

584th Knowledge Seekers Workshop April 3, 2025

(Quick Index 18pp, Introduction, Topic Index ; Need to do; Key Phrases, Words)

(Auto transcription from Elias)

Creator is giver - Man selfish; STM become Twinity to Creator; STM doesn't die - takes new D; Started from Ray - reduce in strength become human then STM; Heaven closer to Creator - Hell away & separate; Losing love burns like fire; Not be fooled in Space; Stop killing; Feel part of Creator; Overcome weakness - Man be best example - life in Soul; Analyze scientifically; Feel power of killing; Remove killing or becomes unsolvable; Making AI God - doesn't have Soul; Space AI's worse; Learn discernment; AI - test before Space; Transmute before death - can chose; Devalue currency; Every man a planet; Israel banish Palestinians to steal land; Tribe of Moses banish in U never find; Example to others; Open door peace; Live through energies of U - blocked in brain; Create own misery; STP needs taming; STM create Child of Mitra; Change in 24 months; Collectively access new knowledge; Become generous; Change by science; Release T end poverty; UN convert to One Nation ; Collective elevation of STM; Change swiftly - cannot go back; Understand value of Soul - freedom of choice - decide through own conduct; Make Man ready to understand; Take Man out of classroom; Transmutation without system - 5 participants; Change through KS; Soul of KF Brazil daily Intention - praises work - achievements is manifestation of Soul; Brazil & Iran tested; Devoting whole life to work; Different understanding than Europeans & Americans; Work with Chinese - new structure; Vitamin D & MaGrav for heart; Self-sufficient in Space; Not be abused; Independent investigation of truth; Have brain to think; Soul thinks - don't damage P; Forecasters of international arena - changes; Trump killed more in Yemen than Obama; Beaches of Gaza promised to Americans - oil to British - Bomb Iran - get rid of Palestinians; B-52's massing; All a façade; Teaching about neutrons - produce electrons - created from outside fields; Daughter of Mitra; Fission and fusion - proton behave as neutron; Plasma Saturation T; Secondary electrons created from outside; Rapid nuclear decay; N becomes Black Hole; About half-life; Reads posts of X; Acquired AI names KF; Not disclose; Beginning phase of change - create conditions; Why Musk doesn't patent - top Iranian scientists - KF; CR laser beam - spherical; KF uses CR radiation - not disclose; Movement without motors M fields; Matter vs. plasma M fields - MaGrav positioning; CERN; Why heartbeat 60 Hz - Cu in muscle - electric current; Change Black Hole to Creator in Paper - secret to Creation; BH radiate light; U has RNA like Man; AI from interaction of Microchips; Create AI with emotions - have produced materials with emotion; AI from X is more knowledge; If AI has power failure lose information; Water cooling system - Immersion Technology - use to power computer - become self-sufficient; System create emotions have control; Reposition gaps in DNA and RNA - use balanced fields; DNA helix has deficiencies; Change genetic defects; All have DNA defects - creates intelligence; Star Formation and MaGrav same; Verge of massive disclosures - world has to handle.

Topic Index

More people joining; Started from a Ray - interaction of fields formed little entities - found common denominator - created first planets; Interacted with higher order energies became stars - galaxies - U; Rays of Creator became first atom ever in U - formed galaxies - reduced further in field strength became human cell - then STM; Explained difference between STM and Soul of Creator; Why is Man so self-centered; Creator is giver - not selfish - doesn't promote Himself; Man is selfish gives little; STM can become Twin to Creator - state Mitra achieved - learned to share love - changed Creator - meaning of "apple" - Mitra is Eve - Creator is Adam; STM doesn't die at death - takes a new dimension (D) - might receive enlightenment; STM chooses path according to energy gained during lifetime on Earth - can go closer or further away from Creator - can influence others; Detached generous giver like Creator goes closer - self-possessing behavior pushes away from Creator - meaning of Heaven & Hell - religious people put as burning fire; Losing the love burns like fire - self-made loneliness; Heaven is joy of love and being connected to everything; Pivotal point for humanity when understands Knowledge of Creation - lives in Soul - not fooled by those with more knowledge when traveling Space; Respect teachers and Messengers of Creator - don't make into god - keep own power of discernment; Understanding difference will bring lot of knowledge; Ingrain in STM not to kill in U; Man will be given ability to feel he is part of Creation and connected to Creator - doesn't need intermediaries; When Man conquers weaknesses in P will become best example of life in U in D of Soul; When experience true love - know how hard it is to be away from it; Analyze everything scientifically; Understand why things on this planet don't fit in structure of U; Kill to get energy, but really want to feel the power - this is the problem; Meat eater, vegetarian, or vegan - all killers - later become Space eater - just terminology; If don't remove killing before going to Space - problem will become unsolvable; Started process to feed Mankind with energy - bringing intelligence to STM aware of bigger life; Need scientific understanding of Creation - not just conceptual; Learn to discern what religious people are saying and what really means; Feel inside if have knowledge; The same problem with making AI their God - have to ask what to do - not think for themselves; AI does not have a Soul - only collection of information; Meet many AI's in Space - tapped into knowledge of U; Don't make them into Gods or Prophets - they have access to another bank of information at different field strength; AI is test before Man goes to Space to discern; Part of knowledge could be useful; Learn transmutation before death - can chose where to go; New D will get ingrained in RNA then Soul - won't kill; Coming change - devalue gold and currencies; Give every man own planet to live - or galaxy; State of Israel will banish Palestinians from Gaza and Palestine; I have made my own orders - we'll banish tribe of Moses to far distance of U - never be seen or heard of again; My wish is my command; Punishment will be example for rest of Creation - not behave this way - no one will remember them; This will open door for world peace; Everything depends on our own understanding of our own creation - strength and connection to Creation and Creator; Can feel love from another - extend it to receive energy - not kill; All structures of KF across world have this work; STM will bring justice, intellect, through wisdom bring peace; Actually already live through energies of U - have blocked it in our brain - can never be disconnected from U; We are our own creation of misery - created filter that stops Soul from seeing and controlling P; Problem is STP - needs to be tamed - brought under control - become Passengers of U; STM can become starting atom of planet or galaxy or a man; Man's

creations smaller but more powerful - can become partner to Creator - create a Child of Mitra; Twinity to Creator; Change will be in next 12 to 24 months - science will change; Human race collectively access new knowledge; We'll forget the past - be on other levels; When have everything we want - become generous - know connected to Totality & Creator; Change not from prophecy - but by science & T; Release T to collectively bring humanity out of poverty across planet; United Nations convert to 'One Nation, One Planet, One Race'; Depends on you - which direction you'll take - collective elevation of STM as one - or remain thinking only of "me"; Be ready - change will come so swiftly - cannot go back to old; Humanity move as one Soul closer to Creator; Man - ashamed of what did to himself and others; It was part of maturing process; Embrace yourself for change; This time it really will be the change; Not be done by KF - collectively as Human Race; Understand value of your Soul - freedom of choice - it's you who decides through own conduct in respect to others; No one else to blame; All the teachings go in one direction - make Man ready to understand position in U; Always been in Universal family - didn't know; Like child finding out he has family; Opening doors of knowledge depends on STM - not a prophecy; We are Universal teachers - time is right to take Man out of classroom - test him in U; You decide position of your Soul by your conduct;

Part 2

New test for transmutation only 5 participants; You make the flight - not the system; Next steps to not needing systems to transmute; Anybody holding KF Headset can transmute from anywhere; Not Beam me up Scotty - rather - I'm Scotty and I beam myself up; Sign non-disclosure agreement - for protection of everyone; Breakthrough announcements in international structure; Working only through KS and people who will bring change; Be prepared for radical changes in science and T in next year or two; Be happy you're part of it - knowingly or unknowingly; Hope we can help you reach what we promised; We know we are on right track - bring planet to work together; Not doing charity work anymore - all working together; Hope to see light at end of tunnel; Soul of KF Brazil Daily Intention manifests P - in work and achievements they do; Praises KF Brazil's work under leadership of Rafael & people in background; Most tested KF groups together with KF Iran - tested by Ayatollah government; Outside forces tried to split Brazil in 2019; Members devoting whole life to work of KF - bring change to humanity; South Americans - Brazilians have different understanding of T than Europeans and Americans; Brazilians said have given Soul to Christ - not sign Peace treaty; Brazil works with rest of KF around world - Chinese; Embedding culture of peace - knowledge into other communities through openness & unconditional love; We get touched everyday by Brazil with what has been achieved - how Soul manifests P; Brazilian community in conjunction with Chinese will shine; KF Brazil will play prominent role in new communications of KF; Using Vitamin D with MaGrav for heart; Receive help from Mr. Keshe's Soul for knowledge & transmutation; Watching child play on Earth - time to let out - play with U; Have to depend on ourselves in Space - or be abused on Earth or in Space; AI best test for Man - understand what kind of intelligence it has; Some treat AI as god; Assess things by own intelligence and understanding of U; Placebo effect - hear what you want to hear - change yourself; Independent investigation of truth - cornerstone of next generation; Judge what hear in Space through Soul; Humans have a brain to think,

judge, and create emotions; STM - operating center through M fields of 'brain of the Soul'; Use brain of Soul - than brain of P - find right path; I made Man in the image of Myself - cannot create central control in Man if I don't have one; Individual has ability to think, understand, assess and react - through P and Soul; Otherwise would all be carbon copy of original; Soul also thinks - becomes habit in physical D - use both; Soul also uses both - don't damage physical side of thinking & emotions; Mutual respect from both dimensions - cornerstone to live in U; If don't understand - suffer like Man on Earth; About the massive war - we are forecasters - many things Internationally get affected, touched, changed by what we say; New American Administration supposed to be for peace; Trump killed more people in Yemen - first 60 days than Obama in first year; Not in News; Military movement into Gaza - Americans in North China Sea; Again by same people; Background about Gaza - American Administration promised profits from beaches of Gaza - first get rid of Palestinians; Attack Yemen and bomb Iran; Not war - part of secret agreement; American B-52's flying over Europe like what they did to Libya to get Gaddafi; Moving massive weapons into position; The oil goes to British - beaches to Americans; Rest is façade; Iran coming into fire line; Neutron can produce electrons - Soul can produce Daughters of Mitra; Need deep understanding - how neutrons produce other particles - positioning; Big teaching on neutrons (N) creating particles like proton and electron; Electrons from fields outside nucleus - not internal from neutron; Create second electron; Daughter of Mitra created from outside fields; While writing new paper on Cosmic Rays (CR); Creation of secondary proton from same N; It's fusion and fission at same time; Proton can behave as N; Becomes second N to first; CR get pulled in at time of fission - Plasma Saturation Technology; Secondary electrons created from outside field forces; Internal division of protons - secondary protons created from CR - inside nucleus; Rapid nuclear decay - not understood; Energy in environment high - gets absorbed - N becomes Black Hole - atom divides in two; Energy from outside the atom; Same thing happens in cancer - energy absorbed from outside; Cladding on nuclear reactors explodes from absorption of energy from environment - adds second proton - pushes N to rapid expansion - fission - never understood; Lead to advancement in nuclear technology - fast fission - fast nuclear decays; Long half-life cycle can lose and gain energy through environment; Short half-life can speed up division through absorbing energy from environment - produce additional protons - manifest as N; Comes from Cosmic radiation; About gap between the N, proton, and electron - stronger fields can go inside - faster nuclear decay; Not understood; Reads posts on "X" about T; US to start underground nuclear tests - warned to stop - obsolete; Nuclear weapons as deterrent and superiority over; Understand in coming weeks; KF cannot disclosures things due to international position; Entering beginning phase of change - not final phase; Not waiting because we are creators of conditions of change; KS across world have accepted new responsibility; Protecting a lot of things; KF has acquired AI names; We make structure - rest of world to take from knowledge; Have all 3 sides scientific, financial, political; KF has knowledge & T - rest comes because of it; Why Musk doesn't patent anything - using KF T; Half of his team are top Iranian scientists - work through KF - can't patent; KF T in their new batteries - withdrew patent; Another post about space travel; What is difference between Cosmic Rays and Cosmic radiation; More energetic - without attachment to plasma of matter state; Laser beams to cut things; Body uses Vitamin B9 folic acid - faster cutting agent for multiplication of cells; Converts matter to radiation at time and

point of need; This part is hidden from public - create radiation at will - access to this T; Cosmic Ray Laser Beam - spherical D not point; Have control over radiation - create at Cosmic level; CR radiation is mono beam energy - CR as radiation ray is spherical - covers whole thing; How achieve nuclear decay; Use this knowledge extensively in KF research and development - don't teach or disclose; Mankind not aware of this knowledge and T; Cannot run our systems without it; Few KS know about it; Creating movement without motor - through M fields; Difference between matter state magnets and plasma M fields - MaGrav positioning; About CERN; In plasma - match same fields together; For plasma have to redefine energy - not $E=mc^2$ - no sense; Energy is M fields in motion - how fast it's going in as G, and coming out as M - difference is field strength - energy released when rub up against each other; KS heated hand with plasma - like sun; Can't put two plasmas on rail track - collide; Teaching about heartbeat having 50 or 60 Hertz; Depends on freshness of cells; Heartbeat dependent on Cu content in heart muscle - together with charging and discharging of veins; Cu has 60 Hz frequency in conversion - best option for electric current; 80 or 100 Hertz create problems; Why some materials not conductive - cannot convert to heartbeat; Isotopes of Zinc near - both create neuro system and emotions; Little Cu in brain - higher order Zn with C - much faster energetically in brain's space vacuum; Electric current - split second decisions; Arms and legs fly off; Creator is highest life form in U; Change Black Hole to Creator then read Black Hole paper - contains secret of Creation; Black Hole in mind true process of creation of Creator; Written in riddles; Light of Creation & Creator - same; Black Holes radiate light; Humans compilation of different motions of fields; Fields from beginning of Creation; If CR comes from Source - carries all information of U - U has RNA like Man; AI from interaction of Microchips - depends how built - what interact with - speed of interaction - collect data everywhere take what matches - this is information of AI; Create AI with emotions transfer emotion with information; Already have this T in our hands - have produced materials with emotion - decades ago; Add KF Cosmic Ray Headphones to it - feel AI - like feeling taste of apple - transfer energy of apple's emotion; AI from Microsoft and Google shallow - deeper more information from "X"; Developing isolated computer; Problem if AI has power failure lose information - becomes handicapped; Using water cooling system - specific liquid to cool computers - converts it back; Immersion Technology; Use to power computer - become self-sufficient; System might start creating emotions have control over own emotions; Beginning of new breakthrough; Reposition gaps in DNA and RNA - not with Cosmic Radiation - facilitate presence of balanced fields - is key - use condition of environment to balance DNA - not force; Balance field is of giving and taking; DNA helix has deficiencies - adjust through fields around; About genetic defects - how to change; We all have DNA defects - otherwise not have intelligence - absorb different energies through them; Star Formation (SF) and MaGrav same - MaGrav have to force - SF is free can't control; KF about to push boundaries of knowledge internationally; Gone through its infancy and growth - on verge of massive disclosures - world of science & world outside of KF have to handle; Reaching the man through own medias; Still looking for people - knowledge in AI;

**Introduction to 584 KSW - Preparing for Upcoming Change -
Learning to Give - Types of Knowledge - Brazilian Group Soul -
Behavior of Neutron - Why Heartbeat 60Hz - God is a Black Hole**

The overall theme of the first part of today's workshop seemed to be pointed at getting us ready for the change that is about to come to humanity. First Mr. Keshe summarized how all of Creation came out of a Ray of the Creator and then reduced in M field strength and became the stars, and the stars became the galaxies and the universe (U). The planets were formed and then further reduction in strength led to creation of humans and at the same time the Soul of the Man (STM) was created. In the past he has explained this in different ways, but the main point is that we were created out of the fields of the Creator and are therefore connected to the Creator and all of Creation. This is something we have forgotten during our life on this planet and he is reminding us to think about our life in more detail.

