Creation: Time-Place-Position-Possession - Zero-Time -
Enlightenment Created - CR are Safe - KF Accepted -
Parallel Worlds - CR Balls Amazing results - Holy
Villages of Iran**

Introduction to 588 KSW

Note: Not checked by KF interpretation by KS of KF Brazil

Today's teaching is about the creation of a real Time Machine that KF is currently developing and testing. It's not a Time Machine like what we've been told about in science fiction movies, or what matter state physicists think they can develop. In fact, Mr. Keshe made it very clear that in the matter state these things are just self made fantasies. For example, the Chinese are spending billions on trying to fuse elements for some seconds, the same with CERN. And then we have the Americans using huge amounts of electricity to generate a magnetic field of over 100 Tesla's, when KF Knowledge Seekers (KS) made 129 Tesla with simple equipment costing hardly anything. It's because KF teaches the Knowledge of Creation, which works with the Magnetical Gravitational (MG) fields of the plasma.

The other part of the teachings explains the next step in bringing the Plasma Technology out into public. On Saturday May 10th the Plasma T will be shown publicly for the first time in Beijing. In a small area in a very prestigious place close to all the embassies, they will setup some large TV monitors behind a glass window where people can see the plasma being demonstrated. In addition there will be large monitors outside as well so that anybody walking into this area will be able to see the revolution in science. He said, the experiments will be done remotely and broadcast to this location where thousands can come by and view it. World dignitaries, leaders, scientists and others are invited to attend. It will be broadcast live on Zoom for 72 hours, and then it's up to the KS to spread it through Social Medias around the world. Mr. Keshe will show how materials are actually created in the Universe (U) through the interaction of Universal fields, or what we call, Cosmic Rays (CR). He has the knowledge to create materials of the U not known on this planet through the interaction of local MG fields and Inertia, with the CR generated in the systems that he helped KS and plasma scientists of the Keshe Foundation to build. This is not something new, he demonstrated the creation of gold years ago to the Chinese Military and it rained down gold particles, and the Generals and scientists were covered in it. But this is the first time it will be done publicly that the whole world will witness it, and therefore it cannot be denied any longer. During the presentation they will give away 100 spoonfuls of the material produced by the machines, so that people can take it back to their country to have it analyzed.

Another very important aspect of this demonstration will be the launching of the American Markray Corporation, which is the financial and commercialization arm of the KF. Markray will carry this new breakthrough technology across the world creating a new Industrial Revolution in Plasma Science.

To train us to understand about Time he had to go through over a decade of plasma teachings starting from the Nano to the Gans, rotating Space reactors to generating fields, Space Travel, about the Soul, and Cosmic Rays and now this. He taught us how the Universal Fields travel through Space and when they interact with the MG fields of a local environment they can chose to manifest themselves into the physical dimension (D). He called this the time, place and position (TPP). We understood that the Time was the relative time we made up as human as minutes, hours, and days based on the rotation of our Sun. And the place was somewhere on planet Earth. The position he never really explained before and nobody asked what it was. Today he said, the T - P - P form a triangle, but it doesn't work because something was missing. That missing piece was Possession and in this case it means the MG field strength of the AA, which for us is of a human. The other parameters are defined as the Place being Earth, and the Position being the entity or a human, but it can also be an animal or any other creature in the U. This new triangle is called, the 'Triangle of Creation' and the 3 base reactors are Place, Position, and Possession. When these 3 interact they create Time at the top. It's just like a Star Formation (SF) that we used to make out of 4 rotating plasma reactor balls. When the 3 base reactors are free to interact with each other, then they create the 4th reactor on top. It is not physically made, instead it is created out of the fields. However, we were taught that if we fix the 4th reactor with a physical reactor, then the whole SF as a unit would create lift trying to find its field balance. In the same way, if we fix Time as the 4th reactor, then we can change the Place, Position (entity), and Possession (strength of AA). Now we can begin to play with Time. I understood that if we fix Time, and change the Possession (strength), then we can also change our place, and what Position, or entity we want to manifest as. By changing any of these parameters we can change the others. We can also experiment with fixing one or two, and seeing what effects they will have. Today Mr. Keshe has given us an amazing tool for travel in the U, beyond our imagination.

