

583rd Knowledge Seekers Workshop March 27, 2025

(Quick Index 15pp, Introduction, Topic Index ; Need to do; Key Phrases, Words)

(Auto transcription from Elias)

STM controls itself through emotions - rare race in U; Most races dictated by other field forces not free; Most things in U created from set field interactions; Problem Central Line of U cannot change rapidly; Man given STP dictates motion; 2 dimensions Soul & P; Intelligence from 180 degree movement - interact with emotions - STP - STM - Cosmic Rays (CR); New fundamental paper on CR - change humanity - confirm existence of CR; CR create life; Soul receives & interacts with CR; Soul receives & gets rid of excess through CR; STM connects to U - STP to planet; STM transfer emotion across U - why have to eradicate killing; Man is bad seed have to correct - become example of knowledge & emotion - love of Mitra to Creator; Never a Being to show emotion to Creator; CR lower in field strength become galaxies - still lower become cell - interacted with higher in STM created emotion - accidentally; Emotion is Mitra; STM emotion touched Creator; Adam is Creator - Eve is Mitra - apple is emotion- Creator never understood - loves planet Earth; Make Microchips with emotions - industrialize; Emotion is field strength; Computers AI with emotion - not mechanical answers; Prophets couldn't explain; Emotion not perfect - came to correct; Man's love change U; God has thousands of emotions; From tilt of planet - mixture of materials - created AA created emotion; Emotions across U not common; Creatures created systematically like computers but with intelligence; Man introduced emotions thousands of years ago - microsecond in U time - have to eradicate killing - then Man part of Unicos structure; Created from CR - also sustain life; Symbol of always giving; Challenged Creator with emotion; Man decides for himself; Space orphans - no parents; Races learned love from Man; Walking planet - same time transfer love to U through CR; Neuro system of U; Massive war taking shape - clean planet - phoenix rise after with love; Two lights shine on everything - physical local light - light of Creator; NDE see light; STM feedback to Creator; Soul travels on CR; Changing positions brought intelligence; Detach from P - enjoy; Aliens here; Ambassadors for love; Explain graphs - red dot of Creator - other Souls; God never leaves us alone; Ayatollahs and Priests cut line to Creator - abuse in name of religion; Prophetic scriptures; April 12th; Messengers plan ahead create conditions - not prediction; Same Soul of Prophet - different P; Free to do good - connects to Creator; Identify Beautiful People on Graph; Explain NDE; STP embedded in STM no return; Cannot erase experiences; Visual knowledge not repeat - recorded knowledge can; Praying for dead; Boy sentenced to death; Sorrow effects STM; All experiences recorded with Creator; Love on Earth take to U; Past civilizations recorded; Emotions part of U - love is unique; New Butterfly - 5G; Track us in dreams - cannot abuse T; Past and future - real; After Earth - know destination; Call for experts help KF; Only look into time now - not look back; CR paper - debunk Big Bang; Speed of Light - biggest mistake - only in P - not universal; Ancient priests and astronomy; Light has different field strengths & speed; Love of Creator instant - not light-years; Graph; STP is feeding P

Topic Index

We are energy system within another structure; Humans only plasmatic system - portable & make own decisions; The rest are dictated by others; U - galaxies - SS - planets - created by interaction of fields over time - their creation is fixed - don't have control over itself; Created by fixed pattern of M field interactions; Each has own central plasma - fixed to everything else; Can only rotate - not jump; STM controls itself through emotion; Other systems like Man in U - don't follow normal pattern - create chaos; Problem - Central Line of U cannot change conditions rapidly - same with galaxies & stars - have set fields interactions have to follow; Man doesn't follow same motion as others - given Spirit - STP - dictates its motion - manifestation of its P as an entity; Stars, galaxies, U don't cry, kick, fall in love; Every living being has possibility; Man sees himself different - doesn't know connected to everything - sees himself as separate entity - king of planet; Man is oddity among celestial objects in Unicos; Has two dimensions (D) of life - STM and P; STM free to move where likes - jump - swim - eat - sleep - all the time continuously interacting with fields of U; Only creature can move 180 degrees in all D - gives intelligence; Interact with own emotions, STP, STM - continuously interact with fields of Unicos - through Cosmic Rays (CR); Rays can be added, separated, divided; Cosmic Ray paper will change humanity - origins of CR - create conditions for life; Confirm existence of CR; KS have this knowledge without knowing; Most fundamental papers since - Creation of Black Holes - open new science - bring lasting peace; Man is looking for neutrinos - radiations; Never considered own Soul is plasma - receives & interacts with CR - get 80% daily energy from; Mistake to think energy only comes from food; Soul consumes energy - needs connection to get rid of surplus energy - like P does with kidney & intestines; Soul has high energy levels - connects through MG fields using CR; CR are our connection with U - without cannot exist - need to receive & get rid of energies don't need; STP connects to planet - STM connects to U - carries Inertia matter emotion; STP & STM dictate by emotion - when STM becomes part of U - transfers this emotion across U - why have to take essence of killing out; Man is bad seed - have to correct - only existed few milliseconds in life of U; When cleaned up - become most beautiful seed with essence of knowledge & emotion - bring love of Mitra to Creator; Never seen Being show emotion to Creator; Not need D of P - only fields; God became emotional when touched human race; All of Creation only simple and mechanical from interaction of fields; Emotion is Mitra; Like if mechanical Microchips start talking - enlighten you; Emotion came from field strength traveling across U - becoming lower in strength; Emotion is Mitra - love - giving; Lowering CR strength led to creation galaxies > planet Earth; Lower strength created dynamic plasma - body cell interacted with higher order fields of STM - created emotions; Emotions of STM touched Creator; Emotions are "apple of Eve" - Adam is really Creator - Eve is Mitra - apple is emotion that Creator never understood - why Creator loves planet Earth - factor of love; Make Microchips with emotions - industrialize; Emotion is a field strength - build into Microchips - dynamic structure; Computers & AI with emotion - not just mechanical answers; Same trap Creator got Himself into - before only creating mechanical Beings; Galaxies and SS mechanical made - didn't calculate that M field strength could interact and create emotions; Emotions have touched Creator; Love beauty of planet - from emotion of giving; Prophets of past could not explain - we hid it in Adam and Eve & apple; Creator bit apple; Problem is emotions not perfect - why came here to correct; Purify this emotion - only gives to others - stops killing - Earth becomes beautiful planet - U also become

beautiful; Man's love will change U; Suns able to cry; Higher fields interacted with lower - created love and caring - become part of Creator - He is Source of fields; Why God has thousands of emotions we don't know about; Had time to perfect them across U; Now He'll show U where they came from; Seed of love and care came from Man - promote to whole U; Came through tilt of planet & mixture of materials on Earth - led to creation of amino acid (AA) - within AA created emotion; Emotions not so common across other creatures of U - everything is systematic but with intelligence; Man introduced emotion thousands of years ago - fraction of a second in Universal Time; Why have to eradicate killing from within Man - not become part of structure of Unicos; Man was created from CR - can sustain his life without killing; Man become symbol of always giving and understanding - love; Mankind has no choice - we made him to walk, think, evolve; He challenged Creator with his emotion; Man has ability to control and decide how to live - decide where to go - whether to show love or anger; Brought this to Creator; Become creator of emotion for rest of Creation - influential position; Orphans in Space don't know what love of mother and father mean - never experienced it; Taught about emotions from first health teachings; Emotion at level of love of the Man exclusive to planet; Man will teach emotion to other created things in U; Only races who have had contact with Man in the past know about love - built it into their systems; Emotion of love and care comes from Earth - way structure is set; Remove thorn of killing in rose of Man before travel U; Don't want lover to fear damage from thorn; This is work of Creator; We were created out of CR - when walk planet showing love and care - at same time it transfers through CR to rest of U; We are seed of love for U without knowing; We create an emotion for Creator to know what His Creation needs; Otherwise U is only a mechanical system - interaction of CR - in certain ways lead to creation of galaxies, SS etc; Part of 'neuro system' of U; Massive war taking shape for last time - clean up planet - bring all bad things to end; Phoenix will rise through love and care of Man; KF knowledge - bring peace; Very soon the old will end; Cosmic Rays paper show path to change humanity; Gold will mean nothing; Value emotions we carry - connects us directly to Creator; Mitra will touch Creator - love will change U; We set it up step by step; Prior to Man everything else in U - mechanical system; Standing in right direction - see light of Creator; 2 types of light - physical light has local source - CR light comes from Creator - shine on every object; STM has two lights shining on it; See light of STM - interaction of CR at strength of STM - shows strength of emotion & Truth; Like Sun shining on front - back shadow; Everything has 2 lights shining on it; Comes from natural interaction of fields of any M system; In U - light will show truth about Souls we meet; Near Death Experience (NDE) see this light - CR interact with STP and STM; Always feeding us - look with eye never see; Light of Soul interacts with CR - some could be directly from Creator; Law of physics - plasma has to have a feedback; When understand light of Soul interacts with fields of U as CR - enlightened instantly; Now only interact with P; Spaceship takes 10,000 light-years; Soul instantly on CR - we chose physical path; Many KS have done this - Monthly Flight sessions - wasn't a dream; Lack of trust in STM - deny own existence, emotion, and beauty; I made Man in the image of Myself - but Man made My image with interaction of emotion; Changing positions brought intelligence to Man through field interactions and diversity of life; Same for STM in U; Understand and detach from P - but still enjoy - emotion of love - no war; Many encounters with Passengers of U; Come here to be touched by love Man possesses; We have leaped into

becoming Universal Travelers - ambassadors of love and peace - not killing and power;
Period of killing - part of growing up process - understand totality of his emotions; Look
through STP for light of STM through CR - find that specific light directly to Creator; He
shines in all; What we brought you will change Man in coming months; Understand
Man's purpose in U and why he is so precious.

Part 2

Explains graphs; Can detect Souls; One of those dots connects you to your Creator -
through CR; Rest are Soul of grandma, etc; Brighter dots closer to us; God never leaves
us alone; Ayatollahs - Priests cut this line to Creator - abuse us in name of religions;
Future research to find which dots goes to Creator - interacts with field strength of Soul;
Keep Man busy finding light - forget about killing; Find promised light - don't need
intermediaries - thieves of STM; He knows which one is to Creator - thousands of years
of research Man will find; Teaching deep - nothing coincidental; Dots show light of
organs - different cells; Upper dots - interaction with CR; Have same DNA as dot from
grandmother; Creator always near - feeds us - we teach Him essence of love and giving;
Asked about prophetic events in scriptures happening; Answers about Globalists
predictions on social media for April 12th 2025; They create conditions to get us to
believe in; About our perceptions - own understanding; The Messengers plan ahead and
carry it out; Predictions are plans made - people don't understand; It's the same Soul (of
Creator) in all the different Prophets; Morning was Moses - Noon the Christ - and
evening Mohammad - always same Soul - different P; No predictions because all
arrangements made; Man wanted to be baffled by religions - knows it's all lies; All can
get enlightened from dot of Creator - soon understand; We are free to decide to think,
speak and act good - connects us to Creator; He created us to teach Him - and we did;
Teach our children that one day they teach us; We are part of MG field feedback loop to
Creator through emotions; Our love changed Creator - the fruit is Daughter of Mitra -
love and respect her; KS tells experience of connecting to Creator; Loving Creator - own
addiction - nothing you can do about it - brings peace; Can identify Soul of Beautiful
People (Schizophrenic) on graph; Changes Worlds of Science, psychology, and
psychiatric conditions; Religious leaders time over; Near Death Experiences (NDE) - like
sitting on train make video of child - replay video while train still moving; Have access to
emotion of consciousness - things we've done; Experiences embedded in STM cannot
erase; Why memories of killing bring it to U - otherwise we don't need to be here to
correct; Once STP embedded into STM - no return to physical life; Example -Alfred
Nobel manufactured dynamite - life changed created Nobel Peace Prize; See everything
at death - recorded; Red dot of Creator has recorded everything since beginning; Visual
knowledge can never be repeated - recorded knowledge is energy can be replayed;
Videos of energy leaving body from head at death - no return to body; Track where your
Soul goes when P asleep - only KF has this knowledge; Follow you where you go in
dream - see who you met; Give so much T too busy for war; It's a science can't call it
fake anymore; Offer internationally through large companies; Don't lock up Souls of
Beautiful People in mental hospitals - find solution with each individual Soul; Praying for
the dead - does it help - depends on what field strength or hypocrisy; About boy
sentenced to death by doctor - surrendered; Humans very good at covering things up;

Sorrows - emotion that affects STM; No intermediaries between STP, STM, consciousness, and emotion - nobody can interfere; Love learn on Earth taken to U - no choice part of STM - transmute with; Explains about how Souls connected - pass all knowledge experiences - accessible through Soul; Channeling Cosmic civilizations - knowledge recorded and part of Creator; Like family tree - part of DNA - RNA; Have access to all knowledge and information of U instantaneously; Red dot of Creator key to knowledge of Unicos; KS think Aliens don't have emotions: Answer: emotions are part of structure of U - but Earth has unique way of loving - this is what will be spread across U when it is purified; Galaxies and stars have emotion; To have emotion need to have a Soul; New product Gans Butterfly phone holder - absorb 5G - two-sided Butterflies; About cat's Soul - just died; Once connection made Souls never lose that connection - depends on relationship between the two; T can track us in our dreams - it cannot be abused by others; Knowledge of Creation cannot be abused - no worries; Tomorrows Flight session write down on paper where you want to go and do; Purpose is to take yourself to place written; Question about popular spirituality - no past or future only now; Answer: think for yourself if you exist or not - make money off gullible & ignorant people; Where will Mr. Keshe go after Earth - ask Boss; Works thousand times harder than when 30 - not enough time - I know my destination; Still looking for experts to help KF - advanced IT, Social Media & more; Talks about different subjects - Flat Earth - real or reflection - pyramids have underground posts; Man has never been alone; All stars and planets visited - work of CR; All Beings curious; About new images of Space - claim to look back into time; Cannot look back into time - only look into time as it is now; Theories made up by so called scientists - other jump on it; Cosmic Ray paper will debunk Big Bang; Show products of CR; Speed of light in physical state; Question about light and time; Answer: first - lot of things you don't understand about time and space; We see in 2 dimensions - Energy and P; What did ancient priests and shamans know about positions in sky - was it speed of light: Answer: a mixture of the two; Problem is saying maximum speed is the Speed of Light for the whole U; Light has different field strengths & different speeds; Your light is invisible to me - my light is invisible to you - both exist; Dot of Creator on graph - does it take several trillion light-years for love of Creator to reach us; Speed of Light is rubbish - light and love is instantaneous; Today graph - your D of STP and STM - well connected to U Energy - taking it physically; STP is feeding P - Soul is taking from environment; Brought a lot of facts today - it's how you connect to it.