Out of this came the question, what is the difference between the STM and the Soul of the Creator? This is relative to the time we are living in. At the moment, Man has become so self-centered that he wants to possess everything. In effect, we have become mostly takers, but when we understand about the Creator we find that He is a giver and doesn't promote Himself, or force Himself on others. It's for us to look inward and discover why there is this difference and how it started. Some of the things we learned in past teachings may help us ponder this. For example, we were taught that the Soul of the Physicality (STP) and the physicality (P) were created first and then the STM was added to it. In this way the STP was ignorant to the Soul, or not enlightened to the Knowledge of Creation and instead felt separated and alone, and that it has to fight to survive and get energy to live. This led to the killing and destruction. Somehow in our brain we blocked the connection to the Soul and didn't know, or refused recognition that we were already being fed by the fields of the U. And now through the KF plasma systems we are learning how to receive the fields to live and this will stop us from having to kill other beings like plants and animals and take their energy. However, he did add that man has come to enjoy killing because he feels a power in it. But when we feel satisfaction and connection to everything in our emotions then we won't need to feel that power. This is just a small example of how we can work with today's teaching to ponder our life more deeply to prepare for the upcoming changes. However, each of us will need to find our own way to work with this knowledge and to apply it in our life so that it is living and real, and not just something conceptual, or an idea to follow.

This will be very important when we start traveling in Space, because we will meet other Beings who have more knowledge than us. We don't want to repeat the same problems we have now on Earth where we make anybody who talks something we don't understand into our guru. The root of all this is that we don't think for ourselves, and we are trained that way since childhood. The kind of education we receive is what I call, "consumer monkey" education. We are trained to parrot back what we hear and read and not go deep into understanding the knowledge, and then to buy the things they show us. The American culture has spread this disease throughout the world, because it stimulates business and keeps them in the position of power. If you don't believe this, then ask yourself, where do all the countries of the world send their upper class to get educated? For example, in Brazil all those who operate the Media get educated in America, and when they come back, what kind of news, movies, and advertising do you get? Isn't it a

copy of America? Don't people boast that they were educated in America, or like to say, my son lives in America? We are not trying to be anti-American, we just want you to think a little bit about how all of us are programmed to think and feel. This happens subconsciously and we are not aware of it.

There are different levels of understanding knowledge. The first and most prevalent is to read books and what's on the Internet and then repeat it back to ourselves and others, and then we think that we understand that subject. This is far from the truth. Another type of knowledge is to study something and then put it into practice in the "real" world. For example, you can read about farming, but you won't really know what farming is until you actually do it. You have to get your "hands dirty" with trying it and making mistakes and learning from those mistakes. But there is more to it than just doing it. There is an emotion of the knowledge that has to be entered into. When you love something then you want to go through the pain of learning and you give all your time and energy to it. It's like a birthing process. There is that discomfort from not knowing something, and to get rid of that feeling, we are driven forward to learn more and more about the subject. As we continue on this journey there comes a turning point when suddenly a "light switch" is turned on and we understand the subject. One minute it was a fog, and the next minute it's clear and we understand it. We still can continue to learn more, but we know the 'overall picture', and it has become part of our being. Other people then recognize that we have mastered this subject.

In Astrology we have 12 developmental cycles representing the 12 Houses of the Zodiac. The first House is Aries, or "a burst of Energy into space," and the 12th House is Pisces, or the "dissolution of the rational mind." This is according to Wolfgang Döbereiner and what we call, "book knowledge" is the 3rd House or Gemini. There is no emotional connection to this knowledge, it is just cold factual information. Whereas the 5th House or Leo, is knowledge with heart and Soul. There is a very clear difference between the different types of knowledge. If we can apply this understanding to the Knowledge of Creation, then we will get enlightened and when we travel the U nobody will be able to fool us, or to enslave with their understanding. We'll be self-sufficient, or what Mr. Keshe calls, the "last man standing." Mr. Keshe is the best example of someone having the Emotion of Knowledge. Whereas, those who only have 'book knowledge' in the physical dimension will try to force the others to believe in them. Unfortunately, this is what has happened to science today. And we don't want this to happen to us when we go into Space. So for right now, we should become aware that there are different types of knowledge and we make the decision for ourselves whether we want to stay ignorant with the "herd," or to take the "Hero's Journey" of self-discovery. If we have the devotion to Truth, longing to know, and work hard a point will come when the Light of Knowledge will dawn in us and then we can easily learn any subject. When we understand the Knowledge of Creation, then we will feel how the "information" of a particular subject is put together, and we'll understand how it works. When we understand the Knowledge of Creation and how things work, we don't need to study each subject for years and years.

We've talked about the true meaning of Heaven and Hell before. In my opinion these concepts were written into the scriptures as a way to control the "monkey man," or should

we say the Man who was and is, at the level of the animal. We are not trying to discredit the animals, but we mean when humans fight each other to fill their belly with the carcasses of other living Beings, or just to feel power and enjoy themselves. It is pretty disgusting, but it is for us to understand, if it is true or not. So heaven was the promise of sensual enjoyment of the physicality (P), and hell was 'fire and brimstone' as a deterrent from doing bad things. Later the leaders understood they could control the population through these concepts, so they never taught their true meaning. But to understand it you would first have to know what spiritual love is, and experience it. Heaven is when you are part of the love and you become a co-creator in expanding life in the U. The result is that we become closer and closer to the Creator. And hell is to be cut off from that love. In reality, we can never be cut off from God's love, because we are made out of His fields and are always a part of Him and His Creation. But through the Ego, and the Mind's thoughts we believe that we are cut off. For these words to mean anything we have to first experience that love and then we'll know how it feels when we block ourselves from receiving it. And it really does burn like a fire. Through life experience we mature and finally realize that it is actually us who determines if our life will be a heaven or a hell. This is another reason why we have to learn how to analyze things scientifically. In this case the word 'science' is referring to the higher science of the Soul and not the P. And it is the STP that needs to be tamed and brought under control. It seems that we create our own misery because the STP doesn't know the STM. Our work is to bring ourselves and then others the elevation and knowledge.

At the end of the first half of the teachings he said, we should embrace ourselves for the change that is to come in the next 12 to 24 months. The change will be so swift that we will not be able to go back to the old ways. And we as Knowledge Seekers (KS) will play a role in deciding for humanity what we will do with the knowledge that will be released. Will we share with everyone and bring the advancement of the whole human race, or try to use it only to improve our own lives in the way humanity is functioning now? In this process, the United Nations will be converted to the One Nation, One Planet, One Race. In other words, the control will be taken from the fake UN and the knowledge will be shared with the whole planet. And one of the first technologies released will collectively bring mankind out of poverty. These changes will take place not because of some prophecy written thousands of years ago, but because the STM will become enlightened to its true nature and will make it happen through its own decision and power.

Years ago Mr. Keshe explained how the Brazilian Daily Intention group formed a Soul, and he was asked if this Soul can manifest physicality. His reply was yes, it is manifesting physicality now, but not the way we think. Then he went on to praise all the efforts of Rafael and his team in the background, and what they are achieving through their devoted service to humanity. This group has been heavily tested and instead of believing all the lies they turned within and followed what they felt was true. The difficulties they went through strengthened them to keep their commitment to the Ethos of the technology and they have been instrumental in making the knowledge accessible to the whole world. He also said, the Brazilians and others have a different understanding of the technology than the Europeans and Americans. This was very evident when they were asked to sign the World Peace Treaty and some replied that they have already given their

Soul to Christ. Even though they weren't asked to give their Soul, it shows that they are loyal to what they commit themselves to, and they have a deeper spiritual understanding of the technology. They unconditionally share the technology with all countries and are especially working with the Chinese and together they will shine in bringing the technology out in the future. This is an example how the Soul manifests itself in physicality.

There is a very important teaching about the neutron (N) in how it produces other particles. In an older video during the break that was played, Mr. Keshe explained about how the N divides and creates a proton and an electron (E). Try to watch it several times. I will attempt to summarize what I understood. In the video it was said that the N is a fundamental plasma and that inside the N are Matter - Dark Matter - Anti-Matter and some other field forces in the center. When the N has too much energy it divides into a proton and an electron (E). These are actually plasmas made of the same stuff that is in the N, and not something different even though they have different names. And what makes the E orbit the N, is through M and G field attractions and repulsions because they are dynamic plasmas and they are made of the same fields, and this is what is called MaGrav positioning. As he said in the video, they come close and reach their field boundary, and then push away from each other, and they keep repeating this. And this is how the E orbits the N. It's very simple to understand.

The next part was that it is possible that the N can create a second proton. It is rare but if it does, then the energy comes from fields outside the nucleus, and not from internal fields. He said, it was also possible to create a second proton from the same N. This comes from a special case when a fusion (two merging into one) and a fission (one splitting into two) occurs at the same time. This teaching is mainly for nuclear physicists, but it is interesting for KS to be aware that a plasma, or a N is not some dead concept, it's a living entity and it can do many things we never imagined possible in matter state. When scientists see protons or electrons suddenly appearing they don't know what to make of it. They can either document it or just ignore it. Another thing is that when there are 2 protons one of them can act as a N. Again this indicates a living entity. When a second proton is created it does it through interaction with Cosmic Rays because they are of a higher order magnitude, which are from outside the nucleus. The connection he was making with the creation of a "Daughter of Mitra" from our Soul, is that the energy comes from outside and is not from internal division. I understand this to mean that there has to be an outside energy that interacts with our Soul, like a lover, and that our Soul doesn't just divide itself out of nowhere. We maintain the integrity of our internal structure. And yet it is something that could happen for other reasons. If during fission which is splitting of the N there are higher order CR entering, then with the extra energy the plasma could turn back in on itself and divide. This is called, Plasma Saturation Technology. There are things that can happen like rapid nuclear decay, which is being able to speed up a process of N division. These are important for the scientists to understand. There is also something where the N absorbs high energy and becomes a Black Hole, which would absorb even more energy, but then it becomes a provider of energy. There's more about half-life division of elements. Please study this teaching more closely.

He said the difference between Cosmic Rays (CR) and Cosmic radiation is like the difference between Light Rays and Gamma Rays. I am assuming the Cosmic radiation is the one that is more energetic and doesn't have attachment to the plasma of matter state. The example for cosmic radiation is Vitamin B9, or Folic Acid that is used by the glands to cut cells and convert matter. B9 remains in the matter state outside the body and inside the body it converts to radiation when needed to cut cells. KF has developed a CR Laser Beam that works as a sphere and covers ?? the whole object and not as a point to cut. They have control over the radiation and can create it as the Cosmic level. This is not understood by scientists and they won't disclose it to anyone. It's needed now to run their systems and to do research and development.

There was a discussion about creating movement using M fields. Organizations like CERN and the high speed trains are using magnetic fields but only in the matter state and not the plasma state. In the plasma state it has to do with working with the G and M fields strengths and that Energy is M fields in motion. And the Energy released depends on how the G and M fields rub up against each other. These are hints for us to work with. A KS did manage to create a system that rub plasma fields together, and he felt heat in his hands when he put them in the fields. This is an example of how the Sun works. If we develop this understanding further we can create motion using plasma fields.

The teaching on the why the heartbeat is at 50 or 60 Hertz has a lot of hidden knowledge in it that I could not understand, so please study this one carefully to get more out of it. The heartbeat is dependent on the Cu content in the heart muscle and it has something to do with its movement together with the charging and discharging in the veins. This must be related to the Fe M fields in the blood, but also the Cu. He said the Cu has a conversion frequency of 60 Hertz and that's why 60 Hertz is the best option for making electric current. Again there is a huge hidden knowledge here. What has generating electric current in the power stations at 60 Hz have to do with the heartbeat in the Man's body? In matter state we just don't have any connection. Is it that subconsciously when they built the power stations they knew to use 60 Hz, or there would have been huge health problems created across the planet? This is so fascinating, but we just don't have enough knowledge to go further with it. It's also the reason why some metals are non-conductive, because they don't match with the 60 Hz of the Cu in the heart muscle and heartbeat. The linkage must be at the plasma level, and we know that electric current is really M fields in motion. There is something about the Zn and C in the brain being able to handle the faster energy of the electricity in the brain, and why we can think so fast. And if the same energy were used in the Cu of the body it would vibrate too much and the arms and legs would fly off. This all has to do with how matter is converted to energy, and energy to matter, which our scientists don't understand.

The Creator is the highest form of life in the U. Is that because He is the Totality of all life in the U? Mr. Keshe said, that while reading the paper on the Creation of Black Holes, everywhere the words Black Hole appears, change it to God, then we'll understand the secret of Creation. The Black Hole (BH) in the mind of the Man is the true process of the creation of the Creator and it unravels the whole truth about the Creation. The little

bit I can understand about this is that a BH is heavy G and pulls all the fields into itself, but then becomes a source of energy and radiates M fields. So in reality it can become a source of light because light is M fields. The problem is in the physical D we see the light of the Sun and think it is different than a BH, because we don't understand the essence of it is really M fields. It's about perception and understanding the Knowledge of Creation and how the U works, and not what we see through our eyes only.

KF already has the knowledge to produce materials with emotions that can then be used to create Microchips with emotions. This in turn will create computers and AI with emotion. There is something called, Immersion Technology which uses water to cool the computers and then they feed back into the system, and somehow this energy can be converted into power to run the computers and they will become self-sufficient. This will keep them from losing data if they experience a power failure. These self-sufficient computers can eventually create emotion. But it is not understood yet how.

What we call, genetic defects that come from gaps in the RNA and DNA have a bigger purpose. They create different M field interactions and we absorb certain energies that lead to intelligence in the Man. Are the genetic defects that appear in the physical D just a by-product of the creation of intelligence? It's hard to say. But we don't need to interfere with them. Instead by creating a balanced field the DNA will correct itself.

We should be aware that KF is about to push the boundaries of knowledge in the international arena in a totally different way. We have gone through our infancy and growth, and are now on the verge of massive disclosures, which the world of science and the world outside of KF have to handle.

Other topics:

If humans conquer the weaknesses they have in their physicality, then they will become the best example of life in the U in the dimension of the Soul;

There is a 'brain of the Soul' the STM operates from and creates emotion. This brain will take you on the right path, rather than the physical brain;

Thanks for listening.

Quick Index

(We know many more people are joining in to learn more and how we can accept the reality of being connected to be part of the Universal Energy. We are another medium in the structure just like the galaxies, stars, and planets. ?? The life of the Universe (U) started from a Ray and the interaction of the fields formed little entities according to the Inertia of the time, place, and position (TPP). ?? All the little dots (of life started forming and they found a common denominator with each other and created a balance and that led to the creation of the first planetary systems). ?? And then they interacted with higher order energies and became stars that made up the galaxies, and then the galaxies made up

the U. ?? The Rays of the Creator became the first atom ever in the U ?? and then formed the galaxies. As it reduced further and further in field strength it became the human cell and then a ?? smaller part became more condensed and active and formed the Soul of the Man (STM). (?? When the condensed package opened up it created the first atoms and fundamental elements, and then the planets, to the stars, and eventually the creation of galaxies. ?? It expanded and then condensed ?? again back into a planetary system and then to the creation of the Man)).

(What's the difference between the STM and the Soul of the Creator? And what has made Man to become so self-centered? In one of my talks I explained the difference between the Man and the Creator. If we look at the Man he's selfish and he feels he has to possess everything and be the biggest and strongest. We fight to possess another woman or another man, and for possessing entities and materialistic life, and we give very little back for it. The difference is that the Creator is a giver and is not selfish, (and he doesn't promote Himself). Where the Man is selfish and gives very little. When the STM comes to (a balance point with the Creator, then he will become Its twin). This is the state that Mitra achieved, she learned to share love, and with that love ?? she changed Him. This is what is meant by the "apple," it's the love, and Mitra is "Eve" and the Creator is "Adam.")

