

559th Knowledge Seekers Workshop October 10, 2024

(Quick Index 18 pp, Introduction, Topic Index ; Need to do; Key Phrases, Words)

(Auto transcription from Elias)

Secret of CH & NO connecting P to Creator - crystal structure of U; 2 lives of Soul and P; O scientifically confirmed G to planet; Deeper on CH & NO; C60 crystal; CH & NO creates emotion; How to transmute; C-H in sugar CH₃; C chains of narcotics addiction - same with sex created through hormones; Calculate AA of star - create fish tank - how life will be; Not light-years - instantaneous; U connected through H - 1 proton & 1 electron - cornerstone Creation - Creator & Mitra; Fundamental Element - neutron; repetition same process; C14 + H is C15; HC is Soul - NO is P; Air ration 4 O to 1 N; Control transmutation through O & breathing; Survive in U by C14 & H or C15; C14 to Creator; NO right mixture connect to Soul; Feed through breathing; Overlap of CH with NO creates emotion STM & STP; STM black dot because C; U black because C; Connect to creatures in U through HC - not P; Love of Creator - see light; 3 teachings on HC & NO - Knowledge of Creation; Giving - level of love; If abuse sent back; Scientifically understand own creation; Proton Black Hole - Unicoses electron - same structure as Element; Fish absorbing energy in water; Mermaids split Souls; New teaching - subdivisions in empty space - sub-seminal lives; About sugar - N feeds AA; Drunk with Love of Creator C15; Centuries to decipher today; Understand fields and emotions; New Twinity Soaps - trial - like Pain Pads; way to release T without certification; Brazil Conference - KF Humanity Award; Crystal explained scientifically & plasma; How crystal formed - U created; Not spherical - elliptical; Volcanic eruptions responsible for variety of life - mix C - N - O; Diamonds; C14 purest form can't break; Hormones same as narcotics - made from emotions; U has "DNA"; Falling in Love - C15 to Creator - feel in heart; Elements in U; UFO crystal structure - 100 km; 1 ray of Creator - own crystal & U; Explains graph - KS connected to system; 3-D graphs see Soul; Daughter Mitra help go to another U; Nano Mirrors - 5 finger receive fields; Control own Self - interaction of fields; RNA; Hormone control hair - through emotion & environment - research why hairy; 25 years to DNA; Children of older parents high intelligence - gifted; War imminent - America control detonation of bombs - decide for Israel; If hit nuclear sites - destruction of Israel; Plan to take Iran then Russia and China - Global Domination; British Petroleum wants Iranian oil - control oil prices; If Iran touched release gas unit - other technology - Transducer headphones - sound through bone; Not afraid to release plasma technology

Topic Index

Heavy attacks on KF websites - delete "cookies" in browser; Man lives 2 lives same time - Schizophrenic life - Soul and P; Don't understand own beauty - how it works; Creation has majestic system of connecting with itself - expands to totality; H - C is Soul; N - O is P; Test NO scientifically - confirm gravitational fields of O in liquid and gaseous states; N connected to matter G fields of Fe; All 3 state in NO - physical manifestation on planet; Some planet only gaseous - single element; Other elements not effected when pass between horseshoe magnet; O bridges both sides in matter state - therefore

scientifically teaching is correct; Shows how N-O become part of amino acid (AA) or COHN of man; 4 times 16 (O) is 64 - strength close to Zn & Cu - makes muscles and brain tissue; Other field strength associations 3×14 is 42 - covers Ca & K; Multiply M field strengths by 1, 2 or 3; Multiply by 2 get 28's, 30's, and 32's; How structure of P on this planet is created; Planets with no atmosphere or surface - have life inside and not outside planet; Understand Knowledge of Creation - Micro is in Macro of Universal life and local physical life on planets; Move away from matter state - all 3 bring a common denominator maximum extent of field strength of Soul; H is starting point for anything we do; STM & STP both work within 1st D and with same D; 12×5 is 60 - crystal structure of P - common denominator; C14 becomes C12 and C14 ?? becomes crystal structure of C60; $C14 \times 4$ is 56 - how C14 is connected to both U and P; C60 gives physical muscle tissue through Cu; C14 is equal and parallel to N - how AA is created and connects to physical D through energy of C12 - gives crystal structure of C60; When we eat we absorb energy interact with Soul - creates emotion between C-H & N-O - gives confirmation of existence; This shows you what you need to transmute; This is why we taught you how to make Gans's - CO₂ in water; Look at Gans as energy - fields of U - interact them with fields of matter state of life; Sugar - CH₃ does this. Addicted to C - H chains - abuse, sex, and psychologically; Get locked into one of these connections to AA; Chemical combinations of alcohol and narcotics; Same with hormones - connects to our sexual and emotional behavior; Shows how the game of Creation is played; Find chemical composition of star - easy to calculate AA - kind of life there; Create 'fish tank' of fields - feel what it is like without going there; Add part of AA of our Soul - can see what manifestation of P will be; Know how you'll look when arrive; Saying a planet is thousands of light years away - all rubbish - we can see composition and level of life on planet - transmutation is instantaneous; Everywhere in U life is connected to H - M field of "Fundamental Element"; H is 1 proton and 1 electron - a Twinity; This is the cornerstone of Creation - Creator and Mitra; Mitra is electron - Creator is proton; Together they are origin and totality of Creation, which is the neutron; H is totality of Creation; Neutron is Fundamental Element as energy; Fields encapsulate - create atmosphere of proton and electron; When you see neutron - see Creation; It's a repetition of same process - repeated over and over again; Man does not see it; H - C is 13 and 15 depending on energy - not molecular structure; C12 plus H is 13; C15 is C14 and H; Live 2 lives of Soul and P; N and O is 14 and 16 equal 30 - how connected we are to Soul; Multiply by 2 get 60 - parameters of minimum; How emotion of P is connected to emotion of Soul; Because H-C travels U and N-O connected to P; Why hallucinate when breathe certain elements - put in mouth; Control speed of travel through breathe - amount of O and N - control transmutation; Combine both on C60 and float - create own dynamic crystal structure; Air is 60% N - 15-16% O - breathing part of life - connects and feeds Soul; Problems from misunderstanding and fallacies of science. Ratio of O to N is 4 to 1 - same ratio Earth needs for its GM fields of P; Breathing air connects us to GM field of the matter states of this planet; When die and leave this atmosphere - disconnects from G matter states; If keep O connected to C15 (C14 & H) can survive anywhere in U - don't need matter state N of TPP; Live on C14 connection to Creator - creates its own composition; Like interaction of fields creates Mass; Then interaction of Mass with field package of environment creates Weight - same process and understanding; Wrongly told if stop breathing O you die - mixture of N with O connect to Soul; Why some people died

and saw light; Need right combination of N & O; Can feed yourself only through breathing - connect to C15 - Universal Energy; N in AA create Black Hole - get energy of U; Indian Guru who didn't eat 20 days; There is Universal energy of intellect and physical intellect - access to both at same time; Can get Universal knowledge - download information; Discusses graphs from systems; Understand how to connect to H, C, N, O; N - O side dealing with P and STP - where overlaps with HC creates emotion; Connect our emotion to Creator; 100 attributes of Creator in Koran - emotions of Creator - not P and His behavior; Control and use emotion of love; Cannot take; Both sides - are in balance all time; Create emotions where circles overlap between HC and NO; Emotion in physical life - same as emotion of Soul; STM is black in color on MRI - because of C in D of U; Why U looks illusive black - interaction of the energy of Creator as H & Carbons - try in lab; Convert emotion into essence of P; Why when dream of Mother feel that emotion in our physical condition - wake up and remember - because we sit in HC side; Connect to another creature in U through emotion - not through NO or P; Make children from fields of love - same in U; Understand what emotion and how environment effects - and whose love; Play with love of Creator - see the light - access to Knowledge of Creation; You are part of light and knowledge - all equal - not think better; Don't need to fight to wear jewels and crowns - call yourself a king or president; Useless to fight in P - in essence all have same access to Creator; How long will it take man to understand this as a whole - what life is about; How you and ancestors created - given in these 3 teachings on HC & NO; Use Soul to connect to Universal Community from our physical world; Change course of humanity by connecting to common denominator structure of U; Problem in most of World of Creation from P part of NO; Because we haven't understood HC or Soul part; I made man in the image of Myself; If understand HC and NO - decipher Knowledge of Creation - create life anywhere in U between a constant reference point and TPP of its manifestation; All we need is to understand the emotion - common denominator between both; Be giving - find energy level of love - transmute and transport; It's about the love of Creator, love of knowledge, and love of becoming a knowledgeable creator; If you abuse just one time - sent back to beginning; Scientifically understand more about your own creation; It's a knowledge - not breathing technique; Can all feed yourself with knowledge; Play with 4 elements of COHN; Master H - find path to your Creator; Unicoise is a different game to play; Cannot be any different than Source of Unicoise; Connected to a specific Fundamental Energy of Creation - H of U; All Universes work within to create - connect to same point; It's H in plasma - others call it a neutron; Essence of Totality; In center of Black Hole is proton - the electron are the Unicoises, Universes, and galaxies; Look through this U from a distance see exact same structure as an element - center point and many electrons as galaxies around it; Just a larger scale; No difference in all the different dimensions in Creation; Understand essence of interaction of the fields; Fields in motion create energy and life; As long as Man has energy he moves and lives - absorb energy from environment - Creator has already fed you - won't kill; Stand outside fish tank and look at fish; Tank is his U and fish continuously opens its mouth - not to take water - it takes energy from its environment embedded in water; Man is same as the fish; Change environment and fish will change accordingly; In Space man will change the same way; Soul in center will not change; Cannot put a fresh water fish in saltwater - unless a system has been pre-set; But Soul of fish can in plasma state; Mermaids manifest split D of Soul and STP; Now you

know more about yourself - can connect to your environment - emotion allows you to be travelers of U; Change breathing - can change structure - absorb energy; In AA - the N & O and H & C can reach C60 energy fields - common denominator energy of U; Teaching on subdivisions of fields - instead of multiplying the fields outwards; STM can interact with certain sub seminal dimensions of U - create life there; Sub-seminal lives have faster access to D of Creation; One day I'll explain more; This kind of life exists in empty space of the U; I hope I opened your eyes to the truth about yourself and how you exist in D of Creation and Creator; Easy to create and live - understand connection between your position and origin; CH₃ - sugar is original essence of life; C₁₂ plus 3 H equals 15; C₁₅ strength is common denominator between CH and NO; Why N feeds AA; Why sugar is common denominator feeds both STM and P; Alcohol touches realms of dream state - combination of H and C - takes you to Soul D - P has to follow; Be drunk with love of Creator - not alcohol of the man; Gift of Creator is to understand His essence, giving nature, beauty; Take men of science years after I'm gone to understand teaching of today; Those who understand get access to World of Creation instantaneously - know how to manipulate Soul & P; I sincerely hope scientists will study today's teaching for centuries to come; What he calls a dream is the reality of the U; Man needs to understand his fields and emotions;

Part 2

New range of Twinity Soaps; Any 2 combinations out of 5; Let us know how you feel when you use them; Soap will be like Pain Pads; Explain later; For extension of knowledge to unify field energies in body; Have lumps or anything use Soap observe changes - emotion or P; Soaps are extremely expensive - taken lot of research to develop; Feed yourself with fields of Soap - create that condition - change mindset; Many other things involved for 1000 Euro per soap; See what emotion they create - emotion and P together; Worth it - millions in US to reach same point; Groundbreaking work - never be copied; Transfer into cosmetics; November 9th and 10th conferences in Brazil - KF given Humanity Award; Wish you all the best; Fantastic to see hard work of Brazilian; Chinese replicating work; Scientific explanation of crystal formation - all fields come back into a center; Not matter state fields; Crystal structure is a point of reflection of energy, or light, or matter state energy balance; How diamonds are created; Diamond are created how the U is created; This shape is in rough diamonds; Shape is elliptical and not spherical - Earth not a sphere also Sun; Why North Pole warmer than South P; Creates totally different wavelength; Created from reflection of same light - not from interacting with another; Light of Creator interacts with own fields - creates own U; Not stop - continues to interact - creates all life in U - Creator is everywhere because of crystal structure; Can change size of "popcorn" to create diamond; Diamonds are created in volcanic eruptions - same procedure everywhere in U; Creation of life on this planet partly due to volcanic eruptions - different energies of C; Without volcanic eruptions - life wouldn't be here - create variety of lives; Mix C with N and O - brought conditions for AA; Latter part of creation due to salinity; C₁₄ and H make C₁₅ - crystallization; Universal alcohol to get drunk with - essence of Creation - connected to Creator; C₁₄ purest form - can't break down - connected to origin; Field energies of U interact with themselves - C₁₄; C₁₅ is an energizer; CH₃ is C₁₅ too - Matter and U energy state - Combines with COHN; Why

narcotics effect man; Same with hormones - like testosterone; Same with Sex cause addiction - subconscious level reach to Creator; Due to hormones; Understand how everything else works - get rewarded; Emotion brings a physical reaction - why we fall in love; Discover physical energy level of falling in love - find C15 - because in both dimensions; Why feel 'falling in love' in our heart - because CH & NO are flowing through heart as AA; Emotion of P is connected to C12 - emotion of Soul to C14; U has something like DNA - why always see same sized planets; Not find same elements in center of Black Hole of U - as outer boundaries - different conditions; Outer boundary of U have pressures from other Universes outside; All have same common denominator; Have to have a field and energy to create a structure; Change energy into a structure; KF create UFO from fields - 100 kilometers in diameter - crystal structure; See clouds coming up in lab - beginning of physical structure; M fields of Earth interact with its own dynamic structure creates atmosphere - no difference with UFO; But it has to be dynamic; One Ray, one field of Creator - creates its own crystal - own U; Macro is in the Micro - but we never understood - we can do the same; Discusses graph from today's teaching before any computers connected to Zoom; Change your P into energy - Transmutation; More about Twinity Soaps - interaction of fields in life of man; Soaps you don't need legislation and certification - base material stays same; Keep process secret - man can abuse; Use same Soap in 2 different positions - same as Twinity interaction - don't need 2 different Soaps; Play according to your emotion; Cosmic Ray material packaging found; To form crystal structure need more knowledge; Can see your physical shape on graph - before seeing you; Make 3-dimensional see Soul & P - need to be holographic structure; Daughter of Mitra help us go to another U - teach knowledge couldn't imagine exists; Open doors into another D of life; Connect to U through emotions of Soul; All KF systems come together - each have special quality; About Nano Mirror Discs - new version; 5 fingers - how part of our intelligence comes; New systems upgraded to dual stereo system - left and right on the system have to match with headphones; Long question about action & thoughts and can we control ourselves; Change the word "program" to interaction of fields - find answer; RNA is creator of DNA; DNA is creator of itself; Transmute, (physically) transfer, change emotion, change body structure - we all know how - ignore it; Hormones create conditions in body - to have hair or not; Creates chemicals based on emotions; Used to increase our chance of survival in environment; Means our emotion changes our P; Emotion becomes a hormone interacts and changes P; Long discussion about hormones changing hair condition to fit environment; Why Middle Eastern men and women have more hair - Sweden less hair; Body creates hormones that will remove or increase hair; Lot of deep research done on this to prove it; RNA keeps record creates DNA in P; Plasma Science - RNA contains information from RNA of the U; Emotions are fields - change P; After 25 years of behavior written to DNA - passed to next generation; Older parents pass more to children; Children of older mature parents totally different intellect - proven scientifically - smarter; Don't like to speak until age of 4 - understand body language; Daughter of Mitra comes from intellect of U - matured in time; Children of Soul tap into knowledge from time U created; Man's knowledge limited to mostly about trees, plants, and animals; Don't talk about medical part - being watched; New Sight Gans - has D of Soul - Twinity; Talks deeply about war between America, Israel, and Iran - it's imminent; Americans put control on bombs to Israel - "military disarmament"; Special control systems added to

the weapons; Never restricted Israel before; Americans disarmed Shah's generals - allowed Iranian Revolution; New laser communication disability systems - first take out Iranian defenses then bomb; Expects bombing shortly if situation not resolved inside with Israelis, Americans and rest; Iranian have 100,000 missiles will rain down upon Tel Aviv - State of Israel totally changed - last Yom Kippur; Israelis going into Lebanon and Syria; Same guy who constructed Ukrainian War sent to Israel; Iranians better strike first or won't be able to respond; First Americans will disable all electronic defenses; Expected last night - had problems with system; I hope both sides will step down; We are advisors; Asked British to help - won't do - too much invested; Whole problem is Persian Gulf Oil - British Petroleum (BP) wants to control all oil in Iran; If comes to it - we'll introduce a new technology; KF will break embargo of oil, gold, and money control; Blueprint Day - if Iran is touched - release gas production - within minutes all become self-sufficient; You couldn't make gold - need to transform to matter; We'll release T; Their plan is to take Iran, Russia will fall, then China within 5 years; Global domination; We're not scared of releasing; October Monthly Flight session keep 2 bottles of Gans's with you; Transducer headphones conduct sound through bone; KF already does; Bones create a different vibration; Twinity Soaps could be way to release technology without having to go through certification processes - work with fields in essence of Creation - we have the knowledge.

Introduction to 559 KSW - 3 Teachings of CH & NO - Change Humanity Common Denominator - Crystal Structure - Creator is HC

Today's teaching is a continuation of last week and should be studied first. Mr. Keshe has gone deeper into how the amino acid (AA), or "Mr. COHN" is the secret to how we are created and in that creation there is a "built-in" connection between us and our Creator, and the whole of Creation. The COHN can be divided into the 2 parts of our "schizophrenic" life of C - H for the Soul of the Man (STM), and N - O for the physicality (P). Last week we said that we won't find this kind of knowledge in matter state science. They found the carbon and hydrogen chains in everything but they don't know what it means, or should we say, they interpret it in a very different way. There is one thing they did find that will be very helpful for us if we have a doubt about the validity of the Plasma Science.

