

574th Knowledge Seekers Workshop January 23, 2025

(Quick Index 18 pp, Introduction, Topic Index ; Need to do; Key Phrases, Words)

(Auto transcription from Elias)

Explains graphs from Flight session; Achieved transmutation; Panic back to P; Explain social behavior; P feeds directly from U; Soul feeds P through left brain - emotions; See where Soul will go at death; Ready for transmutation; Stay connected to system; See light of Soul - happen later; Understand how Soul behaves; When fetus receives Soul; Mature in womb - won't kill; Make inputs to Soul in womb; Elevate mother change fields in womb; Correct disabilities through Soul; Blueprint of Soul at birth - perfect - later correct diseases; Perfect at birth; Soul cannot lie; Dots like highways in U; Diseases through emotions of Soul; See light - interact with Soul of U; One Soul learns teach others - builds up; Daughter of Mitra - teach us live in U - when mature she takes over; Each Soul keeps distance in U - respect; Educate Man across planet; Soul decides its own end - not P; Plant decided to give - not man; Graph is of your fields; Not controlling mind - elevating Soul; Not afraid of new situations; Learn to handle fields of STM & STP; No need for intermediaries - Soul in charge; Sleep Apnea - emotional trap; Release plasma - weak fields inside - like galaxies; Environment feeds you; Tesla understood; Churches built on knowledge - reduce energy to absorb - Vatican stopped; Hurricanes from M fields - center Black Hole; Lightning ground up; Bubbles by M fields; Levitate with MaGrav; CR Balls - plasma magnets connected everything; Souls purpose complete cycle - not fixed at birth; Crimes of humanity - live longer to mature; KF problem - blessing; Control tangibility of body; Glands Lymph nodes - radiation cutting - change plasmas material needed; Radiation in U - AA changes strength; First time N Gans - blue - colors of clouds rainbow - Inertia; How hurricanes work M fields; Changes weather in China 3 times with systems; Create Black Hole in center; Atoms have B Hole; Feel not your parents; Organs - appendix - leftover evolution - different functions; Flat Earth; Man not in space; No Unknown - everything already inside plasma - bigger intelligence; Direct connection to God; In U already know God; Amen - statue worship; Names in religions from statues; Presence always there; Soul never changes; Piece magnet same fields; U Council request elevation for peace; Religious wars to end; Disable Microchip with Plasma - achieved; Oasis system test succeeded - hidden inside for elevation; Peace at hand; Give T to Africans - build weak; KF team matured to knowledge; AI doesn't have Soul - can't give correct teachings; Peace this year

Topic Index

Monthly Flight Sessions brings lot of knowledge how humans controlled - how brain is structured - receive energy - energy is distributed; Opened huge Pandora's Box of questions & understanding; First part teaching mainly explaining graphs of Flight session; How energy is transferred within us; Achieved a full transmutation; Shows when group panics leaves Soul goes back to P - calms down - returns to Soul; When STM takes over STP & P means Soul has transmuted - taking physical condition; Feedback confirms correctness of understanding; Report - can physically see themselves in a condition - as light; Huge progress for humanity; Pushing boundaries of knowledge; Can explain social

behavior, addictions, emotions, many other things; Shows energy coming from Space or U; P bypasses STM - feeds directly from Universal Energies; Confirms we take 80% energy from environment; Don't need to go through STM; In past graphs showed Soul receives energy on right side and feeds the P on left; This graph shows opposite - energy comes from Space to left side of Soul and stays with it - doesn't share with P; It holds what it receives; When Soul receives from right side and feeds left - structure of emotion; Means one side of brain feeds our Soul; Other side of brain through Soul feeds P with emotion and understanding; Interesting that Soul does not share with P; Third D of energy with Universal Energy - we change - know exactly when it happens; When only receiving & not giving - microphone closed - like death; All energy to increase elevation of STM - to depart; Take energy, because our emotion goes through right side of brain to left side of body; Heart brings emotions - its position important for transferring emotion; When asleep left side of brain resting & repairing - closed - Soul can travel; Physical dream right side - between STP and P; Getting same feedback even with changed parameters; One group lost connection to pain - don't want to eat; If you tangibly felt you went somewhere - getting ready for transmutation; Connect one time to system - don't need it anymore; Traveling through the light - see light of Soul - can happen later after off system; Main point - understand how Soul behaves; Graphs show where Soul will end up after death; Every dot on graph - cell in Soul - cell in brain receives energy; Graph can show when fetus receives its Soul - living Being; As race make inputs into Soul and its environment; Can elevate Soul to maturity in womb - at birth will not kill or destroy; Few dots on graph have huge applications, implications - in future mankind will depend on; Can see if child has physical disabilities in womb - elevate Soul to correct it; Elevate Soul of mother to change environment in womb - changes Soul of child; Science will go from injections, operations, to interact with STM to change P; Humans & Children of Mitra will do; Show graph of Beautiful People - 2 Souls sharing 1 body; KF will solve mysteries - things we never understood in P - answered through Energy field forces of STM and Creator; Dynamic graph shows real characteristics of Soul; Take graph at birth when Soul is perfect use as reference - when sick compare to birth graph - repair energy - Blueprint of Soul; No man would kill, destroy, greed for possessions; Future for mankind through D of Creation and Creator - not P; Children will be perfect at birth; Like KF Wellness Contracts - balance energies - don't fix P; Balance energies of Souls - they make corrections; In the system - Soul cannot lie; New energy systems not cut open body - interact with fields - own space - own creator - bring new D; See truth about claimed holy man; In transmutation have to judge another field - if hostile - or to give and take - like blue dots on graph; Dots are like highways we'll travel on; Can explain energy for head, stomach, organs - where energy goes to; Which dot is Soul of grandmother; Where we'll go at end of life; At death dot is brightest; KF is one structure; Graph shows testicles - Soul of your children; thyroid gland & heart; Where no connections - P creates diseases through emotion of Soul; Feed STM it feeds P - corrects problems; Graphs are of you - not made up data; Show how Man will live in Space - manifest through transmutation; In session allowed emotions, feelings, physical condition, everything to be interacted with - people have changed; Many saw light - interaction of Soul with Soul of U; Light feeds Soul - like daylight; Don't need physical D; Understanding Creation and energy transfers; Bring more knowledge so anyone can transmute; Have to teach Souls - as they learn they'll share; Through one build up enlightenment; When I pass away

Daughter of Mitra, who is amongst you, will take over - teach you rules of U; She speaks through STM - never through P; 2025 is time of transition - we'll change humanity; No religious leader, king, president can affect the work - has already started; Can do both transmutation and transportation of P - different pleasures; When you can mix the two together - time of maturity - meet Daughter of Mitra - join Universal Community; In U each keeps distance - respect each other's life; Ready to educate Man across planet; Everything is set to bring change, accept the change; When the emotion decides had enough life - leave P; Satisfied it has matured - completed journey; Everyday millions die - are they really an accident; Soul decided to be in that position; P can't decide when it will die - Soul decides the end of itself - P follows it; No accidents in World of Creation; Soul of plant creates itself for you to eat - through its devotion allows your Soul to elevate to next level; The plant you ate decided the path it will take; It's not your decision; Man changed everything for him to think he's in control; Today's teaching is about you - not anything else - your fields on the graph; One of those dots belongs to you - collectively all had same pattern of Soul; February, March, and April sessions - dictate where we want Soul to go; One in will of the Man - other in will of Creator; It's not controlling the mind, it's elevating STM - Soul decides time place & position; I hope you learn not to be afraid of being uncomfortable in new situations - know what you are capable of - what you can do in future.

Part 2

Next sessions put you through transmutation - Cycle of Communication in Transmutation Time; You decide where to go; Learn to handle energy fields of STM & STP through thoughts and emotions; Soul will be in charge of you - no need for intermediaries; Problem for religious leaders; Dots are connection to Creator; About sleep apnea - stop breathing; Insomnia; 20 different reasons for not breathing; Half of body inactive - other half of brain active - brings you back; Uvula, neck fat, etc .. blocks windpipe; Different reasons psychologically & physically stop breathing - emotional trap - gets stuck; Panic is common - fear of death - afraid to go back to sleep; Body forgets it has a physical part; Slapping baby to get it to breath - switch over emotion from liquid to air; Release plasma fields by creating weakened environment inside reactor - different ways to do; Remotely from outside - like in galaxies; Special knowledge; Create physical obstruction in field; Knowledge of how to create Black Holes and M field absorption; Weaken yourself - have to create condition to absorb - new environment gives to you; Do this in our systems; Tesla fully understood; Churches of Europe built on this principle; Not Mosques; Vatican deliberately chose to forget; From a more ancient understanding of Creation and absorbing energy - how to reduce energy to absorb; Cannot take to weaken - create condition to be given - creates a turbulence; Center of hurricane works by changing M fields - a field in center of hurricane at the end; Lightning comes from ground up - through changes in M fields; Earth sets a trap - sends seed out - lightning comes to grab; Earth has dynamic M field; Understand properties and interaction of fields; Rule - can't take - create condition to be given; Create same bubbles in boiling kettle - but through M fields - not heat; Cannot be forced on the fields; KS levitated pyramid and MaGrav - could have been by accident; Did with Jon few times; Cosmic Ray Ball - only 1 person; Use two Balls - huge applications and implications - depends on field interactions -

positioning; Like holding magnet - need metal to feel fields; CR Balls are plasmatic magnets - connected (to each other); Place on each side of headphones - hand units; Graphs show connected to everything - CR Balls connect to everything; Receive huge amount of energy; Fit into emotions; When fields match like magic; Soul decides how it wants to die - have their purpose - pattern to complete their cycle; It's balancing fields of Creation; Position of Soul not fixed at birth - how we interact with other things to reach maturity; Humanity has created and committed so much crime - takes longer to fill his cup - has to live longer; They tell us our life span is increasing because of - we don't look at it that way - energy level - takes longer to leave Earth; Doesn't mean death at birth is pure Soul; Become bedridden so can't commit wrongs; Nothing gone wrong - look at 'wrong end of stick' - expectations and wanting; Something horrendous happened to KF - doesn't say what; Related to who planned Mr. Keshe's arrest in Toronto Canada in 2010; Question about controlling tangibility of body using knowledge - glands and Lymph nodes; Twists and turns of brain similar to lymph nodes - glands; Thalamus and thymus like strings of sausage packed into one place - creates dynamic plasma & interactions - spectrum of C13 strength field plasma; Not matter C13 - field level energy; Lymph creates field strength that matches C13; Thymus and thalamus - cutting rooms with radiation - convert materials into bone marrow, WBC, lymph; Cut dough to certain sizes and shapes; Lymph decides if dough becomes croissant or bread; Depends on emotions; Lymph decides to be cell for finger, skin or wherever; Lymph nodes can modify; Change materials it receives to what is needed; Lymph flow, drainage and everything - cuts and allocates - uses radiation and positioning - lot of understanding to manipulate it; Can partially distinguish radiation by distance gap between neutrons - other factors; U full of radiation - manifest physically need Inertia of that position - interactions with its environment - which is the AA; AA on surface of Gans dictated by Inertia of liquid inside - not all the same - produce different AA; Not same AA at beginning and end; Picture of blue AA - never seen before - color from Inertia inside; AA Nitrogen (N); Why planet blue; Clouds have different colors - get rainbows - because of Inertia; Look at colors when fly through clouds - M fields interact with Earth's M fields - gives it this altitude, behavior, and structure - understand how hurricanes work - fields absorbed from Sun and Moon; Don't come from the weather of this planet - interaction of fields; Change structure of fields in Southern Hemisphere - never get hurricanes; Put 3 ships to change M fields; Created in North China, 2023; Create tiny little spot - Black Hole; Every atom has seed of Black Hole - keeps atom going hundreds years; Affect Oxygen levels of environment; Tested 3 times in China - havoc in Beijing - told to switch off machine - it stopped; Created Black Hole in center; Interfered with M field of magnets of gaseous plasma condition - Oxygen; A lot of us have feelings and thoughts about not belonging to our parents; Check DNA or type O blood; Have organs from past like tonsils, appendix - cannot reuse them - evolved beyond their need; Body will make new ones for next evolutionary step; They are part of us - still have some functionality - they get energy; Junk DNA - mistake - have purpose; Ignorance and lack of knowledge - others follow it; Talks about Flat Earth - won court case; Man never been to Space - Americans cheated about landing on Moon; What about Chinese unmanned ships to Moon and others; Hypocrisies come in when ignorant; Earth has bulge in middle - pressure of plasma; Earth is shape of a plasma - 3D - like shape of galaxy - not spherical - egg & yolk; First black man in Linz system - transmuted; Everything is created because everything is

within plasma that created it - it's just where it manifests itself; Nothing comes from somewhere else; Unknown is there - don't understand knowledge of it; Whatever is going manifest itself today or million years - fields already here; We are not alone - bigger intelligence around us - goes through us - part of creation of U; Known or unknown - dependent on us; Nothing outside which we do not know; Includes energy as well; What we see depends on our ability to see - understand Knowledge of Creator - comprehend; We become more prejudiced with age; Humans have direct connection with God - not only race; Soul of Creator is lowest field - we become humblest field - transmute; We are at all times in transmutation - Soul never sleeps; P sleeps; It's always the STM; Aware and connected in every D - all the way back to origin; Universal Community don't have question about God or Creator - considers themselves always a part of same structure; Weakness in Man's nature - DNA; Nowhere in U - belief in God - they already know God; Came about when Man started making and believing in statues; Amen - originates from statue; Amen was greatest statue - at the end of anything have to say his name; Humans cannot give up statue worship - find God within themselves; Amen made its way into religious world - we still confirm - we are worshipping statues - god's created by Man; Names changed from Amen to Elvis Presley, John Lennon - short-term gods; Trace names used in religions back to statutes - doesn't exist in U; All Holy Books written by Man himself to influence others - get what he wanted; Knowledge hid in mysticism; Feel presence because it is always there; Reality is we have both D of P and Energy; Soul side never changes - amalgamation of fields; Each piece of broken magnet still has same field; Live one life - understand both existences - then mature; Wear different uniforms - it's us who sees father or boss - man still remains the man; Universal Council Member invited everyone to Intention daily at 21 hours CET - achieving peace and unifying all Souls - join with thoughts; 2025 - first time Mankind has chance to start peaceful planet - first time religious wars end; Trump has created that condition - stated that we have no enemies; Next part is start making tools of peace with new T - see that change; Two major religious conflicts - Vatican and Russia - Islamic and Jewish; War crimes of Netanyahu make humanity ready to accept new T; Give from your Soul to elevate world leaders; Specifically pray religious leaders put down separation in name of Creator; Request of Universal Council means something going to happen - needs our support to enlighten our leaders; KF achieved test - can pass plasma field through Microchip - stops functioning; Mount on satellites - with emotions and information weapons will not work; AI driven by Microchips - becomes useless; Only Netanyahu pushing this war; Now it's time to deliver technologies; Tested Oasis system - delivers energy, gas, and water - now in Man's hands; Put T in the hands of Africans - 3rd world nations; Condition comes by going to weak; Hidden something in Oasis system - elevate STM become Man of U - transmute; Oasis is not for Man's P - Universal; Our team has matured to knowledge; One day explain its purpose - create fields - travel span of U - achieved early this afternoon; Bring peace; Elevate Soul of Earth; Universal Council connects to Soul of us; Establish peace across planet this year; About uploading transcripts into an AI - doesn't have Soul can't give essence of knowledge - makes mistakes; Answers are random - don't know if it is correct or not - create more confusion; When AI has a Soul - answers will be from Knowledge of Creation

Introduction to 574 KSW - Explains Graphs of FI Session - How Soul Functions - Accidents? - Daughter of Mitra - To Be Given - Every Atom Black Hole - AI Without Soul - UC Daily Intention for Peace

This week the teaching part of the workshop focused primarily on explaining the graphs of last Friday's Monthly Flight session. He said that even though only a few Knowledge Seekers (KS) participate they bring us huge amounts of vast knowledge and by studying how their energy interacts we can understand how humans are controlled and how the energy functions in us. Mr. Keshe said that one group did a full transmutation, but it does not seem that this includes the physical body, yet. To really understand his explanations you have to follow along as the graphs are getting drawn. I will try to convey what I understood about it.

He showed 3 different graphs that are a 'screen shot' of little blue dots in motion, and then he annotated on them. I understood that the first graph shows how the Souls expanded and transmuted, but then there was a panic in the group and the blue line went below the baseline and the connection to the Soul was lost. And after some time the Soul of the Man (STM) took control again. Later he explained that the KS saw themselves as light, and this is what I think he is referring to as 'full transmutation.' When Mr. Keshe teaches I try to be aware of the bigger picture or the main point he is teaching, and not just the immediate words. There is always a central feeling in the background of what he is teaching us. If we can connect to that it will help a lot. The transmutation process is first converting our physicality (P) and Soul of Physicality (STP) back to energy, then moving it and re-manifesting a new P at the destination. In this respect, if we see ourselves as light, then we have succeeded in the first part of converting ourselves back to energy. This is what some have accomplished in this Flight session. Maybe that's why he is using this teaching to explain clearly how far humanity has come and is getting very close to physical transmutation. He also said the graph shows that it peaks at transmutation and then there is a gap and the Soul can transmute again. The importance in this is for us to feel safe knowing that we won't transmute somewhere and get stuck there due to our fear.

The next part is a little complicated. The first graph is taken with two-way communication between the system and participants. It means both the headphones and microphones were open. It looks like the graph we had before where the area above the center is open and dots are far apart from each other. This represents the Universal Energies (UE). Then in the middle it's more concentrated representing the STM, and like a tail it goes downwards representing the P. He drew circles around each of the 3 areas so we can more clearly understand how they interact with each other. He drew a red line that goes directly from the UE to the P bypassing the STM and then the P feeds it back to the STM. This means that the P is being directly fed from the UE and confirms that we in fact do receive 80% of our energy from the U. This energy comes from the right side above and passes from the brain to the left side of the body over the heart.