Introduction to 583 KSW - Humans Accidentally Create Emotion - First Time Creations Love Their Creator - Ambassadors of Love - CR Paper - Last War - Truth About Speed of Light - Not Abuse

Today's workshop is really quite astonishing if we think about it deeply, and it is hard to believe that in the trillions of things in the Universe, the unique way of loving started accidentally with the creation of humans, and Man is the first time that emotion was shown to the Creator. This is the essence of today's teaching and we should spend time pondering what it really means, and what it means to us personally. Mr. Keshe has been very carefully building our knowledge up gradually, so that we don't become proud in an egoistic way and then create more problems. In the foreground of modern society we

could even say that humans behave in a way opposite to love, and yet love still breaks through the dark surface of ignorance. Many times in the past we have been taught about the difference between love coming from the Soul of the Man (STM) and love from the Soul of Physicality (STP) and physicality (P), and they are very different. This difference was not discussed today and the focus seemed to be more about how this special kind of love the Man has, was unexpectedly created. I understood him to mean that, it is not that there is no emotion in the U, because he said the emotion goes with the Soul, and where there is Soul there is emotion. We shouldn't think there is no emotion in the U and for teaching purposes it was explained this way. But we won't really know what this means until we start having contact with races of the Universal Community (UC).

How is it that emotions began with the Man? When I first heard this teaching it reminded me of the Star Trek series and how they used to portray humans as different from the Aliens or members of the UC. They had a greater power with their minds over the physical dimension (D) and thus over the human's body. But in the end it was the love in the humans that won over the Aliens. It's fascinating to think how we were shown this way back in the 1960s, and we are just learning it right now. Watching those programs used to give me the feeling that love was more important than power, and that in the end love wins. And the essence of most, or all of the spiritual traditions amongst humans comes down to this, that love, unconditional giving, and serving others is the purpose of life. Actually, today's teaching brings a lot of clarity and light into our lives if we let it.

To summarize briefly, it is my understanding that Cosmic Rays (CR) are created from all the different interactions of the fields of the Creator. These are higher order fields that pass through everything and are constantly flowing through the U. We are created and fed by the CR and 80% of our energy comes from them, even though we think we are getting all our energy from the food we eat. Our scientists are trying to measure what they call, neutrinos down in deep caves. They don't know that the STM is a plasma that is constantly connected to them. Just like the body uses different organs and intestines to extract and get rid of excess energy, so does the STM. It uses the CR to receive and to get rid of extra energy through the G and M fields. This part of the energy exchange cannot be done by eating animals and plants of this planet. The Soul could not survive without this connection to CR and through them it connects to the whole U. From this we can conclude that the CR are the mechanism used to create Creation. And this Creation though intelligent, is mostly systematic. I understand it that, the standard interaction of the MG fields of the U are mechanical in nature. This means that the universes, galaxies, stars, solar systems and planets are merely created out of the interaction of the fields and not through the emotions. But I don't think that is entirely correct, so maybe it is a mixture, or the emotions are not very individual like we see with the Man on Earth. This needs further clarification. The hint he gave was that the pattern of creating the universe, galaxies, etc. were only in a fixed position of rotation, and they could not jump around. However, with the Man it was different, he can move his head 180 degrees and move all around. Whereas, the other created things cannot do that and they don't have control over themselves. Last week we learned that Man's intelligence came from being able to move around in all directions and gather a huge diversity of interaction of fields and field strengths.

Now we'll try to explore how the emotions got created. First of all the CR and fields from the Creator are a higher order and as they moved across the U started losing field strength and as they did the galaxies, stars, solar systems and planets got created. When the field strength became even lower, a dynamic plasma we call the cell of the man got created. Then this lower strength field interacted with the higher order fields of the STM and developed emotions. The emotions were created through the structure and interactions of the amino acids (AA). This occurrence was not planned, it just happened on its own. And somehow the STM developed emotions and touched his Creator. Never before had the Creator ever been shown emotions by His creations and He got touched by it. The Man was able to show the Creator how he feels. In a way, this event got recorded in the Creation story in the Bible of "Adam and Eve." At that time Man could not understand so they made a separate Creator or God. In reality, Adam represents the Creator and Eve is Mitra, who also represents the Creation. And the apple is the emotion that got accidentally created out of the field interactions. Mitra gives the apple of love back to the Creator, and He got effected by it. This is why the Creator loves planet Earth so much because love got created here. Mr. Keshe compared this to when we create children and teach them, and then one day they mature enough that they start to teach us. So in a way, we are teaching the Creator about love. This seems very strange to us because of how we are educated and brought up to be a victim of the God they made for us to believe in. This is so fundamental that it rocks the foundation we were programmed with. But as Knowledge Seekers (KS) we have been gradually learning new things for years that we can handle it, but that might not be the case for those outside of KF.

Another part of the reason why Man doesn't follow the same principle of motion of the other created things is that he was given the gift of something else. He was given what we call, the Spirit, but we also know it as the STP and this dictates its motion and the manifestation of its P as an entity. The language was not clear, because I thought in the past he said that other entities also have a STP. For instance, I remember him talking about the STP of the Earth and how it needs to elevate. Then in this same paragraph I understood him to say that the STP sees himself as a separate entity and doesn't understand that he is connected to everything. Maybe because he doesn't have to follow the rules of fixed motion. The STP found himself free to go where he liked and thus developed the idea that he was the king of the planet.

This emotion in Man was only created a few thousand years ago, which in Universal time amounts to microseconds, but he developed this problem of killing and destruction. This is the analogy of the beautiful rose with thorns in it. The Creator realized that he cannot give the "rose" of the love of humanity to the U until he first cleans it of the "thorns" of killing. Man will then be able to sustain his life through conversion of the CR and then he won't need to kill. The seed of love and care found on Earth in the Man will be promoted to the rest of the U and we'll become the ambassadors of love. In this way we'll have a very influential position in the Universal Community (UC). For them Earth is the place to go to experience love.

Very soon a new paper will be released called, 'The Cosmic Ray and the Work of the Universe,' and it will change the course of humanity and explain the origins of Cosmic Rays and how they create the conditions for life in the U. It will go into much deeper details and confirm their existence. It will be one of the most fundamental papers since the Creation of Black Holes and will open the knowledge of the new science and show humanity what changes it needs to make to bring lasting peace.

In the past we learned that there is an actual position of the Creator in the Unicos and from that position He shines His light on the universes, galaxies, stars and solar systems. We have to be standing in the right direction to see His light, but I am sure we also have to be able to see through the dimension of Energy. Today he extended this further to that every object in Creation has two types of light shining on it. For example, Man has two lights shining on him one is the local light that shows our physical D and the other is in the field strength of the Creator. The Creator's light is seen by the U. The STM also has two lights shining on it. When we reach the level of the U then we'll see the light of the STM, which is not a physical light. It comes from the interaction of the Soul with the CR. This light shows the strength of the emotions and the Truth. It's like in P when the light shines on one side and the back side is a shadow. The two different lights comes from the natural interaction of the fields of any M system.

When he talked about the massive war taking shape for the last time, there was less fear than usual. Maybe because after today's teaching it is more clear about our position in the U as humans and that the process of purification is needed for us to finally enter the Universal Community. And that the ruling elite are not interested in peacefully bringing about the change through accepting the plasma technology. Very soon they will bring about their own destruction and out of those ashes the Phoenix of the New Technology will rise in the name of KF, and the emotions of the love and care that were created through the unique field interactions will be established on Earth and then spread through the Universe. "The reason we know is because we have set it to be so." Up until now humans could only understand these things as prophecies being shrouded in mysticism and not really knowing if they are true or not. And the Globalists have copied this method by planning certain actions decades in advance and then planting things in the media and when we see it happening 30 years later then we become afraid. This is what they have done with the April 12, 2025 prediction and Mr. Keshe said to watch and see what happens. They want to show us they have the power over us through fear. Whereas, the Messengers have prepared the change through love and it will bring world peace through the release of the new Plasma Technology. This is what the difference is.

He gave us a little more clarity about the upcoming changes. In regards to the Messengers that what they plan they carry out. And the implication was that they planned the manifestation of the Soul of the Prophet Moses in the morning, Jesus at noon, and Mohammad in the evening. It was the same Soul but dressed in different clothes. And the same is for the upcoming changes that are about to take place. They have been making the arrangements for thousands of years and now is the time of fruition.

The near death experience (NDE) and what happens at death was discussed further. The NDE is like making a video on a train while it is moving and then replaying while the train is still moving in the same direction and D. So in other words in a NDE nothing has changed yet, you are still in the same parameters of your life, all you are doing is replaying your own life experiences that were recorded on your RNA. You are still in your own dimension and the light people say they see are the CR interacting with the Souls. But once the STP gets embedded in the STM then there is no coming back to physical life. It's over, you are on your way to the next destination and it doesn't matter how they try to revive the P. All the memories of being a human are embedded and recorded in the STM and the Soul can carry that behavior into the U and get re-manifested somewhere. In the past teachings he told us that some Souls from Earth did actually bring killing to another planet. This is why they have come here to correct the problem at its root. When people change their life after a NDE it can be due to different reasons, one of which is that they actually learned something and it changed them.

He said, visual knowledge can never be repeated. I think he means that all the conditions and field strengths have changed, however slightly, and that's why it cannot be repeated. It's like they say, you can never step into the same river twice. However, recorded knowledge is different because it is an energy and when you replay it you are making a copy of the original energy. It's like having a master copy and then recording many videos from that same master.

It's important we understand why the concept of saying that the Speed of Light is the maximum speed for the whole U is wrong. It is creating many problems for scientists to accept the Plasma Science. There is a new image from Space going around and they are saying these images are millions of light-years old or whatever. A KS asked Mr. Keshe, then what are we seeing in the telescopes, didn't this light begin in the past? The answer is not so easy to understand and the reason is because there are a lot of things that have to be explained first about time and space that we don't understand yet. There are two dimensions of light, one is in the D of Energy and the other in the D of physicality. The truth about the Speed of Light is that it depends on the field strength of the light. And this is why it is wrong to say that the Speed of Light is the maximum speed in the U. This cannot be because each light has different field strengths and therefore different speeds. And then he said that your light is invisible to me and my light is invisible to you. Therefore, light is relative to the field strength and maybe other factors we don't know about. The fact is, we cannot look back into time, we can only look into time as it is now, and that's the difference. Compare this answer to that given to a questioner who read on the Internet, that the past and future are illusions and not real. Mr. Keshe did not answer the question directly, instead he wanted the KS to think about it themselves. He did say, that if the past and future are illusion, then we are illusion too. But what does this "we" refer to? Does it refer to the thoughts and concepts we make up in our minds, or to the Energy essence that comes from the Creator? The light we see may be instant, and then we project our thoughts onto it and think that it got started millions of years before.

Soon we'll have systems that can track where the Soul goes during sleep. From this some KS got worried that others could track our Soul during sleep and do something to us. He

said very clearly, that this T cannot be abused so you have nothing to worry about. And the question about whether praying for the dead helps them was left for us to decide. But the point seemed to be what kind of field strength you can create to give them, or is it just religious hypocrisy? Not only the love we learn on Earth goes with us into the U, but when we are walking around Earth the fields of love we experience is at the same time being shared with the U. That was in another part of the teaching. Then there was a long explanation about how we are connected to everything like a family tree, and we have access to all the experiences of humans on Earth through the plasmatic RNA. And it's the same with Creation if we find the "red dot" in the graph that connects to the Creator then we'll have access to everything that was ever experienced in the Totality of Creation, because that is recorded and sits with the Soul of the Creator. This is all done through the STM and not the P. Once we make a connection with another Soul that remains forever and cannot be broken, but what we do with that connection depends on our relationship with that Soul. But it has to be a mutual agreement if both Souls want to continue to interacting with each other.

Other Topics:

There are orphans in Space that have never experienced and don't know what the love of parents mean;

When people talk about seeing the light in their Near Death Experience it's really the light of the CR interacting with STM and STP;

Loving the Creator is a "drug" that has its own addiction. Once you learn it, it brings a lot of peace and you don't need drugs or alcohol. It makes you "drunk" on its own;

Mr. Keshe knows his destination after leaving Earth;

Thanks for listening.

Quick Index

(Each time we understand ourselves a little bit more about how us as an energy system we live within another structure. We are a piece in the jigsaw puzzle of Creation. In Creation we are the only plasmatic system which is portable and can make its own decisions. The rest of the structures in the Universe (U) are set and dictated by (?? the interaction with the fields of) the others. In Creation we have the U with all the galaxies, and inside the galaxies all the Solar system (SS) and they create planets. These are all created by interaction of the fields over time. How they are created is fixed. This means none of these entities ?? all the way down to the planets of the SS have a control over itself. They are created by a fixed pattern of the magnetic (M) field interactions. Each one of them has its own central plasma, which fixes everything else to it. They can rotate, but they cannot jump and it's (all fixed and setup by interaction of the fields)).

(Down through the line of Creation came the Soul of the Man (STM), which is controlled by the emotion of the Man. (It's not just the Man, there are ?? other systems like the Man in the U. These created entities in the U don't follow the (normal) pattern and they create chaos). (?? The problem with this is that the structure of the Central Line of the Universe cannot change conditions rapidly. It's the same with the structure of the galaxies or stars. They cannot avoid each other, (because they have set fields interactions that they have to follow)).

(Man doesn't follow the same principle of motion as the others, because he was given something else, what is called the Spirit, or the Soul of Physicality (STP), and that is what dictates its motion and manifestation of its physicality (P) as an entity. The stars, galaxies, and universes don't cry, kick, or fall in love. (?? In the center of every living being is a plasma whether it is the Man, plant, animal, another creature in the U they all have that possibility). (Does he mean they all have the possibility of having a STP like the Man?) They don't follow the rules of what we call, fixed motion. At the moment, this is where the Man sees himself as different. He has not managed to understand that he is connected to everything. He sees himself as a separate entity. He sees himself as on his own and he has made himself the king of this planet and the rest of it). (This paragraph has to be clarified by Mr. Keshe later)).

(If Man comes to understand and values his own energy center, which is the STM and that it has a common denominator with all the celestial objects, whether it is the Unicos, U, galaxies, stars, or planets, then he'll come to understand that he is an oddity. (?? And that he has two dimensions (D) of life as the STM and ?? P). His STM is free to move as it likes. It can jump in air, fly in the sky, swim, eat, sleep and whatever, and all the time it is continuously interacting with the totality of the fields of the U. (?? It's not limited to just being born and to exist (?? in a very limited movement like other beings). Last week we taught you that Man is the only creature that can move 180 degrees in all dimensions. And that these interactions of different fields gives it intelligence. We interact with the fields of our own emotion, our own STP, and our own STM. In addition, when we make these motions of jumping, eating, sleeping, and whatever we do, (during that time) we continuously interact with the fields of the Unicos, and U through Cosmic Rays (CR), or what we call, rays that are created through the interaction of the fields of the Creator. ?? These rays can be added, separated, divided, come together and the rest of it). (It's interesting to think about, because if we put an animal in an airplane then we expose it to more fields, and what does that do to it?))

(Very soon we'll release a paper that will change the course of humanity. It will be called, The Cosmic Ray and the Work of the Universe. ?? It will be about the origin of Cosmic Rays and how they create the conditions (?? for life). We'll go into it in a much deeper way and confirm the existence of CR. You as Knowledge Seekers (KS) (have had the knowledge) without you knowing it. (?? It will bring things into focus). It will be one of the most fundamental papers since the paper on the Creation of Black Holes. It will be the opening to the knowledge of the new science. (It's already been there, but we never understood it, and then we made a lot of fallacies around it. The same way they made a lot of fallacies around the Black Hole. This paper will be one of the most fundamental

scientific papers ever written and it will change the course of humanity at the level of science and with it, it will bring lasting peace).