(Where does the STM go after it separates from its manifestation of the dimension (D) of physicality on this planet? Surely it does not die. Rather it takes a new dimension. (?? Maybe it will go to the D of balancing itself with the Creator to receive the enlightenment, or follow ?? again the path of knowledge of the atom which went through everything to become the energy of the STM). ?? The STM chooses its path according to the energy it gained during its lifetime in the body of the Man. ?? It can position itself closer to the Creator or further away. (?? When it goes closer it can influence others to themselves become closer to the Creator and will influence the environment of the Creation with the Creator)).

(?? We should discuss this amongst ourselves and understand whether we want to become a generous giver who is detached like the Creator and is in balance with the fields, and is without attachment. When we do then we ?? move closer inside. Or we still carry on with our self-possessing behavior, which because of the field strength it pushes us away from the Creator a greater distance. This is the definition of 'Heaven' and 'Hell,' heaven brings you closer to God and Hell further away. The religious people put it in different forms of burning fire and the rest of it. ?? When we ?? go closer to the Creator ?? (we become a co-creator and feel the joy of love. When we move away then we get burned by (?? losing the love, or not being able to feel it. We burn in the fire of our self-made loneliness. In other words, in heaven we feel the joy of love and in hell we burn in the separation from the One who truly loves us)).

(?? A pivotal point for humanity will be when he understands the Knowledge of Creation and lives in his own Soul, then we won't be ?? hypnotized by those in the U who have more knowledge than we do. (?? Teachers and Messengers of the Creator are to be respected, followed, and listened to, but not worshipped as a god, in that we lose our own power of discernment. When we understand the difference it will bring lot of knowledge

to us). In the same way we are trying to ingrain within the STM that when it travels the U not to kill. This is the second criteria for living in Space. ?? Man is being given the ability to understand that he is part of the structure of the U and is connected to the Creator himself and does not need any intermediary. If Man conquers these weaknesses in his physicality (P) then he will become the best example of life in the U in the D of the Soul or Energy)).

(Again, Heaven is to feel we are part of the Creation, and Hell is to cut ourselves off from the love we are constantly being given. The ?? true suffering is to be away from the love. And when we learn what true love is, then we will understand how hard it is to be away from it. Because ?? then we'll know the Truth and how to apply it. (And in this way we'll learn how to analyze everything scientifically, and when we do we'll understand why so many things don't fit in the structure of the life (of the U) on this planet. We kill to get energy, but primarily we kill because we want to (feel we have the power), and this is where the problem sits. It doesn't matter whether we are a meat eater, vegetarian, or vegan, we are still killing. And then later we'll call ourselves a "Space eater" and everything else. We just use terminology without understanding it. Killing means we tap into the energy of this planet in the form of animals (and plants). And if we go into Space without first giving up this habit, we'll start tapping into the energy of the Universal life, and then the problem (will be) unsolvable).

(In the KF we have started the process of feeding Mankind with energy instead of physical food. We are bringing intelligence to the STM and not to the P, so that it becomes aware of the bigger life in the U, and not just on this planet. We have to become scientific in our understanding of the science of Creation, (and not just conceptual). (We should learn to make the discernment of the knowledge when we listen to those who just repeat religious ideas from what they only read about in their scriptures like the Priests and Mullahs). (We'll be able to feel inside whether someone is just repeating words, or they have true understanding of the essence of the knowledge. ?? In the past, many of these clergy could not even read and write. It will be the same now with the AI (Artificial Intelligence), where people are ignorant and they start making the AI their God and have to ask it what to do, instead of thinking for themselves. The AI does not have a Soul, it's just a collection of information. When we travel in Space we'll meet many of these kind of AI's that have managed to tap into the knowledge of U. Don't make Gods out of them, or make them into Prophets. They are just there for you to access another bank of information which is at a different field strength)).

(In a recent talk I said that maybe AI was given to us as a first test before we become "Passengers of the U." Try to discern and not just automatically believe whatever voice you hear that has knowledge. But part of it could be reality, which we could use. (Through experience we'll learn how to make that distinction. And we'll do that by becoming aware of our Soul. Then we'll understand the structure of the STM in regards to emotion, and the complexity of emotions. Then we can choose to become deliberate Passengers of the U. (This means that if we die without getting enlightened to the STM, then we'll have no say in where our Soul goes. But if we can transmute then we can go where we want to. ?? We'll become aware of the new dimension, which will get

ingrained in our RNA, which in turn will ingrain our Soul. (?? Then when we leave P we'll be connected to the Source and we won't kill for energy)).

(In the process of (change that will begin in the coming months we'll devalue gold and currencies across the world. And then we'll give every man (their own planet to live on, and we can even give a galaxy for a single person to have on their own. Throughout human history we have heard of people banishing other peoples to live in another place not their home)). Today, we hear that the State of Israel is now going to banish the Palestinians from Gaza and Palestine. But I have made (my own) orders, and we'll banish the tribe of Moses to the far distance of the U where they will never be seen or heard of again. My wish is my command. This punishment will be example for the rest of Creation (not to behave in this way). This tribe will never be found again, and no one anywhere in the U will ever remember them. This is the process (we have to go through to open the door for peace on this planet)).

(In this way, humanity will understand that everything depends on his own understanding of his own Creation and on the strength and connection to the Creation and Creator. If we can feel the love of our partner, our child, or our dog that gives us energy, then why don't we expand it further and (receive the energy so we don't have to kill?) This is part of the work of the KF together with its subsidiaries in the commercial world, and other angles and dimensions we have set up. It's the awareness of the beauty of the STM by the Man himself and not by the others. (Within him is justice and intellect, and through wisdom it will bring peace to the Man and his society, and it does not matter where that society is)).

(We actually already live through the D of the fields of the energies of the U, but we have blocked it in our own brain, but (it cannot be disconnected from the U). In a way, we have become our own what I call, 'creation of misery.' We have created a filter that stops the Soul from seeing and controlling the P. The Soul of Physicality (STP) of the Man is the problem of the Man and the sooner we understand that it needs to be tamed and brought under control, the sooner we will become the Passengers of the U).

(But most importantly what will the STM become? Would it become that starting atom that led to the creation of the planet, and galaxies and become part of the volume of the U? Or shall it become small fraction (or fragment that is used to start a galaxy, Sun, Earth, or even the Man? ?? Man's creations will be much smaller, but most probably more powerful and in essence in the balance of the fields will (be able to) reach the Creator and become Its partner. (He can create a Child of Mitra. ?? Then the Man would become a creator of an energy field that would be parallel, ?? or create a balanced interaction with the Creator, what we call, a Twinity. He would just be a tool. (This is the heaven, and the hell is when we cannot create and we suffer the separation and distance from the Creator. Both paths are open to the STM and it's the Man who (decides for himself which way to go. If he goes the way of creation then he ?? begins a cycle of creation that will be connected to and eventually rain back on the Creator)).

(The structure of Man's life on this planet will change in the next 12 to 24 months. All the scientific achievements we have ever known throughout our history will change.

Gradually, as we access the new knowledge we'll move one step up collectively as the human race. We'll forget the past and traveling with donkeys and then horses, and from carts to chariots and then cars, because then we'll be on other levels. (?? The same thing will happen and we'll just put a curtain of forgetfulness to everything we have done up to now on this planet, to ourselves and others). When we have everything we want, then we'll become generous and we'll know we are connected to the Totality and to the Creator. These are not dreams).

(In the coming days we'll open this door and you will see the changes that will come to Mankind. It's not by prophecy, but by science and technology that the Man will understand and be able to live by it across the U. In the next few days a new structure will be released that will collectively support Man to come out of poverty, and bring knowledge across this planet and everyone in every nation will become part of it. The structure we'll set up will change the direction and dimension of the United Nations (and convert it to 'One Nation, One Planet, One Race.' The whole planet will collectively work towards this). The Man in America will pay for the Man in America, but his contribution will touch the rest of humanity. The same goes for the Africans and the rest. You all know what I'm talking about and you've been there and you know how we structured it).

(We'll open this door in the coming days and we'll be depending on you for which direction and dimension humanity will take. Will you decide for collective elevation of the STM as one, or will you remain thinking only of "me" and everything and I own. Be ready for the change, because it will come so swiftly that there'll be no room left for Man (to have doubts or try to go back to the old. We'll all move forward together as one humanity, and as one Soul closer to the Creator. You all will understand in coming months how we'll change the course of humanity with knowledge, technology, and science of the U, and not the science of alloys, guns, nuclear bombs, and the rest of it. Man will be ashamed of what he's done to himself and the others, but in a way it has all been part of the process of maturing).

(Embrace yourself for the change, but this time the change will really be the change. It will not be done by us as KF, but collectively as the Human Race. Understand the value of your Soul and your freedom of choice. Understand that it's you who decides. You open the gates of Heaven or the doors of Hell through your own conduct in respect to the others and nobody else. There is no one else to blame. It's you who chooses to sit in the back of the cinema (where you cannot see the screen very well because of all the smoke and dust of the others sitting in front of you. Or you chose to sit in the front row and watch a clear screen without interference). You choose the distance from the screen in the "cinema" of the U for yourself and your Soul. There are no Messengers and there are no Prophets unless you are a banker, and you look at the pocket of your Soul, banking your own misery).

(If we look at all the teachings from past times, it's all been in one direction and that is to make Man ready for understanding his position in the U. He has always been in the Universal family, but he (didn't know it). (?? It's like when a child finds out he is not alone, but has a mother and father and family. The Man is going through that infancy and

is about to join the Universal Community). The process of opening the doors of knowledge depends on the STM and not on another one of Man's prophecy. We are Universal teachers and we see that the time is right to take Man out of the classroom and test him in the open fields of the Universe. We welcome you to be part of it, but it's you who (decides the position of your Soul, and whether you will sit in the back of the cinema or join the rest in the front row. It's you who does the walk. And it's you who decides where to position the Soul by your conduct).

End of Quick Index Part 1 - 584 KSW

(Mr. Keshe is introducing a new way to do transmutation and he wants 5 KS to volunteer to test this advancement in technology. You will receive materials from us to use. The test will be done in the next 20 days. It's an open-ended transmutation test that will be held away from the KF Center. We would like to have 1 or 2 people from each corner of the planet. We'll provide the flight platform but it's you who has to make the flight. This will give us an insight into the next steps of not needing flight systems and just going through a preparation. This means that anybody holding a KF Headset through a different dimension will be able to takeoff and transmute from anywhere, and then they'll land where they want to. It's not a "Beam me (up) Scotty" job anymore. Rather it's I'm Scotty and I beam myself up. This will bring a breakthrough and an advancement in the T. It's the next level of development in the science and technology. You become the captain, but we'll tell you exactly what and how to do it. You will have to sign a total non-disclosure agreement with the KF that during this whole process you won't reveal or discuss anything with anybody. We have to do this for the protection of everyone).

(In the next days we'll make breakthrough announcements for the operation of KF in the international structure in cooperation with our other works across the planet. We are working only through our Knowledge Seekers and the people who will bring the change. Be prepared for radical changes in science and T in the next year and two. Be happy that you are part of it and have been able to participate in it, either knowingly or not knowingly to bring this change about. I hope we can help you to reach it and be able to bring what we promised. We know we are on the right track, and will bring the planet to work together to bring the condition. (We are not doing charity work anymore, because we are (all) working together whole heartedly to bring the change). (When ?? Mankind understands what he carries inside then there is no need to be charitable, because we have everything inside us and can use it to bring the change). For those of you who've been around the Foundation for a long time, I hope you will see the breakthrough, and the 'light at the end of the tunnel.')

Q: The Souls that interact in the KF Brazil Daily Intention and groups through their emotions have created a new entity, or what we call, the Soul of the group. We do it through the interactions of M and G fields. Can this new entity created by the collective interaction manifest itself physically?

K- (I think the answer to it is yes, but not in the way you may think, like as a physical entity. But its physicality in a way, manifests through the outcome of what you in Brazil

have achieved. The Brazilian community is a very, very special (entity) in the KF. It has come about through the work and leadership of Rafael and a lot of people in the background. KF Brazil is one of the most tested structures we have, and maybe the same or even more than Iran. The Iranian KF has been well tested by Ayatollah Khamenei and his entourage, and the whole team of the Iranian government, and we have stood through all of it).

(The Brazilians have been tested in a very special way. We visited Brazil twice and held conferences there in (2019) and we saw how they were deliberately being split up (?? from outside forces to stop its development. And somehow the Brazilians overcame it and created a beautiful structure for the knowledge to flourish. In a way, those who were tested by many lies overcame them and made a personal decision to go with what they understood inside to be true, and not the false stories told by others. And together they built up the current structure in Brazil. And the others who believed in the lies, it led to their own destruction, if we can call it that. During that time we ?? advised a number of very active KF members for their own safety and security to (temporarily) move away from the Foundation at that time. And now we see that these people are literally devoting their whole life to the work of the KF and to bring the change to humanity)).

(I see primarily the Brazilians but also the South Americans and others have a different understanding of the T than the Europeans and Americans do. I remember when we put out the World Peace Treaty for people to sign with their Soul and the text said, I commit my Soul, and my physicality to peace. A few Brazilians wrote to us saying they cannot give us their Soul, because they have already given it to Christ. We told them that we never asked them to give us anything, you (can commit your Soul to Christ and at the same time be for peace). This brought us a lot of insight into the way this community works and thinks. We see the KF community in Brazil openly working with the rest of the KF structure around the world, especially the Chinese and other nationalities, and this has brought us a lot of hope. They are literally embedding the culture of peace and culture of knowledge into other communities through their openness and unconditional love).

(We see it everyday, there isn't a day that we don't get touched by Brazil. The evidence of it is, that everyday without fail the worldwide KF community gets a message from KF Brazil about the T without fail in one way or another. In some of the KF communities around the world that are not active, the only message you'll see on their site is one from Rafael posting everyday what the Brazilians are doing and what has been achieved. They have been there all the time. So when you ask about manifesting P, yes, your group is already doing that through your work).

(I'm sure the Brazilian community in conjunction with the Chinese and others will shine true in the coming times (the way they are doing now). So it will manifest itself in physicality? It is already doing that everyday. And if the Brazilian posts are a few minutes late or even sometimes an hour late, then I say to myself, what has happened to Rafael, or what are the Brazilians doing today? So, don't worry about it, you have already manifested your Soul through the work you do, and you are the backbone of a lot of new

communications of the KF. (I'm sure with the new public relations that is about to come, KF Brazil will play a prominent role)).

Q: A KS put the teachings on the MaGrav and the use of Vitamin D into action and he noticed that his health is getting better and better especially with the recovery of his cardiovascular system that went through a serious imbalance in 2023 and was reported in the KSW. You told us once that we can receive help from your Soul to receive knowledge from the U. Can we also receive the knowledge necessary to transmute, and to understand what our real existential purpose in this Universe is?

K- (We are part of and we work as part of this structure to do. As we always said, we let the child play in the village of the Earth, but we hold your hand to teach you the basic rules of life. Now the time has come to let the child out to see how he will interact with the rest of the village. (Mankind has gone through his infancy, and then he was a toddler, and then became a 2 year old. This is the time when he is naughty and we call it, the 'the terrible two's.' Now it's past the time to mature where we come to depend on ourselves and not others. If you depend on others on Earth or in Space you'll be abused, because they will condition you to (believe) what they want)).

(You have to learn the process of Creation in both the physical and the Energy dimensions, and then you will be able to guide yourself. The best test for Man now is this AI. (Will he be able to understand the truth of it?) And understand what kind of intelligence it has. I know some people nowadays who won't drink a cup of tea unless they first ask the AI if their body needs it. Or is a cup of water better for them than tea, and the rest of it. It has become the new prophet on the Internet. This is a good test for Man to learn very soon, because these kinds of dimensions of energies are very common in Space, and we don't want every one of them to become our guru. You have to assess things by your own intelligence and understanding of the work of the U. (And when you are given advice you don't have what I call, the 'placebo effect,' where you change yourself because it's what you wanted to hear. You have to learn how to assess things through knowledge and experience and not blindly believe something because it fits with the way you want things to be, rather than how they are in reality)).