The manifestation of our P on this planet includes all 3 states of matter as solid, liquid, and gas. It would make sense that they should be somehow connected in the AA, which is the building block of our body. We said before that the N is connected to the Fe by M field strength of 4 times 14 equaling 56 for Fe. Fe is the gravitational (G) Inertia strength and element for the solid matter state of Earth. And O is the G Inertia for both the liquid and gas matter states. In the air we breath the ratio is 4 O to 1 N. When you pass liquid O between a horseshoe magnet with high voltage it creates a bridge like a fog between the magnets. The other elements don't do that, so this is a confirmation of scientific correctness of the teachings.

There are 3 drawings he made of the CH & NO and they contain the secrets of how we are created and how we can transmute. You have to follow along with the drawings to get

all the information. The first one goes over a lot of calculating of M field strengths in trying to show to us how the AA creates the P of our body. We know the N connects to Fe at 56. Then O is 16 times 4 is 64. This is close to the strengths of Cu and Zn, which make up the muscles and brain tissue. It's good to wonder how 64 becomes both Cu and Zn, but don't get trapped in the matter state understanding that exactly 56 is exactly Fe. Plasma doesn't work that way. Every plasma is like a spiral and contains all the elements inside it, it depends on where you tap into it. Also there are other factors that can change field strength, for instance emotions of the Soul. And then if you multiply the N or 14 by only 3 you get 42, which is close to Ca for bone structure. The importance of showing all this is so that we understand that the NO of the AA most certainly can create all the matter states of the body.

Then he went on to make the link between the HC or Soul side to the NO or physicality side and he did that through the carbon. H connects to the Creator, and C14 to the Universe (U). Carbon creates a special bond with the N in different ways. One is that 4 times C14 is 56 or Fe. Remember that the AA flows in the blood and the M fields of Fe are what keep the STM encaged in the body. Then C12 times 5 is 60. He didn't explain where the 5 comes from. But we know that C60 creates the crystal structure of the body. The important thing here is to understand that the carbon is the common denominator that connects the AA together and the local physical dimension (D) to the Universal life of the Soul. All of this is going to help us realize that transmutation is a natural process for life in the U and that our whole physical and energy structure is already setup for it. It's just that we don't understand it and don't know about it. We are learning this to give us confidence and to believe in what is inside us waiting for us to start using. Now we can understand why he taught us the CO2 Gans first. I think of the C as the common denominator of not just the body of the man through the AA, but also for the U. He gave a hint by using the word Unicose in the plural form. Is it that our Unicose is based on Carbon? By this teaching we can see how important Carbon is. But is it just a certain number of protons, electrons, and neutrons? Or is it something much more? How else can we understand Carbon? Is it a Soul or an essence of some sort? Just thinking of it as a bunch of numbers doesn't do much for me. Of course it is a M energy field, but how to conceive of its true importance?

The second drawing is still about the HC & NO but it is more how the two sides interact and connect to each other through M field strength relationships and the relationship with breathing. We should know that H plus C12 has a field strength of 13, and H plus C14 is 15 and together they add up to 28. Then on the physicality side the N is 14 and O is 16 which adds up to 30. If you add the two together it comes up to 58, which is very close to the C60 needed to create the crystal structure of the body. I understood 58 to be the minimal parameter for this. This shows that we are already living very closely connected to our Soul. I understand this to mean the Soul is providing what the P needs to live, interact, and create new life, but P is not aware of it, and tells itself that it has to kill to get the energy it needs. And then he said if we could combine the HC & NO together and get the C60 we could float because we would create our own crystal structure. This is not the crystal we see in stones, it's on the energy level and there is another dimension to the

understanding of it. What we see as crystals is just the outer physical manifestation of the fields. Nevertheless, people who are sensitive can feel the high energy in crystals.

This also shows that there is a close relationship between the emotion of P and emotion of the Soul. We can see this in sugar, which is C12 and 3H, means C15 that connects to the Creator. We have the physicality in the sugar itself, and then it links to the Universal Energies. It's the same with the C-H chains of narcotics and drugs. Looking up morphine we see that it has a N in it and this connects it to the NO, so it's not just the C-H bond. It has many C-H bonds formed in hexagonal and pentagonal shapes, which another reference to C60. All this links the Universal Energies with the local physical body, and why we hallucinate, or we can say, enter the dream state with drugs, which is another way of saying the D of the Soul.

The discussion then went into the breathing part. When we control our breath we control the amount of N and O we take in, and this can be used somehow to control the speed of travel during transmutation. The connection to the Earth's MG fields is a 4 to 1 ratio, and 4 N add up to Fe, or the solid state of the planet. Therefore, breathing connects us to the Earth's GM fields of its matter states. If we leave Earth's atmosphere we get disconnected from its G fields. It wasn't clear how, but when we travel to other planets we don't need the N, if we just keep the O, and then the C14 plus H makes C15, and with that connection to the Creator we can survive anywhere in the U. The N is the part of the COHN that is created local due to the time, place, and position (TPP) and at another planet it will be a different element, and at that planet we'll make a new AA according to the fields of its environment. It's the same process that we learned many times about how the Mass and Weight are created. We need to understand this knowledge for transmutation, then there will be no fear of how to survive at the destination.

The Creator has already provided the energy we need to live so we don't need to kill for it. We think we need to breathe the O otherwise we'll die. This is a fallacy of science. Maybe we really breathe the N and O connect to connect ourselves to the MG fields of the matter state of this planet. And the right combination of N and O connect us to the Soul, which will feed us. This is how certain people are able to live only from breathing, they have learned how to connect to the C14 plus H in the AA, which is C15, and they still get the connection to the matter state of the planet through the N and O. Otherwise, I think they would become Energy and we wouldn't see them. You may have noticed there are different ways to get the energy through the connection to the U and Creator. Another way he talked about is that the N in the AA can become like a Black Hole and absorb energy from the U. Remember, a Black Hole comes from the interaction of two plasmas that are rotating in opposite directions, they start a kind of whirlpool between them that becomes a Black Hole, which then pulls energies into itself to get recycled and find other uses. In this case it will be for feeding the body with energy for survival.

The example of this can be seen in the fish. We see the fish constantly opening and closing its mouth and we just assume that it is taking the water in. Actually that's not what really is happening. The fish is absorbing the energy from the Creator which is

embedded in the water. You may think that it is a play on words. But the truth is, it's up to us to understand the deeper knowledge. We can say, well the scientists say we breath oxygen to oxygenate our blood, and if we don't do that we'll die. They pretty much ignore the N in the air, because they can't understand it, but now we found out that N plays a huge role in being able to manifest our P on this planet. But back to the air we breath. What if we breath not for the O₂ but for the energy embedded in the air, and we use this to connect ourselves to the matter state Inertias of the planet. The same words now have a whole different meaning and understanding. Then if we could get that right combination of the N & O we could connect directly to our Soul.

Try not to get confused with all the information and possibilities, the main point is that our Creator has provided us with everything we need to feed ourselves without having to kill other Beings. All these scientific explanations are to take it out of the realm of superstition and blind belief. And it is for us to know that we already have the ability to feed ourselves from the environment, but we need the knowledge and emotion to do it. We can use this same process to "download" knowledge from the U. The same way we used the O in our breathing to get energy, we can also get Universal Knowledge.

The third drawing is about how the HC representing the Soul and the NO representing the P interact in regards to emotions. He said it like this, 'it opens a position in the D of emotion that both Soul and P share, and this is where we connect through emotion to the Creator.' He drew 2 circles around each side and where they overlap is where they create emotion. The STP is in that overlap, it's the go-between the Soul and P, but the STP is mostly on the P side of life. The higher emotions of the Creator are the kindness, giving, forgiveness and the others, and this is what we are talking about here, and not the P and its behavior. That's a different story. This interaction between the two is already setup only for the Goodness and creation of beauty, and not for taking. I think this refers to when the STP and P start taking for themselves they cut themselves off from this relationship. If we can control our emotions and get into the higher fields of love, then we can go from one side to the other. In other words we have access to the Universal fields for creation of more beauty. He said, this relationship cannot be changed. I think this means that selfishness and evil can never take over the Creator. There are spectrums of energies we interact with, but it only comes available through the higher emotions. This shows us that each of the STM, STP, and P have their own emotions, and that all the cells of the body, which are created based on the AA are effected by the emotions and all of it serves the purpose of the Soul and P. It's not that the liver, heart, skin, and all the different body parts are separate, through this process they are actually connected, and they are carrying out the desires of the STM, which comes from the Creator. And when they try to setup their own operations, then we see the kind of life we have now on Earth. But this is only a temporary situation until the Totality of Creation can correct it.

The talk about the STM showing up as a black dot on the MRI scan and that the U looks illusive black indicate that the energy of the Creator is H in combination and interaction with C. This can be tested in the lab. As we said before, that maybe our particular Unicose is Carbon based. But we really don't know the extent of what that could mean. Nevertheless, all the organic life on Earth are made of C and H chains. We are closer now

than ever before to understanding what that truly means instead of temporary theories that get fixed in our minds and block us from understanding the Knowledge of Creation. And when we know the common denominator structure of how we are all made, then we can use that knowledge to change humanity for the better.

For some reason when I listened carefully to the teaching on how crystals are formed it brought a lot of things together, especially the C60 and how that created the U. Mr. Keshe said this explanation is controversial and refers to the energy state field interactions, and because it leads to a complete understanding of how the U was formed. A single Ray of the Creator interacts with itself to become the U. First remember that everything has both a M and G fields, which just means when you push out in a direction, there is an automatic pull in, in the opposite direction. In Plasma Science we say Energy is M fields in motion. So a ray of light travels as far as it can in a space until its M and G fields reach a balance with each other in respect to its own position. (Does that mean in respect to the environment it is moving in?) This all depends on how much space there is for it to move in. For example, creation of small diamonds is in a very small space compared to a U. Then it reflects back on itself, travels the same distance and comes to a balance and reflects again. These reflections depends on how much energy there is. All these reflections start to create the outer boundary of the entity.

Watch how he draws it, and then it will make sense to you. Then you'll understand why the U is not a perfect sphere, it's actually more oval, and this is due to how the field interactions reflect off each other in finding their energy balance in respect to each other. This is how everything is created from the fields, but we only see the matter state boundary not the fields that created it. It just happens that rough diamonds have kept this field shape in the matter state too. So a rough diamond can look just like how our U was created in the field state. The Earth and Sun are not really spheres, though they appear to be that way in the matter state. The real revelation comes when we realize this is how our cells are created and our body too. This is the "missing link" when you contemplate how does the AA floating on our Gans Box become the cell of the man. It pops out like a popcorn, but it is going through this balancing of its M and G fields and reflecting back on itself, on the boundaries of its limitation of expansion. What he drew on the whiteboard is how Creation creates itself from the C14 to the C60, but we don't see it happening in the matter state. All we see is the end product of its manifestation. If we can learn to control and use our emotions we can direct the C14 to the C60 and create our own crystal structure and go floating around our environment. There was a saint called St. John of the Cross, and he used to get into such states of devotion to the Creator that he started to float in the air. Did his Soul automatically know how to create the crystal structure with the C60? And maybe his pineal gland started producing hormones of C-H chains and C15.

It was mentioned in different places about how the C - H connects the P to the Creator through sugar (CH₃), drugs (C-H chains), and sex (hormone made C-H chains). In a way, there is implication that our Creator is actually a C - H Being, because the whole Unicoise is connected and made out of it. We have the C14 plus a H becoming a C15 directly linked to the Creator, it's even part of the mechanism for falling in love. Then add 3 H's

to C12 and we get the sugar which is also C15. And then the C14 energizes the C60 which blows up all the flat matter states and gives them the dimension of crystal structure, which creates the U, biological bodies for Souls to inhabit, and all the other things we call life. He said, that the excitation point, I think that means the sexual orgasm is so intense that it can lead to addiction because we subconsciously reach the point of the Creator. The key point here is "subconsciously," because it is done mechanically through the physical structure and by repeating the action, we repeat the experience. There is no self-awareness or the high emotion of the love of Creator necessarily involved. When the consciousness elevates and there is love, as what is attempted in spiritual practice then Enlightenment can arise. It is the same with drugs, they can connect us to the Creator. If these things are not understood correctly and are misused then they lead to destruction. It all depends on our intention and level of emotional maturity. It's interesting that the "Devi" of this planet, or should we say the Soul of Physicality of the Earth uses the orgasm as a way to keep the animals reproducing. He called it the reward system, if you do this action then you get this reward. They don't care about all the personal dramas going on or the social norms, they want new bodies made regardless of the circumstances. If the humans and animals develop higher consciousness then all these things will change. It's like we are the lab rats in a huge experiment of life. And all the time we are worried about our petty little emotional experiences, while those in charge are looking at planetary and universal trends and consequences. This is truly an amazing teaching, because for the first time we are able to scientifically understand the universal process we are in, without our even knowing about it.

Before the workshop started he turned on the systems to get a base line graph. But then guess what happened? He said, the KS connected to the system. Does he mean that all the Souls connected, because the physicality's were not aware of it? It's a wonderful development and a great progress in humanity's advancement. It means our Souls are working with him without our knowing it, and the P is just doing its own thing.

Other Topics:

Looking at our U from outside we would see that it looks just like an element and all the galaxies are like electrons spiraling around a center;

The variety of life on this planet came from volcanic eruptions, because they mix up the C with N & O for the AA creation. The latter part of creation was due to the saltwater;

The reason we physically feel falling in love in our heart is because the C15 (is energizing) the COHN that flows through the heart in the blood. I felt this physical sensation in my heart one time, and now I understand that it was the M fields of the C15, and not the story I made up about it.

Thanks for listening.

Quick Index

(There have been heavy attacks on the KF websites in the past week and we took some steps. If you get the status of "forbidden" when trying to go in our websites, all you have to do is delete the "cookies" in your browser and that should solve the problem).

(The teachings continue to deepen our understanding of our own existence and how we live two lives at the same time, or what we call a 'Schizophrenic life.' One is in the dimension (D) of physicality (P) and the other in the D of Energy, or the Soul. In a way, we are all "Beautiful People," it's just that we don't understand the extent of our beauty, and how this beauty works. The Creation has a majestic system of connecting with itself, (and it becomes an expansion of its totality)).

(Last week we spoke about Hydrogen (H) and Carbon (C), and gravity (and how all the materials in the body work through transmutation and transportation. One is in a physical D and the other in the Energy D. So we all live a schizophrenic life. (Last week we drew the picture of two circles, on one side was the H - C, and the other side N - O. The N - O is related to the physical life. The validity of this can be tested by studying current scientific research where they confirm the (gravitational fields of O in liquid and gaseous states. Whereas the N is connected to the gravitational fields of Fe, which is for the matter state of the planet. (Therefore, we have the G Inertia fields of all 3 states of matter for the planet covered by the N - O side, which covers the physical manifestation)).

(If the planet were only gaseous, then we would only look at one element, because there is no matter state solid in it. ?? When the planet have a composite material state with no gases in it, then we look at its matter state connection to find light).

(Oxygen has been confirmed to behave as a gravitational field, when in the liquid state it passed between a horseshoe magnet with very high voltage. Other elements that are passed through it don't do anything. But when O is passed through in the liquid state then it builds a bridge between the two ends of the magnet. This shows gravitational characteristics, and it comes into balance with the magnetic field of the earth, which connects to N, as we said before 4 times 14 is 56, or Fe. (It's not clear what happens to the N between the magnet). (If you pour the ?? H and O through the magnet it forms a white cloud, and sticks, and becomes like a matter state. This is the confirmation that O ?? has gravitational fields for the liquid and gaseous states on this planet. Therefore, scientifically we see the fundamental understanding of the teaching is correct)).

(?? Between the magnet we have two M fields connecting. ?? This is the same with the H & C. You Knowledge Seekers (KS) can do this test if you like. This shows how N-O become part of the amino acid (AA) or COHN of the man. Because the N connects us to the matter state through the Fe, and the O connects us to the liquid and gaseous states of the planet).

(Further, if the N is 14 times 4, or 56 and the Fe. The for O 4 times 16 is 64. This is the limitation of the materials, which can be connected, ?? or become part of the body, which is the life structure on this planet. (?? The M field strength of 64 connect to the Zinc (Zn) and Copper (Cu), which make the muscles and brain tissue)).

(There are other field strength associations such as 3 times 14, which is 42. This covers the Calcium (Ca) and Potassium (K). The same goes for other elements (in the body) where you can multiply the M field strengths by 1, 2 or 3. There are also ?? strengths we call the 28's, 30's, and 32's, because of the multiplication by 2. This is how the structure of the P on this planet is created. (?? It is linked ?? connected to the strength of the M fields of the planet)).

(This is why we don't see life on planets that have no atmosphere, or a surface on them. But it doesn't mean that they don't have life inside the planet. Once we understand the totality of the Knowledge of Creation in full detail, then we can easily understand the rest and how the Micro is in the Macro of Universal life and the local physical life on planets. (It's all connected) We have no choice but to understand it. Then we can see how if we add Ca then we'll get a bone structure. And if we add Potassium we'll get field radiation and connect to some of its characteristics).

(In the next step we want to move away from the matter state and move in ?? the direction where we can collect all 3 (??) and bring a common denominator maximum extent of the field strength of the Soul. What does this mean? Once we find a common denominator field strength. (?? Something about M fields of N - O and C - H). The H is always there, so it's the starting point for (anything we do). Then we should find the field strength of the Soul and what its maximum extension of field strength is. The Soul of the Man (STM) and the Soul of the Physicality (STP) both work within the first dimension and with the same dimension. What does this mean? (To understand we need to bring in a very strange, but specific characteristics into it. (We'll try to decipher it ??) (We multiply 12 by 5 and get 60. The crystal structure has a common denominator, and life has given crystal structure to the P. Before we said, the C14 becomes the C12, and the C14 ?? becomes the crystal structure of C60 (which creates the U)).

(If we multiply C14 by 4 we get 56, this is how C14 is connected to both dimensions of the physical life and the Universal Life. The ?? C60 gives us the physical muscle tissue, ?? through Cu, which has the elusive greenish color with tints of green and red in it. The C14 is equal and parallel to the N, where the bond is created. This is how the AA is created and connects to the physical D through the energy of C12, and it connects and gives the crystal structure of the C60 to the physical structure (of the body) ?? in the D of the Universal line. (Therefore when we eat we absorb energy and interact with the D of the Soul, and the emotion (created) between the two sides (?? of the C-H & N-O). This gives confirmation of the existence)).

