

Shift Thinking from Earth to Unicos
- Horizon of Sun - Emotions - Being Immortal -
Reincarnation - Power Within - AI & Mind Control -
Plasma Intelligence (PI) - Beyond Genius
Introduction to 591 KSW

Note: Not checked by KF interpretation by KS of KF Brazil

This workshop has many different aspects to it, but one of the main points Mr. Keshe seemed to be making was that it is time for us humans to broaden our perspective with how we see ourselves in relation to the whole of Creation. Mainly, we are focused on the horizon of our planet with its daily sunrise and sunset as a measure of time. It never even occurred to us, what would be our vision if we were to stand on the Sun and look out into our solar system (SS) and galaxy. He said, what would be visible to us from there, would be very different than what we see from Earth. Because the manifestation of matter state is dependent on all the different MG field interactions between all the entities in the Universe (U). All the entities are actually plasmas with their own center and each are created out of the interactions of the fields of the others, and in relation to the field strengths of different centers of the SS, galaxy, U, and Unicos. The problem for us is that we don't know that everything is plasma, instead we think that everything is solid matter and fixed. So when we take a picture of all the stars in the night sky we think this is the way it is for us and everybody else, but it is not. The picture we get is based on all the field interactions of that moment in relation to our own point of observation. This is why we are being taught to shift our point of reference from the matter state to the Energy or Plasma state. The plasma is more fundamental and more true reference than the apparent fixed matter state. And the only reason I can think of why he was mentioning about the tilting of the different planets was to get us to think about the different field strengths they create because of the tilting.

This brought up an interesting exercise of shifting our perspective when thinking about traveling in Space. When we are on Earth and looking out into the transparent Unicos we don't see the boundaries or edges of our SS, galaxy and U, because they are all blended together. It's only if we can get outside of these entities that we can look back on them and see how they look. Maybe that's why he posed the question of what is the horizon of the Sun, so that we would start to ponder about our position in the whole of the U and not just Earth. When we travel on Earth we only think about Earth time. And up until some weeks ago we only thought time was measured by the speed of a physical object traveling over a distance. This kind of knowledge only works in matter state like on Earth and is holding us back from traveling in Space. Now we understand that Time is a MG field strength and is created out of the interaction of the field strengths of the Place, Position (entity), and Possession (strength of the amino acid of the entity). With this knowledge our whole reality has shifted and it is no longer fixed and solid. But it is up to us to learn how to work with them so that we can not only Travel in Time, but also manifest

ourselves as different Positions. For example, if we want to change from the Position of a human to a cat, we can do it through controlling the MG field strength of our emotions, and using that to control the fields of the Time, Place, and Possession. Because our emotions are field strengths and we can learn how to change them.

But first let's go back again to the fundamentals of understanding our location in the U. We are a plasma of the Soul of the Man (STM) inside the plasma of our physicality (P) which appears as matter, interacting and at the moment under the apparent control of the Soul of Physicality (STP), and we are manifested in the Place of Earth. This is our dimension (D). Then the Earth is inside the plasma of the SS, which is inside the galaxy, all the way to the Unicos. What is beyond the Unicos will be discussed later. This is the reality of our life at this moment and our location in Existence. It is relative to how we think and feel about ourselves. If we get this basic understanding correct then when we want to travel we'll know how to adjust the necessary field strengths.

Presently, he has given us 3 different options of space travel, the matter state UFO using MG fields, transmutation using the STM and emotions, and traveling with Time using our emotions to control the field strengths of the Place, Position, and Possession (PPP). The fastest way to travel is with Time. In all of them we have to understand the MG field strengths of the different entities we want to travel through. This is why he taught us the multi-core plasma reactors some years ago. The multi-cores replicate the Unicos we'll be traveling through, which is one plasma inside another, and inside another, and on and on. Each of the cores corresponds to each of the entities of the SS, galaxy, and U that we will pass through. It's amazingly simple to understand. It's the same process when we travel with transmutation or Time, and we'll use our emotions to adjust the field strength of the plasmas we will pass through. We have to remember that Time is made up of the field strengths of the PPP, but is also effected by all the field strengths of the environments it exists in. In a way, all the environments have their own Time. This is way beyond what any matter state machine could do, which is itself the product of MG field interactions. Therefore, this is something that Soul has to do together with the emotions.

