

577th Knowledge Seekers Workshop February 13, 2025

(Quick Index 21pp, Introduction, Topic Index ; Need to do; Key Phrases, Words)

(Auto transcription from Elias)

Empty Space not empty; See according to bandwidth; Neutron (N) Fundamental Plasma; No research on size of N; Russians made 16% gold -compression; Compression not effect plasma; Pull N with M fields; Secret take one part out - not function; H is N - field inside N - imaginary boundary; Atom & plasma of atom; Not understand separation matter & plasma - KF T out of line with science - looks like magic; Persecuted because know truth; In time all will understand plasma; 2025 year of change; Control Energy; Biggest opposition religious & money people - matter scientists; Diagram structure of Creation - N proton electron; STM - STP- P; Inner - Middle - outer layers of skin - plants; MaGrav to understand power of fields; Trump open T; Understand plasma or stay locked up; Show T September; Stop prejudices; Stand resolute with Knowledge; If scientist accept have to change - Sharif U; Transmutation inside you; Fooled by ignorant people; Problem if professors not accept plasma - teach plasma as matter; War of science - both don't understand essence of plasma; Edison & Tesla; End of 2025 persecuted by religious & scientists - 2026 battlefield; Learn Knowledge - no intermediaries; Tap into his Soul for knowledge; Ghana could make gold - stole by British; Chinese admit hid data - lost trust; Too late to block T; Don't become arrogant; New systems to transmute at home; Make Vitamin D; Deuterium stable; Explains micro sonic energy - African inventor - can do like West; Energy from radio frequency - Chinese manufacturers - problem can explode; T limited to radio waves - needs battery - matter state; Studied Professor Miles scalar waves; Plasma covers everything - Oasis system; KF T used & modified by others; Be open - share T; Can short-circuit microchips; Plasma T cannot be destroyed or interfered with; Uses scalar waves - size of pinhead; How Tesla powered car from Moscow - didn't understand scalar - could use - Infinity Loop; Power from Moon; Mg Gans on own; Vitiligo disease - eggplant; Spectrum of Mg Gans plants - meat - mineral; Water in lungs - pneumonia - bed 15 degrees clear water; Nicotine in nightshades tomatoes; Breakfast cereals created through advertising - illness; Toxic materials used; Control through salt content - Hamburger chains; Connected to air, wind fire planet; Digest air; Higher fields radiate to others; Receive from all directions - 360 degrees spherical; From Soul through intentions - powerful; Target energies; Organs absorb energies; Too fat keep energies from organs; Blood types receptive certain energies; Liver - color of stool - death; CR Twinity MaGrav - feed; Oasis of Soul; Connect to emotions through pictures - words - letters; Sees 3-D images - Beings without P; Soul & P live parallel lives; When dream pop in and out Soul D - busy 24 hours; How he lives 50 years - accept life on both sides - not crazy; U Being don't need P; Prevent others access to memories through emotions; Alzheimer's too painful; Create emotional barriers; Women not allowed to speak - lips shake; Don't need vitamins; China uses both traditional & alternative medicine; Herbs not effective - chemicals - another strength; New diseases & emotion eat food out of season - all parts of world; Grow herbs with plasma - regain original power; Time & mixing cultures changed; GMO control seeds - food; KF system beginning of change - trigger to work; Have to give to take; Pain Pen repair body; KF Head sets

Topic Index

Ingredients to make Creation same - variety from conditions field interactions make;
Essence of Creator and Creation same; Can have life without manifestation of P; Open space gaps between galaxies & stars not empty; Cannot see them visually; Beings of U see according to bandwidth of field strength; We don't see what they see & vice versa; Everything comes from fields; Neutron (N) is Fundamental Element or Plasma - only manifest itself where field strength matches; No research on size of neutron, proton, electron; West quiet about Russians making gold - funded campaign; Produces 16% gold - use compression - T is dependent on matter state pressure; Was advisor to confirm - had all scientific data - explained to officials - dependent on Earth's condition - limited to 16%; Different than Plasma T - create materials out of interaction of fields; In Plasma - expand size of N, proton, electron; Expansion in matter - gap between atoms; How we make molecules - add Cu, Zn - composition of brass; N in plasma condition - specific methods - secret of transmutation and transportation; Compression not effect plasma; Pull N with M fields - MaGrav Positioning; Secret in teaching - take one part out - other part cannot function; H is proton & electron - really a neutron - look at totality; H is field inside N; Why H so important to understand physics; H is a Fundamental Plasma - has imaginary boundary - assume it's atom of H; In matter state when STM passes over P; P sits between Soul and P of object - depends which one look at; Confusion - don't know difference between atom & plasma of atom; Atom is matter state with P outside; Soul has P inside; Matter state see the created; Plasma state see the creation; Science not understand separation between two states - why Plasma T of KF out of line with present science; Only taught about physical condition; All rules of physics - matter state only - never considered plasma; Fusion in matter - never come true; Chinese held 1,000 seconds - higher temperature than center of Sun; KF does same process at room temperature - convert and transmute from one to other - Gans's and Cu; Scientists think our T looks absurd - like magician appears; Don't understand magic of energy; We are like man hung in Church for saying Earth is not center of U - because he told truth - understood beyond what man forced to accept; KF in same position; We have become aware of energy fields - they will crucify us - kings try to kill us - mental institutions - families detach from us; In time will understand process of energy transfer, transmutation, Gans's - then everything will change; Collectively we'll all understand how World of Creation is; Time of change has come - 2025 plasma energy will be understood; Matter-state understanding back thousands of years - we can control Energy; New promotion video - understand Knowledge of Creation; Biggest opposition to KF from religious & business people - matter state scientists; Burn wood to get energy - plasma - use energy to make wood - complete cycle of knowledge; KF goes from matter to energy - energy to matter - most KS understand; Diagram chart of : Energy as N - proton and electron : Half Plasma & Matter - STM, STP, P: Every structure in P - tissues of plants & stones - 3 layers of skin, Inner, Middle, Outer; These are all interactions of M fields; Science and Religion have blocked you from understanding - crucify anybody that tries - abuse in name of religion; Science use peer reviewers to steal - no difference between religious leaders - suppress knowledge & steal patents - Einstein, Stephen Hawking, Pope - thieves of Baghdad; Man only lives in P - science is playing with plasma; After Energy next step is MaGrav - go back to N, proton and electron - Energy - no D of P; Biggest problem KS &

Space scientists with engineers, professors - in matter state - plasma too far for intelligence; MaGrav for understanding power of fields; Drawing is how everything in Creation is structured; Saw in Flight session graphs showed 3 layers of STM; KS intelligent - taught whole process of Creation - go between matter and Energy - Energy back to matter for this they want to crucify you; Process of Creation goes from Creator to Man - Man to Energy - back to Creator; Bring out in 2025; President Trump - bring knowledge to Man; Knowledge is laid out in 3 Books; Man's ignorance looks for confirmation in P; Monthly Flight sessions to confirm Energy side exists - your thoughts and emotions; Learned how to make Gans's - now learn to use energy in field energy - go to Moon; You say you dreamt - witnessed your Soul go to Moon; Ignorant professors say show me in matter state - how to show emotion; Universal Community already understands Energy - Man doesn't - when Man understands - bring 2 community's together - job of KF in 2025; Use laws of nations to bring into action; Understand Plasma or continue suffering in matter; Locked up on Earth with passport; People of Color called immigrant - Whites called 'expat'; Terrorist or freedom fighter; Don't have this in Space - learn & implement on Earth; Show Man vastness and beauty of U - forget ignorance and prejudice - do in September; KS understand more about plasma than professors - they won't accept you; Felt Energy with Pain Pens and MaGravs; Jon felt energy of properly wound MaGrav; Stand resolutely in understanding plasma - no matter circumstances; Your job to explain it to others - KF work doesn't become magic - calling you guru; Chancellor of Sharif Tehran University afraid to stand by technology - problem we have; If scientists accept T have to bring the change; Put KS in mental institutions - deprived of love of family; You need to learn process of conversion from Energy to matter - then can translate it into language; Drawing is key to your understanding - enlighten people; If on CNN - accept it; Soon no CNN in Space - don't need rubbish talk - look at beauty of Creation; Understand yourself how Energies within transfer from one to another; Transmutation inside you - receive energy of U - balance with energy of planet through STP - create body; I made Man in image of Myself - manifest Myself when I need depending on local environment; We have been fooled by ignorant people; Learn transmutation and transportation - do it without understanding; Made Gans - plasma energy - frog-leaped across science of Creation; Helped by Universal Teacher - able to teach from nursery to graduate; Fear - when bring plasma out - matter state professor and everyone not truly understand - teach plasma as matter - no transformation - back to same old problem; KS only understand a little about Plasma - need people who truly understand its essence - can enlighten others; Problem when Universities want to teach Plasma Science & make PhD's - but don't really understand it - go back to matter; Had war of nations and religions - not war of science - one thinking understand better than other - but both don't understand essence of plasma; Saw with Edison and Tesla - Edison electrocuted elephants to scare public - stop Tesla's AC; Problems from religious leaders - knowledge of KF; Haven't yet seen resistance from ignorant scientists & kings; Religious people will say plasma is criminal - knowledge of God not for us to know - lose positions as prophets; You thought you were persecuted by your family, friends - wait until scientists & religious leaders join together against T; It will come end of 2025; 2026 will be battlefield between new knowledge & matter state knowledge; Mr. Keshe fought with kings and governments - Red Circle discredit us from within - for you not to have the knowledge; Through knowledge understand World of Creation and Creator -

don't need them as intermediaries; We are not gurus - we understand Science of Creation - teach it freely; Never has a knowledge been taught so freely, for so long, by one man in voice and writing; Tap into my Soul for knowledge - don't need voice or matter state; What you do when you pray to Creator; Are you still making statues - hanging around your neck - through ignorance; We can produce gold - bankrupt World Banks; Ghana had knowledge of making gold - British invaded Ghana stole gold - 2/3 their reserve; Shown to Chinese military 2023; They hid data for gold test - called them a thief - worst thing for Chinese; They admitted - can make gold - broke trust stopped work; Have video of generals - one day will release; Return stones of Vatican back to Coliseum before leave planet; Today's abuse by Church hidden; Chinese deleted pictures on phone with officials; World leaders try to block T - that time is gone; Understand knowledge and be kind - don't become arrogant - elevate their Soul that they understand faster.

Part 2

Change KF ads; Add new systems - easier to transmute; Transmute at home; Deliver technologies to citizens instead of government; Combine past technologies together; Start transmuting between rooms - then to office; Be ready to see huge changes in transportation and transmutation; Vitamin D is matter state radiation can be made; A knowledge already have; Understand how it's absorbed; Deuterium is stable cannot neutralize from water; Explained new T of African man Chikumbutso - micro sonic energy to power cars generate electricity - being developed by Chinese auto industry - in background; Inaugurated by President of Zimbabwe; Can't commercialize yet; Problem not known to public; Uses and receives energy from radio frequencies - can explode by accident or tuning into; Chinese company backing him; Amazing what African man has done without any education; Receiving energy from radio frequency - not plasma based; Germans working on Hydrogen; KF develops different technologies - others same time with similar ideas - all correct; Other technologies limited to certain areas - only radio frequencies; Plasma T covers all areas energy, food, agriculture, Space travel, life in Space, production of materials; Oasis system use Plasma T - produce Vitamin D - water with all minerals and vitamins; Stand next to - absorb energy; Actually receive and give energy; System can fly; Cannot be arrogant - say only solution; Our T is used - modified by others; Why we opened patents - teachings open and transparent - we can't be prejudiced; Gans's can do agriculture, Wellness, rest of it - through fields; We respect other scientists - share knowledge; Gans and Plasma T will mix with matter T - this is what MaGravs are; Used Plasma T to short-circuit microchip - observed by government scientist; African inventor uses microchips and electronics; Plasma T cannot destroy; Plasma microchips cannot be interfered with; African studied Professor Miles of Germany uses scalar wave - absorb energy as matter-state frequencies; Professor Miles made presentation at KF. Power little boat wirelessly; Miles discovered G, scalar wave; This Black Hole only works with matter frequencies - size of pinhead; Shows Africans can break through in T as well - amazing what he understands & describes - he found his working principle; Tesla used scalar waves in different way; Created Infinity Loop between tower in Moscow - car in New York; Hid how he did it; Tesla never understood how it worked but could use it; Why he couldn't understand scalar wave - thought M & G same strength - M slightly higher; Why Tesla's second car wouldn't run; Can power car

from Moon; African man working South Pole - cannot stop power surges - explosions; Problem - need to be near radio frequency transmitter - satellites etc - cannot work in desert or remote places; It needs a battery for storage; Not Mr. Trump - conditions created by his presidency will bring out T; Use Mg Gans on its own; Vitiligo disease - loss of skin color in patches; Can use Gans - see old teachings; Boil eggplant skin - Iranian scientists; P - sign of interaction of Souls with environment; For medical questions write to Dr. Kern at the Wellness Center - not in teachings; Can make Mg Gans from vegetables - broccoli - different versions; Need to know what type Mg short of, etc; Different field strength develops into pneumonia - water in lungs - same air - changed composition so it produces water; Doctors can't accept - energy creates matter; Change inclination of bed by 15 to 20 degrees water will disappear; Reduce 2 liters every few days; Position on bed creates pressure in lungs converts CO2 into water; Same how Indian Guru fed himself by changing posture; Mg has spectrum of fields in vegetables, AA of meat; Mg tablet is mineral state - not right form - convert to Gans; Have to understand science to be benefited by it; Say don't smoke because of nicotine; All races eat foods with high content nicotine - nightshade vegetables tomatoes, eggplants, etc; Nicotine part controlling neuro system; Processed breakfast cereals target children TV advertising; Past - nobody ate these cereals - created need in our head; Additives - research reports spikes in blood sugar, diabetes, other illnesses; Top brand breakfast cereal stored toxic materials in his warehouses - use tiny amount in cereal; Get addicted through salt content - Hamburger chains too; Be aware of what you are eating; Human race mixture of everything air, wind, fire of planet; Came from Earth rely on minerals - vegetables & meat have same minerals different spectrum; Missing understanding about what take from air; Understand how to digest from air; When one person transmutes - others will learn more easily; Those with higher fields radiate to others; Key is to understand how to apply; We take in things from every direction - 360 degrees spherical - get everything from all directions; Releasing Energy, vitamins, everything else from Soul through intention; It's understanding the process; Intentions very powerful and as plasma is a filter; You can target energies; Testimonials - see energies coming to them - feeding; Soul of body has intention - needs; Built system to target energy; Organs - kidney absorbs certain energies for itself; Why disease complications in digestion area - too much fat absorbs energies - then kidneys - organs don't get energy; Can change this by intention - bring energy to organs - have to do this in Space - body will absorb certain field strengths; Certain blood types more receptive to certain energies; Certain areas have certain field strength - shield when passing through; Liver passes energy to pancreas; Stool color changes - tells about liver - when will die; Design MaGrav in specific way - connect to it - give energies needed; New Cosmic Ray Twinity MaGrav system - person's name on it - don't let anybody touch - active; 2 knobs on side - configurations for holding hands; Choose Soul of P dimension; Turn system upside down; Will touch your Soul; Energy transfers within you - bring STM & STP into operation; Use intention and emotion to feed - change; Oasis of Soul; Connect to emotion through images - pictures - words; Take photo of someone - they give part of their energy - registered on paper; (Taking pictures of people without permission - take their energy); Letters - music do same; He see images as pixels - 3-D screen - don't see physical image - see energy image; Real physicality of energy - aware of their presence - see both dimensions; Soul travels during sleep - dream; P and Soul have parallel lives - both exist

on their own; Come out of dream and go back in; Busy 24 hours a day; Sleep it's not really sleep - it's a different life; He lives that way 50 years - accept to live life on both sides - aware of both; Sees a Soul coming through wall; Not dreams - not going crazy - Universal Beings don't need to manifest in P; They reflect light; Learn a lot from these experiences; Can prevent others from accessing our memories through emotion; Same way we create cancer with emotion; Alzheimer's don't want to remember painful things - create disease - create emotional barriers; Change C to block information; Get patches in brain; Senses do in P - emotions do in brain; Cut finger nerves bring to brain create pain - physical part; Emotions can also block; Plasma T overrides condition of Alzheimer's - start dealing with underlying pain - don't want - say T doesn't work; Especially in women - not allowed to speak their mind - lips shake - call it Parkinson's; Find out psychological reason behind - will disappear; Feed Soul - feeds emotion of P; Body doesn't need vitamins - doctors know how to use in matter; Traditional medicine blocking alternative medicine; In China use both western medicine or traditional medicine; Herbs not as effective as 100 years ago - chemicals pollution; Herbs moved to another strength; Herbs came within 100 km of living area - same fields; New diseases & emotions because eat food from all over the world at any time of year; Don't pay attention to seasons - different energy; Traditionally ate oranges only in winter; Creates different field energies - genetic materials modified; Wanted to grow herbs with Gans - no chemicals - regain original strength of herbs - effective; Through time and mixing of cultures we have changed - body hasn't yet evolved; Some cases do; GMO foods - they control seed production - total control over food supply; KF System beginning of change - trigger system to work; Transfer energy as food - observe what happens - how you change - give feedback; Vegetarian, vegan, meat version of system; Create food with intention of Emotion; Change we promised has started creeping in; For you to know yourself and understand what you need; If you don't feel anything - don't want to accept change; 3 layers of skin and N proton and electron - is a comparison; To take from environment have to give what it needs from us; Target energy with attention to that part; Pain Pens not just for pain - repair body; About using KF Headsets; About graphs in tomorrow's session.

Introduction to 577 KSW - Creating with the Atom - H Between Matter & Plasma - Radio Frequency Car from Africa - More on Tesla

The main thread of the teaching part of today's workshop was helping us to understand that Creation has two parts, the matter part which we see and the Energy part or plasma that we don't see, but is in fact, the basis of the Creation. We learned a lot about the essence of Creation which is the M field, but then how do we play and create the variety of all the different things we see and interact with? This is what Mr. Keshe referred to as the Creator being the baker. The dough is the same, it's how He puts it together and the different conditions He creates that makes beauty of life. I was listening to the teachings over and over trying to understand how we get from the Hydrogen (H) to all the different elements. We are not going to smash everything together like the scientists believe, but rather we'll do it through the fusing of the plasmas through the emotion of Existence. And this will come through understanding more about the H when it takes the form of a matter state atom and when it is in the form of H plasma, which are actually two different states. Then the teachings went in the direction of preparing us for the upcoming release of the

KF Plasma Technology in 2025 to the public. First he explained the current situation we are in with the sciences only being based on the matter state and not at all having any knowledge of the Energy or plasma. And that it will be a difficult transition and we as Knowledge Seekers (KS) have to remain resolute in what we have been taught about the true Knowledge of Creation.

First, let's talk about how we make the atoms into molecules. In the matter state they say atoms join together to form molecules by sharing of valance electrons in the outer shell. And alloys are another way molecules can join together to make different combinations of things, but in this case they are only metals. They do this through different processes of heating, pressure, using a vacuum, and other ways to join these atoms and molecules together. Keep in mind that generally they don't actually see the process happening. They do certain things and see the end product and then write up a theory about what they think happened. Mr. Keshe is saying that no scientist has ever done research to find out what heating and compression do to the size of the neutron, proton or electron. This was a hint that the sizes can be changed.

