

566th Knowledge Seekers Workshop November 28, 2024

(Transcription, Editing and Proofing done by KF Brazil)

(Auto transcription by Elias)

Summary how U and everything is created & works; M fields in motion - Fundamental Plasma or God; Single Ray or Combination M Fields interact with itself - expands to create boundary - becomes U - galaxy - Man - all life; All started from one field; M field residues cross over itself - create plasmas; Same structure for everything; Galaxy mirrored in body of Man; U fed - umbilical cord of Unicose; H is M field where crosses itself become C14 - gathers volume becomes entity is C60; C14 confined in womb becomes C12 - fields within fields created human - in environment creates elements Zn Cu etc; When Man understands becomes fundamental Decision Maker of manifestation; Detect every field in U - give visualization - don't kill; Dream grandma died 20 years ago - see ourselves; Soul aware of division of itself in brain; Total Knowledge within; In dream stuffed with food - can't convert energy to physical D; Friday tasted food from system - dictate what foods to give; Feed everyone through Satellite Soul - how Creator works; Love of Creator; Expand STM over STP - transmute; MaGrav source of energy; Correct MaGrav floats; To Creator; Reveal too much information; Use different Gans's together - like body does; MaGrav is plug & play; No coils in Pain Pen; New Gans for stroke & kidney; Test Gans on self - unblock 5 minutes; Knowledge from Interaction of fields - Creator uses; How to use Gans nuclear disaster; Peace agreement fake - rearm and get 3 nuclear bombs from US to bomb Iran - Biden paid - Vatican finance; CR Bundles use for radiation exposure; MaGrav in car - heart better; More about Israeli Iron Dome - lies about war casualties; Lockheed Martin - war profits - make more war - rest is lies; Pope orders guns; KS give information - want peace; hundred million KS

ENGLISH TRANSCRIPTION

(:13)

K- Thank you very much. Good morning, good day to you. As usual, whenever and whenever you listen to this series of Knowledge Seekers, from Keshe Foundation Spaceship Institute. I do apologize today, I have a bit of a... blocked some parts, that the voice might be a bit restricted. (:14) We welcome you back to the Keshe Foundation, as I said, teaching of the Spaceship Institute.

Today's teaching is on the back of the teachings of past few weeks. And now we have become aware of the work of the Universe (U), the way the Universe has structured. And the way this Universe moves, every particle, every being, even the skin of the man we choose, it is a dynamic. And cells within it, are continuously in motion. Let ?? alone the objects in the Space we look at. Where does the essence of the motion comes in the dimension of the Universe? As we spoke before, the origin of the whole structure, is a magnetic (M) field, we know we call it a fundamental particle, as Fundamental Plasma. And the other name for this Fundamental Plasma, which has led to the creation of this Universe, we call it the God. And on other hand, there is no difference. We are within a

sphere, the magnetic fields are embedded in it, and they interact, they expand. and it has a dimension (D) collection, dimension restriction. To what extent this Universe of ours will extend, (:16) it depends on what pressures in the other Universes, which allows it to grow into, in Space time of the Unicose, allow it to.

But, what happened? How come we start with a single or combination of the magnetic fields? And this leads to creation of such a structure as a Universe with all these planet, with all these, with all life. In fact, this process is very simple. The life on this planet and the life in the Universe as a whole is very much restricted by the process of the creation of the fields, interaction of the fields, and in a way the whole process. Where did it start? How come from one fields, one ray, we have such a combination of the structures, man, planetary system, complicated structures of Universe. If one looks at the whole structure, if one understands the process of the creation, one will come to see it's so simple. It actually is one of the simplest thing. As long as you have a field, in this field is motion, it doesn't matter how it evolves, what space it has, somewhere it crosses these lines, (:18) and you just need to give it one dimension and direction. As you see on the drawing. But, to you this is a line.

Follow this in a different way, if you look at it this way, for example, on this line. You see that the line is going away from the center where it started, but in this way he's coming back to it. But what is interesting is this point (where lines crosses over itself). What is interesting is this point, this point, and many like this, and this gives us understanding of the World of Creation. Because when the field interacts with another field, residue, creates a plasma, even though it's of the same. And this plasma, depending on its position, will have the same position, interacting within itself, in the same manner as a bigger structure. So, one can see how like galaxies and different life started.

And as this continuous field in the center exists and feeds, this leads to creation of what we call, life. Life in a way of residual leftovers. If we look at this and change the center of the Universe, the Creator of the whole lot, (:20) to a Sun, if you look it's the same structure again. If you just change the color we see repetition of the same, which means if I change the center of Universe to a Sun, again these fields of the Sun within the environment it has in the Galaxy, creates the same kind of motion. An interaction of these fields somewhere at the end of the line leads to plasmas. I think ?? the scientists never understood, and the world of science never understood, was a simple fact. And this simple fact is that when two magnetic fields interact, they don't need physically to touch each other, they come near each other, because they ?? have a dimension. In this process, does not matter which way they are moving and which way they came, they create residue fields, which this residual fields of them crossing each other, creates a plasma. And in a way if you look at it, a plasma at the point of intersection is that patch, which is a collection and collector collection of whatever is made by interaction of the two fields.

Once we understand this, then understanding of how Universes, how everything else, how galaxies, how cell in body of the man how your kidney is positioned, is created. (:22) There is no energy in a way in the womb of the mother, except in a way of what feels that body that womb creates that, that womb become the limitation of the interaction

of the fields which later on becomes the fetus and then in field interaction with outside, which the womb of the mother has dictated, leads to creation/manifestation of the man with two legs, two arms and the rest of it.

Once the world of science understand this in much deeper way, we see in a way galaxies have the same structure. We are in such a hurry in the world of the science of man, like a 'bull in a china shop,' that we don't stand still to look, to understand. And that is very simple. If you look at the body of the man, with his arms and with his body, with the position of his kidneys, with the eyes and with whatever else. Once the world of science understands what this means in the structure of life you will see the same thing in the structure of the galaxies. Which means we see, we come to see the what we call, a position of holding fields within a galaxy, or position of the observing what other things is happening by field interaction, a position of storing materials as like a liver. And how to digest the energies which come from the Universe and it goes through it. (:24) And then you compare this, you parallel this with the other galaxies, and you say, okay, this set of galaxies in this part of the Universe behave like what we call, the 'kidney' of the Universe. Then we see the bigger structure. Then we understand the function of totality.

In a way, an energy in a package arrived in certain position in Unicose, which in that energy, which is a magnetic field in motion, led to dimensional motion of this field, which then, in a way, by absorbing energy from the Unicose, created the life of what we call, our Universe. Isn't this the same as what we do in a womb of the mother? We introduce a seed, and the mother puts a bit into it, and the whole cycle of life starts. Here we're in the womb of the mother, here we are in the womb of Unicose. There is no difference. Interaction of the fields in the way they are targeted leads to creation of the liver, kidney and the rest and it's the same with the Universe.

