

# 580th Knowledge Seekers Workshop March 6, 2025

(Transcription, Editing and Proofing done by KF Brazil)

(Auto transcription by Elias)

Understand principles of M fields - why interact way they do; M fields same throughout Creation; See without eyes; Saudi princess no iris - use KF T - see red; Research is basis of Headphones - transmutation; Don't need eyes to see - brain recognizes M field; Soul doesn't need P; M fields go out back of Earth - M fields circle back around Earth - some connect to Sun; Scientists don't understand M fields - block research; Why daylight only in front - fields also in back; Teaching - Nuclear Decay - fields out back; Neutrons (N) have own strength - like Jupiter & Earth; N push away - Nuclear Decay; M & G fields of Creator rub - energy packages - CR - noise - translucent lights; Side facing center of U receives stronger M fields - to Creator; Need to measure M fields - not Tesla's - outside scale; Can measure M field connection to Creator - passing through us; All fields circle back to Creator; Ready for peace - switch finances to peace - way to Creator; WE provide knowledge; Newton's law not for plasma - need to correct; Creator felt by STM measurement; Creator has different strengths - light not what used to; Enlightened by light of U; Direct enlightenment from Creator - no intermediaries - with P temptations; End of Religions; Travel U on 1 M field line - or jump on galaxial fields; Emotions; M field interactions within plasma; All plasmas made same; Stone has emotion - atomic; 2025 Promised day - end wars; Give help to leaders; KS spread T; Understand how M fields behave - different strengths; Einstein wrong; Physics wrong; M fields - light - sound bend; M field feedback - emotions of planet; CERN mixing matter & plasma; Koran 99 names of Creator - emotions - 100th; New emotions; Emotion of Transmutation; All fields end up in Creator; Concentrate emotions reach strength to Creator; Gans's are tools - connect to Soul; Not to be afraid of Creator - joy being part of; KF looking for experts bring T out; KS who understand become teachers; First disciples; Change in next 2 years; KFTV & Keshe Coin; Your responsibility bring change; Teach correct way; Ca skull & church structure - emotions & dogmas; Graph of today's teaching - ready for maturity; Grasped by Soul - enlightened later; Monitor effectiveness of teaching; Flight session KS stopped eating - couldn't maintain - told to start again; Have to prepare not to eat; Emotion of eating; Business of Bio - organic food; Fasts 36 hours; Developed 'Space Frequency' - unknown; Plasma own shape; Find frequency of planet; New Space Fuel - don't have; Change behavior; Musk - interplanetary rocket; New alliance for peace - end NATO; Ukrainian negotiations; About calories; No calories in plasma; MaGrav Black Hole of U - connect to it; Test Energy of Sun - change emotions; Vitamin D; Omega 3 & 6 - free and imprisoned; Tomato factory; AA Inertia of life; Ca bone Inertia; Fat belly; Cancers have Ca seed; MaGrav; Diamond business - black spot; CH3 reactor - galvanized mixture; Create blood; Field liquid gravity; Call Space Agency professionals to join KF; Brazilian team summarize Soul of teachings in Introductions - see website; Call for illegal sellers of KF products to join KF - get license - expand T; Tools how to get to Creator.

## ENGLISH TRANSCRIPTION

(:14)

K- Hi, thank you very much. Good morning, good day to you. As usual, whenever and wherever, you listen to these series of Knowledge Seekers from Keshe Foundation Spaceship Institute. We welcome you back as usual and we endeavor to add to the knowledge.

As I said before, in the past few weeks, in a different ways, we try to open up and add into the knowledge of the Cosmic Rays and Cosmic dimensions (D) of the life in the Space, as we are preparing Man to start the travels of, what I call, to the city from the village of Earth, the city being the Universe and when it comes to a new dimension and new, what I call, bigger structure, what we'll see the whole Universe (U). The principle of magnetic (M) fields is the same, the interaction of the magnetic fields is the same, does not matter if it's a cell of the body of the Man, if it's a structure of the planet Earth, if it's a Galaxy, a Universe or Unicos. (:16) One needs to understand the combination of the interaction of the fields. One needs to understand why they interact this way, and then one needs to understand what's the outcome. There is no effect if there is no interaction.

And the magnetic fields of this Universe have been moving around and there's a lot of interactions. One of these interactions, for example, as we become passive beings of Universe, as at this moment of time on planet Earth, we listen to it, it's a Cosmic noise. How the sound is created. As is in the Book number 2, how is the light of darkness, which still allows us to see through it, is created. What translucency means to us as a Man with eyes and those creatures of the Universe who have no vision, but they still see the Universe like the animals on this planet. We call it with the sonic sounds, the mouse can found, but the food is even ?? sublime. How do these people see the Universe? How do they recognize it's where they are? There is no difference, but they work on a different level of the strength of the magnetic field of Universe, which gives them visualization in the brain without the eye. We see that with the blind people. They have an understanding of, for example, an apple in their hand, (:18) and they visualize it in their head, but they never seen an apple.

This is interesting, and some years ago, some of the Knowledge Seekers who've been involved with that are most probably listening, they know who they are. One of the princesses of royal family of Saudi Arabia was born without the eye color. So the eye is totally white. When she was born this way. There is no brown, there is no other thing, it's just a white eye, white material. We were approached and requested to see if we can give sight back to this girl. She was around about 13, 14. Material was made and one of the Knowledge Seekers (KS), as some of you did during Corona, technology (T) of the Keshe Foundation, as a Iranian nuclear physicist, could not be at that time, be transferred directly to Saudi Arabia. So, the royal family send an agent to Dubai and the system were handed over in the airport. From Keshe Foundation to the royal family.

We had a strange situation with this case, where the man who is a Knowledge Seeker in Saudi Arabia, and still we see him around, of Indian origin, was not allowed to go and to see this girl. So we had to do things through back, what you call it, outside door inside.

And, get a response in how it was. In matter of a few weeks, the girl could see back, could see red, could see colors. And, this brought us a new dimension of understanding. (:20) How we bring, we imagine, we see, when we don't have an eye. But how does this happen? This became part of the research, that now you Knowledge Seekers use the headphones, and you go places, because the knowledge was learned from this 13 year old girl. How we can transfer that she could see colors, when they put a red color, she says, "This is red." Nobody told her what it is. So, we don't need that brown parts to see. We don't need the eye to see. That color radiates fields, which interaction with the brain condition of the fields of the man, recognizes the color.

This is why I always said, when you travel the Space, you lose your mouth, you lose your eyes. These are too energy consuming, and you don't need it, because you strengthen the dimension of the Soul, which has, does not need, the physicality (P). Nothing in these teachings done, if it's not experienced, then we tell you exactly what it is. Then, it brings us back, how do we recognize magnetic fields? How do we understand the process of magnetic fields? As was in the Intro, we said, the emotion of the Man, or wars, if you look, when the Man tries to, literally bring it to a point, where the Earth was, in a given position in the Universe, in his, what you call, Solar System (SS) at the same time, created the emotion of anger, war. (:22)

And then, there is another element, which in the world of the science of today, our scientists have not understood. We see it, quite regularly. We see it on a regular basis, it's spoken about, it's deliberated on, and not understood. What does this mean? I'll draw this for you to understand, and see the, what I call, the condition of the knowledge. Today, we are shown the planet Earth, in this shape. They tell us, the Man of knowledge of Space, the Man of the knowledge of Physics, they tell us, the Earth is round. And, they tell us, our Sun is this way, radiates towards the Earth. They tell us, that we have a flat Magnetic fields, and then it curves to the back. This is the flow of the Magnetic fields. And then, we see some Magnetic fields, which they flow close, back into Earth. We have to understand, how this field of the Earth, at a given strength, flows this distance, from the center of the Earth, and how come this is close to Earth? (:24)

But, what they don't teach us, what we don't see in the present knowledge of the Physics, is other parts, which these are fields, which we have no understanding of the strength, that the field pressure of the Sun, cannot touch them, and some of them even connect to the Sun, in a different way. So, misrepresentation of the science, has stopped research and development, in addition to, due to the lack of the knowledge of the Man. And, just because somebody said, we listen. These are the dogmas, and these are the things, which the new science has to overcome. So, we have in fact, to understand, why does this, turn so close to, and goes back in, or in other hand, it goes out, part of it, and why is this field so distanced, from the Earth?

But, we go back, which doesn't fit, the knowledge of today, because then, you cannot explain it, then it comes the reality of, one thing more, which is, how come, at this front, we have the daylight? It's the same Magnetic field, coming from the Sun. Why can't the lights, from the interaction of the Earth's Magnetic fields, and Gravitational fields with

each other, don't turn to the back of the planet, and it'll create lights in the back side, that we have a 24 hour light time? As we see, in a way, in Northern Pole, or North part of the Earth, Polar System. And then, we call these interactions, due to the compactness of the fields in this area, what we call, the Aurora Lights. (:26)

And, we try to explain this in a different way. In fact, it's the same Magnetic fields, it's the same understanding. But, if you understand this picture, and you understand the logic, behind the working of Magnetic fields, Man describes and explain this, in a different way. when it comes to another dimension. Again, we have a source, which comes in touch, with another source of itself, or different dimension of itself, with and through the same system. Where, we have interaction of a number of, what we call, Suns and planetary System, we call them the Neutrons and Protons, and the conversion of this material, conversion of interaction of these fields, leads in what we call in Nuclear Physics, as Atomic Decay. There is no difference in energy transfer, as they show us in the back end of the Earth, Magnetic field as above, to what exactly, and what happens in Nuclear Decay. It's the same process. And when the field energy interaction creates higher level, this structure becomes unstable, if we have additional Neutron in the system, which behaves as a Proton of the other.