(By understanding this you can understand what you need to do to transmute. (This is why we taught you how to make Gans's. The very first Gans we taught to you was CO2. (?? The Gans is in the matter state and in water. Look at the Gans as an energy, which are the fields of the Universe (U)). (Interact these with the fields of the matter state of life. Then you'll understand how sugar, CH3, plays the game on this side. (And why people get addicted to these C - H chains). Then you have the N - O on this (other) side. Then the emotions come and we get addicted to it, whether it is to abuse, sexuality, or

psychologically. It's because we get locked into one of these connections to the AA. We see this in all the chemical combinations of alcohol and narcotics. It's also with the hormones which connects to our sexual and emotional behavior. This shows us how the game of Creation is played)).

(If we find a star in deep Space that has this chemical composition in its atmospheric condition with such-and-such a composition in its matter ground state, then it will be easy to calculate what AA combination of life exists on this planet. Then we don't need to go there to feel it, we can create a 'fish tank' of it here. We just add part of the AA of our Soul into it, and we'll see the manifestation of the P of it in the fish tank. Then we'll know how we'll look when we arrive on that planet in the time, place, and position (TPP)).

(It's not what the astronomers and cosmologists tell us, that this planet is so many thousands of light years away. We'll tell them that's "rubbish," because we will have understood the composition of that level of life on that planet. And once you do that, transmutation is instantaneous).

(There is nowhere in the U where life exists that is without a connection to H, or what we call the M field of the "Fundamental Element." The Hydrogen is one proton and one electron, which is a Twinity. This is the cornerstone of Creation. It's the Creator and Mitra. All we do is change the name of Mitra to electron, and keep the Creator as the proton. In essence, when you put them together you get the origin, or the totality of the Creation, which is the neutron. (?? The plasma is the neutron, because the two are together. This is the knowledge man lacks of understanding Creation)).

(The element of Hydrogen in its totality is the totality of the Creation, because the neutron is the Fundamental Element, as energy. It has an encapsulating field as an atmosphere of the proton and electron. When you see the neutron, you see the Creation. If you understand this, then you understand that it's another repetition of the same game. It repeats over and over, again and again. But man does not see it). (Doesn't this mean the neutron is the same as a H. And before he said that the proton and electron together are what make up the neutron. But in science they put the neutron as a separate particle. We need clarification on this one)).

(You have a H and a C, and we call it, 13 and 15, depending on the energy, and not on the molecular structure. The 13 is the H plus C12, and the 5 is the ?? H plus C14, because you live two lives of the Soul and P. From now on you have to consider both. What is interesting is that when you put the N and O together, you have 14 and 16, which makes 30. This is how much we live in the D of the connection to our Soul. And even if you multiply this by two, you get the parameters of the minimum. You can live, interact, and create a life combination. This is how your emotion of P is connected to the emotion of the Soul. Because the H-C is a traveler of the U, and the N-O is connected to P, he's heavier and got stuck with the P. (Now you understand how when you put certain elements and breathe them in, or put them in your mouth, you start to hallucinate, or what we call, dreaming. You can control the speed of your travel by the amount of O and N

you breathe in. You can control your transmutation. Or you can combine the two together on a C60 and float, because you create your own dynamic crystal structure)).

(The air on this planet is 60% N, and O is around 15-16%, this is how your breathing has become part of your life, and it connects and feeds your Soul for you to have your schizophrenic life. Again the whole problem goes back to the misunderstanding and the fallacies in our science. The ratio of O to N in the air is 4 to 1. This is the same ratio the Earth needs for its GM fields of physicality). This is the intricate way the matter state fields create and connect to the energy state of the fields).

(By breathing the air we connect to the GM field matter states of this planet. This is why we die when we leave this atmosphere, because we can't breath and because our connection with the G matter state of these fields are disconnected. As long as we keep the O, which is connected by matter to the D and direction of C15, or as we call it, the combination of H and C14, then we can survive anywhere in the U. We don't need the matter state N of the TPP. (When we arrive at our destination we'll live on the C14 with connection line to the Creator. That connection creates its own composition. It's like the interaction of the fields creates the Mass, and the interaction of that field package with another field package of the environment gives us the Weight. It's the same process and understanding)).

(How are we to go to the next step and add to the understanding of the new condition of the matter state, when we have not understood this connection of the air we breathe. They wrongly tell you that when you stop breathing O you will die, and then they give you Oxygen. If they would put a mixture of the connection of the N with the O in a specific way, when you breathe, then you can connect to your Soul. This is why some people (who've had what they call, Near Death Experiences say they have died and seen the light, because at that point the right combination (of the N and O connected to the Soul). And this is why some people can feed themselves only through breathing. They connect to the C15, and to that combination of C15, which is C14 + H. It connects them to the Universal Energy. So why are we killing to eat? If you know how to breath you can change the level of O in your body and connect the P of this planet (through the N in your AA and you create a Black Hole for the energy of the U. Or any energy you want to tap into).

(Then this brings you to a new understanding. If you remember, there was an Indian Guru who came to the KF and his followers were laying flat on the ground and kissing his feet. It was because he was able to not eat for 20 odd days, and he did it several times, and it was magic for his followers. The guy found out how to (get energy) through his breathing. But if he would have taught his followers to do this, then they would not have to eat food and kill for it).

(There is another D to this which is the field interaction. Your Universal energy of understanding intellect and your physical intellect are the same. (You) have access to both at the same time. But you have to understand how it works. You can pin to the Universal knowledge. Then you have to learn how to interact with it. The (same) way

you use the O through your breathing to connect to the Universal energy to feed yourself, (you can also connect to the Universal intellect). You can "download" information from there).

(Mr. Keshe discussed some graphs from the systems, but it is hard to follow. You have to follow the drawings. In the physical life you have a STP with energy packs of matter state, which are connected to N, and then you have the Universal line of energy. In reality, this means you just have to understand how to connect to the H, C, N, and O. This gives you a very interesting combination. ?? With the N - O side you're dealing with the P, and the STP, which sits between the two. But the STP in interaction between the two, finds itself on the physical side of life. But where the two overlap there is emotion created that both share. This is where we connect through our emotion to the Creator).

(Muhammad said, there are 100 attributes of the Creator in the Koran. These are the emotions of the Creator, and not the physicality and His behavior. Kindness, giving, and forgiveness are emotions. If you know how to control and how to use the emotion of love, you can move from one to the other. Use the emotion of everything which is the beauty, but you cannot take, because these two are set and cannot change. Both sides of the equation are in balance all the time. It just depends on what spectrum of the energy we interact with to create which emotion in this common ground where the circles overlap between HC and NO).

(The emotion in the physical life is the same as the emotion in the Soul. Now you understand why the STM is black in color on the MRI scan. (Because of the carbon. In the D of the Universe. This is why our U is dark and looks illusive black. It's because the interaction of the energy of the Creator as H, and the interaction with the combination of (Carbons) creates that illusiveness of the black color. You can try it in the lab, then you'll understand).

(Then you'll understand how the system works and how to convert emotion into the essence of the physicality. This is why when we dream of our Mother we feel that emotion in our physical condition and wake up and remember, because we sit in this H - C side. The STM and P are connected to the physical characteristics of this planet, and to the life in the U (through the HC and NO). When you connect to another creature in the U you do it through the emotion between the two, and not through this P side of N - O, or through this (??)).

(In the physical life we connect through this (see the video) and a bit of this, then we call it love and make children from the fields of the love. You do more or less the same in the U. But you have to understand what the emotion is and in what environment, and with whose love you are playing with. If you play with the love of the Creator, then you're in it, you'll see the light, and have access to the Knowledge of Creation. Then you'll find out that you are part of the light and knowledge, and won't feel proud or feel you are above the others, because you are part of Creation, which is common to all the others. Then there is no need to fight the others to wear jewels and crowns and call yourself a king, or

president, or the rest of it. If you understand this it is useless to fight in the D of P because in essence we all have the same access to the Creator).

(How long will it take man to understand this as a whole? Then you'll understand what life is about. The whole process of (how you and your ancestors and the Creator were created is on this page on the screen of the 3 teachings we just gave you on the HC & NO). If you understand each one, then what are we fighting for? (It shows us how to use our Soul to connect to the Universal Community (from our physical world)). And how to change the course of humanity by connecting to the common denominator structure of the U. The problem in most of the World of Creation comes (?? from this P part of the N - O, this is where the problems sit. And because we haven't understood ?? HC or Soul part then we run into problems with the P part. I made man in the image of Myself. In reality, ?? the P part is My image and is what I want to create). This is what (we all have to understand about ourselves)).

(If we have the intellect to understand this process of the HC and NO then we'll be able to decipher the Knowledge of Creation, and create life anywhere in the U between (a constant reference point, and the TPP of its manifestation). All we need is to understand the emotion, which is the common denominator between the two. This is why I always explain about giving the love. If you find the energy level of love, which is not difficult and many have achieved it, then you can transmute and transport. It's about the love of Creator, love of knowledge, and the love of becoming a knowledgeable creator. Then you can create anything and have access to the Knowledge of U. But if you abuse just one time you will be sent back to the starting point).

(Now, scientifically you understand more about your own creation. That it is a knowledge, and not a breathing technique you learn from someone, because they learned how not to eat for 21 days and they said they see the light. Now all of you can do that through this knowledge. But which one of these (4 elements of COHN) do you want to play with? If you (master the H you will find the path to your Creator or the Source. In the World of Matter State you call it, a proton and electron, in the World of Energy it's called the "Fundamental Element," which is the Energy itself)).

(In the matter state you look inside, in the World of Creation, we look from outside to see one. And if you understand what I just said, then you have found a way to every position and D in the Unicose. Because when it comes to the Unicose, it's a different game to play, but it's very easy. (It means you cannot be any different than the Source of the Unicose in its structure, and it is connected to a specific Fundamental Energy, which is in the center, and is the Hydrogen of the U. It's the Fundamental Energy of Creation. All the Universes work within to create, and connect to the same point. (Those who understand this knowledge about the Fundamental Energy will understand the totality of the World of Creation, and it does not matter in which TPP they manifest themselves)). In plasma we call it H, and others have called it a neutron. But in fact, it's the essence of the Totality on its own. ?? It's the whole Creation. The Black Hole is the center and sits as a proton, and the Unicoses, Universes, and galaxies become the electron).

(If one day man is able to look through this Universe from a distance, you will see the exact same structure as an element. There will be one point in the center and many electrons as galaxies around them, but it will be on a larger scale. When you look at an electron (in relation to an element) it's like a galaxy and it has so many (?? electrons) inside it). There is no difference between all the different dimensions in Creation. It's for us to understand the essence of the interaction of the fields. We should know that fields in motion create energy and life. Then we'll understand why it says, "I made Man in the image of myself." (As long as the Man has energy he moves and lives. And Man needs to learn how to absorb energy from the environment, (because the Creator has created that energy for the Man live, and not to kill for it))).

(Stand outside a fish tank and look at the fish. That tank is his U and the fish continuously opens its mouth. It doesn't do that to take water, rather it's taking energy from its environment which is embedded in the water. Now put the Man in place of the fish and it's the same. Then if you change the environment and make the water more acidic, or more salty or sweet, then the fish will change according to that environment. In Space man will change the same way, according to the environment in which he lands. The Soul in the center will not change, but the manifestation of the P changes to suit the environment. You cannot put a fresh water fish in saltwater, it will not adapt, unless a system has been pre-set for it. But it can adapt if it travels through D of its Soul. It will manifest its STP for a salt environment. Mermaids ?? split dimensions of the Soul and the STP, (in their manifestation of P)).

(This teaching should have brought you to know yourself more and to understand how you can connect to your environment and how your environment creates the emotion that allows you to be travelers of the U. It's you who decides which way you go. If you change your breathing, (you can change your structure, and how you absorb energy. But in totality you have to come to understand one thing and that is in your AA dimension, which is the N & O, and H & C, you have to reach the C60 energy fields to be able to manifest the "energy field common denominator of the U," (which is) created by its own dimension and characteristics)).

(We usually look at multiplication (of the fields), but sometimes we have to look at its subdivisions (instead). (?? There are also basic fundamental energy transfer units of the U (that can create life)). (We don't always live in (the normal outer structure), sometimes we can use this structure (to go into its lower order of elements and create fundamental steps. These steps create energy fields that allow the STM to interact with certain conditions in the physical condition to create life in sub ?? seminal dimensions of the U. (Life exists below the normal dimension of existence)). (Does he mean life exists below what we consider the lowest order of life, like sub-atomic, below the M fields)?

(These sub-seminal lives have faster access to the D of Creation than (what we call normal life). One day I'll explain (it more). It's not that everything has to be the multiplication of the environment created. (There are also subdivisions of (life)). This kind of life exists in the empty space of the U. (?? They are more numerous than "normal" lives that we see). (Nevertheless, the process of creation of life is the same

across the U). I hope I opened your eyes to the truth about yourself and your existence in the D of the Creator and Creation. (If one day you understand this, you'll find that it is easy to (create) and live. It does not matter where you are in the U, as long as you understand the connection between your position and your origin. (Because in the end, the N & O come from the interaction of ?? itself in different shapes and formations)).

(Another way to look at it is through the CH₃, or sugar, which is the original essence of life. The C₁₂ plus 3 H equals 15. The C₁₅ strength is the ?? common denominator between the CH and NO, and then we see why N feeds the AA. This is why sugar is a ?? common denominator that feeds both the STM on the Universal level, and physicality side of the matter state. It's why when you drink alcohol, you touch the realms of the dream state and going to the other side. Alcohol is a combination of H and C when it takes you to the Soul D the P has to follow, but (it's not guided there by the higher emotions and the P is given images of the fields of Universal Energy and tries to follow (but can't)). Would you like to be drunk all the time? Yes, but drunk with the love of the Creator, and not drunk with the alcohol of the man. Then we understand that to reach to his Creator, the only thing man can do is to understand the process of his own creation. This is the gift of the Creator, to understand His essence, giving nature, and His beauty).

(It will take men of science years after I'm gone to understand the teaching of today. And those who understand will get access to the World of Creation instantaneously, because they will know how to manipulate between the Soul side and P side, and then be able to decide how they want to go. You don't need to push it, because it pushes you to that dimension. I hope you understood today's teaching and the totality of the understanding of (?? how man is made. Then you will have found the secret to the World of Creation)).

(I sincerely hope that one day the scientists of the man will study today's teaching for centuries to come and finally he'll understand that what he calls a dream is the reality of the U. (Man needs to understand its fields and emotions). I hope what I have taught you for the past ten years has brought you to the point of understanding the Knowledge of Creation as it was planned to do. (Your emotion is the connection line to the Creator, and learning the games the M fields play are how you will become part of the Creator and Creation at the same time)).

End of Quick Index Part 1 - 559 KSW

(KF has launched a new range of soaps, which are different than the soaps before. They are part of the Twinity Gans products and they are setup specifically inside for a purpose. You can use any 2 combinations and there are 5 different combinations available. Let us know how you feel when you use them. On the back of these soaps we'll launch something we call, Unifying Soap. It's a structure is similar to the Knee Gans, and then something for joints. The Soap will be like the Pain Pads. We'll explain this further in the future. It's for extension of the knowledge and to unify the field energies in the body. These are very specific soaps. If you have lumps or anything and when you use the Soap observe if there are any changes. Does it change your emotion or P? These soaps are extremely expensive. They are not just a normal soap, they have taken a lot of research to

develop. We would like to have your response to it. It's part of a trial. If I use the soap, can I feed myself, or learn how to create that condition? Can I use it to change my mindset? And there are many other things involved. They cost about a thousand Euro per soap. We want to see what emotion they create in you. These are Twinity Soaps, we (bring) emotion and P together. They are actually worth it when you consider how they pay millions in the US to reach the same point. It is groundbreaking work that can never be copied. It's impossible for anyone to copy them. If you see a copy out there, then you'll know it is fake. These are not medicines, these are just a normal soap, with a new twist in understanding the process of Creation. This will be in a very limited edition and we'll not repeat it. Then we will transfer these into the world of cosmetic).

(On November 9th and 10th will take place one of the biggest conferences on alternative therapies and technologies of Brazil and KF was invited to be at this conference, and we have been given the Humanity Award).

(That's fantastic and I wish you all the best. The KF grows on its own steps, step by step. It's fantastic to see how the hard work of the Brazilian have made out. The Chinese are trying to replicate the work of the Brazilians in KF China).

Q: How are the crystals created?

K- Crystal formation is a scientific way of explaining how all the fields come back together into a center. This is for our way of understanding the energy fields, not the matter state fields. The crystal structure is a point of reflection of energy, or light, or matter state energy balance. (The light is energy in motion and travels a distance between A to B, and it reaches (a field) balance of the GM fields in respect to its own position. In free space it can travel a lot. In a closed space it travels very little, and then it confines, and reflects back on itself in a matter. This is how diamonds are created)).

(I explained this before in private teachings and to some scientists and it's very technical and very controversial, because you don't even know how the U is created. (You have to follow the drawings). It depends on the field strength that it travels from a given source. Then its GM fields become balanced in relation to its own source, then it reflects and travels the same distance until the energy within it becomes balanced again, and then it reflects again. It goes on like this until it takes the shape of the Universal crystal, or what we call, like a U. We see this shape a lot in rough diamonds).

(Couldn't understand first part ...) (All these reflections create a shape of the crystal. The shape is elliptical and not spherical. The Earth is really not a sphere it's slightly oval due to the actual field interactions. The Sun is not spherical. This explains why the North Pole is so many degrees warmer than the South Pole. It creates a totally different structure of the wavelength and everything else, and a different shape of the creation of life in the U. But in principle it is created from the reflection of the same light, and not from another interacting with it).

(It starts with the light of the Creator and in interaction with its own fields, creates its own U. It does not stand still and continues to interact with more fields and creates all the life in the U. The Creator is everywhere, because of the properties of His own crystal structure and His own fields).

(This is what I understood. Something about a Black Hole. And then if you change the atmospheric condition inside the pot, then you can create different sizes of popcorn. The popcorn pops and becomes the diamond. By the same principle diamonds are created in volcanic eruptions and we see different structures, depending on the environmental pressures and temperatures that effect the solidification. It's the same procedure no matter where you are in the U, on the Earth, Moon, or other planets with volcanic eruptions).

