

**As Old As Creator - We Are recycled Fields - Universal
Inertia - Mass & Weight - Reference Being on Earth -
COHN Connected to Creator - Science Failed - TIEP -
Nuclear Obsolete - New Material Brings Change - KF
Vindicated from Fraud
Introduction to 557 KSW**

Note: Not checked by KF interpretation by KS of KF Brazil

Today's teaching is more about how the M and G fields interact and manifest life in the Universe (U) and what our life in the U will be like. As we were born out of the physicality (P) first and do not know about the Soul of the Man (STM) we consider our age to be how many rotations of the Earth around the Sun the P has made. But if we come to know about our Soul, then we will have to trace our origins back to the origins of our Soul. A department of the United Nations does the genealogy of the human race and in P they have traced humans back to a single mother from which the physical body came from. In the same way the M fields of the Creator spread out from Him and started dividing and interacting with each other and itself and has created this web of Creation we call the Unicose. Everything is within the womb of the Creator. As the Micro is in the Macro we can see the same pattern of creation happening in the womb of the mother, creating the child. The fields coming from outside the womb cannot be seen, but all the interactions take place inside the womb and the resulting manifestation of the fields is the physical body of the child. This is just the physical side of Creation, we haven't even talked about the emotions, which are the strength of the fields. Even this paragraph is way beyond anything we ever learned in school. And the common person walking the street will not even be able to comprehend this much.

But what does all this tell us? If we think deeply about it, it means we are connected to everything in the U through our fields and we are all made out of the same fields. So when we fight with others we are actually fighting with ourselves. But to understand fields we need much more knowledge, because our science is so limited and has almost no knowledge of what magnetic fields are. Mr. Keshe has only just "scratched the surface" in teaching us about M fields and that is already way beyond the understanding of the scientists with PhD's. We know that when two fields interact to become plasmas they remain with that plasma until its lifecycle is complete, at which time the fields separate and continue on their journey through the U, but they will keep what they experienced in their memory, or RNA. And during the lifetime of that plasma, parts of those fields can be emitted to create yet more cycles of life. It's starting to feel a little bit complicated, but this also indicates to us how it is that everything is connected to everything else. Because the fields seem to have an unlimited ability to interact and divide themselves and continually create life.

Of course there are rules in Creation that fields have to follow, but they are not like the fixed rules we made up in the physical dimension (D). Another way to think about it is that we are made out of recycled fields, but we are not talking about once or twice, but billions and trillions of times. In the old days when we used to use typewriters with paper we were afraid to make mistakes and have to start over again. Then when word processors and computers came we could make as many mistakes as we wanted, and as many copies of the documents as we wanted. And if we go further into this analogy, the "0's and 1's," or the memory on the hard drive of the computer is continually being recycled. The letters we see on the screen are not new, they are recycled fields. But the main point is, this is the way fields interact and create, and because we are made out of recycled fields, it means that we are already connected to everything. And if we can get this feeling inside ourselves, then it will be easier to transmute because we will be traveling along these established connections.

If you are a newcomer, there are some detailed teachings about the Mass and Weight we did a couple years ago that will make this teaching more clear to you. These are important foundational teachings in Plasma Science as to how we go from the energy state to matter and manifest all the things we see around us as Creation. If you are curious as to why when you drop a huge boulder and a tiny stick they fall to the Earth at the same speed, or why the mass of an object on Earth is the same on the Moon but the weight is different, then these will be answered for you. Today he extended the knowledge in that the Mass will be the same not just in our solar system (SS) but throughout the entire U, because the Mass is created from the fields of the Inertia of the U, which is responsible to create all the elements in the U, and not just the elements of Earth. Remember that Mass is equivalent to the plasma, or we could say an atom, and Weight is when the Mass interacts with the MG fields and the Inertia fields of the planet and manifests itself as a material. Our scientists don't know about this kind of Inertia, they only know about physical inertia and a mathematical formula. So Weight is related to the Inertia of the local environment, that also includes empty space. In a way, Inertia is like the desire to manifest and wherever there is a center like a U, galaxy, SS, planet, and even the STM they will all have their own fields of Inertia. There are many plasmas in the U that have Mass, but they won't be able to manifest in the matter state on Earth because they don't match the Inertia field strength of this planet. They still exist but we won't see them, unless we can find a way to make a box and create their field strength. The other important thing to remember from today is, that the Inertia field strength of a planet can change as it is moving from the outer boundaries of the SS back in towards the Sun. So Jupiter and Saturn are at the Inertia field strength of the gaseous state and when they reach the point of where Earth is now, their Inertia fields will change and they will become matter state.

In transmutation we are not doing anything else other than following the pattern of how Creation takes place. We transmute from our body, which is the same as the Weight back to the energy of the plasma, which is the Mass. Then we travel to a new location and through emotion and the local fields of the Inertia of that environment we create a new physicality, or Weight. It's the same simple process that we all can understand, but we

need to engage our emotion and be able to control it. The KF systems help us to expand our Soul and encapsulate the P and then we are back in the field state. When we understand this basic process of Creation, we won't be afraid of it and transmutation will go easy.