In the world of Nuclear Physics, what is not even understood, is that we just call them Neutrons. You have so many Neutrons in the center of the... an Atom. (:28) But in fact, every Neutron has its own Magnetic field strength. One has the Magnetic field of the Jupiter, one has the Magnetic field of the Earth, and one has the Magnetic field of the, let's say, Saturn. And, whichever interacts and delivers energy to the other, creates a condition of pushing away, what we call, Nuclear Decay. But, what is important, and in the future, Man will understand, is this interaction, and the structure of what we call, Magnetic field of the planetary system and the Earth, creates interaction of the fields, which these fields, what we see as light, part of it, creates a friction between two Magnetic fields, that, we have not understood, and we need to understand, to be able to travel the span of the Universe.

In the Nuclear Decay, we see it as the departure, or separation, or and then, which leads to the split of an Atom, we call it a Nuclear. And it can be measured, half-life of so much, we call it. Because, each Neutron in the structure of creating certain Atom, always has the same structure field strength Neutrons. Half-life of the lighter elements, is not as fast as, most probably, in some of the isotope forms, as the others. If you understand this process, if you understand this part of the, what we call, physiology of the Space, we come up with something very interesting, which, I'm sure a lot of physicists will 'give their right hand' to understand. (:30) But it's never been discussed, it's never been brought up, it's not brought up because the question has never been put, and Man never thought about answering this question, because it's beyond it.

But, if you look as a Knowledge Seekers, we brought this up a few weeks ago, if you go back to the teaching. We spoke about the magnet, and the fields which goes through it. And we spoke about planetary system, which we have been told, the fields comes in from the North, and it goes South, and some fields come from South, and they go to the North.

But, what is strange with this system, is again, Man, scientific world, because cannot measure these, what I call, interaction of the fields, have not understood, it shows us one way, but it's the two-way. We call it in the world of electronics, 'current' and 'eddy current', where the blue is the current, and the red is eddy current.

But, what is fundamental, and then it comes for Man to understand in the future, because we have to, if you are traveling the Spaces of the Universe, to interact and to be repelled. So, what does this mean? This means a very, very, very simple understanding of the truth, about the world of Magnetic fields. In the picture before, if I go back to, we showed the interaction of the fields of the Universal magnetic fields with the interaction with the Earth, creates a light. (:32) And this light we see as visual, and some of these lights are reflected back out.

But, if we go back to this, this opens up a new Pandora Box of knowledge. And this is where most of the Cosmic Rays, noises, and translucent lights in the Universe are created. Where the rubbing of Gravitational and Magnetic field of one field strength, creates noise, and creates light. A large percentage of the light in the Universe is created by interaction of Magnetic fields, which are, don't come from a source. But, in traveling the span of Universe, rubbing against each other, they create packages, releases of energy fields, that they become that elusive light. There is another part of the understanding, this becomes when we become the travelers of the Unicos. But, in the same process, in the same understanding, we come to another point, which is interesting for the Man. And that is, understanding of the Totality of the process of the Creation. What does this mean? This means, that we were never aware of the sound and the lights, which are created from the Magnetic fields of the same element. And the effect on the environment, and the effect on the Totality of the direction of the motion of the structure.

What does this mean? (:34) This is very simple. We considered the light, which created on the planet Earth. Now we go up, let's do it another step further out. We have a Galaxy, with so many hundreds of billions of Stars and Solar Systems within it, with its own Magnetic fields. And, this structure is facing what we call, the center of the Universe. The same process as here, repeats itself. We see the interaction of the fields of the center line of Universe, which we call it the Black Hole of this, which I in the first paper I wrote, about the creation of Black Holes, explain this, comes to this point. Where the energy fields of the Universe, the energy fields of what we call, this Black Hole, in interaction with the fields of the, what we call Galaxy, it creates a light. The same as what happened on Earth. We see a Solar lights on the daytime of the Earth. We see Universal light on the surface of the Galaxy. Which is facing a stronger field from the center. Because the other Galaxies around, are in the same position.

So, when we become wise, through the Knowledge of the Creation, and we become traveler of the Universe, and manage to cross the Solar System, and manage to cross the Galaxy, (:36) we will see the same light. This light is so important. On Earth, if you are on the North Hemisphere, due to the angle of the rotation of the Earth, you get lost in the woods. You have no understanding of dimension of the, where you are, where is the North, where is the South, where is your East. What do you do? One of the first thing

they teach you, in the World of Survival, is look at the trees. And you see where the branches go to. You pick up five trees, and the combination of the angle of the direction of the branches, will show you where the South is. Because our fields come in that way. Because of the twist and the tilt.

So, if you understand this, and translate it to other knowledge, when you reach outside the, what you call, Solar System, you look to see how our Solar System, which side is brighter. That gives you the direction towards the center of the Galaxy. Further, when you're outside the Galaxy, you look which side of the Galaxy is brighter. This gives you the way home, to the center. You don't make a mistake going that way (opposite way). (:38) And then, in a bigger scale of understanding the process, when you are out of our Universe, when the knowledge of Man understand the process, you look to see where is the light of your Universe, and how the other Universes shine. This gives you direction to the Soul of your Creator. The Essence, the Source.

So, if you understand this process simple, from an Atom, which we started here, going up to our Earth System, in Solar System, going to the Galaxy, going to the Universal Line, we have the same process. Then, if you understood this part, of creation of the Magnetic fields, from the interaction of the two similar fields, or similar strength fields, you know if your field is in a matter condition. Or, if you go to this, you know the field strength is to the Universe and the Creator.

The only problem Man has, at this moment of time, to understand how each Magnetic field from a Magnet, to the Universal System like Earth and the Galaxy, means a measure. The (magnetic field) measurement of today we have, where we call so much Tesla's and the rest, is in a matter state. (:40) We have to, and to become Man of Space, to develop, measure, what I call the Magnetic field strength, of the Universal Magnetic fields, which does not work in Tesla. Or, Tesla is out of the scale. Once Man understand this, once Man, at the moment we see graduates from this Nuclear Decay, what we became Nuclear and Atomic, and join with the Cosmologists, and then we join those who understand this process, then we find, with a lot of shake and bumps, the path, in a way, to our Creator.

And then it goes, one beautiful thing. This material, you call it Nuclear Decay, this material could be a combination of the COHN amino acid (AA) in your body, has the same condition. And then what you see, what we always said, there is a common denominator, which connects us to our Creator. And, it has a measurement. Because if you cannot measure it, it cannot exist. So, now you see how we said, "I made Man in image of myself." Because I come in right on the top of you, in every direction. I go through your Soul, through your head, through your brain. I go through the Solar System, and the Galaxies, and the Universe, and the Unicos. Now you see the connection of the Man with his Creator. (:42) The only thing is, Man has to learn one thing. How to measure these fields. And by measuring it, recognize, is he on the path to the Creator, or is it like here, bending over, to go back to itself? Chasing its tail like a dog. (Meaning the M is circling around back to itself).

This is why, as we see the progress of the peace, the funding, and the knowledge, and the money, and everything else, will go into this technology of Space very soon. Where Man stops fighting. And the finances of wars, will become the finances of the path to the Creator. Research and development on this scale, will bring Man to the point of maturity. We stopped the wars, we stopped the wars of the religion, and now we see governments, who are holding hand to each other, to spend the resources of Humanity, for expansion of peace. And, this is the time when we come in, to give it a hand. They provide the peace facility, we provide the knowledge. And, we show how to develop systems to be able to measure. Maybe, in a short time, by accident, or by deliberate acts of the teachers, we will find the path to the Creator, that is not anymore in the Holy Books, but it's in the Holy Soul of the Man (STM). (:44) But, one thing Man have to understand, in depth, and without failure, to recognize the strength of the field, which line goes back to the 'tail of the dog,' and which line leads Man to his Creator.

This knowledge has been hidden from Man, of the present time. But, understood by those who are the traveler of Space, gained the knowledge, through what we call, "understanding of the work of the Universe", and not creating false books and knowledge, in the matter state of Man. Newton's law, does not apply, in the dimension of the plasma. Somebody has to come up, with the knowledge of the Magnetic fields, in the plasmatic condition, and not in the matter condition. And then, make a correction to convert the matter state laws of Physics of the Man to the Space plasma condition. Some of these, we have already shown you, some of these in a very simple ways, over past 20 years, I have explained to you. I keep on saying, the factor of the energy of the plasma, (:46) is maybe 60%, 50%, maybe 80% of its matter state. These are all part of the teaching to bring it to this point.

But, recognizing the line of life to your Creator, cannot be measured with the tools of present time. Because, it has to be felt, by the Soul of the Man (STM). That's your scale. That's your indicator. And if you look at it, going back to the Earth, taking this Earth to be the STM, and in a way, taking the Sun as the Soul of the Creator (STC), how do you find your path? Different strength of the field of Creator, creates different lights. The light of the Unicos, is not what the Man is used to. The light of the Galaxy in the Universe is not the way we are used to. You go out there and you look, "Oh, Mr. Keshe said, we'll see the light of the Universe." Yes, but you don't have the tools of the Universe. The same goes, with this, with the STM. (:48) But, you have to understand that, as I said many times, if I can get these two together, you still receive some of the fields of the Universe, with the STM. And, it enlightens you.

And, in so many ways, when you're asleep, you call it a dream. In some parts, maybe you have reached the level of understanding, in the level of the STM, you will see this light, and you become aware of the existence of your Creator. Where, there is no light, as you are used to. But, it's the emotion, it's the feeling, that you have come across, you have seen, and you've been with the Soul, or have found the line to its source.

So, it means Man has a couple of options. You become the processor, yourself directly, in some strength fields. But, when you get this light from the Creator, you get enlightened,

with the process of Creation. When you go this way, you are enlightened through the physical matter knowledge, and God help you. How much diversions you'll get, and at each point, how many Ayatollahs, (:50) and Mullahs, and the priests, and prophets, you have to handle. Where, this has no intermediary. And, as we've seen, every entity has direct access to it. Because, it comes from it. This is where the end of fake religions, and the abuse of the STM in the name of the religion, will come to an end. And, when it comes to an end, Vatican is nobody there to be, we return the stones, back to the Coliseum. Because, that's the matter state of the abuse of the physicality of the Man. And, Man will see his destiny. Because, he is enlightened to see, in a way, its own Creator, to all dimensions.

