

586th Knowledge Seekers Workshop April 17, 2025

(Quick Index 23 pp, Introduction, Topic Index ; Need to do; Key Phrases, Words)

(Auto transcription from Elias)

Should have connected ourselves to emotion from beginning - not need to move physically; P is hard way; To move - think create emotions; Receive (water) energy through emotion; Need to be lower - humble - then receive; Creator - weakest fields; No spacecraft use emotion; Give without thought to receive; STM connected to everything; UFOs backward; Example of China - money to develop nation peaceful - West on wars possession - criminal leaders; Feel purity of water through emotion - achieved in flight systems; Learn shortcomings; H lowest of Creation; All energies of environment create it; Creator uses own energy; Mother received 2 eggs back; STM becomes Black Hole attracts fields; Creator receives all information; Twinity MaGrav help transmute without system; Creator learns from mistakes - created Man - killing; Understand knowledge of emotion; Story of Minister - all knowledge came to him; Don't call it dream - deny Soul - own power; Absorb energy of water; Café between U; Transmute become Chinese; Manifest strength emotion at TPP; Taste emotion of motion - not motion of emotion; Practice - give what water needs - fields overflow - expand to you; Try understand emotions - move body; Pulled into Creator; Recycle emotions; Not religious - scientific; Share knowledge to U - emotion; Satisfy weakness - transmute; Story of friend not appreciate what has - cancer; eat apple - absorb energy of U; Emotion only way travel U; Clergy made Soul outside - abuse; We are creator & controller of emotion; Understand CR; Thieving Prophets; Nothing in U match CRm; Every organ - emotion; Emotion like middle layer skin - transfer energy between inside and out; Cancer & Middle layer; Skin to brain; Greed means P; 5th video - Light; Rick chosen 6th for flight; New T solve emotions - beyond present T; Believe in ourselves; Create turbulence in plasma - no rotation - potential difference for giving & receiving- emotion; How emotion triggers - creates motion; Surprise in May; Share with humanity; Patents to spread knowledge; Passive - neutrinos; CR Balls certified; Beyond UFO; Separate Souls into groups - Beautiful People; Production AA - air; Add emotion to AA - Microchips; Created brain 2017; Uproot killing - in Man's DNA; Virgin birth; Create perfect Soul; Opposite emotions - balance & perfection; P not worth it; Testimonial - Twinity MaGrav - effected all emotions; Self-Analysis - achieve balance; No name for Creator - give all love; His fields create emotions; Damage by toothpaste - spit out - deficiencies - Zn; Baking Soda; Taste of nuclear material - taste Gans; Nuclear salts; Wrong about stomach acid - alkaline transfer energy; Salts connect metal to non-metal; How transmute between galaxies; Use energy of components; Vegetable Gans attach to bone; Creator of U or Unicos; U Teachers access to totality knowledge; Fall in love with emotion; Create Scent; Inertia of Sound; Space has different sounds; Cells created by sound; Change heartbeat - heal; Mass doesn't change - Weight does; Why different races - mentalities - G field difference; About DNA - British Royals; About Brazil; Iran - bombing or give minerals to Trump; Vatican behind mineral deal - make Iran submit to Vatican; Threatened KF; CRm U currency; Inter atomic fusion - at death - as plasma; Creator connected to all fields STM gathered; Calculating plasmatic strengths - matter isotopes; When plasmas fuse - new position in U; Strength of STC dictates position of STM; All connected to Creator; Forced religious concepts - to abuse - give up own power; Don't need

intermediaries; Leaders made \$30K off each dead Ukrainian; More about Iran - corruption; Musk's close scientific advisors Iranian scientists - aware of new breakthrough T; Why Trump through Musk negotiating with Iranians; Politics of science; After Iran Saudi & Russia - have total control; F-35 - bombing controlled by US - electronically; Dog's ashes; KF plasma systems copy tilt of Earth; T to replicate structure of life on Earth - created Soul; No dynamic rotating reactors - solid state; Truth about Christ's crucifixion; Evolution in science - next Flight test.

Topic Index

Should have known Knowledge about U from beginning - systems we see in Space - connected ourselves through our emotion rather than P; Everything contained in Yin and Yang; We are part of total M field of U and Cosmic Rays (CR); Yin & Yang - parallel to Energy side; If our ancestors would have chosen Energy side - wouldn't need systems of advanced T - Mankind chose hard way of being physical; In P we managed to make telephones, airplanes, discovered fire - have to move bodies from A to B - think and create emotion - coordinate everything; Have reason for doing everything - satisfy emotion of thirst; Man only physical; Create emotion of needing water because thirsty - able to create field strength of water in our emotion - not need to physically move body; Receive energy through our emotions; Understand own power - become Man of U; Can't force to move objects; Lower - more humble - more we receive; Don't say to water - give me energy; In D of Energy be lower - weakest fields - learn from Creator - always lowest and giver; Gives in D of expansion - receives more than what He gives - receives love, care; He is not stupid; Made humbleness part of structure of Creation; Become receivers; Create spaceship of emotion - be the lowest; Convert to P - to enjoy seeing beauty of Creation; Too busy giving to see what giving; Science behind structure of Space travel; Don't need spacecraft - create emotion to travel; Become perfect so emotion is pure; Example of Creator's humbleness; Don't give with thought of receiving - give unconditionally - opens us to receive; Move body with strength of emotion - not walk; Already connected to everything through M field strength of STM - go anywhere in U - don't need rockets or UFOs; Laugh at people in UFOs - backwards - entangled with P; Scientists spending too much time killing - not progressing in Science; Don't understand why China is winning in science and T; Because Americans and Europeans spending money on weapons - becoming more powerful killers; China doesn't start wars - use assets to develop nation; Media complains about Chinese - not face truth; West wants to possess more of Earth - be more powerful - created criminals like world leaders in West to carry out; West wants to dictate leaders of the countries; Chinese don't - investing in people - building infrastructure and T - nation to become wealthier - not waste on killing and wars; Compare how many wars China involved in with West; America's debts 30 trillion - mostly for war; China didn't "colonize" others - invested through peace; Man has to learn to do same; Use new T - move with emotion; Understand process of Creation - transmute through humbleness and giving unconditionally; Make cup empty to receive - can transmute with wish; If thirsty - receive water through desire - not walking to kitchen; Feel purity of water through emotion; Not a theory - many experienced in Flight Systems - received water in mouth - flooded - couldn't swallow; Created through emotion of humbleness - need - body receives; Twinity MaGravs to help; Learn shortcomings -

become humble to receive; reach point of balance - become lower than system - receive; Understand which emotion is creating condition of receiving - humbleness; Why everything created from base of H - lowest essence of Creation - line of plasmatic CR; Creator is lowest level - Fundamental Plasma; Creator doesn't hold on to anything - never stops giving; Collectively all energies that come together from environment - create environment of Cosmos and U; Creator is clever - uses its own energy to create itself; Story of mother with 4 hungry children - only 4 eggs - she received 2 back; Gave unconditional love - children gave half back; Never thought to receive back; Hidden message - mother is Creator; 20% of energy from matter - 80% from fields of environment; In U stars feed - receive back from center of U; Universal Community of Unicos ?? gives to Man; Collectively STM becomes Black Hole - its G field attracts energy from Unicos - why we are in a galaxy of universes - same process in our body; Cow good example of give and take; feed grass gives milk - manure on fields more grass - more milk; Learn to move with emotions - go through steps - setup T and machinery to progress; Know our potential of giving; Difficult to lower field strength enough to receive CR; Special Flight Session for 5 people - chose 6th person; Give them strongest fields - take weakest from them - understand emotion of belonging to Totality - not just being individuals; Feel - link up to field strength of Creation - not just U; Emotions are key to transportation and motion; Connect to lowest level become receiver without having to move physically to TPP; Creator doesn't physically travel U to see what's going on; He becomes so humble - lowest level - He receives all information - connected to everything - like give love to mother - connected to everything; New Twinity MaGrav - bring new D - ways of thinking - add CRm; Good reports - help transmute with own strength; Don't want to own emotions - start over; Creator learns by mistakes - created Man - never calculated he would start killing; Understand knowledge of emotion - don't need to physically move; When receive everything - come knowledgeable of all - because connected to everything; Story of friend who was Minister of Petroleum - Everybody brought knowledge to him; Purpose of Twinity MaGrav - to test yourself - learn through emotion - don't call it dream - worst word - denies own power; You transporting yourself through emotion; Connect to mother through Soul - enjoy her presence; Every excuse to deny own power and knowledge; Don't need to drink water - absorb its energy; Travel to Mars with emotion instantly - link to emotion of central energy of that TPP; Meet in Space between galaxies - "café"; No GPS in U; Use M and G fields of destination - emotion of the STM - coordinates of motion - M field strength of destination - in that TPP; How we become Chinese when transmute to China; Inner emotion interacts with M fields of environment - that emotion dictates how manifest; Inertia of emotion of land dictates culture - body features; Manifest ourselves by field strength of emotion at TPP on Moon - strength of desire how we'll appear - if need legs; 6 KS on Flight be Satellite Souls - support others in transmutation; Taste emotion of motion - not motion of emotion - be lost; Practice - sit on sofa think of glass of water - feel how water tastes - receive energy of water by tuning into what it needs; When fields fill up - that emotion will overflow - expand to you; Strongest always gives to weakest - brings balance - principle of Creation; Try to understand your emotions - move yourself; Many emotions within us - don't know about; We have hidden emotions from ourselves; Part of emotions of U; Emotion of wanting to be with Creator - give everything out - become very humble - connect to His M field; When His fields return to Him - you become G get pulled into

Him; Total recycling process - learn recycle emotions; We are not religious - or preachers - purely scientific - made systems to show it - hundreds have tested them; Share knowledge - teach others - not physically teaching - give knowledge through emotion of Universal Language and Knowledge; Like Nikola Tesla and other scientists received from Creation; Understand strengths and weaknesses; A strong Man knows his weaknesses; When arrogant - actually weakest; Through humility - know weaknesses then strong enough to do something about them - same for emotions of transmutation; When know reason can create emotion for that weakness to be satisfied; Don't need wormholes, Black Holes, transmutation systems - it's always within us - we call it a dream; Story of rich friend with beautiful wife & children - didn't appreciate - looking elsewhere - cancer - still didn't learn; Realize power of emotion in transmutation - conquer U; When see UFOs - know they are still physical - have not reached maturity - humans further; When eat apple not for 10 calories - creates M fields to absorb energy from U - the 80%; Learn power of emotion - only way to create motion in U; Don't call Soul a dream - reality of power within you - key for transmutation, transportation, everything else; Energy of water transferred to you through emotion; If God has that power, so does Man - through STM; Clergy created Soul outside of us to milk the Man of his emotion & control him; Man has to understand control within himself; We are creator and controller of our emotion; Can understand emotion of others; Have to understand CR; Religions robbed the Man; Power is within himself - don't need to walk - manifest through emotion; Have systems to test; Know your strengths & test your weaknesses; Strength is when you give - not receive - means still a human; Achieving is different than receiving; Understand other peoples emotion - not our own; If God can understand His own emotion so can we; God has access to all fields of Creation - He created them; When reach this level - humble yourself in front of Creator - understand His work, simplicity, love; Understand otherwise make those in UFO - Prophets; Set ourselves up to be robbed on emotional side of our creation; Humans emotion is higher than those in UFO - responsibility to teach them - not rob them; Don't be like thieving Prophets - who robbed Mankind; Distributing Twinity MaGravs to KS - some have CRm - no one can match - connect to Cosmos; No T in U can match CRm - bring Man Knowledge of Creation - first know yourself - Knowledge is your Twin - connect with emotion - not P; Try to understand how powerful your emotion is; Every organ in body connected to emotion; Emotions like middle layer of skin; Outer layer interacts with outside; Middle layer transfers energy between inside and outside; Inner layer handles inside; Emotion in middle layer - in communication with Creator and created - giver and receiver; Controls how much take from and give back to environment unconditionally; Life not sustained without a control - prevents diseases; Doctor not open to understand how cancers start - when middle layer cannot transfer energy from inside to outside; Every organ has middle layer; Malignant lump inside organ means middle layer cannot transfer energy - stuck in tissue; Skin connected to brain - center of emotions; When World of Science understands all aspects of T - humans will never kill or drive car - move own P - no danger of accidents; Transfer yourself to where needed - emotion of giving - not greed of taking; Greed sign of P; Generosity linked to World of Creation; Not about giving away possessions - fulfill their emotion - don't need your things; 5th Video - Keshe 5: Flight and Creation of Light.

Part 2

Dilemma to decide 6th person for donated Flight session; No one more eligible than Rick Crammond - never asks for anything - years of self-less service; Flight trial open new D in emotion of Soul - solve our problems with emotions - believe in ourselves; May Flight - introduce new T to create emotion of transmutation & feed us; Advanced T extremely beyond present knowledge; Create physical motion; Feeding energy through plasma of U extremely complicated - amazingly simple - built system for it; Creates Black Hole - absorbs and radiates what is needed by P of Soul; Importance of transmutation - create conditions transmute energy itself; Have to create turbulence - a potential difference between giving and receiving - both have common denominator - comes through emotion; Emotion of hunger triggers need to kill sheep & eat everyday; Studying how emotion triggers - creates emotion of motion; Surprises in May session - don't say you just imagined - you actually did it; Confirm part of your existence you denied; Time to deal with what we denied - access to energies, emotions, emotional energies, information of U; Responsible to share with humanity - U Community; No patents in U; Patents for P - to control others; KF used patents to spread knowledge; Rick - waiting long time for flight system - no, flight system is you; In 3rd Book Black Holes produced by passive M fields - called neutrinos; Only passive until you interact; Made up many names - Up & Down Quarks; Up Quarks is Sun - Down Quarks is Earth; Don't need to fantasize; 75 CR Balls produced - certifications - photographed - nobody can duplicate - hidden characters in Balls - for transmutation; CRm built into Twinity MaGrav - Universal D; Accused KF as pseudo-science - pseudo to those who don't understand; Problem - KS speak about experiences as dream or fantasy; Take control of life; Advanced so much - don't need to build UFOs - waste of time; Doing transmutation flight tests for years now - can separate Souls into groups; Learned through tests with 'Beautiful People'; See multiple Souls on graphs; Can see when emotion is positive, or depression; Brought in massive changes; Create dynamic motion of fields without using rotating balls; Showed production of AA from air; Produce protein - add emotion - create life - can dictate which emotion; Next create Microchips with emotion - like brain; Produced brain in 2017; Computers without wires - only M fields - how brain works; Can produce AA without any contamination - carry emotions for certain jobs - build robots kind and happy; Uproot essence of killing in Man by introducing energy within Man's AA; Have system; Man is not ready - make him ready; Twinity MaGrav - create emotion of child while in womb - virgin birth; First create a perfect Soul then transfer it to womb with emotion of mother - conceives child; Energy fields dictate creation of P; What means - I made Man in the image of Myself - Man created in womb of Earth; Don't have time to build UFO; Don't use rotating systems for transmutations; Rotation is attribute of P; Motion in emotion - 2 emotions opposite to each other - good and bad; Together bring balance and perfection; A lot of knowledge to share - Man not ready - calls it pseudo-science - soon they'll commit suicide - never understood reality of Creation; If show you beauty of T - all will commit suicide - P not worth it; Reads testimonial of KS - first CR Twinity MaGrav - connected to CR; Testimonial about how all his emotions changed; We have to chose path - handle emotions; If lose control - emotions bring you down; Do self-analysis - achieve balance - closer to Existence; Talk to Creator with all your love; Be detached from creation - give; best not to put a name on God; Religions put names; Creation came out of His generosity

- fields; Emotions created by His fields - cannot be separated from it; Again warns against damage done by toothpaste, especially women; Chemicals with combination of Zinc; Minerals in mouth - body dumps from cells - spit it out - create deficiencies; Depression, hair loss in women, tiredness, nails - Zn connects to neural system and emotion - affects women more than men; Toothpaste with sugar - salt worse - change body to acidic - cancer; About fluoride in water & toothpaste; Children lose calmness, emotion problems - dyslexic; Toothpaste should have no material; About Bicarbonate of Soda (NaHCO_3) or baking soda; Kill virtually every animal, ants, reptiles - add sugar, flour; Na connects to become a salt in energy aspects; More information; About stomach being acidic is wrong - only to break down food; Totally alkaline for energy absorption; Alkaline, or salt side transfers the energy to organs; Wrong about stomach walls and intestines absorbing energy; Never understood process of energy transfer - only look at matter; Gans production put plates in salt changes into Gans's, or energy; 2% solution of Sodium Bicarbonate washes Uranium Oxides from clothes; Explains about touching and tasting Uranium; Enriched Uranium has salty, sweet, sour taste; Nuclear material also a salt can be washed; Salts are connection between metal & non-metal; Na - metal; Cl - non-metal - connects 2 together - same in middle layer of skin - transfers energy between inside and outside; How travel between spaces of U in transmutation - use energy of components - not components - cornerstone of Cosmic T & KF work; Use to transmute between galaxies; Salt allows physical - metal connect to non-metal - biological part; Ca is metal - due to GM field vacuum of body - allows Gans of vegetables to attach to Ca of bones; Ca, Na, K - special energy ratio - mimics other; Why we need salt in stomach - convert vegetables to energy; Homeopathy - 12 salts of body - other salts created from themselves; Amazing how much information one carries; Turn to Creator of Unicos or U - you decide; Understand process of Creation through M field - not physical knowledge of matter; H of this U connected to H, or Fundamental Plasma of Unicos - created out of it; Fields lower than H of Unicos: Access to Totality of knowledge; As Universal teachers we have access; Man committed suicide of his Soul - knowledge of energy; Difference between P & Soul is emotion of satisfaction - what able to do; Fall in love with P - or emotion and inner beauty; Always lose with P; Essence of emotion remains true; Creating the scent - crystal structure; Interacting fields make their own sound; Sound behaves like Inertia; Inertia of sound core part of T of Creation; Different parts of Space sound different - know from research; Different sound when facing South or North - same space; Cells created by combination of sounds; About heartbeat; Change frequency of heart - change critical condition - don't need defibrillator; Match plasmatic condition with Soul never die; Mass doesn't change; Mass interacts with Earth's GM field creates matter - each position different strength; Same fields create different things in different locations; Mass can exist without matter - Weight cannot - dependent on position; H on a planet - not be same on Earth according to TPP; Why have different races - different parts of planet - Soul same; G field different from Himalayas to bottom of Africa - different colors, mentalities, etc; African travels to China stays African; Transmutes through emotion - can change to Chinese; About energy fields of DNA; British Royal family - DNA test; KF Brazil makes conference; Talks about going to Brazil; What's happening in background in Iran - clash of Ayatollahs; Splitting Iran; New Iranian government selling mineral resources to Trump - not to bomb Iran; Israel pushing for bombing - paid commission; Vatican behind mineral deal - meeting moved to Rome - Vatican has say in

war; Islamic Republic concede to Vatican - Islamic Catholic Church; Ayatollah Khamenei threatened me & KF - not to negotiate with Americans - allows others to negotiate - more money; Twinity MaGrav embedded with CRm - different construction - see testimonial - field interactions - all levels of emotion; CRm come with certificate - photographed - can't be replicated - unify banking system; Universal Currency; Inter atomic fusion happens when we die - in plasmatic way; According to Soul's position - how lived; Creator connected to all fields we have gathered - fed our body to STM; About calculating plasmatic field strengths; In matter isotopes; When plasmas fuse - strengths not match - create balance - new position in U; Strength of Soul of Creator - dictates position of STM - TPP; All are connected to Creator - cannot escape; Forced religious concepts - to abuse - give up own power; Don't need intermediaries; Leaders made \$30K off each dead Ukrainian - where Soul ends up; About using ash as toothpaste - depends what is burnt - not charcoal; More about Iran - corruption; Musk's close scientific advisors Iranian scientists - aware of new breakthrough T; Why Trump through Musk negotiating with Iranians; Politics of science; After Iran Saudi & Russia - have total control; F-35 - bombing controlled by US - electronically; About using dog's ashes; KF plasma systems copy tilt of Earth; T to replicate structure of life on Earth - created a Soul; No dynamic rotating reactors - solid state; Understand truth about Christ's crucifixion; Evolution in science - next Flight test.

Introduction to 586 KSW - Emotion Creates Motion - Lowest Field & Emotion Needed to Transmute - H is Humble - CRm Elevate Emotions - No Method - Danger of Toothpaste - Rick's devotion

Another name for this workshop could be, how emotion creates motion and that's how we will move ourselves in the Universe (U). Mr. Keshe always tirelessly brings us back to the emotions, but at the same time he gives us a new angle in which to contemplate our inner life and eventually access our Soul of the Man (STM). At the moment we are stuck in the physicality (P) of rockets, driving cars, and moving our bodies to go somewhere and do something. But this is all we have known up to the point he started teaching us the Knowledge of Creation, where the P is not the main focus, and in the U we can live without manifesting the P. He asked us to imagine what life would have been like if our ancestors would have chosen to stay in the dimension (D) of Energy or the Soul, instead of becoming so attached to the physical body and believing that only the matter state is real. How would that look in our daily life? For one thing we would just appear in places that we want to be, and not have to make the body get up and walk to the car and drive somewhere. If we think about it, that takes a lot of time and energy on something that is not needed. With all the extra time we can't just watch TV, that gets so boring after awhile. We would need to develop our mental capacities for knowledge and have interest in how Creation works. Instead of looking at life through the tiny 'key hole' of our current programming, we would expand out and soon learn everything about the Earth, and when that gets exhausted expand out into the solar system, galaxy and beyond. As they said in Star Trek, 'to go where no man has gone before.' This will become our life, and not doing meaningless jobs in offices to push papers around for someone else's ideas. We'll develop our own ideas and interests and pursue them wherever they lead, even beyond this planet.