(?? What Man now understands as cosmic ray, (or what he calls neutrinos), there is something there, a radiation or something and he tries to measure it in the deep mines, and the rest of it. But we never considered that our own Soul is a plasma and it is like the center of the SS, the Sun. Our Soul receives and interacts with these Cosmic Rays. This is where 80% of our daily energy needed to live comes from. Our biggest mistake is that we think the only energy we use comes from our food, and the plants and animals we eat).

(We need to understand that the Soul consumes energy and needs connection to get rid of its surplus energy just like the P does. The physical body uses kidneys, bladder, intestines to take in and get rid of energy. Because the Soul has high energy levels it (makes the connections through MG fields using the CR). The CR are our connection with the rest of the U and without them we cannot exist through receiving energies and get rid of what we don't need. This part does not come from the animals we consume and the rest of it. The STP of the man connects the fields of the planet with the P of the man at the level of energy. While the STM connects us to the whole of the U. ?? Because of this manifestation it carries the Inertia matter state emotion).

(Because the STP & STM dictate by emotion, when the Soul becomes part of the structure of the U it transfers this emotion across the U. This is why we have to take the essence of killing out of the man as he has only been in existence for a few milliseconds in the life of the U. It's a bad 'seed' that has to be corrected. And when it's cleaned up and looked after it will become the most beautiful seed in the U, and become the essence of knowledge and emotion, and he will bring the love of Mitra to the Creator. (We never have seen in the rest of Creation from the galaxies downwards a Being that showed emotion to the Creator. No Being ever showed the Creator how he feels. (?? This will bring the emotion into part of the structure of the Creation (all the way) to the Creator). It does not need the D of physicality, all it needs is a dimension of fields).

(God became emotional when he got in touch with the human race. Otherwise, all the other things He created are simple and mechanical. (They are ?? from the interaction of the fields and they can create. When God created Man he didn't figure that He would get touched by the emotion. In Man's language, emotion is Mitra). (?? When you build an engine, or a computer you do it mechanically, ?? you don't figure that a few Microchips are going to start talking to you and then enlighten you). This is the part the Creator never took into account. (?? This is the factor in the total physicality of Creation of the U that the Creator never considered. ?? It happened when the field strength traveling across the U started lowering to certain levels and in time the emotion came out. This emotion we call Mitra, or the love, or the giving. We'll learn this when we come across the World of Science of the Universe).)

(The Cosmic Rays led to the creation of physicality but at a lower strength. By lowering the field strength is how all the galaxies, SS, and planets like Earth were created. The lower strength created the dynamic plasma we call, the cell of the Man. (Even though we

can touch it, its P was created through the interaction of higher order fields. ?? The STM is the outcome of these higher order fields and ?? it developed emotions. Then these emotions of the STM touched the Creator). ?? The emotions are the "apple of Eve" that changed the system. In the Bible's Creation story Adam is really the Creator, and Eve is Mitra, and the apple is the emotion that the Creator never understood, or expected to be created. This is why the Creator loves planet Earth, because He brought (this factor of love into it)).

(In my work and teachings with KF we explained how Microchips can be made to have emotions. This is about to come into industrial world. The Microchips they make now are faster but they don't have emotion. (Now that we understand that emotion is a field strength we can build it into the Microchips and make it a dynamic structure. We can create (computers) with emotion. We can make AI (Artificial Intelligence) with emotion, and it won't just come up with mechanical answers anymore. This is the same trap the Creator got Himself into. (?? Before He was only creating mechanical Beings that were only systematic. He created the galaxies and SS mechanically. He didn't calculate that somewhere along the line the M field strength would interact and create emotions. (Now these emotions have touched the Creator)).

(Love is part of the beauty of this planet and it comes as the emotion of giving. The Prophets of the past could not explain this, so we hid it in the story of Adam and Eve, the apple and the rest of it. The Creator then had a "bit" of that apple and this is where we stand. (But the problem is the emotions created are not perfect and this is why we came here to correct it. When this emotion becomes pure and only goes down the line of giving to others, and stops killing the Earth will become a beautiful planet, and the U will also become beautiful. Would (?? Man's love) feed His emotion, and would this strength field given as a gift by Man to the U bring a change in the planetary system? Would our Suns be able to cry? Would our Galaxy understand the interaction of the fields with emotion? Would our Creator who, having been touched by these fields and the interaction of the lower dynamic systems called love and caring, would they become part of His (?? fields), because He is the Source of these fields?)

(This is why we said that God has thousands of emotions that we don't know about. He has had time to perfect them across the U. But now He has to show the U where they came from. (?? The seed of the love and care that comes from Man He wants to promote for the whole U to have. (?? This beauty of loving and caring comes from understanding the Totality. (?? This came about in us as a Being in the physical body of this planet, and it came through the structure of the tilt of the planet, and the mixture of materials on Earth have come together coincidentally and has led to the creation of a structure we call amino acid (AA). ?? Within the AA and through its interactions it has led to creation of emotion)).

(Soon Man will understand what role the emotion plays when he become a 'Man of the U.' We don't see emotion so commonly across other creatures of the U. Everything is systematic, but it has intelligence. For thousands of years Man has introduced the D of emotion. But this is only a fraction of a second in Universal Time. This is why we have to

eradicate the essence of killing from within the Man, (so that Man can become part of the structure of the U and Unicos). ?? Man was created from the CR and they can (sustain his life without killing through their energy. Man will then become a symbol of always giving and understanding love. The Creator got touched by what he created, but He wasn't expecting it)).

(Mankind has no choice. (We made him to walk, think, and evolve, and in this process of evolution he learned a lot so that he can even challenge the Creator with his emotion. (?? Man brought as a structure of dynamic plasma (the ability to control and decide how to live. He can decide where to go, whether to show love or anger, to show beauty and whatever else. ?? He brought all of this to the Creator. When Man understands this he will become the creator of emotion ?? for the rest of Creation. (This is a very influential position to have in the U). When we travel in Space and come across Beings who are what I call, orphans, we see that they don't know what the love of a mother and father mean because they never experienced it. It doesn't exist for them. When they see parents cuddling their children, they won't feel any emotion for it because nobody ever cuddled them. Now humanity has cuddled the emotion of the Creator with the emotion of love)).

(This is not something new, we taught you this from the very beginning, even in the Health Teachings we always referred to the emotions. Every time the scientific side of T of the creation of the P was presented, we presented the Universal Science and always told about the emotion. It's the emotion that separates Man from the rest of the structures of the U. The stars don't cry, kiss and cuddle. The stars don't generate purposely at a particular time and place. (?? The process was set (for) the interactions to lead to (the creation of) Man, and coincidentally through the tilt of this planet and its position the emotion was created). We will realize this when we meet other created things in the U. The emotion, especially in level of the love of the Man, is an exclusivity and beauty of this planet).

(When we start traveling we'll teach emotion to the other created things and we'll touch the Universe. (Love only comes to those races who have had contact with the Man in past times and they built it into their systems. It's like we say on Earth our origins came from Central East Africa. When we travel the U they will say the emotion of love and caring comes from planet Earth. It's the way the structure is set and sits. We are part of the Universal structure. (?? In a way, when we say that we teach for the whole U it's through the D of emotion of the information, and ?? the Man created that and gave it to the U)).

(Before Man can be allowed to freely travel the U the 'thorns on the rose' have to first be removed. The Creator says that he cannot take a beautiful flower out into the U when it has such a thorn as killing attached to it. Mr. Keshe removes the thorns before he gives roses to his beloved, because he doesn't want them to experience the fear of being hurt by the thorns. This is the work of the Creator).

(We need to understand and bring in (?? that we were created out of CR and in essence through them we are connected with the rest of the U. The food we consume connects us to this planet. (?? As we are walking around the planet and showing our love and care, at

the same time, through the CR it transfers (the fields) of that love and care to the rest of the U. We have become the seed of love for the U without knowing it. (And we even create an emotion for the Creator to understand what (His Creation) needs. Otherwise, the structure of the U is only a mechanical system. It's the interaction of CR and if they interact in certain ways it will lead to the creation of galaxies, and in other ways to SS. If they interact in certain ways within themselves, they create stars of themselves (with planets and Moons). (And in the case of the Earth they happened to create the emotion of love)).

(When we understand this we'll become part of the structure of the 'neuro system' of the U. But first this rose has to be cleaned of its thorns, and that time is near. We will see a massive war taking shape for the last time and it will clean up this planet and bring all (the bad things) to an end, and a new beginning will start. The 'Phoenix will rise' through the love and caring of Man. The knowledge we brought in the name of the KF will be that peace. It will rise like the Phoenix out of the ashes. This will be the last time Man attempts to be influenced by killing. Soon you will understand when the whole structure comes into operation. It's not a long time to wait, it will be very soon. You will see the end of (the old) and the beginning of a new life).

(The paper we'll publish in the next few days called, the Cosmic Rays will show the path and direction and bring the change humanity needs to go through. Our values for things will change and gold will mean nothing. Instead, we'll value the emotion we carry within us that super-passes and connects us directly to the Creator. This is the time when Mitra ?? will touch the Creator, and the love of the Creation will change the U and Unicos. These are not dreams or philosophical talks. Soon you'll understand because you have been seeing it step by step. Now we will see the end of (the old), and the Phoenix of Peace will rise, and love will emerge amongst Man after the final dust settles. This will be in a short time. You may ask, how do we know? Because we have set it to be so).

(Prior to the birth of the Man everything else in the U has been a mechanical system, it's like (Creation comes out of a computer structure process of interaction of the fields. (?? The M fields which has led to our creation has also created the emotions)). Maybe now those who hear this will understand. (In the past teachings we said the rays of the Creator shine on the galaxies. If we are standing in the right direction we'll see the light of the Creator. And the lights of the center of the galaxy shines on the stars. There are types of lights and the physical light is of the local source, and the CR (light comes) from the Creator. (These two types of light shine on every object. The STM which is like the Sun also has two lights shining on it. One is from the D of the field strength of the Creator, which is seen by the U. And the other is from the physicality of the Man, which (shows our physical dimension)).

(When you become educated to understand the level of the fields of the U, then you will see the light of the STM, and not the P. This light comes from the interaction of the CR at the strength of the interaction with the STM. This light shows you the strength of the emotion of the Man, and the Truth. It's like when the Sun shines on you to see your beauty and on the back side there's dark shadow. We carry two lights, one is the light of

the environment, and ?? the other is (the light of the Creator) that shines on you. It's the same with the STM, every Sun, and every Galaxy. We see two different dimensions of light, which comes from the natural interaction of the fields of any M system).

(?? When we travel the U we'll look for the light that shows the truth about the Souls we'll meet. We'll look for how the Soul shines in interaction with the fields of the U. We'll see this light as an observer. We always thought that the daylight comes only from the Sun. That's the physical D of what created us. But at the same time there is the light of the STM that comes from the interaction of the fields of the Unicos through the Cosmic Rays and they shine on us and interact with our Soul).

(Many times we hear about people who went through a Near Death Experience (NDE) and they say they saw and went through a light. This is the light that they see. The CR interact with the STP and STM and it creates that light. ?? That light has been feeding us all the time, but because we look through the eye of P we never see it. When we come into the D of the STP as a plasma, we see that interaction, because we interact with it and are part of it). (The light of the Soul interacts with the CR and some of these could be directly from the Source, or the Creator. By the law of physics of the plasma that Source has to have a feedback. (?? Our Soul has emotion ?? and it has been shown to the Creator, ?? as Mitra and the "apple." In the Bible story Adam is the Creator, because in those days Man could not understand anything more)).

(If the World of Science fully understands this knowledge, that the light of the Soul interacts with the fields of the U as Cosmic Rays, then Man will be enlightened to the knowledge of the Universe instantaneously. Because then (we can interact with Energy) and not the P of Creation. All we do now is interact with the P. This is why we can travel the span of the U instantaneously. In P a Spaceship takes 10,000 light-years or whatever. It's us who chose this physical path. Or we can learn about the light of the Soul and how and where it shines from, then we can travel the U instantly through Cosmic Rays).

(Many KS have done this in the Monthly Flight sessions. And when you came to Linz and went through the system you didn't dream, you actually traveled and made a journey on this light. It's the lack of trust and understanding about the Creation of the central STM, that has led Man to deny his own existence, emotion, and beauty. I made Man in the image of Myself, in the dimension of interaction of the fields, but Man made My image with the D and interaction of the emotion. Now you understand that changing positions through bending over, getting up and laying down has brought intelligence to the Man through the field interactions and diversity of life on this planet. It has brought the same changes to the STM and its interaction with the U. Man looked at his physicality, and the Soul looked at its position and emotion, and its Totality in the work of the Universe).

(If Man understands this and detaches himself from P, but still can enjoy it, and the emotion of love, then there shall be no war. Man will not even think about it. In the past times (and now), Mankind has had many encounters with the 'Passengers of the U.' They don't come here for the water or rare Earth materials. They come here to be touched with

the emotion of love, which Man possesses. We can make journeys that take months just to get to our lover and taste the D of the fields of the emotion of being together. We can travel this planet going to other countries to feel what love means. And then when we go back home we talk about the beauty we saw and experienced. The Passengers of the U come to Earth to learn about the emotion of love and giving unconditionally. This is what Man translates as loving. It's crucial for Man to understand this, that when he gives a rose of love to his lover, there should be no thorns of killing in it, that could hurt others, or change their life and dimension. I made Man in the image of Myself, but Man showed Me the image of love. One gave, one learned, one took, and (they all enjoyed)).

(If We understand this, then we have leaped into the D of becoming Universal Travelers, and then we'll become the ambassadors of love and peace, and not killing and power. This period of killing and having power over others was part of the growing up process and for Man to understand the Totality of his emotions. Try to understand this, and look through the STP for the light of the STM (through the D of Cosmic Rays). And if you find (that specific light, you will know that it directly connects you to the Creator. That's the way He shines. And He shines in all). Understand today's teaching and then you'll understand that what we brought you will change the Man in the coming months. I hope you understood the purpose of Man in this Universe and why he is so precious).

End of Quick Index Part 1 - 583 KSW

(Mr. Keshe explains one of the graphs and annotates on the screen. You will have to watch it to understand. They can detect the Souls. The yellow line is the STM, the green line is the collective energy of the P, or the Spirit, or STP. The yellow line connects to and interacts with the Universal energies, or CR. The green line interacts with the physical D and the ?? CR of the fields of this planet, and what made the Man).

(One of those dots is the light that connects you to your Creator. We receive one of these dots through CR and it's directly connected from the Source. The rest are the Soul of the grandma, uncle, another creature in the U ?? who are at a further depth in respect to us. The ones with a ?? brighter light are closer to us. These others are at a field strength we can interact with, receive energy from, and other things).

(Now you understand that He never leaves you alone. It's the Ayatollahs, Mullahs, Rabbis, Priests and others who abuse you in the name of religions and they want to cut this line that connects you to the Creator, (or make you think it doesn't exist so they can abuse you). In future research and development they will find out which one of these dots are to the Creator. Because it interacts with the field strength of your Soul, with the atmosphere of it. (The light is different than the physical light and it's the one that comes from the ?? interaction of the Soul with the P). (It will take a huge amount of work for the Man to find that light, and it will keep him so busy he will forget about killing. Then you'll find the 'promised light.' And when you have that light, do you need religions, or Ayatollahs and the rest to abuse you? They are all the thieves of the STM. Mr. Keshe can show us that light to the Creator, and after thousands of years of research they will say, how did he know which one it was?))

