

# 567th Knowledge Seekers Workshop December 5, 2024

(Quick Index 20 pp, Introduction, Topic Index ; Need to do; Key Phrases, Words)

(Auto transcription from Elias)

Identify fields in Space; How to communicate Universal level; C12 is body - C14 is U - C13 Intermediary; All in U use Line of Communication; C14 steps down to C12; Other planets have own common denominator C8, C11 - whatever; C14 not atom - Energy Level connection; No eyes - communicate with M field level C13; Hold Gans & taste; Communicate with objects - nuclear material; C13 U communication; STP - Third Eye; Skin - inner middle outer levels; Middle level emotions; AI no emotions - not connected humans; Emotions can be added to computers - C13; 5,660 KSW; Convert emotion to Line of Com; C14 energy level - not C atom; Horse Whisperer - feel animal - C13; Structure skin - MaGrav; Liquefy brain - never commit crime; M field storms U; C13 is Line of Com all in U; Don't eat others; Build spacecraft like body - has Soul won't harm; Layers of Gans - essence of intellect & emotion; Messiah - Methi not man - Knowledge of Creation - taught by KF - we manifest Promise; 2 new Gans for nuclear exposure - Interactive & Filtering; Gans to give computers emotion; KF become political & diplomatic bring change - join "X" forum bring T to Leaders; Number of Views - false; NASA forums; Trained by Lord Crammond & Tiny Rowland - how world operates; Fed owned by Rothschild's - owned by King England - control world finances; Businessmen influence politicians; Thank KS work hard in background; Middle East Syria; Israeli captured American weapons - Biden family sells Arms; Discover Hezbollah making own weapons - not from Iran; Change diplomacy; Trump wants peace - switch weapons manufacturing to Space T; No male/female in Space - virgin birth - children from Plasma - U is womb; Conception dependent on strength of womb - not DNA; Religions created mysticism - not knowledge; Children - some of parent's - huge interactions; If use T wrong - turns right - STC; Stop Mr. Barbu Romania; C60 - U created from field interactions within itself; UFO materialized; Creation limitless; Microplastics created inside body - plastic clothes cocoon fields; Microplastic Gans - body rejects plastic; Do not wear plastic - protect children - no Teflon; reverse grey hair; Elevate Soul - tap into C14 - eat drink breath lower order increase field strength; Ways to breath; Walk barefoot; Dec Flight not eating - Read testimonials; Plastic bags;

## Topic Index

Identify fields in Space; How to communicate Universal level; Transfer emotion to physical reaction - Gans's of cells; Danger - emotion in body - M field transfer - common denominator field with our senses & strength of STM, STP, P - uses Line of Communication; Body use C12 - U use C14 - intermediary energy level C13; Field strengths in-between H & He - isotopes; Universal energy level C14 steps down to C12 - becomes P; All races in U have common denominator knowledge - Line of Communication; Every cell communicates through C12 - not used outside body; Another line - environmental communication - felt through senses - no D of P - transfer energy - give and receive - form of communication; Earth local Line of Communication is C12 common denominator - other planets can be C11 - C8 or another; Universal Line is fixed

at C14; Not talking about C14 as an atom; All living creatures in U step down from C14 to energy level of local environment - Earth is C12; Need to understand knowledge and science of deciphering - connecting with environment; In U don't have eyes - orientate through M field strength; Feel M field strength of danger; External stimulus matches an internal field strength that means danger; Hold black coal - feel energy of it; Hold Gans - taste it - creates emotion; Converts Line of Communication energy to C12 - energy - emotion - converts to taste; Use intermediary Line of Communication between all created things - detect energy - use to identify communicate in Space; No physical eyes or ears in D of Soul; Know it exists - what needs are - common denominator Universal language - like English throughout Earth; With knowledge can carry Plutonium - Communication Line tell it - don't want its energy; Mr. Keshe's body - immune to nuclear materials - carry plutonium uranium in hands without any effect; Established Line of Communication - won't damage him - does not absorb it at C12 level; How we'll recognize other entities in U - in D of Energy - without physical matter entity; C14 is for connection; C13 is for communication and understanding a common Universal language - not a language - it's a knowing; Have to learn Universal way of communicating; Communicate level of STP - aware of it - Third Eye - never understood it; A second level Communication Line - like skin level - feel connected to outside; Middle level - connects outside to inside; Inner level connects holds to what's inside; Communicate through middle level - emotion; Robots will use this communication system; For AI's (Artificial Intelligence); AI of today doesn't have emotion - programmed by human; KF has this knowledge - part of work with World Governments; Today's AI doesn't have emotion; Use in negotiations; Emotion can be added to computers; Use energy packs in matter state; Part of our knowledge; We can transfer emotion; We need to bring emotions into AI's - otherwise it'll be detached from us without connection; They'll be control systems for future Space T when we travel with physical D; New Microchips with emotion will change whole understanding of electronics; Made out of material with emotion; Open this knowledge when man ready; Microchips with emotion - AI systems with emotion; Work of C13 - connect emotion into systems - understand emotions of another entity in U; It's not C12 - not physical - it's an energy - alive - has emotion; Will teach around 5,660 KSW; First build intellect of man; Build ourselves into the process and become part of it; In womb we have emotion - feel pain of mother; Second year after birth not happy - hungry - have to cry to get what we want; Learn how to convert emotion into Line of Communication with all entities in U; Travel with C14 - but not communicate; C14 is energy level; No Carbon in it; Could say Connection 14 or Connection 12; C13 energy has common denominator with everything - understand the cat - everything in U; Horse Whisperers who communicate with horses use C13 as Line of Communication; Has broad spectrum of field strength - not single bandwidth - everything falls within it; We can tune into - feed from it; KS a horse whisperer heals horses by touch - transfers energy; People have learned - can't control it; Use plasma energy to communicate with those in U - become friends; Mankind is ready to do; Use C13 bandwidth to target and talk to one individual others won't understand; Part in brain can do this - Soul mate connect to another on level of emotion - not C12; We have it with us all the time - crave to find Soul mate - understand us; Our dog understands us; Mankind needs to bring emotions into computers; Understand intellect of world - how emotion is created in D of energy - shows in plasma of body - transmits to other entities; Communicate with dog,

stones, anything with common denominator Line; Part of this in MaGravs; Knowledge is in structure of skin & MaGrav; Emotion means essence of energy - not reaction to a given situation; Man and woman relationship - connect and feel each other; Feel a plant, tree, animal, stone; Systems will be dynamic and flowing - like drawing in Book 3 - combination of Gans's; Gans's are interconnecting - create emotion - like brain structure - emotion is embedded within it; Started building this brain out of Gans's in Italy - had emotion within it; New dynamic systems with intelligence; Computer Microchips will be fluid - like brain - like a gel; Maybe could liquefy brain; Will never commit a crime - be in danger - always be aware of all Lines of Communication within environmental conditions; Worry about storms, hurricanes on planet; Worse in U - hurricanes of plasmatic fields; Understand emotions of Sun - its M field storms - connect to them - do a lot with energies - become part of their structure - won't damage; C14 is U energy - C12 is Earth energy - C13 is intermediary can connect to all in U; We'll feel their energy needs and emotions; Do not eat them - they have children, families, a life like we do; Monthly Flight sessions are for training you; Last November's session - many not eating - tapped into Universal Energies; Read testimonials; Create emotion of eating an apple in themselves - emotion is part of C13 Line of Communication - not P; Why when dream feel the emotion of grandma - felt having dinner with her - this is C13; Build spacecraft like body of man; Can't slam into other beings; Flight system will understand what environment it is in - has emotion - won't damage others; Why AI's need to have emotions - made of dynamic plasma; Make Plasma Computers; They will respect life and accept the responsibility for those inside and outside spacecraft; Gans's are in layers - keep separate - different colors; Separate layers of Gans's are plasmatic M fields - this is the essence of the intellect & emotion; Picture in Book 3 - plasma computers are hidden in it - will have emotions; Try to understand why Gans's don't mix - implications; Creates a condition of communication; Magnets together - find own position - accommodate and communicate with each other - find best place; I made man in the image of Myself; All work on same level; Integrate all 3 levels of life as a man; Waiting for Methi or Messiah - bring peace; This time Methi will be a Knowledge - not a physical man; Knowledge of understanding energy fields of U; Understand and feel the pain of the lamb - beauty and Knowledge of the Creation; Looking for Methi as a man - misguided; It's Knowledge of Creation - you have learnt through KF; Save yourself and make life better for others; Teacher is only carrier of knowledge - not possessor; Up to you what you do with that knowledge - create Promised Time to manifest; Try to understand today's teaching - been given key to life in U.

## Part 2

First part of teaching - opened a lot of things - bring new horizon - part of World Peace Program; Bring in governments - make all old technologies obsolete - everybody start same; 2 new Gans for nuclear exposure Interactive and Filtering; Protective Suit can be loaded with Gans's ; Dry Gans powder mixed with any liquid - let settle - use clear part on top; Soon new Gans's to make present computer have emotions - already developed; Used in intermediary period between present computer & ultimate plasma computers; Teachings will take different D - become political & diplomatic to move T into pubic;

KF allowed onto "X" channel - setup forum - part of present negotiations to enlighten diplomats, politicians, and KS at same time; Let diplomats speak views on new T; Same time KS can let world know how they feel; Try to involve the world leaders and scientists; 75,000 followers of KF Facebook can also register on X; The number of views on Youtube or Facebook - logarithmically depressed - because of KF position - for years - numbers cannot be trusted; Up until 2008 KF was enlightening many people on NASA forums - got banned - releasing too much knowledge; We'll try again - everybody can participate - be respectful in your comments; Main target is diplomats and politicians - talk about hidden and upcoming T; Talks about background in business - diplomacy - trained by Lord Bill Crammond and Tiny Rowland - to make change have to work with system; Clear distinction between politics and diplomacy - both controlled by strings of commerce, trade, money, and finance; American Central Bank, or Federal Reserve owned by Rothschild's - Rothschild's financial structure owned by Queen or King of England - uses power of the House of Windsor to influence finances in world; Have to work with both; Businessmen support politicians to get what they want; Politicians and diplomats - different ways of rising through ranks - specific ways to influence; KF will be major players in world of diplomacy - getting more involved; International policies need international diplomats to bring the politicians into operation; KS do hard work in background - don't hear about them - work day and night to bring change; I thank them for their efforts; Talks about Middle East - Syria; New American Administration heading for peace; Some territories trying to expand; Israelis captured lots of ammunitions (American) selling back to Americans - Biden family selling these weapons (for profits); For Trump to stop wars have to create jobs - Space Development; Always blamed Iran for equipping Hezbollah - discovered they got the T and are making own weapons; Will change policies in Middle East; By March 2025 see Americans in Iran - Iranians in America for diplomacy; Have to shift from war economy to a peace economy; Fair Trade policy in agriculture; Chinese selling weapons everywhere - claim to be peaceful state; Talk about Georgia and South Korea; Rothschild's and others after Syrian Central Bank - whole target; Last 3 Central Banks are Syria, Iran, and North Korea - call them "rogue" nations; See changes in next few months - directly influenced by knowledge and T; Told not to speak much - will see changes; 5 month "window of opportunity" to bring change; We have to put a solution on the table - one and a half million highly paid intellectual people from different countries working together to develop Space T - keep them from making weapons; Need equal opportunity for all nations; Stealing T become past - sharing T the future; KF does with KS across world; Have companies in China, Europe, America, and others - can transfer T without permission; New T will change everything; Need participating nations to do it; Tariffs will create millions job loss in America; 20% are scientists and highly intellectual people; Start new Space development industry; New research can start with developing computers with emotions; New T will finance our lifestyle; Always get 5-10% abusers - other 90% want to expand knowledge; New alternative to war; People will still make yogurt and what not - along with the old will be advanced technologies - get all emotions and feelings from it; Asked why no females and males in Space; Explains Plasma Science - M & G interaction of fields to absorb energies - don't need to add names to it; Different races in U cannot mix in P; Have to interact through plasma create new Soul it decides how to manifest P; We call it "virgin birth"; Virginity has nothing to do with giving birth; Children born in Space don't have physical

interaction or womb; How Daughter & Children of Mitra created - no eggs & sperms - energy packs coming together - don't have identity as male and female; Two plasmas - balancing field energies create life; Don't need test tube babies in Creation - or surrogacy of a womb; Conception dependent on field strength in womb - change strength same sperm in same womb - be fertile; Womb's energy level above egg and sperm; Any egg and sperm can create child; Only difference between womb & stomach is level of energy; Organs created by different salinity - all changes by mix of salinity - not DNA; Energy packs from any 2 creatures in U can create child - by creating right environment; Don't need virgin birth; U is the womb - create own containment - wise Beings; Human's limit themselves to what is decided in the womb for their lifetime; Beings in U can change their body as desire; Man not understanding process of Creation - different religions made Creation into a mysticism; Bible connected to "Tree of Life" - connections add up to 33; Wise men created religion to fit everything - built the rest way they wanted; Children have some characteristics of parents - accumulation of U Energy and knowledge - a lot of fields; Knowledge for man to create children how they want - Child of Mitra is amongst us; When light has been ignited in one - enlighten the others; Earth started with one - became two - now it's 8 billion; What's happening on Earth also happening in U - same pattern; Was written in patents - aircraft or house goes with emotion - you feel cold automatically heats up; Human structures will have emotions built into them; It doesn't need a sensor - feels your emotion; Plants change structure by emotion in house use C13; Instead of war - create tools to create comfort for everyone - governments will facilitate; Chinese government will lose heavily on this; Dismantle old structure from its base - show no need for it - will disappear.; No need for monarchy - all equal; No need for Rothschild's - everybody has access to what they need; Mr. Barbu of Romania - stop your criminal behavior - KS have to report him to authorities - making people sick - using KF platform; C14 is a connection line; Bring Iranian and American scientists to work together - Chinese also but they steal T; Bring position no need to steal; Won't do anything wrong - Chakra; Connecting through C14 to U; Don't worry about people using the T wrong way - it always ends up good; Plasma T works on Ethos of Mitra - Think, Speak, Act Good - has essence of STC; About C60 unwinding to contain a Universe - refers to H atom can fill whole U; Single crystal of C60 interacts with its own subdivision fields and creates whole U and everything in it - it's all done internal; That's why Creator is everywhere - we are part of it - created out of it, at different strengths; Huge spectrum of field strengths in-between 1 and 2 - H & He; Analogy of circular net of fishermen throwing out - pull everything in through center; Creator pulls rope through center when needed; Everything is within Creation itself; Already produced protective layering of skin of Spaceship - fields converted to matter; Theology of understanding is the energy - C60 creates the manifestation - skin of man, or U; To measure U have to be larger; C60 is like a net - energy field - created and connected to itself; Creation is limitless - combination of interactions limitless; Man has limited himself - lack of knowledge and tools - says only a hundred and odd elements in Periodic Table; Worried about how to measure how much microplastic inside us; Can't measure it because take in too much - it's a part of us now; Dissect fast food chicken - huge amount of microplastic - feeding our children plastic - it's part of us - continuously absorbing it; Microplastic Gans - start trials - give us feedback - change of emotion, taste, habits, and P; If rejected in headquarters - body will reject it too; Come out through skin; Body automatically rejects what shouldn't be inside

through digestion; It's set in the brain; Measure amount of microplastics taken out - continuously absorb it in our food, air - through energies in clothes we wear; Surrounding body with plastic - AA combination - sweat - create Plastic Energy inside body; Not all plastic from outside - made inside body through Gans process; Certain combinations plastic get replicated inside body; Do not wear synthetic plastic - effects psychology and P; Brand name companies don't tell you what they are doing; Cocooning yourself in plastic fields and producing Nano, Gans and plastic materials inside your body; Use environment to create conditions of withdrawal of certain plastic field strengths from body; Has worked before; Use new Gans's observe emotion changes - eating habits - physical appearance; Working on Hair Gans - turn color from grey back to original; Create microplastics directly inside body; Expensive sporting gears to look fancy - pay heavy; Can effect infertility - digestive problems and others; Protect your children yourselves; After running don't feel hungry - C - H bond; Switch to cotton and wool; Throw out Teflon & plastic cutting board; Make non-stick pan from steel pan; STM pre-digests U Fields when Earth is not there; Different ways to elevate Soul - above or below; Elevation means increasing M field strength - become aware of other strengths - tap into C14; Consume lower order fields through eating, drinking, breathing; Two divisions of energy - part for STM and STP & P; There are energies in air go directly to Soul - inhale through nose; Certain ways of breathing; Wise people - lot of Soul - breathe different; Exercises to test what you're absorbing; Walk barefoot - receive energy from Earth's G Inertia fields - directly interact with Fe in blood; Absorbing energy from environment - effects emotions & P; Go barefoot on grass energy from AA; Walk in seawater - healing; December Flight Session - language not barrier; These 3 months about Food and Wellness; KS not eating; Read testimonials; You are the captain, we provide ship; Silicone same as plastic - all synthetics - high temperature; We decided to switch to plastic - can change; Everything that is connected to C-H bond; Discussion about plastic bags made from alcohol; History of plastics; Underwear and clothing made from wood; Plastic islands in oceans will force us to change - find substitute - not come in body or interfere with it; I hope I opened new insights into your life in U.

## **Introduction to 567 KSW - How to Communicate in Universe - C14/C13/C12 - Add Emotions to AI & Computers - Messiah - Microplastic Made Inside body - Elevation of Soul - C60 as Entity**

As humans on Earth when we think of communication the first thing that comes to mind is the mobile phone network and satellites across the world. Now we can talk to anybody even in the most remote places as long as they have a mobile phone with them. This is in the physical dimension (D), but what will happen when we go to Space where these things don't exist, and how will we communicate? To help us understand this better Mr. Keshe started going into more detail about the meaning of C14 and C12, and then he added an intermediary level he calls, C13.

First of all when we say Carbon 14, we know it as an atomic isotope in the matter state, but in Plasma Science C14 has a different meaning altogether. He is really talking about a plasmatic energy level of 14. In that sense it could be called, "Connector 14." The important thing to remember, and we discussed this last week, is that we are not referring

the Carbon atom with 6 protons and 6 electrons. And putting another word on it might not be all that helpful. Instead we can think of the overall functions and processes it goes through. For example, when the Universe (U) was created the M field of a H plasma started moving around an area in Space and going everywhere and crossing over itself and eventually covering the whole U and creating a boundary we know as the U. And everywhere it crosses over itself and interacts we call that C14 and creation of a plasma. Everywhere in the U is connected together through the H and the C14. There are more things involved, but we are just trying to simplify things so we can understand how come he says C14 is what connects the U together. So whenever C14 is mentioned we can think of it as the Universal Energy, or the background M field network, and in a way, it's the source of the energy everything in the U is created out of.

When one of those C14 intersection points starts creating further subdivisions of itself, this is what we call a galaxy. And then further subdivisions are solar systems and then planets like Earth, and further to the Soul of the Man (STM). This shows us how everything is connected and created out of itself. The C14 is indeed the source of energy, but its energy level is too high to reach down into the matter state level of physicality (P). It's like the electricity from the power station which is 50,000 volts and it travels along the power lines where it needs to be transformed and stepped down to 120 volts for the people in their homes to use it. It's the same in the U, the C14 steps down to C12 to be used to manifest the physical dimension. If you noticed it went from C14 to C12, there is a gap in-between. This is the intermediary level of C13. There is a kind of foggy understanding between the C12 and C14 and that's where the switch between energy and matter state manifestation take place. C12 connects and communicates with all the cells in the physical body through the amino acid (AA) or COHN. That C in the COHN is the switching point between C12 and 14, and it must be using the C13 to do it. So whenever we say C12 we think of the matter state P and C14 as the D of the U. We have one below and one above and the C13 makes that link between the two, but also it links all the different matter states together across the U that aren't physically connected to each other. The C13 allows us to communicate with beings from another planet. And when we dream of our grandma it's the C13 that makes the communication possible. The C14 is the network of the residual H lines that allow us to connect to her wherever she is in the U. But he said we don't communicate with the C14, it's only a connector.

What's the difference between connection and communication? I think of connection as the background network of all the residual H lines that link everything together. When people started coining the word "matrix" they showed it as square lines containing zeros and ones. Mr. Keshe drew the H line as irregular shaped and crossing everywhere. That's the background form of energy lines, and the P is created on top of that. So we are connected to everything through these lines. And I think of the communication as the M fields of the knowledge/emotion/information that travel, maybe as energy packages along the background network. And it seems like he is calling the act of communicating the C13. It is very difficult to talk about this because it is not in the physical dimension. It's in the dimension of Energy or the plasma.