This teaching is very scientific orientated but it will help us all to understand the plasma better. He said it this way, in the matter state, theoretically, the expansion (of the neutron) occurs in the gap between the atoms and this is how we make molecules. For example, if we add Cu and Zn together then the composition becomes brass, which is a new matter state with different properties and uses. Our science has reached the level that we can join molecules and elements together through heat, compression and other mechanical ways of manipulating the matter state, but we are limited to the conditions the planet allows. However, in Plasma Science it is different and things like compression don't have much effect on the plasma as they are not objects. Plasmas are M and G fields and they are controlled and managed through field strength. If we want to pull a neutron (N), then we can use the M field strength like a rope. It's like how two magnets position themselves in relation to the strength of the fields. This is called MaGrav Positioning.

In different places in this workshop Mr. Keshe talked about 3 examples of how gold has been made. The Russians made 16% gold through a process of compression in the matter state. Later he said that, the rulers of Ghana knew how to make gold and the British invaded and stole it. It was not said how they made it. Perhaps they had enough Soul they could do it through their emotion, but that's only speculation. The third one was when he made gold for the Chinese Military last year out of the fields in a purely plasma process. This is to show us that both the plasma and matter states already exist and we are using them all the time without us knowing.

When we talk about making gold, alchemy comes to mind. Alchemy is said to be an ancient practice that was the precursor to modern chemistry where practitioners transformed base metals like lead into precious metals like gold. At the same time mystical teachings arose that talked about an elixir of life that could cure all diseases. As we are gaining knowledge it is very possible that some of these people ignited the plasma of their Soul and had access to greater field strength. The strange thing is we never find any actual teachings and methods of alchemy. Perhaps they have been suppressed by the

Church and governments or were purposely kept secret. One very amazing alchemist was Paracelsus and by coincidence today I came across a film from 1943 about his life. We'll post a link on the Brazilian Telegram. The film gives the feeling of the essence of today's teaching. Then the teachings started to go deeper into the meaning of the H atom and H plasma.

In the matter state, H is considered the Fundamental Element with only a proton in its nucleus and an electron orbiting around it. It's the most abundant element in the Universe (U) and through fusion it combines to make the other elements. This part is pretty much the same as what we say in Plasma Science for Hydrogen. Mr. Keshe calls H a Fundamental Plasma, but the proton and electron are in fact also a N. This is where matter state scientists will object. For one thing, they have made names for the N, proton, and electron, and have accepted certain assumptions about them, which they continue to build more theories and mathematical formulas on top of. So if we say that they are all the same energy in different amounts it will cause too many problems for them. But then how should we think about it? At this point in our understanding our main task is just to ponder over what he is teaching us. Remember a plasma is the interaction of two fields, so could it be that inside the N the proton and electron are those two fields? After all they are just energy and not the names they have been given. Then he said, inside the N we have another field which is exactly what we see as the H. And this is why H is so important to understand, if we want to understand physics in both the matter and plasma states. I think he means the H inside the N is a plasma and not matter. But then I am sure there is a lot more inside the N than just the H. It seems like the whole Creation is in there. But if we go that far then we won't be able to talk about it.

You can follow along with the drawing he makes at 27 minutes into the teachings. The way he is drawing it and talking about it, is that H is that foggy place of transition where energy becomes matter, and matter becomes energy. He says, they see the H atom and the proton and electron, but that boundary is really an imaginary boundary that we are assuming to be the atom of H. The way I understand it is, that the drawing on the left with the imaginary boundary is the plasma of H and the one on the right is the matter state atom of H. This is what the scientists have not understood, that H has two states, the plasma and the matter state. When we expand the STM over the physicality (P) we become a plasma like the H plasma, and the P is inside. What's interesting to think about is the atom of H on the right. Are these plasmas inside the circle? Then they would be just like our present state of when the STM is trapped inside our P. Then the plasmas of the proton and electron, which is the same as saying H, are trapped inside the H Atom, like our Soul inside our P? Is this why the matter fusion will never work because you are not smashing pure matter states together? It's only the outer boundary that makes it visible in matter state, and that's what they are smashing together. It would be like smashing two human bodies and expecting to get a child. It's interesting to think about, because if we get this foundational understanding of Creation correct, then the rest of the understanding will fall into place.

There is one last piece of knowledge that puts the whole thing in perspective. At the end he said something like, this is what we do in Transmutation we go from one to the other.

Then he drew a little box under the two types of H and an arrow from the H plasma to the H Atom, and said this is your Gans's. The arrow bounces off the box because that's the process of converting the fields from the Gans into matter state. There is a huge revelation here if we let it sink in. The conversion of H plasma to the H Atom is the fundamental process of Creation that is continually repeating itself. This little picture is showing us how all of Creation takes place. That's what we did in our Gans Box without knowing it. We went from the Cu, which is the H Atom through the Nano material, saltwater, and the rest of it to get the Gans, or H plasma. It's all the same process. This is what we are going to do in transmutation. It's so simple, that when we stare at this picture and ponder it, the mind resists, but the emotion says, yes, this is it, this is the knowledge we have been searching for.

For some reason the Reality likes the number 3. We have the Trinity of Father, Son, and Holy Spirit. Then Mr. Keshe drew an important diagram of the structure of Creation and how the M field interact. I will just summarize it briefly. The Energy or plasma is the N, proton, electron. We are considering the inside of the atom as plasmas. Then the STM, STP, and P are the middle way, or half matter and half plasma like the Gans's and our body. And the full matter state is the 3 layers of the skin, the Inner, Middle and Outer. The plants and even the stones have this structure. Maybe even the boundary of the H Atom has it too. And then of course, our MaGrav has a bottom, middle and upper coils. In addition, the 3 layers were shown on the graph of the STM in one of the Flight sessions. With all these examples, it seems that if we can understand this structure, we'll be able to understand how the U works.

Mr. Keshe wanted to prepare us for the upcoming change and because we understand the knowledge, the establishment will persecute us, as now we cannot be fooled like the rest. Maybe this year will be the time of testing for many of us. Will we be able to stand by what we have learned and sacrifice the sweet feeling of the fake love, and bear the weight of the denials of the others, so that we can bring the new emotion and the new way of life for the whole of humanity? Aren't we part of the fields interacting to create the new Plasma? We should be aware that the childhood wounds are laying dormant, covered over within us from living a life of conformity. There is one trick that might help us. If we understand that the root of all of our problems stems from not getting the true love in the formative years in the womb and as a child, and if we can expand the STM over the STP and feel that love, it will give us the strength to be part of the change. In the meantime, we can try to become aware of that 'vibration in the stomach' that occurs whenever we feel challenged, or fear we might be put out of the 'herd' and think that we'll lose the 'love.' These feelings have been covered up subconsciously that hardly anybody knows about it, but it is the major cause of why we live a false life. True love, or the 'spiritual love' is really the only remedy, and many people who have been close to Mr. Keshe and the reactors he builds, say they feel that love. And today he gave us a beautiful gift that Yogis spend countless years trying to attain. He said, those of you who want to go to the next level of understanding, you can tap into my Soul and you will get the information and knowledge. You don't need to hear the voice in matter state. Isn't this what you do when you pray to your Creator? In India they say, life is made of blessings

and curses. And this is a blessing beyond imagination. Let's hope a Westernized mind can understand and use it.

We should make it clear because some people misunderstood and thought Mr. Keshe said that Trump will help release the T. No, he won't consciously do that. There was a great Prophet who said, you know a tree by its fruit. And we have seen the 'fruit' of his tree. Someone like that will most probably not be able to come near a plasma reactor. I think of it like this. He is an instrument of higher powers and unknowingly or maybe because of the negative circumstances he creates, the Yin will switch to Yang, and somehow the T will have to come out. But we'll have to wait and see how it will play out on the world stage. Mr. Keshe said, that his presidency will be the greatest gift to humanity for changing matter state understanding of the world. His controllers will be shocked when he suddenly turns the tide against them.

And then in the beginning when the T does come out we'll have a huge problem with those who are in charge of controlling the acceptable social concepts, or those who run the universities, let's say. If they don't go through transformation and understand the Energy, how will they teach the true Plasma Science? The same way they do now, in the matter state. They'll teach it as a magic and a mysticism. And hopefully it will not give way to what he called, the 'war of science,' where two sides fight each other thinking they are right, when they both are wrong and haven't truly understood the Plasma. As Knowledge Seekers we have to be on our guard and not claim to understand the Plasma unless we have gone through elevation of the Soul. And those who have will become the most wise and humble people. I am sure the Creator has a bigger plan for how we are going to get through this transition period and not fall back into the matter state and pretend we have advanced into the Plasma. Mr. Keshe has successfully help other planets change and he'll be able to change the Earth too.

I came across a video named, "Can Radio Frequency Power an Electric Vehicle." It doesn't really explain how it works, but what was fascinating is that it has opened the discussion to think about what new technology would mean for the world. When our T comes out all we would have to do is to replace the words 'Plasma technology' instead of radio frequency. Nobody out there seems to understand what this commotion is all about, except Mr. Keshe. He has explained in detail what the Zimbabwean inventor Maxwell Chikumbutso has created. Weeks ago Mr. Keshe was saying that the new T should come out in Africa first. He also gave many praises to Mr. Chikumbutso for his achievement as an uneducated person in being able to master his particular point of that technology. And let it be known that Africa has just as much right to be part of the advancement in technology as anyone else in the world. And shame on those Frenchmen who stole the metric system from the Africans and blew the noses off of the Sphinx in Egypt, because they couldn't stand the beauty of the African nose. The videos coming out on Youtube are mostly public relations propaganda and have misleading information.

The "micro sonic energy" is really radio frequency that originates from towers that broadcast radio frequencies throughout the cities of the world. It's not "free energy," as they are saying. In fact, the cars won't be able to run where there are no towers like in

deserts and remote places. And somewhere they are burning fuels to generate the electricity for the radio frequencies, so it is not truly green. They say it doesn't have a battery, but Mr. Keshe says they will need to be able to store energy some way with this T. There is a top Chinese car manufacturer who is spending millions in the background trying to bring this out, but because the system can absorb too much energy and explode they cannot commercialize it yet. This technology has a very limited scope of what it can do. It is not at all like the KF Plasma T which covers all aspects of life from agriculture and wellness to Space travel. Soon the KF Oasis system will come out.

It is believed that Mr. Chikumbutso studied the work of Tesla, who understood the M fields, and Dr. Konstantin Meyl of Germany who understood "scalar waves," which are G fields. Mr. Keshe said he is using scalar waves in the matter state which only required the size of a pinhead to utilize and that's why the systems are so small. Dr. Meyl sells kits on his website for actually testing scalar waves in wireless transmission, but you will never hear about this in the Media. In this discussion Mr. Keshe told how Tesla powered his car in New York from Moscow. Listening carefully, he did say that Tesla generated a plasma in Moscow and created an Infinity Loop interaction with his car in New York, and because it was plasma the Tesla Tower could be on the Moon and it would still work. Even though Tesla didn't understand all of it, he was able to use the T. There is a major problem in how the M field splits so you can't power more than one device and this is why Tesla's second car did not work. I don't remember ever hearing about the second car. This is the problem with these kind of matter state technologies, they are very limited in what they can do. Whereas plasma technology is not limited and covers all aspects of life and it will change humanity to become peaceful and the other technologies won't do that.

There was an important teaching for us about the Soul & P and how we seem to pop in and out of each others lives. The way I understood it, is that the Soul life is continuous in its own dimension, regardless to what happens with the P. The more we elevate our Soul through the plasma systems the more we will be aware of the Soul's work. He said, the Soul is busy 24 hours a day even when we are only aware of the P and doing things in the physical D. He said he is aware of 3-dimensional Beings that he sees in front of him as kind of like pixels on a TV screen. He stressed that the experience is real and that we are not going crazy, and as we advance more it can start happening to us. Perhaps because the transmutation is coming closer he wants us to be aware of these things so that we should understand them correctly. He can even see a Soul coming down the hallway, which implies the matter state is transparent to the Energy state and they just come through the wall. As we go deep into the plasma this will become our life too.

Other topics:

Nicotine is partially used by the body to control the neuro system and we eat large amounts of nicotine in nightshades like tomatoes;

We can prevent others from accessing our mind through our emotions;

New emotions and diseases have come out of the change in the world by being able to transport the food anywhere, anytime, and out of season. This is because the food is created at a certain field strength and transported to another. With more knowledge we'll have more things to consider when we do something in the matter state.

Thanks for listening.

Quick Index

(When we understand more about the work of the Creator and Creation we'll start to realize just how beautiful the Creation is. It's like if you are a cook and have all the same ingredients (as the others but) you mix it in a different way and you give it your own taste, texture, and color. Or another way to say it is if you put the same ingredients on a table and ask 10 cooks to make something with it, they will come up with 10 different dishes that are unique. This is how the World of Creation is, but fortunately we only have one cook called the Creator, God, or whatever. The conditions are what creates different recipes within the same environment of the same kitchen, we call the Universe (U). The ingredient for cooking is exactly the same. He uses the same flour, milk, sugar, and the other things, but from the same dough the Master Cook will make a bread, cake, or croissant with the same ingredients. So in the World of Creation it's the same. We have the Creator and the different conditions in (each) U that creates different products (with different purposes) but they're all delicious to eat. If you're a human, you enjoy the life of a human. And if you are a Martian you'll enjoy the life of a Martian. (It's all relative to the one who tests and tastes the food on that table). But in essence the Creator and Creation are all the same. It depends on how you twist it, what kind of dough and what it will give you in the end).

(The life of cycle of the fields of the Creator are all the same. It's how they entangle with each other and the amounts and the strength that create different opportunities and chances in physical life like being a planetary system, or a star which has its own life. And then there is life that has no manifestation of physicality (P) and the man will soon learn that it is still a life. In open space gaps between galaxies and stars we see are not really empty, they are full of life. But they use a different "recipe" to keep themselves together and exist. We only look at life (if it is) in the dimension (D) of physicality and we them bunched together and call them a galaxy. But as much as we see in the physical D, there is life in those empty gaps, which are even bigger than the galaxies. We don't have a way of seeing them visually. (It's like when we look at X-Rays of the body and see cancer cells, we only see the solidified part and they are like the galaxies. ?? They have a length). The universes, galaxies and planetary systems are where the energy has managed to manifest itself in the D we can see them. Not (all the Beings in the U see what we see. Many stars and planets which are visual to us, are invisible to them, because their bandwidth of the field strength (cannot see it)).

(But in essence, ?? everything comes from the fields. It's for us to understand this. We taught this last week when we referred to the neutron as being the Fundamental Element mentioned in the Books. But this Fundamental Element, or Fundamental Plasma can only

manifest itself (in an environment that matches its field strength. ?? The field strength dictates, whether or not it can manifest). Today in the world of physics they do experiments to understand about heating, expansion, creating pressure, and vacuum, but there has never been any research about what heating and compression do to the actual size of a neutron, proton, or electron and how it changes it).

(The West is trying to keep very quiet about the research done by Russian scientists that will bring huge changes. It's similar to Keshe Foundation's work. In the very recent past when one of the world leaders wanted to compete in an election, but he had no funds, so they used a technology (T) and developed it to fund his campaign and he won the election. The Russians have come up with an amazing system where they can mix materials together in a specific way that it will produce about 16% gold. They use compression with a specific way of mixing, and hardly any chemicals are used. It gives a 16% gold residue. This gold was used to finance one of the biggest elections in the recent past).

(But that T is dependent on the matter state pressure (and how much it will give). I was supervisor ?? an advisor to the confirmation of this T and had all the scientific data in front of me. I explained to the officials, that the gold was created out of the pressure, (and it's dependent on the Earth's condition and that's why you can only get a maximum of 16%). That's different than what we do in Plasma T, where we create materials out of interaction of the fields. In the matter state we have to compress the materials together, but in the Plasma technology, we never measured the size of a neutron. Intelligence research up to now has not confirmed the exact change of the size of the neutron in a vacuum, heat, compression, or on any other condition).

(In a way, we cannot change it with the physical matter. But if you understand the Plasma T there is a way to expand the size of the neutron, proton, and electron. In the world of physics today we say, the size of the electron is 2,000 times lighter than a neutron. In physics they see things and make assumptions, but they have never scientifically measured the size of a neutron, proton, or electron in the matter state condition).

(Theoretically the expansion in the matter state is the gap between the atoms. This is how we make molecules. (We can add copper, zinc, or whatever to make a composition of say, brass or anything else). In Plasma T we can only change the size (by the amount of fields in a condition, because ?? they are not objects anymore. The neutron is in the plasma condition and we have to use specific methods. This is the secret of transmutation and transportation. This means in matter state we use a mechanical system to (do something to an object like pulling it with a rope. Or we can use pressure to compress it). We can't do this in the world of plasma. Compression has only a slight effect, which amounts to nothing. There is no way we can physically put a rope around the neutron and pull it. But we can pull the neutron using M fields. We can use the M field strength like a rope. But how do we tap into it? This is why when you put 2 magnets together, one magnet moves or gets attracted. You don't physically push the magnet away. Physically it's the strength of the field that dictates its position. This is what we call MaGrav Positioning).

((?? The Knowledge Seekers (KS) should have understood this process, because it's a secret that ?? appears in all the teaching of KF. ?? If you take one part out, the other part cannot function). Physics say, that a Hydrogen (H) is a proton and an electron, but in fact it's really a neutron. We look at the two halves (of the proton and electron), but we don't look at the totality of it. The structure of the H as proton and an electron, is exactly what's happening inside the neutron. (Inside the neutron we have another field, which is exactly what we see as the H. This is why H is so important to understand physics in the matter and plasma state)).

(In the World of Creation the plasma H structure is very simple and this makes a lot of sense when we look at science, Space technology and physics. We say H has a proton and an electron. But in fact, Hydrogen is a Fundamental Plasma, it has different characteristics. It's what we see as an atom of Hydrogen. In a scientific way, it doesn't have a physical boundary as we are used to. It has an imaginary boundary, which we assume to be the atom of Hydrogen).

(?? This is (what happens) in the matter state when the Soul of the Man (STM) passes (over) the D of physicality (P). The actual P sits between the Soul and the physicality of the object. Then it depends which one you look at. The confusion in the world of science today is that we have not identified scientifically the difference between an atom and the plasma of an atom. The atom is matter state with a P outside. Whereas (?? when we look at the Soul (in its own state) then the P is inside). ?? In matter state we see the created and in the plasma state we see the creation. The present world of science has not understood this separation between the two states. This is why the Plasma T of the KF is out of line with the present science, because we have only been taught about the physical condition. All the rules of physics is written, dictated, and drilled into our head is for the matter state only. We have never considered the plasma or the energy state).

(This is why I have always said that fusion in the matter state is a dream which will never come true. The Chinese have now done 1,000 seconds at so many time higher of a temperature than what they call the center of the Sun and the rest of it. They produced an atom of whatever, H, Tritium, Deuterium, or whatever they call it. The KF does the same process at room temperature, because we have learned how to convert and transmute from one to the other. This is your Gans's and this is your Cu. To the scientists our T looks absurd, because it's like when you stand in front of a magician and one second you see the cup, and the next second you see the ball. We have not been taught about the magic of energy, or plasmatic fields in motion).

(At the moment, M. T. Keshe, the KF, and you KS are exactly like when the first guy said the Earth is not the center of the U and they hung him in a church, in the house of God. For what reason? Because he told the truth. Because he understood beyond what the man was forced to accept. And we are now in the same position with the KF. We know more than just the matter state, but also about the Knowledge of Creation. We have become aware of the energy fields. And they will crucify us, the kings will try to kill us, put us in mental institutions, and families will detach themselves from us, because we are

(coming to understand the science of the world of energy, which leads to the creation of the matter state). For this we'll be crucified. But the time will come when man will understand the process of energy transfer, transmutation, what we teach as Gans's, and the energy side of Creation, and then the whole thing will change).