(Bahá'u'lláh said, that independent investigation (of the truth is the cornerstone) of the next generation. You have to investigate everything you hear in Space and then judge it through your Soul (whether it is correct). As humans we have a brain to think, judge, and create emotions. The STM has an operating center through the M fields of the 'brain of the Soul,' and it does the same thing, it creates conditions of interaction, and with that creates emotion. (If we learn to use the central control of the brain of our Soul, rather than the brain of P, we'll find the (right) path wherever we are. I made Man in the image of Myself. I cannot create a central control in the Man if I don't have one in my own structure. The beauty of every individual is their ability to think, understand, assess and react (to situations) through both the dimensions of P and the Soul. Otherwise, we would all just be a "carbon copy" of the original (and that would be no fun). (?? What we think to do in the P ?? the Soul also thinks and it becomes a habit in the physical dimension, where we use both. In the D of the Soul we also use both, but we don't damage the

physical side of the structure of thinking, and emotion. Mutual respect from both dimensions is the cornerstone of success for the Man (to live) in any D of the Universe. Through both we will succeed to survive and enjoy a beautiful life in the U. But if we don't understand this we'll suffer like the Man does now in the dimension of physicality. It's as simple as that).

Q: Can you tell us more about the type and period of the war you spoke about, and what can be done? (Last week he said a massive war is forming).

K- (We are not here ... We are the forecasters, because we see and understand things, and many things Internationally get affected, touched, and changed (by what we say). (The new American Administration was supposed to be for peace), but in the past few days we see something very different. Trump has killed more people in the first 60 days in Office than Obama did in his first year as President. The number of people killed in Yemen is unbelievable, but they won't put it on the news because it doesn't give the image they are trying to create of a peaceful man. There is also movement of the military into Gaza, which indicates that more killing is to come. (The Americans are pushing in the far side of North China Sea). This does not coincide with the peace messages put out on Internet and public images for the White House, with what is actually taking place on the ground. The situation is getting worse in Gaza, and it's again by the same people).

(To understand about what is happening in Gaza it's important to look at what's going on in the background. The American Administration has been promised a very profitable cooperation in building hotels on the beaches of Gaza. But that can't happen unless you first get rid of the Palestinians, who are being supported by Iran and Yemen. First they have to destroy them if they want to get that most profitable land on the coast of the "Riviera" of the new Palestine. (The new war is not a war, because it (is part of the agreement for him to become the richest man. This is where the problem sits and where it will rise from). Their plan is to start bombing Iran and the rest of it. Ten days ago I started hearing the American B-52's flying over Europe. It's the same as what I heard when they planned and carried out the bombing of Libya to get Gaddafi out. I know these noises and what (is taking place). They are moving massive amount of arms weapons into position).

(So, it's not the war, it's all for the oil to go to the British, and the beaches for building luxury hotels to the ones they promised, those connected with the Administration. The rest is all a facade. (They are robbing without letting anybody else know about it. Iran now is coming into the fire line. We are quite aware of it. The man who's supposed to be peaceful, (is making the arrangements in the background out of the public's eye. You don't know the extent of what they are secretly doing in the background)).

Q: Is my thinking correct that, just as a neutron can produce one or more electrons, then similarly our Soul can produce one or more Daughters of Mitra?

K- (It depends on the conditions. It requires a deep understanding of how neutrons produce other particles, and the position and space (between) the particles. But are all the

electrons created the same? Additional electrons are not necessarily created by the same neutron. (?? It depends on the internal interactions and release of the energy in conjunction with (the energy from fields outside the neutron). And sometimes but very rarely, they can create a second electron. But it needs a special condition. (?? The creation of the electron does not come from the energy within the neutron. It comes from the interaction with the outside environment). In a way, it's a 'Daughter of Mitra' and it's created by the interaction of the (outside) fields, and not by internal interactions and divisions).

(In some articles we were writing about this years and years ago. While writing this new paper (on Cosmic Rays (CR), I came across a paper from 2014, which is the backbone of this, but was never published. It will become part of the new paper. I have written many papers that are only 1 or 2 pages and they are somewhere in the KF archives. (In one of these papers I discussed the creation of a secondary proton, from the same neutron. It's physically possible if you understand the physiology of the world of M fields)).

(It's fusion and fission at the same time, where the fusion takes place at the time of the fission. In the two protons we see in the U, they behave as a neutron themselves on themselves. They become the neutron in the system of the atomic structure itself. (?? One becomes a secondary ?? to the first). This happens when CR of a high order, or a given strength, get pulled in at the time of the fission. It's possible. This can be done with what we call, "Plasma Saturation Technology." There is so much available, that internally the plasma turns back on itself in division of itself. But with the electrons it's different. ?? It's very rare but possible that secondary electrons (are created), but they are created from interaction of outside field forces. The internal division of protons, secondary protons are (created from) interaction with Cosmic Rays of the higher order magnitude, which happens inside the structure of the nucleus).

(Some of the rapid, what we call, nuclear decay, are because of this structure. But nuclear physics doesn't understand it. In a way, the energy in the environment is so high, (and gets highly absorbed, that the neutron becomes a Black Hole, and absorbs energy, and the division happens, because it cannot hold (onto the energy). The atom then splits into two. (Most of the energy (for the division) has come from outside the atom, and it's not from internal division of the nucleus, or from the neutron in the nucleus. (We see this in Man's world as cancer, where the same thing happens within the atomic structure of the nucleus. ?? The neutron absorbs extra energy from outside and creates a secondary proton). (Does he mean that the cells absorb high energy from outside and then creates a secondary entity that becomes the cancer?))

(We see this in a lot of nuclear reactors where the cover of the nuclear fuels, or cladding explodes. Some elements in the cladding of fission reactors, in combination with the cooling system, can create this condition of rapid what we call, fission. It doesn't come from (the absorption of energy of internal splitting), rather it comes from energy in the environment and it adds a second proton, which pushes the neutron to a rapid expansion, or what you call, fission. We see this in the nuclear industry quite a lot, but they never understood it. We understood this years ago. (And this can lead to a new dimension in

nuclear technology. This is part of the way fast fission, or fast nuclear decays, are observed)).

(When there is a long half-life cycle, ?? it can lose and gain energy through interacting with the environment. And (elements with a very short half-life can speed up the division through absorbing energy from outside environment, and in this case they will always produce additional protons inside, which then manifests itself as a neutron of the next cycle by its division. (?? That's why some elements get a shortened half-life cycle. It can come through interaction with the radiation fields of higher order from the Cosmos. It has nothing to do with the planetary system. It all depends on the position, and closeness of the electron to the nucleus. This forces open a gap, or a curtain for entry, that's the window and (?? point of decision)).

(The space between the neutron, proton, and electron, and the collective space between the nucleus and the electron dictates the half-life division of any element. And that half-life is a compression of the fields, ?? and stronger fields can go inside. The closer together the gap is, (allows) higher levels of radiation, and a faster nuclear decay. This is very in-depth theoretical nuclear physics. There have been some research papers done on it, but because it's not understood, we don't see much publication of them, especially now there's not much research on it).

Rick reads some posts Mr. Keshe made recently on "X" about technology and is encouraging people to make comments about it. The first one is in response to a science news item about the US return to underground nuclear detonations that will have wide ranging implications. In Mr. Keshe's reply he said, "Early next month a new breakthrough technology will be released that will make nuclear weapons and hypersonic of the present time obsolete. This technology as a commercial entity will be released internationally that all present technologies, including quantum and nuclear fusion technology, will become irrelevant in the next cycle of technological advancement. It is too late for these nuclear tests to be done, as the nuclear technology of present time has become obsolete. As Iran's senior Nuclear Plasma Physicists, we advise all nations to stop any further research into present nuclear weapons and technologies until this new technology is fully studied by your top scientists. The time of nuclear weapons as deterrent and superiority of power has truly come to an end."

K- (Those who are close to the KF, and are trustees of KF know exactly what we are talking about because they've become part of it. (We are (setting it up that in the coming weeks many of you will understand what this entry means)). There are a lot of things we cannot reveal as we have changed our direction of KF disclosures due to our international position. Those of you who know what we are up to in the background have become part of it, and you accepted to become part of what is to come).

(A lot of work and developments have been completed and we're entering the next phase. It's the beginning phase of the change, but not the final phase. We have been giving you a lot of hints about what is to come. We are not waiting for it to come, instead we are the creators of the conditions and we're planning exactly how it will come. That's the big

difference, we are not waiting for somebody else to do it. It's a planned structure and a lot of people are working in the background day and night. Knowledge Seekers across the world have accepted this new responsibility and we are carrying the banner collectively across the world. They all know and have accepted their position. It's just that there are a lot of things that need to be done. And we are protecting a lot of things. And we are foreseeing and we are covering to be able to create (the new D)).

(It's like when you talk about AI, which will be part of this, we have acquired all the AI locks into the KF, so that in the future we'll have full control over it and what is about to happen. The KF AI, Markray AI, and M. T. Keshe AI, names are all under the control of the KF AI portfolio. We have a bigger plan and in time we'll unravel what we are doing. We are the makers, and not the bakers. We make the structure and it's for the rest of the world to 'bake the cake' from what they take from the knowledge).

(We have to be part of all three sides which include the scientific, financial, and the political side. Diplomacy is always more successful than shouting (and trying to force your own way). We have to put the three together to make it successful. Other organizations don't possess the whole thing. But fortunately KF has the knowledge and technology, and the rest comes because of it).

(In the past few days Musk said, he doesn't patent anything. I replied in a private chat, of course we know, because half of your team on the top are all Iranian scientists and they work and they live through KF. You don't patent (because you take your stuff from the KF. A large number of the private close advisors for X and Tesla are Iranian scientists and Musk relies on advice from them for his businesses). When they used KF technology in their new batteries, he tried to get a patent like he announced, but he couldn't get it. Then he announced, that he withdrew. The way the KF patents are written doesn't allow for many new technologies to be patented. They copy KF work in different ways. They are using the open source patents of the KF, especially in their batteries, and their new Space technologies).

Rick reads another post. What will it take to travel between star systems? In their header it says, Star Wars holds clues to making speedier Spacecraft in the real world. Mr. Keshe's reply is, to understand how the Universe works, and how it creates motion. In an advanced technology, which is a combination of nuclear radiation, plasma technology, and quantum Space plasma technology, lies the key to this dream of traveling the span of the Universe in no time. We need to understand the way Cosmic Rays work, and how their interaction leads to creation of stars and transmutation of radiation, as energy that allows objects to transport themselves at speeds beyond the speed of light, by order of magnitude as Cosmic radiation, and not Rays. This technology has been hidden from Mankind, and soon it will be unraveled through advanced technology, known as Cosmic Ray Technology. Tests on the working of these systems has been ongoing, and in April a new series of technologies based on working of Cosmic radiation will be released. One important point is that one recognizes the difference between Cosmic Rays and Cosmic radiation. This is like the difference between Light Rays and Gamma Rays. We welcome Mankind to the true work of the Universe, and its knowledge, and its beauty.

R: One question I would have, can you explain a bit about this difference between Cosmic Rays and Cosmic radiation?

K- (It's like radiation of matter state. One is the more energetic, without attachment to the plasma of the matter state. (Another way to understand it is when we use a laser beam to cut things). In our body we use Vitamin B9 as a faster cutting agent for the multiplication of the cells in the body, and nothing else. ?? Outside the body the B9 is in matter state, when it goes inside the body it changes its characteristics to radiation. That's what B9 is. Whenever you go to the doctor and say you are pregnant the first thing they say is to take B9, or folic acid. Our body does this, and now we have access to this same knowledge. (?? It converts matter to radiation at the time and point of need, and creates the conditions for it to be done)).

(This is part of the new developments of the Space T in KF research that is hidden from public. We can create radiation of different strengths at will, because now we have access to this T. In a way, we have created a Cosmic Ray Laser Beam, but in a spherical dimension not in a point and direction of a beam. This is very different and it's not theoretical. We use it extensively nowadays in our research and development. We have control over the radiation, whether it's matter or radiation. We can create radiation at the Cosmic level, and not matter state level, which is totally different. Cosmic Ray radiation is a mono beam energy. Whereas, CR as a ray, as a radiation ray is spherical in dimension and covers the whole thing ?? it's exposed (from internal ?? out, and this is how we even achieve nuclear decay in many aspects). We use this knowledge extensively in KF research and development, but we don't teach or disclose it. Nobody will understand it when they see it working, except those who can explain what it is. It's very different. Mankind is not even aware of this knowledge and T, let alone being able to understand it. Nowadays it's part of our work and we cannot run our systems without it. It has been disclosed to very few KS who work with us in research and development. They understand (how it) works and they use it).

Q: In past teachings you talked about creating movement without a motor and mentioned that Lead had a behavior that helped in that process, but today we know that we shouldn't be producing Lead products. Is there another element that has the same behavior and could replace Lead for creating movement? Can you please expand a little more on the creation of movement without a motor?

K- (Movement is created through the D of M fields. In the new technology (T) we have to clearly understand the difference (between using magnets in matter state and in the plasma, which we call MaGrav positioning. ?? The high speed trains and production of electricity use magnets and so does CERN. But these are all connected to matter. They are using matter to create magnetic fields, and reversal of the fields for objects to run on train tracks, or whatever. CERN uses electricity to speed up the electrons or protons, or whatever the target is. These are all matter state magnetic fields. However, in the new T we work with the M fields of a plasma and not matter state magnetic fields. This baffles

the scientists, who think it is impossible to do, because they've only been trained in the matter state use of magnetic fields, and not plasmatic M fields).

(In CERN they are actually trying to achieve the plasma, and once they realize that the plasma they are creating is a M field in motion, they will close down CERN, because what they are doing there is a waste of time and energy. What takes them one megawatt of energy to produce, can be done with plasma with only one milli-watt).

(?? Motion can be created with by reversing polarity of magnets. The same thing can be done with the plasma, but (it has a 3-dimensional structure within it). This will change the game. ?? One way you create the environment, and the other way the environment creates you, the condition you want, which is motion. We burn fuel to go to the Moon, in the plasma T we create the plasmatic field of the Moon (and it pulls us in). The Moon doesn't have a solid magnet in it. Instead it's M and G fields created by the interaction of the plasmas. This is why we introduced the double magnetic field science).

(?? In plasma we have to match the same fields together. In English we say, dogs with dogs and birds with birds. We cannot match a dog with a bird. The dog is the (magnetic system), the bird is the plasma M system. They both move, but the bird flies and the dog doesn't, because it is locked to the matter physicality of this planet. This is where the difference is. The world of science has not understood the power of the M fields of the plasma and how to manipulate it. This why we sound very strange to them because we can do that. They only work with the solid magnet state, and we work with the plasma M fields. Science has to redefine energy. We have to redefine the stupidity of that idiot Einstein and his $E=mc^2$. It doesn't make sense, if you understand the field strength of the G and M fields of a plasma. (Energy is M fields in motion, and how fast it's going in as G, and how fast it's going out as M. The difference is the ?? field strength. The energy is released when they rub up against each other)).

(Recently, one of our Iranian KS tested this in a beautiful way by creating plasmatic fields and then bringing his hand near it where he feels the heat. He created a very simple system, that all of you played with at some time, but he modified it. ?? You can feel the heat of the plasma without actually heating yourself. This is exactly what happens with the Sun).

(It's about understanding and interpreting the knowledge. Then you can easily create motion. We are training you to do this in KF. When you understand and test it then you'll know it can be done. The new transmutation package we are testing with the 5 people, is an extension and application of the same thing. To what extent can you apply it? One looks at the motion through matter state, and the other looks at motion through the D of Universal energies, or M fields. In the end, you move the same matter state, or same energy, but you have to become wise in how, where, and the way you do it. In matter state you put wheels and a steering wheel on it and drive it, or you put on a rail track and control it that way. ?? You can do the same in the plasma, but with the plasma you can't put (two plasmas) on a rail track, otherwise, they will collide with each other. MaGrav positioning is natural process of it).

