

Creation from a Single Ray - (H - C14 - C60) - Dream Food - MaGrav Floats - US Gives 3 N to Israel

Introduction to 566 KSW

Note: Not checked by KF interpretation by KS of KF Brazil

Today's teaching is mainly about how our Universe (U) is created out of the M fields. In the beginning we were taught that two fields interact to become a plasma, then later when we could understand more Mr. Keshe told us that only one Ray or field is needed because it turns back and interacts with itself to create a plasma. Today he went into a deeper knowledge and in a way, summarized a lot about what we learned in the past. The essence of how Creation takes place is through the motion of a single M field and as it moves around it crosses over itself, and this is basically the same as two fields interacting. And then it creates a boundary and can be recognized as an entity like a U, galaxy, star, Soul of the Man (STM), a cell in the body of the man, and everything else. This is the basic pattern that all of Creation follows. Our U is created from a single M field of Hydrogen (H) plasma and the places where it intersects itself are like the galaxies, and so forth. He also calls these intersections Carbon 14 (C14) and from the drawing we can see that they are connected to each other and everything else through that H line. This is why they say that Carbon is the connector, or the "line of communication" in the U. We connect to everything through this basic setup. And when the C14 gathers into a volume and becomes an entity then we call it C60. In the past we have also called C60 the diamond structure that blows up into an entity like a popcorn. In the matter state C60 looks like a soccer ball and is called a "Buckyball." In the past he used to say that the C14 rode on top of the H, maybe that was for us to develop our understanding, or maybe it is also true, in a way. But now we have a new way to describe how Creation comes about and that is, H is the M field in motion and when it interacts with itself becomes C14 and when it creates an entity we call it C60.

Other ways of describing it are that H is the STM, C14 is the Soul of Physicality (STP), and C60 is the P. We are back to the Trinity, or the Body, Speech, and Mind as the Buddhist call it. In Plasma Science we are calling it H - C14 - C60. But the strange thing is everything really is made out of H and C. Is this a deeper understanding of how we go from the energy state into the matter state? We only know Carbon as with 6 protons, 6 neutrons, and 6 electrons and as a matter state element. But we can't really do anything with this understanding. It's like a block of concrete it just sits there and doesn't move or do anything. Whereas, pondering H as the single M field that creates everything by interacting with itself to become plasmas we call C14 and when it creates a separate entity we call it C60, keeps our mind fluid and open to anything that might be created out of these interactions. There are endless possibilities and unknowns. It's like looking into the night sky and trying to explain what we are seeing.

What about all the separate objects we see in Creation including the human being? When C14 is confined within another dimension of fields it becomes C12, like in the womb of

the mother. When he said, it's fields within fields I understood it to be the same as plasmas inside of plasmas. We are way down inside many layers of plasmas inside the plasma of our U. The process of creation is the same. It's the interaction of the M fields that lead to creation of life. Inside the womb the C14 becomes the C12, and we already have this connection in every molecule of amino acid (AA) or COHN. This C can go both ways between C14 and C12. In the womb the C12 becomes the human being. But in the environment it becomes all the elements like the Cu, Zn, etc. So now we have included all of Creation in this process. And it is said that once Mankind understands this process then he can do anything he can imagine, because as he will know the source of all of life and he will become a creator. He will become a fundamental Decision Maker of how the energy will manifest itself.

This brought up another aspect of living in Space that humanity will have to evolve into. And that is being able to detect other energy fields and not to violate the integrity of their existence. In planetary systems Beings will most probably live in some dimension of P, but outside of that, life will exist as fields of energy. It would seem that our Soul has a built-in ability to detect and understand the existence of every energy field in the U and would thus be able to translate that into something we can understand. We have to remember that outside of Earth we won't have a physical brain to create images for us the way we do now when we dream. Now when we dream and meet our grandma who died years ago, she is in the D of energy fields, then the brain converts those fields into how we experienced her when she lived on Earth. But when we meet other entities we will have no experience with, the STM will have to detect and convert those fields into something we can understand. And we'll develop respect and care for all Life in the U.

Something else that was brought up was how when we dream of our grandma we see ourselves there also, but at the same time we know our body is back on its bed sleeping. He said, our brain recognizes our own Soul as an energy. I am assuming that means a separate energy within itself. In a way, this confirms our STM as a separate entity inside the head different from the STP & P, which it is. This means the Soul recognizes the division of itself. Does he mean that one part of the Soul stays with the P while another part goes out to meet the grandma? And then he uses the same analogy of the Soul in the body being the H, and meeting the grandma as the C14, and seeing itself as a body with her in the D of the Soul, as the C60. In a way, it is transmutation, but we each have to sort this knowledge out and understand it ourselves. It's a Knowledge of Totality that we have within ourselves and we use it at night when we dream and travel and transmute with our Soul. In summary the body stays on the bed, while the Soul travels in the D of Energy and manifests a P in that dimension. We have to get used to thinking of ourselves in multiple dimensions at the same time. This is something that will be natural for the Children of Mitra because they were born first through the Soul and then P was manifested. They will easily be able to make the energy of their physicality as part of their Soul. In other words, they can expand the Soul over the P and bring it inside and transmute. The essence of life is this energy transformation and transmutation and the rest is just mechanical.

In the next part he made us think about when we dream of our grandma and she stuffs us full of her wonderful cooking why, when we wake back up in the D of P are we still hungry? The dream is in the D of the Soul and we receive "food" or energy from the Soul of our grandma, why can't we convert it into the D of P, then when we wake up we would be full of energy, instead we are hungry. Again, it's about learning how to exist in different dimensions. Think of the freedom it would give us. Any child going to bed hungry on Earth would just have to dream about eating food and then convert it using the Inertia field strength of Earth when coming back into the body and he would be filled with energy. There is a lot here that can help motivate us to change our ideas about ourselves and see that the power is within us and the emotions are the key to accessing it.