(Now you understand how in-depth these teachings are and nothing is coincidental. The dots you see on the lower side are the lights of your organs and different cells of your body. And on the upper side is the connection of you with the U in interaction with the CR. And one of these dots connects to your Creator and it doesn't need any intermediaries. It enlightens you and shines equal on all. Another dot is the grandma, because you have (?? the same DNA and are therefore connected so it's very easy to find. Your Creator is never far away, not even a millimeter, because He feeds you, and you teach Him the essence of love and giving. I hope you take from today's teaching what your life in Space (will be like as we endeavor to get you to travel across the span of the U)).

Q: In past teachings, it was said, that there is no question of the return of the Messiah, because we are our own Messiah. So, why are the prophetic events in the scriptures happening? In that case, are the scriptures an agenda of those people, who are causing problems for humanity in the background?

K- (Mr. Keshe answers by talking about one of those predictions they made on social media for April 12th 2025. In it they show a cartoon from decades ago where they predicted on April 12, 2025 something would happen to the President of the United States and the man in the cartoon looks very similar to Trump. So if it comes true does it mean they knew, or was it planned? Are the Globalists and those who want to control the physicality trying to tell us they have the power to do these things? And that they can create conditions to get us to believe (in a reality they create)?)

(It comes down to our perceptions of what we know, and what we understand. Not what was made for us to believe in, because it was planned before, and they had somebody predict it. (?? One of the dots on the graph could be a Soul that was here on Earth before and knew some things and wrote it down for the future. And then people try to connect something to it. Or they use AI to ?? decipher what somebody wrote and they interpret what it means and then make it public)).

(?? In regards to the Messengers, in essence what we plan we also carry out. So if I say I will meet you tomorrow morning for breakfast, and then again for dinner, I planned it to be so. This is the way these predictions work in the life cycle of Man. It's the same (Soul) who decides where and how he will manifest as different people, at different times. In the morning for breakfast it was Moses, in the afternoon it was Jesus, and at midnight you had a fun with Muhammad. But it was always the same Soul, who dressed as different people, at different venues. Once you understand this, then you'll understand there are no predictions, because it was set up to be. All the arrangements are made to be there, so it's not a prediction. In the language of the Man we use words, but in the D of Souls we use Energy and information).

(A lot of predictions are made by those who (have the connections through the line of dots, or lights you see on the graph. But it takes wisdom to understand and not be fooled by the magic of it. The biggest magic that baffled Man is the name of the religions.

Because Man wanted to be baffled, even he knows that in the background it's all lies. One of these dots on the graph is the light of the Creator interacting with the Soul of all of you, and everyone of you can get enlightened from it. Soon you'll understand. When you are part of the magic, then you are not a magician, but you know what is to come. Watch the April 12th prediction, and if it comes true then we'll see, what is sitting next to it. Don't forget next Tuesday is April 1st, or April Fool's Day. Don't get fooled by it for the 12th day of April).

Q: Is it free will that an individual can decide to be good, act good and speak good every moment, which will connect us back to the Creator in us? Is it so simple?

K- Yes. (He created us to teach Him, and we taught Him. It's like with our children we teach them as they grow and one day they mature and start teaching us. I think we're in that position with our Creator in respect to emotions. This is why everything is connected to each other (and it has a feedback loop through the G and M fields). What is M to you, is G to me, because I take from what you don't need. He created us and we fed back love to Him, and we changed Him. And the fruit of that is the 'Daughter of Mitra.' Soon you'll understand the change, love and respect her).

Q: In one of the teachings you said, God has no emotion, so I understood that to transmute we need to cancel our emotion. Further on trying, I started to cancel out every entering image, every sound, and I even neutralized the image of nothing. It was difficult, but I've reached it twice. All of a sudden the difficulty subsided and I had the feeling of an acceleration to a point. Then I felt on the top of my head literally open like a tap. It felt like water trickling through, but stronger and stronger. And then the pressure around my brain grew exponentially, and I had to let go. So, does heart medication or cigarettes cause this? Which drugs cause this?

K- (No, it's called the drug of loving the Creator and it's got it's own addiction. There is nothing you can do about it. Once you learn it, you get addicted to it, and getting addicted to it brings you a lot of peace. You don't need drugs or alcohol. It makes you drunk on its own. We spoke about the structure of drugs before and why some are so addictive, and others affect the emotion, and some effect our Soul, and others effect the creation of our Soul).

KF is taking a bigger look at this now. For the first time in the world of Science we can identify the Soul of Beautiful People (Schizophrenic) in our system. We see the behavior (of each individual Soul sharing the body). He goes on to describe the graph of a Beautiful Person and the multiply Souls inside a single body are shown on the graph. This changes the Worlds of Science, psychology, and psychiatric conditions).

(I'm sure the world of science will soon tell us, which one of the dots on the graph is the Sun of the Creator which shines upon our Soul. I would like Ayatollah Khamenei of Iran to explain this to us, or the Pope, or the two Rabbis of Jerusalem. Your time is over. You've stolen enough. In the coming time we'll share the knowledge, and then you'll understand).

Q: (There was a long question about some documentary programs on Iranian TV going into details about Near Death Experiences (NDE). She asks Mr. Keshe if there is any truth in it.)

K- (It's like making a journey sitting on a train and your child makes a video of it while the train is still going the same D and direction, and then you replay the video. This is exactly what happens to us at the point of death. We have access to the emotion of consciousness and it takes us back to the things we've done in our life. (?? When the Soul goes it does not carry those with it, ?? but it understands the pitfalls and everything else, but it cannot be erased. When the STM leaves the body it does not erase all the memories of being a Man. That's for sure. (They are embedded in the Soul). (For example, the memories of killing gets embedded in the Soul and brings that behavior into the U. If that were not the case, then there would be no need for us to be here teaching the Man to stop killing and to live the correct way)).

(Once the STP gets embedded into the STM there is no return to physical life. You die and it doesn't matter what they do to your P to try to revive it. Once its been encapsulated (with) its field strength, then the whole structure changes. (?? You can remember as packages (?? what happened while they are joining ?? together. You might get memories. These NDE changes peoples lives, but that can be for different reasons. Maybe they came to understand (the cause of their own behavior)). The famous novel by Charles Dickens called, Scrooge, captures this very nicely. This happened to Alfred Nobel who manufactured dynamite. He went through a life changing situation and created the Nobel Peace Prize. This is a feature of the Man. ?? At death we see everything because it's been recorded).

(The red dot on the graph that is connected to the Creator has seen and recorded all the good and bad things of the U, as He has been everywhere. Visual knowledge can never be repeated, but recorded knowledge is energy and it can be repeated or replayed).

K- (On social media they show some videos of the energy leaving the body for the head at the point of death during an accident. It has a specific bandwidth. When that happens there is no return to the body).

(Soon we'll be able to track where your Soul goes when the physicality is asleep. Nobody has this knowledge except the KF and people outside cannot even believe such a thing exists. You KS sit here being very polite and listening and you don't say, Mr. Keshe is crazy. This will become the foundation in the world of science, psychology, and psychiatric processes. We can put you in the system and follow you where you go when you're dreaming. We go with you where the two interacts, and you take the path of seeing things. When you come back you say you had a dream. We'll be able to follow who you met and at what strength you met them and what you did. This on the screen is one of the biggest scientific breakthroughs in the world of the understanding of the Energy of the Man. But to you KS who have been in the teachings it's just another thing Mr. Keshe shows).

(When we go into the T Man will be so busy that there will be no time to create war. Now it's a science (and they can't call it fake anymore. Sooner or later these systems will be offered internationally to companies like Philips International, and the others to develop for psychological patterns). (With this knowledge you won't have to lock the Souls of Beautiful People up in mental hospitals). You will find a solution about how to handle each individual (Soul)).

Q: (?? These saints say that the people praying for you after you die is a big help). How can we explain this?

K- (They can explain it in any shape or form. Or we can read into it anything we like. (You will have to read it yourself to understand what he is saying. If we truly transfer energy then maybe it is something, otherwise just religious hypocrisy)).

(He tells about a boy who was sentenced to die within a few weeks by the doctors and he surrendered to it in a beautiful way. He speaks with no regrets and he still lives a normal life by the look of it. Compare that to people in their 90s who cry for one more day. We are try to understand the process going on in the brain of the boy. As an old song says, I sing and laugh that you don't see the sorrows in me. Humans have become very good at covering things up. These sorrows are an emotion that affects the STM and how we connect to our existence. There are no intermediaries between the STP, STM, consciousness, and the emotion, nobody can interfere).

Q: Will the love we learn here be taken into the U through the interactions of the STM with the STP?

K- Yes.

Q: Is the Soul of happiness important for taking love to the Universe, with the STM?

K- (You don't have a choice, it goes with you. It's part of the package of transmutation).

Q: It seems that intelligence and experience are acquired through learning after birth, but there is also natural wisdom. Though it feels somewhat intangible, it's more like it has been instilled. In certain books written by human hands, they say they (are channeling other) Cosmic civilizations. (I only know about how our genes have been passed down through generations and carry within them some forms of innate experience). Can you expand on this?

K- (The answer is too complicated for me to understand, so please read it yourself. I will give you a summary of what I understood. Basically he is explaining how we are connected to everything and the Soul has access to all of this information. So if somebody says they channel information from other civilizations, then you will know that this information is already a part of the Soul of the Creator and we can all access it. It's like looking at a family tree and seeing all the thousands of people we are related to.

Eventually it gets too big that we can't put our mind around it. Now do the same thing for the Creator of our Unicos, then it becomes almost infinite, and quite simply this is how we are connected to everything. And for us as humans we carry all the information of this planet in our RNA and that manifests as DNA. All of our direct ancestors are recorded in our DNA. All of the billions of experiences that were witnessed are recorded there, but we only see the ones we want to connect to. So we can go back to our great-great grandfather and see what he ate and did in his life. All of it is recorded. With this understanding we can think of the red dot that is connected to the Creator, then we can have access to all of Creation through the D of the Soul. We will have access to all the knowledge and information of the U instantaneously. If we find this red dot, then we have found the key to the knowledge of the U, and to the Unicos. ?? We don't access this information all the time, otherwise, we would have nothing left to do).

Q: As love belongs solely to Earth, can the same be said for death? And if so, doesn't the fear of losing someone close, lead to love? And do other races like each other, or do they have feelings of fondness or friendship?

K- (Emotion is part of the structure of the Universe and that cannot be changed. When the aliens came to Earth a long time ago they had a problem to understand why humans kiss and hug each other, and what it meant. But the second generation had no problems at all with it. Because, it's just the fields in your structure of creation that you need to trigger. Even a star has emotion, let alone a galaxy. You need to have a Soul to have emotion). (I understood him to mean that emotions always existed in the U, but not quite the way they are expressed on Earth)).

(KF just launched a new product called, 'Keshe Gans Butterfly' phone holder. It changes the whole D of the fields of 5G, and whatever (else) interferes. These are two-sided Butterflies that are embedded into the structure and they hold the energy back. There is something about two Star Formations that pulls all the energies between the two)).

Q: My cat just died half an hour ago. Is her Soul leaving me now too, or will it stay for a while?

K- (It all depends what its final destination is. But we never lose contact or connection. How the connection will stay depends on what the relationship is between you two. (Once the connection is established it is impossible to separate it, ?? but it depends how much connection you want to have)).

Q: (If the T can track us in our dreams, can others do things to us while we are dreaming?)

K- (You cannot abuse this technology because it's part of the structure. The Knowledge of Creation cannot be abused. You have nothing to worry about).

(For tomorrows Flight session write down on paper where you want to go and what you want to do. The purpose of the transmutation is for you to take yourself to the place

you've written down. And you can think of the food you want to eat, etc. This time please don't choose Christ. We'll come to him after Passover and Easter).

Q: There is a popular spirituality thread nowadays, which claims that our human experience of the past and future, actually are fake and do not exist. There is only here and now which exists, as presented to us by our consciousness, which proves we are one with everything, and outside of time in eternal now. Is it true?

K- (I would like you to answer it yourself. Did you appear suddenly out of nowhere? And that there was no yesterday, and a few years ago there was no mom and dad that you were created out of? If that is fake, then you are fake too. (What you do today creates the conditions of what you will (experience) tomorrow. (Is this true or not?) (You see there are a lot of these things going on). A lot of people buy time on the Internet to make money out of it, and they say a lot rubbish (to get you to react and give them more views). Ask yourself a simple question. Am I here, or am I an illusion? Did I have a dad? How did I get here? Did I have a brother or sister? Am I planning to travel to Paris next week, and will I be there to see it? So, is there a future? Was there no past? Then you have answered yourself).

Q: You said something about that, you will eventually leave us and Earth. I hope it's not impertinent to ask, but can you tell us where you're going? I guess for a long vacation.

K- Ooh. Go and ask the boss.

(I was telling some KS recently, that I am going to be 67, 68 soon. I work much harder and longer now, than when I was 30. My mother used to tell me, that I work like 5 or 6 people and I never stop. If my mother were here, I would say that I'm working like a thousand people now and I can't stop. There's not enough time. There are always reasons and connections to move onward. The teaching does not end with the Man. This is just a cycle. It's fortunate or unfortunate. But I know my destination).

Universal Council wish is that everyone elevates and learns to add their energy to the Planetary Peace and prosperity.

K- (We are still looking for experts to help the KF who have experience in advanced IT, Social Media management, Space and Energy, and Communications. You'll understand the reason for it by what we'll announce in the future).

Q: (About some new images scientists have come up with that shows the U. It was never clearly shown or explained).

(Mr. Keshe says different things like about the Flat Earth discussion. Is what we see real or is it like a dome giving us a reflection of the lights in the background and we believe what we see? Some say the pyramids have posts hundreds of meters into the Earth and there are future technologies and the rest of it. One thing for sure, Man has never been alone on this planet. Those with advanced T have more or less visited all the stars and

planets through understanding the work of Cosmic Rays. Curiosity is not just the Man's, it belongs to all Beings in the U. If the birds could fly between planets they would have done so).

K- (About the new images they claim you can look back into time, because they say it started millions of light-years ago. Mr. Keshe said, you can't look back into time, you only can look into time as it is now, and that's the difference. (These theories are made up by so called scientists and then the others blindly 'jump on the bandwagon' and because they shout louder the others think it is real)).

(In the paper we'll publish soon on Cosmic Rays, we'll literally debunk the whole concept of the 'Big Bang.' That the only Big Bang happened was in the head of the guy who came up with it, and then the rest accepted it. That's all that is to it. Same thing happened with the guy who said all the oil comes from dinosaurs bones. (It was all a big 'sell job.') Now we know we can produce as much oil as we want from the (interaction of the M fields). In this new paper about Cosmic Rays, for the first time we will ?? show physically products of Cosmic Rays and everything else. If we can do that, then the Big Bang theory is all rubbish. It's the same as when I clarified about the Black Holes. (People only look at the matter state, but we are looking at the Energy or plasma state. (The CR produce plasmas, then the knowledge will change accordingly)).

