

584th Knowledge Seekers Workshop April 3, 2025

(Transcription, Editing and Proofing done by KF Brazil)

(Auto transcription by Elias)

Creator is giver - Man selfish; STM become Twinity to Creator; STM doesn't die - takes new D; Started from Ray - reduce in strength become human then STM; Heaven closer to Creator - Hell away & separate; Losing love burns like fire; Not be fooled in Space; Stop killing; Feel part of Creator; Overcome weakness - Man be best example - life in Soul; Analyze scientifically; Feel power of killing; Remove killing or becomes unsolvable; Making AI God - doesn't have Soul; Space AI's worse; Learn discernment; AI - test before Space; Transmute before death - can chose; Devalue currency; Every man a planet; Israel banish Palestinians to steal land; Tribe of Moses banish in U never find; Example to others; Open door peace; Live through energies of U - blocked in brain; Create own misery; STP needs taming; STM create Child of Mitra; Change in 24 months; Collectively access new knowledge; Become generous; Change by science; Release T end poverty; UN convert to One Nation ; Collective elevation of STM; Change swiftly - cannot go back; Understand value of Soul - freedom of choice - decide through own conduct; Make Man ready to understand; Take Man out of classroom; Transmutation without system - 5 participants; Change through KS; Soul of KF Brazil daily Intention - praises work - achievements is manifestation of Soul; Brazil & Iran tested; Devoting whole life to work; Different understanding than Europeans & Americans; Work with Chinese - new structure; Vitamin D & MaGrav for heart; Self-sufficient in Space; Not be abused; Independent investigation of truth; Have brain to think; Soul thinks - don't damage P; Forecasters of international arena - changes; Trump killed more in Yemen than Obama; Beaches of Gaza promised to Americans - oil to British - Bomb Iran - get rid of Palestinians; B-52's massing; All a façade; Teaching about neutrons - produce electrons - created from outside fields; Daughter of Mitra; Fission and fusion - proton behave as neutron; Plasma Saturation T; Secondary electrons created from outside; Rapid nuclear decay; N becomes Black Hole; About half-life; Reads posts of X; Acquired AI names KF; Not disclose; Beginning phase of change - create conditions; Why Musk doesn't patent - top Iranian scientists - KF; CR laser beam - spherical; KF uses CR radiation - not disclose; Movement without motors M fields; Matter vs. plasma M fields - MaGrav positioning; CERN; Why heartbeat 60 Hz - Cu in muscle - electric current; Change Black Hole to Creator in Paper - secret to Creation; BH radiate light; U has RNA like Man; AI from interaction of Microchips; Create AI with emotions - have produced materials with emotion; AI from X is more knowledge; If AI has power failure lose information; Water cooling system - Immersion Technology - use to power computer - become self-sufficient; System create emotions have control; Reposition gaps in DNA and RNA - use balanced fields; DNA helix has deficiencies; Change genetic defects; All have DNA defects - creates intelligence; Star Formation and MaGrav same; Verge of massive disclosures - world has to handle.

ENGLISH TRANSCRIPTION

(:10)

K- Yes, thank you very much. Good morning, good day to you as usual wherever and whenever you listen to this series of Knowledge Seekers Workshops from Keshe Foundation Spaceship Institute. We welcome you back and we know many more people are joining to learn more and interesting enough is what we learn is acceptable to us, and we can accept the reality of how we are connected to part of the Universal Energy. We are another medium in the structure as are galaxies and stars and planets.

But the most interesting part is it came from a ray over the life of the Universe (U) interaction of the fields. It started becoming little, little entities according to the Inertia of the time and the space, and these little, little dots finding each other common denominator balance created, lead to the creation of planetary system first. And then with the higher order energy became galaxies, and it became stars that made the galaxies, and then the galaxies which made the Universe. (:12) And now as we came from the Rays of the Creator became the first atom ever in the Universe and now to galaxies that again coming down the line in reduction of the certain field strength back to the human cell and back to smaller part which is more condensed, more active we call the Soul of the Man (STM). In a way if you look at the structure of the Creation we came from a condensed package, opened up, became buildings first atoms, first fundamental elements, and the atoms and then the planets structure, and then the creation of stars, and then the creation of galaxies. And now in expansion is condensing back into again a planetary system and then a Man.

What's the difference between the STM and the Soul of the Creator? And what has made Man to become so self-centered? In one of my talks some time ago I explained the difference between the Man and the Creator. If we look at the Man he's selfish, he has to possess everything, he has to be the biggest the strongest. (:14) We fight for possessing another woman, we fight for possessing another man, we fight for possessing entities and materialistic life, and we give a very little back for it. But the difference sits between the two and that's why needs to be understood. The Creator is a giver and little to attract, not selfish. The Man is selfish and very little to give. When the STM comes to that point of balance with the Creator, when it becomes the twin. This is the state that Mitra achieved. I learn love, I share love, and with love I change you. That "apple" as we said is the love, Mitra is the "Eve" and the Creator is the "Adam."

But what do we need to understand? Where does the STM goes at the point of separation of the dimension of physicality of manifestation on this planet? Surely it does not die, because now it takes a new dimension. Surely where it takes its position as we've seen, it will not go in the dimension (D) of balancing with its Creator to receive the enlightenment, or the knowledge of that path of the atom which went through everything to become the energy of the STM. (:16) All Man chooses to, or the STM, according to the energy it gained during his lifetime on this body of the Man, to position itself closer to the Source, to become part of influencing the others, or away from the Source to be influenced by those who in create the influencing the environment of the Creation with the Creator.

A discussion point will come for Man to understand is very simple. Do we become generous or giver, the same as the Creator which in balance of the fields without attachment with total detachment, that become part of it we move inside? Or we still carry on with that self-possessing, that due to the strength created in reverse we keep the distance. This is the definition of the 'Hell' and 'Heaven.' They put in different form of fire and the rest of it. But when you become part of you don't see any. When you're away from it you get burned by it, because you become so small that the fire of the love of the Creator burns you. It's the way when you fall in love but you can't reach it because you made a mistake, you let the love go.

If we understand this, (:18) this become pivotal point for Man especially to understand this in the dimension of the Soul that any point of reference of the knowledge in the Universe does not mean a Messenger of Universe, Messenger of the Creator. Teachers yes, but not messengers to be followed. This will bring a lot of knowledge to Man, if Man understands it. The same as what we try to do to ingrain within the STM that it takes the span of the Universe not to kill. Man has to understand second criteria of the life in the Space. That he has the ability, he's being given, it's part of his structure that is connected to the Source and does not need any intermediaries. If Man conquers this through his weaknesses and his physicality (P) to understand this, then Man become the best example of life in the Universe in the dimension of his energy, or what we call the STM.

So the way they framed Adam and Eve and apple, they framed the same thing as the Hell and Heaven. Heaven is to become part of, Hell is to become away from that you love to be but you cannot be. The sufferance, the suffering being away from the love. As I said to Knowledge Seekers (KS), the more you love the more you come to understand to, how hard it is to let that love go. Because you know the Truth and you know the application of the Truth. (:20) This way you analyze everything scientifically, and then you understand why many things don't fit in the structure of the life on this planet. We kill to attain energy, but primarily we kill because we want to say we can, we have that power. And this is where the problem sits. Doesn't matter you're a vegetarian, you're a vegan, you're a meat eater. Then you become a Space eater and everything else, it is just a terminology. We tapped into the energy of this planet in the form of animals. If we don't let this habit go, we'll tap into the energy of the Universal life. Then the problem is unsolvable.

