

588th Knowledge Seekers Workshop May 1, 2025

(Transcription, Editing and Proofing done by KF Brazil)

(Auto transcription by Elias)

Time Machine; Beijing Exhibition May 10 - 12 show Breakthrough technology (T) - Markray to commercialize Plasma T; Mankind ready; Taught enough - theoretical to practical application; KF understands Energy & Matter; This is controversial teaching on Time; Built system - prove and repeat experiment; Deeper meaning - Time, Place, Position; Time is relative to observation: Place is Earth; Position is ourselves as human; Triangle of Time - Place - Position doesn't work; Possession missing; Possession is M field strength of human amino acid (AA); New Triangle of Creation - Place - Position - Possession; Interaction of 3 creates Time at top; For Time to exist need Place - Position (entity) - Possession (strength of AA); Time starts zero when decide appearance; Change one parameter - change Time; Live 1000 years ahead on Moon as Man; Don't need transmutation - move Time; Control Time only as plasma CR - strength of M field - not matter; Time Travel - energy & position - a science; KF Time Machine; Parallel Time exists; Create fish in tank; Move GM fields of Position & Possession - Time moves; Aliens living Earth different Time - like humans; Different Time zones; Teach how; Show T publicly Beijing; 10 to prepare; STP is Position; STM is Possession; Time starts when arrive; Create - control - manifest fields; Control by emotions; 7 captains for 7 billion - captains remain - Trust Soul to them; Blueprint of knowledge for centuries; Our Time zero - Place already existed; Souls start new cycle at zero; U created instantaneous - 1 cell grew into; Parallel U - Galaxy; You create Time - plasma; Time Travelers through transformation of energies - not wormholes; Freeze Time - see different D across U; Time exists in multiple states; STM through emotion - appear as fish; Lock Time - change Possession and Position - become dog; Last week changed enlightenment - some received; Create conditions of enlightenment; Emotion dictates Place, Position, Possession - create Time; Time Machine; Systems gave emotion; Parallel times - worlds - change any parameter; Play with Time; Beijing - change plasma by wish; Dream Machine; 5K Light-Years - scientists retarded - repeat same mistake - confirm correct; Test appearance in 1,000 years; Cannot see past; Influence - past becomes future - emotion; Knowledge of Me to make My image; Don't create borderline for learning; Move Time & change Possession - Position - stop killing - not with Gans; Change Time on planet - remove killing from memory; Half of Space dark - another Time - strength; 4 seasons fixed Time; Hope Mankind not abuse Time - key to traveling U; Make time stand still - change to dog; Understand what My image is; Trust yourself - to change Time; Interfere with Time; Soul is perfect; Thousands of kilometers from Source; Gift to humanity; If abuse - balance mistake; Way Creator manifests - parallel worlds; Rain when at Vatican; Knowledge of Man pure; Reason of birth; See future of Soul; Spread Beijing release Social Media; Markray shares - Board of Directors; Resistance from governments; Solid financial groups - bring out T; People betrayed; Cosmic Mystery package; Surprise in Beijing; CR from plasma not matter; Adding energy to M fields way to North Pole; Universal materials - solar cells; Fear of nuclear; Respect CR with love; Coded message Ayatollah Khamenei; Banish Jews to U; Not rejoice in others suffering; Decided by wish; ; STM damaged by behavior of P; Not reset - add to knowledge; Parallel but opposite - G to M connected; NDE not parallel world - memory; Possession -

change strength AA - allows different manifestation; Change solid magnets with plasma; Northern Ireland peace - Queen submitted to Vatican; Holy Zoroastrian villages in Iran - simply life; Stop feeding Palestinians - no uptake; 3 hats- CEO KF- Markray - owner of I rights knowledge; Prudent what says in teachings not influence shares; France nuclear again - power outage; Produce gas; African nations; redefine Time; Die at birth; Looking Earth from Mars; Don't stop experimenting - Lead aluminum dangerous; Underarm sweat - smell - body tunes to conditions; Natural deodorant; Tilt of earth - Life; Change aura transmute; don't panic in flight; CR Balls - amazing results -how to use - inside not static - part of U structure - elevate STP - only few minutes - STM has to accept - time to enlighten Man.

ENGLISH TRANSCRIPTION

(:12)

K- Yes, thank you very much. Good morning, good day to you as usual, wherever and whenever you listen to this through the Knowledge Seekers from Keshe Foundation Spaceship Institute.

In the past 13 years, 12 years as we had the first session, we explained, we took you like a teacher from showing you the first words, the first steps, the first knowledge, bit by bit we brought you in from Gans's into Nano material, into Space technology (T), into application of the dynamic systems, into energy levels, then we brought you to Cosmic Rays (CR) and we brought you into Soul. And all this has a pattern, we don't do anything without reason. And in the past few weeks, few months, if you go back on the teaching, I use a word quite frequently, but in a way I set the scene for what to come today. What we will share with you today will change the course of history of Man, in respect to science. The reason for it is twofold. First of all, Mankind as Knowledge Seekers (KS), which we will follow in a big way in the coming weeks and days, is ready to take that step. We are ready to break through the knowledge. A lot of things you hear around the background, and a lot of things you hear about what Keshe Foundation is doing, what we're doing, and now we have a very strong arm under the Markray Corporation of United States, that allows us to break through Industrial Revolution. (:14)

Theoretical is one side, and practical, showing it, is the other side. Commercializing it in a massive way is the other side. And this is what we as Knowledge Seekers set up the Markray Corporation for. It belongs to us, and it's the way to break the technology through Internationally. But, at the same time, we have taught you in a very deep way, the knowledge you have is astonishingly so deep. Many of you have it, but you've gathered connections, collections, bits by bits together, and you listened to a lot of Knowledge Seekers (workshops), and this brings us to the evolution in the science. What evolution is? We know everything about the matter. We know everything about what we call, opposite to what the whole world does.

For example, you hear about fusion system, Chinese is spending billions, they can hold it for 1,000 seconds, and then the French can do it 3 seconds more, they broke the record.

We saw in the past, Americans, NASA, whatever they called it, that they could keep, produced so much Tesla, and we showed with a simple way how we could achieve 129 (Tesla) and we hold the plasma together with a huge energy, and you Knowledge Seekers with a few cents, put a caustic in there, and do more than what the people in CERN do, but they can't accept it, because they are connected to the world of matter state. We work, both we understand the matter state of the world, we understand the energy state, what we call, the Cosmic Ray.

And, this is what is the next step in the world of science comes to. (:16) Today's teaching will be extremely controversial, but I tell you why we are correct. We have built a system for it. When you build a system, you are not anymore in the realm of theory. When you build a system, you work in the dimension (D) of the reality of time, and by law of physics, if you can repeat it, and control it, and bring it up to a position of understanding, a position of what we call, working with the parameters, which gives us a chance to be able to, what we call, new dimensions. We understand deeper the science of Creation.

<< Mr. Keshe have problems to open the whiteboard. 17:50 >>

So, what is important for us, as Knowledge Seekers, to understand how to bring the dimensions of the creation together. (:18) What does this mean? We know about Cosmic Rays, we know about planet Earth, we know about us as collection of fields, we know about us as being today, 1st of May, Day of Labor and Revolution of the Communist explosion for rights of the workers and the rest of it. So, we have a place, we have a position of being Labor Day, and then we have another dimension to it, and then we give it a time. What does this mean? In the structure of the physics of today, if you heard me many, many times, especially in past few weeks, months, I refer to time, place and position (TPP). I set you up, as you all know, I'm good in setting you up, with a very good way for you that there is something comes in the future, but you just listen to the words, you don't look deeper into the structure.

What does this mean? We call this one, Place. Yeah? And then, we have a position, our position. We are human, animal, tree, whatever we are, and then we always call, this is your Position, and then this is your Time. You see the triangle. But this triangle does not work, because one part is missing, and this is Possession. What do we possess? (:20) Now you understand the triangle of Creation, which, when all three are working, you create time. Time does not exist if you don't have a place. What time? Is it Monday on the Moon, or is it Thursday on the Moon? Position is, are you going to manifest yourself as a dog, as a man on the Moon, or as another creature? So, your position, in what you appear, important. Possession is strength. I'm a man, so to manifest myself as a man I need to have a certain magnetic (M) field structure, which we call the amino acid (AA). Amino acid is a magnetic field structure. So, we know the position, we know the place, and we know the possession.

In this point, then we arrive, time zero (in center of triangle). Beginning of time is when we decide on what it be, and what we're going to appear as, and then in what field strength. Because, if I change the field strength the time moves. You all ran a Star

Formation (SF). This is the basis of the Star Formation, if you look at it, and time is there. If you slightly change this, this moves. If you slightly change this, this moves. What does this mean? This means, for the first time, we don't need to travel. If we change the strength of, we can move the time. We can live in different platforms, in different dimensions, as a man on the Moon, but in a thousand years ahead. (:22) So, now we don't need to do the transmutation, because now we can move the time. The knowledge of controlling the time through a strength of magnetic field is only possible, not in the matter state, because it's solid and stuck. Only is possible in a plasmatic Cosmic Ray combination. In a way, we have found the key to travel time, to travel the space, to travel the energy, to travel the position. Go back to the teaching of the beginning of some of the teachings. We always refer to, we don't want to appear, we cannot appear on the Moon with the structure of the man, unless we change the strength of the amino acid of the man that can stand the condition of the place which is the Moon. So, we cannot do that, because the time is not there. We create the time, in a way, we can go to the future.

And now, in the hand of the Keshe Foundation scientists, there is such a machine. We have developed it. The time machine, in the true essence of working, is in our grasp. Now, we have completed the condition of the creation according to the dimension. In a way, we see the time, we can create that time, we can change the time. We can bring Totality to the system, and understanding how, I don't need to go to the Moon. I can be here, change the magnetic field condition, bring the time to the position of the life, and live as I live on the Moon, on planet Earth. (:24) All I did, I changed the place. I chose a different place. This place creates a different dimension of time.

The basic foundation of time, the basic foundation of the creation of plasmatic fields, creates what we know as structure of life in the Universe. So, parallel time exists. We created it, now we have the knowledge to create the parallel time. By changing the Cosmic magnetic fields of the ?? possession, changing the Cosmic condition of the position, or changing the Cosmic condition of the place. This is why, if you go back to the teaching, I said, "In time, I'll create for you a fish in the tank." I'll show you how, when you want to go to another place, how you look when you get there. Now, this is the knowledge of it. This is the science of it. Now we know how to create dynamic magnetic fields. You cannot do it with the matter state magnetic fields. CERN is one of them. They are trapped in the time and the position of solid magnets trying to create the condition where the mayhem we see, high temperatures and the rest of it.

If you move the positions gravitational magnetic fields, if you change the ?? possession magnetic fields, how you change the position magnetic fields, time will move. But the question to ask is very simple. Are there other, with the different gravitational magnetic fields, in the same place, with the same position, living in a different dimension of time with us? Yes, they do. (:26) We call them Aliens. Those who gather this knowledge in the Space, maybe they were ever created long, long after man was created. But they got to the knowledge before we do, they travel that way. This is why we see them, we don't see them. Because they live in a different time and space. But they look like a man, they are on the Earth, and their gravitational magnetic fields inside is in their control to change it. They are here and the time for them moves to another place, another dimension.

In a way, if you listen to the intro, you have the four reactors. Now you play with it? You create a gravitational magnetic field, you hold it, but how do you change the position and time? You can manifest yourself and the time does not exist, till you show the ?? possession (or ?? position). From that moment, time is yours, is your time. This is how different time zone, different time, what we call, interfaces exist. I change, I want to hold the time. I change my ?? possession. Two things can happen. Position can change or the place. I don't need to travel, if I keep myself as a human, my position, I desire, is New York, I'm there. Can I live in the different dimensions of time? In time, we'll teach you how. (:28)

As many of you know, is now public knowledge, 10, 11, 12th of May, in city of Beijing, for the first time, we show this, remote. We endeavor to create a condition, as one of the demonstrations, the creation of materials of given time. I showed you this last week, as those white dots (pictures of material created from fields). These are possessions created in time kept as Earth. But place ?? is fixed. The position cannot be fixed, but we fix the possession, and that's what (when) it showed itself. To show this knowledge, we have set up a structure of teaching for years, to bring you to this point. It's not anymore, can you transmute me? Can I transmute? It's where position, time and the place, I want to clear, to be, to manifest myself.

