

570th Knowledge Seekers Workshop December 26, 2024

(Transcription, Editing and Proofing done by KF Brazil)

(Auto transcription by Elias)

High fever - short teaching - Questions & Answers; T advanced beyond UBESUS - New Headphones do more; Graphs of Soul's shape; Souls react separately to conditions; Analyzes graph - dots; Soul functions like MaGrav; Center Soul "S" energy transfer - to above higher - and below to STP & P; See size of Soul; Show emotion - if ready to transmute; 3-D P comes inside Soul; Same as 3 layers of skin; Convert fields from outside to inside through middle layer; Cosmic Ray material (CRm) put inside Headphones; CRm connects to Universal Fields; Headphones connect two Souls together; About C60 Energy crystal structure - different than matter crystal; C60 like gas no dimension; Depends on container of crystal - fill U; C60 pops up like popcorn; Inside Soul rectangular - outside sphere; Plasma anticlockwise; Genetic corrections through plasma; No more genetic defects - balance; Can change 1 gene number not all; Post Traumatic stress handled through Headphones; Political talks - advanced weapons T disarmed by plasma; Matter not exist in energy state; Space Defense not meant for military; 3 forces to bring peace; KF Space development only alternative to war industry; Biden blocks everything; Ukrainian president 14 billion; Discuss CR material - each has different fields; Same field strength make invisible; Balance outside fields with middle layer - invisible; T for old age - bent over; Be healthy up to 3 weeks before death; Everyone dies on this planet - principle; Hurricanes convert energy; U expands - ends or contracts - energy used to start again; Natural process of fields - not cycles - no meaning; Souls in dying U become Space refugees - some live on Earth.

ENGLISH TRANSCRIPTION

(:12)

K- Good morning, good day to you, as usual, wherever and whenever you listen to these series of Knowledge Seekers Workshops from the Keshe Foundation Spaceship Institute. We are here after the Christmas, and unfortunately I suffer from very high temperature fever, but we, as usual, keep the session going and try to keep the tradition. As it has been on the road. What we decided is that today, instead of teaching, we answer any questions that we try to keep the session as short as possible, and till we come back next week, hopefully, in a better condition and a better position. So, if there are any questions that you might want to ask, that you've been trying to for past year or two as we haven't had another of these questions and answers sessions for a very long time. We would like to hear from you, and then we will see what we can do. If there are any question, in any way, let us know, and we try to answer.

Q: ... Do we have an update for when the Healing Pods will be released publicly?

R: I know we show in our halftime adds, (:14) various, what people call pods, healing pods, but various odd shaped devices we had, the Flight Enhancement Unit and etc. Will they be released publicly, or would they... ?? we have superior technology (T) ??

K- We have more advanced. In a way like the UBESUS (Universal Body Enhancement Spaceship Units), the big ones now have been changed more or less, we have a more powerful way, to the Headphone Units. And the technology advancement does not require the, what we call, UBESUS, and the Material Production Units. In advancement we have asked the use of these systems. When you run like the UBESUS, you have some 30 – 40 odd systems running. The noise inside is huge. Now we have brought that into a static reactors in the lab. Now we run the same thing, in conjunction with Dr. Kern. Where there is all... There is no dynamic system anymore. It's an advancement in technology. And I don't think you will see that, what you call, UBESUS, to ever see, or come back, because now the Headphones are much more advanced, and the new series of systems coming in literally targets everything. (:16)

We tested part of this last Friday. And for the first time we can see the shape of the Souls of the participants, and from each group. We can literally trace the Soul of the participants. How their Soul separately reacts to, what you call, to the condition we create. It is very interesting. It is extremely interesting when you see the shape of the Soul. And when you analyze it. We could not do this before. It is advancement in technology which has allowed us to do this, and with this we do not need, what we call, UBESUS anymore. Because we can even target the Soul. Interesting enough...

<< Mr. Keshe search for an image to share on the screen. >>

K- What we see is very interesting, as we observed in the session of last week. Next time we go directly to the Soul of the Physicality (STP) and the physicality (P). To see how they react, or how they show themselves in that process. If you look at this picture, (:18) it is very interesting. It is a video, I just took a screenshot of it. You see, each group cell is totally different, it is not all the same, according to the people. And you see, repeat itself as the same way as a MaGrav system. .. If you look on the top cluster, this is the Universal field, this is where we open up to the Universe (U), where the fields come in. You see in a very narrow line, they join in, the central block is the Soul of the Man (STM). And then the energy transfer, you see a slight line on the top of the structure, it looks like a 'S' if you look deep into it. This is like the top layer, or the top stack of the MaGrav system. Then you have the Central line, which transfer energy, in a way balancing it, that for the energy of the STM to connect with the STP and physicality, which is the bottom line. And then it drops off into the physicality of the man. We see the dimension of the Soul directly. If you look somewhere between the top...

