

# **Further on Communicating in the U - C15 & C16 for Unicose - Trust in Creator to Transmute - Not Godless - Water Connects to Unicose - Drones Over US - Plasma Drones**

## **Introduction to 568 KSW**

Note: Not checked by KF interpretation by KS of KF Brazil

There was more teaching about how we communicate in the Universe (U) and how the U is structured. We were already taught that the Hydrogen (H) plasma traces everywhere in space in an irregular way and leaves a M field residue. These residues cross over itself and interacts and creates plasmas. This is what we call C14 energy level and not Carbon as an atom with so many protons and electrons. And when it creates a volume, which is really a structure with a boundary, then it becomes an entity and we call that C60 energy level. Everything in the U is created through this same pattern.

Mr. Keshe summarized a little bit more and said that, H can be in the plasma state or the matter state. When it remains in space it does it as a plasma and has no physical dimension (D). This is interesting to think about, because it means that just by looking at the physicality (P) of Space we will never be able to see, or understand how the U is created. And this is the problem with our scientists they only look at the matter state.

In a mysterious way he went on to say, that something happens to the H that it develops gravity at the position it is in and goes through certain steps to convert to the matter state atom of proton and electron. It interacts with the M fields of the Inertia of the matter state at that place and the single plasma becomes 2 plasmas and then it becomes tangible at the strength of observation. In other words, the Inertia of the time and place turns the H plasma, or energy state into matter state. It's my understanding that this is what happens on Earth, the H plasma interacts with the different M fields and Inertia of the time, place, and position (TPP) and we get all the elements. They are actually all formed from the H plasma of the U, which originated from the Creator. As our scientists only believe in the matter state they think that each element is made separately and are not connected to the others. But actually they all come from the H plasma, that M field residue line that is tracing everywhere and interacting, and where it crosses itself it becomes C14 or a plasma, and then due to all the different M & G fields and Inertia it becomes an element. And in a way, each element, or what we call molecule has a volume and that would be C60. Each element is an entity on its own and is a plasma based on its M field strength, and not by the number of protons, etc. And these plasmas of a particular field strength can interact with other elements to become bigger plasmas, they don't go through fusion in the way we think. M field strengths can add up to become bigger plasmas. But we don't see this energy part. We only see them when they manifest through Inertia into matter state. Perhaps, this is where all the confusion lies with the current science. He is taking us deeper into this same pattern so that we comprehend it ourselves and

understand how simple it is. In summary this is what happens to the H plasma when it becomes matter state on some planet or somewhere in Space.

Instead of going towards matter state and becoming a planet or something else, the H plasma can go the other way towards interacting with plasmatic Inertia, which is different than matter state Inertia, and by interacting with itself it can become a U. But to do that the Unicose has to provide the Inertia and make a space for it to grow into. To find out how our U was created we need to find out the MG field strength Inertia of the Unicose that interacted with itself to become our U. It's again on the same pattern of the H, C14, and C60. And now we can understand when Mr. Keshe says, that the Soul of the Man (STM) can become a U if it has gathered enough field strength through living the Ethos of Mitra in the dimension of P of Earth. When I hear this it makes sense because of all the Plasma Science that we have learned over the years. But the brain has a difficult time to grasp it because of all the education we received.

In our U the C14 Line of Connection steps itself down to C12 to create matter state. And the Line of Communication between all the different entities in our U is C13. Through C13 we communicate with Beings from different planets like when we dream and travel with our Soul. We use the same C13 to communicate with the Soul of the grandmother who died 20 years ago and is in some other dimension in the U. It's the same process. And the same goes for communicating with animals, plants and other beings on this planet. This is the structure for our U and the same structure holds for the Unicose only they have different energy levels. The C14 equivalent in the Unicose is C16, and the C13 equivalent is C15. These are just simple terms to keep track of the different ways of communicating. I understood he meant that when people say they see strange looking animals in their dreams, that they have traveled through their Soul on C16 to the Unicose and have communicated with different Unicose Beings through C15. Then the STM translates all of that down into our brain's apparatus for seeing visual images. Maybe that's why they are strange looking but similar enough to something we can recognize.

Then he said, there is a huge difference between C16 and Oxygen 16 in the plasmatic condition of the transformation of Space. But we know that matter state gas does not exist in Space, so again we must be talking about the energy of plasma in Space converting to matter state on our planet. And the energy level of C16 is the Line of Connection for the Unicose and it just happens to be the same field strength for the Oxygen gas on this planet as a gaseous plasma state. Plasma is a gas and is the free energy of the U and this is how we are connected to the U and Unicose without us knowing it. I always wondered why Mr. Keshe used gases in the original plasma reactors, but it was never really explained. He gives us the knowledge in a way that we should ponder it over time until the answer comes from within ourselves. And then "Gans" is a gas in a Nano state, but Nano just means an individual atom of something. And gases are individual molecules floating in space. We call them matter state, but are they really plasmas? Where is the point that energy becomes matter, and matter, energy? This is really what Plasma Technology is all about.