Now you see, what we have to do. And, what it needs to be understood, to travel this planet of the Universe, through one line, and in every line has a problem. It's a scenery you see, you're happy to be seeing planetary systems, and Galaxies, and the shape of the Universe. Or, you can, in a way, jump, create the fields of the, what I call, Galaxial of fields, and jumps from Earth to a Galaxy, and jump into a Universe, as part of Unicos, and, or, whatever. When, you understand the field strength of the Magnetic field interaction, within, within a plasma, and not within an ion. (:52) You measure the fields in this, you travel in this. You measure the field of the plasma, you travel with the plasma. (Where in matter) this has friction, this has limitations of the speed, the speed of light, the speed of all other rubbish Man has come up with.

Where, in the dimension of the Soul, there is no limitation. There is no limitation whatsoever. Because, there is no limitation on understanding the Essence of the Creation between the STM, and its Creator. And emotion plays a big factor. Emotion plays a massive factor, in this direction. Because, it's the path to the Creator. Because, maybe for the first time, you might understand, even the Creator has emotion. Because, if he didn't have, he could not give it. And then, you have to find the Magnetic fields of the structure of the Creation of the Man's plasmatic fields, and his emotion, to find your path to the heart, to the operation of the Creation.

And in a way, no plasma is made any different than the other. Plasma in the cell of your body, plasma in the cell of a dog, in the cell of a stone, in the cell of an alien, in the cell of a Galaxy, all have the same property, and the same direction of the motion of the fields. (:54) As I said before, Man says, in the books of the Man, I made Man in the image of Myself. Because, he understands only that. But in reality, is, "I made the Universe, the image of Myself." And to have My image, and if I show My image in the emotion of the Man, so I have to have an emotion. Otherwise, Man couldn't have it. Dogs wouldn't have it. The interaction of the Soul of a stone, in its atomic structure, with my Soul, therefore, even the stone has an emotion. Because, the interaction of the fields of its Atomic structure, as a plasmatic structure, and my field, gives it that emotion.

In the coming time, as we expand on this, in a much more detailed analysis and development, now you start gradually understanding the work of the Universe. And the reason I brought this subject up today, to show the path of you, directly to your Creator, is to stop from now on, the game play of religious and religious leaders, and all the

mayhem they have created. Because Man has started to kick away the wars, and concentrating on peace, concentrating on development of the nations to One Nation. And now is the time when the tool is needed, to be given that group of people, (:56) to push with a new technology, with a new understanding, that allows the diversion of the Man's attention from wars to peace, to walking away from it, that allows Man to open the doors of the Universe to ?? tell. You can shout and howl as much as you like, "We want peace!" But if you do not deliver a new structure, the problem with Man will go back to its old structure. A new path, a new understanding, has to be shown to the Man, that Man chooses this path, and finds a way to his Creator, finds a way to a new knowledge, that he forgets about the war. And we are there to support this evolution, through the structure we set up years ago, and to the structure we'll set up to come, to give the hand to those who start this process. And many of you understand how this process has started in past couple of months.

If we don't give this tool to the world leaders, they will not be able to deliver, to get rid of, all the dogmas in science, technology, and the name of the religions, to be washed out, to be able to move. In a way, 2025 is the time of the destiny for what was promised, as a 'Promised Day.' Where Man reaches a point that there'll be no war. As I said, we finished with the border imaginary line wars, now we finish with the religious wars in 2025, and then we have to give that knowledge, this knowledge on the table, to the world leaders, to the Man of knowledge, to not just to spend to make war tools to have peace one day in the future, (:58) that we don't make any war tools. We see the direction, and we spend our time, science, technology, in the direction of understanding the Totality, and find the path for the STM to his Creator. This is the reason we are here. Not only us, it's you as Knowledge Seekers, as collectively, the dimension of knowledge has to be spread very rapidly. We are doing our work, it's your work to do. Do not be ashamed, do not be frightened of what they say, because the shame is on those who try to block, because of the way they've been blocked, by the knowledge, by those who abused them.

This is what, primarily, in a coming time, most of the teaching will concentrate. Understanding of the interaction of the fields of the plasma, measurement of these fields, creation of these fields, and confirmation and transition of these fields, to matter state or the other. One of the misguided words, or problems of the Man, is this part, which we started with. What does this mean? This means, very simple. You have the Earth. You have the magnetic fields of the Earth, which are plasmatic fields, and if you look at it, it's the same thing. Why some of these fields bent back in, like a tail of the dog, and some of these move away, and some of these move this way, to the Sun, and then some of these move to the Galaxy, to the Unicos, to the Creator. (1:00)

Would the knowledge of the Man become so extensive, that can measure and understand the reasons of everything going through the same, come up in different, what I call, 'spaghetti' of field strength, and one of the first things he has to answer, which has caused a problem by idiotic knowledge of Einstein, which has caused more problem for all of us, in understanding the science, than anything else, is, they have told us, they have taught us, that magnetic fields, or light, travels in a straight line, and it cannot bend. If the magnetic field of the light cannot bend, how does, and how come the magnetic field in

other pictures and diagrams, they show us, goes back, or bends to the back? There is no difference. If you cannot bend one magnetic field, you cannot bend any magnetic field. Call it a light, call it a sound, call it whatever you like. Universal laws applies to everything.

Then, it comes to understand, how we get diverted. How do we go from the one process in a way, to another with diversions? Or, how can we maintain, and in a way, see the resources of the Man directly? Why does this magnetic field, in the world of the cosmology, is shown to us, as bending back and coming down, (1:02) and bending with the fields to go in the back of the Earth, but it doesn't happen in the light? So, the physics of today is wrong. The teaching of the physics is wrong, because those who taught, they never understood. We had a bad teacher. When it comes to the work of the Universe, you have to keep an open eye.

Does this field, which we see here, which comes back in, is this? In fact, the line of the emotion of the Earth, feeding itself, how to react to the other things which happens. There has to be, if this field goes away somewhere else, Earth cannot react to it. If I don't kick you, you won't feel the pain to kick me back. I create with my kick, your emotion to kick me back. So, if the Earth magnetic field feeds back into the Earth, it creates an emotion to react to what it collected. Isn't this part of the seasonal changes and emotion, Man changes fields, because now we move away from the source a little bit, and back in, forward again a little bit? So, we have to find the magnetic fields, the emotion of the planet, the way we have with ourselves. We haven't managed to measure these things, and this is the dilemma.

Then, we go back again, how do we measure the fields, which ends up in the Galaxy, what the strength? Then, if you understand this, the most beautiful thing is, you have found the access to the, what I call, transmutation and transportation. (1:04) The Vertical Systems, which you have seen in Linz, and we have shown it before, that system, if tuned the right way, will take the Man to the Creator. You do not need to land anywhere else. If we tune it to the different field strength, it'll end up you, in a specific planet on the Universe, or a specific Galaxy, anywhere in the Universe. But, so now we have to learn this. How to measure plasmatic magnetic fields, not the fake plasmatic magnetic fields, which we have now in CERN, and the other governments are trying to create fusion. We've seen the French going 1000 seconds, the other one 1020 seconds. We know better. Because they haven't understood, they are trying to mix a matter magnetic field with the plasmatic magnetic fields, and they are in this dilemma.

If the world of the science in the fusion understands, instead of putting magnets and putting current in it, put Gans's in it and direct it, you need one mille volt. And you get the same result, because you open the plasma of the, what I call, matter state. And then in the energy level, you always do. This is one of the reasons, if you understand this, I always said, fusion, the true fusion, is a dream which never come true. Because the Tokomaks, the CERN, the French system, the Chinese system, creates magnets and it creates electric power to handle a plasma.

This is a problem you have as Knowledge Seekers, exactly the same as CERN. Transmutation. (1:06) In this world, there is no one plasma. It's a mixture of fields, and you can make anything out of it. They are trying to create a fusion for Hydrogen, they haven't understood they can create a Gold from the same process. But they haven't understood how. You don't get fusion from matter state, you get fusion, what we call, delivery of the field strength, magnetic field, dependent on the location, time and place, and energy field, in the plasma. And once our scientists understand, goes the same as what you've done as Knowledge Seekers. But, unfortunately, we regret, as scientists have not managed to get to your point, you get the Copper, you take it to its energy, and you take its energy back to feed yourself. And then you take this energy, bring it back in energy level, and make what you like. Because you only work in a plasmatic condition, you call it Gans, the, what I call, 'time-wasters of the world of science,' call it ?? Tokomak.

Confining the plasma over matter state. I'm sure you've seen this. This is your skull, and this is your Soul. (1:08) Matter state, trying to create a condition of the plasma and control it. There's no difference. This is... maybe Man learns from it. But, once you're Knowledge Seekers, once we bring open the knowledge of the plasma, interaction in dimension, conversion to matter, in coming weeks, in coming months, into the public, in a way, then you'll see, no scientist will go to CERN. No scientist will spend so much money, and so much heat, we have created billions of it. How many of you have billions of heat in your rooms, in your labs, in your bedrooms, and your kitchens, when you made the Gans's? The only thing you haven't learned is how to manipulate it. How to bring different field strength together, to be able to achieve what you want to achieve.

And, coincidentally and accidentally, if one of you manages to do this, you will see the Creator, and nobody else can replicate it. So, you become a liar. Because, in the devotion, in correcting to bringing all the emotions together, to be in one path, finds your way to the Creator. Because, in that path, in that strength, all the field strength, in strength of gathering together, create the field strength of the Creator, with all His emotion. Muhammad, bless his name, he says, "If you read Koran, you find 99 names of the Creator." And, they're still looking for the 100th one. Because, the 100th one is understanding the true meaning, (1:10) that the Creator is the collection of all Magnetic fields, of all these names. Kindness is an emotion, love is an emotion. But, if you want, if you understood the emotion of the Man, in 99, for you to reach your Creator, you need 99, to the order of 99, to gather all the emotions of the Creator, to find His path.