<< Mr. Keshe tries to draw on the screen. >>

K- You see, (:20) this here is where we open up to the Soul, to the Space, to the Creator. This is the STM. And this is where it connects to the STP of the man. Interesting part is this part which is here, and in here.. Let me take it off, this is the same with all of your

groups, the same ?? will be. This is a dimension of the Soul in a physical thing. That step exists between all the groups. This is the size of the fields of the Soul. And here in the center is where your Soul is. In a way what it means is that, if you look, you have this. Exactly like the MaGrav system. This is the lower, which connect with the world of the physicality, this is the higher. But, interesting enough, if you look at this picture. It brings in an amazing reality to all of us, and that is, if you look at this end, somehow it balances with this end (The bottom with the top).

In another group what we see is a total cavity here, there is nothing in the center. (:22) And this is not static, it is a dynamic structure. And comes from the right side of the brain of the man, into the Soul, and from the left side goes into the body of the physicality. If you draw a line you see it. So, in a way, we now are getting into the point that we can physically structure your Soul, see what it is. And in the future these graphs will give us the condition of your emotion, gives us the condition if you are ready to transmute. And it is just matter of technological development, we will see a 3 dimensional zone that physicality is now come inside, and then the Soul is ready to go.

We bring scientifically data to it. That, you know, it is like getting on a jet plane, you run along the way with the jet, till it reaches a point that it can take off. You overcome the speed and the gravity. And in the future, very near future, this will be a feature we look in. And maybe in the next Session, in January Session, we can identify your 3 Souls, STP and physicality, and see how they react. And we have ?? developed intelligence to a level now that we can literally touch your DNA. What does this bring to us? Huge advantages. If you look at the different arms of the RNA, with the little ?? nudges somewhere, it brings different conditions. (:24) Now we developed a technology that literally we can do this. Which means, any genetic defect can be put right by balancing the fields of the genes, by the body itself, not chemically, not any other way. This gives us new dimensions in the work, but we have to mature into the knowledge, that these things can be done.

Now with the Soul we can the emotion of the condition of the Soul, we can see the emotion of the condition of the STP. And as more and more data comes, then we become mature to it. Mature into understanding the process of the STM. And if you look at here, in all the figures we see, then you'll come to understand what we go with the MaGrav system. It's completely the way ?? the Soul works. It is the same as the 3 layers of the skin of the man. It has the top layer, middle layer and the inner layer. There is a conversion to the inside field strength, and a conversion to the outside fields, and a conversion between the two to be able to stand outside and inside. That is the purpose of the 3 layers is. And we see the same pattern with the STM.

So, with the knowledge advancing so much, is there a need for UBESUS? The new Twin Headsets which has come, we will get in touch with those of you who bought the Cosmic Ray materials, (:26) with your permission, would you allow us to put your Cosmic Ray material into your Headphones, that opens up totally new opportunities into the World of Creation. Because you connect directly to the Universal fields. We ask if you like to have your Universal materials into the Headsets. That in the dimension (D) of the fields of

what you hold connect you to the Universal fields. So, the UBESUS has become obsolete due to development in the knowledge. And we see a lot of advantages in the new system targeted directly, and with the results we look for.

Any other question?

Q: ... What is the difference between the Cosmic material and the new Twin MaGrav, and their uses? ...

K- Cosmic materials is connection to Cosmic Rays, to Universal fields. Twin sets is to connecting two Souls together. (:28) Two different things.

Q: ... Can you extend on the concept of the Twin self. Is it a Twin in a parallel dimension?

K- Twin is between you and somebody else or your physicality and your Soul. Not connection with dimensions and different time zones and timelines or whatever.

Q: ... I hope you get better soon. I have a question about, about the 568 Knowledge Seeker (KSW). In one time you said, there are plasmas, which come back to themselves and create a Star Formation (SF), I think, which creates Carbon 60 (C60), and they create Universes, if I understood. And my question is, you talked about creating Universes by crystal plasma, or... C60

K- Crystal structures, yeah. C60

Q: And then I was thinking, I was always thinking, universe is full of plasma's, dynamic, which connect with, also with others around them the same size. So how come they come back to themselves? (:30) Do they connect with other plasmas also to create Universes? Or only crystal plasmas can create?