I certainly didn't expect this. I thought transmutation was the highest form of travel. But now it seems that this Triangle of Creation is even higher and easier. I believe that if we can create and control our emotion then we won't need technology or a system to do it. But he said that before about transmutation. Maybe this is still a transmutation, but through our emotions we change the MG field strength of our AA and that changes our Time, Place, and Position (entity) of manifestation. But it is still too fresh to understand exactly what it is, and how it is done.

There are a lot of new concepts and knowledge in this workshop that have to be studied more carefully. Today they have been introduced and I am sure he will expand on them over the next months and years. He talked a lot about Time and directed us to ponder what Time really is. First of all, does Time really exist? Or is it something relative that we make up through our own experience and observation of it? If we studied Eastern

Spirituality we found out that they already had a more advanced understanding of the illusiveness of time, than in the West, where scholars even a hundred years ago accepted that the world is only 5,000 years old, because that's what the Hebrew Bible said. Now with the new scientific understanding of Time that Mr. Keshe has brought us today through the Plasma, we are understanding that both groups were partially correct. We have to include in these groups the more recent theories of the Big Bang, which many people accept as fact. They all have some elements that are true, but lack the Totality of understanding the Knowledge of Creation. In other words, they don't understand the "big picture," of how Creation started and works.

Since we have discussed this many times we can go down to the part of the Cosmic Rays (CR), that are high order M and G fields that emanate from the Creator and are constantly flowing through the U and when M fields of matching strength interact with each other they can form plasmas and accumulate and become entities like stars, planets, and Beings like humans, and the Soul of the Man (STM). This is just a very short summary, our main point is to get to Time. So when entities like the STM become mature Souls, then they can create and control Time, because they understand how Creation is made in the first place, and how it functions through interaction of the MG fields of the plasma. We now have the background understanding to work with the 'Triangle of Creation,' which is a SF of the Place, Position (entity), and Possession (strength of the AA), and when these 3 interact they create a 4th reactor on top, which is Time. Because we know that each parameter is a plasma and can be controlled by emotion, which is also a M field strength we can manipulate and change Time. With this knowledge all the things we have heard scientists say about Time Machines, Parallel Time, Parallel Universes, Parallel Worlds, and all the other things now become possible. Though the words may sound the same, they are far from it. We don't want to fall victim to the fantasies of ignorant matter state scientists who are like autistic children repeating the same mistake over and over, but claiming it as proof of their theory, because they control the narrative through force.

On May 10th Mr. Keshe will show the reality of the Plasma Science for the first time in public on this planet in Beijing. He will show the creation of materials from the plasmatic fields of the U and Cosmic Rays. In other words, gold particles will appear out of the air, and accumulate around the plasma systems, and they will be gathered and given to the public to take to their countries and analyze. We say something is scientific when it can be understood and replicated. This is how matter is created in the U, and by implication it is how all of life is created as well. Therefore, it will be a revolution and evolution in the science of the Man. The matter being created by this machine follows the same pattern of the Triangle of Creation. The Place is Earth, the Position is the matter being produced, and the Possession is the MG field strength of the AA of the material manifesting, and the Time is the relative Earth time of its creation. That will be its zero-time, or its birth in this dimension.