(Collectively we'll all understand what and how the World of Creation is. The time of the change has come and 2025 is the year when the plasma energy will be understood to be as correct as what we consider the matter-state is today. (Up to now we have spoken about the plasma as Gans, and the transfer of energy (through) M fields. But for those only believing in the matter-state they are still back thousands of years ago when they were sacrificing virgins, believing that it would do this or that. But in the world of Energy there are no sacrifices, because (we can control the Energy)).

(There is a new promotion video that should be completed in the next couple of weeks and it will show how we'll bring this knowledge for man to understand. (We'll structure it so that for the first time man will understand that the KF and the knowledge of plasma is the Knowledge of Creation. The biggest opposition to KF and the work we do will come from those who are religious and those who want to make financial profits). Then the other group will be the matter-state scientists who are not willing to switch to understand the Energy state. The foolish thing is that we burn wood to get energy, but we haven't managed to use the energy to make wood and this is what will complete the cycle of the knowledge. In KF we go from matter to energy, and from energy to matter).

(I'm sure that by now 99% of the KS understand this and where the similarities are and where it fits into our position. The beauty of the knowledge is in its simplicity. It takes us back to the fundamental elements of the neutron, proton and electron. Whereas in the body of the man we have the STM, Soul of the Physicality (STP), and the P of the Man. Every structure in P like the man's body, including tissues of plants, and stone also have the same principle of having 3 layers of the skin, the inner, middle, and outer layers. Mr. Keshe draws the 3 structures next to each other. On the left side is the Energy, which are the neutron, proton, and electron. The middle drawing is half Energy and half Matter as the STM, STP, and P. And the Matter State is the 3 layers of skin, inner, middle, and outer. This is the World of Creation but man has not understood it. They are all interactions of M fields).

(The world of Science and Religion have blocked you from understanding this and they crucify anybody that tries. This is abuse in the name of religion. (And in science they use the 'peer reviewers' to steal what others understand to make themselves look good). There is no difference between the religious leaders who suppress knowledge and those who steal patents. These are people like Einstein, Stephen Hawking, and the Pope. There is no difference between them, they are all the "thieves of Baghdad." (The term "thieves of Baghdad" came about when the US Military allowed thieves to rob the museums of Baghdad, but protected the oil refineries. In other words, those in power sanctioned and even helped people like Stephen Hawking to steal and publish the knowledge in Mr. Keshe's paper submitted to the Royal Institute as his own. This keeps the people ignorant because he couldn't explain what he stole)).

(Now you KS can understand this drawing because we taught you the Knowledge of Creation, (which they kept from you by fear of punishment or making it mystical with terms like Holy Spirit). The man only lives in the world of P. At the moment science is playing with understanding plasma but they have not crossed over to understand the full structure. After you understand about the Energy the next step is the MaGrav and that is why we gave it to you. ?? Through the MaGrav you go back to the neutron, proton and electron, which is the Energy or plasma condition because there is no D of physicality. He draws this on the far right side of the diagram as plasma. The biggest problem KS and Space scientists will have is with the engineers, professors and the rest of (the established Academia), because they are in the matter state. Plasma is too far for their intelligence to understand).

(This is why I've been telling you that the MaGrav systems we gave you are not for electricity, they are for you to understand the power of the fields. There is nothing in the World of Creation that is (structured) any differently than what is on this drawing. We showed you this in a very simple system through the structure of the STM. If you were ?? in the Flight sessions with us during the past few weeks and months, when the energy came from Space we saw it (?? on the graphs) in three layers in the STM and the fields. From a bigger (perspective) we saw the fields coming in ?? to the top layer, and then it converted between the two (?? upper layers) and then to the bottom layer. (?? The top layer of the STM went to the physicality)).

(Now you understand how intelligent you KS have become. You've all been taught the whole process of Creation. You can go between the matter state and Energy, and from Energy back to matter. They want to crucify you for this, because now you understand the process of Creation from the Creator to Man and from Man to Energy and then back to Creator. This is what we'll bring out in 2025 through the structures in our hands. One of the biggest gifts given to Man today for changing this world of matter state is called, President Trump of United States. You will understand soon why and how, and how we will utilize this opportunity to bring the knowledge of the Man to understand the Totality).

(The KF plasma physics can go from the Energy to create matter and then go back to energy. This is the knowledge of transmutation. At the moment, man can only physically transport matter. He has not yet managed to understand that the vertical side also has a horizontal side on the other side of it. The foundation of this knowledge is laid out in the three Books. It's the ignorance of man that he looks for confirmation in physicality. This is why we run the Monthly Flight sessions on Fridays, so that you can get confirmation that the Energy side exists, and that is your thoughts and emotions. We call this transmutation in the D of Energy. When we don't understand this then whatever we put out looks like magic. But in a way, we still understand this simple process).

(As the Master Chef he has taught us (how to cook everything) with the same (ingredients) on the table. We are the (student chefs learning) at the table with the same ingredients. We all use Cu, Zn, salt and we make the Gans's with them. But now we can

learn something more, and that is we don't need to transfer energy into the matter energy, we can use the energy in the field energy. (Then when you are online with us in a session and we tell you to go to the Moon, later you will say, that you dreamt about going to the Moon. But actually you didn't dream it, you witnessed (your Soul take the trip)). (Maybe he means you didn't dream it as commonly thought of as a fantasy and not real). As they say, ignorance is bliss. And when this bliss is there you cannot do anything with it, because then the magicians use it). (In other words we enjoy the pleasure of being ignorant and then others can abuse us)).

(I think he is trying to say that the best thing that ever happened to man, is when he said to the others, you have to show me or I won't believe it. But how do we show you your emotion? What you call your dream is actually the Soul traveling somewhere. And this is the problem we have with ignorant uneducated people even at the level of professors in the matter state. They try to protect themselves from truth by saying, "show me." (If I show you something in P then you accept it. But if I show you your grandmother who died then you say it doesn't count, because I was asleep dreaming)).

(The majority of the Universal Community understand the level of Energy, but Man doesn't. So first we have to get the Man to understand so we can bring the two community's together. This is the job of the KF in 2025. We'll use the rules and laws of the nations to bring this into action. You will soon understand, that the biggest gift for the technology to be transferred to everyone is literally, if you understand it, (has been) given to Man).

(Do you want to understand the Plasma or continue to suffer in matter state? Do you want to be locked up on planet Earth with a passport? Then wherever you want to go they call you a foreigner or an immigrant. If you are Black, Asian, Middle Eastern, or a person of color then you're an immigrant. But if you are White then you are an 'expat.' If you are a person of color and you enter a border control, then they profile you as a terrorist. But if you are White then you are a freedom fighter. It all depends on the color of your skin and the paper you carry. We don't have this in Space. Man will learn this in the Space and bring it back to Earth and implement it. Man has to be shown the vastness and beauty of the Universe for him to understand his ignorance and prejudices on this planet. We are set to do this in September or October of this year).

(KS understand more about the plasma than the matter state professors and therefore they won't accept you because they only see matter state. You have become aware of the Energy state and you've experienced the benefits of it in the Pain Pens and other things. We gave you the MaGravs to feel the energy. Jon used to say, (if the people want to experience the energy they have to stand on a MaGrav whose coils are correctly wound). (When you understand the Plasma you have to stand by resolutely no matter what the circumstances are. It's your job to explain it to the others so that the work of the KF doesn't become a magic show and they start calling you 'a guru,' or whatever. (As long as you want to feel happy being ignorant you won't learn anything new)).

(Mr. Keshe gave the example of the Chancellor of Sharif Tehran University when 5 heads of universities were sitting to approve the technology or not, in around 2008. He said, Mehran-jan, you have discovered gravity, but if I say yes to this I have to stay and see your technology through the Sharif University and I'm retiring in a few months time, so I will stay in the middle. You already have 4 votes, go ahead." This is the problem we have. The scientists understand, but if they accept, then they have to bring the change. This is how you KS have been put in mental institutions, or deprived of the love of your family for trying to show them something (new and a real solution). (One of the reasons is because you always tried to show them what it does in the matter state, and you haven't yet learned the process of conversion. ?? When you understand it yourself then you can translate it into language)).

(Learn this simple drawing on the screen because it is the key to your understanding and to be able to enlighten people. You can show them that this part of matter state is where all the scientists are, it's where the plasma nuclear power is, we are one step even beyond that. If it's on CNN, then we'll accept it. But soon there'll be no CNN in deep Space, or on the Moon. If you are on the Moon would you like to tune into all that rubbish talk, or would you like to look at the beauty of the Creation?)

(It's for you to understand yourself, the Energies within and how you transfer from one to another. The transmutation sits directly inside you, it's where you receive the energy of the U, and you balance it with the energy of the planet, and through the STP you create the body of the Man. You have to learn how to (do it). I made Man in the image of Myself, I manifest Myself when I need and I live in the realm of the energy to create what I like depending (what is available in the local environment)).

(Now you understand exactly how you Knowledge Seekers have been taken in by ignorant people. ?? Through the advancement in communications T you have been able to learn the basics of the transmutation and transportation, and conversion from energy to matter and matter to energy. Even though (you don't understand it, you have been able to do it. You just put the metal in the Box and got the Gans at the bottom. But actually it's plasma energy. You frog-leaped across the science of Creation in a very simple way through the help of a Universal Teacher. Because we know how to teach people even in nursery all the way to graduate school).

(This is what I understood Mr. Keshe to mean. My biggest fear is that when we suddenly bring in the Plasma Science those who are in the administration positions only understand matter state. Then when we switch over, they will try to teach you plasma as matter state, because they never went through the transformation themselves. (We saw this when the Pagans became Christians in the 4th century. Overnight the Pagan administrators if they wanted to keep their jobs they had to be baptized a Christian. So all the Pagans became Christians, but not really. So Christianity in the society, in essence, went back to Paganism and only switched the words to Christian words. Ordinary people won't understand this unless they know what the essence of Paganism and Christianity are and what the difference is. The Spanish film "Agora" in 2009 captured this same dilemma which the Plasma Science will soon face. As they say, the blind cannot lead the blind)).

(Many KS have understood a little about the Plasma because they made some Gans's. So you have bridged the gap a little bit. (This will become a big problem for you. (We need people who truly understand the Plasma in their heart, and understand its essence. It's the same as being enlightened in some way)).

(?? The real problem will start in a few years time when the Man wants to teach Plasma Science at the Universities and make PhD's and everything else for Plasma. (The danger is we'll get the same old mentality back again into society, but they will just use the words of Plasma). We had the wars of nations against nations, then religions against religions, now it will become a war of scientists trying to show that one is more correct than the other, when they are both wrong, or don't understand the essence of Plasma. They haven't understood that when the field strength of a plasma reduces, then according to the Inertia it becomes matter, and when it goes to the plasma Inertia becomes plasma. (The same thing can be both, and that's what people can't understand).

(This was the difference between Edison and Tesla. To stop Tesla, Edison went around the country electrocuting elephants to scare the people from using AC. It only worked for a few years and the Europeans adopted AC and the Americans followed).

(We will see this coming from the religious leaders in respect to the knowledge of the KF. We have not yet seen the resistance that will come from the ignorant scientists (who want to hold their position), and from the "kings" as well. (The religious people will say that the plasma is criminal, (or from the Devil). They will tell people that the knowledge of God is not for us to know, because then they will lose their position as prophets. They will lose all the religious titles they created for themselves. You thought you got persecuted by your family, friends, and the people around you because of this knowledge? You wait until the (?? the scientists and religious leaders join together against the T). That will come at the back end of 2025. And 2026 will be the battlefield between the new knowledge, and the matter state knowledge and those who will lose their positions in the world of religion).

(As the song says, 'you ain't seen nothing yet.' You think you had problems with your family and friends, saying that you joined a sect or whatever. I, as Mehran Tavakoli Keshe had to fight with kings and governments. The king planned to kill and his proxies like Red Circle created everything to discredit us for you not to have the knowledge. You have not yet seen what the religions will do to this technology. Because through the T you'll understand the energy and the World of Creation and the Creator. Then you won't need them as intermediaries. We are not 'gurus,' we are people who understand the Science of Creation and teach it freely. Never has a knowledge been taught so freely, for so long, by one man in voice and writing. (?? Those of you who (want to go to the next level of understanding), you (can) tap to my Soul and you will get the information and knowledge. You don't need (to hear) the voice and you don't need the matter state. Isn't this what you do when you pray to your Creator? Or are you still in the process of making statues and hanging them around your neck? It's you who has put yourself around your own neck, through the noose of your own ignorance, and not the knowledge).

(We can produce as much gold as we like to bankrupt the World Banks. There is an old knowledge of how to make gold that is known in Ghana. (The people in power know about it. The Central Bank of England, and not the Monarchy, took advantage of this knowledge. When the British invaded Ghana they stole thousands of gold bars and brought them back to England. Two thirds of their gold reserves are stolen from Ghana). But KF can make more gold than is in any bank on this planet, and we have shown it. The Chinese military confirmed it. In 2023 we tested it in the mountains north of China at a gold mine. They tried to say that they didn't see any gold. So I took scientific papers into a meeting with about 20 representatives of the Prime Minister, Chinese military and the rest. Mr. Keshe asked them where they hid the data for the gold test. They got offended when he called them a thief. For the Chinese that's the worse form of humiliation for them. A few days later they met in Central Beijing and the head of Chinese Military Committee admitted it. He said, "Mr. Keshe, you have found out how to transfer energy into gold. In a different way, you have changed materials into materials, energies to materials. And we accept that we hid the knowledge. Now we confirm you are correct.")

(It took an insult for the government to come out with the truth. But humiliation meant there was no trust and everything stopped. Because admitting to stealing and hiding does not leave much room for trust. The beauty of what we did in China is that we kept a video of these generals. They always covered their faces, but somehow we got a picture of them on the video. One day I will release their names and their pictures).

(It will be the same with the men in robes. They have to hide for them to keep their jobs. I made one promise, that before I leave this planet, I'll return the stones of Vatican back to Coliseum. It's where the man was abused physically, but at least he (was told about it and the abuse wasn't hidden, like it is today. Now you understand what is about to come and how the game (will be) played)).

(He told the story again how the Chinese invited him to a high level diner and he left his phone with them for security reasons. They deleted all the pictures with him and the officials that they took together. He had a backup copy and one day will release them).

(The world leaders who understand the power of this technology and try to block it. But that time is gone. The religious leaders and not your families, will be the next step for you as KS who understand the T. You have to be resolute. You have to understand the knowledge, and be kind. As I said last time, don't become arrogant. Elevate their Soul that they understand faster, that they can catch up with you, that you learn from them the new technology).

End of Quick Index Part 1 - 577 KSW

(The KF ads will be changed soon with the latest products. The Gans's are for next Friday not tomorrow. Tomorrow we will make a fingerprint of your Soul so nothing should be in your hands to be added to the test. Soon we'll add a new range of systems to

make transmutation. They will allow you to expand the fields and that you can transmute at home. There is an advancement in technology to make this possible. We want to deliver technologies in the hands of the citizens, instead of the government. ?? We'll combine the different technologies you have purchased from KF over the past years. You will be able to transmute between two points starting from room to room and then to your office and the rest of it. ?? The new systems will be very elaborate and sold as Twin sets. We will see how we change these in the future. In that process be ready to see huge changes to come in transportation and transmutation).

Q: How could we make the Gans of Vitamin D?

K- Vitamin D is a matter state radiation and it can be replicated and made. (It is very easy to produce, but you have to understand the T and its application and implication. It's a knowledge which you already have. It's in the teaching and it will be well taught. Understand what the purpose of vitamin D is, how you absorb it, and what it needs to be absorbed).

Q: How to remove the Hydrogen isotope known as deuterium from water, which accelerates the aging of human beings? How to neutralize deuterium from water?

K- You cannot neutralize it. Deuterium is stable. You have to find a process to extract it. More than neutralizing.

Q: A KS helped a friend's dog suffering from a tumor on his lower back. He gave him salts from an old Cup with Cu & Zn and put it in extra virgin olive oil and massaged the affected part, then clean and replace it everyday. The little dog healed. Did the amino acids (AA) in the oil play a role in the process?

K- Yes, it does.

R: Is the olive oil one of the better oils to use for that kind of process?

K- You can use any natural oil. (It should be natural, not synthetic).

Q: There is an African man in Zimbabwe, Maxwell Chikumbutso, who has developed a technology called, 'micro sonic energy,' that can power a car and generate electricity for general use. Would this energy be similar to plasma fields that he is capturing, or is it totally different?

K- (This technology is being developed by one of the top Chinese brands in the car industry. It also was shown as a source of power on the back of a television. It was inaugurated a couple of days ago with the President of the nation present. The Chinese say it has some technical problems so it can't be commercialized just yet. Otherwise, this T would have gone "viral" around the world. The problem is not known to the public, but as it uses and receives radio frequencies it is receptive to explosion. (?? If you were able to tune into it, or if it accidentally pass a zone with different frequencies it could cause it to explode. It uses the energy from radio frequencies (?? that are generated off of satellites and radio transmission towers).

(It's not something new I have been following this man's work for 2 or 3 years. Originally he showed it supplying power on the back of a big screen television screen. (But they didn't show you the other part, that there are certain radio and television frequencies, which this system cannot block and it can destroy the TV. The Chinese company that is backing this man is trying to find a way to block certain frequency ranges that can lead to explosion).

(It's amazing what this African man has done without any education. He's a village boy who educated himself and now he is coming up with some beautiful ideas. But this is based on (receiving energy from) radio frequency. It is not plasma based. There is another system like this being worked on by I think a German group. They are talking about using Hydrogen. It's more expensive and they haven't managed to bring it down to a workable condition. (The African man has made a (large power generator with this T). But they have problems with the system exploding and malfunctioning). (We also see explosion of the batteries in Tesla cars)). It's amazing what this man has achieved).

(As the KF develops different technologies we always see other people at the same time coming up with (similar) ideas, and they are all correct. These other technologies are limited to certain areas. Like this one is limited to radio frequencies. Whereas with the Plasma T it applies to all areas such as energy, food, agriculture, Space travel, life in Space, production of materials, and more. When an organization covers such a wide range of technology and sciences, you always see other people coming up with the same things, or in parallel, or using other materials to do the same thing. The principle is that with the KF technology you cover everything. Very soon you will see one system that not only produces energy, it also produces materials, food, fields and motion, and works the same as the Earth. Our scientists are maybe 2 to 3 months away from (completing it). We have produced the Oasis systems using Plasma T. The system can also produce Vitamin D. And it can produce water with all the minerals and vitamins you like in it. Or you stand next to it and absorb the energy. You actually receive and give energy. At the same time, the system is set to lose weight and fly. This is how the KF technology is structured (to cover everything)).

(We cannot be arrogant and say we are the only solution. I'm sure our technology has been taken and modified by others. And new knowledge has been added to it, and new technologies have come out of it. That's why we opened the patents and why our teachings are open and transparent. We can't be prejudiced. You cannot fly or grow food with this radio frequency technology. Whereas with the Gans's we can do all kinds of things in agriculture, Wellness and the rest of it. We have never had a problem in sharing technology. We respect other scientists who come up with their own intellectual understanding of science).

(I'm sure in the next decade or so we'll see a lot of mixtures of the Gans and Plasma T with the matter state T. What do you think your MaGravs are? You use Cu, Nano coating, and field plasma, and you create different conditions and energies. This is the principle behind it. We don't want to discredit anybody by saying we are better, no. We

brought a fundamental knowledge and with it comes changes. While at the same time, there are other technologies. As long as we stay open-minded and understand this principle, then we'll have no problems. We have to stay open-minded. This man has done a lot of work. At the moment it is not commercialized because of the problems with explosions from absorbing different frequencies. In a way, it could be targeted intentionally or unintentionally. (?? There will be a lot of recalls in the car industry if you know how to radar it)).