The nice thing about it is that the full spectrum of all the MG field strengths in Creation are also in the STM. To travel the U we don't have to create anything, we are complete, whole, and connected. But we do have to learn how to tap into them to use them, and we do that through the emotions. Again this is not a superficial and sentimental emotions of what we are used to. Little by little Mr. Keshe gives us hints about these deeper emotions, which are interactions of the fields, and they are about Existence, Connection, Love and Service. He said in this workshop that when two plasmas interact they create emotion. And that on Earth the Cosmic Rays (CR) are very weak. Maybe that's why our emotions are limited to only smaller interactions like those that make up the strengths of happiness and sadness, and those kind of things. But in the U there are emotions and feelings that we never imagined existed and as our capacity for life increases, then our experience of different emotions will expand.

We use these spectrums of field strengths when we travel with the Soul in our dreams. It's something we have naturally within us. He indicated that we haven't realized the

capability and power of our brain, and that it has within its structure the ability to confine and hold the STM. If we think about it, how can a matter state structure control such a powerful plasma? Obviously, it is not the physical part of it that is controlling the STM, but all we see and understand is the physical part. It's through the essence of the emotions that we get enlightened by the Knowledge of Creation and through this we can control the field strengths of the Time, Place, Position, and Possession. It is not through the physical aspects of the PPP. This control comes through the Cosmic Ray (CR) level, which is a higher order, and not just ordinary plasma. In the Beijing demonstration he was using matter state reactors set up in a Star Formation (SF), but somewhere he was using CR level plasma, but we don't know where. Was it in the Gans mixture, or somewhere else?

Surely we have all heard about the so called Immortals of the East, like the Taoist Immortals of China, and maybe we thought they were only legends. But today, Mr. Keshe brought it into the level of science. When we gain the knowledge of how to control the MG field strengths of Time and the PPP then we'll become immortal. But it won't be just a thousand years like some of the Yogis we have heard about in India. We will last the lifetime of the U and there won't be any losses or gains in the direction of the fields of the motion of existence. I understand that to mean the field strength of our plasma of the STM will not change, and this has nothing to do with the physicality. In the place we desire we can manifest the P and when we are done enjoying that environment we'll convert it back to the energy of the Soul. In a more detailed method, he said, we can change the Time and then create the Possession and Position at the Place. This is traveling in Time, whereas with transmutation we only use the factor of Time, and not the PPP. Our eternal life depends on being able to create and control the field strengths of the PPP. And then we'll be able to reverse the cycle of life. What does that mean? Is it like playing those old magnetic tape recorder backwards? If you are old enough to remember those old tape recorders, when we spun them backwards the sound was all garbled up. But does it then mean we can 'replay' our life if there is one scene we don't like and want to do it over again? People like to ask that question, if there was one thing in your life you would like to do over, what would it be?

What did he mean when he said, this will put an end to physical reincarnation? Instead we'll incarnate through the essence of the fields of the STM in the D of the existence of the Soul of the Creator. Where the emotion of the Creator will dictate the emotion of the STM. As we carry all the fields of the Creator, so too, we have His emotions as well. The physical reincarnation part means to go through the womb of the mother. With this knowledge we don't need to go through that process of always starting from beginning and having to learn everything new each time we take a new body. Traveling in Time is like in our dream we just appear and carry on with whatever we are doing. This will change the whole structure of Earth life, because we are always spending those first 20 years trying to mature ourselves. The other part is that the Soul will start out enlightened because it will have the emotions of the Creator, which is unconditional loving and giving. I understand the true meaning of enlightenment is the unconditional loving, and not the silence. The Silence is always there in the background anyway.