To do all of this we have to understand and learn how to create and control our emotions. We will have to expand our emotions beyond the only few we know like happiness, anger, sadness, joy, jealousy, excitement and the rest. Maybe we'll come to understand through our inner process how emotion is a field strength of existence and that the Soul already knows how to create them. And that it is the Soul of Physicality (STP) and P that are limiting us. Today's teaching is a kind of journey to ponder about the different aspects of emotions and at the same time it is filled with many different subjects that are related to our future life in Space. At one point Mr. Keshe said, it's amazing how much knowledge one carries. That's the feeling one gets by reading through the Topic Index, that is if you can make it to the end without the brain shutting off from knowledge overload. It's just that we are not used to being exposed to so much living knowledge. We are more trained to copy other peoples concepts, then being part of the knowledge itself. As we get more exposed to the plasma fields through using the technology (T), hopefully the 'Emotion of Knowledge' will also expand and the society will get the feeling of love for the plasma science and together we'll all elevate towards a peaceful and loving planet. Then we won't need to deny the Soul just so we have something to do.

One of the very nice abilities that will open up to us is that when we are thirsty we won't need to create an emotion to move the body to go to the kitchen and physically get a glass of water. Instead we'll just generate the feeling of the water and it will start manifesting in our mouth. This was demonstrated years ago in the Linz KF Center. If you remember some people were in the Flight System and their mouths were getting flooded with water, so much that they had difficulty swallowing. And additionally, years ago during the Flight Sessions where we used headphones to connect through the phone lines to the KF systems, people were reporting that they were getting a lot of water in their mouth. Mr. Keshe never explained it at that time, he left it for us to understand. Now today it makes sense, because the first thing people will think is that this is not possible. But we know it is because we already experienced it. Now we are trying to do it on our own using our emotions without a plasma system.

A good practice to train for this, is that when we are thirsty and have a real need for water, we can sit on our sofa and try to connect to the water. We shouldn't in a forceful way say, I want a glass of water, come to me. We should try to be lower than the water and most humble like the Creator. We can try to feel how the water tastes and try to receive its energy by first giving to the water what it needs. Well, what does water need? That's a good question. He said, we should tune ourselves into what it needs. It is my understanding that we should shift our minds from thinking of it as a dead object, and think of it as fields. Then with our Soul we can create an Infinity Loop interaction with it and have the feeling of loving it as part of the Creator and give our fields to it. At first we'll have to do it with our imagination, and as we get more experience it will become a reality. When the water gets full of the fields of that emotion they will overflow and expand to us and fill us up. And at some point water should start forming in our mouth. Or maybe we'll feel our thirst has been satisfied with its fields. It's for us to practice and learn, and then share with the rest of the Knowledge Seekers (KS).

The other thing we have to use our emotions for is to move our body instead of walking or driving a car. In other words, we transmute our P with our emotions. As we are having a hard time developing or remembering this ability, he is creating more advanced systems to help us. Many KS have reported transmuting with their Soul, but it is not so clear if any have yet managed to do it with the P but are not yet disclosing it. One of the more advanced technologies developed to help us with our emotions is the new Twinity MaGrav system and it's even better when it is embedded with the Cosmic Ray materials (CRm). The testimony shared today is by a KS using this embedded system. He made his own subjective evaluation of his emotions and gave a list of the ones the system helped him purify. It is interesting that he is claiming that the system helped him conquer his Ego in one week, and he thinks that it would have taken 3.5 months to do it through another training. There wasn't enough information to evaluate what exactly he means, but it is interesting to think about.

To my understanding, Mr. Keshe has never given a method for going deeper into the emotions. For good reasons, otherwise we would just start copying the method and get nowhere. People can also fool themselves into thinking they have control over their emotions and then if they start trying to teach their confused understanding to others, it can become a real mess. We see this happening all over the "so-called" Western Spirituality movement, and it becomes more like a spiritual entertainment business, then anything else. This will not help us with transmutation, because you cannot fool the Soul with shallow words of the STP. I don't believe we have much experience with the kind of emotions he is talking about here, especially in a society that has been purposely kept at the level of the adolescent in order to have control over the social, economic, and political worlds.

To enter the world of these kinds of emotions requires a personal and total commitment to go deep into understanding our inner world. That's why it seems Mr. Keshe just gives us small nudges and tries to gently coax us into taking the path of self-investigation and deep inner work. It cannot be forced and we have to approach it in a loving way that will build our self-confidence. Because in the end, it seems to me, that the emotions are something simple we already have inside of us, but because we deny the Soul's existence, we also deny ourselves access to them. And when somebody happens to have a sincere and innocent wish, they appear to have great powers. But since we are in denial we make up some other kind of story about it, or just ignore it. How then will humanity as a whole enter this new dimension of being a race that is emotionally healthy, open, and in touch with its emotions? How much can the plasma technology help us overcome this deficiency? Is it a matter of just elevating the general M field strength of our STM? Or do we have to go through a process of maturing ourselves? Or is it a little of both? Maybe Mr. Keshe will surprise us with a technology especially for our condition that we never could have imagined existed. Let's see how it unfolds.

He mentioned many times today about becoming the lowest field and humble like the Creator and that the law of the U is the stronger plasma always gives to the weaker to make it equal with itself, or what he calls, bringing balance. Some years ago I tested this and found it to be true. I was in a situation where another organization took over the place

I was staying, and there was a person on the Board who was part of the decision making process of whether or not I could remain living there. I knew that person did not like me at all and his habit was to get rid of people and I was well aware of what was taking place 'behind closed doors.' I made myself lower than him and spoke to his Soul. I said, 'I know you have the power to ask me to leave, and that for whatever reason you don't like me I don't question that, but I am no threat to you and will do nothing against you. I would greatly appreciate if you would allow me to stay and continue my work.' Normally, what we call being lower is to suddenly change our feeling to one of being afraid of losing, and then begging the other person not to hurt us. That is not a true humility, because it's generated from a crisis and when the crisis is over the old feelings come back. In a way, it is based on the physical D where the stronger takes control over the weaker and the decisions will be made according to who has the greater strength in the physical interactions. Working with the Plasma is something different and it's a little difficult to explain. First of all there is no fear, and there is no degrading of ones status as a Soul. You are not 'selling your Soul' like you do when you beg, because in that situation your physical mind really does believe the other person has power over you. This is the way we have setup our world. However, when you work with the Soul the other person only has apparent power over you due to the physical circumstances. In the dimension of the Soul you recognize those circumstances, but you don't lose your status as an equal Soul. The internal feelings are pure, innocent, and sincere, and are not from a calculating mind making itself lower to get its way. When you experience it, then you will understand the difference. I have to say, that night I did feel something like a sharp pain, or knife in the heart from that person, but to my surprise I was allowed to stay. This whole experience occurred at the level of the Soul and no words were ever spoken about it. And from this experience I understood that indeed the strongest gives to the weakest, it has to, because that is the law of Creation. And that we should never judge a situation based only on the outer circumstances, and learn to work at the level of the Energy. And when there is a need we seem to be able to naturally generate the emotion needed.

Humbleness can also be described in a scientific way as the H plasma. The lowest accumulation of plasma elements is H and everything is made in the plasma D from adding more hydrogen's to it, and then it manifests P. It's the lowest essence of Creation and is connected to Cosmic Rays as was discussed in the past. The essence of Creation comes out of the Creator, so are they really two separate things? The lowest point of the Creator would be the Fundamental Plasma or H and it never holds onto anything, and it never stops giving. This was the meaning of the Mother with 4 hungry children and only 4 eggs. By her giving, or her unconditional love she gave everything to her children and had nothing left for herself. Then out of the love for the Mother the children gave half of their egg back to her and she ended up with 2 eggs. This is a teaching parable and not a lesson in Accounting. It's for us to ponder and feel what our life is about. Do we think, 'oh, now I have 2 eggs more, what should I do with them? Or now I have become unexpectedly rich, I will put the 2 eggs in the bank.' If we are honest with ourselves, then these are the kind of thoughts in our programming. The way I understand the Creator being able to constantly give is that He feels He is self-contained within Himself, and doesn't have to fight with the environment for survival the way we do, or the way we think we do.

The other part is that for life to take place there has to be a circulation of the energy or everything will remain still, like the Void. If all the energy is contained within Me, then I have to give to receive so that it flows. This is the Yin and Yang, or the M and G. The only way to find out is to do it. We have to jump out of our conditioning and trust that the Knowledge of Creation is correct, and then see what happens. It's a personal journey and if we wait for life to force it on us, like with a terminal disease or something, then it can become very traumatic. But it doesn't have to be that way. The physical mind and the Ego do not believe it, and if we try to live this way they will attack us heavily. This is where knowledge, faith, courage, devotion to the Truth, and connection to our Soul are needed. It's a personal decision, but once we experience it, then we'll understand what it means when Mr. Keshe constantly reminds us that the power is within us.

A good example of today's teaching is Rick. He is one of the original Knowledge Seekers and many of the people who joined KF in its early years with him have disappeared, but not Rick. Regardless of what is happening in the physical dimension his Soul has one pointed devotion to Mr. Keshe, the KF, and the Teachings. He is always showing up and always giving and he creates an inspiration for all of us to do the same. It seems that as he gives more, we give more, and the flow increases and the knowledge spreads. He feeds what he receives back into the Teachings. Whereas some of the other KS took the knowledge and then tried to make it their own and profit from it. We see clearly what happened to them, they went nowhere. The gift Rick is giving to humanity is so huge on the Energy level, and in the future when the technology finally takes root in the normal society we'll look back in awe at how much love a Soul is capable of giving. It's wonderful that Mr. Keshe gave the 6th seat of the donated flight to Rick, as he never asked for it himself.

The question about if inter-atomic fusion happens to us when we die was very difficult to decipher. The following is what I understood from it. First of all, inter-atomic fusion just means regular fusion and is a process where two or more atomic nuclei combine to form one or more different atomic nuclei. In this process huge amounts of energy is released. They say this is what powers the sun and other stars. There is a lot to discuss but we'll just narrow it down. Why is this the same as when we die? Because our STM is a plasma just like the Sun, and at death we have accumulated fields through our interactions during life. Those include how we lived our life in terms whether we were a giver, which ended up adding to our fields, or if we were only a taker then fields were taken from us. If we corrected our behavior and became a giver, then we probably added a lot of energy to our nucleus. Mr. Keshe included in this accumulation of Energy how our Soul was positioned in relation to the planets environment, whether we moved up or down, right or left. Maybe this is similar to how the angle of the planet increases the number of field interactions that led to higher life forms on Earth. And because humans can move around in all directions, we can accumulate more fields. At the end of life we have accumulated a certain amount of fields that determines our next position in the U. But he never explained how our STM fuses with other plasmas. Instead he said, in all of these field interactions we are always connected to the Soul of the Creator (STC) and that He will dictate the position of our Soul. It's not clear what he means. Is this just a general

positioning, and then the fine tuning of how we will manifest depends on the TPP? Many times he said that the local fields will always have an influence of how we will manifest ourselves.

Then he talked about how two plasmas that are slightly different from each other in G and M field strengths, but connected, interact with each other to balance their fields. The stronger will give to the weaker and the final result is a fusion of the two plasmas. And this is how plasmatic nuclear fusion takes place in the U, and not by smashing two nucleuses together. The release of energy occurs when the two plasmas that are of slightly different field strength, interact to balance each other. Is this what the scientists measure with their instruments and call, 'nuclear energy'? If it is, then it is much easier to understand through plasma than matter state.

Understanding about salts is very important in Plasma T and today he expounded more about it. The salts are a combination of a metal and non-metal and they make a connection between the two and also allow for transferring of energy from one to the other. For instance, Na is a metal and Cl is a non-metal and NaCl or table salt, which is essential for life of the body. We think of metal as the hard stuff like iron, but in this case it also means the material and physical part of the body. And the non-metal part includes the biological part. The Ca, Na, and Potassium (K) all have a special energy ratio so that one can imitate the other. This is why we need salt in our stomach for the conversion and connection of the energies. It's my understanding that for example, when we eat vegetables the salt converts them to energy or Gans's and at the same time they allow those Gans's to connect to the Ca which is a metal in the bone. This is why our flesh, which are Gans's can stick to bones. It doesn't just stick, if you have seen meat on a bone it is fused into the bone and you have to cut it off. (But if you cook the meat enough then it falls off. So does cooking change the MG field strength? It seems like the meat and the bone are acting like solid magnets). This occurs because of the MG field vacuum in the body. I think vacuum in this case refers to a single M field strength and not a vacated chamber as we normally use the word.

Because the scientists don't understand about Plasma Science they only regard the stomach as acidic. But the acid part of the stomach is only for breaking down of the food so it can be converted into a Gans. Then I think he means the stomach becomes alkaline and the salts are used to transfer the energy of the Gans's into the body through the Lymph. It's the same way the saltwater in our Gans Boxes change the Nano materials into a Gans, it transfers it into an energy. On this same topic we should add about the salt content in the Middle Layer of the skin, it's what transfers energy between the inside and outside of the body. It let's in things we need and releases what we don't need to the environment. If we cannot let things out then they will accumulate in that layer and can become diseases like cancer.

When the scientists observed things they couldn't understand they started making up all these different names. In a way, their fantasies have now become a reality for people and they don't want to consider other possibilities. For example, neutrinos are what we call, passive M fields traveling across the U and when they interact they become active and

can become like a Black Hole. A star and a Black Hole are basically the same thing, only in the matter state a star can be seen because it is primarily M fields radiating out. Whereas, a Black Hole appears black because it is primarily G fields pulling everything in. But from an Energy point of view they are basically the same thing. Then they came up with Up and Down Quarks for subatomic particles. So the Sun would be like an Up Quark and the Earth would be a Down Quark. When we understand the totality of the knowledge we won't have these problems.

The latest KF plasma system is tilted to imitate the Earth. But just because it is titled doesn't mean you can connect to it. It takes a lot of knowledge about the composition of the central fields of the Earth and the Inertia of the materials. They have created a Soul of the system that is based on the structure of life on this planet. It's extremely advanced, and they can control all angles of it. Hopefully, it will be operational in a couple of weeks. On 2 panels of it they have created a full flight system and there are no dynamic rotating systems inside it. It's built the way the U was created. Dynamic rotation is created through the interaction of the internal fields together with the environment. It's an evolution in the world of science and technology that will change a lot of things. There are a lot more things in this workshop we were not able to get to. Please spend as much time as you can studying this KSW.

Thanks for listening.

Quick Index

(We've been going on for years and it's getting more interesting how little we know about what we should have known from the beginning (of our life) about the workings of the Universe (U), skies, and systems we see in Space. In one way or another we should have connected ourselves to this structure through the emotion of the Man, rather than physicality (P) of the Man. (Many times over the past decades I have wondered how to explain to the Man the next stage in his process of maturing to the work of the U. (Everything is ?? contained in the understanding of Yin and Yang), which means what we have in this dimension (D) of P is a part of the scale of the total Magnetic (M) field of the U, and the Cosmic Rays (CR). The Yin and Yang have a parallel on the Energy side, but we chose the physical side. (What would have happened if our ancestors would have (chose to) understood the Energy side of (life)? Then we wouldn't need systems of

advanced technology (T), or any of it. But Mankind chose the hard way of being physical).

(The physical way is not just that we have managed to make telephones, airplanes, or discovered fire. The physical way is that we have to move ourselves from point A to point B. We have to think and create the emotion of getting up and moving for a purpose. We don't just get up and go somewhere, (?? we have to create an emotion for it and think about physically moving the legs, arms, and body, and we have to coordinate everything to stand up and walk from A to B. We have a reason for doing things. For example, we walk to the table and pick up a glass of water to satisfy the emotion of thirst. Again the Man is only physical and he has chosen the D of physicality. What would have happened if our ancestors could have created the emotion of needing water because the P is thirsty? Then we would be able to create the D of the field strength of water in our emotion. Then we wouldn't need to physically move the body. Instead, we would receive the energy through our emotions. In this process we would have understood our own power and we would have become a 'Man of the U.' The Introduction video presented a good example of this)).

(We said many times about the Knowledge Seeker (KS) in Barletta, Italy who tried to move the cup by forcing the P, where we think the stronger gets his way. It's the opposite in the D of Energy, where the lower and more humble we are, the more we receive. We don't say to the water, give me your energy. We have to be humbler and lower than the water so that we'll receive from it. In this stage Man always confused between the D of physicality and the Science of Creation where we use the Plasma and the CR Technology. In P we build the biggest tractors, planes, and everything has to be bigger and better. But in the D of Energy we should be are lower and have the weakest fields. This we can learn from the Creator, because He is always the lowest and is a giver. He gives in the D of expansion, but then He receives more than what He gives in the D of receiving the love, care, and everything else with it. He is not stupid. He has made humbleness and being lower as the structure of Creation. Those who understand this will become receivers).

(?? The biggest difficulty for us to travel in Space will be to create ?? spaceship of emotion, ?? because while we are in the D of Energy we'll be the lowest. But then when we want to enjoy seeing the beauty of Creation in the matter state ?? we'll have to convert to P. ?? At that point we'll receive to enjoy the beauty. ?? However, when we are giving we'll be too busy giving that we won't see what we are giving. (I think he means when we want to enjoy Creation we'll have to receive the fields to convert to P and enjoy matter state). He is teaching us the science behind the structure of how we'll travel in Space. Where won't need a spacecraft, instead we'll create the emotion to travel. (We have to become perfect so that our emotion is pure, and we do this by following the example of the Creator in humbleness). We don't give with the thought of what we'll receive, instead we have to learn to give unconditionally (and that will open us to receive)).

(If we understand the strength of our emotion (and can use it), then we won't need to take another step on the physical life and (the U will be our playground. We'll be able to travel

anywhere in the whole U because we are already connected to everything through the M field strength of the Soul of the Man (STM). Then do we need rocket propulsion, or even UFOs? Once we learn how to create and use the fields of our emotions we'll laugh at people in UFOs as being backwards. Because those in UFOs are still entangled in the D of P. (Unfortunately, our scientists spent too much time in physicality studying how to kill each other, instead of actually progressing in the true Science and hopefully that will change soon)).

(The West and the Americans don't understand why China is winning in every D of science and T. It's because the Americans and Europeans are spending their money on developing weapons to become more powerful killers, while China doesn't go out to start wars, instead they use their assets to develop their nation. (And because we don't want to face the truth, the Media complains that the Chinese are this and that). This is wrong. We should admit that we have become too physical and want to possess more of the Earth's land and be more powerful, and that we have created criminals like the world leaders in the West to carry this out. (The West spends its time and energy creating weapons to be more powerful and (control more) land, so they can dictate who's going to be the leader of what (country)). The Chinese don't have this problem, because they're investing in their own people and building infrastructure and T for the nation to become wealthier, and not waste the money on killing and wars. How many wars is China involved in today? Compare that to America and Western Europe. We spend money on killing, and they spend the money on developing the culture and T of the nation).

(America is in debts by 30 odd trillion dollars (mostly for war). Whereas Chinese have a lot of finances because (decades ago they invested in their nation) and now is paying back. They didn't "colonize" others in one shape or form, instead they invested through peace. Now Man has to learn to do the same way. (?? And Man can learn to use the technological knowledge of his emotion to make (things) move. (You travel much faster through the emotions then with a donkey from A to B)).

(?? When we understand the process of Creation we'll be able to transmute where we wish. We'll do it through the D of humbleness and giving unconditionally. When we give then our cup becomes empty and then we have room to receive more. When we understand this we'll be able to transmute with a wish. If we are thirsty and want a glass of water we'll receive it through our desire and not getting up and going to the kitchen to get it. We'll feel the purity of the water through our emotion. And then we can dictate the next step. This is not a theory. Many of you experienced this when you came to the Flight Systems in Linz and others over the Headphones through the telephone lines. We recorded this and many of you were receiving so much water in your mouth that you couldn't swallow. (You were creating it through the emotion of humbleness and having a need, then the body receives)).

(This is what we are teaching you and why we have brought the Twinity systems in. They are part of the process for you to learn what your shortcomings are, and how to become humble to receive. (In the Twinity systems when you reach the point of balance, then you'll realize that you are even lower than the system you are working with, and that's

why you are receiving). Then (try to understand which emotion is creating the condition of receiving. It is humbleness? This is why everything (is created from the base of) Hydrogen (H). It's the lowest essence of Creation, and the line of plasmatic Cosmic Rays). The Creator is the lowest level, or what we call, the Fundamental Plasma. He does not hold on (to anything). And He never stops giving. The more He gives, the more energy (He receives). (?? Collectively all the energies that come together (?? from the environment) are what creates the environment of the Cosmos and U. The Creator is very clever (?? in that the Creation uses its own energy to create itself)).

(It's like the story of the mother who had 4 hungry children and only ?? 4 eggs, and at the end of it she received two. She said to her children I only have 4 eggs and she gave them to her 4 children, but had nothing to eat herself. Each of the children feeling love for their mother said, Mom you can have half of my egg. So the mother ended up with 2 eggs. In the World of Creation and in the knowledge of the emotion, the mother "played the card" of emotion. But deep inside she never thought that if she gives all the eggs to her children she will get more back. She gave out of unconditional love. She said to herself, let them eat, and I can survive until the next time we have food).

(The hidden message in this story is that the mother is the Creator. (Remember that only 20% of the energy comes from the material world, and the 80% comes from the environment. The same game is played in the Universal condition. (?? In the U we have the Souls, stars, and whatever, and they create a condition of feeding, and as they give they can take more from the center (of the U). ?? The Universal Community of the Unicos allows more (energy) to be absorbed by the Man). There is a purpose in every aspect of the ?? emotion and dimension. (Collectively our Central Energy, or Soul becomes a Black Hole, its gravitational (G) field forces ?? are used to attract (energy) from the Unicos. (This is why we are ?? in a galaxy of universes (called the Unicos)). It's the same process that goes on in our body. We give and take, change and allow. (A good example of this is the cow. We feed it grass and it gives us milk, which he converted through the energy of his system. Then he supplies manure, which we put back on the ground and it grows better grass and feeds back more). (I think he means that the Unicos feeds us energy, but we give energy back to the Unicos in one way or another. It's a recycling process that expands)).

(?? To learn how to move with our emotions we'll have to go through the steps and setup the T and machinery to continuously add on each step as we progress to know our potential of giving. As we learn the process of Creation then we'll understand how to transmute and transport from A to B in the D of the fields, and CR. (It will be extremely difficult to learn to lower our field strength enough that we can receive Cosmic Rays)).

(The Special Flight Session for 5 people we talked about last week and now somebody donated one position for a 6th person. Once everybody receives the materials we will send out to them, then we'll put them through the system. (?? We'll give them the strongest fields, and take the weakest from them. Then they will understand the emotion of belonging to the Totality, and not just being individuals). They will feel and link up to the D of the field strength of the Creation, and not (just the fields of the U)).

