

563rd Knowledge Seekers Workshop November 7, 2024

(Quick Index 18pp, Introduction, Topic Index ; Need to do; Key Phrases, Words)

(Auto transcription from Elias)

Flying Carpet - Creators Carpet; Every cell MaGrav Positioning with Earth's gravity; Plasma cars; Controlled by thoughts emotions; Raise foot use internal Energy - same time to cross U; Cells G positioning with Earth; What determines appearance P; Access to all fields of U; Decide strength of Soul through conduct; Correct yourself before; Transmute at death; Emotion to extend Energy; Travel instantly not Light-Years; T help move body; Puppet analogy - control through strings; We are Beautiful People - integrate Soul & P; Soul decides how leech moves; Change strength of Soul; Travel Mesh of U; Map of U; Carpet of Creator; Gans never mix strengths - receive give- change color; Gans in paint - no smoke; Dilute P within STM - key to transmutation - increase strength Soul; Increase giving - Creator feeds you; Need detachment; Creator gives - attached to Totality; Soul of shoe agree; Feed through U Energies; Cosmic ray dust in balls hold; Sheep gold teeth; Nuclear dump lake - new species; KF produce gold plasma - never share; Explains MRI scans MS - shrinkage; Process MS - elevate Soul; feed Soul feeds emotions - change; Emotion change - 40 years MS; Teaching on Pain Pen - recharge - how to use; Concussion; New Infection P Pen; AA key to make Gans work; Koran - man from mud & Jinns interpretation; Satan - move away from Love; T come through Iran; KF inside government; Exchange for Peace - Trump; Biden sell weapon - not peace; Netanyahu blocking peace - keep out of jail; Teaching on Black Hole - every atom plasma has BH; How brain created; 3 plasmas in Womb of Mother; Flying Carpet images; Markray joint structure; Need world peace.

Topic Index

Teaching connected to Persian Flying Carpet - make Creator's Carpet - travel U; Every cell of Carpet finds MG positioning with gravity of Earth; Same for body and Soul; He achieved flying carpet through plasma reactors make Tesla cars obsolete; New T flying cars - won't need batteries - controlled by emotions interaction of Souls - no more accidents; Create positioning in Space; Beyond atmosphere rocket T useless; When dream Soul navigates itself on carpet of U; Tesla's rocket T obsolete - 18 months; Efforts of nations - towards MaGrav positioning for Space travel; World leader excited about rockets - shows knowledge has not been transferred; Nuclear reactors not for space travel; Centers of planets create field strength to sustain life on planet; Use energies of U - learn how transferred - creates conditions; 40 years to complete understanding of how we raise foot - make a step; Moving body is same as MaGrav positioning; Secret to traveling U; Take from T according to intelligence and no more; Lifting foot off ground same as rocket lifting off from Earth; How do muscles contract - know how much energy they need to raise foot to what height; We do it without thinking; Law of physics - have to have energy to do it; Have ignored how we travel - it's inside us - energy is within us; If understand don't need another system for living - or separate system to fly; Nearest galaxy is 100,000 light-years - ridiculous - lack of knowledge; Time it takes to make one step - can travel to galaxy; Man has to understand this; When make that step all other

parts of body - organs - have to coordinate each move -they move also - have to synchronize; Leading scientist beginning to understand Plasma Science - talked about energy - how neutrons, electrons, protons position themselves in respect to each other; Understand essence of energy - where it comes from - how it propels you to take that step; How did brain create energy needed for whole body to detach itself from ground; There is inner inherent energy within cells of body - creates continuous gravitational positioning; We take it for granted; Where does that energy come from; We can learn to enhance inner strength of Cell's energy; Science in wrong direction - almost impossible to realize mistake; The inner energy of the cell, atom, plasma that leads to creation of itself - don't need rocket T or physicality - don't need to use dream to travel U - all is same system - raising foot - traveling across U; One uses physical condition interaction in matter strength - other uses Universal condition in matter strength; We use M fields of Earth to position ourselves; There is an inherent inner field strength of plasma of life; Earth creates that strength in center - every cell adjusts itself according to that strength by its position on Earth; Center of Earth creates our gravity; Through strength of fields we decide where we want to be - field strength of that position determines if we look Chinese or whatever; Cut through fields of planet - Inertia Weight - creates body; Misunderstanding about composite structure of fields; Shows true meaning of field lines; Central position rotating fields comes out as spiral - not straight with spikes; Reverse happens - first G then in reverse M; Field strength decides how we look - then Inertia; Earth's Gravitational fields are continuous and when rotating interact with matter state Inertia & dynamic fields of body & Cells have Inertia as Gans; This is life as us; In essence all are fields of Creator; Draws Spiral over all of it - all interacting with us all the time - game of Creation; Field strength of our cells - have access to all fields of Creation - and beyond to Unicose; Why when we dream - instantly cross U - travel M field energy lines of Creation; Fields have to be in shape of man to understand; Increase strength of brain - see U as it is - not in shape of man; Become part of Universal Community; Inherent M fields of U within himself; You decide strength of your Soul through your conduct - what eat - take in - what give to others - determines strength accumulate in your Soul - find position in U; We need to teach you about inherent energy of C & H; Take energy from food - put fuel in car - structured this way; How to fuel your Soul; At death transmute - learn how to navigate U; Energies of cell originate with H; Use STM & STP to control emotion - move without walking - Persian flying carpet; Take charge of Energy side; Don't want shoe muddy jump puddle - do same - use emotion to extend Energy in HC; Time to lift foot - can travel U; Travel instantly in dream; Know how to live in both Soul and P - same material - painted different pictures on canvas of Creation; Become one with our emotion; Show you road map of Creation - play in U - learn capacity of car; Subconsciously learn how to strengthen Soul reach your destination; Transmutation and transportation same; Know our destination before death - can correct yourself before; 100,000 light-years is stupidity of scientists - limits man's understanding; Plan position of Soul before death; Create system to land you again in another P - re-manifest yourself; Permanent position in life till next cycle of Creation; Conduct of life brings closer or farther away from Creator; Give to others - love them - come closer to Creator - because added to knowledge of others; This is the process of Creation; Bring technologies develop your own abilities to move your body; Fly with your own Energy; Use field energy within internal structure of plasma of life; Same

energy as living for travel; Can't transmute - find out what lacking; Comprehend the beauty of Creation; Like puppet - make image on stage connected by string to puppeteer; Puppeteer creates emotion and Energy - decides how puppet will move; Bring puppet and puppeteer together - work as one; Emotion and P dance together as one; Integrate both Soul & P not live schizophrenic life; We are the Beautiful People - we are that schizophrenic - have both Soul and P; P is leech on STM - Soul decides how leech moves - how P will manifest itself; Change strength of Soul - can change color of skin - eyes - behavior - amount of fields give and receive; Color & race won't matter can be any color want; As Passengers of U - change field energy - decide where to go; Show you how to travel the mesh of U - same structure as roads on planet; 3-dimensional structure of Creation and Creator; Today's teaching was to open your eyes - connected to U - it's within you; Show map of U; Persian Flying Carpet - become Carpet of Creator - go anywhere on energy fields of Soul and P; Gans's position by fields; Read Book 3; Gans's never mix - energy fields of different strengths can never mix - unless they receive or give energy that match; Change color because gives and takes energy from environment; Test emotions - put Gans in different rooms; Understand color spectrum of Soul - strength and fields; Added Gans's to paint made Chinese soldiers handle high altitudes of Tibet - become peaceful; Room full of smoke cleared - P didn't manifest; Destiny in Space - hands of man himself - you judge yourself; Dilute P energy within STM - P has no manifestation like smoke in room; If you understood this last sentence - found the key to Universal transmutation and transportation; Increase strength of Soul - dilutes P within it - key to transmutation - not just feeling you went somewhere; Teach process of Creation; Discover mazes of Creation; Never forget - have to increase strength of giving, so G part becomes so humble and minute in strength - can be absorbed and attached to Soul of the Creator (STC)- secret of elevation; Create balance - like how Potential Energy Difference works in P; Give and take to find balance of position; More you give from G side - the less you have - this weakness in G field of STM attracts to higher energies of STC; It's about detachment - understand true meaning; Balance between G and M always be conserved - give here and weaker there - opens you to receive fields of Creator - they are stronger than you; I made man in image of Myself, but I never taught him how to be Me - to be detached - becomes attached to Totality of Creation; When you travel can take children, suitcase, everything with; Soul of shoe has to agree to come with - if take summer shoes but it's winter - won't agree; Muhammad - we go with name of Creator & all His beauty - understand beauty is within you - you can become as beautiful as Him; No other standard to judge by - you judge yourself - be clear about what you judge - find position in Creation.

Part 2

Tomorrows session convert energy within yourself; Achieved transmutation; Monthly Flight November to January - feed through Universal Energies - use the U Energy Balls (Cosmic Ray materials) - taste Gans when touch; Using U Energies - tastes you don't know - bitter or sweet - tells what strength you are receiving; recognize Energies through tastes; Energy Balls not toy - essence of connection to source - have to match your Soul; Absorb energies from their fields; Produced with U Energy; Always give from right hand - receive from left; Understand connections to fields of U; 10 years to prepare you -

purpose of teachings; Many will change their life; You have to understand fields - not say - Mr. Keshe said - we are just teachers; You decide how to interpret teachings for yourself; According to your understanding; Annual Christmas gift packages KF Store; We planned this Change for thousands of years - bring it step by step; Sheep with gold teeth in Iran; Don't know if true; In Plasma Science it's possible; Body adapts to what we consume; Sheep wool collected gold - rare earth metals - helped understand how we transfer energies; Inspected radioactive dumping site for Russians - entire lake - vegetation and life forms changed; New species developing; Lake like huge nuclear reactor in liquid condition; Los Alamos Labs left uranium in buckets - people exposed; Same thing in Chernobyl - Fukushima; Our bodies will change by what we eat; Possible Ca level; Look at evidence with open mind; White Chinese turned back to black - deterioration of fields in body; Everything possible - have to understand reason - what energies doing; KF can produce solid state gold - gold Gans as protein in body & in vegetation; Each has different properties; Showed to Chinese military; Gold Gans gets absorbed straight away into body - huge application; If grass creates a protein to interact with Ca levels can change teeth of animal; Nothing impossible in World of Creation - limitation of our own understanding; Animals with golden kidneys; Eskimos have monotonous diet - body produces Ca, Zn, and whatever is not part of food intake; Body converts Ca energy into hormones - vitamins - whatever isn't in our diet; KF T can replicate it; Produce plasma energy of gold - tested in November session; Produce gold as matter, protein and plasma; Also for other elements - unique knowledge - we never share; HC and NO on both sides of brain - it balances; Long teaching about MRI brain scans - and from MS patients - areas of brain correspond to different parts of body - meaning & what happens in MS cases; Two halves brain from Cu structure of muscles - creates motion - chose to walk; Fields of right & left side like 2 magnets - create Twinity; Small field flow keeps both sides in balance; MG spacing - Positioning; Moveable center point between 2 halves - effects field strength; Once plasma created M and G fields are in balance - brain has a balanced field; This center is STM - dynamic; Assess STM according to mass, density, emotion, P structure; Details about brain shapes - see characteristic of STM - behavior; See behavior in MRI; Cannot change composition, position structure of brain - only through emotion; Emotions make STM, makes P of brain - creates body; Analyses MRI scan of MS - white spots - indentations - shows different emotions created MS; Left side of brain - deals with physical life - not getting what wanted; Right side of brain - love of mother - emotional connection; Shrinkage of brain mass in certain areas; MS - person doesn't want to live anymore - show others they need love of mother; New T go for elevating Soul - person decides if want to balance not system; Feed P - part goes to emotions; Feed Soul - first goes to emotion then P - brings change; Why certain characteristics in certain races - fields of Inertia; Feed Soul energies it needs - impossible to get MS - control P with Soul; U covered with love of Creator; Stop a lot of illnesses; STM strongly acts on STP and P of brain - P of body follows STM; Takes second to create change through emotion - 40 years later pay for it with disease; Control a lot of things through emotion - transmutation; Know yourself inside; Teaching on use of Pain Pen (PP); About concussions and stroke; Deplete its energy with back side of PP; Put in water - use again; Energy of brain different than muscle pain; Have someone else hold PP to deplete energy; PP triangular like Star Formation; Use side for pain along muscles; Energy of pain released into liquid; Design PP in specific ways -

not circular; Not use coils in PP; New Infection Pen internal, muscular, or organ infections; Already tested; Restore PP putting in Gans CO2 Box - Cu Gans for muscles; Never put PP, Gans's near metals - drains energy - running facets drain - color change of Gans; Energy absorbed inside PP - connects to body by AA; AA is key for Gans to work; AA in KF manufacturing; KS translate knowledge they understand; MaGrav T can do massive things - Space travel; Position between STM and heart - cannot change - field interactions create P; Creates specific behaviors - physical shape - why people look similar; Seeing 2 fields in transmutation; Cannot manifest same in different locations on Earth because of all different field interactions; Might see similar features; Depends on distance between STM and STP; Why twins look exactly same; In Koran - Man was created from mud, and Jinn from a fire which has no smoke; Mud is symbol for Earth & P; Jinn or fire means fields of U - Creator; Need Love of Creator - HC - or no life; Satan or devil - that which takes you away from love of the Creator; In centrifuge - heavier goes to the outside; Plasma vacuum - heavier goes to center; Towards Creator; Iranian government will show T very soon - flagship of KF T; KF will be a section in government to share with world; Extend negotiations to new administration in US - T in Exchange for Peace; Biden Administration bent backwards for destruction - not peace; Talk peace sold 22 billion in weapons being used for war; Basis will be showing T; American organizations illegally moving arms - cannot put in public; Negotiate internally with Americans - breach of International Law; Situation in Middle East - Netanyahu deliberately blocking negotiation to stay out of jail - keep war going; Biden sell more weapons - commission; Teaching on Black Hole (BH); Every atom has own BH - not exist; BH absorbs energy through mass of gravity; Only way to disintegrate plasma - add or take from its fields; Chakras are Black holes; Every plasma has own BH - otherwise disintegrates; How man can change cycle of life; Balanced fields of M & G between two plasmas; BH cannot be only one field strength - cover spectrum of fields of U; Brain created from BH of STM - detailed explanation; Combination of STM & STP in womb - 3rd plasma is Soul of Mother; Why we can feel our Mother - made form her STP; Soul of child matches with STM and STP of Mother - BH has to have full spectrum of fields - creation of organs; We see auras according to field strength of our wish - how we'll survive in Space; Hidden images in Flying Carpet; Negotiate with American government, Markray could be joint structure; Problems with electric cars - plasma solution offered to Americans; Have to come to an agreement for world peace - to allow T to come out; Oil companies want to stick to their status quo; World peace more important; We'll see a lot of changes in this direction - especially in car industry.

Introduction to 563 KSW - Flying Carpet of Creator - We are Built to Move on Our Own - Scientific Understanding of Giving - Conduct in P - Every Plasma has Black Hole - Recharging Gans

The workshop started out with the Persian Flying Carpet and the question was how do we make it into the Flying Carpet of the Creator and travel the span of the Universe (U). This Flying Carpet is really a symbol for how all of Creation can move itself throughout the dimension (D) of Space. In a very subtle way Mr. Keshe said, all the cells in the Carpet have an independent relationship with the gravity of the Earth and each finds its own position, or should we say, they MaGrav Position themselves. There are a lot of different

field interactions to sort out in this simple statement. We have plasmas inside of plasmas, and the MG fields of the Earth, and the different Inertias like the Inertia of the Earth, the Inertia of the Soul of the Carpet, the Inertia of the Cells of the Carpet, and other things. And then we have to think does the Carpet itself fly, or does it need a STM to be the second reactor and to use its emotion to control it? Mr. Keshe makes a simple statement, or what we call, a 'pith instruction' and then we have to try our best to unravel the knowledge with whatever capacity we have available to us. It seems to me that the act of flying or moving our body follows the same basic pattern throughout Creation, and that's what we have to discover in today's workshop. Remember that in 2008 Mr. Keshe went to Iran (Persia) and he sat on the Iranian Space reactor number 2, while the other one remained stationary. Was he on a flying carpet? The flying carpet is the theme of today's teaching and the essence of it runs very deep. The Soul of the Man (STM) can use our body as a flying carpet if he wants to Transport instead of Transmuting. From this we can conclude that the Flying Carpet is a matter state method of Transportation but it uses the knowledge of plasma field interactions to move, the H - C is the source of energy and the building blocks of all of Creation, and the controlling system is the STM through its emotions and thoughts.

The next part was for us to think about is how do we take a step. We raise our foot and move it forward without the least bit of awareness of what is happening. It's so natural that we take it for granted, but within this simple act is the secret to life in the U. Our scientists tell us that our muscles contract and do this or that and the energy comes from our food after we have processed it. Well that's as far as that understanding goes, we have to stop there. But what if we try to analyze it from the point of view of Plasma Science. There is the gravity of the plasma of the Earth pulling the foot or the plasma of the body towards itself and this keeps us from floating around. If we break it down even more, each cell in the foot is a plasma and also has a GM relationship with the Earth's GM fields. To lift the foot means that the M fields in the foot are greater than the G pull of the Earth. The Physic's Law of Conservation says that the total energy of a system always remains constant. For example, the foot in relationship to the Earth could be considered a system and the total strength of M & G fields will remain constant. Therefore, when raising the foot if the M becomes stronger, then the G will become weaker, and the 2 different strength fields will always add up to the total strength fields of the system. This means that as we raise and lower our foot the strengths of the M & G fields will become more and less, but always equal the same number. A good practice to contemplate this understanding is to lower and raise our arms while at the same time feeling the M & G fields changing, and then wondering where does this energy come from and how am I able to move so easily, and yet I feel I have to get in a vehicle to go somewhere? Then we have to consider the Inertia field strengths of all the plasmas involved. And then how our STM provides the desire to move and is connected to the H - C fields of the U for the energy.

At around 30 minutes is where the main part of this teaching starts. Every plasma has an inherent energy and for us on Earth each of the cells of our body positions itself in relation to the M fields of the Earth, it's plasmatic, but we call it gravity in the matter state and it holds everything to the Earth. Then he drew a picture of how every plasma

positions itself on the Earth. At first it looked like an "L" with a line coming out, but later I realized he was drawing the X,Y,Z coordinates, and the Z is the height or the field line coming out, and our plasmas position themselves closer or farther away from the center of the plasma of the Earth on this field line. This represents how we position ourselves on Earth. It goes up and down and M & G fields increase and decrease accordingly. It's actually a very simple system for movement in the matter state on Earth, but there are a lot of hidden field forces that we don't know about. Therefore, we remain ignorant of how we move our body, and now we have become dependent on vehicles and fuel to do it.

It's my understanding that the Spiral of the plasma he drew represents these M and G fields coming out and going back to the Earth's center, and it's all done on the Z axis. So when you look at the Spiral he drew imagine it is superimposed on the Z axis. This is how simple we position ourselves on Earth. In the next part we have to stretch our imagination a little more. The Spiral Mr. Keshe usually draws represents the Plasma, and the field strength where we tap into the Plasma determines what it will manifest in P. But in this case he drew a box over 2 different positions and then he said, it was the same cell but at 2 different Inertia strengths. The language is very symbolic, and it is not direct, you have to use your imagination and knowledge. The subject we are talking about is the inherent energy in a plasma. In this case he is saying a cell in our body draws from the Plasma at 2 different positions and strengths. This would mean it can create a Twinity within itself, and maybe this is the source of the inherent energy. I don't know for sure, but this is my feeling. And then he said, all these interactions together with the Inertia of the Gans of the body lead to creation of new dimensions, and us. This is how we are created, and maybe the Twinity connects to the H - C fields from the Creator. It still needs more clarification.

The puppet is a good image for what we just talked about. The STM is the puppeteer and the P is the puppet we see on the stage. The strings that make the arms and legs move are like the Universal Energies of the H and C. The STM directs its emotion down the strings along with the Energy to make the puppet move. When we mature then the puppeteer and puppet will work together as one. It will be one integrated system then we'll become the true actor on the stage of life.

