

Aftermath of Beijing - Licensing Through Markray - More Presentations - Creating Time through Controlling PPP - Emotions - Change Half-Life - Seeing the Future

Introduction to 590 KSW

Note: Not checked by KF interpretation by KS of KF Brazil

It's a week after finally being able to openly show the Plasma Technology (T) for the first time in public in a prestigious venue in Beijing, China. Knowledge Seekers (KS) and those who were fortunate to see this historic presentation in person got to feel and touch the materials that were created out of the fields of the Universe (U), or we could say, out of 'thin air.' It must have been an amazing experience to witness and feel the Love of the Creator manifest like magic in front of them. Nevertheless, those of us who watched online got to feel the energy of it just as strongly as those who were there. You can see all the testimonials given by the Brazilian group in our Friday teachings. All the love that was passed through the fields took more than 20 minutes to present, and many lives were deeply touched. I remember the very first moment I saw the two reactors spinning, it was magnetizing, I didn't want to stop looking at them. Rafael confirmed that he felt the presence very deeply. These so-called "obsolete" reactors still have enough energy in them to change the whole of humanity, if we would just let them.

But unfortunately, as Mr. Keshe said, because we are not a university we are being boycotted by Fox News and the rest of the world, and that, what was shown 'put a crack in the wall' of their control through the monetary system. It's not about being a university, rather it's about, that the universities are controlled under their structure. The 10 billion licensing contract that was signed during the exhibition is in a way, confirmation of the reality of what was shown. This is just the beginning not only of the exhibitions, but of the knowledge as well. Since the showing of the T a lot of things have changed in the background. The governments have changed their position towards KF, but it is too early to tell what this means. Of course, they will still try to do everything to maintain their control, but somehow they know that something has changed. The fact that the Chinese government allowed this to be shown publicly is huge. But we'll have to see how they maneuver things to keep their power, or try to convert the plasma into matter state knowledge so they can stay in power. As he said, the 'storm' is still ahead of us, and most likely there will continue to be many tests for KS to see if we can maintain our Ethos. Mr. Keshe has a way of teasing us by saying, the Markray shares will go into the thousands. It's not that they won't, but God has a way of testing us with 'gold,' to see how much greed is hidden in us. Will we be able to realize, that if we accept the new Plasma T, then there won't be a need to be attached to wealth, which is the cause of so much suffering on this planet?

The pattern set in Beijing is for Mr. Keshe to first negotiate with a company for licensing agreements with the technology. He has no intention to go back into building factories, that didn't work before, and took his time away from greatly advancing the T through research. That job will be left to the financiers and those companies that already have the capacity to manufacture the Plasma T. KF will be the provider of the knowledge and Markray will grant the licensing. The 10 billion signed with the Chinese company is for licensing and not an investment fee. Those who understand finance will know the difference. There are two parts to this, first is the agreement with the company, and the second is with the government of that country. He didn't clarify what the government has to agree to, but I am sure it has to do with peace and not using the T for aggression and war. When those two parts are fulfilled then he can present the T like he did in Beijing. He hinted that he is working with a large American corporation to collaborate with Markray, and then when he gets an agreement with the American government, he can show the creation of materials in Washington. The same with Russia, Britain, and then on to India and Africa. The next exhibition will be a very important indication of how we'll bring the T more into public. For now we should keep trying to spread the videos as much as possible.

The old reactors that are rotating Gans balls with motors are not to be confused with the new advanced Cosmic Ray (CR) solid state plasma system that he showed a picture of. The new one is a silver sphere about the size of a football and has many red tubes sticking out of it. This is an 'all-in-one' system that can provide everything we need to sustain our life in Space. The old reactors created materials more like a dust, where the new one creates larger balls. The way it makes materials is the same way the different systems in Space like planets and stars make meteorites. It's all done through interaction of the fields and not through explosions of Supernovas as ignorant scientists say. This one has a control panel with 2 seats but it was not shown to public. It has taken 40 years of continuous research and hard work to reach this stage. The next step is to build into it a brain with a Soul that has emotions. But it is also possible to create a Soul without a brain. The hint is that, if this system is combined with AI then it would run forever and never need an external source of power. We have to remember that the present AI does not have a Soul or emotion, it is only high speed computers communicating with each other. Much of the public has been fooled into thinking that it does have some kind of emotion and can think for itself, because of the way they are programming its responses in the background. But if KF were to add this new CR Plasma system to it, it would have a Soul and would never do anything to harm others.