(Let me explain something else to you. Last week I said we have shown how using Plasma T we have wiped out, or short-circuited a microchip. This was observed by government scientists. And this African inventor uses microchips and electronics. Now you can see where the next step sits. With the Plasma technology you cannot destroy it, if you understand the process. You can create new conditions, and because of the diversity of the fields it will get absorbed into the fields. Any kind of matter state electronics in the future will have this disadvantage, but plasma microchips won't and cannot be interfered with. Is it because of MaGrav Positioning?)

(It's in the patents of 20 years ago. He doesn't use any solar cell or any fancy things. It all sits inside his system. The principle behind his work shows he understood and studied the work of Professor Miles of Germany. He uses the scalar wave, which means it can absorb energy, the matter-state frequencies. You don't need a huge box for that).

(When we gave a conference in Ninove, Belgium Professor Miles himself made a presentation. In Germany he showed me a little boat that was power wirelessly. He said, it was not Tesla's work. I always said, that Tesla discovered the M, and Miles discovered G, or the 'scalar wave.' In a way, it's a Black Hole, but that Black Hole only works with the matter state frequencies, and doesn't need more than the size of a pinhead to (work)).

(The African man achieved this very nicely. But still he uses matter in the form of microchips and everything else which can be damaged by radio frequencies, at a certain (wave) length, very quickly. This is why the Chinese car producers have not launched it yet to the world. They made a few prototypes, for this man and his nation to show that Africans can break through technology as well. He has done a lot of beautiful things and it is amazing what he can describe by what he understands. He has found the principle and is working on that principle. He can miniaturize it. It just uses the scalar waves).

(Tesla used the "scalar waves" but in a different way. He created an Infinity Loop between the tower in Moscow and his car in New York. Tesla hid how he created this scalar wave very beautifully. It was amazing how Tesla never understood how it worked, but could still use it. He made a very small motor in New York and a very powerful plasma generator in Moscow and created an Infinity Loop between them, that's how he received the energy to power the car in New York).

(The reason he couldn't come up with a scalar wave was because he only considered ?? that the M field travels (only at the same strength both ways in the Infinity Loop). In plasma the stronger gives to the weaker. ?? But the M field of the Infinity Loop had a

slightly higher strength than the G field coming back. This is the inherent problem with the Tesla Tower. When you ?? split the fields to run other things ?? it doesn't have enough strength to power them. That's why Tesla's second car wouldn't run. You can put the Tesla Tower on the Moon and it will still power the car).

(The African man is working on the South Pole with what professor Miles explained as scalar waves. You cannot put a filter on to stop the surges, they've tried. They were able to filter out some of the frequencies, but once you go to a certain bandwidth, it'll start emitting energy out. Then the system absorbs more energy and explodes. He studied the work of Miles and Tesla and he's come up with this in a miniature way. It's only on the matter state frequency, and M field basis).

(The other problem is if you stop broadcasting through the satellites the system won't run. And it cannot run in the deserts and places away from satellites and radio frequencies. This is the disadvantage. But it's very good for the cities. It needs an environment saturated with radio frequencies. The Chinese are working on it very hard and have put millions of dollars into developing it. Some of the restrictions are that you cannot charge it. They will need to add a charger to it later on. There is a possibility that Starlight will be connected to it, but (it will) put a lot of pressure on their system, if they support such a system. Radio frequencies need to be created somewhere. The noise needs to be created somewhere. They say it has no battery, but they need to have a storage for the energy. It's amazing how an illiterate man with no knowledge and being kicked out of school, has come up with this technology).

Q: Did I hear correctly, that you said Mr. Trump is going to help us to release the Plasma knowledge publicly in the future.

K- No, no. The condition created by his presidency will do that, not he himself.

Q: Does the Mg Gans also work if a person lives alone and feels lonely? Or would it be better to use a combination of CO2 and Zinc in this case?

K- Magnesium Gans is usually on its own.

Q: Vitiligo is a disease that causes loss of skin color in patches. Can the problem of vitiligo illness be resolved through plasma?

R: (From Wikipedia) Vitiligo is a disease that causes loss of skin color in patches. The discolored areas usually get bigger with time. The condition can affect the skin on any part of the body. It can also affect hair and the inside of the mouth. Normally, the color of hair and skin is determined by melanin.

K- You can use Gans's if you know what you're doing. I have spoken about this in the teaching some years ago. Iranian scientists developed a technology to overcome this temporarily. You boil the skin of an aubergine (eggplant) and mix it with oil and dab it on the skin. (?? After 4 to 8 weeks the skin tone should match. This is a scientific work

they've done. At KF we don't get involved with these medical things, especially in the teaching. But yes, there is a way to do it with the T.

R: In the past you mentioned that it's not something that you need to change. The Soul has decided for that to happen, it's a deeper connection. Is that possible?

K- In a way, yes. Our P is a sign of interaction of our Souls with our environment.

For medical questions write to Dr. Kern at the Wellness Center. He will answer.

Q: How to make the Gans of Magnesium. Do we mix the tablets with CO2 Gans?

K- (You can make it from foods, I think from broccoli. There are different versions of it. But first you have to find out what (type of) Mg you are short of and what it is connected to). (There is a lot of knowledge out there that we can use and you can also add to the knowledge of plasma. Understand what and the way you need it, and what's the purpose for it. The body is a composite of what man calls 'the same.' You breathe the same air and if you don't exhale the same rate as you (inhale ?? you create a different field strength that develops pneumonia. ?? The different fields create water in your lungs). But it's the same air, you just changed the composition that it produces water).

(Once he tried to explain to a doctor (how water in the lungs is created through the fields. As Plasma scientists we now understand the process of creating matter from energy. When I said to him that it is only a matter of 15 degrees, he looked at me as if I were a 'man from Mars.' All you have to do is change the (inclination of the bed by 15 degrees and the water will disappear from the lungs. ?? It will reduce by 2 liters every few days ?? as you change the bed's position by 15 to 20 degrees. You don't need to do (anything else). (?? The way they position the patients in the bed creates a pressure in the lungs and converts the CO2 into water)). It's the same way the Indian Guru did it, who didn't eat food for so many days. He fed himself by changing his posture, which changed the field strength).

(When you are short of Magnesium (Mg) the doctors tell you to take a Mg tablet, but the (problem is Mg has a spectrum of fields in vegetables, and the amino acids ?? of meat. First you need to know which type of Mg you are short of. (The Vitamin tablet of Mg is in the mineral state and has to be converted to a Gans. ?? If you only take the Vitamin tablet your body might get saturated with the form you are not short of)). (?? They have influenced us in a way not to understand the overall condition (and that can lead to abuse)). We have to understand the science to be benefited by it).

(For example, they tell us not to smoke because of nicotine. But why are all of the races addicted ?? to eating foods that contain nicotine like the nightshade vegetables of tomatoes, eggplants, and the rest? Tomato and Aubergine (eggplant) are very high in nicotine. Why did Nature bring nicotine to us in this way? You can get a full list on the Internet. (Nicotine is part controlling our neuro system, otherwise, we wouldn't eat it)).

(?? Another example, are the highly sweetened and processed breakfast cereals they target on children through television advertising. (In the past, nobody, more or less, ate these cereals in the morning. (You ?? get a lot of energy from the sugars by eating them, but in fact, they also give you every other diseases. You can't imagine what additives they put in these products. In the (research) reports they talk about spikes in the (blood) sugar, diabetes, and every other illness that comes from them). (Mr. Keshe tells of how one of the top brands for breakfast cereal in the world used to store certain highly toxic materials in one of his warehouses because he had a license for it. One of these bottles lasts so many weeks, because they just add a drop or a very minute amount to everything they produced for breakfast cereals. You can imagine they produce thousands of breakfast packages to sell around the world but they just need one 2 liter bottle. It means they dilute it. It's a dilution of dilution of dilution, but think of what poison it carries. (So through advertising they brought us a school of thought that says we need breakfast. Now it's a fashion to have breakfast cereal in the morning. They built it into our head and now we all do it)).

(There's a lot more research on diabetic spikes from around the 1980s, when they measured the energy in a box of cornflakes, and discovered that the cardboard packaging had more energy. They control how we get addicted to these things. The mineral content is way out of control. (They do those surveys on the street where they have you taste a sample of the cereal and they measure your response. They actually control the salt content, ?? and that keeps you coming back for more). The Hamburger chains do this too. They determine what salt content fits in your spectrum. Then people develop a favorite Brand that they only go to. They tune the foods to the sodium base, and now they (tune) the energy base to the coloring content).

(You should be aware of what you are eating and the reason you use things such as vitamins, minerals, or whatever. The human race is a mixture of everything from air, wind, and fire of this planet, we have to serve all of it. When you choose a vitamin, mineral, or anything on that spectrum, understand that we came from the Earth and rely on these minerals. We came from eating vegetables, which again has the same minerals but in a different spectrum (or field strength). And same with the meat. The part we are missing is the air we breathe. It carries things like Magnesium or whatever. (If we understand how we digest it then we can feed the full spectrum)).

Q: You said that if one person transmutes, then the others will learn more easily. In physics class they taught us about the Compton Effect, which means that when radioactive energy is applied to an electron, it changes its layer and releases energies. In Plasma science (will the energy released elevate the Souls around the people who have more energy than the others, like (what we do in the Flight) sessions and other things?)

K- Repeat what you said and I think you answered yourself. (In other words, those who have higher fields will radiate that to others). But you have to understand how to apply it. That's the key.

Q: But (does that high energy have to be at an angle) or anything else?

K- (It's all .. diversity. We take in things from every direction. It's 360 degrees spherical. We get everything we can imagine from all directions).

Q: (Is this going to happen soon where people can release this energy for everyone)?

K- (Yes, if you know how to use your Soul or Central Energy. We call it intention. When you intend something to happen, then you can release energies, vitamins, and everything else. It's literally just understanding the process. Your intentions are very powerful things in filtering out. (In a plasma way, intentions are filters. And if you know how to target, you can bring energies to it, and you'll achieve it. There's no difference between receiving energy, or giving somebody energy. (It's about what your intention is to give or receive)).

(Many KS who attend the Flight sessions see energy coming to them. Some don't need to eat and they see energies coming to them. (?? You didn't consciously have the intention of, but the Soul of the body (had the) intention because of what it needed). He demonstrated this with a system he built years ago. You can target what vitamins and energy is absorbed by which part. For example, the kidney absorbs certain energies for itself, but the liver immediately above it has a different G field and absorbs different energies from the environment. One of the reasons we have so many disease complications in our digestion area around the stomach and hips is because when you get too fat it absorbs the energies, instead of the kidneys and other organs getting that energy. (The fat filters out protein or whatever the kidney needs and it goes bad. In other words, the environment around the kidney absorbs the energy the kidney needs and it rots). You can change this by your intention. ?? You can bring energy into the organs until it can do it itself. And the body sorts itself out. We will have to do this in Space anyway. Our body will absorb certain field strengths).

(We confirmed this during the time of the "Virus." People with certain blood types were more receptive to it. The research papers show that certain types of damage to certain organs from certain blood types occurred during the Virus. In Space we'll have to monitor this. (If we're passing through an area we'll have to keep up a constant field (so certain people don't get certain diseases or certain changes from those fields). (It will be like a shield)).

(This is like when changes happen to the liver it expands to the pancreas. Changes in the stool color tell what is happening in the liver. The color can tell you when the person will die soon).

(If you design a MaGrav in a specific way and if you can connect with it, it will give you all the energies you need, ?? even to expand the Soul and P. Mr. Keshe shows photos of the new Cosmic Ray Twinity MaGrav system and they have the person's name on it. Don't let anybody touch your MaGrav because it is already active. It is only for you and your energy. There are 2 knobs sticking out on the sides. These are for you to hold in different configurations with your hands. ?? You can choose to stay only in the physical or Energy D. And you can turn this unit upside down. Do not use the Headphones or

anything else with this system. It's not linked for anything else. One side increases your absorption of the physical part, and the other side is for the Energy part. Do not share this system with anyone, not even your cats or dogs. You can put it under a chair and sit above it, and hold your hands on the two knobs. Don't sit on the system itself because it will break. Feel how the energy field of the system will touch you. It will touch your Soul. This is different from the two Headphones and the rest of the other systems. It's (for teaching purposes)).

(It's for you to understand yourself and the energy transfers within you. This one is able to bring in the Soul and the STP into operation. Let's see how you can feed or change one. You do it with your intention and emotion. One unit is set for only vegetarian food. See if you can feed yourself, and how your eating habits change. If you are hungry you can go to the system. You can decide if you want to feed the Soul or P side. In its simplicity, it is one of the most complicated systems we have put out. It's an "Oasis" of the Soul, it Twins with ...)

(A KS tells her experience and he replies that it is like the emotion that touches you when you are with young men. It's an emotion of connection of thoughts. (It's like when you look at a picture of your child and brings back all the emotions, and tears). It's just a picture. It brings the emotion. Words and pictures have that power. When you take a picture of someone, by intention and observation you connect (to them) because it's part of the energy they gave that is registered on that piece of paper. A letter and music do the same).

(Mr. Keshe asks the KS if she has ever seen an image that is like the digital televisions with thousands of dots or pixels to make up the image. But the shape is 3-dimensional and is in front of you. You don't see a physical image. You see an energy image, but it has bits of physicality presentation (in) it. In the future more KS will become aware of the operation of the fields (and you will see these kind of images). It's like a 3-dimensional picture and the body moves around, but it's not fully energy (?? so you don't feel it). You visually can see it).

(The KS said she sees everything like a fog. He said, that has to do with your eye, get your eyes checked. The image I am talking about is in real life, you see it, but it's not an image, it's a real physicality of energy, and it has something like a speck of dust in it. You're aware of the presence. This happens to me quite a lot. I see both dimensions, and I see the energies. (??It's like (having) somebody in front of you. I feel the energy. And I am partially aware of an existence, another (Being with me)).

Q: I think there is some stuff you are reluctant to tell us, because you feel we might get scared. I think it is really the truth that my Soul travels when I sleep. I go to different worlds and there is constant activities happening. I don't remember most of them.

K- You do that even now (while) talking to me.

(Does he mean that regardless of what we are doing in P the Soul still continues its life and we come in and out of it?)

Q: If I am dreaming for example, I am in a market and when I wake up I come out. But if I sit to meditate I can go back to that same scenario. I continue talking with the person I was talking to. So it means my Soul has another life someplace else).

K- Yes, that's exactly what I've told you.

(This is what I understood. Our Soul and P each have their own lives and existence. I don't like to use the word "parallel" because it has other connotations. But it is like they are parallel to each other. When we sleep and dream we pop in on the Soul, which will be in the middle of doing something and we just come into it like opening a door to see how the cooking is going on in the kitchen. And we just join in, in whatever part it happens to be playing at that moment. And if suddenly Mom calls, it's time to go to school then we pop back into the P and carry on with our life here as it is going forward. It doesn't stop because we popped into the Soul life for some time. And the Soul life doesn't stop because we went into the P life. And if we go back to the Soul D then we just continue on with what the Soul is doing. The only time gap would be on the P side because the Soul is timeless and continuous. But maybe it is related to time when it is still connected to the P. There are still more things to uncover here).

Q: I'm actually more busy at night doing things than in the waking time in P.

K- You are busy 24 hours a day.

Q: I'm very busy (in the Soul D visiting different cultures, sometimes with my brother, and sometimes you're with me. When I go to sleep it's not really sleep, it's a different life).

K- (Now you know how I have been living for the past 50 years. It doesn't stop, because you accept (to live) life on both sides, or it's not accepting it, you're actually aware of both sides).

(Mr. Keshe tells how sometimes he can be sitting on the sofa with somebody and he sees (a Soul) coming through the corridor and it just comes through the wall. But these are not dreams, and you are not going crazy. It's about understanding that Universal (Beings) don't need to manifest themselves in physicality. (And under certain conditions, and at certain wavelengths, they reflect). (They are like those reflectors that you put on your bike so others will see you at night). (I think he means that he sees them as flashes of light). It needs a lot of understanding and you learn a lot from these experiences).

Q: In the 575th KSW you revealed the concentric layers in the brain, starting with the Soul in the center, then the hormones, then emotions, and then the body on the outside. Where do our memories reside in relation to these layers? Where do we receive them? And where do we (make a wall to prevent others from accessing them)?

K- (You can prevent others from accessing them by your emotion. It's the same way we create cancer with our emotions. (He again tells about the Alzheimer's patients who don't want to remember painful things and create the disease). We create emotional barriers. If there is something we cannot accept, that's the physical part. On the emotional side we change the Carbon to block the information. (?? The conversion of Carbon happens at the end of the nerves. It's no different. We do the same in the brain, and then we get patches in the brain. The neuro system controls the emotion and P. Or what our senses do in P, the emotions do in the brain. The patches (on the MRI) are connected to Parkinson's, Alzheimer's and everything else).

(?? If we cut our finger the nerves bring it to the brain to create the pain. This is the physical part. The same goes on with the emotions they can also block. He has seen it many times with helping people with Alzheimer's with the plasma. The Plasma T overrides the condition and they have to start dealing with the underlying pain and they don't want to. It's very hard for them to suddenly start having to deal with what they created the Alzheimer's to deny. Then they'll say the T doesn't work. But really they don't want to deal with their life).

(He has seen this a lot especially in women who were not allowed to speak their mind by their husband. When he brings them back to themselves with the plasma systems then their lips shake, like Parkinson's. And when he would sit down and talk to them, it would come out that they were always told to shut up. And their husband always made wrong whatever they said. The mouth shakes as if it wants to speak. They call it Parkinson's. But why don't they try to find out the psychological reason behind it, and then it will disappear. When we feed the Soul, it feeds the emotion of physicality, and then it's easier to solve).

Q: (Since the body has the ability to convert matter into plasma and plasma into different matter through the glands and lymph, is there a place for using vitamin and mineral supplements?)

K- Yes, the doctors know how to do it and what to measure.

(In the West traditional medicine has blocked alternative medicine and we know the reason why. But in places like in China they use both western medicine or traditional medicine, and Traditional Chinese Medicine (TCM) which uses herbs and acupuncture. The herbal medicines are not as effective as they were a hundred years ago. We discussed this before in some teachings. It's because the farmers have added so many chemicals that the composition of the herbs have changed and the field strength has moved to another strength. Therefore, it doesn't do what it used to do, because the amino acid (AA) in your body was used to (the herbs). In the past the majority of herbs came from the same area people lived in or within a 100 kilometers. Today we eat things from all over the world from Africa to Asia and everywhere else. (We have created more problems just by moving foods around)).

(The composition of the foods are enormous now and with it (has come) new diseases, new conditions, and new emotions. Traditionally we used to eat oranges in the winter near Christmas. There used to be a season for eating different foods. Now we can get any kind of food at any time 24 hours a day. This has changed our body and emotions. And our expectation has changed. This creates different field energies. The new genetic materials that have been modified releases totally different energy than a normal fruit or food).

(Some years ago we signed a contract with a Chinese Traditional Medicine University in Beijing and in our discussions we said we don't accept their work. We don't accept to test their herbs, or whatever they use because it is so mixed up with so many things and chemicals. We wanted to find a remote place to cultivate the herbs through plasma technology, so that there will be no chemicals added to them. Then we'll see what will be the glory time of the Chinese Medicine the way it used to be. Because there will be no genetic modifications or use of herbicides, pesticides, and the rest of it).

