

557th Knowledge Seekers Workshop September 26, 2024

(Transcription, Editing and Proofing done by KF Brazil)

(Auto transcription by Elias)

TIEP - technology in Exchange for Peace - Iran should give to all nations - nuclear is obsolete - end 5Plus1 talks; STM old as Creator; Connected to everything in U - came from Plasma of STC; Mass plasma of U - doesn't change; Weight is local field interaction; Universal Inertia; "Reference Being" for Earth - man & animals created from; Inertia of planets change; About strengths of COHN (AA) - H & C connect to U & Creator; N & O local matter; Fe - Cu - Zn - flexible & intelligence; AA connects local fields to Creator; Everything in U connected to Creator through H; No prejudice - love all equally; Manifest according to environment; Transmutation; Change color different COHN; Become Fire; Hybrid - matter & fields; Mix races in U - hybrid; Resurrection; Single brain & multiple sections; Cu split structure; Twinity; Invisible; Take cell out kidney; Twinity Gans success; Hold Twinity G in both hands - connect to system; Embed system under skin; KF Apps; KF doctors rebuild daughters kidney; Thank KS for support to achieve; Children Mitra no umbilical - different races; Grandparents love; Transmutation at home - expand Soul; Shroud of Turin; Seeds in mouth - Soul; Alzheimer's; Nuclear obsolete - TIEP - end 5Plus1; Leaders won't release T - lose power - explain each nation; Every household gets system in Iran - no sanctions; 10 years to implement T; AI; New rare Earth material - change humanity - shield nation - all needs; Shameful Biden - sold old weapons; British King own trillions - hidden - block T; Plutonium in energy state; Plasma Communications - bring change; American election; Release T right time; Governments backed fraud against KF - warrants - get money back; Fundamental change of planet will be permanent.

ENGLISH TRANSCRIPTION

(:13)

K- Yes. Thank you very much. Good morning, good day to you, as usual, wherever, whenever you listen to this series of Knowledge Seekers from Keshe Foundation Spaceship Institute. We are back here again, and hopefully we learn a little bit more from each other, and how the knowledge will be shared, and how we use the knowledge.

In the past few weeks, (:14) we have come to understand more about the cycle of life. We look at the cycle of life in the eye of the man, from the time of inception till the time we die. But, in the Universal language, the cycle of life for our Soul, comes from the time of the .. creation of the Creator, and is ever ongoing. It never changes, it never finishes. It always stays ongoing. So, in a physical life we have maybe 50 years, 20 years, 80 years or 100 years, from the time of our inception, when we were went away, conceived in the womb of the mother, till the day we finish the physical life. But, if you understand that, "I made man in image of Myself," which I refer to a lot, because, it's an attribute and Totality of every direction and dimension of the life of the man. The life of a cell, the life

of the physical body, the life of the Soul of the Physicality (STP), and the life of the Soul of the Man (STM), it's all replication of.

Now we have to understand as we all come from and go back to, our physical life, material collection, is the time on this planet. The Soul life as it's connected to the other fields of the Universe (U), comes from the Origin. So, we are in the Soul level, we never die. There is no, 'an end,' we are just part of amalgamation of all, in interaction of all, and sometimes some fields come together in one point, (:16) and that leads to the creation of, let's say, the STM. And then, on departure, those parts of the physical life energy in the fields, carry on and maybe become part of another cycle of life, of physical condition, or part of the Soul of another life, and then it's ongoing. We are, in the Soul level, a mixture of all what is come from Creator, and leads to another creation, which itself goes back to the Creator.

So, if someone ask you, how old you are, in physical dimension, I'm 50, 60. In the Soul strength, according to the field understanding strength of the Creation, in this dimension of the Soul, could be from the beginning of time, but, it's not could be, 100% is from the beginning of time, because that's where everything come from. So, if they say this Universe is 4 billion or 10 billion years old, the dimension of the strength of the fields that created your Soul, combination of amalgamation of whatever, is that age. It cannot be any different. Fields which led to the creation of your forefathers or the creation of the Sun, did not just come up out of nowhere, it has come from a Source. And then we say the fields of the Sun in interaction with the fields of the Earth, leads to the creation of the matter state or plasma, or protein, or whatever. So, in fact, in the cycle of the Soul, field strength of Creation of the STM, (:18) our Soul is as old as the Creator. Cannot be any different. Different strength, yes. Different dimensions (D), yes. But in essence, is, cannot be, and is part of the Soul of the Creator, fields of the created things.

And once we understand this, this brings us back to the transmutation, which means as we have been right along the way from the point of the creation of this Universe, with every other fields within this Universe, so we are connected to all of them. It's just "cousin" Souls, cousin fields. And some get together, have a party, in that party become the STM. Some other get together in another part, become Soul of your brother, or your mother, or your father, or whatever. Or another cat, another creation in dimension of Creator in another Universe and galaxy. It's not that, in the physical dimension we all go back to one mother, as it's been tracked by United Nation. In the dimension of the Soul, we all go back to the same father, to the same Creator.

And once we understand this, then we understand how we have access to the knowledge of the Universe, because it all comes and goes through and is within the same system. I made man in the image of Myself. I create many images according to the interaction of the fields of Me, with the environment which I created. (:20) The whole purpose, the whole understanding of life is very simple. The fields create conditions, which those conditions create new positions and conditions within themselves, which that interaction itself, leads to creation of condition of creating life.

I've referred this very clearly in the first Book, when we talk about the fields. They make a plasma, they make an atom, and then you get the Weight and then the rest of it. But if you look at it, a Mass which is itself a collection of the fields with interaction with its environment creates a Weight. And then the same, how did the Mass come across? How was it produced? The Mass comes from interaction of the fields, which have created condition in the Inertial dimension of the field of the Universe. This is why the Mass is the same across all points and places in the Universe. Because the reference point Inertia of it is the central point of the Universe. Now we understand this. Now, we always say your Mass is the same, doesn't matter where you go. We understand why, because it's all connected to the Source and like you have Inertia on this planet, you have the Universal Inertia, which dictates all elements within this Universe, follow the same category, the same structure, the same interaction and we call it, the Mass of the material, the Mass of an element. We have atomic Mass and we have atomic Weight. (:22) The Weight is when this Mass interacts with its environment. Then we get the new side. This is how much energy is at this position.

When the fields of the Soul of the Universe interacts with the condition at a certain field strength of this planet creates a reference man, mankind. If that reference is a slightly different, it becomes a dog. If that reference point is still different, it becomes something else. Exactly each atom has its own Mass and that Mass in interaction with its environment creates its own condition of manifestation in respect to the Inertia of that point. We have a universal Inertia and we have a local Inertia. This is why some materials cannot manifest themselves on this planet because the Inertia of that element in respect to interaction with the fields of the gravity and magnetic field of the environment of this planet, does not allow manifestation, but does not mean that it doesn't exist. This answers a lot of questions in the world of physics. This is why we, for example, look for neutrinos. And we can't find them. But if we create the energy of magnetic (M) field-strength of a given size, all, what we call, elements will manifest themselves. There'll be no neutrinos. Because, there are this planet does not create the Inertia of field strength to lead to the manifestation or interaction.

Once man understands this, once we extend the knowledge to understand we are part of, because we came from of, then we understand the whole process of the creation changes. (:24) How does it change? It depends how this planet, in the interaction with the fields of the Solar System of it, with other systems, was given the responsibility to create this Inertia to absorb certain element field strengths from a source and within the structure of it. Jupiter, Saturn have a structure gravitational magnetic field Inertia of gaseous level. And as they lose it, as the Jupiter or Saturn reaches to interact with Inertia of field forces of the solar system, the star of it, then you change the gases into matter state. Because Inertia of the gas is different than Inertia of the matter state. It's created different.

If you go back to the teachings for a long, long time, I always said, gravitational field force of what we call, life on this planet is connected to Oxygen. Now you understand why. Where the gravitational magnetic (GM) field of the Earth and the matter states connected to Iron. And if you understood this if you can comprehend what is Oxygen which is more or less 16 multiply 16 by 4 what do you get (64)? (:26) Now you

understand. You sit around the gravitational magnetic isotopes of Iron with capability and power strength fields of Copper and Zinc. You got 16 by 4, 40. 16, sorry 4 by 10 is very easy. 24, you have 64. Sits with the upper bracket of the isotopes of Iron (Fe), which is 56, plus what comes to Zinc. And then you go down by the factor of field strength, then you understand why our life is created in the structure of the protein on this planet. It's all Inertia connected, but at the same time, gravitational magnetic field absorption of the point and place and position. Now you understand how everything on this planet is controlled, because you have Nitrogen 14, 4 times 4 is 16, 4 times 10 is 40, 56, Iron is 56. Then you understand why Nitrogen becomes an energy source connected to gravitational field forces of the matter state of this planet.

This is why our life is a hybrid and we are flexible. We have flexible muscle tissues as protein. We connect to the matter state plasma, which is the Iron, and then Copper, and then Zinc, (:28) which gives us our neural system and the muscle tissue. And then on the other end by the common denominator fraction, we're connected to the amino acids (AA), the storage nitrogen, plus the gravitational field of the gaseous sides, by the matter state, then the two come together, this leads to the creation of the flexible life, flexible tissue, combination of interaction, creating intelligence.

Then if you understand this further, you understand how our life is connected directly to the Hydrogen and why to the Carbon. Hydrogen takes us directly to the line of connection at its specific characteristics, in a specific condition to the line of the Creator. It gives us the Inertia magnetic field strength of the Universe. Then you have the Carbon which again connects us to the dimension of the physicality. Carbon-16, Carbon, whatever you call it, communication and creation of my own environment. Then you understand how easily life on this planet is dictated. And then you understand how your Soul is connected to the Planetary System, because of the nitrogen and Oxygen and then connected to the universal and they create it through the Carbon and Hydrogen. This pattern follows anywhere in the Universe. One is local, which what we call, the Weight. One what we call, Universal which we call, the Mass. (:30) And one in interaction with the other leads to creation of life.

Then, the question to ask is very simple. What is and how is the Soul created? Is it Hydrogen? Is it Carbon and Hydrogen? And is it connected in the field strength of the other matters? This is for man to understand. And then, when it comes to the point of the transportation, you use the heavy side (?? Weight). When he comes to the point of the transmutation, you use the Universal side (?? Mass). And once you understand this, you understand how the cycle of life is connected anywhere in the Universe. Life on this planet is connected to Iron, which is magnetic field strength of it, with a spectrum of the field strength of, to the matter state Inertia, that it can be dynamic to create interaction of the fields with the Universal fields. This is the only reason we have the Amino Acid (AA). This is the only reason why Amino Acids are created. Connecting the universal fields and the line of connection to the Creator to the local Inertia dimension of the field strength what we call the environment.

So anything, anything created in the Universe from a stone, to a plant, to a tree, to a man, to an animal, to another creatures in Universe always have that line of connection which is through Hydrogen. (:32) Then you understand why in all the teaching I speak about humbleness. I speak about giving, being in love with. Because then you're not attached to the universal dimension and you're not attached to the physical dimension. But you connect yourself because has no attachment, stays independently to the Hydrogen which is a line of the connection to the Soul of the Plasma of the Creator which we all came from.