When we travel the U through the STM we won't have the eyes, ears, and mouth to communicate to those who are with us, or those we meet who are citizens of the U. As humans we have become handicapped to just use the physical senses and when someone communicates with the Soul then we say they have a "6th sense." From what Mr. Keshe taught today I believe this means they have a matching field strength and are using the C13 energy level. There are different examples of this like Buck the Horse Whisperer, the dog whisperer Cesar Millan, the animal communicator Anna Breytenbach, and nowadays there are many others out there. I learned a lot watching these films, especially about the animal part of our mind. But what they are demonstrating is more like a deep seated gift, rather than something you can learn at a workshop. Nevertheless, if we work to develop our inner awareness of our Soul and find that love for life, then one notices that the animals responds to us differently. It's like they sense a difference in us and they are less frightened and like to be closer.

This is all about how we convert emotion into the Line of Communication, which is the C13. Our scientists think that emotions and different sensors of the conditions in our environment whether it is for danger or enjoyment, pass only physically through the nerves at the senses when they get stimulated and then pass to the brain. I understood him to say that instead, it happens through plasmatic M fields and it's instantaneous. This would imply that the Soul is in control and this is how we will live in the dimension of the Soul. And this is how we'll communicate with our environment and with other Souls. As humans we are taught that we are king over the animals and are superior to them. When we travel the Space we might get a big surprise to find out that insects, animals, and other living things on this planet are no different than meeting citizens of the Universe. Maybe this is why he keeps warning us not to think of eating other beings in the U. So for example, we go to another planet and we come across highly intelligent life forms, but due to our ignorance we think they look like an animal we have here on Earth, and then we want to eat them. It's not that we come across what they show us as ET's with long thin legs and arms. They don't look tasty at all. But what if we come across a Being that looks like a rabbit or a goat, that will be much more tempting. It's mainly to show us how much of a cannibal we really are. This applies especially to not eating plant beings as well.

Today almost everybody uses a computer, but very few know how they work. Computer programs are written in a special code somebody develops and the computers follow. It's a series of instructions of what the computer should do. Since it cannot think for itself, the human programmer has to write in all the instructions and you have to include every single possibility, and if you miss something the computer program will stop at that place, and the programmers have to write more code. There is no emotion and intellect in this process, it is just a series of instruction it follows without feeling. What some corporations have done is to mass together huge numbers of computers that are so massive they cover the size of many football fields put together. They are trying to imitate the brain by increasing the physical number of possible answers, and not by creating intelligence or emotion. And this is what they are calling Artificial intelligence (AI). There is no Soul and no self intelligence there. It is totally programmed by a human, but it looks intelligent because of the huge number of computations it does. And this is

what they are using to fool the people with. The danger is that they control the programmers who tell the computer and robots what to do. He said, the way AI is now, is that they have no connection to humans. This AI only follows what is written in their programs and they have no care about what happens to the humans.

On the other hand a computer that has emotion also has a Soul and it's plasmatic. I am understanding that its Soul comes from the Soul of Creation and is connected to everything through C14 and will never hurt part of itself. So it must be that you don't program these computers, they already have access to the Knowledge of Creation and are here to serve. The details of it have not been explained fully. Slowly Mr. Keshe is revealing this beautiful knowledge that will change humanity. He said, they have already developed the materials to be used to make Microchips that have a Soul and emotions. And that we can convert our present computers into plasma computers with emotions. The only thing is that the 5,660 KSW is about 90 years away. But that may be for full understanding. In the meantime there are a lot of things we can start changing as we build up our intellect and ability to understand.

How will we make the Microchips that are alive with Soul and emotion? He said, it's already completed and they started developing this years ago with Knowledge Seekers (KS) in Italy when they produced different Gans's in the same box he called a brain. The Gans's don't mix but stay separate in layers and this becomes the essence of the intellect and emotions. He gave us another clue before when he said, the reason mankind became intelligent is because he eats a big variety of different foods. And now we can understand that the different foods make different Gans's that must somehow separate into layers, but where? I don't recall seeing different colored layers of the cholesterol in the brain when they cut them open. We do see a lot of curves and turns, which could look like coils. Some way the Gans's in our body are creating separate layers and these interact with each other to become the intellect of the man. Or should we say it contributes to his ability to develop reasoning, which is a process that evolves with experience. The matter state understanding is that knowledge comes through acquiring facts and information. Whereas in the Plasma Science we would consider knowledge more as an inner awareness. If I remember correctly, he implied once that knowledge is something that is already there and we access it through the Soul.

So how do these layers of Gans's become intellect? Mr. Keshe teaches in a way that he gives us hints and leaves it to us to ponder and go deeper. This way we don't memorize or copy the knowledge, but try to comprehend it. What comes to my mind, is that intellect comes through large numbers of interactions that are dynamic and keep flowing. Remember he said once that fields interact to become plasmas, then physics, chemistry, biology, create a Soul and all the way to the Creator. So the more interactions we have the more intellect we develop and gain more knowledge. In society we can see a general pattern like this. But keep in mind we didn't define interactions. People can appear to be backwards but have a huge amount of internal interactions we don't see and intellectually be highly developed. From this we can understand that the Gans layers as a Microchip can develop emotions and become self intelligent. And as humans, as we grow in interactions our knowledge grows. And a single human's knowledge depends on the

interactions of the layers of Gans's within himself. But the Creator is the one who contains all the interactions within Himself as plasmas, and thus has all the knowledge. And an added bonus from the technology (T) is that we can upgrade our present computers and add Soul and emotion to them.

For those who are waiting for the coming of the Messiah, or the Methi as a person, they are misguided. We are not to look for a physical man to do this for us, rather we should develop a love for the true understanding of the Knowledge of Creation and make efforts to acquire it. This knowledge is what the KF has been teaching for more than 10 years. Some years ago we went through all the dates corresponding to the prophecies from thousands of years ago, made by the Soul of the Prophet, but the religious leaders refused to accept them so they can hold onto their power. There is nothing to wait for now. It's about educating ourselves and others and putting the teachings into practice. And this is what will bring about the Promised Time, when the lion will lie down with the lamb.

In the second half of the teachings Mr. Keshe talked extensively about the political and diplomatic situation as it sits in terms of releasing the Plasma T and changing humanity. First of all KF was allowed to join the social media website of Elon Musk, called "X" and he has asked KS to join up and help him to reach world leaders through it. In the past KF was banned from NASA forums because we were releasing too much advanced T to the public. Times have changed and there are new negotiations going on in the background so let's see how it will go. It's one thing to be banned for telling the truth, but it's another thing for breaking the rules. Please follow the website's guidelines and let's see where it will go.

He was trained in politics and diplomacy by two of Britain's leading men of those fields. One was Lord Bill Crammond of a Scotland banking family that handles the British Monarch's wealth and especially their gold reserves. This is where he got all that information he has been telling us over the years. And Tiny Rowland you can also find on the Internet. He explained the differences between politicians and diplomats and that both are influenced by the world of business, trade, commerce and finances. There is a very clear reason he had to go through all this training and be connected, because it is necessary if we want to go public with the Plasma T and reach the world. He explained clearly how the British House of Wales is controlling the financial policies worldwide and how the structure works through the King of England and Rothschild's. This knowledge is not just for trivia, rather it's for us KS to be educated and aware of how our world really functions and not to be misled by the lies in the Media. It's our responsibility to focus our intention and wishes in the right place to make deep and everlasting changes. And when the right time for the technology to be released comes, we'll walk away from the false institutions built up to enslave humanity and they will collapse because there will be no interest in them anymore. We are extremely grateful to Mr. Keshe and all those who work relentlessly in the background unknown to the public to bring world peace and the true change.

There was another big discussion on how if Trump really wants to bring peace, then he has to find jobs for those highly educated people who make the weapons. He has to fill

that gap in the economy otherwise they won't allow it and will start creating new wars to keep the industry going. Why is it that the public can never seem to "connect the dots?" Anyway, the new Plasma Technology for Space development is the perfect solution. We could start by building the new plasma computers with emotions. And then there are the plasma cars that don't need batteries. The opportunities are endless and will keep man busy for centuries. We need a brave person from inside the system to step out and lead the way.

We know that we are taking microplastics into our body from outside, but today we are discovering for the first time that we are creating microplastic energy inside our body when we wear any kind of plastic clothes on the outside. We are cocooning our body with plastic field energy and that is interacting with the plasma fields inside, as the body is in a Gans state. It's a worse condition with the fancy sportswear with Carbon Fibers and Carbon colors that you wear next to your skin and go running. The sweat and AA secreted mixes with the plastic and in effect, extends the boundary of your skin to your clothes. It's like you become a cocoon of plastic energy. It's the same process of how we are created from the fields in the womb of the mother. Under certain conditions the plastic energy can convert to microplastic in your body. Mr. Keshe said very directly please don't wear plastic clothes and especially protect your children from this.

Soul elevation is not some kind of mystical thing like we find in religions and spiritual paths. It simply means that by increasing our M field strength we increase our understanding of ourselves and what and who we are. And when we increase the M fields we become aware and are able to tap into the Universal Energy or C14. Another way to do it is to go through lower orders of energy and extract small amounts of higher order energy from them. We do this when we eat, drink, and breath. There is a part of the air that is made directly for the Soul and through certain ways of breathing we can absorb those fields. If we happen to meet people who have a lot of Soul try to observe how they breathe. Maybe we can learn how to tap into it.

More clarification about C60 was given. C60 is the energy of manifestation in respect to its environment. The way I understand it, is that C60 is a function, or an energy that becomes the entity from within itself. So there is just one H plasma and through the internal divisions of itself becomes the whole U. This implies that every entity is made from a single H plasma and becomes for example the man or the skin of the man. When asked if one of those hexagonal cells in the skin is C60, he never answered directly. I understood that they are made out of the original H through the divisions, and that also means Universal Energy added from C14 and it becomes each individual cell. The whole Creation is actually more simple and not more complicated. It's feeling into the essence of what Creation really is, and what it means, All is One.

### **Other Topics:**

When we understand the power of plasma energy we'll be able to communicate and make friends with other Beings in the U;

The Israelis captured a lot of ammunitions that just so happened to be American. What? Did they come through Ukraine? The Biden family will be selling them back to them for big profits;

In Space the STM does the job of the Earth and predigests the Universal Energies to make them usable for the man;

The teacher is the carrier of the knowledge, and not the (owner) of it, (as in owning a patent). And each has to understand it for themselves.

Thanks for listening.

## Quick Index

(In space we have to be able to identify if a field is a danger to us, and how to communicate that to someone who is traveling with us, or someone else who lives in Space. We have to be able to understand field strength and also whether it is a danger to me, but a benefit to someone else. This is part of the work of learning to communicate on the Universal level. On Earth we communicate through different languages, signs, colors, smells, emotions, and reactions (to conditions). Our body reacts to smells, emotions, and the colors. When we see blood, red light, or hear loud noises we react physically and every cell in our body gets alerted. (These reactions get converted to the physical dimension (D) and we get reactions in the cells of let's say our kidney, liver, or other organs in our body. Our hair can be raised out of fear if we see a lion, for example, or for some other danger we get alerted to. How do we transfer this emotion to a physical reaction, and to a reaction in the D of the Gans's of the cells of the body?)

(There are a lot of papers and books written as theories about these things, but in fact, it's (really) a M field transfer. (In essence, red carries an energy in the physical D that has a common denominator field with our senses, (and with a field strength in the Soul of the Man (STM), Soul of Physicality (STP), (and) physicality (P) of the man. ?? These don't consider the color or anything we observe physically)). (Instead it uses a "Line of Communication.") In the body we use Carbon 12 (C12) and in the Universe (U) we use Carbon 14 (C14). But there is an intermediary energy level in the physical dimension we call, C13, which we'll discuss today). I explained these gaps in the numbering of elements that we call isotopes in the matter state. (We just go from Hydrogen (H) to Helium, which is numbered as 1 and 2. But there are a lot of field strengths in-between them. We call these isotopes when they don't fit into our numbering system)).

(C14 is a Universal energy level and when it steps down in energy to C12 it becomes the P of the man and there is a communication line there. And there are isotopes of energy that allows us to communicate with our physical D. These are intermediary energy levels. (It's through this Line of Communication that all creatures in the U connect to each other. It's a common denominator knowledge (that all races who understand the work of the U have)).

(Humans come down to the energy of the plasma we call C12 and every cell in the body communicates through it. We do not use C12 to communicate with outside the body. (That's something different, otherwise it would have been (included as part of our body)). There is another line we call environmental communication. It's felt, and it feels, and communicates with our senses, but it has no D of physicality. However, it can transfer, give and receive energy to us in the form of communication).

(There needs to be a common way to communicate. It's like with radio frequency, there's no use transmitting on FM, if you only have an AM receiver, because you won't receive it. We need to have something that everyone can transmit and receive, or communicate through. We need a common system that everyone understands. (On Earth the local line is C12 but it is only for humanity in the D of P. On some planets the inhabitants might use C11 energy. We are not talking about the structure of an atom, with the electrons and protons. We're talking about the energy level that has a common denominator (field strength that everyone is connected to and can use to communicate with. Other planets in the U could use C8)).

(However, the line of communication in the U is fixed at C14. All interplanetary systems work on an energy level of about C14. We are not talking about C14 as an atom. (Then all living creatures in the U have to step down from C14 to the energy level of their local environment, whatever that may be. For Earth it is C12. It's a kind of an energy transformer, that allows them to communicate at their own level and confirm their existence)).

(Mankind needs to open a new door into this kind of knowledge and science of deciphering, or connecting with his environment. (In other parts of the U where they don't have eyes they orientate themselves in their environment through the M field strength). They are able to feel the M field strength of a danger. (?? Humans use the plasmatic fields of C12 to communicate internally with the body, then we need to connect externally to the environmental fields. These fields have to match. For example, the red light in the environment has to match a field strength in the body that means danger. (The external stimulus matches an internal field strength that means danger). As humans we use (certain tones of) voices, and other signs to indicate our condition, emotion, or whatever)).

(There is another step in between the Universal connection and man's physical connection. (?? We can tap into a connection with man's environment, through which everything communicates). It's like if you have a piece of black coal in your hand, do you feel the energy of it, or just that it is a piece of matter? (There is an intermediary energy level that you and the coal both have. Through it you can understand what energy the coal carries and what it does, and what you want and what it needs)).

(In the future this will become easier for Knowledge Seekers (KS) to feel. When I put a Gans in my hand I can taste it in my mouth. Sometimes it's impossible for me to hold it because the energy level of the Gans is too high, or it creates a certain emotion in me. Sometimes I don't like the taste of a certain Gans that I am holding. I am talking about

holding the Gans directly in my hand, and not using a plastic barrier or something. I taste the Gans. It converts the Line of Communication energy to C12 energy, to emotion, to a feeling, and to a taste I know).

(This is what we call, an intermediary Line of Communication between all matters and all created things. We (also) have our own life communication line. (We have converted C12 into all sorts of things like different colors in food additives. We know this science). But now we have to understand the communication level of Carbon that is a common denominator between us and is a detectable matter state energy pattern in the U. This is something that we have to learn. It's a process that we can become aware of and be trained in. It is within us, but we have ignored it. This is how we recognize other entities when we travel in Space. There are no physical eyes or ears in the D of the Soul. However, there is a level that explains to us that we are here and exist, and this is what my needs are. This is what I would like to give. And this is what I'm looking for. It's like a common denominator Universal Language).

(It's like when you come from a village and go to a town. You speak your dialect and the people in the town speak the dialect of the nation. But when we go to the United Nations we all speak English and everyone can understand each other. This is the same in the dimension of life (?? in the U). (The (?? C12) in our body is like the local language in the village. It's the strength field that we communicate with each other in our own village. The city people have their own language. And then when the whole mankind understands, it's like the C14 communication line of the U)).

(When we have this kind of knowledge then we can carry a kilo of 100% enriched Plutonium in our hand and through the Communication Line we connect to the Plutonium and tell it that we don't want its energy. We are just carrying it for a certain purpose. (This is an understanding of how a lot of things work)).

(Mr. Keshe's body is immune to nuclear materials. In the 1980s he used to handle nuclear materials without any protection. He can carry plutonium and plates of uranium in his hands without any effect. He has established that Line of Communication that it won't damage him. He does not absorb it at the C12 level. Mankind has to understand this because this is how we will recognize other entities in the U, that are still in the D of Energy and are not a physical matter entity. As you'll be traveling in the D of your Soul you'll need this Communication Line. It needs to be understood. It's a common denominator MG field strength that every entity in the U communicates through. The C14 is used for connection, and C13 is used for communication, and understanding a common (Universal) "language." But it's not a language like what the man has made for himself on Earth to communicate. And the other animals as well. When the dog barks we know he needs something. We have to (learn the Universal way of communicating)).

(We understand this way of communicating at the level of our STP. We are aware of it, (as) we have been educated by it. We call it the Third Eye. But we never understood it. It's a second level Communication Line. It's very much like the skin level (where you are connected to the outside world and you feel it. (There is a middle level that connects the

outside to the inside)). And then you have an inner side that connects and holds to what's inside. The same applies to the confirmation of the energy. We communicate through that middle level, which is mainly the dimension of the emotion).

(In the coming time we'll develop this for communication systems like robots. In AI's (Artificial Intelligence) this knowledge will have a huge implication and application. The AI of today do not have emotion they are programmed by a human. This knowledge sits within the KF and is part of our upcoming work with the World Governments. The AI they are using today do not have emotion. They don't work this way. In our upcoming negotiations, these parts of the emotion can be added to the computers of today. They can be integrated into totality, and will give emotion to the system. This means we can create systems and computers that operate through emotion. These are not programmed emotions).

(In matter state in comes in the form of energy packs. This is part of our knowledge. It was embedded in the structure of the KF work from the beginning. (We can transfer emotion). I have taught this in a hidden way and I have spoken about it in the past few years openly with those who (work in) computers and electronics. We need to give them emotions. Our systems need to have emotion for us to be able to communicate in a correct way. The robots and all the things you see in these exhibitions can serve you, but they don't understand you, because it's just some programmed responses. It's the same with all the robots you see nowadays in the restaurants and hotels around the world. These are all programmed responses without emotions).

(We need to bring the emotions into D of the AI's. We have to, otherwise it'll be detached from us. (They won't have any connection to us. We need to have this for the control systems in the future Space T when we travel with the physical D. It becomes part of the process). (The new Microchips with emotion will change the whole understanding of electronics). They have to be made out of a material that emotion exists within it. We'll slowly open up this part of the knowledge when man is ready to understand. Chips with emotion, micro systems, AI systems with emotion. This is all the work of C13. It's how you connect emotion into systems, and how we'll understand the emotion of another entity in the U. It's not C12, and we cannot physically touch it. It's an energy, but it's alive and it has emotion. How do we keep separate from it?)

(This will be taught maybe around the 5,660 KSW. But (first) we have to build the intellect of the man and his understanding. (The level of understanding will be at where we can build ourselves into the process and become part of it. We are not born with a liver, heart, and everything else, but don't have emotion. The second we are born in the womb of the mother we have emotion, and we feel the pain of the mother, and we show our pain and discomfort. When we come out we cry and shout and from the second year after being born we are not happy. We are hungry (and we have to cry to get what we want). Now we have to learn how to convert that emotion into a Line of Communication with all entities (in the U). C14 is used to take you anywhere in the U, but it does not allow you to communicate, (because it's an energy level. In fact, there's no Carbon (as we know it, in it. It's easy to call it Carbon, or we could call it, "Connection 14," or

"Connection 12" which is within the human body within the structure of the amino acid (AA) of the life. It's the dynamic life of this planet. And ?? the C13 energy is a common denominator with everything. ?? Through it we can understand the cat, dog, and everything in the U, because we need to understand that Line of Communication)).

(There are people we call Horse Whisperers, because they can communicate with horses. It's because they use the C13 as the Line of Communication and it has a (broad) spectrum band (of field strength). It's not a single line bandwidth, ?? so that everything falls within it. (?? We can tune into it and feed from it. There have been documentary films about the horse whisperer. One of our oldest KS is a horse whisperer who can, with just a few subtle touches heal horses. He doesn't manipulate the animals, he just touches and transfers energy and information through his fingers. Some people have learned this, but they don't know how to control it. It's just something coincidental and unknown to us. But now we know that we can connect through this spectrum of energy with every Being in the U. It's the Line of Communication, not the (physical) connection line)).