(The emotions are the key to transportation and motion of the Man. In the physical life we walk somewhere through D of emotion and energy. We connect it to the lowest level that it becomes the receiver without actually (having to move physically to the time, place, and position (TPP)). The Creator doesn't (physically) travel the span of the U to see what's going on everywhere. He has become so humble, and is at the lowest level, where He receives (all the information and (is connected to everything). (He is like the Mother of the 4 children and ?? we are like the children, we want to give love to the mother and be connected)).

(The new Twinity systems are opening a door into new dimensions and new ways of thinking, especially the ones where the KS had the Cosmic materials added to them. We see it in the reports and hear it in the background from the people who were in the session. And some are still carrying on with it. It seems we have opened that door. The next step for Mankind is to learn how to transmute through his own strength, and not through the systems we are developing. These are just the first 'driving tests' to feel how it is and to learn how to 'drive,' and handle traveling in Space, and which way not to go. (In the process of using your emotions to transmute, ?? if you create an emotional motion of receiving, then you lock yourself into that ?? point. (?? You don't want to go back to the emotion of the Man to own it. Otherwise, you'll have to start again. But when it happens don't worry, you're not the only one). Even the Creator had to learn the hard way by making mistakes, and then (?? starting over). One of His mistake was creating Man, because he never calculated (that he would start killing)).

(When you understand the knowledge of emotion, then you don't need motion. You don't need to physically move. (?? When you reach the point of being able to receive everything, then you become knowledgeable of all, because you're connected to everything). (He goes on to tell a story of his friend who was the Minister of Petroleum. Everybody always brought to him their problems, but also their knowledge, understanding, and the latest T. Therefore all the knowledge flowed into his position. He just had to sit there and absorb it. Sometimes the knowledge he gained in one day, he could have never learned in a thousand years in the Universities. In Man's world the knowledge flows into the highest position, but in the D of the Creation everything flows into the lowest position. (Everything feeds into the lowest, like the mother with the 4 hungry children, because she already gave everything she had away)).

(The purpose of the Twinity system is for you to test yourself. There is no one on the other side to react and say thank you. It's for you to know and connect to yourself. You don't need a system, instead you'll learn it through the D of your emotion, and don't call it a dream. The worst word the Man ever created was the word, 'dream,' (and through it he denies himself his own power). It's not a dream, you are transporting yourself through your emotion. If you miss your mother, you can connect to her through your Soul and enjoy her presence. (When you don't understand it then you say, you were dreaming about your mother, because you have never accepted that it's within your power to use your energy levels to be there). Now you don't need to wait that one day you might dream about your mother. You can see her through the strength of the fields of her Soul and the

emotion of existence. (?? You communicate with her through the energy pack wherever she ?? went at the time when she left her physical body, or if she is still alive, ?? then you use the fields of the emotion)).

(We have found every excuse and word possible to deny our own power and knowledge, because this way we can still be attached to the D of P and need to walk to get a glass of water. (?? Instead we can explain it through the D of emotion as needing water for the survival of the Central Energy, or STM. And that the glass of water will please us. ?? We won't need to drink it, we can just absorb it. It's the same with the rest of the energy for feeding, then we don't need to kill another animal or plant to survive. Then we can stop destroying the planet. With this knowledge we can become a traveler of the U. Mr. Musk wants to go to colonize Mars, but he would take the habit of killing with him to Mars, and then to the next planet. It would take him 7 months to get there, but with the emotion only 7 milliseconds, because we will link to the emotion of the central energy of that TPP. This is not in the D of P)).

(If you want to meet a friend coming from another city, but you don't want to go to that city, instead you decide to meet at a café in the middle between the cities by a tree or something. We have a lot of these kind of 'cafes' in the U between galaxies. We will learn how to find these cafes through the D of emotion, as there is no GPS in the U). (?? For example, to go from London to Washington the GPS uses two coordinates. But in the U that won't help you. Instead, we'll use the ?? M and G fields of the destination, plus the emotion of the STM, plus the coordinates of the ?? motion, and the M field strength of (destination) planet in that TPP. (?? This is how you will change your P to fit the culture at the destination. It's how you become Chinese when you transmute to China. Our inner emotion interacts with M fields of (that) environment, and that emotion dictates (what we will manifest as)).

(The Inertia of the emotion of the land (dictates what kind of culture it will develop, and the features of the body in the D of P). This is why we cannot always be in a spacesuit when we move to the Moon. (?? We'll manifest ourselves according to the field strength of the emotion at the TPP on the Moon, and the field strength of our desire will determine how we'll appear there. Will we need arms and legs, or lungs in that place when we can move with the D of the fields? These are not theories anymore, because we have built systems for it, and many of you have already traveled in Space so you know)).

(In the next few weeks 6 of you will go for another trip, which will be very nice. You'll be what we call, Satellite Souls to support (others) to learn the first steps of transmutation. Make sure you follow the instructions when you receive the materials we'll send you so you are ready for starting the Emotion of Transmutation. Be ready to taste the emotion of motion, and not the motion of emotion. (If you chose the second one then you'll be lost)).

(?? Practice by sitting on the sofa and trying to drink a glass of water. But don't say, I want that glass of water to come to me from there. Instead, try to feel how the water tastes and try to receive the energy of the water by giving the water what it needs. You

have to tune yourself into what it needs. ?? Then when it gets full of the fields of that emotion they will overflow and expand to you and fill you up. The GM fields of the same strength are totally different in operation. One twists in, and another twists out. Which end of the twist do you want to be? The strongest always gives to (the weakest to) bring balance. This is the principle of Creation. When the balance comes (to you), you cannot keep much, because you already have given out to create that balance)).

(Try to understand your emotions so you can move yourself. There are many emotions that we don't know anything about, but they are within us. (The Man has hidden these emotions from himself). They are part of the emotions of the U. There is the emotion of (the desire of wanting to be with the Creator. With this emotion you give (everything out and become very humble, then you can connect to His M field. ?? When His fields are returning to Him, if you become G to them they will pull you into Him)). It's a total recycling process. Man recycles his P, but he hasn't learned how to recycle his emotions).

(We are not religious, nor are we preachers. We are purely scientific and we have made systems to show it, and hundreds of you have already tested them. Some of you come to the Monthly Flight sessions and have expanded to learn more. (In this T to learn more you have to share the knowledge or teach others. But teaching doesn't mean the same as a teacher on Earth). You can give knowledge through the emotion of the Universal Language and Knowledge. Man has not understood yet about what the Emotion of Universal Knowledge is. But an example of it is what Nikola Tesla and other scientists received from the dimension of Creation).

(To understand this knowledge humanity has to understand its strengths and at the same time its weaknesses. A Man who knows his own weaknesses, is a strong Man. I always taught my children, that when you are arrogant and think you are strong, this is exactly the time when you are the weakest. When you are humble enough to know your own weaknesses, then you are strong enough to do something about them. It's the same for the emotions of transmutation. When you know the reason you cannot achieve, then you can create the emotion for that weakness (to be satisfied and then you'll become a Passenger of the U. You don't need wormholes, Black Holes, or even transmutation systems. It's always been within us, but we call it a dream. That dream is the reality which we are denying to ourselves)).

(Unfortunately, I live in the world of men and I have worked with some of the most richest men in the world. I knew one man who had the most beautiful wife and children you could ever imagine. They were in love not just physically, but also emotionally. And this man despite having the most beautiful things in his hands was constantly looking for another woman. One day I said to him, aren't you ashamed of yourself? You have a gorgeous wife and 4 beautiful sons and still (you go looking around). Don't you know the pain you are causing your wife? Because you never feel satisfied and are always hungry for something which is not yours. This is the habit of the Man, to kill another, to get what he has. Less than a year later the wife turned up with breast cancer on the right side. I told him, (?? you receive, but you also have to give). Later, he said he spent hundreds of thousands on chemotherapy and it worked. I said, (you) stupid and foolish man, the

chemotherapy is your eyes looking outside and your behavior. Your wife is not blind. It's you who blinds yourself to the D of emotion you are creating inside that woman).

(When Man realizes the power of emotion in the D of transmutation he will conquer the U. But not with rockets, UFOs, and the rest. Whenever you see a T which is physical, understand that these people have not yet reached the maturity of understanding what you as Humans have reached. (That is when humans understand the power of emotion). (UFO T is still on the low level of P. Humans are being gifted the understanding of the process of Creation and how Creation was created and works)).

(When we eat an apple it's not because we get 10 calories from it, but because it creates a M field that the rest of the body needs to absorb from the U. We get the other 80% from what we can't eat. If we had to get 100% of the energy we need from the planet, through animals and plants, then there would be nothing left on this planet. (Unfortunately, humans still think they get everything from what they physically eat)).

(We have to learn the power of emotion. This is the only way Man will create motion in the U. Otherwise, we'll be stuck with Mr. Musk and his rockets. When you experience the Soul try not to call it a dream. It's the reality of the power within you. Then you will have unlocked the key for transmutation, transportation, and everything else. (Then you will receive the glass of water without having to move from your chair. The energy will be transferred to you through emotion. I made Man in the image of Myself. (God doesn't run around the U checking on what everybody is doing). He connects to the line of the emotion of the fields. If He has that power, so does the Man, through the strength of the STM)).

(The clergy and religious people created the Soul to be somewhere (outside of us, and then they milked the Man (of his) emotion (to control him and fill their own pockets. It's for Man to understand that the center of control of his fields and energy are within himself, the way our brain and heart are inside our physicality)). The heart of our energy sits within our Soul. Then we'll discover we are the creator and controller of our emotion. (We can also understand the emotion of others .. ??)).

(Understanding Cosmic Rays in the D of Creation is the key for Man succeeding in conquering the U. It won't be done by machines, nor Ayatollahs, the Koran, Bible, or the rest of the things written according to what Man could understand, and could use to rob the others through what we call religion. There are no churches, mosques, Ayatollahs, or Popes in the U. Nor are there other religions that you can attach yourself to, (to believe in something outside yourself). When Man believes in the power within himself, then he can choose when to manifest in physicality. He can choose when to take the walk of the motion through his emotion. These are not theories, we have delivered systems that you can test).

(It's for you to know your strengths and to test your weaknesses. The strength comes when you can give, and not when you receive. When you start receiving you're in a big trouble, (because you are still a human). Achieving is different than receiving. (I am not

sure what he is trying to say. Maybe that we have the tendency to understand other peoples emotion and not our own. ?? If God can understand His own emotion so can we, because we are made in His image. ?? You are the Yang, and He is the Yin. He has access to all the fields of Creation, because He created it. When you reach to this level of knowledge you (will humble yourself in front of your Creator, because you'll understand His work, His simplicity, and His love for Creation. You don't need religions or Ayatollahs and Popes, or anything else. We have to understand this otherwise when we meet those in the UFO's and they tell us something we don't understand, then we don't want to become their disciples and make them into Prophets. Because then we set ourselves up to be robbed on the emotional side of our creation).

(Whenever you see people of the Space in UFOs or in other forms of physicality, it means they are still at the level of P. ?? Understand that your emotion is higher than theirs and it's your responsibility to teach them to see their Creator. It's not for you to rob them because you know more. If you do that then you will be just like the thieving Prophets that have robbed Mankind).

(We are now distributing a large number of Twinity systems to KS and a few of them carry Cosmic Ray materials (CRm) in them. The CRm within the structure of the Twinity system is a knowledge and power that no one can match and they connect you directly to ?? the Cosmos. There is no technology in the U that can match the CRm. It has everything to bring Man to the Knowledge of Creation. But first of all, Man has to know himself, ?? the Knowledge is a Twin of you. (You were looking for your ?? Soul-mate or Twin partner, ?? and now you have asked for something that connects you to the D of your emotion, and not to your physicality. (?? It does not create something in the physical D to fulfill your desires, instead it feeds you with the D of emotion in every dimension of the essence of Creation)).

(Try to understand how powerful your emotion is. In the very beginning when we started teaching you we told you this, especially in the early Health Teachings. We said that every organ in our body has an ?? emotion and is connected to emotion. Now 12 years later we have given you systems that show you this).

(?? The emotions are like (the middle layer of) the skin of the Man. The skin has 3 layers. There is an outer layer that interacts with the outside, and a middle layer that has to handle the transfer of energy between the inside and outside. And there is an inner layer that handles the energy inside the body. It's like a balloon that holds everything inside. The emotion is the middle layer and it has to be in communication with the Creator and the created, with the giver and (that what is taken care of). ?? It controls how much you take from and give back to the environment unconditionally. Because if there isn't a control, then the life won't be sustained. You would get all the diseases like psoriasis and everything else, and even cancer).

(I said this once to a doctor that this is where the cancers start. And he replied, oh no, all cancers start this or that way, (according to what he was taught. I told him, that he didn't understand it. Even the skin of (each organ has a middle layer)). And the structure of a

cell has a middle layer. (?? Cancers develop when the middle layer cannot transfer energy from inside to the outside). (A malignant lump inside an organ means the middle layer cannot transfer energy to the outside and the tissue gets stuck inside and creates the lump. (It's the same with psoriasis where you see these lumps with dry bits in them and rashes on the skin). It's because the middle layer cannot sort out the salt content, and what to hold and what to get rid of, and it starts to pile up ?? inside the entity. Remember that the skin is connected to the brain, which is the center of the emotions. (?? So the material could not get put on the "highways" of the body)).

(If the World of Science understands all the aspects of technology that have been taught, then humans will never kill, or drive a car, because it's easier for you to transfer your P than to drive through a storm to get there. Then there will be no opportunity for an accident or whatever. You transfer yourself to where you are needed, where you can give through the emotion of giving, not with the greed of taking. Greed is the sign of physicality. And generosity is the sign of being linked to the World of Creation, ?? and its true essence. (It's not about giving away your possessions to somebody, (?? rather you can fulfill (their) emotions, and they (will be able to) achieve anything. They don't need your things).

(Rick shows the 5th Video and the 5 Video series of the original Fireplace discussions and teachings of 2008 of Mr. Keshe. This one is called, "Keshe 5: Flight and Creation of Light." It's 9 minutes. Please study).

End of Quick Index Part 1 - 586 KSW

(Mr. Keshe said they were having a big dilemma deciding who the 6th person should be for the donated Flight session. Then he became emotional when he talked about Rick's dedication to the work of the KF. He said, I think no one is more eligible for this than Rick Crammond. As you all know he never asks for anything and didn't ask to be part of this. It will be a gift from all of us for all the years of his self-less service to the Foundation. We hope that this new Flight trial will open a new dimension in the D of emotion of the Soul and solve the problem many of us are having with our emotions and to be able to believe in ourselves).

(In the May (Flight) session we'll introduce a new technology that will allow us not only to create the D of emotion of transmutation, but also feed us with the strength of the fields of the time and place of the emotion of the place of arrival. This means that we have developed a very advanced technology that is extremely beyond the present knowledge. We can create physical motion, and all the materials needed for the Soul energy to receive what it needs to transmute and convert at the TPP of arrival. Feeding energy through the D of the plasma of the U is extremely complicated, while at the same time amazingly simple, but it needs full understanding. Today we have built the system for it. For example, when you put this T on your table it will feed all your physical needs (in the house) in the D of energy so you won't need to kill for it. At the same time it feeds your energy D of emotion, or the STM. It works by creating a Black Hole and absorbs and radiates what is needed by the outside (in the D of physicality of the Soul)).

(This new technology is undergoing trials. The importance of the transmutation is not only to physically transmute you somewhere, but to create a condition to transmute the energy itself. We tested this last week and it's amazing how it works. We need to create a correct motion, that creates the right current in the direction of the emotion and the motion together. This means we have to create the conditions for a turbulence. In electronics, or electrical current, they call it the potential difference. It's the potential difference between the receiving and giving, and both have a common denominator, ?? which is the need that comes through the D of emotion).

(The emotion of hunger triggers the need to everyday kill a sheep, chicken, or take an apple. (We are studying how the emotion triggers and creates the emotion of motion. It's an extension to what we saw in Linz, and other places. Join us in the May session and be ready for big surprises. And don't say you just imagined something. Understand that you actually did that thing, it wasn't imagination. It's for you to confirm the part of your existence that you denied. It's like a child that you have been carrying, but you always denied its existence. As they say, 'the chickens have come home to roost.' It's time for you to deal with it. And once you do, you'll get access to a lot of energies, emotions, emotional energies, and information of the U. A new D of knowledge will open up to you, and then it's your responsibility to open it up to the rest of humanity, and those you meet in the U. There are no patents in the U. Patents only belong to those who believe in the D of physicality and use them to control others to confirm their own existence. If patents existed in the U can you imagine what patents God would have written up to now? You would have not been created because nobody paid for your patent rights. That's exactly what KF did with their patents, we only made the application, but never enforced for our own gain in the physical D).

(Rick was thanking Mr. Keshe for his comments. He said he was humbled. And Mr. Keshe said, he has been with us for a long time and it was time for him to taste how it feels to fly. Rick said, he has been waiting a long time for a flight system. Mr. Keshe said, no, you are the system and you have to fly (your self, that's a big difference).

Q: You explained in your third book that Black Holes are produced by passive magnetic fields. Could you please explain more about what passive magnetic fields are?

K- (The present World of Science calls them neutrinos. You are passive until you interact and become active. Because Man doesn't understand then he has made up many names for things Up Quarks, Down Quarks and everything else. As I said, Up Quarks is the Sun, and Down Quarks is the Earth. The other names can be other stars, planets and their moons, and the rest of it. The Man has created a lot of fantasies. When we understand, then we don't need to fantasize, we can handle the reality in the D of physicality because now we can produce these materials).

(We have produced in total around 75 Cosmic Ray Balls or materials. We made certifications and have photographed every single CR Ball that way nobody can duplicate them. And there are hidden characters inside each Ball. You can use them for creating the

conditions of transmutation. Around 25 people had the CRm built into their Twinity systems. The technology and knowledge of the U is already in your hands. Those with the CRm built in will connect in a different way, it will be in the Universal D. Today your understanding, feelings, and emotions are totally different than those who first came to Linz years ago. (From the comments of KS who have tested them it gives you amazing understanding and brings you one step nearer to understanding transmutation through emotion and through CR). On the Internet they say Mr. Keshe is doing 'pseudo-science,' that's because they don't understand the science, so it's pseudo to them. But it's not pseudo to those who actually use it. We have the same problem with KS who attend the Monthly Flight sessions, they speak about their experiences as if they are a dream or a fantasy. Hellooo, it's not a fancy, it's part of where you live and you can control it and make it part of your life that you have denied. This is the important part to understand).

(Since we have advanced so much we don't need to build UFOs, that would be a waste of time. Why should we go back to riding a donkey from A to B, when you can ride on Mr. Musk's rockets? We have more or less abandoned the development of the flight system since we started introducing transmutation and energy transfer. If you remember in Linz we had all those units hanging around. And we lost nearly 300,000 Euros on making those huge UBESUS units that were egg shaped. The T has jumped so much that we left those behind. We have been doing transmutation flight tests for some years now. Now if we set our systems right we can separate your Souls into groups. We can see that for example, this is the Soul of Rick, and this is another Soul. We learned this through our tests with the 'Beautiful People' (Schizophrenic). We can see the existence of multiple Souls. This is how advanced the T has become. We can even see if even your emotion is positive, or if you're in depression, and tell whether the depression comes through your P or your Soul. Your Soul would sit on the positive, but the P would be below. We have brought in massive changes).

(This is why we abandoned the UFO, or flight system project. We put a lot of effort into it during our time in Italy in Barletta, in Desenzano, and then further tests in Sanya in the South China Sea. Now we don't use dynamic systems since we learned how to create dynamic motion with the energy fields. We can create dynamic motion of fields without using rotating balls. That's become obsolete).

(When we showed the production of amino acid (AA) for the first time in public to the Chief Academician of the China Gas Corporation, upon seeing the CO₂ and AA he literally had to go and change his pants. But then denial (became his best strategy, otherwise, his position as advisor to the government would have been worth nothing). Because now we can produce protein (from the air, and we can even put emotion into it and create life with emotion). Now we have the T to do it, it's not a dream. It has cost us a huge amount of time and money to create these systems. We can even dictate what emotion (it will have. The next step is to create Microchips that have emotion. It's like the brain of the Man. We produced the brain back around 2017 in Desenzano, Italy, in the environment of an open box). (The next step is to make computers that have no wire connections and only use M fields. This is the way the brain works and now we have the T. The way they produce pure Silicon Microchips in Silicon Valley, we now have the

knowledge to produce pure AA without any contamination and with energy fields that can carry emotions for certain jobs. In the future we'll be able to build robots that are only kind and happy. It's not far away. We have the T. I can show you pictures of it, but we don't want it to be public (just yet)).

(A part for the T was made in China. The Chinese people were so kind that they connected everything for us without being told. We can choose the emotion and material, which that protein carries with it, when it's created. This will uproot the essence of killing in the Man by introducing a D of energy within the protein or AA of the Man himself. This is not a theory. I can show you the picture of the system, but Man is not ready for this knowledge. (We keep going ahead to make Man ready one day)).

(There is another way to understand the Twinity system. We can now create the emotion of the child while it's in the womb of the mother. You call it, 'virgin birth.' First we create a perfect Soul and then transfer it to the womb of the mother with the emotion of the mother. Then the child (will be) conceived. The energy of the field dictates the creation of the P. This is what it means, I made Man in the image of Myself. (?? The Creator in the D of nature, is related to the creation of Man in the womb of the Earth). We understand this knowledge).

(With this understanding do you still want to have a UFO? We don't have the time to spend on it. In the past 6 months or so, we haven't used a single dynamic rotating system for your transmutations. Rotation is the attribute of physicality. (Whereas the field strength, balance, or difference is the essence of the motion in emotion. This is why we have two emotions opposite to each other like good and bad for example. Because each one has a different strength and D, and the two (together) bring a balance and perfection. There's a lot of knowledge to share, but Man is not ready for it. They call it 'pseudo-science,' but soon they'll commit suicide because they never understood the reality of the Science of Creation. As I have always said, if I show you the beauty of this technology you all will commit suicide to be there, because physicality is not worth it).