We have been trying to figure out what Inertia is for years. We know that part of it is coming through our emotions as the desire to exist and confirm our existence in the matter state. It seems that salt is a kind of mechanism for the Inertia to manifest. Even matter state scientists understand that life started in the saltwater of this planet we call the oceans. I think of them as the "big Gans Boxes" of the planet. Today he gave us another hint that salt is an Inertial system. For example, table salt is NaCl and there is a connection between the metal, which is Na, and the non-metal, Chloride. But why is the metal deeper, in what way? And to live in the U we'll have to find out what the salt of the Universe is. It's another kind of riddle of Creation. And further ponderations are that the Inertia comes from the Soul of the Creator (STC) and connects to us as a Soul. We could take that to mean it connects to us as a plasma, which would be obvious since matter state is only the result of interactions of the plasma and has no foundation of its own, other than the time we think about it. And then he stressed that we still remain connected to the STC. We just learned that. It's the residual M fields of the H that traces everywhere in the U in an irregular shape that forms the background "matrix." And everywhere it crosses over itself it creates C14 or plasmas, and the entity it becomes is through the energy of C60. From this we can see that we are always connected to everything. And unknown to us is the fact that we actually build the building we live in. As a creator we built it out of the higher dimension field strength, but we live in it, in lower order fields as an apparent matter state. It's a very different way of thinking about how we are created, than what we were taught in school. Now if we can just ponder it deep enough that we can believe it.

This comes to the next part about transmutation. He said, many Knowledge Seekers (KS) are now able to transmute with the Soul. They can see themselves present in their destinations, but they still cannot manifest their physicality (P) there. They are unable to interact and connect with that environment. There seems to be two issues, one is we are not understanding the process of Creation enough to believe in it. But the main reason is that we are too attached to our physical world and own emotions that we can't detach from them. Once we let go of them, we should develop a trust and love for the Creator and attach ourselves there, then we will be able to transmute. Wherever we lay our head will become our home and we'll feel a love there. And this is what the Creator does, He sends out His fields and creates a U, galaxy, or the body of the man and dwells in it. And we can do this in our dreams if we become aware of our Soul then we can create a home in the place we go to and manifest P there. Otherwise, we are just looking at it from the outside like looking through a window, and we remain separate from it. In effect, we interact with the Creator and become His lover. This is the meaning of Mitra, the Love of the Creator for Itself.

To make it more personal for us, Mr. Keshe talked about Jon Bliven and he explained to him why he couldn't manifest P in his transmutations. It was because he was attached to something emotionally in the physical dimensions. He admitted recognizing that problem and that it was a burden in his life, and it seemed he wasn't able to overcome. That doesn't mean we can't overcome it. This is why we need to study more and do more inner work to uncover the deep seated emotional wounds. We have to become determined and decide what is important in our lives and then spend the time with it.

Twice Mr. Keshe mentioned that when we understand the Knowledge of Creation that we won't become atheists, or Godless people, instead we'll know the Truth about how Creation works and that we are part of the Creation and Creator. We should understand a little bit of the history and why this is important. Back in the days when the religious leaders had absolute control over the society, they even controlled what could be taught as science. And if someone claimed to be one with God, they called that heresy, and they would kill you for it. If you watch the film Jesus of Nazareth (1977) when he said, "I and my father are one," that's when they considered they had the right to kill him. Nothing has changed, but today they do it in a different way. When Mr. Keshe teaches their slaves that they have the freedom and power within themselves and are able to know how Creation works, he becomes a threat to their authority. They can't hang him on a cross these days, instead they say, he doesn't believe in God, and the true science is somehow against God. And for some reason the "sheep" feel safe being ignorant and will believe more in the religion, than in the truth about God. In a way, we should be aware that some will try to label the knowledge and science KF is bringing as being atheist. In a BBC interview when Dr. Karl Jung was asked if he believed in God, he replied, I know God exists. That made the religious leaders and society very angry, and the New York Times wrote things against him when he died. The main thing is that people don't understand how the control mechanisms work in the background. And Mr. Keshe is skillfully navigating through all these ignorant belief systems we have and are not aware of. This is why it is so difficult to bring the technology out.