The reason I brought this subject up is that you this topic opens another dimension to understand. If this Universe ?? seeded that from the beginning in the center has all dimension and direction, and is growing. As the scientists tell us it's expanding. (:26) It has to have a place to be fed into fields like the umbilical cord of the mother, or the energy within the placenta, or the energy within the liquid of the field of the womb of the mother, and has the dimension to go, continuously receives energy, and gives energy. And if you understand this and find out in the future science of man, which way their fields come in and they go, we can jump into Unicose. And the same way, come back into our Universe. This is what we do every day and through the dimension of the Soul of the Man (STM), the energy within the center of the man, does the same trip. No difference, what so ever. There is nothing special about man, which man would like to make it.

Then this leads to another step, this leads to another dimension of the understanding. This leads to the totality of the life of the man. And how these fields come. Then if we literally look back at what we call, original picture, then we understand how galaxies are created in a given position. And how stars created in certain position within the galaxy. And how within these star's planetary system started and understanding the planetary system our life on Earth created. The totality of the knowledge is understanding the interaction,

interception of plasmatic fields. (:28) Which way they come, which way they go, how do they arrive, and how do they go?

And if we expand this, we come to a very simple understanding. Life starts with a single ray. Then in confinement of the environment of itself, it makes motions, it makes directional motion. And in the interaction of the motion, maybe comes to proximity, and the others, and in that process, in the world of the man today, this is what we call, Hydrogen. In interacting, having common denominator and understanding the process, this with the limitation of the field strength, gives us at this point what we call Carbon 14 (C14). And in the dimension of the motion of so many of these interactions and fields it gives the cell a volume which we call Carbon 60 (C60). So we understand how to start with a fundamental element, energy, and through its interaction to create whole cycle of life.

This is a gift of knowledge, this is the gift of understanding the process of Creation. It's not that there is seven, or six, or two, or one, electron and proton. Man looks at it as a matter state, in the dimension of the field of creation, (:30) we look at as energy level. This energy, it creates condition of Hydrogen (H). This energy creates condition of C14. If you confine it within another dimension of fields, you call it a Carbon 12 (C12) in the womb of the mother, which leads to creation of life, fields within the fields. And if you give it a full dimensional connection, the C60, which is the volume of this Universe, size on the body of the man is called the skin of the man, there is no difference. This is where C60 confirms, confines, the size of the planetary system, or the Universe, or the body of the man, or everything else.

So if we understand that the first field, fundamental energy, in interaction and dimension with its own creates a line of communication and connection that the fields separate, leads to what we call the communication, separation line, what we call C14. And in a dimension of the motion that stays within a certain structure, then we see what we call, the C60, or the volume. And you understand everything goes back from interaction and what we call, dimensional friction of the same ray.

Now we understand the process of Creation. (:32) Now we understand the process of understanding of Creation, and then you have to bring into play is that Fundamental Plasma as a single plasma, and in interaction with itself leading to creation of the communication, or separation but interaction of C14, and then understanding the totality in the process of the creation of everything else, which man needs to have to be able to create the life of the man, and life of another things in the Universe. But fundamentally this process is the cornerstone of the understanding of the Creation. And how you bring this C14, and how you bring the C12 on a human side, to any name you want to give it, but looking at as a plasma and the interaction back with itself, leads to creation of the Copper (Cu), Zinc (Zn) and every other element. But we have been led by scientists of the man to understand only the matter side, but we never looked at his energy side. This is why it's been said, once man understand this man will be able to do everything which he could ever imagine impossible. (:34) Because you know the source, you become the

creator, you become the decider, you become the what I call fundamental decision maker in the how this energy manifests itself, interacts by itself and the rest.

In the past times, I try to explain this, if you go back to the teachings of past few weeks. Tried very clearly to explain this in a very fundamental way, that you understand this process, and once you understand the interaction of the fields by itself, leads to line of connection, separation, and communication, which in that process, with the interaction of itself, leads to dimension of the physicality (P). Or energy which leads to dimension of manifestation and ?? detection. Where does this come handy? Why we talk about it this way? You travel in Space you come across an energy, that has no dimension, has no visualization, to you is nothing, but you're aware of it. How can you make this detectable, maybe visible, but being aware of another life. Where does this connection comes, at what strength, and what line of communication comes to it, to give it physicality?

In a way, this is important for you, for transmutation too. (:36) How do you change the field strength, that like what I call, 'night vision glasses,' you be able to see the physicality, it's not just something in the dark. Man has to be able to understand this process of connection between the essence, the source, and the line of communication, or connection between the two, then you can develop technologies, even sensors which does not mean technology, within the structure of the STM, within the structure of physicality of the man, that whatever you see, you can give it a dimension of visualization, detection. Become like a blind man who touches the thing and says this is the fruit this is watermelon. And because he knows the taste of it what it could be, when he opens it even though he's blind he knows what to taste. Man knowledge has to get to that point, that when he comes to a field in the Universe at any point does not need to eat it, does not need to kill it, does not need to do anything except respect and honor its existence, by detecting it. And not just go through it like a bullet, because I didn't know it's not there. It's like you're driving down the road, a child comes across you, and you just hit it and you go, sorry I didn't see the child. This is not doable in the Universe.

So, we have to build senses, we have to understand systems that can recognize the totality of every energy within the Universe. You are not unfamiliar with this. You are very well familiar with this. You do it every single day in your life. (:38) The grandma died 20, 30, 40 years ago and last night you had a dream about the grandma. She has no physicality, but you know this energy is the energy of the grandma. When it comes back to your brain, this energy is transferred to figure the color of the eye and the clothing of the grandma. So what we teach is not something drastically what you don't know. What it is, you never understood the process.

In the space we do not carry the brain, we do not carry the connection with the brain, that one can decipher what this object is, but we have the fields energies within the STM who can do that conversion. In a way if you understand it in a very silly way as I could put it, is you've never thought about it, but if you understood what I just said above, you go and see the grandma. But the strangest thing is you see yourself too. You have dinner with the grandma and you enjoy the apple she gives you, the cuddle she gives you. But, excuse me, your physicality is still here. So, man in the dimension of his own brain, is aware of

his own energy. (:40) This is what is interesting, this is what you as Knowledge Seekers (KS) and humanity have not ever understood, because you were aware of the Soul as an energy, as a plasma fields which exists within the structure of our lives. Even our own Soul recognizes the division of itself that you become sitting with the grandma at a table somewhere. Grandma is in the dimension of fields she died years ago. How come you recognize yourself? This goes back again, you become the H and the dimension of the fields become the C60 and this is the C14. Just stand still and for a second think, how do I recognize self, recognize myself, sitting with the grandma? Even my physical being is aware of my energy, which we call the STM, and his transmutation.