A couple weeks ago Mr. Keshe started teaching us about Time and that there is no time in the U unless it is created by the interactions of the MG fields of the Place, Position (entity), and the Possession (M field strength of the amino acid (AA) of the entity). It's also called, the Triangle of Creation, because it's a Star Formation (SF) whose base is made up by the 3 parameters of the Place, Position, and Possession (PPP), and Time is created by the interaction of the 3 and sits on top. This is the fundamental structure of how life in the U is created. It's also how stars are created. To travel in Space using Time we need to learn how to create, control and interact with these parameters. When he says, we don't Time Travel I understand it to mean we don't go inside a machine and turn a dial

to go to this or that time. I am sure we all have seen this in science fiction movies, so subconsciously in the back of our mind we may think this is how it works. This is a fantasy that comes from not understanding the Knowledge of Creation. Man created the concept of time for himself based on the distance an object moves in matter state. We measure time by how many rotations the Sun makes on its axis. It's not wrong, but it is limited and relative to our existence on Earth and only in the matter state. The time we are being taught here is based on the plasma and the interaction of the MG fields of the PPP. When these parameters come into correct interaction and balance then Time starts new at that moment. This is a new way of understanding existence and will take some getting used to. Even though we do that when we dream, we start Time, but we never thought of it that way. Maybe dream is an example of using Time to travel, where we go to some place and then when we manifest ourselves there in the dream, we actually begin Time at that PPP.

This teaching is very difficult to decipher, so you might have to watch it many times. What I understood is that we can use the creation of Time to understand how cells in the body are created and what determines their lifespan before they get replaced with a new cell. He said, the Place is the body, and the Position is a heart muscle cell, and the Possession is the MG field strength of the AA. To make it more real he gave the example of the field strength being 1 Tesla G and 1 Tesla M. Before he said, the Possession is very important for controlling Time, and we see here that this is where we could adjust the M and G field strength and thus control the Time. In this case, when the field strength of the Possession is correct then the life of the heart muscle cell will begin. This is very interesting, because this is a parameter that we could potentially control with the field strength of our emotion. When he was talking about the lifespan of the cell, it seemed he was adding another dimension (D), or another layer of PPP. He said, the lifespan of the cell is determined by the field strength of the cell, the environment around the cell, and then the body. If we look at the drawing carefully, it's like another layer of PPP. The door is opening up wider to understand how the MG fields effect the creation and the lifetime of the cell. This knowledge fits together with what we were taught earlier about the lymph being a 'big soup' with a spectrum of field strengths and they can be increased or decreased by the glands such as the thyroid and thalamus, and the brain to meet the requirements of whatever cell needs to be created. An extension of the same understanding can be transferred to the lifespan of the Man. What we give to the Soul of the Man (STM), that it gives the Soul of Physicality (STP), and the interaction creates the physicality (P) and how we interact with our environment will determine how many years we can live. It's the same model of the PPP creating Time.

Just like the M field strengths in the environments of a cell effect its lifespan, so too, do the M field strengths in the environment of matter state elements effect the half-life of the atoms. When we look up half-life of radioactive decay of elements on the Internet they don't consider there are any interactions with the external environment. It's not clear from the teachings, but there is a field flow between the inside of the entity of the elements and the outside. Maybe it's too slow to be recorded, so we just notice that some of the atoms are gone, which they call decay. From the point of plasma, the MG field strength of the entity could not support the strength needed for the PPP of the atom to exist in that

particular Time. So they disappeared from observation in this D, and went somewhere else. But in essence, we can say that the MG fields of the environment of the planet do effect the half-life of elements here. And what I understand is, that if the M field strength of the Possession changes, and the Place stays the same, then the Position can change. Maybe that's how radioactive elements "decay" into another element.

If we don't have control over our emotions, then another way of controlling the Place, Position, and Possession is through developing technologies using Cosmic Ray radiation. KF is already able to produce this radiation. The technology and know-how for it is in our grasp.

The main reason it is too difficult to change the Time for humans is that there are too many factors to control. The GM fields of the Earth are constantly changing, and this means the fields of the Position of being human are also constantly changing, therefore it would be very hard to predict and travel a human to a time in the future of itself. It means we would have to create all the changes, which are the increases or reductions in the GM field strengths of the Place, Position, and Possession to be able to create that new Time to exist in. Nevertheless, he said, we'll learn how to co-exist in the 3 dimensions of Time. All the cells of the body will interact with the MG fields of the new Place, Position, Possession and create the new Time. Life without time does not exist.

It's very important that we understand, that we are responsible and in control of our life through our behavior in physicality (P). In the future, we'll be able to measure the strength of our Soul, and through that we'll be able to tell if we are getting closer to the Creator or further away. Then through our will and hard work we can change our behavior and attitude before the time of separation, or what we call death occurs. In this way we can improve where our Soul will end up after it leaves Earth and creates a new Time at the new PPP.