Where we will go at the end of this life depends on us and how we conducted ourselves in physicality. The analogy of the schoolboy is very appropriate. If we are like that naughty boy who disturbs the others in class and prevents them from learning the truth about life, then we are sent to the back of the room in a kind of isolation and punishment, so that we don't disturb others. But also we feel the pain of loneliness and if we are not willing to learn from it, then we blame others and that actually puts us back even more and farther from the Creator. But if we realize the power to get what we want from life sits within us, then the Creator asks us to come to the front of the class so that we can motivate the others to want to learn, and we can share what we have discovered and this expands Creation and adds to the Knowledge. And the joy of our life increases, and if we detach ourselves from the sweet feeling and don't become arrogant, and instead give even more from ourselves, then we expand even more. I have noticed this over the years with Mr. Keshe, that when somebody is really giving selflessly to others, then he wants to give

them even more than what he already gave them. If we are someone who is cynical and tends to rebel when we don't get our way, we should test this phenomenon on ourselves and see if we really get more when we rebel, or does our life expand more when we truly give from our Soul. In the end it is only us who stand before ourselves and judge our lives and what we have done, and what our true feelings have been in life. If we do it now before we reach the separation of the Soul and P, then we can change it and decide where we want to go in the U and at what field strength. This is the process of Creation and we can't get away from it. It's the way things work. There is no need to call it, Karma, rather we should think of how it works scientifically and that we are in control of it.

He did mention that there is another option at death and that by creating a system we can take birth in a new body and start out fresh again. It doesn't sound like we transmute into a womb, or go through the birthing process at all. We just appear and the people around wonder where we came from. But we would have a problem with this today because of birth certificates and being identified. It was easier centuries ago during the time of Count of St. Germaine. Nobody really knows about his birth and he had a lot of occult knowledge and people say he kept showing up in different places for hundreds of years. In the past we would consider these stories as fantasies, but now we understand the science of it. I wonder if there is an unspoken rule as to how many of these special Beings can appear on the Earth at a given time. And with the Change will we all be like this, or only those who want to? Will the Transition period last for thousands of years?

It's interesting to go on the Internet and search about why we should give to others and you'll get very interesting and sensible responses. Everybody agrees that it is good to give. And for religious people they have all their dogmas that get involved in their thinking. It is very hard to find someone that understands the science of it. They usually turn it into a philosophical and mystical idea where it leaves off at, 'don't try to understand it, just give.' The religious leaders like that you believe it is good to give to them, it's a subtle form of control. Through Plasma Science we understand it very differently. As we said before there is a balance that is maintained between G (receiving) and M (giving). Our position in life is the result of the balance between the G and M. From the perspective of the Energy of the U the more we give from the G field creates an expansion, but at the same time it means that we will have less. This is the general understanding of people today, they think when they give they lose. They haven't yet understood the bigger picture. By giving away we make room to receive energies, because in the U the stronger plasma always gives to the weaker to make it equal with itself. He said, when we have less in the G field of the STM, then we attract higher energies from the Soul of the Creator (STC). This sounds like an amazing unexpected bonus. But I am sure it has to be done in all humility and sincerity, without that little bit of greed sneaking in and wanting to get the power of the Creator. But I don't think we have to worry about the Creator being deceived by humans. But we do have to understand the true meaning of detachment. Because the hint he gave was that we were never taught how to be detached like the Creator. And our minds cannot understand that the Creator is detached, but at the same time He is attached or Loves the Totality of Creation. To us it sounds like a contradiction, but it is not. It requires a lot of deep inner

work and spiritual maturity to understand it. It's like a feeling you have inside that makes you love everything, but it doesn't make sense to your mind. That's just the way it is.

I read the teaching on Black Holes (BH) over and over again and I realized the language used does not match up with the D of physicality. He is not talking about the BH astronomers see in the galaxies. Of course, the Micro is in the Macro, so the pattern is the same. Every atom or every plasma has a BH and can't exist without one, but we don't see this BH in the D of P. It's in another dimension. It's just like the Chakras, we cannot see them but we can feel them, or we feel something that they told us was a Chakra. They would seem to be providers of energy and emotions corresponding to the different organs. A BH is formed when 2 plasmas rotating in opposite directions interact and their M and G fields come to a balance with each other. Then what's the difference between a BH and a plasma? He told us that Black Holes have massive G fields and are mainly absorbers of energy, but at the same time that energy has to go somewhere, and therefore they are providers of energy for other plasmas. If every plasma has a BH then where does it exist? Is it simultaneously there in another D? Just saying the words, "Black Hole" doesn't help us much, but they definitely are pointing to another dimension of understanding.

So what two plasmas create the BH of the STM in the womb of the mother? The language isn't clear, but would it be the STM & STP of the mother? He said, the brain and heart are created first in the womb and that would be the STM and STP of the child. They need to have the full spectrum of field strength to be able to create the organs and the rest of the body. I think the brain gets its 2 lobes because it is created inside the Cu Gans fields in the womb and they interact with the fields of the environment so the brain has the right information to manifest a child befitting to the environment it's born in. He then said, the STM & STP of the child interact with a 3rd plasma which is the Soul of the mother, and this allows the growth of the child in the womb. Is he talking about 3 plasmas because they form a Star Formation and thus can provide all the energy and information for the proper growth of the fetus? This teaching has given us a lot more to think about.

As we are all interested in Gans's he explained how to recharge the AA in our Gans's and also the Pain Pens. We just have to put them inside a CO2 Gans Box that is producing Gans and it will also recharge the AA in the Pain Pen. I put mine outside the Cup of Life that has mostly turned green and it seemed to be working because the Pain Pens felt stronger than usual. the green is the Cu and will help with the pain in muscles. We should also not put the Pain Pens on metals as they take energy from the Gans and will change its color. The same with running water. It makes sense when you think about it, because the motion of the fields is going away, and remember that one H is of the P and the other H is of the Universal Energy and the O is G for the liquid and gas state of the Earth. We don't wash the AA, instead we take it out and set it aside. I always wondered about the AA because they only really float on top of the water at the beginning inside the reactor, and when you take them out they behave more like normal Gans. He confirmed that and said they are still AA.

Other Topics:

There is an inner inherent energy within the cells of the body which creates continuous G Positioning;

Gans's never mix. Energy fields of different strengths can never mix, unless they give of receive energy that matches up;

The Soul of your shoes have to agree to transmute with you.

Thanks for listening.

Quick Index

(Coincidentally, today's teaching is connected to the Persian Flying Carpet, and how do we make the Creator's carpet to travel the span of the Universe (U). How does it work? And how we can live in the deep Space? In Plasma science we use Gravitational and Magnetical (GM) field positioning to travel. Our system has to find its position in respect to the gravity of the Earth. Even the airplanes fly in respect to the gravity of the Earth. (But for a carpet each cell carries a system inside it that finds its position, and we control every cell through our thoughts. It's the same for our own body and Soul, and not (just) the physical carpet. Years ago Mr. Keshe was involved in the Persian carpet export business and that's how he began his relationship with Belgium).

(He always thought that there should be a way to achieve this flying carpet, and later on he started working with plasma reactors that can actually do just that. In the next few months, in cooperation with one of the leading nations we'll make Tesla cars obsolete. We'll start launching systems that will replace the technology of the cars of today and they won't need batteries. We'll see the flying car, which will be controlled by our emotions and the dimension (D) of the Souls and interaction. Accidents will become impossible, because your Soul will drive the Soul of the car, which interacts (with other plasmas) like the magnets on a table full of magnets. No Soul will be harmed nor children run over by cars anymore).

(On Earth we have the limitation of physicality (P). From our amino acid (AA), or 'Mr. COHN' we have the N-O side which is the matter state D positioning and this side of the equation. And the Hydrogen (H) and Carbon (C) side have to do with our Soul in the Universal condition. How do we fly in the "cockpit" of the Creator? How does it work, and where does it take us? It's the limitation of our own understanding. In the physical D we travel with the cars and planes. In the Soul D, or Energy, we position ourselves and connect to the (?? HC). How do we create the conditions for positioning in Space? (How do we get the flying carpet to work, the it supposedly works on Earth. We fly jumbo jets, and rockets, but once we get beyond the atmosphere of this planet, the rocket technology (T) is useless. How do we position ourselves when we are beyond the atmosphere of this planet? What do we do in the galaxies and U? When we dream does our Soul navigate

itself on the carpet of the U? Do we really live in the world of the physical D, or do we travel on the D of the Energies of the U?)

(We have to come to understand the field positioning of the U, because in the very near future the human race will become part of the Space development. Tesla's rocket T will be obsolete within 18 months. You will understand why in the coming time, because the efforts of the nations has moved towards, and will move towards MaGrav positioning as the way to travel in Space. Yesterday, one of the world leaders in his victory speech talked about how excited he was to witness the Tesla's rocket system, etc. But this is all obsolete in the world of science. It shows that the knowledge has not been transferred to the world leaders).

(Nuclear reactors are not the answer for space travel T. The centers of planets are not made of Uranium or Plutonium, neither are the star systems in the U, unless uniquely someone decides to create that field strength, (?? but even then the other materials will dominate and dictate how the gravity and (MG) field strength will sustain life in that position of the planet).

(How do we navigate and sail on this carpet of the Creator, across the created life of His Unicosé? We cannot use nuclear reactors, which we think is very advanced. (We have to learn the Knowledge of Creation to do MaGrav positioning for Space travel. We have to learn how the energies of the U work. We have to learn how energy is transferred and how it creates conditions).

(It took Mr. Keshe 30 years to understand what we do so naturally that we don't even notice, and another 10 years to complete the (total) comprehension of it. And that is MaGrav positioning when we move our body. We do it from the minute we are born and start to move our body. If you understand this then you have found the secret to traveling the span of the U. And if you don't understand it, then it's just another bunch of words. You'll take from this T according into your intelligence, and no more. (When you lift your foot a few inches off the ground, it's the same as a rocket lifting off from Earth. But is there any rocket propulsion under our feet blowing us upwards, and bringing us back down again?) Or do we just call it muscles contraction and the rest of it? But how do the muscles contract? How do they know how much energy (they need) to raise the foot to what height? And what about running and jumping? Since we do it all the time without thinking about it, we have forgotten how we lift our foot. We are actually positioning the fields of the U. But our brain and physical body is so used to it, that we never think about it).

(By the law of physics you cannot do anything unless you have the energy to do it, (and you have to ?? move relative to a position, for example, from A to B. Understanding this we don't use rocket propulsion, or anything to propel us, or whatever. If we are going from A to B, then we create the energy that is needed. We have ignored how we travel on the planet, which is part of the U and it's inside us. It's done by energy (within us) and by understanding the complete cycle of life. If you understand this, then you don't need to have another system for living. You don't need to have a separate system for flying

around on this planet. Nuclear and rocket propulsion are all useless. (And what is most ridiculous is the belief that it takes 10,000 light-years to go somewhere, or that we are 100,000 light years away from another galaxy. We are as far away from another galaxy in physical distance, as we are from taking one step to the next. Man has to understand this. The amount of time it takes you to make one step in the physical D using the energy fields of your body, is the same time it takes to travel from here to another galaxy. And when you make that step all the other parts of the body like the liver and other organs have to coordinate each move, because they have to move also. So all the parts of the body like the legs, arms, head and everything else have synchronize with each other to make that step. And it's the same amount of time it takes you to travel to another galaxy. No more, and no less. (This is how the process of Creation, transmutation, and how the fields of the U work)).

(I was talking to one of the leading scientists recently and for the first time I (felt) he could understand what I was talking about as a scientist. We were talking about the energy as nuclear, as an atom, and energy of the atom, and how the neutrons, electrons, and protons position themselves in respect to each other. And how neutrons position in respect to another neutron. And how an atom positions itself in respect to the next atom, and decides whether to make a matter, gas, or whatever. We were talking about the inner inherent energy of an atom, or of any plasma. And then in the physical D we talked about positioning of the entire M field of the atom in respect to another matter. We need to understand about the essence of the energy and where it comes from, and how it propelled you to take that step. How much energy did it use and where did it come from? How did the brain create the energy needed through the fields for the whole body to be able to detach itself from the ground, go into the air, and then land it back again on the ground? (By understanding this you're way ahead of Elon Musk)).

(We don't think about it because it's so much a part of our life. But there's an inner (inherent) energy within the cells of the body that creates continuous gravitational positioning. It does it when we roll in our bed and stick our leg out. It's done so naturally that we take it for granted. But where does that energy come from? How does it decide where our leg or head will be? How does it decide whether we can jump or not? How does the energy co-adjusted to it and why can we only jump one meter, but someone else can jump two meters? Because we don't carry that, we have not enhanced the inner strength of the energy of the cells, which creates the heat of our body and the rest of it. The world of science has pushed us in such a wrong direction in understanding that it is almost impossible for man now to realize where the mistake came in).

(If we understand the inner energy of the cell, atom, and plasma that leads to creation of itself, then we don't need rocket technology, or the P. We don't need to (use the dream to travel the span of the U). It's all the same system. Does it take us 1,000 light-years to raise our foot up and put it down somewhere else. (Taking a step in the walk of the U is exactly the same as the man taking a step with his foot)).

(One uses the physical condition interaction in the matter strength, and the other one uses the Universal of the same thing in the matter strength. On Earth we use the M field of the

Earth to find and position ourselves. At a higher altitude the air is thinner and the rest of it, because we never understood the inherited inner field strength of the plasma of the life. Earth creates that strength in the center and then every cell adjusts itself according to that strength and according to its position. The Earth is a very simple system, and its center creates our gravity (?? and through the fields and strength of it, we decide where we want to be. And according to the strength of that position determines if we'll look Chinese, Indian, or from any other place)).

(In a way, we cut through the fields of the planetary system, and at the same time we cut through the Inertia Weight, and then it creates (our body). There is a small misunderstanding man has about this and it's because of the composite structure of the fields. (You have been looking at these lines in a different way. Now, let's look at it in the its true meaning. (You have to see the drawing). The central position is rotating, so the field comes out (as a spiral). The fields of the Earth rotate and don't come out with straight spikes because it's dynamic. Then the same thing happens in reverse. (?? The first was G and in the reverse direction it's M). (?? The field strength at any point will decide how you will look). The second parameter in this is the Inertia, which is constant in the position of everything else. It's constant in the position of every element in this process, which makes it another dimension).

(There is another position, which is the Inertia of the cell of the man. (As was taught before different positions on the Spiral of a plasma have different field strengths. At the same time the Earth's Gravitational fields are continuous. When the fields are rotating they create interactions with the matter state Inertia, plus with the dynamic fields of the body, which has its own Inertia as a Gans state. This has never been understood. And this leads to the creation of new dimensions, which is life as us. But in essence they are all the fields of the Creator, (and they all are (for) the confirmation of existence, or what we call D of life in this position)).

(The extension to this is that farther out we have our Sun, galaxy, and center of the U and these all create their own fields. Mr. Keshe draws a Spiral over all of it and says they are all interacting with us all the time. This is the game of Creation. At any point the field strength of our cells sitting on this planet in this position has access to all the fields of Creation. And even access to the fields beyond this into the fields of the Unicose. They interact with us. In the time it takes us to make a step on Earth, we can be in the center of the U or another galaxy. This is why when we dream we can instantly cross the U. We travel on one of these lines of Creation at the M field energy level).

(?? As we said last week we only see things in the shape of the animal of the man, because that is the limitation of (our understanding through the strength of the fields, it's what we allow the cells of our brain to work with). If we increase the field strength of the brain we'll be able to see in the Universal dimensional energy, and then we'll see the reality of how things look in the U and not in the shape of man. (?? Man has to understand this to become part of the Universal Community and travel the U. There are inherent M fields of the U within himself. (?? He decides if he wants to travel on the matter state Inertia gravitational points, or the Universal energy level M field points))).

(Understanding even part of this you will understand that it is you who decides the strength of your Soul. You decide it through your conduct, what you eat, what you take in, and what you give (to others), and this will determine the strength you will accumulate in your Soul and where you will find your position in the galaxy, U, or Unicose. This (will determine) where your Soul will land in this maze of the work. Then it's you who decides what your Soul is going to do, and what will be the outcome at that (time, place, and position (TPP)). For you to be able to do this, we need to teach you about this inherent energy of the C and H and how it works).

(You take the energy from an apple or banana, or you put fuel in your car to run the engine, because it's all structured that way. How are you going to fuel your Soul? As a man on Earth you walk on the solid ground, but when you reach liquid you need another way to travel across it. The same to cross air space. Now you have to learn how to jump the barrier to the fields of the U ?? through the fields of the P. The point of death, will be the point of transmutation. The teachings will go this way from now on. You have to learn how to navigate the spans of the Universe).

(Man is now living a schizophrenic life of the Soul and P and this connects him to the matter state of P and it does not matter if it's on the Earth, Moon or wherever. The D of the energies of the cell of the body originated in the D of the Hydrogen (H), which is the essence of the Creation). From now on we'll try to teach you to understand this.

(You have to learn how to take the Energy D of your life, or what we call the Soul of the Man (STM) and bring it into the P of the car, which is the body and then navigate the span of the U. You travel by picking your foot up off the ground and making the next step. But sometimes you're about to step in a mud puddle and you push yourself to step a little further so you don't land in the puddle. You have to be able to do the same thing in the D of Energy side of your life. And once you learn this, you'll understand that you don't need the STM in the D of P to transmute and transfer. You can use the STM together with the Soul of the Physicality (STP) to control your emotion and move your body without walking. It's like getting on the Persian flying carpet. You take charge over the Energy side of your body, rather than the physical side. (You don't want to get your new shoes wet in the puddle so through your emotion you extend your Energy to step over the puddle. The same emotion sits with the STM, or the Energy side of the Universal part of the man (the H-C). If you use the two, then you'll find out that the amount of time it took you to make one step on this planet, you could have crossed the U)).

(?? If the wife is dreaming and being with her Mom who died 20 years ago and found a position somewhere in deep space as a Soul of maybe a planet, and when the husband calls for his coffee the wife instantly returns to Earth to give her husband the coffee. Was the Mom sitting right next to her brain? No, the wife instantly traveled back home).

(We know how to live in both the Soul and P dimension, because the material is the same. We just painted different pictures on the canvas of Creation. The one in our head is what we want to do and the one we actually painted on the canvas is our P. But the

emotion of what we want to do is always (with us and we have to become one with it). This is what the teachings will be about from now on. We brought you from the Gans's to the Soul, to understanding your own creation. Now we have to show you the road map of Creation and how to play in the U. You'll learn what your "car" is and what capacity it has to travel how far. You'll learn to reach your destination. You'll learn how to strengthen your Soul to reach your destination and you'll do it subconsciously. Transmutation and transportation are both the same. One uses the energy as matter state and one uses the same energy in a Universal Dimension Energy of the Plasma).

(Most of us, before the time of death know our destination. We know what we've done, this is what they call the 'Day of Judgment,' we know. We judge ourselves by our work, and it will determine where our Soul goes. Just like when you corrected your jump across the puddle so as not to get your feet wet, you can correct yourself as to where you want to go in the U. There is no difference. The hypocrisy of a 100,000 light-years, is what was brought into our head by the most stupid scientists in the world, because the light is the limitation of the man's understanding of his own physical creation, and not the process of the creation of the Universe).

(You'll be able to plan the position of your Soul, (and where it will go at death. If you understand the process, you can create a system that will land you again in (another P. It's like getting a brand new car. You can re-manifest yourself. Out of nowhere (you'll appear as a body and people will say, where did he come from?)) They were not aware that you could do such a thing. You have to learn how to fly in the ocean of the U, where your Soul has the energy balance to manifest itself, and it's a permanent position in life, till the next cycle of the Creation (starts again)).

(What was the conduct of your life? Did it bring you closer to the Creator or further away? This is the punishment (or reward for how you live your life. It's what position you will take in the U. It's like in grade school when you were naughty the teacher made you go to the back of the class so nobody would interact with you. And if you were good you were brought to the front of the class to encourage the others to do good for themselves and to enjoy your knowledge. You give to the others and you love giving to them). You come closer to the Creator, because you added to the knowledge of others. This is the process of Creation).

(From now on we'll teach you how to navigate the U in the D of the P, STP and STM. This is why I told you in the near future electric cars will be obsolete and a joke of the past. Because we'll teach you and bring technologies that will allow you to develop (your own abilities to move yourself where you want to be. Then you can choose if you want to sit in a car or you fly with (your own Energy). You'll use the field energy within the internal structure of the plasma of life).