For you Knowledge Seekers, the only thing which is left, is to understand how, if you could manifest yourself, at this point in physical condition, but you're in the middle of Space, I appear, I just see energy, this energy doesn't exist, I can't see it, but in fact it's the grandma's energy. We know, we have all the sciences of it, we have all the technologies of it within the structure of our brain, within the structure our skull, within the structure of our physicality. (:42) It's just for us is needed to understand the totality. How come you go somewhere and you see yourself doing something, you physically do it, you move, you drive, you eat, but you're still in bed asleep, or you've given the driving seat to the energy side, leaving the physicality behind. The 'Children of Mitra' have this benefit, that they can make the energy of physicality as part of the energy of the Soul, instantaneously. Because to them physicality came to them second, as they were created from the energy of the Soul.

In this process many of you will be baffled, many of you will understand more about the process of the Technology, understanding the science of the Creation, in the dimension of the STM, in the dimension of energy of the man. And then, once you do this, you come to understand, life, existence of life, is much deeper than we thought. It's not just by getting up, eating and walking. It comes from the essence of understanding oneself, energy transformation, energy transmutation, (:44) and then the rest is mechanical. I'm sure you see, you feel the energy of the grandmother, you recognize it. But the grandmother does not exist, does not walk in Space, in this physical condition. As you used to go to her house and used to cook for you and used to cuddle you, and you used to sit on the same table and eat with her. There are no table and chairs, but the emotion of understanding conversion of the energy fields, is what you convert in your brain.

What is interesting, which comes out many times, and it must have happened to every single one of you. You went to see the grandmother, she made you the most delicious food you liked, she gave you the fruit you like, you ate so much, "Grandma I'm so full, I can't..." You come back to the dimension of physicality and you're starving. Now you understand how man has denied what has been given to him through the process of understanding the energy field of itself. Just think one second. How can I be with the grandmother? Don't know where she is, how come you find her so fast? And how come the mother shouts at you, get up, it's time to go to work, and you say, goodbye grandma I have to go, mom is calling me. You come back in the dimension of physicality and carry on with life. "Mom, I had a dream of the grandma, I was having food with grandma, it was so delicious." (:46) "Are you hungry?" "Yes, I'm starving."

Why don't we carry the energy from one to another? Why don't we understand the dimension of the other? This is where the game starts. Understanding to become the Passengers of the Universe, in how you can travel the dimensions of the existence, the totality of life in the Universe. The most important part for you as Knowledge Seekers, is this, connection and Creation. Book number 1, to Book number 2, and to Book number 3. Where this is your Book number 3, this is your Book number 2, and this is your Book number 1, in the dimension of the energy, and in the dimension of physicality, this is your 3, 2, 1. If you manage to connect the line of dimension of the communication, transportation, transmutation, then you can connect, manifest, at any time, anywhere in the Universe.

This is the secret of what we call, The Promised Promise. Which means, you go from the matter to energy and from energy to dimension of the... anything you like another matter, or you start from the energy through communication, you become the matter. (:48) Where starting from the energy is the Creator and the matter is you. And if you understand this, and you can convert your energies to direct transmutation of the fields, go through the process, you'll reach the Creator. You'll become part of. From Creation to Creator, and from Creator to Creation, there is no line of difference, it's just the lack of knowledge, lack of understanding.

I hope you understood this clearly, because in the coming time, and as we started last week in the sessions of the Friday, many of you will receive the fruit, as an energy, you transmuted it, and you tasted it in dimension of physicality of the man. We provided the energy of the fruit, you converted it into the taste, emotion and the fruit. This is, same part of the same structure. And if you understand this in a deeper way, in a much, much deeper way, where we could dictate, or decide what fruit, and many of you who write back to us what I tasted, that material which you tasted has been on the table of the headphones which you tapped into the energy from the source in the central system. (:50) Which means we can (from) now on dictate what we would like you to have, that you taste it and you feel it. Knowledge Seekers who joined us in the last session will receive a list of what was the content of the materials which they were given. Then they can checklist what they received, what they tasted, and how they have started transferring energy from the Soul, which comes through the headphones, to the physicality of the taste and energy.

This was the first process of last week which we have started, because this then explains to you in a further way how we fed, we opened channels to Palestine. One Soul, one Soul as a Satellite feeds the rest in the dimension of connection. We do not need millions and millions of resources, we need one source to feed millions. It's the way the Creator is, the love of Creator is one in the center, and it feeds the whole of the Universe, instantaneous. And then you understand the Knowledge of Creation. We give you the fields, through line of communication, we feed the physicality.

Many of you Knowledge Seekers who joined last week, (:52) by next session in December, hopefully we'll have your food containers, which some of the Knowledge

Seekers have received it, and then you see what you feel, how you feel, what you taste, and how much of it, without digesting the food will absorb through the, what we call, the system. Then do we need to kill? And do we need to do what man has done? Destroy to survive, where we become all survivors without destruction? And when you get to that point, it will bring a new emotion to man, which the killing does not exist, because killing comes to survive to show superiority, where you are superior and you have no starvation for it.

This is the line where the peace will come. This is the line where man will start changing and you Knowledge Seekers who joined us are the first step in that structure. You have created the first dimension. And it'll be interesting to know how you will change and make manifestation of. What will be interesting is when you go to Space you receive energy but you see the shape of an apple, taste the apple, chew the apple and get the energy of the apple. But in your life you have never seen an apple, because you are a child of Universe, you've never been on Earth, you never had contact with no apple trees and you've never seen it in your life. (:54)

The process of understanding the work of the Creation is fundamental to all of those who want to become the Passengers of the Universe, to transmute. Recognition of what I see as me in the dimension of the energy, while I know my physicality, is still here. Now you understand. The way you went to see the grandma and you sat with the grandma, you ate with the grandma, you showed the grandma, look at my new clothes, you've done half of the transmutation. But because the grandma hasn't got any more physical dimension as you knew it, because the physical body is buried six foot under, you recognize the energy. But why didn't you feel the taste of the food in dimension of physicality, you didn't feed yourself through the Soul that your physicality gets fed and when the mother wakes you up, would you like breakfast? Yes, I'm hungry please. But you already had a feast, you live like a man with two wives, going to the new house and saying no I didn't have anything because otherwise this one will be upset.