Today we have prejudices about our color, the race, which part of the world we come from. What happen when we understand this and become passengers of the Universe? People from such a galaxy, people from such a planet are so and so and we have to hate them or love them or whatever. When you know you all come from one, does the five finger of a hand make any difference? Do you love one less than the other? That's what we are. That's what Creation is. That's what Life is. Does not matter where you come from. And this is where man has literally misunderstood the process of the Creation. We are all those fingers all connected through the hand to the body of the man, but the creation of process of life in the Universe has many fingers. One hand and one connection to the Creator. All come together, all interact with each other, all become to be part of each other, and this is the essence of the Creation. (:34)

If and when the scientists understand this, how we are connected, how we link into, how we connect ourselves to the Inertia and at the same time we connect ourselves to the gravitational field of the planet in the matter state, gaseous state or whatever state, then we become to understand the work of the plasma, the work of the creation of plasma, how plasmas are created and how they manifest themselves. Then if we manage to create the Inertia of the Universe and the Inertia of the given environment, we can manifest anything in that environment according to its field strength. The process of creation is simple, it just needs to be understood. Connections have to be understood, connections have to be made. Then, you understand how everything is connected to each other. And how we grasp, we add, we collect, we divide, materials, fields, matters, together and with each other. Then you understand how to go from matter state to the energy state, transmute, transfer, and then return back to the matter state. But you have to understand again you abide by the rules.

On Earth you have the Carbon or Hydrogen and then on Earth you have the gravitational field strength of the Iron base which is 56 and is what we call, the boundary of his field strength which Copper the Zinc, and the Copper then you understand man will look like this does not matter wherever it goes on this planet. (:36) But when I take you out in the dimension of the gravitational field of the universal field strength, because you transfer everything into it in the Hydrogen in the Carbon combination and take you to another dimension where, for example, the magnetic field of the planetary system is let's say Potassium. Then you have a spectrum. Your skin will be green. You won't be brown and blue and black, you'll have different shades of green. Your body will not work on a Nitrogen basis. It works on the combination of the field strength to make that. You don't work on 4 times Nitrogen, you work on 3 times Nitrogen, which is 42. And then you have

the spectrum of life with it. This is why Calcium is the solid state of the physicality (P) of body as bone. In the condition of the atmospheric gravitational magnetic field plasma of this planet.

Then, you understand, when we always said if we create a fish tank of the field strength of the given environment, When we transfer you in it, you'll transfer and you will see how you look in the other environment. It's not magic anymore, is it? Now the science is understood. It's very much like you stand by a pool and jump in the pool. (:38) You weigh so much outside a pool, and when you're in water, you don't weigh that much, because you're in the new environment. The only thing is, you have not managed to convert, to transmute yourself to the structure of a fish. And would the desire to become a fish, would you jump from the side of a pool as a man, once you land in the water, you behave and live like a fish? Or, now would that make sense, what is a mermaid? Was there a fish? Was it a man who jumped to become, to live like a fish, or a woman, that half transmutation has taken place, combination of two? Mankind will see many styles of life like this in the Universe. Combination of two environments where both lives can be enjoyed. But one is a combination of physical condition and one is a condition of the wish of the Soul, strength of field of the STM. Then hybrids, structures is a very common position in the Universe. Where man can live in both dimensions, but both can tolerate each environmental condition.

Many, many of children of man in the future when we become travel over Space, will create these kind of conditions, these kind of children. Where one is from one side of the Universe and the mother is from the other side, and then both can live in both societies because they carry, they inherited the dimension of the fields of both. (:40) It's like a black and a white couple. We see that in the physical dimension what we create as a child, in the dimension of the Universal field transfer transmutation, we see the interaction of the fields of the Soul and the physicality that can live with the dimension of both.

Then we understand how to transmute in the future. Then we understand how to travel in the future. And then we understand for us to become the Passenger of the Universe. We need to transfer our energy and the physical condition into the Universal Energy. Into the direction of the Hydrogen and the Carbon. And then we can travel the span of the Universe. This is what we do when we are asleep and we call it the dream. In a physical condition, we travel, we walk with our legs and arms. When that cage is released, on the other half, in a way if you look at it, in a physical condition, we rely on the Copper (Cu) and Zinc side. In our condition of sleep, we go on the Hydrogen and the Carbon side. We use the Carbon to travel the span of the Universe. And then we use the Hydrogen for manifestation of the point and the time of place, because we use the same thing when it comes to dimension of physicality.

And if you understand this, it becomes very simple to understand. Anywhere you go in the Universe, due to the dimension of the Carbon-14 interaction, all things can communicate and transmute anywhere in the Universe, depending on the gravitational field of the environment. Carbon 12, then you have the Nitrogen 14, (:42) then you have

the condition of the gaseous condition gravity (O), 16. H is too far from Carbon. It's the line of connection to the creator. 14. Carbon 12, Carbon 14 is the connection of the line of the interaction of the field of that Hydrogen with itself which has amalgamated to a point that is common denominator universal transfer in this Universe, which then, in interaction with the environment of the fields, Inertia, Gravitational field, matter state, leads to manifestation of the matter life, which connects us with its Inertia, with its gravity, with its gaseous, with its matter state, with its liquid state, to the condition conversion of the physicality of the man.

Then you understand, how Creation and the Creator are connected to each other. This is how our Soul is connected to the Soul of the Creator (STC) because we are part of it, it's not a connection of it, we are it. And when man understand this, man moves to a new dimension, a new direction in life. And then we understand, irrespective of life, position and place, we are all connected through that Hydrogen to the Creator. And we are all the same. And somewhere, in transfer of the physicality, one will meet another, and lead to creation of new life. (:44) When we speak about, when the man leaves his physical dimension, and takes position in another place in the Universe, this can be in the amalgamation from another energy of another Soul from another place, which together they create that condition of life in that position.

And then in so many ways we understand the process of Twinity, balance between the field forces of different part of the Universe. It is not just two things coming together, it's like egg and sperm from two different races, two different creatures of the same in this environment leads to creation of life. Then we understand the simplicity of the process of Creation. Then we understand the process of Creation. Then we understand the totality of the Creation. "I made man in the image of Myself." Because it's Me manifesting Myself according to the time, the place, the position, gravitational field Inertia.

I refer to this many times. You are in the room, you breathe, room is normal temperature. If you change the environment outside, you get the frost on the window, you know there is a moisture manifestation of physicality. If you heat it up, you see the moist on the window, manifestation of the same in different shape. (:46) There is no difference between the Macro and Micro. There is no difference in life of manifestation of the man, or the creation in a dimension of created in another position. Then we have to understand the room is the space of this Universe. The condition inside is the manifestation of fields of the environment you enter in. You'll be a drop of water on the window today, and the ice is on the same window with the same name. And in a normal environmental condition of the place, time and position, you manifest yourself as a man.

Then we will understand why we burn in a fire. If you understand how you can transfer, transmute, you become part of the fire. You never burn, there'll be no ashes as you're transferring, because in Space you'll come to the spaces that the temperature of the position and time and the place is hotter than burning fire on this planet. Doesn't mean you're demise, it means you have to understand that you live within that fire. This is why we see life in what we call, the hottest places in volcanic eruption of this planet. Now we understand the process. This is why they said you cannot live under so much pressure,

cold or whatever and now we see life in those places because now we understand the process of creation and not the hypocrisy of the past. And we have become very good at it, (:48) we just brush it away, as we didn't believe it, this is something new, we don't know about the others. But if you understand this, that life can live in the most coldest part of this planet, and in most hottest part of this planet, then you understand, it's the same for the Universe. Life exists across this Universe and the Unicose. Then, in a most probably more compact understanding of the science of the man in the near future, we'll see full cycle of life on the moon, we'll see full cycle of life on mars. We don't need to come up with the hypocrisy does every life lives. No, we go and create a condition and see how life is and we find it, because we know what we are looking for.

There is a difference between the Inertia, there's a difference between and gravity there is difference with magnetical and gravitational and this is why I split it from the beginning very clearly. How much comes in and how much goes out. If you read in detail understand the concept understand the essence of the what I call, the Black Hole, "creation of Black Hole" paper you have been given the secret of the Creation. And the knowledge in that paper is so complete that when you put it in conjunction with the first few chapters of book One you see the essence of the Creation, the line to the Creator. "I made man in the image of Myself," because I create the environment of it, (:50) I decided what environment I want to be created, I create the fields for it and then I manifest myself because of it. So, each one of us carries the image of the Creator in the dimension of the field strength of the Soul, the emotion and the physicality, in the time and the place.

Then, we understand why all the attributes of the Creator is within the man. Man has to manifest it. Man needs to understand it, to transmute between dimension of physicality or the fields. And so, it's very easy. The new systems which you will see coming into operation, creates both. We have a part of it, which is the collection of the Soul, and we have part of it, which is within the collection of and creation of the magnetic field of the matter state flying system. So we have a hybrid system in the new flying system, you can transmute what you can transfer, or you can transfer what you transmute. Depends which side do you like. You would like to be in dimension of physicality and enjoy the partner, or do you want to be in the dimension of the Soul strength and be in touch with the partner, where we can enjoy both dimensions. It's like speaking two languages. You're not prejudiced about one or the mother because one is spoken by the mother and one by the father or one is spoken in the family, in the house and one is spoken outside. You're aware of both and you exist amongst both and this is how life is on this planet. (:52) And this is how we transmute.

The whole structure and the failure in the world of science has been that they never understood the connection of the man with his Creator and with his Universe. We always looked at the man to be in this village of planet Earth and that's it, this is life, what it is. No, we are here because that's what was brought in and interacted with the environment, but as we brought in, we still got connection with, because we came from it. This is the purpose, this is the totality of understanding the Knowledge of the Creation and the

connection to the Creator and man as the manifestation of his physicality of this place, time and position.

Then you understand why you can resurrect as man calls (it). You take the body to the dimension of the field of the Soul and then you create a new condition of the emotion of the man and you manifest yourself as a new man. Isn't this what the Christ did? And now we understand the process. He went on the cross with the emotion and the motion of giving love and bringing the connection to the whole race of the man. On the cross, transferring to his energy, returning back to a new emotional dimension, he became a man and he walked amongst men. It wasn't that he disappeared. Man didn't see who came out of the room. Who came out of the cave. Who came and went in and what came out. (:54) He went with a different field strength of the Soul. And he came out with a different field Soul strength. And that creates different man.

This is why we are all different from each other. And maybe understand why some people look like each other. If you go into depth of their emotional understanding, they have very similar characteristics. Doesn't matter which nation they come from.

Then we understand the process of Creation and then we understand the true meaning of transmutation. Where we can take the body with us, or we can take the energy of the body with us and then manifest ourselves in that place, and time and position. And then if you can create the matching field strength of the Soul at the point of manifestation, you will be looking exactly the same as you are in the other place. Now you understand why I explained you can be in two places. Man has that ability primarily due to the fact of the use of the Copper and the split in the field strength of the Copper. Man is one of the very few creatures in the Universe that has a split brain structure. Because due to environmental condition has been pushed into that dimension.

In the Universe we have other structure of the brain, which are 4 or 6 sections. Because that's what that environment allocates, allows to bring in and balance fields. And in most of the Universal Condition Creatures, are singular brain structure. Because they are directly connected. These creatures never kill, these creatures never do anything wrong. (:56) Because through understanding of the common denominator, they can feed themselves. They can exist. And we have the confirmation of it. And we tested this on you lot last Friday. Last Friday's test was the confirmation of the teaching of today. And this is why the new systems which is got into use by the German Wellness Center uses this principle and we've seen in the first week the changes, where we feed the physicality of the man directly to connection to the STM and the Soul of the Creator within the structure of the system.

And this is where the change is, where the principle change has come in. In the last Friday we checked you out, those each group, some of you group, went through nothing, you felt nothing, because we went to prove that this is what happens. In other groups we created a connection with the Soul and STP of the man. What I thought for decades, that you feed the Soul, the Soul feeds the physicality, you don't need the STP in between. Then man shall not kill. Then we become mono-brain structure. We become mono-Soul

structure, where we have two pieces of brain to interact, to create the dimension of physicality of the man and his behavior. Now the structure of the brain of the man with the Soul becomes a twin. And this is part of the creation for man needs to understand.