(When you understand how the cycle of life works then you can use the same energy to travel. This is why in the Monthly Flight session some of you have the problem of not being able to bring your P with you when you transmute. There is something you haven't learned yet. You have to find out what you are lacking. Why can you go with the Soul but

leave the P behind. You need to understand that the uniqueness of (using) the same structure is the beauty of life. Then you'll comprehend the beauty of Creation).

(I always said to my children that man is like a puppet in a puppet show. He makes an image of himself on the stage for the others to see, but he holds the string to control the puppet above the stage. He wants to show how he feels in the emotion of the brain, emotion of the STM in that puppet. Both are the same energy which moves the puppet through the strings. The only connection is through those strings, which are the fields of the U and they connect us to the Creator of the thoughts and Energy. They connect to the puppet at the bottom of the strings. The puppeteer creates the emotion and Energy and decides how the puppet will move. It's time to bring the puppet and the puppeteer together to work as one. Then you'll become the true actor of the stage of your life. Then the emotion and the P will dance together as one like a ballerina dances on the stage. The man dances with the emotion inside himself, and the P is outside on the stage of the Universe. The elegance and emotion, together with the thought, (are) both the same).

(If we comprehend how to bring the two together as one, then we will not have to live the life of a schizophrenic. We will live an integrated life as one, but have the understanding and the confirmation of existence as two. This is why I always call "schizophrenics" the Beautiful People, because we are beautiful. We are that schizophrenic, because we have never realized that we have both a Soul and a P (together as one being). I always spoke about the P of the man as being a leech on the STM. But inside that leech, the Soul decides how the leech moves. The Soul decides (how the P will manifest itself). Then by changing the strength of the Soul, you can change the color of your eyes, skin, your behavior, and you can change the amount of fields you give and receive. Then since all is one would it matter what race, color, or religion you want to be? When you mature to this understanding then you'll become Passengers of the Universe. Then you'll have to learn how to change the field energy that (determines) where in the U you will go).

(In the coming teachings I'll show you how the mesh of the U is traveled. The way you have roads on this planet, the same structure exists in the U. You have to understand how to navigate these roads, these meshes, and how to understand a three-dimensional structure of the Creation and Creator. Then, I have taken you in a trip of the lifetime of the Universe).

(Today's teaching was to open your eyes to see how you are connected (in the U), and to understand what is within you. In the coming weeks, I will open a map of the U for you. Then the Persian Flying Carpet will become the Carpet of the Creator). You can go anywhere, as long as you travel on the energy fields of your Soul and P, and not in the dimension of physicality of your Soul, which is you, that puppet).

(The very first things we taught you about the Gans's was field positioning. Read Book 3 before the next few sessions, where I said, Gans's never mix, the energy fields of different strengths can never mix, unless they receive or give energy that match up. This is why the Gans's change color, it gives and takes energy from its environment. You can put Gans's in different rooms in your house and see how they change color according to

your emotion and the fields in the house. You can also monitor the height of the Gans in the jar and which side it pulls up to. Then you'll understand the color spectrum of the Soul, its strength and fields. Mr. Keshe told about how he made some Gans's to be added to paint to help Chinese soldiers handle the high altitudes of Tibet, where they had a lot of psychological problems. These paints change the emotion of the soldier to be a man of peace. I have done the job). The Gans painted in the room will elevate the Soul of the soldier to be peaceful soldiers. He told the story again about having a diner in the room painted with Gans's with a bunch of chain smoking soldiers. The fields totally transformed the smoke and the room was clear. He said, it was devoid of confirmation of showing its P. It's the same with the man).

(The destiny of the man in Space and the U is in the hands of the man himself. It's you who judges (?? yourself), and it's you who decides (?? what you want to do). We setup the conditions for you like in the Monthly Flight sessions to let you do it. You have the confidence that you can come back home. (You dilute your P energy within the STM, so that the P has no manifestation. If you understood this last sentence, you have found the key to the Universal transportation and transmutation)).

(You have to increase the Soul of yourself to such an extent that encompasses and dilutes your physicality within it. That's the key to the transmutation. Not (just feeling you went somewhere and coming back)).

(We'll be teaching this process of Creation for the next few months. In the process you'll learn more and how to travel the span of the U. You'll discover the mazes of Creation. Never forget that you have to increase the field strength of giving, so that the G part becomes so humble and minute in strength, that it can be absorbed and attached to the Soul of the Creator. This is the secret of the elevation of the man in all dimensions of existence in the Universe).

((You have to create a balance. It's the same as what we call Potential (Energy) Difference in P. (?? You give and take to find the balance of your position). In the Energy of the U the more you give from the G side, to expand and give more, the less you have. And this weakness in the G field of the STM, attracts you to higher energies of the Soul of the Creator. This is why we teach you detachment. You have to understand what detachment means. The balance between the G and M has to always be conserved. (When you give on one direction it makes you low on that side, and that opens you to receive the fields of the Creator), because it's stronger than you. Detachment. I made man in the image of Myself, but I never taught man how to be Me, to be detached. Then he becomes Me to be attached to the Totality).

(I hope I opened your eyes to the new cycle of teaching today, and we'll try to teach you how to travel the span of the U, and to go from London to New York and take your children, suitcase, and everything else you need with you. Even the Soul of your shoe has to agree to travel with you, because if you take summer shoes, but the Soul knows it's winter and that you'll need boots, it won't come).

(As Muhammad said, we go with the name of the Creator, with all His beauty. It's you who has to understand the beauty within you, so that you can become as beautiful as Him. There is no other standard, and no Day of Judgment, it's you who judges yourself. But you have to be clear about what you judge. Then you'll find your position in the realm of Creation).

End of Quick Index Part 1 - 563 KSW

(In tomorrow's session we'll make every effort to bring you to be able to convert the energy with your self, within yourself. Hopefully some of you will achieve. Last time somebody in the first group achieved transmutation).

(In the Monthly Flight sessions from November to January we'll try to feed you through the Universal Energies. You can use the Universal Energy Balls (Cosmic Ray materials) and then you should feel what I feel when I touch the Gans's. I can taste the energy of the CO₂ and Cu when I touch them. (?? During the sessions you should taste the foods like carrots and steak. And because we are using U Energies there should be tastes that you don't know. The tastes of the Energies of the U. Are they bitter or sweet and to what strength are you receiving them? The tastes teach you how to recognize what energies you need in the U. This will go on with the teachings we started today).

(When you receive the Cosmic Ray material, (?? the Energy Balls to use in the Flight sessions do not play with them. These are essence of connection (to) the source. They have to match your Soul. They have to be the strength that you understand the field of it. You have to understand how to connect to them. You will absorb energies from their fields. They are produced by the dimension of the fields of Universal Energy. (It's for you to understand which one is taking and which one is giving more. Then change hands. You always give from the right hand and receive from the left. We'll tell you how to use them in the sessions and you'll learn how to travel the U, and connect the P to the D of energy)).

(The exciting part of the whole teaching after 10 years has started. Up to now we taught you about the energies, fields, and the rest of it. Now you have to understand about connection to the fields of the U. This is the whole purpose of teachings, which took us 10 years to prepare you for. As we go through this cycle many of you will change your life, because of it. It's understanding the fields of the U, and not what Mr. Keshe said. We are just the teachers. You are the students and users, and you decide how to interpret the teachings for yourself. (You can make out of it whatever you want from your understanding. This starts a new cycle of teaching)).

(The KF Store will introduce the annual Christmas gift packages. There are a lot of things happening around the KF and as usual, we'll let you know as the things are ready. The true life of the KF as an International Organization has started. You will understand soon what I'm talking about, as new dimensions will appear in different dimensions and directions. Hopefully, we'll manage to bring the change, which we have planned for thousands of years, over the next few months and years, step by step).

Q: There is a phenomenon happening in Iran recently where the teeth of sheep have turned to gold or a gold color and some people believe it's because they eat a certain type of grass, an alchemist's grass. Some sources confirmed that it is actually gold. But we cannot say it's 100% correct. What's the reason for it?

K- First of all, is it true or not?

There is a joke and they say the sheep's teeth turn gold but it happens only to the Russians. The sheep near the Russian border of Iran. We don't know if the story is true. But fundamentally, from a Plasma Science point of view it is possible. We are not saying this case is real or not. It can be possible due to what we consume and how our body adapts to it. It's like with the Indians who always eat a lot of spices, when you come near them they smell of spices).

(Mr. Keshe tells a long story of his business days buying sheep's wool in Uzbekistan and Kazakhstan. The point is that the buyers were interested in the dirt that the sheep rolled around in because they collected gold and rare earth metals in their wool. Then they would wash it out of the hides and make a lot of money. Also the fat of the sheep skins can be processed for expensive cosmetics and medicinal uses).

(This helped him understand how in the Plasma technology we transfer energies. Later he worked with the Russian government to inspect lakes (that became dumping grounds for nuclear reactors) and they were contaminated with nuclear materials. He studied how the people and animals who live around those areas were effected and changed by the radiation. We saw some oddities. There was one lake that was totally used for dumping and nothing normal lived in it. There were new species developing in it that were not normal to the area. The lake was literally like a huge nuclear reactor in the liquid condition. (It's like what the Americans did in the early days in Los Alamos Labs, there were buckets with uranium and plutonium just laying around everywhere in the hallways and people just walked by them not knowing what was happening. In Russia it was far worse, they fed all sorts of chemicals and nuclear materials into this lake and we have seen all sorts of changes in the vegetation and animals that drink this water. The same thing has happened in Chernobyl and we are observing what is happening to Fukushima).

(The different energies change the structures and we've seen new types of animals around the forest of Chernobyl. So yes, our bodies will change by what we eat. Were these animals effected at the calcium (Ca) level, possibly? We have to look at the evidence with an open mind. A couple years ago we saw white Chinese turn back to black because of the deterioration of the fields in their body (during the pandemic). Everything is possible, but we have to understand the reason and what the energies are doing).

(In KF we have achieved a knowledge and science where we can produce matter state gold in the solid state, gold (Gans) as it is in the body, as a protein, and we have produced gold as it is in vegetation. Each one has different characteristics and different properties. I showed the production of the gold as a protein to the Chinese military when they came to

our offices. It gets absorbed straight away into the body. It has a huge application. If the grass in the area of the sheep creates a protein, but does it interact with the calcium levels and change the teeth of the animal? This is something that has to be understood. Is the conversion in a layer, or is it actually in the structure).

Nothing is impossible in the World of Creation. It's only the limitation of our own understanding.

(We have to understand the energy conversion and what energy leads to the conditions that we see manifesting. We can have animals with golden kidneys, but they still function as kidneys. The gold is produced in the process of the creation and conversion).

(For example, the Eskimos have a monotonous diet, but the rest of the body still produces Ca, Zn, and whatever else is not part of their dietary food intake. Our body takes the energy of Ca and converts it into hormones, different vitamins, and whatever isn't in our diet, but is needed for our life. We do it naturally. The knowledge in the KF is at that level and we can (replicate it). We can produce all three at the same time now).

(The KS are reaching the understanding of how to produce the plasma energy of the gold, which is a massive breakthrough in the world of science. Part of this was tested in the November session and the rest. Creating energy in a plasma state is totally different than producing energy as a ?? Gans. It involves different structures, different T and knowledge. Our body does it automatically and now we have found out how it does it. We can produce gold as a matter, protein and protein of vegetation, and gold as a plasma. (We can do it for silver, Ca, and the rest. It's a unique knowledge and we never share it, but we use it in our processes)).

Q: Is the left and right side of the brain related with the HC and NO of the COHN?
You said before that the left eye is for the Soul. Can we deduce that the right side of the brain is the HC part, and the left side is the physicality?

K- You have all of it in both sides. (You don't walk on one-side only. You have to understand the balance between the two).

(Mr. Keshe goes into a long teaching about what he discovered by looking at MRI brain scans since he was a child. He also studied a lot of brain scans from MS patients and he will go over how some the areas of the brain correspond to different parts of the body and what happens to them in MS cases and what it means. It's difficult to understand so you'll have to go over it several times yourself, but I will try to summarize the main points).

(Our brain has two halves primarily because of the Cu structure of our muscles, and that creates the D of motion, and because of it we chose to walk. The fields on the right and left side are like two magnets and they create a Twinity. They create a small field flow to keep the balance between both sides. They create what we call magnetic gravitational spacing, (or MaGrav Positioning). There is a center point between the two halves, which is movable according to (?? the effects of the field strength). Once the plasma is created

(?? in this center point all the energies are the same, and M and G fields are in balance. ?? The brain also has a balanced field)).

(?? This center is the position of the STM. Future scientists will be able to pinpoint the STM. (It's dynamic and both are creating dimensions in it. If we enlarge it, it's a plasma which is working in this area. (?? We can assess the STM according to the mass, density, emotion, and the structure of the P ?? as a position and a field-size dimension). This is a knowledge).

(He goes into some details about the shape of the brain. From the structure of the brain we can see the characteristic of the STM, and the man's behavior. He can see the behavior of a person in the MRI and how their life is setup to be, and the point is set. You cannot change the composition, position and structure of your brain unless you bring into it an emotion. At a young age he could clearly see on the MRI how the emotions make the STM, and how the STM makes the P of the brain and then it (creates the P)).

(He goes on to talk about an MRI scan of an MS patient from the Internet. There are certain white spots showing up and indentations. It shows how different emotions created the MS. The left side of the brain effects the right side of the body and it has to do with in the physical life of not getting the job promotion or reaching the financial expectation, basically the person is not given what they wanted. And the right side of the brain has to do with the love of the mother and emotional connection. The scans show shrinkage of brain mass in certain areas. MS occurs when the person doesn't want to live anymore but they don't want to physically kill themselves. Instead they want to show the others that they need the love of the mother. This is seen a lot with footballers and actresses having MS).

(In the new technology we have added the process of elevating the Soul to the Enhancement Unit in Germany. We are going directly for promoting the Soul. Then it will be the judgment of the person themselves and not the responsibility of our systems (to process the condition)).

(When you eat food and feed the P only part of it goes to the emotions. But when you feed the Soul, it feeds the emotion first, and then the P, which brings the change in. The emotion is the D of our Soul and the strength of our Soul is D of P. This is why we have certain characteristics in certain races, because of the fields of the Inertia in certain positions and the rest of it).

(When you feed the Soul with all the energies it needs, then it's literally impossible to get MS, because you control the P with the Soul. A lot of things can change for man, because this is the energy of the emotion of love and the U is covered with the love of the Creator. If you understand this we can stop a lot of illnesses in the body of the man. We have to understand how strongly the STM acts on the STP and P of the brain, then the P of the body just follows the boss or the STM. It takes a fraction of a second to (create a change. It's just one second of really meaning it and saying to yourself, I wish I was dead because

I didn't get (what I wanted). Or I didn't get the love of the mother. If it is a deep strength it will trigger a reaction and 40 years later you'll pay for it (by whatever disease)).

Q: I don't have any specific question. My interest is in the control system and how the Soul does the control system.

K- (If you learn how to control your emotion, you'll learn how to bring a lot of things about transmutation and transportation under control. It literally brings a lot in the D of the STM. (We have to learn a lot about ourselves to be able to control our emotion, and a lot of understanding about ourselves to change ourselves without (creating prejudices for ourselves and others. We can only do this for ourselves and nobody else)).

Q: A KS said he suffers a lot from concussions from playing Australian rules football.

K- (There are certain rules you have to follow especially for things like concussions and stroke. You cannot touch the body, or the brain with anything till the bleeding stops and it heals. Because when blood is flowing you create a dynamic (?? field which can get out of control. So we wait 4 to 6 weeks before doing anything)).

(Mr. Keshe gives a teaching on how to use the Pain Pens. (For concussion you can deplete its energy with the Pain Pen (PP). You don't put the pointed side towards the head, rather the back blunt side. (?? After using it you can put it in water and then use it again. Because the energy in the brain is different than the energy of muscle pain, which the Pain Pens are mainly used for). It's of a higher order and try to have someone else hold the PP to deplete the energy. The condition is reverse to an injury to the muscle tissue of the arms and neck).

(Understand that the brain uses a different field strength (and it's much stronger than pain in the physicality. Using the PP backwards creates stronger fields and for concussion you need a broader field. There's a reason we shaped the PP this way. For example, if you have an injury that goes along the long muscle of the arm, then you can use the PP on the side so it covers more area. The PP is also triangular which is a Star Formation (SF). (We design everything in accordance with Plasma Science and the science of material conditions. (?? The energy of the pain is released into the liquid. You have to understand how to use these systems (that we make to take full advantage of the knowledge). I've seen people making different PP and in one case they made it circular. If you understand the knowledge, where are you going to (drain the energy, where is the balance going to be if you make it circular? We design these PP in specific ways)).

(The PP is shaped like a SF. For head injuries, or injuries covering large areas use the flat back end of the PP. For joints, and pain along the arm or body use the long flat part of the body of the PP). Some KS put coils in their PP and it comes into the center. That's not the way to do it. Very soon we'll launch a new PP called, Infection Pen and it's for infections you have in the body. The Pen will totally take them out. It can be internal, muscular, or organ infections and we've already tested it and it's extremely successful).

Q: How do you restore the PP and Gans's when they lose the power of their amino acids (AA)?

K- There are different ways to do it and it depends how you used it. (A lot of KS just kind of put their PP anywhere without paying attention to the fields that will interact with it when you are storing it. Sometimes they write and say their Gans's changed color. They put it near the sink, which is a draining environment and it will change the energy of the Gans. Never put your PP, Gans's, or whatever near metals, because the gravitational mass is more than your Gans, so they connect to your Gans and take energy from it. Also because it's a composite Gans it will change color. You can test this by putting your Gans on metal and seeing how fast it changes color).

(When you put your Gans's near a tap or flowing water the color will change continuously, because of the flow of the water, it takes energy from it. We presume that after 10 years most of the KS have understood this by now. Releasing the Infection Pen will change some things in the world of medicine, or understanding of the work).

(When you use a PP it absorbs energy and takes it inside itself. It's not just a Pen. (?? Over time it balances out the fields inside the PP. ?? The field strength is connected to the AA or fat in your body. ?? We have to replenish the AA inside the PP, because you connect to the pain your body through the AA)).

(When you make Gans you set aside the AA and first wash the Gans and then put the AA back into it. Don't wash your AA, they are a field strength. After some time they don't look fatty anymore, but they still carry the energy of the AA, this is the whole key. You take energy as a field strength of the AA. (?? The Gans in your PP will only connect to your body if there is AA in it. That's the link between the PP and your body. Now we need to understand how to create a condition that the PP will regenerate the AA. When the PP don't work it's because the AA is depleted. There are different ways to replenish the AA. One of the best ways is to put it inside your CO2 Gans Box when it is producing Gans. As AA is being formed on top of the water in the Gans Box it will also form inside the PP. Every year or two you can replenish the AA in your PP. The best is using the CuO Gans because the Cu connects to the muscle tissue. But CO2 (is very good too)).

(In KF manufacturing they have made a special unit that sits on top and constantly produces AA during the production. This ensures the PP will work).

(When KS understand part of the process then they can translate the knowledge in the steps they understand. If you put a tube inside another tube, that's the same as we have done in the MaGrav coils. It's a translation of the knowledge. Now you have a continuous field interaction, because (the two coils are different and if you put it around your neck it also interacts with the fields of your body, so of course, you will feel an effect). It's a translation of the knowledge, but the principle is the same. If you understand the process of MaGrav technology, you can do massive things with it. MaGrav T gives you everything you need for Space travel).

(Mr. Keshe explained about the position between the STM and the heart, and that it is fixed and cannot change. They create specific field interactions that create the D of physicality. This position creates the fields that also interact with the environment, and also fields that comes through the breathing in connection with the fixed position of the Soul. This creates specific behaviors in the man. The position of your Soul and heart gives you your physical shape and behavior. This is why people appear similar to each other. The interaction is so precise that it creates the same features in each person, or a certain P type. The fields of Inertia also come into it, and the Inertia of the fields of the Soul and the STP, and all these create the D of the physicality or body of the man).

(There was something about during transmutation you may see and feel a creature with the two lights, two fields, and it has a Soul and a physical dimension, but your field strength doesn't allow you to see it. It's a matter-existing thing. You might feel one field inside the other).