This is what we have missed in the line of communication. (:56) How in this process, we bring in fields from dimension of the Universe, that embraces this, that this become that plasma which moves. This is the part which is missing, in your line of the dream, to dimension of physicality. In this process where you dreamt about the grandma, you did not do this. So you stayed in dimension of energy. But, sorry, grandpa is alive, you are in London and grandpa is in New York. You cannot do that with grandpa. You have, you want to fly and you actually get there physically to feed with the grandpa. You learned half of the pack. You did not learn the totality of the knowledge. Because doing, eating with a grandpa in New York in dimension of physicality, and having a beautiful lunch with grandma somewhere in Space is exactly the same. It's just you, who have not recognized the power which is within you, the energy field dimension which is within you. And this is part of the process of the teaching of the Keshe Foundation. To, in a way, open your eyes to new dimension.

I tell you what this dimension is. If you go back to all the teachings, over past years, I always told you that you eat 20% of your food in dimension of physicality, (:58) and

80% comes from your environment. In a way you put the seed inside you and then it attracts energy to feed you for whatever else you need, at that energy level. The only thing which you need to learn, is how to connect your central energy fields, what you call, your Soul, to tap into these (?? Universal Fields). Because these, in certain way, connect to the grandmother on the energy side and connect to the grandfather on a physical side. Your line of feeding is what I explained like the galaxies, which way it comes in, which way it goes out, and it can jump into another Universe, or come into ?? another Universe. That Universe is you. There's no difference. And to what extent you convert, you embrace in totality, or you embrace in fraction, which is your Soul, and you dream on, or you can expand. This is what I said from the beginning of the teachings years ago. If you expand your Soul then the Soul embrace cocoons the physicality. Then you can have a dinner with grandma in dimension of energy, or transfer this when it comes to Inertia of the Earth, have lunch with grandpa in New York.

All this, how to tap into this energy, (1:00) how to receive it, goes back to one fundamental principle. And fortunately, I have given you that source of energy, years ago. Because it's a field interaction. Because in it you have enough to live with it. The MaGrav system is that system. Energy in the dimension of the all levels. And if you understood this process, then you understand if you design your MaGrav system in a specific way, that become the Soul of your feeding not just making electricity to budget your food or your life. And if you understood this, one connects to the Soul, one connects to the line of communication, and one connects to the physicality of the man. In creating energy in these different levels, you dictate, you transmute, or you transport. (1:02)

In a way, the MaGrav system, which you've been given, and many of you made, and you looked for 30% in the reduction in electricity, is the key to your understanding of the life and creation in the Universe, and your connection with the Universe. In the life of physicality, you bought yourself a car. Or a bicycle or a donkey, with four legs. In the dimension of the fields of the Universe, I gave you the MaGrav system. Where, if you understand how to set it up, will give you everything you need. But you need to understand, and don't look at the physicality of it, look at the energy of it. This is the secret. And I hope as Knowledge Seekers, you understand now, the gift you've been given as a MaGravs. And you went for the crumbs.

In so many ways, every time you bring in possession and position, again you will stack it up as a MaGrav system. You make it up as a Star Formation. (1:04) You create a field which manifests itself that fields, if corrected and connected, will ?? lead the interaction of the field of the fourth manifestation of the man, or the Creator. You remember those fields which crossed from the Source, now through the structure of fixing it, we dictate the position of the interaction, the star, the STM, the dimension of the existence. And once you feed this source, as this is connected to the other Souls, will feed them the same. Man shall not kill, because now man knows, understand the process.

So, in fact, there is no difference between your MaGrav system and your Star Formation system. You want to stack it, or you want to move it. Static and dynamic. Once man understand this technology, once man understand the work of this technology you will be

moving these from this to this, to bring dimension of physicality. The STM, the Soul of the Physicality (STP) of the man and then the physicality (P) of man. And then you will change it, you'll have the physicality in the other way and you see the man as energy.

Then, many of you should understand why you have not managed to achieve such a position and dimension. (1:06) Because you never understood the process and principle of Creation. Do I want to be in dimension of physical, or do I want to be in dimension of motion and travel the span of the Universe.

In the future I teach you how to combine these, to create a dimension of the, what I call, emotion. That then it brings you dimension of realization, ?? attachment and detachment from every dimension of your life in the Universe. We go for a break and we come back and try to answer some of your questions. But if you understood the teaching of this morning, in the full essence of it, you have found your pathway to your own Creator, in the creation of the whole structure of the Universe, and the Unicose. And if you tackle the last point, you'll find yourself within the structure of the Creation, which is the Creator. Rick, take us for a break, and we come back.

>> BREAK >> 566 KSW November 28, 2024 (1:13).

K- Not really today. It's just the structure which we set up is moving along. And we hopefully will have some news for Knowledge Seekers in the next few weeks on the progress of our work. But we have to be very careful. As I said, the past couple of weeks, I gave too much information in teachings, and some of our governments were not happy, that we release information in this way. So, I have to be prudent, that what we release, till it's done, so we keep very quiet about it.

On the other hand in the next week or so, Keshe Foundation will release another cycle of new Gans's for a specific application. (1:14) And with this will come a lot of new understanding, new emotions. A lot of Knowledge Seekers write to us, "Can I use one Gans in conjunction with the other?" As long as they don't interfere, yes. Because you do that in your normal life, you do many things. You listen, you eat, you walk, and, this Gans's, use of Gans's, has to become that normal life for you. It's just learn how to use it, when to use it, that it gives you the maximum outcome, and what it needs to be done. The

new cycle of Gans's is, it'll bring a new dimension to the work of the Keshe Foundation. In the, we have opened the Keshe Foundation channel in a different way, that you might see new Knowledge Seekers, and new groups of Knowledge Seekers. Which we have to be fully aware of, their new approach, understanding, as they are totally, what we call, connected to the physical dimension, and not understanding the technology.

If there are any questions to answer.

Q: ... Does the MaGrav need to be connected to electricity, or can a MaGrav be stand alone already now? (1:16) If the MaGrav is not made correctly, does it still work?

K- Not really. You have to understand the essence of MaGrav and not just making it that it'll do something. This is what I always said, go in the dimension of energy, not the physical structure. And this is the essence of understanding the work of it.

Any other question?

Q: I have a question, does a correctly built MaGrav require a period of time to build up its energies or is it sort of a plug and play?

K- No, Plug and play. It's a plug and play, it's just that you have to understand the process, you have to understand the effect of. As I said, Knowledge Seekers for past years treated the MaGrav the wrong way, so that's why in so many ways everything came to a halt with them.

Q: Can you give us a few more clues as to a direction that we can look for a correct MaGrav?

K- Look at the structure of the Universe. Look at the way fields in the Universe operate with each other. And how they interact. (1:18) One of the best examples of, if you ever manage to make a MaGrav which is completed on his energy side and he can bring it back to his physical side, is when you build a MaGrav, it floats. It will never sit on the table. A couple of Knowledge Seekers by accident in past few years have managed to do it. One Knowledge Seeker, even if I remember correctly, once said that, I pick it up but it has no weight. But it sits on the table. Knowledge Seekers overall have not understood the principle and that's where we hit the problems.

