

555th Knowledge Seekers Workshop September 12, 2024

(Quick Index 17 pp, Introduction, Topic Index , Proofing done ; Need to do; Key Phrases, Words) (Auto transcription from Elias)

Structure of Creation same - how field connect; 90% empty space is full of life - at different strength; Galaxies behave like kidneys - heartbeat in U - same structure as body; 60 organs in body - billions in galaxy; Travel on pathway of field transfer between galaxies and universes; High speed line throughout Unicose - supernovas; Use during dream; Create supernova in Transmutation; Interact fields without physical D; Interact with 90% - most of life in U - field strength of Soul; Take energy from empty spaces; Capable to become invisible; world leaders secret meetings - present in Soul; Use breath absorb U Energies & Gans - take energy according to emotions; Use emotions expand Soul travel; Go shopping don't steal; Learn M field strength - many KS ready transmute; Exist in 2 places same time; Structure of physical & plasma manifestation same; One person learns - transfer knowledge; P collection M fields; Harmony between Soul & P - split sides of brain & body - travel with one side - other in bed; Denied ourselves abilities - always could transmute - dream; Monthly Flight new systems - split brain 2 manifestations per STM; Bring knowledge back to Earth - belongs to U - no patents; Connect emotion of Soul with P; 2 more Twinity Gans - Sleep & Migraine; Satellite Souls time; Pray to elevate leaders - stop religious wars; Soul of baby independent; Galaxies collide; Meet twin star; Spider video; Black Holes - eating machines - energy in then out to create new life; Doesn't kill - independence inside plasma - part of bigger; How UFO made from fields - Black Hole in center - absorb in - radiate out - add fields - interaction creates P of Craft; Create walls from fields; KF UFO see steam - fields interacting; Walk on Moon under Spaceship; Black Hole in STM - fields in - radiate out create body; Position of Soul - same height - same behavior; Owls hear M fields when STM & STP separate - death; Systems tell if Soul in body - can revive; Agriculture Testimonial - Gans huge sunflowers in drought - neighbors dried up; Explains how to apply Gans - field interactions - U feeds; Gans obsolete; Heart Attack - food - emotions - expand STM over STP elevate emotion; KF Systems in Germany obsolete; W Peace

Topic Index

3 fives in 555; Somebody to carry the teachings to 5,555; Teachings of U never finish; Who claims to know it all - has to be linked back to Creator; Expand knowledge of M fields to KS - how connections created between elements - kidneys, liver - or galaxy & U; Become Universal Scientists - understand work of U similar to body - or any other animal; Galaxies behave like kidneys - rid excess energy; Collections of galaxies behave like heartbeat of U; Structure of Unicose follows same pattern as body of Man; No difference - M fields cannot interact any other way; Collection of fields - collection of plasmas - will end up with same structure - automatically regardless of field strength & composition of fields; Different field strengths are totally due to size of amalgamation of fields when manifest P - create same type of structure; Scientists think only 5% of visible U is matter - rest is empty space; Structure is to receive energy from U - get rid of extra energy don't need - store energy - control center like STM; Galaxies & U have same

structure; Galaxies grow to a particular size when mature - same as Man; Man matures in 100 years - Galaxies in billions of years; 20% of our energy from food - 80% from environment - Cosmic Rays - Earth's GM fields; Galaxies do - take energy from U - from Unicose; Some energies cannot be absorbed - not needed; Body has 60 organs - Galaxies, have billions - called solar systems (SS); Transmutations between U - galaxies - SS - very interesting; Have to learn pathways of how energies are handed from one galaxy to another, etc; Become part of the energy transfer - how we travel from galaxy to galaxy - U to Universe; Have to choose right pathways (these are not "wormholes"); These are high speed lines of connection throughout Unicose - we join and travel on them; Already do this when we dream - never understood; Out in another U - mom calls to wake up - ride high speed line back to Earth - instantly wake up; High speed lines of connections are supernovas - never understood - only look at P - blow up; Don't look at M field strength they produce or where they go; Can create supernova in transmutation - lock it into the system; P has become obstacle understand field interactions; Learn to look at Soul of things - discover what's inside it - learn how to deal with it; Have to do this in Space - come across fields with no physical D - interact with its fields or Soul - understand its emotion; Taught no empty spaces in U years ago - now coming to it - need this knowledge for transmutation; Will turn whole world of science upside down; 90% empty Space is nonsense; Every empty space has a Soul & D; Empty Space is full of life - not manifesting in D of P; Need right field strength to observe them; Universe is full; Educate ourselves about other 90% - how to interact with - that's where most of the life of the U is; Change field strength of our Soul - see empty parts; We will travel in these empty spaces - through another life - it will be a M field interaction; Change strength of our Soul - rest of U becomes tangible; Respect every life in every corner of Unicose; We take extra energies from these empty spaces; Amalgamate this knowledge with our knowledge - understand whole structure; Learn feel what's in empty spaces; Respect them; Through transmutation - learn this very quickly; Many of you are trying - some have succeeded in different ways; Find through strength of your Soul; Stand in front of a mirror - you'll become invisible; Space T can make spaceship invisible; Create parallel strength field lines - but it's still in same position; capability within Man - always had it - learn what that field strength is; Teach you this in transmutation Flight sessions; Change your manifestation & still be within same environment; Some of you did it - saw it on graphs; Some are ready to transmute and elevate Soul; Don't need to travel - make yourself invisible - like empty spaces of galaxies; When I speak - shakes some world leaders - I listen to secret decision making - those in seat of power scared - we are present at level of Soul; Everyone can do; In U exist as Soul in empty spaces - on Earth die if don't have P - not seen; Develop a system to see Souls - field strength of plasma packages; U is jam-packed with life; See Souls within their rooms - don't spy on them - present as part of the connection line of thoughts - fast track - man does not have - never understood it; Can change breathing - absorb energy from U and live - also with Gans's; Receive 80% through breathing; Take according to emotion; Emotions for travel - expand position; Feed P; Extend fields of emotion - repair body to keep P; Transmute directly to shopping center - don't steal - pay in D of P - return home; Don't need cars; This science and T in reach of every man - understand how to connect to it; Learn M field strength; Many KS ready for transmutation; Once one of you learns - share - transfer knowledge to others - be with you as a part of you; Can't force Souls to do; No difference in structure

between physical & plasma manifestation; Work of M fields; P is a collection of interaction of fields - coordinates a movement - same with Soul; Go to work in office through emotion; Do the same with emotion of Soul; Can exist in 2 places same time - have body in bed and send other part to office; Based on 2 halves of brain & pairs of organs; Left side responsible for keeping P here - right side can travel somewhere else; In dream - send right side out to U; Send right side to office to work - energy will transfer through STP - manifest second body; Beauty of having a physicality - use different energy fields at same time - be in 2 places at same time - this is how they do it; Learn how to increase energy to bandwidth of field strength to do this; Reason why man always wakes up to P; Have one P in office and one at home in bed; Use emotion of Soul - connects to emotion of P; Each STM can manifest two copies of himself - if "Beautiful People" (Schizophrenia) have 2 STM - can create 4 copies of themselves; Each Soul capable of 2 divisions; Can test out planets with one part - won't lose main Soul; We do this when we dream anyway; The secret is detachment - synchronize Soul & P - not to do harm - can't start wars or do wrong things; If do something wrong with other side - won't be able to return back to body - field strength changes; There is a gap when you can do it - harmonizes; Sleep in 4 hour cycles - breathing cycles between left and right lungs; Heart has same sequence - other organs too; Get all sequences to match to one side at same time; Learn about your physiology and which lung is at rest; Create harmony in STM - and between two parts of body - then one part can separate; Soul feeds P - controls it; Reason why have two halves in brain; Soul D also has 2 halves - one goes clockwise - other counterclockwise - 2 hemispheres of brain; How field flows of two hemispheres in brain interact with each other - pull in - push out - create organ or body; Soul of SS counterclockwise - Earth clockwise - Moon counterclockwise - all work within a system; If harmonize field flow - manifestation fields together with STM - can split them into two halves; Important for transmutation; Learn why everything is in two parts - (creates field flow); But only one intestine - 2 kidneys, etc (one absorption with 2 parts); Combination structure of a brain - intestine is like worm; Understand field structure of 2 arms and 2 legs; Even plants have this structure - how their Soul works; Understand structure of fields - their division & emotion in respect to environment of fields; Soul and P has many capabilities and capacities - never knew; Denied ourselves abilities; Transmutation and transportation have always been with us; We move body on bus - STM moves through his field energy; Control fields and create motion in different parts of body - learn transmutation by division - be in two places at same time - do during dream; Go biking with mom in dream - created P; Half of Soul went to see her - while other half stayed in bed - learn to do it in waking state; Use new system in Monthly Flight sessions - experience splitting brain in 2 halves - appearing in 2 places at same time; Understand capabilities you have denied yourself; When move through empty space - moving through a Soul - feel and interact with it; Other half that remains on Earth - gain knowledge from them; Bring back to Earth - enlightened in sleep; Not one-sided enlightenment - both sides gaining knowledge; When energies interact - stronger always gives to weaker - same with knowledge - because you have knowledge the other doesn't and vice versa; Understand truth about knowledge - where it comes from - not exclusive to man - belongs to every entity in U; Why patents make no sense - have no value - unthinkable what man is doing to himself; Your dilemma - connecting emotion of P with emotion of Soul; Transmute and be in 2 places at the same time in P - gain information,

knowledge, and whatever emotion, collectively from whatever entity you meet; Mr. Keshe lives by this.

Part 2

2 more Twinty Gans's - Sleep & Migraine; Use in field replication systems; No direct contact with Gans; Building towards a full transmutation unit; Gradually moving away from units in Germany - centralize new systems - effective; Our doctors doing more trials; Bringing in 'Satellites Souls'; Asking KS to support us in elevating world leaders - create new phase World Peace - support through D of Soul - concentrate intention - bring in final phase of peace - Mankind ready; Started to bring religious part to an end - we need your help - so Soul of Humanity goes for change; End wars between religions; Twinty Gans cannot be used by women during pregnancy - don't have right to touch another Soul - trusted during pregnancy with another Soul; Our Sun has twin star somewhere in this U - what happens in either of us - we both feel it because connected - but doesn't have same internal structure - not necessarily human life there; Every 200 years all planets of our solar system (SS) line up; Galaxies have their own D of interaction; Accidents happen in U - galaxies collide - very common - things get moved around; If our twin star has collision - we would see change in constellations of stars - have to find new balance to lock into; Our SS in galaxy vulnerable to collisions; SS is exactly like chair on carousel - hangs freely - all reposition; Will meet twin star soon; Video of a spider spinning a web that looks like a star; Black Hole paper in KF Plasma Times of December 2018; Black Hole becomes a vast eating machines of debris - stars - planets; Black Holes created totally by chance - natural interaction between two or more passive M fields or matters in motion within galaxy or U; Why Black Holes allowed to consume Souls - if U is peaceful; Depends how humanity perceives things - only see physical part; Actually becoming part of another entity; When Black Hole or Plasma consume others - they remain individuals - like different types of animals running in a herd; Black Hole radiates out when receives too much energy - creates more stars; How Black Hole pulls in then radiates out - creates stars - same way UFO pulls in fields and radiates out fields that interact to become the UFO; How will create UFO in Iran; Pack fields into middle - becomes like a Black Hole - then expands out releases fields - creates physical D of craft; High intention fields in center - adds on top - manifests P; Like smoke to see laser light; 3 km wide UFOs - no hangars - by fields; First create Black Hole in the center - then radiating fields of different strengths which will create interactions with these fields - they create shape of the craft; How Spaceships are built in U; Strengthen field forces on central line - introduce fields to surrounding area - creates first layer; Then make walls - partitions - with fields in environment - like video of spider web; KF laboratories developing this system now; Written in patents - especially about creating walls and partitions; All fields are connected to center fields - Black Hole; First absorb all the fields - then radiate them out - and they interact create P; We see steam coming out in this first phase of testing; Beginning of manifestation of craft; On Moon can use UFO as a dome - creates Earth MG fields of atmosphere underneath - you can walk on surface; Spacecraft will have a Soul; Don't wear spacesuit inside spacecraft - create M field of 1G - doesn't matter how fast craft travels; In your own Soul there is a Black Hole - why you absorb fields - has a gravity - decides what is absorbed; Every

entity in U has a center - creation of Soul of Creator - capability to absorb all fields of U - interact with them - interaction feedback becomes the physicality; When fields come out of center - winds interact and push them around; Follows principle of existence; Fields don't go out straight - there are M field flow winds of U - dimensional field flow - flow motion on expansion is circular (spiral) - why plasmas are always dynamic - external fields in motion force this interaction; Black Hole is a center of life - absorbs to give; Depending on field strength - creates SS, galaxy, your eye, or a leg; 2 Sides of brain and body balance each other - left and right; Soul expands to create whole body; STM in center of 2 halves of brain - dictates height and shape; People with same height have same behavior; Position of fields of brain decides your eyes, behavior, trust, and emotion; Black Hole was created in STM absorbed from womb of the mother - dictates how things will be; Interacting fields always make sounds - particles; Interaction of STM with STP at death - heard by owls; Like crimpling one piece of paper around another - take off; Exactly what happens to STM when separates from STP; M field strength created at separation of STM from STP is physical; Build a system that works like owl hears - through fields of Soul - transfer emotional understanding to P; Machines that monitor when Soul leaves - can revive body if Soul inside; Whole science of medicine will change; Why living longer - increase this field separation; Know what age you will die; Mr. Keshe knows exactly when he will separate from P; Video of 300 hectare crop of sunflowers - used Gans plasma in Romania; Soaked seeds & one time watering; Severe drought in Romania; Fields all green - enormous Sunflower heads - no water; Plants provide own water; Looks like a miracle; Neighbors use chemicals all dried up; Great testimonial - confirmation Plasma Science works; Gans's are obsolete - T has moved on to fields; Explains how it is done - have to create field interactions between ground and plants - then they connect to Universal Energy; Specific Gans and time to water; Teaching on how emotions damage the heart - heart attack; Comes from food we eat & stress; From attachments and unwanted losses - cannot handle emotion; Strengthen STP to strengthen heart; Heart is M field creator - when its fields interactions don't match with STP - release spark - heart attack; Expand STM over STP - Heart can absorb M fields; Look for cause of heart attack - elevate STP - stop pressures on physical heart; M fields of blood inside get mixed up - cannot interact and handle each other; Interact with STP - have to release that energy - heart attack - energy converts to matter state cannot hold it; Signs of upcoming heart attack 6 weeks before - can control; Lack of sleep is another contributor; Sleep patterns change out of nowhere - 3 months before; Soon start 'live streaming' UFO development on new Youtube channel; External field boundary of UFO - can't walk though; Transmute yourself inside; Lady developing Parkinson - talk to Dr. Kern; New developments in T - systems in Germany totally obsolete; New systems producing plasmatic water - don't need to drink it - absorb its energy; KF needs lots of donations and help; Pray for us to create World Peace through the religions in a different way - bring Soul of these world leaders for peace.

Introduction to 555 KSW - All Creation Same Structure - Empty Spaces are Not Empty - Appear in Two Places - Two Bodies - Agriculture proved - Black Holes Source of creation - Heart Attack

For years Mr. Keshe has been teaching us different bits and pieces of Knowledge of Creation and today he has taken some of that information and summarized it. The first is, that all of Creation is made from the interaction of two magnetic (M) fields. Even when a single M field turns back on itself, it is still two M fields interacting. When they form a plasma and more plasmas gather around each other they create a structure for life. And this structure is the same for all of Creation and any time creation takes place, it will form the same type of structure. This is the "Micro in the Macro" and vice versa, and it applies to everything from the single-cell amoeba, humans, the solar system (SS) all the way up to the Creator of the Unicose. For example, by studying the structure of the body of the man we can learn the structure of the galaxy. This structure consists of things like gathering energy from the environment like the lungs, getting rid of excess energy like the kidneys, having a Control Center like a brain, and inside it at the level of Energy another control center we call the Soul of the Man (STM). This means that all plasmas have some form of soul. Souls are plasmas made of M fields and in Plasma Science Energy is M fields in motion. And when we look at the structure of a universe (U) we see clusters of galaxies that behave like a heartbeat of the U, and others that behave like the kidneys. This is because the collection of fields and the plasmas these fields make automatically follow this pattern due to the field strength, composition of different field strengths, and because of the size of the amalgamation of the fields. The M fields cannot interact any other way. So for example, the body absorbs different energies for different functions through around 60 organs. The galaxies have billions of these "organs" they are called solar systems and other things. We are being asked to look at the essence of what something does and not just its physical manifestation. We have to be able to do this to travel in the U.