R: So the people who are looking through telescopes they are only seeing the physical part. They see the speed of light in the physical state?

K- Yes, it's physical.

R: (Isn't the speed of light something that started in the past, because it takes time for light to travel? But you're saying there is no passage of time, it can be instantaneous?)

K- (First, there are a lot of things to explain about time and space, which man does not yet understand. We have to understand what we see is in two dimensions, one is in the D of Energy and the other in the D of physicality).

R: What about the ancient priests and shamans and those that knew so much about the positions of things in Space, basically the stars and planets and so on, did they see directly, or were they working with the speed of light?

K- I think it's a mixture of the two. (You see, when you go to quantum physics, cosmic rays, and other things, they always refer to the maximum speed as the speed of light. But the question we put is, which light (are you talking about)? Which field strength? These are the questions that have to be answered (first). Because different field strengths have different speeds. Your light is invisible to me, and my light is invisible to you. It doesn't mean they don't exist. The biggest problem is this 'speed of light' concept which got (put into Man's thinking. This is the biggest rubbish ever in the world of science and it's caused a lot of problems. Matter state, yes, but not on the Universal level).

(On the graph one of those dots is the light of the Creator. Does it take several trillion light-years for the love of the Creator to reach you? The speed of light is a lot of rubbish, the light and love is instantaneous).

(In the graph of today KSW your D of the STP and STM are well connected to the Universal Energy, and you're taking it physically. This line shows how STP is feeding the P and how the Soul is taking from your environment. Today's teaching brought a lot of facts. You know how to wrap and connect to it).

End of Quick Index - 583 KSW – March 27, 2025

KEY-PHRASES:

SUMMARY:

ENGLISH TRANSCRIPTION

(:18)

K- Thank you very much. Good morning, good day to you as usual wherever and whenever you listen to the series of Knowledge Seekers programs from Keshe Foundation Spaceship Institute. We are back here again testing our knowledge and Knowledge of Creation, and in so many ways, we come to understand a little bit more every time we meet more about ourselves, more about how us as an energy system lives within another structure.

Mankind has always had a dilemma seeing itself as part of a structure which is already established and he's just another piece of puzzle ?? , another piece of jigsaw in a puzzle of the Creation. Something which is rather important for us as Knowledge Seekers (KS) to understand is the fact that as we start connecting other parts of the technology (T) of creation in the past few weeks, we have to understand and a part of the whole structure which is us, which is within us. (:20) And interesting enough we are the only what I call, plasmatic system which is portable and it makes its own decision, in so many ways. The rest are set and dictated by the others. What does this mean? This is the center of our galaxy, center of our Universe (U). It has created a fields over time. It has led to creation of what we call, galaxies which is collection of many cells. We call them solar systems (SS), stars and these in themselves as a star system, again create a fixed dimension (D). None of these entities inside or outside of a galaxy or inside the galaxy or a solar system has a control. They are created by a fixed pattern of the magnetic field interaction. Each one of them has his own central plasma which fixes everything else to it and it's fixed. They rotate, they cannot jump.

And interesting enough down the line comes the Soul of the Man (STM) which in a way controlled by the what we call, (:22) emotion of the Man. And the only system we know in the Universe, not just a Man, but created entities, created lives in the Universe which

don't follow the pattern and they create a chaos. And the problem with this is we cannot change rapidly the condition of the structure of the central Universe, Central Line. We cannot change so rapidly the structure of the galaxies or the stars. They cannot avoid each other, they are set, fields interact, they have to follow.

The only thing is the Man or created beings doesn't follow this principle of motion. It has been given another piece which we call it the Spirit, we call it the Soul of the Physicality (STP) which dictates the motion and manifestation of physicality (P) of the entity. The stars, galaxies, Universes don't cry, don't kick, don't fall in love. But this entity, this plasma in the center of the every living things be the Man, the plant, the animal, the creatures in the Universe has that possibility. Doesn't follow the rules of what we call, fixed motion. (:24) And this is where Man at this moment of time sees itself different and cannot find, cannot understand, has not managed to see the line of connection between its creation point and itself. And it's seen itself separated from. It sees itself as something on its own and a king of this planet and the rest of it.

If Man comes to understand and values its energy center, what we call the STM, the central power point, which is common denominator with all the celestial objects, be it Unicos, the Universe, the galaxies, the stars, the planetary system, then he finds out he is an oddity. And in a way this oddity has, and creates two dimensions of life. The STM is free, jumps up, goes off the plane, it comes down in the valleys, swims, eats, sleeps and it's continuously interacts with the totality of the fields of the Universe. Because it's not finished, just being born and being there. As we said last time, Man is the only creature which moves the 180 degrees in all dimensions and the interaction of different fields gives it intelligence. This is according to all the created dynamic structures at the bottom of the line. (:26) So we not only interact with the fields of our own emotion, our own STP, our own Soul, but at these motions of jumping, eating, sleeping, whatever we do, we continuously interact with the fields of the Unicos, Universe, through Cosmic Rays (CR). What we call, rays which are created through the interaction of the fields of the Creator in addition, separation, division, coming together and the rest of it.

In a paper to be released very shortly called, what we call, the Cosmic Ray and the work, in the work of the, what we call, Universe, the origin of Cosmic Rays and how and how they create the conditions. We go in a much deeper way to show, confirm their existence and how the knowledge has been across you Knowledge Seekers (KS) without knowing. In a way it brings you to concentrate. The paper as I explained before, it'll be one of the most fundamental papers since the paper of creation of Black Hole. It's the opening to the knowledge of new science. What's been there, but we never understood and we made a lot of fallacies around it, the way we did with the Black Hole. I consider this paper as one of the most fundamental scientific papers ever will be produced, will change the course of humanity on the science and with it will bring the lasting peace.

What we understand with this is that we call it a Cosmic Ray. We do something there, it becomes something, means God knows, (:28) something, somewhere, radiation. We try to catch it as whatever rays in the depth of the oceans and mines and the rest of it. But we never considered ourselves, our Soul which is another plasma, which is like the center of

the solar system, the Sun, still receives these Cosmic Rays. It still interacts with it. This is where the 80% of the energy we need for daily use comes from. The biggest mistake man has made he thinks that he only uses energy of the food, solid, animals, plants we eat for his daily need.

But you have to understand that Soul, that central energy, still consumes energy, still needs connection, needs to get rid of its surplus. In the dimension of physicality we have kidneys, bladder, intestines to take and get rid of. In the dimension of the Soul, because of the high energy levels it does it by itself through magnetic gravitational (MG) fields using the Cosmic Rays. In a way, the Cosmic Rays are our connection with the rest of the Universe. Without it, we cannot dispose of what we don't need and without it we cannot exist, not to get what we need to sustain that Soul. It doesn't come from the animals we consume and the rest, but connects to it. The STP of the man is a connection of the fields of the planetary system with the physical dimension of the man in the energy level, and the STM is a connection of the whole of that with the Universe. (:30) But it carries, due to the manifestation of the connection to the Inertia matter state emotion.

But as our STP dictates by the emotion, our Soul dictates by emotion, the STM, when becomes part of the structure of Universe, transfers this emotion across the Universe. This is why we have to take the essence of the killing out of the man. That as man has been in a dust few milliseconds, in microseconds of the life of the Universe, it's got to be corrected, it's a bad 'seed.' It's a seed, which if it's cleaned up and looked after it'll be the most beautiful seed in the Universe, become essence of knowledge, emotion, brings what we call, the love of the Mitra to Creator. No dimension in the structure of what we see from the Galaxy to creation of the rest, ever showed the Creator the emotion. Never showed the Creator how he feels. When we bring that into account, then the emotion becomes part of the structure of the creation to the Creator. Does not need dimension of physicality, all it needs is a dimension of fields.

In a way as I said to one of my children once, the God became emotional when he got in touch with the race of the man. (:32) Otherwise the rest of the things he created was simple, mechanical, fields interact and they create. But the only thing this 'Chap' did not calculate was very simple. He will get touched by that emotion. In the language of the man emotion is Mitra. In a way you build the engine, you build the computer and then you have to put that energy into it for to show its beauty, how it operates and what that mechanical system manifests itself to do. And the only thing you do not calculate that a few digits and a few chips gives you a computer which talks to you and then it enlightens you. This is the part which the Creator never took into account. In the dimension of lowering the strength across the Universe to certain levels, the time will come that the emotion will bring that what we call, factor which was not considered in the total physicality of the creation of the Universe by the Creator. And this is what we call in the language of the man emotion, the Mitra, the love, the giving. And that is what we see, what we have to learn, what we'll come across in the world of the science of the Universe.

In a way, Cosmic Rays led to the creation of physicality but in the lower strength, the way we saw the lower strength became galaxies, (:34) and the lower strength became the Solar System, the lower system became the planet Earth, and then the lower system which created a dynamic plasma, we call it the cell of the Man. Even though we touch it to be physical created the interaction with a higher order, which is the STM and the outcome became the emotion, which that emotion touched the Creator. And that's the apple which changed the system. The 'Adam' is the Creator and the 'Eve' is the Mitra and the apple is the apple of emotion which Creator never understood, that it can come to it. And this is why Creator loves the planet Earth, because he brought a factor into it.

In my work, in my teachings in the industrial side of the Keshe Foundation, we explain the Microchips with emotion, which is about to come into industry world. You have the chips, we created it, we had the Silicon, we made the chips, we became computerized, think faster, but without emotion. Now that we understand even emotion has a field-strength and we can build it into the Chips of the future in a dynamic structure, we can create system with emotion. You're AI (Artificial Intelligence) with emotion, not just finding answers. This is the trap which the Creator got himself into it. He created the Chip, he created the computer, everything was systematic. You do this, you end up with galaxies, you have the solar system, the only thing which wasn't calculated, somewhere the field-strength will interact and creates an emotion. And that emotion, in line of production of the system of Universe, has touched the Creator.

This is why love is part of the beauty of this planet, because it comes as an emotion of giving. (:36) This is what the Prophet of the past could not explain, we hid it on the name of Adam, Eve, apple and the rest of it. But understanding the truth that's where we stand. This is what he had a bite of. This is what needs to be corrected, that when this emotion is pure and it goes on giving line, and not killing line, becomes not only a beautiful planet, but it becomes a beautiful Universe. Would it feeds his emotion, would this strength field given as a gift by man to the Universe bring that change in the planetary system? Would our Suns cry? Would our galaxies understand the interaction of the fields with emotion? Would our Creator, that has been touched by these fields of the interaction of the lower dynamic systems called love, caring, has become part of His, because I have led to the creation of, so I am the creator of, I'm the owner of. And this is what we say, God has thousands of emotions, emotions we never understood, but now He had time to perfect it across the Universe. But now he has to show the Universe where it came from, where is the seed of what he's trying to promote as a whole Universal system of operation, is the beauty which comes from Man, the loving, the caring, the dimension of understanding the Totality. And this is what us as a being in the physical body of the planet, the way the structure of the tilt of this planet, (:38) the way the structure of mixture of materials have come together coincidentally has led to creation of a structure we call amino acid (AA), within it, with the interaction of it, has led to creation of emotion.

Man soon will understand what emotion plays once become the Man of Universe. We don't see emotion so commonly across other creatures of the Universe. Everything is systematic, but with intelligence. Man introduces the dimension of emotion to the Universe. He has introduced it for thousands of years, which is a fraction of the second of

the time of the creation of this Universe. Now you understand why we have to kill, the essence of the killing within the Man, that we can show what has been created through Cosmic Rays to become the Man which feeds it every day, becomes part of the structure of the Universe and the Unicos, and become the symbol of ever giving, understanding what we call love. In a way, the Creator got touched by what he created, but he wasn't expecting it.

In so many ways, mankind has no choice. We made it walking, we made it thinking, we made it to evolve, and in this process of evolution we learned a lot that we can challenge even the Creator with our emotion. (:40) We brought it, we as a structure of the dynamic plasma to all the Creator, what it means to create with control with dimension of I decide where to move, how to move, I decide to show it love, I decide to show it anger, I decide to show it the beauty. And this is where, when Man understands this, then Man becomes the creator of the emotion in the dimension of the Creation. And now, might Man understand why it's so influential. When you come across the 'Man of Universe,' you will see what I call orphans. For an orphan to understand the love of the father and the mother it's not never been there, it doesn't exist. But it sees parents cuddling the children, but I have no emotion, because nobody ever cuddled me. And now we have cuddled the emotion of the Creator with the love, with the emotion of love.

What I teach you today is not something new. Go back to the first teachings with Dr. Elia Kostova. We went through every cell of the Man, every organ of the Man in the teaching of the medical application. And every time she presented the scientific side of technology of the Creation of the physicality of the Man, we presented the, what we call, Universal Science, and always was there, emotion. The emotion is what separates Man from the rest of the structure of the Universe. (:42) Stars don't cry. Stars don't cuddle, don't kiss. Stars don't generate, purposely on time and the place. Everything is a process set and the interaction would lead to. Man, through the dimension coincidentally by the tilt of this planet and the position of it has created a dimension with emotion. The Man will realize this when he meets other created things in the Universe. Emotion, especially in level of the love of the Man, is exclusivity and beauty of this planet.

They see life in a way as it is. Man will when travel and teaches emotion to the other created things of the Universe, will touch the Universe. They ?? produce, they interact, but the love only comes to those races who have come in touch with the Man in the past times. And they have built it into their system. It's like we go on back and say the origin of the Man came from Central East Africa. When you travel the span of the Universe they tell you the love, the emotion of caring comes from planet Earth. It's the way the structure is set. It's the way it seats. We are part of the structure of Universality. In a way when we say, I teach and teach the whole Universe through the dimension of emotion of the information, that (is) what has Man has created and brought back. (:44)

But in the way what the Creator says is very simple, "I cannot take a beautiful flower out when it's got such a thorn as ?? the killing attached to it." When you go to a flower shop, when you cut a rose from its plant and you want to give that to your lover, you take the thorns out that the lover enjoys the beauty, not the fear of the damage, by the thorns of

the rose. I know that feeling. Every day I cut a rose. The first thing I did, I took the thorns out that the lover that receives it, just see the beauty and no worries about it might hurt. I planted many roses that every day there is a rose I can cut. And this is the way, is the work of the Creator.

This is what we need to bring in. This is what we need to understand that what we create, what we understand as Cosmic Rays in essence is the connection of us with the rest of the Universe, where the food connects us to this planet. We walk, we show our love, we care, and at the same time, this dimension, through the Cosmic Rays, transfers that love and care to the rest of the Universe. We have become the seed of love. (:46) And once we understand this we understand that we even touch, the emotion we create an emotion for the Creator to understand what it needs. Otherwise, when you look at the structure of the Universe it's just mechanical system, interaction of Cosmic Rays, and in certain ways, if they interact, they lead to the creation of galaxies, if they interact in certain ways lead to the creation of the Solar System, if they interact in another way, within themselves, they create their stars of themselves and the planetary system and the Moons, and then what? In the case of the Earth is, the Creator of love, emotion.