(Because of all the different field interactions that go into making a person you will not find two that look exactly the same, if one is from China and the other for example, is from Europe. The physical feature conforms to the emotion, and the Inertia of the TPP will not match with the one in Europe. You might see some familiar features, but they won't be exactly matching. In Arab countries you might see that many people look the same. It's because the Inertia of that position dictates that kind of feature. Then it depends on the distance between the STM and STP, and few other bits together. You get similar features. It's why some of twins look exactly the same as each other).

Q: (In the Koran) it says Man was created from mud, and the Jinn from a fire which has no smoke. Can you explain what it means, to be created from fire? Jinn is translated as beings, which have intelligence but we cannot see them.

K- (The mud is a symbol for Earth and means the D of physicality. It's used quite a lot in historical literature. It doesn't say we were made out of a stone or whatever. Because mud has a dynamism, it's like the physicality of the man. Jinn or the fire means the fields of the U, or the Creator. When the love of the Creator interacts with the mud, the earth, it leads to creation of life. The mud is that N-O, and the fire is C-H. The Jinn is fire or the energies of Creation).

(We would not have had life on this planet, or even in the U if we did not receive the Love of the Creator, or connection to the central line of Creation, which dictates the size and shape of the AA of the man. The fire is actually life. Life has fire, it moves and absorbs energy, and it creates a D of confirmation. The interaction of the fields of the Creator, what you call the Jinn, with the mud of the Earth creates a fire, which is the STM, the life. Without the energy of, and especially the connection to the Hydrogen there would be no P life on this planet. This is the interpretation of life in the Holy Books).

Q: Sometimes they say Satan is a Jinn, or from the Jinn category.

K- (The way I interpret Satan or what people commonly call the devil, is that which takes you away from the love of the Creator. It adds to your Weight, (and makes you heavy). (?? It's hidden in a lot of different names)).

(In physics we create a centrifuge. The plasma is a centrifuge, dynamic and spherical. In a (matter state) centrifuge the heavier part goes to the outside. But in the Plasma fields of a vacuum, the heavier goes to the center. (?? In the energy level you go towards the Creator, but in the matter state you go away from the Creator. Going away from the Creator is the punishment, the judgment)). (There are different names for God).

Q: What government is going to implement the Plasma Technology?

K- The government of the Republic of Iran will show this technology very soon. (Iran will be the flagship of the KF T. The KF technology will be brought within the structure of the Iranian government and Iranian nation. It will manifest itself from Iran as an independent and new technology for human race in the coming weeks).

(For the first time we will see a (KF) structure setup within the structure of the Iranian government, it may be a Plasma Technology Ministry where (companies will implement and disseminate the technology through Iran. KF still has contacts with the Chinese and other nations. We'll use the new structure as a new science to collaborate and negotiate between the American government and Iran. (We'll extend this to the new administration in the US). (It will be KF within a governmental structure, and not KF on its own)).

(We are in the stage of negotiating Technology in Exchange for Peace. We will not negotiate on nuclear anymore but on technology in exchange for peace. We could not negotiate with the Biden Administration because they are bent backwards for destruction and not peace. (They talk peace but at the same time they sold 22 billion this past year to a nation only pushing for war). Hopefully the new administration will be open to exchange technology at a governmental level and want to bring peace).

(The basis will be on showing the T. We have put the hand of peace out to the new American administration for talks on T and not nuclear, because nuclear to us is obsolete. But you have to understand that Iran is a very large structure and has different arms of work. We have to navigate and negotiate and in a way, teach our people to walk away from a lot of things. And we also have people who have spent their lives, especially in Iran, in certain sectors to develop rockets and other things. They don't want another solution, they only want bombing. Up to now, thanks to the wisdom of Ayatollah Khomeini, in past few weeks we managed to curb it, or at least keep it under control to see what next step will be).

(Trump said, there should be no war, and if he sticks to it, we'll exchange technology for peace. The new administration knows how we work, and what will be there. One of the biggest casualties of advancing American technology will be the Tesla (Corporation). We have to find a way for Musk to collaborate inside the new technology. He knows our technology very well and has copied a few of our items and marketed it in different ways.

Hopefully, we can keep the wisdom of peace within the structure of the Iranian government, and bring KF inside).

(We have to keep a very close eye on the development of weapons by the others, and transportation of these weapons. This is part of our peace work. We have access to, and we have received a very detailed information about the movement of arms illegally by the American organizations, which we cannot even put in public. This can create a massive problem, and we have to negotiate internally with the Americans. This is a breach of International Law, and can create havoc on a lot of things. And it's part of the work we have to do to negotiate for peace. And we have to see).

(You have to understand that the present situation in the Middle East doesn't come from the people themselves. It comes out of the one man trying to keep himself out of jail for his corruption, and financial corruption. Because of this he is creating this mayhem. He is keeping other people busy with hyperactivity, so that they don't see that he really wants to be a king. Netanyahu has to be dealt with because he is deliberately blocking a lot of negotiation. If he weren't there we would have reached a peace settlement months ago. He keeps the war going, to keep himself out of prisons, both in the International Courts in Dan Hague, and in his own country, where he has 2,500 criminal cases against him. He's the biggest problem at the moment. He even changed his war cabinet minister because the peace talks were advancing in Egypt, and the rest of it. Then Biden may go for another 2 billion in contracts, where he himself gets 5 to 10% commission before he leaves office).

Q: How small is the smallest Black Hole in this Universe? And can a Black Hole be created on a miniature scale?

K- Every atom has its own Black Hole, otherwise it could not exist. (You have to understand what a Black Hole (BH) is. A BH absorbs energy through its mass of gravity. An atom needs to absorb energy to confirm it exists, otherwise it cannot exist. The only way to disintegrate a plasma is to add or take from its fields. Chakras are Black holes in the body, it's where the central point of the energy sits, in respect to its environment, or the organ around it. In essence, every plasma, and atom has its own BH, and without it, it disintegrates. This is the only way man can change the cycle of his life).

Q: How does the BH manifest in relation to the Soul of for instance, an atom?

K- It is the outcome of the balanced fields of the M and G between two plasmas.

You create it of course. Certain fields which cover the spectrum of the fields of the U, they become. A BH cannot be only one field strength, it has to be able to survive in the full spectrum (of fields), but it manifests itself as a given field strength. (The brain is created from the BH of the STM). In the D of the P of the Cu, the fields of the environment interact with the fields of the mother, and start creating the structure of the brain. And then that leads to creating the structure of the body. In the womb first the brain and heart are created, then the arms and leg. (?? The combination of the STM &

STP in the womb, and the 3rd plasma is the Soul of the Mother, these create the conditions for the growth (of the fetus) in the fields of the womb). And with the energy fields from the STP in the heart of the Mother. We are created out of the fields of the STP of the Mother, and that's why we have such a connection, and can feel our Mother).

(As a fetus we create a field position between our STM, STP, which is our heart, the heartbeat, and with the STP of the Mother and the STM of the Mother. This is how we are fed in the womb of the Mother. This structure demands absorption, or attraction of the fields. The STM has to have a full spectrum of (the plasma), because each one of the field strengths (in the Spiral of the plasma) leads to creation of (a particular) cell. It can be of the heart, bone, liver and all the others. The Soul of the child has a full spectrum and it matches with the STM and STP of the Mother. That's why the Black Hole has to have a full spectrum. And then according to the plasmatic Inertia ?? a given field strength leads to creation of the organs).

Q: There is a question about seeing each others Aura.

K- (We see auras according to the field strength of our wish. Some people can do and others not. Some people can create it. (?? We all will reach the point of being able to see the interaction of the fields, like the atmosphere of the Earth. That's how we will survive in Space)).

(Rick tells about the hidden images in the Flying Carpet used as the background screen.

(Mr. Keshe says when they negotiate with the American government, Markray could be used as a joint structure, and it will be an American establishment. We'll have to see how it takes shape in the coming time. It could be part of the collaboration between Iran and United States. Even though a lot of Musk's work will become obsolete, especially his battery powered cars, and the Americans want to stop importing cars from China. The problem is the Americans don't have the materials to produce the Lithium batteries. And a bigger problem is to dispose of these batteries. With the introduction of the new plasma cars that use MaGrav positioning we can bypass all of these problems. Maybe Tesla cars could be fitted with the new T. This is part of our ongoing research and the negotiations with the Americans, and Trump. Musk could reach Mars much faster if he collaborates with Iran. We would produce and deliver the technology, and they would make the hardware which they have).

(We have to come to an agreement for world peace, and this will allow the technology to come out. But the oil companies want to stick to keeping their status quo. But world peace is more important than a few barrels of oil and we don't use oil in Space. We'll see a lot of changes in this direction in the coming weeks and months, especially in the car industry).

KEY-PHRASES:

SUMMARY:

ENGLISH TRANSCRIPTION

(:10)

K- Thank you very much. Good morning, good day to you. As usual, wherever and whenever you listen to this series of Knowledge Seekers, from Keshe Foundation Spaceship Institute. As usual, we are back here, another session, and adding to the knowledge of man. It's interesting the picture which is on the screen. It's what we call, a flying carpet and with a ship on board on top of it. Which is very, very coincidental, how these things is chosen by Rick, and how is connected to the teaching of today. In this picture and to our culture of understanding, a Persian flying carpet is to fly and take you everywhere.

Today's teaching is, how do we make the Creator's carpet. That, we can travel the span of the Universe (U). How does it work? And how we can live in the deep Space? When you have, to our understanding, (:12) a carpet or a flying machine. Now we know which travels in the dimension of the Gravitational Magnetical (GM) positioning. It has to find its position in respect to the, what we call, gravity of the Earth, that's how you fly around, like an airplane but this one is a carpet. Each cell carries a system inside it that finds its position and in a way, through your thoughts you control every cell of the carpet, which is that carpet, your own body, your own Soul, not the physical carpet. But, when you look at this, what we call a flying carpet, is in respect to the planet, its center of gravity, you position yourself in how this thing is. Years ago, when I used to be in business, part of one of my companies was involved in literally carpet business. We used to export hundreds of thousands every year across the world through Belgium. This is how my connection started with this country. Exporting of rugs and carpets and being Iranian it was always a joke that we are selling flying carpets. In those days it was the beginning of the what we call LED lights to be put in the carpets and it could have lights. We used to make it like as you're flying it and it was very nice. Things to see in those days.

And I always thought there should be a way to be able to achieve this. And later on we have seen with the, what we call, reactors that we actually can. Now as I said, in the next few weeks and months, as I said, we make Tesla obsolete. (:14) In cooperation with one of the leading nations, we start launching the systems which replace today's technological cars without batteries. And in that process, we will see that flying carpets, what you see, flying car, will be controlled by the emotion of the man and the dimension (D) of the Souls and interaction. This is why I said in many teachings, in the coming time, accidents will be impossibility, because the Soul of you drives the Soul of the car, which in interaction is like that magnets on the table, interacts with others and no Soul can come to it to be harmed.

And... but this is the limitation of man on Earth. What do we do when we use the other side of our, what we call, technological advances? What do we do now that we

understand the process of the creation of the man? We at the moment, we go on a very system, very simple, where we go with... (Prepare to choose a thicker one, it's easier). When we have 'Mr. COHN,' when we come to understand, this part of the equation, which is the Nitrogen (N) and Oxygen (O), is to do with matter state dimension of positioning and this side of the equation, which is part of our amino acids (AA) which is the Hydrogen (H) and the Carbon (C) is to do with our Soul, with our dimension in the Universal condition. How do we fly in the cockpit of the Creator, how does it work, where does it take us, what's the limitation of our own understanding? Where do we go in this process? (:16) In the physical dimension we travel with the cars, we fly. In the Soul dimension, energy, we position ourselves, we connect to that. How this positioning is created? How do we create condition of position in Space? Where does our flying carpet, can it work the way it does on Earth supposedly. We take our jets, we take our jumbo jets, we take our rockets, once we get to atmosphere, once we get beyond the atmosphere of this planet, rocket technologies are useless. (I'm in teaching, please). Then it comes to this point, how do we connect ourselves to the position that we can position ourselves beyond atmosphere of this planet? What do we do in galaxies? How do we position ourselves in the Universe? Where does this and how does this 'magic carpet' comes about, to fly, to be able to position? In a way how does our Soul during the time of we call, sleep our dream, navigates itself on the carpet of the Universe. Do we really live in the world of the physical dimension, or do we travel on the dimension of the energies of the Universe.

This brings a new understanding. We have to understand the field's positioning of the Universe. We have to do this because in a very near time in the human race history we have and we become part of the Space development. (:18) What we see with the rocket technology with Tesla and the rest in next 12 months, 18 months, will become obsolete. You will understand why in the upcoming time, because efforts of the nations has moved to and will move towards the change of what we call, the positioning. How do we do? The rockets have no use, we shake our head and we dance and we saw one of the world leaders in what we call it, victory, talk yesterday, that he talks how he stood and watched this thing comes out of the light and doesn't lose paint and how Tesla system sat or landed and bla, bla. This is obsolete, already in the world of science. And it makes not the world leaders to be excited to see such a thing. It shows the dimension of knowledge has not been transferred.

But how do we go in the dimension of the Space? On Earth, we become very good. We send the rocket and it gets a man excited to see how he can land on his leg. We travel the space of the Universe. I'm sure nobody celebrates it every time to get excited. But how does it work? On Earth, we found the jets and everything else. How do we work in the Universe? Nuclear reactors are not the answer into the dimension of the space technology. There is no nuclear Uranium, Plutonium in the center of the... no planetary, no star system in the Universe, unless uniquely was decided and a field strength created to be, and still in that position, the field of the material will dominate and dictate. How the gravity and how the strength of the fields will sustain that life in that position? (:20)

So, it comes to for us to understand, how do we navigate, how do we sail on this carpet of the Creator, across the created life of his, what we call, the Unicose. We cannot use nuclear reactors which now is on the edge of our lives, which we think is very advanced and we fuel them and we push them a little bit, even on the Moon we are, what you call, "schizophrenic" craft, which we still fly all the way there and when it comes to landing a craft, we push a little button, the jet blows this way and that way to land. We still rely on that schizophrenic life. We haven't learned how to perfectly adjust to the land in a position, MaGrav positioning, in the world of the present science.

So, how do we change? Do we use MaGrav positioning for a matter state? And then, in the depth of the Universe, we use the energy system to change one carpet to another? To fly in one system and another? Or we learn the Totality of the knowledge, and from the beginning to the end, we travel under one system? The problem we cannot fly in the Universe, in the Cosmos, and we have this limitation of the man matter state, is because our knowledge is lacking the fundamental understanding of the Creation. We have not understood the world of Creation. So, we are busy like a child playing (with) that "Play-Dough" on the table and making rockets and we think we are very advanced with it.

For man to become a passenger of Universe, has to understand the work of the energies of the Universe. (:22) How energy is transferred, how energies create condition. I always said, which is so natural to us, we never understood, and we, all of us do from the minute we are born, we are conceived in the womb of the mother, the minute we get up, we stand, we walk, ask yourself a simple question. We use a rocket, we use a plane to get a material, we burn fuel, we use propeller, jets, whatever, from off the ground and then into air and then landed and makes a president very happy. But ask yourself a simple question, I asked this question for myself age of 8 and 9, and it took me nearly 30 years to understand it, and took me another 10 years to complete the understanding and the comprehension. If you understand what I'm about to say, and if you understand this you have found the secret to travel the span of the Universe. And if you don't understand it it's just another sound because, as I told you, you take from this technology according into your intelligence, no more. You walk, you take that foot off the ground, you go 10 cm, 20 cm (high), some of us become high jumpers, we can fly 5 m up, we can do whatever. What is a rocket space technology to it? Do we have any rocket propulsion under our feet to blow it up, to bring it in the air and put it down again? Or as we do it in the science of physics we call it, the muscles contract and the rest of it. (:24) But how do the muscle contract? How do they know how much energy to what height, if you're running, if you're jumping? It is become so much part of us that we have forgotten about us, about our motion, that lifting of the first foot of the ground to bring it up to the next step is a positioning of the fields of the Universe. But we have become so good at it, our brain, our structure, our physical body has used it so, and we see it so, that we never think about it.

You cannot by law of physics do anything unless you have energy, unless you have a position to be positioned in respect to. If you understand this, we don't use any rocket propulsion, we don't use anything propeller or whatever, but we find a positioning of our foot, you're going up a ladder, whatever, in respect to and we create that much energy, become so much part of us that we ignore the most important things of the traveling in

the planet of the Universe which is inside us. It's done by energy. It's done by understanding the complete cycle of the life. And if you understand this, you don't need to have another system when it comes to life. It does not need to have a separate system when you're flying on this planet with rocket propulsion, and when you go out using a nuclear which is useless. And then finding another way to travel the space and we come to this ridiculous position of the 10,000 light years. (:26)

We are 100,000 light years away from another galaxy. We are as far and in distance from another galaxy, as we are from one step to another. Man has to understand this. The amount of time it takes you, in the physical dimension, using energy fields of your body, in coordination with all the parts, the liver has to move, the kidney has to move, the left leg, the arms, the head, or have to be in synchronized to move to the next step, it should take you the same time, the same amount, to travel the span of the Universe to another galaxy. No more, no less. If you understand the process of Creation, if you understand the process of the transmutation, if you understand the process of work of the fields of the Universe.

I was talking to one of the leading scientists in past few days, and trying to explain to him, for the first time I could hear, he could understand for the first time, as a scientist, what I was talking about. We talking about the energy as a nuclear, as an atom, we talking about the energy, as the energy of the atom. How electrons and protons position in respect to each other. How neutrons are positioning in respect to another neutron, how an atom positions itself to the next atom, and decides to make a matter, a gas, or whatever. We are talking about that energy, the inner inherent energy of an atom, of any plasma. And then, in the physical dimension, we talk about positioning of the whole atom magnetic (M) field in respect to another matter. (:28) If we start learning, we start understanding the energy of the man in his essence, where did that energy come that it propelled you to take a step? Which amount of energy used, how did it come? How did your brain, created the field for the whole body in an energy level to be ready for it to literally detach itself from the ground into the air and land it again. You're doing better than in Elon Musk, if you understand it.

You have never thought about it because it's become such a part of our life that we don't think. There's an inner inherited energy within the cell of the body of the man which creates continuous gravitational positioning. You roll in the bed, you take your leg off, you turn in the bed. This is done so naturally for us, which... ask yourself one second, where does that energy come? How does it decide where my leg is going to be, my head is going to be? How is it decided I can jump? How energy co-adjusted to it and why I can jump only one meter, the other guy can jump two meters? Because I don't carry that, I have not enhanced the inner strength of the energy of the cell, which creates the heat of my body and the rest of it. And the world of science has pushed us in such a wrong direction to understand this, that it's God knows it's Hercules job to bring man to understand where the mistake came in.

So, if you understand the inner energy of the cell, inner energy of an atom, inner energy of the plasma which leads to creation of itself, then you don't need the rocket technology,

or physicality, and you don't need to go to sleep, to dream, to travel the span of the Universe. (:30) It's all the same system. Does it take you one thousand light years to take a foot to put it on the other one, and then landing? The step of the walk of the Universe, is exactly the same as the step of the physicality of the man on his foot.

Then, one uses the physical condition interaction in matter strength, and one uses universal of the same thing in the matter strength. On Earth we use the magnetic field of the Earth to find ourselves, to position ourselves. If you are at a higher altitude, the air is thinner and the rest of it, because we never understood the inherited inner field strength of the plasma of the life. Earth creates that in the center and every cell adjusts itself according to that, according to its position. If you think in a very simple system, center of Earth creates our gravity and in the field of it, according to the strength of it, we decide where we're going to be. And in the position where we sit, in the position where we are, in the strength we have in accordance to the position of both, decides if you look Chinese, if you like Indian and the rest.

In a way we cut through the fields of the planetary system, at the same time we cut through what we call, the Inertia Weight, and then it creates us. But, there is a small, small misunderstanding about this with the man. (:32) Because the composite structure of the fields. You look at these lines in a different way and different manner. Now, let's look at it in a true manner. This line, this central position is rotating, so the field comes out, it's this way (draws a spiral). This is how the field of the Earth rotates, it's not a spiky straight, it's in dynamic. You have to understand the same thing happens in reverse, that's gravitational, this is magnetical. Now you understand, you have the creation field strength and at any point you decide in a way, of how to wear to sit to be. Then you have a second parameter in this game, which is the Inertia. And that Inertia is constant in the position of everything else, in the condition, and the position of every element of this process, which makes it another dimension.

