

Beijing Exhibition by Markray - Creation of Gold from Fields - How We Create Time As Plasma - Going Back in Time - Love - Dark Matter - White Light - Satellite Souls

Introduction to 589 KSW

Note: Not checked by KF interpretation by KS of KF Brazil

An amazing event happened on planet Earth over the weekend in the beautiful city of Beijing, China. The plasma technology (T) of the KF was shown for the first time to the public by its financial arm, the American Markray Corporation, which is traded on the US Stock Exchange. This exhibition was officially carried out by Markray and not the KF. On the Markray website they call it Cosmic Ray Technology, which I understand to be a higher order plasma that comes directly from the Original M Fields that created this Unicos, but it is still plasma. Mr. Keshe himself went to China to show creation of materials from the M fields by using obsolete technology (T), or what we call rotating Gans reactors with electric motors. He is using these old reactors as a starting point for humanity to slowly accept the evolution in science and technology. For 3 days straight the reactors were run and shown Live on Zoom so that anybody from around the world who wanted to, could come in and see. At first there was some problems with the old reactors, but then black particles like dust started appearing on the white paper sheets around the reactors. There were 4 sets of pairs of reactors with red and green Gans's spinning in them. We were told they were not CH₃ and CuO, but something else. They were setup in a Star Formation (SF) on tables inside the front windows of the Intercontinental Hotel. Anybody passing on the street could see them. White papers and spoons were spread around the reactors to catch the materials being formed from the fields. Some Knowledge Seekers (KS) were able to capture on video when black specks suddenly appeared on the paper, like out of "thin air." It was very interesting to witness when energy first appears in the matter state. As time went on and the fields built up and changed strength the specks formed into bigger pieces and some elongated, and some changed color to gold. This is the first time the public has been able to freely witness the creation of matter from energy. At the end of the 3 days Mr. Keshe collected more particles and showed everyone attending. An interesting thing occurred. When he touched the black dust on the paper with his finger it turned gold. He said, it interacted with the fields of Inertia of the Earth through his finger. This phenomenon was written about in ancient times when the Greek God Midas touched things it was said, they turned to gold.

Besides showing the creation of matter for the first time publicly, there were some other objectives as well. The plasma communication system was shown to engineers and scientists with the hope that they will further their understanding of zero-time communications and make advancements in that direction. The Headphones used were not the same as the ones made for KS. Mr. Keshe said the new plasma system was the

size of a football, and there were some photos of it floating around so that we can get an idea of the advancement in T from dynamic rotating reactors to static reactors, where we rotate the fields of the plasma instead of the matter state and creating fields from that. This new system will provide everything in one system from creating lift & motion, atmosphere, materials, gases, energy, and everything else. There were a lot of red tubes coming out of the top of the reactor. Maybe those are for feeding different gases into it. This is the first time KF allowed this system to be seen.

We were expecting there to be huge announcements throughout the Social Medias, but for some reason that didn't seem to happen. It's a shame that a monumental achievement in science was ignored by those in power. Nevertheless, they cannot stop the spread of the knowledge through the Soul of the Man (STM) on this planet. In the past they were able to stop the public demonstration of the T, for example the Flying Car, but it did not stop the development of the T and in the last 12 years or so we have made huge progress. Since the Beijing exhibition was allowed to go ahead, it means that we'll be able to do it again. So this exhibition achieved making a 'crack in the wall,' and now it will start growing larger and larger. This was also achieved in the background during a meeting with high level financiers that have agreed to finance the commercialization of the plasma technology in collaboration with Markray. But because of the legal structure and the rules of the US Stock Exchange these kind of announcements have to be made by the OTC. About 4 years ago there were similar agreements with the Chinese Government to commercialize the T, but something happened in the background and it never came about. This time it is with a very large private company, so we hope it will go ahead. Looking back over the weekend, a lot of things were accomplished. It doesn't need to be announced on CNN. An interesting point is that back in around 2008 Mr. Keshe took the T to South Korea and their response was, we expected this to come from America and not from an Iranian. Well, this weekend an American company with the official codes for Space Research and Development called Markray demonstrated plasma technology publicly in China. It will be exciting to watch how it takes further development, but the teachings will continue as usual.