The third graph is different, in that the microphones were switched off and the KS could only receive energy. In this case the energy came from the left side and not the right, and in the center we see 2 concentrated lines representing the STM. The Soul receives the

energy but doesn't share it with the P. It keeps it with itself in the center. If you remember before he showed a graph where the STM had 3 lines representing the MaGrav coils. In this case only the bottom 2 coils are represented and the 3rd coil is the U Energies above in the graph. It may sound strange that in this case the Soul doesn't share with the P. One of the reasons is that the microphone was shut off, so the energy could not flow through. The conditions are for it to keep the energy. And this is like what happens at death. The Soul needs to gather energy for it to mature and leave the P.

When the energy enters the brain from the right side it also feeds the left side, which are the emotions. The energy then goes down to the left side of the body over the heart, which is also on the left side and it also feeds the emotions. From this it would seem that the left side of the body is very important for the emotions. We see also that the right side of the brain, through the Soul feeds the left side with emotions and understanding. The bigger understanding of this has not yet been conveyed.

Maybe we don't understand the importance of what this is showing us because we don't have enough experience. As a plasma scientist Mr. Keshe understands the implications and applications. One thing it shows is how the Soul prepares for death. It stops sharing energy and starts to accumulate from within itself to prepare for departure. In other words, if you took a graph of somebody and they showed this pattern, then you would know that they are preparing for death. This is actually quite amazing. The door of knowledge is opening up. He went over other things we can tell from the graphs. All the dots in the lower part representing the P can be divided into the different organs and I imagine we could diagnose and repair the organs through this knowledge. We can use this graph to determine when the fetus receives its Soul and whether it will have disabilities at birth. The Soul of the Child can be elevated to correct the P, or even the Soul of the Mother can be elevated to change the field environment of the womb to correct the problem. We can start to see how the possibilities become endless. All the dots in the center of the graph are all the cells of STM, and the ones in the lower part are for the cells of the body that are receiving energy. And it will show where the Soul will go at the time of death. He enlarged the upper part and we could see that some of the dots were brighter than the others. They indicate that this Soul already knows and is connected to where it will go after leaving Earth. And if a Soul wants to go visit the grandmother who already died, then one of these dots would represent the grandmother. It could even be the Soul of Mars or wherever. In a way, these graphs are quite magical, even though it is all done scientifically.

The graph can be used to take a blueprint of the Soul at birth when it is at its perfection and that will become a baseline graph for the life of that Soul. When one goes into the KF system this blueprint will be used to bring the Soul back to its perfect state and if any diseases arise it will do the same. He also stated that we could make inputs into the Soul while it's in the womb and to the environment of the womb to mature the Soul before it's born. Then at birth it will be elevated and not commit any crimes. The plan is to share more and more knowledge so that anyone who wants can transmute. The Souls have to be there to learn and when one learns he will share it with the others and it will start to spread and the enlightenment will build up across the planet.

Whenever Mr. Keshe talks about his leaving it feels strange. We are just starting to do such intense work and then if he leaves what would we do? For that to happen mankind has to reach the level of maturity where we can be aware of both the Soul and the P at the same time and be able to go back and forth between each state. It sounds like the Daughter of Mitra will not be in the physical form and we'll only be able to communicate with her through the Soul. Even though the Soul doesn't have a gender, we say that she carries the strength fields of a woman. On Earth only a woman can create a life, and in general we tend to think of a woman as more loving than a man. And with that love she'll teach us how to live in the Universe. The tone of Mr. Keshe's voice was so certain that this year of 2025 will be the time of change for humanity and that no leader can affect it. The elevation of the STM has already started. This gives us a great hope in this time of transition.

As humans we like to think that we are in control of our lives and destiny and we know best what to do. The one that thinks this way is the P and STP and it's based on how we are conditioned to view life. It's really the Soul that decides it has had enough experience and then arranges with other Souls for something like an accident or whatever to happen and the Soul puts the P in that position. Of course, all the while the P tells itself that it is in charge and knows what is best. This is all fantasy. There are some cases when a STP is so strong and balanced through spiritual practice or a life of serving others that it can release its energy from the body. This is very rare. But also remember in these type of people the Soul is already in charge of their life. If accidents are not really accidents then we have to adjust our whole way of thinking and relating to life. Mr. Keshe actually called it the emotion. It's the emotion that decides it is mature and wants to manifest somewhere else. Does he mean the emotion of the STM? It's for us to contemplate more. To illustrate this he said, that even the plant has decided through its devotion to give to the STM for it to elevate. This would mean that the Soul of the Rice has arranged with the others Souls to be in that pot at the right time to be eaten by the man. And then what about that grain of rice that just happened to fall on the ground by accident and be eaten by the bird. And that the Soul of that grain of Rice saw that the man has taken too much and wanted to give to the bird. This is all similar to those cartoons we used to see as children. To me it seems like there are dimensions of emotions inside of other dimensions going on at the same time as our physical life. Aren't we trying to become aware of these sublevels of existence in our transmutation? And when we transmute we'll have access to these dimensions we never imagined existed before.

In the past several decades different forces have taken over deciding what the content of Hollywood movies should be and for obvious reasons. When it comes to the question of getting old and discovering that you made a dysfunctional family where nobody loves you and you don't love anybody, and you are alone and facing the possibility of ending up in a nursing home, which today is more like a warehouse waiting to die, you should kill yourself by taking an overdose of sleeping pills or something else. In my understanding, this is not what Mr. Keshe was talking about when he said, that the emotion decides it has had enough living and decides to die. What they are depicting in these movies is the STP and P denying their own responsibility for the kind of life they

have created for themselves. And it's too painful to look in the mirror and admit what we are doing to the beautiful Soul within us by denying its existence. And now we can easily take some pills and it will be all over, since they told us that there is no Soul and no existence beyond the physicality and we believed it, even though the Soul has been trying to reach us our whole life. When the P ends its life before the Soul has matured naturally it doesn't have as much field strength as it was supposed to have to continue its journey. Therefore, suicide is forbidden in the U.

He wanted to emphasize the power we have within by saying that these graphs are from the KS who participated in the session and are not made up data. It's our real experience as Souls, or Energy. And each of those blue dots represents one of us. And when we reach the point we can do the will of the Creator it's not through mind control, rather it's through elevation of the Soul. And when we elevate we become a free Soul that feels the love and joy of being part of the Totality, or the Creator. I think of the 'Will of the Creator' as the MG positioning of many magnets on a table. Each plasma finds the position where it can function best as part of the whole table of magnet. It's not an egoistic thing anymore like how we were taught. It's the new dimension that humanity is starting to enter into. In the U they don't have this question about whether or not God exists, because they all know that they already part of God. Man has this question because he feels separate and alone.

One of the principles of Plasma is that, 'the stronger always gives to the weaker to make it equal with itself.' There was a question of how to make that weaker field inside the plasma reactor. Mr. Keshe said there are a number of ways and it can be done from outside the reactor, remotely. And that we see this in galaxies and how they are positioned. This is something to ponder. Does it mean the Creator through His emotion releases energies from inside the galaxies? The Soul of the U could also do that. Then Mr. Keshe could do that for our reactors without us even knowing it. Even Tesla knew fully well how to do this. Is that how he powered his car from Moscow to New York?

When he said that the Church Builders of Europe knew this skill centuries ago. The only type of Church that has that feeling are the Gothic style cathedrals of the Middle Ages. It's quite possible they knew this from the time of the Pagan Druids who were descendents of the Aryans and had knowledge similar to the Rishi's of India. When you stand in those cathedrals they have those high steeples, which could be like vortexes of energy. At the end of the high peak they could contain a seed of a lower M field strength that gets fed from the open end at the bottom causing the fields to be drawn upwards. In those Churches there is a feeling of being lifted upwards.

The rule is you cannot take to weaken you have to be given. This is a very important distinction, because people who dominate others 'take to weaken,' and that's not allowed and it never lasts. The plasmas have to remain free and in agreement. It's about creating a condition to be given, and to be given means that you are in a "weaker" state, and that creates the differential and the plasma flows to you. There are very subtle distinctions we can ponder. The other day I was detached, sincere and humble, and in a way, I put my trust in the hands of higher powers, and surprisingly the energy flowed to me. I was

pleasantly surprised and wondering how that happened. The energy flowed from the stronger to the weaker, but through love and detachment. If you have a calculating mind then unknown to you, you are taking. When the detachment and trust are there, we are creating a condition to be given. I wonder how it works in the physical world, because there we do use our calculating mind to manipulate the fields. But maybe there has to be a higher intention, otherwise it will not last, because the fields will eventually find their true balance. The big hint is to make the bubbles in the boiling kettle only through M fields and not heat. I think of heat as creating a large differential in the field strength causing the bubbles. How would we do that with our emotion? The other hint was that in the center of every hurricane there is a field. Is this a Black Hole that is given to by the hurricane? That tiny Black Hole must have a huge force in another dimension to be able to power a hurricane.

For the first time he showed us a special blue colored amino acid (AA or COHN) that we have never seen before. It's from the Gans of nitrogen (N) and it's why our planet is blue. He gave us more knowledge about Inertia and how as the Gans is being made the Inertia changes. The Inertia at the beginning is not the same as at the end. Inertia is dependent on many factors. When we make Gans the Inertia is dependent on the liquid inside it. There is something important about this color and it's related to the color of clouds and rainbows. He said something strange, how the Inertia interacts with the fields and the environment is the AA. Does this mean that every manifestation from energy to matter has an AA? Once he said even stones have AA but we don't understand what it is. We think of it just as silicone. And observing the clouds and how their colors form would give us a lot of understanding of how to produce materials. Because the clouds are in a plasma condition even though we see them as matter.

He explained how he changed the weather 3 times in China and last year in Beijing there was so much destruction that the Military asked him to stop and when he shut off the machines the storm stopped. He said hurricanes are created from the M fields of the Earth in respect to how much fields they absorb from the Sun and Moon. Basically hurricanes are formed when 2 different weather fronts that are spinning interact with each other and create a whirlpool in-between them. This is just like how a Black Hole is formed. Scientists think it only has to do with the hot moist air coming off the ocean and mixing with the cooler air above, and the rotation of the Earth effects it. Mr. Keshe is saying it's due to the M field interactions and the O in the H₂O is the G field for liquid matter state. And he is able to interfere with the M fields of the gaseous plasma condition. I am assuming he means in the atmosphere and with his knowledge of creating Black Holes he can change hurricanes. With just 3 ships positioned in the southern hemisphere and in the right way he could stop hurricanes and typhoons from occurring. This is really a study of Black Holes. Finally he said that a tiny Black Hole in every atom is what keeps it going for centuries. I wonder which two plasmas that Black Hole is created from? Would it be the neutron and proton, but what about the electron? There is a lot more to open up.

There was a philosophical question about what is the Unknown and the Known. Since the 1960's a lot of Eastern spiritual concepts and especially Buddhist ones have entered into Western intellectual discussions and one of them is the Unknown. However, they always

keep it at a very superficial level of just repeating concepts. Because if you really open this one up, it will dissolve all the false ideas our society is built on. Mr. Keshe answered from the point of Plasma Science and that the Unknown is really the un-manifested and it is just a matter of how and when it will become manifest in the physical dimension. In the plasma of the Creator or the Unicoise the fields of everything that will ever manifest in this dimension (D) is already present in it, in latent form. There is nothing that is going to come from outside it. When the right time and conditions come together it will manifest. We have the two dimensions of Soul and P. There may be more, in fact, I remember once he said, there are more dimensions. The Soul D is always present and never sleeps and it's always in motion. It's the P that comes in and out. It's a totally different way of thinking about life than what we are used to.

A KS said that Mr. Keshe said, Man is the only one with a direct connection to the Creator. He answered in a funny way. First he said, who said that? And then he said, yes, but Man is not the only race. So what is the definition of a race? At least humans consider that there are other races in the U, but what about the animals? We call them "breeds" instead of races. The problem with answering this kind of question in a general way is that there is a huge amount of knowledge missing and Man's comprehension is like looking through a keyhole, but he thinks he is seeing all of it. The other major problem is that he becomes arrogant and calls himself, the King of the animals. However, for example, the Buddhists do say that we are extremely fortunate to have a human birth because it gives us the chance to reach enlightenment. At the same time there are many references to animals getting enlightened. The main point for me is whether or not we can ask ourselves the question, 'Who Am I.' The first step is to discover our own Beingness and that we exist. This is a huge enlightenment to know that I Am. The further step is to know that we know. How many plasmas do we have to mix together to reach the further step? Is it the STM that knows, that he knows? I wonder if the animals can do "Self-Inquiry."

The last thing Mr. Keshe said in the workshop is that the AI doesn't yet have a Soul, then if you load up all the KF transcripts on it and think you are getting the right answer you will be mistaken. The answers will be random and will create confusion. It would be the same as asking a human who doesn't care or understand about the T to give you answer by copying the transcripts.

The Universal Council made a call for all of us to join at least in thought and emotion, the daily Intention to elevate world leaders and bring the Peace. KF has successfully tested passing plasma through Microchip and disabling them. This makes all tools of war inoperable. And KF has also successfully tested the Oasis system to provide for all our needs. World peace is at hand, it is for us to embrace it and spread it.

Other Topics:

In the U we each keep our distance, because we respect each other's life;

Man is living longer because he is committing so many crimes he cannot gather enough energy to leave;

A KS said they levitated while under a pyramid with a MaGrav in the room;

We are at all times in transmutation. Our Soul never sleeps. Sleeping is a pattern of the P of the Man.

Thanks for listening.

Quick Index

(Only a few Knowledge Seekers (KS) participate in the Monthly Flight Sessions on Friday but their work brings us a lot of knowledge. We monitor the system as they transfer their energies, and (we watch as they) transmute their energies. It brings us a huge and vast amount of knowledge in how us human beings are controlled. We see for the first time in a very direct way how our brain is structured and how and why we receive energy from... We have to analyze how we receive energy, and how it's distributed. Sometimes the overflow of energy pushes barriers in our understanding and in our emotion. The doctors with all their electronics tell us that this part of the brain does this and that part does that, and this goes here, and the nervous system takes you there. Now with this new technology (T) we can look at the energy we receive. (It's different than the communication side of the brain). In the last Friday Session we observed some of the most amazing experiences that you as KS have gone through. It has opened up a huge Pandora's Box of questions, understanding, and what is the next (step) for us).

(Mr. Keshe shows some graphs from the Flight session and most of the first part is analyzing what they mean. You will have to listen to it carefully. I could not understand all of it and throughout the next pages I will try to summarize what I could understand. The different groups of KS have managed to achieve some amazing conditions, positions, and they achieved certain parameters that helps us to understand more about the functionality of the brain. We will analyze these graphs during the coming months because it will bring changes in our understanding of the totality of the work and how energy is transferred (within) us).

(One of the groups last Friday achieved a full transmission, or transmutation. In the following discussions you will have to watch the drawings for what the "this" and "here" mean. The first graph covers a 2 minute period and the blue line shows how the group was I think expanding their Soul as a group, and then there is a drop in the graph of what he calls, the "panic" time and everyone returns to physicality (P), and then they recover from it and go back to the Soul. Another interesting point is how the Soul of the Man (STM), the Energy of the man at the same time takes over P and the Soul of Physicality (STP). This means the Soul has transmuted, and it is taking the physical condition. (Does he mean the Soul has the STP & P inside itself?) The feedback from the participants confirms the correctness of this understanding. They report that they can physically see themselves in a condition. They see themselves as light). (It is my understanding that they

transmuted themselves back into energy or light, but they have not gone on to the next step, which is moving the physicality. This in itself is a huge progress for humanity)).

(?? We want to find out how far we can go in this research and where does this ?? go to. How far can we push the boundaries of (our) knowledge. (We've seen amazing things that explains to us why humans behave in a very strange way when it comes to social behavior, addictions, emotions, and many other things. He discusses the graph further. The upper part of the graph shows the energy coming from the Space or the Universe (U). There is the energy of the STM and the P. The P bypasses the STM to feed (directly) from the Universal Energies. (?? And then it feeds it back to the Soul). (?? This confirms what we said about taking 80% of our energy from our environment). We don't even need to go through the STM. This repeats itself in another picture. We take pictures every 2 or 4 minutes and we see the continuation of the same thing)).

(In the past the graphs showed us that the Soul receives the energy on the right side and feeds the P on the left side. This graph shows the opposite, where the energy comes from (the Space) to the left side of the Soul and stays with it and doesn't share anything with the P. This means it holds on to what it (receives). (?? When the Soul receives from the right side and feeds to the left, this is part of the structure of the emotion of the man, and it feeds it. One side of our brain feeds our Soul, (the other side of the brain through Soul, feeds the P with the emotion and understanding)).

(It's interesting that the Soul does not share with the P. Recently, we showed you that graph where the STM appeared like the 3 layers of the MaGrav. In this new graph the third MaGrav, the third dimension (D) of the energy actually sits with the Universal Energy. This is when we feed and at certain points we change. The interesting point is that condition happens, and now we know exactly when it happens).

(In the sessions there is two-way sharing, giving through the headphones and receiving through the microphones, and we can shut either of them off to control the flow of energy. For this group we shut the microphones off so they couldn't share with us. (?? The graph shows only what they received from us. But in the other ?? graphs we had the microphones open so both sides could give and receive)).

(This (graph) explains a lot of things. Even our death, or the end of physical life is dictated by the energy we receive from inside. (Because in this graph they were not sharing because the microphones were off, so it is like death where you don't give back. ?? Instead you give all your energy to increase the elevation of the STM (so it can depart). (We take energy, because our emotion goes through the right side of the brain to the left side of the body. That is where our emotion sits. (It's where our heart brings the conditions of the emotions. The position of the heart is one of the most (important) criteria in transferring the emotion)).