And we see, we feel, we understand the totality. (:58) Then, transmutation and transportation becomes part of the same. It's just you have to decide. I walk or I get in the car, go faster. Then you understand why we use, we talk about emotion in dimension of physicality and the emotion dimension of the STM. Because that's the key of the connection. And when they share, you say in the world of the man we get the twins. We get twins of the Soul like the twin stars, like the twin systems we introduced in the Gans production. Because one lives in the dimension of the fields, and one lives in the dimension of the matter. And then the interaction of the two leads to creation of the condition of satisfaction of the STM.

Now you understand. When you receive your twin Gans's, understand the process of the interaction of the fields, dimension of physicality. And then you understand the totality. In the next few days we'll announce, in the second part, a new cycle of the, what we call, processing, has started understanding this process. And then you understand how things will change, how man will understand the condition, transformation and transmutation. There is no difference between one and the other. You transmute between the universal condition and the Carbon and the Hydrogen. (1:00) You transfer in the dimension of the physicality, gravitational field of the matter state, which is the Zinc and the Copper and the Iron, which is the physicality of the man. You have to decide which energy you transfer. You have to decide which dimension you want to transfer and more or less move into.

In the dimension of the science of the man when you want to travel in the dimension of physicality what does your scientists tell you? 10,000 light years. If you transfer to the dimension of the universal field energy of the Carbon and Hydrogen, instantaneous. That's why one doesn't make sense with other because man never understood the knowledge. If I bring a cell of your kidney out of your body and put it on the table, would it still know it's a cell of a kidney in your body? Or it's just cell on itself, on its own and then if he has the combination of it will create a life. Would it create the kidney? Or would it create the work of the function of the kidney in the body of the man in that new environment?

Now you understand the whole connection with the life of the man, with the Universe, or the physicality dimension of this planet, or any other planet, or any other position in the Universe. And this is why I keep on saying, (1:02) there is no place in the Universe that there is no life, even the open span of the Universe there is life. We have to understand what is the gravitational magnetic field and the Weight of that environment that we can interact with, and then manifest ourselves in that dimension, place and position. And then if you understand this, and you can transfer the field strength of it, in the dimension of physicality you become invisible on this planet, if you know what it means. Manifesting yourself, knowing and aware of your physicality on this planet, but connecting to the field of the Universe that the field strengths envelops the physicality.

I hope you understood how much you are part of the Creation and the Creator at the same time. With the beauty and the control of emotion you can be in any dimension as the wish of the man wishes to be. And understand more in depth what life means both in dimension of the Creation and the Creator. We go for a small break and we come back and try to answer any questions you might have. Thank you very much Rick.

>> **BREAK** >> 557 KSW September 26, 2024 (1:08).

K- .. As usual per usual. Yes, first of all we have some questions raised about the Twinity Gans's which came in. The new Twinity Gans's, they said there is no picture. There will be a picture or they should have put a picture up to now. It's the product as it says and it does what it says and we need your feedback on all the Gans's you, what you call it... There will be two pictures on this one. It's the same as the other bottles. Because they're waiting for labels to arrive that are going to be done. Most of your Gans's should be out in the next 4 or 5 days. All this is just a waiting for labels to arrive from the, what you call it, from the printers. And that should be done within today or tomorrow. So, whatever you wanted, it'll be there.

But the interesting thing is, we started a process with this Twin system. You are not the first ones using it, because we've done tests in the background, and we've seen the results, we've seen the interaction of the fields. But this leads to a new structure in what comes from German Wellness Center. As I explained in before, the new structure which allows us to speed up the whole system understanding, (1:10) for all conditions of the transmutation and what we call, transfer, now will be run on the same basis of Twinity, as we always explained.

What does this mean? This means we've seen a high success rate with this process. We've seen high changes in this process of testing, which now the doctors in the Wellness Center and in conjunction with the Keshe Foundation explore it to a new dimension for Space development. What does this mean? This means that the Twin system will come into operation from next week or so, where the doctors in what we call, the Wellness Centers will send the materials to you which now becomes part of your connection with

your headphones to the system. Which means, in a way is not just remote, but is connected direct. So, you have a matching system with your headset, you have a matching system with your, what you call, what comes to you in like these jars, but you hold them in your hands. If you came to what you call, Linz, originally, we gave you this, this was part of the structure of the connection.

What does this mean? If we look at some of the first, what we call, units in Linz, when you came, what you saw when you sat in the chair, we gave you two handles to hold, which you held in your hand, you connected to the system and then to the structure of the emotion and the physicality. (1:12) Now we cannot send you, bring you the, what we call, the unit. But we can put you in it, but in a different way. And we have seen a rapid development in the use and testing of these. What it means, you will receive the, what you call, the two Gans's in two bottles and maybe two patches which goes with it. You don't open, you don't touch, you just hold in hand and then connecting to the system with, we call it Dr. Kern and the other team, doctors, or whatever, you connect in a very different way with the systems on the Wellness side. And this allows a huge breakthrough for us to be able to transfer energy fields and the rest of it.

And the preliminary tests on the pre ?? prior to this has shown a massive, massive changes. And we've seen the structural change, we've seen what we were waiting for. And we... It's the following and in a way, the follow-up of the same technology (T). It's understanding how the systems work and how the system transfers and how energy is transferred through. So, for cases that the doctors will you work with, will for example, malfunction in any part or addition of parts which was not supposed to be there and is there and is a concern, (1:14) you change this through emotion, physicality and every other dimension. And then you will understand that a system like this will become now workable anywhere across the Universe, anywhere across this planet. Which means we can transfer this to you and you are part of it. You become the structure of it. And this is part of the technology which has been developed for this purpose. You've seen these pictures, these are different structures of the systems.

I'm trying to share photos. Rick?

R: Okay I think I was trying to re-share something there, so I wasn't sure.

K- Ah, okay. If you allow us, I can get back up again. Now I have to go find it. I spent time finding it now I have to go back again.

R: Sorry about that.

K- Don't worry.

What this means it means now everything works in a very efficient way and this is why I'll explain to you why the doctors and the Wellness Centers will ask, or will you can join in for things which was not possible, things which will come change and it'll bring a lot of changes in the dimension of the Wellness, especially in deep Space travels.

What does this mean? This means that now instead of you traveling to a position or to a, what you call, a Wellness Center halfway around the world, we bring that world to you, but you are connected directly into it. And this gives us a massive change in dimension

and direction. (1:16) Let's say if you have a malfunction with one organ you receive the handle and a patch and you connect to the Center, and you go through the remote condition. Then you should be able to see the difference very rapidly, because we did not have this opportunity. Now new materials has been produced, developed, which gives us this possibility to connect through universal fields to what we call, the condition of existence, that we can transfer, we can develop, we can bring systems into operation, that allows us to literally change a lot of things.

For example, we can feed you through these systems. You hold on to your system. You connect through your own mobile. You don't need the Keshe Foundation in a way to be there. And you, with the connection you have with you with your headset, you download your food, your energy, your needs, and at the same time you can change all this with any condition which might occur in your life. You could feel depressed, you would like to feel happy. And this is the next step in what we call, digital communication, but through plasma. And for this reason, we bring new changes, new dimensions in what we call, the process of Creation. And is, in a way important for us as the research and developer of the Space technology to become part of this evolution. (1:18) We have what we call developed it, we have brought it in and we have many people which we could not in a way, give an answer to. But now we have the answer for, we have developed specific materials for this purpose. So, those of you who been waiting for evolution in the science of the Wellness and in the evolution of technology, now you have it. Combination of the structures of years of research now has come into operation.

If you have any condition you can use the process to achieve in a simple way what was not achievable. This is the development technology. What this means? It means the Cosmic Ray combination or UBESUS combination, plus the transmutation, plus the, what we call, the Gans patches, which we developed years ago and we tested with all of you, plus the knowledge from other aspects of the technology now is in our hand. And we worked on it to make it simple, and you can receive it and you can see it you can use it. If you look at this was the Keshe Foundation Exhibition Center. If you look at this unit you can see the unit always carry two pieces hanging on the side, which we used to sit and hold in your hand. Those 2 units connecting you to the headset, now has been changed. (1:20) Now you receive it as 2, what we call, 10 centimeter bottles in your hand. Then you connect to the, what we call, the headphones and the earphones and Cosmic Ray units and the UBESUS unit into the system in the center. Which this brings you, and brings us a new dimension and very direct effect.

Because we tested this in depth with the groups of last Friday. In how and where we need to connect in a very effective way and we watched how people responded to us. They had no connection. Others connected deeply, others found immense changes and the process has been going on. So what you see now with this, is the amalgamation of all the knowledge's of the Keshe Foundation in the past years.

In a way, if you understand, you see, you are sitting within the structure of the two technologies together. Here, they are next to each other. Now, the white unit on this side, this one is part of you. Comes to you and it connects to you remote and you connect to

the system. And this has taken us 20 years to develop and the effect of it is amazing. I looked at some of the graphs which came in as part of this technology in the past few days and I watched where I put people through it myself, past couple of years, how they worked. Now we have completed the technology. We have brought the technology in the point that all the sciences of the Keshe Foundation, (1:22) on the Wellness, feeding, on what we call, health application of the man in Space now has been brought together.

And we needed this to complete the process of how you as Knowledge Seekers (KS) will connect anywhere in the Universe, anywhere on this planet for any need. And this brings us one step forward towards what we call, the App system. Because now we can see the changes, and how things change, and how you as people change and you bring different conditions. And so in, as we announced today you can contact the Wellness Center in Germany with doctors and join this. And this is a revolution in science and technology. This is more or less a step before the ultimate condition.

I can see this to be step up maybe in next two to five years as two microchips, two miniature cylinders placed under your skin, nowhere that you can feel. And through this, with your connection to what we call, communication systems, which we developed and is unique for Keshe Foundation, you can connect to the system to feed yourself to what we call, what you call, the Wellness of you, you feel depressed in one corner of the Universe, you just connect directly to the system. And we invite you, and we have many people who like to join this, (1:24) and to expand the knowledge, to bring the collection of all the research and development of the Keshe Foundation over the past few years.

And this will bring us to a new understanding. This is evolution and revolution in science of the, what we call, the Space travel. And in so many ways the next step after this will be using this knowledge for transmutation. And I explain it to you when we come to it when more data is available for our scientists to understand to be able to carry this information forward. So what we started with you lot if you remember as a Pain Pen, and the Pain Patch, and the Pain Pad, and then as the Universal units, and then the Head units. If you came to Austria, all now comes into one cycle and with its effectiveness, with its operation and with its delivery. And I hope, I hope we should be able to see our doctors to help many, many people very fast.

And with this new technology you do not need what we call, the elaborate systems of the past. And you can see in a way, as you know there are two strings attached to this which you hold in your hand. When you come you can see them hanging here, very faint. Now you see these two as a package. (1:26) Where you connected your headphones and where you sat in this, now you do it with the headphones. In the UBESUS system, when you look at the chairs, fields were built inside the system. Reactors were put inside the chairs. Now you receive that as the patches, which you already know how to make it and you know how to apply it. And then, once it's all connected, you will see the change in emotion. You change elevation of the Soul.

And it's amazing how this thing works. I have shown you systems that... how we see the operation of the Soul. And some data which has come up and pictures in the past few

days, from our research centers, and the data we create and we control... It's very interesting to see how effective these are and how they change, and how our Knowledge Seekers individually come to interact, and how they changed. And how they create new conditions for themselves. And in a way we try to bring this into understanding of what we call, a more dynamic system, that our scientists and doctors in the near future can help and change the dimension of the physicality and life of many people not only on this planet, but beyond, where we can reach now in a very simple system.