Last week Mr. Keshe introduced a new understanding about time and how we can change it through the "Triangle of Creation," which consists of the Place, Position (entity), and the Possession (M field strength of the amino acid (AA) of the entity), and these 3 form the base of the Star Formation (SF) and through their interaction create Time, the 4th reactor on top. These are all in the plasma and not the matter state, and because they are plasmas we can change the field strength of each of the parameters and control how they will manifest in matter state. So now Time Travel becomes a possibility, but not the way we think. On Earth we measure time as a certain period and distance the planet physically rotates, in our case we use 24 hours as one rotation. This is a physical rotation or movement of matter in space. It is not plasmatic, and therefore we can not go backwards in time in the matter state. The other thing he said about it was, that the further we get away from the starting point in time, the more our image scatters. I understand this to mean that we are not the solid blocks of matter that we subconsciously think we are. Our molecules and atoms are really in the energy level and are constantly flowing. The matter state is always moving forward and created from the Energy, so we can't go backwards. If

we wanted to go backwards we would have to make a copy of what that state was, and pretend that we went back to it. And this is physically not possible, because physicality (P) is manifested in the present moment, and the past and present are mental states we think about. The other thing is that our reality is relative to how we understand things and what we think and feel ourselves to be. He says, in the plasma state we can go back and change the M field strength of the manifestation. Time and all the parameters are based on field strength and can be changed. And everything is controlled by the strength of the emotions, and Time begins new when we chose to manifest. There is a lot more to understand in this area, which he will gradually unfold to us.

In the past Mr. Keshe explained how the way we behave with our P effects the M field strength that we are able to gather in this lifetime. At the end of our physical life on Earth we will manifest at a new Place in the Universe (U), and create a new Possession and Position (entity), and a new Time will start for us at that Place. Where we will end up depends on how much M field strength our Soul has gathered. The more good things we do brings us closer to the Creator and this becomes the Heaven they told us about. And the more bad things we do will weaken our field strength and move us in the opposite direction, to experience what they called the Hell. Popular Media barrowed the word "Karma" from India, but this is a scientific explanation of what happens. We can blame others for our condition, or say that we didn't know and plead ignorance. But this will not change the fact, that it is our own behavior and attitudes that determine how much field strength we can and are gathering. This is why it is important for us to understand the truth about Creation first ourselves, and then help the others to understand. Through ignorance we believe that if nobody sees what we do, then it's okay, and we think we got away with it. But the Soul sees and knows everything the P does. We only fool ourselves and this is the cause of what seems like eternal suffering. However, all of this changes when we start getting more enlightened to the Knowledge of Creation, then instead of depleting our energy from not knowing, we start increasing it through sharing, loving, and unconditional giving, just like our Creator does. We become more like our Creator and that's why he said, we move closer to the Creator. This is the fundamental basis of how to use the Triangle of Creation. Our behavior and attitude converts our emotion into field strength and we can use that to influence and control the plasmas of the Time, Place, Position and Possession.

This is the true meaning of a Time Machine, it's not a box we walk into and then we chose to go to another time. The way I understood it was that, we don't travel to another time, instead we create the Time, by certain ways of controlling the M field strengths of the parameters of the Place, Position, and Possession. He gave the example of wanting to become a dog, then we would hold the Time and Place constant and change the strength of the AA to that of a dog, which is the Possession and that will create the Position of a dog.

To work with Time we need to be able to measure and create M field strengths of a plasma. The only magnetic field strength we know about is Tesla, and that won't help us in this case because it is matter state. They will introduce to us new tools for measuring the M field strength of Cosmic Rays (CR), then we'll be able to create Time. The Place,

Position, and Possession dictates the Time. And the creation of the Place and Position totally depends on the strength of the Possession. All 3 of these can be replicated in a system and this means that the knowledge of the Man is at the point where he can create the M field of each one of them to control the Time. And if we can create the Time we can reach any dimension. Of the 3 parameters, Possession is the most important one because we can change it by our behavior and attitude. It makes sense that Possession is the main factor because the strength of the AA will determine the entity, or Position. These two sides of the Triangle are closely linked to each other. Our emotion and behavior, which are mostly unknown to us, heavily influence how we manifest ourselves in Creation through the strength of the AA. And since we don't know this we fall victim to outside forces. This knowledge shows why our bad behavior results in so many of our diseases.