The next thing we have to get used to is the fact that the empty space in the U is not really empty. Scientists say that 90% of the U is empty, that's because there is nothing physically there that they can understand, or relate to emotionally. In matter state when we say that something is at a different frequency than us, we can't "tune" into it. In Plasma Science we don't talk about frequency, instead we understand that everything has a different M field strength. This was talked about recently when we were discussing the strength of magnets. A plasma is drawn as a spiral and the strength changes as we move away from the center. And where we tap into it, is called the M field strength. So let's say Earth tap's into the spiral at a point very far away from the center and planet Zeus much closer to the center. The field strengths of those from Earth and Zeus are not the same, so their physicality's will not be able to exist together. This is how we get the variety of different physical manifestation of things in Creation. If we can see planet Zeus in the night sky, then I think it means we are in the same "family" of M field strengths, or our COHN are somehow compatible. If we cannot see Zeus with our physical eye, then it is not even close to our strength. It would be existing in the empty space of the U. Our physical bodies cannot interact, but our Souls can. The Central Energy in our body, or what we call the STM can change its M field strength to anything in the U. This is what we are doing in the Transmutation and we use our emotion to do it, but there is more involved in it. So the empty spaces of the U are teeming with life and we have to learn how to interact with them. This is also where some of that 80% of the energy we get from the environment comes from. Plasmas or other beings live in these empty spaces and

when we travel through them, we are traveling through other beings who are at a different field strength than ours. This may sound strange to us, but isn't this happening in our bodies? We have all kind of bacteria's and viruses traveling throughout the body without our knowing it.

When we transmute to another part of the U we don't just magically appear there, like there was nothing in-between us and our destination. He explained to us before that there are high speed lines of communication that connect the whole Unicose together. When we are dreaming that we out in another part of the U enjoying ourselves and suddenly our mother says to our physicality (P) on the bed, "it's time to wake up and go to school," we are instantly back in our body. We didn't just travel back through ordinary Space, we came back on one of these super fast connection lines. One such source of these lines are supernovas. We only see the explosion in P, but in terms of M fields they must be pumping up the high speed lines in a certain parts of the U. And maybe they all connect together like the lymph nodes in the lymph system of the body. He said we can create a "supernova" in the transmutation, but we don't know what that means yet. According to what Mr. Keshe said, there are also energy transfer lines between different plasmas. We can ride on these transfer lines if we want to go more direct between one galaxy to another, or one U to another. Maybe these are what the Science fiction people call, "wormholes." But they are really just energy transfer lines that are commonly used by the citizens of the U.

To enjoy all these wonderful things in the transmutation it still comes down to being able to control and create emotions. The ability to do these things are already inside us and we do some of them when we dream at night. Another thing he added was the ability to become invisible. The way I understand it is that through our emotions we change the field strength of our Soul, which changes our physical manifestation. But we still can remain in that environment and nobody would see us, and if they are aware they could feel the presence of our Soul. Mr. Keshe said that they do this with the world leaders whenever they are holding secret meetings to do their misdeeds. He is there, and it scares them at how he knows what they discussed. He also mentioned the word "change," but did not elaborate. We all have this capability but we deny it to ourselves. It seems that because he is serving humanity selflessly, then his Soul must automatically appear in these meetings. We know that the life of the Soul is transparent and all other Souls are aware of it. So it is not spying on other Souls, rather it's like living in a glass room, everybody can see you. The ones disturbed by this are the ones who want to hide their bad behavior, but in the dimension (D) of the Soul they are exposed. This is what it means, there is no place to hide in the whole of Creation.

I have read about holy people who could appear in two different places at the same time. Now he has started to teach us how it is done and that it is not magic, it's the science of M fields and emotion. It's not just two hemispheres of the brain, we actually have two independent sides of the body and each can create a copy of the STM and create another physical body from it. Each of us can create 2 bodies and the "Beautiful People" can create 2 bodies per STM. If they have 2 Souls they can create 4 bodies. We already do this when we dream at night, we go out into the U and in our dream we see ourselves

with a P interacting with others. When we travel the U being able to make an extra body is very useful. For example, if we want to visit a planet that we don't know anything about we can send one body out. If anything happens our original Soul will remain intact. And the reason we always wake up to our physicality is because one half is left behind and the other one comes back to it. This has been going on with us all the time, but we just didn't know about it. And again this is the basic pattern of 2 plasmas interacting with each other.

We have to understand more about the dual nature of our body. All the different organs come in pairs except the intestine, which is single and we'll talk more about that later. While the right side works and does its functions the left side rests and repairs its cells. The organs have a sequence of operating on the left or right side. Controlling the breath is important for transmutation in that it effects the energy and the emotions. The lungs have a left and right sequence of use as well as the nostrils. In the future he will teach us more how to become aware of which side we are breathing through. Discovering the sequence of the rest of the organs will have to be done through the Soul because we don't have conscious control over them. If we can learn to set the sequence of all the organs in the body to line up on either the left or right side, and if we can learn to harmonize them with the STM, then we can split the body into two parts and create two bodies at the same time. It's not just the two brain lobes, it's the whole body itself. Because as he said earlier, the two sides of body are actually independent parts that work together. When there is harmony between the two then we'll have control over them.

This is an amazing function we never knew we had in us. And the secret to doing it is detachment from the P. We always come back to detachment, which we have talked about many times before. The other secrets are we have to learn how to synchronize all the organs to the left or right side. If we think about it, this is very practical. For example, if all the organs lined up on the right side, but the kidneys remained on the left side we couldn't get a balance between the Soul and the P. And we cannot split our Soul and create a second P to go and do bad things with it or harm others. If we did something like that it would change the field strength between the left and right sides and we couldn't get back to our other half of the body and function as one again. Wandering around the U with only half a Soul is probably a worse fate than what happens to suicides.

The STM also has two sides to it and they have to come into harmony with each other and then they can harmonize with the two sides of the P. But in the case of the Soul one hemisphere goes in a clockwise rotation and the other goes counterclockwise. This is why he was teaching us about the different rotations of the Sun, Earth, Moon, and STM. They are part of a bigger system, and the direction of rotation is very important, but we don't have enough knowledge about it yet. In the future we'll learn how to harmonize them, and together with the strength of the emotions be able to split ourselves into two halves and do all kinds of amazing things with them. Mr. Keshe says he lives like this and has great pleasure doing it.

Human beings were not the first life forms on the planet. He seemed to be hinting that there is a special structure to how life is created. He said the intestine is single and then

we have the 2 kidneys. The digestion and absorption of energies from the environment only (needs) one system because the Soul can feed everything. Does this mean we don't really need a dual system of organs? Maybe the purpose is something else. Maybe it has to do with having two organs to create a Twinity, which connects us to the Universal Energies which allows us to fulfill our emotions. The interaction of the two sides would create a free plasma in the center, which is where the spine is. The knowledge of Yoga and Kundalini may not have been complete. I did come across an image in the scriptures that alluded to the two halves of the body being separate. The two sides of the body, the arms and legs create a Twinity and balance each other. Even if a person loses an arm or leg the energy of it is still there. So there is something fundamental that has to do with the field interactions and how bodies are created in the U. The plant bodies send up a single shoot and then branches out into dual sides. It's helpful to look at some of the pictures on the Internet about worms. They seem to be the most basic form of life before the human body was created. You have a nerve column and two small balls at the top where the brain would be. They only have 302 neurons, which are nerve cells, and that's it. Then look at a snake, they already have a two hemisphere brain. If you think about it, isn't our intestine really a worm? Does the human body carry the essence of the whole evolution on this planet? Putting that aside, the main point here is the dual system with pairs of organs that create a Twinity field interaction. And this is what we need to get in touch with for transmutation. Maybe knowing that we are already connected to the U whether we like it or not, will give us more trust in ourselves that we are already part of the field flows of the Universe, and having the knowledge that it is with us now may open us up to the love of being part of Creation.

(Note: A big snake has 10 million neurons; human brain 86 billion neurons ; Milky Way Galaxy up to 400 billion stars, U has 200 Billion Trillion stars. It's all just H plasmas stacked up on top of each other, or what we call "zero's and one's." And what we can see here is the pattern of increasing complexities of plasmas, create a higher M field strength. Perhaps this means that the Galaxy is already way more enlightened than our solar system because of the higher field strength).

A video was shown of the use of Gans T in Romania on a 300 hectare crop of sunflowers. At the moment there is a severe drought in Romania and the correct use of the Gans helped the plants to create their own water from the fields of the environment. They didn't need to be watered. The sunflowers heads were enormous and lush green, even in 40 degree Centigrade (104 Fahrenheit). Then they compared it to the neighbors farm using chemicals, which were all dried up and brown. Mr. Keshe gave a more detailed teaching of how the Gans's work. This trial nicely proves the Plasma T, but at the same time Gans's have become obsolete as now we can use the M fields directly.

The process started with soaking the seeds in Gans water and then when the plants grew they sprayed them only one time with Gans water. When the soaked seeds were put in the ground it created the first field interaction, but as it was a single field, and there was nothing else to interact with, except horizontally with other seeds. Therefore, nothing much will happen at this stage. When the plants grew up they created a distance from the ground and the first application of Gans water started the field interaction. Now they could create a Twinity interaction between the top and bottom of the plants. This

interaction will start to attract fields from the environment. And with this single watering the plants will be protected from drought, because now the field interactions have connected the plants to Universal Energy for their needs. This is the same process for all plasma interactions. The first job is to get the Twinity going and then that automatically draws in the stronger Universal Fields. This is how simple the Gans Plasma Technology is, and we all can do it.

In the KF Times article of December 2018 on Black Holes, Mr. Keshe said that they are like 'eating machines' that consume stars and other debris in the U. A KS was confused by this and asked about the U being a peaceful place. And Mr. Keshe explained that this has to do with human's perception of things. He didn't go into detail, but in previous teachings he taught that humans don't know about their Soul, that it is an energy center and is eternal. When a star goes into a Black Hole, or amalgamates with another plasma it doesn't die like how we think of the physical body dying. It still remains an individual plasma but it becomes part of a bigger structure. Black Holes receive energy and when they have too much energy they radiates out and becomes a source of new life in the U. When asked if they are a transmutation device that separates the Soul from the P, he answered, not really because that Soul is still in the same dimension, but now it is part of something bigger. Our concept of Black Holes have to go beyond what matter state scientists are teaching about them, otherwise we'll be in a great confusion.

This leads into another part where twice he went over the details of how the development of the KF Spaceship made from the fields and to be shown in Iran is coming along. When he opens the suitcase in Isfahan the fields will start interacting and they will create a Black Hole, or what he calls the central field forces of the spaceship. It will draw other fields to it, and when those fields become excessive then they will start to radiate out. Then they will add other fields to them as they are radiating out, and these interactions will create the physical shape of the Craft. To make walls and rooms inside the craft they will repeat the same process. The place where they want a room, they'll create another central field force or Black Hole to draw other fields to it, and when they radiate out, they will add other fields to them and he mentioned something about materials, and these interactions will create the room. It's all the same process. It's like how the spider was creating the web. We can imagine each square as a room, only they will be 3 dimensional. This is the way building is done in the U, and not with bricks and mortar or aluminum sheets.

KF is in the first phase of testing this and they are seeing steam coming out where the fields are interacting. The field forces interact with this steam and bends and makes the shape of the UFO. The theory now is slowly becoming a reality.

In the teaching on Heart Attack Mr. Keshe asked that we do some research on what the doctors have observed as early signs of an impending heart attack. The main causes today are diet, which generally means too much cholesterol clogging the arteries and blood flow and stress. From the point of view of Plasma Science heart attacks come when there is too much attachment to P, or one gets unwanted losses in their life that they cannot handle emotionally. The heart is a M field generator and when interactions with the fields

of the STP don't match, then it releases like a spark that results in a heart attack. We need to find out the causes of the heart condition and deal with the emotions of it. We should try to expand the STM over the STP to absorb the (excess) M fields. In this way it might not release its energy to the physical heart. If we elevate the STP then we can easily absorb the physical tensions and take the pressures off the heart. Lack of sleep contributes to heart problems. The sleep pattern can change out of nowhere about 3 months before the impending heart attack. One wakes up after 4 hours for no reason. If you have a heart condition please don't get nervous reading this. There are many symptoms that overlap with other causes. Everything has to be understood in the correct context. Elevating the emotions through the STM and learning detachment from the P will be a great help along with eating and living correctly in the physical dimension.

Other Topics:

When one KS is able to transmute they can transfer the knowledge to others who want to receive it. But they have to want to be with you, as part of you. (What's does this mean?)

'The stronger always gives to the weaker' also applies to knowledge. When we visit another D or planet we'll share our knowledge with them, because we'll have something they don't. This means we are in a stronger position of knowledge. And the same applies to them, they will share back to us.

Mankind is ready for the final phase of the world peace. We are asking KS to pray for the elevation of the Souls of the world leaders and religious leaders. We are starting to bring the religious part to an end, then 90% of the wars will stop. We need the Soul of Humanity to accept the change.

Thanks for listening.

Quick Index

(There are three 5 fives in 555. Mr. Keshe hopes that when he finishes there will be somebody else who'll carry the teachings to 4 digits instead of 3 (5,555). The teachings of the Universe (U) never finish. Whoever claims that they know all of it, they have to link themselves back to the Creator). (As he said before, the Creator is all of it).

(For the past few weeks we have been teaching about the magnetic (M) fields to expand the knowledge of the Knowledge Seekers (KS). We want you to understand more about the connections of the M fields and how the connections are created between the elements, and it doesn't matter if those elements are in the body of the man as the kidneys, liver, or whatever, or as a galaxy of the Universe (U). (Our scientists have to understand and become what I call, 'Universal Scientists,' who understand that the work of the U is similar to how the body works, or any other animal on this planet). For example, we see certain areas of galaxies that behave like the kidneys (in that they get rid of excess energy). There are collections of galaxies in the U that behave like a heartbeat of the (?? Universe). The structure of the Unicoise follows the same pattern as the body of

the Man. There is no difference, because M fields cannot interact in any other way. It's not like a car where you can move the engine from the back and put it in the front, or do anything else and it will work. (The collection of fields, and the collection of plasmas that they make will end up with the same structure. They do this automatically, ?? regardless of the field strength and composition of the fields. The different field strengths are totally due to size of the amalgamation of the fields. ?? when they are manifested in the dimension of physicality (P) they will create the same (?? type of) structure)).

(The man says that only 5% of the visible U is matter and the rest is empty space. When our Soul of the Man (STM) interacts with the fields of this planet and begins its creation in the fields of the womb of the mother, it creates a structure of a memory pack, where everything has to be kept and controlled, ?? this is the brain. It's a place that keeps everything operating for the physical part. Then it creates a place that rejects the extra materials (energies) it absorbed from the environment (organs like intestines and kidney). And all the other things needed for the body to survive in its environment. The same kind of structure is setup in the galaxies. The galaxies start small and then grow to a particular when they mature, just like we do. Man matures after about 100 years and then the P and Soul separate. But a galaxy takes billions of Man's years to mature. But in essence it's the same).

(We eat 20% of our energy from food and the other 80% comes from the environment, from Cosmic Rays (CR) and Earth's Gravitational Magnetic fields. The galaxies do the same thing, they take energy from the U. And our U takes energy from the Unicose. But some of these energies cannot be absorbed, or they are not needed. The body of the man has 50 to 60 organs. In Universal systems like galaxies, there are billions of pieces that (can be compared to like the organs), we call them Solar Systems (SS), stars, and the rest of it).