As I said, Man is not even aware of many emotions, which will come to Man, as the Man develops to understand the work of Space. The latest one emotion, is the Emotion of Transmutation. We don't have it, in Koran. And, how many of you have wished to do that? How many of you go through pain to transmute? Because, you haven't learned the Emotion of Transmutation. The Creator does it, because if you look at it, in a way, it comes from Him to you. And it comes to you, to Him, through the understanding of the Totality. The beautiful word of the Italians, "All roads end up in Rome." All plasmatic magnetic fields of the Creation, ends up with the Creator. (1:12) It's Man, who has to find, which Rome is his home. And, which home, is the home of his Creator. This is a

science, not a religion. It's for you to understand the science of Creation. To be able to achieve, to reach, to be able to find your own path, to your Creator.

This is why, I many times, if you've been with me, and you in the teaching, I tell you one thing, some of you, reward your life, you serve the mosque, the church, the synagogue, and the fake names of all those leaders, and you never achieve, to find that strength, the path to the Creator. And a child, in the womb of the mother reaches that field strength, that in the womb of the mother departs, does not need to manifest, to create a life, if to suffer in the dimension of physicality. In that way, if you understand, if the collection of the fields of the emotion of the Man, comes to a point, Man will reach to the field strength, which changes dimension of emotion and his field strength of the physicality and Soul.

And in a hidden way, I showed this to you last week, in the graphs of your own Souls. You remember that red line? You increase that red line, you find it, it will find its way to the path of the Creator. (1:14) Because it's emotion, and you've seen, when that clicks, the physicality and the Soul follow. Then you understand, how important the emotion, how important the Soul of the Physicality (STP) is, in the dimension of the Man, in the dimension of the Creation, in the dimension of collection (?? connection) of the Man to his Creator. I made Man in the image of Myself, because I connected myself, as part of my fields, not only to the Man, as I radiate in all dimensions, to the all creatures of the Universe.

Understanding the science of the Creation, does not make Man, the Man of Creator. It only makes Man wise to understand the path, to travel the span of the Universe, and enjoy the beauty of the Creation. And if you understand this, then you understand how simply, through the connection of the field strength, you can learn the languages is instantly, you can travel anywhere instantly, because you use the field strength of the Magnetic fields of the plasma, and not the matter state. And, the tool for this was given to you, Knowledge Seekers from day one, the Gans's. It's you who have to understand how to manipulate it. It's you who have to understand how to create it. It's you who have to understand how to connect that plasma to your Soul, to receive the field strength that you want, you need, (1:16) to manifest yourself, to travel the span of the Universe without physicality and the rest of it.

And then, if we even go deeper for you to understand, which I come to it later on in the teachings, is when we saw the fields coming in, and the fields going out, and their interaction creating the light and the noise of that spectrum, then you learn something more. And that is, this interaction itself, by itself, at every level, will create Cosmic Ray sounds, and Cosmic Rays light. And this interaction of the fields is partially responsible for elusive light we see in Space. It's not created by interaction of the field of Galaxies. Majority of the lights we see at translucent energy, light, transparency, comes from the interaction of the Gravitational fields of the Universe with the Magnetical, what is going back to the Creation and the Creator, and one is coming back to create more. And this light, this ?? translucent light, is the Cosmic Rays which Man has not managed to achieve, to understand, and then, if you do this, you'll find a way to the Creator and back,

as you travel within dimension of the fields of the Universe, direct in the strength that does not, get not, cannot, manipulated by the Galaxies fields, Universal fields and Unicos. (1:18)

If you understood the teaching of today, as I always say in the recent past, you have managed, you have achieved the point to become much closer to understand the process of the Creation. And, from today, we are one step closer, for those of you who listen to us in Vatican, in Saudi Arabia, in Tehran, in Jerusalem, and the rest, to lay down the fake robes, hats, and everything else, and let the Man to see, to find by his own, the path to his Creator, now you have the knowledge what you have to do. Is the emotion of the Creator's field strength which takes Man to his Creator, and not the fake names of the rockets, Spaceships, Temples, Mosques, synagogue, and churches. All these buildings are like that skull on the head of the Man. Is that skull, which does not allow the STM, to be free all the time with his Creator, because he has that. Change this skull to the shape of a church, to a mosque, to a synagogue, and that's the limitation of the STM to find his Creator. And the knowledge is the path through it, not the ignorance, and not control.

Man with the new knowledge, with the way we have shown you, and many of you go through what you call, transmutation, (1:20) you travel by being in the system, to surpass your, what we call, Calcium structure dome, the skull of the Man. Now Man has to break this, from what is called, his own imagination dictated by those physical structure of the Calcium, or what we call, the bricks and mortar, and the fear created by the name of the religions, by the Man. As long as you have that fear of the, what we call, bricks and mortar, you are still in the same trap as the skull has created for your Soul. If you understand the knowledge, if you understand the principle, we have brought an end to religions, the fake names used for what is natural to every Man, from his Creator to his Soul. I made Man in the image of Myself, I didn't make Man to have fears of Me, but to be part of Me.

We go for a break, we come back, and we try to answer some of your questions. And as I said, in the past few weeks, the teaching goes for the expansion of the Man to understand the process of the Creation, and to free Man from the village of the Earth. It's Man who has to understand the process, without the fear, but with the joy of existing, and being part of that existence. Rick, take us for a little break, and we come back, and we'll see where we go.

**>> BREAK >>** 580 KSW March 06, 2025 (1:27).

K- Thank you very much. As usual, we're still trying to expand the knowledge. And, for more people to understand the process of the creation of this knowledge. Which is important for us, in so many ways. That we gradually open the knowledge in a different dimension. And, hopefully, somewhere down the line, step by step, Knowledge Seekers will pick up this and expand it.

There are a couple of announcements which I put at the end of the teaching of last week. (1:28) We will repeat this, again and again, in the coming weeks. Keshe Foundation, through our cooperation with other structures, we are looking for people who work, are experts in the world of plasma. Space Technology, Energy, Medicine, Wellness, Sports, Entertainment, Production of Materials, Defense, and Environmental. We want Knowledge Seekers who've been with us, for long enough to understand the technology, to become the teachers of the new structure of teaching. To become the, what we call, the markers, for structuring the new cycle of the work of the Keshe Foundation, which we will gradually, over the next year or two, we open up. [info@keshe.foundation](mailto:info@keshe.foundation). Doesn't matter if you've been with us before, you wrote to us, whatever. You got to renew it, and if you are within the category you want, we'll ask for your CV and then we look at the structure. We are looking. Don't say, "I just wash cars, what I need this for?" Don't say, "I just, what I call it, I'm a doctor, I don't have time." As I said to Knowledge Seekers years ago, (1:30) we'll bring you to it. Your Soul will bring us to it, bring you to us. It's time to bring the change, and you need Knowledge Seekers who understood the knowledge.

This is what I said to a Knowledge Seeker before, and maybe, maybe has the truth in the work of the Keshe Foundation what to come. You're all like the first disciples, because you learned the knowledge with the love and care, with the knowledge of wanting to bring the change. Don't look if you're a housewife and you ?? don't understand all of it. Don't look if you're handicapped, because knowledge does not have a handicap. It's only in the head of the man. And now it's time to bring that change. And somehow is going to bring the change we are looking for in the international market. The condition is set and getting set, hopefully within the next two years, to bring that change about. And we have to be there to support it with the new technology, otherwise we have failed ourselves, and the Humanity take that step towards opening the village of the Earth into Universal dimension.

If you fit in, you don't need to be a full time, part times, you can help to bring that change. We'll tell you how and why and we set the structure for it. And then you will see the things which we set up in the past, like KFTV, like the coin operation of the Keshe Foundation, everything will fall in place. The structure of the Universal Council and Earth Council. (1:32) It's time for everything we set up in the past, teachings and the rest, KFSSI Institute, the research and everything else, to fall in place. The Humanity is ready for that change, because the environment has been made for it to be ready. And it's our

responsibility to be. You don't do it for the Keshe Foundation, you do it for what you believe in. We are not another sect or religion or whatever to tell you we need this. It's your responsibility to bring that change. If you've been here and you've learned enough, but the correct way, not just going and teaching the wrong way.

We see this, as I said, if you're ex-nuclear, if you're ex-space, ex-materials, you know how to set up factories, you know how to set up tests, and you know you're expert in writing research papers, in dispersing the knowledge, everything else is there for you to do. [info@keshe.foundation](mailto:info@keshe.foundation). And then there'll be people who respond to you, in what level, what we need, what is going to be there, what is the responsibility of position, and to bring that change. We are not looking to create something else. We are not setting up factories, we are not going into those kind of things. There's a structure we set up, and it's following up, that allows the rapid expansion of the technology worldwide. And we have the support of those who are there behind us, to bring us ?? to support that change.

Putting this aside, Keshe Foundation, in its structure, still is the same, (1:34) and we are ready to serve. Not only ready, we've been serving long enough. Rick, do you have any questions? Oh yes, before I forget, I just received a note from our people in the background. Keshe Foundation has produced a limited edition of, what I call, glasses, which carry the emotion of the time to come, for 21st of March, 2021. It's a limited edition, very few of them will be available. As you understand, the structure of the Iranian New Year, is the fish and the ?? water, the Creator and the world. A very limited numbers are available, and these are handcrafted individually, and will be for, try to be able to reach you before 21st of March, which is the Spring New Year. And if you go to the website of the Keshe Foundation, you can see them. They all carry the essence of the Creation in a different way, the Earth, the Wind and the Fire, or what we call the Earth, the Water, the Air.

R: Are these the items that you're talking about?

K- Yes, yes, these are the ones, yes.

R: It's under mini aquarium, as the title for it, but there's many different shapes and sizes here of this... cups and

K- One of the features of the New Year is the fish. (1:36) We, if you were in Sanya last year with us, happened to be the day after the end of the conference was the New Year, and the Chinese brought out the fish and everything, and set up a beautiful table for the New Year. And this is what has been put by the Knowledge Seekers, to show the beauty of the Creation. Very, very limited edition, because it has to be made individually, according to what you order, to be able to reach you by time or by spring.