(Part of the creation of life on this planet is due to the volcanic eruptions. They have different energies of C and in the explosion, and in interaction with the atmosphere, it all leads creation of life. Without volcanic eruptions the life we see on the planet today wouldn't be here. They create the variety of the lives we see on this planet. They are one of the major contributors to the creation of life on this planet. They mix the C with N and O. Partially the Carbon came through the inner part of the Earth, and brought the conditions for the creation of the AA. In the latter part (of creation it was) due to the salinity).

Q: In what condition is C15 created?

K- C15 is a combination of C14 and H. It's the Universal alcohol to get drunk with. You can do a lot of things with it. It's the essence of Creation and its connected to the Creator. C14 is the interaction of the field energies of the U by themselves, on themselves, and because of themselves, and it's in its purest form. It cannot (break down into) anything else, but it can connect to its own origin, because it has the same common denominator).

(C14 and H go through a process of crystallization and the plasmatic fields give you C15. This C15 is an energizer. In a way, CH₃ is C15 too. (So we have both matter state energy and Universal energy connected to the Creator). The energy combination of this, together with the COHN gives a clarity and an energy release that man can reach the C15. That's why narcotics have such an effect on man. All the hormones in your body also have these characteristics and combinations, like testosterone. (They allow the energy to get free ??)).

(This why we have excitation to the point of addiction with sex, because in the subconscious level we reach to the point of the Creator. It's due to the hormones. Then you understand how everything else works and how we are rewarded. One is in the matter state and the other in the energy state. (And then the emotion is connected to it, and that emotion brings a physical reaction. This is why we fall in love. If one day the scientists discover the physical energy level of falling in love, they will find C15 in it. It is in both dimensions. This is why when we feel 'falling in love' we feel it in our heart. Because the CH & NO are flowing through the heart, while the other guys are on the other side)).

Q: Are the emotions of P and the emotions of Soul related to each other, or are the same?

K- They are connected to each other. The emotion of P is connected to C12, and the emotion of the Soul is connected to C14.

Q: We see always the same sized planets in each solar system of the U. Is this uniformity of the sizes? Is it like human DNA, where we all have the same form? Is it because of the line of Inertia of the U and the locality, is it regulated?

K- In a way, yes. (But in a bigger shape and size. You do not find (the same) elements close to the center of the Black Hole of the U, as you do on the outer boundaries, but they are all connected through, and due to the Universal line of M fields. It's like when you change the pressure and temperature of a substance, its manifestation changes and you go from gas to a liquid. The same happens in the Universal structure where the M field pressure in the center of the U is totally different than it is on the boundaries. But on the boundaries you have pressures from other Universes outside it. In a way they play each other off of it and they bring new conditions of existence. But at the end, they all have the same common denominator).

(You have to have a field and energy to create a structure. And if you understand how to change energy into a structure, you don't need to hold the structure, you can create it anytime. This is what we do in KF labs. We create the structure of the energy, and by the interaction with itself, we create the UFO. Can you imagine a UFO being 100 kilometers in diameter. You couldn't do it with aluminum panels. The structure is built by the combination of the field interactions with itself. It's a crystal structure).

(In our laboratory tests we see clouds coming up, and it's the beginning of the structure. It's like when you see the vapor rising from the sea and it interacts with the environment of the Earth itself, and becomes a cloud. It gives it a structure. The M fields of the Earth in interaction with its own dynamic structure, creates the atmosphere of the planet, there is no difference. (But it has to be dynamic)).

(One Ray, one field of the Creator, in its dimension, in respect to its essence of the field strength, creates its own crystal, its own Universe. What is in the Macro is in the Micro, but we never understood. Now we understand, and we can do the same. But we control it in a different dimension and direction).

(Mr. Keshe shows a graph they took of today's teaching before any computers connected to Zoom. You can listen to the recording. This is how you will change your P into energy and where the P does not even exist. It's Transmutation)

(More about the Twinity Soaps. We don't look at it as a soap, we look at the interaction of the fields in the life of the man. There is a reason we started working this way with the Plasma T, because with soap you don't need legislation and certification. As long as the base material stays the same, you can produce it as soap. We'll never release how to do it,

because it can be abused in different ways. In some of the Twinity Soaps you can use the same Soap in 2 different positions, and this will give you the Twinity interaction. It doesn't necessarily need to be 2 different Soaps. You'll understand more how to play with these and use them according to the needs of your emotion).

(The packaging has been found for the Cosmic Ray ?? material. It actually reflects what is inside, like the C14 and Cosmic rays together, which is fantastic. It's strange that it comes from a land, which you would never think could do such a thing).

Q: From this graph can we see the crystalline structure, and how it's formed?

K- No. (That needs another addition. Maybe in the next few months when we can put it in. Because when they interact, it will create a different dimension. If we put the left and right for an individual, who is connected to the system, we should be able to see your physical shape, even before seeing you. In the future we'll be able to see for example, if you had a leg or an arm amputated. We'll see it in the structure. First, we need to make it into three-dimensional, but when it's three-dimensional, we'll see the Soul, and the P. It will take some time before this can be done. We need to go into a holographic structure so that the data comes together and creates that structure).

(People are receiving the Cosmic Ray Communication Bundles and the first year subscription is covered. Next year you will have to pay an annual fee to KF. This is for us to keep you connected. It's part of your agreement when you bought it. It's like any other subscription and needs to be paid to keep the technology going. When you receive your system at home, then we have to physically add it to our system to make the connection. This is also for the UBESUS system, it needs time to be connected in).

Q: Last week you said that the H - C, or Soul side is constant in our U, and that the Soul of the Creator is implanted in the Soul of the Universal Cosmos. Does this constancy of the Soul side still apply when leaving our Universe and going into the Unicose, or is this exactly the part that the Daughter of Mitra, will then teach us KS?

K- I think I explained that in the teaching today, in a touching way. The Daughter of Mitra will teach you knowledge that you could never even imagined exists. The knowledge will open the doors into another dimension of life, and you will understand it when we come to it.

(Regarding the connection to the U, I explained it earlier and touched on it very softly. In the future we'll show the process of how you connect through your emotion to your Soul. (All the KF systems you bought are related to this including the Cosmic Ray Bundles, UBESUS, the Nano Mirror Discs with and without holes in the center, and the Vision Units. There is a more powerful version of the Nano Discs. Mr. Keshe draws how your fingers are placed over the Discs and each finger receives certain field strengths. That's why we have five fingers and this is how part of our intelligence come from our fingers. People who lose their hands or are born without arms have a different intellect, it's not a problem. The hole in the Disc concentrates and homogenizes the fields. There are fields

without matter state. When you hold these Discs in your hands and connect to the Cosmic Rays Bundles, you will feel the difference in emotion, and difference in the information. Every part you feel will be different, even your vision changes when you use the Visual Glasses, and even with the old ones. Then you'll understand how we are connected in different shapes and forms to the fields of the U. Because now you're dealing with the fields to (other) fields, and not just from fields to matter. (You can experiment with the distance between the hand that holds the Discs and the KF system you are using. There will be a different experience of the fields).

(The new systems are now upgraded to a dual stereo system, which means left and right on the system have to match the left and right on your headphones. You will get a totally different combination of energy. It's unbelievable what it does. (This is related to how the fields come into balance between the different points like the ear to the headphones, etc. With the Cosmic Ray Bundles we will connect and balance both sides ?? for you, equally)).

Q: Our actions are driven by our thoughts, and our thoughts, much like a computer, are like programs running. What the input is determines what output will be. From the moment we begin absorbing energy in the womb, the program of absorbing energy to divide the cells starts running. This seems to be a program endowed by the Creator. After birth, in our interactions with the external world in life and work, corresponding programs are running. Some of these programs come from the emotional memories of our parents and ancestors. As you've mentioned, that emotional distortions in parents can manifest as problems in their children. Some of these programs we are not aware of, such as absorbing environmental energy, growing hair and nails, the residual emotional programs from our parents in our genes, etc. While others we are aware of, such as various actions we take for survival, planning to attend a party, etc. The question is, can we become aware of these deeper programs, that we were previously unaware of? Does it mean that we can control the operation of our own fields? How can we become aware of these deeper programs?

K- (Change the ?? word "program" to the interaction of the fields, and I'm 100 % sure you'll find an answer and you'll have a different understanding. What you call, programs, they call, RNA. It's there because of the interaction of the fields of the matter state, which confirms its own existence. The scientists and doctors speak about RNA and DNA. But the RNA is the creator of the DNA, and the DNA is the creator of itself. One is directly connected to Universal Energy, and one is connected through an intermediary to the Universal Energies and local energies. If you understand these 2 parts, then you can do a lot with both).

(You can transmute, (physically) transfer, change emotion, and change the body structure. We all know this, but we ignore it. The hormones create a lot of conditions in the body like for example, if you want hair or don't want hair. (It creates the chemicals to do this based on your emotions). (If I want the change for me, then I will teach it to my child and they'll have the same). This is what increases our chance of survival in our environment. This means our emotion changes our physicality. (This allows the P to

extend its life in the environment). Emotion becomes a hormone, that interacts and changes the physicality).

(There is a long discussion about how the hormones change the condition of hair on the body of the man. The reason Middle Eastern men and women have more hair on their body is because of the hot climate. It acts as an insulation between the two bodies and creates more comfort. This is the same reason why in the northern cold climates like Sweden they don't have much body hair. This way the two bodies will heat each other up more, and feel more comfort with each other. This is not due to food like some scientists think, but out of the needs of the climate and the emotional response to it. The body then creates hormones that will remove or increase the hair).

(There is a lot of deep research done on this to prove it. It's the emotion of trying to guarantee the survival of the next generation. The scientists couldn't understand how man evolved this way. They have studied the lice content in different areas where hair grow, and they opened up graves to study what happened to the corpses over time).

(I will try to summarize. The DNA of the child in the womb matches that of its mother. It's the RNA that keeps the record and then creates the DNA in P. In Plasma Science we consider the structure and interaction of the M fields of plasma. We know that the RNA contain information from the RNA of the U. With this knowledge it changes a lot of things in science, but it is not yet accepted. Instead they play with stem cells and others things. But if they could play with the fields it would open up new dimensions. Our emotions as fields bring changes to the D of physicality. ?? Any behavior we have for 25 years will become part of the DNA and that gets passed onto the next generation. If parents have children at a young age then they haven't had enough time to add things to the next generation. But parents who are older, let's say around 40 to 45 they will have a higher chance of passing any defects onto their children. (Emotional reactions are also part of this transfer of fields).

(But it's not just physical things. Children of older and mature parents will have a totally different intellect. This has been proven scientifically. They have also compared children that were born at a younger age, with those born later to the same parents. They refer to these children as being so smart. Their approach to life is totally different. Because all of the parents knowledge, experience, intellect, and emotions are added. (Mr. Keshe then said, it's not in the DNA, but in the information of emotion).

(The majority of children of older parents don't like to speak until the age of 3 or 4, because they realize they don't need the language to (communicate. They understand the emotions of the body language. They start talking at the age of 4 or 5, because the intelligence (has developed) and they are extremely intelligent people. Some are called gifted children. They're gifted with knowledge of the parents, especially at a very high level)).

(The Daughter of Mitra comes from the intellect of the Universe, which is matured in time and created by the fields of the U, and not by the matter state of man, but takes the

shape of man. Children of the Soul will tap into the (knowledge of the) creation of life from the time the U was created, and not the meager life of man. The Children of Mitra are totally different, because they access the knowledge of the Universe, rather than the knowledge of the man, which is mostly about the trees, plants, and animals).

Q: To treat hair on the head, or farsightedness, or myopia with M fields, should we first work on the general fields of the body, such as the fields of the liver, and solve their problems?

K- There are many controversies in these. (But we don't talk about the medical part in these teachings, because they are watching what we do here like a hawk, and then they go after us. You have to understand the process of the creation of sight. And then the rest comes, nothing to do with).

R: The rest comes nothing to do?

K- To do with it. Yeah. The liver and the lung and the rest of it. That's what it means.

(The new Sight Gans has an amazing structure. We have added the D of the Soul into the new system. It doesn't mean that the first one is not good, it still works, but this addition to the knowledge is part of the Twinity Gans).

Q: What about using a transducer headset along with headsets with a microphone?

K- What's a transducer?

Q: Do you think that a war between Iran, Israel and America will happen seriously in the near future?

K- (It's imminent).

(Imminent. The Americans do not trust that the Israelis will not bomb the Iranian nuclear sites. So they have done what's called "military disarmament" to them. This means that there is a special control system added to the weapons that Americans sell to other countries. The Americans have the right to stop them from using the weapons where they don't want them to. They put a special control device inside the weapons. But for years they never put restrictions on the Israelis. They let them bomb wherever they wanted. But this time they have put a restriction).

(The Americans don't want Iranian nuclear site to be touched, but they don't trust the Israelis. So, they have appointed a top-ranking American officer, who is actually answerable to the Senate inside Israel. This guy is extremely powerful. In military terms they call this "disarming your generals." The Americans give the orders and the Israeli general have to follow it). (The Americans did this to the ?? Shah's generals during the Iranian Revolution. This allowed the Iranian Revolution to happen)).

(The Americans don't want to go into this war with troops on the ground. So they are providing the new laser communication disability systems, and other things. Their first plan is to take out all the Iranian communications and defense systems, so the Iranians won't be able to defend themselves. Then they send in the bombs. (This is kind of a cowards war by a bully that controls everything, but they don't let the public know. It's clear that with the power they have, they wouldn't have to have the war, but then they won't make any money)).

(Mr. Keshe expects them to start the bombing shortly. If the situation is not resolved inside with the Israelis, Americans and the rest, the war is imminent. The Americans have laid out exactly what's going to happen to the Iranian government in the past 24 hours. It's going to be a mayhem, because the minute the first attack takes place all the Iranian missiles will rain down upon Tel Aviv. We won't have a State of Israel the following week, or at least not the way it is today. Because the Iranians won't stand to be attacked. The Americans are trying to say to the Iranians, don't attack back and we'll just hit you here and there. But at the same time, the Israelis are going into Lebanon, and now into Syria. I see massive problems).

(The guy they are sending to Israel is from an organization and wherever he ends up there is always war. They are in Ukraine and they constructed the Ukrainian War. (When the Israelis and Iranians rain missiles on each other, then the Americans will have to get involved, (because their public will not allow the end of the state of Israel. (You have to remember about the Jewish Lobby). There was big destruction in Israel but they are not reporting it, so the public will keep quiet).

(According to an intelligence report from the American side, Iran possesses over 100,000 missiles of different shapes and forms. This is a very dangerous point. We asked Israelis and Americans to withhold. I explained to the Iranians that they had better strike first before they get hit (or they won't be able to respond). They will keep to the ethos of what they want to do. It's going to be a mayhem if certain people have their way, because they're bringing the most advanced electronic warfare into Israel before the physical warfare. They'll disable all the electronics and then destroy everything physical with bombs. The electronic warfare will start first).

(We expected it to start last night in a certain direction, but the Americans has a weakness in their structure so they could not support the Israeli bombing. They'll fix that within the next few days. Most probably before the weekend which is Yom Kippur. As one American intelligence officer said, it'll be the last time Yom Kippur will be celebrated in Israel. Because they know what is coming. But on the other hand the American's need the war to keep their factories running, and other countries too. It's the last celebration of Yom Kippur, but I hope it's not, and I hope both sides will step down).

(We are advisors and we keep informed from all directions. I even approached the British to try to step in and bring some sense in. But they are not ready. The Americans don't want to talk, and the Chinese have already been looked after. We'll have to wait and see what happens).

(The whole problem is the Persian Gulf Oil. British Petroleum (BP) owns all the oil on the other side of the Persian Gulf. They need to control the Iranian side. They also control the oil in the Gulf of Mexico. Then they will control the prices of oil for next 5 to 10 years. BP will control more or less all of the oil in one way or another. This is how British Petroleum originally came into life. They controlled the Iranian oil from the Persian Gulf in the beginning. Now the plan is to take the whole side of Iran and the Persian Gulf, then the oil prices will be extremely volatile. And they will control it).

R: It always seems to be about oil. Isn't it time to stop the burning, as you said many years ago in the fireplace discussion?

K- If it comes to it, we'll introduce a new technology. The KF will break the embargo of oil, gold, and money control. It's very easy to do by having a Blueprint Day. If Iran is touched we'll release a Blueprint of gas production and within minutes all of you will become self sufficient. Many of you tried to make gold, but you failed, because you couldn't do the transformation. We'll release the technology for it. It will go viral, and then we'll ask you to support the KF to be on the other side of it).

(It's not that we don't have the T, but we are very prudent to work with the governments and release it under control so it won't create problems. (But the problem is that once they take Iran, Russia will fall, and then China within the next 5 years. This is the basis they are working on. Then it becomes one global domination. (They won't be able to dominate when we show you how to make and use ??). We're not scared of releasing, but we are aware of what the release of technology can do).

(Those of you who join us for October Monthly Flight session try to keep bottles of Gans's with you. If you have a couple of bottle of CO₂, Zn, or whatever combination you enjoy have them ready and with you. We might ask you to do something very interesting and then you'll see your emotion and your response).

Q: The transducer headphones use the bone to conduct the sound. They transmit the sound through the bones by the ears rather than in the ears themselves.

K- We have used this in some of the Flight sessions. If that's what you mean. Because we don't use the headphones only on the ear. So if they call it a transducer, then we already do that. Now we know the word for it. The bones creates a different vibration ?? of the environment.

Lets' call it a day. We'll see what come up, and if we are still here by next week. That'll be very interesting. And see how things take shape in the World of Creation.

(The Twinity Soaps could be the way to release the technology without having to go through all the certification processes and other things. We'll work with the fields in the essence of the Creation, because we have the knowledge. There is no regulation on soap with natural water. I hope you enjoyed the session today).