(When we understand this, it will make the journeys we do in transmutation traveling between Universes, galaxies, and SS very interesting. (A star is part of another system in the structure of the galaxy. If we understand this then we can hand over energy from one system to another. By learning these pathways, we become part of that energy transfer. This is how we will travel from galaxy to galaxy, and from Universe to Universe. But we have to choose the right path during our transmutation or transportation (if we go by UFO). What does this mean? It means we have to find the high speed lines of connection (throughout the Unicose) and then learn to join into them. Actually, we already do this)).

(We do this every night when we dream, but we never understood it. When we dream our Soul is traveling the U having a wonderful time in this galaxy and on that beach. And then mom calls and says, wake up it's time go to school. What do we do when we are way out in another U? We jump on one of these high speed lines and immediately we say, yes mom, I'm awake. We already do this. We know the shortcuts and we can use them to extend the speed and dimension (D) of the transmutation and transportation).

(We see this all the time, but world of science has never understood it. We see these high speed lines of connections in what they call, supernovas. They give them all sorts of

names. But they only look at how the things physically blow up, or whatever. They don't look at the M field strength that they produce, or where they go. We can create a supernova in our own transmutation and then lock (?? it into) a system. (We need to look at the supernovas through the eyes of the M fields and how they interact in the U. The D of our P has become an obstacle for us to concentrate and understand the D of the field interactions)).

(This means that now when we look at the structure of a galaxy, U, or any structure of a system, even a man, we only look at its P. We need to learn to look at its Soul and discover what's inside of it. We need to see the true galaxy, man, or whatever we are looking at and learn how to deal with it (in a real sense). In Space we'll have to do this, especially when we come across fields that have no physical D. We have to interact with the physical interaction of the fields, and its Soul or Central Fields. We have to understand its emotion (?? of what has taken the shape of physicality. There is that which we observe and then there is its existence)).

(Years ago I taught that there are no empty spaces in the U, and now we are coming to it. We need this knowledge for transmutation. (This knowledge will turn the whole world of science we've been taught, upside down). We were told that only 5 to 10% of what we see in Space is matter state and the rest is empty. This all will become a nonsense. Every empty space has a Soul. Every empty space in the U has a dimension).

(We say that if we don't see something, then it doesn't exist. We have totally misunderstood the World of Creation. We only see the parts which are physical to our eye and according to our knowledge of today the rest is empty space. But the fact is, that empty space is not empty, it's full of life, but that life is not manifesting itself in our D of P. Those who have the field strength to observe them, can see them. They see that the Universe is full. Is there an empty space between our lungs and heart? Is there empty space between our organs? Is there empty space in our brain? And this is only the P of the man. What will be in the conditions of the galaxies and the U? We still have a lot to learn).

(We should try to learn about what is in the other 90% of the U they say is empty. We have to educate ourselves. How do we interact with that 90%? Because that's where most of the life of the U is. If we change the field strength of our Soul we would be able to see that the empty parts as full. (Traveling in that empty space will become part of life of the man in Space. In that empty space we'll be traveling through another life. We're crossing through another existence, another field, (it will be a M field interaction). Just because we can't see anything does not mean that there is nothing existing there. It's like when they made the Night Vision Glasses, then we could see in the dark all the difference life forms moving around. When we can change the strength of our Soul, then the rest of the U will become tangible to us).

(When we understand this then we will respect every life in every corner of this Unicosé. Then we understand where these extra energies we take from the U come from, which gives the D of P to our physical life. There are no empty spaces in the U. Once we

understand this, then we can amalgamate this knowledge with what we have, and we'll see how the whole structure works. We'll have access to a knowledge that allows man to travel and move in any D in the U and Unicoise. We have to learn this. We have to learn how to see the empty spaces of the U. How to feel them. How to interact with them. How to respect them. And then with that process we'll find new ways of movement, transmutation and transportation, in any dimension).

(With the transmutation we brought you, mankind will learn this very quickly. Many of you are trying, and some of you have succeeded in different ways. You'll find that you can change the strength of your Soul, and then when you are standing in front of a mirror, you can become invisible. But does that mean ?? you have reached the stage and field strength that your dog in the room passes through you in the physical D? Or he doesn't see you. But is he aware of your existence? We do this in Space technology when we change the fields and the spacecraft becomes invisible. One second you see it, and the next you don't. We create parallel strength field lines, but it still is in the same position. Man has within himself such a capability. He has always had it. Now we have to learn what that field strength is).

(We'll start teaching you this during the transmutation flight in the coming weeks. You'll be able to change your manifestation, and presence, and still be within the same environment. (Some of you managed to do it in the past few weeks. We saw it on the graphs. Some of you are ready for the transmutation to elevate your Soul. You don't need to travel, but you can be invisible to the eye of the man. It's like the empty spaces of the galaxies and U. Just because we don't see anything in them, it doesn't mean nothing exists there. This brings you a new dimension and understanding).

(Sometimes when I speak it shakes some of the world leaders, because when they sit in there sealed meeting rooms to make that decisions and do whatever, we are present. We are invisible. This is the reason we know what they are talking. (?? We change). We see the Soul in those meetings. We don't see the physicality. We are part of what we call, ?? the non-visual part of it. Many times in the teachings we speak directly to governments about what they say in those meetings. Those who sit in the seat of power are scared. They wonder how we do it? We are present when that decision was made at the level of the Soul. We were invisible. It's not just us who can do it. Every single one of you has the capability within you).

(The reason for it is very simple. When you transmute somewhere in Space, there are many such spaces in the U, not just one specific point, there the physical D of the P of the man has no visibility, but the Soul exists there. So you do exist there. It's not like Earth where you die if you don't have your physicality. Your field strength is not at the level of vision. You cannot be observed by others. If we develop a system that can see the field strength of plasma packages, or what we call, Souls, then we will see that this U is jam-packed with life. (?? We see the Souls within their rooms). We don't spy on them. We are present as part of the line of the thoughts. It's the connection line, it's a fast track. It receives information fast, which man does not have. We know it, but we never understood it).

(In the past I taught you about how by changing your breathing you can absorb energy from the U and live. You can also do that with Gans's. Now you have to learn how to breathe with the fields of the U. You can receive from that 80% that comes in, of which you have no knowledge. You take from it according to your emotion. You can strengthen the emotion of travel, and the expansion of the positioning. You position yourself. You increase the absorption of the energy that can feed your physicality. You can do so. You extend the fields of your emotion for repairing part of your body, because you want to keep the dimension of physicality. This is the beauty of Knowledge Seekers (KS) and humanity, and those who have a physicality can learn and add to their knowledge. I wonder when many of you learn this, whether we'll ever see a car on the road again. Because you'll learn to transmute directly to where you want to go. You can manifest yourself in the shopping center, but you don't steal. You pay with the physical money and then go back home. That's if you want to feed your P food).

(This is the science and technology (T) of the U and it's at the reach of every man. It's the man who has to understand how to connect to it. How to read the language, which is the M field strength. You have to understand it in this environment and position in the U ?? where there is life. (?? Something about empty Space). It's a Being. Just because you don't see it, doesn't mean it doesn't exist. Then transmutation and transportation will become a game for you. It becomes part of your everyday life. Many KS are ready for that position to manifest, and others moving into that position. Once one of you learns it and wishes to share, then you can transfer the knowledge to those who want to receive it, to those who want to be with you as a part of you. We want to go to a wedding, four of you are happy to go, but one doesn't want to go. (If 3 of the 4 Souls want to go to the wedding, you can't force the 4th Soul to go with)).

(There is no difference between physical manifestation and plasma manifestation, in structure. It's the work of the M fields, and there is no difference. P is a collection of the interaction of the fields, which coordinates a movement. It's the same with the Soul. For example, if you decide to go from your house to the office, then the P has to make that move to get you there. Because you made the emotion of movement. You made the emotion of (wanting to reach that point). You can do the same with the emotion of the Soul. You can leave the physicality in bed, and go to the office with the energy of the Soul. You manifest yourself there and do whatever needs to be done and come back home. You will have existed in two places, (at home and in the office)).

(You can understand this from last week's teaching where I talked about the two halves of the brain and pairs of organs. The body of the man has two halves, left and right. The left is responsible for keeping the manifestation of the physicality here, while the right can travel somewhere else. (When you dream, if you learn to control it, you send the right side (of the body) to the office. At the office the energy will transfer through the Soul of the Physicality (STP) and manifests a second body of you. The right side manifests itself, in the D of physicality in that time, place and position (TPP). This is the beauty of having a physicality, (you can learn to use the different energy fields at the same time and manifest in two different places at the same time). When you hear of people being seen

in two places at the same time, this is how they do it. Now you know the secret, there is no magic to it).

(When you get good at it, you'll know which part is best to send for which job. When you are meeting with a lover, but are too lazy to get out of bed, then you send the right side, because it controls the left side, which (?? controls the emotion), and you manifest a perfect lover. And when you want to go to the office to do physical work, then you don't need the emotions, so you send the ?? left side. This is how you can manifest yourself in two places at the same time. But, you have to learn about that spike, (to increase the energy to be able to reach a bandwidth of the field strength to be able to do it). This is one of the reasons why man always wakes up to the physicality. If you understand the field extension, you don't need to do that. You can have one P in the office and one in the bed, and it will still do a perfect job at the office).

(In this process you use the emotion of the Soul, which connects with the emotion of the physicality. (Each STM can manifest two copies of himself). So the "Beautiful People" (Schizophrenia) can manifest many copies. For example, if there are 2 STM in one body, then they can make 2 copies of each STM. That means they can appear in 4 places at the same time. Each Soul has the capability of 2 divisions. This will be important when you learn to transmute, because you don't know what planet Zeus will be like, but you would like to try it, and you don't want to destroy the ?? P you made from the STM. You can send one copy (one side of the brain) of yourself to planet Zeus, while you keep (the other half at home). This is what you do when you dream anyway. Now you understand the process of it).

(There is a secret how to do this. It can be done very rapidly. The secret behind it is detachment, and understanding how to work with your physicality, and to synchronize these together. The other secret is to not to do harm. You can't send the other half to start a war in another place, to steal, or do something wrong. The right and left sides have to be in perfect harmony. "Thy shall not steal, thy shall not kill, thy shall not do anything wrong." Because, if you do something wrong with the other side, then you won't be able to return back to your body, because field strength will change).

(I have taught you a lot of different things in pieces to be able to do this separation, (or making to the 2 physicality's). (The man's world of science knows these pieces, but he could never connect them together). There is a gap, there is an instant that you can do it. You can create that instant, or you can bring that instant to harmony with the rest, and you can (make the two copies of the two halves of the body). Your P goes to sleep in 4 hour cycle. You can change that. Your breathing through the left and right lungs have the same sequence. Your heart has the same sequence. Your intestines and the workings of your physicality have that sequence. Your kidneys switch sides. (You have to get all the different sequences to match to the left, or to the right side at the same time). You have to learn about your physiology and which lung is at rest when, and which lung is active. (?? Which lung is absorbing energies during the active time, and which is not absorbing, because it's absorbing a higher order or lower order? The switch time))).

(By creating harmony in the STM, you can create harmony between the two parts of the body, so that one part can separate. This is where the Soul feeds the P and through its operation, controls the P. This is the reason why you have two halves in your brain. In the Soul D you also have the two halves. You have the fields which are going clockwise, and others going counterclockwise. This separation has become the two hemispheres of the brain).

(When scientists look at the field flows in the brain they will see two hemispheres. They work totally in opposite to each other, in different sections, and move to a different sections, to harmonize, to keep the shape and the structure of the fields within the brain of the man, which they can interact with the STM. (?? I think he means that the 2 halves work like Infinity Loops with each other in the different sections of the brain). This is not strange, nor is something we don't see. The Soul of our SS, which is the Sun goes counterclockwise, while the Earth goes clockwise. The Moon goes counterclockwise, but they all work within a system. If you can harmonize the field flow, and the manifestation of the fields together with the STM, then you can split them into two halves. You have that privilege. In the future, I'll teach you more how to do this).

(Today we are "sowing the seed" of the understanding, so that in the future you'll have the capability to create this split, or separation of the two halves. This is important when you go through transmutation. (?? If you travel in P in a UFO and you reach a planet you want to visit, either you have to get into another landing craft, or go to the surface with Transmutation). Or you can call it, dreaming while you are (awake). (To do this you'll have to learn more about yourself and why everything is in two parts)).

(You have to understand why you have only one intestine, but two kidneys. Because the digestion and absorption of the energy from the environment means one system, because once you have the Soul you can feed everything. But when you're in two parts, in two sections, each section has to operate on its own. (It has to do the functions of controlling operations (brain), getting rid of excess energy (kidneys) and take in energy it needs (?? lungs and stomach)). This is how the field strength between the two different parts create a dynamic structure (in) your physicality. Why do you have two arms and legs? What happened with the worm, which is one straight body? It doesn't have legs and arms. How does the Soul work ?? in a combination structure of a brain, for a worm or for a man?)

(These are the things we see in the World of Creation. But now you need to put two arms next to each other to create the man. But the man has never tried to understand the field structure of himself or other animals with two arms and legs. We understand even the structure of the physicality of the plants and how their Soul works, and why they shoot up with only one stem and then break apart into branches. Once you understand the structure of the fields, division of the fields, and the emotion in respect to environment of the fields, then you can understand that the man with his Soul and P has many capabilities and capacities that he has never explored. When someone understands part of it and shows us, it looks like magic. (What any creature can do, you can also do). This means you have denied yourself the ability to do it. But the knowledge is within you. It's the same with Transmutation and transportation, it's always been with us. We move the body

of the man in a bus. But we move the STM to another part of the U through his field energy).

(Once you learn how to control the fields and create motion in different parts of the body, you'll learn transmutation by division. You'll be able to be in two places at the same time. It's not magic. We do it when we dream. (We dream we are visiting our mom, and we see ourselves biking with her. What happened? How did we give ourselves a D of physicality with mom there in the dream? But our body is still here on the bed. That half of the Soul (went to see her while the other half has stayed on the bed). Now you have to learn it to do it in a D of physicality (the waking state). We are opening a new dimension in transmutation of the man)).

(In a coming time, we'll build these systems and use them in the Monthly Flight sessions so that you can understand how to do this. (You can use the two halves of the brain and the body, because they are two completely separate parts). The field replication comes from this part of the structure. (It mirrors the P in two dimensions. You take one half and the other half is a mirror of itself. You have two physical conditions (bodies) connected internally through the Soul, and the fields, and rapid expansion of the fields). We're setting up these systems and gradually we'll introduce them to KS who do the transmutation. Then we'll test it, and then you'll test it. I'll show you how it is on the graphs, and how two Souls will be created and move at the same time, in two different positions).

(I hope you understood today's teaching and what is to come, and what capabilities you have denied to yourself. Because when the other half moves (through) what we call empty space, you could be moving through a Soul. And as you are also in the D of the Soul, you will see, feel, and interact with it. (When the other half is here on Earth you'll gain the knowledge from that position in space. You'll gain knowledge from those you meet and interact with in the D of the STP. You will bring back that knowledge to Earth because (you're) connected to the D of physicality when you're asleep, you call it enlightenment. (But you have been learning outside in your Soul in another classroom in another part of the U, something that we don't know about on this planet)).

(At the same time, it's not (a one-sided) enlightenment, because while you are gaining knowledge from them, they are gaining knowledge from you. That entity, or field, takes in your experience in the dimension of physicality of the man on this planet. It's not only you taking, they take also. The energies interact, and the stronger always gives to the weaker. It's the same (with the knowledge, because you have knowledge the other entity doesn't have. Then when you wake up in the morning, you do something new with that knowledge you gained. That enlightenment came to you at night while you were dreaming, and the other half of your body traveled).

(Now you understand the truth about knowledge and where it comes from, and that it is not exclusive to man. It belongs to every entity in the Universe. It depends on your need, and then you receive it. This is why patents make no sense and have no value. How can

you patent a knowledge that is shared with the whole U automatically. It's unthinkable that man is doing this to himself).