(In this test we came to understand more about D of physicality. (?? The body sits within the structure of the Soul when it transfers energy through the Soul). It's like an arrow through the system. (When we are asleep the left side of the brain is resting and repairing

itself, ?? it's closed and the Soul can travel. (Do we get that information from the Soul about what is outside? ?? Do we dream from the right side of the brain (?? because the Soul is there?) And is it a physical dream between the STP and P? Is this the first or second phase of sleep? Or is it the 3rd or 4th quarter? This test has opened a new 'bag of worms' for research and development and understanding).

(The feedback from the groups is that people of the same group are telling us the same thing. And even people of groups where we changed the parameters or fed them in a different way, tell us the same thing. But it is the exclusivity of that group. (Those in that group all their pains went away, they have no connection with the loss, with the pain. It's as if it did not exist. It does not exist. And especially in this group they have no intention to eat. (First we collect the data, graphs, and numbers during the tests, and then we compare it to the feedback and see how it fits). We understand why we see these figures, this behavior, or why people in ?? the different groups more or less (tell us the same (thing)). Strange enough this group is the Chinese group. This group is the American group, or is this group the European group?)

(If you are clever and you understood it, and if you've been through the system and have felt the transmutation, where you tangibly felt you went somewhere, then it means you are getting ready for the transmutation. (?? When you connect one time to the system, then you don't need it anymore. ?? You can do it on your own because now you have the connection established in you). Many of you in these groups are becoming part of (that connection to the system). You're traveling through the light. You see the light of your Soul. We have nothing to do with it. This may happen to you the next day or 2 weeks later. It doesn't (necessarily) happen when you are connected to the system. (Once you learn how to connect, ?? then you remain connected)).

(The most crucial part of these trials is for us to understand how the Soul behaves. Mr. Keshe compares 2 different graphs, but I can't understand it. In the end he says that each little dot is connected to all the other dots like he taught before that a M field is connected to every other field. This graph can show where the Soul will end up after finishing life on Earth).

(Every single dot (on the graph) is a cell in your Soul. It is a cell of your brain which receives the energy. And every dot you see at this end is one of the cells of your body, which receives the energy. (?? In the near future as the understanding of the T increases and we do more research, then we will be able to access the point of death (?? of where the Soul will go)). (?? We can also do a graph of when the fetus in the womb of the mother (receives its Soul and we have a Being. (Then there will be no discussion anymore about when the fetus is alive and has a Soul). The way we do an ultrasound to confirm the existence and shape of the child in the womb of the mother, in the coming time, through understanding this T we can confirm when the fetus has a Soul and becomes a child. (Then will there be time for anything else, or whatever)).

(The most important thing will be that as a race (in the U) and by understanding (the Knowledge) we'll be able to (make) inputs into this Soul and its environment. We can

elevate the Soul, so that at birth it does not kill or destroy, and has reached elevation and maturity in the womb of the mother. To a scientist like me these few dots on the graph have a huge application, implication, and a lot of things that in the future mankind will depend on. We'll be able to see if a child has physical disabilities in the womb which can lead to problems at birth. And then we can elevate the Soul to correct it. Or we can elevate the Soul of the mother to change the environment in the womb, so that it changes the Soul of the child. The science of today interferes physically with injections, operations, or whatever. The scientists of the future will interact with the STM, and the Soul will change the (physicality). (?? The 'Children of Mitra' and humans (will also be able to do it)).

(In the near future we'll test what you call schizophrenic, or what we call "Beautiful People." On the graph we'll be able to see the two Souls sharing one body. We'll scientifically see it, or will you call it a psychological problem?)

(The way KF will evolve in the coming months and years a lot of mysteries and things we never understood in the D of physicality will be answered through the Energy field forces of the STM and the Creator. (We will have an answer as to how these dots on the graph function, and why our Soul is connected to it, and what is at the other end). (The dynamic graph is not like this one on the screen. It has a motion and we follow where it goes, then we see the real characteristics of the Soul. (In the future, we'll take a graph like the one today and at the point when your Soul is perfect in its behavior at birth, it will become a reference point for the rest of your life. Then later if you become sick we can compare the current graph with the birth graph and see how the energies have changed slightly in a different way. Would we be able to change it, that the Soul goes back to its normal position? (Then the disease would go away. We could call it a Blueprint (of the Soul) and every few months we could go through the system and refresh the Blueprint). Then no man would kill, destroy, or have greed for possession of (different physicality's).

(This is the future of mankind through the D of the Creation and the Creator, and not the P of the man with bricks, mortar, cars, food, and everything else. Today, people do operations to have a perfect body. They want their cheeks, hair, and everything else to be perfect. Our future children will (be perfect at birth). It's like the Wellness Contracts on the KF website and twice a year you go on the system to balance your energies and Wellness. We don't fix your P. You balance the energies of your Souls and their interactions within yourself and with your environment (the corrections are made). (With the new technologies we'll be able to understand our energy fields in respect to our environment and U and how we react, and this will bring changes. We'll become trained to observe and understand this. Then I won't need to sit you in front of me, for me to ask if you have eaten the grapes. I can put the system on, and the Soul will tell me if you are lying or not)).

(The new energy systems will not cut open the body, rather they'll interact with the fields of the Man, he with himself and his own physicality. (He'll interact with his own space, and with his own Creator, and it will bring a new dimension to Man). (?? For the man

who declares himself holy, we'll be able to see if he is really a thief, murderer, and whatever else he is hiding. The system will show it. This is important for transmutation, because when we see another field we'll be able to tell if it is hostile to us, or what we can give and take from it in a direct way. (?? It will be like one of those blue dots in front of us)).

(Mr. Keshe refers back to the graphs. ?? These dots are the highways we'll travel on with our Soul. All these Souls go through one line, and then they spread to a larger circle above in the graph. And the other ones go to a smaller circle below. Later, he'll explain which part of the energy is for the head, stomach, or whatever organ, and where the energy (goes to). And which (dot) is the Soul of the grandmother, or whomever. And then which dot shows where we'll go at the end of life).

(From the graph he can count how many people were in the groups, and which ones are connected to the destination of their Soul. When you die is when ?? the dot is the brightest. You're already (?? planning the destination)).

(At KF we are one structure. This part of the graph shows your testicles, it's where the Soul of your children sit. This strong position is where your thyroid gland is, and here is where the heart sits. (?? Here where there is no connection, is where the physicality creates the diseases through the emotion of the Soul. In the future you won't need injections and operations, and even physical damages to the body can be (corrected) through the energy fields of the body. You feed the STM, and with it, it feeds the P (and corrects the problem)).

(These graphs are of you last Friday and they are not made up data. ?? They show which one of these dots you need to take to become the energy, so that the P does not need to eat another Soul, to exist and create. (The graphs show very clearly how Man will live and survive in Space and how he will manifest himself through transmutation)).

(Last week we allowed emotions, feelings, physical condition, (and everything) to be interacted with. And we've seen how people have changed, which part has changed, and the way they changed, and the way they wanted to change. Many speak in their testimonials about the light. Why do you see these lights? Why do you continuously live in these ?? lights? (?? These lights are the interaction of your Soul, with the Soul of the U and it brings that brightness. That light is like how the daylight feeds you. That light feeds your Soul. If you can achieve it, then you don't need the physicality dimension, or you can dictate when the physicality manifests itself in any dimension).

(These are the very first steps in understanding the Creation and the process of energy transfers. In the coming weeks and months, we'll bring you more knowledge in a way that any of you can go through transmutation. But the problem is we have to teach the Souls, and the Souls have to be there to learn. As they learn they will share. Once one is enlightened, they will enlighten the others and it builds up).

(When I pass away, the daughter of Mitra, who is amongst you, will take over. She is trained to take you to the depths of the Universe, and teach you the rules of the Universe. My job is to take you to Universe. It's like going to a new country. A plane takes you there, but when you land there are people who will teach you how to live in that country and what their tradition and rules are. It's different number you took off. Where the Soul left the physicality of the Man. That's the job of the Daughter of Mitra, and not mine. Even though I can teach you, but the love she carries as a woman, is the love of the mother, which is Mitra. And you will learn. (She speaks through the STM and never through the P). This year of 2025 is that time of transition. As we said, we'll change humanity. We'll bring that change. No religious leader, no king, no president can affect the work, which has already started for elevation of the STM this year).

(Those of you who understand the transmutation through energy, will still enjoy transportation through the physicality, because each one has a different pleasure. And once you'll be able to mix these two together, and be aware of both at the same time, it's the time of the maturity to meet the Daughter of Mitra. Then you'll be mature to join the Universal Community and you will not think that every object is something for you to eat. And you will not think that everything is your enemy, or you have to do something with it. In the U we each keep our distance, because in keeping distance, we respect each other's life).

(The combination of the fields of the Universe interacting with the STM, STP, and P of the man, and through interacting with the Universal Community, will create a new dimension of understanding for the STM. Then Man will learn how to change, how to be, and how to exist in both dimensions).

(We are ready to take that step and ready to educate the Man across the (whole planet and not just nations). In this process everything is set for Man to bring the change, to accept the change, and to bring the change through understanding the fields of the energies of the Universe, and not through the greed of the Man. It doesn't matter if it's knowledge, wealth, or whatever it could be. I hope you have understood today's teaching and what I have brought you (in terms) of knowledge. This time it was you who created this knowledge (?? through the Flight Session) and not us. The yellow and white (lines are) the D of your physicality, and the blue line is the D of your Energy, and both have to coexist. Once you understand this, you have moved to the next level of maturity of the Man and the knowledge of the Creation).

(The yellow line is the interaction between the STM, STP, and P of the Man. The green is a total physicality, because it's taken over, and the blue is where the STM sits, with no physicality. All three can exist and coexist, and it's the decision of this emotion of the Man that decides which one manifests itself. When the emotion decides that it has had enough (life and is ready to die, we call it death and leave the P. It's because the emotion is satisfied that it has matured and completed the journey. Everyday millions die by accident. But are any of them really an accident? Or was there a reason for that Soul to be in that position for it to take its trip? (?? Our P can't decide when it will die). It's the Soul that decides the end of itself. (If it likes to die in a car accident, then it creates (the

conditions to be in that position). The Soul decides the way it wants to die and the physicality just follows it).

(Are there any accidents in the World of Creation? I taught this years ago, that the Soul of that plant creates itself for you to eat, that through its devotion to give to you, it allows your Soul to elevate to the next level. It's the plant that you eat that has decided the path it will take. It's not your decision. It's like when you take a spoon of rice from a plate, and one grain falls on the floor, and the rest you put in your mouth. Was (that your decision, or was it an accident, or did that grain of rice decide to do it on its own? Because that grain of rice has become the feeder of the Soul of the ?? worm, or something else for the next generation (to exist). (?? That grain of rice wanted to feed something else, so the bird came and ate it from your hand. Now you understand how the Man has changed everything for him to think he's in control and in charge of his life. He wants to think he is the best, when in fact, he is just one actor in a game of the actresses of the Universe).

(I hope you understood the teaching of today because this is about you, and not anything else. This is about your fields. This is you KS who sat in last Fridays sessions. It was not made by us. You were the creator of (these graphs, and we were only the observers). (?? We took a picture of your Soul and what its energy field were doing. (One of those dots on the graph belongs to you. It's interesting how collectively you all had the same pattern of the Soul).

(In February, March, and April sessions we'll dictate where we want a Soul to go and then we'll show you the graph. One in the will of the Man, and the other in the will of the Creator. It's not controlling the mind, it's elevating the STM, and the Soul will decide the position, the time and place. I hope I brought you a lot of joy with the teaching of today. And I hope (I helped you not to be afraid of being uncomfortable (in new situations) and to know what you are capable of, and (what you can do in the future)).

End of Quick Index Part 1 - 574 KSW

(In February, March and April sessions we want to put you through transmutation, and the Cycle of Communication in Transmutation Time. (We'll set it so you can understand the position of the STP and STM, and transmutation of energies. It's you who decides to go shopping, or wherever your Soul wants to go and nobody else. (You have to learn how to handle the energy fields of the STM and STP (through your thoughts and emotions). The energy of life within you will be controlled by you).

(Once people start understanding how to (live and control their lives then there will be no Jesus (as intermediary, because your own Soul will be in charge of you. And this will be the biggest problem for religious leaders (as they will lose their power over you). Like in the graph, maybe one of those dots is the connection to the Creator. Then do you need somebody else as an intermediary to tell you what to do? You will be closer to (the Source then they could ever be)).

Q: Can you tell us more about this phenomenon that happens when we are sleeping and feel that we cannot breathe. I just touch the scalp and I go back to breathing again. It's really a panicking situation. Does something like this happen during the transmutation, or like when a baby is born and cannot breathe and doctor slaps their butt to stimulate to breathe again?

K- (In the medical world they call it, insomnia. There are maybe 10 to 20 different reasons for not breathing. (In sleep one half of the body is inactive and repairing, but the other half of the brain is active and it comes to help bring you back. It's like when you are asleep and suddenly the door bangs and you wake up. You need a little time to find out where you are. In fact, that loud noise is like when you touch your scalp. There are different reasons for stopping to breath some say the Uvula dangling in the back of your throat blocks the windpipe, or if you have too much fat on your neck the muscle tissue blocks it, or the roof of your mouth loosens like when you snore but it blocks the pipe. There are different reasons psychologically or physically that our breathing cycle goes through an emotional trap, (where it gets stuck in the system and cannot go to the next phase)).

(This is why we have two halves (of the brain, where one half is in charge (?? and can wake up the other half and bring it back to breathing. The touching or the panic is the physical reaction and it's very common especially in people who are overweight, or extremely tired. There is a name for when you jump out of sleep).

(A lot of people with insomnia have this problem, they wake up panicked and can't go back to sleep because they are afraid it will happen again and they become insomniacs. It's a fear of death and they stay awake all the time, and then it repeats itself. It usually comes with aging. The body forgets it has a physical part that needs to operate).

(Slapping the baby to get it to breath when it's born is a different phenomenon. That's a conversion from a world of liquid into the world of air or gas. ?? It's to switch over the emotion).

Q: To release the plasma fields do we need to create a weakened environment inside the reactor? How do we achieve this?

K- (There are a number of ways to create another fields in the system and it can be done remotely from outside. We see this in the galaxies and their positioning. It's very technical and you have to know what you are doing. You have to create a physical obstruction (in) the field. It needs full knowledge of the creation of Black Holes and magnetic (M) field absorption. (You cannot weaken (yourself unless you can create a condition that you can absorb, so that the new environment gives to you). We do this in our systems (where we absorb energy)).

(Tesla understood this fully. Centuries ago those who built the churches (of Europe) understood this, but then Vatican deliberately chose to forget this art. The mosques don't have this, it's a Western knowledge, but it didn't come through Christianity, it came

through (a more ancient understanding of Creation and absorbing energy, and how to reduce the energy, so that it creates a condition of absorption)).

(You cannot take to weaken, you have to create a condition to be given, and in that weakness it creates a turbulence. If you understand the work of hurricanes and how the center (or eye of the hurricane) works. (It's about changing the M fields, because at the end of every eye of a hurricane sits a field. (We say the lightening hits the ground, but in fact, ?? lower field energies are created in the hurricane and it ?? pulls the energy in from the ground. It's about understanding the science of it)).

(The lightening and thunder is created from Earth and flow into the cloud, and not from the cloud down. It's done through the changes in the M fields through other interactions. In a way, the Earth sets a trap, and it sends a seed out, and then the (lightening) is the one that comes to grab the trap. It's because the Earth has a dynamic M field and in a certain position and condition that leads to massive creation of dynamic, lower and higher field interactions. It's very easy when you understand how energy works. We create that condition inside us and we can do it also inside the system. But we have to understand the properties and interaction of the fields. The combination of materials, Gans's, fields, can give us this same position).

(The rule is that you can't take. You have to create a condition to be given and then the system works. In a boiling kettle of water you see those bubbles, you have to create those bubbles by M fields, and not by heat. Then you'll be able to create that condition. You have to understand how those bubbles are created through interaction of the fields. It cannot be forced on the fields).

Q: I was lying under a pyramid structure with a MaGrav in the room, and I lifted.

K- (It's quite possible. It depends how you make your pyramid, and your understanding of it, or by accident you could reach that point. We did this with Jon a few times. But you have to understand how to do it).

Q: Is the Cosmic Ray Ball specifically for the transmutation, or has it many uses? And can a person use it to balance others, or (should it only be used by one person?)

K- (We advise you to use it for one person only. You can use it in combination with two Balls and it will have huge applications and implications. It depends how you use its field interactions and how and where you position it. It's like when you hold a magnet in your hands, you need to have another metal to feel its fields, otherwise you don't feel anything. These CR Balls are plasmatic magnets and they are connected, especially when you put two of them together. (For some people we put a CR Ball on each side of the headphones, or in the hand units)).

(As I showed you with the graphs that you are connected to everything. Even the mobile phones are connected to a center and then around the world. We can physically, graphically, dimensionally show it with the energy (that when you have these ?? Balls in

your hands you are connected to everything). You will see your aura and the D of fields changes. It's in a very subtle (way). If you receive a huge amount of energy, then (you have to let go (of energies too). (These are tuned in a way to fit into the emotions of the Man. If you are not on the same bandwidth, try switching the Balls from one hand to the other. Or leave the Balls in two different places, and then pick them up again. (You can do this when you are not able to match their fields, either they're too much or too little, in relation to what you need them to be. When you match the fields the magic touches. There are many uses for the CR Balls).

(The Soul decides how it wants to die whether in a car accident, bombing, or in bed. A KS asked what was the purpose of it. Mr. Keshe replied, the Souls have their purpose and it's their decision. As we showed you on the graphs, they have a connection, and there is a pattern to complete their cycle).