How I understood that we can use this Triangle of Creation to travel is for example, if we want to go to New York. We hold the Time and our Position as a human constant and then we create a MG field of the Place for New York, and we'll manifest in New York. But it is not clear about the Time because he said, 'the Time is our time, and this is how

we interface with different times.' So my question is, do we stay in our own time when in New York, or do we join New York's time? He will teach us these things later. Maybe we can do both. He said, multiple Times exist but we have to understand how it functions. If multiple times exist at the same time then, is it like changing channels on the TV? And when we enter that 'channel' do we take up the time that channel is at? But what if we are just a short visitor? Maybe our Soul keeps track of our own Time in relation to the Totality of Creation. Like, do Aliens who live on Earth know in the back of their mind that they are in a different time dimension? But he made it clear that it's not like changing time zones on Earth, where it is just physically moving over a space. Rather it is done through changing the MG fields of the plasma of the other parameters in the Triangle of Creation, like Place, Position, and Possession. This opens up a huge science to explore.

He said, that when we chose to go somewhere then our time starts at zero the moment we manifest there. In Nisargadatta's book "I Am That," he said something like, when you dreamt last night, did your dream go through evolution, or was it just there? When I first read that, it put a big question mark about the reality of this so called, world. Is it just appearing instantaneously but we are so distracted that we are not aware of it? Now Mr. Keshe is explaining the science of how it is done. Emotion is a field strength and through our emotion we can create and control the MG field strength of the Time, Place, Position, and Possession. These teachings will become the blueprint for the evolution of the science of the society of Man for centuries to come. This will be the easiest way to travel, but we will still have the option of transmutation, UFOs, rockets, and the donkey of the Man.

This puts a big question mark in how old the Earth and U actually are. Scientists are now saying the Earth is 4.5 billion and the U is 13 billion years old. Mr. Keshe is asking us if the Creator's fields traveled those billions of years to get here to interact and create Earth, or did it appear here as a Position (entity) and a Possession (strength) as one cell, and the rest manifested into it? And later he said, did the U suddenly spark out into all the millions of stars and galaxies, and since we couldn't understand it, then we came up with a number so we could feel safe in our ignorance? If we create the Time through our emotion, then so does the Creator, and the Creator's Creator. The more we think about it, the more we realize how much our knowledge is lacking. Time is a very strange thing to contemplate. If I think back to my childhood I can't relate to how I used to think and feel about things, because I have changed so much and I continue to change. And yet I have the memory of having been that way. But today it has no reality, or what we could call, field strength in me. By chance I have met people I knew from my childhood and it is very strange, but most of them are still the same. It's like they have been frozen in time. They still think the same way and are stuck in the same problems in their lives. They have almost no intellectual or spiritual growth at all. I wonder how that can be, and yet the evidence of it is standing in front of me. So are we the creator of our own time? Do we create time every morning when we open our eyes and start a new day? The knowledge of today is opening a new dimension that will change all of our lives.

There was a subtle message we should all pay attention to. Mr. Keshe said, last week we changed the enlightenment and some received it and moved on. Once we create the

condition of enlightenment, there will be no need for fear, nor for peace or love, because everything below it (in field strength, is already contained) within it. When I hear this I think, oh, so at any point they can throw a switch and we'll all be enlightened, then why do all this hard inner work? For one thing, I think we still need to be matured enough to be able to handle it, so that it integrates into our life and remains and grows. And most importantly, whatever we obtained through our own efforts I believe remains with us always and is never lost, and perhaps it gives us a certain field strength that can be used to help others progress. And doesn't he always say, there are no shortcuts?

To stop the killing in the race of the Man we can move the Time and change the Possession (strength of the AA), but keep the Position (entity) as Man. It was the Place that did not provide enough energy to satisfy the hunger of its inhabitants. So we also need to change the M field energy of the Place. And then we have to change the whole structure of Time on this planet so that the Man will not have in his memory his former life of destruction and killing. Because the Man and his Soul are perfect. Mr. Keshe said many times that he hopes the Man will not abuse this knowledge of Time.