End of Quick Index - 559 KSW October 10, 2024

KEY-PHRASES:

SUMMARY:

ENGLISH TRANSCRIPTION

(:08)

K- Hello, good morning, thank you very much. Good morning, good day to you, as usual, wherever and whenever, you listen to this series of Knowledge Seekers programs from the Keshe Foundation Spaceship Institute. We welcome you back, as usual, we still want you to share. Before we start, there is a note that I have to ask you, as Knowledge Seekers (KS) to pay attention to, and that is, we... Keshe Foundation website, in the past week, has been under heavy attack. Number of our websites were attacked heavily, and it persisted for days. For this reason we had to do some steps, the Keshe Foundation IT team has worked heavily, trying to, what you call, clear the mess up, and some of you might have a problem with your Internet, reaching the website or the store, and the system is up and running, but the remnants of this could have created some problems for you. And what we'd like you to do is, read your cookies for the website Keshe Foundation, Keshe.Foundation, or whatever website is ending up in the status of forbidden. And reinstall it again, and you'll find out, you'll get it in through very easily. And it should be no problem. (:10)

Following the teaching and understanding and the work of the last few weeks, we move on to the next step. We move on to the understanding of the totality, further of our own lives, our own existence. And how we, as people, live this life. How we lived, this what I call, in the English language, 'Schizophrenic life', of one dimension (D) of the physical and one dimension of Energy. And when you understand this, then we are all "Beautiful People," it's just that we don't understand the extent of our beauty, and how this beauty works, how this majestic system of the Creation works within itself, to connect with itself. And how man comes to understand the expansion of his totality.

In the last week teaching, we spoke about Hydrogen (H), and we spoke about what we call the Carbon (C) and we spoke about the Gravity and the dimension of the use of all the materials in this body, be it transportation or transmutation, and how this works. One in a physical dimension and one in the energy dimension. (:12) It was easy to understand that we all live a what I call, a schizophrenic life. Now we understand about our own schizophrenic, that we have a Hydrogen-Carbon bond on one side And we had a Nitrogen (N) and... very interesting...

<< Mr. Keshe has problems with the whiteboard. >>

K- ... Okay, so what we came to, I hope this time it works, is, what we said about Hydrogen and a Carbon. And then we have the Nitrogen and Oxygen. (:14) I always explained this Nitrogen and Oxygen relationship with the physical life. It is interesting to as a part of the studies if you go back and go into some of the scientific research in some of the things you can test to confirm the gravitational field, or what we call, the magnetic (M) field, gravitational (G) field of the, what we call, the gaseous and the liquid side with the Oxygen, to be the same as the one which is with the Nitrogen which is connected to the iron, the physical side. We need the gravitation of both. If a planet is only gaseous, only look at one element, because there is no matter state solid in it. When you have a composite material state with no gases lying on it, you look at the, what we call, matter state connection of it, to find light.

In the scientific research, if you've done this or if you ever knew, we confirm that Oxygen behaves as a gravitational field, as a magnet into the liquid inside. How the scientists do this is very simple. You take a magnet, in a way, like this, and you apply a very high voltage in a way, and then you pour different liquid, materials like Nitrogen, like what you call, anything you have as a liquid, and you find it just goes through, you don't see anything. But interesting enough, when it comes to Hydrogen, to Oxygen, (:16) Oxygen builds a bridge. It shows its gravitational characteristics which is in a way in balance with the what we call, the magnetic field of the earth which connects to Nitrogen as I explained last time, four times Nitrogen gives you the Fe, which gives you that magnetic field. But if you pour Nitrogen in this gap it will not go, but if you put ?? H and Oxygen, you see a white cloud, just sticks, it becomes like a matter state. So, one of the confirmation for you to understand why and how physically confirmation that Oxygen behaves like a magnet, like the gravitational fields on this planet for the liquid and the gaseous state is this test. So scientifically you can see it, that what we call, the fundamental understanding of the teaching is correct.

So you have two magnetic fields connecting. And this is the same with the Hydrogen and Carbon, two magnetic fields of the same connect. This is what is the beauty of the creation. So, for you Knowledge Seekers, I know you do these things, go and get yourself a horseshoe magnet, specifically designed it that it has a power, you can adjust it and then pour some liquid Oxygen, you see this cloud created, this connection created, and then you understand how Nitrogen and Oxygen have become the element of the amino acid (AA) of the man. Because one connects you to the physical side, the Nitrogen, and one connects you to the liquid and the gaseous part. (:18)

But this teaches you one further point, and that is, if the Nitrogen side is 14 times 4, which gives you the 56, which is around the element of the Iron, what does 16 times 4 give you (64)? This is the limitation. This is the position of the limitation of the materials, which can bring, connect and be part of the life into this structure. You see Zinc (Zn) and you see Copper (Cu). On the other hand, if you look at the different multiplication of the same, when you go to 14 times 3, it gives you 42, you did Calcium (Ca) and Potassium (K). The same goes with the, what we call, the elements, to the multiplication of 1, 2 or 3 times the magnetic fields. Then, you understand when you have and you connect into, what we call, 28's and 30's and 32's, because multiplication of the 2. So, it shows how the

structure of the physicality on this planet is created. Link, strength, connection, to the magnetic field of the planetary system.

This is why we don't see life on planetary system, which have no, what we call, atmosphere, on the surface of them. But it doesn't mean that they don't have life inside. (:20) But, all this is always connected, to the World of the Creation of the Universe (U). Once you understand this in a full detail, in understanding of Totality, the World of the Creation, the world of science, becomes very easy to understand, in a 'Micro and Macro.' Universal life and a physical life. They're all connected, they are there. We have no choice now we understand it. And then we see like when we add Calcium to this we get bone structure. We add Potassium into this we get field radiation and connected to some of the characteristics of it.

But the next step for us to understand is to move away from the matter state and move in a dimension, in a direction, where the correction and what we call collection of the whole three, brings a common denominator maximum extent of the field strength of the Soul. What does this mean? Once we find a common denominator field strength. The same as what we did with magnetic fields here with the Nitrogen and Oxygen. Between the Carbon, Nitrogen and Oxygen, because Hydrogen is always there, as a basic limit, as a starter point. Then you find the field strength of the Soul. The maximum extension of the field, the strength of the Soul. Because then the Soul and the Soul of the Physicality (STP), all work within the first dimension with the same dimension. (:22) What does this mean? You need to bring a very, very strange, but specific characteristics into this.

I taught about this couple of years ago, in dimension of the work. But, what is interesting, is the beauty which this brings into play. If you bring and place in here, very simply, very straightforward, put 12, (this is not the right color, let me get you my darker color, that you can see. ... let's go for a blue). If we take this, and we bring it in here somewhere, in between, and play a slightly different game, and multiply 12 by 5, you get 60. Then, you understand, if you go into the crystal structure, you find a common denominator, why life is given crystal structure of the physicality (P). If you don't understand this, go back, you have Carbon 12 (C12), Carbon 14 (C14), and then you have Carbon 60 (C60) which is crystal structure but here at the same time if you multiply C14 by 4 which gives you the 56 you see how we are connected to both dimensions of the physical life and dimension of the Universal life. (:24) 60 brings us the physical muscle tissue, Copper. It's elusive greenish color with tints of green and red into it, but the interesting point is When you bring C14 into game and into play, in being equal or parallel to the Nitrogen, this is where the bond is created. This is how the Amino Acid is created, connected to the physical dimension on the energy of C12, and connected, giving it a physical structure as a crystal structure of the C60, in the dimension of the Universal line. Then you see how when you eat, when you absorb energy, you interact with the dimension of the Soul, the emotion between the two side. Understanding the positioning, understanding the confirmation of the existence.

If you understood this, if you take it a step further, you come to understand how to transmute. You come to understand what you need to transmute. Then you come to

understand why we ever started the production of the Gans, the very first Gans we taught to you was CO₂. (:26) Because you look at the Gans in the material and the water you have. And I keep on telling you, look at the Gans as an energy, which is the fields of the Universe. If you take this and bring it into the play, and bring it into interaction with the fields of the matter state of the life, then you understand how sugar, you call it CH₃, plays the game on this side. Then you understand into the addictions, why you have the Nitrogen and Oxygen playing on this side. And then you understand where the emotion comes, we get addicted to, abuse, sexually, psychological abuse, because we lock into one of these in connection to the Amino Acid. Look at all the alcohols chemical combination look at all the narcotics, look at the hormones which connect to your sexual behavior connects to your emotional behavior. And then if you understand this you have learned the game of the Creation.

Then when we are told in the deep Space there is a star which has this chemical composition on its atmospheric condition and such-and-such a composition in its matter ground state, (:28) it'll be easy for us to calculate what life and what Amino Acid exists in this combination. We don't need to be there to create, to feel it. We can create it in the 'fish tank' as I call it. And then, add part of the Amino Acid of your Soul part into it, and you see the manifestation of the physicality in the fish tank. Then you know how you will look when you arrive at the point of the time destination and the place. But what again we see, what again we understand from the world of science of today, if the astronomers and the cosmologists tell us, this planet is this, this, this, then it takes so many million light years or thousands of light years to go to it, you say "rubbish", because you understood the composition of the creation of the connection in this level of life. And once you do that, transmutation is instantaneous.

There is nowhere in the Universe that the life exists without connection to the Hydrogen, or what we call magnetic field of the Fundamental Element. Magnetic field of Fundamental Element, which is the one of the Proton and one of the Electron, which is the Twinity, is the cornerstone of the Creation, the Creator and Mitra, Hydrogen, Electron and a Proton. (:30) We change the name of Mitra to Electron, where we kept the Creator as Proton. But in essence the origin is when you put them together you get the Totality of the Creation which is Neutron. And in a plasma you have a Neutron because the two are together and this is where the knowledge of the man lacks understanding of the Creation.

When you look at element of Hydrogen in its Totality, you look at the Totality of the Creation because that's what the Neutron is, a Fundamental Element. As the energy, when you look at it as a, as encapsulating field at the atmosphere of the ... Proton and Electron, you see Neutron, you see the creation, you see the Neutron. And if you understand this you understand again the same game repeating itself again, and again, and again, and again. But man does not see this. If you play it in the dimension of... (:32)

If you look at this in a very simple way, you have a Hydrogen and you have a Carbon. In the present world, we call it, 13 and 15, depending on energy, not on molecular structure. 13 being Hydrogen plus C₁₂, 15 being Carbon plus C₁₄, because you leave two lives.

Now you have to consider both from now on. But, interesting enough, if you put the Nitrogen and the Oxygen together, you have a 14 and a 16, so you have a very straightforward combination of 30. Then you see what this means. How much we live in the dimension of connection to our Soul. And then even if you multiply this by two, you find the parameters of the minimum. You can live, you can interact, and you can create a life combination. Then you see how your emotion of physicality is connected to the emotion of the Soul. Because this guy (HC) is a traveler, he travels the Universe, and this guy (NO) is connected to physicality, he's heavier, he has to get stuck with. Then, you find out, why, when you take certain elements, when you breathe it in, when you put it in your mouth, playing this game, would affect this, (:34) and you call it, hallucination, you call it, dream. Then you understand by controlling the amount of Oxygen and the amount of Nitrogen you take in your breathing, you can control your speed of travel, your transmutation. Or you combine the two together, on a C60, you can float, because you create your own dynamic of what we call, crystal structure.

When you look at the Nitrogen being 60% of the air of this planet, elements of the, what you breathe, and then you play with the Oxygen, which is round about 15-16%, then you understand how your breathing has become part of your life, connecting, feeding your Soul for your part of what we call, schizophrenic life. The whole problem goes back again in the misunderstanding, in the fallacy of what we call science. Look at the life. Just go on the Internet and look what is the percentage of the Oxygen in the atmosphere we breathe, at the connection with the Nitrogen. Four to one. Isn't this what we saw the gravitational magnetic field of the physical Earth needed? (:36) Then you start seeing the intriguing way that the field matter states create, connect to the energy state of the fields.

Then in reality by breathing the air we connect to gravitational magnetic (GM) field matter state of this planet. This is why when we go out of this atmosphere, become breath, we die. Because our connection with a gravitational matter state of this field is disconnected. As long as we keep the Oxygen which is connected by matter of the dimension and direction to C15, what we call, combination of the Hydrogen and a C14, we can survive anywhere in the Universe. We don't need the matter state Nitrogen of the position, time and place (TPP). This is how way you arrive, you live on the dimension of the C14 with connection to the Creator, the line, that connection creates its own composition. You remember the way we said, interaction of the fields creates Mass and the interaction of that field package with another package of the environment gives you the Weight, it's the same process, it's the same understanding.

Then this brings you to a very interesting point and very interesting part, and that is how we go to the next step, how we add to understanding of new condition of the matter. (:38) And how we have not understood this, this connection of the air we breathe. They tell you so wrongly, when you stop taking Oxygen, you die, and they give you the Oxygen. If they put a mixture of the connection of the Nitrogen, with Oxygen in a specific way, in a time of when you breathe, you can connect to your Soul. This is why some people say, "I've seen the light, I died." Because at that point the combination fits into it. This is why some people, by breathing, can feed themselves. They connect to that Carbon 15 (C15). They connect to that combination of C15, which is addition to the

Universal line, which is a $C14 + 1$ which is a 15, you are connected to Universal energy. Why do you kill to eat? If you know how to do it, by changing the level of Oxygen in your body, connected to the physicality of this planet on a Nitrogen, within your Amino Acid, you created a Black Hole of the energy of the Universe. Any energy you want, you tap into.

Then this brings you to a new understanding. You remember, I've repeated this many time before, when the Indian Guru came to the Keshe Foundation, and they were flat on the floor with him kissing his foot, because, so many time he could not eat for 20 odd days, and it's magic. The guy found out how to change through breathing, to this energy level, to tap into. And if he could teach that to his followers, no one would have eat anything, no one would have killed for. (:40)

But, there is another dimension into this, because is field interaction. Your Universal energy of understanding intellect and your physical intellect is the same. It has access to both at the same time. But you have to understand how it works. How you can pin to the Universal knowledge. How you interact with it. The way you use the Oxygen breathing to connect with Universal energy to feed, how do you connect to Universal intellect? That you can take the information, as we say, "downloading."

This comes to another point, this comes to another side of the what we call, we've shown you the graphs. You have a physical life, you have a Soul of Physicality (STP) with the energy packs of the matter state, which is connected to the Nitrogen, and then you have the Universal line of energy. Which... what does this mean? In reality, this means, you don't need to do much. In this process, you got to understand how you connect to the Hydrogen, to the Carbon, to Nitrogen, and to Oxygen. In this process, how does it work? This gives you very interesting, very intriguing combination. What this combination is, just draw it like this. (:42) (Let's take it off that I can do it for you much easier). You have entry in position of this. (As much as... I know you like yellow if I can get hold of the yellow which picture of the Sun). On this end (NO) you're dealing with the physicality. And on this side of it you're dealing with the STP, which sits between the two. But this STP in the interaction between the two, finds itself on the side of the physical life. But it opens a position in the dimensional emotion which both share. And this is where we connect through our emotion to the Creator.

Muhammad, bless his name, said, "If you read the whole Koran, you find 100 attributes of the Creator." These are the emotions of the Creator, not the physicality and his behavior. Kindness is emotion. Giving is an emotion. Forgiveness is an emotion. Kindness is an emotion. (:44) And then if you understand this, you know how to control and how to use the emotion of love and to move on from one to another. Use the emotion of everything which is the beauty, you cannot take, because these two are set, you cannot change, either side of the equation is balanced all the time. It just depends what spectrum of the energy of which we interact, to create what emotion in this common ground (circles overlap between HC and NO).

Go back to your teaching all the time, I said the emotion in the physical life is the same as emotion in the Soul. Now you know this is your Soul, now you understand why the position of the Soul of the Man (STM) is black in color within your MRI, within your scans. You have carbon. In the dimension of the Universe. This is why our Universe is dark. Looks black. Illusive black. Because the interaction of the energy of the Creator as Hydrogen and in interaction with the combination of the Carbon creates that illusiveness of the color of black. Try it in the lab, you'll understand.

Then you understand how the system works. Then you understand how you use the emotion in the essence of the Soul, (:46) to convert into emotion in the essence of the physicality. This is why when we dream of the Mom, we feel that emotion in our physical condition and wake up and remember, because we sit in this (HC). Then you understand how the STM, the physicality of the Man, connected to the physical characteristics of this planet, is connected to the life in the Universe. Because, when you connect to another creature in the Universe, you connect through this (the emotion between the two), not through this (NO), or through this (??) .

In a physical life we connect through this and bit of this, we call it love and we generate children of it. In the World of the Creation of the Universe, it's more or less the same. But, you have to understand what emotion in what environment and with whose love you're playing. You play with the love of the Creator, you're in it, you see the light, you see, you get access to the Knowledge of the Creation. Then you find out you are part of that light, you are part of that knowledge and there is nothing to be proud of because you are common amongst all the others you are part of the Creation. Then our men on this world fight for how much of this, in one combination they put on the crown, they call themselves kings, diamonds, crowns and the rest of it and the presidents. And this is a question which comes down to, what are we fighting for on a dimension of physicality, (:48) when in essence we have access to the dimension of the Creator?

How long will it take man to come to understand this? And how long would it take man to understand this as a whole? Then you understand what life is about. The whole process of your life, your ancestors, the Creator is on this page (3 teachings on HC & NO). Then it comes to the point that, if you understand each part of this knowledge on the screen, what are we fighting? And how can we use our Soul to connect to the Universal Community than our physical world? And how to change the course of the humanity by connecting to what I call common denominator, structure of the Universe. The problem in most of the World of Creation comes in this part, and this is the part which we have a huge problem with. (:50) And this is where we sit with problems. Because we haven't understood this, we run in problem with this, and we have a bigger problem with this. I made man in the image of Myself. And in reality, is this my image? Is this what I want? This is what I want to produce. This is what I have taken further to understand about myself.

And if we understand this process, if we have the intellect, to decipher the Knowledge of the Creation, between its element of time, place and position (TPP), and a constant point of reference, then we can create any life, anywhere in the Universe. All we need is to

understand the emotion, which is common denominator between the two. And this is why in all the teachings I keep on explaining, and I keep on referring to, giving the love. If you find that energy level, (:52) which is not difficult, many have achieved, then you can transmute to this dimension, or you can transport to this dimension. The love of Creator, the love of knowledge, the love of becoming a knowledgeable creator. Then you can create anything. You can access to the knowledge of the Universe. One abuse and you are back to start point.