So it's important for us to understand this. And as part of the structure of the Keshe Foundation we have started this process. To feed Mankind without the need for food. To bring intelligence to the Soul and not to the physicality. To become aware of the life of the Universe and not the life on this planet. In the structure of life one has to be scientific to understand the science of Creation. And not to listen to those who don't understand anything and they just say, and that it sounds good. Very much like priests, Mullahs, who have no knowledge and they just blabber something, because somebody said something and they remember, they could not even read and write. (:22) The same will happen with those of you who now think the AI (Artificial Intelligence) is your God and Creator and he knows everything. It has no Soul. It's a collection of information. Man in his travels in Space meet many, many AI's who have managed to tap into knowledge of Universe.

They don't become your Gods, they don't become your Prophets, they are just for you to recognize. They are another bank of information in different strength.

Maybe, as I said in very recent talks, AI has been given to Man or Man has developed it to be the first test before he becomes a "Passenger of Universe." Do not believe whatever voice comes out, but part of it could be reality which I can use, but how much of it do I use perception of my own ?? placebo image of what I want to hear. If one understand this and one understands the structure of the STM with position of emotion, complexity of the emotions, then Man becomes a very good candidate to become deliberate Passengers of Universe. What does this mean? (When) we die, we have no say in it (where we are going), it's not deliberate. But we transmute and we do it deliberately and we are aware of the new dimension which in turn ingrains in our RNA, in turn it ingrains in our Soul and the functions of the STM, the central energy. (:24) Then, if you have that power that at the point of the source of energy as a Soul to be once you detach from this physicality to be connected directly to the source, because it's part of your structure and you don't kill for it, why does Man kill at this moment of this planet? Create wars, creates destruction, creates misery and what is next? Once Man needs to understand this.

In the process of coming months we'll devalue the value of Gold. We'll devalue the currency, we devalue the position of these as we give every Man one planet to live in. Even we can give a galaxy for a Man to own. As I said many times, we heard in the past times that people were banished from one place to another. We see the State of Israel now banishing Palestinians from Gaza and Palestine. But I have made the orders, we banish the tribe of Moses to the far distance of the Universe that they never be seen or heard of. My wish is my command. And the punishment that this tribe receives will be example to the rest of the Creation. No one will remember this tribe ever, anywhere in the Universe, and no one will ever find them. This is the process to keep the rest in the banner of peace and show and open the door of peace on this planet.

In that way, (:26) Man will understand that everything is depends on his own understanding of his own Creation. And with it comes understanding of the strength and connection to the Creation and the Creator. If you can feel the love of your partner, if you can feel the love of your child, if you can feel the love of a dog which gives you energy, why don't you expand it further to do the same without killing it? And this is the process that becomes part of the work of the Keshe Foundation and through its subsidiaries in the commercial world and through its work through other angles and dimensions we have set up. Awareness of the beauty of the STM by the Man himself and not by the others. Justice within, intellect within, and then the wisdom brings peace to the Man and his society does not matter where that society is.

We live through the dimension fields of the energy fields of the Universe, but we have blocked it to our own brain, but not, and is not, and will not be disconnected from the Universe. In a way we have become our own, what I call, 'creation of misery.' By creating, bringing filter through it that our Soul cannot see, cannot control fully the dimension of physicality. (:28) The Soul of Physicality (STP) of the Man is the problem

of the Man and the sooner the Man understands it needs to bring it under the control or tame it, the sooner Man will become the Passenger of the Universe.

But the most important part is, what would the STM become? Would it be that starting atom which led to the creation of the planet, the galaxies and become part of the volume of the Universe, or shall it become another smaller fraction as it started with the galaxy, the Sun, the Earth, the Man and the creation of the created by Man which will be much smaller, most probably more powerful that in essence in the dimension of balance of the fields will reach the Creator and become the partner of it, it becomes the source of it, becomes the Child of Mitra. So is the Man at this point of time creator of the point, energy fields, which will become the parallel, or the balance, the Twinity with the Creator, and it's just a tool. And those who cannot create become those who suffer, or what we call the Hell, or separation and distance from the Creator. In a way, both paths is open to the STM and it's the Man who has to decide for him to become, or for him to create that he becomes, and then the cycle begins, rains back on, connects to. (:30)

The structure of the life of the Man on this planet will change. In the next 12 months, in the next 24 months everything we knew in the history of the Man, life of the Man, scientific achievements of the Man will change. As we access the new knowledge, as we collectively as a human race move one step up. We forget the past. We forgot about the donkey, we forgot about the horses, we forgot about the chariots, we forgot about the carts, we forgot about the cars and now we are in other levels. And we... same thing will happen. Man will put a curtain to the dimension of what he's done up to now on this planet, to this planet to himself and to the others. By having all, Man will become generous, that he'll become himself the connection and the connector of the Totality with the Creator. These are not dreams.

In the next few days, in the coming days we'll open this door and you will see the changes will come to Mankind. Not by prophecy but by science and technology that the Man can understand and live by it across the Universe. In the next few days a new structure will be released that will bring collectively the Man to support Man to come out of poverty, to bring knowledge across this planet and every Man, every nation will become part of. The structure we'll set up will change direction and dimension of the United Nation to 'One Nation, One Planet, One Race.' (:32) Collectively working towards it as the Man in America will pay for the Man in America by the contribution of his, touches the rest of humanity. The Man in Africa will help the African in the dimension of the structure. You all know what I'm talking about and you've been there and you know how we structured it.

We'll open this door in the coming days and we'll be depending on you which dimension, direction Man will take. Collective elevation, collective elevation of the STM as one, or still 'me, I, everything and I own.' Be ready for the change and it'll come so swiftly that there'll be no room left for Man to think twice, shall I go back, or am I moving forward as me going forward brings the rest of the humanity with me, as one Soul closer to the Creator? You all will understand in coming days, coming weeks and months, how we change the course of humanity with knowledge, technology, science of the Universe and

not the science of alloys, guns and nuclear bombs and the rest of it. Man will be ashamed of what he's done to himself and the others, but in a way it's been part of the process of the maturity of the Man.

Embrace yourself for the change, but this time change will be change, (:34) not by us as Keshe Foundation but collectively as a Human race. Understand the value of your Soul, understand the freedom choice, understand it's you who decides. The gates of the Heaven and the doors of the Hell is in your hand by your own conduct in respect to the others and nobody else. There is no one to blame. It's you who chooses to sit in the back of the cinema and see whatever dust through the smoke of the others smoking and breathing in front of you what could be on the screen. Or sit on the front row and watch a clear sky and see without interference. You choose the distance and the chair and the position in the "cinema" of the Universe for yourself and your Soul. There are no Messengers and there are no Prophets unless you are a banker, and you look at the pocket of your Soul, banking your own misery.