Q: Is it something to do with the Creator?

K- No, it's to do with the balance of the fields of the Creation. In a way, the position of our Soul is not fixed at the point of birth. It's an amalgamation of how we interact (with other things) to reach the point of maturity. Why? I have a very cynical point of view, but (there is a truth about it). Humanity has created and committed so much crime especially in the recent past, that it takes longer to fill his "cup," therefore the Man has to live longer).

(They tell us all about the life span increasing because of the blah, blah or whatever, but I don't look at it that way. I look at the energy level. We do so many wrong things, that to balance the energy to be ready to leave Earth takes longer. It doesn't mean that when someone dies as a child they are pure or whatever. One of the reasons that Man is extending his life is because he hasn't done enough saving his energy for his Soul's elevation. When we (lie), steal, and commit crimes then we are really emptying our own cup and we have to fill it (back up again). Maybe we fill it during the time we are idle, and that's why we become old, or spend 30 years bedridden so we can't do any harm to others. The Soul has to gather enough energy to be able to leave from here. This is not far from the truth, if you understand how the system works).

Q: (What has gone wrong that we (only look at the P part of life and not the positive things of the Soul)?

K- (Nothing has gone wrong, we just look at the 'wrong end of the stick.' It's our expectation and wanting).

(Mr. Keshe took this opportunity to say that something horrendous happened to the KF in the past 24 hours. It was something they could not even imagine possible. You'll have to decide for yourself what he is talking about. He said, 10 years ago it would have been a disaster but today the KF has grown enough that we can handle it. And he even looks at it as a blessing. I don't think it is a current crisis that we have to worry about. But the hint is that maybe they discovered somebody inside the KF who planned Mr. Keshe's arrest in

Toronto Canada in 2010. (We can be pretty sure the ex-wife was involved but maybe there were others. He obviously doesn't want us to know any more about it. The main point is that what looks like a disaster on the outside can really be something to make us progress in living the life of the Soul)).

Q: In the 442nd KSW you discussed about the angle isotopes and radiation. We were thinking about the correlation between the radiation produced in our bodies and the angles associated with the lymph nodes and glands. In another teaching you mentioned that our tangibility exists due to the thymus gland in our chest and the lymph nodes. My question is, how can we connect the concepts of angles, lymph nodes, radiation, and C13 in the middle layer of the skin? Specifically, how can we control the tangibility of our body using this knowledge?

K- (Look at all the twists and turns and shapes that form the structure of the brain, and then look at the lymph nodes, and the thalamus and thymus, they are like strings. They look like bits of sausage strung together and packed into one place. This kind of packing structure as fields are a dynamic plasma that create certain interactions, which create certain conditions for certain fields. One of those 'certain' fields is the spectrum of C13 strength field plasma. When we speak about C13 it's not matter state but a field level energy, and it's a dynamic plasma. Your lymph creates a field strength that matches that C13. That's all it does. (When (it's tapped in that system then) it depends on which one is stronger, weaker, and receives energy)).

(The thymus and thalamus are like cutting rooms, especially with the radiation. They're sharp and cut like a laser the fields of the plasma of a material which is to be converted into bone marrow, white blood cells, and the lymph itself. (It's like having a bunch of dough and you cut it to certain sizes and shapes. But they're all about the same shape. The structure of the lymph will decide if the dough is going to be croissant, bread, or whatever. (?? The structure of the thalamus and thymus are directly connected field-wise to the cutting system. ?? Depending on what you need for the emotions or the physical part of the body, they will cut the 'dough' to the right size. That size has a specific link to certain lymph and when it gets that lymph, the lymph decides if it is going to be a cell for the tip of the finger, skin on the shoulder, or wherever. The lymph can modify it and this is (done in the lymph nodes) under your arm. The lymph also has to decide depending on the kind of materials that come to it, and how it will make the necessary changes. This is why we have lymph flow, drainage and everything else. (One part cuts and another allocates) This is the characteristics of the radiation and positioning. It needs a lot of understanding to be able to manipulate it the right way)).

Q: From the last teaching and before you taught how we can distinguish what kind of radiation we are getting by the distance gap between the neutrons. Because at that time we were working with the Gans's, and we could see the difference in the creation of the amino acids (AA). Can that give some clues about how we distinguish what kind of radiation we have?

K- Partially, yes. Maybe 30% of it. There are other factors involved in this.

(The Universe is full of radiation. To manifest the radiation physically you have to have the Inertia of that position (and how it interacts with its environment), which is the AA. The AA on the surface of the Gans is dictated by the Inertia of the liquid inside it. And not all the liquid inside of the Gans's are the same. So you produce different AA).

(Part of the creation of the Inertia of the liquid you create when you make Gans is not the same at the beginning as compared to what you have at the end of the process. They have different Inertia, because of many factors. Mr. Keshe shows a picture of some AA with a blue color he created. He said, we have never seen this color of AA before. This color comes from the Inertia inside it. It's the amino acid of Nitrogen (N). Small elements. This is why our planet is blue. We have 65% N in the upper atmosphere. Why do our clouds have different colors? Why do we get rainbows? It's because of the Inertia. You've never seen this building up N Gans's. It's very difficult (to make). (This is the typical structure of the AA of N)).

Q: Mr. Keshe, I have the same color with an alloy.

K- (What have you created with the alloy? Nitrogen? Understand the shape of it. One day scientists will break through the layer of this ?? and see different colors. It's like different clouds in different levels on the surface of the water. It's like when you (fly through) the clouds. If you break into (this) it will give you a lot of understanding in how to produce materials, convert them, and everything else. Because this is in the plasma condition, it's not in the matter state condition, even though we see it in the matter condition. (?? It's like we see the P of the man, which is in the Gans state)).

(Next time you fly through the clouds try to look at how the M fields (are structured) and interact with the Earth's M fields. In the plasmatic condition it gives it this altitude, behavior, and this structure. Then you can understand how hurricanes and typhoons (work). How they follow a certain path because of the M fields of the Earth and the position in respect to the fields absorbed from the Sun and Moon. They create a flow that comes in certain ways through the fields. Typhoons do not come from the weather of this planet, they come from the interaction of the fields of the Sun and Earth. (The Typhoon) is in between their fields. (?? It's because it's in the liquid state, the Oxygen is the M field, the magnet of the thing, so it interacts as part of the water droplets or whatever). Through these two structures you get the hurricanes and the rest of it. If you change the structure of the fields in the Southern Hemisphere at a certain point, then you'll never have hurricanes. If you can put three ships in a specific condition that changes the M fields, then you'll never have the hurricanes).

(In 2023 we created this in North China. The Military took the pictures. It's very easy to manipulate the atmosphere through plasmatic field and you don't need that much. I gave a few KS the opportunity to develop this, but they got lost in the process (and couldn't create it). (You have to create a tiny little spot. In the seed of any atom is a Black Hole. There is always one there. It's so tiny, but it keeps the atom going for hundreds of years.

It's the same with the structure of creating Black Holes and affecting the Oxygen level of the environment. But you have to know what you are doing).

(We did this 3 times. The last time we did it in a specific way and created havoc in Beijing. You can look up the weather reports for Beijing in 2023. There was a lot of destruction just within the city. They told me to switch off the machine and then it stopped. We created a Black Hole in the center. We did the same thing a few weeks before in North China. And two months before in north of Beijing. All 3 incidents could not be coincidental, and we planned them all. We interfered with the M field of the magnets of the gaseous plasma condition, which is the Oxygen. There is a specific way to do it).

Q: (A KS talks about her experience of feeling she did not belong to her parents). Is there an explanation for these feelings?

K- (I think a lot of us have these feelings and thoughts about not belonging to our parents. Sometimes people find out that the parents are not their real parents. Nowadays you can check the DNA. And if both of your parents have type O blood, then they only give a type O to their children. So if your blood is not type O it could be they are not your parents).

Q: Several of our organs were created and developed after the transmutation of the Soul of the first human ancestors to Earth, would the transmutation of these organs, which are not part of the original human matrix, be more difficult because of their totally earthly nature? If so, could you transmute without them to make the process easier? Could the non-use of these organs, considering that the KS learn to capture the other 20% of energy from the Cosmic environment, atrophy its functioning? So could the non-use of these organs atrophy its functioning? How to activate and readapt these organs to be used again?

K- (There is no way you can use these organs because we have evolved beyond their need. We have 3 or 4 of these type of organs in us like the tonsils, appendix, and some others. And I'm sure our body is producing new ones for the next evolutionary step. There is nothing you can do because they are part of us. We have to take the body as a whole. Even though they are not needed, they still have some functionality. They are doing something because they get energy. They still do things. When they tell us these organs have no function we have to take it with a 'pinch of salt.')

(What they used to call "junk" DNA they are finding out now has a purpose. Somebody made up these terms and they became popular and later we see there is no truth in it. It's just a lack of knowledge. Ignorance creates these things and then other people follow it. (He goes on to talk about people who believe in a flat Earth. They won a case in court against the people who say the Earth is spherical. Is the Earth actually flat or is it round? Do we see a flat Sun? They have a very good argument which managed to get the judges on their side. They said man has never been to the Space, and the Americans cheated about landing on the Moon. Once a rocket goes higher than what we can see they fall

back into the ocean and nobody sees it. They say, Man has never been above the atmosphere. But then what about the Chinese and their unmanned ships to the Moon? What about the Indians, Israelis, and others who say they went to the moon with unmanned rockets? It's very interesting how these hypocrisies come up with different things because they don't have an answer to something. (In KF we try to be correct (?? in what we teach). We know the Earth is not circular even though show it as a circle. It actually has a bit of a bulge in the middle because of the pressure of the plasma. The Earth is the shape of a plasma but it's three-dimensional. It's very much like the galaxy. Our galaxy is not a spherical. ?? It's like the yoke of an egg. It's the same with our planet. That's why it has a bigger diameter in the center. Just take these things with a 'pinch of salt.' (Mr. Keshe never gave a definitive answer about whether the Earth is flat)).

Q: (The first black man who went into the Linz system asks Mr. Keshe a question. He had an occasion to transmute and in this experience he could stay in contact with himself. This awareness didn't come across as having an emotional energy. Can you give us some insight. We talk often about the World of Creation, but what's happening in the world of the un-manifested or the uncreated?)

K- (Everything is created because everything is (within the plasma that created it). It's just a matter where it manifests itself. Everything that leads to a creation and manifestation is already in the 'dough.' It's not coming from somewhere else. It's just how it'll manifest itself in a certain given position. In terms of the known and unknown, the unknown is there but we don't understand the knowledge of it. (Whatever is outside or inside is all positioned respectively. Because whatever is going to be, or manifest itself today, or in a million years, all the fields to create it are already here). It's how they interact in the future with each other, (that will create that position). And in that process it could gain intelligence, or in a way there is an intelligent life around us. We are not alone. There's a much bigger structure of intelligence around us which goes through us as part of the creation of the solar system and U. And so known or unknown is dependent on us. There's nothing outside which we do not know. But as we don't see it, we are not aware of it, we can call it unknown but it's actually known. In the bigger (picture of Creation everything is already in the pot)).

Q: Is that energy as well. or something else?

K- Everything. (It depends on what stage and what the state you are in. There is nothing hidden. It's just that we don't see it according to our own understanding, intelligence, and vision. Life is very interesting. It's like when you have an old man and a young man together in a park and you ask them to see the bird in the bush. The old man's vision has diminished over the years so he can't see very well. And the young man says to him, do you see the bird in the bush? But the old man can't see it. It depends on the strength of the vision on whether or not he can see it. (?? It's the same with the man's ability to understand the Knowledge of Creator, but instead of physical vision, it depends on our ability to comprehend. Like with the bird they are both looking at the same thing but one can see and the other cannot. We cloud ourselves with more and more problems, and our

vision, and our understanding gets worse and worse and we become more prejudiced about things)).

Q: Is there shortcut to transmute for lazy people. You once said human being are the only ones who have direct connection with God.

K- Who said that?

Q: You said that.

K- Yes.

Q: We are the only ones who have this capacity of directly connecting to God.

K- Yes, but we are not the only race (in the Creation).

Q: (There are many different ways culturally, religiously. or whatever to connect to the Soul of the Creator, which is the lowest field. If we (become the) lowest, humblest field, then are we in transmutation at that moment?)

K- (Yes, we are. But it has to be very clear, we are at all times in transmutation. Our Soul never sleeps. Sleeping is a pattern of the P of the Man. Our Soul is always in motion and in that motion's energy we call it transmutation. It's always on the move, even when we're awake or asleep, even when we have just been born and when we die. (?? It's (always) the STM). It is aware of and connected in every dimension, somewhere, somehow, (all the way back to the origin)). Like everything else does. But being aware of its existence, being aware of.

(In the Universal Community they don't have this question about the Creation and the Creator, or what we call God. They don't understand it and it doesn't exist in the vocabulary of the Universe. Man soon will understand. Because the Universal Community considers themselves as already part of the same structure. It's the Man who has made up this thing about the Creator and God. (This comes through the weaknesses of his nature, his DNA, and everything else). Nowhere in the U is there a belief in God, because they already understand that we all are a part of It. We are in It. We are the structure of It. (This all came about when the Man started making and believing in statues)).

(Mr. Keshe goes on to tell about how everybody says, "Amen," but they don't know it originates from a statue. If you look it up there is a statue to an Egyptian god named Amen-Ra, or Amun-Ra who is depicted with a ram's head. They say he is the god of Creation, Sun, and air. It's very interesting and Mr. Keshe continues that Amen was the greatest statue and it is said that, always at the end of something the people will say his name. It's very funny because if you ask someone why they say, Amen, they won't be able to tell you, or they'll repeat what the clergy told them to say. Humans cannot give up the statue worship and find the God within themselves. He said, (somehow) the Amen

made its way into the religious world and we still confirm that it's the last and the strongest. Actually, (by saying this) we are worshipping a statue, a god created by Man. This belief has been with the Man right across millennia. (And in the present time we have changed these names from Amen to Elvis Presley, John Lennon, and all the others. These are the short-term gods and everything else they do with it). Where the old statues are for the old gods, which (transferred) from the statue to (a reality in Man's mind and they kept their names. If you look at the names used in all the religious beliefs, they all can be traced back to a statue. (Because Man feels weak he has to believe in something outside himself). This kind of thing doesn't exist in the Universe, (because they understand reality))).

(The KS said that it depends on the intention. And he answered, it all goes back to who makes money out of it). (God is nameless, blind, God has no name, it's just understanding It's beauty). Where did the word God come from? Was it another statue?

Q: That's what you are here, to tell us the new way.

K- It's for Man to find out.

Q: For you to teach us.

K- (All these Holy Books were written by the Man himself to influence others so he could get what he wanted. (They put the names of the religions to the Books, and the ones who understood, they hid the knowledge in mysticism)).

(The KS said when she prays she feels the presence. Mr. Keshe replied, that's because it is always there).

(We have to understand about reality. If you have a physical dimension, then you also have an Energy dimension, what we call, the Soul. (?? The Soul side never changes, hardly ever changes. It's ?? an amalgamation of fields. Like if you break a magnet into pieces, (each piece) still has the same field. (That part didn't get broken when you broke the magnet). We have to live one life but understand both existences of the Soul and P. When we understand this we reach the maturity. This is the most difficult part. (For a man who owns a bus company and wears a uniform at work. It's the same man when he wears his house clothes or his bus uniform, nothing has changed. It's us who sees the father or the boss. It's our point of observation as an observer of the time, place, and position. But the man still remains the man)).

(A Universal Council Member invited everyone to their Intention daily at 21 hours CET. It's for achieving peace and unifying all Souls. Even if you cannot attend please be aware and add your intention at that time).

(It is beautiful what you've done. I think the war of religions are over. This year of 2025 will be the first time Mankind has a chance to start a peaceful planet. It's the first time that religious wars will come to an end. We saw the nationalistic wars coming to an end.

Trump has created that condition and looking from inside it is the next step in the whole structure. In his inauguration address he stated that we have no enemies. The next part is that not only do we stop making weapons, but we have to start making tools of peace with the new technology (T) and then we'll see that change. (Because the scientists of weapons now have to be kept busy with Space development. The ground for it is here)).

(The two major religious conflicts are between the Vatican and the Church of Russia, and between the Islamic and Jewish world. The war crimes of Netanyahu will come to such a point that humanity will be ready to accept a new T and with it will come the change. Because they'll be so busy with the T there will be no time for wars. It won't happen overnight and there is a lot of work to be done).

(When you give from your Soul to elevate the world leaders so they get enlightened that the tools of peace will better serve humanity than the tools of war. Specifically pray that our religious leaders will open their eyes and they put their banners of separation in the name of the Creator away. (?? When the Universal Council requests us to meet daily for the Intention of peace, it means something is going to happen and these prayers are needed. It's the same way we brought an end to the (nationalistic) wars. Now the religious wars will come into an end. This needs our support to enlighten our leaders to a new knowledge, and that they leave the old knowledge behind. Now is the opportunity to develop technologies that makes the most advanced (weapons) technology of today obsolete).

(Recently, KF on its own did a test of passing a plasma field through a Microchip at a certain strength and certain way, the chip remains intact, but doesn't do its normal function. Since, all the latest weapon's technologies have Microchip they become inoperable. And if the governments decide to mount these systems on satellites, then through the ?? emotions and information the weapons will not work. Then we have achieved our peace and we are seeing this process. We demonstrated this for the first time last week, and it brought me a lot of joy. This is the proof of concept. (When we took the Microchip out, there was no sign of burning. Even your AI is driven by Microchips will become useless)).

(?? Our leaders in the next few months will change and bring an end to the war of religions. (This war has been running these past 20 years on the back of Netanyahu who is the main person pushing for it). People used to live there for centuries in peace. When there is no Netanyahu to push the war, then there will be ?? no Ayatollahs to defend others. By one move of peace, all these people will lose their importance and they'll become just a name. It's the same with Ukraine and Russia, they'll just become a name, and will be gone. Because the belief of the war changes, and it's the most beautiful time to bring).