K- No, when we speak about crystal structure there has to be a clarity between crystal structure in the matter state, or crystal structure in the energy state. Crystal structure when we talk about plasma is on the energy level, not on the matter level. And has no dimension, in a way it's like a gas. The gas, when you have a gas, the containment of the gas is the room which it is in. You, if you release 1 milliliter of a gas in a balloon, that's its confinement. You can release the same in a room and that room will be its confinement, that's the space it'll cover.

With energy and the plasma, the fields dictate the condition and the interaction, and not the physical boundary. And with energy in a plasma condition, you have, you are connected by the fields, where in the matter crystal you are limited by the structure. When you are a gas in a room as a crystal structure, the room is the size you are confined to, as a physicality. With the energy crystal structure, you, you have, you're limited, you're confined, you're connected through the fields, so there is no limitation. (:32) And the higher or lower fields dictates your position or your size.

And it's totally different understanding of the work. And this is what a lot of times we refer to, a lot of times we refer to, that the crystal structure in the energy, in the Space, is not in Matter-State, is, is a gaseous field space. It has no physicality, but it has a field energy strength condition. Then we decide on the crystal, a crystal structure according to its strength, can be the size of a Universe, as an energy, where in a better state, limitation of the structure itself, makes one crystal structure, is a diamond on your finger.

Q: So the crystal, the crystal in fields, the crystal structure in fields, how do they create the Universes which I thought it is, we see the planet so it's partly...

K- It's like a popcorn. You know you drop a corn in and it popcorn and it expands. It's more or less if you look at it, it's that structure. It's to what limit it can go. And to how much energy is within it, which leads to its structure. And that popcorn we call the Universe. And it has a limitation of the fields to the center. (:34) It has the limitation of other fields outside it, which dictates its limitation. And then it has how it's created in a way, by interaction of the fields, how activities and how much it can expand to. It's very much a controlled system, but in a chaotic way of finding its place and time and position. It's like when you look at this picture on the screen, you expect the Soul to be a sphere shape, but you see it's not a sphere shape in the inner structure. In the outer structure it's spherical. If you look at it, in this structure is spherical. Because this (the top of the annotations on the graph) is above your head, outside, and this (bottom of annotations) is below your Soul to your physicality, your neck, or whatever you call it. In the inner structure, it's different than the other structure. And this is how Universes are.

In all the tests we've done, we don't see, we always see a rectangular structure, in different shapes. But we see the leakage on this side, and we see the leakage on this side. And if you look at it is the shape of the plasma going in this direction, anti-clockwise. Or you come into it as a clockwise and you go out of it anti-clockwise. (:36)

Q: And then the line blue and red above what was it?

K- Those are genetic corrections which now we are working on. This we have reached a point in knowledge that we are testing on genetic modification. Now in the way you look at it, in a way, in the human race when you have genetic illnesses. By bringing things in position (balance), you'll find there is no genetic defects.

Very recently, very recently we've done a test, where you have, let's say, a bone in the structure of the foot, broken and bulges out. Doctors put you in a plaster, doctors put you in the cast, or you need an operation to put these little bones back into place. We have developed a technology within 24 hours you walk, and there is no sign of breakage and there is no bulge, there is nothing. You just carry on with a normal life. We are achieving breakthrough in the knowledge and the whole bone is sticking out which is usually the pattern, the bulge you cannot walk, you have to put the bones back in the structure. Within 24 hours there is no sign of the breakage and no sign of what we call it, bone deformation.

Q: Fantastic.

K- It is what we learn, .. we have to learn the process. (:38) And this is not genetic modification, it is genetic balancing, which means if somewhere in what number what number a gene has moved which causes such a such a illness. Now don't forget you have to go through all the genes in the body of the man. We have found a way to touch and to change. It's the same with cancer. We are working on a cancer which in research coming up you, you sit in the machine and within hours, whatever is in the lump we call the cancer, will open up itself. But what's the next step in what to do with it?

Q: And for people who have post-trauma problem, emotional or.. (Post Traumatic Stress)

K- Those we can handle now with the, with the system with the Headphones. We have to, there is a, there is a collection of knowledge where we have to bring in two part of the work which is done together to see a massive result, big changes. And now we are going through that phase.