Now, you understand more about yourself, you understand more about your own creation, scientifically. Not by, "I breathe", "I can fast 21 days", "I can become illuminated", "I can see the light", you can all do all of it. Now you know which one of these fours you have to play with, And, if you become good enough to play with this one (H), you find the path to your Creator. You find path to the Source. You find path to beauty of this, as in the world of matter, you call it, an Electron and a Proton, and in the world of energy, we call it the Fundamental Element, which is energy itself.

In the matter state you look inside, in the World of Creation, we look from outside to see one. And if you understand what I said, you have found a way to every position, dimension in the Unicose. Because when it comes to the Unicose, you have a different game play which is very easy. (:54) What does doesn't what does this mean it means again cannot be any different the source of the Unicose in its structure is connected to a specific what you call, fundamental energy of element which is in the center, you call it, the Hydrogen of the Universe, the fundamental energy of the Creation, and then you have all the Universes which work within to create, connect, to the same point. Those who gather this knowledge to reach to the fundamental energy, to the fundamental source, will understand the totality of the World of Creation, does not matter in which position, time and space, they manifest themselves. We have called it the Hydrogen. We have called it a Neutron. But in fact, it's the essence of the Totality on its own, of the whole Creation. Where again the Black Hole as a center sits as a Proton, and the Universes and Unicoses and the galaxies become that Electron.

If one day man looks from a distance and be able to see through this Universe, you will see exactly what you see in a structure of an element. One center point and many Electrons as galaxies within and around it, but in a bigger dimension. When you look at Electron in a combination structure of physicality of an element, (:56) that electron is a galaxy. It has so many elements inside it. Then you understand, there is no difference in the World of the Creation, in all its dimensions. Is for you to understand the essence, of the interaction of the fields. And understand, fields in motion, means creation of energy, life. And then you understand why it says, "I made Man in the image of myself". As long as I give it energy, the man runs, the man lives. And that Man, to be given energy, needs to take from the environment, the energy which I've created for it to live.

Stand outside a fish tank and look at a fish. That tank is his Universe and that fish inside opens his mouth continuously, not taking the water in but taking the energy from its environment which is embedded in that water. Then change ... that fish with a man. And then you change the environment, make it more acidic, make it more salty, make it

more sweet and see what kind of fish you get. You change from the sweet water fish, into the salt water fish. (:58) Then you will be the fish that you can live in acidic environment, but you need different tentacles and the others. And then you see how man will change in Space by changing those elements of his environment. Then you see how you look in Space when you land in that affirmation of confirmation of the environment you landed in. The Soul in the center does not change, but the manifestation of the physicality changes to suit the environment. You cannot put a fish from the sweet water in the salty water, it cannot adapt unless has the pre-set system for. But it can adapt if it travels through dimension of his Soul. It will take the manifestation of the STP of the salt. Maybe, maybe you understand the terminology used as a Mermaid but then that comes in both split dimension of the Soul and the STP, and the physicality of manifestation.

As Knowledge Seekers (KS), today's teaching should have brought to know yourself more, to understand how you connect to your environment and how your environment creates the emotion that allows you to be the Travelers of the Universe. It's you who decides which way I go. I change my breathing, I change my structure, (1:00) I can change part of the absorption of the energy, but in totality you have to come to understand one thing. In your Amino Acid dimension, which is the Nitrogen and Oxygen, and Hydrogen and Carbon, you have to understand how to reach to that C60 energy fields to be able to reach to manifestation of the energy field common denominator of the Universe and created by its own dimension and characteristics.

We looked at multiplication, but sometimes you have to look at subdivisions. This life is the basic fundamental energy transfer units of the Universe. Does not mean that you always live within the structure, but sometimes you can use this structure into its lower order of elements, to create what we call the fundamental steps, in creating energy fields, which allows the STM to interact in certain conditions, with the dimension of its physical condition, to create life in sub ?? seminal, in a way sub-existing in the dimension of the Universe.

And then you understand this kind of life finds faster access to the dimension of the Creation than this kind of life. (1:02) One day I'll explain. It's not that everything has to be multiplication of the environment created. In position, it's a subdivision of. And this kind of life exists in empty space of the Universe, man looks at. And there is more of them, than more of them. And this is, if one day you understand, creation of life, in the span of the Universe, is the same. I hope I opened your eyes to the truth about yourself and your existence, in the dimension of the Creator and the Creation. And one day, if you understand this, you'll understand, it's easy to work and easy to live, it does not matter where you are, as long as you understand the connection between your position and your origin. Because at the end, the Nitrogen and Oxygen comes from the interaction of this itself, in different shapes and formation.

If, this is hard to understand, I'll bring you another point for you to understand more. You look at CH₃, the original sugar, the original essence of life. 15. You take common denominator between these two. (1:04) You see why Nitrogen feeds the Amino Acid. And then you understand why the basic sugar works within the structure. Because now he

has a common denominator to feed both. STM, in dimension of the Universal level, and to the physicality of the man, in dimension of matter state. Then you understand why when you drink alcohol, you touch the realms of the dream, and going to the other side, alcohol is a combination of sugar and a Carbon. When it takes you through more in dimension of the Hydrogen and Carbon, physicality has to follow, it has no sense of direction of the emotion of it, you tittle tattle, because the physicality tries to follow the images of the fields of the Universal energy. And then you wonder, would I like to be always drunk? Yes, but drunk with the love of the Creator, and not drunk with the alcohol of the man.

And if you understand this, you will understand, there is nothing that man can do, except understand the process of his own creation, to be able to reach to his Creator. And as I always said. << Farsi Language >>. This is the gift of the Creator. If the man understands his giving, his beauty, his essence. And now man understands. (1:06) It will take men of science, years after I'm gone, for them to understand the teaching of today. And for those who understand, will get access to the World of the Creation instantaneously. Because then they know how to manipulate between this side and that side, and how to go. And you don't need to push it, because it pushes you to that dimension. I hope you understood from today's work, the Totality of the understanding of the work of the man, and I hope that in you understanding this, as a whole, you have found the secret to the World of Creation.

Thank you very much for today and I hope, and I hope sincerely one day in the science of and scientists of the man will take this page and study it for centuries to come, to understand how, where, how it look, how it will come, how it will shape, what he calls a dream and what he calls the reality, but the dream is the reality of the Universe, and the understanding of the man with reality is in dimension of the understanding of the Universe, we call it the dream. It's emotion, it's fields, and it's understanding.

We go for a small break, and we come back and I hope what I have taught you for past ten years has brought you, and was planned to bring you to this point of understanding. I hope you understood. As you see your emotion, the line, the connection to your Creator, (1:08) and the games magnetic fields plays, and with it, how you can become part of the Creator and the Creation at the same time. Rick, take us for a break and we'll come back.

>> **BREAK** >>

559 KSW October 10, 2024 (1:14).

K- You came in a little too early ... Thank you very much, sorry about this. You used to have a very long Intros, I used to do a lot of things in between, but now I had to, with a short Intro, what you call it, interim time (Break). Thank you very much for being back. Yes, there are a few things which we like to bring your attention to. As usual, as part of the structure of the Keshe Foundation products, Keshe Foundation has launched this week a new range of what we call, soaps. You see it but you cannot add it to the cart. It'll be open up in next day or so. And this is another dimension to the work of the Keshe Foundation. (1:16) We will pursue this work of the soaps. It's totally different than what was before. It is the new structure and you we would like you to report back to us how you feel emotionally as much as physically. It is said to, it's one of those Twin Systems but now we have brought it into a very nice way as a soap product. It's not the one which I've seen a lot of Knowledge Seekers making soaps and promoting it, but this is a dual structure and we would like to see it. Part of that, what we had the Twinity Gans's. Now we have the, what we call, dimension of the Twinity as a Soul, but it's set specifically inside. You can use any of the two combinations, if you like, because there's a five different combination into it. Each one, you can use and see how you feel, more happy and more connected than the rest of it.

On the back of these soaps, in next few days and weeks, we will launch a new Twinity soap, and one Unifying soap. What this means, very much like the structure you had with, let's say, Knee Gans. We will launch such a thing for joints, for Twinity Soaps, or what you call it, like the Pain Pads, we'll call it the Pain soap. And then we will hopefully, in the course of very short time, we will launch, what is known as Unity Soap. (1:18) What does this Unity Soap will bring? We'll explain it in the future. It is for extension of the knowledge, to unify the field's energy within the body of the man. It's a very specific soap. When you use it in the shower, when you use... wash your body with it, you will feel that process. What does it mean? Let's say you have a condition, which has been a point of your concern, see how that condition changes. If you have a little lump on your what you call it, psoriasis, see how that changes. Does it bring the change of emotion, and does it bring change of physicality?

The soaps which will come on that level, are extremely expensive. It's not just a normal soap, and it's taken a lot of research to develop it. We would like to do the response for it. And we would like to see how you react to it. So it's part of the trial. It's still the same clear water, the same certification, the same process. But this brings a new dimension. What we're trying to do is, if I use soap, can I feed myself? To learn how to create that condition. If I'm in a certain mindset, can I change it? (1:20) If I have certain condition, a lump here, a lump there, can I bring the change to it? That I still have the lump but I feel happy, I'm content, I wanted a blonde hair or blue eyes, whatever, is contentment. And once we launch these, especially the what I call, the Body soap and what I call, the full

what I call, Unit soap of the one thing, they'll be around about a thousand Euro per soap, it's not going to be cheap. We have to achieve it, we have to be able to do it and then you see it on the what you call, on the structure of the Keshe Foundation. And we would like to see if... how you react to it, how you enjoy it, what emotion it creates in you.

These are Twinity Soaps, we start the physicality and the emotion together. And we want to see your response. It's standard soap, what you call, dimension on it. And, it's, for what it should do it's actually worth it. When you pay two and a half, three million in the United States to reach to the same point. And we take this further up in next few weeks and we explain to you the single soap, and like the Body Soap and then what we call, the Pain Soap. But these are not normal soaps. The condition, the production of it is, what we put in it is groundbreaking, and it'll never be copied. (1:22) Impossible for anyone to copy, and if you see somebody puts on, know that it's impossible to do. I'll explain one day how.

And then, we'll go to the next step, in the same process, in the same production, in the same, what we call, material delivery, of bringing things in a more direct use by the emotion of the man, by how you feel to use it. These are not medicines, these are just a normal soap, with a new twist in understanding the process of Creation. As I said, you see the new soaps which is launched, will be released in the next few hours, a few, and maybe today, tomorrow. They are unique and they'll be delivered, I think, in about 2 weeks, 3 weeks, more weeks, whenever it's completed in. And there will be a very limited edition of these, we will not repeat it, it's just, as we understand, is what we call, trials of the Keshe Foundation, and then we will transfer these into world of cosmetics, in the what we call, in many, many ways of application and use.

It was interesting to see how many of you responded to the session of last week, where without you knowing, we brought in new elements, how most of you come with the same kind of understanding, the same kind of, what you call, emotions, and it was interesting that you were not aware what we did, what was the process, (1:24) and how it'll be set to be done. The Knowledge Seekers who come into, or came to the last session of the September, we will get in touch with you in coming days, some of you, and we want to go through the whole process of your journey in the September session. Even though some of you written to us we know, we might come back to you to understand more and to go in a more intriguing way to develop the process.

Are there any questions?

K- ... If you were not here before, when we started, what I explained, some of you, because of the attacks we had on the servers of the Keshe Foundation, in a very severe way, it went on for days. If you have any problem to log to Keshe Foundation websites, any of them, KFSSI, KF Education, Keshe Foundation ??, keshe.foundation, clean up your cookies and come back in, you should be able to get it in. It's just that it's a process used to stop these attacks, we have to do certain things, or what we call, the IT team does, to protect what you call, the Keshe Foundation assets in the, on the Internet. And please, just clean up your cookies and come back in, you should be able to get in, because some

people can get in on their mobile phone. Some people can't get on a mobile phone, some people can get it through their laptop or iPads. We're trying to clean up, if you have problems, send it to info@keshefoundation.com and the IT team will sort it out. (1:26)

R: Okay, we have an announcement from Rafael and the Brazilian Keshe Foundation. And he wanted me to read it because he's not able to do that while he's translating. I have a picture of the conference coming up November 9th and 10th, in Rio de Janeiro in Brazil. So, let me read what he has to share here. (starts to read wrong message then stops ...)

K- ... He says he sent you the wrong file. He just put it up, check your file, just wait. I know where that came from, your reading. Just wait, he'll most likely send you another one and come bring this up later. Okay, no problem. Oh, it would have been nice to be there again. We were there three, four years ago, just before the Corona. Around about by the same time. And I wish you very success with this conference.

R: ... (1:28) Okay, here's the text that goes along with the announcement. On November 9th and 10th will take place one of the biggest conferences on alternative therapies and technologies of Brazil. and Keshe Foundation was invited to be at this conference, and give a talk on the first day. We were also chosen by the organizers of this conference as one of the institutions in the country that has made the biggest impact on the lives of others and on society. And for this, we will be receiving an award at this event, called the Humanity Award. In addition to the one hour talk that the representative of the Keshe Foundation in Brazil, Rafael Teixeira, will give on the first day of the conference, during the two days of the conference we will also have a booth, where KS from the Brazilian community will be there to share their experiences and understanding of the Keshe Foundation technology. We are also using this opportunity of this great event to make the first face-to-face meeting between Knowledge Seekers from the Brazilian community since the establishment of the Keshe Foundation Brazil in 2019, and Knowledge Seekers from various parts of the country will be with us at this event. (1:30) There will be no live recording of this conference. For more information about this conference, please get in touch with the Brazil team in our Telegram group, Keshe Brasil Knowledge Team. Thank you Rafael.

K- That's fantastic. I wish you all the best. And the Foundation grows on its own steps, step by step. It's exactly five years more or less since we've been to Brazil for the conference, about around the same time. We went twice within a short time back to Brazil. It's fantastic to see how the hard work of the Brazilian have made out. I know Chinese are trying to replicate the work of the Brazilians in China, with the Keshe Foundation.

Any other announcements?

Q: ... Hello Mr. Keshe. Thank you for this fantastic teaching. I have... I hope I don't take time of other Knowledge Seekers to ask. I have two questions, three questions. (1:32)

First of all, when you talked about crystal formation. Is it... Well, I think you said it's in Space. How it's created? Is it in field form? And what's the characteristic of that?

K- Can you repeat, please?

Q: You talked about crystal form.

K- Crystal formation is a scientific way of explaining all the fields come back together to a center, in a way. In the Keshe Foundation translation of the energy fields, not the matter fields. Because crystal structure is a point of reflection of energy, or light, or matter state energy balance. What this means, is the light of what we call, which is energy in motion, travels through its distance from A to B, to reach balance of the gravitational magnetic fields, in respect to its own position. And when it's space free, it can travel a lot. When it's a space closure, it travels very little, and then it confines, back reflects, back on itself in a matter, I say this is how diamonds are created.

This is a very technical, and I have explained this in other, private teachings, to some scientists, and it's very controversial. Because if you understand it, you understand even how the Universe is created. (1:34) What this means is, in a common man's language, is that you have a source, depending how much the field energy of this source travels, at a given strength it cannot, its Gravitational, is Magnetical, becomes balanced to its own source, it reflects, travels the same distance, and then it reflects, travels the same distance, is the energy balance within that distance. And then it has now two position of balance, so it reflects. So, in this reflection, and if you take it in the matter state it travels so much that it takes a shape of the Universal crystal, or what we call, like a Universe. And we see this structure a lot in even diamond structure, in the rough diamonds we see this shape.

So it is the reflection when a magnetic G .. when the light travels, now we know from Book 2, it is a plasma. It has magnetical as much as it has gravitational to its point. And how close you bring these two, dictates the speed of it. Because there is less losses, less given to the environment. So this reflection, this interaction in a way if you look at it, it creates a dimension like this. (1:36) Gravity always pulls in on the different strengths and pushes out as magnetic, or different. It usually gives you an elliptic shape like this, is not shaped like this spherical. And there is a reason why it takes this shape and in a way we see it in the, what you call, in the structure of the creation of the systems that we've been brought up wrongly, that the Earth is a spherical shape. Earth is not a spherical shape, if you look at its totality in a field strength, it's more like this (slightly oval).

This is a crystal structure shape and this is one of the reasons even when we look at the Sun we think the Sun is spherical by distance, but it's not. Sun itself has a slightly different shape and that shape is even explains why the North Pole is so many degrees warmer, what you call it, different than the South Pole. Earth is the same. So this creates a totally different structure of the wavelength and everything else, and different shape of creation of life in the Universe. But .. in principle, it is created from the reflection of the same light, not from another interacting with it. (1:38)

And if you understand this, then you understand the ?? starts with the light of the Creator and in interaction with its own fields, creates its own Universe, if you understand it that way. But, does not stand still, because in his reflection, in a way, it interacts with more, and this creates the life, and this is why we say, "The Creator is everywhere", because it comes from the creation of his own crystal structure property, His own fields...

This is what we see, what we understand, but the beauty with this understanding is that, for it to travel a distance in that source, what we call like, let's say the Black Hole, it has, it has to be given what is absorbed and what is emitted by its environment. This is why if you take a corn and you try to make a popcorn out of it. If you change the atmospheric condition of the pot you'll find out the same corn creates different sizes of popcorn. By the same principle, when you go to the volcanic eruptions, where some of the diamonds are created through the same property of the explosion of the 'popcorn of the corn,' becomes diamonds in a way, we see different structures, depends what environmental pressures, temperatures around allow the solidification, (1:40) we get different shapes and different colors and different sizes of the diamond. And they follow the same procedure, it does not matter where you are. You are on the Earth, on the Moon, and on other planetary systems with the volcanic eruption.

And part of the creation of life on this planet is due to the existence of the volcanic eruptions. Different energies of Carbon, different energies of explosion, in interaction with the atmosphere, led to the creation of life. Without it, life as we know it today, would not exist. And the same way is the dimension of the life, and the variety of the lives we see on this planet. The volcanic eruptions on Earth were one of the major contributors to the creation of life on this planet. Where they mix, they create the condition of mixing of the Carbon with the what we call with its content, with Nitrogen and Oxygen. Where, partially where the Carbon came through the inner part of the Earth, brought that condition of the creation of the Amino Acid, and then in the latter part, due to salinity, life, with only the volcanic eruptions, the salinity has taken that position, and what we call, process.