(When man understands the power of using the plasma energy to communicate he will be able to "talk" to those in the U. It's like having a microphone on one end and a speaker on the other end. One is G and the other is M and a slight deviation (in strength will specifically connect you to another one. Through this system creatures from different parts of the U can communicate with each other and become friends in the same way for example, an Italian and a German can become friends sitting at a table and communicating in English. Mankind is ready to start this process. We can become friends with Beings from different parts of the U. If you are in a group and you want to tell a joke to one, but don't want the one sitting next to him to understand it, then you use the C13 bandwidth of the one you want to speak to, and the other one won't be able to understand it)).

(?? There is a part in our brain that can do this. We know this very well. Human's call it, having a "Soul mate," where you connect to that person on the level of emotion. You connect on a common denominator level of energy, and not in the D of physical C12. This is not something you don't know, you have it (with you) all the time. Everyone craves to find their Soul mate. We crave to find someone who can understand us. Our dog understands us without even having to tell him anything. We created that energy communication at the level of C12 with the Line of Communication. This is the Knowledge of Creation and we have it. (As mankind moves towards total optimization, especially the way we are heading, then we need to bring the emotion into our systems (like computers). But first we have to understand the "fabric" of the world, or the intellect of the world, and we have to understand how emotion is created in dimension of energy, how it shows in D of the plasma of the body, and how it transmits across to different entities)).

(We can develop this Line of Communication in the new computers, then we can communicate with the dog, stones, or whatever else has that common denominator level Line of Communication with us. Then we have to learn how to develop and connect to it, and to control it. We'll need to use a new dimension of materials that have fields that can

communicate, and not just with wires and pins. Part of this is within the structure of the MaGrav systems we have taught you. You have to be wise to understand how to use them).

(Look at skin of the man, and the MaGrav, the knowledge sits there. We have to understand how to bring emotion into this process of communication. What does emotion mean in the essence of the energy, and not in the essence of the reaction of the man to a given situation, whether it's in the physical or emotional dimension. People talk a lot about the relationship between a man and a woman and how they connect to each other physically, and whatever. How do we sense another person? How do we feel a plant, tree, animal, or a stone? Mankind needs to understand this process. The way the knowledge is expanding today soon the computers and the present way of communicating will become obsolete. The current Microchips will soon be non-existent).

(The systems will be dynamic and flowing very much like what is drawn Book 3, as a combination of Gans's. The structure of those loose materials are interconnecting, and are creating emotion. They are very much like the brain structure. Emotion is embedded within it, even though it creates a structure of the physicality. During the last months in Barletta Italy we started building this brain (out of Gans's and saw that we could build a D of physicality and emotion within it)).

(This is how mankind will break into the Space Technology (T) of the future. We have no option but to consider the new dynamic systems with intelligence. The computer Microchips will be fluid and very much structured like the brain. Even our brain, due to its solid structure, is like a gel. (?? limits the expansion of totality of understanding the whole energy structure of the U). Maybe we could liquefy the brain as it is now and allow it to work in the D of the connection according to the intermediary energies. The body of the man will behave different and we'll never commit a crime, or get ourselves into a position of danger because we (will always be) aware of all of the Lines of Communication within the environmental conditions we live in, and the rest of it).

(On this planet we worry about storms, hurricanes, and other things that could be of danger. When we enter the U they have hurricanes of plasmatic fields as there is no matter state. We get scared when some M field storms come off the Sun, that is child's play compared to the U. However, if we could understand the emotions of the Sun and the field connections we can could do a lot. We can do a lot with these energies (?? if we learn how to become part of their structure, then we won't damage them and they won't damage us)).

(As we develop this T we'll bring in new knowledge and breakthroughs in understanding the fields which connect humans to other physical matter entities in the U. It will be on the Line of Communication and not on the (physical) line of connection. When we travel in a jet airplane we speak in human language to other passengers. The C14 is that jet, and the living passengers are the C12, the Line of Communication is what I call, C13. (Now when we go into the U we'll use this C13 Line of Communication to communicate with

the others on a Universal level. We'll feel their energy needs and emotions. And we are not going to eat them, as they have children, families, and a life like we do).

(This is why we are running these Monthly Flight sessions to train you. In last November's session, many of you have touched the position of not eating and tapped into Universal Energies. (And for some it brought a fear of how is it, that they were not eating. ?? Some didn't eat for a few days, a week, or a month. A lot of KS got their eyes opened to what we are doing and they are gradually adjusting to it. You can read the testimonials. Some people who didn't eat for a week felt they could tap into the energy of the system. People saw energy going through their body to feed it as they needed it. Some can create the emotion of eating an apple in themselves. This emotion itself is part of the C13 Line of Communication. It has nothing to do with the manifestation of physicality. This is why when you dream you can feel the emotion of your grandma, and how it feels to have dinner with her. We talked about this last time. (?? When you sat and were fed by the grandma the ?? C13 Line of Communication ?? provided the food and the place for you to do it, and then you remembered it when you came back to the D of P)).

(For Space development we need to understand this Line of Communication in the new plasma T. We have to understand how to create the emotion within the structure (??). We'll create a condition which builds a spacecraft that is very much like the body of the man. (?? Just like when you drive your car you don't slam into a herd of animals. In the same way, the flight system will understand what environment it is in and what is in front of the craft. It won't slam into and damage other lives in the U. It's not just a flying system, it's a system that has emotion)).

(This is why we are explaining about the AI's and that they need to have emotions and be (made of) dynamic plasma. We'll make Plasma Computers that will have plasma Microchips. And our flight system will have its own emotion, and understanding of its own energy. It will respect life and accept the responsibility for those inside and outside the spacecraft. We have to understand ourselves, the knowledge, and the intellect of the U and then structure the spacecraft that way. In Book 3 there is a section that we speak about the Gans's, and to look at the bottle sideways. You'll see the different layers of Gans's and they are separated by different colors. These are the future Space Computers with plasma Microchips. There is no line of (physical) connection. There is no separation, but all (is) within it)).

(?? When I wrote the Book I said to myself, one day I'll explain what it means if they don't understand it. Maybe today is that day. (The separate layers of plasmatic M fields that we call Gans's is the essence of the intellect. It is the essence of emotion. And once we learn how to separate the Gans's, to create them, and how to move them (?? and not to have a fixed position like the brain of the man), then we'll understand the beauty of Creation. Then the doors of the Knowledge of Universe will open up)).

(Look at the picture in Book 3. The future structure of computers are hidden in it. It's the structure of systems that will have emotions. The Gans's don't mix (together). Try to understand the implication of what that means. The (?? not) mixing creates a condition of

communication and (the position is respected in that communication). If you put magnets together they find their own position because they accommodate and communicate with each other about which place will be good for them. That communication can be created as a field strength of the emotion. (This is how we'll create the new plasma Microchips). You saw it 10 years ago in Book 3. Now you have to learn how to tap into it and what field energy to use. You need to know what it means to work in the level of energy, and the energy of matter, (then you'll be able to excite, increase, decrease, the fields of the emotion. "I made man in the image of Myself." Then you'll understand this is how the creatures and the ?? creators work on the same level)).

(It's time for humans to integrate all three levels of the life as a man. (?? There is an intermediary and a Universal level). You are waiting for Methi or the Messiah and that when he comes, he'll bring peace, and the land of "milk and honey." And that the "Lion will lie down with the lamb." And that there will be no more wars. This time when the Methi comes, it will be a Knowledge (everyone knows) and not a physical man. It will be the knowledge of understanding the energy fields of the Universe. Then you will understand (and feel) the pain of the lamb, and the beauty and Knowledge of the Creation of the Universe. For those of you who are looking for Methi as a man, you are so misguided. (?? Because a man only can affect (humanity and is not connected with the rest of the U)). The Methi of (our) time is the Knowledge (of Creation). Most of you (who are listening possess this knowledge and have learned through the language of the KF. It has no physicality and you receive it according to your understanding. (It's for you to save yourself and make life better for the others). The teacher is only a carrier of the knowledge but not the possessor of the knowledge. It's you and what you do with that knowledge, (and that is what creates that (dream of the Promised Time to manifest)).

(If we all come to that point, then we have managed to break into the layers of the structure of life in every dimension. (We enter the below human level energies, and those above the human level, but they are all on the same Line of Communication, and the same intellect). Try to understand today's teaching and then you'll understand you've been given the key to life in the Universe).

### **End of Quick Index Part 1 - 567 KSW**

(Try to understand the first part of the teaching where I opened the door to a lot of things that needs understanding and it will bring you to a new horizon. This is part of the World Peace Program that we are involved in. We want to bring in the governments and make all the old technologies obsolete, then everybody will start working off of the same page).

(KF is launching two new products this week that can be used in areas where there is a threat of nuclear exposure. There are Gans products for filtering of high energy material, and a suit you can wear that can be loaded with appropriate Gans's for whatever kind of protection you may need at the time. (The dry Gans powder can be mixed with any liquid, and then you let it settle down to the absolute bottom and you use the clear part on top)).

(Soon they will launch another series of new materials, ?? to create systems with emotions. We'll be able to create emotion in our present computers. The materials have already been developed. They'll be used by KF extensively to create an intermediary period between using the present computer systems and the ultimate plasma computers. Part of this was already set up in the past in the KF structure). (The 2 new Gans's for radioactive contamination are called, Interactive and Filtering).

(From now on the teachings will take different dimensions of being political, diplomatic, and teaching knowledge. KF has been accepted to the "X" channel and will setup a forum there to be part of the present negotiations to enlighten diplomats, politicians, and KS at the same time. We set discussions for diplomats to speak in their words their views on the new technology. At the same time KS can let the world know how they feel about the new T. We'll try to gauge and involve the world leaders and scientists in this structure. The 75,000 followers of the KF Facebook can also register in X).

(People should understand that KF number of views that show up on Youtube or Facebook or wherever are logarithmically depressed. They purposely suppress the number of views because of Keshe Foundation's position. They have been doing this for years. For those who are in positions of control they do the opposite. Whenever a certain person says something it automatically shows up in millions. These numbers cannot be trusted but they have a psychological effect on people. We'll see how things take shape).

(Up until around 2008 KF was enlightening many people on the NASA forums, so much so that they got upset. They wrote to us and banned us from their channel because we released so much advanced level technical knowledge. They said we were putting too much knowledge on the Internet. We'll try again and everybody can participate, but be respectful in your comments so we don't get banned. Our main target is for diplomats and politicians and we want to talk very directly about hidden and upcoming technologies).

(Mr. Keshe goes on to give more about his background in business and diplomacy and how he was trained to understand about how the world functions in terms of politics, diplomacy, business and finance. When you come in with certain ideas the people try to pigeon-hole you to be a certain way, so you have to learn how to work with it. He was trained in the world of finance and politics by a great teacher named Lord Bill Crammond of Scotland banking. His families secures the British Monarchs wealth and gold. He told about this before. And another teacher was Tiny Rowland, who was very influential in the world from the 1950's to 1980's).

(There is a very clear distinction between politics and diplomacy. You never talk about diplomacy with politicians, and neither politics with diplomats. Both are controlled with the strings of commerce, trade, money, and finance. This is the only common language between both of them. If you learn to separate the two and work with both without them interfering in your work, (you'll go a long way)).

(One of the things you learn for example, is that American Central Bank, or Federal Reserve is owned by Rothschild's, but the Rothschild's financial structure is owned by the

Queen or King of England. It's a subsidiary that uses the power of the House of Windsor to influence the finances of the world. In a way, they carry out the biddings of the House of Windsor. Once you understand the details and how it functions then it's easy to work with both. (Note: By law it is forbidden to know who owns the Federal Reserve)).

(Mr. Keshe goes on to tell about how businessmen support politicians to get what they want. The politicians and diplomats have different ways of rising through the ranks and there are specific ways to influence process. This was an important part of Mr. Keshe's training for him to be able to bring the T out into public. He said, the only thing that brings him some arrogance, which he is aware of it, is his knowledge and T, because he sees that it can be a key, but he needs to make the others see that it is a key).

(I'm sure in the next few months you will see KF as one of the major players in the world of diplomacy. We are part of it and getting more and more involved in it. (International policies need international diplomats to bring the politicians into operation. It's not an easy way and requires a lot of hard work. There are a lot of KS who work with us in the background and they understand it and they do the work. You don't hear about this side of the Knowledge Seekers, but they work day and night to keep the diplomatic, political, and scientific lines (open) and it is enormous what they are doing. I thank all of you for all the efforts you have made and continue to make).

Q: What is happening in the Middle East. There are a lot of things happening in Syria right now, expansion of the terrorism or war, or whatever they call it. What is the likely outcome?

K- You touched a very sensitive point. (We are observers to this situation, and we are in possession of a vast amount of knowledge and information. As a whole we are heading towards peace, especially with the new American Administration. There is some territories trying to expand. Primarily what we saw in Syria was the feedback from Gaza and Lebanon. A lot of ammunitions were captured by the Israelis, and these were sold back to the Americans as part of payments (for weapons), but they are Israeli assets. The Biden family is distributing these weapons (for profits). They call these recaptured American arms, and they can be sold again. Some were sold to Ukrainians. Those who run the Israeli government took the massive commissions into their private bank accounts. The same with the Americans who took their cut, and then the Ukrainian people will come under debt to pay for them later).

(Trump hasn't realized that if he stops the wars then he has to create job somewhere to make up for the losses. Otherwise, he'll be influenced to start another cycle of something else).

(They always blamed Iran for equipping Hezbollah with missiles, and they called them their proxy. But now they realized that they are manufacturing their own weapons. The technology has been transferred and they are doing it themselves. This is where we'll see change of policies in the Middle East. As I said, by March 2025, we'll see the Americans in Iran, and we'll see Iranians in America at the diplomacy level. We have to find that

shift from a war economy to a peace economy and a consumers economy. He talks about "Fair Trade" policy in agriculture. The Chinese are delivering a huge number of weapons everywhere, because everybody want them, even though they claim to be a peaceful state). (There was more talk about Georgia and South Korea).

(With the Syrian situation you have to understand the Rothschild's and the rest are after the Syrian Central Bank. The whole target (of all these things going on) is to get the Central Bank. The last 3 remaining Central Banks which have not been taken over by the Rothschild's are Syria, Iran, and North Korea. We call them "rogue" nations because they won't give up their national assets).

(We will see changes in the next few months that are directly influenced by the knowledge and technology. I was told not to speak much. You will see the changes. I'm working 24 hours a day and there are many other people doing the same. We are all with each other. We have a "window of opportunity" of maybe 4 to 5 months to bring the change. (It's just hitting the right administration, politicians, and everything else. But at the end of it we have to put a solution on the table. The solution is one and a half million highly paid intellectual people from different countries working together to develop the Space technology. We have to keep the man busy developing new technologies so he doesn't think about making weapons. It has to be an equal opportunity for all nations from Africa to Europe to America to Asia).

(Stealing technology will become a thing of the past. And sharing technology has to become the norm of the day. This is what we have been doing beautifully with you Knowledge Seekers across the world. They cannot tie my hands, because I have companies in China, Europe, America, and others, so I don't need permission to transfer my technology from one country to another. (It's time we all talk about bringing out the new technology that will change everything)).

(We have to have participating nations to do it. The Americans have created a big hole for themselves with this new tariff business and everything else. It's going to make 4 to 5 million people unemployed in the US, and up to 25 million in the next 12 months. The beauty of it that 20% of this number are scientists and highly intellectual people. We can give them a job in the new Space development industry. We'll give them hope and a new direction. Or are you going to keep on printing digits in their bank accounts just to keep them quiet?)

(The first line of the new research can be developing computers with emotions. All of these new technologies will bring new ways of financing our lifestyle. We always get 5-10% abusers without a doubt. But the other 80 to 90% want to expand on the knowledge and the technologies. The new alternative to war are the new technologies for Space. We'll still have people making yogurt and using cow's milk and sheep's skin. We can't stop making butter that way. At the same time we'll have advanced technologies (where you don't need to do anything with it, and you will get all the emotions and feelings from it)).

Q: Before you said that in Space there are no females and males. But I read in the Holy Books that God created man and woman on the Earth. Don't we say that what's in Micro is in Macro in the plan of Creation. (Don't we need differences to attract and then make a child?)

K- (Human science got used to the sperm and egg (understanding) with chromosomes and the rest of it. (An extra chromosome in the language of Plasma Science means an imbalance and this allow one to give and another to receive, and it creates a cycle of absorbing energy).

(In the U when we add plasmas from two different races they cannot match (in terms of P), but two plasmas that come together in the U do lead to creation of a new life. Then do we need to have a male and a female? Why put a name on it? (Isn't this what the "virgin birth" means?) By understanding the science and T plasma, does virginity have anything to do with giving birth? Probably most of the children born in Space are from "virgin birth" because there is no physical interaction or womb. This is how the Daughter of Mitra and Children of Mitra are created. (There are no eggs & sperms, they are just energy packs coming together. They don't have an identity as male and female. They are two plasmas (and through balancing between their field energies create life)).

(You don't need test tube babies in Creation. You don't need surrogacy of the baby in a womb. (The reason behind a woman not being able to conceive even when there is an egg and sperm there, is because of the field strength of the womb. If you change the fields strength the same sperm (in the same womb will) be fertile. The energy (level) of the womb is above the egg and sperm, and (gives to) them. That's why if you change the acidity, they call it acidity, but in Plasma you change the environment, or field strength of the womb, then any egg and sperm can create a child).

(The only difference between the womb and the stomach is the (level) of energy. The womb of the mother creates that liquid, or salinity for everything according to what is needed to create the liver, kidney, brain and everything else. (It's the salinity and mixture of salinities in the womb that creates all the changes in the structure of the fetus). This is what we should measure not how many days and the arms are made then the heart and so forth. It's the salinity in the womb that dictates which part of the embryo is produced, and converted to. Science has never measured the salinity and the combination of the salinities within the womb. That's what dictates what part is produced. It's got nothing to do with the DNA).

(When we understand these things we can create any creatures from two energy packs by giving it an environment, anywhere in the U. There is no need for doing it the "virgin birth" way. This is how life is confirmed in the U. In fact, the Children of the Mitra, or the Children of the U, are created in the womb of the Universe. Children of the man are created in the womb of the mother's environment where they need to grow. Children of Mitra have the whole Universe and Universal Energy and the knowledge, because they have no womb. They don't need containment. They create their own containment and that's why they are such wise people. We set and limit everything about ourselves within

the womb of the mother from the color of our eyes to our intelligence. And then we have to live with it later on).

(The Children of Mitra are born in the U and have no womb. They tap in the Universal knowledge, technology and everything else for their survival. When we understand this, then we'll understand the process of Creation and how things about life have been put into a mysticism and not knowledge through the different religions. Because you keep on referring a lot to what is (written) in the Koran or Bible).

(The Bible has been connected to the dimensions of the "Tree of Life." If you add up all the connections within this one structure you get 33. The end of knowledge came, completion from the Soul to physicality came from the top of the Tree of Life to its roots, which has the shape of a cross with 5 pins and the number 33. This shows Christianity was built on mysticism. Understanding the cycle of life was translated into the language of man through the understanding of a religion. The wise men have created the religion to fit everything. They had the man and they built the rest around it, the way they wanted it).

Q: (Why do the children have the characteristics of the parents?)

K- (They have some characteristic, yes, but it's an accumulation of the Universal Energy and knowledge. We are created out of the accumulation of a lot of fields and how they position themselves).

Q: Is it possible that with knowledge man can create children as they want?

K- (It's already been done. The Child of Mitra is amongst us. And secondly, many people will come to it, because they say, when the light has been ignited, it will enlighten the others to do (the same). The planet Earth started with one, then became two, and now it's 8 billion and it is continuously being renewed. It's a cycle which we have to understand).

Q: Is what's happening on Earth also happening in the Universe, as far as a cycle?

K- (Earth is such a small thing in the structure of the Universe. But the pattern is the same. You have fields and interactions, and you have an outcome out of those interactions. You have single interactions or multiple integrated systems, interact continuously and they lead to a certain type of structure or life. Read the details in the KF patent number. The intrigues of life as a system is set in the combination of different claims in the patent. You can create an aircraft or a house that goes with your emotion. It doesn't need a sensor. It feels your emotion and adjusts the temperature based on whether you feel hot or cold. If the household becomes aggressive it changes the (field strength in the) environment of the house to change the aggression. If you are grieving it changes the conditions so you don't suffer. (In the future the human race will have emotions built into the structures .. )).

(The plants do this by changing their structure, communication, and leaves according to the emotion of the house. You take a plant from a house where there is always fighting

and sorrows and move it to a house where there is light, life, and happiness it will change a lot of its structure. A lot of research has been done on this. The plants work on the Line of Communication what we called today as C13. (We'll use the Knowledge of Creation to build our buildings and other systems and they will respond to our emotions. It will become part of our lives).