In the Space you don't need to dial, (1:28) help me I'm hungry, I'm thirsty. The system is embedded in your structure and is embedded in the field strength in the, what we call, the STM. And then we see the next step. And we see how, in the near future, when we introduce the Apps, and what we call bypassing the artificial intelligence (AI) system, which they are talking about, because if you have this, you are the Artificial Intelligence system. And you don't need this to, or in a way, you don't need to be away from it, to be part of it. And you can see I show you something which has come up from this week.

If you remember the figures, the pictures we showed you before (shows graphs). This is from a session with the new system, partially new system in the last week. You see how the Soul has interacted with the physicality and the STP and how the physicality takes charge to change itself. This could be a cancer, this could be a problem with the kidney, this could be a problem with what we call, the STM. In these pictures, these graphs, brings a lot of clarity. You see for the first time, physicality which is the yellow line, is on its own, is dealing with it. It has to deal with it. The Soul and the STP stay in touch, they lock in, and then you come in with a cancer, then you have no cancer. (1:30) Because physicality has to handle it.

These graphs, if you understand the science of the Space plasma, has a huge meaning in the work of the knowledge and the development. We hardly ever see the physicality separating to do, to handle, to be, to come in what we call, combination and connection and in the same length of the physicality, the STP and the Soul. The physicality is handling it, it has to handle it, because it needs to reach this point. And then, if you understand this, you understand the new dimension in the world of science. As we said, now we change those huge system of UBESUS to this systems, to headphones and headsets and Cosmic Rays can be used partially for this system, if we set it up, the UBESUS units, then you can see how you can be hungry in one second, you make your wish, you connect yourself to the system, you have your headphones and you are no more hungry, you don't need to kill for. You walk in with conditions that the doctor says it's impossible and then within a few minutes it become possible.

Today, as we speak, we are running a trial in Middle East. A girl, young age, has faced unknowingly with a condition which she has lost 60% working capacity of the kidneys, (1:32) both kidneys at the same time, and the parents are doctors, they have taken in conjunction with the Keshe Foundation, this process in a different way. And within three weeks we have seen changes that the doctors cannot explain. And hopefully everything is data collected by the parents, because they are doctors, they are Knowledge Seekers, and there were no solution for this child in the world of medicine of today. Now the kidney is

back to operation and tests will show in the next few weeks. The way we rebuild the brain of Naomi for the first time. Understanding this technology we have built the kidney, rebuild the kidney.

The data will be released as it completes, in next, most probably four, six weeks, that what was impossible, now has become possible. And as parents, either... are doctors, scientists in the world of medicine, they will publish it themselves. And would this change the world of dialysis? The doctors involved in, they say they think so. Would we need dialysis machines. In most cases, most probably no. And then it goes to the next step. And can we eradicate other diseases? Can we change other diseases? Can we grow muscles with the conditions of polio? Can we change bringing the children who have brain damage, or bone at point of birth because of lack of Oxygen with a lot of problems back into the system, to these systems. (1:34) Data since last week gives a lot of promises and we would like to expand it.

We have people who would like to do it but financially cannot afford it and Keshe Foundation cannot run without it (finances). We'll come to you or you can nominate for it to be done, because we have to get this completed. And once we do this, we go to the next steps of the science and development of technology. We need this (for) the process of transmutation. We need this for the process of transfer. We need this to understand more of. You've never seen this. Nobody can show you such a technology so clearly as is what is on the screen. The physicality being supported by the STM, bringing that change to bring itself in line, to bring itself in a position of change.

Would it take more than a few hours using this technology to change cancer? Would it change a few hours to change the Parkinson? Would it take a few seconds to feed the hunger of millions, that that man does not need to kill? And this is the progress we have in science and technology. And this is thanks to you, Knowledge Seekers, who have managed, supported us, became, what I call, volunteers, and you allowed us to develop it, to test it, and to bring it back in a new position and condition. (1:36)

When I was listening in the past few days, to the world leaders in the United Nations speaking about AI, I said, "Oh my God, I, I." We don't need artificial intelligence. We have intelligence within the structure of the man to do the job. And then we see how things will change and what is to bring it. And we're looking for volunteers. We're looking for people who come in, it doesn't matter what condition you are. Go to Dr. Kern, to the Wellness Center run by the doctors, and is supported by them, to reach through the system. And we'll come to every individual we know who can support us, to support us to cover this, to be able to expand this, that we can go further.

And I think as I said to you, we have new messages, new information and this is what you see. You were different groups last Friday, and we tested every combination of connecting your Soul to your STP, your Soul to your physicality, and what we see is now the system is complete. So, the system is set. We can transfer you from outside the system into the dimension of transmutation into the system, gives you physicality inside the system, allow you to manifest yourself in the physical dimension and then use the

same thing to transfer you from inside outside. And we did this with your people last week, last Friday. Where we see no Soul movement, we just see physicality. We see in one combination where the Soul is working but the physicality has moved on. (1:38) And we have graphs all of it, and this was the completion of what you see this week on your screen.

Does it mean a man can be condemned to death because of color, race, cancer, Parkinson's, or political views. Or with this technology we all become the same. Does not mean that we elevate our physicality to get rid of cancer. It means we can elevate ourselves to get rid of our racism. With this technology, it's possible. We can get rid of our prejudices, unknowingly, and this is, all men will become equal. This technology, now what we see, gives us that opportunity. And the beauty of it is that huge number of people on this planet carry mobile phones, huge number of people carry headphones, and we can reach.

I thank every individual of you supporting us for past, especially 3 to 4 years, testing things for us, joining these sessions, because in a way this is the fruit of years of collaboration with Knowledge Seekers across this planet, where we didn't succeed, we understand where we adopted it. Where we succeeded, we learned that we made more solid basis on it and this is in front of you, if you understand what it means. You've been, you've seen the pictures before. (1:40) We published many of it in the past, or in some sessions we have shown. You've never seen the physicality of the man ?? so trying to fix, to join the STP. And when that yellow line joins the purple line, it means the process is complete. And when all become one line, it means there is no disease. There is no hunger. There is no racism. There is nothing, and the man become equal to the others.

And I hope as Knowledge Seekers you understand this, that you supported us, you brought us to this position, with your relentlessly support in past years, and this is the fruit of work of all of us, not just one of us or somebody did, of I did it myself. I hope those of you who feel lucky enough to be healthy understand those who are not healthy, who are hungry and suffer with other things from the hand of the other men.

When you see these pictures, when you understand it the way we do, we need to tweak it a little bit in another combination and get rid of all the racism. Get rid of all the prejudices, color, race, religion, the rest of it, and then man becomes one. Because here you see the physicality of the man on the yellow line. In next step you see the STP which comes with the prejudices in place of the yellow light. And we know how to do it. (1:42) I hope this brought you a new dimension to understand the work. And I hope you understand how deep this work is going on with us, with the Foundation, and what we set to do. If there are any questions we answer.

Q: ... Thank you Rick. Today's teaching has just absolutely blown me away. I am so, so grateful. I really, not even going to bother trying to put it into words. Thank you all so much. So, I did have two questions, but your teaching from the first part of this workshop, I feel, as has the answer to the question, I just don't comprehend it yet, but

what I'm looking for is in the teaching, so I'm very grateful for that as well. So, it's just, my second question I'd like to ask, which is actually a two parts.

K- Can I ask one question? Just one second please. Rick, did you, did you, Rick, did you lose any voice in between past five minutes, ten minutes?

R: I don't think so, I think it was all clear. It was all clear.

K- Okay because we had a clinch in the system. (1:44) Okay no problem, carry on please.

Q: ... Thank you Mr. Keshe. So my question is, when a child of Mitra is created and that pure, shining energy centre chooses to manifest in the matter-state dimension of blue planet Earth, ... if that Child of Mitra is conceived by a food-eating mother, it is attached to an umbilical cord, attached to the digestive system of the mother, even though the fetus is growing and the child is growing, manifesting only from receiving the universal fields external to the magnetosphere of the carrying mother. But if the mother does not eat matter state food any longer, and she has already lost her digestive system over time, then there will be no umbilical cord for the fetus to attach to, and the fetus, the growing child will manifest fully matter state detached from the carrying mother within the womb Universe of the mother. Is that correct?

K- You got to understand we work through the fields. These fields can be in any dimension or direction. You do not need the umbilical cord as you do not need, you don't see umbilical cord between the Earth and the Sun. (1:46) It receives the fields, and it receives everything it needs from it. In the dimension of physicality it has been built.

I always say it's this, it's like loving. You know, you love your child because you can hold it and then till you (become) a grandparent and then you see the love of your grandchild. The, the child is for you to feed, you were there to do everything for to guarantee survival. And the grandchild is for you just give the love of and the child feels it. Do you understand? There is no connection of feeding. So is the man. I have two gorgeous granddaughters and I don't need to do anything with them. Sometimes you know when you speak to them, you see the love inside them, the beauty in them. I spent time understanding this with my grandchildren. And I see it different than when I had my sons and my children. That was a physical contact that was a physical thing. Now is emotional and the link. And sometimes you feel my granddaughters feel me better than their parents. Was it a need for me to create that line? I had nothing to do with their creation, but the field and the love which came to my children and it's gone to the grandchildren, knows no boundary. I hackle with them, juggle with them, trying to understand. (1:48) And this... my granddaughter is amazing. You don't need, I don't need even to talk to her, with a picture I can transfer my energy. I hackle with them, don't eat sweets, eat this, do that. I didn't have the patience with the father, or with their fathers. Because it's the love and it's the amazing it is. I watched them with their grandparents, other grandparents. We have no physical connection, but the emotion and the love is there. And sometimes the parents say, "Would you like to raise these children? Because they don't listen to us, but they listen to you." And I heard the same thing from my grandparents, with my mother.

Do we need that umbilical cord? Or do we have the line of connection through emotion? I love my granddaughters beyond imagination. And I don't need to... a few words... eat your food. You're supposed to do this, you're not supposed to. It wasn't an agreement. All said, all listened to, and it's all done. Parents have to pull their hair out. Because they have a physical connection. With me it's an emotional connection.

And this is the same as Children of Mitra. The connection is with the Soul of the Creator. The mother creates the what we call, the ambience, the womb. (1:50) This is why the Children of the Mitra are born from interaction of different races in the Universe, does not necessarily means to be born in a womb of the mother. We've seen how birds and lizards lay an egg. Take it to an environment. In the sand they bury it. When it warms, then they are born. Nothing to do with the womb of the mother. This is how the children of the man and Universal children as we call the Children of Mitra in the Universe are created. Because they don't fit into the structure, they have to fit in the environment.

And this is what we need. This is what we need to understand. The physicality connection and the beauty is very much within the structure. Very much within understanding. But, we have to understand one is connected with dimension of physicality, one is dimension of energy, or fields. And if you understand this, then we understand the Totality. And then we see the connection. And then we understand the future steps.

We have ?? taught that, when you're young and you have children, you are very much involved everything with a physical dimension. When you become a grandparent, they come and go, they're not yours, you have them for a few days, (1:52) but they feel your love, they feel what you give them and logic is different. I speak totally different way to youngsters than the parents. And emotion carries you through, not shouting. logic, you can talk and somehow you build that with your grandchildren. And sometimes the parents even they've given birth to them, look at them all day, doesn't go. Are we in a way talking about the second part? No physical connection, but the emotional connection? Isn't this what the man is and the Child of Mitra will be? Then you have answered yourself.

Q: Thank you Mr. Keshe. The second part of this question, if you allow me, will a Child of Mitra, child of the Universe, when born in this matter state dimension of blue planet Earth, will that child be more silicon crystalline than a regular child and possibly have a single hemisphere brain structure rather than the two hemispheres that humanity presently has at the moment?