We all have this capability within us, where we bring the interaction of the Soul and the Soul of Physicality (STP) to each other. STP is Position, the Soul of the Man (STM) is a Possession. The Place is Earth, the Time starts when I arrive. If you understand this, and you can change two dynamics of the structure, you can travel the span of the Unicos, instantaneously. (:30) But you have to understand how to create these fields, how to control them, how to manifest them. And, in that structure, you have to learn how to create the elements in an energy level, to be able to confirm the condition of creation of multiple time, not as zone on Earth, three hours behind, two hours ahead of Greenwich Mean Time, but in the strength of the magnetic fields, in the dimension of gravitational magnetic (GM) field, Possession and Position.

So, now we open a new dimension. What has been theoretical, can we travel the time? Now we know how, we have the science of it, now it's a knowledge, it's a technology. Do you still want to sit in a craft, take you seven months to get to the Mars. Hopefully you have enough food, you packed everything properly, the guy on the Earth did not make a mistake, like the aircrafts, tanking in the wrong way, you run out of the water half way there, you get to the Mars and you're thirsty and die. Or, you sit there, you get to the Mars, month, two months, three months, you got to the right track to come back, another seven months. Round trip of 18 months can be done in 18 seconds, because now you can change the dimension, the Position and the Possession. This is how you transmute, how you go from A to B.

This is why many of you have a problem with transmutation. We saw this in the test we did last week with the Knowledge Seekers. (:32) They, we interfered with their emotion, and between the interaction of the STP and the STM. We don't need to change, we adjust

it. One of the Knowledge Seekers, I felt love, and exactly on our communication, with our central control, we added combination, which creates to pull up, creates knowledge. We can create everything else. But in the same structure we can create to eliminate wars, conflicts, killing, because each one to kill creates an emotion. Now we have the knowledge, and we can reverse technology, the killing into dimension of time.

<< Break in audio. >>

When the whole of humanity has never taken place, but it still stays as Man. The evolution, once the Man understand what's on the screen, that you Knowledge Seekers look at, will bring a total change in the fabric of the society of the Human race.

Now, you want to be a thousand years, you adjust the energy fields to live, because you keep the Position, and the Possession, you play with Time by changing the dimension of the Place. Or, you change another parameters. We, in the, what we call, Star Formation, we tried to create a lift. Now we create a time. When we did the first structures, we showed energy inside the plasma balls, in Sanya in 2017, 18, the object (purpose) wasn't there to show you, the object wasn't there to lift, (:34) was to bring the position to now, that creation of the plasmas, in interaction with each other, can create time. Time machine of the Creation in the control of Man. But, we don't have fast enough computers, so, we have developed the technology for Man to understand on the level << Break in audio. >> of emotion. Where we control Knowledge Seekers that they become the captains of the future of the Space Technology, in Time and Space, they understand how we control. It's easier to control seven, than seven billion.

In the sessions, which is set up, we were supposed to do it tomorrow, we'll do it on Tuesday, because, some of you know, it's a bank holiday, and space time of year, some of the Knowledge Seekers who are participants are not available, or they are celebrating different things of the May Day holiday, so, we move the time to Tuesday, because we have different countries, celebrate different days in between. So, when we meet you lot with the seven participants of the last time, you choose yourself a captain. You'll be sent a list of seven captains, who do you want to trust your Soul with, that he creates a time, place and position, and, can we all meet at the same time. Selective time by the captain brings Position and Possession to all the others. This was taught very early in time, in the Knowledge Seekers. Trusting your captain, trusting the man, this time you trust the captain, (:36) you go in with your luggage and the suitcase and the chart and the arm on the aircraft and you think he'll take you from New York to Washington, nothing will happen. You trust him with your physicality. Now, you have to trust him with your energy, with the Soul, with a combination of the emotion.

Today's teaching will be a watershed in the world of science if you understood. And, if you haven't understood, it's another teaching. For centuries and decades, what's on the picture, on the screen, will become the blueprint for the evolution of the science of the society of Man. How we'll travel? How we'll do it? Because, without the emotion I cannot create the Position and Possession. And, what's the use, if I don't know where I'm going, and what Time I create in the life of that time for me? Because, from now on, my time is a zero time, not the time of the place and the position. Because, the place has been there, I am moving into it. Or, if you are the pure Soul, you create the dimension of the

time, you become the star. That's your position, possession. And, place in the time of zero of the time in that place in the Universe (U). This is why we taught so much, past two or three years, about the Soul, about this emotion, about the STP. Because, if something happens with your emotion, instead of end up on planet Zeus, you end up in the center of another Galaxy, another Universe, and the rest of it.

And, this is why, in the demonstration of the past two years, playing with you lot, who came every month, who let us to play with your Soul, we saw how you lot panicked, how you lot go, and then suddenly, one of you panics, the whole lot of you fall. (:38) We see it clearly. So, now the structure it goes, you can travel with a donkey, you have a choice with a, what you call, UFO, and you thought they are very advanced, then you moved to another dimension of traveling as a transmutation. Now you travel the way the Creator travels. He creates a time at the presence of his energy, at that position you manifest yourself with a ?? position of time zero to start.

Then it comes a big question for Mankind, does time exist? We live in the time of the creation of planet Earth, we are not living on the time of creation of us. And, once Man understand this, you understand why this planet is the greenhouse, is where we grow the seeds of the STM for different dimensions of the Universe, as this dimension, this energy given to it in a ?? position and a place, will start the zero time, start of a life, start of a cycle. This is why we have a big conflict in the world of science, Earth was created now with a new idea, 4.5 billion years ago, but up to now everything was created 4.5 billion years ago, now we see 13 billion years and then it happened for the Earth to be created, billions of years later, did it happen?

Or is it all place and time, all created instantaneously through different fields strength of the Position, Possession, Place, that the Time has become one, and the rest is all? Did the fields of the Creator travel billions of years to make Earth, or was it there in a Position and a Possession, (:40) as one cell, the rest solidified into it, in a way, manifested into it. And is there parallel Universes there are parallel galaxies in respect to each other? We talk about a lot of things, we see the mirror reflection and the rest of it, but now you have a machine, you can create it and change the evolution of the science of the Man. For the first time you understand the creator of time is you. At the fields, the Magnetic Gravitational fields, in the plasmatic condition, of the consideration of the position and the place, you create, you start the zero time. And if you want to keep everything in the three, position, place and the possession, then in changing any of the three parameters, you move the time. You become time travelers through the true essence of transformation and transmissions of energies, and not by wormholes and dog holes and every other thing which you never understood.

In the exhibition of 2025 in the city of Beijing, we try remotely to show you how. In a way we allow people in the, come to, some of them to dictate and see what does, and if they change things. For the first time we show you the what we call, the traveler of time, the space gap system which has been developed and we control majority of its outcome. In a way if you remember, I showed you the gases last time, and if you remember I showed you the material last time. There is a purpose. We don't deal with the matter state,

we deal with the Energy state. (:42) But we have to understand by the Energy state in matter state is, that we decide for the combination of ?? Possession and Position of time.

Today's teaching will change the world of science if the scientists understand how the world has changed. Do you want to see the beginning of time, than being part of the time which is created on the condition of the Earth, at the same time as the rest of the Universe? When you have a moisture in the room, and you suddenly change the condition that every space has exactly the same temperature and the pressure, and then you suddenly change one of the parameters, you see the water crystals. You see bits of water, ice hanging and then you see that's exactly what we do. So in a way, if we freeze time, we can see different dimensions of time across the Universe.

Does multiple time exist? Yes, if you understand how. If you understand it's a combination of interaction of the three different elements in plasmatic condition which each one has a Possession, Position, and a Place. Then the whole Universe suddenly sparks out with thousands and millions of stars and galaxies that we never understood, we're trying to adjust it, 4.5 billion, 13 billion, all created at the same time as the fields of Universe fix this ??. What happens if our Universe moves in a different position than the external gravitational magnetic field of the Universe, according to its position changes, our time will change, our manifestation will change, our structure will change. (:44) It's exactly like bringing water and suddenly putting it in the freezer, different condition.

Space and time is the place where the STM, through the emotion, control of the emotion of the Man, will dictate the manifestation, what we call the position. My position, I am in the figure of Man. I've changed the strength of my Soul, I appear as a fish. Many of you have done this, but you don't understand, but then you're at the same time. If you understood that you closed the door of the time, you locked it, and you changed the, what we call, magnetic field of the ?? possession, you have changed the Position, you become a dog. I saw myself as a mermaid, because half of my structure still connects to the dimension of physicality energy, the other half has moved on. I saw myself and others in different shapes and forms. Because now you have locked, you put your foot down, you're still connected, you're still part of physical life of this planet, time and place and position, but you see another time space.

Because, what we did it last week, in the latter part, we changed the enlightenment, and some, God received it, they moved on. Once we create the condition of enlightenment, there is no need for fear, there is no need for peace, there is no need for love, because everything below it is in it. Now we have a choice. We become a time travelers, we become what we call, transmuters, (:46) we become transferers by UFOs, or we become Man still pushing the rockets, the cars and the rest of it. We can choose any, according to which one we change, which dimension of the fields of the transmutation of the transportation of the Possession of the Position, we decide. Now you understand why emotion is so important, because the emotion dictates the place, the position, and the possession, which in interaction with each other creates the time. The time machine is in our hand.

Many of you will travel through this time. When we bring you in on Tuesday some of you will see that. You will receive an email, respond to it, who you want to be your captain. We decide two options, if we see two men with one of you, we push you to the other one, you have to trust us. You Knowledge Seekers from China, Knowledge Seekers from Australia, Knowledge Seekers from Canada, from South America, from Europe, from Asia, you play the game with us, now it's time to enjoy the game. Nothing is coincidental. You use the words, for me to tell you, come to me to Linz, I use the system to give you the dimension of the emotion. When Knowledge Seekers who were with us, explained something to us, they don't know what they explained, but we know what we need for them to get that feeling, that emotion. After today's session, we have a meeting with them, to prepare them to become the captains of you lot on the Tuesday session. (:48) And these seven captains will stay for life of the testing with us, we don't change again.

And, in that position and position, we bring the operation of the seven captains, to the members of the Universal Council, it's their decision how they want to interact with outside. We'll see this in the next 12 months, maybe more, maybe less, depends on how the evolution of science comes. Now, was creation of the time and time travel, different times, different parallel world, parallel things, all make sense. You change any of these parameters, you change, you build reactors, which we talked as an Intro, for each one of these, which creates different condition of, your time will change.

Now the Man has a technology how to play with the Time. Those of you who will be allowed to come into the exhibition, we'll give you a chance to play with time, you will see the feeling, you will see how ?? plasma changes according to your wish. Time does not exist, unless you have a place, you know what you want to appear as, what field it's going to use to, and if you change the other three, the time will manifest itself. You call it a dream, now it's a dream machine. (:50)

The process of creating and playing with time in the essence of plasma condition is the way the Universe creates time for us. When I listen, they say, "Oh, it's taken 5,000 light years to get here." Oh boy, our scientists are not even at the infancy of the Knowledge of the Creation. They're stuck in their little doll toy, what I call, we have, we call them, specific name for them, and repetition of the same habit to confirm their existence. Autistic in understanding the Knowledge of the Creation, and repetition of the same mistake to confirm that they are correct. As Knowledge Seekers, you made different reactors. Now, if you understand how to control each one in a specific way, you can create time, move time, see how it looks in 10 years time, how it looks in a thousand years time.

I always said, "You cannot see the past." But, if you know how to create the time, you don't need to go out and look for the fraction of what it was, as the dynamic structure, but you go to the time when it was created. Can you influence the future of past to the future? Again, it depends what emotion you put in the dimension of the Creation. In a way, if you play with the possession and position, you can play with emotion, and that emotion creates a time, which gives a time and the place of it. (:52) In understanding, possession

is the Soul, and position is the STP, then you have to manifest the time, but you have to have a time to manifest yourself. I made Man in the image of Myself, but I gave Man the knowledge of Me to make My image.