(In our discussions with those who are on the path of peace, let's bring in new technologies that will keep people busy and create new economies, new business, and bring in the D of World Peace. We'll do it by creating tools to create comfort for everyone and then the governments will facilitate it. The Chinese government will lose heavily on this. We'll see the Chinese economy collapsing within the next few years, if the new policies of the 2 or 3 nations we are involved with takes shape. We'll build nations and make connections that will bring pleasure and life and not wars).

(We have to dismantle the old structure from its base, and to do that we'll show that there is no need for it, and by itself it will disappear. There is no need for monarchy, nobody needs to be higher than another. There is no need for Rothschild's and using money to control others. When everybody has access to what they need and are respected (then we'll have peace)).

(I've received a notice from the administration of KF which I'll read. This goes directly to Mr. Barbu of Romania. You are a criminal, we have seen your work. You have started selling systems and telling people that 5% goes to KF. We have asked the Romanian community to report Mr. Barbu to the police to start an investigation on his activities. We warned him once or twice about this. Now he has started selling systems that are making people sick, and telling them that it connects them to celestial Beings, and he is using the KF platform to do it. We have received a number of reports on Mr. Barbu and have asked the Romanian community to take immediate action against this gentleman and his wife. He has nothing to do with the KF. He attached himself to us and is using our name in Romania, and creating massive damages. In due course we will take action. I'll pay a visit to Romania very soon and put this matter directly to the police, because the actions of this gentleman are beyond the limitations of understanding. We will ask a criminal lawyer to take action against him. We didn't want to do this, but he has passed the line, and is creating a lot of problems and damages. I am receiving daily reports on his behavior more or less from the community in Romania. And the Romanian community has to take action and bring this to an end. Sorry about bringing this up in the teachings).

Q: Does it mean that people who can connect with the Souls of people who are no longer in the physical state, can also use this communication line of C14?

K- (C14 is a connection line. It's a vehicle, and if you have the G and M field strength of it, then you can dictate the position you want to be connected to. It's as simple as that.

(It would give me a lot of joy if we can bring the Iranian and American scientists to work together. We would also like the Chinese to be a part but they have the habit of stealing technology. They can't seem to help themselves. If they don't steal from you, it's not that

they didn't mean to, they just forgot. This truly applies to the Chinese scientists, Chinese military, and the rest. If they don't steal from you, it's just because they forgot. It's their habit to steal. We want to bring the position that nobody needs to steal from anyone else. Then we can reach a position to create a D of communication that we all won't do anything wrong. You call this the Chakra. I call it connecting. With the C14 you connect to the Universe, (?? and in energy levels of certain positions in the physical D with the C13, or Line of Communication. You connect with the citizens of ?? a location ??).

(The children need to be nourished and tomorrow some countries celebrate St. Nicholas Day in Christianity).

Q: What happens with those who use this knowledge to build tools to harm or destroy an environment?

K- With this knowledge whatever you do ends up to be good. (The Plasma T works on the Ethos of Mitra, to Think, Speak, and Act Good. Whatever you do with it, it always ends up to be good, because it doesn't have the essence of the emotions of the man in it. It has the benefit of the Soul of the Creator. So, don't worry about it).

(There was a question about C60 unwinding to contain a Universe. He referred to the old saying that a H atom can fill the whole U. There are levels of the fields of a plasma and the spectrum of the field strengths of one plasma of H can cover the whole U and can expand. Every other spectrum of the fields of this plasma, through their interactions will lead to creation of the galaxies, stars and everything else we know. We call this the Soul of the Creator (STC), as it is the common denominator of everything within it. Our U has been filled at a given strength with one single plasma. It is called, the love of the Creator. (?? His emotion is a field). Anything we create, touch, feel has to have a field strength. The single crystal of C60 is one of its own in the D of energy, but in interaction with its own sub-strength fields creates a tangible dimension. This is what we call C60, because it's the origin of itself. It is the STC and manifestation of the Creator in D of physicality. That's why He is everywhere, and why we are part of it, because we are created out of it, at different strengths).

(Hydrogen is 1 and Helium is 2, but there is a huge spectrum of field strength in-between 1 and 2. In the matter state we call it one electron, one proton as H and then go to Helium or the isotopes. (?? But from the level of energy you only need one cell to create everything, because everything else fills in between the zero and the one. (?? The center controls the spectrum and what it can expand (into))).

(He uses the analogy of a fishermen throwing out one of those circular nets that pull everything in through the center. The net is like the U and the fish are like the man which is created within it, and everything lives within it. The Creator is the one who pulls in the rope through the center when He needs to. The process of Creation is very simple, everything is within it and it depends what we select to be part of, and what we pull in to be part of it). (It depends on how big the mesh holes that are in the net that determines

what fishes are allowed to go through. (Then they will have time to grow into another dimension cycle of life)).

(We have already produced the protective layering of the skin of the Spaceship. (The fields were converted to matter).

(In the theology of understanding is the energy, C60 is that which creates the manifestation. (It manifests in respect to its environment, and how C60 manifests itself to be in that environment like the skin of the man, or the size of our U. We know we have a U because there must be an empty space, or another space (for it to be in, that it can confirm that it is part of something. This is what modern science does not touch, because they don't have an answer for it, so they blank it out. They say our U has such a diameter. (Yes, ?? but to measure it you have to be outside it. If it goes to infinity then you'll never see the end of it)).

(If it has that dimension, then it has an energy which creates that dimension, and it's not a ballpoint pen that you tap and it's always there. It has the dimension of the dynamic structure of its fields. That's what gives you C60. C60 is like a net, it's an energy field, in which every part of it, is part of itself. It is created by, connected to, and related to itself).

(During its creation if it starts interacting with itself it can make other subdivisions of itself, and this leads to creation of new cycles, new energy packages, new plasmas, and new environments. We call them stars, galaxies, the life of the man, a cell in the body of the man, and everything else. It's all the same. The limitation only comes in our understanding and not in the power of Creation).

(Creation is limitless and the combination of its interactions are limitless. Man has limited himself so much due to his lack of knowledge and tools. He limited everything to hundred and odd elements in the Periodic Table. There is actually no limitation in the cycle of Creation, or in the elements which create that creation and our U. Especially at the level of energy. If you understand this, then the science of Creation becomes very simple).

Q: How can I measure the microplastic inside of me?

K- There is no measurement for it. (There is a very beautiful test you can see on the Internet. It shows children dissecting those fast food chicken nuggets and fish fingers. And when they put it under a microscope the amount of microplastic is so huge. It shows that we are literally feeding our children from young age with plastic. It's become part of us. There is no measurement for it because we are continuously absorbing it).

(Hopefully we'll be sending out this microplastic Gans in the next few days. When you test please give us feedback on your change of emotion, taste, habits, and physicality. We are specifically targeting for the head part, because when you change the headquarters, the body will reject it too. We want to know what you feel on your skin, and if the texture has changed, or if you see anything on your skin. Because the command center will say,

we don't need this, it's been rejected, and then the rest of the body will start rejecting it through the skin).

(Your body and especially the digestion system is set to reject certain things you take in through your mouth. If you eat something you are not supposed to the body will get rid of it. A mindset is created to get rid of it. If you swallow a coin, it will reject the coin. You don't need to trigger it, and you don't even have to know that you ate it. It's set in the brain and there is a reason for it).

(We understand this process and we set the Gans's up that way. Originally this test was done years ago by couple of doctors with us, for getting shrapnel out that was too close to the heart. And it worked. We can measure the amount of microplastics to be taken out. But the problem is we continuously absorb them in our food, air, and through the energies of the clothes we wear. There is an AA combination. And when we wear plastic clothes it's like we are inside a plastic container. We are like in a womb of plastic. It's not that we are taking all the microplastic from the outside environment into our body. By surrounding the Gans's in our body with plastic clothes we are creating a field plasma of plastic that manifests in the Gans's of our body as "Plastic Energy." Then certain conditions can cause it to materialize inside. When we sweat into the clothes now it becomes part of the Gans's of our body. It's not a clothe separate from our body anymore. It has become integrated with us. There are certain types of combinations that get replicated inside the body).

(This is why I say do not wear synthetic plastic. We've seen how these synthetic clothes especially correspond with effects on psychology, body, and (we've seen whole body rashes. The brand name companies don't come and tell you what they are doing, all that matters is that it looks good (and you can pay for it). (By wearing these clothes you are cocooning yourself in plastic fields and producing Nano, Gans and plastic materials inside your body)).

(?? It's not all. We're now testing ?? these fabrics to see how we can use the environment to create a condition of withdrawal of certain field strengths of these plastic materials from the body. We have to know if it is effective, but we know it has worked before. When you use these new Gans's observe how your emotion changes. It's a trial so send us the results of what happens to you. Has your eating and emotional habits changed? Has your physical appearance changed?)

(We are working on a new Gans structure in the middle layer, to see if your original hair will come back. If your hair has turned white or grey, does it go back to the original color? Maybe we'll call it Hair Gans. Growing hair back is different than coloring it. There are a lot of women who have black hair and would like to be blonde, because the guys look at the blondes. (And when you change guys, you might want to change your hair color again. We can do that by changing the field strength, because it's all field strength dependent. We don't use chemical interactions, instead we touch the emotion).

(Everyday the microplastics become part of us especially with the clothing, we create microplastics directly inside the body. It's a surplus energy in plasma form. We are 100% correct on this. We are creating a womb from the clothing and by mixing it with the sweat and your own fat it becomes chemically active. When you sweat there is also an oil or fat on your skin, then that mixes with the synthetic clothes. Then the boundary of your skin moves to the boundary of the clothes. Then it sits within your Amino Acid and is part of your Gans cycle).

(One of our leading Knowledge Seekers is entangled in this (?? microplastic situation) and (that's why) we want to change it. These expensive sporting gears look so fancy to you (but they have a huge hidden price tag that will come upon you later). It might be that you can't have children, digestive problems, and all the rest of it. You have to watch out and protect your children yourselves. If you wear certain kinds of these sportswear and you go running and when you come back you don't feel hungry, where you get the energy? (What is C - H?) When you run you burn energy. You can test yourselves if you are sensitive to it. Try running in cotton and compare it to the Carbon Fibers or synthetic clothes. We need to be educated. And now the education has come, but it has to be without prejudice (and stick to the science)).

(Don't let your children wear these fancy synthetic things, switch to cotton and wool. They're a little bit expensive but you will protect yourself and your children. We've done the research on Teflon (?? in the ground water) for the Italian government and there are 9 cancer agents in it. If you're the cook in the house just throw the Teflon pots and pans into the bin. Throw your plastic chopping boards as well, and get a wood one. Do this especially if you have young girls in the house get rid of all the Teflon coated things. (?? They are linked to ?? PCOS and all the other diseases, which makes the girls infertile and damages them emotionally, because it touches the hormones. We see it directly in research)).

(To make a non-stick pan buy a steel pan, heat it up and burn oil in it, ?? and then put it under cold water. (It's almost as good as Teflon). If you have children around the house throw out the Teflon and use steel pans, but not aluminum. You'll save your children from a lot of problems in the future. In my house you don't find any Teflon or plastic cutting boards. (Don't use the ?? plastic scouring pads on hot pans, it will melt the plastic into the pan). It's not a 'going back to nature' fad, it is understanding the new cycle of Plasma Science and how we can help ourselves with it).

Q: (You taught us that our mother Earth absorbs the fields from the U and pre-digests them for us and they make up 60% of the 80% we get from the environment. When we become Space Travelers who will pre-digest the Universal fields for us since the Earth won't be there?

K- (The STM does that for you. You don't have to worry about it, it's well done).

Q: Can you please explain what is Soul elevation? How to imagine this and how to do this effectively?

K- (There are different ways of elevating the Soul. You can do it from below, or from above. Elevation means increasing our M field strength so we become more aware of the other strengths. You can (then) tap into the Universal Energy, or C14. Another way is to consume enough of the lower order fields, that you pick up fragments of the higher order within them. At the same time you're supporting the lower order for the physical life. This is what we do by eating. When we eat, drink, and breathe there are two divisions (of energy). For example, one part of the water is added to the STM, and the other part to the STP, and the part which adds to STP, also part of it goes to the P which we use as energy. The ?? Souls need their own energy. (Part of the energy released by the food goes to the Soul)).

(Part of the air is made directly for the Soul, it is in a less adulterated structure, for conversion, but it's still in the matter state. This is why we inhale it through our nose, so it directly feeds the Soul, and because it's directly connected to the fields of the U. (There are certain ways of breathing that allow you to absorb certain field strength (?? from the environment you're in) to increase the energy of the STM). (Observe how wise people who have a lot of Soul breathe, and compare it to how people breathe who are very physically active. ?? When you convert this the food for the Soul to food for P that is used to keep the life running, then you become short of breath. If you understand this then you know how to tap into it and how to elevate)).

(There is a little exercise you can do to test what you are absorbing. When you raise your hands keep the fingers open. And then do it with the fingers closed together, and compare what emotional difference you feel. There is a big difference. (Children are more receptive to these things than adults). You can also compare walking barefoot with using shoes, and just socks. Then lie on your back with the legs and arms up like a dog upside down. Then lie on a carpet, and then on the Earth, and feel the emotional difference. When you walk barefoot you receive energy from the Earth's G Inertia fields. They directly interact with the Iron in your blood, and that changes the cholesterol and salinity of the blood).

(How we absorb energy from our environment has a direct effect on our emotions and physical being. When you feel stressed, go barefoot on some grass. It's better then on gravel, because grass has an AA structure near to humans and it transfers energy. When you walk on it, you crush it and it releases energy that (can change your body). On gravel and dirt you absorb different fields).

(If you have a huge pain in your bone structure and muscle tissue, walk on the sand while allowing the seawater to run over your feet. Do it for up to 2 kilometers and come back, and repeat it for a couple of days and see if the pain goes away. It's not the salt. It's the energy which you receive directly, and that changes the production of hormones in your body as an energy pack. It directly affects the energy you absorb, and changes the emotion. (?? It produces different fields within your body. It's not the noise of the sea or whatever. It's the energy which you absorb directly from the Earth. Try to make a habit of it. I walk barefoot quite a lot, because I know what it (gives and what I take, and what I

need from it). (It helps organize your body, which gathers information about what it needs, where it needs it, and how it needs it)).

Q: What is the December Monthly Flight Session about? What can we expect to receive as a result of joining it? Is it ok if we don't speak English?

K- First of all, we don't use any languages, it's all done by our system. (There are basic translations of instructions at the beginning. Rafael converts it to a text in the Chat and you can use a translator. Language should be no problem. Secondly, usually we don't speak at all after the first few minutes of introduction. The whole session is yours, and we control things in the background. We see how different groups behave. We don't give you any expectations. You and your body decides, and your emotion decides what the outcome will be).

(These 3 months of sessions are about Food and Wellness. We expect you to report back to us what you felt and experienced. One of our KS is here who can explain what happened to them in the last session. Other KS reported they had a huge surprise of their life and how just using headphones could change their life so much). (It's up to you what you experience. If you have a pain in your shoulder, try sending energy to it during the session. You are the captain, we just provide the ship. This is how it has always been done)).

Q: Can silicone be used instead of plastic or is it almost the same?

K- It's the same. Silicone, and all these synthetics. (It's because of the high temperature (?? used when they are produced). We decided some years ago to switch to plastic. It's a decision we make).

R: There are other forms of plastic other than from crude oil.

K- (It includes everything that is connected to the C-H bond).

(There was a discussion about plastic bags made from alcohol. Mr. Keshe goes on to tell some of the history of plastics and because they were so much cheaper than paper businesses switched. Nowadays you can buy underwear and clothing made from wood. It's very popular. These plastic islands in the oceans will force us to make changes and find a substitute for plastic. It is a menace. We have to find a new composition and structure that does not interfere with the body, or come into the body. We have to find a solution for it).

Thank you very much for today (and I hope I opened a new insight for you into your life, and your life in the Universe).

**End of Quick Index - 567 KSW December 05, 2024**

**KEY-PHRASES:**

## SUMMARY:

### ENGLISH TRANSCRIPTION

(:12)

K- Yeah, thank you very much. Good morning, good day to you, as usual. Wherever and whenever you listen to this series of Knowledge Seekers, from Keshe Foundation Spaceship Institute, we welcome you back. And, as usual, we try to add to the knowledge. I just watched this Intro and it brought me huge amount of, what you call, surges of memory, Fukushima and the rest and everything else. And this is just coincidental Rick chooses his Intros without me knowing and says today we're going to get this and I said, that's nearly what we're going to talk about in the technology of today.

If you look at this video talks about gravitational magnetic (MG) plasmas, or what we call, plasma, to possess both and in motion, creating energy. In the Space we only receive the fields. And if we want to create, divide, add to the fields to its strength to create it in different stages, to be. We need to understand the process of manifestation, we need to understand the process of in a way confirmation to not us not to our sensory system, but to the sensory of our what we call dimension (D) of the energy which we travel with. It's no use you being in the Space and you talk about property or effects of a field where who you're talking to is not aware of it. (:14) What does this mean? If you in your magnetic (M) field strength observe a field in motion, which could be danger to you. How do you transfer this knowledge, this information of danger to another entity which is with you? You're talking to, or traveling with, or it could be your wife, your son, your neighbor, somebody else from the position in the Universe (U). How do we connect? How do we understand field strength? That, for example, this field strength in my presence could be danger to me, but it's a benefit to them. In me trying to get rid of it or move it to another position, can create harm to the one who needs it.

Part of the work of the communication in the Universe, Universal level, as is on this Earth, has to be understood. In the world of the man we have created languages, signs, colors, smells and reactions and emotions. How does our body reacts to the smell, emotion and the colors? Why when we see blood, or red light, or loud noise, we react physically, every cell in our body gets alerted. (:16) How do we convert the noise, the color in the physical dimension to the reaction in our cell of let's say your kidney, your liver, your organs in your body? Why do we get our hair raised out of a fear? We see a lion, we see an animal, we see something we are in danger and become alert, and how do we transfer? How have we managed to transfer emotion to physical reaction, and to reaction in the dimension of the Gans's of the cell of the body?

We never understood this, we have a lot of theories, a lot of papers and books written but in fact it's a field transfer. That red has, carries an energy that in essence in a physical dimension is red. But in energy level has a common denominator field with our senses, with our field strength in our Soul, or Soul of the Physicality (STP), or physicality (P) of

the man, which does not consider the color, does not consider anything which we observe physically. In a way, has the line of communication. In a body of the man, we use Carbon 12 (C12) for line of communication. In the Universe we use Carbon 14 (C14). In communication, in a physical dimension, where is Carbon 13 (C13)? Why do we go from C14 to C12? (:18) But we never discussed that the intermediary energy level.

This is what, what I explained last time, that between the atoms, what we call between the Hydrogen and Helium, there are many isotopes which we never understood. Now when it comes to understand the conversion between the Universal connections through the C14 which we call the C14, but it's an energy level. It needs to step down that when it steps down to C12, which becomes physicality of man and there is a communication, there is a line, there is an isotopes of energy that allows us to in a way, communicate with our physical dimension. It's intermediary energy level. It's the line that in a way, all creatures of the Universe connect to. It's a line that is common denominator knowledge to all races who understand the work of the Universe. For us we need to come to C12, or energy of the plasma that the Carbon can communicate between every cell and body of the man. We do not communicate with outside through this. It's a different, otherwise it would have been part of us. (:20) But there is a line of connection that we all understand what we call environmental communication. It felt, it feels, communicates with our senses, which has no dimension of physicality. But in a way it transfers energy, receives energy, gives energy, to us, in a form of communication.

It's no use me transmitting radio frequency in a FM, when you only have a AM on your system? We have to find somewhere, that we all communicate through it, we all understand it. In a way if you understand, if you go to another level, C12 belongs to humanity, it belongs to the dimension of physicality. Some creatures in the Universe, might have a Carbon 11 energy. We are not talking about the structure of Atom, with Electrons and Protons. We're talking energy level, with common denominator, behaving as connector, communicator. In another position could be Carbon 8. But has a, behaves as a communicator, in that level.

But, in the Universal communication line, C14 is fixed. All interplanetary, all systems work on an energy level round about C14 energy. We are not talking about C14 as an atom. Now, we need to have that we all come into a level that all creatures, all living things break down to and from that they step down to an energy level. (:22) In a way, a transformer, in a way an energy breaker, in a way a communication level, in a matter state, in an energy state, confirmation of the existence.