(Maybe now you understand what the future teaching will be. We'll expand the knowledge and the interaction of the fields. Until we sort it out, your dilemma will be how you connect the emotion of the physicality with the emotion of the Soul. When you understand that, then you can transmute and be (in two places at the same time in P, and you can gain information, knowledge, and whatever emotion, collectively from (whatever entity you meet). I hope you learned something today. This is something Mr. Keshe lives by and it brings a huge pleasures in the life of his physicality).

End of Quick Index Part 1 - 555 KSW

(KF will introduce two more parts to the Twinity Gans's, one is for sleep and the other for migraine. It's a trial so please give us feedback on what happened. You can put these Twinity systems in the KF Alkalizers, also called, field replication systems. You can also immerse the sealed bottles even in the container that holds the water you will drink. There should be no direct contact with the Gans itself. You can also put them on both sides of the glass for drinking water. The main point is to get field interaction between the two bottles of Gans, with the drinking water in-between. You'll find a totally different experience with these Twinity systems and they'll bring a new D. Read the instructions from KF).

(We are building up towards a full transmutation unit, and a full connection. Gradually we are moving away from units in Germany, and will centralize in the new systems. We heard the testimony last week from one of the KS on how effective it is. The old systems will become more or less obsolete. The new technology has taken over and we'll see a new D in transmutation and the Wellness application. Where we'll feed through the systems. Our doctors will start handling new cases like cancers, Parkinson's, and others. You can contact KF about joining a trial).

(In the coming weeks we'll expand the knowledge of transmutation in a very different way and we will ask for specific people to join us in this transmutation and (physical) transportation. We will call those who joined the 'Satellites Souls' to come into operation as we expand).

(We are asking KS to support us in elevating the world leaders as we create a new phase in the World Peace, and to the "One Nation" process on this planet. We need support through the D of the Soul. We should all start wishing for peace, and start creating the environment of peace. All you need to do is to concentrate (your intention for world peace) to help us. It's not in a physical way, we work for elevation of the world leader's Soul to bring in the final phase of peace. Mankind is ready for this phase. We have started to bring the religious part to an end, and we need your help to bring the rest so the Soul of Humanity goes for the change. We will end the wars between the religions. I hope we succeed this time in a beautiful way. You will understand it as it takes shape, and as KF will become part of this structure).

(The Twinity Gans cannot be used by women during pregnancy. Because you don't have the right to touch another Soul. When you're pregnant you are trusted with another Soul, (you don't own it). That Soul will decide in the future for itself).

Q: (You mentioned that there is a twin star paired with our Sun somewhere in this U. The twin star has a Solar System (SS) twinned with our Solar System, and if it also has a planet like Earth in its SS would it be able to sustain matter state human physicality, because it is paired with our Sun?

K- No. (Just because we have a twin star it doesn't mean it will have exactly the same internal structure as ours. The twin star of the Sun, because it is part of the structure of the U, will have the same structure as our SS has. (?? Every so often all the planets of our SS line up with each other. They say it happens every 200 years). (?? In the galaxy twin SS can come together, but it takes ?? billion years (he might be referring to galaxies). It does not mean that twin pairs will have the same internal structure. (This won't happen at all). (?? Galaxies have their dimension of interaction). It seems that just because we call them twin stars they are not necessarily exactly the same. When all the planets in our SS line up, that doesn't necessarily happen in the twin at the same time).

(Accidents happen in the U like when galaxies collide with each other. This is very common and then things get moved around. What would happen if our twin star had a collision in another part of the galaxy, how would it effect us? Physically we would see a change in the field strength of our Solar System and that would effect our position. If this were to happen we would see a change in what stars we see on our horizon. Not the horizon of our SS, but of our Sun (?? I don't know what he means). We will see different star formation (constellations) in the night sky. If our twin star got destroyed, and as we are locked into it (I think he means we make an Infinity Loop interaction with its fields), then we would have to find another position (or star) to lock into (to keep the fields flowing)).

This is not something impossible and it happens (often) where matters collide with each other in the U. We've been lucky for past billions of years, that our SS and its twin have not collided with anything. But it's inevitable that one day it will happen. It could be a billion years down the line, or it could be tomorrow. The only way we'll know if something has happened to our twin system is when the stars in the night sky change position. They rapidly change. Some constellations may disappear altogether).

(Our SS in the galaxy is vulnerable to these kind of things, very vulnerable. Us and our twin star are like 'loose bullets' rotating in the fields of the galaxy. But we have connection with our twin and we balance each other. Our position in the galaxy is fixed. It's like those big carousels you see in a fair where the seats are hanging on a 10 meter chain and as they rotate the chairs swing out. Our SS is exactly like that chair on the carousel, where the carousel is the galaxy. Every position is fixed. (?? Just like the chairs hang freely so does our SS hang freely and when it moves the others have to reposition. This means that (none of the SS are internally the same, because they absorb different

energies in different parts, and they release different energy in other parts. We'll come very close to our twin star very soon. It will happen in 2,000 years. The meetings happen regularly. Now we have the knowledge about it. The twin stars are a combination of fields pressurizing each other, they come close and they go away. It's a pool of attraction and repulsion. Soon we'll explain more).

Rick shows a video of a spider spinning a web that looks like a star. The spider goes clockwise and counterclockwise rotation. There is some other information you can read about. He tries to relate it to Mr. Keshe's paper in KF plasma Times of December 2018, called the creation of Black Holes. In the article Mr. Keshe wrote that, 'as the Black Hole grows bigger and its Gravitational forces take over, then a Black Hole becomes a predator for parts of its galaxy. They become vast eating machines of the debris and stars and planets, and this is exactly what is to be expected of them. The Black Holes originally created totally by chance, there is no pattern in their creation. (They are) simply a creation or an outcome of natural interaction between two or more passive magnetic fields or matters in motion within the galaxy or the U.'

Q: You've said that the U or Space is a peaceful place, where they don't steal others energies like what we humans do on Earth. However, in the process of the growth of Black Hole's, aren't they consuming other Souls? They consume stars and they have Souls. What happens to the Soul of the star that gets sucked into a Black Hole? And, why are Black Holes allowed to consume Souls, if it is a peaceful Universe?

K- This goes back to (how humanity perceives things, doesn't it? We think that once a physical part of something is added to, or consumed by another, (then it is dead or lost). We don't understand that it has actually become part of that other entity)).

R: Is a Black Hole a (sort of) transmutation device? Because it separates the Soul from the physicality?

K- Not really. It's still is in the same dimension. ((But it is part of a bigger soup). It now has become a bigger soup with more fields added to it. (For example, it's like if you have 2 different type of animals running together in a herd. They're running in the same pasture (but they remain separate). The beauty with the plasma is that they keep (?? their essence, and their M fields interact) (I think he means that with a plasma the individual parts still keep their individuality)).

(?? When a Black Hole receives more energy then what it needs, then it radiates out and creates more stars in the galaxy. So your energy becomes part of all that creation going on. You don't die. We don't see life immediately around them, the fields release in the galaxy further away and as the strengths reduce and slow down, then they create new cycles of life. They don't squeeze ?? the others. Instead they create a size that accommodates all the fields together. (I couldn't follow exactly what he was saying, but its important about the packing of the fields and how the UFO in Iran will be created)).

(When we create the spacecraft from the fields, we'll pack enough fields into the middle, that it becomes like a Black Hole, and as it expands out it will release its fields, and this will create the physical D of the craft. Or we can create a very high intention of fields in the center, and by adding on top of that we'll create the manifestation of P. It's like when you want to see a laser light, you have to spread smoke on top, then you can see the laser as it interacts with the smoke. This is how most of the large scale UFOs in the U are created. They don't use 3 km wide aircraft hangars to build spacecrafts like the build matter state aircrafts on Earth).

(First you create a Black Hole in the center, then create a condition of radiating fields, and one of different field strengths, which will create interactions with these fields, and this is what creates the shape of the craft. This is how you build Spaceships that are kilometers in diameter. You strengthen the field forces in the central line and then you introduce fields in the surrounding area. This is how you build the first layer. It gives you the shape according to that field strength, and its connection to the center. And then inside the craft you can make walls, partitions and rooms. (This is done by the fields in the environment ?? interacting because they are connected to the field strength ??) It's very much like that video of the spider web).

(This is how it works. We have developed this system in the KF laboratories now. It's not something to be done. We create a field pressure in the center, and introduce additional fields, and through their interactions with this, we build the structure. This is how UFOs are built. You don't get a aluminum sheets and panels and screw them together the way you do with aircrafts. That doesn't exist in the U. This is what KF laboratories are working on and we'll show in Iran).

(First we create a central field force and then introduce materials of field forces, which are made of and are a part of. The interaction with the central line will create that "spider web." It depends on where we introduce the additional fields to give us the shape of the craft. Because it's away from the bottom, then the bottom has to be closer. It creates the shape of the UFO. This is how the Spaceships are made).

(Then you create the walls. It's all in the patents. I especially put this part about creating the walls and partitions in there. You introduce different field strengths and different materials, but they are all still connected to the center fields, to the Black Hole. We absorb all the fields in, and create that condition of the central field, and then by expanding it, we interact with it. But we can decide where we want to interact with it. (We can move the interactions around and create even a bigger spacecraft)).

(We are in the first phase of testing this system. In this first phase we see steam coming up, because it's the beginning of the manifestation of the craft. The steam together with the field forces will bend and start making the shape. We see the steam coming up and the fields are getting built up. Then we can dictate where we hit it. Don't forget this is dynamic, and how the fields we introduce interact, will give the shape. We create that Black Hole. You call it a UFO. I call it transportation in the D of the fields).

(To create the shape of a UFO, it's the same as when you land on the Moon. You still have your craft and then you want to walk on the Moon to see how it feels. You expand the fields (above you so now you have protection when you're on the surface of the Moon. Because your spacecraft is sitting on the surface, you have the field forces underneath the surface too, to make that shape of the UFO. This acts like a dome. You can walk underneath the craft and it will be at the atmosphere of the Earth. So you are making fields underneath you too. This way as you are underneath the spacecraft you are still in the M and G field strength of the Earth. It's like making a dome on the Moon but you are using the spacecraft to create the fields of Earth).

(It's a different understanding of the use of the same principle. In Iran we'll bring in a suitcase and build the craft. We'll create different field strengths for it and this will create the shape. (The spacecraft will have a Soul, because it's a field interactions)).

(He talks about creating a dome on the Moon. We don't wear a spacesuit inside the craft. Instead we create a M field of 1G. (It's doesn't matter how fast the craft goes)).

(In your own Soul there is a Black Hole and this is why you absorb fields. It has a gravity which decides what is absorbed. There is no entity in the U which does not have a center, what we call the creation of Soul of the Creator. It has the capability to absorb all the fields of the U, interact with them, and ?? this interaction has a feedback that becomes the physicality. (?? When fields come out of the center, winds will interact with it and push them around)).

(It follows the principle of existence. When a field gets to its position, and (starts expanding or being repulsed, it does not go out straight. There are M field flow winds of the U. The U has a dimensional field flow. It doesn't go this way. The motion on the expansion is circular. This is why plasmas are always dynamic, because the external fields which are in motion, force this interaction, force this dimensional direction of the field forces).

(A Black Hole is the center of life and it has to absorb to give. It (draws) everything in and what it doesn't need, it releases back out. What comes out interacts with the environment and becomes the manifestation of life. This is how it works. What it creates depends on the field strength that it releases out. It can create a SS, galaxy, your eye, or a leg in your body).

(He gives an example of crossing 2 chopsticks in the middle and the STM is that point in the center. Each side of the chopstick hinges on the center. One side builds one side of the brain and the other end builds the body. It does this for both sides. Imagine expanding the Soul over the chopsticks and you get the whole body of the man).

(The STM is in the center of the 2 halves of the brain, this dictates the height and shape of the man. People with the same height have the same behavior. (?? It creates the same physicality because it has to balance it. It's like a seesaw in the park, you sit on one side and the other side has to balance your weight by the distance from the center. This is why

the people with the same shape, have the same characteristics, because that's how the fields work)).

(The position of the fields of the brain decides your eyes, behavior, trust, and your emotion. It all comes down to where and how this Black Hole was created in the STM. Because when it absorbs from the womb of the mother, then it dictates what it gives out, and it starts shaping the man).

Q: You said when we hear a voice, we are dealing with the matter state. What kind of sounds and what frequency do we have to make in order to create a match between both the STM and STP, to create peace in our physical structure? How can we work with the uvula in the throat, which is related to the STM?

K- Interacting fields always make (sounds). (That's part of it, and the way they make particles. They make fields which is audible to the ear of the man or other creatures in the U according to the strength. The interaction of the STM with the STP at the time of separation or death is heard by owls very clearly. We know this by experience and through tests).

(How to describe the separation of two fields? It's like crimpling a piece of paper into a ball and then crimpling a second piece of paper over it. Then try to take the outer paper off, it makes noise. Sometimes it's the sound of the paper itself, and sometimes it's the sound of the second paper separating from the first. It's because it has to let go and it crackles. This is what exactly happens to the STM when it separates from the STP, and this sound can be heard by owls).

(When they hear it, it bothers them, and makes them to sing. It's like it hurts their ears. The M field strength separation of the STM from the STP is physical. It's literally physical. You can build a system that works the way owl hears it, which is through the fields of the Soul. You have to transfer the emotional understanding to the physicality. The scientists could put an owl near a dying man and observe when the STP separates from the STM. They can monitor it, and they will see the change or transition).

(Now in the hospitals when a person is dying they have machines that monitor the heartbeat and know when it stops. In the future they will have machines that monitor when the Soul leaves. When the heart stops the Soul can still be in the body. Then they will be able to tell if it is still there, and then they can bring the person back from death because the Soul is still in the body. We can expand the Soul to create the heartbeat again. The whole science of the medicine for the P of the man will change. Maybe the Soul has decided that it wants to leave the P, then they won't be able to interact).

(This is part of why we are living longer today, because we have managed to increase this field separation. (If you have the knowledge, you can know at what age you will depart the P. And you can extend it, it's very easy to do. You have to find a match, to find the separation. We can find it scientifically. You can put an owl there and watch how it reacts

to the Soul. When it starts singing and at what frequency, as the STP is separating from the STM, and it makes that sound of like opening the outer paper. The owl hears it).

(This sound is not heard by the ear of the owl, it's heard by its Soul, which converts it into the emotion of the P, and this makes it sing. If the owl would have heard it in the physical ear, then it would have flown away. It's like hearing a shotgun. Mr. Keshe knows exactly when he will separate from his P. He knows the time, shape, and space of it. Because they understand the work of the physical life).

Q: If the Sun, Moon and man's Soul rotate in the same directions, but Earth rotates in the opposite direction, then is Earth the top reactor of the Star Formation?

K- Oh my God. No, it's not.

Q: Will transportation systems be equipped with plasma feeding, so that the passengers can live inside whilst traveling?

K- That's part of its construction. We won't carry any food, because the energy transfer comes from within the structure.

(Rick shows a video of a 300 hectare crop of sunflowers that used the Gans plasma in Romania. The seeds were soaked in Gans water prior to planting and only one time after the plants rose up did they spray with Gans water. There is a severe drought in Romania at this time and the field is amazingly green and the sunflowers are enormous. They feel very happy to walk among them in the field. And it's 40 degrees Celsius (104 Fahrenheit) and they feel cool. Then they showed the neighbors fields which use chemicals. They are all dried up and in very bad shape from the drought. It's like a miracle. There should be lines of farmers driving up to the field to see this amazing advancement. But it seems all is quiet and they are trying to hide it).

K- (We see this a lot. Not only can you increase the harvest, but you can also create a condition of moisture for the plants. Once the Gans technology is understood and used properly by farmers, droughts and lack of rain will not make much difference to them. The plants create their own moisture from the fields of the environment, not from the ground).

(The key to understanding this is in the first few sentences where he said, we soaked the seed in Gans water, and this created one part of the condition underground, and we only watered it once with Gans Water, and this created the second condition for the fields to interact with each other. First the fields were set in the ground but they could only interact horizontally with each other. When the plants grew up and they used the Gans water they created a field interaction between the one in the ground and the fields put on the plants. This allowed the plants to create their own moisture and draw whatever they needed from the fields of the environment or the Universal Fields. They created a Twinity in the plant and it became self-sustaining).