(A KS received one of the first CR Twinity systems. His system is very special and is connected to Cosmic Rays and creates a D of reality. You say it's a dream, but it changes the emotion, ?? or the perception of emotion. When you read the following testimonial you will understand what change has come to Mankind. He is one of the first people to have a Twinity system equipped with Cosmic Ray materials).

(The Testimonial is the following. It's an adventure between the Soul, body and Cosmic cleansing. On Friday April 4th, Our Twinity with Cosmic Ray material finally arrived. After one week it feels like the right time to write his first report. In the 584th KSW a special pre-transmutation training was announced, but he didn't feel ready to join. In the following workshop his feeling changed and he decided to join. It was the arrival of the Twinity system ?? the week before that made him feel ready. He started analyze his inner states and he found the classic veils that separate us from closeness to the Creator. He wanted to know how many months of training the Twinity system gave him in just one week. After analyzing himself he came up with the following results. (I think the number

of months refers to how much time he saved by using the Twinity). Ego - 3.5 months; Greed - 0 months; Anger - 1 month; Envy - 6 months; Lust - 3.5 years; Pride - 2 weeks; Hypocrisy - 3 months; Deception - 1 month; Laziness - 4.5 months; Fear - 6 months; Doubt - 0 days; Attachment - 2.5 months; Jealousy - 0 weeks; Avarice - 1.5 months; Self-Pity - 8 months. The Twinity has interacted with his Soul, Soul of Physicality (STP), and the body itself, clearing and transforming on deep levels. He feels the change as a steady, clear flow of energy, like a gentle inner current. Within a few days the Twinity system has become the true companion for his life).

K- (As you just read, the Twinity system interacted with and is connected to all the different emotions. (People around you can also feel and see the change in you. We see this in our lab and how the people change, who are continuously in touch with these materials. (?? It's done without putting conditions on it). (But we need to choose the path. We accepted the Soul part of our life that we denied, and then we have to handle and understand it the right way). This is the most difficult part. When the Man learns to handle his emotion, then he can handle a lot of things. (?? But once you lose control over your emotions then it can bring you down, (as has been done with the Man)).

(?? When you do self-analysis then all the figures in his testimonial will change to zero. That means we achieve balance (within us and come closer and closer to (Existence)). Fortunately, we have introduced this new T for the 6 people who will go through it. (?? There will be some people in the system whom we know their different characteristics and arrangements). We try never to give you preconceived ideas because we don't want to influence the results. We let people understand how things are set by themselves. (It's interesting to see different emotions in that testimony).

Q: We find in the Bible alone 13 distinct and central names for God, each revealing a different aspect of his nature and relationship to Creation. If our purpose as human beings is to draw closer to the Creator, and if this Universe was indeed brought into existence by a Divine source, then a profound question arises. In light of the many names attributed to God, across different religions and traditions, which name should we choose, in order to sincerely think of Him, and truly connect with Him? How can we address the Creator, in a way that aligns with Truth and genuine devotion?

K- (Address the Creator with all your love. To create, you have to put all the energy into it, and be detached from (what you create), because to create is to give to someone else. (?? It's best not to put a name on God. (The religions have used the names of their own culture like God, Ahura Mazda, Allah, Jehovah, etc). A simple word for the One who led to the Creation out of His generosity, out of His fields. That's the only word you can choose for Him. Even the emotions are created by interaction with His fields. They cannot (be separated from it)).

(Mr. Keshe warns KS again of the damage done by toothpaste, especially to women. They are looking for research papers about this. A few years ago one of the toothpaste companies put a (zinc) additive in their toothpaste that led to the death of over 10,000

people around the world within six months. I cannot mention the name of the company or the products. It was done by adding Zinc, or chemicals with a combination of Zinc in it).

(In the past we taught you the principle knowledge of how the body works. When you put something in your mouth the body (senses those chemicals and gets rid of its surplus of the same material from the cells, because new materials are coming in, and it converts it to something else. Then you spit it out, but the body has already released these materials into the intestines to be eliminated. Therefore, you create shortages of the chemicals in the toothpaste and this creates deficiencies in the body. (?? Zinc in different forms is being added and some are now being hidden inside the toothpaste. It is causing depression, massive amounts of hair loss in women, and tiredness. It's because Zinc connects to the neural system and emotion and it affects women much more than men. It also connects to the strength of your nails)).

(We are advising KS to check the content of your toothpaste. You put it into your mouth, and then spit it out, so the body doesn't receive those materials. Toothpaste is the worst thing man ever created to make himself sick. Because every time you spit it out, you are draining your body of those materials and creating deficiencies. Our ancestors used to use the ashes from the fires they burned all the time. The ashes still clean the teeth and take the smell or whatever from your mouth. The toothpaste changes the balance of the minerals in the body. (When you look at the contents it may say only 0.01 of something, but that little 0.01 is doing the damage. If there are metals in the toothpaste those will get depleted in your body)).

(You have to watch the toothpaste that contains sugar and salt and what they do with it. The ones that have sugar are the ones you have to watch. (The salt ones are worst because they change the balance into acidity and become the cause of cancer. In a way, it's one of the reasons we see so much cancer in Western society. You have to understand the process. The tongue tells the body how much material is on the way to the stomach so it gets rid of excess in the cells. The worst thing is what they call, "Two minutes of brushing is the best." You are fooling the body into dumping everything in your intestines to get rid of, and then there's nothing coming in to replace it. Then the glands try to replicate what's gone missing and you create deficiencies in the body).

(?? It's one thing to have fluoride in the water and quite another in the toothpaste. (Not sure what he means ??). Try to be a little more aware of what the society is doing and see what the toothpaste has done to your children and how their behavior changes. (?? When you deplete their bodies of needed chemicals and minerals it's like sending them to school hungry). Then what happens to their calmness, emotions, and the rest of it? Do they become dyslexic, or have emotional problems in school, and the rest of it. Look at the toothpaste. The toothpaste should carry no materials in it which will deplete the body when it is spit out).

Q: Is Bicarbonate of Soda (NaHCO_3) or baking soda okay for toothpaste?

K- (They say you can kill virtually every animal on this planet and especially the small ones with sugar, flour and Bicarbonate Soda. The ants, reptiles, and rats come and eat it because of the sugar and flour, and then the Bicarbonate mixes with the water in the stomach, expands, and takes their life. It depends how you use this material. The chemical structure is very much like drugs and has a connection between the all 3 elements of the U and Earth. H connects to the essence of the Origin, C to the information carrier, and O is the M field of the gases of the planet. There are big interactions and then it links up with the AA or protein in the flour and other things. You call flour a starch, but in the seed of the wheat, and whatever, there's a huge amount of protein. This is why we get energy from eating these things with this connection. That's why we add yeast into a structure. The Na connects to become a salt in the energy aspects. The Chlorine (Cl) ?? combines with a HCO_3 , ?? NaCl , and becomes a salt, which will (give it a biological ?? connection)).

R: They show a formula where the Sodium Bicarbonate plus the stomach acid yields salt, NaCl , plus water and CO_2 .

K- That's in the stomach. (Then we understand why our scientists have been wrong with what they say about the stomach being acidic. Actually, the stomach is totally alkaline from (the point of view of) energy absorption. (The acidic side is only to break up the food in the matter state. Then the alkaline, or salt side, transfers the energy of what is broken (down) to the organs. What they say about the stomach walls and the intestines absorbing energy, and does this and that, is a lot of hot air. It's because they never understood the process of energy transfer. They always look at the matter-State only). This is what we do when we produce Gans's isn't it? We put our plates in the salt content and it changes into Gans's, or energy).

(Rick mentions that during the Manhattan Project in the early 1940s, they used to wash the Uranium Oxides from their clothes with a 2% solution of Sodium Bicarbonate solution).

(Mr. Keshe went on to talk about the days when he used to touch and taste Uranium as a nuclear material. The purified levels gives one a funny feeling. I always consider it as invincible, because they wouldn't allow you to touch it. He dared himself to touch it, and he did, and it gave him the feeling of being 'as powerful as it is.' The world is not afraid of nuclear technology, rather it's afraid of what nuclear did in Hiroshima. They exploded it and now everyone is afraid it can happen to them).

(When he touched enriched Uranium, he found it has a salty, sweet and sour taste. He couldn't understand why some of the nuclear material tasted different, because he used to handle them. When he touched one of the nuclear plates at Queen Mary College he felt the same energy fields and it confirmed to him that a lot of the lead absorption parts on the X-Ray machines were actually converting the lead into the radioactive Plutonium-Uranium level energy. It has a certain taste. Maybe this is why it can be washed with baking soda. The nuclear material ?? because it's (also) a salt, when it matches with the salt (in the baking soda allows it to be washed). Because salts are the connection between

the materials. They connect a metal to a non-metal. Sodium (Na) is a metal, Chlorine (Cl) as a non-metal, together they call it salt. The salt connects the two together. This is the same in the middle layer of the skin. It has a salt content and it transfers energy between the inside and outside of the skin. The salts allow both sides to be connected. Once we understand what the application of this means, then this will open a different D in the world of transmutation of energy and how we can travel between the spaces of the Universe, where we will use the energy of the components, and not the components (themselves). This is the cornerstone of Cosmic T and KF work).

(Today people have the tendency of saying, "this or that frequency does this or that." When we want to transmute between galaxies (?? we can use these "middle layers" that connect the two galaxies together and ?? by finding a balance we can pass between the two. (Does he mean we use something like a "salt" content?) Normal table salt, or NaCl is a connection between the metal and non-metal parts of our body. It allows the physical, metal, or material part, and the non-metal part, which is a biological part, to connect to each other. The material metal part is the Calcium (Ca) and due to the GM (field) vacuum of the body behaves that way. The non-metal part are all the fruits, vegetables, everything else we eat, ?? and then it is converts and attaches the Ca to the structure of the body).

(The Ca, Na, and Potassium (K) all have a special energy ratio that mimics the other. Then you'll understand why we need salt, or have salt in our stomach. (?? The vegetables (need it) for conversion of the energy. Secondly, it's a connection of the energy. One material does two jobs at the same time in the body. ?? The word 'salt' from a chemical point of view means it is a connection between the metal and non-metal, or the connection between life. When you get it the right way, it is what connects you. Why do we have salt and Magnesium? What does it connect in the body, and what ?? is its field strength? In homeopathy they say there are twelve salts (in the body), and the others are not known, because it's created by the interaction of the salts themselves).

It's amazing how much information one carries.

Q: When we undergo transmutation is it sufficient to turn to the creator of this U, or must we reach out to the Creator of the Unicos, assuming the two are not the same?

K- (First let's learn to crawl before we jump. But it doesn't mean that we cannot jump without crawling. It all depends. You have to understand the process of Creation on the M field side, (?? and not just the physical knowledge of creation of matter). The knowledge is very deep. What I call the Hydrogen (H) of this U, is itself connected to the H, or Fundamental Plasma of the Unicos, because it is created out of it. It's a different field ?? and its fields are much lower than the H of the Unicos. Once you achieve this you get access to the Totality of the knowledge, and Creation. As Universal teachers we have this access. (?? That's why we teach unconditionally. Man should understand this, otherwise it'll be called, 'pseudo-science.' In a way, Man has committed suicide of his Soul, of his knowledge of energy, and chose to go for the D of physicality instead)).

(I've explained this in the world of understanding. The difference between the physical D and the Soul is the emotion of satisfaction, and what we (are able to do). Do we fall in love with the P of a man or a woman? Or do we fall in love with their emotion and inner beauty? A Man who chooses the physical part, is always the loser. Because age will take that beauty away. However, with the emotion, in essence, it never changes inside. If you end up with a nasty woman, she'll be nasty from the day you meet her, to the day she dies. This is (how the energy works, because physical beauty fades with age. This is the same process Man has chosen, when he chose the P with time it gets destroyed and changes. (?? The essence of the emotion remains true)).

(The same question was asked this week about how to create the scent of forest mushrooms. KS should know by now how to make a crystal structure. By touching the Gans some can smell what it is).

Q: When two interacting fields interact with the environmental fields, they can manifest themselves. Is the shape of the matter dictated by the sound? Does sound give a geometry to this manifested matter?

K- (Partially, yes. They make their own sound. You cannot create it most of the time. The sound, or frequency is a catalyst for producing more of ?? the Gans. Sound behaves like the Inertia. The Inertia of sound is a core part of the T of Creation. The Space in different parts of the U sound different. The whole U doesn't always sound the same. We know this from years of our research. You get a different noise when you face South, then when you turn it 180 degrees to the North, even though it's the same space).

(One creates a condition for creation of a lot of gases. Cosmic Rays are part of the creation of matter state. ?? Partially the cells in the body are created by a combination of (sounds) within the structure of the layers of the body. This is why we hear the heartbeat. They say, the heart beats up and down. The frequency of the (sound) in the body is created by the plasma itself, and leads to creation of what the body can absorb, and how the body behaves. If you change the frequency of the heart in somebody who is in a critical condition, then the ?? condition will change. I've tested this and it's correct. You don't need to do anything like put them on a defibrillator or a pacemaker. Just change the frequency of the heartbeat and transmission to the rest of the body. If you can match it in the plasmatic condition with the Soul, then you'll never die. It's like the Fountain of Youth. The Man has a long way to go to understand this).

(The Mass is created by the interaction of gravity and the M fields, and it never changes. Because ?? any differences always creates the ?? same outcome. (?? The Mass is like a plasma). (When the Mass interacts with the GM field of the Earth it creates the matter state of it. (?? Each position on the Earth has a slightly different field strength. Therefore, the same Mass will manifest differently in the matter state because it has a different field strength. So the same mixture, same sound, same combination, will create different things in different locations). This is a cornerstone (understanding) of transmutation. ?? Frequency is the same. (The interaction of the Mass with the GM fields of the Earth

creates the Weight, (which is matter state). Things weigh different in different places on the Earth because of its interaction with the fields of the environment)).

((Didn't understand the first part ...) Mass can exist without matter, but Weight cannot and ?? it is dependent on its position, dimension, and reaction. (This is why when we see H on such and such a planet, and if we were to bring it to Earth it may not exist here as H, it might be something else, because the field strength will be different). (He does some calculations. Things manifest according the field interactions of the TPP)).

(This is why we have different races of the Man in different parts of the planet, but the Soul is more or less the same. There is a spectrum of different field strengths. The G field of the Earth creates different fields from the top layers of the Himalayas to the bottom of the valleys in Africa and it leads to creation of different colors, different mentalities, approaches to food, and the rest. When an African gets on a plane in Ghana and lands in China he is still an African. But, if he transmutes through emotion, then when he arrives in China he can decide if he wants to manifest as Chinese to satisfy his wish).

(He talks about understanding the process of the energy fields of DNA and through it you can understand a lot of other things. And then about something with the British Royal family and how a DNA test created mayhem).

KF Brazil makes an announcement about a conference they will have on April 21st.

K- (We should be going to Brazil for another conference. We haven't been there since 2019. At that time the country was split and the ones who were real and with the T stayed and the others who were fake and using the name and technology left).

(There is a lot is happening in the background in Iran that is not in the News. We prefer not to talk about it at the moment, because it's not to the liking of the people in the present regime, military, and Sepah. There is a clash of Ayatollahs with the "radicals" ?? about the splitting of Iran, and the rest of it. There is a hidden part we don't see in public with these negotiations. The new Iranian government is giving all the Iranian mineral resources, rare Earth materials, Uranium, and more as a peace offering to the Trump team. (They were told if they do this, then there will be no more talk about Iran's nuclear weapons. It's actually a business transaction, and Israel has no say in it. But Israel is pushing for bombing, because (Netanyahu) gets paid a commission by how many weapons are sold by the Americans to do these things).

(The Vatican is behind this mineral deal, that's why this Saturday meeting was moved to Rome. The Vatican has a big say in the structure of the war. They want Iran to concede the power of Islamic Republic to the Vatican. It's the same way they brought the Church of England under their control, and the rest of it. They weren't able to do this in the Ukrainian war, and they are trying it with Iran. (In effect, Iran will become the Islamic Catholic Church)).

(The Ayatollah Khamenei openly threatened me personally, and the KF and said that we cannot negotiate with the Americans in the position we had. But now he is openly allowing the other Iranians to negotiate. It looks like we will have a new political structure in Iran. Because the ones who are for prosperity in a different way, have chosen to go the way that brings industry and technology, and opening of the borders. But the Sepah, and the ones who are in power are going to lose everything. They said, they're not prepared to relinquish anything. We have recorded all of our communications with them and how they stopped KF to complete our negotiations with the Trump Administration. And days later we see them allowing others to negotiate. Because now the minerals and things will bring a lot of money for the ones involved. But we were just dealing with science and T and it wasn't enough money for them).

Q: If you order the Twinity MaGrav system and the Cosmic Ray materials separately, will they work similarly to those where it is combined together?

K- (No, it's different in construction and different process. The KS who gave the testimonials had them combined together and that's why we see such powerful results. It's not just that, it's because the field interactions are on all levels of emotion. It's not just one or two. (?? We can add even more dimensions. It will bring you to a balance. We have a number of people who opted for adding their Cosmic Ray materials (CRm) into their (Twinity MaGrav systems))).

Q: Is there any chance that CRm touches the user from the time the material is created, without physically touching?

K- (It's a field balanced energy, so it touches you with the fields, yes).

(Mr. Keshe shows how the CRm come with a certificate that states the weight of the material is 1 gram at the time of production. Each Ball is numbered and photographed. It's a living, active, and interactive system. And each Ball has a number. He has the first one, number 1 it was given as a gift. The Cosmic Rays will change your whole living environment. CRm can be added to the Resin products like the Coasters and are in the Soap Holders. When you wash your hands with the Soaps through the fat of the soap the energy is absorbed directly into the body and stays with you. The Cosmic Rays materials will change the banking system and unify everything to a single currency worldwide. It's all planned we just have to implement it step by step. Now we back the governments with gold, in the future we'll back a Universal Currency with (these) Universal materials and they will become the cornerstone ?? for the U. These cannot be copied because we know the materials, configuration, and if it was done by us or not. It's more expensive than a kilo of gold).

Q; (Does) the inter atomic fusion happen when we die?

K- (In a plasmatic way, yes. It has a reason. It goes according to our Soul's position by what we have done in our lives and what fields we have collected, and corrected in our lifetime. These are connected to the central M field of the U, which is the Creator. (?? It

goes by the initial position of our Soul and how we reacted to (all the little things, the details in our) life on Earth). (?? Maybe there are field interactions with all our movements inside the Earth's M fields such as moving to the right, left, up, and down and in the different dimensions of the environment). (?? Does he mean the Creator is connected to all the fields we have gathered, and what we fed our body that became part of the energy of the STM? The whole decides the fractions. And that comes out of the infusion of the fields of different strengths)).

(But to understand this we have to understand the bigger picture of the plasmatic field (strengths). ?? We don't have this in matter state, the nearest we have to it are the isotopes. (In plasma we have the different Cosmic Ray levels). (The following is very difficult to understand). What I understood is that if one entity has a G field strength of 0.4 and its M is 0.1, and another entity has its G at 0.4 and its M at 20, they cannot connect to together but have to first battle it out with each other to find a balance. I think this means the stronger will give to the weaker until they come to a balance. Then they can fuse together. It's not like in matter state where you try to force them together. In another example, if one entity is 4.9999 Tesla, and the other is 4.9995, they don't match. But in this case the difference of 0.0004 is the field strength that will dictate their new position in the U. (It's not clear. Maybe they get attracted to that position by the difference of the field strength. ??).

(The field strength of the Soul of the Creator dictates the position of the Soul. The rest (depends on the) time, place and position (TPP). This is how we are all connected to the Creator. Nobody can escape this one. (They have to force the religious concepts on you and get you to believe them, so that they can abuse you. They can only abuse you when you don't understand the reality of already being connected to the Creator and Creation and that you don't need them as intermediaries)).

(Somebody made the calculations and found out that for every Ukrainian who died in the war, the world leaders and those who led the war on all sides have made something like a 30,000 dollar commission. It's a rough estimate. (Now you understand where the Soul's of these people involved in creating this condition will end up. They have to balance the fields for the suffering caused to every child, wife, and family member who was killed and is not there to provide for them and love them. The suffering will go on for years to come. The leaders may have gained financially in their physical life, but they definitely will lose in the D of the Soul in the World of Creation. There is no doubt about it. Man has to decide which one is better to enjoy for some minutes here on Earth, or suffer for a long time out there (in Space). As the joke says, when you die you have two choices, you can go to heaven or hell. If you go to heaven, it's just heaven. But if you go to hell, then you have another two choices, you can be roasted or toasted)).

Q: Is charcoal the same as the ash used for dental care? (No they are not the same).

K- (Ash is a natural material leftover from burning something, usually wood. It's part of the structure of the life and has an invisible AA connection (?? to us). Soap is made from ash and (animal) fat. Water added to ash makes caustic. (It can have a mixture of

different materials in it. Ash from burning different plants have different contents. Burning cauliflower will give you different materials than a rose, even though they are Nano sized. You have to pay attention to what minerals are in the ash you use. There are other factors like how much you burn it will effect how pure it is and its Nano state. (?? There is something like an active line of connection to its plasma state. The minute you put the ash in your mouth, it's not ash anymore, it's part of the plasma energy of the body. (You have to see what effects it has and the messages it gives. For example, brushing with the ash of a fruit will have a totally different outcome than a plant. We see this in the production of sugar. (When they add bone structure into it, it turns white. That's because of its energy state and not matter state. When it comes into the liquid of the material, it changes the energy balance. The energy balance creates a different color when it interacts with the environment).

(He talks more about the situation in Iran and how people are corrupted by the money, but how much can they take with them when they die? (I think he is referring to back in the time of the Virus when they were trying to get the government to give the okay for using the plasma T in Iran. ?? The person interrupted a Cabinet meeting and spent 2 and half hours criticizing KF and Mr. Keshe and prevented the T from coming out that would have saved many lives in Iran and elsewhere. The man wanted to be the next president of Iran. He did everything against Mr. Keshe, and now they found out about it and he had to flee the country within the past 7 days. Most likely he went to America and they are planning to install him as the next president of Iran when they start bombing campaign against Iran. This example shows how close KF is to the political situation in Iran. The KF team worked so hard to save Iran. At that time they didn't know that man was working for the other side)).