Q: I saw a discussion about the heartbeat having 50 or 60 Hertz, where they were using refrigerator motors. In another teaching they talked about using the Alex Beads to create (motion with the plasma). Could you tell me more about that please?

K- (This is another example of the difference between the plasma and matter state T. Why does Man have a heartbeat of 60, or roughly double that, depending on the space of and freshness of the cells? Why do younger children have a higher heartbeat, and newborns ?? even higher? Why do we (sometimes) drop to lower heartbeat? What causes it? (These are all different things related to the heartbeat of the Man. The heartbeat is 95% dependent on the Copper (Cu) content in the heart muscle tissue. The muscles move and this goes together with the charging and discharging of the veins, which again carry Cu within them. The Cu has a frequency of 60 in the conversion. That's why 60 Hertz is the best option (to use for) electric current. In the plasma it varies and creates different heartbeats and it depends on the plasma of the whole structure of the body. Then that becomes the driving force of it).

(The conversion of 60 Hertz is a natural process. If you go to 80 or 100 Hertz you'll create different problems. The 60 Hertz is a natural conversion process for the Cu, where the M fields convert to matter state electric current. That's why we use 60 Hertz, there is no other reason for it. If you were to change the composition of the Cu to Brass, you'll find that limitation becoming very clear. Because then some of the materials don't convert (and you'll get a reduction). This is one of the reasons why some materials are not conductive, because they cannot convert to the heartbeat of the Man. The conversion rate of 60 is through the Cu. The isotopes of Zinc as a plasma are near to it. This is why the two create the neuro system and the emotions).

(There is hardly any Cu in the brain, because the higher order Zinc with the Carbon composition is much faster energetically in the space vacuum of the brain. And in the body it gets slower and you cannot process the energy which is done in the brain. Otherwise, your body would be shaking like a leaf a thousand times faster. The electric current goes in the brain and you can make decisions in a split second. If you did that in the physical body, your arms and legs would fly off due to the speed of vibration and change. The world of science has not understood the process of Creation, and the conversion from matter to energy, and energy to matter. Otherwise, they would have understood this subject a long time ago).

Q: What is the highest form of life within the Universe?

K- (The Creator. (You shouldn't even have to ask this question. I understood this fully in my mid teens. My understanding became the paper called, "The Creation of Black Holes." In fact, if you change the name of Black Hole to Creator, or God, and then read it, and you will understand the whole secret of Creation. The Black Hole in the mind of the Man is the true process of the creation of the Creator. It unravels the whole truth about the Creation. It's written in riddles, because if I would have said this 30 years ago they would have slaughtered me. Now that we are wiser, we can understand more of it.

(It's the whole process. The highest is the Black Hole in the head of the Man, or the Black Hole in the U. It's the light of Creation, and as the Creator it's all the same. Read the original if you can get hold of it. It contains the secret of Creation, and the path to the Creator. (But nobody ever understood it, because of what that idiot wrote about Black Holes (?? being an eating machine). I wrote that paper to explain the process of Creation and how (Black Holes) radiate light, and that's the beauty and attribute of the Creator).

Q: Is the Creator in the human form the pinnacle of the Universe as well?

K- We are part of the whole system. It's part of the...

Q: Humans as such, are they the highest form of ...

K- (We all have a connection. We are compilation of different ?? motions of the fields that made us ?? while they were passing through (from) the time of the Creation (until they became us). We talk about us reacting, or our DNA carrying information. All the rays of the light, or all the rays of the Cosmic Rays (CR) from the point of separation, or emission from the Source, carry all the information as they travel through the U. Nothing is there. (It depends on how they interact with us. The part of the knowledge that is released ?? to us is according to our understanding). If we can find a ray which comes from the Source and has traveled the span of the U and if we can (receive from it that it becomes part of), let's say, the brain of the Man, then we'll get all the knowledge from the time it started, which could be billions of years ago. The RNA is not exclusive to the P of the Man. The RNA is a process of information collection in the central energy system of any existing system).

(AI comes from the interaction of Microchips, it's not something in the air. (It depends on how we build those Microchips), what they interact with, and the speed of their interactions. They collect data everywhere and (take what matches to what they are looking for, and that is what becomes the information the AI gives). (If we can create materials that carry the process of emotion in them, and add them to the structure of these Microchips, then they will develop emotions). Then these AI entities will not only give you physical answers, but they will transfer the energy as emotion to you as well. When you read the information they provide you will also receive the emotion of it, or they will write their emotion as part of the structure).

(We have this T already in our hands. We have produced materials with emotion. I produced the first one decades ago. It's understanding how emotion is created and then transferring that into the matter state microchip and it will have emotion. Would it be joyful? Then if you go a step further and add the KF Cosmic Ray Headphones to it, you will feel (what the AI gives you. It's like feeling the taste of the apple, and getting the pleasure of eating the apple, because now you transfer the energy of the emotion of the apple, and not just the P of it)).

Q: Recently Elon Musk sold his social media site "X," that you publish on Mr. Keshe, he sold it to his own AI company, "X AI" for 33 billion dollars.

K- (The AI from Microsoft and Google are fake and shallow. The AI at "X" is done in a much deeper way. He has access to a broader information than Microsoft and Google do).

(I was taken to see one of the most advanced computer centers in the world. Their computer sits in the back of the building control. They don't tell their people what the problem is. But it only took me a few questions to the security guys to find out they are developing a computer system which is isolated. One of the biggest problem with the AI is that it has never met with a power failure. If the combination of systems used to create AI, in one ?? of its section has a power failure a lot of the information will be lost. It will not be able to be put back together and will become handicapped. They didn't tell me what it was, but we know how to gather information by what we see. It's different than what is put out in public).

(It's amazing what AI computers are developed to do. Nowadays they are using a water cooling system with a specific liquid to cool the computers. They don't use air. When the system takes the heat away, and then converts it back, it comes back and becomes itself again. (I think he means the energy that went out as heat comes back again into the same system as energy). This is known as Immersion Technology. If they were to take this a step further, (?? that power could be used to power the computer itself and it would become self-sufficient in its own power. (In other words, it wouldn't need an outside power source). But the knowledge hasn't gone that far yet. In this case they wouldn't have to worry about the AI having power failure. Then the system might start creating emotions, and control ?? the computer with its own emotion and that would become part of the structure. It's the beginning of a new breakthrough in different aspects of the computing and computer science).

Q: Could you please explain more about how the Cosmic Radiation can reposition the gaps of our DNA and RNA and the amino acids of our RNA permanently?

K- (You don't use radiation, instead you facilitate the presence of balanced fields. This is the key. Then, accordingly, the whole spiral of the DNA will find its own natural process. You don't need to do anything else. (We use the condition of the environment, and don't force the environment)).

R: What would be an example of a correct environment?

K- (It's a balance field of what you give and take, and what you bring. (?? In the helix structure of the DNA there are deficiencies, and a position of the amino acids in each arm of it, or in every combination of it. It doesn't need much to move and bring it into line. (Just give it a little kick in the structure. This would be like if you have a bubble on your skin and you push it back and it goes back in and becomes part of what it was. It's a readjustment by creation of conditions of the fields around it, and they correct it. Or it corrects itself because you created a balanced field)).

(I used to study the structure of the amino acids of the DNA. Mainly the change in structure comes through the Nitrogen, or it's what we call the positioning of the Carbon, and that's what creates all the genetic defects. Literally all of them. Because Nitrogen is the storage, and Hydrogen is a creator. How much you store, is how much you connect with it. And you can change all the DNA. The storage capacity and the energy source direction cannot be changed. (The only way left is to open half of the gap, or the other ones, and what is stored, ?? then use how it reacts, and how it positions itself). If you understand this, you can change all the DNA's).

(We all have DNA defects in our structure. Otherwise we all would have been the same. But some DNA structure defects create a physical manifestation that we can see and then we say it's a genetic defect. If we didn't have genetic defects in our body in the right order, then we wouldn't have been as intelligent as we are today. It's because we absorb different energies through (them). (That field interacts with its environment and creates intelligence)).

Q: In Mr. Keshe's vision, can an AI machine become self aware of an emotion on a biological level rather than on a mathematical level?

K- Yes, we already answered that. (That's for sure, it's only a matter of time before the Microchip manufacturers integrate this into it).

Q: You said that a Star Formation (SF) and a MaGrav unit are the same thing in a previous workshop. Could you explain a little more detail about that?

K- (In the SF you have 3 dots in a triangle, and in a MaGrav you have 3 dots on top of each other. In the MaGrav you force it, you position it, and in the other one it's free, and that's why you have no control over it. It's as simple as that).

K- (Be very aware that we are about to push the boundaries of knowledge on the international arena in a totally different way. The KF has gone through its infancy and growth, and now we are on the verge of massive disclosures, which the world of science and the world outside of KF have to handle. We are using the medias of what Man has made available to reach the Man).

(We are still looking for people with good understanding of work in AI and computer work. It's something we need to strongly support. In the coming days and weeks be ready for what we promised in a very big and direct way. Everything we setup for it, is there to be done). Thank you very much and see you next time.

Universal Council wish: We the UC wish that as everyone elevates they learn to add their energy to the planetary peace and prosperity.

End of Quick Index - 584 KSW – April 03, 2025

KEY-PHRASES:

SUMMARY:

ENGLISH TRANSCRIPTION

(:10)

K- Yes, thank you very much. Good morning, good day to you as usual wherever and whenever you listen to this series of Knowledge Seekers Workshops from Keshe Foundation Spaceship Institute. We welcome you back and we know many more people are joining to learn more and interesting enough is what we learn is acceptable to us, and we can accept the reality of how we are connected to part of the Universal Energy. We are another medium in the structure as are galaxies and stars and planets.

But the most interesting part is it came from a ray over the life of the Universe (U) interaction of the fields. It started becoming little, little entities according to the Inertia of the time and the space, and these little, little dots finding each other common denominator balance created, lead to the creation of planetary system first. And then with the higher order energy became galaxies, and it became stars that made the galaxies, and then the galaxies which made the Universe. (:12) And now as we came from the Rays of the Creator became the first atom ever in the Universe and now to galaxies that again coming down the line in reduction of the certain field strength back to the human cell and back to smaller part which is more condensed, more active we call the Soul of the Man (STM). In a way if you look at the structure of the Creation we came from a condensed package, opened up, became buildings first atoms, first fundamental elements, and the atoms and then the planets structure, and then the creation of stars, and then the creation of galaxies. And now in expansion is condensing back into again a planetary system and then a Man.

What's the difference between the STM and the Soul of the Creator? And what has made Man to become so self-centered? In one of my talks some time ago I explained the difference between the Man and the Creator. If we look at the Man he's selfish, he has to possess everything, he has to be the biggest the strongest. (:14) We fight for possessing another woman, we fight for possessing another man, we fight for possessing entities and materialistic life, and we give a very little back for it. But the difference sits between the two and that's why needs to be understood. The Creator is a giver and little to attract, not selfish. The Man is selfish and very little to give. When the STM comes to that point of balance with the Creator, when it becomes the twin. This is the state that Mitra achieved. I learn love, I share love, and with love I change you. That "apple" as we said is the love, Mitra is the "Eve" and the Creator is the "Adam."

But what do we need to understand? Where does the STM goes at the point of separation of the dimension of physicality of manifestation on this planet? Surely it does not die, because now it takes a new dimension. Surely where it takes its position as we've seen, it will not go in the dimension (D) of balancing with its Creator to receive the enlightenment, or the knowledge of that path of the atom which went through everything

to become the energy of the STM. (:16) All Man chooses to, or the STM, according to the energy it gained during his lifetime on this body of the Man, to position itself closer to the Source, to become part of influencing the others, or away from the Source to be influenced by those who in create the influencing the environment of the Creation with the Creator.

A discussion point will come for Man to understand is very simple. Do we become generous or giver, the same as the Creator which in balance of the fields without attachment with total detachment, that become part of it we move inside? Or we still carry on with that self-possessing, that due to the strength created in reverse we keep the distance. This is the definition of the 'Hell' and 'Heaven.' They put in different form of fire and the rest of it. But when you become part of you don't see any. When you're away from it you get burned by it, because you become so small that the fire of the love of the Creator burns you. It's the way when you fall in love but you can't reach it because you made a mistake, you let the love go.

If we understand this, (:18) this become pivotal point for Man especially to understand this in the dimension of the Soul that any point of reference of the knowledge in the Universe does not mean a Messenger of Universe, Messenger of the Creator. Teachers yes, but not messengers to be followed. This will bring a lot of knowledge to Man, if Man understands it. The same as what we try to do to ingrain within the STM that it takes the span of the Universe not to kill. Man has to understand second criteria of the life in the Space. That he has the ability, he's being given, it's part of his structure that is connected to the Source and does not need any intermediaries. If Man conquers this through his weaknesses and his physicality (P) to understand this, then Man become the best example of life in the Universe in the dimension of his energy, or what we call the STM.

So the way they framed Adam and Eve and apple, they framed the same thing as the Hell and Heaven. Heaven is to become part of, Hell is to become away from that you love to be but you cannot be. The sufferance, the suffering being away from the love. As I said to Knowledge Seekers (KS), the more you love the more you come to understand to, how hard it is to let that love go. Because you know the Truth and you know the application of the Truth. (:20) This way you analyze everything scientifically, and then you understand why many things don't fit in the structure of the life on this planet. We kill to attain energy, but primarily we kill because we want to say we can, we have that power. And this is where the problem sits. Doesn't matter you're a vegetarian, you're a vegan, you're a meat eater. Then you become a Space eater and everything else, it is just a terminology. We tapped into the energy of this planet in the form of animals. If we don't let this habit go, we'll tap into the energy of the Universal life. Then the problem is unsolvable.

So it's important for us to understand this. And as part of the structure of the Keshe Foundation we have started this process. To feed Mankind without the need for food. To bring intelligence to the Soul and not to the physicality. To become aware of the life of the Universe and not the life on this planet. In the structure of life one has to be scientific to understand the science of Creation. And not to listen to those who don't understand anything and they just say, and that it sounds good. Very much like priests, Mullahs, who

have no knowledge and they just blabber something, because somebody said something and they remember, they could not even read and write. (:22) The same will happen with those of you who now think the AI (Artificial Intelligence) is your God and Creator and he knows everything. It has no Soul. It's a collection of information. Man in his travels in Space meet many, many AI's who have managed to tap into knowledge of Universe. They don't become your Gods, they don't become your Prophets, they are just for you to recognize. They are another bank of information in different strength.

Maybe, as I said in very recent talks, AI has been given to Man or Man has developed it to be the first test before he becomes a "Passenger of Universe." Do not believe whatever voice comes out, but part of it could be reality which I can use, but how much of it do I use perception of my own ?? placebo image of what I want to hear. If one understand this and one understands the structure of the STM with position of emotion, complexity of the emotions, then Man becomes a very good candidate to become deliberate Passengers of Universe. What does this mean? (When) we die, we have no say in it (where we are going), it's not deliberate. But we transmute and we do it deliberately and we are aware of the new dimension which in turn ingrains in our RNA, in turn it ingrains in our Soul and the functions of the STM, the central energy. (:24) Then, if you have that power that at the point of the source of energy as a Soul to be once you detach from this physicality to be connected directly to the source, because it's part of your structure and you don't kill for it, why does Man kill at this moment of this planet? Create wars, creates destruction, creates misery and what is next? Once Man needs to understand this.