Any questions?

R: And to be clear, they're not real fish, I presume, that are embedded in there?

K- No, I don't think so. And if you see, a lot of them carry the symbol of the Star Formation (SF). Many of them carry the three fishes.

R: ... Mr. Keshe, you were talking about the idea, you were just describing the skull, and the Calcium around, the Calcium encasement around the Soul, with the skull. And you mentioned being able to escape that, but being trapped by the next level of the physicality of, say, a church, (1:38) or some other structure that's... that also is entrapping the Soul, in a way. And you mentioned different religions, and whatnot. Well, I just had a quick look at what are churches made out of, what percent Calcium is in the mortars and bricks of church structures. And it turns out, there's a very high percentage of Calcium. It ranges somewhere between 10 and 26%, for example, in the Byzantine type churches. But also, with general cement, it's between 30 and 60%, for a lot of the cement type structures, and various gargoyles, and whatnot. And the mortar itself is between 50 and 80% Calcium. So, there's a very high percent Calcium in those structures. And I thought, "Well, that's a very interesting coincidence." So, you're hot on the trail there, somehow, in that relationship, I think. We look at it physically, perhaps, I am at this point, but maybe there's an interaction there, energy wise, with the Calcium. Can you comment on that a little more?

K- ... We have a small problem, I got disconnected. (1:40) We're traveling, and so, we are not as usual, fixed, and it's been like this for the next few weeks. You have to bear with me. As I go from one system to another, to be much safer. Can you repeat that, please?

R: Okay, I expounded a bit on that, but I'll try to shorten it. Basically, the idea is that, I was looking up what percent Calcium...

K- I heard that part, I heard just the last part of that.

R: Right, so, I wondered if you could comment on the idea of the comparison between these church structures, let's say. They have a high percent of Calcium involved, and so does our skull. So, as people in, through history have moved from inside their own skull, be able to escape that somewhat, they've been trapped in the next layer, which is the church structure, other types of structure like that. Even underground, it might be similar, as far as that goes, underground churches and what not.

K- But, it's the same over-ground, but we create that Calcium through our emotion and through our dogmas. The people in Amazon don't have a church. But, that's a physical manifestation of it. We create these barriers by denying ourselves access to it. I always called it, if you've been in some of the talks or presentations I've done to religious leaders and people of the clergy, (1:42) in different shape or forms, is that, we have, we create for ourselves Alzheimer's, which we don't want to remember or to understand anything. Man, due to the lack of its commitment to himself, has become ?? isolated with respect to the Creator. Our Soul is aware of it, connection to our physicality blocks it.

We create a beautiful sensation with it, that we give that, it's you who has to understand, the... what I call, the process. I'm going to show you something, which comes, the teachings now, in the background, is connected to our systems. You will see, the way we show you during the sessions on Friday, we're monitoring how your Knowledge Seekers absorb, and how we reach. This is the collection of (graphs) you lot, with us today. Look at this. We, if you look at it on the Soul side, how much your awe, you call it in English, resonance with the teaching. This is in the past few minutes. (1:44) You don't see any difference, more or less. With the Soul, the Soul of Physicality (STP), all is engaged, is ready for that maturity.

And the most interesting part is this part. If you look at it, this is, the first time you see this. Direct teaching, direct knowledge, touching the STM, and the STP of the Man. Direct path of the knowledge from the Creator to created. We usually see massive packages on this side (of the graph), or here. But if you see, it's all in line. Man is ready for the change. Man is ready to bring a change, and as I said, when we teach, you hear us by voice as Knowledge Seekers. But, the Soul of the Universe, hears us by the Soul, and this is the evidence of it. This is what you as Knowledge Seekers, have done in the past minutes of the teaching.

I wonder, how you can explain this part. But the most interesting thing is, (1:46) you're still trying to digest it in physicality, because, if you look, the Soul is still, one place has managed to jump you. And, as I said, if you look, in the very detail, you see the role of the emotion, and the changes which it brings. If you expand on the whole structure, you see how physical you are, and how your emotion is battling you to create that change. And if you look very, in a very, very detail, you see, what I call, the interactions. How your emotion is dictating, and a lot of you are physical. This is hundreds, thousands of you online today. This is what you are, this is what you interact with the Knowledge. And this is important for us, because we have to understand you.

You see it in another way. When you look in detail, how much your emotions are playing the game, with the interaction of the Soul. You have to understand, (1:48) if we interpret and we bring the knowledge together, you see as collectively, still it's the same. It's one line. We usually see, if you remember other pictures, we have all sorts of things. You are receiving knowledge directly from the Source. But part of it you understand, is a knowledge, physical, and part of it is grasped by your Soul, which enlightens you later on, or in time of your life. Now we, as I said, we monitor, even the teaching times. How effective is our teaching? How much you lot are connected to bring that change? And none of you have a headphone connected to our system. We have a thing, we have set up a technology, which can tap into you, all of you in one go. Man will understand this technology, this process, in the coming time.

Any other question?

Q: ... (1:50) I recognize the importance of eating food that is as uncontaminated as possible. In the Nutri sessions from November to January, I did not learn to connect. What could we do to remove this barrier?

K- The barrier comes, a lot of us we try. We have one of our Knowledge Seekers here, a few of them, who stopped eating after these sessions. But they feel the energy coming to them. They don't feel hungry, but they receive. It's not what we try to physically do. We have to understand the emotion of eating. And how contaminated our style of life physically has become, that affects our emotion.

I was talking to some Knowledge Seekers in past few days. It's very interesting, if you live in the West, and if you live in cities of the West, there is a fashion now, there is a fashion and they make a lot of money out of it, we don't know if it's true or not, everything is bio (organic). The food you buy on the shelf, normal, they've been feeding us for past years, is one dollar. If you want bio, is two dollar, sometimes three dollars. But, what is interesting, you drive, let's say, (1:52) from Austria to Poland, to Romania, to Czech Republic, and don't stay in the city, stay in a village. The farmer gives you milk, meat, vegetables, on his table, all bio. And it costs a tenth of (at the) shop. We are paying to get what the village people and in Africa get free, two or three times more. And it's still contaminated with new materials.

There is a law, which I live by, and that is, if a fruit is not in a season, it's already chemically infected. Because, it takes time, it takes finances, money, to hold, or to regenerate the old to be new, for you to eat out of season. Unless we have the greenhouses and we pay the prices for it. And this goes right across the life of the Man. We are more contaminated, nowadays, in the West, than the people in the villages. Those people can see to the dimension of expansion of the Soul much easier than us, because the chemicals are the same as that dome of Calcium. We want to, but we can't do. And then, on the other hand, is the dimension of true essence of the emotion, which we understand.

And, not eating, but wanting to eat, and everything else, needs preparation, needs understanding, needs the process. (1:54) I fast 24 hours, 30 hours, 36 hours, but it didn't come as one go, the first weeks are determination. But then you understand the body tunes into it, and the emotion builds up, some people say, "Oh, I always eat one meal a day." But, what's the emotion of eating? You know, once whenever I feel hungry, what's the emotion of eating? What does it bring in emotion to you? And, how does it make you feel? Always said, "You can take a horse to the water, but he cannot make it to drink." He can do all the processes, but there's a niche in there, that that niche has to be found out why you cannot. Some other Knowledge Seekers in the same sessions, and the others, we had to tell them to eat, literally, if Knowledge Seekers. After the what you call, Food sessions, they asked, "What shall we do?" We told them, "Start eating." Because you need to, some of them could feel the taste of the food, some of them could actually feel the expansion of the stomach, when they receive the energy, because that's the only way they could describe it.

And, we have to understand the emotion. Then, if you understand the emotion, you feel the emotion, then we learn it, and we can do it. Knowledge Seekers in South China Sea, in Southern China, in what you call it, in Jinanjan, and the rest, they started this drinking

from the Gans waters, many of them stopped eating for months, they're just drinking. (1:56) They learned the transfer of the energy. But, now it's time to understand how to transfer the energy from that food to us. And that's why we brought the Head Units, which is coming out, you put one head unit, and then you see how you feel. If you don't feel, change the fruit, change the position of it. And then you see, can you receive it, can you feel it, and then you build it up. And, this is part of the same with transmutation and transportation.

Now many people like to transmute, as I brought you the picture of today, what I drew. Transmutation energy for me, is not the same as you. My composition of fields is different than you. That's why our systems are adjusted to. We have developed what I call, Space Frequency, which doesn't exist in the vocabulary. We have brought in the, what I call, you see the graphs we just showed you? These shapes, sinusoidal, whatever, doesn't exist in the plasma of the Universe. It has its own shape. And if you create it, you can achieve transmutation. Then you have to find the frequency. We are sending you, are you going to end up on the Moon or Mars or in planet Zeus? These are all the essence of the knowledge Man needs to learn in the coming time, to be able to do.

I was looking at, on the, what we call it, social media, that Mr. Musk is planning to build a rocket that it can go interplanetary, (1:58) it can go from one planet to another, whatever, and come back in the rest of it. Because, don't forget, when supposedly Man went to the Moon, it couldn't take off, they had to count to get off, if it was real. But he built this system, which is, what you call it, third generation, fourth generation, coming up, the way he landed on, lands the craft on the Earth. He takes the craft across there and he lands it the same way, upright on the Moon. And when you're in that position, then he can take off to come back. But, there is a condition on this, that he matches the fuel, he has enough fuel, and this is why these are scarce opportunities.