At the moment we are very much tied up with the process of where we are involved in governmental work. We're very tied up at the moment, past few weeks, months. And now that we have achieved it, we put it aside and we're going to next step, in rapid development. (:40)

We have achieved to create fields, Universal fields. And fields which what we call, the line to Creator, and how to mix them and how in mixing the two create, develop or achieve certain conditions and materials emotionally or physically. Very, very advanced in this at the moment. But now it needs work with structures called, mental structures to bring this in and we are on that path at the moment.

Q: Thank you, good. We are, I think, the advances in Keshe Foundation are way above the normal society now and...

K- No, it is just we look at things different we have access to different energy.

You see at the moment I was discussing it with some officials in past few days. You bring B-52s, you bring the latest ?? (Stealth (Fighters)) whatever you have. You bring in the most advanced nuclear warheads, intercontinental missiles, you bring in the most advanced tanks, you bring in hypersonic and supersonic aircrafts and whatever. With this technology it's one second job. Because you look at matter state not being detected. We work on the energy states which the matter state does not exist within it. So all I need to do is to create a dome, create a field area, that I don't need and play a game of shooting anti-missiles and rockets or whatever. I can put two crafts 100 kilometers away from each other and just switch on, a certain way a plasma, that as a craft goes through, it just disarms, it just does not connect it just drops like a like a brick.

So let whoever talks about the most advanced technologies B52s, B blah, blah, they'll be zero, there'll be no functionality. So we have to look at a new defense technology, we have to look in the new characteristics. And this will become part of you know the Israelis have what they call the Steel (Iron) Dome, which is not there anymore, it's just got so much ?? that they call it the ?? steal Dome, it's not the steel anymore and it's made of plastic because everything goes through it.

R: Iron dome Mr. Keshe.

K- Iron dome yeah. Iron dome what we call, the "Mesh Dome" at the moment everything goes through it.

So now with this technology we don't need to, but you have to understand we didn't develop this technology for military use. We developed this technology for Space use. There are huge, huge applications of this in the Space. (:44) You travel through a Cosmic dust environment. You travel through a magnetic field environment. You balance everything. And this is part of that technology. As, as I said recently, 3 forces are ready to come together. And if we can bring the 3 forces together, there'll be a beginning of the world peace in a very big way. We have the American presidency, we have the Iranian space nuclear technology, and we have finance people who are detached from other finance organizations. And you will see what changes it bring.

And then we come to this position of are we fighting Chinese, or are we working together to open the Space. This debate will come on in the next few days on the International Alliance. You will see, we will answer this phase of discussion with the world leaders. We'll see, you have to understand and in the discussion which is getting written up to be delivered in the next few weeks. We have explained to Trump administration, we have explained to the Russian administration, and the Chinese are a different ballgame in this anyway. Trump is pushing that there'll be no more war. For how long? (:46) There'll be no war during his administration. But we have two options. We close all the weapon factories, all the missile factories, all research and development in the latest weapons. And there's nothing to produce, there's no more missiles, we got rid of. Literally every single missile has been made in past 20 years, has been used in Ukraine. Whatever was left over since Vietnam war and the rest of it has been cleaned out. So they are building new weapons. Lockheed Martin is adding, making new missiles, and this guy wants to go to peace. They're going to kill him. Or if he can keep, not to go to war, what are you going to do with the factories, with the people? They can't sit there with totally ?? nothing to do.

So, you have the top scientists in Space, in whatever, going to become farmers and street cleaners, because there is no job in the Defense, because the guy wants peace. When you want peace you can't produce tools of war. An estimated 30 to 40 million Americans will be without job. Or we produce and wait after the four years when he's gone we start hammering everything out again. Or we create a condition that we do not go creating tools of war which Keshe Foundation technology will come into play. Technology in

exchange for peace. And this is getting planned out in the next few weeks and you will see it directly, publicly.

We have, we cannot at the moment do anything for the next 20 days, 26 days, (:48) because whatever we do, Biden and his Administration will block it because they are in power. So we have to wait till 21st. This is the delay. Where we can talk to administration, government to government. And this is the way the game is played. We have to bite our tongue, and you will see in public channels, we're setting it up very slowly, putting out and getting ?? finger in the water, bringing this matter up.

If you want world peace, if you want to bring no more war, is it just through your term or forever? And if it's forever, you have to give new conditions, new positions, new technologies that man doesn't think about the war to make the tools of war. But at the same time you cannot disarm one nation and the others are at it, hammering, building the greatest weapons. Average 3.2 percent. Some people talk about 2.6 percent of world GDP is spent on military. You have 26 trillion and you have 4% the expenditure in the military. 30% of it is on wages on personnel. Then you can see the scale of work. And we have to come with an alternative. Open the Space, open new technologies, open the truth about what's happening. (:50) And we come to a new condition. We'll see how the government's response, and how we can bring condition and the balance into it. We have to come up with a new technology to divert man from this mayhem of war and arms of today.