You got to understand with all the teachings of the past times, it's all been in one direction to bring Man to be ready for understanding his position in Universe, as he has always been in the Universal family, but he never understood. It's like a child, it's all him, till he find out there is a mother and a father and he's part of that family, it is not him alone. And Man is going through that infancy to join the, what we call, Universal Community. (:36) And that process of opening the doors of knowledge depends on the STM and not on another Man's prophecy. We are Universal teachers and we've seen the time right to take the Man out of the classroom and test him in the open fields of the Universe. We welcome you to be part of it, but it's you who welcomes you to be the instrument of position in your Soul, to sit in the back of the cinema to join in the front row. It's you who does the walk. And it's you who decides where to position the Soul by the conduct. We'll go for a break and come back and we try as usual to answer your questions. (:37)

Plays Keshe Video number 3 of 5 videos (9 min) - "Nuclear decay and Motion." (:38:45). Ends at (:48:30). Plays another video.

>> BREAK >> 584 KSW April 03, 2025 (:59).

K- Yes. Sorry about that, we had to do something urgent. Okay, carry on please.

R: Okay, well, we're in the second part now, so, are you ready for some questions, or is there something you'd like to say, perhaps, before we engage in that?

K- Yeah, thank you very much. Sorry about this delay, it was something important for the Foundation, it had to be done. From the Keshe Foundation point of view, we, as some of you joined us in the last session, last Friday, we are expanding the knowledge of transmutation, (1:00) and this knowledge, as we go through, has to be tested for a full transmutation in a different way. And due to advancement in technology and what we have achieved in development through your support and your work, Keshe Foundation, sometime today will put up through the, what we call, the Store, availability for 5 (participants) only, those who will be, what we call, brought in to go through a transmutation through a technology we have developed. We don't want many people, we would like to start with 5. With this process you will receive materials from us, and the sessions will be only the 5 people. These sessions will go through a systematic process of testing to complete part of our development. It will be known as, what we call, 'transmutation trial.' It's the process and the procedure, once you register for it, will be given to you. The test will be done in the next 20 days, which means, we will go through the process of transmutation. We don't tell you how many hours, how many minutes, or whatever. It's an open-ended, we test transmutation away from the Keshe Foundation Center. (1:02) Which means, wherever you are around the world, you get access to it, you can get access to it.

It be extensively for testing, before we attempt in the, what we call, April Session, to take this in a different direction. What we saw in the trial of last Friday gave us an insight in to be able to use the technology we already developed in a much, much faster way. And, when you go on the Shop of the Keshe Foundation, the minute we arrive to the point we want we close it. It is primarily set for pre-testing the transmutation, and how far we can, how we can, what we call, take you with yourself going and yourself coming back. This development we'll try to look that we choose one person from each corner of this planet, or maybe two. And, we try to understand how far we can connected it to yourself to take the steps of transmutation, in a way we provide the flight platform. You're the one who makes the flight.

And, this will give us an insight into the next steps of not needing systems, but being able to go through a preparation. Which means, (1:04) anybody by literally holding one of the Keshe Foundation Headsets through a different dimension, can literally take off from anywhere, transmute from anywhere, and they land where they want to land. It does not matter where. It's not a "Beam me (up) Scotty" anymore, it's I'm Scotty, I beam myself. And, this will bring a breakthrough for us, to test the technology, advancement in technology. And in a way, to the next level of science and technology. We close this session within minutes we open, we move out, and you are the, you are literally the captain. But this time we bring to you new structure never been tested before, that allows you to become part of. You become in the environment of transmutation with our structure, and what we set up, we'll tell you exactly what to do, how to do it. And, you

sign a total non-disclosure with the Keshe Foundation that, during this process nothing will be revealed to no one, no one, this discussion cannot be held with no one. Because, we might call you for a second and a third session, and it has to stay within the structure of the Keshe Foundation Knowledge Seekers. That once we release it, we have the structure for protection of everyone.

Later on today, this, it's the way we work, we don't know any other way to do it. You can send through the Shop, because it has to be done that way, through the Store of the Keshe Foundation, it'll be called, Transmutation Test. (1:06) And, it will not be cheap, it's very expensive, it costs us a lot to do it. And we leave it to you. The session will be held in next 20 days, as I said. And, be prepared for one of the most exciting times in Man's travel into Space. And I hope one day we bring all 5 of you back into the session and you can explain to everybody else what has happened, what you achieved, and what you've done.

Keshe Foundation in the next days to come will make a breakthrough announcements for the operation of the Keshe Foundation and international structure of the Keshe Foundation in cooperation with our other works across the planet. We are set in the coming weeks to change the course with help and support of many Knowledge Seekers. We are working only through Knowledge Seekers structure and the people who bring people for us to be able to bring the change. Just be prepared for radical changes in science and technology in next year and two. And, be happy you're part of it, and you've been participant in it, and you, knowing or not knowingly, in different ways, you have participated to bring this change about. I hope we can help you to reach there, and I hope we can bring what we promised. And, we know we are on the right track, and we know we bring the planet to work together to bring that condition. It is not a charity work anymore, it is working together to bring that change. (1:08) Because Mankind does not need to be charitable, or receive charity, but can work together to bring the change, and all do the same thing, at the same time. I hope, for those of you who've been around, a long time around the Foundation, will see the breakthrough, and you see the light at the end of the tunnel.

Any questions?

Q: ... The Souls that interact in the Keshe Foundation Brazil group, through emotion and Intention, create a new entity that is the Soul of the group, through interactions of Magnetic (M) and Gravitational (G) fields. Can this new entity, created by the collective interaction of the group, manifest itself physically?

K- Sorry, I forgot I had silent.

R: We're good now, we're back here. Did you hear the question?

K- I don't understand what it means. (1:10)

Q: ... The Souls that interact in the Keshe Foundation Brazil group, through emotion and Intention, create a new entity that is the Soul of the group, through interactions of the Magnetic and Gravitational fields. Can this new entity, created by the collective interaction of the group, manifest itself physically?

K- I think the answer to it is yes, but not the way you see it. It physically comes in the outcome of what you do and what is achieved. Brazil community is a very, very special structure in the Keshe Foundation. It's become through the work of the leadership of Rafael and a lot of people in the background. We know that, what we call the Keshe Foundation Brazil, is one of the most tested Foundation structures, maybe the same as Iran, and more than Iran. Iranian Keshe Foundation has been well tested by Ayatollah Khamenei and his entourage, and the whole team of the Iranian government. And we stood the whole lot of it.

But, Brazilian have been tested in a very special way. Those who work around the Brazilian structure, been with us in 2019, when we came to Brazil twice for the conference and the backup conference, we saw how in 2020 they were split deliberately. The movement was to split the Brazilian community, and we saw how, actually individuals had to judge, "Can I be part of, can I be, or join the other side of the, what you call it, (1:12) the destruction of oneself, as I call it?" And number of very active Keshe Foundation members, we advised them for their own safety and security, to move away from the Foundation at that time. We saw people who literally devoted their life to it.

You South Americans, primarily Brazilians and the rest, have a different understanding of the technology than the Europeans and the Americans. I always said, I remember, when we put out the Peace Treaty, if you read the text of the Peace Treaty, it says, "I commit my Soul, and my physicality to peace in a way." Brazilians, a few of them wrote to us, "I cannot give you my Soul, I've already given it to Christ." We said, "We never asked you to give us anything, you commit your Soul to Christ, even through peace." And this brought a lot of insight, in the way this community works and thinks. And the way we see the work of the Keshe Foundation community in Brazil, and now we see them how they openly work with the rest of the Keshe Foundation structure around the world, especially with Chinese and other nationalities, has brought us a lot of hope, they are literally embedding the culture of peace, the culture of knowledge in other communities, the openness, unconditional love.