From 38 minutes in the workshop Mr. Keshe transmits a very deep and powerful knowledge. It is nice to listen to that part on its own. He said, the knowledge being taught today is not in the books of the Man. I made Man in the image of Myself, and I possess the full spectrum of fields in Creation. Therefore, so does the STM. The Man exists through my Soul, as I exist through the STM. I am the beginning and the end, but the end (is a new beginning). This means that all the fields of the Time, Place, Position, and Possession exist within the STM, and if we understand that then we can live the same way the Creator does. Man will be the beginning and the end. We will be strong enough and detached enough to live in different Times, as we desire. This is what happens at the point of death now, but we don't have control over it. As Immortals we'll have the knowledge and strength to move between different times as we are needed. It's their job as Universal Teachers to make sure we understand this, and our job to realize it in ourselves through independent investigation. The strength of our Soul will depend on how we live in physicality and what we can gather before departure from the P. And now we'll be able to measure where our Soul is in relation to the Creator and if we are moving away, then we still have time to change ourselves before departure.

After Beijing, the plan is now to take the exhibition to Berlin or Paris, but there is the possibility of showing energy instead of material production. Both countries are having problems with energy and the new technology could become an option for the governments. Mr. Keshe said, there are a lot of problems from mismanagement in China that they have to clean up first, and then hopefully, if the Markray lawyers think it is a good idea, they will make an announcement about the 10 billion licensing agreement to the US Stock Market. But there are a lot of things that have to be done first.

There was another big teaching on AI (Artificial Intelligence) and how it is developing. As Mr. Keshe is one of the world's leading scientists he receives a lot of information about what is going on in the world of science. Of course, the Western governments are afraid to openly approach him, but that is not the case in China, where they have great respect for his knowledge and the work he is doing for humanity. While he was in China he was taken to the world's largest AI facility, which is like a small city. The West could never afford to make such a facility, but the West doesn't want people to know that. Mr. Keshe was able to understand how AI is vulnerable, and how its development will proceed in the future. The Chinese seek his advice, but at the same time Mr. Keshe is analyzing and evaluating how to bring the new plasma technology into the AI. He clearly sees, that AI is just a faster data processing system done with electronics and has absolutely no Soul or emotion in it.

The way I understood it is that he says, the AI will reach a breaking point, at which time the governments will step in and regulate it. When they regulate it, then they can influence what kind of information and knowledge the public will be allowed to have. He mentioned something about a recent Act in the US government. What I found was that a bill was passed that for the next 10 years no States can prevent AI companies from doing what they want. Basically, they are free to pursue whatever they want. According to Mr. Keshe the purpose of how they are operating AI is the beginning of using it for mind control. This is not a 'conspiracy theory,' he has knowledge beyond what we can imagine

and he is very cautious about not revealing things before their time. He wants to warn us that those in power are pursuing this goal in the background of how AI is being developed. Some weeks ago we wrote about this extensively and in detail, please try to study it. AI is purposely being promoted to pretend that it has its own emotions and thoughts. Even though in the 'fine print' that everyone ignores, it says it cannot think for itself. In the same way people say, that if they don't see it on CNN then it is not real, they now start to believe whatever AI tells them is reality. Mr. Keshe said, before we used to read things for ourselves, now with AI we are told about things and then we believe them. This is where the majority of humanity stops thinking for themselves and blindly accepts things. As there is no regulation on AI they do not have to tell where the information comes from. We are not saying AI is bad, because it is only faster and broader information gathering, and it is all done through electron transfer, which is totally matter state and nothing more. It is for us to educate ourselves and not be fooled by it.