(Listen to the original for more details. To get bigger sunflower seeds there is a specific time to water it again. But if the sunflower heads grow too big, the body has to be able to support the extra weight. You don't need to keep on watering it all the time.

(This Gans water process is obsolete now, because of the advances in the T. We use a totally different technology now. But it's fantastic to see and it proves the concept of the plasma T in agriculture. This first watering, after the plants are about 10 to 15 centimeters high will protect it from drought and create a (self-sustaining) moisture condition for the plants. There are special Gans's to use for the second watering if you want the sunflower head bigger. You can double and triple the harvest. We've shown this in China. But now this process is too cumbersome and too expensive. We developed a new T for agriculture that doesn't use Gans's).

Q: What emotions damage the heart, and what can we do to restore it, using our Soul or plasma science?

K- (Nowadays the damage to the heart comes through what we eat in the P. Heart attacks also come through stress. It usually comes from attachments, and unwanted losses that we cannot handle the emotion of the P. Sometimes ?? you might not have enough time to sort out the P before the heart attack. But on the other hand, you can (create a condition) to strengthen the STP for the heart to operate in).

(The heart is a M field creator and when its fields interaction with the fields of the STP don't match, then it releases like a spark, this is what we call, a heart attack. You need to expand the STM (over) the STP ?? so the heart can absorb the M fields. ?? It might not release its energy to the P. You have to look at the cause for heart attack. Through elevation of the STP, you can easily absorb the physical tensions that will stop the pressures on the physical heart).

(A heart attack is when the M fields of the blood inside get mixed up and they cannot interact and handle each other. They interact with the STP and have to release that energy. The heart attack is when the energy converts to matter state cannot hold it, and it stops the system, and get the heart attack).

(The body shows signs of an upcoming heart attack weeks before. If you understand it then you can control it. Specific signs show 6 weeks before. Then you should use the STM to elevate the STP and change the emotions. Very few heart attacks come at the last minute. Shock is one of them, but 90% of the heart attacks show their manifestation weeks before).

(You can also be clogged up from the food you eat. One sign is indigestion. But you have to study the whole matter. Don't just read this and get confused and worried. When you get a pulling of your tongue to the back of the throat, it means it's emotional. You cannot speak your words, you cannot put your emotion in to handle it. This type you can delay. There is also a tinkling and a pressure on the left side of the arm. This means you have a problem interacting with people. It's part of your emotion. You can handle this one too.

When you have a brain stroke, or a heart attack try to spell your name, ?? verbally. The heart attack is due to emotional or physical).

(Elevate the STP to handle the emotion increase and you'll find out what emotionally brings you to this point, and you can increase your level of understanding. And you won't get trapped in it. Lack of sleep is another contributor. An initial sign of heart attack and partially the brain hemorrhage is when you start losing your sleep, you wake up after 4 hours for no reason. Your sleep pattern changes out of nowhere, 3 months before the heart attack).

Some things have to be completed before they can start 'live streaming' the UFO development to the new Youtube channel.

Q: Is it easy to walk through the external boundary of the UFO?

K- No. It's dynamic. ((Initially you can before the fields develop strongly, but not in the final stage). It will depend on how you feel the fields. The easiest way is to learn transmutation and transmute yourself inside and manifest P. It's a different experience. But yes, it's a dynamic field).

For a lady developing Parkinson after the loss of her husband, can talk to Dr. Kern. We are running tests on this.

The new developments in technology has made the systems in Germany totally obsolete. The new people are connected directly to the new system now. And we have no need for the Wellness Center in Germany anymore.

The new systems are producing plasmatic water. You don't need to drink it, you absorb the energy from it.

Thank you very much for today. KF needs a lot of donations and help, if you can help us, so that we make our situation steady to go through these times. And pray for us to create the World Peace through the religions, in a different way. We need to bring the Soul of these world leaders for the next step of development of expansion of peace.

SUMMARY:

ENGLISH TRANSCRIPTION

(:06)

K- Thank you very much. Good morning, good day to you. As usual, whenever and wherever you listen to this series of Knowledge Seekers from Keshe Foundation Spaceship Institute. We are back as Rick says, "many five times". And I hope when I finish, there's somebody else who'll carry it to four fives instead of three fives. Teaching of the Universe never finishes, and whoever claims knows all of it, has to link itself back to the Creator.

Something which we taught in the past few weeks, and we expand for Knowledge Seekers to understand more, is connection of the Magnetic (M) fields. Connection, how, it's created between elements, be it in the body of the man, be it in the kidney of the man, be it in the liver of the man, be it in the galaxy, be it in the Universe (U). And once the knowledge is expanded, and once the scientist, or what I call, Universal Scientists, understand the work of the Universe is similar to work of the body of the man, (:08) and body of man like every other animal, we'll see galaxies for example, have certain areas which behave like kidney. We see in the structure of the Universe, collection of galaxies which behave like a heartbeat of the galaxy. In a way, when we look at the structure of the galaxies, and the structure of the body of the man, and the Unicose, all follow the same pattern. There is no difference, because Magnetic fields cannot interact any other way. It's not a car that you can put the engine from the back to the front, and put, God knows, something else, and it'll work. Fields, collection of fields, collection of plasmas which these fields make, automatically, due to the field strength and composition of the fields, and different strength of the fields, and totally due to size of the amalgamation of the fields, at the end have to create the same structure. If it reaches the dimension of the physicality, it manifests itself.

Galaxies, in a way, to the eye of the man we see in the Universe, which is about 5% of what we see, is created that way. Our Soul interacting with the field of this planet, at the start with the field of the womb of the mother, create a structure of a memory pack, where everything has to be kept and controlled. A place which keeps the engine going for the physical part. (:10) A place where rejects extra material, it absorbs from the environment. And a place where it grows and the rest of it. So, galaxies do the same. Galaxies start small and they grow to a size. They reach a point of maturity, like we do. Man's point of maturity and physical separation of his central energy, is 70, 80, 100 years. Galaxy is billions of years of the man. But in essence it's the same.

We always said, we eat 20% inside, and the other 80% comes from the environment, from Cosmic Rays and Earth Gravitational Magnetic fields. So do the galaxy. They take energy from the Universe. In the Unicose, our Universe takes energy from the Unicose. But, some of these energies cannot be absorbed, or it's not needed. But you have many organs, in the body of man you have 50, 60 organs. In the Universal systems like galaxies, you have billions of pieces which make organs, we call them each one a Solar System, a star and the rest of it.

When we understand this, this makes the journey of the transmutation, traveling between Universes, traveling between galaxies, traveling between Solar Systems, very interesting. In a way, if we realize the structure of the galaxy, or a star is part of another system, we

can hand over energy from one system to another. And if we learn these pathways, we can be part of that energy transfer. (:12) This is how man will learn to travel from galaxies to galaxies, Universes to Universes. If he chooses the path of the transportation or transmutation. What does this mean? It means you find high speed lines of connections, and you join those high speed connections. We know how to do it.

We know how to connect to these fast lines. We do it every night we dream, but we never understood. We are dreaming, what you call, your Soul is traveling. And you're having a wonderful time, you're on, God knows, a galaxy or somewhere, sitting on a beach, and suddenly mom says, "Wake up, you got to go to school." What do we do? We don't come back all the way. We jump on these fast routes, because we know where it comes. "Yes mom, I'm awake." This is what we know. We know the shortcuts and we can use these shortcuts to extend the, what we call, the speed and the dimension of the transmutation and transportation.

We see this quite regularly, but world of science has never understood this. We see this in different lines of connections. They call it supernovas. They call it all sorts of names. But they look at how this structure blows up, or whatever, according to them. But they don't look at the magnetic field strength produces and where does it go? (:14) We can create supernovas in our own transmutation and lock into a system. We see them but we only look at them on the eye of the matter state. We don't look at them in the eye of the fields. We don't look at them in the eye of how magnetic fields in the Universe interact. The dimension of our physicality has become an obstacle for us to concentrate to understand the dimension of the fields interactions.

What this means? It means when we look at the structure, when we look at the galaxy, when we look at the Universe, when we look at the structure of any system, even a man. We look at his physicality (P). What about if we learn to look at his Soul? What about if we learn to see what's inside it? To see the true man, through to see the real what we are dealing with. In the Space we have to do this, we come across fields which have no physical dimension. We have to interact with the, what we call, the physical interaction of the fields, the central fields of it, what we call, the Soul of it. We have to understand the emotion of it, has not taken the shape of physicality. Not at least in the dimension of our observation, but it exists.

This is part of what I taught years ago, now we come to it. (:16) We have to understand it now that we are at the point of transmutation. And then, if we understand this, then the whole world of science we've been taught, turns upside down. We are told, as I said earlier, what we see in galaxies and the Universes, and whatever, or what we see in the dimension of the, our Universe, galaxies, and we see them colliding, and the rest of it, and the total environment of these is about 5 or 10% of the Universe, and the rest is empty, become nonsense. Every empty space has a Soul. Every empty space in the Universe has a dimension (D).

And then we understand, due to our, again, physical dimension, if we don't see physically it doesn't exist, we find out that we have totally misunderstood the World of Creation. We

only see parts which are physical to our eye. And the rest of Space is empty space, according to our knowledge of today. But in fact, that empty space is not empty, is full of life. But has no manifestation of physicality in dimension of us. Those who can see, they have the field strength to observe their Universe in a different field strength, they see the Universe full. Is there empty space between your lung and your heart? Is there empty space between your organs? Is there empty space in your brain? And that's the physicality of the man. (:18) How can that be in a condition of the galaxies and the Universe? Then you understand, we still need to learn more.

And we have learned, or we try to learn to understand about this 5 or 10% which they tell us is the Universe and the rest is empty, to find out, to educate ourselves, what's in that other 90%. How do we interact with that 90%? Because, that's where most of the life of the Universe is. If we change the field strength of our Soul, would we see the empty parts as full? This will come to be a part of life of man in Space. In empty space we travel, is another life. In empty space we consider that there is nothing in the galaxy, or in the Universe, we are crossing another life. We're crossing another existence, we're crossing another field, magnetic field interactions. Just because we can't see, it does not mean that it doesn't exist. But, in the structure of the life of the man, the way we produce these glasses (Night Vision Glasses) that we can see, actually, the life in the dark, where we thought there is nothing, we can change the strength of our Soul, that the rest of the Universe become tangible to our existence. (:20)

Then, we respect the Universe, we respect the life in any corner of this Unicos with respect. Then, we understand where these extra energies, which we take from the Universe come from, which gives dimension of physicality to our physical life of man. There are no empty spaces in the Universe. And, once we learn this, once we understand this, we can amalgamate this knowledge with what we have, and then see how the whole structure works. Then we find out we have access to a knowledge which allows man to be able to travel, to move in any dimension in the Universe and Unicos. We have to learn this. We have to learn how to see the empty spaces of the Universe. How to feel them. How to interact with them. How to respect them. And then with that process we find new ways of movement, transmutation and transportation, in any dimension.

Mankind will learn this very quick. Now that we brought the dimension of transmutation for you, and many of you trying, and some of you succeed in different ways. (:22) You'll find that you can change the dimension of the strength of your Soul, that standing in front of even a mirror, you'll become invisible. But does it mean that when you reach that stage, that field strength, and the dog runs in the room, does it pass through you in a physical dimension? Doesn't see you? Is it aware of your existence? In the Space technology we achieve this. We change the fields. One second you see a craft, one second you don't see a craft, because we create a parallel strength field lines, even still in the same position. Man has such a capability, man has it within him, always has it, always had it, and now we have to learn that the field strength.

Many of you, which go through the transmutation, we'll start teaching you in the coming weeks. How you can change your manifestation, your presence, and still be within the

same environment. Those of you who managed to do it, because of the test of the last few weeks, we saw the graphs, (:24) we saw some of you are ready for that position of transmutation to elevate the Soul, that you don't need to travel, but you can be invisible to the eye of the man. Like the empty spaces of the galaxies, the empty space of the Universe. Just because we don't see in them, it doesn't mean nothing exists. This brings you a new dimension, a new understanding.

In so many ways, maybe you understand, when I speak sometimes, it shakes some of the world leaders, because when they sit in that room, they make that decision to do whatever, we are present. We are invisible. And this is the reason we decide, we know, we talk, we change. Because we know, we see the Soul in that meeting. We don't see the physicality. Because we are part of what we call, ?? non visual part of. Many times when we explain something in the teachings, directly to governments, those who sit in the seat of power are scared. How does he know? We are present at the level of the Soul, when that decision (was) made, in a way invisible. It's not just us who can do it. Every single one of you has a capability within the man.

The reason for it is very simple. When you transmute somewhere in a space, in the Universe, (:26) and many spaces, not just one specific point, the physical dimension of the physicality of the man has no dimension of visibility. But the Soul exists. So you do exist. Just because you have no dimension of physicality, it's not like Earth that you die because you have no physicality. Your field strength is not in the dimension of visibility, observation of the other. But, if we develop a system, which can see the field strength of the plasma packages, what we call, the Souls, we will see this Universe is jam-packed. So, we can see the Souls within their room, we can see the Souls in the dimension. We don't spy upon, we are present as part of the line of the thoughts. It's the connection line, it's fast track. Fast receiving of information, which man does not have. We know it, but we never understood it.

I have taught you in the past, how by changing your breathing, you can absorb energy from the Universe and live. You do that with addition of Gans's. Now you have to learn how to breathe with the field of the Universe. (:28) That 80% which comes in and you have no knowledge of. And what you want to take from it, according to the emotion. You strengthen the emotion of the travel, the expansion of the positioning. You position yourself. You increase the, what we call, absorption of the energy that can feed your physicality. You can do so. You extend the field emotion of repairing part of your body, because you want to keep the dimension of physicality, you (can) do so. This is the beauty of what, as Knowledge Seekers (KS), as the humanity, those who have a dimension of physicality can learn and add to their knowledge. I wonder once many of you learn this, many of you will ever see a car on the road. You learn to transmute direct, you do what you like. I go to the shopping center, I go to the shop, this is what I want. You manifest yourself, you don't steal, you pay with the dimension of physicality and then you move back. If you want to feed your dimension of physicality.

Now we understand, the science and technology of the Universe, is at the reach of every man. It's the man who has to understand how to connect to it. How to read the language,

how to read the field strength, (:30) to understand that in this environment, in this position in the Universe, there is life. It's a Being. Just because I don't see it, doesn't mean it doesn't exist. Then, once you understand this knowledge, once you understand this technology (T) of life of the Universe, transmutation and transportation becomes a game. It becomes part of your everyday life. Many of you Knowledge Seekers are ready for that position.

Many of you Knowledge Seekers are moving to that position. And once one of you learns and wishes to share, you can transfer the knowledge to those who want to receive it. Those who want to be with you as a part of you. We want to go to a wedding, four of you happy to go, one doesn't want to go. You know how to add the other three, and the four (doesn't) goes. You cannot force another Soul not to come, or to come. And then manifests at the point of wherever it's supposed to.

In structure, there is no difference between physical manifestation and a plasma manifestation. (:32) In structure, in the work of the magnetic fields, there is no difference. Because even if physicality is a collection of interaction of the fields, which coordinates a movement, so is the same with the Soul. You decide to go from the house to the office. And then the physicality has to make that move to get you there. Because you made the emotion of movement. You made the emotion of reaching a point. You can do the same with the emotion of the Soul. You can leave the physicality in bed, reach the energy of the Soul into the office, and do whatever it needs, manifests yourself there, and do the job and come back. You still exist in two places.

If some of you don't understand this, in the last week teaching I set the scene for this, that you understand. The body of the man has two halves, left and right. Now, the left is responsible to keep the manifestation of the physicality here, while the right is traveling somewhere. You dream. If you learn, if you understand, and if you are in control of it, you send that right side to the office. And in that office, the energy will transfer through the dimension of the Soul of the Physicality (STP), can manifest itself as a second .. you, (:34) in a way the right side will manifest itself, in a dimension of physicality in that time, place and position (TPP). This is a beauty with having a dimension of physicality, if you understand how you can use the energy fields with it at the same time. This is how people are seen in two places at the same time. Now you know the secret, there is no magic.