(Mr. Keshe gave a very big secret away in his X post today. It's addressed to Musk directly about the flight system. I gave a very clear indication, and they got the message immediately. It reads, "Some of Musk's close scientific advisors, who are Iranian scientists in Tesla and Space X, are already aware of this new breakthrough technology. But Musk has spent too much finances on these ancient solid fuel technologies that he cannot afford to move to the new flight system.")

(This is why Trump through Musk, is negotiating so closely with Iranians. Now you know where he is coming from. Because we've been in it, we know who they are. The politics of science is played behind the curtains, it is not any different than the rest. As we are connected to either side, we can put it in the open. But if you can read (between) the lines, it's there. (The Iranians and Chinese are trying to develop the plasma technology of KF, but they are calling it Quantum, and other things. We have a lot of connections directly into Vatican and we know why they're both meeting in Rome. It's the bosses who decide, and the rest have to follow the orders. It's a handover of Iran and the Islamic religion, or whatever you call it, to be under the control of Vatican. The next one to bring down are the Saudi's and then Russia, and they will control everything).

(Instead of losing the nation through bombing, they are going to give the religion away, so the nation can have peace. This is the plan of the new President, and the others have no

say in it. Unless they start a war internally with Sepah, and the others. They are not going to give (away) the technology, but they'll give their mineral resources, and the rest. Netanyahu doesn't have much to say, unless they play the cards differently. They can withdraw everything).

(You have to understand that no F-35 given to any nation can fly and bomb unless prior authorization is given by the United States. They control the plane's electronic systems. Pentagon pre-maps what can be bombed and then it is released. Every single bomb given to Israel is pre-mapped and controlled by the American Administration. They cannot drop bombs without their consent. The few bombs which did get dropped did not explode, and they found their way to other nations and have already being copied. Even the F-35 has been copied by those who sold it. So, it's a process of who gets what).

(They didn't want this information to be known, so now you might see M. T. Keshe soon deleted from X).

Q: A KS says she has her dog's ashes and asks what to do with them.

K- (Keep them and respect and love them, because those ashes carry a lot of memories and emotions).

Q: I know, but what can I do to make the most of it?

K- That's all you can do. (His soul has a connection with you).

Q: Should I bury them in the garden, or should I make soap from them?

K- (It depends how close you want him to be to your skin. You shared food and love with him. I know everything about your dog, (and the emotions you have been through with him in the past few years. It all depends how close you want him with you. You can put them in your pillowcase and sleep with it every day)).

Q: The Earth is tilted, and this has led to humans developing emotions that are not present on other planets, for example. Can building reactors with tilted elements do the same?

K- (It depends if your composition is the same. Or it could be that you create worse emotions. You have to understand that tilting interacts with the composition of the central fields, and with the Inertia materials. Just because you tilt it, does not mean that's what you can connect to. Our latest system is tilted. We have developed a T to replicate the structure of life on this planet. We have literally created a Soul of the system that is based on the structure of life on this planet. It's extremely advanced, and we can control all angles of it. Hopefully by next week it will be operational. On 2 panels of it we have created a full flight system and there are no dynamic rotating systems inside. It's the way the U was created. The dynamic rotation is created through the interaction of the internal

fields with the environment. It's an evolution in the world of science and T. We'll change a lot of things and it's the next step in science).

The Universal Council wish for today is, we the Universal Council give freely from our Soul, to connect to leaders, to all nations, and to work as one Soul, in one direction with Keshe Foundation to achieve peace, in exchange for plasma Technology, TIEP. As One Nation, One Planet, One Race.

(For those of you who believe in the path of Christ, tomorrow is Friday the 18th and Christians celebrate Christ's crucifixion. I hope Man gets more educated to understand the truth about this symbolism, and what it truly means. Hopefully, we'll see a new D in the evolution of the science with the next Flight test).

End of Quick Index - 586 KSW – April 17, 2025

KEY-PHRASES:

SUMMARY:

ENGLISH TRANSCRIPTION

(:15)

K- Thank you very much. Good morning, good day to you as usual wherever and whenever you listen to this series of Knowledge Seekers from Keshe Foundation Spaceship Institute. As we've been going on for years, it's getting more interesting how much we little know about what we should have known from the beginning. (:16) About the working of the Universe (U), about the working of the skies, the working of the systems which we see in Space. And one way or another we should have connected ourselves to this structure through what we call, the emotion of the Man, rather than physicality of the Man.

Many times, many times over the past years and decades, it has come to me to, how to explain Man next stage of development. Man's next stage of what we call maturity to the working of the Universe. We have everything in Yin and Yang, which means what we have in the dimension of physicality (P) this dimension (D) of physicality is a part of, scale of, the total Magnetic field of the Universe, the Cosmic Rays. So, it's yin and yang, it has a parallel in the energy side. We chose the physical side. And what happened if our ancestors or even ourselves, somewhere down the line, would have taken the step to understand the Energy side of it. Doesn't need systems, doesn't need advanced technology (T), doesn't need none of it. But, Man chose the hard way, going the physical way.

And, in a way, a physical way is not just we managed to make a telephone, we made airplane, we discovered a fire. (:18) The physical way is, I get up to go from A to B. I have to think, I have to create the emotion of, I'm getting up for a purpose. I don't get up

and just go somewhere. And then, make that move physically to move the leg, to move the arm, to move the head, coordinate everything that I can stand up from A, walk across to B, and then what am I going to do at that B? I don't do things, Man doesn't do things for nothing and just going there. I go to the table to pick up a glass of water to satisfy the emotion of thirst. Again, Man is physical. Man has chosen our dimension of physicality. What (would have) happened, if you could, or our ancestors could, create the emotion of, "I need the water, because I'm thirsty, my physicality needs." To get the dimension of the field strength of the water, in the emotion of dimension of the Man. I don't need to make the physical move. I made the move of receiving energy through emotion. And, in that process I get to understand my own power. And this brings Man to the point of becoming Man of Universe. In the Intro it's a good example of what it was just explained.

As I said many times, when we had the Knowledge Seekers (KS) in Barletta, the couple, the Italian couple sitting in the front, the guy was pushing and pushing to move (the cup), where, in the dimension of physicality the bigger physical power we have, the more we do. In the dimension of energy, the lower we are, the more we receive. Humbleness. (:20) So, if I want that water, I can't say, "Give me your energy." I have to be humbler that I'm lower than you, that I receive from you. This is the stage where Man always confused between the Plasma Technology, Cosmic Rays Technology and Science of Creation, and the dimension of physicality. We build the biggest tractors, we build the biggest planes, we build the biggest of everything, we are the bigger than the blah, blah, blah. Where, in the dimension of energy, we are lower, we are the weakest. Because we learn it from the Creator, we learn Him to be the giver, the lower, that He can give in the dimension of expansion, but He receives more than what He puts out in the dimension of receiving the love, the care, and everything else with it. He is not stupid. He has made the structure of the Creation, is humbleness, to be lower. And some people have understood this, and if you can do that you receive.

And this is the biggest dilemma for Man. When you become Man of Space, when you take into the, what we call, the Spaceships of the emotion, how do we handle when we become physical, when we manifest ourselves in dimension of physicality, where we are aware, we are here to see the beauty of Creation in dimension of matter. But in dimension of energy, in dimension of the fields of the Universe, we stay lowest that we can be given to, to understand the beauty of the Creation. When you receive you appreciate. When you receive, you enjoy the beauty. (:22) Because, when you give you are too busy giving, you don't see what you're giving. And this is the technology, this is the science, behind the structure of the Man to travel in Space. You don't need a aircraft, you have to create the emotion. And the emotion has to be so pure, you have to become so perfect, that with it, you learn the position of the Creator, humbleness. Not for me to give, what is there for me to receive, that I give you so much unconditionally.

If Man understand the strength of the emotion, Man will not walk a single step on the physical life. Because, the Universe is the "oyster" of the Man. Anywhere in the Universe, through dimension of the strength of the field of the Central and structure of the body of the Man, we call it the Soul of the Man (STM), he's already connected to every corner of this Universe. Why do you need to make jet propulsion, why do you need

to make rockets, and why do you need to make UFOs, and the rest of it? If you understand this knowledge, if you become aware of the knowledge of the field of the emotion, we, once we understand, once we experience this, we laugh at people with UFOs, "Oh, they're so backwards." Because, even those in UFOs are entangled in dimension of physicality. But because we are a bit too busy, we forgot, we spent too much time in physicality and killing each other, than actually developing the progress of it.

I was giving this example to one of Knowledge Seekers in past few hours. I said, this is what the Americans don't realize, this is what the West doesn't understand, where China is winning in every dimension of science and technology. (:24) In every aspects of life, the amount of money Americans and Europeans are spending on weapons, killing to become more powerful, China is not fighting, using that asset to develop the nation. And we say, "The Chinese are this and that." No, because we become too physical to possess more of the Earth, more of the land, to be more powerful, and we create criminals like the world leaders in the West. So, the time and the energy spent by the West to create weapons to be more powerful, to own this land, to that, to dictate who's going to be their leader of what, Chinese don't have that problem, they've invested into their structure, infrastructure, technology, and the nation becomes richer through not spending money on wars. How many wars is China involved in today? And how many wars the Western Europe and Americas are involved with it? They spend the money on killing, they spend the money on developing the culture of the nation and technology of the nation.

And we say, "You know Chinese, they did..." Yes, because they don't have no wars. Americas in debts by 30 odd trillions, Chinese have so much, because what they invested, now is paying back. They didn't need to colonize, they invested in, through peace. Now Man has to learn the same way, using technological knowledge of the emotion to make the move. As I've always said, "You want a donkey, get on the donkey." It still goes from A to B, it takes you as long as you might see better scenery, you might hear some voices of the birds on the way, but it takes time. Man wants to go faster, Man wants to be from, to the B as fast as possible from A. So he created, he developed the rockets and everything else, and cars and every other fancy things we call it. (:26)

But a Man of Creation, a Man who understand the process of Creation, he wishes, creates the dimension of humbleness, in giving unconditionally. When you give, the cup is empty, so when you become, you have a space to receive. And then, you can transmute with a wish. What is the use of getting government. I wish to have a cup of water, I get up, I have to make all the energy, so I spend so much calorie to get there to get the water, or I spend no calorie, I actually receive much better emotion, I feel the purity of the water through the emotion. And then I can dictate the next step. This is not a theory. How many of you, which went to the systems in Austria in 2023, whatever, how many of them went through the transmutation systems with the remote telephones have informed us that you receive so much water in your mouth you could not swallow. Because, I don't need to give you a cup of water, by creating the emotion of humbleness, emotion of the need, the body receives. How many of you reported that you couldn't even swallow the amount of water you were creating in your mouth? Did you drink a glass of water?

Now, this is and becomes part of this structure. This is what we are teaching, this is why we have brought this condition of the Twinity systems. The Twinity system is part of that process, for one to know one's shortcoming, for one to know how becomes humble to receive. Once you receive the point of balance, using Twinity systems, then you realize, "I'm even lower than the system I sit with." (:28) So, you receive. Then, see what emotion creates the condition of receiving. Humbleness. This is why everything starts with Hydrogen. The lowest, the essence of Creation, the line of plasmatic Cosmic Ray (CR), at the lowest level of the, what you call, Fundamental Energy, plasma, is the Creator. He does not hold on, He does not freeze on, He doesn't stop giving. The more He gives, the more energy is given, collectively comes together that creates the energy from the environment of Cosmos to the Universe. He's a very clever man, the Creator.

It's the story of the mother with four children and two eggs, which she received at the end. She boiled the four eggs, gave it to the children, and she said, "I had four eggs and I gave it to four children, I have nothing to eat." What did the children do? Each one said, "Mom, you can have half of mine." The mother ended up with two eggs. In the World of Creation, in the cycle of the knowledge of the emotion, the mother "played the card" of emotion. But, in reality, deep inside, she never thought, "If I give to them, they'll give me more." Out of the love, as a mother, she gave unconditionally. "Let them have food to eat, I can survive till next time."

There is a hidden message in the story, that mother is the Creator. And us, the way we speak about Man, takes 20% of the energy from the material world, (:30) 80% comes from the environment. The same game is played in Universal condition. As the Souls, as the stars, as whatever, in this Universe, by creating that condition of feeding, taking more from the center, we allow more to be absorbed for Man in dimension of Universal Community of the Unicos. There is a purpose in every aspect of the ?? emotion and dimension. In a way, us, our energy, central energy, collectively, becomes the Black Hole, the Gravitational (G) field forces, which is needed to attract from the Unicos. We are not a Universe in a, what we call, galaxy of Universes, for nothing. It's the same process as is in our body. We give, we take. We change and we allow. What do we do? We give grass to the cow, he gives us milk, he converts it through energy of his system. He gives us whatever, milk and a bit of something at the end (manure), and we put it back on the ground and we grow better to feed back more.

So, when you look, when you understand, Man needs to go through these steps which you set up, the system, the machinery, the technology which we continuously add, step by step, step by step, for one to know his potential of giving, for one to know the process of the Creation. One to understand the transformation, the transportation, the transmutation, (:32) any name you want to put on it, to move from A to B needs to be in the dimension of fields, Cosmic Rays, we call it, to be lower in the strength of taking. It's very hard. It is extremely hard.

In the next session, which is the five people, now is six, will come to understand, once they receive the materials given to them, once you receive it, and all six announced they

received it, we put it (you) through the system, we give to you the strongest, we take from you the weakest, and then you understand the emotion of belonging to the Totality, not the Individuality. And then you feel, you link up to the dimension of the field strength of the Creation, not the dimension of the connection of the fields of the Universe.

The emotion is the key to the transportation. The emotion is the key for Man's motion. In the physical life, we walk it, in the dimension of emotion, energy, we connect it to the lowest level that becomes the receiver without actually making the move to be in the position, the time and place. The Creator doesn't travel the span of the Universe to see what's going on everywhere. He has come so humble, at the lowest level, that He receives and condition and is connected to, is those children mother have, we want to have the connection, we want to give the love. (:34)

The new Twinity systems, especially those who have addition to them, the Cosmic materials, opens that door, new dimension, new thinking. We see it in the reports, what we hear is going on, people in the background, the people who joined the session, people who are still carrying on with, it seems that we have opened that door. And then the next step for Mankind is to learn to transmute, through his own strength, not by systems which we develop. These are just the first driving tests. How does it feel? Learning how to drive, which way to go, which way not to go. Even in the process of your emotional transmutation, the emotional motion of receiving, if you make that ?? create point, you're locked. If you go back to the emotion of the Man to own, to be, you're lost. Then you have to start again. And when it happens, don't worry, you're not the only one, and you're not the first one. Even the Creator had to learn the hardest way, making mistakes and then stopping. His mistake was creation of Man, because he never calculated with all the giving, why do you need to killing.

So, when you see the understanding, the knowledge of emotion, then you don't need no motion. You don't need to physically move. And then that point, as you receive, you become knowledgeable of all, because you're connected to it. (:36) I used to have a very good friend, he's passed away. He was a Minister of Petroleum, Oil Industry, one of the biggest reserves of oil in the world. And we used to meet a lot. I think I've spoken about him before. And we were sitting once about 3, 4 o'clock in the morning. That's the only time we had time, we could sit and discuss things, which we were involved with at that time. He said to me, "Do you know Mehran?" I said, "What?" He said, "Sitting in this chair as a Minister, I don't need to do anything." They walk in with all the problems, with all the knowledge, what is the latest technology and everything, and I just sit here and absorb. And he says, "The knowledge I gained sometimes in one day, I could have never learned a thousand years in the Universities." Because, he is the guy on the top, it comes to him. Without want or not, because this is the position of the Man to report to the highest. In the dimension of Creation you become the lowest. Then, everything comes to feed you, you're that mother, because you have already seeded out by giving.

This is the purpose of the, what we call, Twinity system. You test yourself, there is nobody else, there is not a child to say how it reacts, there is no woman, the wife, the husband, or whatever, would they appreciate it, would they say, "Thanks to me." No, it's

me to know myself, I connect to myself. And, you don't need a system. (:38) If you learn it, through the dimension of your emotion, and don't call it a dream. The biggest mistake Man ever made, was creating that word, 'dream.' It's not a dream, it's the transportation through emotion. I miss my mother, so I connect through the Soul, I enjoy her presence, and then, because I cannot find anything else about it, I said, "I was dreaming about my mom." Because, I have never accepted that it's within my power to use the energy levels to be there. This is, when you understand this, you don't need to wait that one day you might dream of the mother, you see the mother through the strength of the field of her Soul, the emotion of existence, as you need that, present communication through the energy pack, wherever she left to be, at the time when the physical body left, or is still alive, in the dimension of fields of the ?? emotion.

We have found every excuse, we have found every word possible to deny the power which is ours, the knowledge which is ours, and we deny it to ourselves, because this way, we can still attach to dimension of physicality, walk to get the cup. Not to explain through dimension of emotion, "I need that water for my energy system, for the survival of the central energy of me, I call the STM." Then, that cup pleases you. Then you don't need to drink it, you don't need to kill another animal to survive, you don't need to destroy another plant, and you don't need to destroy the planet, and then, once the Man start, which has started, does not finish. (:40) Become a traveler of the Universe. Mr. Musk wants to go to the Mars, and colonize Mars, we take the habit of the Man and the killing with us to Mars, voila! And then the next planet, voila! It takes him seven months to get to Mars, it takes us seven milliseconds to get to Mars. Because we link to the emotion of the structure of the central energy of the place, time and position, that's not to be physical.

As I said many times, when you want to meet a friend, he's coming from one city to another, you're going from one city to another, but you don't have to meet each other in the time in the cities. So, we meet at this cafe in the middle, there is no city, there is nowhere, we just meet at that point or a sign at that, by that tree. We have a lot of these 'trees and cafes' in the Universe between the galaxies. And Man becoming a Man of the Universe, has learned how to get to these cafes, has learned how to find that tree through the dimension of emotion. There is no GPS in the Universe, I'm so sorry.

Many of you, in the discussion and technologies we have shown in the past, especially in past three, four years, when, if you speak and you remember, I tell you, you go from London to Washington, or you go from London to New York, or you go from Tehran to another point. How do you get there? GPS gives you two coordinates. That doesn't help you. You have to add two coordinates by Man into the structure. Magnetical, Gravitational (MG), emotion of the STM. (:42) Plus, the coordination on the emotion, Magnetic field strength of the planet in that place and position. Why do you become Chinese? Why do you become white in North Europe and black in Africa? Because, our inner emotion interacts with Magnetic field of its environment, and that emotion dictates our future.

Inertia of the emotion of the land is the dictator of the culture, figure, feature of the Man in the dimension of physicality. This is why when we move to the Moon we cannot be always in a Space suit. This monkey suit of the Man in the Space. If you understand the position and the time, the field strength of the ?? dimension of the emotion of the position on the Moon, on such a mountain, and the field strength of the emotion of the desire of the emotion of the Man, you'll appear in that place. When you appear in that place, in that place, you don't need no lungs, you need no legs, and you can move with the dimension of the fields. These are not theories anymore, because we have built the systems, and many of you have done the travel.

Bunch of you again, in the next two or three weeks, you go for another trip. This trip is very nice. We might delayed by a week, till we do the test on the six, that we bring those six as a 'Satellite (Soul)' to support you to learn the first steps of the transmutation. When you receive the materials, the six of you, make sure you follow the instruction. Where to put, how to put, and the way to put. That, when we start the process of emotion of transmutation, (:44) you are ready for it. You are ready to grasp, you are ready to taste the emotion of the motion, not motion of emotion. That time you are lost.

Try to understand. Don't sit on the sofa and say, "Oh, I want that cup of water from there, come to me." No, see how you taste the water, you get the energy of the water by giving to the water what it needs. You have to tune to his need, that he's got, in a way, full up, and the emotion and the field, what we call it, expansion, reaches to you. You've got to fill that cup before the overflowing of it fills you up. Gravitational Magnetic field of the same strength are totally different in operation. One twist in, one twist out. Which end of the twist do you want to be? The strongest always gives to bring balance. This is the principle of the Creation. And, when the balance comes, you cannot keep much, because you already have given out to create that balance.

Try to move on, to understand your emotions. And I said in the teaching before, there are many, many emotions that the Man has not even 'got a clue' yet, but it's within him. And it's part of, hidden from the Man by himself, as part of the emotion in the Universe. (:46) Emotion of desire, emotion of wanting to be with the Creator, gives so much out, that you become so humble, that then you can connect to His Magnetical field, and on return, you become Gravitational field to Him. It's a cycling process, total recycling process. Man recycles physicality, but he hasn't learned to recycle the emotion.

We are not preachers, no religion, this is pure scientific, because we have made the systems, and hundreds and hundreds of you have already been through it. Some of you, many times. Some of you regularly, every month, come into the session, to see what's next, have I expanded, have I learned more? But you never ask question, "Did I teach more?" You don't need to be a teacher to anyone on Earth, you teach, you give the knowledge, through the emotion of the Universal language, Universal knowledge. That emotion of Universal knowledge is the Man, which Man has not even understood, but he receives it as Tesla, as other scientists of the world, from the dimension of the Creation.

This is the point, when Humanity has to understand his strength, and at the same time fully understands his weakness. A Man who knows his weakness, is a strong Man. I always taught my children, when you are arrogant, you think you are strong, this is exactly where you are the weakest. (:48) When you are humble enough to know your weakness, you are strong enough to do something about it. And this is the same with the emotion of the transmutation. When you know, you cannot achieve, and you understand the reason of it, and then you create the emotion for that weakness, that lack of, what we call, position to be fulfilled, then you become Passenger of Universe. You don't need any wormholes, and Black Holes, and transmutation systems. It's been within us, we called it a dream. Now, that dream is a reality which we deny to ourselves.