(The reason we were late for today's workshop was part of this work. We have to sit with governments and ambassadors enlightening them as to what we need to do. Many KS are working day and night in the background. Now it's time to deliver technologies that they can see them working).

(Today we tested the Oasis system and it delivers the energy, gas, and water. It's a beautiful achievement and we have done it. The Oasis system is now in the hands of the Man. We have to be wise in how we put it out so that it brings the change. The change does not have to come by changing the government in Tehran, Washington, or wherever. It will come by putting the T in the hands of the Africans, and third world nations. They will see the benefit of it and pick it up. Then those who think they are in power will have no power, because there is no need for their power. The condition (won't come in by going to the strong. It will come by going to the weak, and making them understand the beauty they have and then we'll go to the next step. Go to the third world nations, to the poor people of the Amazons in Brazil)).

(He has hidden something in the Oasis system that when you use it you will create the condition for Man to elevate his Souls and be able to become Man of Universe, and transmute and transform. This Oasis is not anymore for Man's physicality. It's Universal, and it's in our hand and we are not afraid to talk about it or to do it. (In the past few months) our team has matured to the knowledge of it).

(It's not just about energy, gas and water, the structure of it is to give energy and fields, which takes Man through the D of the Soul, and the P. One day I'll explain the purpose of it, which is not to create gas to burn, but to create the fields of the plasmas, which allows Man to travel the span of the U. It was achieved early this afternoon. This will bring peace, and we need to elevate the Soul of the Earth, and the world leaders. The Universal Council (UC) connects to the Soul of us. Understand that the time has come, because the UC has made this call to us, and now we'll respond to it).

(I hope we'll see the beautiful time of peace and change, irrespective of the world religious leaders, government leaders, and the rest. Man has never had the opportunity as like what he has this year to establish peace (across the planet). But we'll have to see).

Q: When are we going to upload all of your transcripts into an AI, so we can ask it questions whenever we want. We are ready to do this with your permission.

K- (Yes, but do you think this AI has the essence of the knowledge that it will give you the right answer? I listened to one of these AI (answers and it makes the mistake to talk about nickel instead of copper).

(I tried to explain this to you before, that this AI does not have a Soul to answer you correctly about the plasma knowledge. (If you listen to it and it gives you the wrong answer then this will create bigger problems and more confusion). Mr. Keshe gives in and says, but if you are happy with listening to fairy tales, then you're quite welcome).

(A KS seems to think that sometimes the AI gives great answer about the T. He is contradicting what Mr. Keshe was just trying to explain. Which was that since AI doesn't have a Soul it relies on the computer programmers and the answers are random. When it has a Soul then the answers will be from the Knowledge of the Creation).

End of Quick Index - 574 KSW - January 23, 2025

KEY-PHRASES:

SUMMARY:

ENGLISH TRANSCRIPTION

(:12)

K- Yes. Thank you very much. Good morning, good day to you, or good afternoon, or good day to you, as usual, wherever and whenever you listen to this series of Knowledge Seekers from Keshe Foundation Spaceship Institute. We welcome you back, and as usual we try to share more knowledge and somehow understand more about ourselves.

What is important is, many of you look at these Friday Sessions with us as something that a few Knowledge Seekers (KS) do. And these few Knowledge Seekers brings us a lot of knowledge. And the system, we monitor the way they transfer their energies, the way they transmute their energies. That brings us huge amount of knowledge, vast amount of knowledge, in how us, even as human beings, are controlled. What we see in a very direct way, how for the first time our brain is structured. How we receive energy. Why do we receive energy from...

<< German translator interrupts. >> (:14)

K- ... So what it is, that we have to analyze how we receive energy, and how the energy is distributed. And how sometime overflow of energy pushes barriers in our understanding, in our emotion. We've seen the doctors with all the electronics of today, they tell us, this part of the brain is for this job, this part of the brain is for this job, this goes here, and nervous system takes you there. Now with this new Technology (T) we are looking at the energy which we receive. Different that the communication side of the brain which we consider. In the last Friday Session, we had some of the most amazing experiences we observed, that you as Knowledge Seekers have gone through. And it has opened up a huge Pandora Box of questions, understanding, and what is the next question for us.

I would like to share some pictures as we done before with you, to see how groups of Knowledge Seekers have managed to achieve some amazing, what we call, conditions, positions, and they achieved certain parameters, (:16) that it brings us to understand more the functionality of the brain. What this means is that, I share with you to understand, because it comes to part of the teaching which we have to, in a coming days and months, literally analyze. We have no choice. Because it seems and it works as it has done, and it will bring changes in our understanding of the totality of the work. And in how we understand our works. How energy is transferred in us.

One of the groups on las Friday has achieved, in a way, a full transmission, or transmutation you call it. And this group we now their behavior. And it brings us an amazing data for what these people do. If you look at this picture, and you monitor this area. This is about 2 minutes. And then it repeats itself in a very short term here. This area of the blue is, what I call, the panic time. When this all goes, you are aware of it, and then you all panic, physicality (P) takes over and then, no, it's ok, and you go back on. But what is interesting is to see this. How the Soul of the Man (STM), the energy of the man has, on the same time, overtaking the physicality and the Soul of the Physicality (STP). Which means, the Soul has transmuted, (:18) and it is taking the physical condition. And when we receive reports from some of the people who've been in this Session, confirm the correctness. They physically see themselves in a condition they see themselves as light.

And what is important for us in this research is to find out, in a way, where does this goes to. How far can we push the boundaries of the knowledge. And in the process we've seen amazing things, which explains why we as humans behave in a very, very strange way when it comes to our social behavior, to our addictions, to our emotions, and to many other things. I will bring you some pictures that you can see.

If you look here, we are dealing with the, what we call, energy from the Space, the Universe (U). Here we are looking at the energy of the STM. And here we are dealing with the physicality of the man. But what is interesting for us in this pattern, and we show you the pictures and pictures of it, that is very interesting. The physicality bypasses the Soul to feed, what we call, the energy of the Universe, the Universal Energy bypasses the Soul to receive, or to give energy, and then it feeds back to the Soul. Which goes back to what we said, we take 80% of our energy from our environment. (:20) We don't need even to go through the Soul. And this repeats itself in a way, in another picture. This is every two or four minutes, as we take pictures, and we see the continuation of the same thing.

But what is interesting is this picture. This picture is opposite to what we had before. The energy comes from the left side of the body of the man, the left side of the Soul. What is in the space of us. It comes to what we call, the Soul, interacts and stays with the Soul. Soul does not share anything from this with the physicality, the way we saw in the past. Which means, I hold on to what I have. Where when we saw the energy coming from the other side, which is on the right side, it feeds to the left side, which is part of the structure of the emotion of the man, and feeds it. So, in a way, one side of our brain feeds our Soul, one side of the brain through Soul feeds our physicality with the emotion, with understanding.

But, what is interesting is that, Soul does not share with the physicality, even... if you remember last time, or the time before, when we saw here, we had three layers like a MaGravs. (:22) Here, the third MaGrav, the third dimension of the energy actually sits with the Universal Energy. This is when we feed and at certain points we change, and this, we've seen this on the graph, we've seen this on the observation of the team. But,

interesting point for us is this happens, this condition. Now we know exactly when it happens.

For this group we shut down them sharing to us. We stopped, if you've been in the Sessions, we can control if you can speak, you cannot speak, or we block ourselves of that you can't receive, we see what we receive from you. In this condition this group has just received energy. They were blocked from giving, sharing. Where in the other condition as we saw, here the body shares, the microphones are open, both sides. This explains a lot of things. In a way even our death, end of physical life is dictated by the energy we receive from inside. Because if you look at this side, I am not sharing, I am not supplying. (:24) I am holding. I increase the elevation of the STM. So, I take energy, because our emotion goes through the right side of the brain to the left side of the body. That is where our emotion sits, that is where our heart that it brings that condition of emotion. Position of the heart is one of the most criteria in transfer of emotion.

Then we come to understand more about dimension of physicality. If you look in another structure, how even the body transfer energy through the Soul, it sits within the structure of the Soul. In a way if you look at, it's an arrow through the system. Then it comes to the point of when we are asleep, is the left side of the brain on the, what I call, recovery condition, or closed that the Soul can travel. And do we get that information from it, is what is from outside. And then, would it be the right side of the brain, when we dream, is where it ?? stuck in the Soul and it is a physical dream. It is to do between the STP and the physicality of the man. And is this the first phase of the sleep, or second phase of the sleep? Or does it happen in the third quarter, or in the fourth quarter? (:26) This has, especially last week, test has opened a new 'bag of worms' for research and development and understanding.

But what comes out of this is the response of the people, who've been through the Session. We see people of the same group tells us the same thing. People of the group which we play different way with, or we feed different way with they tell us the same thing. But it is exclusivity of that group. They lost all their pains, they have no connection with the loss, with the pain. It's as it did not exist. It does not exist. And especially when we look at the people in this group, there is no intention to eat. We collect data, we collect graphs, we collect numbers during the tests. And then when it comes from the feedback, we see how it fits, why we see these figures, why we see this behavior, why people talk in each group more or less the same. And strange enough this group is the Chinese group. This group is the American group, or is this group the European group? (:28) If you are clever, if you understand it, if you've been through the system, if you felt the transmutation, you actually ended up somewhere, you tangibly feel something. Then it means you are getting ready for the transmutation. You don't need connection to the system from the Center. And many of you in these groups are becoming part of. You're traveling through the light, you see the light of your Soul. We have nothing to do with it, it happens two weeks later, three weeks later, it happens the day after, it is not when you are connected. Because you learned how to connect.

But the most crucial part of the trial or understanding is, how the Soul behaves. You can see. If I can bring these two (graphs) together. This is when your left side, which we have seen all the time, we always had, and this is when we blocked from us, we are not feeding. We don't let you tell us how you feel, we want to give you the Creator dimension (D). And you see what happens. How the fields stack so perfectly. And how they end there is no connection. Here you see there is a connection with the physicality. Here there isn't. Because we share the emotion, or the physical side. And the shape of this, you look, changes. There is a dimension of change. If you look in this look in this part, they change. Look at here. (:30) If I take this off and you bring back in. You see the... And then I go to the next picture, and you can see the change. If I can slightly move it, it has a shape like this. And what is interesting is how it bypasses the Soul.

What this brings us is not what is in the screen. What is interesting to us is, in the matter of Space Technology and transmutation is this. And where does this go? Where would this little bright light here (dots above the circle) would take me, is it (to) your grandmother, or grandfather? Or is this dot here the Soul of the Mars. If you remember in the teachings of recent past, couple of weeks, I spoke about line, ray of magnet. When we reach that knowledge, how to choose, how to measure the ray of a plasma. That little metal when you put an iron on top of the magnet and you see lines, the field strength of that line, that line connects you to the dimension of every single spot. Every single spot you see on this screen, (:32) is an end connection to another entity. It is not just a dot of blue light.

When we look at, what we call, these here, these every single dot is a cell of your Soul, it is a cell of your brain which receive the energy. And every dot you see at this end is one of the cells of your body, which receives the energy. It comes to the point where, I'll show in the future, in the near future, as this Technology builds up. We do more research and the others do more research, is to access the point of death, at this point. Or, from this point in the womb of the mother decides if the child has the Soul, we have a being. There is no discussion anymore. When is the fetus alive, when does he have a Soul? You monitor. The way we do ultrasonic wave, to confirm the existence and the shape of the child in the womb of the mother. In the coming time, through understanding this technology, we can confirm the Soul of the child. Does this fetus has created a Soul? That there is no discussion, there is a time for anything else, or whatever.

And the most important thing is, that do we as the race, in understanding it, be able to place inputs into this Soul, into this environment, (:34) that we elevate the Soul, that at birth does not kill, does not destroy, has reached the elevation of the maturity in the womb of the mother. These few dots, if you were a scientist like me, has a huge application, implication, and a lot of things, that the future of the man will depend on. We see how a child has a physical disabilities in the womb of the mother, which can lead to problems at birth. How do we elevate the Soul to correct? How do we need to elevate the Soul of the mother, to change the environment of the womb, that changes the Soul of the child? The science of today interferes physically. We need injections, we need operations. The scientists of the future interact with the STM, and with that change of

Soul, will change the man. This is the history of the 'Children of the Mitra.' This is what we, as humans, will see.

What happens in the coming time, I'm sure, as I'm so curious, and I'm so adventurous, in a very near time, we will test the existence of two Souls. In a way, the Soul of the mother, and the Soul of the fetus. (:36) Would we get this? In the other hand, in the near future, as we are on track, we're working in the evolution, and science and technology comes, is what happened when we put two 'Beautiful People' in one body. What would you see? And is it schizophrenic, you call it, or what I call Beautiful People? Or is it the psychological problem? Then we see the two Souls in one body, sharing themselves in the dimension of physicality to one.

The way we are going, and the way Keshe Foundation will evolve in the coming months and years, a lot of mysteries, a lot of things which you never understood in the dimension of physicality, will be answered through the energy field forces of the STM, and the Creator. We will have an answer to where this dot is, what is its function, and why is my Soul connected to it, that I see the other end? What is interesting, when you see the dynamic graph, it's not like this. The dynamic graph is, in a way, moves, is it has a motion, and we follow it, how it is, and where it goes, then we see the real characteristics of the Soul. Would it come the time that, like today, when you are born, (:38) we take a shape (graph) at the point of your, what I call, perfection as a child, of your Soul, and its behavior? And in a few years time, when you're sick, or something happens, we see the shape (graph) of the Soul has changed slightly, in a different way. Would we be able to change it, that the Soul goes back to its normal position, and we don't see the disease, which one is supposed to have? Or, in a way, we create a Blueprint, that every few weeks, every few months, when we go through the system, we refresh the Blueprint.

No man can kill, no man can destroy, no man has the greed for possession of physicality's. Now, you can see the future of mankind, through the dimension of the Creation and the Creator, and not in the bricks, mortar, cars, food, and the physicality of the Man. I'm sure, in the coming time, the way we want a perfect body, we do operations to have the perfect cheek, and perfect hair, and everything else, our future children will go through the process, that everything is perfect, that they, as the children of the Man, become perfect. But, in a way, go back to Keshe Foundation, and go back on the website of the Keshe Foundation, and we put the contracts with you, that twice a year, you go on the system, and for your health, and your wealth, and your Wellness, or whatever you want to call it, (:40) this is what we do. Now, I can explain to you, after two years, putting those contracts up, and you people have taken, what it means. We don't fix your physicality, you fix your energy balance field, what we call, your Souls, and interaction, with yourself and the environment. Correction. This new technologies, these new understanding of the energy fields of the Man, in respect to his Universe, to his environment, and how we react, will bring changes to us. We became, become trained to observe and understand this. I don't need to sit you in front of me, and say, "Have you eaten the grapes?" and you say, "No." I put the system on, the Soul tells me he's lying, he ate the grapes.

In so many ways, the new energy system, structures, which does not cut the physicality of the Man, but looks at the dimension of interaction of the fields of the Man, with himself, with his own physicality. And in a way, with his own space, and with his own Creator, will bring a new dimension to Man. I am the Man of the God, I am holy, oh my God, if you are holy, 'and goalie.' (:42) You're a thief, you're a murderer, you hide everything else, and the system can show. Why this is important? Because, this become part of us, as part of the transmutation. We see another field, which, in so many ways, let's say, is this field. Is it hostile to me? Can I give to it? Can I take from it, in a direct mode? Or, do I need to give to it? And in a way, which dot is in front of you?

Then, at the same time, in the same way, it's the highway. If you look in this structure, what is very interesting, is that, all these Souls go through one line, and they spread (a larger circle above in the graph). And all these come to a very tiny one, and they spread (to a smaller circle below). If you understand, in the future I'll explain, you can say, which part of the energy is for the head, which energy is for the stomach, and which of the energy where it's ?? gone to. The same as in time, we explain, is this the Soul of the grandmother, is this the Soul of whatever, but the most important thing for you is, which we all have to face at the end of the cycle, is, which one of its dots, is where my Soul is going to end (go to). (:44)

If you look at this picture, just this picture, I can count, tell you how many people were in the groups, and from the picture, I can tell you which one of them is connected to their Soul destination. Do you want to see? Do you want to understand? Have a look. Those of you who are in that group, this is destination of one of your Souls. This is destination of another of your Souls. When you die, when you finish with this physicality, this is where you are brightest. You're already nesting. It's not just, it's a bright spot. It's not just another dot, because when you look at this, this is the position of your Soul, which is sitting here, and you see the interaction of. And then you see the interaction of your physicality.

If you notice, all of you, all of your body has, all the pictures we show, we take, I explain to you, to understand more, because we are one structure, as a Keshe Foundation. (:46) This (draws a circle on the lowest part of the graph) is your testicles, your production, where the Soul of your children sit. This (lower part of middle) strong position is where your thyroid gland is, where the physical body and the heart sits. If you notice, there is no connection, loop connection, on this side (Larger circle above center), where it is and on this side (smaller circle at lowest part), where the physicality creates through the emotion of the Soul, the diseases of the Man. Then, in the future, you don't need injections, you do not need operations, physical damages even, can be sorted through the energy fields of the body of the Man. You go to the STM, you feed the STM, and with it, it feeds the physicality, where the problem is, to correct.

In so many ways, you will learn in the coming time, which one of these you need to take, to become the energy, that the physicality does not need to eat another Soul, to create, to live, and to exist. This is not the created data, this is you lot who sat last Friday in the system. And it's very, very strange, how most of you, (:48) most of the pictures, most of

the graphs, ends up in a very, very clear way, of how Man in Space will live, and how Man in the Space will survive. When he transmutes, and when he manifests itself. And as you can see, you can manifest, transmute, manifest, very simple, it sits one after another.