K- It's a combination of two. (1:54) As I said, I was with a doctor very recently and our doctors are fixed to a certain way. And these creatures are very clever, because if you don't want to be what you call it, separated, become part of. On this planet and the condition they are, they still look like you and me. In the Space they convert where man cannot do, because they work through that operation. And I sat in front of this doctor and he says, this, this gives us this because it's physical I can see it. And I thought, "What's going to happen to you when you get the creature in front of you which doesn't have what

you expect? Is it dead? Is it alive?" And we will see different beauties of the Creation in the world of the Creator. And we have to be ready to accept it all. And don't make separation, because of our own understanding or what we've been taught to understand.

I take, I have a lot of patience with these things, because it needs time to be understood. Sometimes people come to it, because of the need, sometimes people come to it, because of understanding, sometimes people come into it, because it's fashionable, without understanding it. And we have to educate our people, in the essence of the Soul, strength of the Soul, to be able to understand these things. (1:56) And to be able to move forward with these things. And don't have the prejudices. And if we get that emotional prejudice out of the circle of the physical side of the man, we achieved a lot in moving man forward, in the Universal Community.

And you will see different structure of brain or central control system. You will see some don't even have one, in a way of physicality, but create the image of, because the Soul controls everything in a bigger dimension. And very soon, man will see these. Because the fields they create in dimension of central control, is so strong, is so different, that on a planetary system, cannot lead to manifestation of a structural matter like a brain. But, they work in a dimension of the Universal lines, and they have a control system, managing their lives, physical life. And you don't need a physical connection.

Any other question?

Q: ... (1:58) Hello Mr. Keshe, I have two questions, if you allow me. One, how can you practice transmutation yourself at home?

K- It's done by many people. You have to understand how to bring the expansion of your Soul. Yoga people, they try to achieve something, meditation people, the Buddhists, to do another way. But it takes a flash of a second to do it once you learn it and you can do it. And you can start with tapping into Universal Knowledge. And then, understanding it, not just make up things, but understand it in essence. And then understand how you extend it. That you become part of that knowledge. Then you can transmute much easier. As long as you want to take, you don't achieve it. When you become part of to give, you achieve. And this is the biggest problem with a lot of people who don't understand transmutation.

Q: Ok, the second part of his, second question that he has, is concerns older workshops, where he mentioned that there's a new technology for agriculture, and the use of Gans water is already obsolete. (2:00) Can you still tell us which Gans to use for the seeds, then for the sprouts, and then for increasing the yield? Thank you very much.

K- This is well documented by the, what you call it, in the agricultural notes. In Jim in Australia and Dr. Gatwa in Africa, they've well documented these things. Each seed needs a different combination. And each seed needs understanding of the work of the Soul. Then you understand. And partially in a way, we answered part of it last week.

When Rick said people used to put the seed in their mouth. You have to understand. Do you feed them physically or do you feed them through the Soul? Then you understand.

R: We actually spent about two hours last... yesterday in the Keshe Plasma Reactor Group with Giani, going through seeds. His talk with us was all about seeds, the preparation of the seeds, the use of the Gans water. He had tests with untreated seeds, with seeds treated with Gans water, and with seeds treated with chemical process. And showed them under a microscope, before they started sprouting, and as they started sprouting, and shows some of the results, and they planted these seeds that were the test seeds, yesterday. So, they're now sprouted and growing. (2:02) So, there's a couple of hours of information there actually, with Giani as with a translation from Romanian to English, with Horatio.

K- That's nice. You have to understand, you choose two ways of doing it. And the new system is totally different in a way, that we work in a totally different way than using Gans's. But in the near future it'll be all, what you call it, explained in more detail.

Next question.

Q: ... Thank you again, Rick and Mr. Keshe. My question, which I find interesting, is the Shroud of Turin. Scientists are saying it is a very powerful, intense light that imprinted the image of Jesus on the cloth. So, wondering what your thoughts are on this?

K- Can you repeat that? (RC)

R: It was about the Shroud of Turin, it's called. And it's a shroud that as you said, scientists are saying that it is a very powerful, intense light imprinted the image of Jesus on the cloth. So, wondering what your thoughts are on this?

K- I don't understand it.

R: Oh, maybe you haven't heard of the Shroud of Turin, that's... (2:04)

K- Yes, I heard, but I don't understand.

R: Oh, okay. Well, he's saying that, is it an intense light, that imprinted that image of Jesus on the cloth, or how did the image get imprinted?

K- I stay out of this controversy.

R: Okay.

K- Was it ever there, was there a clothe there, or is it manufactured later on, and credited to? There's a big dispute on, what you call it, going on to be about if it's real or not.

Q: ... Can the newly made Snooze Gans be helpful for insomnia.

K- That's what it's for.

Q: ... Has there been any success in relation to someone with advanced dementia or Alzheimer's with the new systems? If the condition is most probably caused by childhood trauma would treatment help?

K- We don't treat, we process, and I should say doctors in Germany do know how to process it, and yes. (2:06) There is a new approach to understanding of the Alzheimer, by the work of the Keshe Foundation. The doctors as we all know look for maybe some spots on the brain, some lack of carrying information. But Alzheimer's in most of conditions from our point of view is when part of the brain does not connect with the memory bank. It's a loss of connection and we have developed for such a thing to rebuild, reconnect.

And on the other hand Alzheimer's, or what we call, the connection to the memory bank is, or does exist. If there is no memory bank section for specific things. We, the what we call, the memory section of the brain is selective, very selective. We have a section which only remembers names. We have places where section which only collaborates and connects to pictures. Some part of it is for data for addresses, some is for shortage of, or not having the connection to for the past five minutes, but two years later you remember these five minutes, but in that five minutes you cannot remember. (2:08) And so we understand this, and through this technology in understanding there is a need for connection we can overcome. We can do this, or we can change this through understanding of it.

The science will... the world of science is very simple if you understand it. When you have a lack of connection or you create a lack of connection because of the emotion. Then, it's easy to break it down because you created through emotion. The systems are set to be above interconnecting and higher level. And we seen that with Naomi, she remembers everything, the emotion of it. The first word she wrote when she came out of coma was Fabio. And so, in that part of the understanding, why do we create Alzheimer's? Because we can't remember. We don't want to remember. Why do we get the total Alzheimer's? Because sometimes there is a misconnection in the brain and sometimes it's so bad that we don't want to remember. And either way, technology is at a level that it can change it. When you have a ?? child ?? Alzheimer's, go back to the point, where, why, how? And then you can trigger. You can't do it. The system creates that environment that it connects.

But we have to understand the reason for the disconnection. And then when you disconnect, emotionally, physically the brain has to follow. (2:10) When you disconnect from life, in the physical life, you want to end it, you get ILS (ALS). We see your paralysis, we see leg, arm not moving. We see MS, why not? What's the reason behind it? But, it's the same with the brain. You deliberately create a condition, you create barriers, they see spots, let's say they call it a calcium or whatever, calcification or whatever, and then they say, this is a sign of Alzheimer's. Because the emotion in the physical ALS

creates a physical disabilities. In the brain because it has been so, something I don't want to remember, creates a condition, become physical. You see the same. There is no difference. And that disconnection to block it, it creates other manifestation of protein which will you shows as calcification they call it in the brain from Parkinson or whatever, whatever. People see the damage they don't understand the cause.

The cause of Alzheimer's, Parkinson, is all psychological. And it's psychosomatic emotion and you can change it. And yes, the new technology, the new understanding of the science of Creation has been helpful and now with a new system it becomes much, much easier and faster.

You have to understand the process is very simple. The process is to understand the dimension. The process is to be able to connect the understanding. We create that understanding, we create that dimension. (2:12) And we understand how to create it. Alzheimer's at any age can be opened up that the person will accept, but you have to satisfy the emotion. The world of medicine does not handle these things, medicine of today. And you elevate the physicality where the blockage is through the Soul and then you'll get the answer. But the biggest problem we've seen with people with Alzheimer's over years is, you think they had Alzheimer's, they don't remember anything, they can't hear you, and some cases we've seen, when we bring people out of Alzheimer's after ten years, whatever, they tell you the things they heard while you thought they were in Alzheimer's. It literally frightens people who face with this. Unless if you've seen, if you've been there. When you reverse Alzheimer's, then they tell you, you remember that Christmas? You thought, oh no, the wife has Alzheimer's, she doesn't understand anything, she is dumb and deaf sitting there. And you said bunch of horrendous things about her or whatever, she comes up with it. Then you understand truly if she wants to stay like that because she's seen the true side of you. (2:14) It's what we want and what we expect and what we love to have. And sometimes we don't want love, to have to remember, because it was too much pain connected to it. That's why we decided not to remember.

When we do that, the brain creates condition for barricading it, blocking it, "Don't listen to information, I don't want to give out anymore. And so I don't want to talk." I've seen a few cases, using the technology in the and how a lot of things comes up, why even the Alzheimer's came in the first place. But with this new technology you got to understand if you understood the process of what we went through in past three, four years as Corona, then these kind of things becomes very easy to understand how they occur and how they manifest themselves, doesn't matter what age. Sometimes it's physical misconnection in the brain, but most of the time it's not wanting to remember the position or whatever. And it's totally age irrelevant.

Any other questions?

Q: ... Mr. Keshe, there's a theory that Alzheimer's, in part, is to do with nuclear radiation, (2:16) which has flowed onto the etheric levels of matter, and cannot be detected with our current systems. My question, does the plasma technology detect this?

K- You can come up with any fancy things you like. They can't detect it, they cannot see it, they don't understand it, and they want to do it. So it brings us back to one point. If you don't detect it, how can you do it?

Q: ... I could ask you a few questions but, so one of my questions would be, how is the situation with the nuclear program going in the background? Where are we in that position now with the nations?

K- What do you mean?

Q: How are the nations handling the nuclear situation in the present moment?

K- Which nuclear position?

Q: I saw some headlines talking about the Iranian president speaking about a nuclear position and speaking with other nations. Is this, according to your knowledge, is this the understanding? (2:18)

K- I have to think very carefully before I answer you this question.

Q: I thought you might.

K- As I said to some Iranian man of power in the past few days, why are we fighting for something which is obsolete? And this has taken Iranian leadership to understand again, do we need to negotiate on nuclear basis? I don't agree with President of Iran going back to it. Even though we've been asked to go back to 5plus1. 5plus1 was acceptable negotiation when nuclear power was the ultimate. Now nuclear power is not the ultimate. And what I don't understand why the present Iranian position is to negotiate. We have a technology which super-passes nuclear and any other weapon technology, but it's peaceful technology. And why do we let me allow this discussion to be on the table. We abandoned the nuclear talk. We want to bring the negotiation on a new legging, which means a new technology in exchange for peace. We call it, (2:20) you might hear this language very soon in the world of whatever communication, we call it very simple, T-I-E-P, Technology in Exchange for Peace.

And we are pushing with this, we have to push with this, that it's like, as I explained to Iranian leaders in the past few days, it's like a dog barking. It shouldn't bother you. That bark is the nuclear. Nuclear is obsolete. We can produce Uranium at a very low cost, more efficiently without mining. We do not need nuclear material because we use other extreme of the science in field energy, which in it's control, what we call it, makes the nuclear obsolete. And at the same time, the new science and technology, the new energy, the new material we have created, leads to the creation of field forces for Universal work. And if we win our way, which I don't think we'll win, because there is a lot of things behind it when I look at it. We change the position of negotiation on the nuclear talk.