But, this is what you will see with the Keshe Foundation in the coming weeks. We have developed a Space fuel, which Man does not have on Earth, that creates fields which gives you that dimension. We had to create this new fuel to be able to be working the same as the, what we call, Universal bodies. In a way, when I look at this rocket technology, and now we're going to the Moon and come back, because we can land here, we can land there. It's like that movie if you remember, the guy stands in front of the other guy, and he's trying to use a sword or an arrow, and the guy just pulls a gun out and that's it. The arrow and the sword is Mr. Musk, the gun is the Space technology. (2:00)

By next year, next couple of years, NASA, X, and Russian Space Agency, Chinese Space Agency, Iranian Space Agency, will come to a halt. They'll be museum pieces. It's like, I explained to you before, years ago, British Telecom went for these telephones everywhere, because a lot of people making, they're going to make money out of the telephones. Wherever you run, I ran around Europe, sorry, England, all the old red telephone boxes went out, it became just a little hood with a phone on it, but it moved out then. Six months later nobody was using it, because everybody was going to a mobile phone. And Mr. Musk is in that position of stuck to the Earth. You can go to Mars and

back, with the new Space fuel, because you match the work of the Universe, within seconds, and the guy is playing fire games of the Chinese.

Building, developing that Space fuel is a breakthrough. Otherwise, we would have been still with the MaGravs and magnetic fields, blah, blah, and the rocket technology. A fundamental change in the world of science is about to merge, but in a different way than you think. And it will merge from Keshe Foundation. This is why we came here, we introduce a new energy source. A new technology, a new dimension of technologies, which has baffled the world leaders and even they wanted to claim on it, that with it, will change. But I look at it back a few weeks later, I said, "Thanks God it didn't happen." (2:02)

You have to understand, that a fundamental change in resources, will bring the change in behavior. Technology which will be developed will change the STM, the physicality of the Man, the needs of the physicality of the Man and the STM, all (will be) equal. It's not anymore that Tokomak holding a plasma, it's a plasma holding a plasma. Smooth interaction. The Soul of the Creator is in dimension of fields of the Universe, as He creates his own field and he interacts with us. And, the "Holy Grail" of achieving what is in the Holy Books, was developing that fuel, that energy, that allows to work in the same strength, same fields as the Creator, and we have achieved that. We hide it in different ways, we manifest it in different structures, but in a way, Man has reached that point of maturity to have the basic fundamental fuel, that it feeds the STM, the physicality of the Man, the emotion of the Man, the illness of the Man, the material production of Man, all from one source. We don't have factories in the depth of this planet, creating, one factory creates only Gold, and one factory only creates Zinc, and one factory only creates Water, and one factory creates Oxygen. It's an interaction of the fields of the Universe which leads to that point. And, we have achieved that level of knowledge.

And, part of that, is the dimension of transfer of energy that becomes food to Man. (2:04) In a short time, we'll bombard the world of science and technology, new systems and technology, new understanding. And, part of the teaching which you've seen, past for five months is parallel to that point. We had to find peace with the Man, that we couldn't give it, that it doesn't use it for that. And now we found that peace. The men who are sitting there, are bringing the energy of the peace into operation, and are working together to do it. And they need our support, as I said in the earlier part.

And, a lot of people in the West are brainwashed with something else, but we see the reality, we know what is about to happen. When the tools of war are changed to the tool of peace, and there are world leaders who support it, and they want to see it, they break up the organizations which are built up to create war. We see the end of NATO. NATO is finished. And, in finishing that, allows the peace world to take. The new alliance between Trump and Putin, and Saudi Arabia, is to disarm the world and use the finances for peace. This is what I've been preaching for past years. And now we see it.

That's why, in the negotiation between America and Russia, they don't even let the Ukrainians in, they don't let the Europeans in. "You want to fight, we don't have time for

you." "You want to fight, you provide each other guns." We want to create a peace and condition to that. When we see this movement, especially in the past week, through the interaction between the two world leaders, (2:06) we have to give them a tool that they can jump on it, they can use it to be able to offer, because the factories making gun have not stopped, they are still producing. The fertilizers which go on the land, which creates mayhem, genetic modification, hasn't stopped. We have to bring a new technology, a new fuel, new industry, that allows them to support them to bring that change, because they have something new to offer. And, that is in the process of being done.

We unleash technologies which Man could not even dream, and it's been held within the structure of the Keshe Foundation. And then you're hungry, "I cannot get food, stop eating." I give you enough food through your telephone line, your, whatever you call it, your cities, that you don't even think about food, "I want to eat." (If) you can't do it, we support you, we do the Apps, condition of speakers around the cities, condition of using what you call drones, to bring the condition of stability. Drones which never run out of energy, and they can stay like satellites to cover cities. There is no need for satellites. It's at the end of an era. They brought us what they brought us. We've seen it now, with the technologies which are coming up. And it's all been in the patents for past 25 years. We are not coming up with new ideas. Now, we are affirming and bringing technologies which we put in patents. None of you, more or less, most of you have not seen the medical patent of the Keshe Foundation. (2:08) That brings shiver on the back of many, many pharmaceutical companies. And the beauty of it is, it's not in the hand of one man, it's spread. Now, you touch me, the technology is released in worse way than anything else.

So, if you can't ??, if you can't transmute, you're still short of that satisfying the energy. And that energy has to come from a source. And we have developed that source. And we see the interaction with you lot.

Any other question?

Q: ... Where does the energy come from? Why do some low weight foods have a lot of calories? Is there a way to burn more calories with Gans?

K- Oh, of course you can. But, the calories is a combination of many things, man calls it calorie. It is in a way conversion of matter to Gans in the stomach of the man, and how much of it can be captured by the man, by what I call, 'the lips'. (2:10) It's the way we explain it, it's the easiest way. And it's got a point of saturation. And we... I explain calories in a different way, as the energy man needs from his environment, to manifest his presentation, or his presence. And the world of science brought up how much energy is needed to hold on to, before conversion. But they don't tell you what happened after it's converted. What you do with this energy. And we see, at certain point, man needs certain amount of measured materials, to keep certain weight. And this is how much energy you need, you convert it, they call it the calorie and the rest. Man has made measurements for everything, fake or real, to confirm his, what you call, existence, and his talent. But in fact, now that you bring in technology, plasma technology, calories don't mean anything.

Because you work in the plasmatic fields, and you don't need to take matter state, calorie. Bonding and the bonding of materials. And what energy you get from it, is what you call the calories, in the present world of knowledge.

Any other question?

Q: ... Mr. Keshe, (2:12) when you showed us the graph of the Soul, and Solar physicality and physicality, there was an ear equal to a plasma from the Universe coming in, and a tail equal to plasma going out from physicality. Should they also be added to a MaGrav system, like two antennas, one on top and one on bottom?

K- Your... The way you make your MaGravs, it's a Black Hole in the Universe. If you understand how to use it, how to connect it, you should have no problem. As I said, our Knowledge Seekers always looked for matter state condition, but they didn't look for the field dimension. And it's time to do that. And you can solve a lot of problems with that, if you understand how to work it. Put it this way, we don't see any cables connected from the Sun to the Earth, but we still receive the energy in a different way through the fields.

The beauty of it is, if you want to understand how much the energy of the Sun affects us, and our emotion, choose a sunny day, nice warm day, and sit under the umbrella in the shadow. (2:14) And then, when it's peak of the heat, lunchtime or whatever, walk out of the umbrella's environment, into the open space where the Sun hits you. You feel warmth? Try to feel what pressure is put on your skin. You feel the pressure of the Sun, the rays. And, measure your emotion, what does it change, in your emotion. Then you understand a lot of things, if you are there to understand. You can use part of that energy for transmutation, if you want. You can use it for anything else. But what does a Man do? Changes to emotion. "Oh, it feels nice and warm." emotion of warmth. "This feels hot." emotion of heat, that he absorbed by the skin. And a person says, "I feel so good." So... And the doctor tells you, Vitamin D. Fake it. This is why we go through all these problems.

I said to a man of pharmaceutical, if I put my technology with your Vitamin D, you'll have no patients, nobody will be ill. Because, I transfer the emotion part to it, that you cannot do with your medicine. (2:16) And, we call it Omega 3. Part of energy of the Omega 3, is the emotion. When you are depressed, when you are ?? concerned, whatever, you take Omega 3, it's part of that fields in that Oil, is the emotion. And then, it's the new technology of science of Man, it says, chickens, bred in captivity, don't have any Omega 3, or very, very little, and are very high in Omega 6. Omega 3 has the emotion of freedom, the bird is free. Omega 6 is the emotion of the imprisonment. That emotion comes to us, we eat it. Depressions, suicides, that bird is locked, it wants to be free. He has created, he's changed even the structure of his own life, through his oil, which lubricates, gives nourishment to all his parts, to imprisonment emotion, Omega 6. The jail free card one, we call it the free range. Original one, is Omega 3. So, which one you want to choose? Imprisoned oil, or free oil?

You get herbs, you get fruits, which are, which use fertilizer, (2:18) or the ones which were in the farms, in Czechoslovakia, in Bulgaria, in Africa, wherever, use the process cycle of the energy of life, natural fertilizers, cow shit, and the rest of it, and you see people are happy. That engagement, that locking up of the fruit, foods, roots, giving them fertilizer, is the same that bird in a cage. That, Omega 3, Omega whatever from that vegetable, is useless. Brings you more depression, brings you more, but they encourage you to buy, because it makes money, but 90% of the biological or something, B or Bi, whatever you see in the shops, you're asking, "Go and follow, see how much it is, what it is." And how they control it.

I had a privilege of, in past couple of years, to be taken to a tomato factory. And you see these cherry tomatoes, little, little tomatoes, which are in usually string, very nicely, neatly done. And this greenhouse is set up, just to produce these. And the way they produce these is amazing. Mobile greenhouse by the plant, I call it. They put a seed of the plant, let's say. It's a very, very interesting the way they've done this.

And, the way it works, is like this. They build a greenhouse. (2:20) And they put seeds in little trays, on this corner. The rest of the farm, the rest of the greenhouse is empty. And they are, what you call, like strings. In the full length of this, very controlled. They put the seed of tomato here, and they connect it to this. This belt is in a conveyor belt. So, in a way, the plant moves up that way. And the plant lasts eight months, so the plant goes up this. The farmer, or the collector, never moves from this position. The way they bring the plant down, it always picks up the cherry at this level. Because the next one is coming down green, ready to come. So, they move the stem of the tomato 16 meters. But to achieve that, they continuously feed, drop feed, chemicals. Then, they add other bits to it, and then the next one starts. The next one starts, by the end of the season, all these plants reach to the end. The train gets to the end, and they have to replenish everything again. Bring all the trains back to the beginning, and start watering them the same way. And they keep on pulling them. (2:22) Sixteen meter, twenty meter tomato plants. But, it cannot go up, they go horizontally, lane by lane, they drop it. And then, one man, always at the same level, picks up the tomatoes.