The knowledge of the Space Technology is according to what I said from the first days, according to the intelligence of the Man. If you understand, you are not prejudiced, and you are prepared to understand the Totality, and not draw a border, "This is how much my intelligence is, that's what I want to understand." Then, if not, you become monkeys, see one do one, without understanding, and then we have the, what I call, the feedback and the kickbacks of the future.

The only way we can stop the killing in the race of the Man is to move the time and change the Possession, because, the Position will be still a Man, and the Place will still be there. Changing Gans's won't do, changing the whole structure of the Time on this planet will bring that Position where the Man cannot even have in his memory the dimension of destruction and killing, which has been ?? inhabited. Now you understand, why at the beginning I said, we bring the biggest change in the world of the knowledge of the Man. Because, the knowledge of time, is the essence of the creation, and the condition to manifest, to be understood, to exist, to be part of. (:54)

Then, you understand, why half of the Universe looks dark. As is, in another dimension, in another magnetic field strength, and it is in another time that is not open to us. If we change the time, in a combination of the structure of our system, we can see what is in that dark position, the place, position and the possession. If you don't have ?? this free, you can't have time. If you are not a Man, you don't exist, time doesn't exist. If you don't have a place, you cannot manifest yourself, so time doesn't exist. If you don't have a strength to show itself to be, you have a Possession and a Position, it never existed, so the Time is zero.

But, what happens, when the knowledge of the Man comes to the point, that he can play with time? That's another chapter in the Knowledge of Creation. Because, when you fix the Time, you fix the Place, Possession and Position. Isn't this what we do, we call it the summer, winter, now we fixed it. This is what's going to happen in the summertime. Spring comes, the flowers come, we feel better and the rest of it. We have so much tuned into it, that even those who have no essence of another dimension, all create their own offspring's, (:56) at that given time, we call it spring. Maybe for the first time you understand, why even, what you call the spring, why you call the cycle of life, the start. Because of the Magnetic fields, constantly coming to the same position, creates another condition of the ?? Possession, which creates condition of Place and ?? (Position).

My hope is that Mankind will understand the creation of the ?? the space gap, the condition, and will not abuse it. Because, this is the key to travel the span of the Universe without rocket fuel, without UFOs, without transmutation, but understanding the process of the creation of time. If time does not exist, nothing does, there is no ?? Possession, there is no Position, there is no Place.

In one word, if you understand the teaching of today, and truly be able to translate it in the dimension of the work of the physicality of the Man, you will find how standing still at this time, you look like a dog, cat, stone and everything else, and carry all their emotions, even though you still remember your Soul is the STM. (:58) I made Man in the image of Myself, but is Man knowledgeable enough to understand what My image is? Does he trust in itself? Does he have the capability to trust in himself that he can change the time? Now you understand how easily Man can make his time travel, interfere with time of itself, and in that position, and possession and the place, create a new dimension of manifestation.

I hope you understand what this means. I hope those of you who become involved in creation of time, and time travel of the future of the Man, respect, understand, and be grateful for the knowledge you receive, that it does not start another cycle of killing, as the Man has got used to it according to the time and the place of this planet, where the place is wrong, but the Man and his Soul is perfect. Maybe it's time to move the Man's time of manifestation, or move the Man to another place that he can live through the STP, and physicality of the Man, and the STM, in a given new time. Now we have the technology, now we have the machinery that actually creates ?? time. This machine initially, originally was made, round about 2014, 2013 and before. (1:00) To cover it, I called it the Energy ?? Unit. But in fact, the way it's designed in the layer of instruction, creates a combination of time.

Those of you who've come to Beijing if we are lucky enough, and the time allows, understanding the position we have taken, will some of you be able to change some parameters, and then ?? fill within you what time you have created, what energy you have created, and connect yourself to the material of the time and the place and the position, and understand you are thousands of kilometers away from the Source. If you can cover that time, you can cover the full span of the Universe. Always has been the dream of the Man, a Time Machine, now Man has the technology to create the time, that it becomes his machine, to be able to travel the span of the Universe. And, it's a gift from Keshe Foundation and Knowledge Seekers to Humanity, as we are all the tools to bring that position and possession and time, for Man to move on.

I hope, my deepest wish, is that no Man abuses the time. As, if you abuse the time, you have to 'stand the time,' what I call, understanding the mistakes one has made. It's the way the Creator manifests, and it's the way that parallel worlds, dimension of field strength exist. (1:02) And you have to understand, the parallel world of different energies, it brings parallel worlds of ?? light.

I hope, sooner than later, Mankind will be able to move, to bring this new time and dimension to us. And this is why we decided, now, when I teach like this, as you've been with us in Vatican and others, thunders break out of nowhere, the sky has opened. Knowledge of the Man is pure. Try to understand, the Knowledge of the Creation, and into what you understand, is where you'll be. Like a donkey, a rocket, in the UFO, transmutation, or a traveler of the time. And this time we have given you the full option. It seems a lot of you still like to be on the donkey. And the others don't exist, are fairy

tales, because, don't carry the knowledge, the trust in the information, and knowledge of your own creation, and nothing else.

In the coming time, in the future, and in the future teaching, I try to bring that, this down to the point, one by one. How you control the time, how you change time. And, you will see what's the future of 'me' in Space. Why I was born? What's the reason of my birth? And, where shall I end up? And, what will be in the time and the place where I will be? As I can change it, during the time when I have the chance to change the dimension of physicality. (1:04)

I hope, Mankind will not abuse this machine. Because, Mankind has to understand, how to control the time of existence. As we have had this machine for years, I put it as usual, right under your nose, that you never saw. But now, Knowledge Seekers and scientists have reached that point, that they can take the time and place, and creation of the fields that changes the time. Place, possession, position, and with it come the time. We go for a break and come back. And I hope, many of you will understand the world of science has changed. As Man, could never understand, and tried many times, to change the time. But now, everyone has the tools to change that time. And, the way, look into the future of their Soul, as an energy plasma, Cosmic condition, and actually, physicality of the Man, which is hard to move. Can we go for a break, and come back?

>> BREAK >> 588 KSW May 1, 2025 (1:11).

K- As usual, we always do, it's very quiet (hard) to keep Mr. Keshe quiet, isn't it? As many of you know, the financial arm of the Keshe Foundation we set up some years ago as Markray Corporation, (1:12) has entered the dimension of the larger scale, what we call, commercialization and bringing the technology that every man on this planet can benefit by it. And as we have been always supported by the Chinese community in different levels, we planned this some months ago and we moved everything in, that between the 10th, 11th and 12th of May, in 10 days time, we kept the time short

deliberately, we even kept our closest Knowledge Seekers who work with us, in the dark, because it could have created different problems for us, into position to bring the knowledge forth in a public presentation.

The public presentation is primarily set for the world Ambassadors, in London and in Italy and in Belgium in past 10, 12 years, we set up different ambassadorial position. We have positioned ourselves as a presentation in a very small space in the ambassadorial area of Beijing, which means any embassy within 5 minutes can be there. We know the Russians, the Americans and the, what we call, Japanese representatives from the embassies will be there, and more or less, it's in the hand of the, what we call, the Chinese community to bring the rest of the embassies in. But on the other hand, we have taken position in one of the most prestigious places in Beijing, (1:14) which this structure has never allowed a presentation of this scale and this position to be used for the premises. As of the respect for the Keshe Foundation and the work we do, and they know us for such a long time, for the first time the International management of the group has allowed such a small exhibition to take place among the most prominent positions in Beijing. Even the management are in a way surprised that the head office has accepted with the presentation, such a presentation.

We are not set out to bring millions, we are set out to bring social media, to bring it to millions. The display is behind a large scale window that anybody from outside can see. We have set up screens that one can directly see. And we wait and we structured ourselves in a way that the social media will bring the news out and to start showing. In so many ways, we take the message right across. It's the responsibility of you Knowledge Seekers to inform the social medias, to be in Beijing, to pick up the stories from Beijing, and we post directly on X and other social medias, directly, on a continuous basis, on a daily basis, if we can. And I'm sure that the social medias will pick on it.

The purpose is two things, launch of Markray in the massive, large scale as operational arm, financial, commercial arm of the, what we call, new technology development. (1:16) It is important for Knowledge Seekers which, who, bought shares, I know many of you have bought many shares. Make sure your shares are physically certified in your hand, as there are some fake ones around, because people bought and sold fake shares. If you have bought any shares in Markray, please make sure you have a solid copy from the agents of the Markray Corporation from Stock Exchange, or what we call, OTC.

You got to understand, we are facing a position to bring the change, and everything has been set up to bring that change. Some of the close people to the Keshe Foundation know, they've been aware of this move, they've been aware of coming up, over past months, and you will see the Board of Directors, closest allies and friends, and the people we trust in 100%, will be seen on the scenery, and with their help we bring the change. As you've seen on Markray, one of the highest ranking diplomats, highly trusted, close friend of mine for years, has been appointed as CFO of Markray Corporation, Ambassador, ex-Colonel of Central Bank of Sierra Leone, and the man we know for years, even though he's very prudent. If you go on the social media, they say, he's the only ambassador who never gave a function, he did nothing, because every cent to him

was good to be spent for his nation, than giving free lunches and dinners, trying to be sociable. He always said, "They want free dinners, the American Embassy is open every day. I don't need to, I save the money for my nation." (1:18)

Being a Governor of Central Bank, and he's accompanied me to Sierra Leone, and many other functions, with the permission of his President, has been always, "My nation comes first, why should I spend money, when my nation needs?" And now we've seen the same pattern, some 12, 15 years later, in Bofasa. How the Niger and other Mali nations have taken, nation first. The richest nations on the planet, supplying all the metals of the World, are the poorest. Now they're taking over, they're using it to feed their nation, and it was his motto. Years ago, when I sat in his house with him in Freetown, he said, "I don't need much, as long as my nation has to eat." And as you've seen, he's been appointed as a Chief Executive, Financial Officer of the Markray, and we are in the hand of one of the most prudent Man I've known in the World of Finance.

You will see the new Directors of the Keshe Foundation appearing in the next few weeks. And each one, we trust with our life, with our heart, and we know them as Knowledge Seekers. The operation of the Keshe Foundation is in its commercialization, and the future of Man sits in all understanding the technology. I hope we set out to show, we know we'll have huge, huge resistance from Governments, don't want to see it be done, as we know the President of ?? had over 20 assassination attempts on him. As I was talking to a diplomat, he said, "Mehran, you had 60, better watch for more. They're coming after you because they don't want to change their status quo, but you already have changed it." (1:20)

It's the responsibility of us to bring the change. Teaching is (have been) done for long enough, and now it's time to bring it to be useful, applicable, and we have found a number of very solid financial groups who will work with us to bring this out, where we are the provider of the knowledge and not running of the structure. The changes will appear in the next few weeks and months, as you will see, but do not be surprised that many strong groups stand behind us to bring the change, and I thank many of you who brought us to the help. And now you understand why I said many times in recent past, we had to lose a lot to learn how to do it without losing, and now we are in that phase.

Understanding the knowledge is one thing, bringing it into dimension of the operation that everybody can enjoy is a different thing. We had people right in the heart of the Keshe Foundation, in China, outside China, in Europe, and people close to me who betrayed us. They sold us for their own personal reasons and their own benefit. We wish them all ?? bad, because their greed, their personal metadata, brought us to where we are today. We would have taken a different path, would have been different. But we are where we should be, and I thank many of you who have been there to support us. In a way, the whole of Knowledge Seekers thanks you, to bring us to where we all believe, and in two weeks time, in the beautiful city of Beijing, we'll see the change. (1:22) I'll be in China at that time, and do not expect just because you are Knowledge Seekers, you are allowed to come in. The space is small, the position was chosen, not just to be there to possess. If you come in, if you come to Beijing to see it, stand behind the window, enjoy

the knowledge, and be part of it. The more of you come, as we could, if you get the permission to allow you in, spread the knowledge, because it's your turn, I've done my side, and the Knowledge Seekers behind us have done their turn, and their ?? time.