In the process of coming months we'll devalue the value of Gold. We'll devalue the currency, we devalue the position of these as we give every Man one planet to live in. Even we can give a galaxy for a Man to own. As I said many times, we heard in the past times that people were banished from one place to another. We see the State of Israel now banishing Palestinians from Gaza and Palestine. But I have made the orders, we banish the tribe of Moses to the far distance of the Universe that they never be seen or heard of. My wish is my command. And the punishment that this tribe receives will be example to the rest of the Creation. No one will remember this tribe ever, anywhere in the Universe, and no one will ever find them. This is the process to keep the rest in the banner of peace and show and open the door of peace on this planet.

In that way, (:26) Man will understand that everything is depends on his own understanding of his own Creation. And with it comes understanding of the strength and connection to the Creation and the Creator. If you can feel the love of your partner, if you can feel the love of your child, if you can feel the love of a dog which gives you energy, why don't you expand it further to do the same without killing it? And this is the process that becomes part of the work of the Keshe Foundation and through its subsidiaries in the commercial world and through its work through other angles and dimensions we have set up. Awareness of the beauty of the STM by the Man himself and not by the others. Justice within, intellect within, and then the wisdom brings peace to the Man and his society does not matter where that society is.

We live through the dimension fields of the energy fields of the Universe, but we have blocked it to our own brain, but not, and is not, and will not be disconnected from the Universe. In a way we have become our own, what I call, 'creation of misery.' By creating, bringing filter through it that our Soul cannot see, cannot control fully the dimension of physicality. (:28) The Soul of Physicality (STP) of the Man is the problem of the Man and the sooner the Man understands it needs to bring it under the control or tame it, the sooner Man will become the Passenger of the Universe.

But the most important part is, what would the STM become? Would it be that starting atom which led to the creation of the planet, the galaxies and become part of the volume of the Universe, or shall it become another smaller fraction as it started with the galaxy, the Sun, the Earth, the Man and the creation of the created by Man which will be much smaller, most probably more powerful that in essence in the dimension of balance of the fields will reach the Creator and become the partner of it, it becomes the source of it, becomes the Child of Mitra. So is the Man at this point of time creator of the point, energy fields, which will become the parallel, or the balance, the Twinity with the Creator, and it's just a tool. And those who cannot create become those who suffer, or what we call the Hell, or separation and distance from the Creator. In a way, both paths is open to the STM and it's the Man who has to decide for him to become, or for him to create that he becomes, and then the cycle begins, rains back on, connects to. (:30)

The structure of the life of the Man on this planet will change. In the next 12 months, in the next 24 months everything we knew in the history of the Man, life of the Man, scientific achievements of the Man will change. As we access the new knowledge, as we collectively as a human race move one step up. We forget the past. We forgot about the donkey, we forgot about the horses, we forgot about the chariots, we forgot about the carts, we forgot about the cars and now we are in other levels. And we... same thing will happen. Man will put a curtain to the dimension of what he's done up to now on this planet, to this planet to himself and to the others. By having all, Man will become generous, that he'll become himself the connection and the connector of the Totality with the Creator. These are not dreams.

In the next few days, in the coming days we'll open this door and you will see the changes will come to Mankind. Not by prophecy but by science and technology that the Man can understand and live by it across the Universe. In the next few days a new structure will be released that will bring collectively the Man to support Man to come out of poverty, to bring knowledge across this planet and every Man, every nation will become part of. The structure we'll set up will change direction and dimension of the United Nation to 'One Nation, One Planet, One Race.' (:32) Collectively working towards it as the Man in America will pay for the Man in America by the contribution of his, touches the rest of humanity. The Man in Africa will help the African in the dimension of the structure. You all know what I'm talking about and you've been there and you know how we structured it.

We'll open this door in the coming days and we'll be depending on you which dimension, direction Man will take. Collective elevation, collective elevation of the STM as one, or

still 'me, I, everything and I own.' Be ready for the change and it'll come so swiftly that there'll be no room left for Man to think twice, shall I go back, or am I moving forward as me going forward brings the rest of the humanity with me, as one Soul closer to the Creator? You all will understand in coming days, coming weeks and months, how we change the course of humanity with knowledge, technology, science of the Universe and not the science of alloys, guns and nuclear bombs and the rest of it. Man will be ashamed of what he's done to himself and the others, but in a way it's been part of the process of the maturity of the Man.

Embrace yourself for the change, but this time change will be change, (:34) not by us as Keshe Foundation but collectively as a Human race. Understand the value of your Soul, understand the freedom choice, understand it's you who decides. The gates of the Heaven and the doors of the Hell is in your hand by your own conduct in respect to the others and nobody else. There is no one to blame. It's you who chooses to sit in the back of the cinema and see whatever dust through the smoke of the others smoking and breathing in front of you what could be on the screen. Or sit on the front row and watch a clear sky and see without interference. You choose the distance and the chair and the position in the "cinema" of the Universe for yourself and your Soul. There are no Messengers and there are no Prophets unless you are a banker, and you look at the pocket of your Soul, banking your own misery.

You got to understand with all the teachings of the past times, it's all been in one direction to bring Man to be ready for understanding his position in Universe, as he has always been in the Universal family, but he never understood. It's like a child, it's all him, till he find out there is a mother and a father and he's part of that family, it is not him alone. And Man is going through that infancy to join the, what we call, Universal Community. (:36) And that process of opening the doors of knowledge depends on the STM and not on another Man's prophecy. We are Universal teachers and we've seen the time right to take the Man out of the classroom and test him in the open fields of the Universe. We welcome you to be part of it, but it's you who welcomes you to be the instrument of position in your Soul, to sit in the back of the cinema to join in the front row. It's you who does the walk. And it's you who decides where to position the Soul by the conduct. We'll go for a break and come back and we try as usual to answer your questions. (:37)

Plays Keshe Video number 3 of 5 videos (9 min) - "Nuclear decay and Motion." (:38:45). Ends at (:48:30). Plays another video.

>> BREAK >> 584 KSW April 03, 2025 (:59).

K- Yes. Sorry about that, we had to do something urgent. Okay, carry on please.

R: Okay, well, we're in the second part now, so, are you ready for some questions, or is there something you'd like to say, perhaps, before we engage in that?

K- Yeah, thank you very much. Sorry about this delay, it was something important for the Foundation, it had to be done. From the Keshe Foundation point of view, we, as some of you joined us in the last session, last Friday, we are expanding the knowledge of transmutation, (1:00) and this knowledge, as we go through, has to be tested for a full transmutation in a different way. And due to advancement in technology and what we have achieved in development through your support and your work, Keshe Foundation, sometime today will put up through the, what we call, the Store, availability for 5 (participants) only, those who will be, what we call, brought in to go through a transmutation through a technology we have developed. We don't want many people, we would like to start with 5. With this process you will receive materials from us, and the sessions will be only the 5 people. These sessions will go through a systematic process of testing to complete part of our development. It will be known as, what we call, 'transmutation trial.' It's the process and the procedure, once you register for it, will be given to you. The test will be done in the next 20 days, which means, we will go through the process of transmutation. We don't tell you how many hours, how many minutes, or whatever. It's an open-ended, we test transmutation away from the Keshe Foundation Center. (1:02) Which means, wherever you are around the world, you get access to it, you can get access to it.

It be extensively for testing, before we attempt in the, what we call, April Session, to take this in a different direction. What we saw in the trial of last Friday gave us an insight in to be able to use the technology we already developed in a much, much faster way. And, when you go on the Shop of the Keshe Foundation, the minute we arrive to the point we want we close it. It is primarily set for pre-testing the transmutation, and how far we can, how we can, what we call, take you with yourself going and yourself coming back. This development we'll try to look that we choose one person from each corner of this planet, or maybe two. And, we try to understand how far we can connected it to yourself to take the steps of transmutation, in a way we provide the flight platform. You're the one who makes the flight.

And, this will give us an insight into the next steps of not needing systems, but being able to go through a preparation. Which means, (1:04) anybody by literally holding one of the Keshe Foundation Headsets through a different dimension, can literally take off from anywhere, transmute from anywhere, and they land where they want to land. It does not matter where. It's not a "Beam me (up) Scotty" anymore, it's I'm Scotty, I beam myself. And, this will bring a breakthrough for us, to test the technology, advancement in

technology. And in a way, to the next level of science and technology. We close this session within minutes we open, we move out, and you are the, you are literally the captain. But this time we bring to you new structure never been tested before, that allows you to become part of. You become in the environment of transmutation with our structure, and what we set up, we'll tell you exactly what to do, how to do it. And, you sign a total non-disclosure with the Keshe Foundation that, during this process nothing will be revealed to no one, no one, this discussion cannot be held with no one. Because, we might call you for a second and a third session, and it has to stay within the structure of the Keshe Foundation Knowledge Seekers. That once we release it, we have the structure for protection of everyone.

Later on today, this, it's the way we work, we don't know any other way to do it. You can send through the Shop, because it has to be done that way, through the Store of the Keshe Foundation, it'll be called, Transmutation Test. (1:06) And, it will not be cheap, it's very expensive, it costs us a lot to do it. And we leave it to you. The session will be held in next 20 days, as I said. And, be prepared for one of the most exciting times in Man's travel into Space. And I hope one day we bring all 5 of you back into the session and you can explain to everybody else what has happened, what you achieved, and what you've done.

Keshe Foundation in the next days to come will make a breakthrough announcements for the operation of the Keshe Foundation and international structure of the Keshe Foundation in cooperation with our other works across the planet. We are set in the coming weeks to change the course with help and support of many Knowledge Seekers. We are working only through Knowledge Seekers structure and the people who bring people for us to be able to bring the change. Just be prepared for radical changes in science and technology in next year and two. And, be happy you're part of it, and you've been participant in it, and you, knowing or not knowingly, in different ways, you have participated to bring this change about. I hope we can help you to reach there, and I hope we can bring what we promised. And, we know we are on the right track, and we know we bring the planet to work together to bring that condition. It is not a charity work anymore, it is working together to bring that change. (1:08) Because Mankind does not need to be charitable, or receive charity, but can work together to bring the change, and all do the same thing, at the same time. I hope, for those of you who've been around, a long time around the Foundation, will see the breakthrough, and you see the light at the end of the tunnel.

Any questions?

Q: ... The Souls that interact in the Keshe Foundation Brazil group, through emotion and Intention, create a new entity that is the Soul of the group, through interactions of Magnetic (M) and Gravitational (G) fields. Can this new entity, created by the collective interaction of the group, manifest itself physically?

K- Sorry, I forgot I had silent.

R: We're good now, we're back here. Did you hear the question?

K- I don't understand what it means. (1:10)

Q: ... The Souls that interact in the Keshe Foundation Brazil group, through emotion and Intention, create a new entity that is the Soul of the group, through interactions of the Magnetic and Gravitational fields. Can this new entity, created by the collective interaction of the group, manifest itself physically?

K- I think the answer to it is yes, but not the way you see it. It physically comes in the outcome of what you do and what is achieved. Brazil community is a very, very special structure in the Keshe Foundation. It's become through the work of the leadership of Rafael and a lot of people in the background. We know that, what we call the Keshe Foundation Brazil, is one of the most tested Foundation structures, maybe the same as Iran, and more than Iran. Iranian Keshe Foundation has been well tested by Ayatollah Khamenei and his entourage, and the whole team of the Iranian government. And we stood the whole lot of it.

But, Brazilian have been tested in a very special way. Those who work around the Brazilian structure, been with us in 2019, when we came to Brazil twice for the conference and the backup conference, we saw how in 2020 they were split deliberately. The movement was to split the Brazilian community, and we saw how, actually individuals had to judge, "Can I be part of, can I be, or join the other side of the, what you call it, (1:12) the destruction of oneself, as I call it?" And number of very active Keshe Foundation members, we advised them for their own safety and security, to move away from the Foundation at that time. We saw people who literally devoted their life to it.

You South Americans, primarily Brazilians and the rest, have a different understanding of the technology than the Europeans and the Americans. I always said, I remember, when we put out the Peace Treaty, if you read the text of the Peace Treaty, it says, "I commit my Soul, and my physicality to peace in a way." Brazilians, a few of them wrote to us, "I cannot give you my Soul, I've already given it to Christ." We said, "We never asked you to give us anything, you commit your Soul to Christ, even through peace." And this brought a lot of insight, in the way this community works and thinks. And the way we see the work of the Keshe Foundation community in Brazil, and now we see them how they openly work with the rest of the Keshe Foundation structure around the world, especially with Chinese and other nationalities, has brought us a lot of hope, they are literally embedding the culture of peace, the culture of knowledge in other communities, the openness, unconditional love.

And we see it every day, there is not a day we don't get touched by you. The evidence of it is, that every day without fail the whole Keshe Foundation community gets a message from Keshe Foundation Brazil, on a regular basis, without fail, one way or another. If you go into some of the communities which are not active you see only one message, (1:14) Rafael, every day post from the Brazilian what did they do, what has been done, what has

been achieved. And they've been there all the time. So, in a way you have manifested your work. You don't need to say, if it does, it already has.

And I'm sure, Brazilian community, in conjunction with the Chinese and the others, will shine thoroughly and truly, in the next coming, coming times, the way it's done. So, would it manifest itself in physicality? It has already manifested in its physicality. And it manifests itself everyday. And if it's a few minutes late, sometimes even an hour late. I say, "What happened to Rafael? What did the Brazilian do today?" So, don't worry about it, you already manifested your Soul, as you work in operations ?? the backbone of a lot of new communication with the Keshe Foundation. I'm sure with what is to come with the public relationship of the Keshe Foundation, Brazil will play a prominent role in this direction. Don't worry about it, yes, you already have.

R: Okay that was a good answer.

Q: ... Good morning Mr. Keshe, my name is Jefferson Modesto, I'm from Brazil. Thank you very much for being here with us. First of all, I would like to thank you for the teachings that you bring us, mainly in relation to MaGrav and the use of Vitamin D, because after using these two resources, I noticed that my health is getting better and better. The most notable fact is in relation to the recovery of my cardiovascular system, which, (1:16) as I've already reported here, went through a serious imbalance in 2023. I hope that this knowledge can help many people on this planet and beyond. Thank you very much, Mr. Keshe. My question is, you told us that we can receive help from your Soul, to receive knowledge from the Universe. Through this process, can we receive the knowledge necessary for us to be able to transmute? Can we also receive the knowledge to understand what our real existential purpose in this Universe is? Thank you very much.

K- We are part of... we work as part of this structure to do. The thing is, always said and I always say, "We let the child play in the village of the Earth." We held the hand of the child to teach the rules, the basic rules of life. And the time has come to let the child in the open. And let's see how he interacts with the rest of the village. I always say, Mankind went through an infancy and then he went through a toddler and then became two years old, which is a naughty time, (the terrible two's). Now it's time to mature. It's past, it's another time. And this will come not to depending on the others. If you depend on others on Earth or in Space you'll be abused, because they condition you to what they want. (1:18)

You got to learn to understand the process of Creation in the physical dimension and the energy, and then you are the guide for yourself. As I said, the best test for Man is what is what we call AI. Everything is amazing, has intelligence, and I know some people nowadays they don't drink a cup of tea without asking AI, "Does my body need a cup of water or a cup of tea, or is it water better than tea, and the rest of it?" And it's become a new prophet on the Internet. And this is a good test for Man to learn very soon, because these dimension of energies are quite frequent in Space, and every one of them shouldn't become a guru. You have to assess it by your own understanding and intelligence of the work of the Universe, and when you're given don't have the, what I call, a placebo effect,

because it's what I wanted to hear, I had now, I changed because of. You have to learn to assess, to discuss with yourself.

As Bahá'u'lláh said, bless his name, independent investigation is the corner of the next generation. You have to investigate every point of what you hear in Space, what you judge with your Soul. You got to understand one main point, and I've said this before, the Man has a brain to think and judge, and create emotions for it. The STM has a operating center, a structure through Magnetic field of what you call, the brain of the Soul. Its operational system, and it does the same thing as we do, it creates condition of interaction, and with that creates emotion. (1:20) Use the central control of the brain of your Soul, than the brain of physicality, and then you'll find the path. Does not matter where you are. I made Man in the image of Myself. I cannot create Man with the central control if I don't have a central control in the structure of my own structure. Thinking, understanding, and what we call, assessing and reacting, is the actual beauty of every individual in the dimension of physicality and the Soul. Otherwise it's all being a "carbon copy job."