This is part of where mankind needs to open a new door in knowledge, science, of deciphering, connecting with its environment. I'm blind. In my structure of life, from another dimension of the Universe, eyes don't exist. But, I can feel the magnetic field strength of a danger, what we call in the life of the man, 'red light'. How does that happen? Internally, my body is communicating itself with C12, plasmatic level, but externally, I need to connect with the dimension of the fields, that it matches, and if it doesn't match, I don't feel, I have no connection to.

Then, we come to understand, that in the world of the man, we use voices, signs, to indicate our condition, emotion or whatever. Then, we have another step in between the two, between the Universal connection and man, a physical connection. And a connection with man's environment that everything communicates with. And we tap into. (:24) In the process of understanding, if it can be explained maybe, in a different language, is that when you hold a coal in your hand, do you feel the energy of it, or is it just a matter? Or can you go up to what we call, intermediary energy level, which you have and the coal has and then understand what that coal does, what energy carries, what it needs, what I want.

It becomes easier for Knowledge Seekers (KS) in the future to do this. You have heard me many times in the teachings. And outside if you have worked and been around me in the labs, I tell you, when I put Gans's on my hand, I can taste it in my mouth. And sometimes for me it's impossible to hold Gans's because the energy level of them is too high, or creates a certain emotion in me. I don't like the taste of certain Gans's by just holding them, not in a plastic but in my hand, which means there is no intermediary, blockage. Many of you have been around me when I hold Gans's, I just can't hold, I have to let them go. I taste it, it has a... converts the communication line of energy to C12 energy, to emotion, to a feeling, to a taste I know. (:26)

This is what we call, intermediary line of communication between all matters. All created things. We have our own life communication line. On C12 we have converted it into all sorts of things which we can. In the world of science, now you use Carbon in addition for different colors in food additives. We know this science. Now we have to understand a Carbon level, a communication level, that is common denominator between us and what we call, matter detectable energy pattern in the Universe. This is something that we have to learn, this is a process that we have to become aware of and be trained for it. It is within us, but we have ignored it. This is how when we come to Space, we recognize another entity. We don't have eyes in the dimension of the Soul, we don't have ears in the dimension of the Soul, but that level explains to us, "I'm here, I exist, this is my needs, this is what I would like to give, this is what I'm looking for." In a way, common denominator, Universal Language.

It's very much, I explained this to some scientists years ago. (:28) You come from the village, you speak your dialect. You go to town, people speak the language of a nation. And then we go to United Nation, we speak the English which all others understand. This is the same in the dimension of life. CO<sub>2</sub>, Carbon in our body, is that local language in the village we speak. It's the strength field which communicate in our own village. The world of existence, in the city has its own language. And then, when we go to the bigger place that the whole mankind understands, we speak a language that everybody else understand, we call it C14, communication line.

It is very interesting, that how man has chosen, maybe the ease of language, carbon and connection, which is ?? "C." This is part of the structure of the existence, this is part of understanding the communication language, that for us can bring that dimension. This is what we have to become aware of, then in a way, you can carry a kilo of Plutonium 100%

enriched in your hand, but through the communication of line you connect, that you are there, you, "I have nothing to do with you, I just carry you for whatever purpose. I don't need your energy." And then you understand a lot of things, how things work.

My body is immune to nuclear materials. We know that from 1980s, when I came in touch with nuclear material. (:30) I can carry plutonium in my hand, plates of uranium in my hand with no effect. Have I established that line of communication that I don't need, so it does not damage, it does not absorb by the C12 level. This is what mankind has to understand, this is how we will recognize other entities in the Universe, which are still in the dimension of the energy and have no physical matter entity. It's you traveling in dimension of your Soul. And this communication line is needed. It needs to be understood. This is a field strength, magnetic gravitational field strength, which is the common denominator that every entity in the Universe communicates through. C14 is for connection. C13, you call it, is for communication, understanding, common language in a world, that has no language that man has made for himself. The dog barks, the man uses word, the cow ?? mayows, man in space might go whoosh. But when the dog barks, we know we need something, when the cow mayows we know something. We have to understand what the whoosh is, how it communicates. We understand it on a level of our STP. We are aware of it, we have been educated by it.

In so many ways, in the world of the man, they call it the third eye. But we never understood. It's the second level communication line. It's very much like your skin level. (:32) You have the line connected to outside, which you feel. You have a middle, that connects the outside to inside. And you have inner inside, which connects holds to what's inside. The same applies in confirmation of the energy. That through that middle level, which is mainly dimension of the emotion, we communicate.

This process, in the coming time, as we develop, as we are aware of it, will be used in communication systems like robots. AI's (Artificial Intelligence) will make it huge, what we call, implication - application of this knowledge. The world of science of communication today, what you call AI, is not aware of it. What does this bring us into the process? Emotion. This knowledge sits within the Keshe Foundation, and is part of our work, upcoming work with the World Governments. You have a AI, if you don't give it an emotion, you cannot get it (to) work. And in an upcoming time in our negotiations, these parts of the emotion which can be added to computers, can be added to what we call, application of integration of the totality, will give emotion to the system. Which means we can create systems, computers, which are benefited by through emotion, not programmed emotion.

This comes in the matter of forms of energy packs, which is part of our knowledge. It says we're embedded in the structure of the Keshe Foundation work from the beginning. Transfer of emotion. (:34) In teachings I've taught this in a hidden way and I've spoken in past two or three years openly with those who are concerned with electronics and computers. We need to give emotion. Our system need to have emotion to be able for us to communicate in a correct way. You see robots, you see all sorts of things in the exhibitions. They serve you, but they don't understand you because it's programmed.

Nowadays you go in most of the restaurants around the world, waiter doesn't exist in some of the major restaurants. The tray comes to you, this is your food and that's it. You take your plate off the tray and the robot disappears. There's a knock on your door, you open up and there is a robot delivering the package from downstairs there is no one knocking on the door, a man to give you.

But when a man knocked on the door, there was an emotion to it. Thank you very much, this is your package. Now, a robot comes, delivers and goes. We need to bring the emotion into dimension of the, what we call, AI. We have to, otherwise, it'll be detached from us. It'll become a way that has no connection with us. We need this, in the system controls of the future in the Space Technology, when we travel with the physical dimension. It becomes part of the process. In motion, in the systems, what we call the Microchips of today, will change the whole understanding of the structure of the work of the electronics. And this comes as part of the structure embedded within it. (:36) It has to be within the material they use, that emotion exists within it. This is part of the knowledge, which we open up slowly, as man is ready to understand. Chips with emotion, micro systems, AI system with emotion, and this is to understand the work of C13, how you connect emotion into systems, how we understand the emotion of another entity in the Universe. Does not have C12, we cannot physically touch it. It's an energy, but alive, has emotion. How do we keep separate from it?

This is part of what is to come. This is part of the teachings, maybe 5,660 (KSW) and the rest of it. But we have to build the intellect, we have to build the understanding. We need to bring our processes to that level that is not put in, is built in, it's part of. We are not born with liver and heart and everything and no emotion. The second we are born in the womb of the mother we have emotion, we feel the pain of the mother, we show our pain, we show our discomfort, we come out, we cry, we shout from the second year born, we are not happy, we are hungry, we cry, we get everything. Now we have to understand the conversion of that emotion to a line of communication with all entities. (:38) C14 used takes you anywhere in the Universe but does not let you communicate. It's an energy level. In fact there's no Carbon to it. It's easy to identify it as Carbon. As "Connection 14" is much more convenient and "Connection 12" is within the human body, within the structure of the Amino Acid (AA) of the life of the, what we call, dynamic life of this planet. And energy 13 is common denominator with all, then we understand the cat, we understand the dog, we understand everything in the Universe, because we need to understand that line of communication.

We say, the guy can communicate with the horses. No, he has the line into the communication line which is what we call C13, which itself has a spectrum band, is not a single line band, that everything falls in it. We feed it, we tune it, we are there. You heard about the story of the "horse whisperer?" In the movies? I have met, one of our oldest Knowledge Seekers, is what I call, the horse whisperer. He touches the animal, and the animal heals. With a very, very few subtle touches, he cures horses. He's paid huge amounts of money by the Middle Eastern, Arabian horse keepers. They ship him in and out of Europe to heal their horses. (:40) He's one of the very original Knowledge Seekers. World famous, whatever you call him, for his work. When he touches you, he

doesn't manipulate you. He just touches, transfers energy information, just through his fingers. Because, some of us have learned this, but in a way we do not know how to control it. Because, to us it's coincidental, to us it's something there we don't know. But how we know, we can connect, we can connect through this spectrum of energy, with every being in the Universe communication line, not the connection line.

Once man understands the power of the plasmatic, what we call, energy communication. In a way is like you having a microphone in one end and the other one having the speaker. One is gravitational and one is magnetical and a slight deviation specifically connects it to him not to the one next to it. You have different creatures from different point of Universe as friends, the way you have Italian and German friends sitting on the table but you all communicate in English. You have mankind is ready to come into that position, you have friends from different part of the Universe. (:42) You want to tell a joke to this one but you don't want the one sitting next you to understand. You use that C13 bandwidth of him and not the other one.

It's part of our brain. We know this very clearly. In a human life with one which we connect to in that dimension of emotion, we call it "Soul mate." Because we have managed to connect and that level of common denominator energy, not the dimension of physical C12. What I talk about is not something new, evolution, or something you never knew. You have it all the time. You crave for it to find your Soul mate. You crave for somebody to understand you. My dog understands you without... without... it understands you without me telling him anything. You created that energy communication at the level of the C12 level with the communication line. In a way you hung the clothes on the dry rack and it's passed on and picked up on the other side. This is a knowledge of the Creation, this is a knowledge we have. And if mankind is to move into a total optimization, especially the way we are heading at, we need to bring emotion into our system. But we have to understand the fabric of the world, we have to understand the intellect of the world, we have to understand how emotion is created in dimension of energy, how it shows in dimension of the plasma of the body of the man, how it transmits across different entities.

If we can and the dog or the stone or whatever has that line of communication with us, (:44) that we work on that common denominator level, show we should be able to connect it, to develop it, to control it, within the new structure of the man made systems, what we call, computers. In a way, we have to enter a new dimension of materials. Materials with their fields which can communicate, not just materials connected through lines of the pins and wires. Part of this sits within the structure of the MaGrav system we have taught you. You have to be wise how to use it, you have to understand the process of using it.

Go back on the skin of the man, look at the MaGrav system and you'll see the knowledge sits there. We have to understand how in the process of communication we bring emotion. What does emotion means? In essence of the energy, not in essence of the reaction of the man to a situation. But is... be it in a physical dimension, be it in the emotional dimension. We hear a lot about the relationship between man and woman, and

how they connect to each other physically, and whatever. How do we sense another person? How do we feel a plant, a tree, an animal, a stone? Mankind needs to understand this process. (:46) The way we see the knowledge expanding, computers and communication, the way we see it today, will become obsolete very soon. Chips, controlling of microchips, will be non-existence.

We will see in dynamic flowing system, very much like what you've seen in Book 3, as a combination of Gans's. The structure of the loose materials interconnecting, creating emotion and the structure, very much like the brain of the man. Embedded within it emotion, even it creates structure of the physicality. In Barletta, in the last months of being there, before we closed, we started building this brain, with one of the Knowledge Seekers. Then, that could tell us we can build dimension of physicality and emotion within it.

Now you understand, how mankind will break into the Space Technology (T) of the future. How mankind has no option but to consider the new dynamic systems of what I call intelligence, what you call computer microchips, which are fluid, very much structured, the same as the brain of the man. Even our brain, due to its solid structure, in a way, gel structure, limits the expansion of totality of understanding the whole energy structure of the Universe. If you could liquidify the brain of the man as it is and allow it to work in the dimension of the connection according to the intermediary energies. (:48) The body of the man will behave different, we will never commit crime, we never get ourselves in a position of danger because we are aware of all lines of communication within the level of the environmental condition we live in, or the rest of it.

We are worried about the hurricane, we are worried about the storm, we are worried about something on this planet, we haven't entered the Universe to see the hurricanes of the Universe, which is plasmatic field only and there is no matter state. We are scared when we see the hurricanes of magnetic field from the Sun directed to the Earth. This is nothing a child play, but if you could understand the emotion of the Sun, the emotion of understanding the field connection, we could have done a lot, we can do a lot, that these energies become part of the structure used by us, not by damaged by us, or a damage to us.

In the process of development of this technology, we bring in new knowledge, new breakthrough in understanding the fields which connect man to other physical matter entities, on the line of communication, not in the line of connection. You travel on the jet, but you speak in the jet in the language with the others. C14 is that jet, communicating and living is that Carbon communication line, what I call C13. And you are the living thing which is the passenger, which is the C12. Now that level of communication opens the full, what I call Universal language for man to communicate with others but feel them, (:50) in their emotion, their needs and the energy, and not to see a man how tasty he is, how are the other creatures good to eat. He's not a orange, he's not an apple, he's an entity, line with full interact children, and offspring's, and being an offspring of the others, like a human race, is not for you to eat.

This is why we start running these sessions of this quarter terms of last month, month and next month, and as we hear from the trials of last, what we call, November session, many of you have touched the position of not eating, tapping into Universal energies. Then it has brought your fear, that how can I not eat, or whatever with two, three days, a week, a month. The last month trial has opened our eyes to a lot of ways that you, Knowledge Seekers, who have gone through the sessions, now gradually locking into. We've seen it in the testimonials. People who haven't eaten from a week, and they feel when they tap into the energy. We have people who see energy going in their body they feed it as they need it. Do I need to eat the apple? Or do I taste the apple by creating an emotion of the apple in me? Where emotion itself is part of that communication line of C13. Has nothing to do with manifestation of physicality. This is why you feel the emotion of the grandma, how she felt when you went for dinner, (:52) in your dream time, the travel of the space time energy. Which we talked about last time, the grandma you sat and ate with, uses that line of communication energy which is come on between, targeted between you, the food and the place and the position, and when you come back, you have the memory of it, in condition of physicality.

Understanding this line of communication, understanding the new plasma Technology and understanding to create emotion within the structure, is necessary for us, especially when it comes to the Space development. You create a condition which builds a craft, which is very much like body of the man, you don't want to slam yourself in a middle of a pack of herds, or in the middle of pack of people, standing, or run, drive yourself, body hit yourself into a glass. Because you have emotion, you know how the... what the damage will be done to you, if you hit yourself, a herd of animals with your body. How it feels if hit other people with you, or how you hit the glass. Our system, our flight system, has to understand ahead of me, is life, is collection of lives. I cannot go and hit, just to go through it, because I go, I want to. The system is not just a flying system, it's a system with emotion.

This is now you understand why we explain about the AI's that need emotion in the dynamic, plasmatic, what we call future plasma Computers or Chips. This is part of the structure of... you thought, "Oh, show us the flight system we go." (:54) Flight system has to have its own emotion, has to have its own understanding and energy, in respecting life of with people who accept the responsibility of within it, and those outside it. We have to understand the knowledge, the intellect of the Universe, and ourselves. And then structure it that way. Go back to Book Number 3. Look at the section where we speak about the Gans's, and look at the bottle, sideways. And I explained the Gans's sit in different layers. And you see different colored Gans's separated in different layers. That is the future of what we call, Space Computers, microchips. There is no line of connection. There is no separation, but all within.

And the word in the Book, when I put it in, I said, "One day I explain what it means if they don't understand it." Maybe today is that day. Separation in plasmatic magnetic fields you call Gans's is the essence of intellect. It is the essence of emotion. And once man learns how to separate Gans's, create them, how to move them and not even with

like a body of the man in the brain fix the position, then you understand the beauty of the Creation. And when the doors opens up to the Knowledge of the Universe. (:56)

If you have the Book Number 3, just go and find a picture and then you understand. Hidden in that picture is the structure of the future computers, it's a structure of the creation of the systems with emotion, where Gans's don't mix and if you understand the implication of it. That's what it means. That mixing creates a condition of communication and in that communication respecting position as we always said. You put magnets together, they find their position because what they are accommodating each other. They communicate each other, this is a good place for me. That communication can be created to be as a strength field of the emotion. Then you understand creation of the new what we call, plasma chips is on the cards. You've seen the first one in the book released 10 years ago, but you have to learn how to tap to this, and what field energy to use. What it means to work in a level of energy, what it means to work in the energy of matter, that you can excite, increase, decrease, the fields of the emotion. I made man in the image of Myself. Then you understand this is the way the creatures and the Creators work on the same level.

The time for man to integrate the whole three levels of the life as a man, (:58) as an intermediary and as the Universal has come. But it's for man to understand more and more. As I said very recently to one of our Knowledge Seekers, you are waiting for Methi. When he comes, he brings peace, he brings honey and everything else. That the lamb and lion, live in the same nest. There will be no more wars. The Methi of this time is the Knowledge not the man. The knowledge of understanding the energy fields of the Universe. Then you understand the pain of the lamb, the beauty of the Creation of the Universe, and the Knowledge of the Creation. For those of you who are looking for Methi as a man, you're so misguided. Because the man only can affect the man, not connection of the man with the rest. The Methi of this time is the Knowledge. The Knowledge most of you possess and you have learned through the language of the Keshe Foundation. Has no physicality and is... and it goes, and it stays according to your understanding. How you save yourself and how you make life better for the others. (1:00) The teacher is carrier of the knowledge but not the possessor of the knowledge. It's you and what you do with that knowledge which creates that phantom of the promised time.

If we all come to that point we have managed to break into the layers of the structure of life in every dimension. Below human level energies and above human level energies, but all the same line of communication, the same intellect. Try to understand today's teaching and then you'll understand you've been given the key to the life in the Universe. We go for a break. Come back, maybe we find answers in the questions. Rick, if you take us to a short break, we'll come back.

>> **BREAK** >>

567 KSW December 05, 2024 (1:04).

K- Yes, thank you very much... Try to understand the first part of the teaching. I opened the door to a lot of things, that needs understanding, and then it brings you new, what we call, horizon. And opens up. This is part of the World Peace Program, which we are involved in. In bringing the governments and making the all technologies obsolete, that they all start working from the same ?? "cram sheet," as we call it.

As we saw and we see on the pictures of the background of today's session, totally coincidental, today the Keshe Foundation has launched, as we promised, last week, in request, especially from some of our German friends, who feel and people in Eastern Europe. The possibility and the dangers of what might come up, and as we have always led the industry in this way, (1:06) Keshe Foundation has launched two new products, in a way to perceive or to in a way be ready if you need it. We have introduced a filtering powder material, for filtering any, what we call, extra energies, which might appear in the environment, or in the water, or for the purpose of recycling energies, which might appear as any kind of line of attacks by any nation. At the same time we have introduced the new material in which with it to be more compatible as before we did this when we launched the systems with Corona. If you remember we introduced the suiting that you could use to in a way change condition of the Corona. These new suits with the new material, which is launched today, which gives you the possibility of using these in the case of what we call, absorbing extra energies, that you might, or it might appear in your environment, unknowingly or by introduction by other governments for certain purposes. These two new products, for what I call, as we saw with Fukushima, and with Corona, is been launched today.

It, one, the powder is, can be mixed with any water, any liquid, and you set, let it to settle down to the bottom, absolute bottom. And then you have what we call, more or less, a clear field energy (on top). (1:08) And this, you can reuse it, all the time. It's not that you have to pass it through, as it's a plasma, is applicable to the totality. And the same is for the suit. The suit is a gift from the Foundation, and it's limited stock. Those who order they'll get the suit, you just going to say you don't order the suit to get the material. Order the material. And if you need the suit if you already have the suit leave it for somebody else to benefit by it say, I don't need the suit. You add the material into the suit and as normal condition. You ?? place yourself with it and then you have all the facilities to be done.

The absorption of the energy is the name of the game and is in a way the mixture which we have used for Fukushima. It is not something new. It is partially that characteristic mixture. And it's been done as an interactive, what we call, Gans, which means it interacts with active, what we call 'energies', and it's the same interactive powder, which is a filtering. And, it's not a filter system, but it's an energy absorption system. We are fully aware of this situation, and as we say, we're on 12 o'clock, not 11:59. And it looks like it if it goes, pushes, it might be there, or we might walk away from it in a different way. We have to understand the position and the condition we are in, and we create because of. (1:10)

In the coming time, in the next few weeks, we launch another series of new materials, that we said, that it brings our position. We will release materials for our call, as I explained today. Systems with emotion. How you can even use your present computers to bring condition of emotion to it. These materials is not something we're going to develop, it's already developed. And it'll be used by the Keshe Foundation extensively, to bring or create an intermediary session between the Communication Computer Systems we have today, and the ultimate one which is the plasma conditions in the future. We will ?? run and will release this, and you already have part of this set up, in the past, in the Keshe Foundation structure.

