

587th Knowledge Seekers Workshop April 24, 2025

(Transcription, Editing and Proofing done by KF Brazil)

(Auto transcription by Elias)

Understand fields of body; Elements manifest matter; Plasma by field strength - take any shape; M fields measured by accumulation; Each plasma connected to everything in U - Creator common denominator; Transmute to exact position - like in dream - Soul reality; Once field established remain forever; Monday Flight with 7 - test control - become captains; May 2 test 35 go with captain; Control M fields yourself; Never understood M fields - don't just go South to North - interact inside Earth create rotation - rotate electron; M field map wrong; M field positioning difference between in and out; G in gap between M; Every M has Twin G - gap between field strength; SF uses overall strength of 3 base reactors; Strength variation creates different objects; Need to measure M field strength for transmutation; Produce any elements any time - place in U; May 10th KF show material production from fields to world; Rewrite Periodic Table; KF produced unknown material in lab - near flight system; Dead fly couldn't adapt new conditions; Biologists wrong - unknown animals from Space - no history; 20 years ago produced in lab; Lot of secrets - Man not ready; Man's Ego - deny truth; Hit on head with new knowledge; Like rings of Saturn - from fields; If new stone hits brain - change energy; Fields grow in Space; Potential Energy same in plasma - difference between forward & backwards flow - M field strength; Measure strength to travel; Communicate Aliens with Soul; Emotion - strength between 2 flows - every creature has same; M one way - G opposite - all we need to know; 1G need also M - problem in science & NASA; M pushed to destination; Ride M field to Zeus; System adjust M & G fields - create G inside - no rotating balls; Change Ca to Fe; Dictate what new system produces - meter shows gases; Produces while flying; Replicates what Earth does; Position self in respect to Creator; KF is scientific not fallacies; Consider all possible effects to create materials; Become creator and controller of life; Create AA of Soul; Not like religious crooks; Build robots alive & peaceful; Have knowledge to make AA dynamic - give it intelligence & emotion - power itself; Part of Microchips with emotion; Need half million in financing; Machine convert H to CO₂, HF - produce any nuclear material Plutonium, Uranium; Remember emotional strength of things - create GM field strength of potato; Measure field of happiness; Measure cell's energy - instead of blood tests; Tell if lump becomes cancer; G becomes Black Hole; Metastasized means more Black Holes; Not use T to take cancer away - first ask if Soul wants to live; Jon Bliven - offered to remove cancer - not lack of T; Knowledge so deep - frightened to explain to KS; Create life as condition of environment - not as children; Ethical responsibility of humanity; Release knowledge - or hold back - suffer longer; Pregnant through field - virgin birth - man become pregnant; Made decision to release T; Heads of States decide; End killing - delete field from AA; Soul is like Sun; Interacting with emotions; Scientists have to understand it; World leadership & economy will change; We say goodbye - Daughter of Mitra will take you further - soon; Show production of materials May 10 - Broadcast - social media; Transmute yourself with materials; Can see Creator; Don't panic - bring uncertainty in flight; Test captain then fly with; Young people for KF social media project; KF Commercial side; Systems have emotions; By field strength of Deuterium; Squeeze fields; Transmuting feel more mature see bigger picture; Leave Earth as Masters of Soul and destiny; Electric & fuel

cars done; 50 years for Man to mature; Create short term problems; Trump tariff war on China - release plasma T; Opportunity in Africa, Monks chanting - sacred sites - emotion at certain strength; Nano coating & Gans - lot of tricks; Need funding stay independent - commitment to KS - not funding

ENGLISH TRANSCRIPTION

(:13)

K- Thank you very much. Good morning, good day to you as usual. Wherever and whenever you listen to this series of Knowledge Seekers from Keshe Foundation Spaceship Institute. We welcome you back as usual and as usual give you more headache for you to solve. (:14)

The headache of today is that if you had the head to have a headache. In the process of the teaching, over past decades, we try to bring a lot of parallels, a lot of understanding that one not only becomes aware of the potential within himself or within oneself. One becomes aware of how to reach this. How to be able to expand the knowledge of the fields of the body of the Man. We know everything, how to use our fingers and toes and leg and heart and ears and eyes and do everything else with it. But now we have to understand the classification, magnetic (M) field strength, of which part connects to what and how we can use this as part of the structure of the work that we become part of the structure of the energy side of the Universe. The biggest problem for Mankind has been that they look at the state of the physicality (P) of the Man at the end state, where actually we are part of the structure of the 'going through,' as we said many times before.

Now we have to realize, we have to come to the point of understanding that putting matter together, having the matters together, does not make the use of the matter till we shape it, till we give it the dimension (D) and direction. We have Iron, we have Copper, we have Zinc. They are individual elements and we can really pack them together. But when we mix them together as alloys and we melt them, and or we bring them in a condition of whatever, (:16) then we put them in a shape, we put them in a box, we make a material out of them. Then the purpose of the material is evident. We say there is so much Copper (Cu) in it, so much Zinc in it, so much Iron in it and the rest of it. But in the world of the Energy side, we have to say, this strength gives Copper. This strength of field gives Zinc (Zn). This strength gives the Iron. In the matter state we speak about tangibility, observation point of view. In the dimension of the energy of the Universe (U) we speak about Magnetic field strength. And, but, due to, in any shape or form you put it, Magnetic field strength again has accumulation, again has packages. But, in fact, it has the Totality.

A plasma of an Electron, a plasma of a Proton, a plasma of a Neutron, a plasma of the Fundamental Element has the same field strength spectrum as is in the other. It's the volume, the speed of, the connection of. And, so, what this means, an Electron has a Magnetic field strength, which connects to Proton, and has a Magnetic field which connects it to Neutron. And then, a spectrum of the fields it has, it connects it to the next

element, to the next Electron, (:18) to the next alloy, to the next position in the Universe. What this means? This means, in a way, that an Electron of the Atom of a Hydrogen (H) has the same connection as the Soul of the Man (STM). The same number of fields. No less, no more. It's the choice of which strength connects with what, gives the manifestation of the appearance, manifestation of confirmation of connection, and the rest of it.

This is important, because when it comes for our transmutation from A to B, every position, every stone, every entity on the surface of the planet, or position in the Universe, has a strength, which our Soul, which our system already has a connection with. This is not theoretical. This is how we are all connected to each other. The common denominator field strength, which connects everything is the line of the strength of the Creator. Which we all have a connection to, because it's the way we came, that's our direction of the process of the division or whatever. But, every sand on the desert of this planet has a specific Magnetic field that every Soul on this planet has a connection to. Magnetic field, plasma, GPS positioning and recognition. (:20) If Man understand this, if Man goes to the next step of understanding the whole process, then in the mosaic of the field strength of the Universe, we can decide exact position, exact place, not by 5 meters out the way the GPS's are today, to this exact point and a spot we can travel to.

We do it, in our dream, you call it, with our mother and father, which passed decades ago. In this vast Universe we know where they are. Because, we have a dream about the mom, because you cannot dream, if it wasn't a reality a connection of the Soul. She tells you, "Would you like a cup of coffee? I made you the food you need, or you like, and don't talk to your wife, talk to your husband and whatever else." She's aware of all your behavior, she's aware of all your problems, she's aware of all, everything which is happening in your life. Because, when you connect to that Magnetic field you connect to full spectrum of all. Every single cell, every connection which my cell made in the past 24 hours, when I dreamt the mom the day before, she comes again and says, "You went to that place, it wasn't good." "Mom, how do you know you died 20 years ago, how do you know what I did yesterday?" Because, that Magnetic field is connected, has a specific strength, has a specific direction and dimension, has a specific field strength, (:22) which once it's established is never destroyed, it never has, what you call, misplaced.

Then, those of you who are hypocrites, they say, "Oh, so I have connection to every Soul and sand on the Moon." Yes you do. In the coming days, next, maybe 24 hours, maybe by Monday, we will run a session with a number of you. And, we have set up that parameter in the materials you have received. Because, the next lot of you, you're going to hit it, on the 2nd of May. And, we use the 7 of you to put together the right direction. In the right process, in the right manner. In understanding this then the mystery of, "How do I know where, what it is?" It is solved. Your problem is, "How do I know the Magnetic field of the sand on the surface of the Moon?" Because, we all came from the same division, we came from the same position. We all have connection.

In the session which will run in the next few days, we dictate a lot. We want to know, how much we can control, the whole structure from our end, and how you find us, it is a hide and seek game. (:24) The beauty of it is, will be interested to see if we can pull you by the leg, or we can take you by the head. Do you feel landed, or do you think you flew? Now the technology (T) is at that level, that we don't talk, we can control. We have all the parameters in our hand to play a game with you. For you to understand that the field strength, you work Magnetical through your head, you play Gravitational through your leg. Then it comes, how do we recognize? As we said last time, every entity has a Magnetical and Gravitational, has in each other part of it. This is what the world of science has never taught us, the world of science has never managed, because they never understood.

Their biggest question in the world of the science of today, most of the scientists in the world of what I call, gibberish science man has made for himself. They have, they cannot, they do not, they do not want to understand a simple proposition. And what is this proposition? What does it actually brings us? And the reality is, as we have said many times before, that the structure of the life on this planet has a process. And as this is the plasma, as you call it a Magnetical, (:26) where we didn't know, it comes from the south end, and all your Knowledge Seekers (KS) know, it finds its way, it's the same line. And if it gets, field strength of the plasma of the Hydrogen, which is in the center of it, it gets some more energies added to it. Then it comes out stronger than it went in.