Q: ... (1:42) Thank you, the second question is about C15. In what condition it is created?

K- C15 is a combination of C14 and Hydrogen. I called it once, Universal alcohol, to get drunk with, because you can do a lot of things with it. But it's understanding that it's the essence of the Creation connected to the Creator. Once it's been said what we call, C14 is the process of the interaction of the field energies of the Universe by themselves, on themselves, and because of themselves, and it's in its purest form. It cannot go to anything else, but it can connect to its own origin, because he has the same common denominator.

I explained maybe scientifically how it looks. If you take Carbon and Hydrogen and put it through the process of crystallization which we call, C14 and then add, interact in a plasmatic fields these two together which gives you, (1:44) what I call, C15. This C15 is the energizer. And in a way, if you understand, as I explained just before, CH3 is C15

too. In understanding that this is the matter state of energy and this is the Universal state of energy to the Creator. And the energy combination of this with the Amino Acid gives a clarity and an energy release that can reach man to C15. That's why we see narcotics have such effect. You look at all the hormones in your body, all have this characteristics, this combination, testosterone. Everything else you look at has this combination of work. Because it allows ?? free energy to get to that point.

Once I explain this why we have excitation in a point of addiction to sex, it is because in subconscious level we reach to the point of, point of Creator, due to the hormones within the body of the man. (1:46) And then you understand how everything else works and how we are rewarded. And how things are and how things are kept, and put in the state of the life, and creation of life. Understanding one is in a matter state and one is in an energy state. And then you have to understand, if you play this game, if you understand it in a way in a full capacity of it, then you understand the emotion is connected with it, and that emotion brings a physical reaction. This is why we fall in love in a way. If one day the scientists come up with what you call, mechanical or physical energy level of the love they will find C15 in it. Both in both dimensions. And this is why we feel falling in love in our heart. Because these guys are floating through it, while these guys are part of it on the other side. World of Creation is very simple if you understand it. (1:48)

Any other question? ...

Q: ... I have another question. First of all, so emotion of physicality and emotion of Soul, are related to each other or are the same?

K- Are connected to each other. The emotion of the physicality is connected to C12 the emotion of the Soul is connected to C14.

Q: Thank you. And the next one is when we see the whole organization and order in the Universe we think, okay, there should be a DNA which fixes the size in every part? Or kind of I think it's the Inertia, the line of Inertia of Universe and Inertia of locality which fixes the size and the force of these fields to lead to creation. Is it true?

K- Pardon?

Q: We see always the same size in each planet, in each Universe, in each solar system, whatever. Is this uniformity of the sizes, it's like human DNA, which is all of us who are the same form. Is it because of the line of Inertia of Universe and locality that it's regulated?

K- In a way, yes. In a way, yes. In a way, in a bigger shape and size. You do not find elements in the... close to the center of the Black Hole of the Universe, (1:50) that you see in the outer boundaries, but they are all connected through the Universal line of magnetic fields due to. It's very much when you change the pressure and temperature of a substance, its characteristics changes, or its manifestation changes, you go from gas to liquid. The same happens in the Universal structure where the magnetic field pressure in

the center of the Universe is totally different than on the boundaries of it, but on the boundaries you have the pressure from outside Universes on it, so in a way they play each other off. And in a way, they bring new conditions of existence. But at the end, they all have the same common denominator.

You have to have a field to create a structure. You have to have energy to create a structure. But, if you understand how to change the energy into a structure, you don't need to hold the structure, you can create it anytime. This is what we do in the Keshe Foundation lab. We create the structure of the energy, and by the interaction with itself, we create the flying saucer, you call it, the UFO. As I said many times, you look at the size of the flying objects, can you imagine a 100 kilometers, 200 kilometers aluminum panel, to build the structure? There is no such a thing. (1:52) You build the structure by the combination of the field interaction with itself, crystal structure.

And this is what, as I said in, you know, laboratory tests, researchers see like a cloud coming up, beginning of. It's just that you see the vapor rising from the sea and it goes up in interaction with the environment of the Earth itself it becomes a cloud, it gives a structure. The magnetic field of the Earth in interaction with its own dynamic structure has to be dynamic, creates the atmosphere of the planet, there is no difference.

Now we have reached that level of knowledge and understanding in the Keshe Foundation laboratories and I created this years ago. But knowledge is done when it's shared and then it can be developed. And our Knowledge Seekers are in that position. The understanding of the change in respect to what itself, which created it, creates by itself the same, creates its own environment. One Ray, one field of the Creator, in its dimension, in respect to its essence of the field strength, creates its own crystal, its own Universe. And what is in micro, what is macro, we never understood. Now we understand, we do the same. But we control in a different dimension and direction.

Q: Fantastic. Thank you very much Sir.

K- You are welcome. I'll show you this, it's very important for Knowledge Seekers. I was discussing this with our team. (1:54) I have to go into it, bring it down and then explain it for you to understand.

K- ... I want you to look at something very interesting. This is the graph of no headphone connected to our system this morning. Last time we connected you all to our system and we watched what happened. This time we didn't connect any of you. Due to the process of the work you lot have connected yourself to our system. The interesting is, I show you something else because our guys are taking these pictures and I show you what it means. Before we start the session, before we connect you to the teaching or we start a Zoom session, we... (I have to edit it because there's some information you don't need to see. Okay. Done. (1:56) Go back and I share it with you... I'm so slow in these things, it puzzles me sometimes. We try to connect to Zoom. We're going to share with you something else you see).

Before we start the session this is a normal standby we see when there is nobody in the system there is no connection, this is few minutes before you start, we start the session this morning. Once we connected the Zooms and the system, because our system externally and all of us are connected to our system, this is what you turned up, where the arrow is, when the system came up, when the session started. And you see how you react, how you interact. I asked our team yesterday to see if they understood the meaning of the question. The left side you have a central line...

(I don't know if I can annotate on this. That's the Internet, we used to be able to do it... If you, let me see if I can annotate on my mobile. We can't annotate anymore. Very strange)

. (1:58) At the arrow point when you see to the left of the arrow is the continuation of this one. So, once we come out, it changes. Somewhere in the center if you look at the second arrow, or the arrow on the right hand side, you see a vertical line, every gap you see a vertical line. That vertical line before the second, the arrow on the right side, is separates us on the left side arrow, is the horizontal side reading which is of your brain dimension of your shoulder to shoulder as I call it. And the one on the right side is the dimension of the, what we call, vertical side, you connect to the Universe. The left side, you hardly see the yellow, which is a physicality, which means the Soul and the STP cover the shape of the body of the man. That's why you don't see it, but it's actually there.

I asked it to be tested yesterday, to get the confirmation it's correct. It's in there, somewhere. You see sometimes a yellow patch it shows itself like a tip of one of these things.

On the right side is the vertical side, the way you absorb energy from the Earth in a way if you look at it and you release it. With this you can travel the dimension of transformation. But you always have the limitation of physicality holding you on to the to the planetary system. That's why you see the manifestation of the yellow very, very, very, very, clear. And then you understand this is the same machine in the same area, it's just red on the horizontal and the vertical dimension. (2:00) Then you understand how to how to change your physicality into energy where physicality does not, even exist, does not play a role. Transmutation. Then this brings a lot of understanding.

You see on the long, if you look at the left arrow, and then see where we switched on the system, or you all came in, we didn't switch the system, it's always on. You see the parallel line, how the Soul and the STP run together, on a, what we call, horizontal line. And on the vertical, there's mayhem. Because physicality wants to manifest itself, and in controlling the dimension of this change of the Soul, in the dimension of the change of STP. This as I said to our colleagues today, if you give me 10 years, I can explain every dot and everything and you learn something new about this graph. How you connected, where the connection of the Soul was and why we jumped and what is the response. Then we understand we have this schizophrenic of life of the STP, and no STP, which allows us to move in a dimension of the STM which is on the left hand side.

This is why we stand vertical and how our emotional field strength height is compared to our Soul height. (2:02) And if you look sometimes, especially just before the second

arrow on the right hand side, you see a peak in the elevation of the Soul or increase understanding. And you see how much on the bottom side the STP jumps in comparison to this and that point. All this has a meaning. You see the repetition again on the right hand side. At the same point where the Soul comes in and you see how the physicality jumps like a monkey. It's just putting a needle into something and just jumps. It's all having an understanding this, this has a lot of meaning in how we react in respect to our Soul, how we react in respect to our physicality and what gives the dimension of physicality in the interaction of the field of the Soul of the Creator and how the Unicoise is created.

Any other question?

K- ... I've just received a note in the background that they have a place for the soaps if anybody wants to go there. It'll be interesting as an observer of using these soaps, give a pack to your partner and don't let your packs to be shared, and ask your partner to observe you in emotion and in physical condition, in respect to what kind of soap you use, let's say over a week, and change it to another, or combine the two together. (2:04) And then you start seeing how even your skin feels? The touch of the skin. How does your partner's touch changes? Would you feel it in a different sense of emotion? And they say, "Always use that one, because I feel you better." And, or you might tell your partner, say, "You understand me more." Because maybe you use that combination of the fields. We don't look at it as a soap, we look at the interaction of the fields of the life of the man, and these soaps are setup that way, and I hope you enjoy it, and is unique in its production, and is unique in its, what you call it, we supply the material, and we don't give the combination to no one to understand.

And then we produce the other part. I've seen some of the groups trying to replicate Keshe Foundation in Knee Gans, there is no way you can do what it does. It's just what you call it, trying to what you call, "milk it" but it's ?? lost. But many of you have used these materials in the Twin Gans's or whatever, in the past in the Gans's. Now we, there's a reason we work this way, because with the soap you don't need legislation and certification. As long as the material stands as a base the same, you can produce, people can produce, and we have given, we're giving this one to outside source to produce, not by the Keshe Foundation. And we provide the material. (2:06) We can go to the same people, but you will not get the same, because it's totally different structure we use. It's the knowledge we never released before. We never release it because it can be abused in different ways.

In some of the Twin Gans's you'll get one Gans, but you have to use in two different positions, that's considered a Twinity, doesn't need necessarily to be two different bottles, and you'll understand more how to play with this, and how to use it according to your, what your need or what your requirement is of the emotion. I know the first batches of these Gans's were shipped out this week, so you soon later you receive all your requests and coming through.

I have a good news for you, those of you who are looking for that Cosmic Ray, we have found the packaging in the box that it'll go out to, hopefully they produce the prototype this week or so. And immediately after we'll start shipping them out, it's beautiful, it actually reflects what is inside it, it reflects the C14, and the Cosmic rays together in its package, which is fantastic. We'll release it soon, hopefully next week or so, you will see the picture of the packaging, and it'll be released. And strange enough, it comes from the land, which I could never think to do such a thing, and they'll be able to do this.

Any other question? (2:08)

Q: ... From this graph can we see the crystalline structure, how it's formed?

K- No. It needs another addition maybe in the next few months when we can put it in, yes, but no. Because when they interact, it will create a different dimension. Initially, if we put the left and right for an individual, which is connected system, we should be able to see your physical shape before even not seeing you. In the future we can even see, if let's say you have a leg or an arm amputated, you will see in the structure. But we don't have, it's something we talked about, we need to make, change this into three-dimensional, but when you make it three-dimensional, dimensional, you will see the Soul, you will see the physicality. And this is (take) some times, before this to be done. We need to go into a holographic structure that the data comes together and creates that structure.

Any other question?

Q: ... Good morning Mr. Keshe. I received the full order of the Cosmic Communication Bundle last week. Now my question is the 300 Euro annual fee, which account can I transfer this to and for what purpose? Thank you. (2:10)

K- This is for us to keep you connected, these are charges, and it's paid to the Keshe Foundation sales. It's part of your agreement when you bought. It's just pay to, because any updates, anything else we do if you damage your system, we replace. Some Knowledge Seekers already damaged their part, they already received a new part, and this is part of our work. We have to place your system inside, system is physically needs to be moved in, you can use you can put your system in but not connected just because you have it, you have to make especially if you made the Universal UBESUS system, it needs time to be connected in. The Cosmic Ray Bundles in a different combination and then it needs maintenance, needs people to look after it. I think we are more or less all the Cosmic Bundles which were bought are delivered now, it's a process complete. We'll complete with all the UBESUS within the next month or two and then we introduce the next step into this structure.

K- ... By the way, there are people, some people bought the Home Enhancement Unit. That is going through the process of getting finished to be delivered in the next 2 or 3 weeks. Because I was in the lab. And now, we will release majority of them, within the next few weeks. If that is they're ready to go. (2:12) Yes.

Q: ... Good day Mr. Keshe. Last week you said that the Soul side, the Hydrogen and Carbon, is constant in our Universe, and that the Soul of the Creator is implanted in the Soul of the Universal Cosmos. Does this constancy of the Soul side still apply when leaving our Universe into the Unicose, or is this exactly the part that the daughter of Mitra, will then teach us Knowledge Seekers.

K- I think I explained that in the teaching today, in a touching way. The daughter of Mitra, she will teach you knowledge that you could not even imagine exists. The knowledge is, which opens the door in another dimension of the life, and you will understand it when you come to it.

And regarding the connection to the Universe I explained earlier on in the teaching and touched on it very softly. In the future we go back to it and show the processes how you connect through your emotion ?? to your Soul. Because a lot of you, especially if you have, if you have these Cosmic Bundles, and you have the UBESUS Bundles, and you have the discs which we gave you. You bought some with the holes or without holes, and you have the Vision Units. (2:14) They all come together. Let me explain to you something very interesting. How those Cosmic Discs which we gave you before and many of you bought it. Plays this. I have to go.

You see the reason we, I originally put this disc out and then the new version, the more powerful version came out. This is your, I am the worst drawer in the world. This is your fingers. This is the disc you hold in your hand. This was originally why I brought this out, for a future time we have enough to do. And then, the new version with a hole in it, which concentrates the fields. This, this is the physicality. It's not pinpointed, because every single finger of you receives certain field strength. That's why we have five fingers. This is how part of our intelligence come from our fingers. I'll explain this. What happened to the people who lose their hands or they're born without arms? They have a different intellect, it's not a problem.

But, now with the disc, you homogenize all the fields, and the ones with the center hole in it, it has a dimension of the fields without matter state. (2:16) When you hold these things in your hand, and connect to the Cosmic Rays Bundle, you will feel the difference in emotion, you feel difference in the information, you feel, every part of you feels different, because, even your vision changes when you use the Visual Glasses, even the old ones you have. Then, you, you will understand how we are connected, in a different shape or form to the fields of the Universe with us.

These, the Cosmic Bundles, in conjunction with the discs, you will see the fields, because now you get it to, when you have just the Cosmic Bundle, is your hand, is what it comes in. The, the one with a disc, when you hold it, then you feel the real energy difference, the emotional changes. And how then you connect, which hand, give to which hand. Because now you're dealing with the fields to the fields, not fields to the matter. And then when you put the Visual Glasses on, we created, you bring a different kind a vision into it, in transmutation and transportation. But you have to understand, try it and see the

distance between your hand, the position of the way you twist these fields together, and then how you place the headphones of the system.

The new systems which now upgraded in our lab is a dual stereo system, which means left and right has to be left and right on your headphone. (2:18) If your headphone with the microphone says that on the left side, you use that combination. But if you use two systems with two headphones on your 2, on your ear, anyway good ... let me explain it. If we always use the headphones, this is your head, you use the headphones like this with a microphone on this side. If you put another headphone with microphone on this side, you will get a totally different combination of energy. ... In sessions we tell you to place the headphones in different places, but if any of you don't have a stereo system, which is both lines, have microphone and headphone, try this, and you will get an amazing sensation. It's unbelievable what it does.

But then you understand how you play with the fields. I've done this, and these things is, is crazy, the condition, especially if we connect it to Cosmic Ray Bundles, and the rest will create in you. You connect to huge fields because ?? balancelly when you have a microphone on one side and a headphones on the head, one side receives the information not both sides equally. And then you have to see how it balances. Where in the Cosmic Ray Bundles we connect balance equal for both side. (2:20)

Any other question?

Q: ... Hello Mr. Keshe, good day to you. Our actions are driven by our thoughts, and our thoughts, much like a computer, are like programs running. What is input determines what is output. From the moment we begin absorbing energy in the womb, the program of absorbing energy to divide cells starts running. This seems to be a program endowed by the Creator. After birth, in our interactions with the external world in life and work, corresponding programs are running. Some of these programs come from the emotional memories of our parents and ancestors. As you've mentioned, that emotional distortions in parents can manifest as problems in their children. Some of these programs we are not aware of, such as absorbing environmental energy, growing hair and nails, the residual emotional programs from our parents in our genes, etc. While others we are aware of, such as various actions we take for survival, planning to attend a party, etc. The question is... the question is, if we can become aware of these deeper programs, that we were previously unaware of, does that mean we can control the operation of our own field? How can we become aware of these deeper programs? (2:22)

K- Change the program to interaction of fields, and then I'm sure 100% you'll see, you'll find an answer and you'll see different understanding. The... what you call, programs or they call it RNA is there because of the interaction of the fields of the matter state which confirms its existence. If you listen to the doctors, if you listen to the scientists, they speak about the RNA and DNA. But one is creator of the other, and the other is creator of the itself. And then one is connected to Universal energy, direct, and one is connected through intermediary to the Universal energies and the local energy. And then if you understand these 2 parts, you can do a lot, a lot with both.

You can transmute, you can transfer, you can change emotion, you can change the what is called body structure. We all know this, but we just because we think we don't know, we just pass it. Presents of hormones creates, as you said, hair, no hair or whatever. But what emotion it brings that game to play. And is it for me or is it for somebody else? And if it's for me, I teach it to my child, that they'll have the same or she'll have the same. (2:24) And what and how does it increases the chances of my survival in the environment I exist (in)? Which means my emotion will change my physicality, but that physicality allows the one which I'm changing for to have a span, or extension to the life in the environment I live. So emotion as a hormone, hormones then interact with the physicality and change the physicality.