We have a problem in Iran which is changing of the situation with Middle East in respect to the religious and Sepah. That's different. From nuclear side, scientific side, (2:22) we look at development, or release of technology internationally, worldwide to all the nations. If, which I think the Iranian leadership would not like to do it, they do not want to do it, they had the opportunity for three weeks to do it and they're holding back for whatever reason they have. We have to change the position of nuclear discussion. By showing the effectiveness of the new technology in every aspects, in defense, Space and the rest of it. But at the same time making it common to all the nations.

We know how to make gases. We know how to create, generate water. We know how to generate energy. Now we know how to transfer fields to become the world of Wellness. My idea to the Iranian government is very simple. We give this to the nations in accordance with Technology Exchange for Peace. Ignore America. Ignore nuclear talks. In Africa we have reached a position, one of the reasons Africa cannot go forward, one of the reasons Africa is kept in darkness and poverty is, you have a few very expensive solar cells, very expensive some windmills, if they can afford it. But in totality, Africa has now finding out about capability and the capacity of having oil, like in Gambia, in Ghana, and the rest of it, and they are too far, sometimes, quality is not the way European refineries are set for, American refineries are set for. (2:24) So they were ignored. But China is not ignoring it. China is literally sucking these things out and paying for it, whatever. But when you put that, even they pay them to build their power stations and the rest of it, Africa has reached a point of total maturity of natural resources like dams and rivers to convert into energy. So African development is blocked because of the lack of energy.

With the new systems which has to be on the table of negotiation with all the African nations, even India and Bangladesh and the rest of it, which I've asked the Iranian government to consider, we ignore nuclear because it's obsolete. What are we fighting for? And promote the structure of the new system, which is not something it is going to be done, it is something which we already have in our hands, and we already know in our discussions. And we have to understand the totality, and that is very simple.

I'll show you how simple it is. If you understand the process of the Creation, the Earth creates... The Earth creates water, gas and energy we see there's a thunder and a storm and the rest of it and the wind, (2:26) as one integrated system. They're all connected to each other. And in Keshe Foundation we have developed this technology. And we're holding it back, you Knowledge Seekers ask, you know, we get this, we get that, and I've got the patience with our lab people, waiting this and that, but I know how the next step has to be complete. We can allow, in a very simple structure, the house, a family, a village to have as much electricity, as much gas and as much as water they need. Cost of the system will be in tens of dollars. This will change Africa, this will change Bangladesh, it will change India. But and then it brings a new dimension. People have new opportunities to be. And this is how, where the focus of new technology has to be, not nuclear.

We can deliver the new technology of the delivery, making Plutonium, Uranium, tomorrow morning, on a, what you call, in a Blueprint. We did a Blueprint for MaGravs,

I can put a Blueprint tomorrow morning, how to make Plutonium. And you Knowledge Seekers are good at it. You'll make it in no time. But what's the good of it? I advise the Iranian government that we walk away from nuclear talks because it's obsolete. What's the use of wasting time on it? And show by what you call it, leadership, to bring that change in. (2:28) But we have a problem in Iran because half of our structure is locked in with the Palestinians and Lebanese. And they are using that part instead of this part and they are connecting the two to each other, which is irrelevant.

Bringing this out has three advantages. First of all, it takes 5 to 10 years that every man on this planet will have access freely to it. Don't forget, go back to my teachings, ten years ago, I said "If you have two mobile phones, you have everything." One mobile phone, you've seen what we use it for, to connect. And the other mobile phone can make you the other part. Knowledge hasn't changed, it's your understanding. So, when we deliver this technology, that people can make that energy, water, forever, the system will last 10, 20 years, for nothing. Then, superiority through power of energy, control of energy, will die. Nobody is superior because everybody makes their own. You make all your Gans's, don't you? Now you make your own energy system. And we have taught you everything about it, but you Knowledge Seekers are like that donkey with two blindfolds in front of you. I look at it, you need to mature. So this will affect American and Middle Eastern nations control over energy supply. Saudi Arabia will not be that important in America, what you call it, all the things they do to get hold of oil and whatever has no value. (2:30)

Then it comes to the next point. What is new? What can we talk about? I have set out the plan for the Iranian government, what it should be. And I'm sure 99% would not be accepted. Because with this, this immaculate position of Middle East for them will be not value. But there is a dilemma within me and inside me, what should be the next step? If we allow, we release this knowledge in the teaching, for sure two things will happen. Keshe Foundation website will disappear. And most probably I'll disappear. And we have to bring it from a nation and we have to get these Americans and Europeans to understand we're not interested in nuclear talks, not at all. Because it's a toy we played with and it's over. When I was little I used to play with toy cars. Now I'm a man I drive the car. I don't need to play with the toy. And nuclear technology for us is that toy and we are matured. We want to play with tools of the Universe. We want to play with the mobility and the energies which runs the Universe, not a few men in different places.

So the reason I explain this in depth to you is because I know Iranian officials are now listening. We need to take a step to walk away from 5plus1, (2:32) even though I set the seed for it with Obama, even though we saw it, we supported in different ways. Unless Iran wants people officials in Iran want to gain something from it, which is totally different. Chinese don't like this technology to come out because they use the oil and gas in financing paying nations to control them for their own ends and for own means. Americans are not in favor of Keshe Foundation because then the superiority becomes superiority is zero. European nations don't like the Keshe Foundation because part of colonial things they built in Africa in South America and in Asia will go to smithereens in the next 5 or 10 years.

I have suggested and I put my suggestion to Iranian leaders. In past few days clearly in long time of explaining and talking. It's not worth talking about nuclear anymore. And I don't know why our president is wasting time on it. Two years ago, five years ago, yes. Two years ago we left the negotiation. Now we come up with the structure which we can show. We are not talking. The production of rare Earth material will damage American economy beyond imagination. And this is my pressure, not to damage any economies or anything else, but create conditions. (2:34) We are not producing anymore one gram, two grams, we are producing kilos. We can lead to kilos of production of specific materials, not using the technologies you've seen or you think you know. And this is important for us to understand how easily we can interfere and change the course.

But two things is important - would we stay alive, would be able to go to the point of changing and bringing the change? And what will it bring? I'll show you a few things because then you understand why we do not need to talk. I asked the Americans, I met with American officials last week in Vienna with the full information knowledge of the Iranian government, trying to set up a new structure of talk. Americans didn't turn up in the second meeting, because they knew what's going to hit them. And the process, it's extremely simple. We move on and leave the negotiation nuclear aside, and look at the new development, new opportunities. And if the Americans are shouting so much for new technologies and now they've got with this crazy AI now, because they can... the intelligence of the nation is so low, that AI is very big to them. AI is irrelevant. This technology even supports AI to a new dimensions.

I want you to see something. This is the most rare Earth materials you ever see. (2:36) And we produce kilos of it. I put this technology in the hand of the Americans. Chinese economy controlling the Earth material is kaput within hours. I want to negotiate with Americans on this basis. Not nuclear. The same material on the table, I can give it to you as Plutonium. The difference between the Plutonium produced with the new technology is, it's already in the energy form. I don't need to ignite it. I just need to pilot. There is no need for control rods, and running away, and nuclear explosion, because it's self-control system through natural basis. And this picture gives you everything else. System this size can produce your water, your electricity, and your gas. And if you are very, very clever, expand the picture. You'll see this on the letter, you paper, you all used in Sanya conference. And you see the size of a pen next to the system.

And we want to speak to the Americans about this technology. I'm not interested in nuclear. Our President is wasting time and I made that very clear to Iranian leadership in past few days. (2:38) And it's the same with Americans. We can give you a technology which takes the embargo of the Earth materials from China on you. Brings a new evolution in the industry in Western Europe. Ends with the building of these huge battery factories for electric cars... This is how it has to be. (Rick you can change the screen). This is how it has to be, how it should be.

We are not interested as a Keshe Foundation and Knowledge Seekers. We are dealing with a technology far more advanced than nuclear. Why do we waste time on it? Two

years ago, three years ago, yes. Now the technology is complete. Why are we doing it? I raised my voice to Iranian leadership and our president has run into United Nation trying to negotiate nuclear, that we get some sanctions off. We don't care about the sanctions, we shouldn't care about the sanctions because when we bring this technology down, what sanctions being created is no good. You got to understand the differences will make to Africa, even in Iran, even in India. The biggest problem for the government with let's say gas or oil is pipelines, transportation. It costs billions to build pipelines across the nation. You don't need it anymore. It's like, if you remember, Dean, in 1980s, 90s, British Telecom announced the biggest expansion of telephone boxes around England. (2:40) You remember?

Q: I do, yes, yeah.

K- And then became mobile phones. Is anybody using them? All these telephone boxes are hanging around. I don't know if they are still there.

Q: I think a few show pieces are still around.

K- So it's the same, nuclear is those telephone boxes. The new technology is the mobile phone in energy. And I advise the Iranian leadership, Ayatollah Khamenei and the leadership of Iran, to walk away. We don't need to. We negotiate with Americans two things. We give them new economy. We give them new materials, we'll bring a new economy, new industry. We bring prosperity to Africa. With allowing the African nations to produce their own material, their own gases, their own energy. Making them, giving them a chance to become like the others. Africans are as intelligent of the Asians. A lot of them move from Africa and they sit in the leadership of even the government we see in the United States after decades.

We need to move on and finish with the nuclear talks. Nuclear talks of Iran is obsolete, and I made this, as I said again and again, to Iranian leadership. We walk away from it, what is the use of wasting time? We are prepared to support American with the new technology and energy, new materials. We are prepared to support Americans with the new Space technology. We open our space T to not just to American but to all the nations and this is a new rule we set for Iranian negotiation. I never fight as an underdog. And in this era with this technology nobody's underdog, we're all equal. (2:42) We are starting a new progressive achievement and the tip has to be cornerstone to works with Americans. Keep your nuclear talk, keep your sanctions. We advised to build these units for Iran every household, we don't need gas pipelines anymore, we don't need refining anymore. We come back to all the Iranian cars and gas units to electric unit directly from ?? our system. Then the sanctions has no value. We bring a new economy into Iran. And with it, with others. We provide raw materials, or Rare Earth materials in Iran to the Americans. And we don't do it free. You sanctions us for nuclear is obsolete, we sanction you for the rare Earth materials and what can bring your economy forward. I think you lose more than we do. My friends, you're American embassy is on the line when we met last week. You made a mistake. And now you know how you pay. Technology will be given to Japan. Technology will be given to India. America will fall behind.

Do we need to talk about nuclear? As I said, this trip to New York should have not taken place. And if you look at it, we had the most respectful, condensed talk at the United Nations General Assembly by the Iranian President since the Iranian Revolution. And this is how it should have been and that's how it should be today. I pay all respect to the Iranian President in the speech in United Nations this week. That's how we should have been, we should have been acting, (2:44) had all the problems which Ahmadinejad as a Jew brought into Iran, for the benefit of his private bank accounts in Israel and the rest of the Iranians. We are not interested in nuclear negotiations. No way! Why should we waste time? We sanction Americans with a new technology of rare Earth material. We sanction Americans with the new Space technology. We speak to the Russians. We speak to Ukrainians. We speak to the Israelis. We speak to every corner. Iran, Tehran has to become the center of peace negotiations due to its technology. And then I want to know who will be shamed to keep the sanctions. And this is the seed I sit as an advisor to Iranian Government and an advisor to Iranian leadership. We have to understand what we have and uses of it. And I advise the Americans, don't boycott yourself from new technology. We put sanctions on you not to receive the new knowledge. And you'll get harmed more by your own behavior than us with a few nuclear bits.