Then, you have another position, which is the Inertia of the cell of the man, which sits at this point at different strength, at this point at different strength (different strength of Spiral of Plasma), while remembering that these fields of the Earth Gravitational is continuous. In a way, when the fields are rotating, they create the, what we call, (:34) interaction, with the Inertia matter state, plus the dynamic field of the body of the man, which has its own Inertia as a Gans state, which you never understood. So, this leads to creation of new dimension and life as us. But in essence, there are all the fields of the Creator, they all are the fields of the existence and confirmation, and what we call dimension of life in this position.

There is an extension to this, out here we have our star, further out here we have our galaxy, and further out here we have the what we call, the 'center of the Universe,' and all these create their own fields. And all this in a way if I go back on the extension, you will see create interacting with us at all time (draws a Spiral over all of it), and then you can see the game of the Creation. At any point, us in field strength of the cell of our body, sitting on this planet at this position, have access to all the fields of the Creation. Beyond this, if even you go beyond this point of reference, somewhere, (:36) (I lost my picture,

come back). Somewhere here, we have the fields of the Unicose, which interacts with us. As long as it took you to take your step, taking your foot off the ground and put it back down, it takes the same on the field strength of to be to the center of the Universe, another galaxy, another position. This is why you dream instantaneously and you can go across the Universe, go somewhere else. Because you in the Energy level magnetic field travel on one of these lines of the Creation.

Now we see things in the shape of that confirms to us in animal shape, because this is the limitation of the strength of the fields, which we have allowed the cells of our brain to work with. If we increase the strength of field of the brain in a way to see the Universal dimensional energy, then we'll see reality of the animal in this position of Universe, not in the shape of man, as I spoke last week. Then you understand, man to be able to become part of Universal Community, understanding the process of the traveling in the span of the Universe have to understand the inherited, inherent magnetic fields of the Universe are within himself. Decide if he travels on the matter state Inertia gravitational point or Universal energy level magnetic field point.

And then if you understood this, if you come to understand even part of this, (:38) then you come to understand one fundamental position. It's you who decides the strength of your Soul. It's you who decides by your conduct what you eat, what you take, what you give, the strength that this Soul will find itself in position of the Universe, Unicose, or galaxy. This is where your Soul will land, in this maze of the work. Then it's you who decides what my Soul is going to do, and what will be the outcome at that point and position. To be able to do this, we need to teach you about this inherent energy of the Carbon and Hydrogen, how it works.

You went to the shop, you put an apple or a banana to take energy, you go to a fuel station, you put diesel, or petrol, or gas in your car to run that engine, because it's structured that way. How do you fuel your Soul? How do you put it across to go, in the path of man you walk on solid matter, on Earth. When it comes to liquid, you find another way of traveling in it. The same when you are in a car, you can go a certain way, you come to a cliff, you cannot go, because that machine is not made to jump over the space air gap, needs a solid ground. You created the car and then add a wing to it and you made it a plane and then you jump that cliff, you jump across, or you put a leg into it, and a bit into it and you swim across the water. Now you have to learn how to jump this barrier in the dimension of the field of physicality of the man and the fields of the Universe. (:40)

You come to the physicality point of death. You have to jump that cliff till you land, your Soul immediately, because it's of the energy of the Universe takes the flight, but the physicality can't come, it's got to that cliff, it's a car. It cannot go, it's got to the ocean, it cannot go, it can only go on the solid ground. But you have added a wing to it, you get it to fly across, you switch it, the motor you can swim across with the same car. Man has to learn how to switch at that point of cliff, that cliff is called the 'point of death,' that cliff is called the 'point of transmutation.' And this is what the teaching will go that way from now on. How to navigate the span of the Universe.

Now that you know you are in a schizophrenic life, the physicality (P) of the man which connects man to this matter state of the physicality, does not matter on Earth, Moon or whatever. And dimension of the energies of the cell of the body of the man, which is originated in the dimension of the Hydrogen, the essence of the Creation.

And this is where from now on we try to teach you to understand. It's like now, it's in the olden days if you remember my age 40 years ago. If we went from London to Manchester we were lost. We had to buy a map. Go through pages of the map, where is this street, harm here, find all the crackers and roads to get to where you are and make a thousand mistakes. Put a window down, excuse me, where is that road, where is that road, to get yourself there. (:42) In past 20, 30 years we leaped into GPS. We don't do it. There is a system in the car. Turn left and it's got a beautiful voice of an actor, a woman or a man, with a funny voice or a nice voice. Next light, turn right. Next road, turn left. You arrive at destination.

This is what you have to do with the Energy dimension of your life, what we call the Soul of the Man (STM) and you have to learn how to bring it in to the dimension of physicality of the car, which is the body of the man. How do you navigate the span of the Universe? How do you travel? It's like you're taking your foot off the ground and suddenly halfway going to land you find out, "Oh, it's mud, I don't want to land in the mud." I push it a little bit further and land it at the other side of the patch. You have to be able to do the same thing in the dimension of Energy side of your life. And once you learn this, you start understanding, you do not need the STM in the dimension of physicality to transmute, to transfer. You use in conjunction, in the control of the emotion of the Soul and Soul of the Physicality (STP), to move your body without walking. You get that, you literally get on that, what we call, the Persian carpet. Because you get charge, you take charge over the Energy side of your body than the physical side of your body. (:44) The emotion tells you, if I put my foot down I end up in the mud, I don't want to get wet, I just got a brand new shoe and that through that emotion you extend it. Another two centimeters, another five centimeter you jump across the pond. The same emotion sits with the STM, with the energy side of Universal part of the man. You can use the two, then you'll find the amount of time it took you to go from one step to another, on this planet, it take you the same amount of time to take one step from here, to another part of the Universe.

How come you meet the mum who died 20 years ago, has a position somewhere in deep space as a Soul of maybe a planet, maybe a beginning of a life somewhere, or as part of another life. And then the minute the husband says, "Darling, I want coffee", you're back. You do it faster than you put your foot down. How come, mom is not sitting next door to you in your brain? Mom's Soul passed, is gone, it's (found) its position somewhere in the Universe. You travel that span of time. In no time to see mom, have a coffee with mom, I was walking on the street with mom, and then you bring the Soul of the mom to the land which you know, and she knows, is the house we used to live in. And then, she goes back and you come back instantly, because the husband wants a coffee. You do it faster than changing your dimension of the step, jumping over the little pond of water.

We know both, but we never been given a chance to understand the working is the same, (:46) because the material is the same. We have painted different pictures on the canvas of Creation. One is in our head what we want to do and one we actually paint on the canvas, which is our physicality. But the emotion of what we want to do is always there, because it's us and has to become one. This is what the teaching from now on going to be. We brought you from the Gans's to the Soul, to understanding your creation. Now we have to show you the road map of the Creation, the road map of the Universe. That, you know, this is my car, it has the capacity of so much, and I've driven it so much, and this is how far it's going to go, and within that kilometer cannot go, that's my destination.

This is what you do with your Soul. How much you put in the tank, is how much you can go, and because you know from where you are to the house, it's 200 kilometers, you tank it to get to the house at 200 kilometer. This is how you tank, how you strengthen your Soul. So, we all know where our Soul will going to land subconsciously in our Soul. Because we 'tanked' it that way, through the cycle of life. Then, you understand, transmutation and transportation is both the same. One uses the energy as the matter state and one uses the same energy in a Universal Dimension energy of the Plasma. The few millisecond it takes you to take your foot off the ground, miss the pond and put your foot down, which you do so automatically, (:48) it takes the same time for your Soul to find its position, and the point of destination.

Most of us, before the time of death know our destination. We know what we've done, we know what we have done, this is the day, they call it the 'Day of Judgment,' we know. We have judged by our work, the position of our destination of our Soul. And it takes the same time, the same amount of time, as you took that step to jump across the little pond (puddle), not to get wet, for you to correct yourself, to land your Soul in a position in the Universe. There is no difference. The hypocrisy of a hundred thousand light years, is what was brought into our head by the most stupid scientists in the world, because the light is the limitation of the man understanding of his own physical creation, not the process of the creation of the Universe.

And if you understand this, you can plan the position of your Soul, at a point when it gets to the cliff, the end of the line, where you have to jump. You call it death. But, if you understand the process, you can create the system, to jump over and across the cliff, and land again in the dimension of physicality, it's the same as brand new car as you were on the other side of the cliff. So, you can re-manifest yourself. Out of nowhere, you land, and people see, "Oh, the new car, where did it come from?" (:50) They are not aware that you have a system that can fly the ocean. You have to understand to fly the ocean of the Universe, where your Soul has the energy balance to create itself, to manifest itself, and that's it's permanent position in life, till the next cycle of the Creation touches it.

Have you created so much energy that you've gone further than out, down to the center, Or, have you created the energy which through your conduct, has brought you closer to the center. This is the punishment of the life. This is the position of it. It's like, you stand in a queue, you're in a class, and you do something wrong, and the teacher says, "Go to

the back of the class, you've been naughty." So, you're further from me to disturb me, you're further from me to enjoy my knowledge, I'm giving to the others and the love I give them. And if you are such a good and you've done good, the teacher says, "Come to the front row, you have to understand more, come to the front row." This is come closer to the Creator, because you add to the knowledge of the others. And this is the process of Creation.

And from now on, in most of the teachings, we try to Bring the knowledge of how you navigate in the span of the Universe even in the dimension of the Soul and physicality, and the STP. Then you understand why I tell you in effects next few months and couple of years Tesla cars are obsolete, electric cars are the joke of the past. Because we teach you, we bring technologies that allows you to understand and to develop. (:52) And then you understand it's your choice to sit in the car or you fly with energy. Then you understand why poor wife because the husband wants a coffee has to let go and it's instantly you say, "Yes darling, I'll make you a coffee now." But second ago I was across the other side of the Earth enjoying a coffee with my mom. Where I was interrupted and brought back. I had to jump back. It's the same as that step going from the ground, jumping to the next step. Both of them used no rocket propulsion. But both used the same understanding of their field energy within the internal structure of the plasma of the life.

Then you understand how the cycle of life is. Then you have to understand how you can use the same energy. This is why some of you have this problem that when you join us on Fridays you go in but you cannot take the physicality because, oh no, you haven't learned something. It's the same energy, find out how you ?? lacked to go as one, not let the Soul go and leave the physicality behind. Understanding of the uniqueness of the same structure is the beauty of life. Once you understand, comprehend the beauty of the Creation.

In a way, as I always used to say to children, (:54) man is like a puppet in a puppet show. He makes image of himself in a box for man to see, but holds a string on the top himself, how he wants to show how he feels in emotion of the brain of the man, in emotion of the STM in that puppet. Both is the same energy. The same energy moves that puppet as the strings in the puppet. And the only connection is that string. And that string is the field of the Universe connecting us to the Creator of the thoughts, to Creator of energy, to the puppet and the ?? and the bottom, which it just moves because what the Creation of the energy of the emotion of the ?? puppetarian has decided to do. It's time to bring the puppet and the puppetarian together and work as one. Then you become the true actor of the stage of your life. As the emotion and the physicality is together, the way a ballerina dances on the stage, man dances with the emotion of inside, with the physicality of outside on the stage of the Universe. Elegance and emotion, with the thought that both is the same.

And if you understand this, if you comprehend, how the two is one", man would not live the life of a schizophrenic. Man will live a life as one, but understanding the confirmation of existence of two. This is why I always called... what you call schizophrenic, the Beautiful People, (:56) because that is us, we are beautiful. We are that schizophrenic,

because we have never realized, we have a dimension of the Soul and we have a dimension of physicality, both in one. If you go back to my teachings and my conferences, always told, I always spoke about the physicality of the man being a leech, on the STM. Because man never understood that inside that leech, that Soul decides how the leech moves. So, in a way, the Soul decides that condition of the physicality manifesting itself.

And if you understand this, by changing the strength of the Soul, you change the color of your eye, you change the color of the skin, you change your behavior, you change the amount of fields you receive and you give. Then it comes to, does the race, color and religion matters, as it's all one? And then, when you mature to that point, you become the Passenger of the Universe. Then, you have to learn how to change the field energy, that predicates to you, where in the Universe you shall go.

In the coming time teachings, I show you how the mesh of the Universe is traveled. The way you have the roads on the physical planetary system of Earth, there is the same structure in the Universe. You have to understand how to navigate these roads, how to navigate these meshes, how to understand a three-dimensional structure of the Creation and the Creator. Then, I have taken you in a trip of the lifetime of the Universe. (:58)

Today's teaching was to open your eyes to see how you are connected, and what is within you to understand. In the coming weeks, I open the map of the Universe for you. Then, you'll be at that Persian Carpet, which comes Carpet of the Creator. You can go anywhere, as long as you travel on the energy fields of your physicality and the Soul, and not on the dimension of physicality of your Soul, which is you, that puppet.

If you understand this, then you go back to understand, the very first things we taught you about the Gans's. Field positioning. Read book number 3, if you have it, before the next few sessions, because in one of the pictures where I show the Gans's, I put one word, "Gans's never mix." Energy fields of different strength can never mix, unless, unless they receive the energy or give energy to match up. This is why you put a jar of Gans behind a window. Today is orange, next week it's black, the week after it's gone green. It gives energy and takes energy from its environment.

Do a test if you want to understand how your Soul travels and how you're connected in your own homes. Make a Gans, anything, a Cu, because you see the green. Divide it in two halves, equal jars, equal amount, shake it well that there is no, (1:00) what we call, different density. Put one in the bathroom by the window, put one in the kitchen by window, if you got another the third one, put it in the bedroom by your bed and put one somewhere that it sees no light. Weekly take a picture and observe the color. You'll find out what happened with the color to the emotion of you in your bedroom. You go to toilet and you find out what was the emotion of the man when he's on his own. You go in the kitchen, you see what energy you absorb from the Universe. And you go where you hit it, to see what actually sits in the structure, the physicality of the house.

And if you understand the definition and the color spectrum, you can see how your household stays. Watch the height of the Gans in the jar. Watch which sides it pulls up to. Watch how different colors are in it. And then you'll understand the color spectrum of the Soul, the strength, the fields and not the physicality. As I said once to a friend of mine when I was doing a test in Beijing, making paints for the Chinese army that they don't depress in high altitude of Tibet when they go into their camps, because they have a lot of psychological problems, soldiers at high (altitude). If I could make a paint that every time a soldier comes in, takes ?? from (the Gans), changes his emotion, it makes him a man of peace. (1:02) I have done the job.

In a way, the Gans color in the room will elevate the Soul of the soldier to a peaceful soldier. We did this, and now it's used by the Chinese Army, Keshe Foundation technology in the hand of the military in China. It even changes the environment of the room. When we developed this paint, when we developed it, and number of different combination was given to the Military.

One night, the man who was appointed on behalf of develop this technology of Keshe Foundation, invited the Chinese military for a dinner. No one knew. If you've been with the Chinese military, they are chain smokers. Security people only know how to smoke. About 20 of us in the room. Wang Lin was sitting with me, the gentleman stood after an hour or so sitting in the room, having dinner. He said, "Gentleman, you see the room? All of you smoking? There is no smoke. The room is clear."

The room was painted in a specific way, with a specific materials, that even smoke was there, it ?? devoids of confirmation of its physicality to show. It's the same with the man. (1:04) You create a field which in strength, was the showing of your own physicality, even you exist in that. With temperature we changes the steam and the moisture, with the fields we changed the manifestation. Then you understand how you can jump across the Universe, which your energy level does, but your physicality is not ?? informed of it, the same as you take that step across the (puddle). It's you who decide, "I put my foot in the pond and puddle," or, "I hesitate, give it more energy and cross it and put my foot across the pond."

Then you understand, the destiny of the man in the Space, in the Universe, is in the hand of the man himself. It's you who judges, it's you who decides, and we give you the condition like on Fridays, to let you do it, with the confidence you can come back home. It's you that from now on, has to say, "I go when the physicality comes to me. The energy of manifestation of the vision or observation moves as the same strengthens me." In a way, I dilute my physicality energy within the STM, that the physicality has no manifestation. If you understood the last sentence, you have found the key to the Universal transportation and transmutation. (1:06)

Your problem is when you get there, you think where physicality is. You have to increase the Soul of yourself into such extent, that encompasses and dilutes your physicality within it. That's the key to the transmutation. Not just, "I went there and I knew I'm back somewhere in the house."

This is the process of the Creation, this is what the teachings will go for next few months and weeks. And then in that process you learn more, about how you travel the span of the Universe, you'll find out about mazes of the Creation, and one thing never forget, in all the teachings to come, that, this picture is your model, if you understood it. Have you increased the field strength of giving, that has increased in a way, the dimension of the Gravitational point of view, that becomes so humble and minute in the strength, that can be absorbed, can be attached to Soul of the Creator? This is the secret of the elevation of the man in all dimensions of existence in the Universe.

There is a balance, it's the same as the dimension of the physical energy. Potential difference. According to what you give, what you take, to what position. In the dimension of the energy of the Universe, the more you give from the gravitational side, to expand to give more, the less you have. (1:08) And that weakness in the dimension of the gravitational field of the STM, attracts you to the higher energy, which is the Soul of the Creator. This is why we teach detachment. Because you have to understand what it means. Balance of the energy between the Gravitational Magnetical has always has to be ?? conserved. So when you give on one direction you are low on the other and at that point of low you are open to the fields of the Creator, as it's stronger than you. Detachment. I made man in the image of Myself, but I never taught man how to be Me, to be detached. Then he becomes Me to be attached to the Totality.

I hope from today's teaching you'll start learning how to travel the span of the Universe, how to navigate, and how for the man who wants to be in the dimension of physicality, knows that does not need no nuclear reactor, and does not need no propulsion. Man has to learn to travel the span of the Universe, with the dimension fields of the strength of the Universe of the time, place and position (TPP), and detachment.

I hope I opened your eyes to the new cycle of teaching today. And then, in this process, we try to teach you how to travel the span of Universe, how to go from London to New York, take your children with you, and carry the suitcase, that everything is in it when you arrive. Because, even the Soul of your shoe has to agree to come to travel with you, (1:10) because you take the summer shoe but the Soul knows it's winter, you need the boots, "I'm not coming".

We go for a break and we come back and try to answer you. But listen to the teaching of today, as we open a new phase of understanding, because we set the ground for it in the past few weeks with making you to understand the two dimensions of your life. The Energy side, to Universal Energy which is your Carbon and Hydrogen of your Amino Acid, in your physical life, which for the past 10 years we taught, with the Nitrogen and Oxygen, which is a Gravitational field force of the gaseous state of this planet.

As Muhammad said, bless his name, << speaks in Farsi >>. We go with the name of the Creator, with all His beauty. It's you who have to understand the beauty within you, that you can become as beautiful as Him. No other standard, no Day of Judgment, it's you who judges, but you have to be clear in what you judge. Then you find your position in

the realm of Creation. We go for a break and we come back, and then we'll see where we go. Rick, would you like to take us for a ride?

>> BREAK >> 563 KSW November 7, 2024 (1:17).

K- Yes, thank you very much. Not much to say, it's just that those of you who join us tomorrow, in the session at two o'clock I think it is, you should receive an email, or you should have received an email up to now, for this special session. (1:18) Part of this session tomorrow is connected to the teaching of today and we make every effort to bring you to be able to do that conversion of energy with yourself within yourself. And hopefully some of you will achieve, as we said last time we knew somebody in the first group achieved transmutation and we received confirmation of it. Actually, two people did in that group. And see how many of you in the session tomorrow will go through it. We cannot register for a session tomorrow, this is the people who've been with us in the past six months. This is what we call, the test after what we call, six months of studying. And you're testing yourself, nobody else, and try to enjoy the session.

We have a session which is maybe next Friday, which is usually the third week or the week after, depending on our situation, how our systems are ready to go for that, which is a part of the three cycles, three months with what we call, Wellness and food. And that will be a very interesting cycle and hopefully by the most probably December session, or some of you by January session, who took those Space materials, will receive your material, and then we take you through a, what I call, journey of life. That we try to feed you through the Universal energies, and then the matter state energy which you see, you feel different, you taste different. And it's a very, very special, what I call, trials and tests for it. (1:20) Most probably, those of you who will have the, what we call, Universal Energy Balls with you, you'll feel what I feel when I touch Gans's. You'll taste the energy. When I touch a CO₂, I taste the CO₂. When I touch Copper, I taste Copper in my mouth. When it's in Gans state. And then you understand how you feel the, let's say, the carrots, the steak and the rest of it, when you hold this in your... But, then there are tastes which you never knew. Which these, you have to get. These are the taste of the energies

of the Universe. "What am I receiving?" "To what strength I receive?" And, "Was it taste bitter?" "Does it taste sweet?" And then that teaches you how to recognize in the Universe what energies you need. With what teaching we started today, you have matches up together. And hopefully, become much more, much more interesting, in that cycle.