You change this feeding system to, what we call, natural fertilizer. Or, in the future, we show you how you feed these. Then you see, a small plant will give you as much cherry trees as there. But, in a natural way, not ???. Who eats, you see the condition is, I explained this before. You put these tanks, you put all these chemicals in, you feed the plant. Goes in the plant, comes in your mouth, you are the end receiver of this fertilizer. Why don't they connect it to you directly? What goes here, is a mess. And what is created in this, is a bigger mess, as a human emotion.

Any other question?

Q: ... Hello Mr. Keshe, we know that the general structure of all types of Amino Acids consists of two groups of Carboxyl and Amino. Is the cause of the fatty Amino Acids due to Carbon and Hydrogen bonds, Carbohydrates, or simpler, why are Amino Acids fat?

K- They are, (2:24) I call the Amino Acids, Inertia of life. You look, you call it Amino Acid. When you put the energies of the Amino Acid, 43 in Atomic structure, and about 32, ?? 30 in the field structure, which is the Calcium balance, that's why you have Calcium in his body, that's Inertia of life. You can move this Inertia slightly by changing composition, but then the structure of the planet dictates how it'll convert it to, and what it attaches it to. That's why our Amino Acid, made of being muscles on the skin, stuck to the, to the, what you call it, to the bone. Different ways of finding to stick itself to it. Muscles, tendons, skins and everything else, that they don't rub too much to each other, create pain. So, in a way, your bone is your Inertia point on this planet. If you create bone Inertia, Calcium, you can create any life on this planet. New creatures. And this is what we need to understand.

And the animals without the bone, you talk. Every cell of them carries Calcium. They have learned how to dilute it, but keep the same structure. And, if you understand the scientific process of Defense Technology, animals do it with the greatest of pleasure. Do you know what we call it, Defense Technology of the animals? Change of a skin. A snake changes its skin. Yeah? (2:26) In Space Technology, I create a system and I release packs of energies. I do exactly what the skin of the snake does. But I make it glorified, I call it a Defense Technology, and I can release energies. Principle is the same, but structure within is not solid. Structure within is multi-layered, that you can allow to do this.

Once you understand, not copy a technology, you can run, you can jump, it's all the same way. Once you walk, you can do everything. And, once you understand the process of technology, you can do anything. And this is part of it. Which, you... Why do you create Amino Acid at 43, and then your Calcium 30, 32, depending on combination of what bone. So, this gives you a very good indicator, energy of the Amino Acid is around about 30, in the Atomic structure. Otherwise, it cannot attach itself to it. And this has to be stronger, that you can hold on to it, that's where your muscle tissue sticks with (the bone). Now, you look at the Carbohydrates, you look at everything else, and see how they convert to this, to be attached to this. And then, how come the more distance you get from this, you store them in different form, you got a belly fat. Because the muscles have already used their space.

The field the strength from the bones. In a way, if you look, understand the structure, physicality of the Man, the most powerful, strongest is this guy. (2:28) It can hold, and it still uses very much dynamic Calcium, but locked it in the plasma. Then you have the backbone, with the rib cage, which creates, diverts the energy of this, your Spinal cord has the highest gravity pull in your body. And then, over the process, you see your stomach, and this is nothing here, it's just your backbone connects you to your hip bone, if you remember the song. Yeah? So, what happens to you, you have these leg bones which come in, which in fact, .. they bring you the conversion of muscle tissue, to walk.

Why all your cancers, majority of your cancers, 98%, 95% of the cancers happens in this area? Oops! Because here, is a dynamic field motion, with one thing trying to hold it together. This is your skin, holding you to the backbone, your spine. And, to do this,

these have to keep on moving, to accommodate this. Yeah? And this movement, creates different fields, you call it cancer.

If you make a solid rib cage, where the stomach goes, man, cannot move. You have these in a steady position, and different things. Look at the diseases in heavy overloaded people. And look at the diseases in the slim people. (2:30) Even cancer in them, is different than the other. But they all have Calcium as a center. How you allow that Gravitational point of the life on this planet, which for physical life is Calcium, spread and how you connect it, it gives you different structures. And then you encage it, or connect it to matter state Energy Gravitational field of the Amino Acid, 43 to 30, and you attract it.

Any other question?

Q: ... In the last workshop you drew a four stacker MaGrav. What does the fourth stacker mean?

K- Go back to the Star Formation (SF). The fourth one you don't create. It's created because of.

R: Is that what you refer to at one point as the free plasma?

K- Yeah. (2:32) It'll take centuries in research and development for Man to understand, to utilize all the possibilities and properties of a MaGrav system. Very soon you'll see, a lot of people understand, and those who called MaGrav systems fake, blah, blah, blah, they have to find a hole to hide it, showing their ignorance. Actually, it's not hiding, it's just they're too physical.

Any other question?

Q: ... Mr. Keshe, are the resin Coasters similar or better than the plasma Butterflies? Could they be used together?

K- They can be used together, but they have different purposes. There are things we cannot do in Butterflies, where we can do. In some of the ones, especially you see with the fish, you see a line, if you look very, very clearly, you see a line. In the middle of the translucent material, and that line, is the line of the separation of the MaGravs, of magnetic fields. If you look deep enough, and if you take it into a Sun, and you look into it, you might see it as a rainbow color. It's a normal thing. This, what do you call it, materials are like Silica. (2:34) And when you put the Silica in a glass, you get this reflection. Then when you cut it, you see different reflection, and you can see the, more or less, Gans's as the energy in these materials. You see them clearly. If you have the eye for it, to see it, to watch it. It's a, you should see a rainbow color.

We see that in, I explained that in the teaching before, we see that in diamonds, when we do the silicon filling. When we put silicon in them, like the gels and the rest of it. And

you know if the stone is real or fake. But in this case, you see the break in the line of the light, which produces like a rainbow a spectrum in a different way. This is where your energy is in ?? MaGrav are sitting.

Any other question?

K- ... Let me... Let me explain to you Knowledge Seekers get a lot of knowledge. I've explained this, I think, in other teachings. Years and years ago, maybe new Knowledge Seekers, were able to learn something from it. As most of you know, in my business life, part of our work was and is, what we call, the diamond business. Nowadays it's not worth being in it, if you really know, because the prices are dropping beyond this, but ?? it's to come out of it.

When you get a diamond, and all the diamonds, most of them, they say the black spots, if you see, these are the mothers, these are actually the thing which created the popcorn, what we call gold, what we call diamond structure. In these diamonds, in olden days, (2:36) you could see black spots, and you buy S2, whatever, what you call it, D1, S2, whatever it shows, S2 shows how many impurities are in there. In the world of a lot of diamonds, especially in the Indians and the Chinese, are very good at this, doing it, and they sold me a lot of it. What they used to do, is they drilled, they drilled the hole, closest to the, what you call it, (with the blue one, it's easier), to the black, this black is just dust, majority of the time it's dust. You put in a syringe, and you wash it out. But, you have to fill in the top layer of the stone, what we call, this when they drill it out, they keep. This is the cap of the diamond, it's a machine, it just takes it out. And then, you will see a hole if you, if you are in, see it.

What they do, then they fill this with Silicon, this hole. Then, what you actually don't see anymore, is this black part. But, in fact, this thing, it ?? still exists, this ?? line. You can't see it, because it's the same color as the stone. And, the only way is, when you move the stone, rotate it in its, what you call it, axis, and you put it in front of a light, you'll see, what we call, the rainbow. Because, it's different. Then, you know, the diamond is fake, it's been tampered with. (2:38) And, the stone, they sell it to you as a ?? flawless, but it actually is due, they cheated they stone. A lot of these are sold in the market. And, you think, "Oh, it's got the beautiful rainbow color." Yes, you bought a cheap one.

Now, the technology has changed, part of the Keshe Foundation technology has been used, part of it with the Russians, where we create a plasma of this, and through a certain way, we pull it out, the stone doesn't get filled up, because the stone fills itself up, and the stone, in that process, creates a different color, and you're getting these new, fancy stone colors in the market, which you see, which 10 years ago, 20 years ago, didn't exist. It's dragging the material out, and in that process, you leave small traces that you cannot see, you dilute the impurities, and that gives you new colors. And, a lot of people know, "I bought a beautiful yellow-green diamond, it's unique." Yes. The one which is a flawless, one is ??, I think, I don't know, whatever it is, not 10, 20 thousand dollar, good quality cut, but, they buy the stone for 20 dollars, and they sell it for you 20 thousand, because you are ignorant to the knowledge. And, most of those who do this cheating, have gone to

Dubai, and they become diamond cutters in Dubai. The way it has attracted all the frauds and cheaters.

Okay. Let's answer the question, and then we call it a day.

Q: Good morning, Rick, Mr. Keshe, thank you very much for your teaching. (2:40) And, I have a question, just by any chance, if you, there are things with Gans, to repair the loss of gum, the bones, under the teeth, which some medications block absorption, Calcium, I don't know if it's because of that, can we create more bones?

K- I'm going to answer you very, very direct. We do not discuss medical things in these teachings... But, scientifically, scientifically you can do... Scientifically you can do, and there's a lot of things to be done. This is something we've done a lot of work with, in the past. And, scientifically the knowledge is there to do, but I'm too lazy to complete it, to release it. I've been asked these questions, many of you know, for past 45 years, by one lady who I love so much. She's a dentist, my sister, and says, "Can you do this with this?" "You should be able, you know what I can do with this?" I said, "Yeah, I don't have time." Yes, it's possible, the knowledge is there to do it.