As usual, we carry on with our work, we don't stop. The seven people who've been with us, immediately half an hour after the close of this session, these come back from the same channels, that we can test, we want to understand more, in how you take your position, at two o'clock on Tuesday, as the captains of the trusted Souls, by the Knowledge Seekers, and where you going to take them. If you don't have trust in yourself, you cannot guide the others to ?? other positions you don't.

As usual, to celebrate the launch of the Keshe Foundation, on its financial arm, the, what we call, the financial side of the Keshe Foundation, has opened a very nice thing, says, "It's a gift." We put it as a Cosmic Surprise, if you go on the website, you will see it, it's been posted today. They've done a very nice thing, they categorize it in certain amounts, and this is a surprise, what you're going to get, as a knowledge package. Maybe, in a 250 package of, you take, could be a Cosmic Ray, (1:24) it could be a Communication Bundle, and one you take, two and a half thousand, you might get just the two and a half thousand worth of, whatever it could be. We decide, but the whole thing was the basis of trust. Are you in it to trust it, or are you in it just what's in for me?

Go on the website today, it's been put on, there's a limited numbers, in time you will receive, whatever you pay for, is a surprise, because your 250,000 purchase, could be 25,000, could be 10,000, could be 5,000. It's been put in there, how you trust the work of yourself, and not us. And it's very interesting, how we set it up. And, it's a big change, and in the coming days, watch the Space during the exhibition. There are going to be some huge announcements will be made which bring the change in the structure of the Keshe Foundation.

I hope you enjoy it, as much as I had in the past years to teach you. And, you enjoy it, as much as I can share with you, as a knowledge of the Keshe Foundation. And, we will not stop the teaching, just because we're going into International commercialization of the technology, with the support of local, national, government, financiers, and the rest of it. Because, that's not our job. We are Knowledge Seekers, we teach the knowledge. And to bring it, that everybody uses, is the job of the financiers.

I hope you enjoyed, and I hope you enjoy. (1:26) Those of you who can get yourself to Beijing, do so. That'll be the biggest surprise. We have explained to the confirmation of what you'll see, on the social media, and from the Keshe Foundation channels, what will be there to be seen. But, don't expect to be there, and to do, because you are there. You are there to support, to spread the knowledge, from all over the World to it. And, be there, to bring the change, because every Soul counts.

Any questions?

Yes, it's called Cosmic Mystery. It is mysterious, what they put in that package.

R: Okay, I'll put that, I'll post that to our chats here, so that people can access that new posting.

K- Some of these packages, deliberately, as the structure, you understand, when you receive it, that allows you to move into the time travel structure of understanding of Cosmic Rays. That's why we keep it a mystery. But, doesn't mean that all of you are going to get it.

R: Now that you mention Cosmic Rays, what is that interaction between what you taught today, the place, position, possession, and time, that interaction, that tetrahedral sort of configuration. Now we have Cosmic Rays entering into that scenario. How do they interact with those entities?

K- Cosmic Rays. Radiation comes from the matter state we are used to. Cosmic Rays are the rays which come from plasma, (1:28) and they don't come from a matter state. Nuclear radiation comes from a matter state of the field. Cosmic Ray, like the ray of the Sun, comes from the plasma condition. And it's understanding in a deeper way, the essence of the creation.

We don't create if you go back, even in the 13 years, but we just listen. We speak about this in more or less the same way. You are deaf, we are awake. You couldn't understand, we try to bring it in, in different ways. And the plasma and the Cosmic Rays and the Cosmos has been always, it's been part of, in the background, in the front, of the teaching, always been there. How we brought it all to separate, what is the matter state, what's the Energy state. Energy state fields are all from Cosmos. It comes from plasma condition of the Universe. Everything else done comes from the matter state. But, we have (taught) over years and over time, about the fields of the Universe. And that's the difference. Cosmic Ray is connected to the energy of a plasma. The other rays you talk about, is what you get, X-rays, gamma rays, whatever, is connected in condition of the matter state. Even though, the interaction of the Cosmic Rays can create in Space the radiations. (1:30)

R: So, Cosmic Rays would have an effect on the Position, especially being that of the physicality. And, what about the Possession or the STM aspect?

K- Of course, we change it with the emotion. We change that with emotion. You see, this is what I was explaining, very recently. We, we assume, we see, we observe, that the Rays of the Universe go in from the South Pole, and we have a huge South Pole ice. And they come up from the North Pole, we have a very small size ice. And we always say, the temperature on the North Pole is between 3 to 5 degrees higher. On the Sun, it's 15 degrees higher than the South Pole. And, the addition in the energy of the system. We never could explain.

Now, we understand the addition in the energy comes from the extraction of the fields, more or less, from the radiation fields of the Cosmic Ray inside the body of the Man, in

the body of the planet, which we call the central core. Where, we always considered is a metal and rotates and creates, blah, blah. But, in fact, is a plasma condition of the Hydrogen, or fundamental element. Which creates fields at the strength of the absorbed or interacted Magnetic field from the South Pole, adding to it with a higher strength to leave the North Pole. (1:32) We have never, ever measured the actual Magnetic, singular Magnetic field, which goes in from the South and comes out from the North. Now, if we create a condition of the creating the Magnetic field strength of what goes in the South, mix what with the technology we have now, our Fields, we'll get what comes out of the North Pole. Which we never had that knowledge.

We always used the Universe, Universal materials. We never worked with the Universal materials. And, a little bit we've done, we call it solar cells, we tried to get it, to use it for ourselves. But, we never actually gone into, to work with them. And, this technology, what we call, Plasma Technology, what we call, Cosmic Ray Technology, what we call, matter state Technology, each one has separate parts of this structure. And, we have to understand them separately. We, we become very good in the matter state, we ignore the others, because we don't understand, there's something wrong with the people who do it, or they are very, very intelligent. Those of you who moved from matter state into nuclear, to understand the radiation, whatever, you know, I always said, "Why people respect Nuclear Physicists?" Not because of our knowledge, it's because we killed thousands of you in one bomb called Hiroshima. It's the fear of respect, not the knowledge of respect. With the Cosmic Ray Technology is, respect of the knowledge.

I always say, "If you've been around me for decades," I said, "You know why you like to listen to me?" "The minute I summon a Nuclear Physicist, oh, he's dangerous, he understand more, we better play with him." (1:34) Because, if Americans want to use a Hiroshima bomb, a Nuclear Physicist, a Chemical Physicist, Engineer, what difference? You are categorized out of the fear of existence. The knowledge of Cosmic Ray should be categorized of beauty of the creation. And that's where the difference comes. And this is where we have to understand the difference. Once we understand the difference, we are all Nuclear Physicists. When we understand this, we are all become part of the knowledge of the creation, which is the Cosmic Ray rays, which comes from Cosmos, that's what it means. The essence of Creation it's not something you created. We never understood. Now we understand, and we're putting it in a way that everybody else understands it.

Any other question?

Do you remember Rick, when we start teaching about the Gans's the mayhem we had with the Knowledge Seekers. "Oh, he's gone from Nano technology to this." And when we went to the Soul, "Oh, what's got to do the Soul with it?" Now they know without the Soul, you don't have the position and a ?? possession, which is the emotion. Without the emotion, you go nowhere. You have no time. Now let's see what cries we get with this creation of time.

R: Yes, indeed, it's always a challenge that way for the new knowledge coming through.

Any questions? (1:36)

K- ... I would like to tell you something very interesting. Sorry, it's totally out, but it brings a lot of things. Early this morning I received a coded message, for in a way, a message from Ayatollah Khamenei of Iran, to how many of Iran people we work with. And the message, very direct, addressing me in name, says that you see how the God is taking revenge on the Israelis, the whole of Jerusalem is burning, and the rest of it, for what they did to the Palestinians. I read this message about two o'clock in the morning, and I sent a message back to his Excellency Ayatollah Khamenei of Iran and his offices, who are part of, we work with. I said, I can release one day the Farsi text message of this. It's a voice message, because I received a voice message, I responded back the same.

Now, the message was, now you see these are burning, for what they did to the Palestinians. I responded to the Ayatollah Khamenei in a very direct way. And I know they're on the line, they listen. I said, I always supported the cause of Palestinians. Not because of what they say, they are terrorists, but they as a Human, they are the origin of the faith. All of our religions comes from Palestine. And, for what they did with the Christ, in crucifying him, they took the love of God from them, and they became banished, and no homeland for thousands of years. And in what the Palestinian, what they did to the Israelis, (1:38) they were the Palestinians in the past couple of years, and as I said in the teaching of the past, I said, "Go and listen to my teaching." Few weeks ago, that I have banished them to the far corners of Universe, that there is no life, that they can suffer, with their own, what you call, pain. They have no one to harm anymore. And, I said to them, "Now you understand the message, and the Messenger." If the banishment was taking the love of God from them, this time we banish them to a point.

And it comes to a point, that we should not rejoice with the suffering of the others. Does not matter, in what position. We can remove those who bring the suffering, but we do not rejoice in their suffering, because they bring it to themselves. And the same will be for Man and Mankind, with understanding of the time, position, position and the place. Any of them, you do wrong in, you will get the wrong end, and you have to balance it. And this is why it goes, literally, goes with the teaching of Mitra, blessed is her name. Do good, act good and think good, because all these are the pieces of place, position and possession, which make it with it, brings a time of joy, time of existence. Carry on.
(1:40)

Q: Yes. Thank you very much, sir, for all these amazing teachings, freely for years, all you do for us. And, we really have to read this teachings again and again, to really absorb the breakthrough about time. And I congratulate you and all Knowledge Seekers, and I think a whole lot of countries who are protecting you. And, so, well, in regarding to my first question, I think you answered it, because there was a triangle, and the first was, I mean, there was a second one was Position, and the third one, I think it was Possession, Rick said position was the third angle, the first one was space, I think, but the triangle you put, it was, anyway, the third one was the position. You made a triangle at first. How

in one space there is the position, in what form we are here, and then a time, and the third one was, you said possession.

K- You have the place, you have the Place and Position, and the Time. (1:42) This is what we always referred in past months and weeks. The third place, which is the time, does not exist. It's like when you have a Star Formation, the fourth place decided by the interaction of the fields of the three. Now we have the condition, we can create the fields of the place. We can create the Gravitational Magnetic field of the Earth. We can create the Gravitational Magnetic fields of the body of the Man, because that's the shape of the Man, as a structure. But now, we have the possibility to change that position, with the field strength of the possession. What is possessed that creates that position, or that place. But when you create a field positioning, and a field ?? possession, and a field of place, which they interact with each other, they create their own time.

In a way, if you've been, if you ever worked with a Star Formation, how you change your parameters in your reactors, decides on the field force, we put the fourth reactor, to enforce it, to lock it in a position. If you don't put a fourth reactor on the top, it finds its own position. You never fly, you never separate from the Earth, or wherever you are. But, now, because we haven't dictated time on top, because even time itself is made of fields, because as given time, given what you call, strength magnetic field, a time is created. Now we can play with time. And this is the beauty of the understanding and the knowledge. (1:44) We can fix the time, we all live as we are, and if we increase the energy of the Possession we travel with the transmutation. We go to the lower level, as a Human, we travel in a physical dimension. That's why we taught about the Soul, because Soul is the only part which the fields of, can easily be manipulated, because it's one energy source.

Position, it depends how many molecules and what you put in it. .. and the Place is, depends on the Cosmos. What is created in that field, is a, in a way, magnetic field, a Mass and a Weight. And in their interaction they create a Time, because it. You see, we call it the birthday. There is no birthday, it's actually a manifestation of a body, entity, out of another. The child is born, an event taking place in that position. So, the time only exists when the three come together. When the place is there the fields are there and the child in the body of the Man as a human is created, and the time starts zero. But we have no say in it. Now understanding, we can change all three of them, with that we can produce any time. We can dictate time. I can dictate the time, what will be in a thousand years. Because, everything which travels in that thousand years will be at that position, at that strength. What I decided, it's my wish. And then you understand why wish is important in the whole structure of the interaction of the fields. (1:46)

We don't 'time travel.' We see the time, which is, we travel to be in that position of time. Because, everything will grow in that time to that position, and all the interactions will be there. We cannot tell the future, but the future is told, by interaction of the fields of it. It's very much, I can explain it, it's like, nowadays, they take your picture, and then they say, "How you looking forty years time?" Now we have that capability to, how we'll look, we

become travelers of time. And this is instantaneous, because it's plasmatic, rather than waiting to age a hundred years and die, and the next child be born, and the rest of it.

