Topic Index

Advice on X to President Trump; Trump - end wars - have to stop weapons manufacturing; Only way - bring in new plasma technology (T) - replace weapons jobs - Space development; Not matter of just bringing new T - create conditions of peace; Man likes to kill - destroy to confirm his existence - from nations to individuals; Has to be changed in DNA; Maybe Trump is new beginning - world leaders don't act as they talk; Chinese claim peace - have latest weapon's T; Can't take Man into Space - first become peaceful on planet; 2025 is starting point; Get used to using T first on this planet; Providing technologies by itself is not answer to making Man peaceful - have to change DNA - he feels part of U; Has to learn detachment from P; Learn science of understanding himself; Instead of walking - transmute - switch from matter state to energy - back to energy - or another D - or back with new P; Already know this - deliberately denied it; We do it when we go to sleep; Half of body rests and repairs - other half active; Energy or Soul goes into operation; Can jump up suddenly fully operational - for survival; Change - learn to trust whole operation of body to Soul - then

transmutation possible - P given access to Universal Energy - we decide where and how we want to go; Flight sessions of February, March and April - get you through transition - allow both sides of brain to transmute; Have problem letting go of P - trusting in Energy; Can use single strand of M field - cover whole spectrum of energy to transmute - choose specific path and energy - like choosing bed to sleep in; Need to use both sides of brain for full transmutation; Go to a specific level in your energy - access to transmute or physically transfer - an art; Do in February session; In the Energy level - can feed P won't wake up hungry; Transmutation energy different than energy to feed body; If come out of system and feel hungry - because energy conversion from C14 to Man is not completed; Have knowingly created a filter - unknowingly still using 80% of it; Have to gradually build it up - can't go in machine transmute and immediately stop eating; Adjust P to structure of Creation - adjust brain - internal energy of Soul to tap into Gans's you provide to body; Get energy from Food Gans tubes - everything doesn't need to have taste and smell to receive energy; Food Gans systems are intermediaries - takes energy from U through own structure - energy will never finish; Singular Gans's reduce - composition Gans's don't - because tap into many different energy fields; Systems hold two Food Gans tubes take energy levels in body, Soul - knows where it's needed; No need for supermarkets; Show you how to convert Universal energies - C14, C13, C12; Body structure have sugar - C & H, water - H & O - Nitrogen (N) convert to storage; If convert Energy don't need N; N is where all problems start - connection to COHN - AA; Work instead with H & C - become Man of Space; Greed and hunger - hunger for power - all connected to N; In D of Energy don't need the N; N 60% of air - every breath connects us to planet; Take energy from environment without breathing - start transmuting; U fields will feed STM - which feeds P - become detached from planet; We take in AA with breathing - 60% N - C - O - H; Lungs AA protein absorber of energy - every second attaches us to planet; Never think about it - creates attachment to P and planet; Land on other planet not use N - another element for storage; H & C stays same throughout U; Every life in U has to have combination of H - it's the base - C is the connection - line of communication to feed & communicate with base; Gravity is from O on Earth - N is storage - cannot become detached because every breath take in AA; In sleep only need half the energy; How Indian guru changed protein intake through breathing; Space won't have lungs - access energies of body of U - H & C; Environment of Space created out of its own C60; How KF systems give everything you need - water, air, energy, flight; Single strand M fields - travel to specific place on Moon; Our GPS made of Universal M fields connect to everything; Do this when decide to get milk at supermarket; Emotion tells us to go; Do everything through Soul & emotion create energy of milk through breathing; When asleep no physical motion - still breathing and taking in protein; Feeding ourselves through air; Brainwashed to believe take in O give back CO2 - what happened to N - majority; Energy level of N feeds & elevates Soul - gas is nearest to plasma; No air in Space - become detached from P; Start this in Flight sessions of February, March and April- become detached from N; As long as attached to gasified protein - never transmute; In sessions will take measurements of O & sugar in blood - how changes; See if going towards U side; Choose strength to transmute; Have to get used to transmuting to new planets - like arriving at airport; Soul has connection to place - will be taught; Create memory of time & place for P to remember; No mechanical system - body continuously does everything according M fields within it; Heartbeat is M

field energy; Body is a U; To learn about galaxies and Creator look within Energy side; STM has distribution system for providing energies - at given strengths; Should be able to transmute in 2025; Decide where to go; Create a D of vision without eyes - feel you're part of place; Gain confidence to feel energy; Tap into U Energy leave planet; When die stop breathing to cut attachment to gaseous AA; Don't have to wait for death; Use U energy to purify air - change emotion - creates STP - can repair P; Have to trust you have access to U Energy to feed P at destination; Planet Zeus has no N - convert to local environment; Fallacy about traveling with space suit; Try jumping into Space without suit; Doesn't need connection to AA of this planet; When eat solid protein as flesh of animal, fruits - see same in excrement - protein ejected; Measure how much AA in exhale - what Soul uses for elevation; Understand what H & C does; Add 3 H create Nitrogen - more H's create O - essence of P; Create P from interaction of H & C - how U was created; We create own U through our AA, which is P; Choose field strength to transmute; Learn it but don't abuse others.