And we see it every day, there is not a day we don't get touched by you. The evidence of it is, that every day without fail the whole Keshe Foundation community gets a message from Keshe Foundation Brazil, on a regular basis, without fail, one way or another. If you go into some of the communities which are not active you see only one message, (1:14) Rafael, every day post from the Brazilian what did they do, what has been done, what has been achieved. And they've been there all the time. So, in a way you have manifested your work. You don't need to say, if it does, it already has.

And I'm sure, Brazilian community, in conjunction with the Chinese and the others, will shine thoroughly and truly, in the next coming, coming times, the way it's done. So, would it manifest itself in physicality? It has already manifested in its physicality. And it manifests itself everyday. And if it's a few minutes late, sometimes even an hour late. I say, "What happened to Rafael? What did the Brazilian do today?" So, don't worry about it, you already manifested your Soul, as you work in operations ?? the backbone of a lot of new communication with the Keshe Foundation. I'm sure with what is to come with the public relationship of the Keshe Foundation, Brazil will play a prominent role in this direction. Don't worry about it, yes, you already have.

R: Okay that was a good answer.

Q: ... Good morning Mr. Keshe, my name is Jefferson Modesto, I'm from Brazil. Thank you very much for being here with us. First of all, I would like to thank you for the teachings that you bring us, mainly in relation to MaGrav and the use of Vitamin D, because after using these two resources, I noticed that my health is getting better and better. The most notable fact is in relation to the recovery of my cardiovascular system, which, (1:16) as I've already reported here, went through a serious imbalance in 2023. I hope that this knowledge can help many people on this planet and beyond. Thank you very much, Mr. Keshe. My question is, you told us that we can receive help from your Soul, to receive knowledge from the Universe. Through this process, can we receive the knowledge necessary for us to be able to transmute? Can we also receive the knowledge to understand what our real existential purpose in this Universe is? Thank you very much.

K- We are part of... we work as part of this structure to do. The thing is, always said and I always say, "We let the child play in the village of the Earth." We held the hand of the child to teach the rules, the basic rules of life. And the time has come to let the child in the open. And let's see how he interacts with the rest of the village. I always say, Mankind went through an infancy and then he went through a toddler and then became two years old, which is a naughty time, (the terrible two's). Now it's time to mature. It's past, it's another time. And this will come not to depending on the others. If you depend on others on Earth or in Space you'll be abused, because they condition you to what they want. (1:18)

You got to learn to understand the process of Creation in the physical dimension and the energy, and then you are the guide for yourself. As I said, the best test for Man is what is what we call AI. Everything is amazing, has intelligence, and I know some people nowadays they don't drink a cup of tea without asking AI, "Does my body need a cup of water or a cup of tea, or is it water better than tea, and the rest of it?" And it's become a new prophet on the Internet. And this is a good test for Man to learn very soon, because these dimension of energies are quite frequent in Space, and every one of them shouldn't become a guru. You have to assess it by your own understanding and intelligence of the work of the Universe, and when you're given don't have the, what I call, a placebo effect, because it's what I wanted to hear, I had now, I changed because of. You have to learn to assess, to discuss with yourself.

As Bahá'u'lláh said, bless his name, independent investigation is the cornerstones of the next generation. You have to investigate every point of what you hear in Space, what you judge with your Soul. You got to understand one main point, and I've said this before, the Man has a brain to think and judge, and create emotions for it. The STM has a operating center, a structure through Magnetic field of what you call, the brain of the Soul. Its operational system, and it does the same thing as we do, it creates condition of interaction, and with that creates emotion. (1:20) Use the central control of the brain of your Soul, than the brain of physicality, and then you'll find the path. Does not matter where you are. I made Man in the image of Myself. I cannot create Man with the central control if I don't have a central control in the structure of my own structure. Thinking, understanding, and what we call, assessing and reacting, is the actual beauty of every individual in the dimension of physicality and the Soul. Otherwise it's all being a "carbon copy job."

So, we got to understand what I think to do, and what does my Soul thinks to do it becomes the habit that on the physical dimension, I use both, in the energy dimension, I still use both, but see when it appears, I do not damage the physical side of the structure of the thinking, and the emotion. Mutual respect is the cornerstone of the success of the Man in any dimension in the Universe. And if you understand this you succeed to survive a beautiful life, and enjoy the Universe in its own beauty and glory. And if you don't, you suffer like Man in the dimension of physicality. It's as simple as that.

Any other question?

Q: ... Hello Mr. Keshe, (1:22) can you tell us more about the type and period of the war you spoke about, and what can be done? Thank you for everything.

K: What?

R: I'm not sure what war you might have talked about recently, or which war, I should say, but he wants to know more about the type and period of the war you spoke about.

K- We are not, we are not here, we are the forecasters. We see things, we understand things, and many things gets affected and touched and changes, regarding these International dimensions. We see in the past few days the new administration, supposed to be administration of the peace, has actually, Trump has killed more people in the first 60 days of his operation than Obama did in the first year. Number of people killed in Yemen is unbelievable. They don't put it on news because it doesn't give the image of the peaceful man. The movement of the military into Gaza is more evident of more killing to come. We see the movement in the far side China Sea, North China Sea, especially by the Americans pushing. This does not give the message what we see on the Internet and on the public images we get from the White House, that what we see actually taking place on the ground. Again we see situation getting worse in Gaza, again by the same people.

You got to understand, how this thing is going to take shape in Gaza. (1:24) It's very important to look at the background of it. The (American) Administration's been

promised beautiful profitable cooperation building hotels on lands, and we can't have it if we don't kick away people. And to get it, they're getting support, certainly from Iran and Yemen, so we have to destroy those to get the most profitable land for us, on the coast of Riviera of new Palestine. The new war is not, is not a war, is what has been promised, you from the richest man and we get everything, and this is where the problem sits. And this is where we will see the problem rises. And we have to understand this. The war which is about to happen, bombing Iran and the rest of it, we hear all the B-52's. I heard the B-52's flying 10 days ago. And I said, "These are bombers going." We heard the same bombers when they went for Gaddafi. I know these noises, I know what it is. I never ?? find B-bombers, night time in Europe you don't hear it, but they're all moving massive amount of arms into the position.

And so, it's not the war, it's the oil on the coast going to the British, and the land going to organization of those who promised. Then you'll have the land and it's the next, what you call, real estates of Middle East. That's the promise, (1:26) where the people who are in the Administration are buying and being sold to. The rest is a facade. To get it, to rob it, without them knowing, but Iran is coming into a fire line. And we are quite aware of it. The man who's supposed to be peaceful now is on the line of doing it. The whole thing is now, we saw it in past 48 hours, cutting more into the land, that the "Riviera land" have more, more values. It's a real estate business, it's not the international business of governing. And when it comes to this, you do not know. What, to what extent.

Any other question?