Time for the Creator is always Zero-Time. This means time never existed, and it shall not exist unless it is created by the fields of the Place, Position, and Possession. There is no beginning and no end. The STM is the Possession, and there is a technique for measuring its field strength. When you travel in the plasma you never end up in the wrong place. It's the same way that a star is created. This is why the Cosmologists say that millions of stars are being created everyday in the Galaxy. Now we can make stars too, because we understand the process of Creation. When we make a star it's our Soul and our identity, and it's what we possess within.

He said, through the fields of the plasma we can go back in plasmatic Time and change something if we are not happy with it. For example, if we have genetic defects we can go back and change them, but only if the other plasmas or Souls that will be effected by that change agree.

The purpose of the exhibition was to enlighten the humanity. It is interesting that he said, enlightenment is part of the Possession, which is the strength of the AA of our Position as human. When I try to think deeper about this I come to the idea that the AA is not just matter state elements. The SF of the COHN is the replicator of all the cells in the body, and is the fundamental building block of our life. So if that were to reach the field strength of enlightenment then the whole body would become enlightened. Thinking of enlightenment as a M field strength is a very new understanding. I never came across that in Buddhist literature. However, one Indian Advaita sage implied that enlightenment was a feeling, which is an emotion, and that has a field strength. Mr. Keshe said, that when we enter the fields of the system not to think of it as for flying, rather understand it as an evolution in time, and an evolution in enlightenment. The Place, Position and Possession will create a Time, and that will be the Time of enlightenment, and that will start at the zero point, or will be the beginning of Time. Because before that time there was no knowledge, and afterwards there is knowledge. This is the time of enlightenment and it happens very rarely. It's the time when the change comes.

The kind of knowledge he is talking about here is not what we are used to. We have read about enlightenment in many books and we may think we 'know' what it is. That kind of 'knowing' is not the knowledge spoken of here or in the scriptures of every religion. It's

difficult to explain, because we are living in concepts, and due to our arrogance we think we know, because we read all the books and can repeat the words back. This is different and requires direct experience. It's like if you study something very diligently for a long time, but you feel inside you don't really know it yet. And then one day a 'light turns on' and you experience it directly, then one of the first things you say is, I thought I knew it, but I didn't. Now after experiencing it first hand, I know it. It's like being in love with someone, and then one day you fall out of love, and you say, I thought I was in love, but I wasn't.

Speaking about love, he said, the worst hell is to be away from your lover, it's even worse than the 'fires of Hell.' Again, this is something you have to experience directly. To feel that kind of pain from love means you have to give your whole sense of existence to the one you love. You lose the sense of your own self and you just want to be near them. It's even more wonderful if the other person feels the same way. They call this requited love. But why did they give it a name, unless it is something rare? If you want to become a 'connoisseur' of love, then you have to burn in the fire of love, but don't just suffer, try to reach the essence of it. I found that love can 'break your heart closed,' in which case you quickly want to find another lover to cover up the pain. Or love can break your heart open, and then you will gain wisdom and your love will expand to All. Try to find out if it is physical love or spiritual love. I found that spiritual love has detachment in it, and even though you would prefer to be with the one you love, when you are separated from them, you still feel them inside you.

God does not kill His own creations and suck their energy. It's not like the Greek Myth of Cronus who ate his children, or the Old Testament tales of Moses. The Man that kills cannot be made in the Image of God. Therefore, it is the STM that is in the image of God, and not its physicality.

The only thing scientists can say about Dark Matter is that it is invisible and we can't see it because it doesn't reflect light. In Plasma Science we understand more about the essence of Creation. Everything is made of both G and M fields and has a measurable strength that changes due to conditions of the environment. It is my understanding that when Energy converts into matter it goes through an intermediary stage of becoming Dark Matter. In reality, there is no such thing as Dark Matter, it is a made up term. The matter appears dark because of its field strength relative to the observer, and it absorbs all the fields so it is dark. It's just like Cu being Nano coated and becoming black, because it absorbs all the fields. In his Book Mr. Keshe drew a circle and divided it in 3 parts and labeled them Anti-Matter - Dark Matter - Matter. These are terms that people could understand at the time, but Anti-Matter is really the Energy state, Dark Matter is the intermediary state between Energy and Matter, it's like the Gans. And Matter is what matter it becomes. He also said, that it is always matter.