Q: I wish you all the best lucks and...

K- It's all of us.

Q: You are very patient with humanity.

K- We, we got to be, we, we are hoping and we are working on that way, and you have to give an alternative, while the other one doesn't feel weak. Now we've seen the Ukrainian position is totally upside down. Mr. President of Ukraine has asked from nine different nations to give him asylum, because he knows that they're going to get him. He came in worth a hundred thousand dollars. Today he's worth in excess of 14 billion. And this is the reason he pushes for war. Every day makes a million. It's been very profitable war for him to extend as much as he can.

Any other question? (:52)

Q: ... We have a plasma lab in the Netherlands together with my partner Timo and I have been studying the plasma for two and a half years now. I study all the Knowledge Seekers Workshops and make notes about it and teach it to other people. But now I have a question about the CRm. When the fields are in the same strength, they balance each other out.

K- Explain to people what CRm means.

Q: Sorry. The Cosmic Ray material, that's what my question is about. And when the fields, the plasma fields, are in the same strength, they balance each other out because they have the same strength. So they become one. Then the fields become transparent. So matter can become transparent when two of the same fields are the same strength. See Cosmic Ray material could do the same, but what I don't understand is that the Cosmic Ray material cannot only balance humans, but also any matter. So, how does that work? How can it balance everything?

K- First of all, the balancing of fields to become transparent not to be seen, is a technology on its own, which has been developed by the Keshe Foundation a long time ago. (:54) It's as part of the Defense technology. You see me now, you don't see me now, if you understand it. And secondly the Cosmic Ray material is not exactly the same, they cannot be because they're produced in different conditions, and they're produced by different machines, and there are a spectrum of fields, and none of the two, put it this way, balls, are exactly the same content and energy and fields. To create a balanced fields which makes you invisible in a way is a totally different technology, and that needs understanding of a system where we .. balance the fields inside and outside. Where this middle layer doesn't exist, theoretically, if you understand what it means. That middle layer is where the conversion takes and manifestation of the physicality. When you go into, into a transparency, or elusive, is when the middle layer doesn't exist. It's like a MaGrav system without the middle tray (coil). And it's a special technology. It's a very, very elaborate technology and it works. But you, you need to know how to treat the fields and how to bring them into separation and then you become transparent, (:56) you're not seen.

Q: Well that's what happened actually with the MaGrav setup that Ali had, and what was it in 2014 or 15, when his hand disappeared, or didn't show anymore.

K- More or less, yeah.

Q: And so I do understand a little how that works, but the Cosmic Ray material is not the same like that, but what then did you mean that it interacts with everything?

K- Because it's within the environment, it's a spectrum of fields. It can literally disappear a planet.

Q: And if I, if I get, if I put the four, we will get four Cosmic Ray balls, and if I put them in a Star Formation and sit in between, is that wise, or would it be too strong?

K- Depends how, and depends how you position yourself. Yes, you can connect into it and then they tell you you've gone crazy.

Q: Thank you very much Mr. Keshe.

K- Thank you very much. Thank you for your work in Holland... I met you and your partner in Amsterdam.

Q: Yes, we did. We have a good memories about that, yes. Thank you.

K- We usually, when we go to some countries, we inform Knowledge Seekers (KS) and we meet with them in private. We had the pleasure to meet a couple and some and a couple of other Knowledge Seekers in Amsterdam.

Any other question? (:58)

Q: ... Mr. Keshe, you mentioned that people are prepared for the transition into old age. One of the consequences is that older people over the age of 80 can hardly move. Is there any way to correct this?

K- You are correct, but not when you're in the hand of the Keshe Foundation. We ran a test with a medical group this year, where the lady is in her 80's I think if I'm correct. She is more or less 90-100% vertical bent. She cannot literally, if you look at it, you're bent when you want to sit. You cannot even go down below hip size. And in a matter of a few weeks, the lady can more or less sit completely down. She is more or less vertical 10 degrees, 15 degrees, and she can do a lot of other things. She can move her arms which she couldn't do and everything else. If people left in the hand of the work of the plasma, (1:00) you should live a very normal life till three weeks before when the energy of the body runs out, when what we call, the death appears. 80, 100 doesn't matter, irrelevant. Old age, now with the plasma technology, cannot be a suffering time age. Makes you more active, it just depends how you use, what you use and how you produce your material.