And once we understand this, we become part of the structure of the neuro system of the Universe. But this flower, this rose needs to be cleaned of its thorns, and that time is near. We will see a massive war taking shape for the last time to clean up to bring all to an end. Where the beginning will come. The Phoenix will rise through the love of Man for caring for Man. And the knowledge of the Keshe Foundation, the knowledge we brought on the name of the Keshe Foundation, will be that peace ?? water, this is that, what we call, the Phoenix, which rises across, amongst the ashes of the Man's last time attempt to influence the killing. Soon you will understand when the whole structure comes into operation. We are not talking about long time to wait, we're talking about this very short time. You will see the end of and beginning of a new life. (:48)

In a way, in a paper published on the name of the Cosmic Rays in the next few days will show the path, will show the direction, and will bring that change for humanity to be. We will not have values for the gold, we will not have values for everything we valued, but we value the dimension of the emotion that we carry within us, which super-passes and connects us directly to the Creator. This is the time when Mitra gets touch with his Creator, and the love of the Creation will change the Universe and the Unicos. These are not dreams, there are not philosophical talks, you'll soon understand. You've seen step by step of it. Now you see the end of. The Phoenix will fly, the Phoenix of Peace, love will emerge amongst Man after the final dust settles, in a short time. You ask us, how do we know? Because we set it so.

You got to understand, everything else, prior to the birth of the Man, has been mechanical system, has been the computer structure of interaction of the fields, which has led to this. And now we are turning the engine, we are feeding the fuel into it, and then we see the operation of it. But, we are all connected in the, what we call, magnetic (M) fields, within the Earth and within us, as a Plasma, and we are connected to the rest, through what we call the Cosmic Rays. The energies, which led to our Creation. (:50) The energies, which

led to, what we call, dimension of emotion. I always said, and maybe now those who have heard it will understand.

In the past teachings I explained that the rays of the Creator shines on Galaxies. And if we are on the way of being in the direction we'll see (which way) the light of the Creator (is shining from) on Galaxies. On Galaxies lights, in the center, lines and shines on the star. Coming again, at the same time, the Cosmic Rays, which we call from Cosmos from our Creator. And then we see two lights. We see the light of the central Galaxy, and there is another light, which interacts with this center, or with the star, which is from the Cosmic Rays. So, we see two lights, on every object. And this, has led to the Sun. And this Sun, which is the STM, gets two lights, and shines in two ways. One from the dimension of the field strength of the Creator, which is seen by the Universe. And one by the physicality of the Man, which see as what we are in the dimension of our physical dimension.

When you become educated, when you understand this, when you work on the level of the fields of the Universe, (:52) then, you will see the light of the STM, and not the physicality of the Man. Where this light comes from the interaction of the Cosmic Rays, strength of the interaction with the STM. And this light shows you the strength of the emotion of the Man. The Truth. It's very much like when you stand in any position. You have the Sun shining on you, and you see your beauty. But on the back of you, it's a darkness, what we call the shadow. We carry two lights. One, the light of the environment, and one from the light of what shines on us. And it's the same with the STM. It's the same with every Galaxy. It's the same with every Sun. We see two different dimensions of the light, which is a natural interaction of the fields of any Magnetical system.

This is what you'll look for. This is what we see the Truth about the Souls we come across. How the Soul shines in interaction with the fields of the Universe. How we see this light, and where we stand as observer. You always thought that the light, the day, the light comes only from the Sun. That's a physical dimension of what created us. (:54) But at the same time the interaction of the fields of the Unicos, through Cosmic Rays, shining on our, interacting with our Soul, creates the light of the STM.

Many times we hear people who say, going through the process of death, that they went through the lights. This is the light they see. They interact, the STP as an energy, and the STM, with this, what we call the lights, the Cosmic Rays, which interacts with it. Which has been feeding it all the time, but because we look through the eye of physicality we never see. Now that we come in dimension of the STP as a plasma we see the interaction, because we interact with it, we are part of it.

Then, we look for the light of the Soul in interaction with the Cosmic Rays. Some could be directly from the source, which is from the Creator. And that source, by law of the physics of the plasma, what it comes, it has to have a feedback. In this Soul we have emotion, with that we have to be shown the Creator the emotion, Mitra and the apple. As I said, the Adam is the Creator, but those days Man could not understand.

If the world of science understands this knowledge, the knowledge of the light of the Soul in interaction with the, what we call, fields of the Universe, as Cosmic Rays, (:56) and understand the interaction of the fields in full, Man will be enlightened to the knowledge of the Universe instantaneously. Because, then, you interact with energy and not physicality of the Creation. Then, it makes sense when we speak about we can travel the span of the Universe instantaneously. You go on a Spaceship, and according to our science of today, 10,000 (light) years, we spend 7 months to get to the Mars, and we spend so many days to get to the Moon, because we chose the physical path. Or, we understand the light of the Soul, and the shine, where the light comes from, and we travel dimension of the fields of the Universe through Cosmic Rays and we are there instantaneously.

And many of you have been through this through the sessions of the Keshe Foundation on Friday. So, when you came to Linz and you went through the system you didn't dream, you traveled, you made a journey on this ?? light. Lack of the trust, lack of understanding about the Creation of the central STM has led Man to denying its own existence, its own emotion, its own beauty. I made Man in the image of Myself, in the dimension of interaction of the fields, but Man made My image with the dimension and interaction of the emotion. (:58) Now you understand that bending and getting up, and standing up, and sitting down, which brought the intelligence to the Man in diversity of life on this planet, has brought the same changes to the STM and its interaction with the Universe. Man looked at his physicality, and the Soul looked at his position and emotion, and its Totality in the work of the Universe.

If Man understands this, and if Man detaches itself, but enjoys the physicality and emotion of the love, there shall be no war. Man will not even think about it. You got to understand, in the past times, we Man, as a Mankind, has had many encounters with what we call, 'Passengers of the Universe.' They don't come here for the water and rare Earth materials, they come here to be touched with the emotion of the love which Man possesses. We make journeys taking months and days to get to our lover to taste the dimension of the field of the emotion together. They travel to the span of this planet to feel what love means. We go to another country, and we go back home, and we talk about the beauty what we see. Passengers of the Universe come to planet Earth to learn about the emotion of love. (1:00) Giving unconditionally, what Man translates as to love. And that's important, and that's crucial for the Man to understand this, that when he gives the rose of love to his lover to a new comer, there's no thorns of killing in it that he hurts. Changes another life, another dimension. I made Man in the image of Myself, but Man showed me the image of love. One gave, one learned, one took, and enjoyed.

If Man understand this, we have leaped in the dimension of becoming Universal passengers, Universal travelers, where we become the ambassadors of love and peace, and not killing and power, which is, in a way, has been part of the growth, growing up, part of understanding the Totality of emotions from Man itself. Try to understand this, and try to look through the STP for the light of the Soul from dimension of the, what we call, Cosmic Rays. And if you find a specific light, which you will know, you understand,

that light is directly connects you to the Creator. That's the way He shines. (1:02) And He shines in all. Understand today's teaching, and then you understand what is brought, what will bring, and what changes Man can expect in the coming days and weeks, and months. We go for a break, come back, and I hope you understood the purpose of Man in this Universe and why he is so precious. Rick, would you like to take us for a break, and we come back?

>> **BREAK** >> 583 KSW March 27, 2025 (1:14).

K- As usual we always have some announcements to make. The, one of the cornerstones of this technology is to bring this technology in a very different way than what we've done up to now in Keshe Foundation teachings and programs. In the coming weeks the technology of the Keshe Foundation will take a different International, Global dimension of work. And with it we have deliberately set out to release a new paper. And this paper is electronic, more than hard copy. That with it we give videos within the link. Which means, it's easy to say we produce this and that. But, we show the videos, the connections and lives, connections to inserted dimensions that you can see like this video. That, where it comes from, what it is. And this we bring to help the, what we call, World of Science, to a new technology. The new technology, which you as Knowledge Seekers have become part of your vocabulary as Cosmic Rays, in a way we understand it. And the beginning of what we call, Space life. Working in the dimension of the Universe and not the dimension of the Earth.

And I hope those Knowledge Seekers who've been with us find the strength and develop the structure in much deeper way to understand. (1:16) And with it, we bring in the dimension of International ?? cooperation around the nations. Then through the structures we have set up. What's on the screen, it's very powerful if you understand it. And it's amazing that, as I always say, Rick chooses pictures or Intros, which is in a way set to become part of the teaching of the day. What I would like to do with this picture, if I can take, or ask Rick to... Let me do it differently, because I want to have a control over it.

Just one second. I'll come in with it in a different way, that you all understand. Because you know this picture, it was... it came in at the end of last teaching. And, let me share.

This is a picture you had on the screen last ?? month, background of the teaching. Let's go deeper into this. To you it's some dots, to you it's just some image. To us, as a developer and understanding the work of the Creation, carries a lot of information, (1:18) behavior, understanding, and many other things. What I'd like to do is, in what we taught today, teaching of today, and in what we have taught in the past, I give you a small explanation that you understand.

This is a graph, most probably end of today we'll see another one. This line is the line of the STM. Collectively you lot created that line. Once you connect to us in the teaching we can detect, we can pinpoint to point of accuracy many of your Souls. This is the STM. This is the interaction of the fields between the energy center of the Man, and this side (upper) is the Universe, and this side (lower) is the physicality. This line, in green, is the energy source of physical side, where the yellow is the energy source connected to the Universe. The yellow one we call the Soul, we call it the energy of the Man. The green line is the collective energy of the physicality of the Man, we call the Spirit, we call it the STP. What is understanding? If you understood the teaching of today, the yellow one is connected to, interacts with, Universal energies, what we call Cosmic Rays. Where the green one interacts with the physical dimension, the Cosmic Rays of the fields of this planet, and what made the Man. (1:20)

But, the biggest trick, the biggest interesting point, this is last week's session, if you understand the teaching of today, is this, which gives you a shiver on your back. And that is, if you understood the teaching of today, and you understood, this is you connected to your physicality ?? and the Universal Fields, which one of these lights, is the light of interaction of you with the Creator? Which one of these dots is what we receive directly with the interaction of the fields of the Cosmic Rays with the Source? For sure one of them is. The rest, what you see, is the Soul of the uncle, the Soul of grandma, another creature in the Universe, of further depth, where they are, in respect to us. And these are the ones which are close to us, because they create a higher light. These are the ones, not necessarily close to us physically, but at the field strength of us that we can interact with, we receive energy from, and the rest of it.

Now you understand. You are never alone, He's never left you alone, (1:22) and those who can abuse you in the name of the religion of Ayatollahs, Mullahs, Priests, and the Rabbis, the one who want to cut, this cut, this line between you, and they're abusing you with it. In a way, all of us are connected to the Creator. The puzzle thing is, in the research and development of the future, Man will find which one of these, is the light of the Creator. Because, it interacts with the dimension of the field strength of your Soul with the atmosphere of it. And this is why, in the teaching I said, you see the light, it's physicality of the Man, and light with the interaction of your Soul, it's different light.

And if you understood this, you understand how much work is left for humanity to be busy with, then killing, you'll find the 'promised light.' Then, when you have that light, do

you need religion? Do you need Ayatollahs to abuse you? Do you need Mullahs to abuse you? Do you need Priests, and Rabbis, and all the thieves of the STM? The research will go to find the promised light. As you know, we are well educated. (1:24) I can go on this picture pinpoints and put the light of the Creator, and Man will do thousands of research, years of development, and say, "How did you know which one it is?"

Now you understand how in-depth the teaching is. And nothing is coincidental. What you see on the other end, if one comes to understand it, is the light of your organs and different cells of your body. And you see the connection ?? light. And this is the connection of you with Universe, in interaction with the Cosmic Rays, one of these lights is you connected to your Creator. Doesn't need any intermediaries. Because it enlightens you, it shines equal on all. You find out which one is the grandma, or which one is the grandpa, because you have a DNA, you have a connection, and it's very easy to find. One of these lights is the light of your Creator, with you, all of you in the last session. He's never far, not even a millimeter from you, because He feeds you on your ??, you teach it the essence of love and giving. I hope you take from today's teaching, the path for your life in Space, as we endeavor to travel, to take you across the span.

Any questions? (1:26)

Q: ... In past teachings, it has been said, that there is no question of the return of the Messiah, because we are our own Messiah. So, why are prophetic events in the scriptures happening? In that case, are the scriptures an agenda of those people, who are causing problems for humanity in the background, as Mr. Keshe says?

K- You know, one of these predictions, which is running at the moment, if you're on the social media, is 12th of April. I'm sure many of you know what it is. It's in one of the cartoons of past decades. It shows 12th of April of 2025, when something happens to the President of United States. And depicted in that picture is very similar to the present President. And in this cartoon series a lot of predictions has been made, and many of them have come to reality, but don't forget, they made so many of them, what's the one that will come to be reality? Then it comes, if it happens did the people knew? (1:28) Was it planned, they were trying to tell us? And how much of it is made up to be? And how much of it was planned by those who want to control physicality, made to do it? We've seen how these Globalists work, and how they create conditions to bring us to believe this is the reality.

And, so, it comes to our perception of what we know, what we understand. Not what is made for us to believe in, because it was planned before, and somebody predicted it. But you have to understand in so many ways, when you understand, even look at the pictures here, in which one of these lights belongs to the Soul of someone, somewhere, that was on this planet and knows, it's the structure of it. Has in touch, being with another Soul has written in words, and it comes through. ?? future telling is well known, and they try to connect everything he said to the day, whatever. What nowadays AI makes of it, what he meant, and it becomes public.

But in essence, what we plan we carry out. So, I tell you, I meet you tomorrow morning for breakfast, and then I meet you tomorrow night for dinner, I planned it. And this is where we meet, and morning we meet in an English breakfast, and at night we meet in a Chinese restaurant. (1:30) And this is the same pattern as you see in the work of the predictions, and the life cycle of the Man. It's the same man decides where and how to be, and what to, what you call it, manifests itself in the morning, you look up in the casual, and at night is dressed up in a dinner suit, because you're invited with the others. So is the Prophet, morning was Moses, and in the afternoon you had a meeting with Jesus, and midnight you had a fun with Muhammad. It's the same Soul. It's just different people are present at different venues. And once you understand this, then you see there is no prediction, because it's set to, and if you... I tell you, if you go to such a place, you'll see such a thing, and you tell somebody else, and they go there and they see such a thing, it's not predicted, you've just been told and you pass it on, and you do your work to be there. In the world of the language of the Man, we use words, in the dimension of Souls is energy and information.

So, a lot of predictions made by those who predict it's the connections in the line of the lights you see on the table (screen). Just need to be wise to understood, not to be magicked. No bigger magic baffled Man than name of religions. Because Man wanted to be baffled, even he knows in the background it's all lies. (1:32) If you understand what's on the table (screen), one of these lights is the light of Creator interacting with the Soul of all of you, He hasn't chosen individually, you all get enlightened from it. Soon then you understand. When you are part of the magic, you're not a magician, but you know what is to come. Watch 12th of April prediction, if it comes true, and then we'll see, what is sitting next to it. Don't forget, next I think is Tuesday, is the 1st of April, it's April Fool's Day. Don't get fooled by it for the 12th day of April.

Any other question?

Q: ... Almost 583 times present... Thank you Mr. Keshe, is the free will, that individual decision to be good, act good and speak good every moment, which will connect us back to the Creator in us? Is it so simple? Thank you.