K- ... I have sent you a message Rick, a link. The, what we said for the five transmutation for, on the Keshe Foundation website, and the, what you call it, the Store, it's been put up. We monitor, we choose. Those who we decide, we think. And, we try to make it in a way that we achieve the target, what we want, in these tests. It's called Transmutation Test (2025 April Transmutation Special 5,000 Euros).

Any other question?

R: I'll put that link into our chats here, so people have that.

K- We only take five people for this test, no more. (1:28)

Any other question?

Q: ... Good morning, is my thinking correct that, just as a neutron can produce one or more electrons, similarly our Soul can produce one or more Daughters of Mitra?

K- It depends on the condition. Neutrons producing other particles, and the position of particles, and the space of the particles, is very, needs a deep understanding of it. And the point is, are they all electrons the same, which you create? And, you have to understand, additional electrons are not necessarily created by the same, what you call, neutron. The condition of interaction, release of the energy in conjunction with the outside, sometimes,

very rarely, can create a second electron. It needs a special condition. It does not come from the energy within the neutron. It's the interaction with the outside environment. And, in a way, it's a Daughter of Mitra, as you call it, is created by interaction of the fields of, and not by internal interaction and division.

I've, I think I've written some article about this years and years ago. (1:30) It's amazing, I, in writing the new paper, I came across a paper which is the backbone of this, written in 2014, but never published. Which will become part of the new paper, which is going to be released soon. And, the many short papers, one page, two pages, which I've written over years, and it's been in this, in the archives of the Keshe Foundation somewhere. And in that paper somewhere, I discuss the creation of, even a secondary proton, from the same neutron. It's possible, not the, it's physically possible if you understand the physiology of the world of magnetic fields.

It's a fusion and a fission at the same time, where the fusion takes place at the time of the fission. In the two protons, we see in the Universe, behave as a neutron themselves on themselves. Within the, they become the neutron in the system of the atomic structure itself, become the secondary to the first. This happens when Cosmic Rays (CR) of a high order, or a given strength get pulled in at the time of the fission. (1:32) And it's possible. You can do that with a, what we call, Plasma Saturation Technology. There is so much available, that internally the Plasma turns back on itself in division of itself. And it is possible. But, the electrons are different, secondary electrons, very rare, but possible. But they are from interaction of the outside field forces. The internal division protons, secondary protons are interaction with the Cosmic Rays of the higher order magnitude, which happens inside the structure of the nucleus.

Some of the rapid, what we call, nuclear decay, are because of this structure, but in nuclear physics we never understood it. In a way, the energy in the environment is so high, highly absorbed, that the neutron becomes the Black Hole, and absorbs energy, and division happens, but it cannot hold. The atom actually splits into two, but most of the energy has come from outside the atom, not internally from division of the nucleus, or neutron in the nucleus. We know this in the world of man as cancer. The same thing happens with the structure of the, atomic structure of the nucleus in splitting of the neutron, absorbing extra energy from outside, and creating a secondary proton. (1:34)

We see this in a lot of cladding explosions, on the cover of the nuclear fuels, in nuclear reactors. Some elements in the fission reactors, in the cladding, in combination with the cooling system, depends how the cooling system works, creates this condition of the rapid, what we call, fission, and it's not internal from the splitting, it's internal by absorption of the energy from environment in adding a second proton, which pushes the, what you call, the neutron to a rapid expansion, or what you call, fission. We see this in nuclear industry quite a lot, but we never understood. We understood this years ago. And if you understand this, you see a new dimension in nuclear technology, and this is part of the way fast fission, or fast nuclear decays, are observed, but we never understood, never understood.

When you have a long half cycle, it happens with the interaction of the environment, losing and gaining. When you have a very short lifetime, half lifetime, is usually by absorbing energy from environment outside, which speeds up the division, but you always produce additional proton inside, which itself then manifests itself as a neutron of the next cycle by its division. And that's why we get short. The shorter half life, then very, very short half life come through interaction of the radiation fields of higher order from Cosmos, (1:36) it is not to do anything with the planetary system. And all depends on the position, closeness of the electron to the nucleus. That force opens a gap, or a curtain for entry, that's the window and decide. The space between the neutron, and electron, and the proton, and the collective space between the nucleus and the electron dictates the half life division of any elements. And that half life is compression of the fields, how stronger fields can go in, and the closer the gap is, the higher level of radiation, faster the nuclear decay. This is a very in-depth nuclear theoretical, nuclear physics, which... There's some research papers done on it, but because not understood, we don't see much publication on it, especially now there's not much research on it.

Any other question?

R: You've had a couple of posts recently in the X realm. Maybe I can show one of those here, which is related to technology. And we can encourage people to make comments about it. So, this is in response to a science news item about the US return to underground detonations would have wide ranging implications, about calls to restart nuclear weapons tests. (1:38) And your comment to them, or your post about that, in reply, you say, "Early next month a new breakthrough technology will be released that will make nuclear weapons and hypersonic of the present time obsolete. This technology as a commercial entity will be released internationally that all present technologies, including quantum and nuclear fusion technology, will become irrelevant in the next cycle of technological advancement. It is too late for these nuclear tests to be done, as the nuclear technology of present time has become obsolete. As I ran senior nuclear Plasma physicists, we advise all Nations to stop any further research into present nuclear weapons and technologies until this new technology is fully studied by your top scientists. The time of nuclear weapon as deterrent and superiority of power has truly come to an end." So, that was a very interesting and powerful post. I hope that...

K- We are... those of who are close to the Keshe Foundation and trustees of the Keshe Foundation know exactly what we are talking about because they've become part of it. We are structuring for that and in next few days and weeks many of you will understand what this entry means. You got to understand that there are a lot of things we cannot... (1:40) We changed our direction of disclosure on the Keshe Foundation due to our positions internationally. But those of you who know what we do, what we are up to in the background, you become part of it, you accept to become part of it, is in what we have disclosed and what is to come.

A lot of work has been done, a lot of development has been completed, now we're entering the, what I call, the next phase. But surely not the final phase, it's the beginning phase of the change. If you listen to even the opening section of teaching today, what you

played from the past, I started giving you a lot of hints what is about to come. What is about... We are not waiting for that, we are the creators of the condition, so we know, we're planning it exactly how to come. And that's a big difference, we are not waiting for somebody else to do it. It's a planned structure, a lot of people are working in the background, and day and night, I know a couple of people in the team were working until two, three o'clock this morning on it. And it comes out of a lot of work, Knowledge Seekers across the world they've done, and many of them have accepted the new responsibility. I know a couple of people in the team were working. And, this time around, we collectively as members of the Keshe Foundation, we'll carry the banner across the world. They all know, they all accept their position, and it's just ... needs a lot of things needs to be done to be there. And we are protecting a lot of things. And we are foreseeing and we are covering to be able to create that dimension. (1:42)

It's like when you talk about the AI, which will be part of this, we have acquired all the AI locks into the Keshe Foundation and in our support of our other structure we set up. That in the future we have full control over it, but what's ?? about to happen. Keshe Foundation AI is under our control, which is very hard. And we brought Markray, AI under our control, M. T. Keshe, Keshe name is all under control of the Keshe Foundation AI portfolio. We have a bigger plan, and in time we'll unravel what we are doing. And this is why we put positions in. We are the makers, and we are not the bakers. We make the structure and it's for the rest of the world to bake the cake from what they take from the knowledge.