Each of the reactors in the SF in Beijing were loaded differently and they were setup to create a Time. The center reactor, which was empty was the creator of the Time. In another place in the teachings he said that, because it was empty it became a G system. Is that because the others were constantly feeding it, and is that why nothing could manifest around that reactor because the fields were too strong, and it also acted like a shield? What is interesting is that the reactors are only loaded once. Therefore, Mr. Keshe has to have enough knowledge to understand all the different interactions that will go on, and how they will lead to the desired result. There is so much to learn, and we are just beginning.

Time by itself doesn't exist, it depends on the interactions of the fields. The STM has all the field strengths of Creation within it. It knows how to choose which of the billions of field strengths it needs to use to get what it wants. The strengths from 1 to 10 are just normal manifestations. But when it wants to use a higher strength of let's say 1 to 20, then it can manifest in 10 to the power of minus 10. The higher orders move us closer to the Creator, and in that case we give more to receive more. These are higher order magnitudes that he will teach us about later.

When we travel in Space we'll come across planets with rings around them and we should understand what they are and how they are formed. These rings exist around every planet, Star, and even Galaxies. He explained this in detail in his paper on the Rings of Saturn. The rings that appear around the Earth that can be observed from outside the planet correspond to the field structure inside the planet. They are like the layers of different colored soil we see when we cut into a mountain. The rings around Earth correspond to the inner structure of the materials, even gaseous materials inside the planet, and its Inertia.

The Ethos of Mitra is part of the structure of Creation to Think, Speak, and Do Good. And it's exactly the same as the basis of Time, which is the Place, Position, and Possession. The interaction of the 3 parameters yields the perfect man. The belief in Mitra is about the perfection in the Creation and Creator. The essence of the teachings about Time, are that the manifestation of the fields of the Place, Position, and Possession are in our hands and we decide where our Soul will go.

I had a realization about Time, but I don't know if it is correct. It's a real story but I will tell it hypothetically. I have a patient I have been working with for years with psychoanalysis and she took over a house that she grew up in and experienced severe childhood traumas. Every time she goes there she changes, even though the people who caused the trauma are dead and she rebuilt the house to fit her own personality. What this means is that there is no external stimulus to cause the reliving of the past other than her own imagination and memory. During a visit I was in contact with her through Skype, and while being in the house something triggered her and she totally changed and became the 'wounded little girl' again, so much so that even her face changed features and became a frightened little girl. I tried to get her to feel the pain and go into it, and to realize that, that time is completely gone, and that what she is experiencing is remembering and recreating the past. It was amazing to experience because we don't believe that we have the power to change our physicality through our emotion.

The reason I am bringing this up is because I think this is an example of traveling through Time by changing the PPP through controlling the MG field strength of the plasma of the emotion. In this case I was thinking that the Place is the house and for simplicity we'll say it is a constant, even though the fields do change slightly. The variables would be the Position, Possession and Time. The Position would be that of being a wounded little girl, and the grown woman, and that entity is able to transmute back and forth. Thinking of Time as a field strength it can be changed and recreated through the memory, but it is not actually going back to that time, it's only the strength field of the memory. And the field strength of the Possession can be changed through the emotion. This is an exercise in imagining possibilities, not in giving definite answers. It's something to ponder over. So maybe what happens is the woman walks into the Place or the house, and gets triggered, so that the emotion creates a field strength that changes the Position back to a little girl, so much so that it physically changes the features of the body. I am thinking that the PPP is recreating the past Time in the present, so that the woman feels she is back in her childhood. But this is all done subconsciously, because she is so identified with her emotion that she is not aware that she has "traveled" back in time. Mr. Keshe said many

times that we don't go back to the past, not in a physical way, but we can go back through the GM field strength of the Place, Position, and Possession. In a way, it is a recreation of the past in the present, because we only exist in the present. He is opening up for us a very exciting knowledge to explore.

What we saw last week when the black materials turned to gold was not gold as metal. The way I understand it is that the gold is in an intermediary state that can be seen in matter state but is more in the energy state, like a Gans. He said this week that KS would never be able to convert the gold material into metal. There are two more processes it has to go through before it becomes the metal that excites our greed. When people rubbed in on their skin it must have gotten absorbed into their body, as the body is in the Gans state. I think that if they analyze the gold particles, the results will come back as gold. All the elements that exist on the Earth eventually become part of the body of the Man.

Other Topics:

We see the stars instantaneously because the time is zero. The historical claim that it takes light 10,000 light-years or whatever to see light is by those who have not been enlightened and live in the matter state;

The age of U is not billions but trillions of years;

One day we all will mature. It's a matter of when we accept the Truth.

I made Man in the image of Myself. Time for Me has never been, nor shall it ever be. I'm everlasting, as there is no Time for Me to last into, but I last the whole of the Time.

Thanks for listening.