In the meantime, he has developed some food Gans's that will be sent to those who participate in the Monthly Flight sessions. I think they are based on the Twinity system and we hold a bottle in each hand and connect to the system through the headphones. This should increase the M field strength of the energy we receive from the system to feel the taste and smell of the food and receive its energy without having to kill it. He is starting with fruit, so the fruit will remain alive and we'll receive its energy. People have reported what fruits they tasted and he confirmed that they were in fact, part of the system. This means the system was able to feed KS. This is how the KF was able to feed people in Palestine. One Satellite Soul was able to use the fields of its own plasma to feed the others. We don't need millions of resources. This is how one Creator feeds His U, because He is already connected through the single H M field. But how did He multiply the fields? How did the Christ multiply the fish to feed the multitudes? We know that the same Sun is reflected in a hundred buckets of water. But still there is something missing in the knowledge that we have to unlock in ourselves.

Again we come back to the MaGrav as a source of energy for all our needs for our life in the U. How precious a gift given from Mr. Keshe and we still have not learned how to ignite the plasma of it. Very few KS have been able to make a true MaGrav, one that floats or is weightless. He said, a few have managed to do it by accident. Today's teaching on MaGrav has a lot of little hints hidden in it that require more time to digest. As usual the secret is in the field interactions. Maybe we should give this more attention.

Years ago during one of the early teachings on the basic understanding of field flows, the "Flower of Life" was being discussed and analyzed. For those who don't remember, by drawing out lines on a paper in a certain way, one by one they start crossing over each other and what we think should be a chaotic mess ends up looking like a flower when you step back and look at it. I remember during the workshop Mr. Keshe suddenly got very happy and said, now you are touching on the basics, we should spend as many days as is needed to discuss this in detail. About 30 minutes later the KS moved on to something else and it was forgotten. He never forces the Knowledge on anybody. And there was another KS who used to do a lot of work with drawing out the field interactions by hand, and he came to many understandings about field flows and tried to share it with others. But the other KS ended up arguing with him and eventually it stopped. Hopefully, sometime soon one of the KS will reopen this discussion on how the fields of a MaGrav actually flow and maybe then our understanding will elevate. Today we are discussing

the H - C14 - C60 and the MaGrav is the perfect example to study these field interactions with. It would be nice if someone got a "spark" and started to manually draw out the countless number of field intersections. Once someone asked if the MaGrav has C14 in it. The answer was vague and indirect, but yes. Maybe it is loaded with C14. We have 3 levels of Nano coated coils, each with coils inside them and I think there are at least 72 turns in each coil. Then we have to consider that each turn of each coil interacts differently as the angle of the turn goes around the circle of the turn. We can begin to understand that there are countless numbers of interactions just within the turns of the double coils and then the 3 different layers interact with each other. This would be an amazing learning experience for someone to manually draw out and analyze all these different field interactions. Maybe it would even help elevate humanity's understanding of the MaGrav and how the U works? Then we'll have to bring the emotions into it and through that find the path to the Creator.

The implication is that America used its power to force a peace agreement because they saw that Israel was only weeks away from being defeated. Isn't this the way bully's act, but since they control the world press they make it into something else. There is one thing for sure you won't hear on CNN and Fox News, that this was not done for peace, but to re-arm Israel with more Lockheed Martin weapons including 3 nuclear warheads to be used on Iran. When Lockheed Martin submits its invoice to Congress hidden within it is a 10 to 15% commission for those who start these wars. That's means Biden will leave office with a "big fat" bonus. Then in the background are those who finance this like Vatican, and the others involved are the Rothschild's and illuminati's, and this how all the money is moved around without anybody saying anything. Don't forget that the only controlling power over the Vatican bank is the Pope, and one of their most famous customers was Hitler. This connects with other hidden banking systems like the City of London, Federal Reserve, Rothschild's Family banking system, and whatever else is hidden. Providing weapons for wars around the world keeps the workers at Lockheed Martin well paid with overtime and big bonuses to the management. It goes on and on, and is also connected to Wall Street and other stock markets around the world to filter down some of the profits, that way other people unsuspectingly join in the crime and in a way, they go along with it by keeping quiet. These people don't want to see peace and have secret structures to create wars. This is where the problem sits with world peace and the release of the Plasma Technology. Humanity has accepted that greed and profits are good, even at the cost of human destruction and suffering. What did Mr. Keshe get himself into by coming to this planet to try to bring peace, and he has been working at it for thousands of years. We must not give up hope, this is all in the physicality dimension. The real work is going on in the Soul or Energy level, but this is hard for us to see. Even though the T is being kept secret, it is being used all over the world. This is what he calls, 'being siphoned up.' Intelligent people in the upper echelons of society know it is the only hope for humanity, but our current structure is built on greed, murder, deception and the rest of it. They know they are sitting on a volcano about to explode and there is nothing they can do about it. We have to persevere and keep the right attitude and focus like Mr. Keshe does. One day the 'wall is going to crack,' and let's hope it is sooner than later.

Other Topics:

Magnesium Gans used in bottles of 300 ml and placed around the house are proven to change the emotions in the house. It takes some months to build up the fields and you have to have the AA in the bottles. It's been proven effective many times;

Knowledge comes from interaction of the fields. It comes from the emotion and intellect and you don't need to create anything to have it. It is there. Knowledge is a field and Creation is the conversion of the fields into matter state.

Thanks for listening.