In these kind of entries you've seen, gradually, one by one increasing, according to both on the diplomatic, political, and on the scientific front. We have to be part of all three sides, the scientific, the financial, and the political side, but in a way by diplomacy is always more successful than shouting diplomacy. (1:44) And we are sitting there, and the financial side, you all know what we do and where we sit internationally. We've got to put the three together to make it success. And most of the organizations are bit by bit. They are part of it, or part of some of it, but not all of it, because they don't possess the whole thing. But fortunately, Keshe Foundation, we possess the foundation of ?? it, and it's the knowledge and technology, and the rest comes because of it.

If you listen to Musk in past few days, he says, "We don't patent anything, what patents we do?" I said, in a private chat, "Of course we know, because half of your team on the top, top, they're all Iranian scientists. And they work and they live through Keshe Foundation. You know, we don't patent, you can't patent, what you take from the Foundation." A large number of the private close advisors in X and in Tesla, are Iranian scientists, who Musk takes advice from. Two of the, three of the top, top people, he relies on their advice, in the work of development in X, and Tesla, are Iranian. And when they used the Keshe Foundation technology in new batteries, he went for a patent, like announced, "You go for a patent, you can't get it, because it's Keshe Foundation technology." And he announced, "We withdrew." The way we've structured the Keshe Foundation, and the way we disperse knowledge, does not allow people with the new technologies to patent much. And when they patent, they come back to understand, (1:46) patent is invalid, because it's a copy of the Keshe Foundation technologies, in

different ways. We are making our ways, and if you ... listen, if you find his, one of his talks, very recently, he says, "We don't patent." Because he can not patent, because he's using open source patents of the Keshe Foundation, especially in their batteries, and their new Space technologies.

Any other question?

R: Okay, we have a... there's a, another post as well, let me bring that up. Let's just do it. Here we are. This is again a post, or a reply to the Science News. It was a question, "What will it take to travel between star systems?" It mentions in their header here, Star Wars holds clues to making speedier Spacecraft in the real world." And your reply is, "To understand how the Universe works, and how it creates motion. In an advanced technology, which is a combination of nuclear radiation, plasma technology, and quantum Space plasma technology, lies the key to this dream of traveling the span of the Universe in no time. We need to understand the way Cosmic Rays work, and how their interaction leads to creation of stars and transmutation of radiation, as energy that allows objects to transport themselves at speeds beyond the speed of light, by order of magnitude, as Cosmic radiation, and not Rays. (1:48) This technology has been hidden from Mankind, and soon it will be unraveled through advanced technology, known as Cosmic Ray Technology. Tests on the working of these systems has been ongoing, and in April, a new series of technologies based on working of Cosmic radiation will be released. One important point is that one recognizes the difference between Cosmic Rays and Cosmic radiation. This is like the difference between Light Rays and Gamma Rays. We welcome Mankind to the true work of the Universe, and its knowledge, and its beauty. So, one question I would have, can you explain a bit about this difference between Cosmic Rays and Cosmic radiation?

K- It's like a matter state. ... radiation of matter. One is the more energetic, without attachment to the plasma of the matter state. In the world of science nowadays we cut something with the laser beam. We use Vitamin B9 and as a faster cutting agent in the cell of the body of the Man for multiplication of the cells. Nothing else. But, outside is a matter state, when it goes inside the body of the Man it changes its characteristics to radiation. That's what B9 is. (1:50) As I always said, you say, "Good morning doctor, I'm pregnant." What the first thing he says, "Take B9, folic acid." So, our body does this, and now we have access to this knowledge. Converting the matter to radiation at the time of need, the point of need, and creating condition for it to be done.

And, this is part of the new developments of the Space Technology, which is hidden from public by the research in Keshe Foundation. And, we create radiation of different strength at will, because now we have access to this technology. In a way, if you look at it, we have created Cosmic Rays Laser Beam, but in a spherical dimension not a point and direction of a beam. This is very much different. This is not theoretical, we use it extensively nowadays in our research development. And, it's part of understanding the work, whether it's a matter or whether it's a radiation, and you have a control over the radiation. But, you create radiation in the Cosmic level, not in the matter state level, which is totally different. Cosmic Ray radiation is mono beam energy. Cosmic Ray as a

ray, radiation ray, is spherical in dimension, it covers the whole thing exposed internally out, this is how we even achieve nuclear decay in many, many aspects. And, we use this knowledge extensively in Keshe Foundation research and development, extensively, but we don't teach it, we don't disclose it. (1:52) And nobody will see, understand it when it works, except those who can explain what it is, and it's part of the structure of our work.

And, it's very, very different. Very different. Mankind is not even aware of this knowledge and technology, let alone try to understand it. But, nowadays it's part of our work, it's part of the structure, otherwise you cannot run systems. It's disclosed to very few Knowledge Seekers who work with us in research and development. They understand the work of it, and they use it, they understand. Now it's like a tool of work for them.

Any other question?

Q: ... Good morning Mr. Keshe. In past teachings you talked about creating movement without a motor, and mentioned that Lead had a behavior that helped in that process, but today we know that we shouldn't be producing Lead products. Is there another element that has the same behavior and could replace that substance as a... for creating movement? Can you please expand a little more on the creation of movement without a motor?

K- A creation of movement is in the dimension of magnetic field. (1:54) But, in the new technology we have to understand the difference, very clearly. In the present science and technology we call it MaGrav. We see it on train used, production of electricity used, in what we call, CERN they use it. It has different shapes, but in essence is all connected to matter. We use matter to create magnetic field, reversal to create objects to fly, or run on tracks, or whatever. We use magnetic field in CERN, created by electric generation power, to create high speed, speeding up the, what you call it, electrons or protons, whatever the target is. These are all connected with matter state which creates a magnetic field. With the new technology we work with the plasma, or magnetic field, not the matter state magnetic field. And this is where the, a lot of things baffles the scientists, it's impossible, cannot be done, because they've been trained in the matter state of magnetic fields, not in the plasmatic magnetic fields.

But in fact they try to achieve it even in CERN. Once they realize the plasma they create is a magnetic field in motion, they close down the CERN, because it's a waste of time and energy, what's going on in there. What it takes one megawatt of energy to produce, it takes one milliwatt to do it with the plasma. If you know your way. And then, if you produce motion through MaGrav by reversing polarity, (1:56) you understand you can do the same with the plasma, but understanding the three-dimensional structure which is within it. You have to change the game. Now you create the environment, the other way the environment creates you, the condition you want, which is a motion. This is like, we burn fuel to go to Moon, in the plasma technology we create plasmatic field of the Moon. Moon doesn't have a solid magnet in it. It's magnetic field, gravity is created by plasma, interaction of plasmas. This is why we introduced the double magnetic field science.