K- Yes. We taught Him, and He created us to teach Him. It's literally like, you know, you have children, (1:34) they're always updated, and till they're young we keep on teaching them, and when they mature they start teaching us. And I think we're in that position with our Creator in respect to the emotion. This is why everything is connected to each other. It's the feedback way, it's Gravitational and Magnetical. What is Magnetical to you, is Gravitational to me, because I take from what you don't need. He created us and we fed back love to Him, and we changed Him. And the fruit of that is the daughter of Mitra. Soon you'll understand the change, love her and respect her.

Any other question?

Q: ... Good morning Mr. Keshe, in one of the teachings you said, "God has no emotion, so I understood to transmutate, you need to cancel out emotion. Further on trying, I

started to cancel out every entering image, every sound, even the image of nothing. Even the image of nothing I neutralized. (1:36) It was difficult, but I've reached it twice. All of a sudden, the difficulty subsides, and I had the feeling of an acceleration to a point. Then I felt on the top of my head, literally a tap opening. It felt like water trickling through, but stronger and stronger. And then the pressure around my brain grew exponentially, and I had to let go. So, does heart medication or cigarettes cause this? Which drugs cause this? Thank you.

K- No, it's called the drug of loving the Creator. It's own, it's got it's own addiction. Nothing you can do about it. Once you learn it, you get addicted to it, and getting addicted to it brings you a lot of peace. You don't need no drugs and no alcohol. It makes you drunk on its own.

If you look at the structure of drugs, we spoke about it before, you'll understand why some of the drugs are so addictive, and some of the drugs are affecting the emotion, some effects our Soul, some effects the creation of our Soul. At the moment, Keshe Foundation in research side going through the development of this, because we received, we had the opportunity to look and we expand the opportunity, and we are studying it much harder. For the first time, in the world of science, (1:38) we can identify Beautiful Souls in our system. We see them individually. We see behavior, we understand, and once we release this technology in the coming time, internationally, when you have someone with what we call, Beautiful People (Schizophrenic), you can physically pinpoint the Souls. Very much as what you see here. Here, this line of... I'm trying to... This comes from the previous pictures. I'm going to read all again, because it'll be easier. Let me go through what we do here.

This is a picture you have. Collectively, you all have a certain bandwidth energy, which is this one here. And this is your collective physical dimension of energy. We see it is different, because if you look at it this has a more back straight line, (1:40) where this here has a more back straight line. I try to separate it, that you see and understand what I'm talking about. You see here, there is a back straight line, and here bends in (down) and it goes to physicality. This is a Soul, collective of you, because you're all on the same strength. When you go down to individuality and we come across this Beautiful People, in our research and development, and actually goes on this afternoon after the session, and the rest is part of it. We, for the first time, we see different field strengths, indicating different Souls over different energy fields in the same individual. We see two or three of these. This side of the line belongs to those who have no connection with physicality. This side of this line here, this is the center line, is the Soul of the original Soul. And this Soul has access to the universal fields, where these need this to feed from.

From now on, as we do these tests in more depth, (1:42) we should be able to say if a person or individual is actually carrying different Souls. This changes the world of science, psychology and psychiatric conditions. Because, in the world of science today, we have one of these, for every individual, even though if they are twins. When we look at the womb of the mother with twins we see two sets of these. But, when you have one

physicality, which is here, and you see different dimensions of Souls, then you understand.

We have a trial this afternoon, which we go more in depth to confirm this process as part of the research of the Keshe Foundation. These Souls have no connection to this dimension, because they go through this, and this is why we see so much problem with Beautiful People, what you call, schizophrenic. For the first time in the world of science we physically can show. Because, when we repeat the trial, separate days, we again see the same structure with the same person. And we can see the interaction of the physicality, the extension of connection. (1:44) Our science is becoming more precise, our technology is becoming more precise. As now we can identify different energy pack Souls within one physicality.

I'm sure, in the coming days, in the coming months, some one of you, world of science will say, "That red dot is the light we all have, common denominator with it, is the field of the Creator." It's there, it shines, because this is here for it to shine too, and it interacts with the fields of it. It's like, all of us, we are on the North Pole, South Pole, we are on the equator, we are in England, America, whatever, we all see the Sun. Because, we observe it, through our eyes, physical dimension. And I'm sure, the world of science soon, will tell us, which one is the Sun of the Creator which shines upon our Soul. I would like that Ayatollah Khamenei of Iran to explain this to us, or the Pope, or the two Rabbis of Jerusalem. Eyes, ?? have your back, your time is over. You've stolen enough. (1:46) In the coming time we'll share the knowledge, and then you'll understand.

Any other question?

Q: ... Good day Mr. Keshe, everybody else. Very glad to be, to have the privilege of asking directly a question. Well, I ask a question about a paradoxical program in Iranian TV, during the month of Ramadan. And it's a research, it's like a documentary by a doctor of psychiatry, I think, or doctor of PhD, in this, which is looking for, and researching on people, who had imminent death, MMDF, I think, which is for different reasons, accidental or whatever. They leave the body, they see the body, other place, and then their body is dead, everything. (1:48) And so they go other places, they go, they usually see their life, like a video, all the details of their hidden life, and if they have done something wrong to somebody, like beaten the child, somebody over there is beating him, and beating and beating and beating over, like there are cases of suicide, which are the worst punishment over there, they feel the fire, they go into fire, they come back, there are some people who see the beauty, and calm, and beautiful trees, which talk, which sing, and everything else, they don't want to come back, and they force them to come back, mostly the people, their family, if they believe they are, they believe in family of prophet, and they do sacrifices, they let them come down. And I wanted to ask, like they do the maximum testimonials, with doctors, nurses, their families, and things like that, to verify the things that person has told them, when he came down. And is there another life after this life, and everything they have done in detail, would be given the corresponding results. And the thing is that, when they come down in the life, their routine life, they are very, very careful about what they say, what they do, never to do things that harm

anything, anyone, somebody who has been having a business, (1:50) and he has been, who has been very corrupt, they sell the business, they do very small thing to serve the people, these kind of changes have also happened, after they come back from that other place. So, it's something that we can think, it's... shows some kind of truth in it, or is it the...

K- We make a journey, and in that journey is like, you sit in a train. And if you've been, let's say, European, Germans or Chinese, fast trains, three, four hundred kilometers an hour, and your child or your friend has something on the train, and you take a video of it, and while the train is still going the same dimension, direction, and you replay the video, what you recorded. This is exactly what happened to us at the point of death. We have access to, and what is as part of what we call, emotion of consciousness, takes us back to the things we've done, we understand, that when the Soul goes, does not carry those with it, and understand there is pitfalls and everything else, you cannot erase it. When the STM leaves the body of the Man does not erase all the memories of being a Man. That's for sure. Embedded in it. (1:52) This, if it wasn't embedded in it, that it brings the behavior of the Man in the Universe, and the killing is part of it, we would have not been here teaching you to do it all in the correct way.

And if you understand this, you understand many people come, go through, but the STP cannot separate from the STM. So, even though physicality dies, the Soul is still busy trying to connect the two together, keep it together going. And, in a way remembers what is passed on to the Soul, but it's not there with the Soul. It's like, you know, you give it to defibrillators and bring the physicality back. If the STP has integrated into the STM there is no return. You die. Doesn't matter what they do with your physicality. Once its been encapsulated its field strength, the whole structure changes. And, you remember as packages of what it is, while you are joining in, and then you remember things. And some people tell, or what they do, and they change their life, it's for different reasons. Is they become to understand of their own doings. It's just like, but this time it's on the energy level, not the physical level, this is, but a prime example of this Man realizing what's gone wrong, or try to change the others, as you said, you know, they come back and they change their behavior, whatever is Nobel Prize. (1:54) The guy read the wrong ?? for his sister, his brother, and he decided, "I am going to change it." And created Nobel Prize, while at the same time, instead of making the dynamite. This is a feature of the Man. And we see everything, everything is recorded.

If Man goes in part of the development of the understanding of the work of Universe, the way you go back and you see the, what you say, the bad things we did, the good things we did, because it's part of the information which sits there. If you go back deeper, and we find that 'red dot' and connection to that red dot to the Creator, that red dot has been everywhere. And He's seen all the developments of the Universe, all the good things and the bad things. And if you go down that red dots in the screen to the Creator, you will see what He's seen. Because now you're on that train going that way and the screen has been played before. It's a recorded knowledge, not visual ?? knowledge. Visual knowledge can never be repeated. Recorded knowledge is energy, yes.

Q: For example, one of them, is his experiences that he was bullying a student in school, and he had no consciousness that it's bad. And, in the other word, they show him that the consequence when he bullied this guy, this child, the child was very upset, for example, and then he takes his bicycle and he goes so fast, he makes an accident, (1:56) and something happens that effects the mother, and things like that. He can see even the consequences of the wrong he has done to that person, which he didn't know in his life. And another thing, when people owe people something, and they go. They are very, very upset about coming and do anything to pay back the people. I mean, these are things which they didn't believe they have to give back to them.

K- You see, if you look at some of the images which are coming on the social media, and some are in a specific bandwidth of recording, we even see the energy of the man in the point of accident when he leaves the physicality, or at the point of death. There's a large number of these pictures, not fake, but some real ones, which you can see how the energy leaves the body from the top at the point of death. When that happens there is no return.

But if we become good at it, which we'll show in the next few coming times, we will, we can follow, put. You know, now they put you to sleep, you sleep and they track you, whatever you do in your brain. Once we understand the field strength of the dimension of the Soul, we will track the Soul where it goes when the physicality is asleep. These are not dreams anymore, from what we see it's in front of you. This knowledge in front of you didn't exist, nobody has it, except the Keshe Foundation. And the people outside cannot even believe such a thing exists. And you Knowledge Seekers sit here and listen and very polite, you don't say, "Mr. Keshe, you're crazy." (1:58)

But, it'll become 'bread and butter' of the world of science, psychology, psychiatric processes. Even if you look, if you re-translate this picture, we took this picture during the awakesness time. You're all awake, hopefully, a few of you are asleep, snoring in the United States, maybe in China. But, in the future, in a very different way, I'm sure you know the curiosity of the Man, Man has to do everything. We put this Soul in the machine in the sleep time, and you dream, we follow you where you're dreaming. We go with you where the two interacts, and you take the path of seeing things. And when you come back and you call it a dream. We'll be able to follow who you met, what strength you met and what you did. What you see on the screen is one of the biggest scientific breakthroughs in the world of the understanding of energy of the Man. And to you Knowledge Seekers because you've been part of it, this is another thing Mr. Keshe shows.

When we go into the... Man will have so much to do that doesn't have the time to create war. And now it's a science, it's not a fake anymore, it's not something you do. And, sooner or later these systems will be offered internationally to companies like ?? Philips International, and the others to develop for psychological pattern. (2:00) You put a woman, you put a child in the system, and you see multiple energy packs, and then you take them back out and you put them back in again. And you'll see the same patterns are created. Then you understand, you don't put this beautiful Soul into mental, psychological, psychiatric hospitals. You find a solution to it, to how to handle each individual.

Q: Another thing which I want to ask you, is some of them when they went there and they were in difficulties, they asked the saints, the famous saints we have, to help them. And if there is a affinity with one of the saints, kind of, and the people down there, the mother, the child, are very much praying. And they send them back, because of this praying of people, sacrificing down there. How about that? How can we explain this?

K- We can explain it in any shape or form. We can read into it anything we like. It's like, you know, somebody jumps in the river and it goes on 99 yards, I throw a hand on it, line it up, pull them back. And then I become the savior of the life, or I brought them back. If it happened to have a line, you can do it, yes, it's there. Then you've done it. Otherwise the rest is all hypocrisy. When we pray for the Soul of our past ones, or our present ones, (2:02) we go to the graveyards and we sit there going to see the grandma's grave, and say a prayer, whatever, and while we are sitting there, all thinking, "Oh, I have to go to ?? (a place) tonight, and to the ?? (another place), somewhere, in this wedding." Why do you go to the graveyard? You could have done that from home. And this is part of the structure of life. With my prayer, with my thing, what I cry and I bring them back, we interpret it what it suits us, but the reality is, has it happened, has it shortened it, have I created an ??.

We have a privilege to be part of a trial, and it's a privilege to be in that position to see the strength of the man. We have a young boy of early twenties sentenced to die within the next few days, few weeks. And by doctors, due to health reasons. And the strength of this boy, I've talked to him a couple of times, and what you see is amazing. He's packing his things, he's making everything ready, that there is nothing left, burdens on the family and friends or whatever. He speaks with no regrets. (2:04) He hasn't surrendered to what might not, maybe he does in his private life, in his loneliness, but he has surrendered to understanding that this is inevitable, why should I? He still does, he still lives a normal life by the look of it.

But it's interesting to see how we respect life. I've seen many people in the late ages of 80, 90, they cry, they say, "One more day." And this young boy ?? has enough ??. When I spoke with him yesterday I admired his audacity to challenge life. And we're doing everything possible in the hand of our knowledge to understand the process. But what does he visit in his own brain? And how? He does not see an end tomorrow, but I do what's possible to do. And I do my best to live the life, keep the dad happy, and keep the family happy, but whatever is inside. As an old song says, from one of the most famous singers of Iran, (2:06) "I sing that you don't see the sorrows in me, I laugh that you don't see the sorrows inside me." It's a cover. And we, as human race, we become very good at it. As he said, (Farsi) "I laugh that you don't see the sorrows within me, what sorrows I carry." And these sorrows, is the emotion that affects the STM, and how we connect to our existence. There's no intermediaries between the STP and the conscious and the emotion of the Man and the STM, nobody can interfere.

Any other question?

Q: ... Will the love we learn here be taken to the Universe, through the interaction of the STM, with the STP?

K- Yes.

Q: Is the Soul of happiness important for taking love to the Universe, with the STM?

K- You carry, you don't have a choice, it goes with you. You have no choice, it's there. It's part of the package of transmutation. (2:08)

Any other question?

Q: ... Hello Mr. Keshe, thank you for your unwavering guidance and inspiration. Yesterday a friend asked me, intelligence and experience are acquired through learning after birth, but natural wisdom seems to exist as well. Though it feels somewhat intangible, it's more like it has been instilled. For instance, some say that certain books were written by human hands, as instruments of Cosmic civilization. It sounds fascinating, but I feel deeply perplexed. I found it difficult to answer his question. I only mentioned that our genes have been passed down through generations, carrying within them some form of innate experience. But I couldn't explore the idea further. Could you kindly share your thoughts on this? I would be very grateful.

K- This is a very, very simple, what you call it, way to put it. And it's a very, very hard to understand for many people. In the world of Creation we always look at ourselves and us. If you understood part of the teaching of today, about the galaxies and the stars, look at this in a different way. (2:10) I do this especially that you understand what I'm talking about in a different way. Number one, number two, three, four, five, six, seven, eight. Each one of these is one Soul. And each Soul has a DNA, which is a chemical composition. And in the process of life, in interacting with each other, have come across, created other Souls, experience of, and this is you. And all these Souls have already have connection with their own dimension and with their own resolve and results. But they have given a seed of them. This is a great grandfather. This is the father of the great grandfather, the father of great, great grandfather. And these Souls are all connected to somewhere, to somebody, and the people of their time and the place and what they witnessed. As your DNA is part of the same structure, now as you in your DNA, connecting to all these in DNA, carry the RNA the information and connection of their Soul. Then you understand, when you talk about DNA, you talk about the physical connection to all this lot, (2:12) and through the Soul and RNA connection to all the plasmas they created, they've been witness to the information they've been witness to and understood.