Any other question?

Q: ... Hello Mr. Keshe, I have the following questions from your last two teachings. (1:20) One, how should the Nano coated part of the CO2 reactor for replenishing with Amino Acid the pain pan be made? Caustic or fire?

K- All depends on you.

R: Are you a caustic person or a fiery person?

K- I never tested fire. .. I never use Nano Coating materials in ?? Pain Pen. Even the original Pain Pens, the production went with some putting coils in them which we took it out. The Pens of today carry no coil, whatsoever. I think if I remember correctly, the coil system came from the Philippine groups at that time.

Any other questions? What's the next question?

R: Those were part of the times of the contradictions between clockwise and counter-clockwise.

K- Why is it?

R: We don't want to get into that.

K- No.

Q: ... How do you create more energy in the middle so that the brain in heart cannot handle it and you have stroke or heart attack. (1:22) What are the ways to deplete that energy so that none of those failures happen?

K- I developed a technique, actually not a technique, I developed a system years ago for this. You can create an environment, that, if you feel you're in that position, you'll bring a change. I tell you, is always coincidental and accidental when people things through it, and it comes up. Part of the materials we put in, as I said it's coming up soon, is to do with this kind of operation. Gans's for what we call, use of Gans's for stroke, use of Gans's for operation of the what we call, kidneys. These all be done in a different way.

What happen when you get a flu? It's understanding of the science. You see me, you don't see me, but you hear me. I got a blocked nose. I caught a very bad flu, 3-4 days ago, to a point that it was impossible to even breathe. And by creating, developing very rapidly a mixture of Gans's and conditions, within five minutes everything disappeared. The catarrh and everything. (1:24) But the damage which was done because of the physical structure of the virus affected my voice and my nose. In the minute I change condition, it disappeared. But the damage in the voice is there as most of you can hear. I don't use things immediately because I want to see if the technology is right. I'm a guinea pig of myself, but you have, even with the people which get the, what you call it, water in the chest, you can create a condition that there is no water immediately, but this takes us to another dimension of science and technology.

The amount of what I call, catarrh all the way to my lung was so heavy, and I was told, "Why don't you do something about it?" I said, I have to wait till it grows fully that I can test it's correct, even though I tested it three, four, five years ago and it works. Within minutes the whole structure changes and doesn't come by Gans's you know, CO2 and the rest you can do whatever you like you'll never get that result. But then we feed this into part of the process.

And .. things like heart attack. Now we are testing a very effective way for the cancer, the specific technology developed, (1:26) that you take... This past few weeks, this has come. You take a specific way, specific material in a very specific direction that the body does not allow the process of the tumor. And once we are satisfied with it we bring it out, it's just again changing the physical dimension, but understanding how. And if it's successful, the way what we see, yes, it has to be done.

The heart attack. Actually I did a first test in 2008-2009 maybe. People on the verge of heart attack total. You just put the system in and the system takes the energy. And you build a structure in the brain that if any damage is done, it'll repair itself. I did that with Dirk Laureyssens. And, in a way, he was my first guinea pig within a few days. I remember when I took him out of the hospital, his hand was twisted and I had to feed him on the restaurant table. In a couple of weeks he was back to normal. There are... it's a system, it's a technology and you can do this. (1:28) But now we are getting into a phase that hopefully we're making announcements with the structure of these things very soon, very soon we have to keep quiet as I've been told by our, what we call, associates, do not talk till it's done. You'll see a very few changes in that direction and dimension.

Any other question?

Q: ... Third and last question was about Magnesium Gans. What is the best way to obtain it? From Nano coated Magnesium with raw Magnesium rod, or Nano coated Copper and raw Magnesium rod, or in Magnesium salt? If a MaGrav is to be sprayed only with Magnesium Gans and have Magnesium Gans balls inside, would it balance plasma faster than as compared to Magnesium Gans bottles placed in the house?

K- You have to go with the bottles, forget about coming up with anything else, because then you create new dimensions and variations. This is to bring stability, is not to create more mayhem. You have set the dimension and it does the work, we know it does, it's been tested many, many, many times. Normal way, just use your Gans's, and Gans of it, and use it that way. (1:30)

Q: ... Does the Creator use knowledge and technology? Or is that something that's for entities such as humans that might be below level of the Creator?

K- The problem is, the knowledge comes from interaction of the fields. I always say, even the God is surprised by the things which man does, the knowledge he accesses to. But in a way comes from that ?? emotion, or intellect, or whatever. But, you don't need to create anything to have that. Knowledge is the field, creation is material, is conversion to. And, I think the Creator knows both how to do.

Any other question?

Q: ... The anti-nuclear disaster teachings is good to be reminded of these days. (1:32)
Thank you.

K- The process is, I think, if one of the Knowledge Seekers goes to the session, we taught what to do, and bring it up as one of the Intros for next week will be perfect. If it can be done.

We have to understand that for those of you who are not part of Europe or Middle East, this is irrelevant, but for those of you who are in Europe, especially Western Europe, Eastern Europe, it's a topic of discussion. And as, what we know, the same with the Middle East. Even though the, what you call it, peace agreement was signed yesterday, this is just to give a breathing time for the Israeli to get weapons in, and receive the nuclear armaments. So Middle East is in the same course. There is a lot of political and strategic moves which pushes it. The Russians are telling us they are going to use it.

But the procedure stays the same how to decontaminate. Decontaminating the environment, decontaminating the air, decontaminating the what you call, food, decontaminating your own body if you are exposed to it. Each one is a slightly different process but it has to be done. As I explained to some Knowledge Seekers very recently, in the process of the nuclear, (1:34) if you are in the wind of it, what happened in Chernobyl in 1986, fit your windows, fit your doors, fit your what we call, air ducts, if you restrict everything with the cloth, with literally dried or contains or wet with Gans's, that as air goes through it filters itself. And try to keep it always moist, that's very essential. Try to keep port of entries like the doors, the windows and the air ducts whichever you have, continuously wet with Gans material. Any Gans material, because it's an energy absorbing, you don't get any, what we call, materials coming. It's the energy fields which come in and they get trapped or even it's dust, it'll get trapped.

And the same thing with your water contamination, you create, if you have any dry Gans's, if you don't, you make layers like, not tissue but the cloth, of different Gans's and you behave exactly like the way you do water filtering. Instead of putting a (?? coal) sand or the coal sand and everything else, you make layers of Gans's, or you pour water in the Gans water, or in the bottle which has Gans's in it and you just consume the top water. (1:36) First of all it gives you Gans water, secondly as it absorbs all the energy within the Gans you receive more or less pure water.