Part 2

Earth is a converter of U Energy for Man; Did chicken or egg come first; Did Man's life come first and then he created conditions of atmosphere to exist in; Or did conditions of atmosphere create Man; In U chicken came first - from it came the egg; True for every aspects of Creation; Scientists say conditions of atmosphere of Earth created Man - Man of U answers differently; Soul manifested itself in P according TPP; Man used every element to manifest himself; Animals have same structure as Man - mouse is 99.5% same DNA; How long did STM exist on this planet before manifesting P; There is a lot to learn; We breathe AA in through our skin; We don't breathe - we transfer energy - come to understand a lot; Breathing means transferring energy without taking material; Aura is energy transfer structure of body; Aura different during sleep; During sleep & moving around environment absorb different energies; Reason die in old age - become bedridden can't move to absorb variety energies; With mono energies become weaker; Stay physically active continuously absorb different energies; Need to interact with outside world; Lock in apartment develop psychological problems; See in war veterans - horrible video of hand to hand killing in Ukraine; Until 40 years ago they were friends - they were psychologically made to become enemies to benefit somebody; Breathing in hatred; Test walking barefoot on ground - record emotion, wellness, blood circulation; Man is isolating himself - creates his own dimensions; Scientific data - walking barefoot less diseases; M fields of Earth mix with blood - solve lot of problems; Inbreed energies - creates problems - inbreed plastics; Become people of plastic - C-H not connected to anything but itself; People who wear natural fibers get different diseases than city people; We are the skin - what put on it cause diseases; Problems with modern structure - not gone through evolution to use it; During transition time - get diseases & cancers; When plasma interacts at boundary of another plasma creates a wave - becomes Inertia for manifestation; In Plasma Science Inertia is cause of manifestation in physical D; Matter state definition of Inertia is from already converted energy; Light has Inertia - other elements; Every conversion has external & internal environment; Inertia in Chemistry is salt; In Plasma it's gravity; Inertia is conversion from U energy to local energy; Many words for same thing; Salt is a metal and non-metal - create dynamism; In Medicine they

say too much sugar creates cancer; When more alkaline don't get cancer; Opposite to World of Creation - Inertia & gravity confirm manifestation; Give energy to create an atmosphere - which is a separation; Science not understood why body works totally opposite. Increase in salinity, or alkalinity - doesn't allow collection of cancer; But acidic side - connected to sugar & energy creates cancer - cells collect; Scientists and pharmaceuticals trick us into not being able to cure ourselves of lumps; Due to ignorance; They say stomach acid breaks down food; We use caustic to make Gans's; It doesn't add up; In intestine create more salinity to transfer energy across into lymph system; What science says doesn't match up; Because in World of Creation Inertia is a balanced field energy between two states to confirm and be part of; When have a Mass, also have Inertia - connected to central line of U - not local; Why Mass is constant, but Weight is different; Energy fields of U work on C60 - not on C12; Inertia is connected to Universal line of energy - not local; Creation is in balance with central U; Neutrons of each U contain different amount of M fields; There is Universal Inertia; On top of our Mass - Universal Mass - Unicos Mass - means all Masses in the universes same strength; U Mass same across U; Due to Inertia, combination; Salt, alkalinity comes from a metal and a non-metal; MG field of Inertia come from Universal fields and Environmental fields; Universal fields control Mass transfer into body; In body don't have Mass - even bones are Gans - behave as solid matter; Matter block of calcium doesn't change; Every cell of bone changes continuously; Controlled by Universal Mass field energy - alkalinity of U; Body is its own U - every cell still obeys laws of Inertia of planet - U - Unicos; Haven't understood these parts yet; Unicos Energy & Inertia different than Universe Inertia; All Universes carry common denominator; There is gaseous Inertia - solid & liquid state; Space gap between Sun and Earth as they rotate; Planet absorbs what it needs - surface is expanding; Why laugh when they say ocean levels are rising, CO2 - don't understand natural expansion of planet; Atmosphere is not same thickness as a million years ago - nor in a million years to come; Getting closer to Sun gets compressed; Inertia is same - production of fields - compactness - 3 layers dictates what will be absorbed; Closer to Sun atmosphere will go inside physical layers of planet; Find internal atmosphere beneath surface; Becomes a Mass; Like a physical Man with Soul inside; In past fields allowed dinosaurs - closer get to Sun smaller animals - fields compressing; Seen on islands in Indonesia - smaller size species; In U different Inertia brings different mentality - emotions; When Inertia interacts with gravity creates Mass; In Flight session kept exhaling - got afraid started to inhale; Time of death we always breathe out - nothing more to take; Freedom of expansion releases energies; When panic lose connection to Soul; Shows graphs when KS panic lose connection to Soul; Help you to stop this; Need to be detached from P; Soul more powerful; Panic from lack of confidence - attachment to P; Gain confidence - exhale beyond limits of body - control over P - can transmute; Jon could explain conditions in detail - how he felt - off the ground many times - no attachments - could see himself; Doesn't matter if you don't breathe; Insomnia of Soul; Physical insomnia can't breathe wake up; If Soul doesn't allow connection to be made get insomnia - panic - back to P; Different ways to control emotions for different people; Different emotions need different kinds of control; Have brain storage endless - 3-dimensional in energy; Short term memory always there - access to both; Alzheimer's - decide memory too painful - lock communication lines - short term fine; Nervous system has two parts - everyday tasks of survival - other information and emotions; Feeding to