But, the most horrible part, which we never been told, is this. It's not all going north out, it's going stronger, coming south in. And where this mix up takes place, in field strength, creates the rotation of the electron, rotation of the proton, rotation of planet, rotation of the galaxies. It's the field strength, which we have always ignored this part. Due to our education, due to what they have taught us in the world of the science of today. We look at a map, we look at the Magnetic field, everything goes like this. No it doesn't, because in fact, it's the other way too, which is coming in too. You come in, as much as you go out. The difference between the two, creates a Magnetic field positioning of interaction of the Totality of the element, in dimension of Universal position. This is how your Magnetical Gravitational positioning decided. (:28) Not by the field just coming and going and interacting, the field strength, the gap between the Magnetic fields, which we see, we are shown, we see by iron dust when we use a magnet, that gap is where it's going out, and that gap is where it's coming out, and in, depending on the position and the place. And the beauty of it is, that every single one of these is connected to something somewhere.

This knowledge of the Magnetic field, when even we look at a Magnetic field in the dimension of the space, time and position, we have to always consider. (Let me put this in a way that, you don't get confused). Every Magnetic field traveling the span of the Universe, has, possesses, a Twin system of Gravitational to it in respect to the position. The space gap position is the space gap position between the two entities. If, the balance between the two is calculated in a direct line you will know what the space gap is. You can predetermine. And then, in the totality of the knowledge, in the future, when Man becomes wise to more knowledge of the Space of the plasma, working of the plasma,

Man will find something very interesting. And that is... (:30) (I have to correct my mistake). And that is, that, (this one), that, now, the space gap, between the average of this one and this one, dictates the position in respect to each other, and position, that it moves one in respect to another. This knowledge, of understanding each Magnetic field has equal and opposite Magnetic field, Gravitational to it, then, will take Man to the next step of the knowledge of the Universe.

You know this as Knowledge Seekers very well, you've seen it, you have played with it, maybe you never understood it, when we played the Star Formation (SF). The Magnetic Gravitational field gap, between these, is irrelevant. Because, in totality, how they interact with each other decide the position of the controlling field. And, in the interaction of these with themselves dictates the position, dimension of the whole entity as a whole. We call these, singularity of, we call this, the Mass of, we call this, the Weight of. And, once we understand this, once we understand the process of the interaction of the fields, in Gravitational and Magnetical of the same field strength, (:32) Man will open a new chapter in the world of science and technology of the Creation.

In a way, you put a female and a male together, what do you get? A middle range, a child. This child now has a new strength of its own, a new dimension of its own. You have to find the Soul of it, you have to find the field strength of the common denominator between the two. But, somewhere down the line, this line and this line, both connect to the Creator. Creator of the structure, it could be a body of the Man, it could be a body of the Galaxy, it could be a body of the Universe, it could be a body of the Unicos. This is, in the world of chemistry, you call it isotopes. In the world of energy, we call it, field strength difference. If the Magnetical and the Gravitational field strength varies slightly, now you have a different position, slightly. These two, in their interaction with what they create, in balance, in origin of the line, the middle line, will decide itself, if I'm going with this strength, or if I'm going with this strength. And then, the interaction of the field between these decisions, in interact with this, and decides which way the two will go with each other, with the matter object we create. (:34)

If you can replicate this, understand this, just don't ever look at the Magnetic field, look at this Gravitational (G) field, at the same time find the strength of it, then Man has entered, as I said, into the real world of the position, dimension, field strength, transportation, transmutation, anything he likes. This has one advantage, if Man understands the process of the addition of the field strength, somewhere in between, can interact, create a field, which can add to this, or take from this, which can change the direction of the motion of itself. And now, this new entity, is a parallel of this, and a parallel of this, and in how it decides to go, is with another entity, which leaves next door with the same dilemma. Space Technology of today, does not have no limitation on matter structure, because it's you who decides, what Gravitational Magnetic field is between the two, and then, let's decide, what Matter is created in interaction with the fields of its environment.

Up to now, we said, this is the table of the chemistry of the materials, and that's it. (:36) There are other materials, we call it, fancy materials, there are other materials, we call them, rare Earth materials, there are other materials, which we might produce one day. If

you understand this principle, you can produce it any day. You don't need to go in the depth of the Universe to find a new material, because, you understood the process of the creation, you understand the process of field of Magnetical and Gravitational interaction with each other, you can create any matter. This is how we have created structure of materials.

We are trying to, 10th, 11th and 12th of May, to show the showcase of Keshe Foundation internationally, worldwide, in an open demonstration for the world to see. One of the structures of this is production of the elements of the Universe, even we do not know exist. All of you can come and see it. Travel the span of the planet, and see for the first time, the knowledge will be confronted, put right across the whole of the planet to see. Change in the World of science and technology, Cosmic Rays (CR), understanding of the new technology, which allows us to create materials, which we could not imagine even exist. We have to rewrite the tables, because this material, we don't know what it is, we have to find its value.

In the past few days in the laboratories of the Keshe Foundation we have developed a material. (:38) We, ourselves, puzzled, wondered, what this material is. And we are producing it, in mass. We are creating it in mass. It's very easy because, now we have to find magnetic field strength of this material. No, it's unknown material to us. We have to find, its gravitational magnetic field. And, is growing like mushroom. Does any of you know, what this is? Because, we have developed a new material. And, look, it's falling off the sky. What is this material? Do we have the knowledge? Do we know what it is? Is it a chalk? Is it candy? Is it, Nano of a material manifested itself in this condition? And, as you can see, on our tables, it's a lot of it. But, the funny thing is, this thing is created near the latest flight system, which is developed by the Keshe Foundation. (:40) Our system, creates specific gravitational magnetic fields with the interaction of the plasma of the planet, creates a new material.

I know what it is, because there are certain characteristics, as we know, you see the dust on the table, there's a little fly there, on the table, you can see everything else. And, you can see the size in comparison. Has the gravitational field of the system has led to the demise of this animal. To what extent the system is creating its dimension? We don't have chemistry labs in the Universe, but we have understanding of the magnetic field of the Universe, which we can make in chemistry. It is understanding the Science of Creation, not by imagination, but by reality of understanding the Totality of it.

Is this the future of the Man entering an atmosphere? Dying because he doesn't understand? He did not comprehend, he did not create the fields of, or like the other animals we have in our oceans and our environment, adapt, become, we have. And, what do we say to them? The most funniest thing that the biologists tell us, "This animal is from ancient time." (:42) No, this animal doesn't belong to this planet, that's why you call it ancient time, because you never understood. This animal has adapted itself to life on this planet. That's why you cannot find the background to it. It has jumped in, it's managed to find magnetic fields of the planet, the environment of this planet, that can connect to its Soul, that the Soul allows the physicality to live in the shape and the form

of a matter state in the plasma condition of the entity of this life. Aliens are not just those who land here in the aircrafts or in a UFO, aliens work by field strength, passing through as a body of the entity of life, on this planet, become a stone.

This is what Man has to understand. This is what should not be the future of Man in Space (that he land somewhere as a stone). What is and how is and to what extent do we understand the Knowledge of Creation depends on how we understand the interaction of the fields of the Universe. Why this matter is taking shape? It didn't fall off the sky (in) this shape. It started like one of these dusts. And like in a womb of the mother has managed to gather enough that it's made this shape.

When I made these materials for the first time, nearly two decades ago, I wondered, how do I respect them? (:44) I didn't throw them out, they're still carried in a box, somewhere in our laboratories. Alive, twenty years old sitting in the box. One of the first things we did, when we set up the new flight system, we put papers around. What are we creating? When you look at the new flight system, set up for flight, which will be shown sooner or later, it's my habit, I can't hold secrets, in a way, keep a lot of things out of it, but I keep a lot of secrets from it, because Man is not ready for it. We have developed a technology. We have developed a technology, which means a ?? system, which can create food, energy, gas, motion, emotion, water and everything else. We have created the planet Earth. When you sit in the panel, in front of the panel, you see the weight of it, you see the gases it produces, you see the energy, voltage, you see everything, the magnetic field strength, it shakes, we know. But Man is not ready for such a system, unless we hit the Man with the head with, to be seen, to understand, to be taken further.

This is the future of Man in Space. And only thing which will stop Man to become 'Passenger of Universe' is his own ego, his own lack of understanding, and denying the truth about his own creation. The most beautiful thing for me, if you understand it, is this shape. (:46) How you see different sizes appear, different shapes appear, and how this will look in the orbit of the element. Understanding the totality of the process, understanding of what you create in what direction, if you understand this process, if you understand this creation of material in this shape, and we create an environmental condition, then you see how the rings of Saturn are created, how meteorites and asteroids are created in the environment of the body of the planet. We call them asteroids, we call them meteorites, what about the ones which travel between the galaxies, what about those which become matter state between the Universes? We call them Universe-oid or Cosmos-oid?

At the end we have to understand what they are, because this little, one of these little things, enters with energy inside your brain, you're done. You go from cat to a mouse, because the energy of the inside has changed. Dynamic structure of the magnetic field, dynamic structure of the interaction of the magnetic field, dynamic structure of the outcome of their interactions it always leads to creation of new material, new dimensions. (:48) It's you who have to understand, it's you who have, who has to go into the depth of understanding which field in my body, in my Soul, in the strength of plasma, the field of me, will connect with which one of these stones, and which one of these materials can I

create. And when I create, would one of these stones will move? What is my position with this?

And with the new system we have it's not pre-set anymore. We set what we want, the way we want, how we want, and as an independent energy source we dictate the gravitational fields and magnetical fields in any dimension, as a field or a ray. Which means, if we tune to magnetic field of a ray, which is connected to us, you go wherever we go, we are the caravan like the camels, one connected to the other. We're going to test this theory the following week on the 2nd of May, because the 6, 7 people, which are in this group, become the herdsmen for the others in the group, which is much bigger. And the 7 have to decide where they are going, who wants to be with them, we create the captains of the travel, and then we become the head of the herds, of the STM, in which direction. One of the 7 says, "I want to go to Mars", the other 7, "I'm going to take your family to show you my mother". (:50) The other one says, "I'm taking you to planet Zeus". And you all, in the 2nd of May, have to sign for it. You are going to Zeus, who's going to see the grandmother, and who's going to somewhere else.