(Through time and mixing of cultures we have changed, but the body hasn't yet evolved with it. Some cases do, and some cases don't. They have genetically modified the food and they made it so they don't produce seeds, that way they have total control over the food supply).

(The KF System we showed you is the beginning of that change. (I wonder how many of you will be able to trigger the system the right way, so you can stop eating because you took the energy. That's all it is, we transfer energy as food. Observe what happens with your cramps, emotions, and how people say you have changed. How come the change didn't happen before you bought the System? Write everything down and give us your feedback so we know how our systems are working).

(We will produce a vegetarian, vegan, and meat version of this system. When you invite your friends for dinner and each of them sits in front of one of these systems, and if they all want "chicken and chips" they will create it with their intention of Emotion. The change we promised you has started creeping in. And this new system is one of them. It's for you to know yourself and understand what you need. Then report back to us what happens. And the ones who say, "I didn't feel anything," is because they have to say that, otherwise they have to accept the change in themselves).

Q: Can you go deeper on the layers of the skin and the neutron proton and electron?

K- (There is no going deeper, because they're similar to each other. It's a comparison. The Inner layer gets internal energies from the Soul. It's different than what is outside. The outer layer takes different strength energy. (As we take from the environment, we also have to give what it needs from us, because it's short of that. The environment has to have a need for what we want to give, (then) we can take (from it)). ?? The strongest sits at the center of the energy, but at what field strength?)

Q: Can we target energy to go somewhere by bringing attention to that part?

K- (Yes, that's how it have been done for centuries and decades. (You can do this with the Pain Pens, they are not just for pain. They can be used for (repairing the body and making upgrades). We always look at what we need, we don't look at what we can give to).

Q: Is it possible to communicate interactively with the fetus in the womb of a pregnant woman using the unit "CMR Soul Connect"?

K- I stay out of this.

Q: Can this unit use one Headset for me and another Headset for multiple people to use?

K- As long as you don't give your Headset to anybody else, keep it as yours. You can do anything, because then you can communicate with them. But you have to tell them that somebody else has used that Headset (because it will transfer their energy)).

For those of you who join us tomorrow we'll send you the graph. This time there will be 2 parts the right side, which is a single figure and is the configuration of your Soul, and the left is your physical D, and then the STP. It's more detailed this time.

End of Quick Index - 577 KSW – February 13, 2025

KEY-PHRASES:

SUMMARY:

ENGLISH TRANSCRIPTION

(:12)

K- Thank you very much. Good morning, good day to you, as usual, wherever and whenever you listen to this series of Knowledge Seekers from Keshe Foundation, Spaceship Institute. We are back in the same position.

Trying to understand the work of the Creation and the Creator. And, once you understand this, you start realizing how beautiful the Creation is. And, in a way, if you are a cook, you have the same ingredient, but you mix it different way, and you make different taste, different texture, different colors out of the same thing. They put you in a cooking session, everything on the table, and they give the same ingredient to 10 chefs, and each chef comes up with different recipe from the same base material on the table. This is how the World of Creation is, but fortunately we have one cook, (:14) who's called the Creator, call it God or whatever, and then the rest of it is, conditions which are given, that creates different recipes, within the same environment of the same kitchen, we call it the Universe (U). So in a way we have one master chef and many tables and ovens and

cutting mixture but the same ingredient and depends where this chef goes on which table with size what to do instead of having 10 different chefs on different tables. So the ingredient of the cooking is exactly the same. Same flour, same milk, the same sugar, the same other things, and we see how the Master makes bread with one, cake with the other one, croissant with the same thing with the other one, and the rest of it. So in the World of Creation is the same. We have the Creator, different conditions in the Universe creates different products, different end, and they're all delicious to eat. If it's a human, you enjoy the life of a human. If you're a Martian, you enjoy the life of a Martian. It's just the taste of the one who tests and tastes the food on that table. But in essence the Creation, the essence of the Creator is all the same. How you twist it, what kind of dough will come and what will give you at the end.

The life of cycle of fields of the Creator is all the same. (:16) And how they entangle, how the measurements are, and how what strength they have give us different opportunities, different chances, physical life like a planetary system, physical life like a star which still has its own life. And then, no manifestation of physicality, which man will learn very soon, but it's still life. In open space gaps between the stars and galaxies you see, is not empty, it's full of life. But, different recipe is used to keep it together, to in a way, exist. We only look at the life in the dimension (D) of physicality. We call it the galaxy, and we see some bunch of them together. But as much as we see, the gaps have their own lives. They are even bigger in a structure than the galaxies. But we don't have the visualization of seeing. In a way, we look at the body inside, and we see the cancer cells. We call it galaxies. There is a still length. There is still a structure which we don't see, because we only see which is solidified and is there. We call it the cancer cell.

So if you look at it that way, the Universes and the galaxies and the planetary system are where the energy has managed to manifest itself in the man visual dimension. Not everybody sees what we see. Many planetary and star systems which is visual to man is invisible to the others, because their bandwidth of the strength is not there. (:18) But in essence, everything is the beginning, the same. Once we understand this, we go back to the teaching of last week, which we refer to neutron as to be the fundamental element that is mentioned in the Books. But this fundamental element, this Fundamental Plasma only can manifest itself to be there if there is an environment which can compare in the strength to. And the field strength of dictates.

In the world of physics today we talk about heating and expansion or creating pressure and vacuum, but we have actually no scientists, no research has been done that does actually the size of the neutron, the size of proton, or the size of electron changes in this heat and compression. There is a research done by Russian scientists, the West is trying to keep it very, very quiet because it's like Keshe Foundation, will bring huge changes. And in the very recent past, past couple of years, when one of the world leaders wanted to compete in the election and he had no funds, they used this technology to fund the campaign and he won the election. Russians have come up with an amazing system that they mix materials together in a specific way and it produces about 16% of gold. And they use compression, they use a specific way of mixing, hardly any chemicals used.

(:20) But when you mix certain materials, it gives you 16% gold residue. And this gold was used to, in a way, finance one of the biggest elections in past years.

But, in that technology, we always look, at what pressure we create, to what to give. I was supervisor, I was advisor to this confirmation of this technology (T), with all the scientific data in front of me. And I explained to the officials, that the gold here, is created out of the pressure, of what happens in the Earth condition if we do, and it's why we get only 16% maximum. And comparing it to the plasma technology, we create materials, but out of interaction of the fields. In the matter state, we compress materials together. In the plasma technology, we never measured the size of a neutron. Intelligence research up to now has not confirmed the exact change of the size of the neutron on the vacuum condition, on the heat condition, or on the compression, or on any other.

In a way, we cannot change it with the physical matter. But if you understand the plasma technology, there is a way to expand the size of neutron. There is a way to expand the size of proton, there is a way to expand the size of electron. (:22) In the world of physics today we say, the size of electron is 2,000 times or whatever, of the, what you call it, smaller than the neutron or proton or whatever. This is all physics things we see and assumption we make. But we have never scientifically measured the size of neutron or proton, electron on the matter state condition.

Theoretically the expansion in the matter state is the gap between the atoms. This is how you make molecules. How you add copper and zinc and whatever you make, what you call a composition. composition of brass and everything else. In the world of plasma technology, we can only change the size, the amount of fields in a condition, because it's not objects anymore of a plasma condition like neutron, by specific methods, by specific ways, and this is the secret of the transmutation and transportation. What does this mean? It means in a mechanical system to get one thing pulled by something else, we use a rope, we pull it, we pull it with the hand. We want to compress it, we use pressure and compress it. In the world of plasma we can't do this. Compression has no effect, more or less, very, very slight. (:24) And there is no way we can physically tag a rope around the neutron and pull it. But we can pull neutron using and understanding the work of magnetic fields, because it's rope, is field strength. It's rope, it's the field it gives out. And how we can tap into it. This is why when you put two magnets together, one magnet moves or gets attracted. You don't physically push the magnet away. Physically the field interaction strength of the field dictates position. This is what we call MaGrav Positioning.

Then going back to understanding this process we understand or you should have understood that Knowledge Seekers (KS), a secret similarity in all conditions of the teaching of the Keshe Foundation and the matter state of today and observation of the scientific way to exist. In conformation of physicality (P). If you take one part out, the other part cannot function. In the world of physics today we say Hydrogen (H) is a proton and electron, but in fact it's a neutron. We look at it in two halves, but we don't look at it as a total. And what we see as a Hydrogen and a structure of the proton and electron, is exactly what's happening inside the neutron. Inside the neutron we have another field

inside it, exactly what we see as Hydrogen. (:26) This is why Hydrogen is so important in the structure of understanding the world of physics in matter state and the plasma state.

If you look at it in a very simple way what we see in the World of Creation as a plasma Hydrogen structure is very simple. And that is, when we understand this the world of science, the Space technology and physics makes a lot of sense. We call it Hydrogen and proton and electron. But in fact, this Hydrogen itself has a different characteristics in a way, is a Fundamental Plasma. Because that's what we see as an atom of Hydrogen. Is a, in a way, if you look at it, if you understand it in, in a scientific way, doesn't have a physical boundary, the way we are used to, but it has in a way an imaginary boundary which we see assume, to be the atom of Hydrogen.

This is when in the matter state, when the Soul of the Man (STM) passes the dimension of physicality (P), (:28) where the actual physicality sits between the Soul of the object and the physicality of the object. Depends which one you look at. The confusion in the world of science today is that we have not identified scientifically the separation or the difference between, in a way, an atom and the plasma of an atom. If you look at an atom, it's a matter-state with a physicality outside. In a condition of the energy state is the Soul with the physicality inside. In a way in this dimension, we see the created and in this we see the creation. And this is what in real world we have not understood the separation between the two. And this is why the plasma technology Keshe Foundation is out of line with the present science, because we have only been taught about the physical condition. All rules of physics is written, dictated, (:30) drilled in our head on the matter state. We have never considered the plasma state, energy state.

And this is why I have always said fusion in the matter state is a dream which never come true. And now we see Chinese have done 1,000 seconds of so many time higher temperature than the center of the Sun and the rest of it, and to produce atom of whatever, Hydrogen, Tritium, Deuterium, whatever they call it, and now that we understand the same process, Keshe Foundation does it in a room temperature, everything else, because we have learned how to convert and how to transmute from one to the other. This is your Gans's and this is your Copper. This is why our technology looks absurd because it looks funny when you stand in front of a magician and he has a ball in the cup, and he holds with the finger the bottle, one second you see the cup, one second you see the ball. We have not been taught, we have not been taught the magic of energy, plasmatic field in motion.

And at the moment, as I've said many times, M. T. Keshe, Keshe Foundation, you Knowledge Seekers (KS) are exactly not even centimeter out than the first guy when he said the Earth is not the center of Universe. They hung him in the church. In the house of God. And...

<< Mr. Keshe's audio cut here. >>

K- ... Yeah, they hung him in the house of God. For what reason? Because he told the truth. Because he understood beyond what the man was forced to accept. And we are in

the same position with the Keshe Foundation. We know more in the Knowledge of Creation, other than the matter state. We have become aware of the energy fields. And they crucify us, kings kill us, they put us in mental institutes, families detach themselves from us, because we are now at a moment, with this science of understanding the world of energy, which leads to the creation of the matter state, we are crucified. The time will come, that when man understand the process of the energy transfer, transmutation, and what we teach as Gans's, and the energy side of the World of Creation, then the whole thing will change.

Then we understand what, how the World of Creation is and collectively we go. (:34) And that position of the change has come. 2025 is the year where the knowledge of the energy, use of the energy, we call it a plasma, will come to be understood is as correct as the matter-state we have considered. Till now we speak about Gans's which is a plasma. We speak about the transfer of energy to magnetic field which is a plasma and in that process those who are matter-state are still sacrificing. Nothing has changed than 2,000 years ago and time of when they use sacrifice of virgins for this and that. Where in the world of energy there are no sacrifices because it's the Creator of, we have control of.

In a promotion video which is getting done and hopefully will be completed next couple of .. weeks, you will see how we bring this knowledge for man to understand. How we will structure the position that man for the first time understands that the Keshe Foundation, the knowledge of plasma, is the Knowledge of Creation and the biggest opposition to the Keshe Foundation and the work of us comes from those who are religious and those who want a financial profit. (:36) And the other group is the scientists who are in the matter state and they cannot switch to understand the energy state. But the foolish thing is, we burn the wood to get the energy. We haven't managed to get energy to make wood. And this is what completes the cycle of the knowledge. In Keshe Foundation, you go from matter to energy, and from energy to matter.

So, if you understand this, which I'm sure 99% of the Knowledge Seekers understood by now, is, where is the similarities? Where does things fit into? And what is our position? The beauty of the knowledge is in its simplicity. We go back to the fundamental elements. You have a neutron. You have a proton. And then you have an electron. In the body of the man, we have the STM, you have the Soul of the Physicality (STP) of the Man, and you have the physicality of the Man.

In the world of physicality of the Man, you have in every structure within the physicality of the Man, even in tissue of the planet, plants, even in the tissue of the stones you find the same principle. (:38) You have the inner layer, you have the middle layer and you have the outer layer. So the World of Creation is exactly the same but man has not understood. This is the world of energy, this is the world of plasma, in a half physical, half materialistic, and this is the matter state detection. But in essence everything works, because they are all interaction of the fields, magnetic (M) fields.

You are getting crucified because the world of science and religion has blocked you, blocked the people around you, and the rest of the world, to understand this. And they're

abusing it in the name of religion. In abusing it we understand more. And those who became peer reviewers, stole everything and find out how they can make it to make it show, that they are look good. Now there is no difference between religious leaders and those who steal patents. Because the people haven't seen it, the other ones who have seen it, like Einstein, like Stephen Hawking, and Pope. There is no difference between them and 'thieves of Baghdad.'

Now you understand. As Knowledge Seekers, you understand this part of World of Creation, which is being kept away, holy spirits, punishment and the rest of it. And this is where the man lives. (:40) And where at the moment the science of man is playing with. They have not crossed over to understand the full structure. Once you understand this, then the next step to the whole thing, if you are now in that matter of states of understanding was given to you as a MaGrav system without you knowing how you go back to where it came back to. And then through this, in a way, you go back to again, that neutron, proton and electron, or the plasma condition. There is no dimension of physicality. And the biggest problem is, we, as Knowledge Seekers, as a scientist of the Space, have a problem with this group, which is our doctors, our engineers, our professors and the rest of it, because they are engineers and professors in matter state. This is too far for their intelligence to understand.

Then you understand why I've been telling you, MaGrav systems we gave you, is not for energy, is for you to understand the power of the fields. There is nothing in the World of Creation which is any different than what is on this board. (:42) We showed you in a very simple system through the structure of the STM. If you were with us in past few weeks and months when the energy came from the Space you saw three layers in the STM and the field. Again, if you put it in a bigger structure and go back to understanding it, we saw the fields coming in, we saw the top layer, we saw the conversion between the two and we saw the bottom layer, but this went to the STM, to the dimension of physicality.

Now you understand what and how intelligent you are as Knowledge Seekers. You understand, all you've been taught, it's for you to go and understand the whole, literally, the whole process of the Creation. You can go this way, you can go that way, you understand the knowledge of this way and how to come back. And for this you are getting crucified, because you understand the process of the Creation from the Creator to Man and from Man to the energy back to Creator. And this is what in 2025, with the structures in our hand, we'll bring out. And one of the biggest gifts given to Man today, to change this world of the matter state, is called President Trump of United States. You will understand soon why and how, (:44) and how we will utilize this opportunity to bring the knowledge of the Man to understand the Totality.

Where energies create the matter and for cycling back we go back to energy. We call this world of the plasma physics of today, we call this the knowledge of transmutation. Where man only at this moment of time can transport. He has not managed to understand the vertical side has a horizontal side on the other side. The foundation of the knowledge is set out in the three Books. The ignorance of the man looks for confirmation in

physicality. And this is why we put the sessions on Fridays a month for you to see the confirmation in the energy side, which is your emotion, which is your thoughts. This is what we call transmutation in dimension of the energy. And this is why whatever we put out looks like magic. But in a way we understand this simple process.

And as a chef I have taught you everything with the same recipe on the table how to cook. You are the chefs at the table. Ingredient is the same. All of you use copper, all of you use zinc, (:46) all of you use salt and all of you make Gans's, and all of you now need to understand more, that you don't need to transfer energy into the matter energy you can use energy in the field energy. And then when we tell you go for the trip, while you're on the line with us, you go to the moon and the Mars. and then you says, I dreamt about it. No darling, you didn't dream, you witnessed the trip of your Soul. Ignorance is a bliss. And when this bliss is there you cannot do anything with it because then the magicians use it.

And the best technology, best thing has ever happened to man, to the man of matter is, "show me." How do you want me to show you your emotion? How do you want me to show you your dream when you actually had the trip? This is the way ignorant uneducated people even in the level of professors in the matter state have covered themselves (by saying) "show me." If I make you to trip, if I make you to have an accident, if I make you to see your grandmother doesn't count, because I don't see, this is accident, this is what happened, this is I do it in the sleep. And when we travel into Space majority of the time with a Man of Space we deal with those who are in this level of understanding. (:48) This is the Universal Community and this is the man's community. Until we don't get man to understand then the two cannot match. And this is the job of the Keshe Foundation in 2025 to bring that merger. We use the rules and the laws of the nations to bring this into action. You will understand, you soon will understand, the biggest gift for the technology to be transferred to everyone is literally, if you understand, is given to Man.

Would you like to understand the energy or would you like to suffer in the matter state? Would you like to be locked up in the planet Earth with a passport? You can't go anywhere, wherever you go, you're a foreigner, you're an immigrant. Don't forget, there are two different words for immigrants, if you're a white or a black. If you're Asian, white, Middle Eastern, you're immigrant, when you go to a country. If you're white only you become 'expat.' Otherwise white immigrant. When you enter a border, passport control, if you're black or other color you are a terrorist. (:50) If you are white you are a freedom fighter. Depends on the color of your skin and the paper you carry. We don't have this in the Space. And this is where Man will learn outside to come back and implement it inside. Man has to be shown the vastness and the beauty of the Universe for him to understand his ignorance and prejudices on this planet. September, October of this year.

Now we understand how you as Knowledge Seekers understand more about the other side and the professors in matter side they can't accept you, your families can't accept you because they see the matter state. You have become aware of the Energy state. You've

seen the benefit of it. We gave you the Pain Pen, we gave you the MaGravs and I kept on telling you, you plugged it in. I'm looking for the energy. Bless his Soul Jon, says, when these people want to understand, they never stood on a correctly winded MaGravs to feel its energy. If you understand this, if you understood this process, half of your problem in standing resolute in your understanding is the same. It's your job to explain. (:52) Then the work of the Keshe Foundation doesn't become magic and what you call it, 'a guru,' or whatever and it's a 'haji bhaji.' Yes it is because the ignorance is a bliss, as long as you do that you don't need to learn a new.

I always remember the word of the Chancellor of Sharif Tehran University and a first launch in Iran presidential offices in 2008, 8 - 9th night of June of 2008, when President Ahmadinejad gave a lunch for me returning to Iran, but I wasn't aware that there was a different plan, there were five heads of universities sitting there to approve the technology or not. The last vote was with the hand of the Tehran Sharif University Chancellor and he said, "Mehran-jan, you have discovered gravity, but if I say yes to this I have to stay and see your technology through the Sharif University and I'm retiring in a few months time, I stay in the middle. You already have 4 votes, go ahead." This is the problem. As scientists understand, but if they accept, they have to bring the change. And this is where your Knowledge Seekers have been put in mental institute, you've been deprived of love of the family, you've been fighting to show something can be done. (:54) Because you always try to show what it does in the matter state, and you haven't learned the process of conversion. Then when we show it to you, for you it's difficult to understand, to be able to translate the language.