This same pattern was shown in Beijing. We saw dark particles forming on the table and this is when the Energy became Dark Matter. He said it was dark because it is Carbon 14 (C14) and C16, then it cocoons itself, and then the energy changes to matter state gold. In the past he talked a lot about C14, but I never understood that we could see it in a

tangible form. Would the pile of particles we see on the table really be an energy state, or half energy? And then is the gold it forms an aspect of C12? He did say that if the environment gave it more energy then it could turn into something else other than gold. The process we are seeing with these reactors is the same as when energy in our body turns into a cancer. This is the essence of how Creation takes place. He always talked about how you need Inertia to manifest matter. This is an example of the effects of Inertia. Is it that the C14 interacts with Inertia and becomes the gold? And how does it work with the parameters? Is it that the Place stayed the same, but the field strength of the AA of gold got created and then manifested the Position of the gold?

A KS thought the color of the Creator would be black, maybe because he thought He would absorb all the fields. Mr. Keshe said, white is the color of the Creator, the White Light, but not white as a color. What does this mean? Is it "White" as purity? But then he said, those who have a white aura reflect the light of the Creator. Not many people have this. The aura of Messengers is white at the time of the receiving the message, but from then onwards the emotion of the physicality taints the color. Maybe this is why Mr. Keshe waited for 3 callings before accepting the Message, he wanted to make sure he was mature enough to carry it through without the problems of an immature STP and physicality. Finally, the color of our aura can tell us where our Soul is destined when we leave Earth.

The 7 KS were trained to be Captains to carry other Souls through the transmutation, and the training went very well last week. He showed the graphs and explained how the passengers became independent from outside fields, because they trusted the Captain to take them to the destination. This time there was no panicking. In the past if a group were transmuting and one person panicked it brought the whole group down. With the Captains this does not happen. For example, one Captain could carry 150 Souls to a destination easily. He said, from now on this is the preferred way to transmute. And that the Satellite Souls can help in this process by becoming semi-captains. They can be part of the connection between the STM and the Captain, just like the Universal Council is the connection between humanity and the Universal Community. This is part of the enlightenment and Satellites can be trained to do this work.

I was thinking deeply about this when a KS asked me, what does it mean when a guru gives you a mantra to say? First of all, if the guru is a true Guru then he should have realized himself the Energy essence of the mantra, then when he imparts it to a student it will have power and the student will feel it when he repeats it. Then it occurred to me that this is what Satellite Souls do, they act as intermediaries and provide an Energy connection for a Soul. Even though in reality the Soul doesn't need that, but it believes it does, because the STP doesn't have perfect faith in its own Origin. I have used mantras and I know they work, but for westernized people it can sometimes lead to other things if they don't have enough maturity. There is a science behind it that requires more knowledge of Totality to put it in its right perspective.

He asked us to listen to the Introduction video at the beginning of this workshop and as we have more knowledge it might have a new meaning for us. In this excerpt it says that

in the U the Soul and the STP are two entities that exist separately and that the Soul has to be encaged in the P, and at what we call death the STP is let go of. With the new changes both the Soul and STP will coexist together and we'll be able to transmute between the two anytime we want. Then there will be no need for death, because they will live together. The new species will contain a collection of the essence of all created entities in the U within it. The process will complete soon and the whole Universal Community will have the benefit of having both the Soul and a STP.

Other Topics:

The brain itself is the creator of the M fields of the plasmatic Cosmic Rays, then they'll understand what it needed to hold the Soul within the body;

Time is the essence of Creation. Time does not exist in the U, it is made by Man;

We can manifest the Christ with this knowledge;

The CR fields will pass through the glass windows and you will be showered with the love of the Creator.

Thanks for listening.