We start establishing the structure of the captains, of what we call, transmutation system of the future. This is why we cancelled last week's test. Because instead of putting you in and then doing it again, we have opportunity, we saw what was missing in the structure, now, you give your Soul, you give your energy to your captain. It's his responsibility to take you across. So, the first 7, what we call, captains of the future Space Technology, is already decided. Your Soul brought you, we didn't. We allocated one, Rick Crammond, the rest have been there, and it was his Soul, nominated itself, we just explained the work.

The future of the Man, the only path of the survival of Man in Space is, if the Man understands the working of the magnetic gravitational field of the Universe, matter state, plasma state, energy state, does not matter what state. How do the fields ?? grow in the Space? Man knows one, but ignores the other. Because, to understand it in the energy, doesn't exist. To understand in the matter state, I can explain to you as much as I can. (:52) In the world of the matter state, we have come up with very good ideas, with good solutions for a lot of things, but we cannot... When it comes to the point of, what we call, energy, plasma, we are lost. Our scientists are as good as a bunch of camels sticking one on the back of the other. What does this mean?

In the world of energy, in the world of today's science of the Man, we have created a word, the ?? dynamics area. We call this, Potential Energy (PE). Then, we've become very clever, we call the speed of whatever goes from here to here (between the PE), the current of. And, here we call it a speed in the river for the water, and we are very clever. In electronic, we call it current. But it's the same thing, flow of. In the world of Man, we call it this, the height level, potential difference. And in a material of the energy, we call it voltage. Now, we have a new game in town. (:54) One goes that way (flows forwards), one goes this way (backwards). In the world of electronics, or electrons, we call this, the Eddy Current. In a way, this is Magnetical, the current we call it ampere. This is Gravitational, we call it Eddy Current, and anything else you want to call it.

So, if you understood this, the gap between the Magnetical and Gravitational connection of the field will give you the field strength difference, the potential of the Magnetic field. And, the speed of the field will give you its current. So, we can in a way, dictate and understand the power of the plasma, by one of the elements, in one side, and the power of the elements on the other side, and the difference gives us the destination point of field strength, of power of the Magnetic field, Gravitational field we have in hand (?? The difference is between the forward and backward flows, equals the M field strength).

There is no difference in the world of science. If it happens in the matter energy side, it happens in the energy matter side too. And, once we understand this, once man completes this cycle, on the energy side, man has conquered half of the way to travel the span of the Universe, instantaneous. (:56) Access the energy of the knowledge of the Universe, instantaneously. There is no language classes in the Universe. When I was little, we used to go to English classes. Ten years I went to English classes. I learned Farsi, English in a Farsi accent, and when I landed, the first thing, first year, first day in the classroom, in Barnard College in London, the guy went, "Blah, blah, blah, blah, blah, blah, blah." What happened to ten years I studied? He was, "Blah, blah, blah, blah, blah, blah." Black boy next to me says, he says, "What's your name, your name?" I never heard that accent, I didn't know he's from Londoner with a Cockney accent. Then imagine, what happened, who's going to translate for you with all the creatures of the Universe you come across. There are no languages in school of the Universe. There is no language school, nowhere in the Universe, as there is no churches and no temples.

If you understand the field strength, you gather the knowledge of, understanding of, and then you understand, this is the field strength between these two, and the current flow is emotion of happiness. I have it, he has it, every creature in the Universe has the same. We have to extend our knowledge, understanding of, instead of putting all this hullabaloo, in the hand of the Man, with Earth and all the Magnetic fields of it going and making it, or whatever, understand one of them, only. (:58) That's all you need to know. These two, one goes in, and which one comes out. These two are the source of knowledge. These are the source of the Totality of knowledge a Man needs, because once you understood this one you understand the rest.

How long we have this? Why we head to this way with our knowledge, is because we never, as always many times, connected the atmosphere of this planet to the Gravitational field of this planet. We always measure Gravity, but what about the repulsion? Because the balance between these two decides I stay attached to this planet. If our scientists understand that when you say gravity is 1G, Magnetical is ?? what G? This is the dilemma you have, this is the dilemma why Man's science has a big problem, makes rockets, makes Mr. what you call it, NASA and the rest, in a game of propulsion and bending it like the Chinese do and done for centuries. Because we just want to overcome the gravity. You don't need to worry about the gravity, find out what's the Magnetic of it, it pushes you away, it brings you to the destination. (1:00) And find out this Magnetic field you get on, does it go to the Moon strength, or is the one which goes to the planet Zeus? That's it, you're on the wind of the field of the Universe. You don't need to burn anything, because this field is going, I just jump on it.

We have created a system in our lab, this is what you saw this material (photo of the material they just showed), which works with this (new system). We can adjust the Magnetical to Gravitation. Where the Magnetical goes this way and we create a Gravitation within the other way. There is no rotating material in it. And if I want to jump from Calcium to let's say Iron, I know what to add to this center field, we divide the system that interfere with this and makes it to Copper. When we show you the system, when, luckily, I don't know if, when we're going to show you the system. You will see one machine with different element, Nitrogen, whatever, whatever, whatever. On our control panel of our system we dictate what we produce. So now we got to the position that we dictate what materials, what gases, whatever we want to produce. I'm short of Oxygen in the system, passengers from the Earth are going to die, (1:02) I just adjust the system, Oxygen is increased.

We mastered the dimension of production of rare Earth materials, which you ?? lot get. Now we mastered the structure of the gaseous. When you see the panel, you'll understand exactly what I... Those of you who came to London, when in the Ambassadors meeting you saw on the top of the panel there were scales of change of weight. Now we do the same thing, the same system, with change in the dimension we can decide to lift, to land. The system while it's leading or landing or going, it produces materials we need. You've seen the other material I showed you, the white one, somebody wrote, this is a chalk, if this is a chalk, you'll 'choke' on it, because you haven't understood yet.

The advancement in technology is, that we have reached a position, that one system can do exactly what planet Earth does. Even position itself in respect to the Creator. Now you understand how scientific we are. We are not, what we call, bunch of fallacies and promises. We are scientific, we are structured scientific, we work scientific, and the knowledge of the man, under the banner of the Keshe Foundation, under the banner of the research and development of the understanding the work of the Universe has reached a position that can produce the materials of the Universe at the will. (1:04) And we know, we can, how we can bring this possible, how the technology has developed to the extent that we do not need to jump into something else. We just need to understand the position of, the understanding of, what we create, how we create, the way we create, and what we want to create. This is the understanding of the work of the Universe. This is understanding how systems are set to produce, what they want to produce, what we want to produce, the way we want to produce, and in the dimension, and the direction we want to produce.

In the process of understanding the work of the plasma of the fields, you decide by the strength of your own dimension, what to produce, how to produce. It's not anymore, this and that. We can, we have within the structure of the knowledge and technology understanding of how to create these things. It hasn't been easy, and never fell off the sky. We had to understand every step of it. We had to understand how to process it. We had to understand, what I'm producing this gas, what I'm producing in this material, why I'm in that position, what's going to happen with me. There we are, now you can see. 35 of ?? 4, 18 of ?? 4, 25. (1:06) We produced this gas, Oxygen and the CO₂. We flip, you can see,

556, 665. And then we can control the Nitrogen, the Hydrogen, the Helium, the CO₂, and everything else, which is under another pages of this control.

Then, if you are clever, you realize one thing from this. We have the Oxygen, we have the Hydrogen. You see, CO₂ and CO, we can produce Carbon in our system. And, something very funny, the only thing that is left, is to get the bottom (?? NH₃). On the second page of the system you can see the other parts of this system, which, I show you now, is very simple. I'm going to go out and add to it and come back, and then you understand how advanced we are. This is the one screen, because we can't fit in all the materials in, we have the second screen. They are from two different, but reads, Nitrogen 81. You have the Nitrogen, you have the Oxygen, you have the Hydrogen, and you have a Carbon. (1:08) We have the knowledge to create protein, we have the knowledge to create life.

On this planet, on the condition of this planet, we have become the creator of, controller of creating life. Do you want me to create the Amino Acid of your liver, or your Soul? Scientifically, we are not rabbis, bunch of crooks, and one of them died last Sunday, called the Pope. Understanding this, understanding the control, and by adjusting our system we can produce anything we like. So, because we understood that fundamental position of Gravitational and Magnetical, we can create that. We can create Amino Acid of any element, any life, anywhere in the Universe, because we control it within. Now technology has become a creator. We build robots, now we can build lives, which are not to be robots, but lives which live a peaceful life. Add water to it, which is not very difficult, you have a Hydrogen, you have a O₂, God help you with the rest of it.

We can make that Amino Acid dynamic. Add few little bits, which I know how to add, give it intelligence, give it emotion. (1:10) Who needs to make robots? We can preset to produce a material with emotion, with energy, with creation of power itself, that becomes part of the new Chips, which have emotion. In next few years, Microchips will not be Silicon Valley, will be empty, because those who understand how this work, those who understand how to transfer this technology, into matter state of it, you create a brain, the Soul of the system, which matches every other matter. And this is the future of the technology, this is the future of the science, which we have set up.

This is why, last week, and the week before, I told you, we need half a million, these equipments are not cheap, these things are not set, and there are one or two companies in the world who can give us more, even with this we have a problem. Research and development needs solid financing, needs solid understanding to finance the right way. Very soon, we play this, you will see the machine, and we adjust it, we see the Hydrogen goes becomes CO₂, and then we change it, becomes HF, if any of you knows what HF is, then you understand we have access to production of any Plutonium, Uranium, Nuclear material in the World. (1:12)

This is the material in your cooling system, in your fridges. Now you have to understand why we need to understand precisely what gives us what, to what emotion strength is, that it becomes pattern of our life, it becomes like the way you remember something. If I

need potato, I have to get up, go in the kitchen, in a drawer, there is a package of potatoes in it. Your memory will remember exactly what field strength, Gravitational Magnetical is of the potato, you don't need to move, you just connect and it comes. The physical walk, it changes with connection of talks and energy.