If you get good at it, you'll know which part to send best, for what job. When you are meeting with a lover, you are too lazy to move from the bed, you send the right side, because it controls the left side, which is with the emotion, and you are a perfect lover. When you are going to the office and the physical work to do, there is no emotion, you send the left side. Then, now you understand how it works, how you can manifest yourself in two places. But, you have to learn about that spike, that increase of the energy to reach a bandwidth of the field strength to be able to do it. This is one of the reasons man always wakes up to the physicality. If you understand the field extension, you don't need to. And both physicality's, one in the office and one in bed, still do a perfect job. (:36)

In this process you use the emotion, emotion of the Soul, which connects with the emotion of physicality. It is interesting in the other dimension to understand that those of you who have the beauty of being the "Beautiful People" (Schizophrenia), you can be in 4 places, or 6 places at the same time. Because each Soul has the capability of division of two. Now you understand, how this is important, because in the coming time, when you learn to transmute, you don't know what's going to be in planet Zeus, but you would like to try it, but you don't want to destroy the Soul you made, your Soul, your dimension of physicality. You control the side which is free to go, (to) planet Zeus, while you keep the physicality. This is what you do in the dream anyway. Now you understand the process of it.

There is a secret how to do this. And those who understand it, they can do it very rapidly. The secret behind it, is detachment. The secret behind it, is understanding the process of the working of your physicality. (:38) The secret of it is, to synchronize these together. And the secret behind it is, to use it, not to harm. You can't send the other half to start a war in another place. You can't send the other half to another place to steal. You can't send the other half to do something wrong. The right and left have to be in perfect harmony. "Thy shall not steal, thy shall not kill, thy shall not do anything wrong." Because, if you do something wrong in the other side, there is no return. The field strength changes.

And, to be able to do that separation, I have taught you a lot of things in pieces. And in the world of science we know these pieces, but we could never connect it. There is a gap, there is an instant that you can do it. You can create that instance, or you can bring that instance to harmony with the rest, and you can do what I call, the 'split.'. Your physicality goes to sleep, or cycle of 4 hours. You can change that. Your breathing lung and right lung has the same sequence. Your heart has the same sequence. (:40) Your intestines and the working of your physicality has that sequence. Your kidneys switch. You have to harmonize that all the sequences match, to the left or to the right, same time. You have to learn about your physiology. Which lung is at rest? Which lung is producing? Which lung is absorbing energies that during the working time, is not absorbing because it's absorbing a higher order or lower order? The switch time.

By creating a harmony in the Soul of the Man (STM), you can create the harmony between the two parts of the man, that one part of the man can separate. This is where the Soul feeds the physicality, and through its operation, controls the physicality. This is the reason, in the future man understands why you have two section of your brain. In a way, if you understand it, in the Soul dimension, you have the two section too. You have the fields which are going clockwise, and you have the fields which they go anti-clockwise. In the brain of the man, this separation of the two has become two hemispheres of the brain.

Once the scientists of the man look at the structure of the physicality, field flow within the brain, they will see two units, (:42) working totally in opposite to each other, in different sections, and move to a different sections, to harmonize, to keep the shape and the structure of the fields within the brain of the man, which they can interact with the

STM. This is not strange, this is not something which you don't see. As I said before, the Soul of our Solar System, the Sun, goes anti-clockwise, the Earth goes clockwise, the Moon goes anti-clockwise, but they all work within a system. Now you understand. If you can harmonize the field flow, if you can harmonize the manifestation of the fields together with the STM, you can split it into two halves. You have that privilege. In the future, I'll teach you more how to get to this.

Today, we seed the Soul, or we 'sow the seed' of the understanding. Understanding that you have that capability to be able to create that split, to create that separation, to create that dimension. This is important for those of you who go through transmutation. (:44) You like the dimension of physicality, you travel in a spacecraft, and you reach a point, you have a choice, you get in another craft to land, or you choose the dimension of what you call, dreaming while you are physically existing. In a way, you have to learn more about yourself. In a way, you have to understand why everything is in two parts.

In a way, you have to understand why you have only one intestine, but two kidneys. Because the digestion and absorption of the energy from the environment means one system, because once you have the Soul you can feed everything. But when you're in two parts, in two sections, each section has to operate on its own, to get rid of, to take what it needs, to control of. And then you understand more about how your field strength between two different parts creates a dynamic structure of your physicality. Why do you have two arms? Why do you have two legs? What happens with a worm, which is one straight body? No legs and no arm. How does the Soul and a combination structure of the brain works? For a worm or for a man? (:46)

Now you understand, in the World of Creation, we see it. But now you need to put two arms next to each other to create the man. Man has never looked in understanding of the field structure of the, what I call, animals with two arms and legs. And his own, and other animals. Now we understand even the structure of the physicality of the plants. How does their Soul works and why they shoot up as one stem and then they break up (into) branches. Once you understand the structure of the fields, once you understand the division of the fields, once you understand the emotion in respect to environment of the fields, then you understand man with his Soul and physicality, has many capabilities and capacities which he has not even explored. Sometimes those who learn a piece of it, understand part of it, to us looks like magic. But that's the same what any creature can do, you can do. Which means you have denied yourself to do it. But the knowledge is within you. And it's the same. Transmutation, transportation, all been has been with us. We move the body of the man in a bus. You move the STM to another part of the Universe through his field energy. (:48)

Once you learn this, how to control the fields, how to create the dimension of the motion in different part of the physicality, you'll learn transmutation by division, by in a way to be in two places at the same time. It's not magic. It's not something undoable, we always do it, but you call it a dream. When you go and see the mom, you see yourself running with mom, biking with mom. What happened? How did you give it the dimension of physicality with mom there? But your body is still here. That half of the Soul has moved

on. The other half has stayed. Now you have to learn it to do it in a dimension of physicality. Then you understand. We open a new dimension in transmutation of the man.

In a coming time, we build this in the systems on the Monthly sessions. That in those sessions you understand how to do this. Because you have two hemispheres in your brain and your physical part has two completely separate parts. And field replication is come part of this structure. Mirroring of physicality in two dimensions. You take half and the other half mirror itself, (:50) and you are physically two physical conditions, but connected internally through the dimension of the Soul, connection of the fields, rapid expansion of the fields. We're setting our systems up for this, in next couple of months. That gradually, we introduce this to those Knowledge Seekers, who do the transmutation. And then we test it, and then you test it, and then we understand, and I show you, in the graphs, how two Souls will create and move at the same time, in two different positions.

I hope you understood and I hope you understand what is to come and what capabilities you denied to yourself. Because when the other half moves in Space, you could be in the dimension of what you call it, the empty space, but there is a Soul. As you are in dimension of the Soul, you shall see it. You feel it, you interact with it. And at the same time, as when you're awake on this planet, you gain knowledge in that position in the ?? space. You gain knowledge from those who you meet, you interact with in the dimension of the STP. And when you bring that knowledge back, because it's connected to the dimension of physicality when you're asleep, you call it enlightenment. In fact, you have learned outside in another classroom, in another part of the Universe, something which on this planet we don't know.

At the same time, it's not exclusively you get enlightened. The knowledge you gained here, in that communication, that point with another Soul, you might enlighten that (one) too. Which means, that entity, that field, (:52) takes your experience in the dimension of physicality of the man on this planet. It's not all you taking it. Energies interact, and stronger always gives to the weaker. It's the same, the knowledge you have is given to another entity, because he hasn't got that knowledge. And you take from that, the knowledge you don't have, in return. And you wake up in the morning, you do something new, you do something, you come during the day, and say, "Oh, I know something, I want to do something." But you don't see that the enlightenment arrived last night, when you were asleep, when the other half traveled.

Now you understand. How much knowledge is not exclusivity, but (inclusiveness). It belongs to every entity in the Universe. It depends if you need it, you receive it. And now you understand why patent has no value. He cannot patent, because whatever knowledge a man has gained, is a man, is a knowledge which is shared with the Universe. Why does a man do this to himself, is unthinkable.

Maybe, now you understand the future teaching. How we expand the knowledge, expand the interaction of the fields, but your dilemma is, and it will be till we sort it out, how you connect the emotion of the physicality with the emotion of the Soul. And when you understand that, then you can transmute and be in the dimension of physicality at both

times, in the same place, but understanding and gaining information and knowledge and whatever emotion, (:54) collectively for the whole of the entity. I hope you learned something today, and I hope if you understand what I understand from this, and I live by it, it brings a huge pleasures in the life of physicality. We go through a short break and come back, and try to answer any questions you might have.

>> **BREAK** >> 555 KSW September 12, 2024 (:59).

K- Thank you very much. Not much to say, just... This week, Keshe Foundation will introduce two more part of what we call, the Twin systems. One is for sleep and one is for migraine. They'll be published very soon. (1:00) Those of you who have a problem with whatever of these two and the others, what you call, you can try and see and let us know what it is.

Something very interesting which we see with this, what we had the promotional videos. If you remember, we, Keshe Foundation, promotes ourselves field replication systems, or Alkalizers. When you have the twin systems, if you put them in... immerse the bottles even in a container, in a water, immerse them in, or put them on two sides of a glass, with the water in (side). Then, you can use the water in the glass, which creates a balanced field energy of the fields of the two bottles. And it's a replication unit, more or less, it's what we call as part of the, what we call, field transfer. And you'll find a totally different experience. When you receive them, they should be shipped out in next week or so. Then you will understand, not only you can bring a new dimension, by using the two, two bottles, placing them outside a glass bottle, or inside a water cup, if you can do it. If you can accommodate them to be more ?? and in a good distance from each other. And then it brings you a new dimension. You'll feel it, you'll understand what it means. (1:02) These Twin systems are not just for what's in it, it's what's interact between it. Which produces the same interaction between part of the body, but this time you can do a lot of other things with it. If you use it in the, what you call, I suppose, the promoters, in the Alkalizers, and the field replication, that water has the properties which contains within, but in a balanced way, because it's balanced between the two, and then you create a new dimension inside.

We are building up towards a full transmutation unit, and a full connection. And in this process, we gradually move away from what we call, the units in Germany, and to centralize in the new system which we developed with, as we heard last week in one of the Knowledge Seekers (testimonial), it's effectiveness of it. As the old systems more or less become obsolete. They've reached their point of, what we call, use, as the new technology has overtaken over. And we'll see a new dimension in transmutation and, what you call, in the Wellness application. Where we feed through the systems and our doctors will go towards more handling new cases and new conditions in the Wellness process. And as we said, cases like cancers and things they're looking at, new versions of applying for Parkinson's and others, is under, what we call, in the vision of work. And anyone who wants to work with them or would like to take the, what you call, advice, you can contact the same way, (1:04) to expand this horizon of the knowledge.

In the coming weeks, we will expand the knowledge of the transmutation, in a very different way, and we will ask for a specific, what we call, people to join us in this, what we call, transmutation, transportation. And, in a way, those of you who are part of what we call, 'Soul Satellites,' will come into operation gradually in this process, as we try to expand. And we will come in touch with you to join us for what you signed yourself into, to run a few sessions and then you'll understand the process of how we bring now the knowledge to a certain point, those who are Satellites to come into what we call, what you set yourself for, and become part of it.

There is one thing which I would like the Knowledge Seekers through the elevation of the Soul of Totality of the Keshe Foundation, is to support us in what Keshe Foundation has endeavored in the past few weeks, to create a new phase in the World Peace, and to create a new structure, that sets up to, what I call, gradually to become One Nation. This process started and it needs a lot of, what I call, support in dimension of the Soul. And, if we all wish for the peace, and what we have in the world, we can start creating the environment of the peace, and the next phase for World Peace. (1:06) And, all you need to do is to, in a way, concentrate to help to be there, when it's needed, not in a physical way, that we get the elevation of the world leader's Soul to bring that final phase in.

Mankind is ready for that phase. And now we have to bring that religious part to the end, which we have started, and we need that help to be there, that the Soul of Humanity goes for it. And in a way, the World Peace, in the totality, as a whole, ending of the war between the religions, we have started. And I hope we succeed this time, in a beautiful way. And you will understand it as it comes, as it takes shapes, and as Keshe Foundation become part of this structure.

Any questions?

R: Okay, thank you Mr. Keshe. There was a question about the Twinity Gans from Andreas in our Q&A, who asks...

Q: It can be used by women who, during pregnancy...

K- No.

R: No, okay.

K- No, no, because it's not your right to touch another Soul. When you're pregnant you are trusted with another Soul. That Soul can decide in the future itself.

Q: ... (1:08) Mr. Keshe you have mentioned numerous times, our Sun has a twin star. That twin star is in a galaxy that is twinned with ours, somewhere in this universe. The twin star has a Solar System, twinned with our Solar System, and if so, there must be a planet in that twin solar system, able to sustain matter state human physicality as we have here on blue planet Earth. But presently there are no humans on that planet, are there? It is currently a redundant planet regarding the matter state human physicality. Is that correct?

K- No. In a way, just because we have a star, which is twinned with us, is like, it has to be inside gravity and magnetic field, it does not mean the internal structure is the same. Not at all. You've got to understand, we see that, for example, in the structure of this Solar System, We have different planets moving in different dimensions and directions with their own moves. The twin star of the Sun has the same structure. It's part of the structure of the Universe. (1:10) Part of the structure of his galaxy. And it has a pattern of movement. We look at, let's say Mars, or we look at, let's say Jupiter, and we see these two move in different dimension and directions, and every so often they come to the same position, or all line up, all in one straight line, it says every 200 years all these stars line up in one line, and create this and that.

Our Solar System is very much like this, but in the dimension in the galaxy. This is the reason that they come together so many billion years, it just takes time to come to the same position. But, does not mean they have the same internal structure. At all. None whatsoever. And, we... we have mapped the movement of our, what you call, planetary system in this Solar System, where they go and how they come together and how many years they will be in the same position, different stars or different planets or whatever, the whole thing applies to a galaxy. And this is why the other Solar System, which is twin with us, is moving in the galaxial dimension. It has its own dimension interaction. And then it comes back to a point. What is interesting, I raised this question before...

Q: Just quickly Mr. Keshe. When our Solar System aligns, and all our planets are in a straight line, (1:12) is that the same as our twin Solar System as well? Do they align at the same time?

K- Not necessarily. No, no.

Q: ... Please continue.

K- What happens when, let's say an accident happen, which is very common in the galaxies. Things move, it's like a bullet coming into a body of the man and it moves

something. What happen if a half twin star comes in collision with another planetary system, with another structure in the galaxy, galaxy of itself, which happens quite often? What would happen to our system?

Q: Emotionally we'd feel it?

K- The combination of physical manifestation of this, we will see total change in the position, field strength of our Solar System. We will see the horizon totally changing. Not the horizon of our Solar System, but the horizon of our stars. We will get a different, what we call, star formations, the way we see it now. Are the star formations we see now, is connected how our twin system is moving with us. If that twin system is not there, gets destroyed, we have to lock in. The system has to find a new position, a new condition. This is when we'll know that we lost all our, what we call, twin star, has come into a new dimension. (1:14)

This is not something which is impossible, it happens as day and night. Matters in the Universe collide. We've been lucky for past billions of years, our Solar System, with its twin, has not, or what you call it, have not been part of this. But it's inevitable, one day will happen. It could be a billion years down the line, it could be tomorrow. But, the only time we know something has happened to our twin system, is when our, what we call, horizon, our skyline, position of the stars, totally changes rapidly. We see new setting, we see new, what we call, what we call, all these things (star constellations) we've given a name, different formations, might not even exist anymore. Because...

Q: You mean the constellations?

K- From our point of view, yes, from our point of view, because we moved to a new position. And the system is very... the galaxial systems, like our Solar System in the galaxy, are very vulnerable to this. Very vulnerable. When we see it, our scientists made a lot of observations. Our twin star is a 'loose bullet,' rotating in the field of the galaxy, as we are a loose bullet. But, this loose bullet, it has connectionz, it has a balance, which balances itself in interaction with other Solar Systems. When you see, when you look at our solar system in the planetary system, in this galaxy, our position is fixed. (1:16) Because everybody. It's like, you know, you go on these big carousels, you're hanging off a chain, like about 10 meter from the top, but it's a hundred of you, you're all rotating around, but your position is fixed. We're exactly on that carousel. But we are in the carousel of the galaxy. Every position is fixed. How and who and where it comes. But with the difference that these chains hanging with a chair at the bottom, you sit in these carousels, have the control of their own movement in respect to the others. Because if they move, the other ones have to move. So nothing internally is the same, because they absorb different energy in different parts, they release different energy in other parts. We are due for a meeting with our twin star. We come close to each other very soon.