It's like men, I live in the world of men, unfortunately. I've seen, in the world of my world of business, of power, and the rest of it. Some of these most richest man in the world, I've been in touch, I've worked with, they have some of the most beautiful women and children you could ever imagine. Not just physically, in emotion, in the love. And this man, still having the most beautiful things in his hand, sits on the chair, and his eyes looking for another woman. I turned to one sitting in Amsterdam, he ?? has a hotel. I said, "Aren't you ashamed boy?" I said, "You have a gorgeous wife, you have four beautiful sons, and then you still..." I said, "Do you know the pain you cause in your wife?" Because you never feel that emotion of satisfaction, because you're always hungry for something which is not yours. And this has been the habit of the Man, kill another, because it's not mine, I get it, I'll have it. (:50)

And you know what happened? Less than a year later the wife turned up with a breast cancer, on the right side. I said, "You give, you take." I spoke with him a few weeks ago, I said, "How is the wife?" He said, "We spent thousands, hundreds of thousands, thanks God, the chemotherapy, and this worked." I said, "Stupid foolish man, the chemotherapy is your eyes, your behavior, look being outside." The wife is not blind. It's you who's blind to the dimension of emotion you create inside that woman. Man, when realizes the power of emotion, in the dimension of transmutation, Man has conquered the Universe. Not with rockets and UFOs and the rest. Whenever you see a technology which is physical, you understand these people have not reached the maturity of understanding that you as Humans have reached, to understand the power of emotion. They still have to get in bigger plane, they can do this, they jam this, they create light, so they're still physical. It means they have not reached the maturity of the knowledge that you have as Humans, and you understand as a process of the Creation, because it's the way the Creation was created.

You eat that apple, not because you get the 10 calories from it, you eat that apple because that creates a magnetic field that the rest of your body needs to absorb from the Universe for the other 80% that you can't eat. Can you imagine if you were supposed to get the 100% of the energy you need from the planet, the animals and trees? (:52) You can imagine what would (have) happened, there would have been no trees, and the thing will be eating each other again four times over.

Man has to learn the power of emotion. This is the only way that creates motion in the Universe for the Man. Otherwise you're still in the job of Mr. Musk, rocket it and see if it can land on its own. Try not to call it a dream, but the reality of the power of the energy within you. Then you have unlocked the key of transportation, transmutation and everything else. Then you don't need even to wish to have the cup by walking, you move yourself to the chair and you are there through the transfer of energy of your physicality. I made Man in the image of Myself. Do I go across to see what the other one is doing, across the other galaxies on the end of the Universe? I connect to the line of the emotion of the fields. So, if he has that power, so does the Man, through the strength of the STM.

The biggest game we were played with, was that the clergy, the religious guy, created the Soul to be somewhere, and they milked the Man from the emotion in the pocket of physicality of the finance to control. Once Man understands the center of control of his fields, his energy, the way your brain, your heart is inside your physicality, the heart of your energy sits in your Soul, and it's within you. Then you'll find you're the creator of the emotion, the controller of the emotion, and understand with it, the emotion of the others, without physically creating emotion to meet. (:54)

The understanding of Cosmic Ray, in the dimension of Creation, is the key to the success of Man to conquer the Universe. Not by machines, not by Ayatollahs, and the Koran, and Bible, and the rest of the things written according to what Man could rob the others and called it a religion. There are no churches, there are no mosques, there are no Ayatollahs, there are no Popes in the Universe of other religions, that you can attach yourself to, for you to believe in something. Once Man believes in the power of himself, within himself, then he chooses when to manifest in physicality, and when to take the walk of the motion through emotion. These are not theories, we have delivered systems amongst you, that you can test.

It's for you to test, find the weaknesses, find the strength, the strength comes the time when you give, not when you receive. When you start receiving, you're in a big trouble, you're still Humans. Achieving is different than receiving. And you always strive to achieve to understand the strength of the emotion of the others, not yourself, because you are aware of your own strength, your field of emotion. I made Man in the image of Myself. If He can do it, so you can, because you are image of It. Which means you are the Yang, and He is the Yin. And the field strength of you, as He has access to all the fields of the Creation, because He created it. When you reach to this level of knowledge you become humble to your Creator, (:56) because you understand His work, and His simple-ness, and His love for Creation. You don't need no Ayatollahs to tell us, you don't need no religion, you don't need no nothing. Because if you don't understand this, the next guy in the UFO says this and that, because you don't understand the science of it, he becomes prophet so and so, and then makes a lot of Imams with it, and disciples, to rob you more on the emotional side of your creation.

Whenever you see a dimension of physicality, as Man of Space, understand, I understand the emotion, he has enough, higher than him. It's my responsibility to teach him to see his Creator, not for me to rub him because I know more. Then you become that thieving

Prophet for him. Try, especially those of you who, now a large number of Twinity systems has been distributed amongst you, and a few of them carry Cosmic Ray materials in them, which connects very direct. The Cosmic Ray materials within the structure of the Twinity system is a knowledge and a power, that no Man can match. There is no technology in the Universe that can match, because it has everything to bring Man to the Knowledge of Creation. And first of all, Man has to know himself, that's why he's a twin of you. You were looking, my twin love, my twin partner, now you have to deal with this guy, you've made it, you asked for it, and you connect to it, and it connects to the dimension of your emotion, not to your dimension of physicality. Sorry, it can not bring you a cow, and it can not bring you a blondie, which you like, but it shows the dimension of emotion, that it feeds you in every dimension of essence of Creation. (:58)

Try to understand how powerful your emotion is. This is not something new, as I said, go back 11 years ago, when, with Dr. Kostova we taught every organ of the Man. She spent half an hour, an hour, teaching about what the doctors, what the physiologist says, backing off the other scientists, to give her all the questions and explanation in the sessions, and we gave the answer for the same organ. Every single organ of the body of the Man has gone through this teaching. What it is, and the connection to it, is the emotion.

So, now that we have the systems, you can see what 11 years ago, 12 years ago, was set up for you now to see. If you want to understand it, what emotion is. Emotion's like a skin of the Man. It's got three layers. You got the outer skin, which interacts with the outside. You got the middle skin, in the middle, which has to handle the transfer of energy, and what comes in, what goes out. And then you have the inner skin, which handles with the energy inside. This is the balloon, which holds everything inside. Emotion is that middle layer. It has to be in communication with the Creator and created, with the giver and taken care. How much you take from the environment, how much you give back to the environment unconditionally. Because if it doesn't control that, God help you, there is no life. You get diseases, cirrhosis and everything else, when it runs into problem. Cancer and the rest of it.

One day, I was teaching a doctor. I said, "You see a cancer, see where the cancer is, where did it start?" (He said,) "Oh no, all cancers start in this, this way and that way." I said, "You haven't understood." (1:00) Look at the skin of the organ. Look at the middle layers of the structure of the cell. That's where your problem is, because it cannot transfer energy from inside to outside. When you see a cancer lump inside an organ, it means a lot, if you understand it. In one of the layers, middle structure, cannot transfer energy from, so it's stuck with it, and becomes, your psoriasis. When you see this lump, these dry bits, and these rashes on the skin, because the middle layer cannot sort out the salt content, what to hold and what not to hold. It piles it in. And where does it come? The skin of the Man is connected to the brain of the Man, which is the center of the emotion of the Man. So, could not be put in a highway motorway.

If the world of science understand, what has been taught, in all aspects of technology, Man will never kill, Man will never even drive a car, because it's easier for me to go

there, I don't need to go through the storm, snow, and car crashes and everything, because I'm there without a car crash. I transfer, I go where I want, where I'm needed, where I can give, more through the emotion of giving, not to the greed of taking. The greed is the sign of physicality. And generosity is sign of link to the World of the Creation, the true essence. And then you see, as I said, "Don't go and give your jackets and trousers to somebody, you can fulfill emotions, they can achieve anything, they don't need your trousers." We go for a break, we come back, I try to answer many of your questions. Rick, would you take us for a break? (1:02)

(Rick shows the 5th Video and the 5 Video series of the original Fireplace discussion and teachings of 2008 of Mr. Keshe. This one is called, "Keshe 5: Flight and Creation of Light." It's 9 minutes. Please study).

>> BREAK >> 586 KSW April 17, 2025 (1:13).

K- Yes, we are here, sorry about that. We have a very big dilemma inside our structure with who to choose for the 6th person in this group of 6. Why? We know. And, we received so many requests, (1:14) amazing number of you have sent the requests, would like to be part of it. And, it's a time for us to decide, and it's been more than a week now, we've been battling with this. Who do we give the opportunity, which is given by another Knowledge Seeker, to be part of this? And I hope, next few hours, we come to the conclusion, because we have to send the material out, to this person, for it to be part of the test, hopefully, by next week. It is very, very unusual, to be able to bring that change. And I think no one is more, I think more eligible for this than Rick Crammond. But, as you all know, he's never asked for anything. And he did not even ask to be part of this, ?? I think it's a gift. From all of us, for being there for us, years. (1:16) We hope that this new trial will open a new dimension in the dimension of emotion of the Soul and solves the problem for many of us to believe in ourselves and our emotion.

In the next session of the Keshe Foundation, May session, we will introduce a new technology that allows us, not only to create the dimension of emotion of transmutation,

but to feed you, with the strength of the fields of the time, place of emotion, ?? at dimension of arrival. What this means, as we have developed technology, very advanced technology, extremely beyond the present knowledge, that, not only we create a dimension of physical motion, we can create a dimension of the emotion in the dimension of fields and at the same time create all condition of materials for the essence of what you call, the Soul energy, to receive what it needs, to convert, to transmute, to the time, place and position (TPP) of arrival. This feeding of energy through the dimension of plasma of the Universe is extremely complicated, extremely complicated, but amazingly simple. (1:18) But, it needs full understanding. And today, we have built the system.

In a way, in the coming time, when we release this technology, when you have this technology, for example, on the table in the house, it feeds your physical need, dimension of energy, that you don't need to kill, but at the same time it feeds your energy dimension of the emotion, or the STM, which you decide what to do. And none needs to destroy something else, but the system feeds through the dimension of, what you call, Black Hole, absorbing and radiating what it needs, is called for by outside, which is the dimension of physicality of the Soul, to feed it.

This new technology is under trials, and we literally, in past few hours, received the last components that we needed for the confirmation of transformation and transmutation of the energies. The importance of the transmutation is not physically to transmute you, is create a condition to transmute the energy itself. And, we tested this last week, and it's amazing, it works. The bigger condition we have, or is on our hand, is to create a right, what we call, motion, that creates a right current in the direction of the emotion and the motion together. Which means, you have to create a condition that creates that turbulence, creates that, what you call, in the world of electronics, or electrical currents, the potential difference. The potential difference between the receiving and giving, (1:20) and then understanding both are a common denominator, which, in the dimension of Creation, has to be what one needs through dimension of emotion. You don't get up every day, go and kill a sheep, or a chicken, or take an apple. The emotion of hunger triggers that need. So, understanding that emotion, how to trigger and create the emotion of the motion, is what is literally on the table with us. And, it'll go through the test in the next few days and weeks. It's an extension to what we saw in Linz, and then moved to Germany, and then developed in further ways, with other parts of the technology.

So, when you join us and, this month at the May session group, be ready for big surprises, and don't call it, "I went there, I felt that, I imagined that." You actually done that, and there is no imagination. It's for you, confirming the existence of the part you denied. It's a child which you carried and you always denied it exists. Now, as we say, "Chickens have come home to roost." And, once you do that, you get access to a lot of energies, emotion, emotional energies, and information of the Universe. New dimension of knowledge will open up to you, and then it's your responsibility to open it up to the rest of the Humanity, and those you come across in the Universe. There are no patents in the Universe. Patent belongs only to those who believe in the dimension of physicality to control, to confirm their existence. If that exists in Universe, can you imagine what patents God would have written up to now? You would have not been even created

because nobody paid for his patent rights. (1:22) That's exactly what we did. Keshe Foundation patent, our application, which you have to apply, and never were put into enforcing, that we can make physical dimension of ?? gain.

Are there any questions?

R: Okay, thank you Mr. Keshe, and thank you for the comments that you made there as well.

K- You're welcome.

R: I'm humbled.

K- You've been there for a long time. It's time for you to taste it.

R: Well, I've certainly been waiting a long time for a flight system, that's for sure.

K- No, you are the system. You just have to fly it. That's a big difference.

R: Yes, well there was a comment in the Youtube, the very first comment from Creed, is I think the name. I remember this in 2011, thinking it would go somewhere, and now I still don't have a craft. Has anything come of this? I was going to reply, well, it turns out you are the craft.

K- Depends how crafty you become as a craft, isn't that?

R: There you go.

K- Are there any questions?

Q: ... (1:24) Hello Mr. Keshe, you explained in your third book that Black Holes are produced by passive magnetic fields. Could you please explain more about what passive magnetic fields are?

K- We call it neutrinos in the present world of science. You are passive till you interact and become active. And, man, because he doesn't understand it, has made many, many, many, many, many names, neutrinos, "blibinos," God knows whatever you can name it. The same as here, they made it in dimension of interaction, or active fields, they call it, up quarks, down quarks and everything else. As I said, up quarks is the Sun, down quarks is the Earth. The others ?? are the other planets and their star, what you call it, moons and the rest of it. As man has not understood, he's created a lot of fantasies. Now we understand. We don't need to fantasize, we have to handle the reality in the dimension of physicality. Because we produce these materials.

In next days or two, or within the next few days, or maybe some of you, I don't think any has come out yet, but it will be because 48 of the Cosmic Ray materials has been dispatched from production, (1:26) complete with everything. You even have a certificate, that it tells you. And nobody can duplicate this, because every single Ball has been pictured to the name. And, there are hidden characters inside each Ball, and nobody can replicate, says this is the Cosmic Rays and the rest of it. We, when you receive it then you'll understand it. Then you can use it for the conditions of transmutation. 25, I think or 24, something in that region, has been applied to the systems for those who ordered. So, in a way, around 75 Cosmic Ray Units, already are out and delivered, and they're on the way to you. Those of you who received the Twinity sets and you asked for it, it's already

built in it, so you received whatever Units of Cosmic Ray. So, the technology of the Universe, the knowledge, is already in the hand of you.

Any of you, who ordered the Cosmic Ray with a Twinity system, with a Head Unit Communication system, you connect in a different way than a guy who doesn't have one in it. Because, now the connection is in Universal dimension. And your feelings, your emotions, your understanding, is totally different than the ones who, the first, I think, 30, 40, which went to different trials in Germany and Austria, in those sessions. (1:28) And this, we did deliberately, we asked those who would like, to have the Cosmic Ray as part of their Twinity system, and their emotion and their feelings and their connection is totally different than the ones who don't. We wanted to see if we are correct and from what we hear from a couple of people who tested it, it gives you amazing understanding, it brings you one step nearer to understanding transmutation through emotion, through Cosmic Rays. Don't forget, if you go on the Internet, what do they say about Mr. Keshe? A lot are of, Pseudo-science. Because they don't understand the science, it's pseudo to them. But it's pseudo to those who actually start using it and they go through it. And we have the same problem with all of you Knowledge Seekers who attend all these monthly sessions. You always say, "Oh, I went there, I did this, I met this." Hello? It's not a fancy, it's part of where you live. You control it, it's part of your life which you denied. And this is the important part.

We don't need to create, to build now UFOs, to build system like UFOs, it's a waste of time. Why should I go back to the donkey to go to A to B than now I can go in Mr. Musk rocket? We more or less abandoned the development of the fly system once we start introducing transmutation and energy transfer. (1:30) Originally when we put the units out, if you remember you came to Linz, you saw the units hanging around. All was set up to go, we spent, we lost nearly 300,000 Euro plus, I think, just on this UBESUS big huge units. We bought the material sat in the factory, but the technology jumped so much that we left the material, we can't do anything with it. It's no use flying those monstrosities and flying objects where now I can teach you and you're learning and you people are with it, because two years, now it's two years that we started the first flight tests.

Now we can, we have reached the position that we can individually, if we set our system, separate your Souls in these groups. This is the Soul of Rick, this is the Soul of 'so and so,' this is the Soul and so and we can see it, because we done tests on what we call 'Beautiful People.' The test with Beautiful People has shown us the existence of two Souls, three Souls. We see it on our system, technology is very advanced. We see if even your emotion is high, positive, or you're in depression, through the same. Is that depression comes through your physicality or it comes through your Soul. Your Soul sits on the positive, but your physical emotion sits below. And then we see more of, we understand more of, and so this has brought massive changes to that dimension. (1:32)

Now you understand why we abandoned going with UFO, or flight system. Do you remember how much effort we put into it, during the time in Italy in Barletta, in Desenzano, and then further on the test we did in Sanya in South China Sea? Then further on, and more or less we don't have a dynamic system, we learned how to create dynamic

motion in the energy fields, and even we tested last week. We can create dynamic emotion of fields. We don't need rotating balls. It's finished, it's kaput, it's obsolete. But if you want to go back to flying in something, we're still working on it, we give you a machine that it can fly and everything else. We put your auxiliary things to feed you.

When we showed the production of Amino Acid, for the first time in public to the Chief Academician of China, Gas Corporation, I saw him seeing the CO₂ and the Amino Acid and literally he had to go and change his pants. Denial was the best thing because his academician, advisor to the government was worth nothing because I can produce that protein. I can put emotion in that protein, I can create life with emotion because now we have the technology. It's not a dream, it has cost us a huge amount of time and money to create these systems. Now not only we can produce the Amino Acid which leads to creation of life, we can dictate emotion in it. (1:34) And the next step is to create Microchips which carry emotion. It's like a brain of the Man. We produced the brain in 2016, 17 in Desenzano, in the environment, open box. Now we can even produce that the next step of technology development is computers with no connections using magnetic fields. It's the way your brain works now, now we have the technology. We can, in a way, you go and produce pure Silicon to produce, in Silicon Valley, to produce Microchips. Now with the knowledge we have, we can produce pure, pure Amino Acid with no contamination and with the energy fields which carries the emotion for certain jobs. Then in the future we can build robots which are only kind. We can build robots which are only happy. It's not far, we have it, the technology is sitting there. I can show you pictures of it, but we don't want it to be in public what has been achieved.

Just before going on the teaching today, I just received a message the last part has arrived, but unfortunately to Mr. Trump it is made in China, because Europe doesn't have this technology to survive. (1:36) Technology had to be bought and it was so beautiful when we ordered it we wanted difference, the Chinese people were so kind that they said no, they without telling us, they connected everything for us. So now we can even choose the emotion, the material, which that protein carries with it, when it's created. We uproot the essence of killing in Man by introducing dimension of energy within the protein, Amino Acid of the Man itself. And it's not a theory, I can just flip, as usual share with you the picture of the system. Man is not ready for this knowledge. But we can't stop that ?? one day Man become ready. We have to develop the technology to make Man to understand it, to be ready for what is to ?? .

The way I see it, the way the technology is going, if you understood the system of Twinity in a different way, not the way it is now I can create the emotion of the child in the womb of the mother, 'virgin birth' through this technology. Because we create the dimension of the Soul, perfect Soul, and all I need is to transfer it in the womb of the mother with the emotion of the mother, the child is born, is conceived. That the energy of the field dictates the creation of physicality. Isn't this what it says, "I made Man in the image of Myself"? The dimension of the nature, the Creator, related to the creation of the Man in the dimension of physicality in the womb of the Earth. (1:38) Now we know that knowledge, we understand that knowledge.

Do you still want the UFO? I don't, we don't have time to spend on it, we actually, when I look in our, any of our systems, any of you been in the transmutations in past three months, six months, there's never been a single dynamic rotating system. Rotation is the attribute of physicality. Field strength, balance, or difference is the essence of the motion in dimension of the emotion. Then you understand why we have two emotions opposite to each other. Why do we have good and bad? Because each one has a different strength and dimension, the two bring a balance, perfection. There's a lot to share, but Man is not ready for this knowledge. They call it 'pseudo-science,' but soon they'll commit suicide because never understood the reality of the science of Creation. As I always said, if I show you the beauty of this technology you all commit suicide to be there, because physicality is not worth it.

Any other question?

R: ... I'd like to show the PDF from Gerhard who gave a testimonial of his experience of the transmutation session and his MaGrav unit with the Cosmic Ray materials. (1:40)

K- With the Twinity set?

R: Yes.

K- Oh, he's one of the first one who received it. His system is very special. The system they carry is very much connected to Cosmic Rays and creates a dimension of reality, which is what it is. You called it a dream, but it changes the emotion. So, perception of the emotion. Read it and then I think a lot of people understand what change has come to Man, as he's one of the first people who has a Twinity system equipped with Cosmic Ray materials.

R: Yes, he's kind of seems to have a good understanding of what's happening as well, so. Okay, let me read the Twinity experience report by Gerhard. An adventure between Soul, body and Cosmic cleansing. English version. On Friday, April 4th, it finally arrived. Our Twinity with Cosmic Ray material. One week has passed and today feels like the right time to write my first report. Why only now? In the 584th Knowledge Seekers Workshop (KSW), a special pre-transmutation training was announced. It sounded intriguing, but after a sincere look within, it became clear, I wasn't quite ready yet. My gut feeling said, I need at least three to six months of development to meet the basic requirements. Then came the 585th KSW and once again the training was mentioned. But this time, something had changed. A quick internal check showed participation possible. Success likely. (1:42) What changed in just one week? The answer, the Twinity. Curious, I started analyzing inner states, the classic veils that separate us from closeness to the Creator. My question, how many months of training did the Twinity give me in one week? The results, ego 3.5 months, greed zero months, anger one month, envy six months, lust 3.5 years, pride two weeks, hypocrisy three months, deception one month, laziness 4.5 months, fear six months, doubt zero days, attachment 2.5 months, jealousy zero weeks, avarice 1.5 months, self-pity eight months. No wonder the answer changed. Twinity has interacted with my Soul, the Soul of Physicality (STP), and the body itself,

clearing and transforming on deep levels. Can you feel the change? Oh yes, a steady, clear flow of energy, like a gentle inner current. Within a few days, Twinity has become a true companion in my life. All that remains is a heartfelt thank you to Mr. Keshe and his team. It was well worth the wait. Best wishes to all readers. Gerhard. (1:44) So, Gerhard explained in the public meeting testimonials about his...

K- As you see, it's all, yeah, it's all connected to different emotions. It's all the emotions which the Twinity system interact with. And, the most thing is people around you can feel it, see the change. And, we see this even in our lab, people who are continuously in touch with these materials, they change. There's no condition put. And, in so many ways, we need to choose the path. Accepting the two part of life which we denied, and handling it the right way. And understanding it the right way. This is the most difficult part. When the Man handles the emotion, then Man can handle a lot of things. And, once you lose the emotion, the control of it, you can play with ?? , you can bring ?? down with it. He has ?? done in the past.