Now you understand how advanced the technology is, and how we invest to bring Man to that point. In London, we showed you how it moves. In Sanya, we showed how we create a connection of, you set different machines, now you see how we can support it. We can support the physical life, and we can support the energy life, which is the STM. Because we have the equipment of it, we understand it. And if any of you say, "How do you measure the field strength of whatever?" Those of you who were with us in the Desenzano, we measured 129 Tesla, we still have those machines which we invested thousands for it, made nearly a year for it to be manufactured. (1:14) So, we can measure the field of strength of your Soul, we can measure the field of happiness, we can measure the field of joy, giving and taking. This is how when I sat the guy in front of me in Desenzano, I said, "He's here to kill me", and at the end he end up the guy who was poisoning me. Plus my ex-wife having a hand in all of it. Belgians.

This is what the technology is. No mystery. Understanding every position and possession of it. Understanding, if you look at the other one, which I showed you, look at this one, it says 556. If I go out and come back in, and you noticed the other picture, 556 on this one, 655 on this one. What does this give us? What new creature? What Magnetic field strength? This is where the future of the science sits. Not just seeing the numbers. What does number mean? Which connection to where, to which planet, to which Soul, to which cell of my body? Nowadays we take a blood, you have a Calcium there extra, you have a Zinc, your Iron is good. We have to produce systems which measures the energies of the cells of the body of the Man. And that energy tells us why a lump is created, somewhere you call it a cancer there, because energy is not correct, (1:16) or happen to be too Gravitational, it creates the Black Hole, it pulls everything in, it's becoming a new star. That star created, needs energy, so it gets grow, it takes energy from you. No Man has ever died on this planet of cancer. Man dies of lack of energy, because that guy is taking Black Hole all the energy. And then it's spreading more Black Holes around the body, because it's cancer, it's metastasized, because we never understood.

With this technology, with this system, we measure that metastasization. You ask the Man, "Do you want to live?" or "Do you want to die?" He decides. I gave that chance to Jon, many times. It's your decision, not mine. His desire to go was bigger than to stay. It wasn't that technology wasn't there, it was at his disposal. The decision was decision of the Soul. I sat him in front of me, in Linz. I said to him, "Jon, I can interfere with every part of your body, but it's not my right, you decide." We can control emotion. (1:18) We can control production of materials, isotopes, Universes. At the end, it's decision of the Soul, which decide to accept or to reject.

The knowledge is so deep, and it's reaching deeper and deeper as our scientists understand more and more, that sometimes I'm frightened even to explain to you Knowledge Seekers, at the World of Science, what can be done. ?? the man "How much

money can I make, I become very rich?" We have reached a state of knowledge, that we can create creatures. We can create conditions, that creates itself a dimension of life. What are we going to do? We were happy to make robots, we were happy to make a dog robot, a cat robot, a waiter robot. Now we're reaching the point of, we can create life, not as children, but condition of environment.

What is ethical responsibility of the Man. Do we release this knowledge, or do we hold it back? Do we go to the stage that hopefully Man will come to understand the reality about the Creation, (1:20) or do we stop Man to get there, because Man is not ready, and then in time goes, Mr. Keshe died, the knowledge was shelved, and another abuse for centuries to come. Do we? Can we? Have we got a right to withhold the knowledge? Or, is our responsibility to make knowledge available, that no one is left behind? And, the decision is ours. Because, you have seen the gas, you have seen the waters many of you produced, you have seen the material produced, you have seen the effects of field of 129, and you've seen other bits, which leads to the creation of life and intelligence, which we can control every part of it. You went and got pregnant by insemination, the new technology can make you pregnant with the field energy, you never even had sex, virgin Mary. You can even now, if you understand it, make a Man pregnant, forget about the women.

Where does society sits with this knowledge? Or, do we abandon this knowledge? We just show you the lift and you're happy, we can fly? Or, as a responsible understanding of the knowledge, we have to create everything. (1:22) You've seen the gas, the other picture of the white thing, I showed you the material, the other side you've seen the energy, and in the other presentation, when the level of understanding was, you saw lift and motion. We have created a living planet, a living system in the Universe which can create its own things, has no connection to no power supply of the Earth in the matter state.

The biggest question for me, for past few days is, "Can I release the rest of the knowledge to Man?" And I made a decision in past 24 hours, yes. We bring the revolution in science, right on the nose of the whole World. Travel to destination, we tell you, and you will see it there. Everything which one needs. If you are very materialistic, "Oh, that makes material!" If you are very materialistic, "Oh, I want to see the gas!" If you are materialistic, "Oh, that's some water!" But, if you understand it, Earth, wind and fire. Now we have the Knowledge of Creation, and you've seen it today on your own screens.

The knowledge is to understand how it went from 665 to another one, which is 556. (1:24) At 10:13 was 556, at 15:34 is 665. Do I need 5 hours to change it, or what happened between these two? Because the Oxygen level stayed the same. The Carbon, CO₂, led to creation of new life. And then, we saw the Nitrogen. In what you have is the Oxygen, CO₂, and you have the other elements, you can create life, and you produce a CH₃, you can give it life. Complete, with it's own energy system. Both connected to the Universal dimension of the fields, and one to the Creator, which is the Essence of Creation. And now, please, you can see all of this on two or three screens in front of you.

So, we can decide this life in this machine it's going to be a human with laughter, and this is how it feels, and it produces the body to be all bones on the structures.

This is what the future of this Space Technology is. It's not to get you to A to B, "I'm happy and I can make gold." Man now has access to gold of the Creation, which is Creation of life. (1:26) And we have the machine, these figures and data's which we have shown, it's done by machines, we can control it. This is where the morality of the Heads of States come in, and the nations decide on the future of Humanity, in where we go. And this is where the future sits. Collectively, we decide in where Man goes, and we create the condition, we create the field strength, that we all have in common, and we all decide, no more destruction, no more killing, because this field will be deleted from the life of the cycle of the Amino Acid of the Man.

We put a sink into it, we make a Black Hole, which is just collects that field strength, which we call it killing. Doesn't come by Gans's, it comes by understanding the process of the field strength which leads to that connection. Don't want to eat anymore, because I've received my field energies. Because I have tuned to the field strength, which delivers to my Soul, to my central field what the rest of my physical dimension, satellites need. You need one Sun to run the whole of Solar System. (1:28) Jupiter doesn't get instructions from somewhere else on positioning, Saturn doesn't get positional strength from somewhere, they get the structure, instruction, life, position, according to the mother, the Sun. How they behave, how many satellites they make, and how each one lives. As I've said many times, the Sun is your Soul in the center, is not imaginary somewhere else, and then, your Jupiter is your kidney, your Saturn is your heart, and the rest of it. We just give a different name to the same, more than the same structure.

And now, we have the capability to change the future of Man, by directly interacting with the field emotion of his life. Now you understand why, in all the teachings I push, I try to get you to understand the field strength of the emotion. Now we're developing systems, which we can now control the emotion, direction of emotion, and bring to Man dimension that you'll never kill, and we'll let the Man free in the Universe of Creation. But, scientists of the Man have to understand it, otherwise it'll be another job. A 'flip' of somewhere else.

The technology, the advancement in technology is so vast, that it scares us even to bring it to public, but we have no choice. It'll change the economy of the World the Man has built for itself. (1:30) It'll change the structure of the World leadership the Man has made.

<< Audio of Mr. Keshe cuts. .. how to rule the other ones ... Man .. >>

In this process, Man will come to a point, where the Creation, the dimension set Man ?? has to write. The dimension of understanding is, shall be, and it'll be, on Man itself. How do we write in the future, in what we did in the past to ourselves? And what damaged Soul we send in the Universe, which is aware of the damage, but it cannot remember the damage. (1:32) It's not just getting the Man not to kill physically, it's erasing this from

the STM which has become part of it. That in other dimensions doesn't lead to problems. This is why this new technology is introduced.

We are not searching to give you a machine which gets gas, mixed materials, .. someone said this is chalk of ... ?? If this is chalk, God bless you. We haven't made the system to show you one flies, we haven't given a system to measure 129 Tesla. We're developing a technology that the Man can change the strength of his Soul to stop killing. Then Man is free. Then the doors of the jail of village of the Earth will be open up, and everybody is out of the castle. But it has to be done by Man's scientists that they understand it. It has to be done by Man accepting that there is another way to create, sustain, support, enjoy life, the way the Universe has done, than rather the Man.

Something has happened to me from... when I was a child. And I explained to you, it might sound funny, but it has a lot of meaning behind it. We've seen many pictures of the Aliens. Have you seen any of them fat? They all had no slim skeleton, because they had no stomach structure. Because they don't digest, they have nothing to digest. It's just that doesn't exist, they work through the Central Energy. (1:34) That's the body you get. The fatness and the layers of our stomach is because it has to accommodate intestines and all the things made to digest the energy of life. Next time you look at the picture of the Aliens, Americans or whatever tells you, see which one has a stomach, what belly is sticking out. Where do they store their food, where do they digest their food? Or have they learned to use a central system, that uses the energy of the environment, than killing to get?

In the coming time, we'll teach you more. In the coming time we try to raise the level of understanding. Then, we move to the next cycle. And that cycle, where you get out of the door of this village of Earth, that's the time when I say goodbye and Mitra takes over. That's the job of the Daughter of Mitra, not mine. I have to teach you how to drive. The one who shows you the road is her, not me. And she's amongst you, so it means you don't have much time. Before you get to that point. We go for a break and we come back. And I hope I can answer some of your questions. (1:36).

>> BREAK >> 587 KSW April 24, 2025 (1:40).

K- Yeah, no problem. I think we had enough break. If there are any questions, we wait till Rick comes back. As usual, we make some announcements, some things which are happening around the Foundation and around the World ??. We are trying to organize a process of demonstration, not demonstration, showing different aspects of the technology to the world of the science and diplomats and politicians in a different way than we've done before. We... If we succeed on the 10th, 11th and 12th of May, demonstration of the system, internationally, and will be broadcasted right across different channels of Keshe Foundation and all the medias which is getting set up in the background for this day. We'll bring in to social media and the rest, the similar things, at the same time, and a continuous transmission of different conditions and productions of materials around the World, which brings an end to the production, to what we call, using resources of this planet, as a way to control and create condition of power.