Q: And, what about that zero time, zero time creation?

K- Zero time creation of me, could be time of a thousand years for you. You understand? Because I decided, how you look in a thousand years is where I start, start my life there on. This is why we have problem with the whole of humanity. Because the STM is ?? indented, is damaged, by the behavior of the physicality, place and time. The place has not provided what it was supposed to do. Satisfy the hunger of energy, or ones ?? What the position has done to compensate, it kills for it. (1:48) And in a way, the Possession which is, we fixed it, because you need two arms, two legs, two eyes, blah, blah. So, it follows the same. If we change the place, magnetic field energy, the, what we call the Possession does not need to do anything, because it has everything for its confirmation. So, the Possession can be any field, the time will freeze, the time is, that's what it is. It's like you put a magnet in a three magnets and a 4th one in the middle. You just try one of them, move them stronger or weaker, forward or backward. You see how the time floats up and down, how your magnets start to vibrate.

Q: Yes, so Possession is how we are. Hands and legs.

K- Possession is how fields of us are what strength it is.

Q: Thank you, thank you. Very, very interesting. So...

K- Those of you who come to Beijing, if we be able to get you to see or to try, we can talk to the Center and see what you consider, what you want to do, what reaction it'll show. On the energy level, on the matter level, on everything else, what you produce, and what's the reason. That's why I say, it cannot produce Nitrogen in the planet Zeus, so, amino acid of the Man cannot exist. Now you can dictate what, and you get the outcome, and see how it looks this material. When you move it to another position, then you see the manifestation of it. (1:50) ?? Does it look like a dog, or is it a cat?

Q: Yeah, we have to reset everything again. We have to start...

K- No, we don't need to ?? do in addition to the knowledge, nothing... Did you reset anything when you learned about the Gans's? Did you reset anything when you start learning about the Soul? It's just addition to the knowledge, we have to be open to start further, higher, to the next level... Nothing is to be reset.

Q: Yeah, I meant mentally, we have to be prepared for new way of parameters of thinking. Thank you.

K- ?? Don't worry.

Q: Second question, which I have for some time, is, you said that every field has its Twin or parallel, in the last teaching, if I understood well.

K- Yes, yes.

Q: So, is it possible that we as human being, which is a whole lot of fields, have a parallel of us, in another dimension, which go, which continue together?

K- Depends if everything else is kept too. The parallel we're talking about is parallel but opposite. A Gravitational field has an opposite direction Magnetical field, and runs parallel with it. (1:52) It's not inside it, but the interaction of the two, creates a balanced energy, what we call the position, or MaGrav position.

Q: Yes, for example, for those people who have imminent death, and come back and they say they have seen the whole life coming and passing, other than video, but, is it that parallel world, which they are living, when they go the other place out of this body? This parallel life, which is shown to them?

K- The possibility... there are a number of possibilities, this what they see. And depends on the field and the strength and what the, what the position is. If you go through a lack of energy in the matter state, and you cross the line of energy transfer, where you see the field strength of the STP interacting with the STM, and you see the light, bright light, which is exactly what we see day light of the Man, it's different. Then it depends, do you go in what I call, physical coma of the Man, and you go into the memory story of your life, and the hard disk of the physicality. And then, you have access to hard disk of the energy side of you, the same as you have in the matter state. If you have a memory of what you did with your mom, ten, twenty years ago, your Soul has a memory of the same thing, but in a different package, because you saw mom did that to bother you, or to make you happy. It's another level of information which this carries. You understand? (1:54) And, this is what people, in which level they enter, and because we have this memory disc of the physicality, of the hard disk of brain of the Man, we record both side of it. But we don't distinguish between which and which.

Q: Yes. I just thought, if we change the parameters of triangle, can we change the position of the STM?

K- If we can change the time, if we can change the place, and if we can change the position, yes. Now, everything is up for grab, everything is up for play. The hardest part will be, who will understand the game of time? Now we have a time machine, which in fact, is not... We can create the plasmatic condition of the Place, we can create the plasma Position, we can create the Magnetic position of Possession, but how you create the Magnetic field of Time that you can change the time, and then you see what changes is a different game. We are about ten years, maybe, far to teach it, maybe more. Because, if you understand how to change the time, you play the game of the Creator.

Q: Yes, I hope we'll be there, and see these things. Thank you.

K- Oh, we will see, thank you very much.

Q: ... (1:56) I believe Possession is not the perfect word to explain the concept, and introduces a little confusion. I'd rather use plasmatic domain, referring to a bubble area, zone, or defined spatial, temporal, or density of plasmatic field dimension. Is this a correct interpretation of the Possession definition or concept?

K- We can interpret what you like, if it brings you to understand what's our creation, call it 'doodle-doo', doesn't make any difference. It's understanding, Possession is the controller of Magnetic Gravitational field strength change. You are capable to change field strength. And changing of field strength does not exist in vocabulary of Man, because he never understood, can. But, in the new systems we developed, we can change. So, it's a parameter unknown, so how you want to define it, a parameter which can physically create. The Possession, or change of the field strength is one of the biggest most important factor in the World of Creation. Otherwise, everything will be constant, because it's one field strength. (1:58)

In the world of magnets, you get a steel, you get a, what you call it, a piece of metal. (One second). We produce magnets by changing current and the voltage, and I don't know if you've ever done this. Because it's something I used to play with a lot. I'm sure Rick and other people, knowledgeable people who are here can tell you. You can change the strength of the Magnetic fields, a magnet, a piece of magnet, by amount of the currents you, and the voltage you put through it. You can make it stronger, weaker, according to the, the, the machine which make magnets, and decides the strength of the magnet.

It's the same in the world of the energy. But, Man has never had a knowledge to change the strength of Magnetic fields. Man has managed to create a huge magnets, forcing them to go as fast as possible by using another dimension of fields. But, the Man has never managed to increase a magnet. .. by put two magnets just sitting there, and suddenly the energy increases. Because, they are dependent on a matter state, which makes them the fields to be radiated. If you can change the Magnetic field of the plasma of the elements of a solid magnet, (2:00) you don't need to put current through it. And this is what we're talking about. So, we can change the plasmatic Magnetic fields, and there is more or less, to my knowledge, there's only one way to be done. And that has been set up in the structure of the, what we call, the new Space Reactor.

Some of you who will have the pleasure of being able, if you can organize it, it can be done, to literally, physically request and see what's the outcome. It's just you go, there's a, there is a, a place in Vienna called the Chocolate Factory. And when you go to this Chocolate Factory, everybody has the same raw material on the table. And then, they let you to mix what you can mix, to make your own chocolate. And nobody makes like the others. All independent. Because the raw material of the chocolate is there, but you decide what you want to add to it, what you want the mixture to be.

And it's the same. We never had the opportunity to be able to choose what we want, because we never understood it, that we have such a choice. And now we have. And when you come into the session, if we, you get a chance, you can ask, "What happen if I change this parameter?" And we don't tell you, there are a lot of hidden things in this structure, which we never mention, we won't let you know what we do in the background. And then, you see suddenly, you change producing CO₂ into Hydrogen. (2:02) And then you see maybe the way it changes with a slight change in one parameter. Because we change the Gravitational field, Magnetic field strength within the system. We know what we are doing, you are not aware of it, because knowledge is not there. And you say, "Oh, when I created the Hydrogen, the ?? weight changes or not?" Nothing changes, but the Magnetic field changes.

We watch six, seven parameters, which is more or less, is the first time we see a control of the Spaceship, in the dimension of the interaction, where I can move some people in physical matter, some people in the Soul level, and some people in time. It's a little ball, you don't understand anything, what's inside is so complicated. But, we have developed it. We can control it, and now we let you to touch. And in the future, maybe in a few months time, a few years time, it's what you sit as a control panel, the way you sit here. And now in the power station, you decide, who gets how much power and whatever, we decide, "Okay, this guy doesn't have any strength of his Soul to do a transmutation, we send him with a UFO." Because, his emotion is not stable.

Now we have this power, now we have knowledge, or the power to create conditions. Time machine was a dream of, I heard even Americans recently, "Oh, we have managed something to make time. And I thought, have you? (2:04) If you listen to the Americans, a lot of rhetoric's coming out of the Americans, especially in NASA and the rest, that a lot of things we teach in the, in Knowledge Seekers in past few months and weeks, is becoming their knowledge. They have, but they don't ?? have it, otherwise they would have shown it. This is why I decided, I show the presentation in Beijing. An American International Markray Corporation, shows the technology in Beijing. There is one choice left, Americans and the Chinese will talk to each other, to bring it together.

If you go on Markray website, you see an amazing thing, if you don't understand it, it's nothing, but if you understand it, it says, "Code 9661, Space Research Development." All of you, we fought for years to get this title, and the discussion for hours ?? with Jon. He said, "Mehran they won't give it to us, impossible." That's why we became a Water Energy Company. We are the 27th company on American stock market with this code. 26 are military defense, and you cannot get it, unless you are in military defense. So, we can show Space Technology openly as a corporation, and we'll show it.

The Americans say they have a time machine. Americans say, they have managed to do what they do. Keshe Foundation's putting on the table will change. As a CEO and Chairman of the Markray Corporation it's my responsibility to bring everything on the table that gives credibility to the knowledge, (2:06) and stops stealing by different nations the technology which belongs to humanity, on the banner of the Keshe Foundation. Don't give any secrets, we don't do, we don't promote anything, but now, we

are there to change the Space Industry, with research and development. And we are openly. The Beijing exhibition is not for you ?? show how it's made. It's to show, we are there, we can show openly, one of the most prestigious places in Beijing, as an American corporation, which stands the time of testing, by public. Is, challenge the time, challenge the knowledge, and challenge in bringing everything as it is, we are the command, we are in, ahead of the time, they say, "We put the time machine on." We show it to you, you decide, you change the parameter, you decide if you create lift and motion.

If you attended that London Ambassadorial meeting, it was a black box type thing in there, and the digits on the top. Now you create those digits, because we are confident enough that you will see what is supposed to be seen. Representative from the Chinese Space University will be there. People from the military sides connected to the defense technology will be there. Sure, American, the Russians will be there. I've already had, number of meeting with Russians, and they're delighted to be in this presentation. ?? Delighted to see, when you come on a structure pre-arranged, in a way of ?? I do my things, (2:08) next to us is the Saudi Royal family structure.

Learn something, ?? is why I said, if you understand, the world of science is not very far from world of politics. When, in late 1990's, I gave a green light to MI5, MI6, that we have achieved what we set to do, literally wiping out the financial assets of the IRA and the ?? priestly, which is a terrorist more than anybody else, but it was British, that we have reached the point, that the Queen can submit. But it was very hard for British monarchy to give a signal of submission to Vatican. And, the way it was done, as many of you know, President Clinton, as a representative of the Royal family of Britain, monarchy, accidentally, met with ?? (a person) champagne, supported by Vatican, shaking hands, on the street, while one was coming out of the bakery. In the world of politic, small gestures, hidden gestures are submission to a lot of understanding. And, nothing in the structure of the Keshe Foundation sits behind by accident. (2:10) Those of you, if they don't block us, we hope not, you will see a lot of Saudi high level next sitting to us in the exhibition. You will see a lot of Arab clothing in and out of the building around us. Nothing is coincidental. But, we can make it to look coincidentally happen, because this is what is the norm, what is the trend.

Any other question?

Q: There was a question, or maybe some confusion, about Markray. Is it, it's traded on the OTC platform, is that correct? Not the NASDAQ at this point?

K- At this moment of time we will not take Markray into NASDAQ. We don't need to, there is no need for it to be done, at least as a chairman of OTC, with Markray. I don't see a position for it, it can change anytime. Microsoft traded out of Big ?? Chips (Pink Sheet is another name for Over The Counter Stocks), for a long time. There's advantages, but that's, that's the job of the what do you call it, Stock Market, not us.