This simple picture on the table, learn it. And it's the key to your understanding, to be able to enlighten the people. Where in fact if you look at it, very simple for you lot, is this, tell them this is where all the scientists are, this is where the plasma nuclear power is, we are one step even beyond that. Because if it's on CNN, we accept it. And soon there'll be no CNN in deep Space, on the moon. Would you like to tune into the rubbish talk or would you like to look at the beauty of the Creation?

And, in so many ways, is for you to understand about yourself. Energies within yourself, how you transfer from one to another, and then what you call transmutation, sits directly inside you, within you, within the structure, where you receive the energy of the Universe, you balance it with the energy of the planetary system, through the STP you create the body of the Man. And this is what you have to learn how to go back. (:56) In this direction you will come to matter state and transportation. In this direction you are in a way to the transmutation and plasma state fields of Universe. I made Man in the image of myself, I manifest Myself when I need and I live in the realm of the energy to create what I like depending where I am the chef of.

Now you understand exactly how you Knowledge Seekers have been snookered by the ignorant people. The only difference is using the advancement into communication, you have learned the basics of the transmutation and transportation and conversion from energy to matter and matter to energy. And you have done it in a way that you're ignorant to it, you have become ignorant to it. Where you put the metal and you get bits at the

bottom and you call it Gans's, when it's actually is a plasma energy and you are working in this region. You have leapfrogged, frog-leaped, whatever you like it, across the science of Creation in a very simple way by a Universal Teacher. Because we know how to teach nursery people. We know how to teach, write "A", we know how to make the first sentence, we know how to teach you to spell the first word, and then become graduate. (:58)

My biggest fear, I always said, and it makes people around me literally laugh is, we have a very big problem which pops his head out in a very near future. And I tell you why and you understand it. We have in the past centuries and thousands of years we have made professors, doctors, priests, (they're ignorant and only) in the matter of state. Your biggest problem as humans just starts, because once the new generation learns about the plasma or energy in motion, then you're going to have the same professors, doctors, priests changing the tone from the matter state (they will keep it matter state but color it a little as plasma). Now we understand how Christ went and the rest of it and (their) ignorant. We have a beautiful say in Farsi say << Farsi Language. >>, which means, now bring the donkey and load it up that these people accept this lot and this lot accept this lot.

This is where your problem sits and in a way you Knowledge Seekers most of you who understood, have made the Gans's, sit somewhere here (side of middle). And you have understood this (about the plasma). You have bridged the gap in a small way. And that's why you're in a big problem. But your problem starts when in a few years time we get Universities of Man creating PhD and everything for the energy state what we call the plasma, we call the Gans state. (1:00) (says something in Farsi ..) Now we had the war of borders, we had the war of religions, now becomes the war of scientists, trying to show which one is correct, which one is real and both of them don't understand when this reduces in field strength in a matter state according to Inertia become matter, and then when it goes to plasma Inertia become plasma.

In reality what we see in the time of coming time is in a very simple way which we all understand, we see in a in a different way, the world of Tesla and we see the world of Edison. And we saw how Edison brought an elephant, created the electrical chair (to electrocute it) to show Tesla was wrong, or was right, but it was dangerous. And this what we saw with Edison doing to Tesla, we will see coming from the religious leaders in respect to the knowledge of the Keshe Foundation. You have not seen the resistance yet. We have the resistance from the ignorant scientists, from the kings who want to have it. You have not seen the resistance coming from the religious people when they say this is criminal. Knowledge of God is not for us to understand, because then we can't be prophets. We cannot be all the religious names (titles) we created for ourselves. You thought you got prosecuted by your family and the friends and people around you because of this knowledge? (1:02) You wait when the man of science stand the man of abuses in the name of religion. And that's to come in 2025, in the back end of 2025. And the 26 will be a battlefield between the new knowledge, and the matter state knowledge and those who lose their position in the world of religion.

As the famous (song) says, "You've seen nothing yet." You are getting problem with the family and the friends, they're calling you, you become a sect or whatever. I, as the Mehran Tavakoli Keshe had to fight the kings and governments. The king plans to kill and his proxies like Red Circle create everything to discredit and everything else for them for you not to have. You have not seen what the religions will do to this technology. Because through this you'll find work of the energy which gives you the understanding of the World of Creation and the Creator. And if you understand that, do you need intermediary? We are no gurus, we are people who understand the Science of Creation and teaches it freely. Never a knowledge has been taught so freely, for so long, by one man in voice and writing. (1:04) And now those of you who go even to the other level of understanding, you tap to my Soul and you get the information and the knowledge. You don't need the voice and you don't need the matter. Isn't this what you do when you pray to your Creator? Or are you still in the process of making statues and hanging it around your neck. It's you who has put yourself around your neck, your own noose of ignorance, and not the knowledge.

We can produce as much gold as we'd like to bankrupt the World Banks. There is an old knowledge, which if you lived in Ghana, you know it. And if you were really with the people at the point of power in Ghana, you know it. When you go into Central Bank of England, not the monarchy, but the Central Bank of England, there is so many hundreds of thousands of bars of gold and 2/3 of it is stolen from Ghanaian gold reserve when the British invaded Ghana. We can make more gold than in reserve of any bank, any nation on this planet. And we have shown it. And it's been tested by Chinese military, confirming it. (1:06) ?? General of China, after we did the test in 2023 in the mountains north of China where .. (there is) a gold mine. They tried to 'dodge and dive' that we didn't see any gold. I took scientific papers into a meeting, there were about 20, 15 of Chinese and the representatives of the prime minister of China, the representative of the Chinese military and the rest.

And I said to them, on the white board, I said, you see these materials which you have given on the report? I give you a research paper, 10, 20 research papers, which says to you, wherever you see this material, it means there is gold and silver. You as a Chinese government officials, as generals in the Chinese military, which you control the test, tell me where have you hidden the data for gold. You're stealing, you're thieving. And they got offended. You can tell anything to a Chinese, but (don't) tell him he's a thief. It's the most humiliating, degrading thing you can do to a Chinese man to humiliate him, to bring him lower.

A few days later I was called into a meeting in Central Beijing, a huge building. Wang Lin was with me, she's always used to translate, we don't know how much she translated correctly or whatever. (1:08) The top ranking general came, who we know, and two other generals which monitored came and sat on the same table. But they sit on the side and the other side, nobody sat on the top. A gentleman who was the head of Chinese Military Committee sat on the top, we found out later on. And the General turned around and said, "Mr. Keshe, you have found out how to transfer energy into gold. In a different

way, you have changed materials into materials, energies to materials. And we accept that we hidden the knowledge. Now we confirm you are correct.”

It took an insult to a government to come out with the truth on the table of discussion and because of the humiliation there was no trust, everything stopped. Because admitting to stealing, admitting to hiding does not leave any much room to trust. The beauty of what we did in China is that we kept a video of these generals. And they always covered their face that they cannot be seen but accidentally their own team sent us a video with all the pictures on it. They didn't know at the end of the picture you see the generals. (1:10) And one day I will release their name and their pictures.

This will be the same with the 'man of robes.' They have to hide for them to keep their jobs. And I made one promise, before I leave this planet, I'll return the stones of Vatican back to Coliseum. When the man was abused physically, at least he had a say in it, and he was part of it. He wasn't abused in a hidden way. Now you understand what is about to come and how the game is played.

In the meeting with the hierarchy, families of a leadership I was invited for dinner. I usually don't take my phones with me that day because it was a very deep discussion. There was a need for some information to be shown and to be seen. I carried my wallet of telephones and we were asked to don't take anything up. We went upstairs, the leading family and close allies to the president were on the table. These are the people we know, we know, we've talked with for some years. (1:12) When I came down, took my bag, my bag was hot. I said to the officials the next day, "If you wanted information on my phone, you didn't need to download it, because you downloaded it fast, it heated up.” Americans use a freezing condition, they use a different method. And they got insulted, that I told them, "You're stolen, you've gone through my phones with the data." And contact was cut, because I accused of stealing. Interesting enough, sometimes later I went to the phone, because I had so many pictures with this family. Dinners and lunches and social meeting. I could not find any pictures of them on my phone. But these people didn't know that the phone gets regularly backed up, downloaded, into other servers, other hard disks. I couldn't find it. I thought, where the heck are these? Am I dreaming? It's always been on the phone. I went to archives, reserves, and they're all there. During the time I was there eating, they deleted anything to be connected to them. Again, Chinese.

The world leaders who understand the power of this technology, try to block it. But that time is gone. (1:14) The religious leaders, not your families, will be the next step for you Knowledge Seekers who understood the process. You have to be resolute. You have to understand the knowledge, and be kind, as I said last time, to those who find out they made a mistake. Don't make it the point of arrogance. Elevate their Soul that they understand faster, that they can catch up with you, that you learn from them the new technology. We go for a break, come back and try to answer your questions.

>> **BREAK** >>

577 KSW February 13, 2025 (1:20).

K- ... Thank you very much. First of all, we try to change the ads very soon, because these are the old materials, I know you got fed up with it, we do, we too. And hopefully in next few weeks you see new ads with the latest products. Another hand, as we said, tomorrow we have a session with those of the, what I call, the footprint of the, your own Soul, how you progressed since the last time over, you make a new fingerprint for the future for you to compare. This session starts at 9 o'clock tomorrow and go the whole session. You don't need anything for this session, those of you who joined us. Just yourself. The Gans's, we said, there is a lot of confusion, is for next Friday (not tomorrow). (Tomorrow) this is just you and your fingerprint, nothing should be there to be added to be in your hands or whatever. The Gans's, which we said, we already, you must already receive, emails for it. Gives the instructions of what Gans's do you need, and what you need to do, and we even advise the Knowledge Seekers, if you have a little bit more Gans's, bring 4 bottles with you or it will be given in your email why you need 4 bottles, only if you can do that, for next Friday Session.

We try to understand the process and we try to explain in a deeper way many things in respect to the, what we call, knowledge of the technology. (1:22) We will introduce very soon a new range of systems to make the transmutation much easier for the Knowledge Seekers and set up new direction and dimension in understanding the totality of the structure and how things sets, and how things are, and how we, what we call, change the position and parameters of the fields around you. And how to help you to be able to, in a way, transfer and transmute and expand the Totality.

New products in next few weeks will be introduced in a way to allowing your expansion of the fields and how you can actually start doing it at home to make the transmutation much easier. You have seen this technology with us in, what you call, in a bigger structure in Linz. So it's not something that suddenly comes up to be. It's part of the transmutation. Now the way we change, if you remember those huge UBESUS to Headsets, we are going in the same direction now for dimension of transmutation where you will see in new version very soon of the systems which what we call, you've seen

before. The advancement in technology and work of the Keshe Foundation has made this possible. (1:24)

And so in the coming weeks hopefully, once we complete one size of our, one side of our work we will bring the other side into operation for you to see and for you to be part of. And this process is fundamental for us. As you Knowledge Seekers are reaching a point of maturity of transmutation and understanding the changes between the matter state and the energy state. And now we are going into a much (more) elaborate systems to be able to bring this technology home, which means you will be able to have the same facilities as we shown before in a much more advanced way using the Cosmic Ray materials (CRm), the new understanding of the technology, to in a way deliver to you technologies which will not be in the hand of the government, but in the hand of the citizens.

And then in the expanded way we will, what we call, extend the knowledge into the next level in combination with what you have in your hands, what you have gathered as pieces of technology over past few months and past few years, you purchased from the Keshe Foundation. And this will be brought up in a very beautiful way, (1:26) for you to have literally the first basis of transmutation systems at home. You want to transfer, you want to transmute, we bring this technology in a way, in a very slow space, speed, that it'll be in conjunction with the transportation, what you call UFOs and transportation, to be launched at the same time. Or, we teach you prior, that it can be shown by you, in the application and the implications in the what we call, upcoming future presentation of the technology.

What you will see is a close, close what I call, replication of transmutation system, which you saw in a very crude way in Linz. And our people and our scientists and researchers and the others who we work with have matured enough and the technology has matured that this can be introduced. In a way we are introducing to you something which what I call, is amalgamation of the technology in the past. If you remember when we showed these the gas production, the CO2 production, the energy production, some two years ago. (1:28) You, and now this has changed to a suitcase size, and even smaller, and hopefully by the back end of this year, what was in the patent of the Keshe Foundation in 2006, 2005, which is the batteries, the miniature power, plasma power generators in size of the batteries on the back of this, reducing from these huge boxes, as you see, to a little handheld battery in your hand. We have advanced in the same way, but we have brought you with us, you will understand later on, that how we changed this (large system) to another system, which is brought to be this (Headphones). And then, what you will see in the coming time, is this (the Vertical EU). We will market this as a system that you hold in the house. And in a portable way, very much the way we've done with this, that you can transmute between two points, to start with in the room to room, room in your office and the rest of it.

It will be sold as a Twin set and it will be so elaborate. It will come in a self packaged packaging. And we will see how we will change these in the future. And we'll try to see how we will, what we call, (1:30) elaborate on these in the processes of the Keshe Foundation, evolution in science and technology and how these will be structured to

show their difference. So be ready for the evolution in science, evolution in what we call, the technology which will be released by Keshe Foundation. And in that process be ready to see huge changes to come, and to be seen, and to be in a way, next step of what we call transportation and transmutation.

Are there any questions?

Q: ... (1:32) How could we make the Gans of Vitamin D?

K- Vitamin D is a radiation. Vitamin D is a matter state radiation and it can be replicated, it can be made. And it is rather easy to produce, very easy to produce. But you have to understand the technology. You have to understand the application and implication of the technology. And it's the knowledge which you already have. It's in the teaching and it will be well taught. Understand what the purpose of vitamin D is, understand how you absorb it, and you understand what it needs to be absorbed. (1:34)

Any other question?

Q: ... How to remove from water the Hydrogen isotope known as deuterium which accelerates the aging of human beings? How to neutralize deuterium from water?

K- You cannot neutralize it. Deuterium is a stable. You have to find a process to extract it. More than neutralizing.

Any other questions?

Q: ... About a year ago, a friend who attended a course on One Cup One Life came to me with his little dog who was suffering from a tumor in his lower back. I gave him salts from an old cup, copper and zinc. I told him to put them in extra virgin olive oil and then massage the affected part, then clean and replace every day. The little dog is healed. The question is, did the amino acids in the oil play a role in the process? Thank you.

K- Yes. (1:36) It does, it has.

R: Is the olive oil one of the better oils to use for that kind of process?

K- We can use any oil, natural oil. We can literally use any natural.

Any other question?

Q: ... Hello Mr. Keshe. There is this man in Zimbabwe, Maxwell Chikumbutso, who has developed this technology called micro sonic energy, which can power a car and generate it generated electricity for general use. This energy, would it be similar to plasma fields that he is caption or totally different?

K- This technology has been extended, developed by the Chinese, one of the top brands in car industry. And he has used it on the back of television, and if you listen it was inaugurated couple of days ago, with the President of the nation present. But commercialization of it, as the Chinese say, has some technical problems with it. And first of all, it talks about... it needs a battery of the whatever it is. (1:38) But what is not known in public, which the Chinese are aware of it, they became aware of it, otherwise this thing would have gone haywire everywhere around the world. Is that this thing is receptive to explosion and as it receives radio frequencies, you can tune it that if you use for let's say military cars or if the car accidentally passes in the zone that there is a different frequency many of them have or will explode. It uses radio frequency it's a ..

I followed this guy's work for two three years it's not something new. Originally he showed in the back of a big television screen, but they don't show the other end of it, that the television screens literally destroyed themselves because in a certain radio frequency, television frequencies, which this system cannot block, has created problems. The car was shown with the president, president on the 10th, I think if I'm correct. Inauguration is a Chinese company has picked up and they're trying to find a way to block certain frequency ranges which actually leads to the explosion. And that's why this is one of the problems, and it's a radio frequency.

It's amazing what this guy has got, he's got no education. He's a village boy, couldn't carry on with the education himself, but he's coming up with some beautiful ideas. (1:40) But again, it's radio frequency based, and is not plasma based. And I think in the next three, four months, we'll see another system like this coming up, with I think it's a German group, who talk about the use of Hydrogen. And that is more expensive, they haven't managed to bring it down to a workable condition. And the same guy in Africa has made a big flower generation of it, it's a big block. And again they have problems with explosion of the systems, or system malfunctioning. And the Chinese company which actually made the first prototype shown in Africa, it says they have some reservation about this technology. And this is what the reservation is. As we see an explosion with Tesla cars, when the battery operation. We'll see. But it is amazing what this guy achieved.

And what you have to understand as Knowledge Seekers. I was explaining this to another Knowledge Seeker very recently. And it is, with the Keshe Foundation, with the extent of the technologies we cover, we always see different people with different ideas which are all correct, coming up. There is, the guy who does this, you cannot bring him into other side, the same with the other things. (The radio frequency T is limited. Whereas ..) The technology of the plasma technology applies into energy, food, agriculture, Space travel, life in Space, production of materials. (1:42) And when you cover some such a range, what you call, a wide range of technology and sciences, you always see people coming up with things in parallel, or the same, or use other materials to do the same. The principle is that with this technology you cover everything. And very soon you will see one system which not only produces energy, it produces material, it produces food, it produces fields and motion, the same as Earth. Our scientists are maybe 2 to 3 months away from this position.

As we said, we have produced Oasis, which is one of the most important things. Then, using the plasma technology, as our colleague just said, one of our friends, how do you produce Vitamin D? In that system, you produce Vitamin D and you can have the water with all the minerals and vitamins you like, if you like to drink it, or you stand next to it, then you absorb the energy, or receive and give. And at the same time, the system is set to lose weight and fly. And this is part of the structure of this technology.

We always, we cannot be arrogant, say we are the only solution, and I'm sure, as we have seen, with our own technology, has been taken, has been modified, new knowledge's has been added to, and new technologies comes out of it. And that's why we brought in a, what we call, open transparent teaching. We can't be prejudiced, is it the same, is it going to change? (1:44) You put this technology (radio frequency) and let him to fly, he cannot do. You put this technology and say, "Grow food with it", he cannot do. Where you use the Gans's and you've seen the agriculture, you use the Gans's, and you've seen for the Wellness and the rest of it. And we never had a problem in sharing technology. And we have to respect other scientists who come up with, their own intellect, their own understanding.

We will see, I'm sure, in the next decade or so, a lot of mixtures of the Gans technology, plasma technology, with the matter state technology. We do it, you... What do you think your MaGravs are? You use a Copper, you use the Nano coating, you use a field plasma, and you create different conditions and energies. And this is the principle behind it. And we are not into discredit someone, (by saying) we are better, no. We brought a fundamental knowledge. And with it, it'll come, changes, and at the same time, as I always said, there are other technologies. And as long as you are open-minded, you understand this, you have no problem. And we have to be open-minded. And this guy has done a lot of work. I followed his work because he originally showed other things. He, they showed the television, big screen television with the unit on the back of it. And he says this is where the plug goes in. But it's un-commercialized, it has huge explosion problems, of absorption of different frequencies, and in a way, it can be targeted. This is the problem with it, intentionally or unintentionally. (1:46) As I was talking to some people in the car industry, there's going to be a lot of recalls if you know how to radar it.

Any other question?

R: Okay...