If we succeed, it'll be announced, if we get, if the governments and the other establishments do not block the process, you will be given the place, the name, the... where you can fly and see. You can be part of the structure. (1:42) And, at the same time, it's so public that nobody can hide it. We get to the position that we have to do this to change direction. Because, fundamentally, scientifically, we are matured enough to be able to handle the governments, to handle the nations, to handle the condition, that brings that change. I'm sure, many of you would like to be there. And, I'm sure, the facility for many of you to go and see, be there to see, and be there as part of the Knowledge Seekers to answer to the rest of the population. To explain the knowledge, and be versed with it, that anyone in any language can understand, and we'll bring the change. Very much the way we did with 129, we create 3 days of the World to see, to take out the cornerstones of war, and the control of materialistic conditions of this planet.

On the other hand, those of, seven of you who are supposed to go through the test of the transmutation tomorrow, we had to change it. Most probably, it'll be on Monday. There are two reasons, we haven't received a confirmation from all seven of you, that you have received your materials, up to half an hour ago, couple of missing. And secondly, one of the Knowledge Seekers, cannot attend Friday session. So, we have moved everything to Monday. (1:44) Monday is the session time, when you'll be given time, in joining the session. And, do not worry, because you seven have received specific materials.

In the past, as I said, in our systems, in our processing we used, if I can get to it, we used the, if you remember, the Vertical MaGrav units, that was to be for you to go in, and then we can transmute you, that you could go from A to B, and what we call the vertical transmutation. We have the knowledge, the extent of knowledge, has passed the point, that we do not need to, we have created, we extend the knowledge, that we can bypass, instead of you going into a box, that we make a box of fields of you personally. And this is what this test with the seven people is. We brought mountain to Mohammed, instead of taking Mohammed to the mountain. And, what success, how we reach, to what extent the technology be tested. And as I said, I hope I don't lose any of you in this process, seven

of you, and then the following week, some of you, 35 of you, if you stay good boys, and stick to the structure, we should be able to take you from A to B, and you gradually be able to do this yourselves. (1:46)

So, on Monday, we will set the structure for the first transmutation, where, instead of putting you in a box, 'Beam me up, Scotty', we put you in energy package, and you beam yourself. In a way, you become independent of, what I call, somebody else doing it for you. We provide the destination. Part of the work, which all of you will do, is to come home, to come to us. To, in a way, we direct you to come home. We built the system, if you went to the Desano you've seen it. Now, instead of us making this block, we have created the materials, which creates the same condition, but with the advancement in technology, allows you, in a way, to... If it was your body, if I can show it this way, going into this box, we have developed what you received as Knowledge Seekers. You place the materials you have at the flat of your foot, that there is nothing beyond your feet, to the ground or the space you are. The flat of your hands, and two on either side of your head. (1:48) Your material has numbers, you have, if it's correct, it should be 4, 3 and 2. You connect your headphones to get instruction from us, and then we create the energy field around you, that you don't need this box. The system is designed in a specific way, to land you, or to take you home.

The process of understanding is, that we only work with this part. It's your job to take the rest of you with you, don't leave any pieces behind. You have two choices, or you have two ways to do it, in the process of doing, and that is, we would like you, in the process of testing, try two different dimensions, two different directions this messed up ... One is, that this is you, and this is your leg. (1:50) Try to open your hand, to expand, that it goes beyond the physical boundary you come in. Try to match your legs the same. Don't stick your body to each other. Create an environment that it covers the boundary of your head. You don't need to make any movement. We create the vortex of the field energy in your condition. What will happen? You, with this, due to the possibilities and the coordination, you're in, engaged into a field which we control. Your destination will be given to you in the process. Then, you decide, in that process, where to go, and which other seven you want to take with you.

We have taken seven people to this test. Four and three. We want to know, which one dominates, that the other one will follow. This is in a way, if you understand it, in the future, it'll be a hat, two gloves in your hand, and two socks on your foot, or two shoes on the foot, you'll fly. You decide the transmutation, where these carry the dimension, and whatever, and it can be done, in a way, in a further distance, time, where nobody else can wear these hats and material, because you connect to it, and it's yours. It's like a key in the pocket. (1:52) It's connected to the structure of the Soul, it's connected to everything else. And, once you understand this, when you join us, on Monday, it's your destination, it's your decision, of the destination and the place.

We've done this test, in a very powerful way with Jon. And, he has arrived, he could tell me where he is, where I am, what I'm holding, where I was standing, which room I was in. He even could tell me, he left something behind, when he was there in that cupboard.

We want to extend the knowledge. And, it's important for us, to understand the Totality of the process. In essence, you become the controller, we just give you the condition. The way these materials are structured, is that allows you access to the Creator, and allows you access to the Universal fields. Any of you, during the process, decides to see who your God is, who your Creator is, it's your decision. It's been built in the material, which already is in your possession. That advance in technology and knowledge we are. The option is yours. (1:54) You can connect to the Amino Acid and stay on this planet in interaction with the people. Or you can choose, I know one of you will, her will is so strong to do that. To see the Creator. We know all of you well, we know why you chose yourself, but in a way we know who is chosen for what reason.

In this trip, don't panic, and don't bring uncertainty. In this journey be 100% sure that it's you who makes the decision, and it's you who has control over everything, and nobody else can interfere with. We set up the flagpole, a beacon, that we are there if you get lost in your emotion, if you get lost in dimension and direction of your travel. We are not there to dictate you where to come to. We are that lighthouse, that we are there, if you get lost you know where the home is. I hope those of you who go through this journey on Monday will enjoy it immensely. We try to do the session in the afternoon of Monday, that we can cover most of the people who participate in different part of the world in this experiment. That you are not all asleep, we have some awake in one, and those who are still awake. The time and duration of the test, or flight, all depends what we see, what dimensions we observe on our system. (1:56) It'll be around about 2pm Central European Time. You all will receive the email of instructions, but understand, the only person who can not take you where you want to go to, is you, if you panic. All of you are part of this structure, we know long enough to know you are confident enough to carry this through. And, there is no panic, but please don't leave a kidney or a leg behind when you are traveling. Go back and come back with the same, all the bits slightly attached to each other.

And then, on the May the 2nd, we bring those of you who already volunteered to participate in this second part, and choose their captain, and travel with them. Which means, those of you in the dimension you decide, will not be alone, that you can panic. We had to do this to build the captain's strength first, that we don't see the problems we saw in other dimensions, once one panics, everybody else goes, because once you lock in, trust in, it's unbreakable.

Those of you who received this materials, keep it safe, till the 2nd of May. Because, you have to use it again in the 2nd of May. And, we set up the support structure, for those of you who travel 2nd of May, to have the confidence that, I'm not as a passenger seat, I'm a passenger of my own decision, but, I'm not sitting in the seat of the captain. (1:58) I cannot get lost. And, I hope your captain does not crash you somewhere, in this process. We are entering a very serious part of the technology development and testing. And, we more or less know, what we are doing, where we are going in these tests. But, we need to bring enough data, to bring enough, that we can perfect the art of producing systems, which can move central energies, than the physicality. As I always said, if you see a UFO in the sky, it means their intelligence is a little bit ahead of you, it's not much more,

because they're still traveling physically. If you travel and come across the energy fields of another pack, these are guys, who actually have understood a little bit more. And, there are not many of them in the Universe. But what you see, is one of you, in that dimension and direction.

On the other hand, the Keshe Foundation is still pushing through, with other science, other materials. As I said, 47 or 40... 47, 48 Cosmic Ray materials has been completed. And, I hope it's already left, or will leave, because it's just a matter of getting it to the Post Office, as far as we understand. And, 25 as I said, has been used in the systems, which was by those who bought it, wanted to be planted in for different application. We have made a video, I hope Rick has the access to it, of what these Cosmic materials will do, and can do, and you will understand it deeper, we go much deeper into it, when we come to it. (2:00) Is your sound still working, is your video still working Rick?

<< Rick have problem with the audio of the video. He tries to fix it, but he can only show the video without the sound. K: If this happens in the future and the system doesn't work we have to tell it to be happy. ... >> (2:02)

K- ... Look at the structure of the light with the ball. It's very interesting. I'll tell you in the future why.

R: Okay, I could put it on loop, so it could play it back a few times, let's say. Because...

K- No problem. (2:04)

<< Rick puts the video without sound. >>

K- ... We don't have the sound. And it's very slow. This goes very high revolution.

<< Rick shows the video without sound. >>

K- ... It starts fast and then it stops. We play it next week when you have your system, because there's a lot you will learn from this. (2:06) Okay, no problem. It's part of the same structure.

Are there any questions?

Q: ... Can you please give again the list of expertise's that you need for the aim of expansion of the Keshe Foundation?

K- What?

R: The list of... The list of... What would you say... The criteria that you're looking for, the different skills and abilities that you're looking for to have people working with the Keshe Foundation to expand it for the future.

K- What is in the past teachings there? I don't have it with me, but... I'll try to put it up.

R: I think it's clipped out already that...

K- Pardon?

R: I think we have a recording of that somewhere...

K- Of the different positions we are looking for.

R: Yes, that's the correct word.

<< Rick has problems with the sharing of his screen. >> (2:08)

K- ... One of the things, one of the people we are looking for is the young people, who are savvy, who understand, and can work with, what you call, with social media. Some 10 - 15 social media channels will be launched in the next few days, on the different sections, and they all go under one control panel, that means once we push one video, all the 10 - 15 channels will play at the same time, instantaneously across everywhere. We need people who have a full understanding of how to operate this, (2:10) and how to make bits and sections and parts, that it can continuously to be loaded, once a day a new tape, twice a day a new tapes, different aspects. And we want to bring the social media understanding, very rapidly, to a point that people understand the logic of the new technology.