Q: ... (2:12) I couldn't see it. Maybe my question is repetitious, but if you look at the Place, Position, and Possession, we can play it in macro and micro, say, Place, say is Earth, Position is Human, and then what is my Possession here?

K- What do you mean?

Q: What is my position if I'm on Earth, and my position is Human, and what is my position. I want to go to Moon, my position is going to be there, any entity there, what is my Possession there, what is, I'm not clear about the Possession on Earth and on the Moon?

K- I don't understand what you're trying to tell me.

Q: ... If I'm on Earth, and my position is Human, what is my Possession?

K- The Magnetic field of your amino acid (AA).

Q: That's my Possession, okay, so when I go to Moon...

K- That's your possession. You possess that field in the essence of the Soul, that in the Place of Earth, gives you the manifestation of Man as a physical look.

Q: Okay, when I go to the Moon, there is no Amino Acid, so my possession is going to be different there. Whatever is there...

K- Yes.

Q: Okay, and then, can you play this in a, in a micro, for example, you're in New York, on Madison Avenue, you want to go to Paris, and then, you can play that way as well, yeah?

K- You can play anything. (2:14) Can I speak about the videos you've been sending me?

Q: Of course.

K- You don't mind if I mention a few things?

Q: No, not at all.

K- Azar has been traveling to the most holiest places for me, in Iran, in past few days. And, she bombarded me with the videos from the villages which are only Zoroastrians. They are known as the Zoroastrian villages of Iran. And when you see the videos when Azar walks through these villages, and the way she's with one of the most knowledgeable men I know, in this field, when you listen to him, you get the sense of, "I've been there, I've lived that life." And, how time has frozen in these villages. They still have the schools of Zoroastrians. They still have way the Zoroastrians lived. There are still people,

some people living in these villages. And the way they used to dispose of their, their bodies, the, the dead ones, and the rest of it. I went through a journey with Azar in past week, the most amazing time, that, how we change the life of simplicity, which stays with these villages, with the modernity of the time of today, with more destroying each other, where the ethos of Mitra and Zoroastrian life was so simple, and still is simple. It gives you a sense of, "Do I need to live in 21st century in New York, (2:16) where is so much pain, or can I live in a parallel time in this village, with so much joy?" Two parallel times, humans, and sense of different emotions. And how people respect each other, and how people value each other, and how we expect the others to be.

We went a few years ago, with the Keshe Foundation Space Technology, everything to the Austrian government. A doctor from the Austrian government, told us, "We don't need your technology, Austria doesn't need advanced technologies, we want to stay where you are, take your technology out of Austria. We are not prepared to support you." I said, "What?" And now, they want to know how much taxes we can pay them. It's the same time, the same people, but, I can take my knowledge to another country, they respect it, they value it, they expand it. These idiots, woman sitting in front of us says to us, "Austria doesn't need you, your technology, please leave, we don't support you." It shows different side of the same point. We sat there, I said, "Boys, we don't need to move, we're carrying with our work." That's what we did. (2:18) I think it was the best thing, because they cannot interfere with what we do, they cannot dictate what we do, they cannot support.

So, we are literally a massive research structure now going to the American stock market, now working out of China, now working out of other places, our country we are in, we have, they don't want to know, we don't exist. They don't want our bank accounts, they don't want nothing to do with us. And I live in a 'time capsule,' where we have the best support from the Austrians in supporting the Keshe Foundation. Has something changed? Is there a difference between that village, city of Linz, and what we do in Beijing, or what we do in New York? Or, do we live in different time zone, the same physicality, the same place, the same, what we call, Possession? Can I move everybody by time to one place, that we are all the same?

Going through the cycle of knowledge, going through the understanding of the Knowledge of the Creation is not easy. And, not everybody can grasp all of it, even (if) we listen to all of it. Do we increase the level of our Soul, that what we've done in Austria, more or less. We said, "Okay, we are in an isolated island, we don't get disappointed, we just do what we have to do, we have a purpose, and we carry on." (2:20) Or, could we just move out, change place, and do something else somewhere else? But, the good thing is, at least nobody's got anything to do with us. We are in an island of ourselves, and that's it. And this is the process, which we need to understand. Do we live in different time, and can we create a condition, that we all live by the Ethos of Zoroaster in Linz, in New York, and then, with understanding of, that's elevation of the Soul, with nothing, it's nothing to do with the physicality, we change the time. Even the place is still Earth. And, this needs a lot of maturity to understand.

Q: ... There's so much pain for the Palestinians, that are still starving, and even not water, dying not only from the bombs. And they said, "I thought that you had been helping those that needed it." And they say, "I can't, I really cannot understand. It was announced, the project to feed starving people, and then, was told to be approved, technology worked, and so on." (2:22) And I wanted to just combine that with another, whether you had a comment about the recent explosion in Iran, in the port in Iran, in Bandar Abbas, and sort of connect these, there's events all over the world, basically, of extreme conditions, and how can we approach that, or how do we perceive that in terms of what you were just saying?

K- We live in a dynamic society, mixture of societies, and a lot of combinations. The system for Palestine was switched off some months ago, to couple of months ago, I was told by our team, and moved, because of our evolution in technology and systems. We, when the peace talk came, and everything stopped, we partially, we stopped that process. At this moment of time, we, I don't see a way to bypass this, because people who were, we were a part of process, working with, to establish in a bigger way, we have disconnected with, even though we keep close work with the Palestinian side. In the past week, with the new development in science and technology of our work, we can extend, reopen the channels back into Palestine. We understand that a lot of things happening, and a lot of things needs, its own time and position, but we have not, in a, what you call it, in a physical way, reopened the channel for Palestine for past two months, or maybe three months, when they start talking about peace and everything stopped. We stopped, because there were, we could not see many people connected to it. (2:24) We can restart again, but I don't see a structure in that way, for us to be in it, we, we are looking at, or I looked at it past, even three, four days ago, how to reopen the structure into Palestine. We have the technology, but we didn't see, in the last part, that much uptake. And that's where we are with the Palestinians.

With the Iranian situation, I have no clue, I don't know what exactly happened. Nobody knows, and whatever they know, we don't know. As we saw, we had such explosion in Beirut some years ago, which a big part of the city got burned out. These things happens in the port, you can't connect one to another. Is it sabotage, is it government? We see these things quite often in, in materials held in the ports, or is it done by, you can connect and put anything to it. I have no knowledge, and I actually haven't had no time to look on it. When you went over it, I see, I get barrage of pictures coming from the port, but there was no understanding, nobody knows, nobody. Because, even the government says, they are still trying to find out.

We're spending more time nowadays, with our work in the Iranian upbringing, in the Keshe Foundation, as a technology, as a commercial structure, internationally. And then, actually, haven't had time, I work nearly 20 hours a day. (2:26) I haven't had time to structure anything else, but to, because we have to change from the root up, and it needed to be done that way. Those of you who know, a lot of time, a lot of time, even now, today, is getting spent on, around the structure of the financial side, and the commercial side of the technology, to bring it in the level of the, what I call, primarily Space ??. And

we have to do a lot of other things, total awareness on one point. You hear something, but you don't know how much it's taken to do things.

Q: ... Good morning to all, in the 586th Knowledge Seekers Workshop, it was said that there are two types of Cosmic Ray materials. A, for embedding in products, and B, the certified balls. I understood the certified balls are part of the new Universal currency. Does that mean the materials integrated in everyday items, like Soap Holders or devices, are also part of this currency? Or are they just for functional or energetic use?

K- They are functional, energetic. As a currency the Foundation will make announcement as part of our work. You all been, a lot of you been buying Keshe Coins, as an internal currency of the Keshe Foundation. (2:28) And, with the full awareness of the European Central Bank, as an internal, what you call, exchange platform. As now we become a bigger structure Internationally, with our own, what you call it, way of thinking, you will see that the Keshe Coins will take a new shape and new structure, as part of a bigger structure in the near future. Those have no value as a, what you call it, products of the Soap and everything else, in a Cosmic, what you call it, structure of the currency. They are two different things. And, the Cosmic Ray, what you call it, as a Ball, will become as part of the, what we call, Keshe Coin. We are planning things into it, but in the future, we'll bring it out. There's a reason we are doing it this way, and I'm trying to be very diplomatic, not to give too much away.

But, those of you who bought, as I said, Markray shares, make sure you have a certificate for your purchase, as soon as possible. Those of you who bought Keshe Coins, and then you spent it, and you bought things with it, depends what's left of it, it's very much like the Cryptocurrency. And, those of you who bought Coins, you'll be given a very different option, which is very prosperous for those who did. Or done to it, we have every single Coin purchased, we have registration of it, we know who it is, what it is, we know how much has been exchanged. (2:30) Then we use this as an International currency, in a very, very short time. As part of the work of our commercialization. You got to understand Knowledge Seekers very clearly, those of you who listen.

I have a very, very tricky position, extremely tricky, and I have to be very careful. I, as a person, hold intellectual right to the knowledge. As a person, I am the CEO of the Keshe Foundation. And as a person, I am the CEO, Chief Executive Officer, and the Chairman of the Markray Corporation. Up to now, we had no problem, .. problem, what was between my knowledge and the Keshe Foundation, because everything belongs to me. Now we have an International commercial aspects to it that makes us to be very careful in what we talk, because, somebody sitting here, say, "Oh, he said such a thing in his teaching, and then he's creating such and such a problem." So, you have seen, I'm very, very prudent about these things, because I know people who run into trouble for less than this. So, when we tell you things, we cannot refer to, we never refer to, stock market, or Keshe Foundation, or in my name, as a share, majority shareholder in Markray. This, what is taught in these teachings, is exclusively for the teaching, nothing to do with us. Those who come and listen to us, and go and play with the Chips that's their problem, not ours.

And, I'm fully aware of it. A friend of mine suffered very badly with this, and I listened to him, and he said, "You never do this Mehran, you never do that." Some of you know him, (2:32) as a very explosive public figure in the British life, and he was about to buy one of the most prestigious chain stores in retail market of England, world. And the night before, or the day before, he was about to make a bid to take over, worth hundreds of millions, and his wife said something, which by law, became inside trading, and he was banned from buying it, and from then on he turned back on the British Industry. And this is so sensitive, these things, anything to do with the stock market, even when your wife talks, can affect the, what you call it, the position of the stock market. So, I try to be very prudent, as now, as a CEO of the Markray corporation, as a stock market company, what, especially in teachings, you notice in past few weeks, I'm barely keeping away a lot of things, because, now we have to announce it first in the market, before we tell the Knowledge Seekers, and Knowledge Seekers want to know, before we tell the market. And, it's a very fine line, now we're playing in the ... according to the games played, we have to play the game.

And don't get disappointed, Mr. Keshe does this a lot, because now I wear three jackets, before was Knowledge Seekers and the Knowledge, now we have commercial side, being appointed or being the CEO of the Markray. People can misinterpret, or do the things they want, and we cannot do that, because it effects the shares in the market, and the values of it, and we don't do. (2:34) Because, the same guy I tell you about his wife, he came, I came across him, because he went into the stock market, and he said he's going to make 2.2 million profit, and he made 2 million profit, and they kicked him out of the stock market, as a CEO of one of the prestigious companies in England, by 200,000 pounds difference in what he was expecting, and what he actually did. And then, he came out, taking revenge on them, and then his wife took his hand, not knowing, she was too cocky, that they're going to do this. And he said, I learned one thing from him, we never talk in respect to the stock market, but unfortunately we have 13, 14, 15, 20 years of teaching in the Keshe Foundation, openly. But now when it comes to the other side of the operation, which is commercialization with the Keshe Foundation, even those who work with us, are aware of, with us, we don't talk, even they don't talk outside.

You will see, in the board of direction of the Keshe Foundation, we announce soon how people you see amongst us are trusted on to be the biggest, most powerful structures to come. Because, we've been there, we all passed a test. We work as one structure, and we can't even announce that, because they are on the, they know what their purpose is, they know what we are doing, but they are those who are mischievous. We have people who use the Keshe Foundation, close people, as you know, they use our structure, they use our finances to traffic drugs, for their own benefit. And we were not aware of it till we found out later on. And, we learned to keep our mouths shut. We have people who use the Keshe Foundation name, for other things. Here, we cannot do that, we got to be very careful, especially me, holding three jackets. (2:36) I have to know which jackets, where it works, and what I say in public, that people don't take it into the other side, that, to make a point, to stop the development of the technology.