He explained how the Beings are created on this planet. When the fields of the Soul of the U interact with the conditions and strength of this planet they create, what I called a "Reference Being" for this planet. At a certain field strength that Reference Being becomes a human, at another strength it becomes a dog, and so forth. It sounds like every entity on this planet passes through this Reference Being to manifest itself here. Maybe more will be taught about it that later.

The teaching on the amino acid (AA) or COHN was a little hard to follow and this is what I understood. The elements that represent the gravitational fields on this planet are Fe at a field strength of 56 for the matter state, and O at 16 for the liquid and gaseous states. We can physically see the magnetic pull of Fe, but that doesn't mean only Fe has M and G fields. He said N is 14 and 4 times 14 is 56, so it has the field strength of Fe and is a source of energy. But why is he using 4 to multiply it with? Maybe it's because of the 4 elements in the COHN which make a Star Formation. He said, the only reason the AA was created was because it connects the matter state of this planet with the Universal fields of the plasma and links us to the Creator. It's interesting that the AA is made of 2 sets of Twinity formations, C - H for the Universal connection, and O - N for the local matter state of this planet. He has talked many times about the Carbon as having the isotopes of C14 and C12, which is another matter to plasma state connection. And the basic building block of Creation is the Hydrogen (H) plasma which stacks up together and makes everything, and directly links us to the plasma fields of the Soul of the Creator (STC). Again we have this Infinity Loop, or Twinity interaction between matter and plasma, this is the basic pattern of how energy and fields are transferred in Creation. We don't eat something and then think that we have taken it. It's all done through interaction of the fields and energy is absorbed according to the emotion. It's hard for us to imagine that an atom or plasma has an emotion. What kind of feelings would they have? What about the emotion of love and serving the Creator? Maybe a H plasma is like a very young child that hasn't yet been programmed, and it's like they love and trust everything. They have a natural sense to share and give. And as the H plasmas start to accumulate and build up in numbers they also start to have more complex thinking. Then of course, if it is not guided in the right way, then we get what we have today in our society. Nevertheless, the innocence and love in our Soul is still preserved. When we learn to transmute we will open this back up again and live by it.

A lot of things were revealed in the statement, "I made man in image of Myself." It's an attribute of the Creator that applies to all of life from a cell to the Man himself, the STP, and the STM. It's the replication of the same process of creation. It's because I decide on what environment to create and then I manifest Myself in it. Each one carries the image of the Creator in the field strength of their Soul, emotion, and P in the TPP they manifest it. All attributes of the Creator are within the Man, but it's up to him to manifest them.

We need to understand this to be able to transmute between the P and the D of energy fields.

The reason science has failed is because they denied the Soul and never understood the connection of man to his Creator and to the U. They still think we are all alone and nothing else exists in the whole U. Regardless of the man's thinking process we always remain connected to the Creator because we are created out of His fields. That can be denied but never destroyed.

Some years ago a KS presented crystalline structures of different elements. I was shocked to see the Cu crystals were split into 2 sections just like our brain. It's due to the Cu in our body that the brain has two hemispheres and we have the dual organs. These all create a Twinity interaction with each other. In the U brain structures can have 4 or 6 sections. I wonder what elements causes that, and what kind abilities they have? But most Beings in the U have a singular brain lobe, and they never kill or do anything wrong, and they can feed themselves from the fields of the U. Will humanity evolve into a single brain lobe? Mr. Keshe gave us some hints. In the Friday session he saw that the emotion of P and emotion of the STM can directly interact with each other and bypass the STP. Maybe a single lobe interacts directly with the STM and no problems are created. But right now our 2 physical brain lobes interact with each other and create a second center, which then interacts with the STM. Maybe that center is the STP and has come in-between the P and STM through this split structure? We don't have enough knowledge. Because the split structure also allows us to be able to manifest two physicality's in two different places at the same time. Again it seems to be pointing to the importance of understanding the Twinity interactions as the basis for life in the U.

Mr. Keshe made a very big push for the Iranians to take the leadership to implement TIEP (Technology In Exchange for Peace). This means that the development of the KF Plasma Technology has advanced to the point where we can begin to spread it around the planet. This also means that nuclear power and nuclear weapons have become obsolete and that the new Plasma T can neutralize any nuclear weapons that are used. However, the Western governments are pretending that there is no new T and the public is ignorant to any new advances. It is all being kept secret. At the same time the Western governments are punishing Iran with sanctions for having the new T, but they do it under the pretense of having nuclear weapons. This is why Mr. Keshe came up with the "5Plus1" talks because negotiations on nuclear weapons was the only thing the governments and public would respond to. Today he is saying, that we have developed the new T enough that we can begin to share the knowledge with all nations equally. Therefore, Iran should not go back to the "5Plus1" talks in relation to nuclear negotiations, because we have gone way beyond that. Instead, we should go to the 5Plus1 for implementing TIEP. A few years ago he laid out the structure for implementing the T through the nations involved in the 5Plus1. In effect, Iran should go back to the 5Plus1 Talks but not for nuclear negotiations. Instead they should take the lead in spreading the Plasma T to nations that will abide by TIEP. And if Iran will have the courage to make this step it is certain the power and protection of the Messengers of the Creator will be with them, if they continue to abide by the correct Ethos. At the end he said, he is 99%

sure they will not go this way. Therefore, we may still need to go through this long drawn out and useless path of 5Plus1 negotiations for nuclear as a show to keep the public ignorant.