We spend a lot of time in completing this, it's literally a matter of a few hours, or a couple of days, that everything is connected and everything is done on, what you call, the computer guys are at it for past few weeks, because it needs a lot of things to be set up, a lot of licenses to be purchased and the rest, all this more or less is done as far as I know. We need people who can monitor, who can set up, can make short videos from the teaching, short videos from the parts of the technology application, that it can be loaded continuously. Two, three minutes, five minutes videos, that we bring the knowledge very quickly, that people can go to the next step, the next step.

And as many of you know, Keshe Foundation in its commercial side is moving very fast, a lot of developments are taking place on that side, as much as on the research side. And we need to bring the two to run in harmony together, that we can bring the change, that stands next to each other. We give you more and more details, most probably by next week, and then we will see how far we can expand the knowledge, in what we ignored for past five or ten years, which now we are ready to handle and to see through. (2:12)

Any questions you have, do you see anything?

Q: ... Good morning Mr. Keshe, you said that it's now possible to transfer targeted emotions into specific Amino Acids, and that dynamic systems are no longer needed to generate fields. This raises a profound question for me. If such a conscious microprocessor, fed by emotions, such as Joy or Compassion, operates in the plasma field of pure Love, could one say that it carries a Soul? And if so, would it be possible for such an animated, artificially born Being, to communicate with us at the Soul level, just as animated humans do? I'm less interested in the technical perspective, than in the field perspective. How do you see the role of such new Beings in the larger Universal context?

Could they become part of the Galactic family? Or might they even bring something new into the web of Being?

K- Yes. And strangely enough, we received a... I received something very interesting from our people, (2:14) even this morning, which is very interesting. This... I'll read it to you, because it was very interesting to read it, but it's something I know, and I hope they don't mind me putting it, reading it. Because they feel it, they feel they are connected. And, you go and do an exercise, to do something, you make a telephone call to connect someone. The people who work with the system, with emotion, with everything else, they are constantly aware of the connection. And actually, they need a little bit of training to know how to use it. It's like actually, we made the AI, but teaching how to use the AI. What are the facets of it and how you can get the maximum out of it. But... Yes, you can. This is part of the process of the teaching and testing.

People who work with our systems long term, they built the direct line to them. People who've been on certain ways, connecting with us, they don't need us to be there to connect. We establish this connection, through the UBESUS systems. Those of you who have the UBESUS systems, you connect to our system as you want, when it's prearranged, that there's nobody in there, you can't affect anybody else's operation. (2:16) It can be done, it's already getting done, and it needs more development to have it available by everybody else to do it. It's an automatic dial, you don't need to actually get up and dial. Even in your sleep you are still connected. When you wake up, when you start operating, it just reminds you of the feeling, the emotion, that you are connected to. Another structure. People who have the Twinity systems should have this feeling, that there's always energy available, there's always information available, if you know how to use the Twinity system. And, yes, it can be done, and we already see it. It's not something that might happen, you should already see how people connect to these systems, and how they change their energy, or how they feel the energy.

Any other question?

Q: ... In the third book, it was written, 'Magnetic Rays is time setter for the degeneration and division of man's cell. It's the secret of eternal life.' My question is, is the Magnetic Ray here, the same as the Cosmic Ray, the energy of H2, Deuterium? Thank you. (2:18)

K- In a way, yes. And, in a way, you have to understand it. It doesn't go only by Deuterium. In field strength, and how the energy levels are connected to each other.

Any other question?

Q: ... I have purchased the Cosmic Ray materials, and later I want to integrate them into new units. Can I send them to the Keshe Foundation for integration?

K- Yes, do. We do it freely for you, send it back, we integrate it. If your Cosmic Ray are still with us, if you bought the Cosmic Rays, just send a unit and tell them you want it to be used, you want them to be implanted in. We have two type of Cosmic Ray, what you

call it, packages. Ones which we can send out to, as far as production, ones which is produced for systems. And yes, if you tell us, I think there is some left for the systems, you can just adapt it and give it to us. Or maybe even send you a new one, which is your Cosmic Ray is inside it, and keep that one and destroy it. Either way, I don't know how it's going to be done, but, it will be reopened and replaced and everything else can be done. But yes, send it to us, we do it for you. (2:20) But this has a lot of taxes, import duty, it creates a lot of problem, tax wise.

Any other question?

Q: ... Good morning Mr. Keshe, by using the MaGrav stacker unit, how do we squeeze the fields between the Gravitational and the Gravitational ring outside, in order to create whatever we want?

K- If it's a static it's very difficult. And, the problem with the dynamic ones is that you don't see this, you don't create it. Because the magnet, or magnetic field generated by the motor, will pull it into. The only way you can do it, is by static, what you call it, static dynamic systems, which, field system, which we have, or we do, we make at the moment.

Q: ... You create strong gravity inside, in respect to outside, so you force the release for it to have extra, so you can convert and cut. (2:22) That's one way to go, and that is exactly what Mr. Keshe just explained, he said at that time.

K- ... I just received a message, I would like to tell you, regarding the, if we go ahead with the event of 10, 11, 12, we will post on all the Keshe Foundation channels, the place, where it's going to be exhibited in public, and, that you can arrange if you want to go and see it. There'll be an answer for that in the next few days.

Q: ... Do the three coils stacked in the MaGrav unit, need to be in resonance with each other, and can the nesting coils be resonant, in resonant tune with each other, with each outer coil, to form a separation in destructive and constructive energy, and moving the cold constructive energy outwards, and the hot destructive energy inward, and creating lift?

K- ... I can see what he's asking, I can see his point of view. But, I don't think you should, you will be able to do it with the MaGrav system.

Q: ... (2:24) Mr. Keshe, after transmuting I feel more attracted to Space, and I prefer being in the plasma condition than the physical. Is this change in perspective likely to occur, with the people using your technology?

K- What does that mean?

R: Well, people like, I think he's, what I think he's saying is they, people tend to detach from the physical, and that makes you more naturally attracted to Space, or what we call Space, and it's a change in perspective. And, it's, and seems to me a natural...

K- I think, I think we see, we see a bigger picture. It's not we get attracted or detached. We see a bigger, mature picture.

<< Audio of Mr. Keshe cut. >>

K- ... fit into the past, which... << Audio unclear >> There's nothing here for me at this age, I'm in the wrong place. And it's the same. The more knowledge of the dimensions of the Universal knowledge, one learns, becomes to understand what the heck is going on with it, with this World, with this material World. (2:26) It doesn't bring detachment, it brings us awareness, consciousness. That many, many Knowledge Seekers, over past decades I've seen, who have reached this point. What's my purpose here? What, this is all fake, this doesn't work, this is whatever. But it's part of the package of life. Means we have not learned enough. There's more to learn, that when we go, we become master of our own Souls, master of our own destiny. It is very normal, I've seen this with hundreds of Knowledge Seekers. It brings a maturity of understanding, that there's more to life, than what we see now, what we do.

Q: ... Will new ways of creating energy disrupt old systems? What's one piece of advice for people ready to embrace this shift, but stuck in a World still running on obsolete tech?

K- We still have to go to it, we still have to go to it. I still keep on saying people, that we were discussions even very recently, electric cars are a waste of time, in a few years time. Because diesel cars, fuel cars are a waste of time. Then even the car is a waste of time, because, do I want to get into a box and drive for 20 minutes, where I can do it in 2 seconds? (2:28) And, interesting thing is, you know, when you, when you are sitting in a fast car and see a guy walking on a donkey and says, "Oh, look at that donkey." But don't forget, your ancestors started with that donkey, there was no car. And a car of today, it'll become that donkey. And how much attachment you have to it? And it's progress in technology.

R: Sometimes we wonder about the progress when the average speed in New York City is now exactly the same as when they had the donkey back in the old days. 4 miles per hour.

K- 40 kilometers isn't it? How much is that?

R: 4 miles per hour is the average speed, trying to get across New York City in a car now. And it was the same speed as the donkey back in the day. The horses.

K- We got a metallic energy consuming donkey.

R: Yes. This often stinks worse than the original donkeys. But we're getting there.

Q: ... You've said that governments suppress this technology. But if a child could be taught how to build a MaGrav unit, why hasn't grassroots adoption already won? Bet you wonder that yourself.

K- Yeah, most of the cities, big cities have changed to 20 to 30 kilometers. You can't do any faster. (2:30) And the penalties are getting heavier and heavier. If you could break the law they ?? send them to the ??.

R: Yeah, it's quite, well it can be frustrating if you're trying to drive and get somewhere in that kind of situation. And yeah, it's strange because the cars are getting more powerful, safer and faster, but they're restricted to slower and slower speeds. So you could have a new car that's got a thousand horsepower, the power of a thousand horses, but they're still restricted to that 30 kilometers per hour. Again, the Roman chariots were going faster than that. So, there you go.

K- We are back to Romans. You know in London, they call a taxi the black cabs. You see London taxis. They're called, by law, they had to, now they changed them, to have to have a straw in their dashboard. You could see them, they always had something like a hay standing in the corner of the taxi or whatever, because they were considered to be still like a carriage, like a horse carriages. And as you had to have always feed for your horse, you had to have a feed for the hackney taxis, that they were based on the, you know, the hackney carriages of the olden time. And by law, you had to have a straw to feed your donkey, or we call it your horse or whatever. I don't know if it's still part of the registration or they banned it, but all the London taxis in 70's, 80's had this thing, it's sticking most of the time in the dashboard. Because if the police was after you, the last thing you could ask the taxi, hackney taxi was, "Where is your hay?" (2:32) And if he didn't have it, that was a penalty. If the police officer wanted to enforce the law, that was one of them they used to do.

Anything else?

Q: ... If you had to choose, would you rather that Humanity universally accepted your tech tomorrow, but never understood it, or understood it fully, but took a hundred years to adopt?