Now officially recognized as a Space Research Development Company, in the International Stock Market we have to follow a lot of rules. It doesn't fit into the work of the Keshe Foundation, but it's the only way we can play it, to spread the knowledge, and then, would it bring the ?? Ethos of the Keshe Foundation.

R: Okay, you'll have to kind of guide us as to what questions are off limits, you might say, but I, I think...

K- No, we try to understand, we try. People have to understand, because whatever we do, officially, once we announce the Board of Directors of the Keshe Foundation, which already all of them have accepted their position, they know who they are, it's a twelve member board, they, when they're announced, because they haven't, they are not in position yet, till we release it the right way, then we tap other structures behind us. And then, even they, as your friends, people you know for ten years, whatever, Knowledge Seekers, whatever, they have to watch what they say, because, whatever they say, can affect the share market, public or private. It's a different game, we came for this, but this is one of the ways to spread the knowledge, and the technology together, because then it's proof of it.

And, this is why we tested the social media, past few weeks. If you notice, I never appeared, I never put things out in social media. We've been on the Youtube, we've been on the Facebook for, we have what, 70, 80, 75,000 followers on the Facebook, I never posted anything on the Facebook. (2:38) And, now, we effectively targeting social media to spread knowledge in a correct way, and we are having other influences, we have other connections, which are, the structure of the running of the Keshe Foundation on this teaching, Knowledge Seekers will never change, I stay free, we went to teach, nobody can tell us, but, we have to watch where those are the enemies of us, try to use it for other things. It's very easy, you see how suddenly you get banned from the Youtube, you get banned from the Facebook, or you suddenly appear somewhere, somewhere else, it's the same people. We have a lot of enemies who don't want to see this change. We saw it, they poisoned me, and when they said they are sick, they killed Fabio, they knew before when he's going to be killed. We know the information's exactly, they have no scruples, they have no ethics. We learned, step by step we learned, and now, we have to be more careful, because we're in public domain.

It's not the teaching of the Thursday's anymore. Because they're coming to these Thursday's teaching to learn what's going on to benefit them, and what he says and what we can do with it. It's a very, very, very, very careful path, especially since we were requested, and we accepted the position of the running of the, as a CEO of the Markray, you've seen a lot of teaching has changed in the public domain. If you haven't noticed it, you've been absent in that level. (2:40) For seven years, they refused to accept CEO and Space Organization. Now we are, we go, go the new way, but we have to be very prudent that we don't damage just because we teach. And all the teaching of Keshe Foundation, is to do with the knowledge, nothing to do with the diplomacy, and other things, which we talk about. To get the, what we call, governor of Central Bank, to accept the CEO

position, is not easy, especially when they are aware of the all the problems around Keshe Foundation.

Any other question?

In a way, let me explain to you, in a very near future, you will see, as I always told you, ex-president, you will see princes, princesses, you will see monarchies on and around the work of the Keshe Foundation. Now that they've been waiting for it, we have two, three crown princes, which always wanted to be part of the Keshe Foundation, now with what we've done, especially taking technology into public, they are there to back us, and one of them more recently said to me, "I'm there, even if it means I lose my crown." (2:42) As I've said, these are close friends, as you've seen, one of my close friends, as a CEO of the Markray Corporation. They are trusted people in the past life of the Keshe Foundation, before Keshe Foundation. You will see very soon, one of the crown princes of the monarchies of the world, as one of the members of the, part of the work of the Keshe Foundation in the different levels. These are friends, people I know, I live through, and they're family, friends, more than somebody just off the street. They've been waiting, because they were not on, they were afraid of what will come out, but now, with a new position in Markray, they are prepared to stand up.

Any other question?

Q: ... Dear Mr. Keshe, are you aware of the major power outage that occurred in Southern Europe this week? And, Filippo is asking, more technically, "Is the so-called electricity, the plasma of Carbon 12, going through Copper molecular structure?"

K- About the European, I know, I heard of. But, you have to understand, a lot of problem in Southern Europe sits with French. And, we are aware that the French nuclear industry, which produces huge amount of electricity to... (2:44) all the way, even to, God knows, other side of Eastern Europe they supply energy to. They are getting old, and there are a lot of pressure, on what we call, central, southern, electricity transmission supplies. You don't get blackout by one power station. There's major problems with systems are getting old, especially the French one, and the French are not having it so easy, losing one of their main resources of nuclear material, with the problems in, what you call it, ?? of the three countries in Central Africa, and the others are learning from them. But, this is nothing to do with other side, but primarily we will see more and more failures, unless huge amount of infrastructure, finances are not spent inside. It's very simple. Things are old, and old, and need to be renewed, and nobody has the money to do it, because, there's no more colony moneys, and a lot of the money was wasted somewhere else. Colonial time of Europe, taking from everything, is gone, and partially, we see changes, but you have that. And, we'll come to it in time. We'll see more and more, there's a huge problems. We know sitting in, what you call, Eastern Europe. (2:46) In section of the energy, ?? we'll be there.

You got to realize, what I said before, in the cycle of the work of the Keshe Foundation, any economical development, or whatever, will be announced through our financial side,

which is a public, and within minutes we'll go right across the World. In teaching of the Keshe Foundation, like Knowledge Seekers, those who want to seek the knowledge of whatever they are here, or you've been around. Anything we announce on the commercial side, which is still with the energy, or whatever else, within minutes, once it's released, it becomes every newspaper around the world, we publish it. Because, we are part of the effects, the share market, insurance companies buy shares, and the rest of it, and Worldwide operation looks at these things. So, I have an answer for you, what's going to happen, but that's it, when it comes out of our financial side, and not from the, what you call, teaching side.

But from the teaching side, there is no solution for the energy shortages, which is about to come more and more. It's combination of a lot of things, coming together, and we'll see the outcome. Is there a need for distribution network in energy? Is there a need for distribution in gas? Is there energy need distribution and control of the transportation, the way it is today? (2:48) And, we have a lot of cartels also, look after these things. And, they have a lot of things to prove, what happened when we bought the gas, we've seen millions in the market, that we just have again.

When you come to the exhibition in Beijing you will see four cylinders. We advanced so much in knowledge, you don't, as Knowledge Seekers, we don't ?? . But you will see there, that I'm sure, they'll go on the social media. We can produce any gases in the solid state matter, and four of them are shown in the exhibition. And if you choose any of these into the world of technology, or commerce, will change the world of energy. And we're not talking about something, these are what, we've shown our, one of our systems production gas, to the, one of the world leaders expecting to come out with it, that this is what's going to be, and blah, blah, blah, and it got caboodled.

R: He, he got what? Caboodled? Is that what you said?

K- Yeah, they got caboodled, they. They destroyed it, kaput. And, was done deliberately, in one way or another, was done outside deliberately, we don't know. (2:50) It's a English terminology, sometimes used in Manchester area. It means, they tamper with it. Well, it's sad that we are living in England too long.

R: I think it's actually made it to Canada as well, it's just I wasn't sure I actually heard that word, and I haven't heard it for 30 or 40 years.

K- It gives the age away doesn't it? The whole essence is, we will see a lot of changes. I mean, it always happens, part of evolution of Man. But, what is interesting is, how the African Nations, one by one are taking their place. We are told Africans are always poor, we never said that we are robbing them, we're taking everything from their pocket. We're taking their gold and we never pay taxes for it. And we become rich, we take Uranium, we don't pay for it. They paid, the share, 80 cents a kilo for Uranium to export, and they charge France 200 dollars a kilo. ?? 50 times difference. How could the Nation survive? Of course, they were all in poverty. They all took, how many, some 30, 320 billion taxes to one country, one gold mine, said you don't pay taxes to get back, and they're spending

their money, because the gold is still needed. 100% goes in the pocket of the nation. The change you call it, the structure is changing, because we become more aware of. But the worst thing is, I always say, we produce gold, what's going to happen to the African nations? (2:52) Get up, standing, we take their back of them, but under the hand we give them support in different way. African structure is well set, we planned it well in advance, how it's going to be done, ?? we have a huge support in African nations.

...

K- ... The Knowledge Seekers who were with us last Friday, please, when we've ... Yeah, the Knowledge Seekers were with us last Friday, please, after the teachings give us about half an hour, we meet to complete the sessions for Thursday to next Tuesday, please.

R: We'll restart the same Zoom number, and gather in Zoom, you mean?

K- Yes, yes please. It's just short meeting, and we want to understand what happened, and then we'll see. Well, the instructions. Because what you tell us from your experience, the past few days, decides how we're going to set the system for Tuesday. .. go ahead.

Q: .. It is interesting your teaching of today, (2:54) because a man I knew spoke about his experience, he was taken up physically in a craft, and was told to look down at this gap, when he looked to the right, he saw the past, and when he looked to the left, he saw many events, some of possible future. So, it makes what you're saying more real, when another can confirm that time does not exist. And, Nikolai asks a simple question, "What is time?"

K- In the Universal language time doesn't exist. In the seconds and minutes, and hours which we have, we make for ourselves. You have to redefine time, is a confirmation of observation of existence. That can be one second to me, a million years to a cat, and ten million, ten billion years to another animal in the Universe. Depends what we leave as a trace of existence, and the time and period of observation. Time, the way we measure on Earth, according to the rotation around the Sun and the rest of it, and we even have a nuclear time machines, and atomic time machines, and quantum time machine, does not exist. Your speed of time, if you speed up, or strengthen the Magnetical Gravitational at the same time, which is a very difficult thing. But the technology has been given to the Keshe Foundation Knowledge Seekers to, that they build the machine. (2:56) And this is the part where we, at the same time, can travel a hundred thousand times faster than the time, then this becomes irrelevant, what's the speed of light. Because, even the speed of light, cannot catch up with the time. If you understand the difference.

Time is the point of observation, and the existence to be observed, and depending on the observer. In fact, there is no time in the Universe. But, the existence confirmation of the field strength of it, creates that to be confirmed. We are here, 60 years time of the Earth, but we are here one millisecond of time of the Universe, most probably less than that. So, what time are we in? Do we carry Universal time, Galaxy time, Earth time? What about the Unicos time? So, we have to understand, for reference point to what?

Is a child, which is born and dies at birth, goes through a rapid time evolution, which could be the span of another Universe, where a man who lives here for a hundred years, does not even catch one second of the Universe. (2:58) Time is created out of interaction of the plasmas of the Creation, in a way you feel the Creation. And has no dimension, is the only factor which you cannot create it, but it creates itself out of the interaction of the other fields. Mass doesn't exist, unless Gravitational Magnetic field interact. Weight doesn't exist, unless you bring another combination in interaction with. And it's unreal, because it's something man-made, to explain, position time in respect to his understanding. Time, the way we allocate it, doesn't exist.

Time is zero. Only exists the time, the window of opportunity of confirmation of existence. We don't exist. There's a very difficult explanation of, but if you understand it. If you stand, let's say on Mars, and look at Earth. Man doesn't exist, because we cannot see the Man, with the naked eye. If we have a better equipment, better facilities on Mars, and we look at the Earth, we see the mountains maybe, then something circular rotating, we see details of sea or whatever, but we cannot see the Man swimming in the ocean, or Man walking on the road. (3:00) That time for Man does not exist to the observer, there is nothing here. There is no time. No time of life of the Man who is in the sea, because he doesn't see it. When you create a better, different field of vision, and you see the Man and how long he swims, that's the time you observe that Man, because after the Man going off the water, you don't, because you don't have ?? the field strength ?? to see it. You don't see it yet, he goes in the car. So, we are time dependent on observation of the Space, when it's evidence of life, evidence of existence, ?? not life. And life again, you have to explain what it is. Manifestation of observation, could be a rock, could be a Man, could be a cat, could be an Alien. We haven't managed to create a machine which makes time, but out of interaction of the fields, we create the illusion of existence, we call time.

Any other question?

Q: ... Can I combine using, excuse me, Plasma Glasses and Plasma Mirrors with the Cosmic Ray Twinity?