We see this very clearly. I've spoken about this before in some of the teachings. Men in the Middle East are very hairy, because woman doesn't need that much heat, that much warmth, because it's not just because of the what you call it, the food, it's just because of the environment. So men create this combination of the hair on their skin. And even women create, we see a lot of hairy women in that part of the world. Because of the comfort to live, to create that circulation of what we call coolness and the rest of it. This is one of the primary use of having the hair. The animals do it in the winter to keep warm or whatever. Men do it in different way. We see the same man over centuries moving to Scandinavia, or moves into China. And we see no hair. (2:26)

The research, deep research done by on this topic, I've explained this before, it shows why men in what you call it, Scandinavian countries are more or less hairless in their body. And if you see the Chinese with one (hair) it's amazing. They want to show that I have a hair on my chest. I have a problem in China when I go to hairdressers there, because the Chinese don't see mustache the way we carry, the hairdressers would love to cut you, "Can I touch your umbrella, can I cut it for you?" Because it's something they don't have, because the feature doesn't exist, because of the emotion.

But why did the man become hairless? It comes from the environment, the warmth the body of the woman needs to stay warm in closeness and then create condition of life to be able to produce. You need skin to skin touch, because of the cold weather. In the warmer weather you need a separation (hair provides separation between the skins). And this comes through other dimensions. So emotion of trying to guarantee the survival of the generation that your partner is warm and whatever, man loses through hormones his own hair. There's a huge research done by scientists on this. If you find it, read it, it's amazing what you understand, what it does, and how long it takes. And I explained, they couldn't understand how man evolved. And I explained before, they went and looked at the lice's, because those people, those times, lice was the second nature of the animals on our body. They look at the lice in the beard, they look at the lice on the, what you call, the body, and they look at the lice on the genitals. And they went through coffins, they opened the bodies, they did all sorts of things, when they found new bodies they took these things into consideration. (2:28) And the knowledge has evolved, it's taken decades to complete this research.

And so, our emotion for our partner to live and for us to be able to generate, the next generation in the cold weather, it needs a close contact, has become part of the Genes, the part of the RNA and DNA matching to create that condition of emotion. We know this very well in research papers. And Canadians have done a lot of this research with the Eskimos. And you can read on that side, ... because, because of the understanding of the survival. In the... how we do this, how we survive, and why mammoths lived in the Ice Age, and then they disappeared, and everything else relates to the same knowledge. And why the animals shed their hair during different seasons. And there's a lot of research done in this. So, that has become part of the RNA information, that we keep and we replicate it in the DNA information.

As I said before, once the scientists of the man understand, the egg and sperm are mainly construction of the DNA, which once given room in the womb of the mother, it manifests itself in a DNA from RNA, as a recording of information to actual physicality in dimension of life, then the womb of the mother creates that restriction. (2:30) That how life should be in this womb because he has to match mine as I have, he has. So the what we call, scientifically we look at the physical structure of the, let's say egg or a sperm. But if the scientists look at the field structure, which is there's RNA information of the Universe, totally different line of information and knowledge and creation starts. They haven't understood that yet. They play with the stem cells and the others, but you can play with the fields, and you can play the others. And so your emotion as a field will bring changes in dimension of physicality, and once its lasts, order 25 years, it becomes part of the structure of the DNA.

This is done again, a lot of research, which let's say you picked up a defect, which let's say you broke a leg or you find whatever had a specific deformation in your cycle of life, not somewhere as some your ancestors, if you have let's say if you had it at the age of 10 this matter and then you had a child at the age of 20-25. Normal. At, let's say you have a child at 40 - 45, the chances of that deformation appearing in the child is very, very high, because now it's become part of your DNA. In the information of the varieties, which brings that emotion. And, did you pay attention to that deformation at age of 10, then it becomes part of the emotion connected. And you're 100% (sure) you'll give it to your child.

This is why a lot of children of the mature parents have a totally different intellect, totally. It's proven scientifically. The parents who have children in late 40s, especially now it's become very common in their 50s and 60s, create children of a different order of intellect compared to their siblings. Who were born 30-40 years earlier. They showed totally different stage of maturity, understanding. And we call them all, "They are so smart." They understand different. They create different. Their approach to life is totally different. Because now, when you had your first child at age of 20, it's whatever came in and whatever was in your parents inside. When you have a child at age of 45, 50, you take 25 from 0, 25 from the 1 year old, 25 from 30 years old. All that knowledge, all that intellect, all that emotion now is part of you, which your offspring takes from you. Intelligence added, because it's not in DNA, it's in the information of emotion.

And the doctors tell you, this is why we see through the research done by many universities, that children born to the parents after age of 40 and in 50s and 60s, especially if both partners are past 40, 45, especially, they hardly speak till age of 3-4 years old, majority of them. (2:34) They (don't) want to speak. Because they realize they don't need the language to talk. They speak the language, because before that, they understand the Emotion carries the ?? signs and everything else. And then they start talking at the age of 4 and 5. Because the intelligence sits in, and they are extremely intelligent people. And the later you have a child, you see, we see very common nowadays, especially like in Italy, in the Western world, marriages men of 60, 70, with women of 35, 40 and 45 and children of them. They're amazing children, they're beyond intelligence of what, and they become what we call gifted children, they're gifted with knowledge of the parents, especially at very, very high level.

You look at the gap when it's small and then when you look at the gap is big, it's totally different generation. Generation creation and intellect. And then when you speak about the daughter of Mitra she comes from the intellect of the Universe which is matured in time and created by the fields of the Universe not by the matter state of man. But takes the shape of man. And this is what we say of the children of the Soul. When you understand this you tap into the creation of life from the time of creation of Universe, not the meager life of man. And that's why we say Children of Mitra are totally different, because they come from access to the knowledge of the Universe, than the knowledge of man with the trees and the plants and animals. (2:36)

Any other question?

Q: ... Good day, to treat hair in the head or farsightedness or myopia with magnetic fields, should we first work on the general fields of the body, such as the fields of the liver, and solve their problems?

K- Oh, there are so many controversies in these. But as we don't talk about the medical part in these things, because we know, they're sitting like a hawk for it. The... You have to understand the process of creation of sight. And then the rest comes, nothing to do with.

R: The rest comes nothing to do?

K- To do with it. Yeah. The liver and the lung and the rest of it. That's what it means.

The new Sight Gans we put out, not the first batch which is gone out or going out. The new side batch which is coming out next week, is again an amazing structure. You will understand if you took... because as we develop we add to. And as is available we add to. The... those of you who received for example, the Sight Gans of the first order, and the ones which come ordered from this week onwards, you change and you feel the difference. Because we added the dimension of the Soul into the new system. It's very interesting how it works. (2:38) It doesn't mean that the first one is not good, it still

works, but this is addition to knowledge of, how bring in... that's why it's called the Twinity Gans.

Q: ... When will the Heat Gans be delivered?

K- They... all the Gans's are in production. These are not the things we can just put in there. They need time. They are going through the process. More or less, all the Gans's should be out next week. A lot has been made, but we received some orders. So, second batch had to be made in addition to. But, there was a slight delay in the labels arriving and then the instruction. All that's been resolved. But, all the Gans's should be out by next Friday, hopefully. If our team be able to push it through. A lot has been delivered this week. But the Heat Gans's and others, all should be out next week.

Q: ... When we buy the Cosmic Ray Bundle are we automatically connected for a year or do we pay the 300 Euro and then get connected?

K- You are automatically connected for the first year.

Q: ... What about using a transducer headset along with headsets with a microphone?

K- What? What's a transducer?

R: I'm not sure what a transducer headset is. (2:40)

Q: ... Hello Mr. Keshe. Do you think that a war between Iran, Israel and America will happen seriously in the near future?

K- Imminent.

R: It is, isn't it?

K- Imminent. The Americans have taken charge of knowing what they have, which they don't give to the Israelis. The American do not trust the Israelis, that they will not bomb the Iranian nuclear sites. So, the... some ?? has moved to Israel. We call it military disarmament. What it means? It means, there's a structure in the American system, I've explained this before. When you buy a fighter plane from Americans or a bomb from Americans of the ?? subscale type. American have a veto right on it, which means they control it from inside. And this is what puzzle does, why the Israelis use it, bomb so frequently, everywhere, without any restriction by the American military. This time, the Americans don't want Iranian nuclear site to be touched, but they don't trust the Israelis. So, they have appointed a top-ranking officer from American forces, which is answerable actually to the Senate. This guy is extremely powerful guy. But, the... what you call it... On the American don't trusting the Israelis that they will not touch the Iranian nuclear, (2:42) what you call it, sites, they have brought in... they've given the condition to the Israelis, we'll let you attack Iran, but as long as the certain Director to be in charge,

which we call it, in military term, disarming your generals. In a way, you pull the strings, they just follow.

We had this in the Iranian Revolution. In the Iranian Revolution, Iranian army was controlled by the Americans, and the Americans ordered to disarm all the Iranian generals at the beginning of the Iranian Revolution to step down, and then we had the Revolution because it, and through it. So, this ?? guy is sitting in Israel since last week. He knows what armaments Americans have, and he knows what capability Israel has. America does not want to get involved because of the elections. If it goes into war, what you call it, Biden, 100% he will lose. Americans don't want to go into the war. So they are using the backup facilities of the Americans, like the new laser communication disability systems, and the others. Bringing in whatever is left after the last week attack on Israel. The last week attack on Israel destroyed a huge number of aircrafts, unfortunately, with many of them with pilots inside them, as the reports are reported.

So now, within the next few days we have a big problem that's the, what you call it, Yom Kippur on Friday, Saturday. That they will do it before Yom Kippur, or after Yom Kippur. So, by next few days, if situation is not resolved inside with the Israelis and Americans and the rest, the war is imminent. (2:44) Or what do you say, the attack of the Israelis for what the Iranians attacked, because the Israelis killed and the rest of it, you know the story, is imminent. Because now the Americans are not putting soldiers on the ground, but the chief of their army soldier control, military control of hardware, knowing all the things which is in the hand of the Americans and Israelis, has taken shape and he's taken position. They have disarmed the Israeli generals in a way. And ?? we'll see what this guy does. We know his capabilities, we know what Americans have. And I have laid out exactly what's going to happen to the Iranian government in past 24 hours.

There is... But it's going to be a mayhem, because the minute the first attack takes place all the Iranian missiles will rain down upon Tel Aviv. We won't have a State of Israel the following week, or not the way it is today. Because they won't stand to be attacked. But the Americans are trying to say to the Iranians, don't attack, we just hit here and there. But at the same time, Israelis are going in Lebanon, they are going in, what you call it, now in Damascus, we saw this past few days. I don't think we're going to end up very, very easy. I see massive problems.

But with, wherever this guy is from, this organization end up, there always has been war. We don't have a single thing. They are sitting in Ukraine. They sat in Ukraine. They constructed the Ukrainian War. And we see the war today is sitting at 99% more than in what you call it, 98%. (2:46) But how it is and what the response will be. And they will rain upon each other, what you call it. And then America needs to get involved because it cannot see the end of a state of Israel. This is the biggest problem because if what we saw last week repeats the Israelis, "Oh, the rocket hit one restaurant." Yes, but why don't you show your military bases? Is there any runway left? And these are the things which are hidden and the other things which are hidden. And we're talking about, according to an intelligence from American side, Iran possesses over 100,000 missiles of different shape and form. And if it comes to the survival of the nation, they will both side try to... but this

is a very dangerous point. We asked Israelis to withhold, we asked Americans to withhold. And the Iranians are, as I explained to them, you better strike first before you get... you know, before they strike you. And they keep to the ethos of what they want to do with it. But this is going to be a mayhem if, certain people take their way, because they're bringing the most advanced electronic warfare in before the physical (warfare). They disable everything (electronically), and then they destroy everything, physically. By that the Israelis have done. But actually, the electronic warfare will start first.

And we saw how Iranians interfered with the last week electronic system. (2:48) Where they interfered with the, what you call it, messengers, that to everything is safe, you can come out. And the Israelis found that they've been short circuited by the Iranians, and they said to everybody, "Stay in, this is a false alarm." It's the same game but in a bigger scale, we'll play, Iran will play new technologies in the game, which is hidden, and then we'll see. We... at the moment we are on a 100% alert, but... how will it shape, take shape, when will it take shape? We expected it last night in a certain directions, but Americans found that they have a weakness in their structure. And they could not support, the Israelis could not support, now they are trying to patch that up, within next few days. And then, most probably, before the weekend or after Yom Kippur, we will see some... as one of the intelligence officers from United States said, "It'll be the last time Yom Kippur will be celebrated in Israel." Because they know what is coming, but on the other hand, arms have to be sold and factories have to be run in America and other places. This American intelligence is from what we know. It will be the last time the Yom Kippur will be celebrated this way. It's the last party. But I hope it's not, and I hope both sides will step down.

R: Ok, thank you for that comprehensive answer.

K- It's not, it's just we keep, we are, we are advisors, we keep breath of all the knowledge from all directions. I even approached a British in the past, putting it out, trying to bring some senses in. The British are not ready. Americans don't want to talk, Chinese have already been looked after, so, we have to see. (2:50)

The whole problem is the Persian Gulf Oil. BP owns all the oil on the other side of the Persian Gulf. They need to control this side of the Persian Gulf, which is Iran. They control the Gulf of Mexico Oil. Then the prices of oil will play a game for next 5 or 10 years. Because BP will control more or less the whole entirety, in one way or another. This is how British Petroleum came into life, originally by the oil from Persian Gulf, by the Iranian, but from the Iran side. And grow British, what you call it, oil corporations and Iranian corporations with the rest of it. But the plan is to take the whole side of Iran, what you call Persian Gulf, with the head of the BP, and they control the oil. The oil prices will be so volatile. It will be all controlled, when they decide. When they decide.

R: It always seems to be about oil. Isn't it time to stop the burning, as you said many years ago in the fireplace discussion?

K- We will introduce a new technology if it comes to it. We'll break the embargo of oil. We will break the embargo of gold. We will break embargo of the money control by the Keshe Foundation. And it's very easy, you all know how Keshe Foundation works on Blueprint Days. If Iran touched, we release the Blueprint of the production of the gas. (2:52) Within minutes, all of you become self sufficient. Many of you try to make gold, but you failed, because you couldn't do the transformation. We'll release the technology. Then we have to see. It'll go viral, because with the gas, you know, it's so rapid that... And then we ask you, how to support the Keshe Foundation to be on the other side of it.

It's not we don't have it, we are very prudent to work with the governments, to bring it under control, not to create problem. And it all goes in, because once this happen to Iran, Russia will fall, and then with it China will go, in the next 5 years which they are working on it. And then becomes one global domination, and ... they can only dominate, because we will show you how, how to use.

As I explained in one of the teachings, with private teachings, how to create the creation of ... that's part of even in today's teaching, in the transportation and transmutation. We work, we develop. We're not scared of releasing, but we are aware of what the release of technology can do.

While I remember something, those of you who join us this session of the October. Try to keep bottles of Gans's with you, means if you can have a couple of bottle of Gans's of the CO2 or Zn, (2:54) or whatever combination you enjoy, two of them you need, or any mix you need, just have them ready with you. We might ask you to do something very interesting as you'll see your emotion and your response.

Any other question?

Q: ... The transducer headsets are, or headphones, are bone conduction headphones. Have you heard of those before Mr. Keshe? They transmit the sound through the bones, I think, by the ears rather than in the ears themselves.

K- We used that with some of the teachings, in some of the sessions. If that's what you mean. Because we don't use the headphones only in the ear. If the word for it is transducing, we already do that with certain testing and even Wellness Center uses them. So now we know what's the word for it.

R: In a way if you put it on your forehead, you're getting more through the bone than through the ears.

K- Yeah, because bones creates a different vibration ?? of the environment.

R: So, is your advice to Randy, would you say, "Why not?"

K- We are using it, don't say "why not?" It's already used in many sessions. Now we call it, you can transduce your microphones. It puts it on your skull. (2:56)

R: Yeah, I had trouble with that with my earphones, trying to keep them attached. I had... I didn't have headphones, I had earphones. So two sets of earphones attached to the front and back of the head, and above the ears, was difficult, I had a headband to keep them all under control, but...

K- Yeah, I was saying to our production people, You know, when they do this knitting, you buy knitted animals on the Keshe Foundation? To make a headband knitting that you can put these in. So, if it can start, we'll put it up.

R: I felt a bit like Medusa with these wires coming out and what not. But, anyway, yeah. Okay, I think you've covered the questions.

K- We'll call it a day. Thank you very much. We'll see you next week. And I'm sure we will, what you call it, have a session the following Friday, I think, if I'm correct. Maybe we move it a week after the session. And we'll see what come up if you are still here by next week. That'll be very interesting. And see how things take shape in the World of Creation. Thank you very much.

Please try the soaps. As I said, we will introduce two different type of soaps in the following weeks. Don't look at it that they're extremely expensive. They're actually extremely cheap. If they do what they say, which we think should do, we'll bring a new dimension in the world of science and technology. (2:58) One of the biggest problem with the world of Wellness, especially in certain directions, is all these tricks with the clinical trials. And understanding that the soap production is a natural process, we don't need (certification), we need a production manufacturing. We can introduce the technology this way, much, much rapid, than actually going through, because it's just a soap. And there is no regulation on the soap with water. Natural water. Thank you very much. And I hope you enjoyed the session today. See you next week.

R: Great. Thank you Mr. Keshe. Thank you very much. Okay. Well that wraps up our 559th Knowledge Seekers Workshop here on Thursday, October 10th, 2024. Our next Public Teaching Workshop is the Public Meeting for Testimonials, and that's coming up Monday, which is I believe the 14th, let me double check on that. Yes, Monday the 14th, starting at 8 PM Central European Summer time, and if you have any testimonials of the Plasma products, or experiences you might have had in your life, that has changed your life, It's a good place to share with the World. And let everyone know that ... you've had such experiences. (3:00) So again, that's Monday, October 14th, at 8 PM Central European Time.

K- Can I just come in?

R: Yes.

K- I just received a message from our production side, that the 4 new discs, pair of discs finished available if anyone wants to buy them. Though, takes a long time and the 4 are production completed. So, if anybody wants...

R: Do they order that through the store? Or do they...

K- Yeah, through the store, yeah. And then the Cosmic material, because we put a hold on it now, hopefully the packaging is sorted, it'll go back on that people can buy. Because we put the stuff on it, until we could sort out the, what you call, the packaging. Now it gets reopened for people to order. Thank you very much.

559 KSW October 10, 2024

END