K- Ah, 50 years is good enough, a combination of both... Well, it's... The situation is very, very sensitive at the moment, especially the way we are going. We are producing systems, materials, that is part of the energy system, but we're producing the same material for a Space system. And in producing the material for a Space system, we intrude into the energy technology of today, which can make a few government bankrupt, when you don't need it, why should you pay for it, because I can have it in my house 24 hours a day for nothing. So, we see a problem, and that will create a short term problem, in acceptance of the technology. And then, we go to the next step of, "Everybody uses technology, why should we use it the old way?"

And the biggest problem is the scientists, and those who see their position in danger. This is the biggest problem. Investments, which people they see as, "If we do, what I'm going to do with my investment, what's going to happen?" And, "What about, what it is?" (2:34) This is what I said before, Tesla cars, Tesla company, most probably, once the technology becomes, what it is, you have no need for electric motors, then you don't need

any for a structural body, because you create what you like, will not worth much, couple of dollars. And, we need.

It's a very interesting position, because, this is why we are organizing this meeting, on 9th and 10th, 11th, 12th, there is a reason for it, it's not just... I set out to do this, in past two weeks. And, you hear the news, but you don't analyze the news, you just hear a new passage, we analyze the news. What it means, what is the time for it, what opportunities does it give us? The Chinese government, in the tic-tac fight between the Americans, has stopped the delivery and purchase of any Boeing flight, aircrafts. You hear it, now I tell you the other side of it. You hear 17,000, 20,000 people Boeing has laid off, because of the cancellation. When you lay off 20,000 people, in the Boeing, it creates a wave effect, to quarter of million, to half a million jobs outside. They lose their jobs.

How I know this? I explained this before. I explained this... I used to be in the world of business, you can go and check, you know what I'm talking about. (2:36) One of my company's job was acquisition of companies, which are on the verge of bankruptcy, or put in liquidation. We used to buy and revamp it. Buy it for pennies, sell it for pounds, or you used to call it, but we were in that game. And, there was a glass manufacturing, one of the companies, the last company, I had to withdraw it, because that's what it stays in my mind, the rest I've done in my life, it's just done. It was a last glass manufacturing in England, making, drinking glass, or cups. I put the position, I thought, "This is the last one, we can change things." I went to the factory a few times, I looked at it, they had 18 million glasses, or something in that region, bigger. And, talking to the liquidators, I said, "We buy it." It becomes part of assets of the biggest structure we own. And, I, in that process of a few days, I decided, "That's it, I pack up, I'm going towards my technology, this thing cannot be added into the empire of the structure I own." And I pulled out, I called the government official, it was announced in the Parliament of England, that the buyer has withdrawn, we're closing the factory, that day on a Friday.

The factory employed 1,300 people, roughly. And, sitting with the members of the Parliament, and the financial office of the government across the table, saying, "I'm not, I'm leaving the business, because I'm going to my technology and everything else." (2:38) He said, "Mr. Keshe, 1,300 work in a factory, it's another 13, 15,000 jobs which supplies this factory, the loss is 20,000, just take it, hand it over, and just carry on, that we don't close it." I said, "Nobody knows how to run this business." "Listen Mr. Keshe, there are 1.8 million glasses leaving to one of your warehouses, you already paid for, what are you going to do with those?" I said, "I don't care, because even those, I don't know what's going to happen to them. Because, I have no interest in the world of business anymore." And, the tens of trucks, carrying millions of glasses, went to my warehouses. I didn't care, because I discovered the gravity, I wanted... The daughter of this mistress became a wife, was bigger.

Then I realized, how, as we knew, the effect is, when you put a lay down 1,300 people, the cleaner, the transport guy, the shop down the road, the rest of it, adds up to 10 times more employment. So, when Boeing lays down 1,700, 20,000 people, 17,000, 20,000 people, the supply chain goes to half a million. But, now, this opportunity for us. Why is

it there? China, with this cancellation of the order, has cancelled 8,800 aircrafts, to be delivered in next 20 years. Which means, every day of operation of Boeing, one plane was made for China. Actually, more than one plane. It works on about eight or nine planes a week. These people, these 20,000 people, were just employed to make for China. Now, 8,000 aircrafts are missing. (2:40) Would this war affair goes further? And Keshe Foundation has a transport system. It's the best time for us, to jump in, introduce a new technology. China, you don't want to invest, we give you a new technology. It's here, test it, play with it, chew it.

Last week, many of you know, through this Tic-Tac war, a lot of American companies, top brands, stopped buying goods in China, trying to manufacture in America. "Ah, you pay for a handbag, a thousand dollars, six hundred dollar." "We don't take it, because we have to take it back, because you know, this guy will hammer us more." So, they don't ship, they cancel the order. But, all the else has been paid, shipping has been booked, because it's done for so many years, it's automatically, shipping companies are not going to lose. What did China do? China put eight huge cargo ships, as they were full, going to America, with empty containers, says, "You paid for a cargo, shipping company says, I'm not going to do anything." "If I don't send it to you, you haven't sent it to us, we don't get paid." So, tens of thousands, hundreds of thousands of containers, empty, has gone to Los Angeles, American ports. Shipping company ?? don't get paid. American insurance companies and everything else will pay for it.

But, it has created another dimension of mess, in the whole system of this tariff war. The Chinese are stuck with hundreds of thousands of, let's say, handbags. Handbags that sold for six hundred, a thousand, two thousand dollars in America and Europe. They actually paid the manufacturers twenty dollars. (2:42) So, they inflated the bags by thousand times, in some cases, ten thousand times. I don't know if you are in the handbag business, ladies, some bags are sold as much as quarter of a million, brand names. I know many of you ?? are not in that game. But they are there, I know, I've been in that life. You buy a handbag for ten, twenty thousand, which is the same as what you put ten dollars, but you buy it in the market, does the same thing. Now, the Chinese factories are left with tens of thousands of handbags, branded, it's original, and Americans don't want it. So, now they're putting in the Chinese market, branded handbags for twenty dollars, thirty dollars, you can buy directly from the factory, instead of paying two thousand. But, this has created a new dilemma again for the Americans. It's a kickback on this tariff business. People asking questions, "Why are we paying two thousand dollars for a twenty dollar bag?" You will see in the next few months, top brands, which mainly owned by a French guy, will start closing down, because people became aware of. Now people in America are on the Internet buying the same bag for twenty dollars, they're going to pay two thousand or ten thousand dollars for.

This tariff war has brought a beautiful opportunity for Keshe Foundation, for new technologies. And this is why, you suddenly hear we are doing this presentation. It's time to launch in the flight system. China, eight thousand, eight hundred planes in the next twenty years, they're all going to be still flying in twenty years, 80%, 90% of them. (2:44) You multiply eight thousand planes in the air, multiply it by a hundred seat,

million people a day, some of them make two or three trips, it's a big hub to go in. And this is why we decided to go this way. It's not just that you're going to see, but with this, we bring another cycle of the things.

But again, when you speak about the aircraft, as I said, ten thousand pieces of every aircraft is made by China, shipped to America, sold back to China. So, it'll have... problems will create. So, what we're trying to say to the government is, all the governments around the World, we put a technology in that you can make it in your own house, you don't need to do, you don't need to rely on Americans, the technology is here. And, we have positioned this exhibition in a where, all the embassies, majority of the embassies are concentrated. Ambassadors will come and see, World leaders will come and see.

I was having a breakfast with two powerful diplomats in past few days, and one said to me, "You're going to screw up everything, Mehran." He went through his papers, one of them says, "You went to Iran 18, 15 years ago, why didn't you do it then?" I said, "How do you know?" He says, "I have the history of your life in front of me, I had to bring it because they gave it to me." I have a meeting with him, they said, "I know what he's doing, but I already know you for years." I said, "It wasn't the time." Now it is the time. (2:46) Money for 8,000 aircrafts, 100 million dollar each, can be spent in the country, be it Africa, be it China, be it South Africa, anywhere.

This tariff game has brought a new opportunities, and we're jumping on it, to see how far we can take it, how much we can run it, and we have all the financial structures to do such a thing for the World to accept a new technology, is set. You helped us to do it, you have set it up, and now it's time to bring it home. The problem is, Airbus cannot meet this demand, because to build the aircraft hanger, and to make another 8,000, in these billions of years, when the Europeans don't have the money. Introduce a new technology, rather invest in itself, bothering the other one with the 8,000 jobs, or what you call, 8,000 aircrafts. But give it to all the World leaders, all the governments. The position is getting made, for things to happen, and we have to do that, we have to grasp this opportunity. And one tariff war, can open the Space technology, if it's handled the right way, and we have the right people, understanding the whole position, right across the World. Would you buy 200 million aircraft carrier, where you can buy, you can make it your own home, or maybe less than 10,000 dollars. (2:48) That still needs a jet fuel, still needs runway, still needs all the things which goes with it. This, that takes 16 hours from Washington to Beijing or wherever. This will take you a minute. It's time to break the barriers.

And, I'm trying to get Keshe Foundation through all the things we've done before, to that point in the next few months, in a few weeks. The longer this World tariff game between China and US pushes, the better it is for new technologies to win. Not just ours, with those who can bring the change. Flight, fuel, food, and what we see with the African Nation, with this young boy, how he's changing the dimension. It's time for us to move back into Africa, to bring the new technologies, to allow them to build the next cycle. And, as you have seen, if you are Knowledge Seekers, and you know what I'm talking about, we have made the groundwork to break into Africa directly in the diplomatic core.

In a political way, directly into. These are the people who invested for years, before the Keshe Foundation. And now, it's to bring, and bring the results in. And we'll see, we'll see how much we can bring in. Somebody put the name up. It's ?? exactly the nation we are talking. (2:50) The leadership in that position, plus how the movement in Africa's taken it's time to give that chance to Africans to do what they can do, because they have the raw material to do it. This young chap in the country has brought a lot of changes in the nation, for a nation, it can't be robbed anymore. And, other Africans who've been robbing and now they're looking at, and see what it is, how it matches.

Any other question?