K- You can do anything you like, create a new dimension, why not? Never, ever stop anybody, unless it's hazardous, to stop you from experimenting, to find new frontiers. (3:02) I stopped, I advised you a lot, don't touch Lead, don't touch Aluminum, don't touch something else, because you don't understand it's magnetic field of it, it's at the strength of the Neuro System, and it can interfere with it, you will do funny things, so we prefer you not to do funny things, because sometimes funny things are good, but sometimes funny things can be bad, and then it becomes the damage to a lot of things, which to you yourself. So, if you feel safe, it's your job to test yourself, job to expand the frontiers of knowledge.

Q: ... My underarm sweat glands produce a lot of sweat, and sometimes there's a very unpleasant odor. I would like to hear your opinion on this issue.

K- Two or three things, don't use Gans's, which you think it is going to help, because, it will go for a few days, and then it goes, because, Knowledge Seekers have not learned how to use the Gans's for this purpose. Secondly, if you really, what do you call it, understand the process, it's like, have you ever sat in front of a Chinese man, eating a pot of chili, and he walks away, and you touch one of it, you sweat like God knows what? The Chinese don't have a sweat glands. Especially those who come from the South of China, because they eat chili like nothing, and as is tomorrow, as it's nothing. (3:04) I touch it, I run like a cat. Some of us don't have sweat glands, or our sweat glands, threshold has moved up, that we can eat our food, or stand hot weather. You walk in Africa, you don't see them hanging around with a handkerchief on their head, and sweating, whatever. I go, I sweat like God knows, I carry a shower on top of my head. It depends how our body is, how it's tuned for.

And, on the other hand, there is a beautiful company in New Zealand, produces natural, what you call, material as a deodorant. And, they are amazing. They have two types, you can use a Bicarbonate, or another Bicarbonate one, if you are sensitive. But, it stops all, more or less, your sweating, but it's natural. They use total natural material, and they're taking over this market quite heavily. In ?? the South, they have a special name in New Zealand, and they have found a way from New Zealand materials to make this thing. So, you even sweat, you never smell. They have managed to trick the odor conversion. And, it all depends on the body, what chemical interaction you have.

Q: ... Hi everyone, and thanks Mr. Keshe and team for the shared knowledge, and for saving the World. (3:06) I would like to ask, if we, the Human beings, as the most advanced technology in the image of the Creator, can we make our body to be in a state of zero point energy, so we can take our body while time traveling, without the need for other external technologies, like Spaceships. When I say external, I mean any tool or energy form, outside of the Human being body, despite the fact that everything is interconnected, as everything is energy.

K- Can you repeat that? Do you want to read it again?

<< Rick have problems with his microphone. >> (3:08)

R: ... Did you answer that question that I had asked or?

K- No, I asked you can you read it again, because I don't understand.

Q: I would like to ask if we the Human beings, as the most advanced technology in the image of the Creator, can we make our body to be in a state of zero point energy, so that we can take our body while time traveling, without the need for other external technologies like Spaceships. And when I say external I mean any tool or energy form, outside of the Human being body, despite the fact that everything is interconnected as everything is energy.

K- Yes. Of course you can. We all can. It's not, what you call it... It's understanding one process of Creation. And knowing how we control. And how we have the control of. The fields which makes us inside, and the fields which creates our image outside. (3:10) As you know, in the West now, most of our banking system, most of our structure of work, works on a face recognition. And always laugh at it, because you make a payment, and then the bank structure tells you, "Can you open your camera, we have a... we need a face recognition that is you who's ordering." So you keep your camera open, they take a picture or scan of your face, and then say, "Oh, it's the right face." They use a face recognition.

And so many times I think, with the knowledge I have, I am going to, what you call it, change the pattern of my face, but it's still the same Soul inside. And what will it say? It says, "Not recognized, the face recognition is wrong." And would the face recognition become a Soul recognition? And we have the capability to do this. And can we change it? Yes we do. We can change our aura, or we can change our physics, and then if you can change your aura, you can transmute. (3:12) Because that dictates your position, in respect to the position we are. And if we don't have the fear of it, we can move it, and this is part of the test we do with the Knowledge Seekers next week. Because when we run the tests, we see everybody's going very well, and one of the Knowledge Seekers panics in the session, and everybody else goes nose dive, because they're all connected to each other. This is why the test we do next week with Knowledge Seekers, we use one captain, and if you got a trust in him, it's his job to take you there, which is, we set him not to have a fear of, to be afraid of, and the rest of it. And if you do that, you can change the dimension by the strength of the inner being, but you have one advantage, you can control your breathing, you can control your position of structure, physical structure, then yes you can.

Q: ... As far as I'm aware, the Planet Earth is tilted 23.5 degrees. Are we able to realign the Planet Earth, once all the nations understand and adopt Mr. Keshe's technology, and the Human collective consciousness awakens?

K- If you go back to zero, there'll be no life as we know it on this planet, for sure, there'll be no trees, no seasons, no water, because this is that, that inclination which has given rise to this energy field, with life as we call it, life on this planet. (3:14) So, the whole structure depends on the angle, and the more this angle increases to another dimension, another, let's say, 25 degrees, 30 degrees, the life, the angle of interaction will change, and life will not be like it is, and it won't become back to one, altogether to be one. Mono-Energetics lives are very, very, very, very, very rare, but very common in the Universe. But even them, they use a different technology, which is not open to Man, but yes, we can do it, and we know this technology very well, but Man has no, in the world of science, there's no knowledge of it, that he can create these conditions.

Q: ... Is it possible to see the video clip about the Cosmic Ray Ball today?

K- ... It's the one you couldn't play last week.

R: Well...

K- A lot of people have received their Cosmic Rays, and a lot of people are reporting amazing results. (3:16)

<< Rick puts the video of the Ball. >>

K- ... If you're Knowledge Seekers, 49 of these Balls have been dispatched, and a lot of you have received it, and we see it, and try to, when you receive it, do different things with it. We see, just even in the past few minutes, I received a message, which is amazing... And... You see, just observe the light. You see how you see the light? Those of you who received this Cosmic Ray units, and you have, some of you had these built into your system, some of you have this, or you have Cosmic Ray Bundles, you have Twinity sets. Try to play with this with, in conjunction with those. And, see what effects you see. (3:18)

The creation of the... material inside is not compact, is loose. So, no two similar seconds are the same from energy point. No two positions are the same position, is the same, because it's different mixture inside. It's deliberately made in this composition, that the center is never static, is never fixed. It reacts to your emotion, it reacts to your, even emotion, and how you twist it. If you use it, in conjunction with different materials, you take them from the Keshe Foundation, you'll see how it reacts to you. And how we are getting the reports, because they're all been delivered, now, the first batch, and it has a very interesting effect on different people.

Those of you who receive this, you're, you must have received the certificate with it. Every single ball is registered. And these Balls worth a lot of money, not financially, it will cost you, it will gain a lot of value, (3:20) but it worth testing with your own emotion, your own time, hold them in your hand, create a dimension of, what you call it, Star Formation base. One your Soul and two of these in a position, and move your hand up and down, move them to the side, and see where, which pleasure, which feeling it gives you. Now you have created these dimensions, and if you can tune into it, and what does it bring you? What distance from it, what distance you, what you use in conjunction with others, and how to change the environment of your partner, your wife, your cat, and the rest of it.

Any other question?

Q: ... Where can I post my testimony about the feeling of the Cosmic Ray Balls, that I received on April 25th?

K- ... It's called testimonial, isn't it? (3:22)

R: We do have a testimonial page, and we also have the testimonials group, which is on the second Monday of each month, starting at the 8pm Central European Time, and that would be a good place to post your testimony.

K- Or send it to info@keshe.foundation, testimony of Cosmic Ray Balls. These Balls will change many of your lives. I know what we put out, and I know what's going to do. Hidden, or in a different way, you will receive energies which enlightens you, changes your life in a positive way, because now you're connected to that higher level of ?? motion, or dimension of fields. And I've seen, in past 3-4 days, and a lot of reports, which past week, and a lot of reports of the people who have received it, and how it's interacted with them. Those of you who bought the system inside, Cosmic Ray added to, you will have a fantastic time, and I know some have already. And the next batch of these will be sent out in June, July. We have already put out around about 70, 75 units, and took a long time to get it. The next batch is in June, July, maybe another 30, 40. And we keep on supplying this till we meet all the orders. But those of you who just been through with this, this morning also, I've just read another one recently, just come in. (3:24) It's amazing how it's affecting people.

Shall we call it a day?

R: Sure, yes. Gone quite long here today.

K- Yeah. I hope I managed to share in your knowledge, and your change. And gradually to build it up in the next step, to the next line of understanding. Will be very nice, those of you who received these Cosmic Ray Balls, to place it in, like a ping pong ball, where it's free to move. And connect the ping pong ball with ... let me see if I can show this. You will have a crazy time, the pleasure of it. ...

<< Mr. Keshe opens the whiteboard. >>

K- ... If you get the two Balls, and put them in, into two ping pong ball like, and connect them, and put yourself in the middle, in line with your Soul. Then tell us how you feel. Tell us if you managed to transmute. (3:26) Tell us in what you see, in what dimension you found. Then change it to different position, that is in the front and the back. And then tell us what vision you see. Those of you who've been with us in the sessions of past couple of years, we use this combination quite a lot. But now with Cosmic Rays it's a different ball game, in a way you tap into the Universal energy. And don't say, "I dreamt", because it's not a dream anymore, you've become part of the Universal structure. And, don't move your head too much, because as these Balls move, they release different energy, locks into you different system. The pains you have, the lumps you have in your body, on any name you... the emotion you have, just watch how you get elevated. Let us know. It's amazing, you can take energy from the Universal, these Cosmic Ray Balls, and feeding the Soul and Soul supporting the physicality. Elevating the STP. Ask other people around you if they see any changes in you. But don't use it too much, maximum a few minutes a day, even a week. Because, knowledge has to be understood, and the whole thing has to be accepted by the STM. (3:28)

Some of you who might attend Beijing exhibition, if there are... I mean, if you manage to get into the hotel room, I'm sure it will be rather a crazy time, but if you can do it. Some

of you will receive a surprise from us. And, mainly set up for the World Ambassadors, but if you can have it on a spare time, we'll give you the pleasure ?? to KS to be able to see. It's a change in the world of science, it's a change in understanding the Totality. There'll be a lot of denial, there'll be a lot of backlash from the Press and the others, because this cannot be accepted to be. How come, as I always said, when I went to South Korea in 2007, 2008, the South Korean nuclear business, we were expecting technology from America, why Iran? And in 30 years, why now? If our South Korean nuclear physicist, 20 years ago, were expecting things to be built by the Americans, in 30 years, the 30 years already arrived, so better, maybe South Koreans can start believing what they see.

But, this technology is so advanced, because it works in Cosmic Rays. Rays of the Creation, not Man-made medicine, and the rest of it. If you receive these and follow in what I said with the ping pong ball, if you can drop them in the way, they are free to, because even their rotation, the speed, the material, will be detected by the STM, and the Soul decides to receive, see what happens with you physically. (3:30) Do you lose your pain? Do you see changes in behavior? Do you see new knowledge? And then you understand why we put these materials out, because it's time to enlighten the Man.

Any other question? Or shall we call it a day?

R: We can call it a day, other than there's a wish from the Universal Council, that I can show here, and just say it, which is, "The Universal Council invites the Keshe family and the Universal family in unifying at the Soul level, every time and every day at 9pm Central European time, to create the energies through the Soul of the Council, that the scientific community and observers become enlightened as the Keshe Plasma Technology is shown in the public Worldwide, in and on the 9th through the 12th of May 2025 in Beijing. Thank you for that. And thank you for today's show Mr. Keshe.

K- Thank you very much. Don't forget those Knowledge Seekers please, we meet in 35 minutes, and just ?? and we carry on.

R: In about 35 minutes, okay very good.

K- Okay, thanks very much and see you next week. (3:32) By the way, you'll be surprised by a lot of orders has come in for this, what you call it, Cosmic Surprise. There's a limited number of this and we close it, because we foresaw what you call it, so many and so much. And I hope you enjoy what you receive. Thank you very much.

588 KSW – May 1, 2025

End
