they are doing." How they are changing the course of Humanity. And they are pure Souls, they haven't come there by accident. We had one rogue guy, he kicked himself out, with his own direction. And when you go into the labs, they build it with the... They don't even know about the teaching, they don't even come to any of our teachings. (3:36) They're not Knowledge Seekers, but they understand the essence of what is there to be done. The only thing if you hear is if a screwdriver drops on the floor. Because these (people) are not there by accident, they are there by the choice of the Soul. And it's amazing, they don't understand, if you bring somebody, stranger outside, they will not be able to walk even to, when I tell people, don't let anybody in the lab, because I know the consequences of it. There are no doors into these Spaceships. The only key is the dimension of the strength of the Soul. You will understand, a lot of you will understand. And you cannot cover it up, you cannot touch it up. It has to be inside you, part of you.

Q: Thank you Mr. Keshe.

K- Thank you very much.

Q: Truly, truly, thank you for the beauty. Thank you for your wonderful, beautiful Soul. Really, thank you Mr. Keshe. And for your humbleness, and what you're doing for humanity, and all the Souls. Thank you Mr. Keshe.

K- Thank you very much. Any...

We got one more question, and shall we call it the day after that.

R: Okay, well we do have a hand up still with Lynn. So maybe we can allow them to talk, we have a number of other unanswered questions, but they can carry on till next week as usual.

Q: ... (3:38) I want to thank you for all of your inspiration. And since Rick has only given me one question to ask, I wanted to finish on something a little bit light-hearted. You tell us lots of stories and I, but you also very often talk about where you come from and I would like you to relate, if you can, a story from where you come from.

K- I don't know anymore. I come from a very humble family, back in Iran, extremely humble. Then the more I live, the more I find out how humble my parents have been, and the rest of it. And I had a great pleasure to be educated in different ways, by the hand of beautiful people like Zoroastrians. And they say your life gets shaped at teenage side. And my early teenage was touched by the beauty of the Zoroaster. I felt the love, and the sincerity of the love, in going to high school, which the Ethos of Mitra was taught. And then the rest of it comes, when I came to England and I saw how harsh these people live. (3:40)

My brother, when he arrived in 1976 to London, from Heathrow Airport to the house in North of London, which is a best part of England, or London, in the car says, "Take me back, this is a village, this is so backwards, it's ancient, I want to go home, we live in such a luxury and beauty in Iran, such old beautiful places." The buildings of, and the structure of London, brought him resentment, why he came. And, I always looked at it that way. We came from the most beautiful part of Iran, the hard and life of comfort, into the life where we became foreigners and everything else, and learned a lot. And it brought the process of more becoming in depth with the teaching of Mitra. And, the rest of it is history. Fell in love with the most beautiful women on this planet, and unfortunately could not get married to. And then the rest is history, and then you realize why it goes this way, step by step, step by step. And then when I sat back, and I'm 50 years old, I looked back, I said, "I had to happen, because otherwise I wouldn't have reached to what I'm doing." Was part of the structure, to learn to be ready. And this is where it is today. Somebody wrote in a report last week, which brought a lot of joy reading it. ... We can read it to you.

This is one of the most powerful organizations in the world, assessing the work of the Keshe Foundation. (3:42) And part of the conclusion or whatever, or discussion was that, Mr. Keshe is 66 years old and he is more or less on the old age. What happen if he's not here or become incapacitated through illness? And I said to myself, "How am I going to answer this guy, with what is written?" And it came to one conclusion, "I'll be here long after your great-great-grandchildren have gone." But we can't tell them that, because otherwise shouldn't just... answer the way, or talk to them the way they understand. So people outside, at the age of 66, look at this, he is going to go soon, so... What's going to be after next? How everything is built, it's going to be protected. Anyway, ?? have we reached the point, have I got to the end? Or is this what they think I got to the end? But, we just started.

Thank you very much for today... Hopefully, we meet each other next week. Those of you who want to participate on this Friday sessions of 20th, please complete it this week, because we have to organize everything in the background to get you into groups. We already have five or six groups. It's very difficult. (3:44) And we don't want large groups. Otherwise, we have to split it in two or three days to do it. Because as we heard from Nick, it will change you. The new system is there to change you. And those of you who have a battle with cancer, write to our Wellness Center. As you heard from Nick, the world has changed. Remotely, it does not matter where you are. Thank you very much, and see you next week.