We do the same, we create a plasma. We say in English, you know, "Dogs with dogs and birds with birds." You cannot match a dog with a bird. The dog is the MaGrav system, the bird is the plasma system. They both move, they both do, but the other one flies, dog cannot fly, it is locked to the matter physicality of this planet, but the bird takes into skies. And that's where the difference is. It's very clear, but world of science has not understood the power of magnets of the, or magnetic fields of the plasma and how to manipulate it. And this is why we do, we sound very strange, because we do that. They work with a solid magnet state, we work with a plasma magnetic fields. And then you have to redefine it. In energy, what is energy, even the stupidity of that idiot Einstein, ... $E=mc^2$, whatever, he put on it. It doesn't make sense, because. But if you understand the field strength of the gravity and magnetic field of a plasma, you're in it. (1:58) Magnetic field in motion. How fast it's going in, as a gravity, and how fast it's going out as magnetical. The difference is your field ?? strength, it's the energy rubbing against each other which is released.

One of our Iranian Knowledge Seekers, very recently, he's done a beautiful test, in the, that he creates plasmatic field, and by bringing hand near it he feels the heat. It's a very simple system, it's just extension of understanding the technology further. He's doing a lot of beautiful jobs. And this is one of them. He creates a very simple system, all of you played with it, but he came up with a diversion of it. He always does. And now you can heat without actually heating yourself. You can feel the heat, because you heat the plasma, and it's exactly what happens with the Sun.

It's a understanding of the knowledge, and interpretation of the knowledge. The rest you can create motion, like nothing. But, as you've seen in the Keshe Foundation, we are training you. It has to be understood and tested and felt that it can be done. It's like what we put on now, Rick just put out, for the transmutation. It is the extension of the same thing, and it is the application of the same thing. And to what extent, is applied to, and to what you, what you expect out, of the outcome of it. (2:00) One looks at the motion, in the direction of matter state, one look at the motion in the ?? dimension of Universal energies, or Magnetic fields. At the end, you move the same matter state, or the same energy, but you have to become wise in how and where and the way you do it. In the world of the matter state, you put a wheel and a steering wheel on it and you drive it, or you put on a track and control it. You have to gain enough knowledge in the world of plasma to be able to do it, but you cannot track it. You cannot track it (put it on a track). Otherwise on the same track, two plasmas they collide. It's the end of one or the other. So, MaGrav positioning is natural process of it.

Any other question?

Q: ... He ad a second question about the plasma drive. I saw a discussion about heartbeat, or perhaps what we know as 50 Hertz or 60 Hertz, where it used refrigerator motors, and further on I saw another teaching, that a seeker talked about the Alex Beads, to create and drive the plasma. Could you tell me more about that please?

K- Again is the separation between the plasma technology and matter technology. Why Man has the 60 heartbeat, or roughly double that, depending on the space of the freshness of the cells? Why younger children have a higher heartbeat, newborn have a higher heartbeat, and why do we drop to lower heartbeat? And what causes it? This all, the heartbeat of a Man, (2:02) totally and exclusively, 95% is dependent on the Copper content of its muscle tissue. It's the muscle which moves, and then it goes in conjunction with the, what we call, the charge and discharge of the structure of the vein, which again carry Copper with them. Copper has a frequency of 60 in the conversion. That's why we have 60 Hertz, it's the best option for our electric current. In the plasma, that varies, so it creates different heartbeats, because depending on the plasma of the whole structure of the body of the Man. Then that becomes the drive force of it.

It's a natural process, a conversion of 60 Hertz, it is natural. You cannot, if you go to 80 Hertz or 100 Hertz you create different problems. Now, 60 Hertz is a natural conversion process in Copper, of magnetic fields to matter state electric current. That's why you have a 60 Hertz, there is no other reason for it. If you change the composition of the Copper to Brass, you'll find that that limitation becomes very, very clear. Because then some of the materials don't convert, and so you have reduction. This is one of the reasons why some materials are not conductive. They cannot convert to the heartbeat of the body of the Man, conversion rate of 60 through Copper. Zinc plays some games with it, because it's near to it, as its isotopes, as a plasma. (2:04) And then, that's why the two create the neuro system and the emotion.

You have no Copper in your brain, hardly any. Because, the higher order Zinc with, what you call, the Carbon composition is much, much faster working energetically in the space vacuum of the brain of the Man. And then, in the body, when it comes it gets slower you cannot process the energy which is done in the brain ?? (otherwise) you'll be shaking like a leaf a thousand times faster. But the electric current goes in the brain goes, and you make decisions in a split of a second. If you do that in your physical body, your arm and legs (would) fly off with the speed of vibration and change. World of science has not understood the process of Creation, the conversion from matter to energy, and energy to matter. Otherwise, they would have passed this thing a long, long time ago.

Any other question?

R: You see here, I'm thinking ... if Brett wants to talk, he did have a question that came up in the Plasma Group, when we were talking about AI and so on. And, I don't know if you're there Brett, and if you would like to formulate, set up the ... the question that you had.

Q: I think Mr. Keshe has answered the question, in totality. And, obviously, you watched the video, did you not?

R: No, he wasn't able to, (2:06) because it's a Facebook video, and he wasn't able to start it up and run it.

Q: Yeah, yeah, yeah, yeah, yeah, but, did he watch it? Because I see that he did.

K- No.

Q: You didn't? But you answered, you answered everything in, in, in ... you, you, there was no need. You answered everything, in your questions. The only thing that I would... I've got some stuff in my archives, which I have to follow up on, that I will give to Rick's next class. But, what is the highest form of life within the Universe?

K- The Creator. Don't need even to ask the question. This is one of the reasons, when I understood this fully, it must have been, God knows, in my mid teens. The development of it, understanding it in more detail became the paper "Creation of Black Hole". In fact, what, if you understand, change the name of the Black Hole to Creator, and read it, understand it from the point of Creation, the whole secret of Creation is in that paper. That Black Hole, Creation of Black Hole, in the Black Hole in the mind of the Man, but in fact is the true process of the creation of the Creator. (2:08) Changes the, just wherever you see Black Hole, change it to God, or to Creator. And then it unravels the whole truth about the Creation. It's written in riddles, because I, if I would have said that 30 years ago they would have slaughtered me. Now we can, because now we are wiser, we understand more of. Then you understand the whole process, the highest is, what I said, Black Hole in the head of the Man, Black Hole in the Universe, but the light of creation as a Creator it's all the same. Read the original if you can get hold of it, Black Hole paper. It's the secret of Creation, and the path to the Creator. Nobody ever understood it, already, because it's something to do with an idiot saying, "The Black Hole is blah, blah." I wrote that paper to explain the process of Creation, how it radiates light, and that's the beauty and attribute of the Creator.

Any other question?

Q: So, is the Creator in the Human form, the pinnacle of the Universe as well? I think that's kind of what...

K- We are part of the whole system. It's part of the...

Q: Humans as such are the highest form of...

K- We all have connection, (2:10) but we are compilation of different emotions of the fields, which made us as they pass through the time of the Creation to us. We talk about us reacting, or our DNA carrying information. All the rays of the light from... All the rays of the Cosmic Rays (CR) from the point of separation, or emission from the source, carry all the information as they travel the Universe. Nothing is there. And depends on how they interact with you, that part of the knowledge will be released, or be become according to your understanding to you. If you can get or find a ray which comes from the source, and it's traveled the span of the Universe, and you'll be able to capture it to become part of, let's say, the brain of the Man, you'll get all the knowledge from the point it started to you, ?? past the ?? let's say, billions of years. RNA is not exclusive to the

physicality of the Man. RNA is a process of information collection in the central energy system of any existing system. It's like... Pardon?