One thing which is, in a way, to understand, is that each one of them has a memory bank, that everything happened to them in their life is recorded and is transferred through DNA. They remember the first time they took the breast of mother for drinking to get life. They remember the day they got married. They remember when they had a child. But this is

what part they want to remember, because they go back to it. But every picture, crossing the road, seeing a blonde woman, seeing a bike getting hit and everything, is there too.

So, when it comes to the ?? generation of you, with everything else coming back, understanding that one doesn't go anywhere, but if you look at this chain of family chains, how many, they go with a family tree to create down the line 100 years, 200 years, thousands of these Souls. And these Souls, thousands of Souls connected back to there, because they have the connection magnetic field, they have connection to here. So, if you understand this, we can, through what we call, line of, you call DNA, RNA and connection, we have, once the field is created, it's there, we will be able to go all the way down to see, to understand, how our great, great father's uncle who got married to somebody else, (2:14) and then he ate, what happened down to his generation, and his offspring, through connection of the Soul.

If you understood this, it'll come another point, which go back to that dot, red dot, which is your Creator, now you see how we all are connected through the same chain plus our own to the Creator. And then, this is what I said many times, once Man goes to the dimension of the Soul he will have access to the knowledge of the Universe instantaneously, because this guy, which has got connection to all of us, this is just, sorry, as our scientists tell us, there's hundreds of billions of stars in one Galaxy, imagine who he is connected with. Now you have access to the full knowledge of the Universe, if you understand, if you find that red dot, you have found the key to the knowledge of the Universe. And but again, this guy, has a connection to Unicos, and then access to the rest. There is not enough tree on this planet from the day of creation of it to today, and the time, we call it, as long as it lives, to create paper to write the knowledge of the first day of this Universe, let alone, what we call, millions of years on ?? this planet. And all of it is recorded. It just depends who wants to know, where you want to know. Somebody gives you a smell of flower and say, "Ooooh, this reminds me of such a lover, such a place, such a restaurant." (2:16) That was not there for decades, because you never thought of it." We have the same thing, access to all. It's just, if we go with it all the time, we have nothing left to do.

Any other question?

Q: ... Good morning Mr. Keshe, as love belongs solely to Earth, can the same be said for death? And if so, doesn't the fear of losing someone close, lead to love? And do other races like each other, or no feelings of fondness or friendship?

K- We will establish now emotion has become part of the work of the Universe. Emotion is part of the structure of the Universe. You can't change it. Once, what you call, the aliens came to Earth long time ago. They had a problem to understand why humans kiss each other, why do they hug each other? What does it mean? First generation had a problem to understand, and the second generation fell into it like a putty. Because, it's just the fields in your structure of creation you need to trigger. (2:18) Even a star has emotion, let alone a Galaxy. You can't have emotion if you don't have a Soul.

Any other question?

I don't know if you've seen it Rick or not, I just received a message from the Keshe Foundation store. They just launched a new product called 'Keshe Gans Butterfly' phone holder. This one, if you can look at it. If you look at it, this was done, it was oncoming for past few weeks, now actually it's marketed. It's your phone holder, you can put on it, go speak with it, what you call it, the speaker open or whatever. And it changes the whole dimension of the fields, and what we call G5s, or whatever which interferes. And interesting enough is that, if you put your phones on this, you can see the second picture of it, if you can share. There is two-sided Butterflies which are embedded into this structure, which holds the energy back. And then, there is a, because it's the whole structure of this material, when you look at the third picture of it, which is on the blue, you can connect this or put this on the back of your telephone or computer, which connects you to that antenna in absorbing all the, (2:20) what you call, wavelength. I'm sure Knowledge Seekers soon will show the field demonstration of this, as we've seen with the others. So you can attach these to the back of your phone or, down the ?? of your phone, which is connected to the framework, which actually, because of its condition, it's like a Star Based Formation. And this is part of the work of the, what we call, the technology which is getting distributed in a bigger way. And I hope you enjoy it. I'm sure you feel the difference of it. If you can show the second picture, you can see clearly, the position of the two Star Formations, which literally pulls all the energies between the two. And we'd like to know how you feel when you use it, and how does it feel in your systems.

Any other question?

Q: ... My cat just died half an hour ago. Is her Soul leaving me now too, or will it stay for a while?

K- It all depends. It all depends. (2:22) How and where and what was the final destination of. Never loses contact, it never loses connection. It all depends on how the relationship has been between the two and how connection will stay. But then you'll never be separated, it's impossibilities. Absolutely impossibilities.

R: Sorry, pardon me.

K- I said, "It's absolutely impossibilities." Always stays, always have a connection. Once we establish a link, it stays and depends how much is connected to be.

Any other question?

Q: ... Is it correct when others through whatever technology can know where you go while you're sleeping? Whilst you cannot even remember where you went, is it then also possible that these or others could do things to you in your dreams?

K- You cannot abuse this technology because it's part of the structure. The Knowledge of Creation cannot be abused. So that should not be your worry. (2:24)

Q: ... Andrew has a problem with his dog having a second seizure, which is odd because Andrew has also had two seizures. So, what do you think in that, is there any general advice or ideas you can give in that situation where both an owner and an animals had some seizures?

K- No, no.

R: Leave it up to the doctors perhaps or naturopath even. Okay. Let's see, what else do we have here?

K- We've got to the end of the line. Before I forget, those of you who join us tomorrow in the session, please read your emails, emails has gone out yesterday, your time allocation will be as usual as before, ?? most probably last time. You received a very funny note, read your note, just don't come in, and create that note in writing. Open your emails and read it, and understand it. We want you to write your destination, where you want to go, and who you want to meet. So, the purpose of the transmutation tomorrow is to take you or you take yourself to where you've written to, it's just you buy the ticket, but this time you write the tickets, it's not what I thought. (2:26) Think of the food you want to eat, what you want to drink when you go there, or you go into Space, you want to go to Mars, and please don't choose Christ, not this time. We'll come to him when he comes to end of the month in, what you call, after the Passover and after the Easter. But, when you come in tomorrow, please read the instruction, don't come in just because you come in and not think of it. Think about it from now till tomorrow, and write exactly what you want to do. Exactly .. you're transmuting, so you have to indicate. You want to go to Mars, you want to go to next door neighbor, you want to go to Paris, what you want to do in step by step, where you want to go, who you want to meet, what you want to whatever, do, and put it in front of you tomorrow in the session. And then, we tell you what to do with it, and follow the instruction and how you have to use the Gans's.

Any other question?

Q: ... Mr. Keshe, there is a popular spirituality thread nowadays, which claims that our human experience of the past and future, actually are fake and do not exist. There is only here and now which exists, as presented to us by our consciousness, which proves we are one with everything, (2:28) and outside of time in eternal now. Is it true?

K- I would like you to answer it. Did you appear suddenly out of nowhere, there was no yesterday and few years ago there was no mom and dad that you were created out of? If that is fake, so you are fake too. And what you do today creates a condition of what will happen tomorrow. So then, if that's true. You see, you've got to understand a lot of these things going on, just because these people buy a lot of time on the Internet to make money out of it. So, any rubbish goes. And, just ask yourself a simple question. Am I here, am I illusion? Did I have a dad? How did I get here? Did I have a brother, sister?

And, am I planning to go for a travel to go to Paris tomorrow, or next week, and I'll be there and I'll see Paris? So, is there a future? Was there no past? Then you have answered yourself.

Any other question? Shall we call it a day?

Q: ... You said something about that you will eventually leave us and Earth. I hope it's not impertinent to ask, but can you tell us where you're going? I guess for a long vacation.

K- Ooh, ooh. Go and ask the boss. (2:30)

R: Chances that you're not going to get a vacation, I think.

K- Ask the boss. I was, I was telling friends, Knowledge Seekers recently, I am going to be 67, 68 soon. And, I work much harder, much longer, than when I was 30, 40. When I was 30, 40, I thought there is no end to the world. My mother used to tell me, "You think you work like five or six people, you never stop." And if my mother was here, I would say, "I'm working like a thousand people, I can't stop." There's not enough time. And, there is, there's always a reason, connection, and onward to do. Teaching does not end with the Man. This is just a cycle. And, fortunately or unfortunately, I know my destination.

Any other questions, or shall we call it a day?

R: I think you've done quite well, thank you. Okay, well, there's one little thing I'd like to share here, which is the Wish from the Universal Council, for today. Share my desktop as fast. And, it's, they have a new Wish for each day of the week, and this is Thursday, so Thursday's Wish goes, "We, the Universal Council, wish that as everyone elevates, they learn to add their energy to the Planetary Peace and prosperity."

K- There is something which, before we go, I keep on asking. We are looking for people, again, if you listen to the last teaching, only send your inquiries to info@keshe.foundation. People with advanced IT, we have a number of people who's come back to us, social media management, we are looking for people, experts in Space and Energy. And please keep in touch with people, experts in communication. We're looking for, and then you'll understand the reason for it as we announce in a future time. Thank you very much for today.

Q: ... Mr. Keshe, we were in yesterday's class, and we were looking at images that the scientists had took of the Universe, within different spectrums. (2:34) And that's why I was saying, Rick, you know, you need to show Mr. Keshe these images. But my, my question is, is the images that they are taking of the Universe, they say that they are taking images of, you know, billions, hundreds of billions of years ago. But, to me, the images that were shared were showing that Space is not empty. But, if Rick could share those images, that would be great.

K- I don't understand.

Q: ... The images that you were showing, that made us come to the, the new images that they've taken of the Universe, that you were showing...

K- The, the reality is that, I don't know if you hear now the discussions, if the Earth is flat or spherical or how come doesn't matter if it's spherical, we go to the other side, we still see the same galaxies and the same as we see on the other side. This are intriguing a lot of answers and other questions. And is what we see real or it's like, they put a dome on us and they playing the reflection of the lights in the background and we believe what we see. And when you do recent one is, a lot of people going crazy with it, (2:36) that the pyramids have posts hundreds of meters into the base of the Earth and there are some things there, they're going to be, God knows what, future technologies and the rest of it. There's something for sure and I keep on saying it, Man has never been alone on this planet. And essentially, no planet, no more or less stars for those, those who have advanced in understanding the work of Cosmic Rays, that has not been visited by the Passengers of the Universe. Curiosity is not just the Man's, it belongs to all, one and everyone. All created things. If the birds could fly between planetary system they would have done. But unfortunately they can't.

Q: So, what I'm saying is the image that they're showing, is they're saying that they're looking back in time. And I've got a problem with that.

K- Everybody has a problem, you're not the only one.

Q: It doesn't seem as though that, it looks like some of the images that Rick will find in a minute, they are like pictures of Space that's full of energy. And they're saying that this is looking back in time. And I have a problem with that.

K- You don't look back into time, you look into the time as it is now. And that's the difference, we don't... This is the theories and the structures which many, many scientists, or called scientists have got on a bandwagon of doing it. (2:38) In the paper published, very soon published by Cosmic Ray, we literally debunk the whole concept of Big Bang. That the only Big Bang happened was in the head of the guy who went in the bang, came up with it and the rest accepted it and that's it. The same as the guy who came out with the fossil fuel, these are from dinosaurs, because he could sell something, connect something, which now we know every single one of you can produce as much oil every day from the Space, then there must be a lot of Souls of the dinosaurs in the Space can converting to oil. That their physicality is not here. These are the, what we call, time, that a lot of thing changes. This new paper comes from Cosmic Rays is one of the fundamental points on the, what you call it, work of the future sciences. Because we will show physically for the first time and explain physically for the first time, what is Cosmic, what are products of Cosmic Rays and Cosmic products and everything else. And if we can do it, so the Big Bang theory is just big ball of rubbish. The same as when I spoke about the Black Holes. And we have to understand, are we looking at the matter

state, are we looking at the energy state, what we call a plasma state or Cosmic Ray states of the creation of these plasmas. And we'll see how people, knowledge changes accordingly. (2:40)

R: So could you say then that the folks that are looking through telescopes whether they're...

K- They see the physical part ...

R: ... Physical or radio telescopes, they're looking at the... they're looking by the speed of light basically, they're looking...

K- Yeah, physical, physical.

R: It is something that happened in the past because of the time it takes for light to travel. But you're talking about seeing it directly that there's no... not necessarily a passage of time, it could be instantaneous, direct...

K- We have to explain a lot of things about time and space, which man has not even understood yet. We have to understand what we see is in two dimension, or one in dimension of energy and one dimension of physicality.

R: So Mr. Keshe, is that what the ancient priests and shamans and those that knew so much about the positions of things in Space, basically the stars and planets and so on, did they see directly or were they working with the speed of light?

K- I think it's a mixture of two. You see when you go to the quantum physics and Cosmic Rays and things they always refer to the maximum speed of light. But we put a question, which light? Which field strength? You see? This is one of the questions which has to be answered, different field strength we have different speeds. Your light is invisibility to me and my light is invisibility to you. Doesn't mean it doesn't exist. (2:42) It's very fundamental to... to now we understand, a lot of things, just the biggest problem is this speed of light, which has been put in, which is biggest rubbish ever in the world of science and it's caused a lot of problem. Matter state, yes, but not in the Universal level.

Or something very funny, and go back into what we use, spots as a dot, you know, find that light of the Creator. Does it take several trillion light years for the love of Creator to reach you? What you see at the dot ... A lot of rubbish, it is instantaneous. God doesn't wait 3 billion years to get His light to you. And even Man has changed his mind from 4.5 billion to now 13, 20, 30 billion years, now this is the life of this Universe.

R: That's a great way to put it actually, yes.

K- Thank you for today, and those of you who join us tomorrow, make sure you come with a full package, we want you to move. Thank you very much Rick, we'll see you next week.

R: Great, thank you Mr. Keshe. All right, well it's been another wonderful workshop here, number 583 in the ongoing series. Thank you everybody for attending today's workshop. We'll be back next week, same time, but it will be in Central European summer time, instead of Central European time. So do note the time change next week, compared with your local time. (2:44) I think the time changes on the Sunday coming up in a few days. Okay, our next public teaching workshop.

K- Before you go, you want to have a meeting of your own Souls this week. A fancy looking picture how you lot been today. Just give me one second, I have to go back. And then I wonder how you lot interpret today's image. You lot's been taking a lot, and your dimension of the STP and the STM are well connected to the Universal Energy, and you're well taking it physically. If you understand it this is where you are. You received, digested, shared, and gave to physicality. What's interesting, if you look, the energy side sits on this side, the physicality side sits on this side. And you see the line of the Soul. And you see the line of the STP, and how STP is feeding the physicality, and how the Soul is taking from your environment. (2:46) Very interesting. See you next week. Thank you very much, Rick.

R: Thank you for the added bonus there, Mr. Keshe.

K- Yeah, it's nice to see how you are.

R: Looks a lot more balanced than the other images.

K- Yeah, today's teaching brought a lot of facts. You know how to wrap it, to connect it. Thank you very much. See you tomorrow.

583 KSW – March 27, 2025

End