K- (Continues) ... Let me, let me, let me explain something to you. As I said in past few weeks, I said it last week, we have shown how using a technology, plasma technology, we have literally not destroyed, we have wiped out, or we have short-circuited a microchip, with observation from the government scientists. And he (African inventor) uses a microchip, he uses electronics. And you can see where the next step sits. With the plasma technology, you cannot destroy (it), if you understand the process. You can create a new conditions, and because of the diversity of the fields it gets absorbed in. And this... anything electronic in the coming time has a disadvantage in respect to plasma microchips.

It's still in the patents of 20 years ago you can find it. With the plasma microchip, you absorb the energy and you transfer it or release it. In the matter microchips, you have these kinds of problems, matter state problems, and the fields within the matter state problems. (1:48) He doesn't use any solar cell. He doesn't use anything fancy. It all sits inside the system. He actually the principle behind it is, he understood, if you don't understand the technology. He actually studied the work of Professor Miles in Germany. He has created a condition where it works on the scalar wave, which means absorbing energy and the what you call matter-state frequencies. That's all he does. And that's all he's done. And you don't need a huge box.

As I said before, if you remember a few years ago, when he came to Ninove in Belgium in a conference we gave, where Professor Miles himself, made a presentation, when I was in Germany with him. He showed me a little bathtub, children, what you call, summer pool, small one, with a little boat on it. And he had a system on top of the second floor and he said, "Look, the machine works and it's not Tesla's work." As always said, Tesla discovered the Magnetical, Miles has discovered the 'scalar wave', is Gravitational. (1:50) In a way, it's a Black Hole, but that Black Hole only works with the matter state frequencies, and doesn't need more than a pinhead to be.

And this guy has achieved that, and he's done it very, very nicely. But still he has matters of microchips and everything else with which can... it can be damaged by radio frequencies, at a certain length, very quickly. And this is why, is one of the major car producers in China, has not launched it yet into the rest of the world, they just made two, three prototype, for this guy, for the nation, to show Africans can break through technology as well. But he has a lot of beautiful things done, he describes amazing in what he understands. He's found the principle and he works on that principle. He can miniaturize it. It's good for Africa to be done but at the same time, it has, what you call it, beautiful job which has been done. It just uses the scalar waves.

Don't forget, scalar waves was used by Tesla in a different way, creating an Infinity Loop between his tower in Moscow and his car in New York. The way Tesla hid this was beautifully done and he created this scalar wave, but he never understood how it worked. (1:52) This was amazing how Tesla never understood this, but he saw the working he understood. But he never understood the backbone to this. That's why he couldn't come up with a scalar wave. He always considered it had to be one way. He put his tower in, they say, wherever in Moscow, wherever, and his car in New York. He created, in a way, what Einstein later on said, the, what you call, the magnetic fields. He made a very, very small motor here, a very plasma powerful generator here, and these two did this (created an Infinity Loop between them). And that's why he could receive energy.

We say the plasma gives all this from big to the small. But he used his connection of Infinity Loop between the two. And he never considered that this direction of the field (?? M) is different than this direction of the field (G). And for giving out you need a slightly higher energy. And I explained this very recently to one of our Knowledge Seekers. We can build the Tesla Tower tomorrow. I know how it's built and it can be replicated very

quickly. But has a problem that if you put too many uses to it, it will not meet the demand. It has a problem with it, inherent problem in magnetic field transfers this way (?? back to the tower). This uses concentration of the fields, and then when you split it, it has this problem. That's why Tesla, when he made his second car, it wouldn't run. And this is the understanding of it, that how it works. (1:54) And you can take this tower on the moon. It still will feed the car.

This guy is working on this end, the South Pole, and what professor Miles explained as a scalar waves. If you surge it, they cannot put a filter on it. They've tried. The Chinese have tried to filter it. They filtered some of the frequencies. Because once you go a certain bandwidth, it'll start emitting energy out. But if you go a certain bandwidth, it releases energy. It absorbs more energy, and then it explodes. This guy has studied the work of Miles and Tesla, and he's come up with this in a miniature way, only on a frequency basis, not a magnetic field basis, or matter state.

In a way, if you stop the satellites, if you stop broadcasting, one of the problems with the Chinese found out, you cannot run this system in deserts a long distance away from satellites and from radio frequencies. He has that disadvantage. It's very good we can have a mass surge in the cities. The way your antenna dies with your mobile phone, this is one of his disadvantages of this system he's developed. He needs a saturation environment for it, but these are pitfalls they're trying to sort out. And they're working on it very hard. It's a major... they put millions of dollars developing this. They... if you've seen it, they say it's just a few built, and then you will see restrictions, you cannot charge it. (1:56) They need to add a charger to it later on. There is a possibility that Starlight will be connected to it, but you put a lot of pressure on their system, if they support such a system. The Tesla system with satellite, they are looking at it, and this has this problem. You cannot support. Radio frequencies need to be created somewhere, noise needs to be created somewhere. And it relies on the cities, and in remote places when there is not, you cannot charge, the battery cannot run, that's why they use a battery to charge. And they say they have no battery, but they have created a storage for the energy, the way they produce it. But it's amazing, from a literally illiterate man, with no knowledge, being kicked out of school, coming up with this technology.

Any other question?

Q: ... Mr. Keshe you said... if I'm not correct, if I heard it correctly, you said Mr. Trump is going to... president is going to help us to release your knowledge publicly in the future because I know...

K- ... Can you repeat?

Q: ... You said Trump is going to help us to release your knowledge shortly.

K- No, no, no. The condition created by his presidency will do that, not himself.

Q: Okay. (1:58) Because the guy was talking yesterday in the White House and I think he's the most stupidest person I've ever met and he was talking about the aircraft carrier they just built. They were supposed to build... They were supposed to spend 5 billion, they spent, I don't know, 30 something billion, he said, because they used a magnet. And the magnet, sometimes it works to lift or carry planes, and sometimes, and I said, because you scientists and yourself, they're both stupid, because if you use a magnet in a matter, of course the magnet is going to be affected by the field around it, but if they use it in a plasma, it's going to work like a clock. But these guys are so just arrogant.

K- No, it's just what they give them. The guys fix about 100 different topics in half an hour. They are not actually (?? scientists) .. they are just talking about what they have been told (to talk about). This new aircraft carrier which is on the talk, has very advanced technologies, it carries a nuclear, and the rest of it. And is a combination of different technologies they use. But amazing enough it takes 5 seconds to disable the system. It takes less than 5 seconds to disable the system. It will be a tub on the oceans. With plasma technology, if you understand it, naval forces are a very good places to have an island just put them somewhere because they can't go anywhere in the future.

Q: ... (2:00) Dear Mr. Keshe and Rick, you have explained in previous training courses that the Magnesium Gans can be used to restore harmony in the home. Does this Gans also work if a person lives alone and feels lonely? Or would it be better to use a combination of CO2 and Zinc in this case?

K- Can you repeat?

Q: ... You have explained in previous training courses that the Magnesium Gans can be used to restore harmony in the home. Does this Gans also work if a person lives alone and feels lonely? Or would it be better to use a combination of CO2 and Zinc in this case?

K- Magnesium is usually on its own.

R: Okay is that the end of your answer on that one?

K- Yes.

Q: ... vitiligo is a disease that causes loss of skin color in patches ... (2:02) Can the problem of vitiligo illness be resolved through plasma? If the answer is yes, please guide how.

K- Can you bring on your Wikipedia?

R: Wikipedia.

K- Rick, can you read the messages and you private on telegram?

R: ... Okay, vitiligo is a disease that causes loss of skin color in patches. The discolored areas usually get bigger with time. The condition can affect the skin on any part of the body. It can also affect hair and the inside of the mouth. Normally, the color of hair and skin is determined by melanin.

K- You can use Gans's, if you know what you're doing. I have spoken about this, some years ago, in the teaching. The Iranian scientist, years ago, developed a technology to overcome this temporarily. (2:04) And that is by taking the skin of an aubergine (eggplant) and boiling it. And then dab, mix it with oil and then dab it on the skin. And it lasts usually about four to eight weeks, they say. And gives, you have to tone it to the color of your skin that you don't see it. And it works. And this is a scientific work they've done. On the Keshe Foundation side, we don't get involved with these things, especially in teaching. But yes, there is a way you can do. There is a process you can do, but again, we don't get involved on the health section of the technology.

R: I think you mentioned at one point in the past, that it's not something that you really, really need to change. It's sort of the Soul has decided that, and it's sort of that deeper connection there. Is that possible?

K- In a way, yes. Our physicality is a sign of interaction of our Souls with our environment.

Any other question?

K- ... (2:06) Did you read my message, Rick?

R: Yes, I see that, thank you.

Q: ... Hello Mr. Keshe, my friend broke his kneecap a long time ago and now has a splinter that travels back and forth in his knee. Can he use the Knee Gans and is there a chance that the splinter will find its place again and grow back?

K- Again, write to Dr. Kern. He will answer.

R: So, just for future reference, people that have health questions will need to go through the Keshe Foundation.

K- These are the doctors, these are the Wellness Centers. They know how to answer.

Q: ... How to create the Gans of Magnesium... Can we create it by putting a Chlorine of Magnesium, I guess Magnesium Chloride or other Magnesium salts with CO2 Gans?

K- You can produce Magnesium and if you can produce it from foods, you can produce it from vegetables, I think from broccoli, some people know, some Knowledge Seekers have done. We produce Magnesium in different ways, so much of it in different versions

of it. You have to find out what Magnesium is short of. How your Magnesium is connected to what. (2:08)

You got to understand a lot of knowledge is out there, we can use it, and there is a lot of knowledge that if you add it to the knowledge of plasma, you can benefit ?? by it in a different way, in a beautiful way. You have to understand what you needed, the way you need it, and what purpose you need it. And you've got to remember your body is a composite of what man calls 'the same.' You breathe the same air and if you don't exhale the same rate as you take in, in a different strength than it should be, you get pneumonia. You get water in your lung. But it's the same air. You change its composition and it produces water.

In a way I said to a doctor, you know, what's the difference between you not understanding the process of the water in the lung? And now as a plasma scientist we understand the, what we call, the process of creation of energy to matter. I said it's only 15 degrees. He looked at me as I was a man from the Mars. I said, you change the way your patients are on the bed, (2:10) pneumonia and you empty the lungs with water every 2 liter, 5 liter, every few days, just change the bed's position by 15-20 degrees. You don't need to do so. Because the way the patients are put in the hospitals, the lung pressure rises, create, changes, converts, whatever you want to put it, and the CO₂ into water. And if you understand the process, it's very simple. It's the same as the guru who was moving different directions, setting up and changing his body, was in posture and he was feeding himself. These are the things we have to understand what you need it for.

They tell you, you are short of Magnesium you take a tablet but the Magnesium has a spectrum of vegetation solid and a spectrum and amino acids of what you call human meat. Which one is your body missing short of? You eat meat, then you eat vegetable with it, and then you eat what you call it, a tablet. But in fact you are not need to eat one of them because your body saturation is short of the other one. (2:12) It's very much the way they have influenced us in understanding, because that way the structure can be used or abused. If you understand the science and we need to understand the science and what they give, to what they tell us to benefit themselves.

They tell us don't smoke nicotine. Don't smoke because of nicotine. But why all of us in all races and colors and shapes are addicted, use extensively nightshade fruits, vegetables and the rest? All the nitrate, more or less all, majority of them, carry nicotine. Tomato is one of the top, I think, three or five nicotine content fruits. Aubergine (eggplant). Nightshade foods are very high in nicotine. Why did the nature bring it to us? You see how you feel after you eat these kind of foods just with nightshade nicotine content. On the Internet they'll give you a full list of it. But they say don't smoke. When nicotine in vegetable, in greens or whatever roots, is part of controlling our neuro system. Otherwise, we won't eat it. (2:14) It's the way the knowledge you can ?? wait.

Nobody, more or less, had cereals in the morning. One advertising brought a cereal into the life, that you eat it, you have all the energy from it. And in fact, it gives you every other disease than you could ever imagine what goes on these things. You just get a corn

crushed and eat it, see how much you would like to eat it every day. The additives, the reports, they talk about the spikes in the sugar, diabetic and every other illness comes. I still have, but I used to store as part of my old operation. For one of the top brands in the world, cereals, they used to store their certain materials, they didn't want to be in their premises, in our warehouse. And there were a couple of hundred of these boxes with 4 plastic bottles in these boxes, each one about 1 to 2 kg. And on a regular basis, because the factory was maybe 5... less than 5 kilometers from our storage depot. I ?? would just come, open a box, sign and seal the box, to all the paper documentation, and take one bottle out. And knowing these people out of curiosity, I asked, "Why this is carried like gold, why do you... (2:16) Why so much secrecy and control on this and why you keep it with us? You have warehouses, you have all your packaging and you can put these boxes." One day the guy told me something, he said, "One of these bottles lasts us so many weeks, we add the minute, minute amount of it to everything we produce for breakfast cereals. And it's highly, highly toxic. That's why we treat it this way, we don't keep it, because we need regulations, you can, because under your license you can carry these things." They were literally, they know, if you can imagine, they put in hundreds, thousands of breakfast packages around the world, and they just need one bottle for it, 2 liters. Diluting to dilution of dilution of dilution, and what poison does it carry? But they brought us the school of thoughts that you need breakfast. It was a fashion, breakfast, having cereal in the morning. It was they built in our head and we all do.

And there's a lot more research on diabetic spikes. They did a research around 1980s, that they took box of cornflakes, energy wise, and it's cardboard packaging, you got more energy out of the cardboard packaging, than the cornflakes, what you call it, the flakes inside it. (2:18) And they control how we get addicted to these things. Mineral content is a way of control. If you walk on the street, sometimes they give you, they do a sample test. Do you mind if you tell us, you like this, you like that, which one is nicer? And you say, "Yeah, yeah." I give it to you. You know, you taste a few and give them a few ideas. Yes, no, whatever. They actually, what they control is the salt content. And they want to see how many people are more in favor of the salt content. And with that salt content, they control. This is why major burger chains you addicted to and you like to go to that one especially, the majority of the percentage of it is because of their salt, the content fits into your spectrum. Many people will not go to one brand, they always go to another brand because they don't like this. Because they tune into, and most of our foods are sodium based, and now energy based coloring content.

And this is what you have to watch. What you're using, what way you're using, and the reason you're using anything as minerals or vitamins or whatever. And as humans are a, are a race has been a mixture of everything from air, wind and fire of this planet, we have to serve all of it. When you choose a mineral or a vitamin or anything on that spectrum, (2:20) you have to understand we came from the Earth, we rely on this mineral. We came from eating the vegetables, we again has the same mineral but in a different spectrum. And then you have the meat side. And then there is one part which is missing in the world of science of today is the air we breathe. It still carries, let's say, Magnesium. But we have to know how we digest it. And you have to feed the full spectrum.

Any other question?

Q: ... Yesterday I was discussing about one thing that I learned in the, in a class about physics matter, matter state. And I want to understand in the plasma science. So, you said that if one person transmutes, the others will learn more easily. And I was remembering a physics class where they taught about the Compton effect, which means that when radioactive energy is applied to an electron, it changes its layer but releases energies. So I'd like to understand in the plasma science this kind of energy that's released, if this energy will like elevate the Souls around the people that .. have more energy than the others, (2:22) like with the sessions and with this kind of things.

K- Repeat yourself, I think you answer yourself.

Q: I think yes. But I don't know, it's this kind of understanding, it's existing plasma science. So, because you...

K- It applies but you have to understand how to apply it. That's the key. You know I think in your own talk, I think you saw the answer.

Q: But is it like, it's the high energy or have like an angle and everything else?

K- It all .. diversity, we get things from every direction. It's 360 degrees spherical. It's literally 360 spherical. We get everything we can imagine from all directions.

Q: And this is near to happen?

K- What do you mean?

Q: Like, (2:24) what this person could release this energy for all?

K- In a way you can, but if you understand how to use your Central Energy, yes. We call it intention. You understand? You intend something happens, you can release the same way, energies, vitamins and everything else. And it's just understanding the process. Literally. Your intentions are very powerful things in filtering out. I .. I said once, which is in a way you understand in a plasma way, intentions are the filters. You target. And if you target, you, and you know how to target, you know how to bring energies to it, you achieve it. There's no difference between absorbing energy, giving somebody energy, or what you call it, receiving it. It's just what your intention is to receive or to give.

Some Knowledge Seekers who've been through these Friday sessions and they see, many of them, that they see energy coming to them. They don't, they see absorption of, we have many testimonials, that people weeks after, months after, still see, weeks after, days after, they don't need to eat, they see energies coming to them because the body calls you have no intention of. (2:26) But the intention of the Soul of the body is that, they're what I need. I have shown this in demonstration with a system which I built years ago. You can target what vitamin, what energy absorbed by which part and accordingly is like your

kidney absorbs certain energy for itself and the liver immediately above it, it has a different gravitational field absorbs different energy from the environment.

One of the reasons that we have so many diseases complications in our digestion area, our stomach and hip area, is sometime, if you understand, when you get too fat, you got too much fat, absorbing the energies which is need to get to the kidney, doesn't get or is different, or kidney gets, what we call, protein around it, so you filter certain, so the kidney goes bad, but in fact the energy is absorbed from the environment to it, but it doesn't reach it so in a way it rots. And by intention you can change it, by intention you can bring it into it till it does itself, and then do the next and the body sorts itself out. And we have to do this in Space anyway. We learn it how to do it in Space and our body absorbs certain field strength, which does affect it more or less. (2:28)

We had a number of surveys or reports, scientific research, done with Corona, confirming this. It seems that people of the certain blood type are more receptive to Corona. These are the research papers which is done since then, we see certain type of damage to certain organs from certain blood types with Corona which is a virus. So in the Space we have to monitor this. We're passing through the Space, we have to keep a constant field that certain people because of certain fields they the path through does not get certain diseases or certain changes. And we know this fully. We understand this fully.

It's like when you have a pancreas and then you have a liver cancer. What we see as the expansion of the liver or changes in the pancreas, what we call, material which is released. It will give us the, or tells us what a condition of the digestion system is. All your life you have a certain color stool, but when you have of your pancreas through diseases, damaged or whatever, or when you have like liver cancer, with the pancreas cancer, you see the color changes and the doctors literally by the color of the stool tell you how long you got left to live. (2:30) Many of people with pancreas liver cancer. Doctors just ask what a stool says and you don't see it, but ask the nurse to look after you. What color is it? It's orange and then it goes to yellow and then it goes to creamish and it goes to the whitish and that's when you die because it means the system is not absorbing anything, releasing total energy. The more ?? , the brighter the color, which goes towards the white and, some people even have a transparent stool in certain diseases.

We have shown and we'll show again, that, we gave you the MaGravs, and you looked at the energy size. And I saw the greed of people how they wanted to save you. How they missed the point for the MaGravs too. But if you design a MaGrav in a specific way and you literally be in touch with it, contact with it, it gives you all the energies you need. You need to expand the Soul, or you need to expand the physicality. I'll show you something which I am going to just one second. For security reasons, we have put a cover on it because this is as you know we are trying to be good in delivering what we say and we are getting good at it, especially with more complicated systems. (2:32)

Many of you have bought this new system which is going to be used by you, different Knowledge Seekers, in the next few days in different conferences. If you look at this, the two black signs here, because they are customized per name, so they blacked out the

name, as you see on it, it says MaGrav Twinity, Cosmic Ray MaGrav Twinity system, but the interesting with this is this, these two pieces (sticking out of the system), it's the same on the other side. This was the purpose of the MaGravs in a way developed partially is one of the system, but internally where you place your hand, I explained this last time, now it's physically here you can see. You place your hand on what you call it, on these two, or if I bring the picture in, let me take this out so that you understand, These are units which are going out this week. There is the same combination on the other side, which means you have a connection here, and there's a connection on the other side. (2:34) And then you have a connection here, and you have a connection on the other side. You literally can, and you feel it, all of you will feel it. It's amazing what you're going to feel, is if you connect, hold these two, connect these two together or connect these two together, put one hand here and one hand here and one hand here and one hand there or put one hand on either side, you will get different condition of emotion, even information.