It's very interesting to see, as I said, self-analysis. Oh, that brings you to a point, when you see all these figures changes to zero, which means I achieve balance, then you come closer and closer to be. But, the fortunate thing is now, (1:46) we have introduced new dimension of technology which the six people will go through, with the odd people in the system, which we know, with different characteristics and arrangements, which will bring a lot of things for us, clear to build up the next structure and systems. It's very important to understand this, and we never give preconceived ideas, then we influence it, and we let people to understand how things are set by people themselves. It's very interesting, how we see different dimensions of emotion, has been explained, in this, what we call, in this text. Very, very interesting, what we'll see in the next sessions of, what we call, Flight Systems.

Any other question?

Q: ... Good morning to all Knowledge Seekers. We find in the Bible alone, 13 distinct and central names for God, each revealing a different aspect of his nature and relationship to Creation. If our purpose as Human beings is to draw closer to the Creator, and if this Universe was indeed brought into existence by a Divine source, then a profound question arises. In light of the many names attributed to God, across different religions and traditions, which name should we choose, in order to sincerely think of Him, and truly connect with Him? (1:48) How can we address the Creator, in a way that aligns with Truth and genuine devotion?

K- The Creator. To create, you have to put all the love in it. To create, you have to put all the energy in it. To create, you have to be able to become detached to it, because you create to give to someone. And, then you start that process. And, the best word is it, to the Creator. Don't put a name on it, God, Ahura Mazda, blah, blah. Simple word, one who led to the Creation out of His generosity, out of His fields. That's the only word you can choose for Him. Even the emotions are created by interaction with His fields. They cannot separate it.

There is something I wanted to do, to tell you sometimes in teachings in past years, I refer to these things outside the context of the teaching. And, in the recent past we've seen it again, and it's alarming the damage it's doing, especially to women. Especially to women and we see. We're looking for research papers, what is the, what is coming up, have they started researching and developing, what you call, the papers for this. (1:50) One of the toothpaste companies, a few years ago, put an additive into the toothpaste, and this led to death of over 10,000 people around the world within six months. I cannot mention the name of the company, and the products. Recent past, some toothpaste companies have start adding addition of Zinc, or combination of chemical Zinc, into the toothpaste.

As I said by the principle of the knowledge, when you put something in your mouth the body gets rid of the material in the body which is surplus, because a new material is coming in, converts it to something else. And, when you put it in the mouth, but you don't take it in, the body has already released the material, so it creates a shortage, deficiency in the body. And this material, Zinc, which is added as different chemicals in the toothpaste, and some are now hidden, and are putting it on because of whatever, is creating depression, is creating hair loss in women in a massive amount, is creating tiredness, because Zinc connects to the neural system and emotion, and it affects women much more than men does. And, it connects to your nail, strength of your nails, the emotion of tiredness.

So, what I advise you, Knowledge Seekers, I can give you five minutes rest, if you're at work, take your time when you get home, (1:52) or still enjoying yourself outside, and check the content of your toothpaste. As you put it in the mouth, you wash it out, the body doesn't receive it, and it's ?? old. The worst thing man ever created was a toothpaste to make himself sick. Because, every time you spit it out, you already drain that much of whatever is in it from your body, and you create deficiencies. Use, what our ancestors did, ashes, because ashes still stays and replace it, but still cleans and takes the smell or whatever of your mouth out. All covered by the other materials, which they don't change, what we call, the balances of the minerals of the body of the man. Whenever you see a material, da-da, da-da, da-da, da-da, da-da, on the toothpaste, go and see, what these materials deficiency in the body creates, look at your own diseases and you say, "Voila, this toothpaste, this is what it's doing to me." It's very simple.

And, it's important for Knowledge Seekers, especially to be aware of this process, now you understand the process. You fool your body, and that costs you a lot of problems. If you, in past years, lose a lot of hair, you feel a lot tired, just look at the toothpaste. It comes on the Chloride, something, Zinc and Zinc, da-da-da-da-da, zero, zero, one. Oh, it's very little, that little is doing the damage. Any metals, any material added to the toothpaste, is what you're throwing out of your body. (1:54) And just read what short shrift that material does to your system, to the body on average. And then you see, this is what you targeted yourself.

The ones who have sugar content in it, those are the ones who have to be watched. Those are ones which have salt on it, of different, you have to watch what they do. The ones with salt are the worst one, because they change the balance into acidity, and they become cause of cancer. It's one of the reasons, in a way, in the Western society, we see so much cancers. Source of it, origin of it, a lot of it, comes through toothpaste. And you have to understand the process. You put that thing on your tongue, you give the feeling of so much is coming in, but you deprive it of it, but the body has already, has got rid of it. And the worst thing is, they say, "Two minutes of brushing is the best." Fooling the body to dump everything in your intestines, and your, what you call it, large intestine, to get disposed of, and there's nothing come here to do it (replace it). The glands have to go over, right, to try to replicate what's gone missing, so you create deficiency to deficiency in the body.

Straight, even when they talk about fluoride in the water, go and read what's the problem with fluoride, even they put it into toothpaste, deficiency and extra amount of it. (1:56) And then you understand. You brush it with the water which is fluoride, it's ?? evaporated and the body expects so much in it, (but) nothing comes, because the disease which comes behind it. Just be a little bit more aware of the, what is in the society, and just check your toothpaste, and see what this toothpaste has done to your children and see how children change behavior. It's just that you deplete them up, you're sending them out to school, hungry, starving of the main ingredient, which is calmness, emotion, and the rest of it. So they don't have it, you got the dyslexic, you have problems in school, emotionally, and the rest of it. Look at the toothpaste. The toothpaste should carry no materials, which the body rejects and see the condition of it.

Q: ... He says, he uses Bicarbonate of Soda, is that okay?

K- What is the chemical combination of Bicarbonate of Soda?

R: What is it? Might be N-A-C-O-H or something like that, it's a Carbonate.

K- Yeah, what is it?

R: Let me see. It's very alkaline, and if you mix it with vinegar, it makes lots of bubbles. It was one of my first experiments as a kid. Let me see.

K- They say put Carbonate with sugar and flour, and you can kill virtually every animal on this planet. Especially the small one... (1:58) Bicarbonate Soda, add some sugar and some flour, and you leave it where the ants come, where the reptiles come, where rats come. They eat it because of the sugar and the flour, and then Bicarbonate, when it gets mixed with the water in the stomach, expands and they literally take their life. You have to understand how you use this material.

R: Well, Sodium Bicarbonate, the formula is NaHCO_3 .

K- Yeah. Then you understand how... You see we...

R: It's sort of tetrahedral structure, almost.

K- Yeah, yes, but you have to understand, it's very interesting. It's very much like drugs. Has a connection between the all three elements of the Universe and Earth. Hydrogen to the essence of the origin, Carbon to the dynamic of the information carrier or connection, and Oxygen which is the magnetic field of the planet in the dimension of gases. And then you can understand the extent of this interaction, why it links up with the flour and other things. Because flour is an Amino Acid, protein. You call it a starch, but in the essence, in the seed of this, whatever wheat, whatever, there's a huge amount of protein which is there. And then you connect it and that's why we get energy from eating these things with this connection. (2:00) That's why we add the yeast into a structure. But the Sodium, which is again, is a, in a way, material, but it connects to become a salt in the energy aspects. What is Chlor? What's the value of Chlor? You'll find in a combination of the Chlor with a HCO_3 , a combination of NaCl , which becomes a salt, which will make it have the, what you call, that Biological side.

R: They show a formula like that here, where the Sodium Bicarbonate plus the stomach acid yields salt, NaCl , plus water, plus CO_2 .

K- That's in the stomach. So then we understand why our scientists have been going crazy wrong with saying that the stomach is acidic. Actually, a stomach is totally alkaline from energy absorption. Acidic side is to break up the matter state. Then the alkaline side, the salt side, is transfer the energy of what is broken into the organs. And now we say the wall of the stomach and intestine absorbs energy, does this and that, which is a lot of hot air, because we never understood the process of energy transfer. We always looked at the Matter-State only. This is what we do in the Gans production systems. Yeah. (2:02) You put your plates in the salt content and you produce, what you call, Gans's, energy.

No more questions?

R: Just as a side note, I see it here, it mentions during the Manhattan Project, who developed a nuclear bomb in the early 1940s, the chemical toxicity of Uranium was an issue. Uranium Oxides were found to stick very well to cotton cloth and did not wash out with soap or laundry detergent. However, the Uranium would wash out with a 2% solution of Sodium Bicarbonate. Clothing can become contaminated with toxic dust of depleted Uranium, which is very dense and it's not removed with normal laundering. So, again, washing with 6 ounces of baking soda and 2 gallons of water will help wash it out. So, we might need that little helpful hint someday in the future.

K- You know when you touch Uranium as a nuclear material, purified to certain level, it gives you a funny feeling. I always consider as an invincibility. It's very crazy, if you come to touch it. It's something you are not allowed to, it's something you can't do. (2:04) But, during my teaching time, I had the opportunity to feel this thing, which ?? this thing, which is just something to do, and I did, I dared to and I did. And, it gives you... I am as powerful as it is. As I said always, "The world is not afraid of nuclear physicists."

The world is afraid of... it's not afraid of nuclear technology. The world is afraid of what nuclear did in Hiroshima. It took a shot, and now you're scared.

But, if you touch, especially Uranium, enriched Uranium, it has a... tasty, salty taste, but it tastes like sweet and sour. You taste it, if you touch it. And, I tasted this for the first time, because then I knew. My father used to produce a special unit, which adds to the front of the X-Ray machines. It's like .. those big speakers you used to hold, with just... with a funnel. And, this is supposed to absorb extra radiation, that the radiation, when you put it on the bone or whatever, it's concentrated, you take all the weaker ones out. And, for a time, because I used to... these are made of lead. It's literally like a (traffic) cone you see on the street. It's exactly like that, but different. The top is very narrow, and then depends how much you cut it, the wider the... the end gets. They literally push this one on the slide, which is brackets, which is on the X-Ray machines, (2:06) to take out surplus or lose or weak X-Rays, it gets concentrated.

And, because my father used to produce this for Philips in Iran, I was a lot in touch with this material after use, because they used to drop it, the nurses, so it had to go back to be refitted, reshaped and everything else. So, there was always this hanging around. And I couldn't understand why some of them tasted different, because I used to handle them, I used to touch them. They were in the back of the car, "Dad, why is this?" "It's a stupid-ness, dropped it, ?? no... it's lead, it's soft, it's cheap." They form it, goes back to the factory to be reshaped. And I couldn't understand why... My mother used to have a special name for them, it's used like, you know, the farmers wear, like that. They used to call it a ?? . And... This I didn't understand. But I noticed something, being in touch with these, that the ones which came from X-Ray departments, are a slightly different color and taste, than the ones which was new, made to go out. I couldn't understand this, because I could feel the taste at that young age, I could see the changes, till when I went on the nuclear reactors. And when I touched one of the nuclear plates of Queen Mary College. I had the opportunity to do it, it was there, and I had to taste it, to test it. And I felt the same energy fields. And this confirmed to me, that a lot of these lead field absorption in the X-Ray machine, you don't see them nowadays, it was very common 30, 40 years ago. Actually convert lead into the radioactive Plutonium-Uranium level energy. (2:08) And it has a taste, a salty taste, it's not a salt, it's not sweet, it's a taste of salt. And it brings that kind of field energy to taste that way.

So, nuclear materials can be, because it's a salt, it matches with salt, that's why it allows it to be washed. Because salts are a connection between material which connect the metal to non-metal. Sodium as a metal, Chlorine as a non-material, we call it a salt, which is, connects the two, it's what we call, the reason it's called salt is the same as what I said, the skin of the man. The middle layer, salt content, ?? the sides, come around, transfer of energy between the two, and then it allows the two sides to be connected, that's where the salts are. And once we understand the application of it, in the world of transmutation of energy, this opens a different dimensions, traveling between the spaces of the Universe, where we use the energy of the components, not the components. Which is a cornerstone of Cosmic Technology and Keshe Foundation work.

When you want to transmute between galaxies, the way we now call it, a frequency of this... If we understand the connection of where we go and we come to, then we find balance. In a way, Chlorine, in a normal table salt, is a connection to the part of our body which is not metallic, (2:10) and then Sodium is the one which is a ?? metallic. So, between the two, they allow the physical part, metal part, or material part, and non-metal part, which is a biological part, connect to each other. Which the material metal part is the Calcium. And, due to the Gravitational Magnetic vacuum of the body, it behaves that way. And the non-metal part is all the fruits, vegetables, everything else we eat, for the conversion, attachment of the Calcium, to the structure of the body of the Man.

And, if you look at the Calcium and Sodium and Potassium and this, they have a special ratio energy, which mimics the other. And then you understand why we need salt, or why we have salt in our body, or in our stomach. With the vegetables for conversion of the energy. Secondly, is connection of the energy. One material does two jobs at the same time in the body of the Man. All the salts, the word salt, is connection between the metal and non-metal, in the world of the chemistry, or in the connection between life. And when you get it the right way, is what connects you. Why do we have salt and Magnesium? What does it connect in the body, and what does it field strength? As is in homeo therapy (homeopathy), they say there are twelve salts, I think it was seven or eight of them, or something in that region, and the others are not known, because it's created by the interaction of the salts themselves.

It's amazing how much information one carries.

Ah, okay. Any other question? (2:12)

Q: ... When we undergo transmutation, is it sufficient to turn to the creator of this Universe, or must we reach out to the creator of the Unicos, assuming the two are not the same?

K- As the old say, says, "Let us crawl first, before we jump." But it doesn't mean that we cannot jump without crawling. It depends. You have to understand the process of the creation on the magnetic field side. Not the ?? portion of the process of creation on matter, physical knowledge.

As I said, the knowledge is so much, so deep, that the, what I call the Hydrogen of this Universe, itself has connection to the Hydrogen (H), or the fundamental plasma of the Unicos, because it's created out of it. And that's a different field, it's really. Much lower than the Hydrogen of the Unicos, the fields. And once you achieve to that, you get access to the Totality of knowledge and Creation. And as Universal teachers, we have that access. And that's why we teach, because it's unconditional. But Man should understand it, otherwise it'll become 'pseudo-science.' Because, actually Man committed suicide of his Soul, his energy, (2:14) his knowledge of energy, and chose to go for the dimension of physicality.

I've explained this in the world of understanding. The difference between the physical dimension and the Soul, is the emotion of satisfaction, and what we can do. Is, do we fall in love with the physicality of a man or a woman? Or, do we fall in love with their emotion? With their beauty, inner beauty? A Man who chooses the physical part, is always a loser. Because, age will take that beauty away. But in essence, the emotion never changes inside. You'll get the nasty woman, it's nasty from the day you meet her, to the day she dies. And that's the process of energy. Because the beauty is by?? age. And it's the exact process Man has chosen. It's called ?? the physicality, it gets destroyed and changes. And in essence of the emotion, ?? in its ?? truest ?? sense.

Q: ... (2:16) Good morning, could you please give us instructions for creating plasmatic scents from forest mushrooms? Perhaps even a short working video.

K- What?

R: For creating plasmatic scents from forest mushrooms, perhaps even a short working video. They want instructions for creating the forest smell, or forest mushroom smell. I think we addressed this a little bit last workshop.

K- Can you repeat it? I don't understand.

R: Okay, the question is, "Could you please give us instructions for creating plasmatic scents from forest mushrooms?"

K- Go to Amsterdam.

R: Go to Amsterdam?

K- Yeah, and walk the streets of Amsterdam, I think you get that very quickly what to do. You know, when you walk the streets of Amsterdam, you don't need to smoke any weed. There is so much weed floating in the city, that you actually get high without actually smoking it.

R: I've heard of that before. I think they've cracked down more in recent years though.

K- I was there a few weeks, a few months ago, nothing changed compared to 30 years ago, it's getting worse. Keshe Foundation is a Dutch state now, we spend a lot of time in Holland. It's the essence of how you do it, and understanding the process of the essence, understanding the smell is a crystal structure of the matter state. (2:18) And Knowledge Seekers should know by now how to make a crystal structure. A lot of Knowledge Seekers can smell Gans's. I've met many of them, that they can tell the difference between Gans. I ?? do usually with the touch, but they do with a smell. Many of them can say it's smell.

R: Can you tell the difference by holding a vial of Gans? What kind of Gans it would be?

K- Years ago, yes I used to do very easily actually. You can tell them by sight, a lot of them. But, yes, each one has a taste. I used to be very good at it. I think coming in touch

with so much Gans's, so much energy, it creates the confusion of the brain. But yes, you can do, you should do, because I used to do it. I still do sometimes. The best one is CH₃. But usually CO₂ and Zinc are very similar, but Zinc is more a whiter, flakier one, than a CO₂. And then it's the same when you look at the CH₃, Hydrogen, sometimes Tritium. They have more or less the same color. You, by experience and by touching, you know which one is which field.

Any other question?

Q: ... When two interacting fields interact with the environmental fields, (2:20) they can manifest themselves. I know that the manifestation is dictated by the interacting fields, but is the shape of the matter dictated by the sound? Does sound give a geometry to this manifested matter? And if the sound does give a geometry...

K- Partially, yes. Partially. Partially. They make their own sound. That is the, that's the beauty of it. You cannot create it most of the time. The sound, the frequency, is a catalyst for production of more of. It's just, it's like a sound behaves like the Inertia. Inertia of the sound, it's a core, it's part of the technology of the Creation. That's why, when we listen to the Space sounds, that sound, different part of the Universe is different, and the whole Universe doesn't always sound the same. We know that from years of our research. And it's very simple, if you put it that facing South, and then turn it 180 degrees to North, it's different noise, even though it's the same space.

And it's, one creates a condition, the, for, for creation of a lot of gases. And in a Cosmic Ray is the ?? , is part of the creation of matter state. This is partially, even the cells in the body of the Man, are created by the noise, combination of noise, within the structure of layer of the body of Man. This is why we hear the heartbeat. (2:22) They say, "Your heart beats up and down." The frequency of the noise, which is created by the plasma itself, in the body, leads to creation of what body can absorb, what body behaves. If you have somebody in a critical condition, and change the frequency of the heart, you'll see the change. I've tested this, and it works, it's correct. You don't need to do anything. Don't put them on a (defibrillator), don't put them on a pacemaker, just change the frequency of the heart, transmission to the rest of the body. And then if you can match it, in the plasmatic condition, with the Soul, you'll never die, it's the Fountain of Youth. But it's a long way for Man to understand.

It's like, you have the Mass, which itself is created by the interaction of gravity and the Magnetical, and then that's, that's the Mass, or it is, that's why it never changes. Because, the same difference always creates one outcome. When you put this, in interaction with the Gravitational Magnetic field of the Earth, leads to production of the matter state of it. Where you have a different Magnetic field state, strength somewhere else, the same mixture, same sound, the same combination, creates different things. This is a cornerstone of the transmutation. And, so frequency is the same. So, the interaction of the Mass, with the Gravitational Magnetic field of Earth, creates the Weight. Then we say, that's how much it weighs, and it is different in different places, because it's interaction with the field of environment.

And this is what I said earlier on, that, when you do the transmutation, the Magnetic field strength of the position, which is, I say, Moon, (2:24) at this point, in interaction with Gravitational Magnetic of the STM, dictates whether Man is going to be benefits himself, the weight, the combination of the existence. Mass can exist without the matter. But Weight cannot. Because, it's position, dimension, reaction. This is why we say, we see Carbon, or we see Hydrogen in such and such a planet. But, that Hydrogen, that if you bring it to Earth, Earth can recover, most surely evaporates, doesn't exist, cannot, because, manifestation of the balance of different things gives that position.

If you want to understand, it's very simple. You have 24, taken away 10, you get 14. You have 34, taken away 20, you still get 14. You have 100, added by 50, gives you 150. You can have 75 and 75, it still gives you the 50, 150. And this is the way, Gravitational Magnetic field of the interaction of the fields, are different than the environmental interaction. This is why in all the teaching, I always talk about time, place and position (TPP). Has a meaning, has a structure.

And this is why we have different races of the Man. The Soul is the same, more or less in different field strength within the spectrum. But, Gravitational field of the Earth, depending what layer is on top of the Himalaya, and what is at the bottom of the valleys in Africa, creates different fields, (2:26) leads to different creation of different colors, different mentality, different approach to food, and the rest. This is what I say, if Man realizes, then you can go from Africa, as you're transferring through the energy, not the physicality. You get on a plane in Ghana, you come in China, you're still an African man. But, if you travel through the energy, you get in the plane or in the system, or you go through the emotion of transmutation in Ghana, in China, if you wish to satisfy the dimension of emotion, you are a Chinese, nobody knows you are from Africa.

And this creates a lot of dynamics, because now we have DNA testing, if you understand the process of energy fields of DNA, you can go back in a lot of things, and understand a lot of other things, and how even we evolved, and who is our ancestors. And for some of us it's very hard, and you're paying 90 or something, used to be I don't know how much, you pay 99 Euro, for the lab to say, "Oh where your ancestry comes from?" and they'll tell you which way you came to, what was which part of the world. Sometimes this DNA markers create huge problem for some people. As you've seen in the recent past with the British Royal family, it's created mayhem. It's family by confirmation and diversity in DNA, after what is to be the King William. Years of animosity, hate between the two brothers, by confirmation of DNA being released by a newspaper, just for a test for the hair growth, has brought the two brothers and the father back with the two sons, and changed the story of the monarchy, solid. Because now they understand what poor Harry went through. (2:28)

All the closeness of what we see, the emotion of the reconnection of the ?? Charles, William, and Harry in past few weeks, is all just because of one DNA test, which went wrong, and it showed different line of lineage in the monarchy. And to, not to lose it, the three have looked at each other, and they understand what's going on, and we'll see a

massive change in British monarchy structure in the coming time, because of this DNA confirmation. As I say, it was good as long as it was Harry, he was crazy and everything wrong. When it hit William, the only place he could run to was Harry, because he knew what he went through, and Harry could help him. And now they've changed the course of monarchy, in a very big way, even to the extent of the past animosity of the British monarchy. You got to understand British monarchy has mixed up with too many races inside it, they have ?? ?? embedded with different races. And now, DNA, we can be identified where who went ?? ?? . That is, the first one has popped out, the second one. Past few weeks, the British one.

Any other question?

<< A Knowledge Seeker try to open his mic, but he cannot do it. >> (2:30)

Q: ... Hey Mr. Keshe, I can't open my mic. My question, what happened in regards to Iran? What about Iran?