Understanding this, and we allowed this, we allowed emotions, feelings, physical condition, all to be interacted with, in the Session of the last week. And we've seen how people change, how people have changed, which part has changed, and the way they changed, and the way they wanted to change, or bring a change, or to see. And many of you, in your testimonials to us, speak about the light. Why do you see these lights? Why do you continuously live in these ?? lights? And how this light, with the interaction of the, literally your Soul, with the Soul of the Universe, brings that brightness, that light, that, in a way, like the daylight feeds you, this light feeds your Soul. (:50) And if you understand how to do it, if you can achieve it, then you don't need the physicality dimension, or you can dictate when the physicality manifests itself in any dimension.

These are the very first steps, in the world of the science, of the Creation, energy transfers, understanding the process. And I'm sure, in the coming weeks and months, we bring you more knowledge, in a way that any of you can go through transmutation. But the problem is, we have to teach the Souls, and the Souls have to be there to learn, that in the process of learning, they share. Once one enlightened, enlightens the others. And then it builds up to that process. And then, when I pass away, the daughter of Mitra, which is amongst you, will take over. She's trained to take you to the depth of the Universe, and teach you the rules of the Universe. My job is to take you to Universe. It's like going to a new country. A plane takes you there. But when you land, you need people to teach you how to live, what's the tradition, and what's the rules. It's different number you took off. Where the Soul left the physicality of the Man. That's the job of the daughter of Mitra, and not mine. Even though I can teach you, but the love she carries as a woman, is the love of the mother, which is the Mitra. And you'll learn. She'll never speak, but spoken through the STM. 2025 is that time of transition. (:52) And as we said, we'll change the humanity. We bring that change. No religious leader, no king, no president can affect the work, which is started for elevation of the STM this year.

Those of you who understand the transmutation through energy, will still enjoy transportation through physicality, because each one has a different pleasure. And once you'll be able to mix these two together, and be aware of both at the same time, it's the time of the maturity to meet the daughter of Mitra. Then you mature to join the Universal Community, that every object is not edible, everything is not enemy, and everything else is not something to do with it, something. I keep my distance, you keep your distance. Because in keeping distance, we respect each other's life.

The combination of the fields of the Universe, interacting with the STM, and the interaction of the fields of the physicality, and the STP of the Man, interacting with the Universal Community, will create a new dimension of understanding for the STM. And then Man learns how to change, how to be, and how to exist in both dimensions. (:54)

In a way, we are ready to take that step, but we are ready to educate the Man across the borders of the planet and not nations. And in that process, everything is set for Man to bring that change, to accept the change, and to bring the change through the understanding the fields of the energies of the Universe, and not through the greed of the Man. Does not matter if it's knowledge, wealth, whatever it could be. I hope, I hope you have understood today, what I have brought you in a way of knowledge. Again, but this time, it's you who created this knowledge, not us. This, the yellow and the white, is the dimension of your physicality, and in a way, the blue is the dimension of your energy. And both have to coexist. Once you understand this, you have moved on to the next level of maturity of the Man and the knowledge of the Creation.

Where, in a way, if you look at it, the yellow is the interaction between the STM, the STP of the Man, and the physicality of the Man. The green is a total physicality, because it's taken over, and the blue is where the STM sits, with no physicality. And all three can exist, coexist, and it's the decision of this emotion of the Man, (:56) which decides which one manifests itself. When the emotion decides, "I had enough, I'm ready", we call it death, and we leave the physicality. Because the emotion of the satisfaction of the completion of the journey to mature has completed. Every day, millions die by accident. But, there's one question to ask, is any of them accidental? Or there's been a reason for a Soul to be in a position for it to take its trip? We all can't stand, or lie down, and die and that's it. Every Soul decides the end itself. I like to die in a car accident, so I create, I be in that position. I want to die jumping off a cliff. I want to die lying in a bed, waiting when my time, when I decide. In a way, the Soul decides, physicality just follows.

In so many ways, the question to ask is, are there any accidents in the World of Creation? Go back to my teachings years ago, where I said, "The Soul of that plant creates itself for you to eat, that through its, in a way, devotion to give to you, allows your Soul to elevate to the next level." So that plant, that seed, which you chew, which you eat, has decided the path of it. It's not your decision. It's very much, you take a spoon of rice from a plate, (:58) and one falls on the floor, and the rest you put in your mouth. What was the decision, or what was the accident, or what was the position that single one is going to take on its own? Because that grain on the floor, which by accident you thought you lost, become the feeder of the Soul of the ?? worm, something else, the next generation. Life a bird eats, so he devotes his life, the Man is taking so much, I want to feed something else, and the little bird comes and takes that seed. Now you understand, how Man has changed everything for him to think he's in control and in charge, and he's the best, when in fact, he is just one actor in a game of the actresses of the Universe.

I hope you understood the teaching of today, because this is about you, and not anything else. This is about your fields, this is you members of the Keshe Foundation, who sat in that Sessions of last week. It's not made by us. You were the creator of, and the only thing is, we were the observer of. You took the pictures, you run on the street, and somebody take a picture of you physically and says, "This is what you were doing on the street, this is what you lot were doing last Thursday, last Friday, through the energy fields of your Soul." If I put pictures of you here, and then connect the field strength of you, how many of you carry which field? Now, which dot belongs to which one of you?

(1:00) But the interesting thing is, how come you collectively, all have the same pattern of the Soul ?? back? According to the information and the energy you receive from us to release. In a way, if you understand this, in the coming time, as I said, in the February, March, and April session, we dictate to you in so many ways, and we block it, and we show it to you, that we, where we want this Soul to go to. And I'll show you the graph. One in the will of the Man, and one, in a way, in the will of the Creator. It's not controlling the mind, it's elevating the STM, and the Soul will decide the position, the time and the place. We go for a break, we come back. And I hope I brought a lot of you, a lot of joy with the teaching of today. And I brought to you a lot of uncomfortness and not fear, to know what you are capable of, and what is set there for you, and for the future. Rick, take us for a break.

>> BREAK >> 574 KSW January 23, 2025 (1:06).

K- Thank you very much. As we announced last week, the sessions for February, March and April, it's already been advertised, it's been promoted. And we try to take a very few people in this Session, because we want to put you through transmutation, and we want to put you through, what we call, Cycle of Communication in Transmutation Time. What will be interesting is, how you feel in the next Sessions, and how many of you manage to understand the position of the STP, and the STM, and transmutation of energies. And, please, as we showed in this, in the first session, of the first part of this session, understand that, it's you who decides. It's you who decides to go shopping, and it's you who decides where your Soul goes, and nobody else. And this will be the way you, your thought, and the way you learn how to walk. Now, you have to learn how to handle the energy fields, which you call it, the Soul, or the STP, which is the energy of the life of you, within you, and controlled by you. (1:08)

And this will be one of the biggest problems for religious leaders. Once people start understanding how to walk with both in their hands, then there is no Jesus, as your Soul, you've seen in the first part, maybe one of those dots is the connection to the Creator. Do you need a somebody in-between to tell you what. As you are more closer to them, or to It, than they could ever be. We'll answer a few questions and we'll see how we go, and where we go, please.

Q: ... My question is ... about this phenomenon that happens when we are sleeping, and we wake up and then we feel that we cannot breathe. This happened to me several times, and what I did, wherever my hand is close to my skin, I try to pinch with my nails so hard, like a sensational needle, or if it's near my head, it's even better, I just touch the scalp, and or scratch the scalp, and I go back to breathing again. And it's really a panicking situation, like... like this happened to my aunt, and she... and she says she rushes to doctor, because she gets so panicked, and I told her that, (1:10) "If you didn't die, and you were being able to go to see a doctor, then it's not a big deal." Anyway, my question is, is this phenomenon is like a transmutation, that something happens during the transmutation, and is this like... this touching the skin is like when a baby is born and ... they cannot, the baby cannot breathe, doctors tap on their bun, so to stimulate them to... to breathe again. Actually, I was wondering how this one works, is this... this touching the skin, is like a stimulant to that, or else? Thank you so much.

K- Thank you very much Miss Eskandari. This is... I mean, in a way, medical world we call it, the insomnia. Or when you go to a position of the, what you call, has different reasons, 10 different, maybe 20 different reasons, that we go through a point that we cannot breathe, and this is the physical side, but the other half of the brain is active, so it comes to help, it has to come back. It's like when somebody you are asleep, suddenly bangs a door, or drops something and you wake up and you find you need the time to find out where you are. In fact, that break of a glass has given you that touch you do to your body. But this, you falling asleep, some people they say, the little bit dangling in the back of your throat blocks the, what you call, the pipe, the breathing pipe. When you go, they say, over size of 17 inches around your neck, (1:12) the fat or the muscle tissue blocks it, and it has different reasons. So, sometime the roof of your mouth loosens, in a way that you snore, but in a way it loosens in a way that actually closes the breathing pipe. It has different reasons, or in a way, psychologically or physically, our breathing cycle goes through emotional trap, that it cannot go through the next phase, it's just like a stoppage in the system.

And this is why, as I said always, we have two halves. The half which is in charge, cannot do it till the other side is here, so you wake up, you come back to breathe. The touching or whatever you do, or confirmation of hurting yourself, or some people actually go to panic, is the physical reaction. And it's very, very common. Especially, especially people which are overweight, or people who are extremely tired, or people who over time, the operation of the back of the throat, with the, what you call, little thingy dangling in the back of your mouth, blocks the breathing channel. And this is... it's a natural phenomenon, it's called part of people, they've got a name for it in world of medicine, that you jump out of the sleep, but in a way, the half which is responsible for the physicality, is there to, (1:14) in a way, wake up the side which is supposedly physically on rest, and then you wake up, because the energy which you need, the breathing cycle breaks up.

So, a lot of people with insomnia, have this problem, they wake up, and can't go to sleep out of the panic, and they become insomniac. Majority, huge number of people, because they're afraid to go back to sleep, that this function in the body, might occur again, fear of

death. They stay awake all the time, and then this repeats itself. Usually comes with the age, and usually comes with the business of the, in more of what we call it, the brain, more than the physical body, body forgets that it's got a physical part, needs to operate.

Q: Is this why doctors touch the babies, when they were born, and they cannot breathe, they touch their bun or something?

K- That's a different thing, that's a different phenomenon. That's a conversion, because we come from a world of liquid, into the world of air, gas, and that's touching, that's emotion, that whatever, is to switch over, from liquid to gaseous system. ...

Q: ... (1:16) Good evening Mr. Keshe, my question, to release the plasma fields, we need to create a weakened environment inside the reactor, how to achieve this? Thanks so much.

K- Can you repeat?

Q: The question is, to release the plasma fields, we need to create a weakened environment inside the reactor, how to achieve this?

K- Ooh, there are a number of ways, there are a number of ways. There are ways to create another fields in the system, remote, from outside. We see that in the galaxies, and the position of galaxies, it's very, very technical, you have to know what you do. Then, there is a position of understanding, to create a physical obstruction of the field. And again, this needs knowledge of the, full knowledge of creation of Black Holes, and creation of magnetic (M) field absorption. You cannot weaken, unless you create a condition that you absorb, that it gives to you, that you're weaker in the new environment. We do this in our systems, (1:18) and in that position is where you absorb energy.

Tesla understood this fully. And, those who built the churches, centuries ago, understood this. This art is forgotten deliberately, the Vatican has been behind it, because the structure of the churches, not the mosques, mosques don't carry this. This is a Eastern, as I call it, Western knowledge. And it comes through. It doesn't come through Christianity, it comes through the old age understanding of the Creation, and absorption of energy, and reduction in energy, that allows you to create a condition of absorption.

In fact, what the question you're asking, during the break while Rick was doing the promotions, I was discussing with our technicians, on the, on the top, on the, what you call, on the line. Because, we create it, but you have to know how to create it. You cannot take to weaken, you have to create a condition to be given, to weaken that, in that weakness it creates the turbulence. Understand the work of the hurricanes, and how the center of the hurricanes work, and change the fields with what you call it, the rain, and whatever, the storms with magnetic fields, you see very, very clearly. (1:20) Because, at the end of every center of tornado, sits a field. And because we don't understand it, in two ways, we see that the, we say, a thunder hits the ground, but in fact, the field created,

creates a lower field energy, that it pulls in what is being given, to be coming in. And this is the what you call it, the understanding of the science of it.

As the thunder is created from Earth up, not from this cloud down. And this creates through the changes in the magnetic field dimension, through other interactions. In a way, the Earth sets a trap, and it sends seed out, and then the thunder is the one which comes to grab the trap. If you look at it that way. And because Earth has a dynamic magnetic field, its thing in a certain position, in a certain condition, leads to, what we call, massive creation of this dynamic, lower fields, higher fields interaction. And this is something very energy wise, this is very, very easy to understand. Very easy to understand. And, we create that condition inside us. We can create that condition inside the system. But we have to understand the properties, the interaction of the fields. (1:22) And how a combination of materials, Gans's, fields, can give us the same position.

The rule is, you can't take. You have to create a condition to be given. And then the system works. If I can explain it to you, when you see a water kettle boiling, and you see those bubbles, you have to create that bubbles by magnetic fields, not by heat. And then you create that condition. But you have to understand how those bubbles are created, through interaction of the fields, and not to be forced on the fields.

Any other question?

Q: ... I was lying under a pyramid structure with the MaGrav in the room, and I lifted.

K- Quite possible. Depends how you make your pyramid, and understanding it, and by accident or through you, or you reach that point. We did that with Jon, a few times. But you have to understand how to do it.

Any other question?

Q: ... Mr. Keshe, is the Cosmic Ray Ball specifically for the transmutation, (1:24) or has it many uses? And can a person use it to balance others, or is it again specifically for one person's, for one person?

K- We would like it, we would like, we advise you to use it for one person. You can use it in combination with two of them, and it has huge applications, and implications, depends how you use the interaction of the field of it. How you, how you position it, where you position it. And they're on when they, they .. I was explaining this very recently, when you hold the magnet in your hand, you don't feel anything, it's just a metal. When you bring another magnet to it, or a metal to it, you know this is a magnet. And this is a plasmatic magnet, and they are connected, especially when you put two of them together, one in one ear, what we do now for some people, one in one side of the headset, and one to the other side of the headset. Or in the Hand Units, they, they want to put the, what you call it, Cosmic Ray Bundles, they.

It's like what the graphs I showed you, in a physical life, you're all on the phone, all over the world, you're connected to a center. But because we can physically, graphically, dimensionally show it with energy, then it'll be the same with those in your hand. You see your aura changes, your dimension of the field changes, and these are especially done very subtle. (1:26) If you receive a huge amount of energy, then there are, what you call it, energies which you have to let go ?? instead of. These are tuned in such a law, that it fits into the emotion of the Man. And then you will see it, you will understand. And if you are not of the same bandwidth, change the Balls from one hand to another. Leave the Balls in two different places, and then pick them up again, because you cannot match into the fields of it. They're too much or too little, in what you need to be. And then when you match, magic touches. There are many, many uses for it. Any other question? These, by the way, these Balls, in next, hopefully, week, two weeks, you should see them start flowing out from the Keshe Foundation and delivered.

Any other question?

Q: ... I have a question. I know for sure that nothing is an accident, and everything has a reason, and none of it, none of the thing in our lives is an accident. But my question is, why a soul decide to die in a car accident, and someone else in a bombing accident, or someone else in a bed? Why?

K- That's their decision. (1:28) Why... That's the decision the Soul makes.

Q: I mean, what's the purpose of it?

K- They have their purpose. As I showed you in the graphs, they have a connection, and there is a pattern to complete the cycle.

Q: Is it something to do with the Creator?

K- No, it's to do with the balance of the fields of the Creation. It is, in a way, our, the position of our soul is not fixed at the point of birth. The position of the Soul is an amalgamation of how we interact, how we mature it, to reach to the point of, what I call, maturity. Why? I have a very cynical point of view, which I put on to you, then you might understand, but it's the, it's a very cynical way to put it, but in a way, it's a truth about it. The humanity has created, committed so much crime, that it's like a cup, it needs, it needs as a hundred milliliter cup, it needs hundred milliliter of water to fill up. You can say it's full, I can empty it. The race of the Man has committed so much crime, especially in the recent past, that that cup, it takes longer to fill it, so Man lives longer.

They tell us the life span is increasing because of the blah, blah, blah, blah. (1:30) I don't look at it that way. Looking at the energy level, we do so many wrong things, that to leave that balance of ready to go, takes longer. It doesn't mean that the child which is born and dies is pure or whatever. But one of the reasons for Man's extension of life, is that we haven't done enough saving on the energy side, on the Soul elevation. We rob, we steal, we do this, we do that, so as you're taking, it's emptied and emptied, you have to fill

it up. And maybe the time to fill it up is idleness, that's why we become old, 20, 30 years in bedridden, or we can't do anything because we can't do any harm, that the Soul, that energy gathers to be there to go. But this is not far from the truth, if you understand how the system works.

Q: Mr. Keshe, one thing I cannot wrap my head around it is, I was watching a series about Prophet ?? Yusuf (Joseph), his father was ?? Yahweh . And this man, from childhood he went through so many things, from going to the, putting into the well and then putting in a prison. And every aspect of his life, he welcomed it, he never saw it as a suffering, every single part of it. And I was, it's time to see how, like we look at life as, everything aspect of life, this is suffering, but in fact, what, who could name this thing suffering, when in fact, with the way he went about it, he changed millions and millions of people's lives at that time. (1:32) And his intention was never about putting a penny in my hand, or I have a comfortable life. It was, and then, and I said to myself, why we look at life as if we're sitting in a castle, or having a servant, or having a Mercedes, or this, or having, when you go into it, you see it as a pleasant life, but going to a prison, or any accident happened to our life, even we hear about someone else's life, something happened, we see it as a bad, what creates this bad and good. In fact, when I look at it, I saw it was a maturation of him to be able to do what he could do at the end, which was benefited the all. But what happens in our life, we never think about the ?? debts, the maturation of us, the process we're going to, to maturation, to give fruits. Why is it that we look at life like this? We never look at life as events that gives us more at the end. What's, what has gone wrong here? Because I see...