Mr. Keshe explained in detail why each nation is against the T and about the Monarchies that are still functioning in the background of world governance. The way I understand it is, that when he tells us in such detail and force how the rulers are blocking the way forward, it's for them and for us to understand exactly what the problem is. And having that awareness is already the beginning of the solution. Normally when people hear this, then they tend to feel helpless and give up, and this is what gives more power to the rulers, because they think they have won in getting the people to accept their powerlessness. And this is the way it has been for all these thousands of years. But what Mr. Keshe is doing is quite the opposite. By clearly making us aware of the problem he is engaging our Souls to find the solution. Unfortunately, most of us believe that we are powerless and we need Mr. Keshe to do it for us. So in a way, he is outsmarting us, because every week he educates more and more about the power of our Soul. He is brilliantly guiding us step by step, little by little towards the change that we ourselves are going to do, even if we are not aware of it. And this is how the U is created, little by little the plasmas gather around and grow. This is how the Sun was created over billions of years and how our bodies were created over 9 months in the womb of the mother. The "Big Bang" is a fallacy and the wrong way of thinking. And we shouldn't expect the Change to come like a Big Bang. We are not forcing our way to do anything. Instead we are letting the fields of the Creator unfold its beauty through us and as us. The day that we lose our fear, which gives the rulers power over us, is the day their power and structure will collapse and the change will start spreading worldwide. And it takes one human Soul to breakthrough the fear and ignorance and then it will start spreading across the whole of humanity.

He gave us another opportunity of what could happen at the time of the separation, or what we call death. If we know how to transmute we can decide where we want to go before, or at the time of death. Otherwise, we are forced to go to a dimension that fits with the field strength we have gathered while in the physicality of the man. A third option is that we can amalgamate our energy with that of another Soul's energy from another place in the U and together start a new cycle of life. The feeling of these options are quite different than the concepts of religion. They taught us that Heaven is a reward for living such a painful life here on Earth, and we are going to enjoy ourselves or at least rest. The idea of Heaven as an expansion of Creation seems foreign. And maybe the religious people's ideas about truth were very far off. I wonder if merging back into the Creator is an end of the process, or is it the beginning of a higher order of experience that we never thought existed?

Back in January of this year the Courts issued warrants for well known banks that were part of a system that was setup to intentionally defraud the KF of millions. That was about 10 months ago, have we heard anything about this conspiracy in the news? We might get into trouble for calling it a conspiracy, but it's quite obvious that the governments are involved and are preventing this from reaching the mainstream news.

This is important for those KS who thought that Mr. Keshe had taken the money, and for us to understand what we are up against and why KF needs our financial support.

Photos were shown of a new material that was created by KF from the fields. Mr. Keshe called it a rare Earth material that will be the backbone of the new Space Technology and for new kind of microchips. It's a special material that won't be taught and it's made in a special way. A gram of it can create a massive shield over a nation and they have already tested it. If you touch it with your finger you'll taste it, and you'll live with it, and it will become part of your energy. The material allows you to create a dynamic and flexible point like a brain. You can also convert it into matter state when you want. This material will change the life on the planet. But it is not known how it will be implemented. From time to time Mr. Keshe releases these kinds of technologies to help us expand our imagination about what kind of life will be possible when we accept the new plasma T on Earth. He assures us that at the right time the technology will be released.

The Americans are preventing new technologies like the Cosmic Ray Bundles from coming out, because they will make all the billions spent on satellites obsolete. They won't be able to intercept and listen in to your messages, and no encryption is needed, and it's instantaneous. Knowledge Seekers were able to connect to the KF systems in the last Friday session using the units. The T is now within the reach of everyone on this planet and we can receive energy as food, power, and whatever we need from them.

One thing should be made clear to KS and that is, the only objective in bringing the T out is so that the knowledge becomes available to every living thing on this planet and beyond, and that it will be shared on an equal basis. We want to bring the conditions of equality and peace, and not have any other hidden motives.

Other Topics:

The secret of Creation is hidden in the Paper on Black Holes together with the first few chapters of Book 1;

The people are fooled by AI, there is no Soul in it;

A leader of a nation has just understood what the T means and has asked for it. But we'll have to wait and see how it takes shape. We know what can go on in the background.

Your Soul brings you to ask questions during the KSW.

Thanks for listening.