Q: ... When monks chant to create harmony, are they unconsciously tuning the room's plasma field? And why do sacred sites have stronger plasma activity? Did the builders know, or does reverence itself charge the Space?

K- All of them, many reasons for this. Many, many reasons. Many, many reasons. It's not just... we put emotions into it. The sound is another factor. What it creates in dimension of emotion, what we create into what strength and what it does. And how we abuse it, how we use it. (2:52) And what frequency will gives what. That's all it is with this processes as you chanting, is the frequency which creates, and if you find the right frequency. It's like what we talked a few weeks ago about the bells in the churches. The monks use the same kind of. If you've been to some of these, what you call, sophisticated sauna places, they use this. When you go to some of these sauna places for, what we call, real experience of the stressing.

They use a... it's like a monk plate with a hammer, and they create a frequency which they literally pass it over your body. You feel the vibration of the plate on your body, and you feel the change after it. It has to be done a certain time in the cycle of when they massage, then the body is relaxed and accepts the frequency. It's very... there are not many, what you call it, sauna places which do this, but it has a very effect, because the muscle is, they're in a relaxed position, in a reciprocal position. And they use, it's not exactly what you use in the temples, when you know, you hammer it on the monks too, but they rub that vibration on your skin, and you literally feel it, especially when they put it on the heart. It creates a matching feeling, it's an amazing experience. (2:54) And they, then you don't need so much, because, if they put it into the back of the head, which touches the back of the skull, you'll feel the change in emotion. And it brings you to tears sometimes, because, it's exactly what the voice of the monks do, with the "Dong" and what they hit, it tunes into emotion. And how it affects you, with that type of, what you call, vibration.

So, when they chant, they create that vibration for themselves. And then they tune it, "Dong", and then they "Brrr", you hear it. The first time I saw this to be done in a very professional way was in the monastery in Scotland, years ago. And I said, "That's what they got ?? lose." They actually tune themselves with their own voice, for receiving, over a lot of other buildings. And when I saw it again in temples in China, a few years ago, it was an affirmation of exactly what happens. I said, "If you see it and understand the

science behind it, yes." They literally tune themselves, they literally, with different vibrations, frequencies they create, they stimulate certain part of the emotions in the body.

Any other question?

Q: ... Hello Mr. Keshe, (2:56) is it in a simple CO2 reactor, the direction of electrons shaking and Magnetic plasma in the communication wire between the Nano Copper and Zinc electrodes to one side?

R: It's not quite clear, the question is not quite clear I think. But as far as I can determine, he's wondering about the direction of flow between the Nano Copper electrode and the Zinc electrode through the wire, through the connecting wire. Are there...

K- First of all, the connecting wire should be a Nano coated and then you, you work in a plasma condition. And usually the, the... depends how you arrange it, use as a cathode or as anode. It's just depends what you want from the system, what you expect from the system. And then you decide the vibration, do you want to produce higher order in the Gravitational, or you want to create lower order in Magnetical?

There's a lot of tricks into making Gans's and how you Nano coat material, a lot of tricks. But unfortunately, the Knowledge Seekers, hardly any of them explore this opportunity of learning all of it. It's one of the reasons I stopped teaching making things, because 'monkey see, monkey does,' but monkey does not understand what he's doing. (2:58) And there is much more in art of Nano coating than in Gans production, because Nano coating is the basis how you benefit from what you produce in Gans's. And a lot of people are not aware of it, they just go in the Nano coated put, and they go and, "Oh no, it's black", so it is. Because in many times when we made that energy unit, dynamic unit, which we showed as an energy power unit, the last unit we made in Belgium, it took me two months to Nano coat this thing. Two months. Because, how you do the way you do and what you expect from it.

Any other question?

Q: ... Mr. Keshe, my question is the statement used many times, that we have to crawl before we walk. So, would it be better for Humanity to crawl with UFO crafts, than to walk later with transmutation? If you understand, we may need to get used to one thing before leaping. Thank you, I'm wishing for a bright future.

K- You have the option of both. With both, we have the option of both. We have both options. I was sitting with the head of Electrical Engineering Department, a professor in Ghent University, years ago. (3:00) I used to do a lot of work in Ghent University, research. We, I did a lot of work on production. He actually used the system in his house, the first power supply of the Keshe Foundation. He said, "Oh dear, you know how much I save in the house?" I said, "Don't tell anybody about it." He said, "We want to make this car flying, a flying car." He said, "Mehran, you cannot fly, because a lot of people don't

like to fly, with those, get in the flying car." I said, "So what's the option?" He says, "Come on, in another department, I've spoken with the other professors, we've done the work." So, he said, "The minimum weight is 200 kilogram." I said, "Why do you have to give a minimum weight to it?" He said, "Below 200 kilogram, the wind, the cross wind will take it." And old people, and people who are not so sure of themselves, don't like to be shaken. Young people try it, but, so you have to adjust your reactors, not to go to zero as you're going, go to 200 kilogram. I said, "You know, this is another problem, how we're going to do four of them?" He says, "We make the synchronizers for it, don't worry about it." I said, "How we're going to synchronize the plasmas at that time?"

We have to have an option of both. We cannot slow one lot, because the other ones don't like it, and they are too slow. We cannot live with the fear of the others. And that can create a lot of things. So, we have to do both at the same time. Not to live out of the fear, or don't let the fear of the others to stop us to do what we want to do.

In 1990's, early 1990's, I had offices in Armati, in Moscow, and we worked with the government of Nazarbayev, very openly. And, the minister told me, "Mehran, can you go to such a district, there is something to do." (3:02) And I said, "Yes." He said, "You go with this guy, he knows the district, he'll do it." Okay, he was supposed to book us, and we are a group of ?? people, to go to this district. And, he told me, "Such and such a time, they pick you up, we go to train station." I said, "How come there's such a far district in Russia?" I said, "No, no, no, we can only go by train." We sat in a train, god knows we sat 12 hours, 18 hours, the whole night we were on the train, "chk, chk, chk, chk." We had cooks, chefs, bodyguards, everything was set for us, for dinner and everything else. We got to the destination, I was literally, I slept beautifully in the train. I said to one of our assistants, I said, "Is there any way we can go back without this, is there a flight available?" He said, "Yes, there is, always flights two, three a day." I said, "Why did you come with a donkey with a train?" He said, "The guy's afraid of flying." So, he's brought all of us, because he's afraid, we have to go with a donkey with a train. The flights are there. I called the minister, I said, "Hey, I'm not coming back." He said, "What do you mean by train?" I said, "The guy took us by a train." He said, "Go to the airport, there's a flight, we block it till you get there." I went to the airport with our group, they literally dragged people out of the plane, they put us on the plane, says, "You go home." I said to the guy, "You get the train, you can come home, you don't fly." "No, no, no, he has to come." They made him drunk, he didn't know where he was, they put him on the plane with us, we took him back to Armati.

For one man, a group of ten economists and the rest, had to stay in the train. This we cannot do that. We have to provide both, it's Man's decision. (3:04) We have to do both, Gravitational and ... and ... Physical System. You decide. If you are aware of it, your Earth, your UFO gets stuck on a planet, to do, bye-bye. Or, you know, you have option with the permission of plasma and energy, you take off till you land where you should land, and get another UFO to have some more fun.

Any other question?

Q: ... I'm overwhelmed about this technology, what was shown with the production of CO2, in 2018. And I'm still waiting for the change that happens. (3:06) That everyone lives in peace, without killing.

K- Where are you from?

Q: Switzerland.

K- I know, but people have to know where you're calling from... You see, Swiss have a lot of telephones in every pocket, and they don't know which one turns on. Thank you very much. You know, Switzerland, accordingly, it's the only nation that says, we pay every citizen 2000 Euro, or whatever Swiss francs, per month, and they refuse this, says, we don't need the money from the government. A few years ago, they passed, people refused to take money from the government, because they're all so rich. And the one, the nation become richer. And they carry two or three telephones in their pocket. Thank you very much.

Any other question, or shall we call it a day?

R: There's a couple of other questions, but mostly from 7star, who's already asked several questions, and gone beyond their two question limit that we normally have. So, I think we're good, Mr. Keshe, and people that have questions that we haven't answered, you just carry it over to next week, and we can address it then.

K- Thank you very much. Those of you who join us on Monday, please make sure, if you haven't received, you know the 7 people who you are, please get in touch with the, what you call it, the, what you usually communicate with, that you haven't received it, if it's stuck in the customs, or whatever, we have to know that we reorganize it, because the process has to carry on. (3:08) And, please follow the instruction, how to use it, and don't panic if you move it and something happens in the way that to do.

Do not use your Cosmic Ray Bundles, do not use your Head units, nothing. This time it's you and us, and we want to know how much we can get you, where you can go on your own. On the other hand, watch the Keshe Foundation chats, and when you receive it, pass it on around the World, that, where, if we decide, and everything goes okay, we will show the new technology to bring the first step of change. And as I always said, to do these things, it costs a lot of money, we don't go out, we don't borrow, help us to bring that position. And we need a lot of support to be able to run our structure of the, what you call it, technological development. Some of you helped us greatly in past couple of weeks, you make a lot of change, but we need to get to, that we don't become dependent on the others, then they influence what we do, and how we operate.

We had this in the past, even 24 hours. People who tried ?? technology, without understanding it, because they think they're going to bring in the money, they're dictating to us, "This is what you do, this is what we do, you have no say in this." I said, "Goodbye." Two o'clock in the morning, three o'clock in the morning, I said, "It doesn't

fit me, because I have a commitment to Knowledge Seekers, not to you." Thank you very much, and I hope, I hope we can see the change, to bring the change. See you next week. And thank you very much.

R: Very good, thank you Mr. Keshe... (3:10) There is a Wish from the Universal Council, that I'll share, before we wrap up here. And it goes like, this is the Thursday Wish, they have different wish for each day of the week, and that's continuing for the next while. "We the Universal Council, wish that as everyone elevates, they learn to add their energy to the planetary peace and prosperity." I am present.