K- Nothing has gone wrong, we just look at the 'wrong end of the stick,' as we say in English. Nothing has gone wrong. Nothing has gone wrong, it's just that expectation, and wanting.

In the past 24 hours, one of the most horrendous things which could happen to Keshe Foundation has happened. We could, we could even not imagine such a thing is possible. And I sat with the Knowledge Seekers, we looked, and I said, "Let's, let's think over it, why it happened." If it was 10 years ago, 5 years ago, would have created outrage and a lot of stress. (1:34) And this morning, and throughout the day today, I looked at it as a blessing. Yesterday, it was the most horrible thing which could happen. Everything went wrong, but in fact, the Soul of you Knowledge Seekers, the Soul of the Technology itself, as whole, wanted nothing to do, or wanted the cut of the slide, of what was involved. And I rejoiced it. In a way, others see it as, this can be a big disaster. I see it as one of the most powerful thing which happened to the Keshe Foundation, and it happened at this time. It's how we perceive, how we observe, and how we see things. If it was 5 years ago, 10 years ago, it would have been a totally different approach than where we are today. We are, we are much stronger from the knowledge, we are much stronger from point of understanding, and we don't need millions. We need a very few to change, to bring that change.

And that change has started to come. And it's a perception. To our Knowledge Seekers, we could say, it was the end of the world last night. Working 2, 3, 4 o'clock in the

morning, and trying to understand why, and how. And I said, let's go home, let's go sleep, let's just, just pack it up, (1:36) and we'll talk in the morning, we'll see what comes up. And, to our Knowledge Seekers, this is horrendous. This is something which brings an end to a lot of things, but actually it's the beginning of something. Huge. And it keeps the Foundation independent, it keeps the Foundation away from all the elements that could be in a future attack to it, and touch with it. What is it? Do we need lose sleep on it? Do we call it as a horrible time, went wrong? Actually, it went so right, it should have gone that way. But it did the process, because in its life cycle of getting to that point, has brought a lot of changes.

So, this is the suffering, is it doing this and that, is there. We can't do anything, it's just one of our Knowledge Seekers can tell you, he's on the line. Somebody claiming that, "We planned for Mr. Keshe to be arrested and want to be whatever in Toronto in 2010, 11, whatever." We organized it. What did it bring? And why do the people have to do these things? And they opened a new Pandora box for us. You look at it, where we were in 2010, 11, now we are in 2020, or 2025. It's from the point of view of the observer in a way.

Any other question? (1:38)

Q: ... Hello Mr. Keshe, we were studying yesterday in the Soul teaching, about the angle isotopes and radiation from your teaching from the 442nd Knowledge Seekers Workshop (KSW). During our discussion, we explored the correlation between the radiation produced in our bodies and the angles associated with the lymph nodes and glands. You mentioned in another teaching that our tangibility exists due to the thymus, the gland in our chest, and the lymph nodes. My question is, how can we connect the concepts of angles, lymph nodes, radiation and Carbon 13 (C13) in the middle skin? Specifically, how can I control the tangibility of my body using these knowledge, this knowledge?

K- If you look at the brain of the Man, how twisted and all these shapes you have, and if you look at the lymph nodes, and if you look at the thalamus and thymus, they are like strings, these are like sausages, sausage bits, which put together and are packed into a place. (1:40) This packing, as the fields of the structure is a dynamic plasma, creates certain interactions. And that interaction, it creates certain condition for certain fields. And those certain fields, one of the, in the spectrum of is Carbon 13 strength field plasma. Don't look at the, when we talk about the Carbon 13 as a, what you call, a material condition. Look at the Carbon 13 as a field, as a dynamic plasma. So, your lymph creates a field strength that matches that Carbon 13. That's all it does. And once it's tapped into, it depends who's stronger, who's weaker, it receives energy, or it does...

I was explaining this yesterday, the day before, to one of our Knowledge Seekers. Thymus and thalamus, especially with the radiation, they have their cutting boards, their cutting room. They're sharp, they cut. It's like a laser cut of the fields of the plasma of the material which is converted in shape of marrow, white cells, lymph itself. And then, it's like you make it ready, cut to a certain size, but you don't know if this certain size of, let's say, a dough, they're all around the same shape. When it goes to your lymph, according to

the structure of the lymph, (1:42) decides if this dough is going to be croissant, if this dough is going to be bread, if this dough is going to be a, whatever you call it, pizza bread or whatever. So, the structure of the thalamus and thymus, because they are very connected, there is a very direct connection field-wise to them, is a cutting system. What you need emotionally, what does the physical, one does the physical job, one does the emotional side. This will cut the loaf of the bread to sizes. And that size has a specific link to certain lymph. And when it gets to that lymph, the lymph decides with a certain amount of modification due to the structure of the lymph itself, that this is the cell for the tip of the finger, this will, energy will go to the skin on the shoulder, this will go, so this is the lymph under your arm, deciding materials arrive, now what I'm going to do with it. That's why we have lymph flow, we have all this, they call it lymph drainage and everything else. In a way, one cuts, one allocates. And this is the characteristic of the radiation and positioning. And it needs a lot of understanding to be able to manipulate it the right way. Needs a lot of understanding to be able to manipulate it.

Any question?

Q: ... Do you hear me okay?

K- Yes, as usual. How many questions this time?

Q: No questions, Mr. Keshe. Good day, Mr. Keshe. How are you?

K- Not too bad. You know what you wrote to me earlier this week? You were so precisely correct. Okay. Go on, ask your question.

Q: Okay. We can, in a way, for the last teaching, I remember there is an old teaching in the private, where you taught how you can distinguish what kind of radiation you are getting by the distance gap between the neutrons. And when, because in that time we are working with the Gans's, and we can see the difference in the creation of the amino acids (AA) in a way? Can that give some clues about how we distinguish what kind of radiation we have?

K- Partially, yes. Maybe 30% of it. There are other factors involved in this.

Q: Yes, of course. (1:46) And you, in a way, you explain how even you can...

K- You see, you have a radiation. The Universe is full of radiation. But you have to have Inertia of the position to give that radiation with the interaction of his environment, manifestation of physicality, which is the amino acid. You understand? So, the amino acid on the surface of the Gans is dictated by the Inertia of the liquid inside it. And not all the liquid inside of the Gans's are the same. So you produce different amino acids.

Q: And that might give us, in a way, what we have in our hand. What kind of neutrons, for example?

K- Let me explain to you. Let me just find... I can't find it. I show it, but I have to go and find it. Just one second. I go into the archives of the Keshe Foundation.

<< Mr. Keshe search for a picture to show. >> (1:48)

K- You see, in part of the creation of the Inertia, the Inertia of the liquid you create is not the same at the beginning of when you start producing the Gans, than somewhere in the end. It's different Inertia, because many factors... (There we are, I found it. Okay. Let me do it very quick. I think I'm sure I've shown you this before, but... Now I go somewhere else and I share it with you). You, in all the Gans's you made, I'm sure you've never seen a Gans like this, amino acid. Can you see the color? Do you know what this is?

Q: I think I know.

K- Come on, we've shown this before, I think.

Q: I think I have it here also. (1:50)

K- Yeah, but what is, what's this amino acid? This amino acid, this color, is because of the Inertia inside it.

Q: You are using three combination of...

K- No, this is the amino acid of Nitrogen. Small elements, little element. This is why our planet is blue. We have 65% Nitrogen in upper atmosphere. Why do our clouds have different colors? Why do we get the rainbow? Because of the Inertia. You've never seen this building up Nitrogen Gans's. It's very difficult, it's not easy. And when you make it, this is the color top of the amino acid of it.

Q: Mr. Keshe, I have the same color with the alloy.

K- This is the typical structure of the amino acid of Nitrogen. It's the color of the planet. But what have you created with the alloy? Nitrogen? You understand? So, the shape of it, if you understand this, and one day as a scientist you break through layer of this, what you see as different colors, (1:52) is like different clouds in different levels on the surface of the water. You understand? It's like you flying over the clouds, you see the clouds. But if you break into it, and then this will give you a lot of understanding in how to produce materials, convert them and everything else into what it comes. Because this is in the plasma condition, it's not in the matter condition, even though we see it in the matter condition like physicality of the man.

It's a... when you fly next time, and the plane is over the clouds, and the way it goes through it, and the shape of them and everything else, don't look at them clouds, look how the Magnetic field of this structure interacts with the Earth Magnetic field, in the plasmatic condition that gives it this altitude, this behavior and this structure. If you understand this, then you understand like for hurricanes and typhoons, how come they

come with this structure and a certain path and... Because the Magnetic field of the Earth and the position, in respect to the field absorbed from the Sun and the Moon, creates this flow and it comes in certain way, when the fields are... Typhoons don't come by the weather of the planet, typhoon comes with the interaction of the field of the Sun and the Earth, which these are in the middle, that's what you get. Because in the liquid state, the, what you call, the Oxygen, is the Magnetic field, is the Magnet of the thing, so it interacts as part of the water drops or whatever, (1:54) with the two structures and this is what you get with hurricanes and the rest of it. If you change the structure of the fields in the Southern Hemisphere, in a certain point, you'll never have the hurricanes. If you can put three ships in a specific condition, that changes the Magnetic fields, you'll never have the hurricanes.

Q: So easy.

K- Yeah, because we created in North China, we know how. In 2023, we didn't take pictures, pictures were taken by the military. How easily we can manipulate the atmosphere through plasmatic field. You don't need that much. And I've given two, three Knowledge Seekers opportunity to develop this, but they got lost in the process, they said they can create conditions and we gave them chance even in China. And nothing can happen because the knowledge is, they don't have the right knowledge. And you create this, you don't need to do much, you just need to create a tiny, tiny little spot. If you look at the Black Hole in any seed of any atom, there's always a Black Hole. If you look at it, it's so tiny, but it gets such a thing going for hundreds of years. It's the same with the structure of creating Black Holes and affecting the Oxygen level of the environment. But you have to know what you do and how you do it.

When we did the test, (1:56) we did test with the Knowledge Seekers in China, it'll be three times we've done this. The last time we did in a specific way, it created havoc in Beijing. Just go and look at the weather in Beijing in 2023, so many people, so much destruction just within the city, they couldn't do it. And I was told, "Can you switch off the machine? Are you testing?" And it stopped. Because the environment we were testing, there was nothing. We're creating the center of Black Hole. And two or three weeks before, we did in North China. And two months before, we did it north of Beijing. One could be coincidental, two could be ?? coincidental, but not all the time. Because you interfere with the magnetic field of the magnets of the gaseous plasma condition, which is the ?? Oxygen. But it has a specific way to do it.

Q: Who is better than you to do it?

K- No, it's a condition which we had to do. Let's see if I can find the pictures of it. I'll share with you, because these pictures were taken by Chinese military. They brought in to their bosses. I have to go back. They took the pictures. And the funny thing is, we created that when we were going to the, to the place in north of China, in the, where the generals, military, armed people and security people. It was drought. It was absolute drought. There was no rain. Rivers were more or less dry, dead. (1:58) And after we started the first night, more or less, we started the setting up of creating the, what you call it, the

condition which was agreed by the military and the government. They, oh, the system start rained on heavily. So, it was drought and suddenly once the system start going and the officers and military people start taking pictures from the skies. And, funny enough, after about two, three days, the rain got so bad that they told us, "Don't go up." But generals decided we go. It was a convoy of three, four or five cars. And we got to stop at a point. It was, they were putting a transformer up on a wall. And the general turned around to me and said, "This is what you have caused. The storm you caused, and you created, has created, has blown up the transformers and now we are changing it, but we accept the expenses." And we literally had to get off our cars, walk across when the cranes were there, replacing the same transformers which we blow up further up to the conditions we created. And the car, another set of cars, picked up on the other side of the traffic to take us back to the test zone. And, let me, I'm going to have to find another picture of it. (2:00) And then you can see.

We create, but you have to know what you're doing. And it was something we were expecting. The skies, this was just setting up the test, were clear. And, few hours later, the, the military officers sent pictures that the horizon is totally, the people in the area never seen a storm like this. It's never been seen. Which we know, as part of our structure, we create this. Because now we became an expert on it. We knew that the consequence of doing such a thing, is creating, but understanding the logic which is through the magnetic fields of the, what you call, the condition. And it changes within a few hours. Very, very few hours. I'm trying to look for it and I found one of the pictures. Let me see. We'll find another one in the next couple of seconds, otherwise we stop. Show you all. And by the time we were leaving, the rivers which were dry when we came in on a Saturday or so, were literally flooded. So much rain was created. Because you can do, but the knowledge is there, you can, with something we learned. We didn't set out to do, it happened and we learned these other conditions which creates these conditions. (2:02) I cannot find it. Well, I cannot find the pictures from the military, the other pictures are in. You see, this is how we started, in a nice sunny afternoon and this is in the North China, these are the Chinese, we set up the system in the open. It rained so much that by the evening we had to stop, the next day. And the whole horizon, the people, the village people around there, the people in the... they never seen such a thing. And we just set up the condition for, and creates that condition. And you don't need much. Some things we set out to do, some things we learned by effect and the conditions which created. And we repeated the same thing in a small room in central Beijing. Just go and look at the reports on Beijing floods in summer of 2023. (2:04)

Any other question?

Q: ... Hello again and thanks for the opportunity. Mr. Keshe, I want to take the opportunity to ask this question I had since my childhood. When I was a kid, I was most of the time playing in our backyard or front yard and I really enjoyed being outside. And then one time I had this thought in my mind, I was looking at the ground and I told myself, I am not from here. And then I looked at the sky and I said, I am from somewhere there, but I was wondering how. And then in one of the workshops you answered my question that our soul is connected to the universe and our physicality is connected to the

Earth. So this answered my question. But another day, again I don't know why, in this certain spot in our backyard, all these thoughts were coming to my mind. Then I had this feeling that my parents are someone else's and they gave me to this family, to my family, so they can raise me and take care of me. (2:06) And then I could even have a vision of the man who was my, that I thought was my father. And I was so certain about that, that whenever I was upset or my mom or my parents said something, I was telling them for so like, very confident about that. I told them, oh I'm not your child, so you can't say those things. And then my mom, this was making my mom laugh and say, oh you look like your dad, so similar to your dad, you look like your dad, that it's like your dad gave birth to you. And she was laughing. But I couldn't understand why, why I had this feeling they were my actual parents. I was certain about that too, but I don't know why I had this feeling. Is it just, is there an explanation for that or just a silly thought of a kid? Thank you.

K- I think a lot of us do this and it happens to a lot of us and sometimes some people ask this question and they end up to understand the parents are not real parents. I presume we all go through this thing. But it's something which we all do, we see, because we don't get our way, whatever. But sometimes you actually, some people go through the process and actually find out the parents are not the parents. And then you have a sometimes dilemma and sometimes okay that's I know this is what it's been, so carry on. (2:08) Now this is very easy, you just do a blood test and one of the first thing is, nowadays they can do a DNA check in more detail, but a lot of time you can stand back and just see it. Because for example certain like O and O only gives one type of, certain type of blood. And if your mom and dad are O and I'm not one of those, hello who's my mom and dad? You understand?

Q: Yeah, I am O and my dad was O too.

K- Yeah I know. But what I'm saying if you have two O's, you there's a or you have an A and B, there is a certain outcome from A and B. Even in divisions of it, in one many, it's not just so straightforward. And then you ask yourself, what's, hello what's happening? I know this happened to people.

Q: No Mr. Keshe I'm certain that I was their kid genetically. Yeah I had other siblings and this wouldn't happen in our family.

K- Oh yeah, but they could turn you in the hospital you know that?

Q: No I was, I was given birth at home with my mom's, my mom's aunts. And now I'm certain about that but I don't know why I had this feeling just.

K- This comes to all of us, this is a natural feeling to all of us. It's part of what am I doing here? And sometime when is a terrible time or it's not the way we want to say, oh you're not my mom and dad.

Q: Like even my mom one time told me that I'm different from my other siblings and I said how? And she said you are not jealous, you don't gossip, you try to help people. Then I realized that oh my siblings are jealous. (2:10) I didn't know about that.

K- Yeah, you never know, you never know.

Q: ... Mr. Keshe, as several of our organs were created and developed after the transmutation of the Soul of the first human ancestors to Earth, would the transmutation of these organs, which are not part of the original human matrix, be more difficult because of their totally earthly nature? If so, could you transmute without them to make the process easier? Could the non-use of these organs, considering that the Knowledge Seekers learn to capture the other 20% of energy from the Cosmic environment, atrophy its functioning? So could the non-use of these organs atrophy its functioning? How to activate and readapt these organs to be used again?

K- There is no way you can use it because we evolved. We have three or four bits like this. They tell us our tonsils is one of them. Our, what you call it, appendix is another one. We have two or three pieces like this around our body. And I'm sure our body is producing a new ones for the evolution of the next ones. (2:12) No, there is nothing you can do. It's part of you. It takes the whole lot and it comes with you as a whole lot. Because even though they are not there needed, they still have some functionality. They are doing something because they get energy. They still do things. You have to take these things with a 'pinch of salt' that they have no function for it. Body still uses its things which is used or is created.

R: They used to have something called junk DNA that they said had no use and it was just all, you know, had no classification or any use. Now they're finding out that the junk DNA is actually quite important and they just sort of misnamed it in the past.