We've done this with one of the major companies in the world. In conjunction with the Keshe Foundation. And even people with a stick. After a few weeks they don't use a stick. And they can walk. And we even have a video of them running. So, all the issues now, the matter is just how to handle. We all die, that's a principle of life on this planet. But, one way or another, if you understand the knowledge, being old does not mean you have to be crippled, sitting and not doing anything. It's just how we do it and how we apply the technology, and we've done that. I wish I could show the picture of this lady. And we've done this a few times. Pharmaceuticals don't like to see these technologies. And I'm sure we're not the only one. You don't need to do any exercises, you just supply the Gans's and you just walk. This trial was so successful that the man, the military general took us to ransom, threatening us, (1:02) and everything else. But we'll take our position back in, in a coming time.

Any other question?

Q: ... Is a cyclone a plasma and what fields does it use to form itself?

K- Cyclones are conversion of, or hurricanes, is conversion of matter and energy. And partially is a matter state conversion with the energy from the inner sanctum. And this repetitive energy system is very much like a vortices as we see in the bathtub. But in the case of the larger scale, you have the magnetic field of the Earth part plays in this process.

Any other question?

Q: ... Mr. Keshe, this is a little bit off topic, but I've, for years now, I can't get this out of my head. (1:04) So, the Creation creates for a certain period of time, and then it contracts and comes in itself, in essence, that the living of the Universe stops. So, knowing that at some stage we have immigrated from another Universe to come into this Universe, my question pertains to what actually happens when the Universe does its thing and actually flips. .. What happens to life at that point?

K- What do you mean? At the point of death?

Q: No, no, no, the point of the changing of the Creation in from an expansionist point to a contraction point. What happens to life? And I've always just, I've, I can't get it out of my head. I just have to understand it in some sort of sense that I can make sense of it.

K- I don't understand. What topic you're talking about.

Q: Okay, okay, okay, okay, okay. So the Universe is in its expansion for so many trillions of years, and at one point it stops its expansion and contracts, and all life is extinguished, and then the whole of the Creation moves from that point to the other point, and then another supposed a Big Bang or a whoosh occurs, (1:06) and life then is again produced in the Universe. I don't understand what this point in time means or is.

K- It's just a natural process. Has no meaning. It's just a natural process of the interaction of fields. It's a phenomena which the fields interact and there are two ways to interact, you attract or repulse, and in what sequence and to what strength, to what combination you interact. There is no rhythmic, there is no sense in the World of the Creation the way you talk about. The process is obvious because it's one way to go, but on the other hand is making collapse. It's not literally play ?? (Playdo is clay for children) if you know what a Playdo ?? is. When the children, you plays a sand castle you build one castle and you destroy it and build something else with the same sand. As humans we would like to put sense of reason and evolution to it, but in reality it doesn't. It's irrelevant.

Q: In essence I was just wondering, say if in a trillion years, (1:08) from now we were facing that. And that was going to happen. And our technology was able enough for us to use to move from one Universe, I mean, one Creation to another Creation, which is what happened to us in the past. Is this normal?

K- Yes.

Q: You know, like, is it normal...

K- Yes.

Q: ... that people such advanced technologies can just move and still go on living.

K- When the man knowledge reaches the point, that we can interact with the Universal Community, the way we see countries disappear and we get refugees and that country doesn't exist, an island in the ocean, goes underwater and its citizens become citizens of another country. The same thing happens in the Universe. And when we become part of the Universal Community, we'll come across these refugees. Where they lived, where the planet or galaxy they were part of, it's not there anymore. It has exploded, it has gone through an evolution. So, it's not any different. We'll come across. Some of those who are on this planet, we suppose are of the human race, are these immigrants, but they're Space immigrants.

Q: I was one of them.

K- We're all part of it.

Q: ... Ok, thank you Mr. Keshe. I really appreciate your time. (1:10)

K- Thank you very much. Rick, can we call it a day, please?

R: Yes, sure.

K- I think it's impossible for me to carry on.

Okay, thank you very much for today, and we'll meet next time, next week. And maybe with a better news. Thank you very much.

R: Yes. Thank you Mr. Keshe, thank you for being here on Christmas. ..

K- Sorry I'm too... ?? Hope that will pass two, three days, it's impossible. Thank you very much and see you next time.