Do we need nuclear power stations anymore? Do we need nuclear bombs anymore? Because plasma technology can take anything out in fraction of the cost fraction of time. But technology as I said to the Iranian leadership past few days, should be the process for bringing peace with Americans and with the rest of the world. And we spent a lot of time in past two weeks in negotiating this structure with world leaders, those we have access to those who listen to us. (2:46) And we have to understand what's the use of talking about a toy we used to play with when we were children. It's sounds good to play with and put in your pocket, maybe it's good for my granddaughter. But not at this moment of science and technology. Let's see how we build up, how we shape up, and how we go up with this to see it in the future ??.

Any other question?

Q: Mr. Keshe, thank you for that wonderful, full, beautiful answer.

K- It's not a beautiful answer. I spent last three months with the Chinese, with Americans, with the Iranians, with the Middle Eastern governments, in every shape or form, to find a universal solution with the new Keshe technology. None of them want this to come out, because one way or another, they lose their power, or what they think is their power. Chinese bringing this out, I showed you a picture with them, we were producing materials, rare Earth materials with them, they see this, Keshe Foundation is a threat to them, because what they invested for the past 40 years buying all the rare earth material, mines and everything around the world, blocking them, without anybody knowing, now it becomes useless. So it's no good to them. Gas production for China is a nail in the coffin, because they can't sign a contract for 400 billion with Iran for gas production in the south, and now we don't need it. Take it, we give people (gas unit) to do it themselves. A lot of

things will go to ?? No where. Americans have spent so much money, they created so much mayhem, "fraking" and the rest of it. (2:48)

You got to understand something very simple. Once you can produce the gas and once you have the other part of the technology of Keshe Foundation, you can produce Petroleum in any shape you like. Doesn't need refining anymore. So Chinese don't want the gas to come out, because they lose the economical control they have. They're already in a big problem in China with their structural economic structure. Americans are the same. They spend so much money. They're in a big problem. Oil countries and gas countries don't want this technology to become public. But this way is the status quo, benefiting to those who are putting billions in their pocket. But they don't take any of it with themselves.

Then on the other hand, with bringing this position America cannot sell the old stockpile as they use in Ukraine and Israel. After all now they have to produce new latest models, because they now they have a room to do it. So this is not my saying, this is the talk of the President Biden two days ago. The stockpiles of the old weapons all been used in Lebanon, in Palestine and in Ukraine. This creates new jobs, he says, for our advanced weapon technology people. My God! This is the word of the most powerful man on this planet. We emptied, we got rid of the old stock, now we create new jobs. Who gets the new jobs? Who's paying for this? And then you understand more why we're in this doldrums, with such advanced technology, with Keshe Foundation. (2:50) Let's see.

Q: Thank you for explaining that Mr. Keshe.

K- You've got to understand you're a British. You have the same problem in UK. And in UK, the monarchy is separated than the kingship, kingdom. And monarchy does anything to hold on to. The assets of what they are taxing Charles and his family is the kingdom. Monarchy assets has got nothing to do with the nation. And it's not taxable. Two three reasons. Nobody knows how much it is. Secondly, it's kept as part of the assets of the king. Not the royal family. All the jewels, all the gold, which British stole from the Spanish, centuries ago, decades ago, all the wars 140 billion dollars of gold taken out of Libya, any other thing which is like this belongs to the British monarchy, does not belong to the nation and is not part of the inheritance of the kingdom. It's a separate things. This asset of monarchy which is all the gold's runs into billions, which nobody talks about it, is kept by the Royal Bank of Scotland, and it's not part of the English assets to be taxed by the Royal structure. This is part of our problem with negotiation. (2:52) British have trillions of dollars of gold gathered since Henry VIII and before. Which the government of England has no access to. It does not belong to the nation. It belongs to monarchy. And that monarchy is only the king. He is the only one who's got control over it. It's never sold, none of it has ever been. Even if it's been lent to the British government to raise funds in the market, after raising funds and payment the gold value has been returned back to the monarch. This has happened two, three times in the life of England, where the government was in a critical position. They could not raise every other nation by Second World War. Monarch gave assets to the government, government then returned them assets back. You can never see it in the data book.

And part of our problem is this gold sits with European monarchies. And this is part of the structure of problem we can produce gold as much as you like, but disturbs the pattern and devalues all what these people fought for centuries. You've got to remember, House of Lords, half of the members, plus of them, were all pirates who stole gold from what we call, the Spanish and Portuguese, and they brought it in. The more they stole, the more Queen Victoria gave them. She encouraged them to go and rob the Spanish. And who did they bring the gold for themselves? No, they brought it from Monarch. Where is it? It sits in the vaults of the monarchy. And this is one of the problems we have with England in these negotiations.

As much as we can release rare Earth materials in the new technology, (2:54) if we do anything else we damage the others. This technology has created its own enemies. And they are fighting with, what we call it, "hand and teeth" to keep it down, that they can at least keep the status quo in. Now you understand that Keshe Foundation technology is not one fault, it's many faults, and this is why we get all sorts of things around us and we... we can't get things moving so easily. Each move damages somebody's position and somebody's wallet.

Q: Thank you. Knowledge Seekers, Mr. Keshe, we now understand why you, you, you, deal with the Soul and, and go through the Soul to, to gain in a, you know, different, field strength, to be able to move physicality's. And that explains a lot, what you just said. Thank you for all that explanation.

K- We need to, this is why we're running to, I mean even we gathered millions trying to build the Keshe Foundation. The Europeans set up the system to be defrauded. I don't know if you know I can release the documents. Those people who have defrauded us with millions, 2-3 years ago, and what we call, the prosecutors, in Europe have issued a warrant for the arrest of these people, confirming that they've been defrauded. We are in position of the documents of the warrants. I can put their names on the screen, but that's the job of the Interpol and the governments are not supporting. This is one of the biggest fraud in Austria, in past 10 - 20 years. (2:56) The prosecutors, January of this year, issued the warrant for the arrest. They confirmed we've been defrauded, after a year and a half of investigation. And now, the Dutch prosecutors are holding back, because involves, one of the biggest banks in Europe, involved in defrauding Keshe Foundation. We'll get the money back, because now the warrants have been issued one way or another, it'll go to court. So, people thought that Mr. Keshe did this and that. I can, the way I showed you documents, I can show you the warrants. It's a well-organized to Keshe Foundation, by, more or less supported by governments, otherwise they would have done this in different. And this is why we are in financial situation, time to time. We never been, for years Keshe Foundation run, you all came and went and never knew anything.

But now, the Chief Prosecutor of Vienna has issued a warrant for the arrest of these people, confirming a massive fraud, Keshe Foundation. Even the major bank in Austria is implemented, being part of it, or they did not respond to prosecutors. We've been allowed by the prosecutors to see the documents in the... they allowed us, we took pictures of it,

pages and whatever, the warrants and the rest. We didn't come to cheat any of you or whatever, it was just all of us getting involved to expand, but this expansion had these problems. Now the warrants are issued and these people... we are not the only ones who were defrauded, they have a warrant ... case for 6.5, 4 million in New York bank in January of this year too. (2:58) And they're supported by major banks.

Q: So Mr. Keshe, can I ask a question from that then? So the material... Going back to the material, do you have a name for this material?

K- It's known as rare Earth material. These are the backbone of the new Space and microchips.

Q: So it's a combination of elements, of materials?

K- It's a very specific material, it's created in a specific way, we never teach it. It's created in a specific combination, and it's not the way you Knowledge Seekers think, "Oh, we can produce this and that." And it's not the process as you produce, you know. We can produce gold. But this rare Earth material, it's taken me nearly 20 years to complete, and this material you see is produced in past few weeks. We can produce radiation and we can produce what we call, rare Earth material combination with the space nuclear material which is beyond Plutonium to create a new conditions. It has a huge, huge implication, application. A gram of this used in an appropriate way, it has to be processed in a certain way, it can create a massive shield across a nation. (3:00) This is not talk, we already tested, we know.

Q: So, we go back to a plasmatic condition Mr. Keshe, with this protection of a, we know the Soul would do no harm and it's all linked. And this is also this material is a matter state condition is this correct?

K- No. It is in the energy state. If you touch it and put it on your skin it gets absorbed like water, like oil into your body. It is very much like a human skin, flexible, separated. It's like the way the separation between your fingers are, you think it's just accidental, otherwise your skins can stick together. We understand the technology and we developed it that way. And you can just put a finger on it and put it on your skin and you taste it and you live with it and it becomes part of the energy. But then you can convert it into matter state if you want to. But in the new advanced technology in communication you don't need to create a solid point. You need to create a dynamic, flexible point like a brain. And this material allows you to do that.

Q: So what are the nations going to be fighting for? This is going to completely change how humanity interacts on planet Earth. (3:02)

K- This is what I said to Ayatollah Khamenei and his team in past few days. Why are we going to beg on a begging ball when the ball is on the hand? We don't ask anybody to beg. We just prepare to give it, share it and do it.

When I met one of the American highest ranking people last week in Vienna, standing in front of American Embassy, he was shaking in his skin with all his power. And what he was told, and what is the next step? We don't work on the ground to do these things. We work over the ground, and over the top of their head, so they can see what we are doing. And I said to Iranian leadership, stop going talking about 5plus1. When I asked the Ayatollah Khamenei to start negotiation, it wasn't about 5plus1. I said we can just talk about nuclear in a different way, and now why do we talk about 5plus1? It doesn't exist. Because the technology is obsolete, let the children play.

My advice to the Iranian government has been direct. We share technology, we call it TIEP, Technology in Exchange for Peace. With the African nation, third world nations very rapidly in next 3 to 6 months, we open the doors of new technology and self-sufficiency. And at the same time nations like America and European nations want these rare Earth materials and new dimensions it brings into play. We are prepared to share and we are prepared to negotiate. (3:04) We don't bring any sanctions, the only sanction is on you not to use it. You sanction yourself. And as I said to Iranian leadership, it's our job, especially the Keshe Foundation in Iran, to start producing these systems as fast as possible. Still people pay for it, still like the car tax, every house we know has one. You have a house, you pay for a television or radio license in Europe and the rest of the world. You pay for, you're using a gas ?? Gans system, technology belongs to Iran, you pay for it, belongs to the nation, you pay for it. And then everybody has and they pay according to their, their, what you call it, their wealth. Nobody is deprived, but everybody is inclusive in science. Those who are near me they know how much I've been wrecking past few days with the Iranians and even with the Middle Eastern people. They just we don't understand... we don't understand the technology they understand fully, but they're afraid of its implication and application.

Any other question?

Q: Thank you. Thank you for your knowledge and your understanding Mr. Keshe from the Creator. It's quite unlimited and astonishing to hear it. Thank you so much for everything you do. I was going to ask some other questions Mr. Keshe, but I think you've answered my question very comprehensively. So I will let somebody else take a position. Thank you Mr. Keshe.

K- You're welcome. You've got to understand, we call it gifted Souls. You don't come here just to ask a question. You come here because the question is set for you to do, if you understand. (3:06) Working through the Souls. And it was necessary for this question to be raised today and to be answered this way. That we don't play hide-and-seek. We play very, very straightforward. We should not be sanctioned as we can sanction you and give this technology to Russians. Give this technology to your biggest enemies you think they are and then you'll be nothing. I could have I've shared this one directly with the Chinese, but the Chinese are so scared of this. This, especially the ?? gas and the rare Earth materials. They're scared to death this is to come out. And now we put it on the table of negotiation.

And the beauty with it is, we bring a system, we make it for you. What is there does not need concept, it works. This morning I received from one of the biggest operating houses in the world, this message, I just opened my... It says, "Mr. Keshe, congratulations! Our nation leaders have just understood the technology. They need the gas as fuel. How much your gas cost, how fast can it be implemented." This is from one of the top five nations in the world. It took them a long time, now they say they understand. Let's see what comes of these kind of position.