On the matter state of this planet if we don't have water (H<sub>2</sub>O) we'll die. In essence, it's the same in the Unicose, it's through "water," or the Love of Creator that everything is run. We learned today that the Line of Connection, or structure of the Unicose is C16 energy level, which is also Oxygen on Earth. And then H plasma is the Creator's Line that traces everywhere in the Unicose. The Micro is in the Macro and the H<sub>2</sub>O is the love the Creator that rains on us continuously as life. And in the Unicose they call this, Mitra. To be able to travel the expanse of His Unicose we need the Love of the Creator, and according to our intelligence and understanding that's where we'll be able to land.

Earlier today we learned that plasma is a gas and soon we are going to find that out when the KF Gas Electric Power units come into the market. It's supposed to be released by one of the governments, then there will be no need to destroy KF and eliminate Mr. Keshe. He discussed the history of the energy market and how it is controlled by banks like Morgan Stanley, which means JP Morgan. If you remember he is the one who said to Tesla when he showed him his car that didn't cost anything to run, 'we can't put a meter on it.' And that was the end of that. They let Tesla live because he kept quiet and the American government kept trying to get as much technology for war out of him as they could. Anyway, let's see what will happen, I am sure they will do anything possible to stop it, like creating more fear and hatred to keep the conflicts going.

Now they are using these drone sightings over Trump's residence as a way to do something they have planned in the background. We know this because without any positive identification of the drones they have people from Congress saying they are Iranian and coming from a Chinese Mother Ship. All this implies that they are using a

technology that the Americans don't have and they can't shoot them down. If you watch what videos start showing up in huge numbers with short messages of fear on your Youtube channel, then you can understand what they are planning. When they do a 'PSYOP' which means a psychological operation of the military on the public, they want as many confusing videos as possible to show up on your searches. This is all controlled intentionally in the background, but the public still doesn't understand what is happening. If you have a little bit of knowledge and are aware, it doesn't feel good what they are doing. He said, they succeeded in taking down Syria with drones and they have got the banks to go along with destroying the Russian gas industry in favor of the Americans. If they get Syria and Russia, that only leaves Iran and China, and they will have complete global domination. We still have a couple of weeks in 2024, let's what will happen.

He said a couple of weeks ago he was going to add more political discussions to the Thursday's teachings in an attempt to bring the technology closer to world leaders. Mr. Keshe has no choice but to work with low characters like Trump and Musk, and for some reason they are allowing him to speak on the "X" channel. This week he was saying that if Musk doesn't realize that the change is coming and start to adopt the new technology into his businesses, then he will become the biggest obstacle in the background for the new Plasma Technology to come out. There are forces in the background that we can't see, but we have to have faith that they will succeed. They cannot stop the change, but they can delay it, and that's what we are trying to prevent.

Someone made a video showing that the US government drones look exactly like the ones they are reporting at night. So when you see the video they fly and look just like drones, because it is very likely that is what they are. But those who make these videos do so in a specific way to make you think it is happening spontaneously. What I mean by this is that they will show you the drones you can't hardly see in the dark, and then they mix it with other UFO footage to confuse you into thinking it is part of this operation. This is what they did in the original UFO footage of Roswell in 1948. Everybody believed it, and 60 years later when people analyzed everything calmly, they realized that they purposely mixed it all up all the images to confuse the public. Every time you go on Youtube they increase the level of fear day by day. Now they are showing videos with headlines like, the government is going to declare a state of emergency, and things like this. As Knowledge Seekers (KS) we have to be wise to how things work.

Always remember that drones made from the KF Plasma Technology, and if they are truly plasmatic and have emotion and intelligence, they will never cause harm. We saw the Star Formation over Gaza neutralizing barrages of missiles that were intended to kill thousands of people, but they did not attack the aggressors, they were only defensive. Mr. Keshe made an interesting statement, when he said, some KS have already moved ahead in this direction. It means they have become Satellite Souls without them knowing it. But humanity doesn't understand what this means. This has huge implications. Because when we hear that we are not allowed to kill the 'bad guys' like they did in the past, we get insecure and afraid that they will be able to harm us. This is not at all the case. It may appear so sometimes, because we don't see or understand the bigger picture. But if all the KS around the world would become Satellite Souls then I think the game would be over

for the bad guys. But we don't have that faith in ourselves. Today he said, we need to detach from the physical D and emotions, and attach ourselves to love for the Creator, and trust in the Creator. And that we have that C14 and H connection, we are not alone, but are part of the whole.

### **Other Topics:**

When you think you transmute to the Moon, is it really our Moon or somewhere else in the Universe or galaxy?;

If we can create the energy of the Creator, then we can make a UFO. In fact, our body is a UFO that is an Inertia that is attached to this planet;

Whenever Democrats come into power they always start wars, because they are from poorer background and become millionaires from the weapon industry bribes. In past 2 years they spent about 200 billion in weapons and figure 10 to 20% commissions;

Next Fridays Flight session should be an amazing surprise.

Thanks for listening.