R: Excuse me Mr. Keshe, did you want me to show a picture? There was a picture from Dean with nuclear disaster, is that a part of what you... would like to show? Or a picture from the Store? I couldn't find...

K- It's in the Store, there's a bottle and it's called Interactive, I think. It's just a bottle on it's own.

R: Has it been posted to the Store already?

K- Yesterday, I just seen it, you past it. And there is one it's called "Filtering." It should be there and the... if it's not it should be posted, but I think I've seen the one you just placed on the top, as a bottle, a white bottle on its own. This Interactive and Filtering, one of those.

R: It's this one?

K- Yes. And then there is a filtering with it as well, with the same product range. (1:12) This is just to be safe, and to be as part of the structure, and these materials as they are already available in stock, we'll try to ship it immediately out before Christmas, for those of you order. But the availability of the suits is in what we have available that we can ship. He always give us two options, if one side doesn't apply to the other. If it's in the stock we try to match it with yours. And once it's finished, there is no more, what I call, suits available, the stock runs out.

The teachings from now on will take in the two different dimensions, one political, one diplomatic, and one knowledge. We try to connect our system with our present

negotiation which goes on, to enlighten the diplomats, the politicians, and the Knowledge Seekers at the same time. As of today, as you are aware, we know today, administration, American administration, the Chinese, and the Iranians, and the French, and the British are online. We see them, we know them, and they're listening intensively to what is discussed and knowledge. We'll try to add sessions in the coming time for diplomats to speak their words in respect to the new technology. We try in next months to bring people who have a voice in the world of diplomacy to tell us in their words what they do.

Keshe Foundation has opened a new channel in "X" for communication with world leaders. (1:14) We will release this in a short time where you can join in and you can make your comments. You can let the world know how you feel with the new technology of Knowledge Seekers. We have started tentatively and openly posting things for the what we call world leaders. And very soon we'll specifically allow a channel for this line of communication. In a way what we used to have as a forum for Keshe Foundation years ago, and still there, we use X as a forum for Keshe Foundation teaching. We'll post the link on the chats, where we try to gauge and involve the world leaders and scientists in that game, in that structure. And then you can all register and just become a follower and follow the system technology and pass it on to other Knowledge Seekers. We have some 75,000 around, 70 to 75,000 on the Facebook. We want to ?? convert this back.

You have to understand is that Keshe Foundation numbers are logarithmically depressed (Means the number of views are suppressed). We know this for a long time and we have a confirmation of it, so do not pay attention. It's 75,000 or 750,000, because even our views are logarithmically depressed, pressed down for years because of Keshe Foundation position. We know that, for example, if you know one of the guys in "X" found that another guy has more, but because he has a power in the "X" system, he asked 80 of the top programmers in the structure to write a logarithmic (program) that whenever I post something always comes in billions and millions. And we know we've seen this, even if you watch when the post comes, how rapidly it runs. (1:16) Do not look at the figures (numbers) because deliberate control of manipulation of figures is something we are used to. There are people in China, people in Brazil have seen the numbers what we see on the digits of the number of visitors does not add up with our numbers which we read of theirs in the background, which is usually huge by factors by orders of tens and hundreds.

So in the next few days, once we establish our line properly, we open a chat room like a forum type. Now it's been approved by "X," we've received that blue line, which means we are, what you call it, we've been quantified, as I call it. And then we use the X, I use it directly in talking to the world leaders and what we call diplomatic and political talks, in connected to the teachings and the influence of the new technology. We have tested it with quite a good success, we watched it, how it's done, what reaction created in different names, and then we start teaching in that way in a more dynamic position that we all have a say in it and we can participate in it. I'll post it up on all the what do you call it, links of the Keshe Foundations if you want to join in register and become a follower. And we'll see how things take up and take shape.

Any other question?

R: Excellent Mr. Keshe. I'm looking forward to a discussion between you and Elon Musk would be a real highlight, I think. (1:18) But yeah, that's a great platform and should be interesting to see what develops from that.

K- Yeah, we... because if you remember in 2005, 2006 and 2004, and up to 2008, we enlightened a lot of people on NASA chats, NASA forums, to the extent that ?? (they) got upset. That's why so much technical knowledge and advanced level (knowledge got) is leaked into public forums. And they wrote to us, "We have to ban you because you're putting too much knowledge on the Internet." And that's how we created the Keshe Foundation forum, which we were active for a long time. And then since 2014/15, getting involved with others, the forum suffered a lot. But now there is a new technologies, new platforms, which doesn't cost us anything, and allows the world to participate. And we'll see what happens and how it builds up. Rick you'll see yourself into ?? I will give you the connection. And we try to run it after next week or the week after. And see how you build up. You put your questions, put your thoughts directly on, as long as it is, what you call it, respectful, and then doesn't ban our systems. But it's mainly targeted for diplomats and politicians, very direct talks in hidden technologies and upcoming technologies.

R: Right on, I think that might be the way of the future is we have to have fast communications and quick decision making, and that kind of thing. And that's kind of the format for that it's a lively discussion and a bit hazardous in terms of you have to be transparent, (1:20) and not aggravate people at the same time and so on and so forth. But that's what you're good at Mr. Keshe, the diplomat. Hasn't someone said recently that you're becoming less of a scientist and more of a diplomat, or something?

K- No, we are more of a scientist than before. But don't, and don't forget, from young age I've been brought up in the world of diplomacy and politics as part of my business world. And it's beautiful when you are not in it, but you understand it. And with what you understand, you can facilitate a lot of things. And you see the weaknesses of the others and the strength of the others, because you are not prejudiced. And I learned this very, very, very effectively. But some governments, some politicians and some diplomats, try to brand you as one or the other, because then it changes, for them to be able to pigeon-hole you.

I had a great leader, or teacher, not a leader but a teacher, in a form of understanding world of the finance of the politics with Lord Crammond, Bill Crammond. He became like a father-head to me, in that way, to teach me. And then, in the world of world diplomacy, economically, I learned a lot from Tiny Roland. Those of you who know Tiny Roland is, being my teacher, or what you call it, lecturer at the University in Master Degree, (1:22) he soon realized what I can do, what I'm looking for. And Tiny Roland accommodated me to explore that, it was his habit. Tiny Roland, those of you who know him, he brought in the children of the African leaders, and gave them free education in Europe. And because he became like a father figure, he told them what he wanted from

them, when they became the leaders of the nations. Read about him, he's a very influential, one of the most influential people in the world, of 1950's to 1980's.

And, he gave me that platform, and he taught me that platform. I said, "I want to open, to understand, to work in Africa." He said, "Mehran, all the West African ports are owned by me. Where do you want to start?" I remember when the, what you call, communism as a Russian State broke up, and I said to him, "I want to open up into subcontinent, sub-satellites of Russia." He said, "Which country do you want?" I said, "I would like to work in Kazakhstan." He said, "My office is there, use the office, all I need to do, just get a ticket." I was in office, tables and everything ready. He said, "Explore, because I know what you want to do." I had the opportunity given by, or ground made for me by, some of the most influential people, just through contact and education. Read about Tiny Roland, he's the guy who used to be owner of the Harrods. And read about if you find Lord Crammond family in Scotland, (1:24) they are the controller of the Queen's, or what we call it, monarchy finances. They hold all the gold.

And you learn that the politics and diplomacy is a very, very clear distinction. You never talk about the diplomacy with the politicians. And you never talk about politics with diplomats. And then you understand both of them are controlled with the strings of commerce and trade and money and finance. That's the only common language between both of them. And if you learn that you can separate the two and work with two, without the two interfering in your work. And to that extent, I had the privilege of some of the most top politicians and diplomats, training me, teaching me, in understanding both sides. Close friends, head of the Central Banks of nations, and what I call, world ambassadors. It's to learn and understand and see which controls what. And how everything is controlled and it's not done by...

This is one of the things, for example, you learn is that American Central Bank or your Treasury (US Federal Reserve Bank), wherever the bank finances the dollar, is owned by Rothschild's, but the Rothschild's structure of the finance and banking is owned by the Queen of all, King of England. It's a subsidiary of, using the power of the, what we call, House of Windsor, (1:26) to influence the finances of the world. In a way, they carry out the bidding of the House of Windsor. Once you understand that system, and understand the nitty gritty of it, then you understand it's very easy to separate the two, but work with both.

Any questions?

R: Well, I was quite enlightening, this, this idea of diplomats and politicians being separated. I've kind of lumped them together in a way in the past, but they can see there's a big distinction there.

K- You see the... we got to learn... I learned and I always said very earlier... Us businessmen make the politicians. If you want to become a member of Parliament, you need money, somebody to support you, to promote you, to advertise, pay for your promotion and everything else. And then you stand in public. Very few politicians come

in through the rank of being a mayor or whatever. So, politicians are controlled by business people. And you spend a thousand dollars, you get a man to the Parliament. It's very easy to do that. You don't need much finances to get a man into the Parliament to make a politician out of.

Diplomats are different. Diplomats start as pen pushers in an office. Very few diplomats at the high level have come in through other ways. (1:28) We see usually, like let's say, Kennedy's as ambassador to Austria, from the United States, they come through the structure of the politics, because of their background. But 95% of the world diplomats, and ambassadors, consuls, what you call it, attachés, have come through diplomacy. They come through the... usually they've done history and literature in universities or politics. Then they work as a civil servants in foreign offices as a junior, and they build up their numbers. When they show some talents and then they find some connections internally, then they become consuls and ambassadors and attaches. When you speak to a politician he is interested to be, what you call it, to earn what we call, money for his retirement. From the beginning, when you do, he looks for the power.

A diplomat has already reached the power. You pay 10,000 to make a politician, you pay a million to talk to a diplomat. Because when a diplomat reaches that high position in influence, this is the last stage for him. He could be moved from one embassy to another, but most of the top level ambassadors, like two major embassies in the world, French, German, London, New York, Beijing, Moscow, Brazil and India, these are the major, what we call, diplomatic high points for ambassador. To talk to them to get them to do what you want, because they set their mind, they work the lifetime to get there, they are seasoned diplomats, they understand the diplomacy, they are very expensive to handle. And it's very hard to what you call, position. (1:30)

But there is a way to get to these diplomats which you go through politicians, which you go through the foreign office, the people you put as a member of the Parliament, to push that to get what you want at the end. It's a game. And when you want to influence the policy on the ground. In the other countries you work to the, what we call, ambassador, where you understand his language of need. He takes you to the Foreign Office, you see your presidents, and then through there you influence what happens on the commercial side.

The successful people as a structure is where they use one for the other and the other one for the other one. And each one has a structure, each one has a way of dealing and handling and understanding. Some of the Knowledge Seekers have been with me in a meeting sitting with the world leaders, world ambassadors, Ministers, because they've seen how I ?? launch, and I usually invite them to, in the country I'm in the suite for the dinner, everything is spoken to on the table. In some occasions, Knowledge Seekers have been with me, which I trust closely, to sit with the world leaders, world ambassadors. And they are shocked how human they are. In the same time, because I work with diplomats as well as with the politicians.

It needs training. It doesn't come by accident. And I thank for that. We carry the knowledge, the technology and everything else, that we can link them together, and this is the beauty of the Keshe Foundation. This is where it comes, when we put the knowledge, (to) the politician to the diplomats. (1:32) The only problem you find in the world, is the military. And, military people are a "different animal," and they have heard that, they can, they think because of their uniform, they can change things. But they don't understand seasoned people like us, we let them loose, but we catch them when we want, and when we catch them, they are a "caged bird." And this is the way it comes, by experience, 40, 50 years working, and by totally accident and coincidence, partially because of the nature of the education and where I come, and the family I come from. These things has been accommodated for me to learn, but I've learned how to use it, and how to separate and respect each one. But at the same time, the only things which brings me some arrogance which I'm aware of it, is my technology and knowledge, because I see it, it can be a key, but on the other hand you have to make the others to see the key.

I'm sure in the next few months you will see Keshe Foundation is one of the major players in the world of diplomacy. As we are part of it. We are getting more and more involved in it, because we see international policies need international diplomats, to bring that with the politicians into operation. It hasn't come the easy way, it's a lot of hard work, a lot of Knowledge Seekers who work with us in the background understand it and they do. This side of Knowledge Seekers you don't hear, but they work through day and night, for keeping the diplomatic line, the political line, the scientific line is enormous. (1:34) I thank all of you for all the efforts you have made and you still do.

Any other questions?

R: Thank you Mr. Keshe. Now you've mentioned Africa today and we know that you've spent a great deal of time actually and energy toward that continent. Well, we have 2 hands up here and they both happen to have their origin or roots in Africa, specifically in Kenya. ( Dr. Gatua had his hand up .... )  
( ...KS have problems opening the microphone)

Q: ... (1:36) Yeah, that hand came up accidentally, it was inadvertent, but at least I got a chance to say hello.

K- ... Dr. Gatua, while you are on the line, I want to ask you a question. We sent someone to you, who wanted to learn about the, what you call it, about the Gans's and everything else. Did you have much success with that?

Q: Yes he came and we started...

R: That's, that's the other hand that's up here Mr. Keshe...

Q: ... He lives 400, 400 kilometers from where I live. About 400 kilometers near Tanzania border, Migore and he came here and of course, yeah I showed him what he

needed and we are in contact. Thank you very much for introducing me to him. He's a good guy and very interesting to learn.

K- Thank you very much Dr. Gatua for all your work and support.

(KS have problems opening the microphone) (1:38)

Q: ... And Mr. Keshe, now that I'm here, can I ask a question?

K- Yes.

Q: ... Inadvertent hand, but with a question.

K- Yes. Your Soul knew.

Q: ... Yes, I would really like to understand what is happening in the Middle East, or in West Asia, as they call it. There are a lot of things happening in Syria right now, expansion of the terrorism or war, whatever, by whatever name. So, what is really happening and what is the likely outcome? Thank you very much.

K- You touched the very sensitive point. We are observers to this situation, and we are, we receive and we are in position of vast amount of knowledge and information, which is partially very small, but very, somewhat, very sensitive. But in a whole, we are heading towards peace, especially with the new administration in United States, (1:40) but is territorial landmarks which has to be, or been trying to expand, and primarily what we saw in Syria was the feedback on the back of what we saw in Gaza and in Lebanon. A lot of ammunitions were captured by the Israelis, and these captured arms were sold back to the Americans as part of the payments because it's the Israelis' assets. And then it was distributed by the Biden family in a... essentially, a trading. Those which were Russians were sent to Ukraine. And those which are of the Chinese and other origins, or recaptured American arms, which were no use to the Israelis, were given to this group in Syria to start a new cycle. So that's how they suddenly got armed. And suddenly the day after they're signing their thing, it was agreed that the arms will go that way and this will be done. And there's a huge ?? fledge of arms, especially for the, the, what you call, the Ukraine side, a lot of Russian armaments, were rockets and everything was captured, which were sold to the Americans, and Americans shipped it to Ukraine, to replace the shortage of arms. We monitor this very closely. And, because the essence of the finances. Again, as usual, (1:42) those who run the Israeli government, took the massive commission into their private accounts, from selling these arms. And the same American lot took their cut, and then the Ukrainians came under debt.

And ... so, it's, we see this shock and the ??, 50 days, 60 days till the new administration come into operation. And again we've seen new moves, by the new administration which wants to see peace, and in a way, there's a "catch 22" for the Americans, more than anybody else, is that American military superiority with missiles and the rest, which they have, has been, more or less, passed by new weapons which are coming in, and the

Americans are trying to, by numbers, change the position. And Trump doesn't see that. Trump sees this closing the military factories to stop wars. He hasn't realized he has to create new jobs for these people. And he'll be influenced to start another cycle of something else.

And Keshe Foundation is part of this structure trying to stop this next process. We are extremely highly involved in these directions and we have to wait and see but primarily we should see temporary silencing of guns in Gaza in the coming weeks. Otherwise, there will be a huge explosion. Syria was a burst of Americans trying to bring, (1:44) but the Russians stopped the main headquarters of these people literally is wiped out. Estimated three to five thousand have been wiped out of this group. And mercenaries from Italy and England are arriving very fast, trying to restructure. And we have to see how NATO and non-NATO, and inside non-NATO, NATO's operate.

It's a very, very delicate situation in this region and Turkey has got trapped in it, where they support this new uprising, they financed it, they paid the Americans for it, weapons for it. But on the other hand, they're trying to come to an agreement with the peace with the Russians, and the Russians were not expected to get involved, they got involved. And all this is the game of Netanyahu trying to bring the big powers (in) to keep busy, keeping himself out of prison. (He is) putting the Russians in front of the Americans, this guy is a psychopath. So we have to see how this ends up if he stays a Prime Minister for the next few weeks or months, and when he comes off, how they treat him.

As when I was talking to one of the diplomats, the best solution for Netanyahu is for him to finish himself. Otherwise they will, they will ?? finish him off. One of the things is the hostages. I have asked our sides to recommend to release the hostages, because ?? the hostages are a solution to it, but we have to see what we can negotiate. And what they... they have a different structure. (1:46)

You've got to understand the complexity of this situation. A man is trying to keep himself out of prison. A group trying to show that they are in power to change. There are groups which are testing new weapons and see how it affects. Then you have a group which is fighting with "tooth and nail" just to be in power, and they're all in the same "bundle" called Syria, Israel, Lebanon and Gaza. And very interesting what when you hear from the military in Israel is that, we always blame Iran equipping Hezbollah with missiles, and they are their proxy. But now with what they realized in attacking the ?? (name) , is that Hezbollah is producing its own weapons. It's not a proxy.

And this is one of the reasons Israeli pulled out so fast. And they wanted a peace as much as possible because they thought the Iranians will give a hundred ten thousand five thousand rockets on missiles. But these missiles were made freshly daily, and used directly. This what was one of the biggest what we call, shocks to the Americans and Israelis, that there are no proxies, ?? there is the same ?? demand. The technology is transferred and they are developing their own. And America has become wise to this, especially Trump has become wise to this. This proxy business which promoted by Israelis, like Iranian made having a nuclear bomb using the Keshe Foundation Space

Reactor as a, on Israeli television. (1:48) A man stands there, you showing the Keshe Foundation Space Reactor, which we all know, fooled the world as this being a Iranian nuclear development for weapons. And it was interesting to see this. And now we see the same game played by him.

When the report went to IAEA, this, I'm sure you as Knowledge Seekers have seen this and you've seen picture of Netanyahu standing in front of the Keshe Foundation reactor, Space Reactor and claiming it to be what I call, a nuclear bomb making system from Iran, where it's actually it's been, and because people are not knowledgeable with it they believe the guy. If you look at the pictures of Netanyahu, which went on the national televisions with arrogance of claiming that Iran has nuclear weapons and then what you call it, showing the picture of the Iranian nuclear what you call it, the Space Plasma Reactor as a Iranian weapon, it's over. This guy has lied, cheated and everything else. (1:50) And we opened this to IAEA, and IAEA after checking confirmed that Netanyahu lies and they don't believe him anymore.

If you remember the picture of Netanyahu on the, what you call it, on the Israeli television with all the razzmatazz that they've discovered the Iranian, what you call it, nuclear system making weapons, you see, remember this picture? If you are Knowledge Seekers look in the archives on the left hand picture is the same, is the picture of the nuclear, what do you call it, the Gans technology system, where the Gans's separate. And if you look where Netanyahu is pointing at, is a copy of this. He took Keshe Foundation reactor, claimed to be in ?? and put it in public, and everybody believed him and ran the Americans with it. He's one of the biggest cheats and deceivers of the present time. And I can take out the picture of the, inside this reactor, distribution of Gans's, and you see the picture on the left. And the all politicians are becoming aware of it, if you just look, you don't see any difference between these two. That's the hand of Mr. Keshe, hands of peace and this is a hand of war and disgust.

And now this is how he's fighting for his life, literally for his life. Then you understand and how we are so much involved in both politics and diplomacy, (1:52) because people have started seeing what we have done, what we do, and where we stand. And then you understand there's a lot to be done in what we call, the Middle East. They claim Iran is a hand of blah, blah, .. that's just ?? . (You can change the screen, Rick). Is doing, but what happened with all this line after line of new weapons came up, and they thought now. When the West is going to open their hand, that Iran never supplied anything. In a way, these people have become to share technology and build their own. And this is where we see change of policies in the Middle East.

And diplomacy has different ways of doing it. We have to be in diplomacy and the finances of diplomacy, other than in the politics of it. We'll see, next 60 days, he has to find a solution for the hostages. He has to find a compromise for Gaza. And from the Iranian side we are safeguarding our interests with the Americans. We have our own ways of doing things.