If there are no more question, we call it a day. (2:42)

Q: ... Hello everybody, Mr. Keshe, please help me to understand the process taking place in the CH<sub>3</sub> reactor. When I start the CH<sub>3</sub> reactor, I use a caustic Nano coated copper coil, and a galvanized iron coil. I use a glass vessel and a 9% salinity. In the first moments, the Carbon appears, which is a gray color, then the orange color appears, then the Gans gets a shiny black color. The Amino Acid has orange color. Thank you.

K- You have to look at the composition of your coating galvanized material. Even though you lose the galvanization, the energy effect of the material is still attached to the iron in the middle. You look at your composition, if the supplier can give you a composition of the coating, then you understand why you're getting variation of colors and materials together. Because, when you deal with Copper and Copper, it's just Copper. When you're dealing with galvanized, you are dealing, making Nano material, and then Gans of all those materials individually. In a galvanized plate, you have Nickel, you have Zinc, you have Copper, you have a few materials. (2:44) And all those are converted into Nano structure. And combination of those, plus the central, once you reach the central iron, you see the orange color, because combination of their effect, with the field of iron, creates the orange color. Hydrogen is about the same color, what you call it, Deuterium is about the same color, Tritium is about the same color, because, is that iron base you're dealing with the gravitational magnetic field of the Earth.

If you slightly tint it, add it, it will be red, which is the color of the blood. If you push it into certain direction of composition, you create blood color. So, the colors and variation is what is on your Nano coated Copper, what's the purity of it, and then interaction of that, because it's not just the Copper, it could be have 5% of Nickel in it. And then now, you have Nickel on the, what you call, the galvanized. So, now you're producing Nickel

Gans, which becomes part of that Gans, and the composition of it. Once the field manifestation of the iron comes, you get the red color. ?? ray field colors is due to, and secondly, due to transition from the coated layer to the iron, you create Nano materials, because of the composition of the field changes. It separates as a Gans, but through the field gravity of the liquid, it becomes a Nano of itself. (2:46) In a way, it's like you're throwing water in the air, and the air is cold, and then you freeze, you get ice on the floor. The Canadian's friends know exactly what I'm talking about, they throw water in the air in Canada in the winter time, and it just freezes while it's going, it drops like a rain. Actually, it drops like a hail stone.

R: Yes, indeed.

K- ... The session of the 20th of March, coincides with the Iranian New Year, and we'll try to, we'll try, if Knowledge Seekers can understand, and bring the culture of the Soul of it, that will be interesting, because there's a lot of things we will manifest in a different way, with that, that cycle of teaching. We would like to thank you for today.

I go back on what I said before, those of you who have expertise, and you can part-time support the work of the Keshe Foundation in, in different aspects, please get in touch with us, that we can expand the knowledge rapidly. Thank you very much.

Q: A question Mr. Keshe, on the transmutation session, you were just talking about, it's listed as March 28th? (2:48)

K- Yes.

R: Is that correct?

K- Yeah.

R: Okay, good. There's one other thing, which is there, let me share here from Lisbeth and from the Universal Council, who have a daily wish now, that they're providing for people to have a common wish for each day, and today's wish was, wish to be shared by Lisbeth, and I'll read it here, and maybe we can take a few seconds of silence to kind of digest it, and then I'll pass on to the end of our workshop here. So it goes, "We the Universal Council, wish that as everyone elevates, they learn to add their energy to the planetary peace and prosperity." And sometimes we say, "I am present for those."

K- ... The Brazilian team has come up with a brilliant document, which they posted today, it's the first time I've seen it, maybe they posted it before, and it summarizes the, or they try to summarize the essence of the teaching of every session. I don't know if you can go to it, they posted it in most of the chats this morning. And if you read some of these articles, it's amazing what they've done. They need some corrections, but that's normal, but if you look at it, if you go to the Chats, and have a look at this link, takes you to, I cannot do it on this one, just one second, you may hear some noise, just bear with me. (2:50)

R: I think this would be the document that you're mentioning, which is the...

K- There's a chart with this, there's a chart of every day, every teaching.

<< Rick shows in the screen the list of the Introductions of the KSW. >>

K- ... If Knowledge Seekers would like to understand the essence of the teaching for past time, it's amazing what they've done here, that's beautiful. I thank to Rafael and the Brazilian team. I think most probably they're doing something with the Chinese team, connecting with each other, with AI. But this is, this gives you essence of the teaching, or the essence of the Soul of the teaching, not necessarily the physical, mechanical. I think this must have done by AI, listening to all the teachings. But it's fantastic what they come up with.

R: It's back to the 440th, at least, Knowledge Seekers Workshop here.

K- If you click on one of them, especially the one from last week, it gives you essence of the teaching. There's some parts which needs correcting, but it's amazing how different Knowledge Seekers bring different aspects of it. And how they will be in the process of changing this. It gives the essence of the teaching, than actual physical teaching. What they understood, and what, or maybe AI understood from it, which we know AI is not perfect yet, (2:52) but it needs to be read and be adjusted. And that is very interesting to see. Very interesting to see, Knowledge Seekers are putting these kind of knowledge's out. And I know the Chinese community is working heavily on the AI side of the Keshe Foundation work. And we'll see how the whole thing takes shape.

There is an announcement which we'll make in coming week or two, but I'll give you an insight into it. If you have ever produced, if you are selling Keshe Foundation products, if you've taken part of the Keshe Foundation work, and you modified it the way you do, or you thought you can do, or you're producing materials that you sell, or you're trying to sell with Gans's or whatever, you run a small web shop, website shop, or you have a shop, you make the materials, or whatever. That you're a manufacturer, you produce it yourself, not that you buy it from the Keshe Foundation and put it on your website. Send a message to us, who you are, what you sell, and we will bring all of you. There's a huge number of people, they sell this. We reckon there are about 400 groups around the world, but now I think it's over 2,000, 3,000 people who are doing it, maybe more. We will announce this further. We give you an opportunity, huge opportunity, we are not looking to demolish you, we are there to help you to build it up. Even those who stole, technology, what you call it, the Italian group who stole our factory, and everything, and everything they've done, and they're trading on there. If you still got their shops and they ?? thought. Get in touch with Keshe Foundation, (2:54) through a line which will be provided in the next couple of weeks.

We are bringing all the Keshe Foundation suppliers under one license. We'll certify you, you sell out your goods. And this will come in the next few months as one massive, what

you call, Amazon product range of the worldwide Keshe Foundation. You can trade with each other, if somebody wants something, you see something, you don't need to pay, you pay through Coin, Keshe Coin. Which means the exchange rate, these things doesn't come into it. And then the plan is to set up a delivery system, that all of you pay the same price across the world to your customers. So you get the license, you get the certification, you get authorization. And it allows you to increase your productivity, or your income. We are not here to destroy you. We are here to bring a massive expansion to Keshe Foundation. As I said, there's a lot of things happening in that plan. But you go on the license.

This way you work safe, this way you can increase productivity, buy from this plan directly from the others and add it to your website in your language. And it creates a market for many of you. And that's the purpose of the Keshe Foundation. Then it depends on you, how you want to compensate this, or the other Knowledge Seekers, how you come to an agreement, or we come with a general agreement, if Knowledge Seekers, manufacturing, trade with each other, this is what you're going to get. And it'll be paid through a structure set, that you're not worried, "I sold them, they didn't pay me", or whatever. Or they would do the wrong material. We give you a certification, that you are qualified. You don't have to have a factory, a lot of you make it in the garage, and in the bedroom, and the rest of it. (2:56)

We support you to make this, but most probably it's hundreds of you, thousands of you out there, who do it. We are aware of, we thought about 400, but now we start tapping into Internet, watching what people do. You might mix with other technologies, this technology. We still give a... we give you a platform to increase your, what you call it, your income, your sales. And this is going to be happening next few months. So we're going to gather this, we give you an email to go into, and then we leave it to you, how much you want to donate as part of your income, which comes into central platform, to the Foundation, that it allows others to be expanding, and as we do, we always go back into the Foundation, and to the community.

So, if you are, even our resellers, we have different kind of agents, and reseller groups, each one benefits different way, you still can advertise on it. It's not that somebody else sells the material, of Keshe Foundation, to a village, or in the next city. Each one of you, get your own people, know how you produce, to their benefit. So, get in touch, we give you, just don't... I mean, leave it to you to think about it, in the next few weeks we'll announce it, the new platform for this will be established. Does not matter, what you do, what you've done, but you have to follow the procedure, then it ?? grieves you, and then we guarantee your work. That gives you credibility, doesn't matter if you make it in the kitchen, and it gives you an income, your orders. And if you set up a factory to deal with the farmers and the rest.

We endorse our producers, the people who produce, and at the same time, you can tap in to the back of the TV education, and increase your market. You can go to a farmer, say, "This is what it is." (2:58) They want credibility, we put those videos from other suppliers, other people on it, which allows you in, let's say, South Africa, to have,

because now you have the support of the guy who done it in China. This is the support, this is the video of it, you can build huge markets, and we are there to support you. So, if you are, what I call, been working and selling a Gans here, a MaGrav there, and whatever, or if you want to put conferences and congresses, we give you that platform, it'll be established, and once you carry the logo, we will deliver to you, and the QR code allocated to you, you're safe, you can produce, we back you, and anything else, we can support you with.

So, think about it in the next few weeks, and we give you an address, all of you, doesn't matter you're a seller, you're an agent, you make things at home, you classify yourself, we are going to put people in charge of this to be set, that a platform for you lot, who are producing at home, if you're a wife, housewife, and you produce Gans's or whatever, any additional income, we support you to become. Gradually you might become a factory owner, and all sorts of things, or you become, through the structure, agent of somebody else, who's selling the product, you can sell.

We are joining all the forces of the Keshe Foundation worldwide, as of this year, as part of the expansion of world peace, and this has many advantages to you, and for the work you do in your communities.

Thank you very much for today, and I hope we all learned a little bit more about our own way to our Creator, which was all of you wanted to find it, but now we have to give you the tools to do it. And hopefully we see you next week. Thank you very much, and see you next time. (3:00)