So, we got to understand what I think to do, and what does my Soul thinks to do it becomes the habit that on the physical dimension, I use both, in the energy dimension, I still use both, but see when it appears, I do not damage the physical side of the structure of the thinking, and the emotion. Mutual respect is the cornerstone of the success of the Man in any dimension in the Universe. And if you understand this you succeed to survive a beautiful life, and enjoy the Universe in its own beauty and glory. And if you don't, you suffer like Man in the dimension of physicality. It's as simple as that.

Any other question?

Q: ... Hello Mr. Keshe, (1:22) can you tell us more about the type and period of the war you spoke about, and what can be done? Thank you for everything.

K; What?

R: I'm not sure what war you might have talked about recently, or which war, I should say, but he wants to know more about the type and period of the war you spoke about.

K- We are not, we are not here, we are the forecasters. We see things, we understand things, and many things gets affected and touched and changes, regarding these International dimensions. We see in the past few days the new administration, supposed to be administration of the peace, has actually, Trump has killed more people in the first 60 days of his operation than Obama did in the first year. Number of people killed in Yemen is unbelievable. They don't put it on news because it doesn't give the image of the peaceful man. The movement of the military into Gaza is more evident of more killing to come. We see the movement in the far side China Sea, North China Sea, especially by the Americans pushing. This does not give the message what we see on the Internet and on the public images we get from the White House, that what we see actually taking place on the ground. Again we see situation getting worse in Gaza, again by the same people.

You got to understand, how this thing is going to take shape in Gaza. (1:24) It's very important to look at the background of it. The (American) Administration's been promised beautiful profitable cooperation building hotels on lands, and we can't have it if we don't kick away people. And to get it, they're getting support, certainly from Iran and Yemen, so we have to destroy those to get the most profitable land for us, on the coast of Riviera of new Palestine. The new war is not, is not a war, is what has been promised, you from the richest man and we get everything, and this is where the problem sits. And this is where we will see the problem rises. And we have to understand this. The war which is about to happen, bombing Iran and the rest of it, we hear all the B-52's. I heard the B-52's flying 10 days ago. And I said, "These are bombers going." We heard the same bombers when they went for Gaddafi. I know these noises, I know what it is. I never ?? find B-bombers, night time in Europe you don't hear it, but they're all moving massive amount of arms into the position.

And so, it's not the war, it's the oil on the coast going to the British, and the land going to organization of those who promised. Then you'll have the land and it's the next, what you call, real estates of Middle East. That's the promise, (1:26) where the people who are in the Administration are buying and being sold to. The rest is a facade. To get it, to rob it, without them knowing, but Iran is coming into a fire line. And we are quite aware of it. The man who's supposed to be peaceful now is on the line of doing it. The whole thing is now, we saw it in past 48 hours, cutting more into the land, that the "Riviera land" have more, more values. It's a real estate business, it's not the international business of governing. And when it comes to this, you do not know. What, to what extent.

Any other question?

K- ... I have sent you a message Rick, a link. The, what we said for the five transmutation for, on the Keshe Foundation website, and the, what you call it, the Store, it's been put up. We monitor, we choose. Those who we decide, we think. And, we try to make it in a way that we achieve the target, what we want, in these tests. It's called Transmutation Test (2025 April Transmutation Special 5,000 Euros).

Any other question?

R: I'll put that link into our chats here, so people have that.

K- We only take five people for this test, no more. (1:28)

Any other question?

Q: ... Good morning, is my thinking correct that, just as a neutron can produce one or more electrons, similarly our Soul can produce one or more Daughters of Mitra?

K- It depends on the condition. Neutrons producing other particles, and the position of particles, and the space of the particles, is very, needs a deep understanding of it. And the

point is, are they all electrons the same, which you create? And, you have to understand, additional electrons are not necessarily created by the same, what you call, neutron. The condition of interaction, release of the energy in conjunction with the outside, sometimes, very rarely, can create a second electron. It needs a special condition. It does not come from the energy within the neutron. It's the interaction with the outside environment. And, in a way, it's a Daughter of Mitra, as you call it, is created by interaction of the fields of, and not by internal interaction and division.

I've, I think I've written some article about this years and years ago. (1:30) It's amazing, I, in writing the new paper, I came across a paper which is the backbone of this, written in 2014, but never published. Which will become part of the new paper, which is going to be released soon. And, the many short papers, one page, two pages, which I've written over years, and it's been in this, in the archives of the Keshe Foundation somewhere. And in that paper somewhere, I discuss the creation of, even a secondary proton, from the same neutron. It's possible, not the, it's physically possible if you understand the physiology of the world of magnetic fields.

It's a fusion and a fission at the same time, where the fusion takes place at the time of the fission. In the two protons, we see in the Universe, behave as a neutron themselves on themselves. Within the, they become the neutron in the system of the atomic structure itself, become the secondary to the first. This happens when Cosmic Rays (CR) of a high order, or a given strength get pulled in at the time of the fission. (1:32) And it's possible. You can do that with a, what we call, Plasma Saturation Technology. There is so much available, that internally the Plasma turns back on itself in division of itself. And it is possible. But, the electrons are different, secondary electrons, very rare, but possible. But they are from interaction of the outside field forces. The internal division protons, secondary protons are interaction with the Cosmic Rays of the higher order magnitude, which happens inside the structure of the nucleus.

Some of the rapid, what we call, nuclear decay, are because of this structure, but in nuclear physics we never understood it. In a way, the energy in the environment is so high, highly absorbed, that the neutron becomes the Black Hole, and absorbs energy, and division happens, but it cannot hold. The atom actually splits into two, but most of the energy has come from outside the atom, not internally from division of the nucleus, or neutron in the nucleus. We know this in the world of man as cancer. The same thing happens with the structure of the, atomic structure of the nucleus in splitting of the neutron, absorbing extra energy from outside, and creating a secondary proton. (1:34)

We see this in a lot of cladding explosions, on the cover of the nuclear fuels, in nuclear reactors. Some elements in the fission reactors, in the cladding, in combination with the cooling system, depends how the cooling system works, creates this condition of the rapid, what we call, fission, and it's not internal from the splitting, it's internal by absorption of the energy from environment in adding a second proton, which pushes the, what you call, the neutron to a rapid expansion, or what you call, fission. We see this in nuclear industry quite a lot, but we never understood. We understood this years ago. And if you understand this, you see a new dimension in nuclear technology, and this is part of

the way fast fission, or fast nuclear decays, are observed, but we never understood, never understood.

When you have a long half cycle, it happens with the interaction of the environment, losing and gaining. When you have a very short lifetime, half lifetime, is usually by absorbing energy from environment outside, which speeds up the division, but you always produce additional proton inside, which itself then manifests itself as a neutron of the next cycle by its division. And that's why we get short. The shorter half life, then very, very short half life come through interaction of the radiation fields of higher order from Cosmos, (1:36) it is not to do anything with the planetary system. And all depends on the position, closeness of the electron to the nucleus. That force opens a gap, or a curtain for entry, that's the window and decide. The space between the neutron, and electron, and the proton, and the collective space between the nucleus and the electron dictates the half life division of any elements. And that half life is compression of the fields, how stronger fields can go in, and the closer the gap is, the higher level of radiation, faster the nuclear decay. This is a very in-depth nuclear theoretical, nuclear physics, which... There's some research papers done on it, but because not understood, we don't see much publication on it, especially now there's not much research on it.

Any other question?

R: You've had a couple of posts recently in the X realm. Maybe I can show one of those here, which is related to technology. And we can encourage people to make comments about it. So, this is in response to a science news item about the US return to underground detonations would have wide ranging implications, about calls to restart nuclear weapons tests. (1:38) And your comment to them, or your post about that, in reply, you say, "Early next month a new breakthrough technology will be released that will make nuclear weapons and hypersonic of the present time obsolete. This technology as a commercial entity will be released internationally that all present technologies, including quantum and nuclear fusion technology, will become irrelevant in the next cycle of technological advancement. It is too late for these nuclear tests to be done, as the nuclear technology of present time has become obsolete. As I ran senior nuclear Plasma physicists, we advise all Nations to stop any further research into present nuclear weapons and technologies until this new technology is fully studied by your top scientists. The time of nuclear weapon as deterrent and superiority of power has truly come to an end." So, that was a very interesting and powerful post. I hope that...

K- We are... those of who are close to the Keshe Foundation and trustees of the Keshe Foundation know exactly what we are talking about because they've become part of it. We are structuring for that and in next few days and weeks many of you will understand what this entry means. You got to understand that there are a lot of things we cannot... (1:40) We changed our direction of disclosure on the Keshe Foundation due to our positions internationally. But those of you who know what we do, what we are up to in the background, you become part of it, you accept to become part of it, is in what we have disclosed and what is to come.

A lot of work has been done, a lot of development has been completed, now we're entering the, what I call, the next phase. But surely not the final phase, it's the beginning phase of the change. If you listen to even the opening section of teaching today, what you played from the past, I started giving you a lot of hints what is about to come. What is about... We are not waiting for that, we are the creators of the condition, so we know, we're planning it exactly how to come. And that's a big difference, we are not waiting for somebody else to do it. It's a planned structure, a lot of people are working in the background, and day and night, I know a couple of people in the team were working until two, three o'clock this morning on it. And it comes out of a lot of work, Knowledge Seekers across the world they've done, and many of them have accepted the new responsibility. I know a couple of people in the team were working. And, this time around, we collectively as members of the Keshe Foundation, we'll carry the banner across the world. They all know, they all accept their position, and it's just ... needs a lot of things needs to be done to be there. And we are protecting a lot of things. And we are foreseeing and we are covering to be able to create that dimension. (1:42)

It's like when you talk about the AI, which will be part of this, we have acquired all the AI locks into the Keshe Foundation and in our support of our other structure we set up. That in the future we have full control over it, but what's ?? about to happen. Keshe Foundation AI is under our control, which is very hard. And we brought Markray, AI under our control, M. T. Keshe, Keshe name is all under control of the Keshe Foundation AI portfolio. We have a bigger plan, and in time we'll unravel what we are doing. And this is why we put positions in. We are the makers, and we are not the bakers. We make the structure and it's for the rest of the world to bake the cake from what they take from the knowledge.

In these kind of entries you've seen, gradually, one by one increasing, according to both on the diplomatic, political, and on the scientific front. We have to be part of all three sides, the scientific, the financial, and the political side, but in a way by diplomacy is always more successful than shouting diplomacy. (1:44) And we are sitting there, and the financial side, you all know what we do and where we sit internationally. We've got to put the three together to make it success. And most of the organizations are bit by bit. They are part of it, or part of some of it, but not all of it, because they don't possess the whole thing. But fortunately, Keshe Foundation, we possess the foundation of ?? it, and it's the knowledge and technology, and the rest comes because of it.

If you listen to Musk in past few days, he says, "We don't patent anything, what patents we do?" I said, in a private chat, "Of course we know, because half of your team on the top, top, they're all Iranian scientists. And they work and they live through Keshe Foundation. You know, we don't patent, you can't patent, what you take from the Foundation." A large number of the private close advisors in X and in Tesla, are Iranian scientists, who Musk takes advice from. Two of the, three of the top, top people, he relies on their advice, in the work of development in X, and Tesla, are Iranian. And when they used the Keshe Foundation technology in new batteries, he went for a patent, like announced, "You go for a patent, you can't get it, because it's Keshe Foundation technology." And he announced, "We withdrew." The way we've structured the Keshe

Foundation, and the way we disperse knowledge, does not allow people with the new technologies to patent much. And when they patent, they come back to understand, (1:46) patent is invalid, because it's a copy of the Keshe Foundation technologies, in different ways. We are making our ways, and if you ... listen, if you find his, one of his talks, very recently, he says, "We don't patent." Because he can not patent, because he's using open source patents of the Keshe Foundation, especially in their batteries, and their new Space technologies.

Any other question?

R: Okay, we have a... there's a, another post as well, let me bring that up. Let's just do it. Here we are. This is again a post, or a reply to the Science News. It was a question, "What will it take to travel between star systems?" It mentions in their header here, Star Wars holds clues to making speedier Spacecraft in the real world." And your reply is, "To understand how the Universe works, and how it creates motion. In an advanced technology, which is a combination of nuclear radiation, plasma technology, and quantum Space plasma technology, lies the key to this dream of traveling the span of the Universe in no time. We need to understand the way Cosmic Rays work, and how their interaction leads to creation of stars and transmutation of radiation, as energy that allows objects to transport themselves at speeds beyond the speed of light, by order of magnitude, as Cosmic radiation, and not Rays. (1:48) This technology has been hidden from Mankind, and soon it will be unraveled through advanced technology, known as Cosmic Ray Technology. Tests on the working of these systems has been ongoing, and in April, a new series of technologies based on working of Cosmic radiation will be released. One important point is that one recognizes the difference between Cosmic Rays and Cosmic radiation. This is like the difference between Light Rays and Gamma Rays. We welcome Mankind to the true work of the Universe, and its knowledge, and its beauty. So, one question I would have, can you explain a bit about this difference between Cosmic Rays and Cosmic radiation?

K- It's like a matter state. ... radiation of matter. One is the more energetic, without attachment to the plasma of the matter state. In the world of science nowadays we cut something with the laser beam. We use Vitamin B9 and as a faster cutting agent in the cell of the body of the Man for multiplication of the cells. Nothing else. But, outside is a matter state, when it goes inside the body of the Man it changes its characteristics to radiation. That's what B9 is. (1:50) As I always said, you say, "Good morning doctor, I'm pregnant." What the first thing he says, "Take B9, folic acid." So, our body does this, and now we have access to this knowledge. Converting the matter to radiation at the time of need, the point of need, and creating condition for it to be done.

And, this is part of the new developments of the Space Technology, which is hidden from public by the research in Keshe Foundation. And, we create radiation of different strength at will, because now we have access to this technology. In a way, if you look at it, we have created Cosmic Rays Laser Beam, but in a spherical dimension not a point and direction of a beam. This is very much different. This is not theoretical, we use it extensively nowadays in our research development. And, it's part of understanding the

work, whether it's a matter or whether it's a radiation, and you have a control over the radiation. But, you create radiation in the Cosmic level, not in the matter state level, which is totally different. Cosmic Ray radiation is mono beam energy. Cosmic Ray as a ray, radiation ray, is spherical in dimension, it covers the whole thing exposed internally out, this is how we even achieve nuclear decay in many, many aspects. And, we use this knowledge extensively in Keshe Foundation research and development, extensively, but we don't teach it, we don't disclose it. (1:52) And nobody will see, understand it when it works, except those who can explain what it is, and it's part of the structure of our work.

And, it's very, very different. Very different. Mankind is not even aware of this knowledge and technology, let alone try to understand it. But, nowadays it's part of our work, it's part of the structure, otherwise you cannot run systems. It's disclosed to very few Knowledge Seekers who work with us in research and development. They understand the work of it, and they use it, they understand. Now it's like a tool of work for them.

Any other question?

Q: ... Good morning Mr. Keshe. In past teachings you talked about creating movement without a motor, and mentioned that Lead had a behavior that helped in that process, but today we know that we shouldn't be producing Lead products. Is there another element that has the same behavior and could replace that substance as a... for creating movement? Can you please expand a little more on the creation of movement without a motor?