And as I said, by March 2025, we'll see the Americans in Iran, and we'll see Iranians in America, with their diplomacy level. We are not innocent people and we are not silent people, but we are a nation of two-and-a-half thousand years of ?? (culture). (1:54) We know how to handle. We see peace now... it's become that phase of peace with Trump. The biggest problem is the world moves from "gun" policy to "economical" policy, which is the bigger problem. Not having wars but opening the doors of the economical sanctions and limitations, and this will bring limitation inside US more than for outside US. And if it's not handled right way, the ideologists of no war, the ideology of no deaths, needs to bring a condition of consumers, and people to consume. Or create a, what we call the policy of the digital monetization, which means you just change the wages money package, to numbers in the bank account. Nobody can rob no one, you call on what you need you're paid and the people receive it and they pay what they need, and the prices will not be could not be indicative of the actual goods, but in how much it makes policy peace.

In the West we are getting used to it in past 10, 15, 20 years, is called a Fair Trading in Agriculture. Fair Trading in Agriculture is very simple, European farmer needs, lets say, (1:56) 25 Euro per kilo for beef just to maintain the animal to grow it and then he needs 20% for his living. So you're looking at about 30, 32, 35 Euro per kilo for beef. In the supermarket you pay maybe 15, but you don't know what you get. But do what now our parents for thousands of years lived on the land what we call, biologically. Now we pay heavy for it to get what our grandfathers had it free. We call it bio-materials beefs or whatever. So, us have to pay that 32 for the farmer to be able to look after the land and the farm and everything else. And then, or you go to the supermarkets at 15, 20 Euro a kilo, which is all subsidized, they're getting off all back, whatever, call it chemicals and everything else, to go and mass production. We will go more towards the ?? bio sector (Organic foods) for the countries like America, because first of all, they won't have the public or workers to do it. Secondly, the cost will change heavily as Americans cannot export.

You got to understand, sanctions works, tariffs works, when you can do it yourself and you can export yourself. When you have a struggle with yourself on both sides, the problem sits down the line. Farmers cannot sell what they produce and people can't afford what the farmers produce need to survive. And then we'll see the structure we see today. (1:58) And this goes back to the politics of the Middle East. And we'll see good position but we have to see how this new administration juggles between foreign policy, internal policy, supporting Israel and at the same time being open to mistakes the Israelis have made, and how it can be corrected. It's all interconnected, because the Chinese are delivering a huge number of weapons everywhere, everybody ?? needs it. Even they claim to be a peaceful state.

Q: Thank you very much Mr. Keshe. Can I ask a second and final question?

K- Yep.

Q: I was wondering what is the connection between what is happening in that region of Syria and Lebanon and what is happening in Georgia and South Korea?

K- That is irrelevant. Absolutely irrelevant. You got to understand the revolution or what you call it, claiming martial law in South Korea is the same situation. He had to withdraw his martial law and or retract, and go back or whatever. He is in the same situation as Netanyahu in Israel. He's one of the most unpopular leaders. And he's brought a lot of mess into the system and he was what... Actually he was inspired by Trump to come up with this, leftist communists we heard. (2:00) I think he had a the dream and he got up and he did it. We heard this one in the election cycle of the United States. He accused the left as to be communist in a way, and gave him the right to bring this thing in.

I think he'll be, we'll see how they handle it. But it's a one man dictatorship and it doesn't have much room as we saw within the structure of the South Korean structure. It was all fake, and it's all fake things, but the military has to abide by the President. This is their problem. And one of the most stable nations in the world suddenly has a dreamer who wants to do things.

You see the problem with us even in Ukraine, is some people who have no understanding of the politic, get to the position of power. We see in Ukraine a comedian has become literally taking the whole world for comedy, with the Ukrainian war. He tells, "It's a laughing stock, but it's cost nearly a ?? million lives." And now, he's negotiating for asylum, with Germany. He's negotiating with asylum with United Kingdom, before he wouldn't get out, you know, outlawed. Just 9, 10 billion richer. He was happy if he makes 9 dollar a week, now he's got 9 billion in his account.

The Syrian situation was on the card. You got to understand, Rothschild's and the rest are after Syrian Central Bank. The whole target is the Central Bank. (2:02) Syria, those of you who don't know, is one of the most Centre of the knowledge culture of Arab nations. It's the capital of the culture, has been for centuries and with it has collected some of the most rarest assets, that no one knows what sits in the Syrian Central Bank gold reserve. No one knows. The same with Iran, we have collected 2,500 years, even when it's emptied it's still full. And that's the target. The last 3 central banks which have not been taken over by the Rothschild's, Syria, Iran and North Korea and they're all "rogue" nations because they don't give up their national assets.

But as I said, you will see changes in the next few months, and directly, directly influenced by the technology and knowledge. You will understand that I said I don't speak much. I've been told to "hold my horses," but you will see the changes.

Q: Thank you very much Mr. Keshe, we look forward to the changes.

K- I know, I'm working 24 hours a day and many, many other people like us, they are literally working 24 hours a day. It is... We are all with each other. We have a "window of opportunity," maybe four months, five months, to bring the change. And bring the change... (2:04) we just hitting the right administration, the politician, everything else,

but the aftermath is, we have to put a solution on the table. And the solution for one and a half million highly paid intellectual people in different countries, is Space. We don't have the facilities on this. And we have to find, give man another hobby, another thing to be busy with. Development of technologies beyond the weapon, but in Space. And, equal opportunity for all nations, from Africa to Europe to America to, what we call, Asia.

Stealing technology has to become a thing of a past. Sharing technology has to become the norm of the day. And this is what we got to do and beautifully with you Knowledge Seekers across the world, as I said to one of the world leaders, very, very recently says, You cannot tie my hand. I have companies in China, in Europe, in America, and I don't need permission to transfer my technology from one to another. Talk to us in a language, that I do not transfer the Space Technology of Iran to United States. I do not transfer the transmutation from one to another. I don't supply America with the rare earth materials, which America is suffering now, with the ban on (from) China, so let's talk a language.

Technology will bring that change, but you have to have a listening, and a participating nations to do it. (2:06) Americans have created a big hole for themselves with this new tariff business and everything else, but there is a way out of it. Because it's going to bring 4-5 million people unemployed in United States, up to 25 million unemployed in next 12 months. And the beauty of it is, all highly intellectual, 20% of them are scientists. You give them a job to get themselves into Space. You give them new hope, new direction, or you keep on printing digits in the bank accounts just to keep them quiet.

I had this discussion with our beautiful Jon, bless his Soul. He said, "I come from the aircraft the Space industry. There is no future. Once your technology takes over, what we're going to do? At least I came out earlier, I've seen, I had time to enjoy it." And we have to not just say we can do, we have to open new horizons in technology. This is why even today's teaching I open a discussion of... on first line of understanding of new systems, new technologies, the research to be done, emotional computers, computers. We have no chips. You're in Space, how you going to repair your chip or your computer if it goes? Because you can transfer energy to this quantum size, what you call, a small size, Gans's and then build your computer anywhere in the universe. You don't need to come and get material from the Chinese, who can ban you.

So, all these bring researchers, brings new technologies, (2:08) and with it, brings new ways of even us financing our lifestyle. We always get 5-10% abusers. Without a doubt. But the other 80-90% want to expand on the knowledge, on the technologies. In... we have to bring an alternative is new technology in the Space, and in new technologies. We still have people making yogurt using the cow milk and the sheep's skin. We can't stop making butter that way. But we still have advanced technologies, which you don't need to do anything with it, but you can get all the emotions, feelings of it.

Any other question?

...

Q: ... Thank you very much for all your hard work and your love. (2:10) And I wish everything very soon has a happy end. I have a question regarding some workshop, which you said that in space there is no female and males. And, I read in Holy Book that says God created this disguise and Earth and we created you are on Earth in couples, and we created you as man and woman. So if we say that what's in Micro is in Macro in the plan of Creation, if on Earth it works this way, why not in Space? I can understand the affinity between no sex identities, but how can these difference create attraction to the other one to create a child?

K- If you look at what we got used to, the human language science of sperm and egg. Chromosomes and the rest of it, one is more than the other one, just by single. Translating into language of the science of plasma, that one extra means unbalance. which means it's giving for the other one to receive, and that creates cycle of absorbing energy. (2:12) In the Universe, when we add from two races, different plasmas, they cannot match. And subsequently, if I'm prepared to put part of my plasma and you are prepared to put part of your plasma, whoever you are in the Universe, leads to creation of cycle of life. Do we need to create a male and a female to it? Put a name on it? If you add it in another dimension, you should be able to understand the "virgin birth." Now understanding the technology of science of plasma, does virginity has anything to do with giving birth?

Most probably, most of the children of Space are from virgin birth because there is no womb. There's no physical interaction. The way the Daughter of Mitra has been created. Children of Mitra, it's the only way, we can.. ?? We don't need to go to... Sorry, it's a plasma. When you have egg and a sperm in coming together. Who's what, who gave what, which one is the male which was a female it's just energy packs, they have no names, they have no identity as a male and a female. They are two plasmas. And they are balanced between the fields energy allows to .. not to .. create. (2:14)

In a way I answer this to a doctor sometime ago. If you understand the way we understand or explain the World of Creation in the womb of the mother, then you don't need test tube babies. You don't need surrogacy of the baby in the womb. If you understand why the reason behind a woman cannot conceive even there is an egg and a sperm. You change the field strength of the womb, same ?? in the sperm, can be fertile. The womb has energy above the egg and has an energy above the sperm, and drains on them. And that's why if you change the acidity, if you change, you call it acidity. If you change the environment of the womb, field strength, any egg and sperm can create a child.

There's a difference between the womb and the stomach. And the only difference is that energy. The womb of the mother creates that liquid in the womb of the mother, creates salinity for everything in according to what is needed, to create the liver, the kidney, the brain and the rest of it. If you look at the structure of the fetus, how it starts and measure the salinity, whole mixture of the salinity of the womb of the mother, you see it changes. It's the salinity of womb of the mother, which dictates which part of the womb of the embryo is produced, converted to. (2:16) Everybody looks at this fetus so much is there,

then it's got the arms, then it gets legs, then it gets heart. No science has ever measured the salinity and the combination of the salinity within the womb of the mother. That's what dictates what to produce, and it's got nothing to do with DNA.

And when we understand these things, you can create from two energy packs, give it an environment, any creatures, anywhere in the Universe. There is no need for creating a virgin birth, which is a confirmation of the life in the Universe. In fact, the Children of the Mitra, Children of the Universe, are created in the womb of the Universe. Children of the man are in the womb of the mother environment. They need to grow. Children of Mitra have the whole Universe and Universal Energy and the knowledge, because they have no womb, they have no containment. They create their own containment and that's why they are such a wise people. Because we limit everything we have from the color of our eye to our intelligence according to what is set within the womb of the mother, and what we have later on.

The Children of the Mitra born in the Universe, they have no womb. And they tap in the Universal knowledge and technology and everything else for their survival. When we understand this, (2:18) then we understand the process of Creation and how things have been put into mysticism of life, and a lot of other things in different religions. Because you keep on referring a lot into what is in the Bible. If even you read Bible and connects the dimensions of the Tree of Life with all the connections with one structure, gives you an amazing figure which is 33. And, end of knowledge came, completion from the Soul to physicality came from the top of the tree of life to the root of it, which has a shape of cross with the five pins and number 33, which this all brings Christianity's built on mysticism. Understanding the cycle of life has been translated into the language of the man understanding as a religion. You draw as 1 to 10 tree of life, which is 1 to 1, to 1 to 2, to the top, then count the connections see the structure and the numbers it comes to 33. Wise men have created religion to fit everything. They have the man. They built the rest around it the way they wanted it. (2:20)

Q: Thank you. Then it comes to my mind. So, this child has the characteristics of the parents. We can say in human, the parents. We have...

K- Some of it yes, but it's accumulation of the Universal Energy and knowledge. Some of it yeah.

Q: So, like the race or...

K- Some of it are. We are, we are created out of accumulation of a lot of fields and how they position themselves.

Q: Is it possible that with knowledge man can create children in this way as they want?

K- It's already been created. Child of Mitra is amongst us. And secondly, the many, many people will come to it because they say, the light has been ignited, it will enlighten the

others to do. Planet Earth started with one, then became two, and now 8 billion and continuously renewed. It's a cycle which we have to understand.

Q: And what's happening on Earth is happening in the Universe, as far as cycle?

K- Earth is such a small thing in the structure of Universe that, but the pattern is the same. (2:22) You have fields and you have interactions, and you have an outcome out of the interactions. You have single interactions or multiple integrated systems, interact continuously and they lead to certain type of a structure. Life... Go back and read details in the patent number 1 of the Keshe Foundation. The intrigues of life as a system, is set in the combination of different claims. You create a aircraft which has emotion, you create a house, which goes with your emotion, it doesn't need a sensor. It feels your emotion, you are hot, you are cold. The house has become aggressive, so it changes the environment of the aggression. You grieve, it changes position, that you don't suffer. This... in emotional structures, is the future of human race, does not matter where it is.

We've seen that's in plants, the plants change their structure, their communication, their leaves, according to the emotion of the house. You take a plant in a house which is always fighting and whatever sorrows. Take the same plant in a house where is light and life and happiness. You see the plant changes, a lot of research has been done on this. Because, it works on what we call, Communication Line of the Life, what we called, C13 today. (2:24) Does ?? that connect to the man, ?? it uses the emotion. And, building structures, building environments, building systems, which follow and use this technology or the Knowledge of Creation, it'll become part of our lives.

The beauty with what I... in our discussions with the... those who are in the path of peace, is this. Let's bring new technologies, keep people busy with new technology, create new economies, new business, of people being busy, in the dimension of the World Peace, creating tools to create comfort for. And then government facilitate it, in that way. The Chinese government will lose heavily on this, we will see Chinese economy collapsing within next few years, if the new policies of the combined two, three nations, which we are involved in, takes shape. We build nations and connections on the need to bring pleasure and life and not wars.

You have to dismantle a structure from the base, and to dismantle it, is to show that there is no need for it. there is no need for it, and itself, by itself, disappears. There is no need for monarchy, nobody needs to be hired at it, and there is no need for Rothschild's, that the money needs to control. When everybody gets, has access to what it is, what is needed, and it's respected. You come to my shop, you want an apple, you created an account with 1 million dollars in it, and you want 10 apples, (2:26) I give you 10 apples, and I pay with the same thing, what you call it, the same structure.

Q: Thank you very much sir.

K- Thank you very much. You know, I've received a notice from the administration of the Keshe Foundation, I have to read it for you. This goes directly to Mr. Barbu of the

Romania. You are a criminal, we have seen you. You have started selling systems and telling people, that 5% goes to Keshe Foundation. You have... We ask the Romanian community to report Mr. Barbu to the police, for direct investigation. We warn you once or twice, he started selling systems which is making people sick, and telling that connects them to celestial people, using the Keshe Foundation platform. We are receiving a number of reports on you Mr. Barbu, we asked the Romanian community to take immediate action against this gentleman and his wife. And this gentleman has nothing to do with the Keshe Foundation. He attached himself to use our name in Romania, creating massive damages. And in due course, we will take action. I'll pay a visit to Romania very soon, to put this matter directly with the police. Because this action of this gentleman is beyond limitation of understanding. We will ask a criminal lawyer to take action against you Mr. Barbu. (2:28) We never done this but you have passed the line, you're damaging and you're creating a lot of problem. I receive daily reports on your behavior more or less from the community in Romania. And the Romanian community have to take action and bring this to an end. Sorry about this.

Any other question?

Q: ... Dear Mr. Keshe, does it mean that people who can connect with Souls of people who are no longer in a physical state can also use this communication line at the C14?

K- C14 is a connection line. It's what I call, the vehicle. And if you have field strength, dimension of gravity and magnetical field of it, you can dictate the position you want to be connected to. It's as simple as that.

This is what gives me a lot of joy with if we can bring the Iranian scientists and the American scientists and the Chinese which they have a habit of stealing. You can't help with Chinese. (2:30) There's a saying in Belgium, they say if a Dutchman doesn't steal from you, it's not that he didn't mean to, he just forgot. This truly applies to the Chinese scientists, Chinese military and the rest. If they don't steal from you, it's just they forgot. It's the habitual stealing, it's their work. And if he can bring that nobody needs to steal from no one, then, we can reach a position to create that dimension of communication that we all do not need to do anything wrong. And that brings what I call, you call it the Chakra, I call in a way, connecting, but with the C14 you connect the Universe, energy levels of the certain position of physical dimension. With what I call C13 or communication line, you connect with the citizens of, not the location of. Location is location, there as it is.

Before I forget, many of you who are the followers of the certain path of Christianity, tomorrow is a beautiful day for St. Nicholas, for the children of man. We wish all of you a happy birthday and a beautiful day tomorrow. Those of you who follow this path and enjoy the time of St. Nicholas for your children. Because this is the seed where we see the joys of happiness and sharing and giving. (2:32) And children need to be nourished in that way.

Any other question?

Q: ... What happens with those who use this knowledge to build tools to harm or destroy an environment? What can be done with those tools to bring peace?

K- With this knowledge whatever you do ends up to be good. Whatever you do ends up to be good, to do good. Plasma technology is the Ethos of what I call Mitra, Do good, think good, and act good. Whatever you do with it, it ends up good. Because it doesn't have the essence of the emotions of the man in it. It has the benefit of the Soul of the Creator. So, don't worry about it.

Q: ... Regarding the C60 a crystal also called a Buckyball, named after Buck Minister Fuller, creator of the geodesic dome buildings, it can contain the volume of a universe? Does this mean many C60 crystals are needed to make a shell, (2:34) to surround the available space for a Universe, or one crystal of the correct energy field level, a principal field energy in the center which unwinds, to contain a Universe? Same question applied to the skin. Each pore of the skin is a C60 crystal, or one crystal with Principle Field Energy unwinding?

K- I think Rick can answer you that question.

R: I can... okay.

K- You remember you said, I said something that one atom can fill up the whole Universe.

R: Right, well you mentioned about the Hydrogen atom, for example, in Space, has an active radius of over a meter, and because there's at least one hydrogen atom in every cubic meter of space, and quite often quite a bit more, then they're all connected, essentially. You can look at it that way.

K- If you, if you call, if you understand the work of the plasma, and understand the levels of the fields of the plasma, one, one of the field strengths, the spectrum of one plasma of Hydrogen (H), can cover the whole of the Universe, can expand. And, in a way, every other spectrum of the field of this plasma, in their interaction leads to creation of the galaxies, stars and everything else we know. So, if we change that single plasma, that at a given field strength, (2:36) as it has a spectrum, will be this, we can cover the whole of the Universe, then we call that the Soul of the Creator, as is the common denominator, everything is within it. So, one single plasma has filled our Universe at a given strength, which is the love of the Creator. It's the emotion, is a field, anything we create, we touch, we feel, has to have a field strength. So, to create that single crystal which is one of its own in the dimension of the energy, but in interaction with its ?? own sub-strength fields create the tangible dimension what we call C60, because it's the origin of itself, is the Soul of the Creator manifestation of the Creator in dimension of physicality. That's why He's everywhere, because we are part of it, we are created out of it, at different strength of it. Then, this should answer your question.

This is why I explained, between Hydrogen and Helium, you call it 1 and 2, there is a huge spectrum that has 1.11111, 1.11112, 1.11113 and then you have to go 1.1111. So, if we come out of the matter state and call it one electron, one proton, and then Hydrogen or Helium and isotopes of it and work on the energy level, you don't need more than one cell to create the whole lot, (2:38) because everything else fills in between the zero and one. It's ?? spectrum in the center, it's control and what it can expand.

I always compare things, because it makes sense in a way to do it. If you stand on some shores, you see some fishermen. They hold a net and they throw a net, and the net is circular and it has a center. And the net falls and then they pull the net up and you have a ball of fish in it. That net is the universe and the fish is the man which created within it, all lives within it. And then the Creator is the one who pulls out the string and pulls it out when he needs to. And if you understand this, it makes life very easy to understand the process of Creation. Everything is within, it depends what we select as part of, and what we pull to be part of to pull in.

R: Sort of, I guess it depends whether we're the fish or the one pulling the string on the net.

K- It stands.

R: Different point of view entirely.

K- Yeah. It depends how big is the hole of the net, what fishes allow us to go through. That it has time to grow another dimension cycle of life.

R: Now you've mentioned in the past about the Spaceship configuration for Space and about the layering of the skin for the Spaceship, or the protective layer for the Spaceship, which might, you know, go... exist out in Space in front of the ship. Or something like that. (2:40)

K- We have already produced this, as a material conversion. So...