The other matter for you is if you do the same with your washing material, with a bath or with a shower you continuously keep that in mind. You create a barrier that any water you use goes through. You make a bath, you make a what you call, tub, or you make a bowl of the Gans's like Copper, Zinc, with what you call, even with Iron, you mix these Gans's in a bowl and you let it settle. You have a fruit or you have food which you think is contaminated, just put it in there, don't let the Gans touch, take the water, leave the food in this Gans water for a few minutes, it's fully decontaminated. Because it's energy has no identity, even if its particles landed on it in the water, it will be absorbed, it will be taken off.

We are in a very serious danger as I said. We are on the top, we passed 11:59, but still there is a hope. We know Israel is definitely going to use three nuclear warheads on Iran,

we are fully aware of it, as Biden has taken a payment for it to his private account. And we'll see the next step.

But essentially try, if you are in a contaminated area, (1:38) try to make Gans's on a continuous basis, because energy fields are safe for a long time. Wash your car, on the air filter of the car, put the same cloth with Gans, not the powder, but always wet, to keep it well moist. If you're traveling, you're cleaning the material, spray outside the house, if you have the opportunity or you can do a spray in the house. It's dimensions we don't know, but we cannot create what you call it, panic. But it can happen. Don't look at it as a nuclear bomb, but what happened in Chernobyl. Nuclear power stations go wrong. It's something we have to know how to do, how to handle it. And if you are in the area and you are contaminated, or you are in that position of contamination, and you have access to what we call, Communication Bundles, we look after you from inside, we feed you from inside. If you have the worries about contamination, all you need, you have to reach us, that we get the message, and we'll connect your system to a system to bring that conditioning. These are one of the applications of the Cosmic Bundles which we put. It has a lot of applications. It's more or less we create a direct line, through no wires, no telephones. The way we can feed you, we can look after you, till things settle.

But this is now a reality in the Western world, in Europe and Middle East. (1:40) We're dealing with it, we read it every day on the news. The Russians threatened and the other ones are ready and the other ones don't like, and every other things which goes with it. Keep any Gans's except Aluminum and Lead in the house, and always keep a bottle in reserve if it happens. We are now in a world of nuclear that we cannot avoid it and anything can go wrong. Somebody hits somebody's nuclear base, somebody hits nuclear weapon and the rest of it and somebody does something else. Even pollutions, with chemical pollution, you can still use Gans's.

Any other questions?

Q: ... Thank you for all the love and knowledge you give us. What happens to the Soul when a person suffers from somnambulism? Which is, I believe, that's sleepwalking, right?

K- That's a physical dimension. Nothing happens, Soul is still there, the body moves around. That's a time when the, when the STP takes over the physical body. Not much to do with the Soul, Soul is still there. Most probably laughing, look at him. But... (1:42)

R: Carrying along for the ride.

K- Yeah, I've seen it happening, I've seen it. I've seen, I've seen it happening to children with the high temperature. It's nothing to do with each other, that's a position of the Soul, but the STP is ?? separately with the body. That's a mechanical system.

Q: ... Thank you very much for your presence among us. A year and a half ago I reported to you that I had a heart problem, and you told me the possible causes. I was living with

this problem until recently, when I decided to buy a car and install a MaGrav in it. I assembled the MaGrav with the coils in a triangular star configuration, connected the gravitational terminal to the battery's positive terminal, and the magnetic terminal to four points on the car's chassis close to the wheels. I have felt an incredible improvement in the functioning of my cardiac system. It's as if the problem no longer exists. My question is about the arrangement of the MaGrav coils. Does the configuration of the Star forming coils, affect the overall effect of the MaGrav? Thank you very much.

K- These are fields, it doesn't matter how you put them, they interact. It's irrelevant, as long as you create the fields in them, or within them and interaction with the others, it doesn't matter in what configuration you put. (1:44) Maybe you find a configuration which gives you better fuel consumption, or better emotion, or you have to change it from one to another, to have the benefit of one and less benefit of the other. But in essence you're dealing with the fields. So you have to decide how you compress that fields, or how you leave it open.

People who've been using the car MaGrav system, they talk about change of emotion. A lot of them. A lot. And even if the pain is there, the emotion of it before was pulling them down, now they don't even just stay there, they live their normal life. It's understanding the fields and not the physicality. And this is one of the beautiful things about it. You change the environment.

Any other question?

R: I have kind of a nice story that I'd like to relay here with our new KS ?? Denken was in a Knowledge Seekers Workshop a couple of workshops ago and was requesting help with his Gans making situation. And he was in Africa, in a poor area of Africa and needed some help. And he was trying to find someone that could help him at that time. You suggested .. you suggested he talk to Dr. Gatua, and that's exactly what he did. He traveled 400 kilometers, (1:46) across some pretty tenuous roads apparently, to Nairobi, in Kenya, to visit with Dr. Gatua for a full week, to do training in the Gans technology. And here's a picture of... one of his pictures that he sent to me, and he's a pretty happy character right there, when he's learning about the Gans technology and picking up some Nano material, or picking up some materials to make Nano materials and to make the Gans's and so on and he spent a full week and learned a lot and it's kind of a success story I think. I think he's an enthusiastic new Knowledge Seeker that perhaps will go on to be maybe someone like Alekz or someone that's involved in the plasma technology. At least that's what I'm hoping.

K- That's nice, we got to realize, in Africa, you see a lot of things new, but getting hold of materials is extremely difficult.

R: We discussed this in the Keshe Plasma Reactor Group yesterday, because Gail is from South Africa, and like we were saying, well can you get some you know, copper wire, some zinc in particular, and she says, "There's nothing around. If it was around, they would have already taken it and sold it." It's that... bad.

K- It's a shortage of material. Because I remember we did some test with the Sierra Leonean Universities, and we were trying to make some Gans's, (1:48) and it became such a job, finding. I said, "You have the wires, you have the batteries, it's impossible to get." And we had so much problem getting materials in what you call it, Freetown University, to start the process. Even in Gambia and in Ghana. Finding materials, raw materials especially is horrendous, and what you want to do with it? But they have to learn, it's... there are two ways in Africa, there is always, wherever you go, there are cables, wire cables, electricity cables, wires, everywhere, there is nowhere in the world you don't find it. In most of the places there is a chicken mesh, it's part of life in Africa. They have to get adapted that they don't need plates, they can convert into coils or wires to do the same. And more or less these are the things they can do.

Any other questions?

R: A couple more and then we probably should let you go. I know you're suffering from...

K- That was just a block nose there not much you can do. Yes.

Q: ... In the 177th Knowledge Seekers Workshop, you remember that one of course?

K- Yeah, of course, yeah.

Q: ... You spoke of a doorway to the Spaceship. This is created by a field blockage. Is this the same as the blockage over the Tel Aviv from the Star Formation? (1:50) Or maybe you don't want to speak about that.