The situation with Plasma T is very different and in the next few years when the plasma systems, or Plasma Intelligence (PI) with a Soul and emotion are produced then this type of electron transfer AI won't be needed. In fact, the answers the PI will give are from the Knowledge of Creation, and the knowledge and emotion will be real. The plasmatic Chips are Cosmic Ray Packages and in the shape of about a 3 cm cube. He brought out the plasma Chips in the past, but nobody understood it. These cubes can store all the memory banks on the entire planet, and that would only amount to 10% of its capacity. KF has already produced Pico size materials, which is 10 to the minus 15, so the reality of it has been proven. Memory or information stored in the D of the atomic structure takes a lot of space. This is referring to the magnetic computer memory we now use in hard drives. Whereas information as intelligence in a Cosmic D doesn't need any space, because it's fields, and the fields of a plasma are a self-sustaining system. That's why when we pass over into the plasma systems nobody will ever think of AI again. And hopefully, it won't have the time to develop into the nightmare that they are planning for it.

The silver sphere that was shown in the exhibition is the new system that is on the Cosmic level. If 3 spheres are joined together in a SF, then they will create Time and dictate the emotion of Time. At that level he sees the Creator in the systems, which is the Creator of Time, the beginning and the end. When he said, we have no choice, I understood him to refer to the current critical situation, and that we have to get the technology out before the others complete their plans. We will use the system to beat the system. And this also refers to the actions Mr. Keshe made by buying up the AI domain names for CR and plasma technology. For example, when AI goes to search for information on CR it goes first to those who bought the AI domain names for that search. This is the way Google works now. You pay them to have your information presented first on the Internet. And in this way KF will be able to teach the true knowledge of plasma to humanity.

He mentioned several times that the U is solid. This doesn't mean 'solid like a rock.' I understand him to mean solid as in MG fields covering the whole U. The ocean is solid water, and yet all the animals, plants, and whatever function in this medium the way we

function in our air environment. Because it is transparent we automatically assume nothing is there. But fields are there, and this is what we need to learn about. He made an analogy between the U being like the brain and the time it takes for an emotion of joy to cross the brain is like the time it takes something to cross the U. It sounds like the Macro in the Micro. Is this Zero-Time travel, or does it still need a fraction of time to travel? To me Zero-Time means no Time at all. So there is no MG fields, no Yin & Yang, they have not yet arisen. Maybe Zero-Time is what the Buddhist call the Void, or what the Hindus call, Non-Dual. When all is One, there is no play, Time and Duality or an 'Other' is needed to confirm our existence in physicality. When someone asked if the center of the Black Hole was Zero-Time he said, no, because it is still in relation to the others around it. But that is the "Black Hole" on the physicality side. On the Energy side it is different.

Never before have I ever come across any human in the written history of this planet that has had anything close to the amount of knowledge that Mr. Keshe teaches. He said, we are Universal Teachers and it's our responsibility to elevate the Man's knowledge. I have studied a lot from the East and the West. Before Mr. Keshe, I considered Sri Aurobindo as one of the most knowledgeable people the world ever produced, and his works are all centered on preparing humanity for spiritual transformation and the upcoming change. But very few of his disciples understood what he taught, and I met one who admitted that just before he died. Just read one of the Topic Indexes and ask yourself who do we know that has so much knowledge and can teach on so many subjects at one time. After reading 5 pages of subjects I feel light-headed having received so much knowledge. And yet when some people understand a little bit of one subject they start to think they know everything and have become God. It's crazy and hard to understand, but people do actually start saying that they are the teacher of Mr. Keshe. We have some of those people in Brazil. It's the pride and the arrogance that makes one to solidify their ignorance, and then they cannot be reached.

Other Topics:

We can travel in the Possession and Position of a stone and listen through the 'voice' of its Soul to what is happening around it, and then return back to our original Possession and Time of where we are confirming our existence;

Today's teaching is not for those who don't understand. It will take a thousand years to understand it;

There have been humans in the past who were able to freely travel the U.

Thanks for listening