R: It gets into a point where you mentioned information, and that is related to intelligence, and the AI is related to intelligence as well. And as the AI said in the video we were looking at, it said something like, it doesn't mean that the AI said, it doesn't mean that AI is self-aware like a human, but it does mean that intelligence has the same source. (2:12) And it was getting to the point where the source of the intelligence for AI and for humans and for the Universe was all one intelligence, one consciousness, a Unity point of view.

K- If we develop the computer system, physical... AI comes from interaction of the work of microchips, it's not something in the air. What and how we build those microchips, they, their interaction, the speed of their interaction collects data everywhere and see what matches it, what then becomes AI. If in the coming, not if, when in the coming time we create materials which are part of the structure of these microchips, which they themselves carry process of emotion, then we'll make microchips with emotion, which their interaction will create AI's, entities, that not only they give you answer in the physical, they transfer energy as emotion to you too. So when you read it, you get the emotion of it, or they write their emotion as part of the structure.

And this is not something dreamland, this is something already in hand. We have produced materials with emotion. And the first one of these was produced decades ago by me. (2:14) It's understanding how emotion is created, so you transfer that into the matter state production, then your microchip in its structure of material has emotion, then you have what you call, the AI's, which not only gives you the answer physically, blah, blah, blah, but it gives the emotion of it, what it comes, what it means, what it'll create, and would it be joyful and how the pleasure is. And then if you go a step further, if you add the Cosmic Ray Headphones to it, you will feel the, what we call, when the AI condition comes to you. That you feel when it talks about it, the feeling, the emotions with it. In, today in one of the science entries on X, I put that again, but you Knowledge Seekers know, you feel the taste of the apple, you get the pleasure of eating the apple, because now you transfer the energy of the emotion of the apple, not just physicality of. And we are in that condition.

Any other question?

Q: ... Recently Elon Musk sold his social media site "X," that you publish on Mr. Keshe, he sold it to his own AI company, "X AI" for 33 billion dollars. (2:16)

R: So, he's connecting the X media site with AI in a very direct way, and that's obviously, he sees that's where the future is going with all that. So, we'll definitely have more interactions of the AI kind, and hopefully the "Grok AI" that Elon Musk has come up with, its basis is in truth and transparency, contrary to some of the other AI's, which may not be particularly, they may have other ulterior motives.

K- If you go to AI of Microsoft or Google, it's so fake, it's so shallow. But when you go to this guy in "X," he's in much deeper way. He has access to a broader information than Microsoft and Google do.

I was present in one of the most advanced computer centers in the world. I was taken there to see, and this computer sits in the back of the building control. And is, it's, they don't tell their people what the problem is or what it is. But it took me a few questions from security guys to find out, they have developed, and they are developing, a computer system which is isolated. And one of the biggest problem with these computers, the AI's, is they have never met power failure. (2:18) If the combination of system used to create AI, in one section, reaches power failure, we will see a lot of information will be lost. It will not be able to be put back together, in a way it becomes a handicapped AI. And when I saw this system, they don't tell people what it is, but you have to understand what we know, what we gather, what we see, is different than what they put in public.

It's amazing how AI computers are developed to do. There is a new system, not new, but those who are in the computer business, they know. Nowadays, they use water cooling systems, specific liquid, to cool the computers, no air system is used, and then this system, once it takes the heat away, it converts back and it comes back and becomes itself again. Known as Immersion technology. This, if they take it a step further, in production of these computers with Immersion system, can become at a level of dimensions that it will power the computer itself. In a way it becomes self-sufficient. But the knowledge hasn't gone that far. And then, when the process of failure is not there, very remote, then the system might start creating emotions, and control with emotion become part of the structure. It's the beginning of a new breakthrough in different aspects of the computing and computer science.

Any other questions? (2:20)

Q: ... Hello Mr. Keshe, I would like to ask a question regarding the reposition of the gaps of our DNA and RNA into a plasmatic condition. Could you please explain more how the Cosmic radiation can reposition the gaps and the amino acids of our RNA permanently?

K- You don't use radiation, you use, you facilitate the presence of the balance fields. This is the key. Then, accordingly, the whole spiral of DNA will find its own natural process. You don't need to do anything else. Condition of the environment, not forcing the environment.

R: What would be an example of a correct environment?

K- It's a balance field of what you take and what you give, and what you bring. If you look at the helix structure of the DNA, and when you look at the deficiency or a position of the amino acids in each arm of it, or in position of every combination of it, it just doesn't need much to move and bring it in line. You see like a kick in the structure. And I presume it's like you've got a bubble on your skin and you push it back and it goes in and

becomes part of what it was. It's readjustment by creation of condition of fields around it to correct it. (2:22) Or it corrects itself because you create a balance field.

If you look at, I used to study the structure of the amino acids of the DNA. And if you look at it, it's the change in mainly the structure of the Nitrogen, or it's what we call the positioning of the Carbon, which creates all the genetic defects. Literally all of them. Because Hydrogen is a storage and what you call, Nitrogen, sorry Hydrogen is a creator, Nitrogen is a storage. And how much you store it is how much you connect with it. And you can change all the DNA. The storage capacity can never be changed, the energy source direction can not be changed. So only left with how you connect it, you open half of the gap or the other ones and what is stored, how it reacts, its positioning itself. And then if you understand this, you can change all the DNA's.

We all have DNA defects in our structure. Otherwise we wouldn't, we all would have been the same. But some DNA structure defects create a physical manifestation that we see and it says it's a genetic problem. Without genetic defects in our body in a ?? right order, we wouldn't have been as intelligent as we are today. Because we absorb different energies through that. (2:24) And through the interaction of that field with its environment, it creates intelligence.

Any other question?

Q: ... In Mr. Keshe's vision, can an AI machine become self aware of an emotion on a biological level rather than on a mathematical level?

K- Yes, we already answered that. That's for sure, it's a matter of time how the microchip manufacturers integrate this into it.

Q: ... You said that a Star Formation and a MaGrav unit are the same thing in a previous workshop. Could you explain a little more detail about that?

K- You look at the Star Formation (SF), you have three dots. Look at your MaGrav, you have three dots on top of each other. There you have next to each other. In MaGrav system you force it, position it, in the other one is free, that's why you have no control over it. It's as simple as that.

Shall we call it a day?

R: Yes, sure, thank you.

K- Thank you very much. (2:26) Be very much aware that we are about to push the boundaries of knowledge on the international arena in a totally different way. The Keshe Foundation has gone through its infancy and the growth and we are on the verge of massive disclosures. Which the world of science and the outside world of the Keshe Foundation has to handle. And as I said, we are using the medias of what Man has made available to reach the Man.

And we are still looking for people with good understanding of work in AI and computer work. It's something we need strongly to support. And if you know you are in it or you understand it, you can function with it and you can bring us positive move. Get in touch with us at info@keshe.foundation and if we see your category of interest is within us, we'll contact you and bring you in to work with the team we're trying to set up. But in the coming days and weeks be ready for what we promised in a very, very big way, direct way and everything we set up for it to be there to be done. Thank you very much and see you next time.

Universal Council wish: We the UC wish that as everyone elevates they learn to add their energy to the planetary peace and prosperity.