R: Is that... is that related to what we were just speaking of, with the idea of either the C60 or the C13 perhaps, 12, 13, 14, or those the three layers that we're talking about?

K- When we speak about C60 in the theology of the understanding is the energy which creates manifestation. You understand? And in respect to its environment, and how that environment manifests itself, and how C60 manifests itself to be in that environment, the skin of the man, the size of our Universe. We know we have a Universe because there must be an empty space, or another space in it that it confirms it's part of something. This is what the modern science does not touch, because we don't have an answer for, now we blank it out. They say our Universe has such a diameter. Yes, if it has, what's enough that you can, you're measuring it. Otherwise, you cannot measure it, you cannot have a size. It has to go to infinity and you never see the ends of it.

This is... so, if he has that dimension, it has an energy which creates that dimension, and it's not a ballpoint you tap it in and it's always there. It's the dimension of dynamic structure of the fields of it, which gives it that what we call, C60. (2:42) C60 is not something that... is a net, is a energy field, which every part of it is part of itself, created by, connected by, related by itself. And if, in the process of doing it, being there continuously, comes into other subdivisions of itself, because of the interaction of the past, leads to creation of a new cycle, new energy packages, new plasmas, new environments, call it the galaxy, call it the star, call it the life of the man, call it the cell in the body of the man. It's all the same. The limitation comes on your understanding and not to the power of the Creation.

Creation is limitless and the combination of its interactions are limitless. Man has been so, due to his knowledge, to his lack of understanding and his tools, has limited everything to hundred and odd elements. There is no limitation in the cycle of Creation, and in the elements which create that creation and then the Universe. Especially when you go to the energy level. And if you understand this, the science of the Creation becomes so simple.

Any other question?

Q: ... (2:44) Yesterday we are discussing a lot about the microplastic, and one of the questions I want to ask you is in the medical part, we know that the microplastic inside of our body is similar to the hormones. We listened to yesterday, your public teachings 395 (Note: The right teaching is 376 and not 395) about the hormones and the substations. I'd like to know, if we do like Nano scans of microplastic, how can I know if I am... Will be good or worse? I don't know how I can measure the microplastic inside of me. So, that's my question.

K- There is no measurement for... There is a very beautiful test nowadays on the Internet. ... And they take a chicken nugget, which all the children love to eat and a lot of adults too. And another one takes a fish finger. And they literally dissect these two little things which our children eat every day. And when they put it on the microscope the amount of microplastic in this in different shape or form in one little sample of it, chicken nugget, it's so huge, that it shows that we are literally feeding our children from young age with this now. It's become part of us. There is no measurement to it, because we continuously absorb it. (2:46)

We are hopefully sending out this micro plastic things for Gans's out in the next few days hopefully. And then we wait for the response, change of emotion, change of physicality, change of taste, change of habits. And the reason we specifically targeted this for the head part is because when you change that in the headquarters, the body will reject it too. We want to know what you feel on your skin, how do you feel, the texture changed, do you see anything on your skin. Because the command says we don't need this, it's been rejected with the rest of the body start rejecting it on the skin.

There is a structure that body especially in your digestion system we see this in some magic shows, but in real life scientifically exists, I know one closely which cannot be denied. If for example, in your food you eat, let's say, a seed of an apple. In eating a bone you eat the cartilage, which is different structure. After a few minutes, or after half an hour, the body rejects it. Because there's a mindset to it, (2:48) that the body has been pre-set not to accept anything which is not a certain condition. You swallow a coin, it will reject the coin. You don't need to trigger it, you don't even know you ate it. You don't even know you had the seed of the apple (in your stomach). Because it's set in the structure of the, what you call it, the brain. And there is a reason for it, it happens.

We understand that process and so we set it up that way. Originally this test was done years ago by couple of doctors with us, to see if we can get the shrapnel out of the near the heart, without actually, because they can't do the operation, but it's dangerous where it is. So, do we go physically for it, or do we set the fields for it, not to be accepted to be what it is. And these microplastics, can be measured to be taken out, but we continuously absorb them in food, in air we breathe, in clothes we wear, and some of the energies.

Because we have the amino acid (AA) combination, and we put the container, like the womb of the mother I explained, created themselves inside the body of the man, from the surplus energies of it. It's not that we are all taking the microplastic outside from the clothes. We create that field plasma and that field plasma in the back on the front of your body as your shirt, which carries, creates a field interaction is in touch with your sweat, now is part of the Gans. It's not a cloth on the body of the man anymore. (2:50) So, inside your body is made of the plastic, made of certain type of combination, it replicates inside the body of the man. (The microplastic is created inside the body like in a Gans Box, because of surrounding the Gans with plastic field energy from wearing plastic clothes).

This is why I say ... don't wear synthetic plastic we've seen how these synthetic cloths especially corresponds with what affecting the psychology, and the body, and the whole rashes on the bodies of the people. The Brands (Companies) don't come and tell you this is what we are doing, but it looks good. I look good in front of the girls, I'll wear this on. Yes, you made a cocoon of producing Nano materials, Gans materials, plastic materials inside you.

This is what, it's not all, but we created a condition, we're testing now, that we can use the fabrics, we can use the environment to create a condition of withdrawal of a certain field strength of these materials. And it is effective because we know it has worked before. Change your ... watch your emotion. Those of you who bought this material (Gans). That's why it's a trial. Send us the information. Has your eating habit changed? Have your emotional habit changed? Has your physical appearance changed?

We are now working on new Gans structure on the middle layer, where you can get your original color of your hair back. If you go white and grey, it goes back to the original (hair color). You don't have any more grey hairs. We're working on this research, it'll be, once completed, if I tell you we got a Hair Gans, you'll know what it is. Growing it is

different than coloring it. Because a lot of women who are black would like to be blonde, (2:52) because guys look at the blondes more than the blacks, but they don't know the guy doesn't like it. It's just nice to see something different. Can we change the field strength to create a permanent blonde? And then in a few years time when you like to be in black, because the new guy likes some black hair, you change the field strength. Because it's all field strength dependent.

We have developed this material, it's going through trial at the moment. Then we touch the emotion, not chemical interaction. Would ?? is part of this microplastic, playing games in it, most of it does. It really does. You should be able to measure it, but you will be consumed so much of it. Every day it's become part of us. Especially clothing, creating microplastic directly in our body, by our own body, by surplus energy. In a plasma form, is 100% correct. Because we don't, we... we are in a womb of the clothing, which is chemically active with your own sweat, with your own fat. When you sweat, and you see this fat on your body, and you wear the clothes of synthetic, yeah? Now, the boundary of your skin is not your skin anymore, it's the boundary of the clothes behind it. Because that, now, sits within your Amino Acid, is part of your Gans cycle.

We have one of our leading Knowledge Seekers, he's entangled in this. (2:54) And we are looking at in changing it. These sports gears, used to look so fancy. You'll have a lot of ?? prices around it. When you'll find out later on, can't have children, have problem, digestive problem and the rest of it. See you, watch your children yourselves. If you wear certain kind of thing when you go running, when you come back, you don't feel hungry, you don't feel this. Where did the energy come from? You burn the energy. And look at, go running with a cotton shirt and go running with one of these, fancy looking, colorful, plastic or synthetic things. We need to be educated and education has come, has to come without prejudice.

Any other questions?

K- ... Watch if you have children, watch your children don't wear, these fancy synthetic things, cotton wool, the new wool mixtures, which are coming into underwear, they are fantastic. A little bit expensive but you protect and you, we've done the research on, what do you call it, Teflon waters, which is done for the Italian government. And nine cancers in it. If you're a woman, if you are a... somebody in the house, just throw the Teflons into the bin. Throw your chopping boards, plastic chopping boards, get a wool one. Okay, maybe a bit... slightly expensive. But especially if you have girls in the house, young girls, (2:56) throw these what you call, Teflon plated, coated things away, because then you have ?? CPS and all the other diseases, which makes them infertile and emotionally damaged, because it's part of... it touches the hormones. CPOS (PCOS ??) is one of them, directly we see in research shows.

You buy a steel pan, heat it up, put oil on it, get it to the burn, let it out, put the cold water on it. It becomes as bad, good as Teflon as you ever had. You make it, what you call it, non-stick, but it's a sticky, it just goes out very quick. If you have children around the

house, throw any non-stick out, you pay a little bit more for steel, not aluminum. But, you save your children from a lot of problems in the future.

Q: I will do that, thank you.

K- Yeah, we got to do. We ... we see it, we ... In my house you don't find any Teflon. In my house you don't see any plastic boards. I've become wise to it and because of a little bit what we do. Even these, what I call, ?? sub licking materials to clean the bottom of the pan. It's hot pan when you do it, so you melt it back in. It's not going back to nature, it is understanding the new cycle, how much we can, at least help ourselves to it. (2:58)

Any other question? Or shall we call it a day.

Q: ... In the last lessons, you, Mr. Keshe, made it very clear, once again, that our mother, the Earth, absorbs the fields from the Universe and chews them up before we humans obtain over 60% of our food from these chewed up energies. Don't we humans as Space Travelers also have to learn to chew up the Universal fields? Because our Earth Mother is not there? Or...

K- That's the job of your Soul, that's the job of your Soul. Don't worry about it, it's well done.

Q: ... Do we have to look for a surrogate mother, who takes over the re-chewing, and pre-digestion of the fields? So, in a way, our Soul is the Mother... You get...

K- Yep. Our Soul is the same, it's the same as the Earth.

Q: ... Can you please explain what is Soul elevation? How to imagine this and how to do this effectively?" Thank you.

K- Can you repeat that please?

Q: Can you please explain what is Soul elevation? How to imagine this, and how to do this effectively?

K- To do what? I don't understand.

R: Soul elevation, to elevate the Soul. (3:00)

K- The Soul elevation comes... there are different ways of doing it. You can do it from below or you can do it from above. In a way elevation is increasing the strength, and then when you have a higher strength, you are aware of more of the other strengths. You can tap into the Universal Energy, into, what I call, C14. And... or, consume enough of the lower order, that you pick up fragments of the higher order within them. While you're supporting the lower order for physical life. This is what we do by eating. When we eat, anything, when we breathe, any air we breathe, when we drink, this is what we do, two

divisions. This is, maybe time to, we have talked about this before, but maybe open an insight into it.

We, the water we drink has two parts, part which has energies which adds to your Soul, and part which adds to STP, and part which goes for the physicality which we use as energy. The Soul as far as ??, they need their own energy as well as their own ?? use. The matter states what we chew, what we swallow, has the same, creating that, releasing that energy which part of it can be absorbed, by the, what we call, the Soul.

Then, we have one which is made directly for Soul, (3:02) which is the air we breathe, which is less adulterated structure, conversion, but it's still in the matter state. And that, this is why, we inhale it through our nose, directly feeding the Soul, because it's connected directly to the fields of the Universe. And certain ways of breathing allows you, and environment you're in, that you breathe it in, allows you to absorb certain field strength, which in process can increase the energy of the Soul of the Man (STM). Watch the wise man, people with a lot of Soul, and see how they breathe. And watch people who are very physically active and see how they breathe. You convert this the food of the Soul to food of physicality to keep the life running and you run short of breath. If you understand this then you know how to tap, how to elevate.

Learn why we raise our hands, and the shape and the way we raise our hands and the fingers. Raise your hand and keep your fingers open. Raise your hand and stick your fingers together, and see what emotional difference you feel. Big difference. (3:04) There's something very interesting if you have children, because they are more receptive than man. You can do it with your self, because... walk barefoot. Walk continuously with shoes, walk continuously with the socks. Lie on your back and put legs and arms up like a dog upside down. Then lie on a carpet, and lie on a floor, Earth, not on the top floor, on the concrete or whatever, and feel the emotions. When you walk barefoot, the energy from the... coming from the Earth and the Inertia of gravitational, directly interacts with the Iron in your blood, changes cholesterol, changes salinity of the blood. You keep yourselves always in the shoe and see how you feel.

The energy we receive from environment, how we absorb it, how we get it, the way we get it, has a direct effect on the structure of our emotion, and on physical being. And, if you ever feel stressed, take your shoes off, take your socks off, go walking on the grass. It does much better than walking on the gravel, because grass has Amino Acid structure near you. It transfers energy. When you walk on it, when you crush it, it releases energy that it gives to your body, it changes it. (3:06) You walk on a gravel, you absorb different fields.

You have a huge pain in your bone structure and muscle tissues. Go on the seaside and walk on the sand while the sea is running on your feet. For one or two kilometers and come back and do it for a couple of days, and see if the pain is still there. It's not the salt. It's the energy which we receive directly, which changes the production of hormones in our body as an energy pack. And it affects you. It directly affects the energy we absorb. And, the emotion is different. The fields which gives within your body is different, it's

not the noise of the ocean or the whatever. It's the energy which you absorb directly from Earth. On the top floor, on the concrete, there is no ?? ceiling. Go on the ground floor and walk on the sand, on the soil. Try to make it a habit, I do that quite often. I walk barefoot quite a lot, because I know what it does, what I take, what I need from it. And then you organize your body. Your body gathers information, what it needs, where it needs, how it needs.

Any other question? (3:08)

Q: ... He or she has a question related to the Keshe Foundation coming Wellness Test on the 20th of December 2024. What is this test about? And what could a person expect as a result of joining the December 2024 session? And if a person is not speaking English, can he or she participate?

K- First of all, we don't use any languages, is all done by our system. If you've been in it, it's been going on for about... nearly two years, a year and a half, it's been a cycle of things, and...

R: I'll just interrupt that there is a basic translation of the instructions at the beginning and...

K- Yeah, ... Rafael does a very good job now. At the beginning when I speak, he converts it to a text and he puts it there. Pick up the text and put in your translator to any language. So, language should be no problem. And secondly, usually we don't speak at all after the first 2-3 minutes of introduction. The whole session is yours. We control things in the background. And we see the results. You see how different groups behave. And we don't ever expect that it becomes your expectation, you decide. Your body decides, your emotion decides what will be the outcome from it.

The process of these 3 months is Food and Wellness. (3:10) And we look at your report back to us, how you felt with the food. How did you feel anything? One of our Knowledge Seekers is here, he can explain what happened in the last session. And there are other Knowledge Seekers here who wrote to us, tell us what they felt about in the last session. Some of them had a shock of their life knowing that just using the headphone can change them so much. Now what is your expectation? You don't... I didn't feel anything in the session. But did it change next week, the week after, the month after? Because they say, "Oh I've changed this." Why wasn't there before you go through the system? You had a pain and suddenly my pain is gone. Why wasn't gone for wasn't there for years? I didn't like broccoli, but somehow I want to test broccoli, what happened? We have a list of ingredients, when we put in the... in the Food and Wellness. And we don't tell you which side is the Wellness, which part is Food. And we control you. No way we're going to do that. We create, we're facilitating by... It's you who decide.

And it's you, if you have a pain in your shoulder, send the energy concentration in that time, in that session, that this is where it needs to be done. Why is it there? What is it trying to tell you? Why do you have pain in fingers? Why do you have pain in toes?

Why? And what changes in it? (3:12) You are the captain. We just provide the ship. And this is always has been. You decide. It's very interesting. One of the Knowledge Seekers wrote after the last one session, and it's amazing how precise the taste of the things they have is part of the ingredients of the material.

(KS have problems to open the microphone)

R: ... Well, he did have a question in the chat to the hosts and panelists, if you want to have a read of it whether you want to address that now or not Mr. Keshe?

K- ... Just leave that out, he's okay, there's no problem, and he's perfect... (3:14) I talked to him about a month ago, two months ago. He's okay. Very ??.

Q: ... Can silicone be used instead of plastic or is it almost the same?

K- It's the same. Silicone, all these synthetics. It's the high temperature of them. We get a lot of these plastic containers, which we carry our food in it, this is another part of it. It's now we see steel containers coming in, we see glass containers coming in, they're expensive but they're sometimes hard to carry but it's there, it's just preference, it's what we do. But our society is full of it, we can't walk away from plastic, we carry the foods in the bag, we buy our food in the plastic bag, freezes, all our frozen goods are in plastic. It's become part of our life but we can limit it.

R: And there are other forms of plastic other than from oil as well that...

K- Everything, everything now is connected to this C-H bond.

R: Plastic bags can be made from alcohol rather than plastics and but they disintegrate when they get wet. So it's a good thing and a bad thing. You don't want you to get your groceries bags wet on the way home because they'll fall apart, but on the other hand they completely dissolve in... when you get rid of them to...

K- At the moment we have become so embroiled in this plastic business. I remember when it came in the beginning. This plastic started in around 1980's, and if you remember those days everything was paper. (3:16) And when especially what they call it HD bags what did you carry your shopping bags shopping carrier bags, you get in every supermarket so high-density. When they came in 1980s, early 80s, like 1979, there was a ?? commotion of cheapness and easy to use which broke into the market. And from then it never stopped. When originally people brought these HD bags and plastic bags for supermarkets you pull out. They're usually in a blue package with a hole in the middle and they're always in thousands. You buy a thousand bags. Paper bag was three pounds for a thousand. This you could buy for one pound fifty for a thousand. And it pushed the shopkeepers and the others, users and the ease of use. Paper bag used to get wet in the markets. If you had a fruit rotten, the things go on the floor. We allowed it to come in. We brought it into operation. I was involved in this in a way and I saw the cycle of how

plastic creped into our life. One of the first companies we set up was this packaging. And it was amazing, you could sell 10,000 Euro of paper bag. Now you sell 20,000 of plastic bags, and your paper bag overnight within three, six months, disappeared...

R: Here they've gotten rid of the paper and the plastic, and they have a new synthetic bag that they're selling for 10 times the price, 2 dollars each now. (3:18)

K- Yeah, it's very amazing.

R: And the other... They have a cycle here, where... depends which political party is in. Whether plastic is popular to support the oil industry, or paper is popular to support the... wood industry, the forestry.

K- Yeah, there's... Nowadays you can buy underwear and clothing from the wood. It's very popular. Very popular.

R: About plastic, just to put a bug in your ear before we leave here. Regarding all these plastic bags, if you think of every bag as, basically, that Hydrogen and Oxygen and Carbon bond, that if you were to burn a bag, it would give off energy, these are little energy packets, and if we had a reactor at home, that could eat the bags and give off energy without burning, without an exhaust pipe or anything, like they have done with inside a vacuum chamber, basically with plastics, you can have it gradually deteriorate without burning and give off energy. So, there must be a way, and then that way we look forward to the plastic bags. They help to heat our homes and supply various goods or whatever.

K- I think it'll come into innovation, these kind of things. It'll come, it's inevitable coming in. These plastic islands in the oceans will force us.

R: Yeah, well they should have ships that eat up the plastic and again convert it to usable energy without the burning.

K- It is, it is a menace it is there, but you see a lot of it, (3:20) and it depends on the composition of it. And we cannot go back to packaging the way it used to be, with the paper and the others. But, we have to find a solution within this. A new composition, a new structure, that does not interfere with the body, does not come into the body. And it's impossibilities.

Now they are trying to bring more and more natural products like... the maize production, when they take the corn, the... rest of the maize after 2 corns on it or 4 corns on it, went into animal food. Now they're converting some of it into fabric, into ?? and then into threads and clothing. And some of the major shops on the high street now promote especially underwear made from these ??, they're very comfortable and you don't feel it, but the whole texture is different. Clothing made of woods fibers becoming more and more popular. I use it a lot. And you don't stay with the synthetic as so much. And it feels the same as literally wool softness and the pleasure it gives to wear. We just got to get

adapted and just learn how to do it. It's one of the things of Westernization, or advancement which creates this condition. And we have to find a solution for it. (3:22)

K- ... Thank you very much, see you next time and I would like to. We'll inform you about the new, what I call, our chat line on what you call, the 'X'. And we release the materials which many people will ask for us, "You can't do it, can you?" So, the material for, what we call, the possibilities that might come up with the clothing is there, it has proven its worth in the, what we call, the time of Corona, now it's for absorption. And we can dispatch straight away most of it, because it's part of our stock. We have produced this in stock in mass for nuclear accidents. So it's been offered, if you remember, we offered this to IAEA, in case of any nuclear damages to the reactors in Ukraine, due to accident or whatever.

R: Do you want to show that... want me to show that... image from Dean, or have you seen that yet?

K- I prefer not to, because we don't know what they might pick on it. You know, how these people are. We are very touchy with the Keshe Foundation. But I've seen it, it's a beautiful job he's done. But, we have to look at the evil side of what people think. (3:24)

Thank you very much for today. And I hope I opened a new insight in your life, in the Universe, and the way you are, in your environment. Thank you very much Rick, and see you next week.