K- I have to stay out of commenting on Middle East. I've been categorically been told, do not comment. But we... I put it to you in a different way but very diplomatically. When you bark too much, but you have nothing in your video, sooner or later people will find out your barking is shallow or hollow. Israel talked about a lot about Iron Dome, And when it got tested, because they put certain things in certain positions, when it got tested, it failed. It does not exist. And very interesting even, I was reading a report this morning from securities, that Israelis said yesterday, in the last hours of... prior to ceasefire, or whatever, they fired, let's say, ten rockets, nine of them were destroyed and one hit it, landed in the land, empty land. And, very interesting, which is not known in public, we hear about, a lot about 44,000 Palestinians who (got) killed, and numerous numbers who got injured. And we have listened into this past months that Israelis have got 99% of all the missiles, everything blocked, and every time they did something ended up in empty land. (1:52) If you read it, this has been in the ?? pattern of the report from Israel, and the security.

But there's one thing, which is known to the military world, and to the outside, we kept... we try to keep it quiet, nearly 7,000 Israelis have died, in this war. Over 12 to 14,000 Israelis are in hospital, from shrapnel wounds and the rest. The question comes what

happened to the Iron Dome. You cannot... if you have a heart attack today, there is no room (in hospital) anywhere in Tel Aviv, in Israel for you. Because it's all occupied by military injuries and civilian injuries from the war. So, when you speak about the Israeli Iron Dome, it's "Iron Lies" than actually a dome. It does not exist.

What is more, another point, is that Israel used to be nearly 5 million Jews and nearly 4.5 million Palestinians. That 9 million was estimated numbers. 2 million Jews have left Israel since last October. Literally disappeared back into Europe and the rest. And so at the moment 25% of a nation are running a nation which are the Israelis. But all of these people who get injured with these missiles and the rest are Palestinians. So they are losing both ends, and Iron Dome doesn't work. And this is a block policy that 99% captured, destroyed and 1% always lands in the open land. (1:54) But these open lands might have something that 7,000 people have got killed on it. And maybe the truth is 1% of the missiles have been intercepted, 99% landed. And this brings a lot of controversy.

In a time to come, the total, what we call, losses on the Israeli side will be known. Experts and the people who have the statistic in Israel speak within 5 to 7,000 deaths in Israel. These are experts, but officially because of the 'gagging order' nobody can report, but people tell you there is no room (in hospitals) anywhere in Israel you can find if you had a heart attack to get yourself into to survive. And they had nothing, nobody has touched, nobody has happened, they only lost a few soldiers and the rest of it. So we have to look at this situation with Israel with a pinch of salt and this 60-day gap they created is actually if the Hamas would have pushed another two weeks, Israelis (would have) had no bullets and no guns, they're running out of ammunition. America forced this to be able to replenish, what you call it, replenish the arms. Because they were under such a heavy attack and they spread themselves in all directions.

And now, you have to understand the reserves of the Israeli army, they don't want to fight anymore. You are by law allowed to be part of the army for one month, a year, doesn't matter, men or a woman, within a given age, and some of these soldiers are on duty for 6-8 months, (1:56) self-employed, they lost their jobs, they lost their businesses, and there's a huge problem which, by gagging orders of the Mr. Netanyahu has kept from the truth. The truth will come out, it will be seen. But when you hear about this Iron Dome, about Israel, it's all fake. Just call a hospital, say, "I have a heart attack, I want to come in this area." (They'll answer) No.

And so, you got to understand, we live in North Korea, and at the moment living in North Korea and in Israel is exactly the same. Censorship, government just tells you what they want to hear. And this Peace agreement is a lot of attachment to it, which is to, in a way, to get arms as much as they can. It's on the Internet and published in different ways of how, they are literally controlling media. But, it's nearly 1 to 5, 1 to 6, and if every missile has been inserted, why do we have over 800, a thousand officially Israeli soldiers dead? Unofficially, which is the reality, some sources speak up to 10,000 Israeli losses. Where does everything, Palestinians, Hezbollah, whatever, shot at them and landed in the open field.

And, we want to understand how these two nations got to this point, to do this to each other. And this 60 days gap was forced by the Americans, because they can't get weapons into Israeli's, or they would have lost the war (1:58) very badly, as we've seen, especially in last 2 or 3 weeks. The military camps, one after another flattened, literally flattened. And these military camps are not empty, it's full of soldiers, and you can estimate what happens. So, it's a peace, just to recuperate, and it's peace till, what we call, get more arms in, and somewhere Mr. Biden and his family collects more commission from the weapons. You've got to understand, that when you send a missile from Lockheed Martin, to go to anywhere, wages has to be paid. ?? Biden and heating have to be paid. Lockheed Martin issues an invoice to the Parliament, or to the Senate, or to the government. There is a 10%, 20% commission on that invoice, which goes to those who created the war, and America pays for it, then they collect it from Vatican.

When you create a thousand or two billion, ?? war ?? men going, these are made by people. Wages, some of you may be listening, working in some of these, or know people in these. None of the Lockheed Martin staff are dying of hunger. Actually, they are doing overtime, their life is very good, because they have to produce more missiles. So, it's an invoice issued. 60 to 100,000 dollars for a missile. And, has to be paid, otherwise Lockheed Martin cannot pay its wages. There will be no missiles tomorrow. And apparently from the security information coming in, people in the areas where weapons are made are having a wonderful time. (2:00) People dying in Palestine, and Americans are on Thanksgiving Day, they couldn't afford a chicken last year. This year it's a turkey, because they give you "over-time" making missiles have paid off. But this bill has to be paid. Or else that turkey won't be on the table. And somebody who signs these bills takes 10-15% commission. And this is why they push the war. It's for their bank accounts, not for bringing another nation.

R: And that of course is happening in Ukraine as well. Mr. Biden, I won't call him President anymore has declared that the conscription age that Zelensky must make the conscription age down from 26 years old to 18 years old.

K- Yeah, because it's the Ukrainians who are dying. Nobody else. It's the Ukrainians who are losing their job.

The thing is, that life is still going on. It's a part of the Keshe Foundation. You know this black box we've been looking for to make for your, the what you call it, Cosmic Ray material? It's produced in Ukraine. And we pay the Ukrainian manufacturer to produce it. We source everywhere around the world. We have beautiful Knowledge Seekers in Ukraine. But how many of them are alive? How many of them are alive, who we saw in different conferences, because they're active, they used to come everywhere. But Germany is bringing the conscription back, Britain is trying to bring it back, and getting ready for a war. For what reason, nobody knows.