Q: Really?

K- In 2,000 years. We do that every time regularly. We know that. Now the knowledge has reached that point. Now we see it. We know it. So every time...

Q: Does that have anything to do with what is known as the Galactic Year?

K- In a way, yes. In a way, no. But in a way, the combination of the fields pressurizing each other, they come close and they go away. It's a pool of attraction and repulsion. And this is something which you will understand in a very short time in teachings as we come to it, we explain more.

Any other question? (1:18)

R: Thank you, Dmitry. Alright. Well, perhaps we can get into this idea of the spider web, that I'd like to correlate with Black Holes. And then we can look at your paper, "The Creation of Black Holes" and the question that relates to that. So, how about we have a look at the a video that Gianni put together. And just a second here while I get things lined up. a video that Gianni put together, And it's a time-lapse video of the creation of a spider web by a spider. I'm so bad at sharing this, there we go. And it's a minute long, the video is a minute long, but it covers, I believe, several hours of web-making. And I just like people to note a couple of things. One is that the spider goes in a clockwise rotation, and then goes into a counter-clockwise rotation. And that's quite interesting, you see a transition there, and there's apparently a good reason for that, having to do with the structure, a more stable structure with

K- I think you better show it twice, that maybe people miss it the first time.

R: Yeah, that's a good idea. Let's watch it and then we can go through the details after. Okay, here we go. (1:20)

<< Plays video >>

R: Okay, so that's it and perhaps we can go through again here. I know that the beginning, if we look at this formation, it looks like a star. You have lines coming straight out, like rays of light, basically. And, when we look into the nature of the silk that the spider makes, It's actually a conductor of light, and a very interesting material, in terms of what it what it can do. Okay, let me just play it through again here. Also, at the very beginning, it's very quick, but you'll see the spider splitting the difference between these rays of light here, to make each one symmetrical, according to its neighbor, equal gap in them, it's quite amazing technological feat. (1:22) See, he just split it there and created that extra piece. First clockwise, now counter-clockwise. And the small the smaller the circle gets, the faster he's going. And I'm starting to wonder, maybe this is the way galaxies are created.

Q: It's the same as Universal clusters rotating around the Creator, they're getting closer and closer to the center, the Creator.

R: So here's the actual picture of the same spider web, in the light of the day apparently, that creates this incredible splitting of the light into the rainbow colors, essentially. And it, again it has to do with the types of protein in the Silk, that reflect the light in certain frequencies. So, in a way the spider is capturing light, And also, all the vibrations, we're reading how spiders are so sensitive, each of its legs are attached to the vibrations of different parts of the web. And the web, each string of each section, between each of these rays, has a certain vibrational frequency, apparently. (1:24) And that spider knows each one of those, each one of those quite intimately, and knows when something is stuck in it.

So, that's all very nice in itself, in the way the spider creates its web and so on. But I'm trying to relate that, and if you look back at our background image for today. We have a spider web in Space, so I'm trying to relate that to Black Holes in particular. Now, if we go to Mr. Keshe's paper in the KF Wikipedia, in It was an article in the KF plasma Times actually, in December 2018, the creation of Black Holes, and it was released back in, what March 12th of 2006, I think it is.

So, Mark had a question regarding this, and we were looking at that question in the Keshe Plasma Reactor Group yesterday. So, the question comes up here, Mr. Keshe discusses, you know, Black Holes, and there's a lovely picture as well here, of the coming together of two systems to create the Black Hole. And that's described in the in the actual text here as well. And, let me just get into the area that we wanted to look at. (1:26) Let me see, it's close here. There's a lot in this article, he's Mr. Keshe has gone quite thorough, and discussed it. I'm just trying to find the part. Okay, it's right around here, I think. Okay. There was a part that mentions about the Black Hole being like a predator. I've actually clipped it out and I can show it here, basically is part of the question.

The part in your paper Mr. Keshe was, "As the Black Hole grows bigger and its Gravitational forces take over, then a Black Hole becomes a predator for parts of its galaxy. They become vast eating machines of the debris and stars and planets, and this is exactly what is to be expected of them. The Black Holes originally created totally by chance, there are no patterns in their creation. There's simply a creation or an outcome of natural interaction between two or more passive magnetic fields or matters in motion within the galaxy or the Universe." (1:28)

So, part of Mark's question is, the idea that you've talked about the Universe or Space being a peaceful place, where we don't have the stealing of energies and what not. The things that we have on Earth and with humans.

Q: So, in the process of the Black Hole's growth, is it not, or is it consuming Souls? It's consuming, for example, a star, is it? We are told, or maybe we sense that a star has a Soul. So, if this star is getting sucked into a Black Hole, what happens to the Soul of that star? And, why are Black Holes allowed to consume Souls, if it is a peaceful Universe? (I guess that's the bottom line).

K- This goes back to humanity, doesn't it?

R: Well, it's always our perception of things. Yes.

K- We think once the physical part added to is consumed by. We don't look at it, that it becomes part of.

R: Well, I was going to say, is a Black Hole a transmutation device, in effect? So, it separates the Soul from the physicality?

K- Not really. Still is in the same dimension. It's a bigger soup.

R: Okay.

K- It's a bigger soup with more fields added to. (1:30) It's like, put it this way, you know? It's like having a herd of one type of animals, but another herd inside it. There is still two different animals, but they're running in the same path. They keep, in essence, we this is the beauty with plasma, understanding of interaction of magnetic fields. The same of the same, all come together, the same when it comes to that point of the plasma.

But, the same what does this mean? This means that, let's say if you have a let's give it a strength 9, 10, 20 and 100. When you bring, let's say, a star, which has 2 of the 10 and 4 of the 5, that 2 of the 10 goes into the 10 strength, 2 added to that, and 5. They don't disappear. They strengthen that structure. When the next comes with 5 times of the 10, it'll add to that 2. So, the whole structure gets stronger. And this is the beauty with the plasma. You don't steal, you add yourself, an addition to what is there. And at the same time, it reaches a point that this, let's say this, ?? twenty of 10 strength, they receive another 5, they need a space for. So they open up, they open the space gap between the other fields. And this gives the expansion or increasing the size of the, what you call, the Black Hole. But, this Black Hole, at the same time as it's the fields, with other stars coming in, interacts. (1:32) And that interaction, creates a combination of releasing fields out. Because I don't have more than, more space than 20. Now I receive two more, I have to give out. And that becomes a source of the creation, what comes out, that it becomes another creation of a star in that galaxy. I bring everything in, and in amalgamation of what you bring in, I have more, which I don't need, and I become the source of life. I radiate at higher strength, because the lower strengths are already built up, structured.

And this is the beauty with the Black Holes, this is why we don't see immediately life around them, but the field they release in the galaxy, in a further distances, as these strengths slow down, lead to creation of new life, new stars, new cycle. They don't get a squeeze. They release, there's a size to of the accommodating fields together, because if you have 20 of 10, it has to accommodate five of the strength one. If strength one comes in, that extra has to find itself in field strength, in the dimension of releasing out to make accommodation for the next one. It's packing it together, and how you pack it.

We show this very clearly, if you understand it, in some of the teaching, in testing, we show this. And this is the whole structure of building an aircraft (spacecraft), by fields.

(1:34) We pack enough fields into the middle, that the middle becomes like a Black Hole. And then that Black Hole, in expanding out, releasing its fields, creates a physical dimension of the craft. Or, we create a very high intention of fields in the center, and in adding in to the top of it, we create manifestation of the physicality.

It's like you create a light, laser light, and then you spread smoke on the top, and then you see the laser beams. If you've seen that, this is how most of the large scale flying objects in the Universe are created. There is no aircraft hangars, two, three kilometers wide, when we build this craft. Once you create the physical structure...

When you look at in creating, you create a Black Hole in the center. And you create a condition of radiating fields. Then you create a condition of a different strength fields, which you interact, you create condition for this to interact with these fields. And this condition creates the shape of the craft. (1:36) That's how you build Spaceships in kilometers diameter. You strengthen the central line. You strengthen the central field force in the center. And then you introduce fields in the surrounding. And you build the first layer. And that, according to that field strength, and its connection to the center, gives you the shape. And then you want to make divisions. You want to make, let's say, a hall or a space. You create, again, that in this environment. You want different shape of a space. You create that environment there. Because these fields you create are connected to the field strength. It's very much like the spider, what we saw in the spider web.

R: I was just going to mention that. Your drawing is starting to look like the spider web.

K- This is how it works. We have developed this system, sits in Keshe Foundation laboratories now. It's not something to be done. We create a field pressure in the center, and we introduce additional fields, which with the interaction with this, we see the structure built. This is how you build UFOs. You don't get a aluminum sheets and panels and screw them, the way you do with aircrafts. Doesn't exist in the Universe. This is what Keshe Foundation laboratories are working on. This is what it will come out to be seen. This is what will be shown in Iran.

We create a central field force. And that central field force, then we introduce materials of field forces, which are made of and are part of. And that interaction with the central will create that spider web. (1:38) And depending on where we introduce this additional field, give us the shape. Because it's away from the bottom, so the bottom has to be closer. It creates the shape of the UFO. This is how the Spaceships are made.

And then you create walls. Read it in the patents, I especially put this in the patents, creating walls, separation, and partitions. You introduce different field strength, different material, but it's still connected to the center fields, to the Black Hole. We absorb all the fields in, we create that condition of the central field, and by expanding, we interact with it, we decide where we want to interact with. If we put it here, we interact with the fields here, where the center is here. If we decide to put our fields interaction here, we get a bigger spacecraft.

This system is on the table, it's getting tested. And, in some tests, our research people see, it's like, because it's the first phase, they see like a steam coming up. Because it's the beginning of the manifestation, and the steam with the field forces will bend, and will start making the shape. Our technology, at the moment, they see the steam's coming up, the field's getting built up. (1:40) And then we dictate, where we hit it, we hit it, but don't forget this is dynamic. And in dynamic structure of this, with the fields we introduce, in a way, will give you the shape. We create that Black Hole. Creation of development of the UFOs, what you call UFOs, I call transportation in dimension of the fields. Because, don't forget...

<< Mr. Keshe tries to open the whiteboard >>

I never learned how to do this. Let me see how I'm going to do this. I want to make it blue. It's not that hard to use this. God help us. Okay. Oh, that's what it does. Send something new.

You have to understand, to create this dimension of the shape of a UFO, it's the same as when you land on the Moon. You still have your craft. Now you want to go for to see how the Moon feels like walking on the surface. You expand the fields of the system to that dimension. Then, when you're on the surface of the Moon, above you have a protection. But because your aircraft (spacecraft) is sitting on the ground, you have the field force underneath the ground too, to make that shape of UFO. So you walk on the surface as you're in the Earth's atmospheric. It's not making a dome only on the top. It's creating a field underneath too, that on the surface you stand, you have the field strength, magnetic field strength, of the gravitational field if the Earth. (1:42) That's how it works. It's not just making a dome, making a dome cover. You make it the same as we saw, and then a field underneath of it.

It's just different understanding of the use of the same principle. In the crafts, which is now, it's lined up to be shown in Iran, you will see this, we bring a suitcase. And this suitcase, we'll create different field strength on it. And this field strength, with what we dictate, will create the shape. Because this point of introduction of this is different than this one, so to close the gap, it has to connect. So, through its dynamic system, you get the shape of UFO. But this system inside it, sits a Soul, because it's a field interaction.

We do the same on the Moon. When we go on the Moon, now this space, the green one, becomes this. I can't find the right color that we can show in this. It becomes this. And now we introduce another point of interaction. We increase the dome. But you still have the bottom half to it. Now this space has come to this. And now this new space is created from there. This is how you increase your dome size in Space. (1:44) That here you can have Gravitational Magnetic field of 1G, that man can exist in it, can live on the Moon. Here, outside the boundary, you hop and jump, like a rabbit you do on the Moon. Here you live, atmospheric condition. You don't need to wear a Space suit. We don't wear a space suit when we are in the aircraft, do we? We travel. Now we create the same condition. Here we create magnetic field 1G. But because this is in a dynamic rotation, because of its central Black Hole, does not matter what speed this goes. This is the entity

itself. You are that water in the bowl. Doesn't matter how fast that bowl goes, you're still the water inside it.

And understanding the paper of the Black Hole is the same as when I published the first book, "The Universal Order of Creation of Matter." The most important part is release first. The most important part of any traveling system, any system existence, even within your own Soul, there is a Black Hole. That's why you absorb fields. It has a gravity which decides what is absorbed. There is no entity in the Universe which does not have a center, which we call the creation of Soul of the Creator, if you want to call it, that has the capability to absorb all the fields of the Universe, interact with, and the interaction of it on a feedback, becomes manifestation of physicality of it. (1:46) Because, it does not come a field does not come out like this, A field from the center comes out like this. Because once it's out, the magnetic field flow, winds will force it to, and then it pushes it to. And this is the beauty of it.

And what we see is that this principle follows, this structure follows. And what we see, it's important for us to understand, is the principle of the existence. When a field gets to its position, and leads to its expansion, or repulsion, it does not go out straight. Is in the wind flow of the magnetic fields of the Universe. In the Universe has a dimensional field flow. You don't go this way. Your motion on expansion is circular. And that's why plasmas are always dynamic. Because the external fields which are in motion, force this interaction, force this dimensional direction of field forces.

A Black Hole is the center of life. It has to absorb to give. It receives totality, whatever it is, and then in what it doesn't need, it releases. And what it releases in interaction with the environment becomes the manifestation of life. (1:48) That's how it works. And depending on what field the strength is, there is a creation of a solar system here, another Solar System there, a galaxy in the Universe, or your eye or your leg in the body of the man.

If you look, I always said, this is a beautiful understanding of it, if you understand it. The body of the man is like two chopsticks hinged together (2 sticks crossing each other). And in that process, the hinging (center) comes through what we call, the STM. You build this side of the brain with this side of the body, this side of the brain with this side of the body. In the Soul, this is why, when you expand the STM, you get what we call, the physicality of the man.

This, if you look at the brain of the man, and the physicality of the man, The position, the shape of the two half of the brain, and their position from the center of Soul, dictates the height and the shape of the man and his structure. If you put brain of the people of the same height, the same behavior, together, you see they creates the same physicality. (1:50) Because, it has to balance of, you're on a ... You know when you go to a park, you sit on a seesaw, what you put here dictates your distance, you come up and down, and how it shapes. That seesaw is turned the side way (?? center point), is the STM. What you put in here (on one side), you get the expansion here (the other side), and depends how it moves. And it's got the limitation, because it's got other half. This is why the people of

the same shape, same type, same thing, have the same characteristics, because that's how the field ?? works.

The position of the fields of the brain decides your eyes, your behavior, your trust, your emotion. And that all comes down to where this Black Hole was created, how this Black Hole in the STM was created. Because, when it absorbs from the womb of the mother, and then it dictates what gives out, and it starts shaping the man.

Any other question?

R: Thank you very much for that Mr. Keshe, quite interesting.

K- change your screen

Q: ... (1:52) You told us, that when we hear a voice, we are dealing with the matter state. And she's wondering how sounds can be used, specifically, what kind of sounds and what frequency do we have to make, in order to create a match between both Souls, the STM and the STP, and then create peace in our physical structure. How can we work with the uvula in the throat, which is related to the STM?

K- Fields in interacting always makes noise. That's part of it, the way they make particles. They make fields which is audible to the ear of the man or other creatures in the Universe according to the strength. And the interaction of the STM with the STP of man, that separation of it, is heard by the owls very clearly. We know that by experience, we know that by tests.