In respect to the, as I said, the Energy Balls, we know, we have received hopefully today, in the packaging, the box we've been looking for, it's from the manufacturers. And, once (we) have it go out, within next two or three weeks from this, once they deliver us all the boxes, you'll start receiving the Balls immediately, as it's produced and we have the material, we dispatch to you. When you receive these boxes, it's like a jewelry box, do not play with these, what you call, materials with these Balls. These are essence of connection and the source. It has to match your Soul. It has... it has to be the strength that you understand the field of it. It's not just there to play, just because I bought it. You have to understand how to connect to. (1:22) Because you absorb energies from the fields. It's very important.

Those of you who bought two systems, one for the left and one for the right, every system is different, because the material is produced by the dimension of field of the Universal Energy. Then you will understand which one is taking from me, which one is giving more. You have to change hand, because you always give from the right hand and you receive from the left hand. And then we'll tell you how to use it in dimension of the sessions which will come. That, ?? across the teaching of what we started today, you'll learn how to travel the dimensions of the Universe, how to connect the physicality to dimension of energy.

The exciting part of the whole teaching after 10 years has started. Up to now we, you had to understand more and more about yours, how energies and the fields and the rest are. Now you understand connection to the field of the Universe, which was the whole purpose of teaching, 10 years it took us to prepare you. And now, you'll go through the cycle over it, and many of you will change your life, because of it. It's understanding the field of the Universe, not understanding what Mr. Keshe says. We are just the teacher. You are the students, you are the users, and you decide how to interpret the teaching. What you learn in the classroom, do you make a, what you call it, a pot out of it, or you make a ?? anything out of it, according to your understanding. And this is you that the new cycle of teaching starts, and how we will come, and how we will see the future.

The Keshe Foundation, what we call, the webmasters on the Store, will introduce, this week, most probably, a package of what we call for, Christmas gifts and everything else, which some has already come in and the rest will come this week, (1:24) if you want to order the, what you call it, the material which is there, because some of these materials are limited, before Christmas, we cannot provide, better than that, and it's our tradition. Usually around this time of the year, we put these, what we call, gift packs, on the Keshe Foundation, for their Knowledge Seekers (KS).

There is a lot of news, there is a lot of things happening around the Keshe Foundation, and as usual, we let you know as the things gets ready. But the, what I said to other Knowledge Seekers, even yesterday, the true life of the Keshe Foundation as an International Organization, has started. You will understand soon what I'm talking about, as new dimensions, in dimension, what we call, around the knowledge of the Foundation, will appear in different dimensions and directions. And hopefully, we manage to bring the change, which we plan, over thousands of years, in next few months and years, across, step by step.

Are there any questions?

Q: ... (1:26) First question is one of the Knowledge Seekers question. Something, I can say some phenomenon happened in Iran and in ?? recently. The teeth of the sheep turned to the goldish color and some people like they believe it's because they eat grass, which means alchemist's grass, and that's the reason it turned to that color. Some people believe, and there is a conversation, that is confirmed that it is a gold layer, that it's not a layers on the ... piece, piece of ?? sheet.

K- Can you repeat? I don't understand.

Q: Something happened in Iran, there is a like something in the media of Iran. One of the Knowledge Seekers asked me to ask you this question. It's about the teeth or tooth of the sheep, like the animal, and it turned in. There's some evidence shows that it turns to the goldish color, gold color. Some sources, they confirm that it is the gold, when like they took it to the, like they examine it with the stone of the gold, which shows it is gold. It shows it is gold. (1:28) I cannot say 100% is correct, I just wanted to ask, what's the reason? Like, if there is possible, what's the reason? This is the first question.

K- First of all, is it truth, or is it just what you call it?

Q: One of the Knowledge Seekers like ask me and persist that it's like happened and it is real. I cannot say that it's 100% because I didn't like...

K- You know, you know, you know the joke that they say that happens, there are gold tooth, but it only happens to the Russians ?? Is the sheep they're talking about near the Russian border of Iran. So we have to see if it's true ?? or not but there's a lot of these things around. But fundamentally, it is possible. We don't say this case is real or not. Fundamentally, it's possible that due to consumption of what we do, our body adopts to it. It's like very much, you know, like Indians, they use a lot of herbs, And when you come near some Indians, they don't need to speak, you can smell the herb they consume every day. You understand?

So, I go back into my business life, I explain to you something to understand. Years ago, when the Eastern Block opened up, one of my companies took over the export of the wool, from Uzbekistan, Kazakhstan, huge amount, hundreds of thousands of kilos... (1:30) tons of it, a year. We used to ship from right across ... Kazakhstan into Europe, and

we use... we had a contract with a company in France, for... which their job was to wash the wool. When I met the agents of this company for the first time, for lunch, near Belgian-French border, two guys, at that time I was with my ex-wife. And they asked us to bring some of the wool with us. And these are the wools which comes from the back of the, literally shaved of the animal. And we took one carcass wool with us in a bag, and you can imagine a French behavior, you don't talk about business, till you finish the food, and then when it comes to the coffee, everything is business. After we had a beautiful lunch, he asked for a wool, I gave him the bag of the wool, and you can see all the waste wool there, what you call it, rubbish, all the bits of the animal from his backside, everything was in it. Because it was, he wanted the natural way. And, you can imagine my emotional and physical condition. When I gave him this bag of wool, he opened it and he went, literally, to the belly side of the wool. And he put his nose in it and he sniffed it, and I was going sick with seeing this sight, and the guy said, "Oh, this is beautiful, this is beautiful." I couldn't understand why the smell of, excuse my French, excrement of the sheep, to this guy was so beautiful.

We established a business, we signed a contract and later on became a business for us, (1:32) in the different ways. Why? He said, in conversations later on, we found more scientific things behind it. He said that the wool has no value but I smell in here it tells me this is like gold, this is money. I said, what are you talking about? They bought the wool from us they wash the wool to clean it. The wool washed is the waste. The fat which keeps the animal warm or what you call it, isolated from the cold and water. The bottom part which is the earth side is the most valuable part where all the rubbish sticks to. I asked him why? They want to know about the size and the height of the sheep from the ground which in that part was from cold part of the Siberia and Kazakhstan coming from for our material. So the wool was very close to the ground type things. You see when we wash the fat comes off and with it everything else comes. When the sheep raises, because of the wool and the wet and whatever, picks up the dust, what gold, whatever rare earth material, sticks to the wool. We sell, we separate this oil. He showed us the oil, then we got to know more about it. It's a brownish, greenish color. He said, this is the money. There we sell that for a, let's say, two, three thousand dollars a ton, this is three or four thousand a kilo. The oil and the material which is in it. (1:34)

Then, working as a, what you call, plasma technology and everything else, later on he opened up a lot of things for me, how we transfer energies. So in this material, this oil which washed from the body of the animal from the wool, there's gold. There is plutonium, there is uranium, there is rare earth materials. And they sell the wool for two or three thousand dollars a ton. They sell this material. The fat part of it when it's separated, used for a very expensive cosmetics. Sometimes for surgeries, in medical applications. How they sterilize it and they use it.

And then I realized, yes it's possible. And then I had opportunity to work with the Russian government and the Russian agencies on the lakes, which were contaminated with nuclear material. And the people who live around these areas and the animals which live around these areas, how radiation affected their structure. We saw some oddities in it. Because I was working with one of the world leaders at that time, he said "Mehran, we

have a problem, I would like you to go and see". This was when the Russian USSR was broken up. He said "For years we have near here nuclear stations and everything else we do processing here. We have fed everything all the waters into this lake. Nothing lives in this lake but what lives is very different than what we have outside or even the animals near it." (1:36) He asked me, because you're a nuclear physicist, can you explain we try to find out how does this thing happens. We have a lot of research going on, but I would like to see your opinion.

They took me to the lake and the lake is literally a huge nuclear reactor in liquid condition. Because you can imagine how much we are ignorant even in Area 51 in America about the uranium they used to give it in buckets in the passages. In Russia it's worse. So they fed all sorts of chemicals and nuclear materials and everything washed into this lake and we saw the changes in the plantation, we saw the changes in animals through drinking water, through vegetation eating in this environment. This answered part of us that part of our question. But when it came to Chernobyl, Chernobyl has got a restricted area. We observe and still observe the changes in animals in near Chernobyl. We are watching the changes in humans, and in animals and plantation in Fukushima.

How energies changes the structure. We've seen new types of animals in Chernobyl, in the jungle, in the what we call in the forests around it. Because nobody can go, it's closed limit but those who have access, there are so few people live in this area, we see changes in the animals. Some of the four-legged animals have shown a lot of changes compared to the ones beyond the fence.

So yes, we can change by what we eat and if there is a reason why these animals eat and is at the calcium (Ca) level, (1:38) does it affect their body, possibly? Why does it, too? Why you don't see gold on the rest of their bone structure? Or maybe when they kill them they find what you call it, golden bones? These things are possible but we have to look at it in a very open eye. Because this is something I in researching or working from student time as a nuclear engineer. Environmental changes and its effect on our people and what it'll have. And part of this radiation change led to the closure of the Queen Mary College nuclear reactor. When I graduated through the research, we've shown the radiation beyond the fields can affect the people population in London.

So, yes, it's possible. Is it a hoax or somebody made up? We change, we change the color of our skin, we saw that in the Corona time, where people, white Chinese went back to black because of deterioration in the fields of their body. Everything is possible, but we have to understand the reason, the energies which come with it, and what has created that energy.

When you... In the Keshe Foundation technology, we have achieved a knowledge and science, that we can produce gold, gold, as gold in the solid material, gold as it's in the body of the man, as a protein, and we have, we produce gold as it's in vegetation, because each one has different characteristics, different properties. I showed the production of the gold as a protein to the Chinese military, when they came to our offices, (1:40) where you actually rub the gold, as it's actually protein gold, and gets absorbed straight away

into the body. Has huge application, especially like in certain cases. So, if these animals absorb their protein in the grass or as a protein, because of change of environment, in a protein of the body... Pardon? Hello?

Q: Exactly, that's the reason that people say. Hello, we have... Can you hear me?

K- Yes, we have to understand if the grass area creates a protein, but does it interact with the calcium levels change the food, the teeth or the tooth of the animal? This is something has to be understood and then there is a lot of processes of the this. Then is a conversion of it is it a layer, or is it actually in a structure. Nothing is impossible in the World of Creation only the limitation of your own understanding.

If, it doesn't matter it's about the sheep with gold or whatever, or is what you call, anything else. We have to understand the energy conversion and what energy leads to the condition which we see. So you can have animal with golden kidney, but it still functions as kidney, because you produce gold in the, what do you call it, in the process of the creation and conversion. (1:42)

This is how in the body of the man, let's say like Eskimos, have a monotonous diet, but like the rest of us body produces Calcium, God knows Zinc and whatever else is not in their dietary food. This is how our body takes energy of Calcium and converts it into hormones. Converts it into different vitamins, which is never in our diet, but it's needed for our life. We do that naturally. And now, the knowledge within the Keshe Foundation sits at that level that we can do that. And the beauty of it is we can produce all three at the same time now. And then we need the knowledge is...

Our Knowledge Seekers are reaching a point that we can produce the plasma energy of the Gold, which is a massive breakthrough in the world of science. And part of this is tested in November session and the rest. Creating energy in a plasma state is totally different than producing energy as a ?? Gans. involves different structures and involves different technology and knowledge. But our body does it automatically. Now we have found out how. So now the knowledge sits and we can produce the gold as a matter, we can produce gold as a protein, we produce gold as a protein of the vegetation and we produce gold as a plasma. Doesn't matter, silver, we do the same with calcium and the rest. (1:44) It's a unique knowledge and we never share it, but we use it in our processes. So yes, it's possible, you can do, you can create, but as a natural process and if it matches certain condition, yes you can change.

Any other question?

Q: Thank you very much Mr. Keshe. Exactly as you said is on the all day saying reason is the grass that this animal is chewing. And they call it the alchemic.

K- Alchemic, yeah. Have we lost him?

R: Behrang, are you still there?

K- I think we lost him.

R: Hmm, I think so. Okay.

K- If you switch his microphone off, if you have access to it, yeah.

R: Oh, it's gone there now. I think he dropped out.

K- Yeah, there's a problem with the Internet in Iran at the moment.

Q: ... (1:46) Hello Mr. Keshe. Now I have five people who hear how you teach us. They're very happy with you. We come from a poor area in Kenya. Help us to meet people that work with Gans in Kenya.

K- Kenya you have one of the top Keshe Foundation scientists, Dr. Gatua in Kenya. If... very active, Dr. Gatua still here, I don't know, we have him with us today.

R: Yes, he is present. And his microphone is open. Hello Gatua, can you speak?

Q: Yes, I can hear. I'm here. Mr. Keshe, good morning.

<< Rick send the contact of Dr. Gatua to the person that asked for somebody who is working with the Technology in Kenya. >>

Q: ... (1:48) Hello Mr. Keshe and Rick, following one of the last conferences, you said that the left eye is that of the Soul. Can we imagine or deduce that the right part of the brain is the HC part, And so, the left side is say, the physicality? Thank you in advance for your answer.

K- I don't understand, can you explain?

R: I think that he's trying to relate the left and right side of the brain, with the HC and NO that you formulated on the white board. So, is there a correspondence there between... He says that the left eye is that of the Soul, and can we deduce that the right part of the brain is the HC part and the left side is the physicality?

K- You have all of it in both sides, you're not walking one-sided. So, you have to understand the balance between the two.

R: So, that Soul and physicality relationship is, doesn't relate to the sides of the brain, it's a... that void-ness at the center, and the complete brain itself, would be the two polarities you could say, or the physicality and Soul, like...

K- I try to go to the white board, maybe I can explain this. This is part of the research, which we have done for years. (1:50) If you look at the brain of the man, I'm sure in the future researchers will see a lot of this. If you look at the shape of the brain, as you know I'm a useless painter, drawer, but try to give you something. I'm going to draw you two things. And then I'll draw you a third one.

When you have a brain, I mean, not when you have a brain, take a different way physically. In the brain of the man we have two halves, primarily because of the Copper (Cu) structure of our muscles, that creates dimension of motion. And because we chose to walk. The fields within the right side and the field within the left side. In that process, it's like a two magnets, Twinity. They create a field flow small, to keep the balance. (I do a

different color, you can't see the yellow, I can't see the yellow myself. Do it there). They create what we call magnetic gravitational spacing. In a way, if we do it in a bigger size, distance, you have this, what we call, positioning, which the two magnets create. (1:52) And in this position you have a centre point. This point is movable according to which one has the strength. But because ?? mostly it is constant once the plasma is created it is a centre point. This centre point with all the energies are the same, equal, magnetic-gravitational is a balanced field. This happens in the brain of the man too.

So, you have this, and so, this is the position of the STM. It's very easy to point out. Even the scientists in the future can pinpoint the STM. When we become knowledgeable, because this is a dynamic, both are creating dimensions in it. If we enlarge it, it's a plasma which is working in this area. So, this gives us, according to the mass, according to the density, according to the emotion, according to the structure of the physicality of the man, a position and a field-size dimension which we can assess the STM. That's knowledge, this is not something we can think whatever.

But if you look at the shape of the brain of the man has an oddity in it. And this oddity is that it's shaped this way. So the field strength according to the whole lot to be in that balanced position, this comes, sits somewhere here. In a way if you look at it because of the shape of the top. (1:54) We don't look at one cross section, we go the STM, because this is in a way three-dimensional, if you look at it what I'm talking about, it's something like this, they're three-dimensional. The STM sits more or less somewhere here, in the structure of the brain of the man. This is the position of it.

So we can see the characteristic of the STM, behavior of the man, from structure of the brain of the man. When I look at the MRI, when I look at the scan of the brain, I see the STM, I see the behavior of the person, I see how this life was set up to be, and how ends up to be, because the set point is set. You cannot change the composition and the position and the structure of your brain, unless you bring into it an emotion. When I discovered this, maybe 40-30 years ago, and it came through literally when I was young, when I was looking with my dad, on X-ray, what do you call it, pictures. It brought a lot of things but those days I couldn't answer it how it worked. When the knowledge, the gift was given to understand, then I could see and about 20 years ago, 25 years ago, it became so clear how emotion of the man makes the STM, and how the STM makes the physicality of the brain of the man, then it shows it in physicality.

If you to do this, (1:56) I had to look at maybe hundreds of pictures, X-rays, and I asked Rick to show you later on you'll understand why we could crack through and understand things like MS, things like Parkinson, different than the present knowledge and that's why we can attack it, we can handle it. If you look, if you look at a X-ray of, or MRI of a brain of a MS, it's very interesting. This brain is different and they talk a lot of things about it but they don't look at the emotion and the Soul. When you look at the brain of let's say. (I try to clear this out then it's much clearer for me to show you what it means). If you look at a brain most of the MS people you see something very interesting. The brain let's say is... If you look at the brain structure, the brain and you see the extent of the MS, you see by the shape of the brain.

This is the front lobe of a brain, let's say, the left side. And then you see the right side. The right side is like this, with this and then reduces, or is the same but is this shape. The right side or the left side has dentations and is smaller on the tip and then on the side. (1:58) If it's on the left side, shows different reason for MS, and if it's on the right side, shows a different emotion about the MS, how it was created. We see the ones with the MS on the left side, it shows 100% direct target goes to the mother. If we see on the left side, which affects the right side of the body of the man, is to do with physical life, promotion, not reaching financial position, not being given what you wanted. The left, the right side, which controls the left side, is to do with the love of the mother, emotional connection. And then, it shrinks, it tilts shrinkage to the right, or shrink shrinkage to the left. And then we see how the emotion of the Soul due to its own consistency has done this shrinkage, closer to me. And this shrinkage creates we see in a physical dimension.

This place, this if I can draw it this way, this let's say is to do with the fingers, part of the brain. Before it was here, now it shrank to here, energy has changed, the right hand does not move. Change of position, physicality is not switched to it, shows paralysis. This side is to do with the upper arm, before was here, not through shrinkage is here, it's changed the balance, you cannot then move your arm from the shoulder. (2:00) This side is to do with the leg part, because they come through the same process. You can't move your toes. Now we see the change in the central line, the shin doesn't move and the upper leg.

When you look at MRI and X-ray of MS, you can see everything in it, it's the life story of the man, because to me, as a scientist, understand these things, I see the Soul. What has created the emotion, that emotion of the Soul has created. And then I even have seen MS conditions where actually the size of the brain is this much. The person is still ?? . She used to sit on a bench bed like Chinese do because she couldn't do certain movement anymore. Because all the brain is there, but the emotion. This is what I don't want to exist. I'm not going to put a bullet in my head, but I accept because I don't have, I want to show I need the love of the mother.

And this is why we see the footballers having MS, actresses having MS, because we see the change on the right side of the brains, or on the left side of the brain. On the left side we see first sign of MS in the physical paralysis and then when these two in time come together we see uniformity in paralysis and then change of the spine and the rest of it.

The whole process of the new technology we even added this in a recent past couple of weeks into to our, what we call, Enhancement Unit, Wellness Unit in Germany, (2:02) that we go directly for promoting the Soul. Now is the judgment of the man to decide what I take, not the responsibility of our systems. We elevate that Soul. We directly, exactly what I taught today, we go directly for the dimension and elevation of the STM. We keyed it. We have bottled it in a specific way in the energy system.

So you have to understand how the energy effects our physicality, how effects our Soul and how everything is connected to it. Our physical brain shows our emotion. (Rick can you go on your favorite website Wikipedia and if you can look for the images, full

images of MS, you should be able to see most of them). You see our emotion is pattern of our physicality in the brain, this is what I say, if you feed the brain, you can feed the man. Because when you feed the man, you feed to physicality and emotion gets part of it. But when you feed the Soul, it feeds the emotion first, and then the physicality, which brings that change in. This is one of the problems with MS, especially ILS (ALS). The shape of the brain of the people with ILS is very different than MS. Because we see most of the changes on the left side of the brain than the right side of the brain. (2:04) But MS uses with the right side of the brain connected to the left side so they move the position and the Soul position cannot be changed because there are other parameters which dictate it. A slight movement one side, you see physical paralysis.