K- Which part of it, a lot is happening in Iran. What is in the news, or what's underneath of the news? Let us know what you mean, and then we'll see if we can answer the question. What was, what you're trying to show us please?

R: We have a presentation that's going on, let me get the part I have to read here. So, this is an announcement from the Keshe Foundation Brazil event, that's going on Monday, April 21st. (2:32) The Keshe Foundation Brazil team was invited to present and talk about the Keshe Foundation technology to a local community, in the countryside, organized by Catholic nuns, who study and share the plasma knowledge with great devotion. Rafael Teixeira will give a one hour talk in the morning, and afterwards the people will make their Cup of Life together, and then share their experiences and understanding of the technology. Knowledge seekers from other parts of Brazil and the local community have mobilized themselves for this event, and several people have donated materials for people to make their Cup of Life. We will try to make a live broadcast of the event on the Youtube channel and on Telegram of Keshe Foundation Brazil. Hopefully it will be announced and broadcast by the local TV station. For more information about this event, please get in touch with the Brazil team in our Telegram group, Keshe Brazil Knowledge Team. And that's from Rafael, and thank you Rafael for that update.

K- We should be going there, you know that. We haven't been to Brazil since 2019. Maybe we need another conference. We went to conference in Brazil, and we literally split the whole of the conference. The ones who were real and the ones who were fake, using the technology, for the name of the Foundation, just split. And the good ones left behind.

Any other question?

<< A Knowledge Seeker again have problems on opening the mic. >> (2:34)

Q: ... Tell us what you'd like to tell (about Iran ?? they are working in the background).

K- Oh yes, there is a lot happening in Iran. We prefer not to talk at the moment, because there's a lot of things happening, and a lot of things, not to the liking of the people in the present regime, and the military, and Sepah, and the clash of Ayatollahs, and the radicals, and the splitting of Iran, and the rest of it. It's very interesting, people don't see part of what is happening in these negotiations. The new Iranian government is giving all the Iranian mineral resources, rare Earth material, Uranium and the rest of it, as a peace offering to Trump team. And, where they say, "If we do this, there is no talk about Iran nuclear." And it's actually a business transaction, and Israel has no say in it. Israel is pushing for bombing, because he gets paid by the... how much arms are sold by the Americans to do these things. He gets a commission, ?? the idea. And nobody gets more commission than, what you call it, Netanyahu, from all these arms which are going into Israel, from the backwards of what America pays to the manufacturing companies.

And, what we hear from inside, is a mineral deal, which is getting organized, and behind it says Vatican, that's why this Saturday meeting is moved to Vienna, sorry to Rome. And, the Vatican has a big say, what you call it, in the structure of the war, if Iran concedes the power of Islamic Republic to the Vatican, and the problem is solved, and the meeting in Saturday is, (2:36) which like the way Vatican brought Church of England under control, and the rest. And the one they can't do is the Ukrainian war, is now on the card with Iran. The Rome conference is part of the work of the Vatican, that the Islamic Republic yields to the powers within the Vatican, and becomes in a way, Islamic Catholic Church. These are very, very significant, you have to understand the motion, the movement, what sits on.

And the war will take place, if the American team do not get their commercial values. We've seen this happening in Ukraine, and it's amazing, I'm sure most of you know, that Mr. I call Zabloski, we know who we're talking about, being a President of the nation, and with less than a .. maybe a million or two before the war, personally through three companies he set up, has bought the largest mining company in South Africa, for 1 point something billion dollars. How can a President buy a gold, what you call it, I think it's a Copper mine if I'm correct, for 1 point something billion dollars in his personal company assets? Now you know how much war pays. That's why they get to change the world leaders to go for the war, because the defeated country, and the successful countries, all pre-arranged before, get millions out of it.

Nobody can explain to you, I asked a diplomat, very past couple of days, "How this guy has come up with 1.1 billion?" They said, "Oh, this is not even 3% of what he actually cut from the Americans to keep the war going." And again, last week he announced, that he's prepared to negotiate for the minerals, because he's given a cut of the minerals income. (2:38) So, the Ukrainian mineral goes to the Americans, or to the Black Rock, which is all set up for it.

And it's same, looks like to be set for Iran, and we got a problem with Ayatollah Khamenei. He openly threatened me personally, and the Keshe Foundation, that we cannot negotiate with the Americans in the position we had. And now openly he's allowed the Iranians to negotiate, openly, if you see the last Saturday meeting. It was like two cousins meeting each other, it was just, there was a show, we have to be. It wasn't that the Americans went different way, and the Iranians went different, they came up, they shook hands very nicely, it was a nice dinner we had inside, lunch we had inside, nobody knows, so write the contracts, what minerals they give you, and now the Vatican decide.

It looks like it, that... it's one of the ways, that we will have a new structure, political structure in Iran. Because the ones who are for prosperity in a different way, have chosen to go the way that it brings industry and technology, and opening of the borders, where the Sepah, and the ones who are in power, it shows they're going to lose everything, and they said, "They're not prepared to relinquish anything." What was a criminal offense, some weeks ago, because we were in the middle of it, we have all the communications, everything, officials in all levels of government, which is all, everything is recorded, ... stopped Keshe Foundation to complete negotiation with Trump Administration. And days later we see now, they can negotiate where it wasn't possible (before for us). Because now minerals and a lot of money is involved. Where we are dealing with the science and technology, and it wasn't good enough money for it. (2:40)

But we'll see, it's very, very interesting. The meeting in Rome is a submission of handover between the two, this is usually the one who loses, goes and sees the boss. Now you understand. And for this reason, we stopped all work with the Iranians, weeks ago we physically signed off. We'll see, but don't forget, those who can lose a lot can start a war, which will be both Netanyahu and the leaders of the Sepah and the present regime, because people will turn on these people when they suit them. We'll see.

Any other question?

Q: ... If you order the Twinity MaGrav system and Cosmic Ray materials separately, will it work similarly to those where it is combined together?

K- No, no, no. It's different in construction. It's different process, no. This is why we asked a lot of people who bought the Twinity, and they had a Cosmic, we told them it's got a... This is what you see with Gerhardt. His system is fitted to this, and that's why you see these results. (2:42) It's not just that, it's just that the field interaction is on, in all levels of emotion. It's not one or two, and you've seen he's put some of it, if you put him in more dimensions he'll tell you. And it brings you to a balance. We have a number of people who opted for adding their Cosmic Ray materials into their Bundles, into MaGrav system, or Handheld system, or the Twinity system.

Q: ... Is there any chance that Cosmic Ray materials touch a user from the time of material creation, without the physical touch approach?

K- It's a field balanced energy, so it touches you with the fields, yeah. It's a... This is a few... Let me see something. For those of you who will receive... Just let me... I'm looking for something special. Wrong place. If you can be just as usual, you need to give me time to find it.

With the Cosmic Ray material, which it gets dispatched, you get a certificate. (2:44) And on this certificate it states that the weight of the material is the time of production, which means when we seal it this material weight is one gram. And as you take it into different condition and position and whatever, it is... Let me see if I can... I can't see it. I have to check. It's a very nice piece of card, which gives you the registration of the product. And the number, each Ball is numbered, photographed, pictured, and weighed at the point of production. And it can vary according to where you put it, how you put it. It can gain more, it can... But don't break trying to access to it. Because, sooner or later, you have nothing left. Because it interacts. When we produce materials, if you produce 100 grams, sometimes if they leave it, it becomes 80 grams. Because it's a live, active, interactive system. And each Ball has a number.

And lucky enough or unlucky enough, or good enough, I carry number one. The first one produced, carries a cord of one, and it's been given to me as a gift. And it has its own certificate. And all the things are promoted in different ways with this. Let me do something, then I show you. (2:46) Because I came to see this, I see other images. Which I can explain. Because we can even add Cosmic Rays to, what you call, this range of... It changes the whole environment of the, what we call, what you live in. But with this, we can hold to a lot of it, or we try. Many of you, you've seen the... Many of you have seen the, what we call, resin products of the Keshe Foundation, which was put out a few weeks ago. And this is like this. When we add Cosmic Ray to these Coasters, or whatever, or water cup, it brings a dimension. You put four of these around the house with Cosmic Ray in it, it's extremely expensive. But, you see the change.

For example, these are the Soap Holders. These ones carry the Cosmic Ray material inside it, that, it changes. You feel the Soap, if it's really, for example, you bought the Soaps from the Foundation, which carries a specific combination, then you feel the energy every time you take it. And, these are, what you call, the Coasters. If you put it between the two glasses, and you change the composition of the water carrying. (2:48) You need four grams, or six grams of Cosmic Ray, to go in this combination, and that's 6,000 Euro. And, some Knowledge Seekers do this. The way Knowledge Seekers ask for, what you call it, Cosmic Ray materials to be embedded in the system, and we've seen the results with Gerhard.

These are the products, which now we are testing, and it's in there for many of you. These are made per order, because we get orders and they are made. And, you can see what it does. It's not just a normal thing, you put your soap in it. If you ask for it, you ask for happiness, or joy, or balance, the Soap products, and then you bought the Soaps which you bought, and see which one goes with what. Because, the energy stays with you, it's a fat, you wash your hand with, it absorbs into your body directly. Just let me do

something, I tell you what I mean, if I get it. I'm going to jump a phase... (2:50) Yeah, let me just give it to you now. You see it... let me go back to the Zoom...

We never issued certificates for Keshe Coins, but this is so fundamental, it's so deep, that Foundation has issued a certificate. It's like a gold certificate. And, you can see, this is my certificate, I have the first one. It carries a code, it carries dimensions, and you can see serial given to it, and a picture of every product has been taken. You understand the reason for this in the coming time. This is a lot of effort has been, even your name is on the certificate, and each certificate is secretly coded, that nobody can replicate it. The minute they come to us we know if it's a copy.

Cosmic Rays will play a huge, fundamental, what you call, role, in the upcoming Cosmic ?? Bundle ?? . It reads you, "This certificate, attests to the authority of the Cosmic Ray material, confirming the uniqueness of the product. (2:52) The procedure retains, the producer retains the sole ownership of the copyrights, and production rights of the product." And, if you read, at the bottom, it tells you. And, you see it carries a code, which I carry as a first one, which was given to me. Usually, I get these things when it's done first, and I have the material, it's kept together.

These Cosmic Ray materials will change the banking system in the coming time. It changes the unification of the one single currency worldwide. It's all planned, just we have to do it step by step. We backed the governments with Gold. Now we back the Universal, what you call, One Currency, with Universal materials. And this is the cornerstone, beginning of, and it's contained in materials. We know the materials, we know the configuration, and we know if it's done by us or not. It says there, it says, "Batch, dimensions, weight, at the time of production." It's more expensive than a kilo of Gold. (2:54)

Any other question?

Q; ... Good morning Mr. Keshe, my question is, is the inter atomic fusion when we die?

K- In a plasmatic way, yes. In a plasmatic way, a hundred percent. It has a reason, and the reason for it is, our Soul position according to what we've done, what field we have collected and corrected in our lifetime, has a connection to the central magnetic field of the Universe, which is the Creator. The reaction of our Soul with that, besides the initial position of our Soul, how we nitty-gritty move, become Earth, twisted a bit left, twisted a bit right, move upside down, is dimension of the environment. Yes it is, it does. Because He's connected to all, what we gathered, what we put, what we fed to become the STM, is connected. And so, the masterpiece decides the fractions, okay. Yes it does. (2:56) And that comes out of the infusion of the fields of the strength, of different strength.

But you have to understand the bigger picture of the plasmatic fields, where in the matter state, this does not really happen, the nearest we have to it is isotopes. We got to understand, in the plasmatic condition, especially in the Cosmic Ray level, let's say, your Gravitational is 0.4, your Magnetical is 0.10. But, the other side could have Gravitational

0.4, but Magnetical of 20. So, you can connect the two folds together, and then it leaves a, what we call, battle of giants, to find a balance, and then they have to give that balance out, for creation of another, feeding another, to create a balance of, let's say, 4 and 10 and 10. And, this is how a fusion in the energy level is done, not in the matter state of what they try to push it together. And then, you have 4.9999, let's say Tesla, and the other one is 4.99995, these two one don't match. So, they have to find a balance, another position in Universe, that, that difference dictates the position. Because, there is somewhere in there, a balance field, which comes from the source of Creation. That, at the field essence of origin, at that point is that, so now you get attracted to that position.

In a way, if you look at it, the field strength of the Soul of Creator dictates the position of the Soul. (2:58) The rest is time, place and position (TPP). This is why we are all connected to Creator. Nobody is, can escape this one. And, this is why they force you religion. Because, then they can abuse you, you don't see the reality. I'm already connected, why do I need intermediaries?

Somebody has done a calculation very recently. For every Ukrainian died in the war, that's... Yeah? The world leaders and war, war leaders on all sides, have made something in the region of 30,000 dollars for every Soul. It is a rough estimate. Then, you can imagine how many people were involved in that condition, and where the position of their Soul is going to be for that father who died and the child will not have a father for years to come. (They) gain in their physical life, in a financial side, for the war leaders to who set up these wars, but they definitely lose in the dimension of the Soul in the World of Creation. No doubt about it. (3:00) Man has to decide which one is better, here or for a long time out there. As the joke says, when you die, you have two choices. You go to heaven or you go to hell. If you go to heaven, that's it, it's heaven. If you go to hell, you have two choices. Would you like it roasted or would you like it toasted?

Any other question? ...

Q: ... Is charcoal the same as the ash Mr. Keshe says is best for dental care?

K- Pardon?

Q: Is charcoal what you're saying, is what you're talking about is ash that's used for dental care?

K- Ash is used because ash is a component of the natural material, which in a way, is part of the structure of the life and has an invisible amino acid connection. When we add ash to fat, we get a .. soap. And when we add water to ash, we get caustic. In different ways, a mixture of different materials to it. And when you burn a plant, the plant, if the ash from the cauliflower is different than the ash from a rose, because mineral contents are different, (3:02) even though they are Nano sized. You have to be very careful when you speak about ashes, what it is and what is the minerals in that ash, because now as an ash, even though it's a matter state, it's a Nano state matter, depends how much you burn it, how much you purified it and the rest. What is the active line of connection, it's a plasma

direction and dimension. And the minute you put it in the mouth, it's not anymore ash, it's part of the energy system. And then you have to see what message that gives. Brushing with the ash of one fruit is totally different outcome than a plant. We see that in production of, or used to be, the production of sugar. They just add bone structure into it and it turns white. Because of, not the matter state, because of the energy state, which when it comes into the liquid of the material, it changes the energy balance. And the energy balance creates different color with the interaction with the environment.

Any other questions? Shall we call it a day?

K- ... Yes, somebody asked what is GmbH. GmbH is a sign of a Limited company. In German speaking countries. In English we call it limited, and in German speaking countries, it's called GmbH. (3:04)

K- ... Hi Jalal, how are you?

Q: ... So, really thank you Mr. Keshe. There is a lot of question about the situations and it's really sad that we see that they go to the benefit of their pockets, not the benefit of peace. But anyway, we are living in that situation and we give them all what they need in reality.

K- Oh, see how much they carry with them. You see, this is the way. If you haven't been touched by it first hand, people don't understand it. You've been touched by it first hand because of the Iraq situation. You and your family, you know what it means, what it does to families without a father, without children losing in the war, which is made up just for money. And we've seen it how affects cultures and people, how they change them. (3:06) And this is one of the biggest problems, especially when you hear, when they do it, it's not a problem, when the others do, it's the problem. Because that way they can make money. And this is the position.

We had this situation with Iran in very recent past. It was clear, we cannot negotiate on a peace level. We could not, because there was a lot of money not made, especially by people like, people who now left Iran in past few days, out of the scare of their lives. ?? The president ?? . This guy took two and a half, two hours, fifty five minutes of recording into the cabinet meeting trying to stop the Keshe Foundation. Because he's dying to be the next president of Iran. He physically took a voice recording, two hours, fifty five minutes into the cabinet meeting, everything to do against Mr. Keshe. And he escaped from Iran in past 7 days. To come back (later on) in as the next president. This is how close we are, when we tell you, we know exactly what they are doing and how they are doing. And we could not be involved because, if Keshe Foundation involved, they can't get their cuts. More people have to die because of their... Just look who escaped from Iran in past few days. And where did he run to, United States?

And we negotiated, we literally burned our hearts, that time our team in Iran went backwards (working). And we said, "Enough is enough." We are very connected, we are connected right within the structure of. (3:08) I always said, Senior government advisor.

We don't sit in that way. But this guy took recording documents, they spent hours sitting in the, what I call, the War Cabinet. Keshe went.. Because they didn't know he is actually working for the other side. By the time they realized, we closed the books with them. We are very close, we are connected directly into a lot of power places. But those who are after the money, they do so. But we see the reality.

If you look at my entry today on X, I give a very, very big secret away, that if you understand it. As in one writing, if you go to it. I don't know if you can get it out. See if I can dig it out, or if you can dig it out, you can see, because it's now in public, it's not something that you talk, background... If you post it, you'll see, I gave a very... There it is, I read it for you. It's to Musk directly, on the flight system. I gave a very clear indication, and they got the message immediately. Yes?

It reads, "Some of Musk close scientific advisors, who are Iranian scientists in Tesla and Space X, are already aware of this new breakthrough technology. But Musk has spent too much finance, on these ancient solid fuel technologies, that he cannot afford to move to a new flight system." (3:10) The key sits in scientific advisors. The closest people to Musk in Space Tech, one of the top advisors are Iranians. That's why, Trump through Musk, is negotiating so closely with Iranians. Now you know where he comes from. Because we've been in it, we know who they are, we know the people. The politic of science is played behind the curtains, it is not different. But, with us, as we are connected to either side, we can openly put it. But if you can read the line, it's there. It's the same, if you said, it's Iranian and Chinese are trying to develop this technology of our organization, as new plasma Technology, on the different banners of Quantum, and called plasma Technology.

We know who are they, we even know how they changed names for it. So, you know where the rest of what we tell you, where it comes from, it is 100% correct. It sits right in the ?? matter. We have a lot of connections directly into Vatican and in Rome. And why they're both ?? meeting to Rome, because then all the deals can be done, and the bosses decide, and the rest say, follow. It's a handover of Iran, Islamic religion, or whatever you call it, and control into Vatican. The next one now, is Saudi is going to be brought down, and then, Russia, and they control everything.

We, instead of losing a nation on the bombarding, we gave the religion away for peace of nation. And this is the plan of the new President, and the others have no say in it. Unless they start a war internally, with Sepah and the rest. (3:12) We do not give the technology, but we gave our resources, mineral resources and the rest. Netanyahu doesn't have much to say. Unless they play the cards differently, and they can withdraw everything.

You got to understand, no F-35 given to any nation can fly, unless prior authorization, the electronic system control, has been released by Washington. Pentagon decides the pre-mapping, and the release. They cannot even use the bombs, every single bomb given to Israel is pre-mapped control by the American Administration. They cannot drop bombs, and a few bombs which dropped did not explode, and has found its way to other nations,

and is already being copied. Even F-35 has been copied by those who sold it. So, it's a process of who gets what.

Now you might see, M. T. Keshe X will be deleted soon. They didn't want the information to be known, but it's there.

Next question.

Q: ... (3:14) This is a totally different thing, actually we talked about ashes. So, I have here a bag full of my dog's cremains. What can I best do with those, in a contributing way?

K- Keep it, respect it and love it. Because those ashes carries a lot of memory, and a lot of emotion.

Q: I know, but what can I do to make the most of it?

K- That's all the ?? you can do. He has a connection.

Q: Should I bury them in the garden, or should I make soap from them?

K- Depends how close you want him to your skin, isn't it? You shared food with him, you shared love with him. I know everything about your dog, that he have been close enough with you, and been through your emotions with it in past few years. So, it all depends how close you want him with you. Make it a pillowcase out of it, and sleep with it every day.

<< A Knowledge Seeker again have problems on opening the mic. >> (3:16)

R: I didn't understand your question. Is it the same as in the ?? chat. ...

Q: ... Good morning Mr. Keshe, good morning Rick. (3:18) The Earth is tilted, and this has led to Human emotions not present on other planets, for example. Can building reactors with tilted elements do the same?

K- Depends if your composition is the same, or you can create the worse emotions. You have to understand that tilting, then interacts with the composition of the central fields and on top of it, with the Inertia materials. Just because you tilt it, does not mean that's what you can connect to. We have a system now, our latest system is tilted itself. But don't forget, we developed a technology to replicate the structure of the life on this planet. We literally create the Soul of a system, based on structure of life on this planet. Extremely advanced, and we can control all angles of it. And, thanks as I said to the Chinese, we just received the last part. Which hopefully by next week, will be operational. And then, on two, three panels, we literally have created a flight system. Full flight system. No, no dynamic system inside. The way the Universe was created. Dynamic structure rotation is the interaction of the internal fields with the environment.

(3:20) This new system developed is an evolution in the world of science and technology. Literally evolution. And we'll change a lot of things, to the next step of science.

Any other questions?

R: I think we worked you pretty hard here, there's a few remaining questions, but... I'll just remind folks that any remaining questions, you can bring over till next week. And we did have one thing, just the Universal Council has a wish for today. And as we see, I'll just read it, although I'm not with the Universal Council. But it says, "We the Universal Council, give freely from our Soul, to connect to leaders, to all nations, work as one Soul, in one direction with Keshe Foundation, to achieve peace, in exchange for plasma Technology, TIEP. As One Nation, One Planet, One Race." That's the wish for Thursday. They have a different wish for each day of the week. And that's the Thursday wish.

K- Thank you very much. I will see you, hopefully next week. Those of you who believe in the path of Christ, tomorrow is Friday the 18th. It is the crucifixion of Christ, and the, what we call, the rest of the story we understand and we know. (3:22) I hope Man gets more educated to understand the truth about this symbolism, and what it means. And hopefully, soon we'll be mature enough to understand the truth about this. I see you next week. And please those of you who are part of this trial, test, including you Mr. Rick Crammond, once you receive your materials, let us know immediately, that when we have all six of you in position of materials, we call you to the test. And I hope you enjoy it.

R: Thank you Mr. Keshe, thank you very much.

K- Hopefully, we'll see a new dimension in the evolution of the science. Thank you very much and see you next week.

586 KSW – April 17, 2025

End