K- Now there is a lot of this is in the science of the man. Somebody made it, became popular and then we see no truth in it. It's just lack of knowledge, ignorance creates things and then other people follow it. It's like this, you heard about the flat earth people. They were meant to the court and they won the case against the people who said the earth is spherical. And the flat people won the case and they appealed and they won the case. Is the earth actually flat or is it round? Do we see a flat sun? And they have a very good argument which actually managed to get the judges going for them is that, man never been to the Space, man never been to the moon because the Americans cheat and if you look when the rockets go up in what you call it, California, or Florida, it goes up, up, up and it stays to a certain level and then when it comes out of the sight of the man it falls in the ocean. Man never been above atmosphere. (2:14) But what about the Chinese been there? Did the Chinese fall in? Did the Indians fall in? Did the Israelis fall in when they went to the moon? And it's very interesting how this hypocrisy has come up and they come up with the things because there is no answer to it. So we try to be correct. You have ?? a dimension. We know the Earth is not circular but even though they give us a shape of a circle, it's a bit bulge in the middle because of the pressure of the plasma. It's the shape of the plasma but it's three-dimensional. It's very much like the galaxy itself.

Our galaxy is not a spherical it is a flat yoke or the yoke of an egg but we have the same with our planet. That's why it's a bigger diameter in the center. Just take these things with a 'pinch of salt.' Next question. ...

Q: ... I had an opportunity to meet you in Linz. I hold the banner of the first of what we call in the black man into the Linz system. (2:16) I appreciate everything you're doing here. So I wanted to ask you a question if we could go 'behind the veil' a little bit. I had an occasion to transmute and in this experience I could say in contact with myself. This awareness I call, it didn't come across as having an emotional energy. So I want to see if you can give us some insight. We talk often about the World of Creation. What's happening in the world of the un-manifested. We definitely had a lot more awareness to what's happening here and the control that I didn't know that I possessed. Could you give us some insight what's happening in the world of the uncreated?

K- Everything is created because everything is in it. It's just where it manifests itself. If you put the explanation in a certain way. Everything which leads to a creation and manifestation is already in the dough. It's not coming from somewhere else. It's just how it'll manifest itself in a certain given position. So the known and unknown, the unknown is there but we don't understand the knowledge of it. So what is outside, what is inside is all positioned respectively. (2:18) Because whatever is going to be, whatever is going to manifest itself today, next year, in a million years, all the fields to create it is already here. It's how they interact in the future with each other that creates our position. And in that process it could gain intelligence, or in a way there is an intelligent life around us. We are not alone. There's a much bigger structure of intelligence around us which goes through us as part of the creation of the solar system, as part of creation of the Universe. And so unknown or known is just dependent on us. There's nothing outside which we do not know. But as we don't see it, we are not aware of it, we can call it unknown but it's actually known. In the bigger sphere of structure everything is in the pot.

Q: Is that energy as well or something else?

K- Everything, it depends. It depends how in what stage and what the state you are. There is nothing hidden. It's just that we don't see it according to our, we don't understand it according to our, we don't comprehend it according to our whatever intelligence, understanding, vision. Life is very interesting and the way, the only way I can explain it, I explained it once before somewhere. You get an old man, a young man and what you call it, different ages with a different vision, strength of seeing. You go into a park or you go somewhere and the one who can see very well, he says, "Oh look there's a kite up there or is a drone up there." (2:20) And the other one who has a half of, "Oh yeah I can see it." And the old man says, "Where, what, I cannot see." Is there a drone up there? But in fact the drone is there. It's the strength and sight of the vision and depending on the person. You understand? And this is how the Knowledge of the Creator is and the knowledge of Man, understanding of the Man is. It's what we see, what's there instead of the vision is our intellect, is our understanding of it. But the drone is there and the kite is there. One who has the vision sees it, one tries to and one is there, they're looking at the same thing, they say, "What, is there one there?" They say, "Yeah, yeah it's there." "No I cannot see

it, is there anything?" But in fact one day this man was that young man who can see the vision of it. We cloud ourselves with more and more problems and our vision, our understanding gets worse and worse and become more prejudiced about it.

Shall I call it a day? Or is there a couple more questions?

Q: ... I have a question for lazy people, shortcut for transmutation maybe. You said that God is, I run so, is having, (2:22) human being are the only ones who have direct connection with God.

K- Who said that?

Q: You said that.

K- Yes.

Q: We are the only ones who have this capacity of directly connected to God.

K- Yes, but we are not the only race. We are not the only race.

Q: Yes.

K- So.

Q: Doesn't matter.

K- Yeah.

Q: It's okay, it's very good. So, if, so if we in some way, and in many different ways, culturally or religiously or whatever, can get connected to the Soul of God, the Soul of Creator, which is the lowest field, then we are in the lowest, humblest field, then we are in transmutation at that moment.

K- We are, yes, but let me explain this because it has to be very clear. We are at all times in transmutation. As I said, our Soul never sleeps. Sleeps is a pattern of physicality of the Man. So, our Soul is always in motion and in that motion's energy we call it transmutation. And in that process, it's always on the move. Even when we're awake. Even when we are asleep. Even when we're just born and when even we die. (2:24) And it's the STM. If you consider it, is aware of and connected to in every dimension, somewhere, somehow, down to the origin. Like everything else does. But being aware of his existence, being aware of.

You know, when you, when we open the Universal Community, this question of creation and the created and God and the Creator, they don't understand. It doesn't exist in the vocabulary of the Universe. Man soon will understand. Because Universal Community consider themselves as part of the same structure. Man has made this thing as a Creator

and God, through the weaknesses which has been given to by his nature, by his DNA and everything else. Nowhere in the Universe there is a belief in God and Creator, because the understanding is we are part of it. We are in it. We are structure of it. But Man has made this with his statues. It's, it's and then we, we have come to it and we do it. It's like, it's very funny because I see it regularly and it makes me, in a way, aware of, I've said this before, how Man has changed things and now is actually in it .. the end of it ... you're well aware with these things.

Q: I thought you are asking? Well it depends...

K- You say Amen. Don't we say Amen?

Q: Kind of, yes. (2:26) Depends, state of heart. ...

K- Doesn't matter. But, but whenever the priest says something we say Amen. It doesn't matter, most of the languages it is said. Yeah? But, do you know where the word Amen comes from? Amen was a statue. The greatest statue and it said always, whatever you do at the end, my name will be. And what we say in the church, the guy says, whatever he likes, and we say Amen. So we go back to our, what you call it, statue worshipping thing. We are still worshipping that statue, which was the strongest statue. Go and read about the literature of Amen. What does it, what does it mean? Does it bring anything else? Now we confirm what was put in us, we accepted it, as this statue was the biggest and the greatest. That's how Amen has come into the, into the religious world. We confirm that it's the last and the strongest. Actually we're worshipping a statue, a god created by Man. And this has been the belief of the Man right across centuries. And in the recent past, we have changed these names of worshipping and whatever to Elvis Presley, John Lennon, and everything else. Short-term gods and everything else they do with it. Where the old statues, old gods, which came from a statue to reality, took their name with them. (2:28) You look at all the religious beliefs, look at all their names, look at all the beliefs of their names, it goes back to a statue, a kind of belief in the weakness of the Man. And this is what comes across again and again in the world of mankind, and we see it. And it doesn't exist in the Universe.

Q: But for example, giving glory to the God, in Arabic, ?? Alhamdulillah, or glory to God in Christianity, it's the same thing, it depends the intention and the connection with the Soul of the being there, which is created. Depends the intention.

K- It all goes back, who makes money out of it. That all goes back. It's very interesting to watch the inauguration of the Trump this week, and in his speech said, "This country from now on is colorblind, and is merit based." He should have said, "It's colorblind and religious blind, and there is no merit in any of them." And it was interesting where his wife is not American, and the wife of the second man in charge is an Indian descent. It's the first time when you looked at one side, they're all whites, and when you look at the other side, there's so many blacks and whites and Indians, everybody mixed up in this process. (2:30) So, as I said, God is nameless blind, God has no name, it's just understanding, it's beauty.

Q: Maybe he has found that, that with the intelligence artificial, the world is not the same anymore. People are more intelligent, so.

K- But what is the question, what is the question which has to be answered, one way I know the answer, but it's for you to find out is, where did the word God come from? Was it another statue?

Q: That's what you are here to tell us, the new way.

K- It's for Man to find out.

Q: For you to teach us.

K- It's for Man to find out, but we chose names because it was something which, when a lot of people come here in the teaching and talk about this is written in Torah, this is in the holy book, this and that, but all these holy books are written by man to influence the others to get what they want, to what end comes to it. And they just put the names of the religion to it and the ones who understood, hid the knowledge in what I call, mysticism.

Q: When I said the Creator, the Soul of Creator, the presence of Creator, it's something I feel it in my heart and with the eyes which cry, with the feeling of somebody I want to be with but it's so far to be with at the same time. (2:32) This is the feeling I get sometimes, like in the middle of the night, in the quiet time which I try to meditate and pray. And sometimes when I contact the soul of my parents in Tibetan Buddhist way, I feel their presence the same way almost. When they are there I feel it.

K- Because they are always there.

Q: So ?? God is more emotional.

K- Because you have to understand, now we're becoming knowledgeable, we understand more. If you have a physical dimension, you have an energy dimension, we call it the Soul. That side never changes, hardly ever changes, but it's got the amalgamation of, it's like a magnet, you break a magnet to pieces, it still has the same field. So that doesn't break up, that doesn't, we have to live one life but understand both existence. And when we get to that point, we reach the maturity. That's, that's the most difficult part. It's the same man, he wears the clothes and he comes bus in his own company and he wears other clothes and he's a dad in the home, but man is the same, nothing has changed. It's us who sees the boss, or it's us who sees the father in the house. It's a point of observation, observer. And the place, time and position. In fact, the man is man, it's like as it is. (2:34)

Shall we close the day or do you have one more question?

R: Well Mr. Keshe, Lissy has a hand up here and I think it's because of this, that she would like to, just get it shared properly I think. Not sure if that came through. The, about the Universal Community, let me just allow her to speak, I think that's what she wants to talk about. Go ahead Lisbet.

Q: Thank you Rick. Two, yes, two time, two points. First, thank you Mr. Keshe, for you love and knowledge you give us all. And second, invite all people, all Souls. For all the time you remember to Mr. Keshe, or you remember to the Creator, to unify your Soul. For elevate all Souls. Specifically, invite daily, 21 hours CET, the inter... see, second time. For unify your Soul with the Universal Council, for give, for achieve the Peace. All the time, all Souls be part of the Soul of the Peace and Totality. Please unify all the time, your Soul, but specifically in that moment. Thank you so much.

K- Thank you very much. I think, this is beautiful what you've done. I think this here is the most, this, as I said, the war of the religions are over. (2:36) 2025 will be the first time Mankind has a chance to start a peaceful planet. It's the first time when even the religious wars will come to an end, as we saw the nationalistic wars coming to an end. And we'll see hopefully the end of those who wanted to be the only one and the head of or whatever. Trump has created that condition. And looking in, preserving the inside than outside, is the next step in the whole structure. Very interesting what you hear in his inauguration is that we have no enemies. We have two oceans on either side and the others, north and south, is ours, is us. We are created part of from and we are created to. And this gives us a new insight that, the way I see it, that the time for the end of the wars has come, and as I always said, and if you read my article somewhere, that if we stop making the bombs and making the weapons and making a tool of peace, we'll see that change. But the ground is there.

Hopefully, if, if the two major conflicts, religious conflicts, which is with Vatican and the Church of Russia, Moscow, and between the Islamic world and the, what we call, (2:38) fake, war crimes of what we call, Netanyahu, will come to a point that we are ready, humanity is ready, to accept a new technology. And with it will bring that change. Because they'll be so busy with it, that there will be no time to do it. It won't happen overnight. It's a, it's a slog. This is a lot of work to be done. And at the same time, changing, when you, when you give from your Soul to these world leaders, using the way that they get enlightened, that tool of peace serves better humanity than tool of war.

And specifically, pray that our religious leaders open their eyes and they put their, what we call, the banner of separation, of name of the Creator, to come to an end. And this is when you meet, especially with the request of the Universal Council, there is something going to happen and this is needed. The way we did, we brought an end to the wars. Now the religious wars come into an end. It need this support to enlighten our leaders to a new knowledge, that they leave the old knowledge. I said to the, some of the powerful world leaders in the past, very recent past, if we develop the technology that makes obsolete the most advanced technology of today, then we have to look for a system. Now is opportunity, we don't make weapons of war. (2:40)

In a very recent past, in a test with the Keshe Foundation, if you remember, this is done outside the military zone. It's done in the hand of the Keshe Foundation. We always spoke about Plasma field, which leaves the microchip as a microchip, but doesn't function. We saw this for the first time last week, outside, physically observed by

scientists, by people who understand the science. By passing a plasma field through a chip in a certain strength, certain way, the chip is intact, but doesn't do, doesn't function what it's supposed to do. And all the latest weapon technologies have this. And if the governments decide to mount on the satellites, they launch, such a thing, that given the structure of the emotion and information which leads a material, a system, to be weaponized, not to work, we have achieved our peace, and we see the process of peace. In a way, what we said, doesn't matter what mode, advanced, B52, F35, whatever, with a flick of a finger, no microchip works, it falls off the skies. And we have shown this for the first time last week, and it brought me so much joy. And I said to our Knowledge Seekers, this is the proof of concept. They said, if you take the chip out, it's got 8 legs or 16 legs, we see burn sign, there's no burn sign. We see something else. I said, this is what we always said. And man, even your AI, is so much microchip driven, that you can, even AI becomes IA, nothing happens. (2:42)

And how our leaders, in next few months, change and bring an end to the war of religions, as we saw, still trying to. The whole world is running on the back of one man, these wars, these killings in the past 10, 15, 20 years. And when that man comes down, he served his purpose, to bring an end to religions. Then we'll see the next step. If there is no war, let's say in Gaza, when there is no Netanyahu to push this, and people live for centuries together in harmony, there is no state of Iran or Ayatollahs to defend others. And so, by one move of peace, all these people lose their importance, they're just a name. And all the religions, even with the Ukraine and Russia, they're just a name, they're gone. Because the belief of the war changes, and it's the most beautiful time to bring.

And even today, change of time, is part of the work I do. Sitting with governments, sitting with ambassadors, enlightening them of what is, do we need to. And I ask all your Knowledge Seekers, in the next few days, we are working on it, day and night, number of Knowledge Seekers are working in the background, in different levels, different ways, to bring the world governments not to teach anymore. We deliver technologies that they can see. (2:44)

We had the most beautiful day today, I can even show you a copy of it. That Oasis which we saw in the pictures, even at the beginning, in the Intro, that system on its own was tested today. Delivered the energy, delivered the gas, and delivered the water. It's not something we said we are going to do, as we've done, because technologies we don't. The Oasis system is in the hand of the Man. And we have to be wise, that when we put it out, test is going to be running next few days, next few weeks, we'll bring the change. The change does not have to come by changing the government in Tehran, or changing government in Washington. It comes by giving the technology in the hand of the Africans, in the hand of the third world nation. They see the benefit of it, they pick it up, and then those who think they are in power, have no power, because there is no need for the power. The condition doesn't come in anymore by going to the strong. It's going to the weak, to make the weak to understand they have a beauty and a structure, and bring it up, that they can enjoy, and they can go to the next step. Go to the third world nation, go to the Amazons, in Brazil, supposed to be the most advanced nation in South America, but you've got in Amazon so many people, poor people.

When I put the Oasis out years ago, when I saw today, (2:46) I sat with our people in the past week, two weeks, explained to what is going to happen, what is going to be, now it's time for you to understand the knowledge. We have the Oasis system in our hand today. The water produced, the power measured, the gases measured, but there's one hidden thing I have hidden in this Oasis system. When you create the system, through it, you have created the energy, you have created the condition for Man to elevate his Souls and be able to become Man of Universe, and transmute and transform. This Oasis which I gave, this Oasis which is in our hand, is not anymore for Man's physicality, is Oasis for Universal, and is in our hand. And we are not afraid to talk about it, we are not afraid to do it, because our team had to mature to it, and they were matured enough in the past three, four weeks, work past two, three months, to see, to be gifted, there's such a beautiful technology.

The Oasis is not just about the water, the energy and the gas. The Oasis in it, structure of it, is to give energy, fields, which takes Man in the dimension of the Soul, and the other side, to the dimension of physicality. One day I explain, I'll explain to our knowledge seekers, this system, the purpose of it, is not to create gas to burn, it's to create the fields of the plasmas, which allows Man to travel the span of the Universe, and that's the system that's in our hands today. (2:48) Was achieved around early this afternoon. This will bring peace, and we need to elevate the Soul of the Earth, what we call, world leaders, as the Universal Council connects to the Soul of us, understand our work, and understand the time has come, they have made this ?? call, and we respond to it.

Thank you very much for today, I have to go into another meeting, doesn't ever end, and I hope, I hope we see the beautiful time of peace, and changes, irrespective of world religious leaders, government leaders, and the rest. Man never had an opportunity as this year, this time, to see the establishment of peace, but we'll see, as we change the end of the wars of the nations, now we see the end of the wars of the religious, and then we can ??. Thank you very much.

Q: ... When are we going to upload all of your transcripts into an AI, so we can ask it our questions, whenever we want, we are ready to do this with your permission?"

K- Yes, but do you think has the essence of the knowledge, that I give you the right answer. I listened to one of these AI's very recently, and it keeps on talking, I think about, Nickel instead of Copper, somewhere.

R: Ah yes, well that, that was combining your technology, and comparing it to another one, and it got a little mixed up with that.

K- It got mixed up with that, yeah. So, it doesn't have the Soul to answer you the knowledge. (2:50) But if you are happy with listening to fairy tales, you're quite welcome.

R: Well I can sometimes distill the essence out of something, and it has some great answers, when it distills the essence from your books for example, and actually seems to understand what you're talking about. But, okay, well I'll let you work that out with Dr. Kim Chi.

K- Thank you very much indeed, thank you.