So our emotion is dimension of our Soul. The strength of our Soul is dimension of physicality. This is why we have certain characteristics in certain races, because of what I explained with the Inertia, the position and the rest of it. If you bring extreme images of MS, if you find it on the Internet and show the cross section of the brain, go for the images part, you know usually in Wikipedia you get a part images, if you get a full cross section. You see, if you look this, they show these dots, these whites become because of what it is.

<< Mr. Keshe tries to find his pen to write on the screen >>

K- ... You see, this is not such a good image of it, but you see here... The doctors looked this white, white dots. White dots comes, because of the Soul position, somewhere here, retracting, (2:06) it's mass connecting together, creates the white side. You see here, the shape of the brain, in this corner, shows the beginning of MS. This white that they put a red arrow on it, is very much like what we saw with Corona. Is the contraction, because of the emotion, creates this mass. Here, we see more physical dimension. If you can go on the images of the Wikipedia, or Internet with the MS, you see much more clearer. You see sometime this shrinkage is as much as, more or less to this point, somewhere here. You see, it shrinks.

They look at this physicality, but this shows, this image here, it shows MS on the physical, tangible life. I didn't get the job I wanted, I didn't get the promotion, I didn't get the actress job I wanted, I didn't get as much as a football as other football player. If you see the reverse on this side, you see emotion of the mother, only mother, nobody else, gives a man, the paralysis, because it's the one who love, who hold, who created. Seldom, very seldom, we see MS on the emotional side, on the right side of the brain, which has to do with emotion, then, let's say, the father or somebody else, or the love. (2:08)

You see MS in the lower point, especially in men who love women, or fall in love with, and they can't have, or something happens, we see on the right side of the brain, MS sign. And MS sign on the right, shows itself very, very different shrinkages than into the right side, which is the physical. This takes decades, this takes few months and maybe couple of years. And because it's so rapid, we see these white spots, shrinkages, mass of capsule. We saw this clearly in Corona, and you saw the white lungs and everything else.

And, this is part of understanding the knowledge of the Creation. But all this, the doctors look at, what is there. But the cause of it is this, the STM, the emotion of the Soul. When you feed this Soul with all the energies it needs, you cannot get MS. It's literally impossible to get MS. Because you control the physicality with the Soul. This is the reason I moved the legs and arms of Naomi in the hospital. I touched the Soul. I don't need to touch their physicality, the Soul does what I... The Giovanni was there, 20 people were there. I said to her, after 30 days no movement. Move your arm right, legs. She was like a puppet. Because, is that puppeteerian, the emotion of me to the Soul was the string.

And if you understand this knowledge we can change a lot of things in the World of Creation for man. (2:10) Because this is the energy of the emotion of love. And the Universe is covered with the love of the Creator. What the heck is going to play with your brain in the dimension of Universe. When you're positioned away from it because of your conduct, you become a MS of Universe? Here the entanglement comes with the love of the mother. There it comes because she's your Creator. There in the space become your energy of your Soul, MS of the Creator, the love of the Universe. If you understand this we can stop a lot of illnesses in the body of the man.

And this is the essence of the Creation. And in the teaching to come, especially with the Balls, which we connected to Universal energy, you can feed this, that this can change this, because it's on the same level of the Creation. And then, we understand the next steps and process of Creation, and then the rest of it, the transmutation, transportation. This is why we are, we can change, and we can bring dimension of physicality into the life of the man through the energies of the Universe.

And if you look in all images of the MS, much more deeper MS, more advanced, you see, the right side of the left side, is ?? one-sided, shrunk. And the deeper the age of MS, the more shrinkage, the more disabilities we see. And then one side disables, the other side pushes, we see pain on the spinal cord, because of the change in energy levels, which goes down the spinal, from the Soul, (2:12) down the spinal cord, into the legs and the arms. And it explains everything, if you understand the way we understand the process of the emotion of the STM with the physicality, you see why the pains they go, why the emotional conditions they go through.

With the Soul of people who got ILS (ALS), we see different brain structure, totally. Where, in fact, in most of the cases, we see in the difference if you look, most of the cases, in the ILS, we see changes like this. We see changes... (Why is it not taking this for me? I don't know if you can see the green, you can't see the green. I'm going to choose something else. Let's see if you see the blue better).

You see the changes in ILS like this. Especially in this area where I made blue. Because it's the part of the brain which handles the physical life of arm and legs. And you see depression, you see lots of movement on the hand and the leg and rapid disability. We see a bigger ?? indentation on above the ears, upper side of the brain and it tells us this is ILS and the extent of this ditch here sometimes tells us that you cannot do anything anymore, (2:14) because once that ditch is very complete, it's very little, you have to be observant

to it. You understand that it's no point of return, because the Soul has already locked, disabled the physicality.

If you remember in 2014-15 in Italy, we took a case of ILS and we took the guy back to work, and he lived for 2, 3 years, but the essence of not getting the promotion was so much that he disabled himself. If you remember we went with him to his office to work and the rest of it. We have to understand the position, the strength of the Soul on the physical, on the what we call, STP and physicality of the brain, then the physicality of the body just follows the boss. And it takes a fraction of a second to bring that change. One fraction of saying, "I wish I was dead. I didn't get the promotion." It triggered the deepest and the right strength. "I didn't get the love of the mother. I wish I could. My brother, my sister, my father took that love. I wanted that touch." You triggered that MS, 40 years later you pay for it.

Any other question?

<< Mr. Keshe raise his hand on Zoom by mistake and Rick lower the hand. >> (2:16)

<< Then Mosfeq raise his hand by mistake. >>

Q: ... It was an accident, sorry.

K- Oh, it's nice to hear from you after a long time Mosfeq.

R: There are no accidents.

Q: I love to hear from you all the time.

K- Thank you very much.

R: Mosfeq has some interesting things to say in the Plasma Group, yesterday about the flying carpet. Is there anything you'd like to say about the flying carpet here now, Mosfeq? Maybe a question or comment on that?

Q: I don't have any specific question. What Mr. Keshe is talking about the Soul is that, I mean, everything is kind of connected from the Soul level to anything that I can think of in the physicality level, or even in this spaceship design or any control system. So my interest is in control system and how Soul does the control system, that's what fascinates me. And now I think it has become a lot more clear, because I can do the experiment within myself. And I don't have to have any devices to do certain experiments. So it's very fast. So this is one of my current experience that can be helpful for others. And Mr. Keshe may add something where we can do this even better. (2:18) That can help me and as well as others, I'm sure.

K- If you learn how to control your emotion, you learn how to bring a lot of things about transmutation and transportation under control. And it literally brings a lot in the dimension of the, what we call, the STM. What will be interesting is how much we learn about ourselves to control that emotion, and how much we understand about ourselves to bring that change without prejudice to ourselves and nobody else.

Any other question?

I want to show you something Rick if I can share here, I want to show you something which is just took out and you see this is a very clear example of the MS, it's on Wikipedia, you can go on the Internet and find it. This is where you see here as I was explaining on the right side, we see a reaction. (2:20) Let me see if I can do it here which is easier for me... We see that this brain, most probably, 100%, had this shape. And you see at the bottom here, again a ditch. It has dropped. It has expanded and you see this shape here. Because of the mass change, shrinking, it has created these Calcium patches. But if you literally look down into this, the Soul is somewhere here. This is the frontal lobe, here somewhere, and has shrunk to the back. This put the pressure on the spine because it's tilt of the continuous pressure on the back of the head, into the upper part of the spinal cord, which creates pain and pressure, on the, what we call, the lower back. But the position of the Soul is very clear. You can actually see it here, most probably.

These doctors look for these white spots through the shrinkage. But in fact the cause is a emotion which usually comes from this part of the brain. (2:22) This is how we feel, we see people, you look at someone you have, you call it the third eye, you call it this chakra, that chakra, but this is where most of our emotion control is front, we see, we observe, we don't, your eyes are closed but you say I feel you're in pain, whatever. So the same goes from here, the emotion affected. So changes, physicality changes, we see these white spots, the present science look at what it is, in the science of creation we look at the energy change, which shows, it's the right side. This MS has a root in financial, in position in the physical life. If it was on this side, this is to do with the love of mother. But we see some very tricky thing, which I explained to you, this gives it away. This brings in the dimension of the love. I (don't) want to live, I give up. I don't want to be here anymore. This gap gives us a lot of understanding about triggering of the life you want to or you don't

We see the same kind of pattern in Alzheimer's. Why do we see certain patterns in certain areas? Since this is Alzheimer's because we have created a switch calcium not communicate, we block, no more information. And I look at the brain, I prefer to look at the scan of the brain to understand the condition than actually looking at the physicality. Because this cannot tell you a lie. (2:24) This is you, this is what you are made of, this is how you behave, this is how your structure is.

An interesting thing is, for example, if you take this picture, understand the skin of the brain, and look at the Chinese, you see why they seem two in two halves, in two dimensions, they don't see straight. You look at the brain of the people from Africa, you see why they behave this way. The position of the brain gives the structure of the Soul. Physicians of tomorrow should look at the field structure of the Soul, of the brain of the man, then you know what to do with the physicality of the man. Then you don't have these side effects of medicines, and wrong medicine or whatever, you understand the position, the field strength. In world of science, from the physicality of the manifestation, it becomes very easy, because then you can assess yourself. In depth of the Universe when you manifest yourself, whatever (I) got different than the local people on planet

Zeus, that they have to change in the structure of the brain, or by central control we call brain, to fit into the environment of the time, place and position (TPP).

And I've studied this brain structure from very young age. And it's amazing what you see, what you understand. These curvatures and all this what you see here, explains a lot, huge amount. Because, your nervous system somewhere here, is the column of the fields which comes up to your upper leg and your shoulder. Here, a cross comes in to do with your, what you call, (2:26) physicality of your upper arm. Then, it comes up by your ears, you see the disabilities of the hand and the finger. You see parallel on this side, deviation, like blockage here, you see these white spots here, these are where your upper shoulder is blocked, information. It comes through your center brain and spans over the top when it hits the skull on the side. This shows what disabilities are in the physicality of this person. Liver, kidney. You see problems with bladder, digestion system.

When, as a scientist, who understand the structure of the fields and the structure of brain of the man, you don't need to look at the physicality of the man. I know the disability without seeing the body. Here, it explains a lot. You see it's parallel with this side. This is to do with the structure of the lungs, in upper left and right and breathing system. This is the latest stage MS. And more affects the breathing system. This is why most of the MS people die of the infection of lung.

Then do we need to see the man? I see the Soul dimension, (2:28) through the strength of the Soul, I know what this thing is made of, in the depths of the Universe, that's all I need to know. What creates in reaction to his environment to his physical dimension of his STP is his job. I see the Soul, cannot lie.

Pictures like this fascinated me from age of seven, eight lying under the X-ray machines in different hospitals in Iran, with my dad telling me it goes through you, it's a magic ray. I had to find out the magic. And this is the backbone why I became a nuclear physicist, because I saw nothing, no answer in the present science, and its energies, and then understanding the external energy which is what we call nuclear radiation, and went going to look for the fields inside, what we call the plasma technology. And when you understand that, it's just a child's play.

Any other questions?

Q: ... Thank you, Mr. Keshe for another incredible insight there on the human brain and I'm someone who suffered from a lot of concussion playing Australian rules football. (2:30) And also by the time I was 28 I had basically been using a big block mobile phone in the 90s and the side of my head was heating up. And one of the best things that ever happened for me was standing near a dynamic reactor and feeling my brain almost being put back together. What experience do you have dealing with concussion and you know how easy is it to reduce that swelling that occurs so quickly when concussion occurs?

K- There are certain rules you have to play and especially like concussions, stroke. You cannot touch the body, or the brain with anything till the bleeding stops and it heals.

Because when you have a blood flowing in that dimension, and that direction, you create a dynamic which is out of control. First of all, with the stroke cases, we usually allow 4 to 6 weeks, for even internal bleeding to stop, that doesn't bring new field energy in, which is out of control. If you don't have it, you have to understand the dimension of the fields within that position.

Literally, if you look at it, we already have the solution for this concussion situation, and we promote it as a Pain Pen. You have to deplete it of its energy, (2:32) and you find out most probably when you use a Pain Pen in a position of what you call it, damage or incident. You have to use the Pen (then) put it away (after use) most probably in somewhere in the water and then use it again. Because the energy in the brain is different than the energy of the pain on the muscle tissues, arms and joints. It's of higher order. And at the same time try not to hold the Pen yourself, to deplete the energy. It's a very reverse condition than the what you call, the injury to the arm and neck, or to the tissue muscle. With the tissue muscle if you seen our Pens.

(... just one second please. Stop sharing. I'll create a new whiteboard I explain to you).

Q: oh goods .. we should have a competition each year for everyone's favorite whiteboard screen.

K- Yeah, I will have to get my whiteboard. Just wait one second.

K- ... (2:34)

This is your head, this is your body, and this is the famous blue Pen of the Keshe Foundation, which is like this. Yep. In your body tissue, in your muscle tissue, Pain Pen you use it this way because it's more or less in that dimension. On the concussion, this is a very small but energetic material inside and whatever you make it, I've seen a lot of people coming up with a lot of things with it. You transfer energy between the pain point and the body.

Oh no, let's get black,

You transfer here and there. You have to understand the brain uses different field strength, much, much more than the physicality in the position of pain. What I will do, I use the Pen this way, when it comes to concussion. You understand? Where you create a much stronger field, in the spread, where can interact to bring in. This pin point (of the Pain Pen) is not that effective. You need a broader base, so you use the pen on its side, on the back end.

There's a reason we made the shape of the Pen this shape. (2:36) If you have a long injury, if this is your arm and you have an injury on the arm, you use the Pen on its side, not on its point, because the injury is elongated, you put the Pen on the side of the pain. Do you understand? And, there is a reason for making this Pens this way. If you look at it, again is a Star Formation.

(Rick, if you bring a picture of the Pain Pen on the Keshe Foundation site, you see it).

And there is a reason we do this. With the whole structure of many things we released at the beginning, was done on the science of plasma, not on the science of material

condition. And you, in this position, you have an energy center and you have an energy center, you release your energy into the liquid. Here you have more of, it's spread, here you have a bigger spread. It's no use when you have a long pain in an arm, putting a Pain Pen on it on the tip. You have to understand how to use the systems.

You have a concussion, that's your best way to use your Pen. (Q: On the side, okay). On the back of it, back end of the Pen, just put it on the position.

And you have to understand, I've seen a lot of people make this circular Pen and blah, blah. Where are you going to lose energy, where is the balance going to be? (2:38) You understand? This was a specific reason we designed this Pen this way.

R: Do you want me to show an image of the Pain Pen?

K- Yes, if it's there.

R: I'll have to interrupt your program there.

K- You see the shape of the Pen is triangular, it's a Star Formation. It's for head injuries, or a big block injuries you use this end, especially for head injuries. For local injuries, joints or whatever, if you have a pain along the arm or body or whatever, you use this part (flat body of PP).

Knowledge Seekers made Pain Pens with coils in it like this, and come into the center. We never... that's not a way to do it. Very soon we launch Infection Pain (Pen), where you have infections in the body, you use the Pen to take out the infection totally. Internal infections, muscular infections, organ infections. We already have tested and it's very, very extremely successful. (2:40)

Q: Mr. Keshe, can you just explain a little bit more, how you talked about training the Pen and resetting it? That's something I've always been interested in with the Gans bottles. As they lose their Amino Acids, they appear to lose some of the impact of the field. Is there a way... Can you explain that resetting process?

K- There are different ways to do it. Depends how you used it, a lot of Knowledge Seekers, put a Pen somewhere and walk away with it, and that's it when I need it. Try to understand that you're dealing with fields, not just with the body of the Pen.

We had a Knowledge Seeker recently sending us an e-mail that his Gans's change color, they're sitting near the... And a kitchen table on a wood, but near the sink. Hello. First of all, you bring in your game of the draining system. Never put your Pain Pens, your Gans's, or whatever, near any metallic energy. Because they have a gravitational mass more than your Gans. So, they connect. And in a way, because you are a composite Gans, they usually take energy from your Gans. It changes color. This is what earlier on I explained, put Gans's in different places. Put one of your Gans's on a metal ?? surface and see how fast it changes.

Put your Gans's near a tap of water. And see how that changes continuously, because the flow of the water, changes it, takes energy from it. And these are the things that we presume after 10 years most of the Knowledge Seekers understood. (2:42) When we will release what we call, the Infection Pain (Pen), will change some of the world of medicines or understanding of the work.

It's... you got to realize, if you have a pen, you used it. It has absorbed energy. It's inside it. It's not just a Pen. What's inside takes energy. You have to bring it to a balance. And that balance is part of its process, crosses the condition of the pain itself. When you use a Pain Pen, its energy, that energy is connected to feel the strength of the Amino Acid, which is fat of your body, or amino acid of your body. And is a process that, you can create that Amino Acid inside the Pen, replace it, replenish it. That's why you connect. This is why we always told you, whenever you make Gans's, take the Amino Acids, hold it separate. Don't wash your Amino. You cannot wash the Amino Acid. It's the field strength. Doesn't look fatty anymore, but it carries the energy of the Amino Acid. That's the whole key.

So, you take energy as a field strength of Amino Acid. You only can connect if it's Amino Acid. When you make something for creation of connection with the body of the man, you need that link of Amino Acid. So you create a condition that your body, your Pen, regenerates the amino acids. That's why the Pen is successful, it works. And then when you say the Pen doesn't work, you have depleted the structure of the connection of the line of the Amino Acid, you have to reestablish it. (2:44) There are different ways to do it. They are structurally the best, one of the best way to do it, when you get a Pain Pen, which you think is depleted in energy, to put it in a CO₂ ?? Gans production. The way you make in the Gans of CO₂, put your Pen where you're producing the Gans. The way you saw that Amino Acid on the top layer of the bottom, you know your Gans unit, that the same is created inside the pen. You replenish it, you understand?

This is, then your Pen, every year, every two years, just, you are making Gans's, just put it in the Gans, in the... especially in the... if you do, if you do Copper Gans, it's one of the best, because it connects to the muscle tissue. But the CO₂ Gans is the best one, just stand it upright, inside it, and let the Gans, the Amino Acid, reproduces itself. And you find, it becomes effective, you replenish your system, and it always works.

Q: Thank you, that's a beautiful one.

K- Yes, I've taught this before. This, this is one of the ways to replenish your Amino Acids in your Pens. You have to do the same with all your Gans's which you continuously produce Amino Acid with it. (2:46) If you look at some of the Keshe Foundation production lines in the factories we had and in the agricultural units we use, we have a very specific... we've designed a specific system for this because we understand it.

(Can you take your sharing your picture off please if you can? Rick? Thank you).

Okay if you seen we don't usually show these things but if you've been to our factories production lines. When we have our Gans production units, we have a special system on the top. Very, very small, shallow, which only produces Amino Acid. These units, you've seen some of the units we sell. These are small boxes, and this is continuous floating. It's impossible to connect. We just make Gans's, Gans's must be used. We've developed a structure, where on the top we add a system, where we just connect and the Amino Acid continuously gets added, after the wash into the system. Because when the Gans's go, 95% to 99% of the Amino Acid, which is on the top in the wash disappears. You've got to understand the Totality of the knowledge, and follow, step by step. This is why, when we produce Gans's, we deliver Gans's, and especially when I control the process, is always much better results than when Knowledge Seekers do the same thing, (2:48) because they're little ?? features that you have to understand.

Any other questions?

Q: ... When you started talking about the concussion side, you talked about the need for a broader field and yeah, Gianni, the amazing Romanian plasma scientist, had the plasma sun concept which is two rings and a table tennis ball full of the four basic Gans's in it. But those two rings have an inner ring in each one and for some reason I picked one up and put it around my neck. And for the mobile phone radiation, I find it's a really useful way to create a broad circular field around my head. It's basically hanging around my neck, but I can feel the fields around my jaw and around the back of my neck and if I do that once or twice a week it helps me feel like I'm keeping all the EMF's at bay. So I wonder if that sort of process has been tried and tested before?