And these are the new units, Twinity System, and every single one has, is named, that's why we put this black pieces here, as you see, that do not share this with no one. The name of the users are given to us, and we put a name on it. I think it's, everything is in there. Because this is going with you. And each one comes in its own packaging, you get it, don't let anybody touches it. And I know, I think about 20 ?? going to sessions in next couple of days for a session. So, this will have an arrow on it, supposed to have an arrow on it, I don't see it, maybe it's on the other the side, where it tells you if you want to be in the dimension of physicality, you, what you call it, you put it on this side. .. (2:36) If you have the sign of physicality on this side, and there is another arrow on the other side, or the same side, if you go into the energy. And this is important. Do you want to only stay on a physical dimension, or do you want to stay on an energy dimension? And then what you have to do, you have to turn this unit upside down.

This is one of the new systems we put up and it has huge implication. And this is used for one of the conferences, I think, 20 ?? going out. And they'll teach you how to reach it. You cannot use the Headphones or any other thing. Better if you have a Headphone don't try to use it with this because they are not linked for, and we advise you not to. Then, one side increases your, what we call, the absorption of the physical part, and the other side is for the energy part. And do not share this system with no one, not even your cats or dogs. If you can put it under a chair, and if you sit above it, (2:38) then hold your hands on the two. Don't sit on the units that break. Put something on top, a stool or something. And then try to do the same. and see how the energy field of the system will touch you. We can produce ?? about , a lot of energy which touches literally your Soul. This is different than the units with the, what you call it, with the two Headsets and the rest. This is a teaching process.

It's called the MaGrav Twinity. Then you'll see what you can use. There is... this will... one of the ways we try to, for you to understand yourself and energy transfer within you. If you remember, the other units which we put out, again that's the energy development, and if you remember there are two patches, which you use to hold on either side. Now, technology development gives us the opportunity to be able to bring in the Soul and the

STP into operation. And this is the beauty of it. And how can you feed one or change one. And you just do it with the intention, with the emotion. Very interesting, in this there is a characteristics for energy, emotion. (2:40) We specifically have conditioned one for food, it's totally vegetarian, there is no meat or fish, whatever is involved in there, because we don't know who is vegetarian and who is not, so there is an element of feeding yourself, see how your habit changes in eating or in or if you are hungry you can go to the system. Do you want to feed the Soul side or do you want to feed the physicality side? This is in simplicity one of the most complicated systems we have put out ?? . It's an "Oasis" of the Soul, if I call it that way, Twin's with.

Any other question?

Q: ... I have two questions. When you talk about energy field this is something is happening recently. So, I really know what is the reason for it like, for example sometimes when you talk, like you say a sentence or a paragraph, suddenly, you know, I feel the energy in my body and my heart races. Or recently, I was watching a movie about the Prophet Yusuf. And suddenly, as I was watching and he's talking about something, the energy field comes from the TV, comes and I can feel it comes to my body, my heart rate goes up. I just like feel something different and I don't know what is happening at those moments.

K- I think, knowing you, a lot of young men used to do the same to you when they were young in university. It's the emotion which touches you.

Q: The emotion of the person?

K- Yeah. How did you fall in love? You feel energy. It's the same thing. (2:42)

Q: But it's a prophet on the TV, I mean...

K- It's an emotion of connection of thoughts. Why do you pick up a picture of your child and brings back all the emotions, or you pick up a picture of your mum, or a scenery it brings back tears to your eyes? It's just a picture. We... it's the same thing, it brings emotion. The words, the pictures has that power. Don't forget when you take a picture of someone, you by intention or by observation you connect because it's part of the energy they gave that is registered on that piece of paper. A letter is the same, the music is the same.

Q: You know that's what I understand because you know sometimes if I am like a guru I really like his words and I look in I see a picture and I look into the eyes and I stare in it. I can, the eyes become alive to me. I mean I can feel the eyes looking at me as if he's right in front of me. I can understand this because I'm focusing on it but something that I have no intention suddenly moves toward me and it was just for me.

K- Can I ask you a question? Something... maybe some of the Knowledge Seekers have. Do you ever had a situation that you see the image and you... it's like, you know, the new

television system... see thousands of dots and then makes the image. But in the shape of three-dimensional in front of you. Have you ever had that experience?

Q: Can you say that one more time? I didn't get it.

K- You see, you see, you don't see a physical image. (2:44) You see an energy image, but it has bits of physicality presentation down to it. This, in the future, the more Knowledge Seekers become aware of the operation of the fields, the more you will see. It's like a three dimensional picture and body that moves around but it's not fully energy that you feel it. You actually visually can see it.

Q: Mr. Keshe what I do I can tell you this if I stand on the balcony and then stare I mean I look at the tree, suddenly a fog comes, takes everything and then suddenly everything comes and fog goes and some things all the trees and everything comes more closer, like I can look at the tree but it just moves in and out.

K- That's to do with your eye, get your eyes check. But in real life, you're sitting down, you're somewhere, you see it's not an image, but it's a real physicality of energy, with like a speck of dust in it, if you want to put it that way. You're aware of the presence. This happens to me quite a lot. I see both dimensions, I see the energies. And it's not that, "Oh, can you see this?" I mean, no, it's just that, in many, it's just like somebody in front of you, is not that you say, "I feel the energy." You, partially, are aware of existence of ... another person with you.

Q: I think Mr. Keshe, also, there is some stuff, I think you reluctant to tell us, (2:46) because, I feel like you might think, we might get scared, because, you know, we talk about, a lot about dreams and what the dream mean, and everything. But, I'm 100% sure now what I'm, um, is happening is really is the truth. And because, because you never told us, because you said when you dream, it means when you go to sleep because of the circulation, there's called comes under physiological, um, activity in the body goes lower. The Soul has, um, you know, can get out and have access to everywhere can travel everywhere. Okay. So for example you say I want to see my grandmother, I want to see my uncle who passed away, you can go see them. But now my experience tell me when I go to sleep, from the time I fall asleep, if I sleep five hours, six hours, seven hours, from the time I go to sleep, I go to different world and constantly activities happening. I don't remember most of them.

K- You do that even now talking to me.

Q: No, no, just wait a minute until I finish. You see, when I wake up, like for example, when I wake up, say I'm in a market and I'm talking to someone and I come out at like five in the morning, come sit on my cushion to meditate, right there, suddenly I fall back into the same scenario. I'm continuing with the person I was talking to. And then this morning I woke up because I put my alarm clock for three o'clock come and listen to you. I was, when I wake up suddenly like this, I remember that. So I was, I was, it was a like a metal piece. I was heating it up and it was really red, and I took care of a cloth and I was

bending it because I want to give it a shape and suddenly I woke up. So if I like here when I was listening to you when I got if I fall asleep I go back to the same scenario. I'm doing it, so it means, so it means that my Soul has another life someplace else. (2:48)

K- Yes, yes, that's exactly what, exactly what I told you, I'll explain to you. When you go home and you start cooking and cleaning, does your physicality run on the street too? Or you carry on with the same? It's the same thing, your Central Energy, you call it a Soul, is what you call it, lives its own life. It carries on. If somebody opens the door he says, "Oh you are chopping onions" and he goes out and comes back, he still comes back two minutes later, "You're still chopping onions" It hasn't changed that you haven't, you haven't stopped chopping it and nothing has stopped because he went out. The only person who goes out is ignorant to you chopping the onion, it's you because you're in it. And your physical side of awareness of your brain is that guy comes have a look and goes, that you're still chopping the onions. You understand? And we are chopping onions all our life we then we go to make the soup with it and the rest in the dimension of the Soul but our physicality comes and goes and have a look and people, are you okay? It's like your child. You know, how are you doing, how is going. And this is what we have to understand. What we see and remember in a physical life of what we call, our dream is us popping in, opening a door, but the Soul is living its life. And its life, yours is limited to the village, to the house, to the car, to the city you live and to the planet you travel. That guy has no limitation. You see an alien, tomorrow you're cooking, the day after you're with mom, but you travel to see the mom at the speed of the Soul. And then you observe, (2:50) "Oh, I'll go back and come back and I'll still carry on." Yes, you're still chopping onion. It's your husband outside coming in and looking, "How long are you going to cut onion?" "I'm still here in the kitchen because it's part of the process. That's the difference.

Q: Mr. Keshe is fascinating because you know when I go to this because I'm so actually at night I'm more busy doing than the daily because...

K- You are busy 24 hours a day.

Q: I'm very busy, I'm very busy actually I'm doing different a culture like sometimes my brother and ?? Suni with me sometimes other people are with me I mean sometimes you're with me and I just like and just like my god it's just so when I go to sleep actually is not a sleep it's just a different life.

K- Now you know how I live for past 50 years. Doesn't stop. Does not stop, because you accept the life on both side, or not accepting it you're aware of both sides, But if you have ever had this to, it's literally walking with you, with somebody, you sit on the sofa and you see it coming through the corridor it just comes through the wall. But you see, these are not dreams, these are not going crazy. This is understanding that other lives Universal lives don't need manifestation of physicality. Or in certain conditions, at certain wavelength, they reflex, as you know, you buy these clothing, especially for children, which have little, little circle of metal on it and as you turn it, it bright, shines and then it gets dark. It's like those (reflectors) and it needs a lot of understanding and you learn a lot from these experiences.

Any other questions? (2:52) Or shall we call it a day?

R: Well we have a couple questions left but...

K- Yeah, let us see what they are... Rick please do that what I told you is very important, immediately. Even it means taking them off and then all ??,

<< Mr. Keshe tries to send a picture to Rick on private. >>

Q: ... I have two questions today. In the 575th Knowledge Seekers Workshop you revealed the concentric layers in the brain, starting with the Soul in the center, then the hormones, then emotions, and then the body on the outside. Where do our memories reside in relation to these layers? Where do we receive them? And where do we create a wall of resistance to prevent access to them? Thank you. (2:54)

K- Emotion. We make the wall of access by emotion. The way we create our cancers with emotion. That's all it is. We don't want to... We had a very interesting case of understanding in the Alzheimer's, where the family and the people get concerned about, the person is disturbed. But in fact, now they have to face what they wanted to forget, and it creates some traumas. But if you go into detail and ask them, they tell you it's exactly what they didn't want to remember. And now, with opening the structure, they have to deal with it, and they don't want to. So it becomes a problem, there is wrong with what I did or what you do or whatever.

We create emotional barriers. That emotional barriers sets the... I can put it in a way, in the physical part when we have a problem with our daughter for example as a mother or our mother we get the cancer on the left side, scientifically said so. You have a problem with your son or a daughter which you wanted to be a son, you get a prostate cancer. Or something you cannot accept as a man, you get it. That's your physical part. In the emotional side, you change the Carbon, so you block the information. In the body of the man, the end of the nerve is the conversion of the Carbon at the end, no difference. (2:56) In the brain, you do the same. And then, they say, "Oh, they see patches in your brain." The neuro system controls your emotion and physicality or what your senses in ... in physicality and the emotion does the same in the brain. And then we see patches say this is connected to Parkinson's or Alzheimer's and everything else.

Your emotion changes it, where you get chopped your finger and then you have a pain and then you have that's... and that's a physical part. Here you do with the emotion. And I've seen this many times, many, many times, people with, especially Alzheimer's, have this dilemma when they start processing. They have to accept it and it's very hard. This is what I didn't want to remember. I created conditions for it. But the plasma technology overrides the condition. Now you have to handle with emotion. And a lot of them come up with, "I'm sick. I've never been like this." But ask one simple question. Have you faced your what I call, "demon" as I call it? Isn't this what you wanted to forget? That's why you created Alzheimer's.

You look at the... especially, especially we see in women. It's very prominent, majority of it we see in women. (2:58) Their lips shake, like Parkinson. Sit down and talk to them. It could be continuous, or it could have been one occasion, we tell them when it started. And take them back, whatever, we know how to do it with our system. They've never been allowed to speak their mind. Just shut up, you don't know what you're talking about. And then see the husband and behavior between the two. I want to talk but I cannot talk because you know, I'm always wrong, I've been told so. The mouth shakes, wants to speak. And you call it a Parkinson. Find the psychological reason behind it, you'll see it's gone. Feed the Soul that it feeds the emotion of physicality, it's easier to solve.

Any other questions?

Q: ... In the past you've explained that minerals of various isotopes have very different effects on the body and that a plant source, animal source, and elemental source are all different. You mentioned, for example, that adequate calcium is required to support strong musculature. On the other hand, we have learned that the thymus, thyroid, lymph, and bone work together to balance our minerals in the plasma condition. So the question is, is there a place for mineral supplementation and can levels be accurately evaluated? (3:00) The question breaks.

K- Yes, doctors know how to do it. Doctors fully know how to do it. Doctors know fully how and what to measure. You see the problem is alternative medicine has been or what we call alternative .. traditional medicine has been blocked by. What we know how it was done and the reason it was done. But in places like in China, which you have both, they call it western medicine or traditional medicine. And medicines are not as effective as they were a hundred years ago. We discussed this before in some of the teachings. Because the farmers have added so much chemicals that the composition has changed and the field strength has moved up to another strength. So it doesn't do what it used to do, because your amino acid, your body was used to it. Because majority of the traditional medicines comes from the same area that people live. So they, they got what they were short from the ground. Within 100 kilometers, within 50 kilometers, that's all it was. Now there's we take things from Africa into Asia and everywhere else. And we create more problems by just moving foods around.

The composition of the foods are enormous now. And with it are new diseases, new conditions, new emotions. We used to be traditionally oranges for winter near Christmas. We had nectarine or what you call it, ??, whatever you call it, and then you have watermelon season. Now you get a watermelon 12 months a year, 24 hours a day. (3:02) You get oranges, doesn't matter summer, winter, whatever, our body, our emotions have changed. Our expectation has changed. And this creates different field energies and the new material in genetic, in a modified, releases totally different energy than the fruit with normal. As we were talking before. It's crazy, absolutely crazy, that nowadays they charge us for bio (organic), whatever, natural products, and (if) we go to a village, we go to Africa, there is, they live on bio and they don't pay three, four times more than what we do. And there's no guarantee, just the bag says (it's) bio (organic), you don't know if it

is actually bio. For what the villages live in the remote places, poor people live off the land, we pay three times more to eat what they eat. And when you eat in the villages in districts, you actually eat from what comes from the land, the food is totally different taste. It has a different texture, because there is a modification. Even they have modification, modified crops. You taste the difference. And so we absorb different energies.

In Chinese herbal, we had a long discussion, we signed a contract with Chinese traditional medicine university in Beijing, just before Corona, (3:04) and in the discussions with them and everything else, I always told them, I don't accept your work. I don't accept to test your herbs, or your whatever you use. We, you have mixed so much in it. I want, that was ??, to find a traditional remote, what you call it, vegetation, and then we cultivate it through plasma technology, that there is no chemical. And then what we will see will be the glory time of the Chinese medicine, what it used to be. Because there is no modification, there is no genetic change, and there is no, what you call, herbicide, pesticide, and the rest of it. And that's the reason.

We have changed by time, by cultural changes and mixing together to this point and our body hasn't moved (evolved) with it yet. Some cases does, some cases don't. When I came to Europe exactly nearly 50 years ago, if you wanted lentils in England it was not heard of, people didn't know what it was. If I asked for a chickpeas I had to go in a remote place away, or to Indian shop somewhere, they were on somewhere, to buy lentils, because it wasn't there. And paprika and aubergines (eggplants).and these things were something luxurious for foreigners. (3:06) And now in every shop you see them, people like hummus, and people like couscous and the other thing, and we have mixed these and our body is not ready for it. And on top of it we've modified the genes to suit us. You get a bag of orange and squeeze oranges out of it. You get not a single, not a single pit out of it, there is not a single seed there. How could it be, how did they regenerate it, if there is no stone, there is no seed in our food? Because then nobody can copy, so they control you.

And this is what I said, what you've seen, the unit we just shown, is the beginning of that change. And I wanted to see how many of you who come in touch with this, and you can trigger it the right way, stop eating because you feel don't need, because you took the energy. That's all it is, we transfer energy by food. Now, these units you've seen are the beginning of that cycle. See what happened with your cramps. See what happened with your emotion, see what people talk about you, is changed. How come it didn't change before you buy the unit? How come you didn't stop eating because of it? See how much your addictions goes. Chocolate, whatever. Write down and report it back to the people in the session, and we get the feedback, and we know how much we do.

Do we have to produce very soon, a vegetarian version, a vegan version and a meat version? Yes, it's on the card. (3:08) Would you invite your friends for dinner and give each one of them one of these systems, and they sit in front of it and say, "We have a chicken and chips." And they all have chicken and chips, because you created the intention of Emotion, the system sees and they accept, and so we have... "I want my chips

without salt," and as the Chinese take-away says in England, "Do you want a "sore finger," because they can't say (pronounce) 'salt and vinegar.' So, that change we promised you, it has started creeping in. And this new system is one of them. It's for you to know yourself and to see what you need. And report back to us. And the ones who say, "I don't feel anything." I have to say, "I don't feel anything." otherwise I have to accept the change in me.

Any other question?

Q: ... Can you go deeper on the layer of the skin and the neutron proton and electron please?

K- There is no going deeper, there's similarity. They're similar to each other. Because the inner side gets energy from the Soul, it gets from internal energies. It's different than what is outside, but outside takes different strength of energy. (3:10) In a way, as much as we take, the environment needs from us to give, because it's short of. It's not that we throw everything out, environment has to have a need for what we want to give, that we can take. And it's the same in primarily where the strongest sits is the center of the energy, but at what field strength?

Q: ... Do you target energy by bringing attention to the part?

K- Yes, it's one of the ways done for centuries and decades. The Pain Pens you have, if you understand how to use it, you can not just use it for pain, is for repairs, for upgrading. But, we always look at what we need, we don't look at what we can give to.

Any other question?

Q: ... Using the unit CMR Soul Connect, is it possible to communicate interactively with the fetus in the womb of a pregnant woman?

K- I stay out of this.

Q: ... And can this unit use one Headset for me and another Headset for multiple people to use? (3:12)

K- As long as you don't give your Headset to anybody else, keep to yours, you can do anything, because then you can communicate with them. And you have to tell them somebody else has used it.

Q: ... Mr. Keshe, make sure you elevate your Soul more than anyone else, so that no one else can play hanky panky and use the Creator's technology for power and greed. I'm sure that's how the Creator would want it.

K- I don't know. We don't play hanky panky. But let's see what comes up and how things take shape.

For those of you who join us tomorrow please be on time because if you miss your slot we cannot allocate you, because there are so many people on the queue. And having multiple systems, it's very hard to do. But please, be on time. We start, we're there, and we disconnect, because it's, you get about 15 minutes window. And as usual, we send a picture of your, what I call movement, and this time we have two pieces. The right side, which is the single figure, is the configuration of your Central Energy. And the one on the left is your physical dimension, then the STP. It's more detailed this time. It's much interesting to see how much the lines expand, how much the distances between the lines, which way you're taking energy. Are you taking energy from left to right or right to left? And the rest of it.

And those of you who are with us next week, next Friday, (3:14) please make sure you have the material with you because it's very important and we try to interact with you in a different way, much deeper than before.

Any other question?

R: No. We're done for now. Thank you very much.

K- Yeah, thank you very much. I'll see you hopefully next Thursday.