He made a clear distinction between what we call, Cosmic Rays (CR) and matter state radiation. Because the Americans used the Bomb in Hiroshima, now the whole of humanity is afraid of any words that have nuclear and radiation in them. It's very strange, because out of that fear humans have detonated 2,056 nuclear bombs in unnecessary tests on this planet. By the size of that number it looks like we already had our nuclear war, without having it. Anytime we use the words Cosmic Rays, or Cosmic Radiation, plasma, or MG fields there is nothing to be afraid of. The following are all part of the energy of plasma: Cosmic Rays, the Energy, or Soul of the Man, plasma radiation, and M and G fields. These all come from the plasma condition of the U and the plasma can never harm you, and the stronger always gives to the weaker to make it equal with itself. It is totally benevolent. However, if you have an unconscious wish to create a certain interaction of the fields that could be interpreted as negative, that is a condition of a local manifestation of emotion. It is not something bad. This is not to be confused with what happens in the matter state. In matter state by force we create nuclear radiation, X-Rays, Gamma Rays, and all the rest. These are matter state radiations of the fields and can have harmful effects on other matter states, and they can be used with wrong intentions. Whereas with plasma even if the intention is wrong, the plasma will not harm. It is for us to mature our understanding of the difference between Energy plasma state and the matter state. Cosmic Rays are connected to the energy of a plasma and they too will not harm. We should come to the knowledge of CR not out of fear, but out of love for the beauty that it creates, which is what we call Life.

The US Government always refused to accept Mr. Keshe as the CEO of the American company Markray because he was an Iranian, and a nuclear physicist. At the same time they always refused to designate Markray as a Space Research Development company and give it the code of 9661. Something changed recently and they have allowed both. Markray is now the 27th company on the American Stock Exchange with this code. You can look it up. Only government agencies and military defense companies get this code. If you remember years ago the Belgium's stopped Mr. Keshe from showing the Flying

Car because they said he didn't have a license for it. That has all changed now. Markray will be showing the Space T as an American Space company in Beijing. NASA has been making some kind of claims about a Time Machine and the only place they can get that knowledge is from the KF teachings. This is why he has decided to show the T publicly in the hope that the Americans will join with the Chinese and make a real Time Machine and bring peace to the world. And to stop certain nations from stealing the T that belongs to humanity.

A question was asked about parallel worlds and if we have a parallel person like ourselves somewhere else in the U. If you look on the Internet in one place it says, in cosmology a hypothetical universe can coexist with our known universe but may operate under fundamentally different laws of physics. This is very similar to Plasma Science, but instead of different laws of physics, we say that every M field has an opposite and parallel G field. It means it is flowing in opposite directions. But does that mean it could also have its own dimension like ours? He said, it all depends if it carries with it all the other things as well. So for example, if I am a M field flowing in this direction with this whole dimension of Earth, then if the G field of me, that is flowing in the opposite direction contained the same kind of dimension as Earth, then I would have a parallel person of me existing in that dimension. Is it possible for us to meet each other?

At the end of the workshop he explained a lot about how special the CR Balls are and that a lot of people are reporting amazing results from using and experimenting with them. The CR Balls allow us to tap into Universal Energy and not just energy of this world. As we use them we should observe how the pains and lumps in our body change, and how we get elevated and especially our emotions. We should be able to feed the Soul and it will feed the P. It should elevate the STP. We only need to use them a few minutes a day, or even a week, because the knowledge we are receiving has to be accepted by the STM. The reason they put them out is because it's time to enlighten humanity. If you are serious about Plasma this may be an essential tool to have for the upcoming changes to humanity.

Other Topics:

To manifest as a Man we need a certain M field structure. The AA is a M field structure that we possess to be a Man;

The Possession (strength) is the STM - Position (entity) is the STP, but you need Time to manifest yourself. I made Man in the image of Myself, but I gave Man the knowledge of Me to make My image;

We cannot tell the future, because the future comes out of the interaction of the fields, and it unfolds.

The Zoroastrian villages of Iran are the most holiest of places for Mr. Keshe. When he sees videos he feels a sense of having been there, and lived that life. They live a simple life and still follow the Ethos of Mitra and it's as if time has stood still. It makes us wonder if we need the modern world where we are destroying each other.

Thanks for listening.