K- You see the, what you just said, you have to understand that he come, he translated the knowledge to his to a step which he understood... (2:50) He's made a tube inside the tube, correct? And this is your necklace, yeah? Correct? Look at your MaGrav coils. Your MaGrav coils is one coil inside the other. You understand? You understand what I'm talking about? It's a translation of the knowledge. Now you have a continuous field interaction because this is different than this, and now you put your neck in it. Now you add another one, so of course it will effect you.

This originally was done in a different way, years ago, by other Knowledge Seekers as well. It's translation of the knowledge, but it's the principle is the same. If you understand the process of the MaGrav technology, you can do massive things with it. The MaGrav technology, the way we gave it to you, how you play with it, gives everything man needs in Space. I explain to you now you're here you understand something else, maybe.

You have a right brain and a left brain, creating their own, and you have the Soul. And then you have the heart or field where the fields of the body of the man comes to it. And then you understand, this at the same time then has a interaction of its own. (2:52) You understand? You cannot change, no way, the position of the heart of the man with the position of the STM. And in that process if you understand this, this interaction of the fields, this dimension of the physicality, how they interact, how the fields are changed, gives the dimension of the physicality of the man. In how you position the Soul, how you

position the field. This position of the fields of all the energies plus what comes in from the environment which comes through the breathing of the man, and in connection of the fixed position of the Soul, shows the creation, the position, the behavior of the man. The position of your Soul and the position of your heart gives the behavior your physical shape. This is why we see people similar to each other. The interaction is so precise that creates the feature of the man the same. And that creates certain physicality's. Then it's a certain Inertia which comes into it, the Inertia of the fields of the Soul and the STP, which creates the dimension of the physicality of the man. (2:54)

So in the future if you see a creature with the dimension of two lights, two fields you feel, one is the Soul of the... You know this thing has a physical dimension, but I cannot see, because my field strength... but it's a matter-existing thing. And how, if you feel the field inside the other one. This is in the time of transmutations, it's in traveling. There are a lot of things which needs to be understood, position of the fields, position of the emotion and then you see physicality of the dimension.

You cannot find two people looking exactly the same one in China and one in let's say Europe. Physical feature conformity of the emotion, Inertia of the time and place and position does not match into the European side. You might see some familiar features, but not ?? complete. But you go to, let's say an Arab country, you see many people looking the same, because Inertia of the position dictates that kind of feature and then you bring in the position, the distance of the Soul and the STP and few other bits together, you get the similar feature. Then, physicality manifests itself. And if you understand this, you understand why some of the twins are exactly the same. There's no difference.

Any other question? (2:56)

Q: Thank you Mr. Keshe, thanks for the tingle times.

K- Enjoy your what you call it, Australian football.

Q: Can't live without it.

K- It's a bit rough, it's but it's better than rugby sometimes.

Q: ... I just think, just the way you talked today, something light up in my head. I don't know which part of it. Thank you very much. I have a question which is in my mind for some time, not related exactly to this teaching. If you don't mind, I can ask.

K- Don't worry.

Q: The thing is in the holy book says we created man from the mud, special earth mud, and we created Jinn from the fire which has no smoke. Can you explain what it means by created from fire? I know it's symbolic language, but I like to know what it can correspond.

K- Repeat yourself exactly what it means.

Q: In Holy Book it says, (2:58) we created man from the mud, special kind of soil, and we created Jinn from the fire, which has no smoke. I'd like to know what it is, the fire?

K- Translate the Jinn, what is the Jinn?

Q: Jinn I saw in translation, it says, that there are the beings, which have intelligence but we cannot see them.

K- The mud is a dimension of physicality. Which is, mud is sign of Earth or physical dimension. In the historical literature we see this quite a lot. Mud doesn't say we made you out of a stone or whatever. Because mud has a dynamism, it's like the physicality of the man. What the Jinn or the fire means, is the fields of the Universe, the Creator. In which interaction of the love of the Creator with the mud, the earth, leads to creation of life. The mud is that NO, and the CH is that fire, that's what you call Jinn, energies of the Creation.

We would not have had life on this planet, even in the Universe, if we do not receive the love of the Creator or connection to the central line of the Creation, (3:00) which dictates the size, the shape of what we call the amino acid of the man. So the fire is actually life. Life has fire. It moves, it absorbs energy, and it creates dimension of confirmation. So, in a way, the interaction of the fields of the Creator, what you call Jinn, with the mud of the Earth creates a fire, which is a STM, the life. And we understand without the energy of the Hydrogen and especially connection to it, the string of it, to the dimension of physicality of this planet, there is no life. And this is the interpretation of the life in the Holy Books.

Q: Yes and then sometimes they say the Shaitan, Satan is a Jinn, from Jinn category.

K- I interpret or how I interpret Shaitan, or the devil we call it, is what you give to, what it gives to you, that moves you away from the love of the Creator, further out, if you explain it that way. In a way it adds to your mass (Weight), it adds to your, what you call it, to your position. In the fields of the plasma you look, in the fields of the Creation you look at the dimension of the fields. (3:02) And it's hidden in a lot of ways in different names.

In the world of science, in the physics, we create centrifuge. And the plasma is a centrifuge. It's dynamic and it's spherical. In a centrifuge, the heavier goes to the outside. In the plasma dimension, fields of vacuum, the heavier goes in the center. And the more you go to the center, the field energy changes the position from the position of the Creator. It's a separation, but in energy level, not in the matter state level. And then, if you interpret it, you will come (go) further from the Creator. That's the punishment, that's the judgment. And so they have created different names for actually the same thing. A position in respect to the Creator, to the love of the Creator, to whatever you call it, God, Ahura Mazda, whatever name you chose for it in the language.

Any other question? (3:04)

Q: ... (3:04) I'll be as quick as I can Mr. Keshe. I know we're well over, we're coming up to the three-hour mark. I do have a few questions so we'll try and get through as quickly as possible. My first question being, ?? Iran has chosen to open its technology to the rest of the world by implementing peace on the battlefield as seen with the Starship Formation in the sky, preventing themselves from hitting their targets, reducing the escalation of murder within a dimension of Blue Planet Earth. Well done Iran. When and what government is going to collaborate with the Keshe foundation, implementing the dimension of feeding the totality of nutrients, physicality on Blue planet earth and providing free electricity, leading governments and humanity, by example, think, speak, and do good, into the inevitable future. What government is going to do that? Thank you.

K- The government of Republic of Iran will show this technology very soon. We, Iran will be the flagship of the Iranian, what we call the Keshe Foundation technology within the structure of the Iranian government and Iranian nation. And as we will see the, (3:06) as I said to the Iranian leadership, the plasma technology will manifest itself from Iran as an independent and new technology for human race in the coming weeks.

For the first time we will see a structure set up within the structure of the Iranian government, as a structure as high as a ministry, possible in the coming time as a Plasma Technology Ministry, and what we call, companies and structures. And we will disseminate the technology through Iran, even with the contacts we have with the Chinese and other nations through Keshe Foundation. We'll use the new structure of the plasma technology as a new science in collaboration, and bringing negotiations between the American government and Iran, and we might even to extend us on through the new structure which come to administration of the United State in past couple of days, to bring the evolution in the world of science as a governmental structure, not as a Keshe Foundation structure, but Keshe Foundation within the structure.

We are in that stage, in the coming time very soon, you will see the structure as a technology, (3:08) and as a part of the structure of the government of Iran. And then the field development will go with what we call, structures will be set up in and within Iranian government. And then we handle the same way through negotiations, and this is one of the reasons if you go back to last couple of weeks, to walk away from war using technology in exchange for peace. And step by step we will see as I call, the skirmishes, because and the way we see the holding back of the next stage for peace, we're negotiating very hard to bring a new weapon into the arsenal of negotiation, and the new weapon is technology. It's understood by the Iranian leadership and thanks to people who work with us so closely, they have understood and their influence which will bring and will negotiate on the platform of technology and exchange peace. And as I hear the group is already setup and we were waiting for the outcome of negotiations, or what you call, elections in the United States. And this will bring a lot of changes. We will see how the Iranian leadership will take position on it. (3:10)

But the new era of science and technology backed by the Iranian government of the Keshe Foundation work, will manifest itself in the coming weeks. And we are ?? planning for peace, that's why I said, we will not negotiate on nuclear, we'll negotiate on

technology in exchange for peace. And in a way, we could not negotiate with Biden, Biden is bent backwards in destruction, and not peace. And we've seen 22 billion in the past year weapon has been given to a nation they push for peace. You don't give somebody a weapon to kill, and then tell them to peace. And maybe hopefully with the exchange of technology at a governmental level we will negotiate with the new administration. As we're hear, ?? they are bent back to bring peace, and we'll see what comes up.

But it has to be done on the basis of showing and talking and we make everything possible. We have put the hands out to the new American administration for peace talks on the technology and not nuclear, because nuclear to us is obsolete. But you have to understand Iran is a very large structure, Iran has different arms of work. And we have to navigate and negotiate and in a way to teach our people to walk away from a lot of things. But we have people who spend their life, especially in Iran, certain sections to develop rockets and other things, and they don't want or they see the solution only by bombing. (3:12) And up to now, thanks to the wisdom of Ayatollah Khomeini, in past few weeks we managed to curb it or at least keep it under control to see what next step is. But Iran has a different layer of structure of the administration and control. And if we reach the peace talks in Palestine in the next few days, maybe next couple of weeks, some people think then we can negotiate in a different way, different level.

And as Trump said, "There should be no war." And if he sticks to it, we exchange technology in exchange for peace. As I said, the American administration, new administration, knows how we work, what will be there. And one of the biggest casualties of American technology or spearing technology, it'll be Tesla. Because in next few months, most of the things achieved by Tesla becomes obsolete. And then we have to find a way for Musk to find a way to collaborate inside the new technology. He knows our technology very well. He's copied a few of our items and marketed it in different ways. But now we try to see how things take shape and you'll hear soon, in the next few weeks and months, how we take a structure. If we keep the wisdom of peace within the structure of the Iran government, and setting of the structure. We have to set our structures inside properly, that when we deal with the governments, we deal as a national level inside the technology.

And we keep a very close eye to development of the weapons by the others, transportation of weapons by the others, (3:14) and everything else because it's part of our work as a peace, to see where that thing comes from. We have access to, we receive very detailed information about the movement of arms illegally by the American organizations, which we cannot even put in public. It can create a massive problem, and we have to negotiate internally with the Americans. This is a breach of international law, and can create havoc on a lot of things. And it's part of the work we have to do to negotiate for peace. And we have to see.

You've got to understand the present situation in Middle East doesn't come out of the people interaction. It comes out of the one man trying to keep himself out of jail for his corruption, financial corruptions, and he creates any mayhem. I call it a ADHD. Keeping

other people busy with hyperactivity, that they don't see, what I want to be the king. And we see it in Netanyahu, and it has to be dealt with because of one way or another by himself. In the... he's canceled, he deliberately messed up a lot of negotiation, with, we ?? would have reached peace talks months ago. But he keeps on jumping from one to another, to keep war going, to keep himself out of prisons. Both in... Dan Hague and it's in his country, two and a half thousand criminal cases against him. And he will... he's the biggest problem at the moment. He even changed his cabinet, war cabinet minister because the peace talks were very advanced in Egypt and the rest of it which is going on to keep the war going to keep himself out of prison. (3:16) But now the momentum will change. We have to see if Biden doesn't go again from the one or two billion contracts to get five or ten percent commission before he leaves office. We should see some ?? movement in that direction and then come the technology (in exchange) for peace.

It's a hard work, it's a relentless, it's not just sitting with people, it's setting up a plan that you can implement, and it's taken months and months to do that, to implement. And what we call the peace team of Iran, and the new negotiations to be setup will bring negotiation, technology in exchange for peace. And hopefully his Eminency Ayatollah Khamenei of Iran gives the green light for the committee to start this work and then we'll see the effect of this work. And this is one of the reasons Iran has not taken the step to.. But we still put pressure on the borders of Israel to keep it, forcing to bring that condition of peace. I hope this answers you, but just you have to wait till we get to that point.

Any other question?

Q: ... (3:18) Mr. Keshe, how small is the smallest Black Hole in this Universe? And can a Black Hole be created on a miniature scale?

K- Every atom has his own Black Hole. ?? Otherwise it cannot exist. ... It's... You have to understand the explanation of the Black Hole. Black Hole is where, due to mass of gravity, we absorb energy. If an atom cannot absorb energy that he can give to confirm its existence, it cannot exist. The only way you can disintegrate plasma, is to add, or to take fields from its Black Hole. In the body of the man, we call these Black Holes, Chakras. Where the central point of the energy sits, in respect to its environment, the organ around it. But in essence, every, every plasma, every atom has its own Black Hole, and without it, it disintegrates. And this is one of the only ways, only ways, that a man can change the cycle of his life.

Q: How does the Black Hole manifest in relation... excuse me. How does the Black Hole manifest in relation to the Soul of for instance an atom?

K- It is the outcome of the balanced fields of the Magnetical and Gravitational between two plasmas. (3:20)

Q: The Black Hole is the outcome?

K- Yeah, you create it of course. Certain fields which cover the spectrum of the fields, of the Universe, they become. Because Black Hole cannot be only one field strength, but it has to be able to survive in the full spectrum. But manifests itself as given a field strength. This is how your brain is created, on the creation of the plasma of the Soul, the Black Hole of the STM. Then the interaction with the environment of the fields of the mother, understanding the dimension of their physicality in the plasma of the Copper, we create, start creating the structure of the brain. And then that leads to the structure of the physicality. We don't get our arms and legs in the womb of the mother first before the brain and the heart is done. The combination of the womb, plus the third one which is the Soul of the mother, creates condition of the growth in the fields of the womb of the mother of the physicality, with energy fields from the, what we call, the STP of the man which is the heart of the mother. That's why we feel our mother, that's why we have such connection, because we are created out of the fields of the STP of the mother.

You have to understand when you are fetus in the womb of the mother, you more or less create a field position between your Soul, the Soul of your physicality, which is your heart, the heartbeat, with the STP of Mother and the Soul of the Mother. (3:22) This is how we are fed in the womb of the mother. So, that is the structure and that structure demands absorption, or attraction of the fields. So the STM has to have a full spectrum of it, because each fields strength, one leads to creation of cell of the heart, one leads to the cell of the bone, one liver and the rest of it. So the Soul of the child is a full spectrum and he has a matching of it with the Soul of the mother and STP of the mother. That's why the Black Hole has to have a full spectrum. And then has given the strength according to the Inertia of the plasmatic Inertia, lead to creation of the organs.

Q: ... Just finally very quickly, you mentioned in a past teaching that humans will be able to see each other's aura, providing at a minimum a visual clarification of the current emotion of the human in question. Will this beautiful phenomenon of reality, of everyday peaceful knowledge seeking life on Blue Planet Earth, be less than a century away from manifestation? Thank you.

K- We see auras according to the field strength of our dimension of the wish. Some people have that condition, and some people don't. Some people can create it, but we all reached that point of being able to see interaction of the fields, like the atmosphere of the Earth. That's how we will survive in the Space. Conformation of existence and what comes out of it in physical body, we call it, aura. (3:24)

Rick, is that for today? Shall we call it a day?

R: ... I think you've gone double, triple over time here Mr. Keshe, thank you very much.

K- Thank you indeed. We call it a day. We see some of you tomorrow in the session, and then hopefully we see some of you next week or the week after, for the November session of the Keshe Foundation. Thank you very much Rick, and hopefully we'll see new dimensions, new understanding, the new teachings. See you next time.

R: Very good, thank you Mr. Keshe. And those that still have questions left over, you can bring them into the next workshop perhaps. And thank you very much for all the great questions today. And the wonderful teaching Mr. Keshe. This has been the 563rd Knowledge Seekers Workshop, here on Thursday November 7th, 2024.

There is actually one thing, let me show you one thing before we go Mr. Keshe, if you're still there, with the image that I have here of our flying carpet, you probably haven't noticed, because it's quite subtle, but underneath the carpet, on the bottom part of the carpet, are a number of images, actually. And, if you are... get a good look at that, you can see, ah, like Mehrnaz was talking about, fire at one point. (3:26) One of these images, there's a dragon here, with an eyeball looking up toward the reactor or whatever it is here, with the light that burns without smoke, and this little dragon here in the bottom that we see, is blowing out this image of a plasma, it looks like, or fire of some sort, but it's an entity, It's got teeth and an eye and so on, but it's like a fire entity. And strangely enough, this carpet also... That fire entity is basically right underneath the part of the carpet that has this phoenix. There's a bird, it's a phoenix inside here, inside that cage-like thing that our fellow has very gingerly hanging onto with the... he's grounded or something with these chains and has something else attached to it as a control system or something there. But underneath there's also these images similar to the NASCAR lines in the... that we see in South America and other places and what looks to be some sort of strange saucer-like device here as well. So, there's a lot in this image, and I think it's somewhat relevant to our teaching and about what's going on in the planetary level now. Perhaps Mr. Trump, whose uncle was the one of Nikola Tesla's chest of information about his flying device, (3:28) his electric flying device that he had, and meanwhile we have Elon Musk, that his favorite thing is to try to fly to Mars, that's where he, that's what all of his companies are geared up for his journey to Mars. So, we have some pretty compelling conditions, I think, for change. So, we're definitely living in interesting times.

K- Talking about that, we have part of our work, consideration, part of negotiation with the American government and the new administration. We know how close he is with Trump, to establish a joint structure, that will move into the dimension of the work of the Markray, as an American establishment. And, we have to see how this takes shape in the coming time. Where collaboration between Iran and United States in two centers will bring that condition forward. And, even though a lot of the work of the Musk will become obsolete. Especially his car, the battery car, and the Americans are looking to stop the production or import of the cars from like China with high tariff. But the end of it, America does not have the materials to produce the batteries. And then the biggest problem is to dispose of these batteries. It's one of the biggest problems for both sides. (3:30) Then it cost 9 billion to build one proper battery production. And China controls about 60% of the world battery production. And this will starve the West, and they have to rely on China on transportation.

But with the introduction of the new plasma systems, and technology, and what we call plasma MaGrav positioning in cars, we bypass this. Maybe Tesla cars again become advanced with the new technology, without the batteries. In this is part of our research which is ongoing, and as part of the negotiation with American, and Trump and what we

call, hmm, the, what we call, the Mars plan of Musk can be achieved much faster, collaboration between Iran and American and the institution with him, with his dreams. Where we put, we produce the technology, we deliver technology, and then they can then make the hardware which they have.

And this is not something new. In 2010-11 when there was a crisis for General Motor, we went to take over and Merkel, the Prime... what you call, Chancellor of Germany, gave us an opportunity, but the Belgium's blocked it, to build the first car on these bases in 2011, where the Antwerp factory of the General Motor was shutting down. And with the possibility of still using the carcasses of the Tesla cars, placing new systems we get rid of the batteries. And this is going to be one of the biggest problem, we are jumping into a very deep end, where, as we've seen in present time, with the electric cars, there's huge amount of scrap metals are getting produced. Because petrol cars are becoming obsolete more or less gradually, (3:32) and 40% of the cars sold in China today, are electric cars, where it was 6 to 7% about 4 years, 5 years ago. And these cars which come in, it makes the engine cars, electric, ?? motor ?? cars, obsolete. And we are seeing huge graveyards of these cars, at the moment, appearing in a few countries.

But the problem is, the problem we'll have, is, in next few years, the electric car batteries. How we get dispose of it, we don't have the technology. And it become huge problem of contamination for us in the very near future. So, the solution, instead of putting five, nine billion, building one factory, just to produce batteries, is to, what you call, we've seen, one of the Chinese companies coming up with a new motor, that you can do 2,000 kilometers on a tank, or on a charge. But to make it permanent without waste in the... possibly, what we wanted to do in Antwerp, the collaboration with the Chinese and the Americans, we bring the technology. Very rapidly, it's implication of it is very, very rapid, because technology is more or less complete.

It's just coming to agreement for peace, international peace, that allows the technology to replace. And this is one of the biggest problems at the moment, because the oil companies want to stick to keeping their status quo. But the peace is more important than a few barrels, because we don't use oil in Space. So, you will see a lot of changes on this direction in the coming weeks and months. (3:34) And it'll bring changes in this direction, especially in the car industry.

R: Looking forward to it. Thank you, Mr. Keshe.

K- Thank you very much.

563 KSW November 7, 2024