emotion of hunger; Emotion always exists - otherwise wouldn't eat; Have conscious control over emotion - interactions with others; Why people with Parkinson's get Alzheimer's; Inertia is emotion energy; Feel different in different places - carry different memories; Having emotional control - depends - when you can't control it - controls itself; About pent up emotions - make you sick; Emotion is energy - has an Inertia in respect to TPP; Cannot stop loving your child, city, another person; We create certain emotions and effects and a response to them; Our dearest friend died because of emotion; Plasma is a conscious entity - connects and reacts without limitation - entity without vessel - no dimension - no limitation on strength - free and connect according to own interaction - control of its own D; We replicate ourselves through emotions in Space; We don't clone ourselves - transfer energy across - manifest differently; Mother gave birth to 3 children - not connected to her by DNA; When mother in womb twin died - consumed by mother; Children of Soul DNA don't match parents - create own DNA - come from Energy fields of U; When transfer our energy to another place - take RNA and DNA of that place; We are Mass - P becomes Weight - manifestation of environment - Children of Mitra follow this; KS shares experience in Flight - not afraid; Feels plasma penetrating - pushing away blockages; Is it dangerous - no problem; Some feel like energy being absorbed; Not abnormal to feel these kinds of things; Explains bad cough - seriously ill for 10 days; Felt illness from person coming to him as energy; As we get closer to ourselves - normal to feel these things - energy transfers; Traveling without body from age 8 - see himself leaving body behind; Not attached to P; Learned it as part of emotion; Speak about future - actually see it as it is; Not afraid of it - rejoice in it - part of structure; As student go through structure of atoms - nuclear reactors - being part of neutron; Design systems from inside them; Have to trust; About being electro-hypersensitive - change environment - Gans and Butterflies; Observe what kind of environment gives you that charge; Can get emotionally charged; It's not anti-electric - Gans's carry M field plasma energy - change by adding fields - KF Butterflies - put on phones - electronics - absorb unwanted energy; Specifically designed with Nano coating & Gans; Put under pillow - sleep different; Gans don't produce negative ions - don't believe this theory; Made tests with negative oxygen with Chinese military - extensively used by them; Material not in possession of KS; Chinese military stole it as own invention - betrayed us a few times; Generals smoking in room - air crystal clear; Stealing has become their habit; Never consider working with nations who behave this way; About Jesus' transmuting; Jesus as a man - other Jesus made up by Vatican & Christianity; Vatican version made prophet; Lot of things don't match up; Through pain go through transmutation; Transmutation done by others before Jesus; We all can do it; Getting taught now in mass numbers; Can do it through pleasure of control; Become invisible - part of Defense T; Replicate science of it; Grew amputated toe - Naomi's brain reproduced itself; Energy of emotion - transfer into P - disappear and appear; Or change colors, extend arms; All have this within us - in our DNA; Blocked in back of mind; Now scientifically we can do; Create environment through plasma; Can do anything in D of Energy - realize power of emotion - we are power of emotion - create own ALS, MS, cancers; We create love - give our life for it; It's how we control that emotion; We can create viruses through emotion anytime - suppression or too much joy; Depends how we perceive it - purpose; Viruses are energy packs - it's how they manifest themselves; Can get emotional virus - you create certain things; Emotions create fields - viruses are

collections of fields; You build emotional viruses internally - worse because tailor made to you; Preparing man for next cycle of opening Space - become part of Universal Community (UC); UC within spaces of planet - they are with us; You can follow discussions we start on "X" channel; Start interacting with world leaders especially American Administration; Put things public - enlighten world with public teachings; Join X - introduce it to others; Bring up topics to benefit human race - advancement of peace; Teaching extensively on this channel; Let public know where we stand; Talk about lifting restriction on Facebook and Youtube; Share advancement in T; Part of the process of peace.