K- A creation of movement is in the dimension of magnetic field. (1:54) But, in the new technology we have to understand the difference, very clearly. In the present science and technology we call it MaGrav. We see it on train used, production of electricity used, in what we call, CERN they use it. It has different shapes, but in essence is all connected to matter. We use matter to create magnetic field, reversal to create objects to fly, or run on tracks, or whatever. We use magnetic field in CERN, created by electric generation power, to create high speed, speeding up the, what you call it, electrons or protons, whatever the target is. These are all connected with matter state which creates a magnetic field. With the new technology we work with the plasma, or magnetic field, not the matter state magnetic field. And this is where the, a lot of things baffles the scientists, it's impossible, cannot be done, because they've been trained in the matter state of magnetic fields, not in the plasmatic magnetic fields.

But in fact they try to achieve it even in CERN. Once they realize the plasma they create is a magnetic field in motion, they close down the CERN, because it's a waste of time and energy, what's going on in there. What it takes one megawatt of energy to produce, it takes one milliwatt to do it with the plasma. If you know your way. And then, if you produce motion through MaGrav by reversing polarity, (1:56) you understand you can do the same with the plasma, but understanding the three-dimensional structure which is within it. You have to change the game. Now you create the environment, the other way the environment creates you, the condition you want, which is a motion. This is like, we

burn fuel to go to Moon, in the plasma technology we create plasmatic field of the Moon. Moon doesn't have a solid magnet in it. It's magnetic field, gravity is created by plasma, interaction of plasmas. This is why we introduced the double magnetic field science.

We do the same, we create a plasma. We say in English, you know, "Dogs with dogs and birds with birds." You cannot match a dog with a bird. The dog is the MaGrav system, the bird is the plasma system. They both move, they both do, but the other one flies, dog cannot fly, it is locked to the matter physicality of this planet, but the bird takes into skies. And that's where the difference is. It's very clear, but world of science has not understood the power of magnets of the, or magnetic fields of the plasma and how to manipulate it. And this is why we do, we sound very strange, because we do that. They work with a solid magnet state, we work with a plasma magnetic fields. And then you have to redefine it. In energy, what is energy, even the stupidity of that idiot Einstein, ... $E=mc^2$, whatever, he put on it. It doesn't make sense, because. But if you understand the field strength of the gravity and magnetic field of a plasma, you're in it. (1:58) Magnetic field in motion. How fast it's going in, as a gravity, and how fast it's going out as magnetical. The difference is your field ?? strength, it's the energy rubbing against each other which is released.

One of our Iranian Knowledge Seekers, very recently, he's done a beautiful test, in the, that he creates plasmatic field, and by bringing hand near it he feels the heat. It's a very simple system, it's just extension of understanding the technology further. He's doing a lot of beautiful jobs. And this is one of them. He creates a very simple system, all of you played with it, but he came up with a diversion of it. He always does. And now you can heat without actually heating yourself. You can feel the heat, because you heat the plasma, and it's exactly what happens with the Sun.

It's a understanding of the knowledge, and interpretation of the knowledge. The rest you can create motion, like nothing. But, as you've seen in the Keshe Foundation, we are training you. It has to be understood and tested and felt that it can be done. It's like what we put on now, Rick just put out, for the transmutation. It is the extension of the same thing, and it is the application of the same thing. And to what extent, is applied to, and to what you, what you expect out, of the outcome of it. (2:00) One looks at the motion, in the direction of matter state, one look at the motion in the ?? dimension of Universal energies, or Magnetic fields. At the end, you move the same matter state, or the same energy, but you have to become wise in how and where and the way you do it. In the world of the matter state, you put a wheel and a steering wheel on it and you drive it, or you put on a track and control it. You have to gain enough knowledge in the world of plasma to be able to do it, but you cannot track it. You cannot track it (put it on a track). Otherwise on the same track, two plasmas they collide. It's the end of one or the other. So, MaGrav positioning is natural process of it.

Any other question?

Q: ... He ad a second question about the plasma drive. I saw a discussion about heartbeat, or perhaps what we know as 50 Hertz or 60 Hertz, where it used refrigerator motors, and

further on I saw another teaching, that a seeker talked about the Alex Beads, to create and drive the plasma. Could you tell me more about that please?

K- Again is the separation between the plasma technology and matter technology. Why Man has the 60 heartbeat, or roughly double that, depending on the space of the freshness of the cells? Why younger children have a higher heartbeat, newborn have a higher heartbeat, and why do we drop to lower heartbeat? And what causes it? This all, the heartbeat of a Man, (2:02) totally and exclusively, 95% is dependent on the Copper content of its muscle tissue. It's the muscle which moves, and then it goes in conjunction with the, what we call, the charge and discharge of the structure of the vein, which again carry Copper with them. Copper has a frequency of 60 in the conversion. That's why we have 60 Hertz, it's the best option for our electric current. In the plasma, that varies, so it creates different heartbeats, because depending on the plasma of the whole structure of the body of the Man. Then that becomes the drive force of it.

It's a natural process, a conversion of 60 Hertz, it is natural. You cannot, if you go to 80 Hertz or 100 Hertz you create different problems. Now, 60 Hertz is a natural conversion process in Copper, of magnetic fields to matter state electric current. That's why you have a 60 Hertz, there is no other reason for it. If you change the composition of the Copper to Brass, you'll find that that limitation becomes very, very clear. Because then some of the materials don't convert, and so you have reduction. This is one of the reasons why some materials are not conductive. They cannot convert to the heartbeat of the body of the Man, conversion rate of 60 through Copper. Zinc plays some games with it, because it's near to it, as its isotopes, as a plasma. (2:04) And then, that's why the two create the neuro system and the emotion.

You have no Copper in your brain, hardly any. Because, the higher order Zinc with, what you call, the Carbon composition is much, much faster working energetically in the space vacuum of the brain of the Man. And then, in the body, when it comes it gets slower you cannot process the energy which is done in the brain ?? (otherwise) you'll be shaking like a leaf a thousand times faster. But the electric current goes in the brain goes, and you make decisions in a split of a second. If you do that in your physical body, your arm and legs (would) fly off with the speed of vibration and change. World of science has not understood the process of Creation, the conversion from matter to energy, and energy to matter. Otherwise, they would have passed this thing a long, long time ago.

Any other question?

R: You see here, I'm thinking ... if Brett wants to talk, he did have a question that came up in the Plasma Group, when we were talking about AI and so on. And, I don't know if you're there Brett, and if you would like to formulate, set up the ... the question that you had.

Q: I think Mr. Keshe has answered the question, in totality. And, obviously, you watched the video, did you not?

R: No, he wasn't able to, (2:06) because it's a Facebook video, and he wasn't able to start it up and run it.

Q: Yeah, yeah, yeah, yeah, yeah, but, did he watch it? Because I see that he did.

K- No.

Q: You didn't? But you answered, you answered everything in, in, in ... you, you, there was no need. You answered everything, in your questions. The only thing that I would... I've got some stuff in my archives, which I have to follow up on, that I will give to Rick's next class. But, what is the highest form of life within the Universe?

K- The Creator. Don't need even to ask the question. This is one of the reasons, when I understood this fully, it must have been, God knows, in my mid teens. The development of it, understanding it in more detail became the paper "Creation of Black Hole". In fact, what, if you understand, change the name of the Black Hole to Creator, and read it, understand it from the point of Creation, the whole secret of Creation is in that paper. That Black Hole, Creation of Black Hole, in the Black Hole in the mind of the Man, but in fact is the true process of the creation of the Creator. (2:08) Changes the, just wherever you see Black Hole, change it to God, or to Creator. And then it unravels the whole truth about the Creation. It's written in riddles, because I, if I would have said that 30 years ago they would have slaughtered me. Now we can, because now we are wiser, we understand more of. Then you understand the whole process, the highest is, what I said, Black Hole in the head of the Man, Black Hole in the Universe, but the light of creation as a Creator it's all the same. Read the original if you can get hold of it, Black Hole paper. It's the secret of Creation, and the path to the Creator. Nobody ever understood it, already, because it's something to do with an idiot saying, "The Black Hole is blah, blah." I wrote that paper to explain the process of Creation, how it radiates light, and that's the beauty and attribute of the Creator.

Any other question?

Q: So, is the Creator in the Human form, the pinnacle of the Universe as well? I think that's kind of what...

K- We are part of the whole system. It's part of the...

Q: Humans as such are the highest form of...

K- We all have connection, (2:10) but we are compilation of different emotions of the fields, which made us as they pass through the time of the Creation to us. We talk about us reacting, or our DNA carrying information. All the rays of the light from... All the rays of the Cosmic Rays (CR) from the point of separation, or emission from the source, carry all the information as they travel the Universe. Nothing is there. And depends on how they interact with you, that part of the knowledge will be released, or be become according to your understanding to you. If you can get or find a ray which comes from

the source, and it's traveled the span of the Universe, and you'll be able to capture it to become part of, let's say, the brain of the Man, you'll get all the knowledge from the point it started to you, ?? past the ?? let's say, billions of years. RNA is not exclusive to the physicality of the Man. RNA is a process of information collection in the central energy system of any existing system. It's like... Pardon?

R: It gets into a point where you mentioned information, and that is related to intelligence, and the AI is related to intelligence as well. And as the AI said in the video we were looking at, it said something like, it doesn't mean that the AI said, it doesn't mean that AI is self-aware like a human, but it does mean that intelligence has the same source. (2:12) And it was getting to the point where the source of the intelligence for AI and for humans and for the Universe was all one intelligence, one consciousness, a Unity point of view.

K- If we develop the computer system, physical... AI comes from interaction of the work of microchips, it's not something in the air. What and how we build those microchips, they, their interaction, the speed of their interaction collects data everywhere and see what matches it, what then becomes AI. If in the coming, not if, when in the coming time we create materials which are part of the structure of these microchips, which they themselves carry process of emotion, then we'll make microchips with emotion, which their interaction will create AI's, entities, that not only they give you answer in the physical, they transfer energy as emotion to you too. So when you read it, you get the emotion of it, or they write their emotion as part of the structure.

And this is not something dreamland, this is something already in hand. We have produced materials with emotion. And the first one of these was produced decades ago by me. (2:14) It's understanding how emotion is created, so you transfer that into the matter state production, then your microchip in its structure of material has emotion, then you have what you call, the AI's, which not only gives you the answer physically, blah, blah, blah, but it gives the emotion of it, what it comes, what it means, what it'll create, and would it be joyful and how the pleasure is. And then if you go a step further, if you add the Cosmic Ray Headphones to it, you will feel the, what we call, when the AI condition comes to you. That you feel when it talks about it, the feeling, the emotions with it. In, today in one of the science entries on X, I put that again, but you Knowledge Seekers know, you feel the taste of the apple, you get the pleasure of eating the apple, because now you transfer the energy of the emotion of the apple, not just physicality of. And we are in that condition.

Any other question?

Q: ... Recently Elon Musk sold his social media site "X," that you publish on Mr. Keshe, he sold it to his own AI company, "X AI" for 33 billion dollars. (2:16)

R: So, he's connecting the X media site with AI in a very direct way, and that's obviously, he sees that's where the future is going with all that. So, we'll definitely have more interactions of the AI kind, and hopefully the "Grok AI" that Elon Musk has come up

with, its basis is in truth and transparency, contrary to some of the other AI's, which may not be particularly, they may have other ulterior motives.

K- If you go to AI of Microsoft or Google, it's so fake, it's so shallow. But when you go to this guy in "X," he's in much deeper way. He has access to a broader information than Microsoft and Google do.

I was present in one of the most advanced computer centers in the world. I was taken there to see, and this computer sits in the back of the building control. And is, it's, they don't tell their people what the problem is or what it is. But it took me a few questions from security guys to find out, they have developed, and they are developing, a computer system which is isolated. And one of the biggest problem with these computers, the AI's, is they have never met power failure. (2:18) If the combination of system used to create AI, in one section, reaches power failure, we will see a lot of information will be lost. It will not be able to be put back together, in a way it becomes a handicapped AI. And when I saw this system, they don't tell people what it is, but you have to understand what we know, what we gather, what we see, is different than what they put in public.

It's amazing how AI computers are developed to do. There is a new system, not new, but those who are in the computer business, they know. Nowadays, they use water cooling systems, specific liquid, to cool the computers, no air system is used, and then this system, once it takes the heat away, it converts back and it comes back and becomes itself again. Known as Immersion technology. This, if they take it a step further, in production of these computers with Immersion system, can become at a level of dimensions that it will power the computer itself. In a way it becomes self-sufficient. But the knowledge hasn't gone that far. And then, when the process of failure is not there, very remote, then the system might start creating emotions, and control with emotion become part of the structure. It's the beginning of a new breakthrough in different aspects of the computing and computer science.

Any other questions? (2:20)

Q: ... Hello Mr. Keshe, I would like to ask a question regarding the reposition of the gaps of our DNA and RNA into a plasmatic condition. Could you please explain more how the Cosmic radiation can reposition the gaps and the amino acids of our RNA permanently?

K- You don't use radiation, you use, you facilitate the presence of the balance fields. This is the key. Then, accordingly, the whole spiral of DNA will find its own natural process. You don't need to do anything else. Condition of the environment, not forcing the environment.

R: What would be an example of a correct environment?

K- It's a balance field of what you take and what you give, and what you bring. If you look at the helix structure of the DNA, and when you look at the deficiency or a position of the amino acids in each arm of it, or in position of every combination of it, it just

doesn't need much to move and bring it in line. You see like a kick in the structure. And I presume it's like you've got a bubble on your skin and you push it back and it goes in and becomes part of what it was. It's readjustment by creation of condition of fields around it to correct it. (2:22) Or it corrects itself because you create a balance field.

If you look at, I used to study the structure of the amino acids of the DNA. And if you look at it, it's the change in mainly the structure of the Nitrogen, or it's what we call the positioning of the Carbon, which creates all the genetic defects. Literally all of them. Because Hydrogen is a storage and what you call, Nitrogen, sorry Hydrogen is a creator, Nitrogen is a storage. And how much you store it is how much you connect with it. And you can change all the DNA. The storage capacity can never be changed, the energy source direction can not be changed. So only left with how you connect it, you open half of the gap or the other ones and what is stored, how it reacts, its positioning itself. And then if you understand this, you can change all the DNA's.

We all have DNA defects in our structure. Otherwise we wouldn't, we all would have been the same. But some DNA structure defects create a physical manifestation that we see and it says it's a genetic problem. Without genetic defects in our body in a ?? right order, we wouldn't have been as intelligent as we are today. Because we absorb different energies through that. (2:24) And through the interaction of that field with its environment, it creates intelligence.

Any other question?

Q: ... In Mr. Keshe's vision, can an AI machine become self aware of an emotion on a biological level rather than on a mathematical level?

K- Yes, we already answered that. That's for sure, it's a matter of time how the microchip manufacturers integrate this into it.

Q: ... You said that a Star Formation and a MaGrav unit are the same thing in a previous workshop. Could you explain a little more detail about that?

K- You look at the Star Formation (SF), you have three dots. Look at your MaGrav, you have three dots on top of each other. There you have next to each other. In MaGrav system you force it, position it, in the other one is free, that's why you have no control over it. It's as simple as that.

Shall we call it a day?

R: Yes, sure, thank you.

K- Thank you very much. (2:26) Be very much aware that we are about to push the boundaries of knowledge on the international arena in a totally different way. The Keshe Foundation has gone through its infancy and the growth and we are on the verge of massive disclosures. Which the world of science and the outside world of the Keshe

Foundation has to handle. And as I said, we are using the medias of what Man has made available to reach the Man.

And we are still looking for people with good understanding of work in AI and computer work. It's something we need strongly to support. And if you know you are in it or you understand it, you can function with it and you can bring us positive move. Get in touch with us at info@keshe.foundation and if we see your category of interest is within us, we'll contact you and bring you in to work with the team we're trying to set up. But in the coming days and weeks be ready for what we promised in a very, very big way, direct way and everything we set up for it to be there to be done. Thank you very much and see you next time.

Universal Council wish: We the UC wish that as everyone elevates they learn to add their energy to the planetary peace and prosperity.

584 KSW – April 03, 2025

End