That, that separation of two fields is like... How I described it once, maybe it's the easiest way to describe, is you bunch a piece of paper into a ball. And then bunch another bigger piece of paper and wrap it around this ball, in a way make a ball from the paper, (1:54) and then wrap another piece of paper around this ball. Then, you try to open the outer ball, the paper, away from the center, it makes noise. Sometimes it's the noise of the paper itself, sometimes it's the noise with separation of the inner paper ball with the outer paper ball, because it has to let it go and it cracks. And this is what happens exactly to your Soul and STP. And this separation of the noise, is heard by the owls.

And it like, it's just something, it bothers them, and makes them to sing, or makes them to make noise. It's like, you know, "Don't make noise, my ear hurts." And it's the shouting because of the noise which is created. That separation field strength of the STM, Magnetic fields from the STP of the man, is physical. It's literally physical. And if you, if the scientists understand and they build a system the way the fields of an owl, hears it through the Soul level, that it transfers to the physical, emotional understanding of it, and the scientists put an owl on the observation near a man who is separating the STP (from) the Soul, they can monitor it, they will see it.

In a way, in the hospitals, now we see the heartbeat stops, but the Soul could still be in it. (1:56) In the future, when the knowledge of the man expands to understand this, you make a monitor, you see the Soul is still here, we can save the body. Because the same as

heartbeat gives you that frequency, the Soul has that frequency. We don't see it. The Soul is still within the body. We can revive it. We can bring it back. And we work on the Soul than the heartbeat. We can expand the Soul to create the heartbeat, the whole science of the medicine for the physicality of the man will change. When we feed the Soul, maybe the Soul has decided, wants to leave the physicality, they can't interact.

And this is part of why we are living longer. Why we survive longer time, because we have managed to increase this field separation. And this is part of it. And if you're aware of this knowledge, you can understand, even in a way, know the point of your departure. At what age you die, at what age your separation will come. Or do you want to expand it? Once the world of science, and it's very easy to do. I've said that many times, but scientists don't understand, one day somebody will do it. You have to find a match, to find the separation. We can do it scientifically and find it. You get an owl, put it there and see how it reacts in the Soul, (1:58) why it starts singing, at what frequency, whatever, as the STP is separated from the STM, and it makes that opening of the paper. And he hears it, it's like the whistle of the dog, when we do a dog whistle, we don't hear it, but the dog does. It's more or less the same.

But this time, the noise is not heard by the ear of the owl. It's heard by the Soul of the owl, which converts into the emotion of the physicality, and it makes it to sing. Because if it would have heard it in the ear directly, (the owl) would have flown away. It's like (hearing) a shotgun, it would have flown away.

And in one of the teachings years ago, I explained this with our next door neighbor. And if you live in an area where the owls live, in not in the cities, but in the outskirts, you always know if somebody has died, if you're wise to it. And they have a habit of sitting on the house, sitting in the area where it is, they don't fly away. Till the noise is completed, till the separation, when the separation is completed, they go. It's like they need that. It's like it gives them something, or it has an essence of a source for them.

Years ago, when we used to live in Belgium, our neighbor passed away about one, two o'clock in the morning. And I said, the guy has died. And in the morning, we were told, yes, he passed away during that time. (2:00) It's not that ???. Everything has to say goodbye. We are wrapping. We're going. And you put it that way. And if you're aware of the strength of the Soul and STP, it's like I told you,

I know exactly when I will separate from my physicality. I know the time, the shape, the space of it and the time of it. Because we understand the work of the physical life.

Any other question?

Q: ... Hello Mr. Keshe, if the Sun, Moon and man's Soul, Souls rotate in the same directions, but Earth rotates in the opposite direction, so, is it that Earth must be the top reactor?

R: I think he's thinking of the tetrahedral configuration.

K- Oh my God. No, it's not.

Q: ... Will transportation systems be equipped with plasma feeding, so that the passengers can live inside whilst traveling?

K- It's part of its construction. We said many times before, we won't carry any food, because the energy transfer comes from within the structure.

R: I'd like to show the video of an agricultural video from Gianni, (2:02) that we looked at in the testimonials meeting. Would that be okay now?

K- Yeah, go ahead, go ahead. Explain where it is, what it is, before you show. Can you give us a background to it?

R: As far as I remember, and someone could correct me if I'm wrong, I believe this is in Romania. And Gianni is in contact with actually a number of farmers in that area. And this particular farmer has a 300 hectare area of sunflowers. And they've had quite a drought situation in Romania, I think Gianni said, two and a half months without rain. But they did use Gans to start, Gans water to soak the seeds, a special brew of Gans water to soak the seeds when they were started. And they applied Gans water once to the crop. So, this is what we get from it, and Johnny will explain some of that with John Wells doing a translation. So, we can have a look at that. And then we, we will see what happened to the neighbor's crop that used chemical fertilizers. Attempted I say, should say, to use chemical fertilizers on the same crop, same type of crop. Okay, here we go. Here you can see, this also happened here, where you can see the production of sunflower.

<< Plays the video >> (2:04)

K- ... (2:10) We see this a lot. And you can increase the harvest as much as you can create condition of moisture. This Gans technology once understood and used properly by farmers, droughts and rain will not make much difference to them. And they create their own moisture, because they get their moisture, they get their fields from the environment, not from the ground. That's the reason you see this. And the more we come wiser to it, the more we see. (2:12)

In a way, the answer was in the first few sentences. Which he said, "We soaked the seed, so we've created one climate underground, and we only watered it once." So now you create the opposite side, the counterpart, the twin side. And these two, with the seed on the ground, and the first, what do you call it, water, the first Gans water, you have created the separation of the fields. And that's why you have this, you have to understand the principle behind it. This is how we create water in our systems. We create two different, which the two different balance fields, creates moisture and water. Because you're creating Carbon and you're creating Hydrogen. And in a position when there's an extra Carbon or extra Hydrogen with a Carbon, it creates the O, which again with the

interaction of the same Hydrogen, same container, it creates water. This is how water is produced. And these systems now lock into the Universal Energy, they get there what they need and the process of how much they have to go, and what they need to make is in the DNA of the environment of the seed.

This is important for our agricultural people because I explained this in a way in the Sanya conference. You soak the seed and you plant these seeds. (2:14) You have created one part of the process. It has no Twinity, it has nothing to interact with. The rest of the fields are here, interacts in horizontal way. When you let the plant to grow, and you water it at this stage of growth, now you have created a different environment with the new water. The interaction of the fields between the two, now creates a horizontal, emotional, what you call it, vertical movement. And this, with itself, interacts fields and energies from the Space. The moisture is in there, now you create it here. So, the system becomes self-sustaining. The taller this grows, the taller this grows, the more environmental moisture.

But the DNA inside the seed, original seed, dictates, this is the point, now you flower. And because they sprayed their fields, now this guy sits on top of a huge fountain. If with, if these people would have sprayed a second time, when the heads were created at the small position, you would have found, if this is the size of the sunflower seed head, it would have been this size (bigger). (2:16) But then, the body has to support it.

If you have a normal agricultural condition, you soak the seed, or you put Gans water on the ground, when it grows, you water it once. And then when it comes to the seeding (?? when the flowers start coming out), at the point of the seeding, you water once more. You increase the harvest. You don't increase the harvest when you put it here. The harvest is increased at a point of the seed production increase. You increase, here you increase the growth, you create a water moisture. Here, you increase the protein, which increases the weight and the size. You don't need to keep on watering it all the time.

And secondly, the water processing of the Gans's is obsolete now, with the use of a total different technology. It's nice to see, it's fantastic, it proves the concept. And especially in such a huge land, as many of you know, in Western Europe, Eastern Europe especially, were hit with a very high temperatures this year. Droughts and high temperatures are common ground, very common. And this has created a massive problem for the farmers.

This first watering, after the seeds are about 10-15 centimeters high, set the scene for any drought, you create a water, moisture condition. (2:18) And then, the second watering at the point of the when the, when the seeds are grown, or when the seeds come out, before, at that point, you water again, you create, change the condition, You have to change, it cannot be the same (Gans) water, it's a specific way to do it. Then you change the harvest. If you have a fertile land, there is enough rain, you don't need to do this second, first rain water. You just do once, at the point of the, when the crown seeds are set. You double, you triple the harvest. We've shown that in China.

And watering now, when you have hectares, is too cumbersome. Too cumbersome, too expensive. Now with the new technology we developed doesn't need this. But it's good, it's nice to see the proof of concept. And it helps, it's you can see the farmer next door, and this farmer is a life and, what you call it, bankruptcy for farmers. In Eastern Europe, especially in the small farming lands have died. Because they used to be communal farming, and a lot of people in Romania, Czech Republic, in Bulgaria and the rest, they went to the West, they went to Europe, to earn better life. And these plot of lands which were given to the families, 2,000 here, 5,000 there, 10,000 there, (2:20) has no one to farm. Because the parents are old, they cannot farm it. So, they have a structure, they're collective farming. Which means, a company takes over your land, you still own the land, and you share, you get the share of the harvest. And in some cases it's criminal, what they do. I've seen that very recently, in one of these Eastern countries, where from a, God knows, few thousand land, they were given rotten corn (seeds) from two or three years ago. It's a lot of cheating, and dishonesty goes on with it. But, collecting, harvesting, like communist time, has come back, but on the, what you call it, on the banner of commercialization, and democracy. The farmers get hardly anything too, and the families don't care, because they're earning money in the East and in the West, and they get, they have sack of rice for it, they are happy with it. But it's come back, collective farming in the Eastern blocks, in a very big way.

And it's nice to see, because this bring a change. This can protect, nobody knows, at the beginning of the summer, especially farmers now, they have more knowledge about how the weather, how bad, how dry it's going to be. And if you do this first watering, you buy yourself an insurance policy. But the new technology, you literally don't need to sow the seed. Thank you very much, it was enlightening. (2:22)

Q: ... Good morning Mr. Keshe, my name is Jefferson Modesto, I'm from Brazil. Thank you very much for your presence among us. My question is, what emotions damage the heart, and what can we do to restore it, using our Soul or plasma science?

K- ?? The heart being damaged nowadays comes through our physicality in what we consume. Our heart emotion, with what we call, a heart attack, comes what we call, stress. It usually comes from attachments, and unwanted detachments (losses). And when we cannot handle the emotion of physicality. But sometimes, sort out physicality cannot handle the physical condition. We call it the heart attack, it happens, which you cannot do much, is usually very rapid. But on the other hand, you can strengthen the STP to create a condition that the heart can operate in. (2:24)

Heart is a magnetic field creator. And when its fields interaction with the field of the STP don't match, it releases like a spark, or what we call, a heart attack. And you need to expand the STM to the STP that in interaction with the heart, magnetic field of the heart, it can absorb. Or it does not release its energy to the dimension of physicality. Look at what's the reason for heart attacks. And then you see when the heart attacks come in. You understand how easily, through elevation of the STP, you can absorb the physical tensions and don't put the pressure on the physical dimension of the heart.

In a way, a heart attack is when magnetic fields of the fluid inside it, which is the blood, get mixed up and they cannot interact and handle each other. And they interact with the STP and they have to release that energy, which, in a way, energy state conversion to the matter state, cannot hold and it stops the system and you get what you call, a heart attack.

If you look at the signs that the physical body makes weeks before a heart attack, you understand how much you have the control of it. (2:26) Body makes specific, specific physical manifestation of the heart attack up to six weeks before a heart attack. When you get these conditions, you are warned, (then) you elevate your Soul to the STP. You change the dimension of the emotion. And (if) you don't listen to it, you're going to hit it. Very few heart attacks come in the last minute before the heart attack. Shock is one of them. But 90% of the heart attacks show their manifestation weeks before.

Scientists sometimes talk about 3 months prior. But 6 weeks before we see the stronger sign, 2 weeks before the heart attack, you still have a chance to change it. The other signs of heart attack, which it comes from the dimension of physicality, the emotions you build up. Or the ?? clogged up you've done with your food, or with your, what you take, intakes in the body, you go up to two weeks before, you can reverse it, or partially delay it, till you can repair it.

And go on the Internet, read the signs of the heart attack. And then you see your pattern of the emotion, and what it creates, why, which part, if you get, like indigestion, why it's in the stomach. These indigestion problems, 6 weeks before the heart attack, shows your heart attack, it shows the physical, cannot digest the food anymore, (2:28) because everything is clogged up, is due to explode, you can get a heart attack.

If it is with your pulling of your tongue to the back of your throat, you feel that pull, it means it's emotional. You cannot speak your word, you cannot put your emotion in, handle it. That you can delay. You see a tinkling and a pressure on the left side of the arm. Why? It means you have a problem interacting with people. It's part of your emotion. You can handle it. Up to two weeks before heart attack, you see the signs of heart attack. You got, you have a chance to interact with it, two weeks before, you're too late. You left it (go) too far.

When you have a brain stroke, or a heart attack and try to spell your name, and see how you spell it, verbally. Then you know your emotion is the heart attack going to be emotional or physical. The number of ?? go on the Internet you'll learn very quickly. You'll see the signs after three months before the first, especially physical heart attack, you'll see the first sign three months before.

And then you handle the emotion increase. You elevate the STP. You find out what is the reason emotionally brings you to this point, and you increase your level of understanding. You don't get trapped into it. (2:30) Sleep, the lack of a sleep, when you start losing your sleep, after four hours you wake up for no reason. These are the first signs of heart attack and partially the brain hemorrhage. Your sleep pattern changes out of nowhere, three months before.

Any other question?

Q: ... When do you think the creation of the UFO, the KF scientists are working on, when will that be live streamed to the new Youtube channel?

K- We're trying to do it, but the research is going on. And we're developing and there's a lot of things happening we have to complete before we do that. We have not received the confirmation from the Iranian government yet, from the military and the government. And even they told us this week, that they are organizing something very big for it, so we have to see if it is, they are organizing very big, or they are organizing something very important, before they give us the permission. And then once we get that, we start putting things in motion to build up on that.

Q: Similar question from Antonio about the fields created to shape a UFO. Is it easy to walk through the external boundary? (2:32)

K- No. No, no, no. It's dynamic.

R: Is there a resistance?

K- It's dynamic. No way. Initially, yes, initial stages, yes, but not in the final stage.

R: So would you feel resistance, or would you feel your hand being dissolved? It would depend, I suppose, on the particular fields.

K- It all depends. Easiest way is if you learn the transmutation, you can transmute inside, manifest yourself physically inside. It's a different experience. But yes, it's a dynamic field.

Q: ... Would you need to create an opposite field in order to walk from the inside to the outer part of the UFO?

K- Not really, no.

Q: ... Is it possible to ask Mr. Keshe if there is a Twinity Gans you would advise if a person has developed Parkinson after loss of her husband?

K- Sign up with Dr. Kern. We are running tests on this. He is at the moment running, have started running tests on this. We should be able to handle part of it, yes. The new development in technology has made the systems you've seen in Germany obsolete, totally obsolete. The new people are connected directly to the new system now. (2:34) And we have no need for the Wellness Center in Germany anymore. Because all the, it's past its, what you call it, state, with the new development.

Any other question?

R: There was a question about the Power Units, when they might be available without the gas feature. I think you mentioned several times that the Power Units won't be announced until they're actually ready for the public?

K- Well, a lot of things happening in the Keshe Foundation development. And we will cover these things, because you've got to realize with the new Flight system, the Power Unit, the Feeding Unit, the Energy Unit, the Flight Unit, all is getting combined into one system. And the system produces its own water and everything else. One of our reports, very recent past days, I was reading on, that they put one drop of water in the system, and couple days later, a few days later, there is 80 milliliter of water, in the same system. So, we've learned how to produce water from, what you call it, interaction of the fields. And this water is a plasmatic water, even it is within the system, that it can connect to anyone who wants to connect it to. (2:36) You don't need to drink it, you absorb the energy from it.

Any other question? Shall we call it the day?

R: I think so, you've done double, triple over time here today, thank you.

K- Thank you very much for today. Don't forget, we made an announcement before, Keshe Foundation needs a lot of donation and help, if you can help us. And, that we make our situation steady to go through these times. And, as I said, pray for us in what we have endeavored to create the World Peace through religions, in a different way, as we need to bring the Soul of these world leaders, for the, what I call, next step of development of expansion of peace. Thank you very much for today, and see you next week.