But would Trump come to an agreement with Putin. And what will be the outcome, the consequences. (2:02) The part which the Russians have taken is the part which was heavily invested by Russia during the communist time. And the part which the Russians

have taken is nearly twenty percent of the land. If Ukrainians and Americans and the rest were all so successful, how come twenty percent of the land mass has gone to Russia? If you listen to one of the interviews with Putin recently, he gives you position where 10,000 Ukrainian soldiers are back to a lake and another 5,000 to a mountain, they can't go anywhere. But since we can't shoot them down, these are our own people, we have to keep them there. They can't do any damage and they keep on making pontoons trying to cross the lake to escape from the other side, we keep on shooting the pontoons down. Listen to one of the recent interviews.

And, so it's not that they're all killing each other. If you're on the line you go that way. And now we hear in recent past days and weeks they're finding a lot of British mercenaries in Ukraine. They find their bodies with the documents. It's become a war where what you call it, the President of Ukraine has banked about nine plus billion in his private account as it's been. Now it is coming up and he's start asking from several European countries for asylum. He's ready to go, he knows it cannot be done. We hear Parliament of Ukraine this week has been told not to attend anything because... and they told not to attend this. They were told to take your family and leave the capital the 8th of December. (2:04) So they don't even know what it is. It's a lot of barking going on, but it's not good for the people who are in it. It's horrendous for people who are in it. It's the same doesn't matter if the soldier is Ukrainian, Israeli, Palestinian, Hezbollah, Iranian, Chinese, whatever, it still is life. Somebody's son and somebody's father. And this is the problem. This is the problem. We have to wait and see.

Let's see if the new policy comes in with the new government. Does what it says. Because if when Trump doesn't follow the pattern that these people make their moneys in the Lockheed Martin and the rest of it, and the big corporations make a lot of money from whatever is to come after, there going to be a big problem for Trump. (If) he wants to stop putting outside, but inside needs to be done. What are you going to do with all these workers nearly a million and a half in military arm recruitment? Find a job. He promised that he'll keep the car industry in America going, which we doubt now more and more. We never promised he'll keep the military. He says, he's going to trade military and this war games they create to show somebody is bad, they have to use weapon it's going to come to an end. But he has to find one and a half million jobs.

These people need to be fed, these people need to be looked after by the specialized. What would they do? Most of these weapon people they get out of job, mmm, "they are food for the cat." Chinese, Russians, Arab nations will employ them for nothing to take the technology to their country. Export of the what you call, the brain, (2:06) is more important than export of what you call, physical equipment. This is part of the problem which Trump hasn't actually calculated it. Stopping the wars the way it's structured, he wants to stop the wars, but the factories need to be supplied. The guy needs another turkey for next year, and the, what you call it, Thanksgiving Day. And if it's not there, he becomes a scientific "mercenary," in Arab countries, and other countries, North Korea will pay good wages for them to go there. He won't stop. And they have the expertise, because they made more and more of it.

This is part of the... this equation and part of the lines which the Israelis have brought into the game. I said to a diplomat in the past few days, "What happened to the 7,000 dead which is reported and statistically is correct?" He said, "We cannot talk about it." And this is their problem, it's not 44,000 Palestinians, no Arabs, it's more or less 54,000 human beings. Because, taking with "a pinch of salt," those who couldn't get to the hospital because of the heart attack, people couldn't have the cancer treatment, they all died too. So, add another 3, 4 thousand on that into the equation, then you see, it's 50,000 family suffering. With somebody having turkey today, it's a Thanksgiving day, we, I did overtime, we made bomb missiles to kill. It's a very complicated situation. And, diplomacy does not come into it, Rothschild and Illuminati's, and Vatican comes into it. (2:08) Anyway, it's a very delicate subject to talk about.

R: I hope you didn't overstep your bounds there. Thank you for all the additional knowledge.

K- No, it's... you see, we, Keshe Foundation is a... we work in a different way. That, especially after 3 or 4 attempts on my life, we have set up a security structure, and that security structure informs us about 120 different countries, how they move, how they operate. And, we get the knowledge, freely as knowledge... Knowledge Seekers are not the ones who come here and sit in the teaching and talk or whatever. The Knowledge Seekers who gather information for us on a continuous basis, or inform us on important sessions, are there 24 hours a day, and they've been there ten, fifteen years. We have much more deeper intelligence, than most probably some of the nations, they're on certain topics. Because, it's Knowledge Seekers, they come direct.

I've explained that before, when we used to be in the Cinzano, the... one of the top managements of the most advanced, biggest gun factory in Europe, in the world, since Second World War. He just came for a coffee. He said, we just... the Pope came in and placed an order for largest number of guns ever. What is going to happen?" I said to him, "What do you mean?" He said, "We just received the biggest order for producing guns in Italy, from paid by the... The Father came himself to pay for it." Does the church buy guns? Or do the, what we call, (2:10) Swiss boys, need a lot of guns to defend the Vatican, if anything goes wrong? Now you understand.

The people who bring us knowledge and information, are people who are truly Knowledge Seekers. And they work on a peace, not on wars, and they give information to us freely, on those basis, we never ask questions. And I tell you, we have over a hundred million plus Knowledge Seekers, they're not all in the point of power, it's all of you plus them, plus people who sit. And when it matters, they speak. Anyway, let's see what happens and what the world brings. Thank you very much for today, and we call it a day, and hopefully we meet next time, same time, same place. Thank you very much Rick.

R: Very good. Thank you Mr. Keshe. Thank you. Well, another amazing workshop. Thank you everybody for being here today for the 566th Knowledge Seekers Workshop here on Thursday, November 28, 2024. And this will be our last public workshop in November, and just looking at the calendar, and it will be December 3rd, for the next

workshop, which will be the One Planet, One Nation, One Race for Justice and World Peace, with members of the Universal Council and support members. And that starts at the 4 pm Central European time with the same Zoom channel. (2:12) Some people apparently have had trouble getting into the... I think I'm getting your throat problem, Mr. Keshe. Getting into the Zoom today. There's an issue with the update of the Zoom. You have to have the update in order to get into Zoom, but you go to get the update, and the update is not ready yet, in some countries, apparently. So, continue trying to update your Zoom, and it should go through in the next day or two, or get you straightened out that way. Alright, I think that's it for now. Again, thank you everybody for attending. And Jalal just put his hand up, but I think it might be too late Jalal. Is it too late for Jalal Mr. Keshe? Are you still there? I'll allow you to talk to him. Just go ahead if you want there, but I don't think you'll be talking to Mr. Keshe.

Q: No, it's about... Hi Rick. Hi everyone. It's about the student account. Since yesterday, a lot of things have changed. So, Mr. Keshe or anyone in the admin knows about this. And the education...

R: I think the main issues with the update of Zoom, I think, because people couldn't get into Zoom, because they needed the update and they couldn't get the update, so they couldn't get into Zoom to start the meetings and ???. There is a new number apparently as well, so between that and the Zoom update there's probably some confusion. (2:14)

Q: Ok. We will try. Thank you.

566 KSW November 28, 2024