Q: Thank you Mr. Keshe, I love the fact that you would actually give it to the most humblest nation as well and that's the beauty of it. And the beauty... (3:08)

K- We have to, we have to, because that's how they were controlled. When I have what you want me to control with, you can't control me. And this is the way it has to be. When I said to our Iranian leadership last few days, when our nation has all the gas, all the fuel, all the energy, why do we need to worry about what the Americans do, or do we need to build a nuclear power station? Why are we building these nuclear power stations where now this new technology sits? Do you know how much transmission lines costs? How much nuclear storage costs? Iran is in the phase, first phase of nuclear power. What are we going to do in 30, 40 years with these power stations when we come to obsolete, like in England? Hinkley 1, Hinkley 2. What happened to them? We don't have the finances to cover. But with this technology we can. We just put a machine on top of the machine, the reactors is domed for billions of years. But building.

This is one of the reasons Americans are stuck and they're trying to force the past, because they build the, as I said many times, they built all these underground cables, and everything else, and the satellites, billions spent on satellites. Now, how many of you have, what you call, these Cosmic Ray Bundles? How many of you have these UBESUS units? Yeah? This obsoletes the, what you call, the, all the satellites, all the communication systems. This new, (3:10) what you call, Cosmic Ray Bundles it literally makes all the satellite billions spent on it obsolete. And don't you think the African nations have the right to have it? And what is the future of this? But they spent billions on satellites. Now, sorry, Keshe Foundation has put a simple unit in the market and communicates faster, no interference, nobody can intercept it, no need for encryption. And it's instantaneous. How many of you connected last Friday to the systems, with the system you have? So we, we have made billions of investments by the Americans and the Europeans in this latest technologies in communication, and today.

I just received a message from our people, just let me read what it says. It says, by the way, second parts of the Cosmic Ray Bundles are sent. So, those of you who took the Bundles, now you receive your second part. If you announced that you received the first part. And your system, we teach you in the future, how to connect it to your computer, how to connect it to your mobile phone, and you don't need to pay a cent for mobile communication, nobody can intercept you. And this is the beauty with this technology. It is already at the reach of every man, every corner of this planet. All of you who took the Cosmic Bundles. (3:12)

You already joined what you call, the new world of science and technology, that the Americans don't want you to see. To you, it's just a unit because you're children of this technology. But to those who understand this is the end of control in communication. End of control in limitation of communication. Through these you will see in the very near future we deliver food, we deliver energy, you deliver everything you need.

You remember years ago, if you go back on the keshefoundation.com, there was a tent, they call it the, what you call it, the open, what you call it, Oasis system. This is that Oasis system. This is it, now it's become such a compact, People don't understand what's in this box. Even our own people don't understand the potential of this system. In the Oasis system we had no telephone, no communication, we gave you water, light and everything else. Now with this you have a Universal Communication system. Not only through the word, you can connect to the Soul, the guy is doing this, doing that, I understand, I feel the emotion. This is the fear of the next generation.

Q: So Mr. Keshe, so this, you mentioned something earlier, you said that no one will be able to bypass the system, so you have direct communication from, between the systems, between the Souls, between these units, and nobody will be able to, all this technology of computers trying to hack, (3:14) you know everything like this, and then blocking communications.

K- You hack to the lines from the Earth to the Sun, then you can hack into the system.

We had a very, very interesting position, people give us information without then knowing how we evaluate it, what we see, for what has been set up to do. We have a couple who have a unit and a Headset, shared Headsets. And it's amazing in sessions, some sessions they feel exactly the same, they don't, haven't realized that they are carrying the two together with it, so one carries the other. You understand? It's already communicating closing the system. So you don't need to speak to your wife, you have a headphone with you in New York, and she has a headphone with her with a unit in Australia. You know each other, you understand each other, everything is done, what's the use? You don't need to call the telephone. Then the reason of telephone is to carry emotion, you carry it. These units and the prices we put out, is a gift. Especially the way and the length of time it takes to produce them.

Q: I think many Knowledge Seekers are aware Mr. Keshe of your, what you do.

K- I hope so we're just pushing the world leaders to understand.

Q: Yeah. I think you just did. I really do. I think if they don't, there comes a moment when every man, every Soul has to understand the position that they've taken for so long but in the same instant it's over, it's finished. (3:16) It's now time, it's now the moment the Souls are elevating they're now aware of other dimensions and other possibilities. And things are changing.

K- Gradually, step by step. As the Armenian says << Armenian language>>, we have to go step by step and bring the change irrespective. The only objective, or the only target for the Keshe Foundation Knowledge Seekers has to be availability of the knowledge to every living things on this planet and beyond on equal share basis. To bring the condition of equality and peace, and that's the target. And that's what I said to the Iranian officials. TIEP is tipping the world present condition. And technology and exchange for peace is the only way. And I said to Iranians, withdraw from this 5plus1. Why are we doing it? Let them come with a, not a begging bowl, but with the proposal that, you know, okay nuclear is obsolete, let's talk about the future. Would the sanctions hold? I don't think so.

Q: And that's the beauty of plasma Mr. Keshe, it's always the weaker, the stronger, giving to the weaker and you've changed the position, so you've flipped the plasma and... I always find it very strange how political leaders, governments and individuals don't understand the beauty of what's been put on the table.

K- They understand, I just explained it to you. This is economical, financial and everything else. Yeah? We've seen it in... (3:18) I think the American election this time, shows the true face of American thinking, right across. The prejudices, the joys, and the collaboration, everything this time is in it, and it's actually the full characters of a human being in the whole nations put together.

Q: So what would happen Mr. Keshe if these units will be given to the presidents and everything and they communicate to the people in a different way, and use the technology?

K- What's the use if you give a Rolls Royce, a jumbo jet, to a president who doesn't know how to drive or fly? You understand? This is the problem. This is the biggest thing. Those of you who were in Sanya, you saw two army generals. Not the one who spoke, the other one who was sitting most of the time. He is one of the highest connections generals in Chinese army, military. He goes back to the .. leadership. And they are scared what this is going to do to China military wise, economic wise. It's not that they don't understand. The problem is they understand fully the implication of it and that's why they are scared. As long as Keshe is not gone to the Americans, we can hold it. And we don't run, what you call it, riots (demonstrations), we go into this embassy people come outside and start (shouting) Keshe Foundation, Keshe Technology. We deal with these people one by one. (3:20) One by one.

Q: At some point Mr. Keshe, you have to let go, you have to trust in the Soul, you have to trust the knowledge, the teachings, the understanding yourself. You have to come to a position at some point in your life structure. You have to... even if you just are very physical, there comes a moment where you know that the jacket is going to be gone and then you have to take another position. And so the belief systems, the theology that all has to open up. And this Communication Bundle is part of that process. And as you said many, many times, there's no stopping it. So it's just, it's been delayed. There's no time for it to come forward.

K- It'll come out forward when it's the time for it. I always say. I wish, I want it, but does it mean it's the right time? And people around me are getting frustrated. When is the right time? Why do you delay? Why don't you do this? Because it's not the time. We haven't come here to do the rush job and go. We've come here to change the fundamentals. You understand?

Q: I do I do understand Mr. Keshe, I really do. And so, just very quick on a last little note, would this communicate with, I know this is stretching it a little bit, but would this communicate with, say, like a plasmatic car? Would you need the car? Would you need the car?

K- If you want to, yes. You set it up for a specific purpose, yes. Why not? There is no reason why not. (3:22)

Q: The reason I ask this question, Mr. Keshe, sorry to interrupt, is because I know that many, you've mentioned it, many large organizations are starting to change position and de-industrialize and all these things and this is all deeply connected. So how would we help them so that they lose their fears of this technology?

K- There's no fear, it's the greed. It's a different way of putting it, it's a greed. What's going to happen if this technology comes and we have no more control over it. We have no more say on it. You understand? This is, this is the problem. This is the mess which is held in and is part of. You understand?

Q: All I can say, Mr. Keshe, thank you for everything you've done. You're quite incredible. Your Soul, of what you've accomplished and what you're doing for humanity and all the Souls. I know each and every person that's present, and really listening to you on many multiple levels. We thank you, for the Creator, for the brilliance of bringing your position forward.

K- I cannot do it without you lot in the background.

Q: Yeah, we'll always be there, Mr. Keshe. Always.

K- Each one of you help and support in a different way. (3:24) And this is part of what I call, collective work. In every time, in a way as I just said with respect to this situation with the fraud, which we got defrauded. And I thank God in so many times for it, because it allowed us to bring the technology forward. We would have got involved in building factories, and things and then research would have taken a second position. But with getting tightened on the belt and loss of millions, we concentrate on research and development. And that has brought us in this position, past 2 or 3 years, we're spending more energy, we closed all the factories around the world, all the other bits, and concentrated only on research. And this has brought us this privileged position to be able to do this.

And it's a... it's... at the time it looked very, what you call it, damaging. But, sitting here today, I thank God for... You know, it's like when you're naughty, you don't know what you're doing, and your dad changes things in the background, as a way of your... because you don't know that I do it, and you learn. It's that kind of thing. You're not supposed to go into commercialization, concentrate on delivering the technology and we're seeing it. (3:26) And thanks God, when I look at things, how things are and the way it's developed and it's developing. We don't talk, we sit on the table, it can be shown, it can be done.

Q: I'm smiling to myself, Mr. Keshe, laughing at your comments about the naughty children. ...

K- Yeah, we became naughty, we tried to go and earn money, for the Foundation to grow on its own, and it wasn't. It has to be done by the nation, it has to be done by the government. When I was little, a very young boy, my younger brother came to my dad says, "you know something I don't want any more money from you" my dad said, "why?" He says, "I'm going to start a juice company and I sell juice" my father said, "that's good" he says, "okay". He says, "But I need the money from you to buy the first fruit." "Oh", he said. And he started his selling juice, making juice. And he wasn't so successful with it, because he was too young, nobody. My dad had started buying the juices in the background, giving to the people neighbors, "Go and buy his juice, that he doesn't feel a failure." And after a few days, he says, "Dad, it's not as good as I thought." My dad said, "Yes, I paid for the fruit and the juice, I hope you learned something." So, this is how it is. We learn something.

Q: We do, we all, we all learn constantly, it's never ending, and it's unlimited. I like your knowledge Mr. Keshe, thank you so much.

K- Thank you very much, shall we call it the day? It's nearly 12:30. We are going for nearly 3.5 hours.

R: Yes indeed quite a marathon today. Very good Mr. Keshe. Thank you so much.

K- Sometimes when I look at Knowledge Seekers, the love and the care we give, (3:28) is what I give to my granddaughters. It's just you give unconditionally and sometimes you make them (a) threat. Don't eat that, you have to do this. And with the Knowledge Seekers, we don't go there, we do this and we all learn from it. It's all in children of God.

Thank you very much for today and we hopefully see what we can do tomorrow.

There is something I forgot, something very important I forgot to tell, ask. Those Knowledge Seekers who joined last Friday session, in different groups. We will ask you in next week or two, to join in the same groups, but as a discussion. We want to find out, exactly what happened to your group. How many of you felt the same? And, this is important for us, structure of the systems we set. So maybe next Friday or Friday after or maybe sometime in during the week we ask group of you if you can join us to discuss what happened with you in the session. Because you should have all felt the same or

should have been more or less the same interaction with all of you in that group. Thank you very much.

R: Thank you Mr. Keshe, and we can go with a comment here from YouTube, that came in early in the workshop, from someone called Harmony and Happiness, who says, "Thank you very much from France, I am very happy to be able to listen to you live, it's for the first time, and it's just extraordinary." So, a thank you from France, Mr. Keshe.

K- Thank you very much. We have very good friends in France. (3:30) Thank you very much, and see you hopefully next week.

557 KSW September 26, 2024
