

592nd Knowledge Seekers Workshop May 29, 2025

(Quick Index 18 pp, Introduction, Topic Index ; Need to do; Key Phrases, Words)

(Auto transcription from Elias)

Continue teaching Time; Place, Position (entity), Possession (strength of AA of entity) (PPP); Create Time - emotions; React through emotion; Everything has emotions humans to U; Life has Energy & Matter - Yin & Yang; PPP tangible matter; P has parallel in Energy; Emotion cornerstone of Time; Intelligence; Emotion exists in Energy & Matter; Intelligence only Energy; Emotion - create Mass - further Weight - no connection to original plasmas; Emotion - salt - connects matter & Energy; Emotion of Energy & Emotion of P; Intelligence from knowledge - no P; Emotion & intelligence - create enlightenment - search for enlightenment; Matter emotions can damage body; STM emotions interact with intelligence - brings enlightenment; PPP creates Time in matter; Emotion, intelligence, enlightenment create Time in Energy; When enlightened tell future - Time moved 200 years ahead - strength of Intelligence equal to future intelligence; Enlightened use Time to travel; Creator has 2 images - Energy & matter - interacts with own fields; Plant needs P & energy of Sun; Tilt brings diversity; Why clouds rain back - speed of environment; Tilt of Mars same as Earth - Earth was where Mars is; Mars will start evolution of life like Earth; Time & PPP - emotion, intelligence, enlightenment - come together; PPP of Mars reaches enlightenment - life begins ; Earth moves to Venus - end of life; Compare tilt of planets; Zone in SS where life can exist; Life is Position & Possession - Place is emotion, intelligence, enlightenment; Don't colonize Mars - life starting; All SS with life have PPP, & emotion, intelligence, enlightenment working together; Time - both matter & Energy; Closer to Sun tilt increases; Emotion dictates new lives on Mars; Earth & Mars will both have life; Dinosaurs on Mars; Sun losing power - Mars - different type humans - creatures - Souls - emotions - intelligence; Less intellect than Earth; Creatures created in lab; Life inside Mars; Creatures in box - own intelligence; Tilt of Earth and Mars not coincidental; Mercury into Sun; Rivers start on Jupiter; Time of PPP matches Time of emotion, intelligence gets enlightened - Life created; If no Sun - no life; Sun is enlightenment; Need this knowledge to travel Space; Starting Life through Energy of STM; Children of Mitra from Energy - enlightened; Markray - mark that Ray - creates life; Same time living through Soul; P is furthest from Creator; Change history of knowledge; Don't live by time - life creates time; Time travels with us - we create it; When Time of Energy & Time of P match - creation of Man - STM within; Everyone responsible to understand Soul & P; Souls of same enlightenment like to live together - areas in galaxies; Measure field strength of enlightenment - where Soul manifests; Understand intelligence and purpose of existence - galaxies; Mitra's Daughter will take you through; Origin of GM fields - Book to be written by you - creatures of U; Tilt of Mars & Earth our wish & will; Re-emergence (the Virus) in China; Emergency Release - new Cup of Life 1 & 2 - through Markray; No microbes & bacteria's in Space - viruses; Control viruses with T; Markray stop shares; International finance without currencies - buy Keshe Coin; Colonization in Space; No wages; KF products in pharmacy - Austria & Germany; Life on all planets; Created new lives in lab - worm; Life exists everywhere in U -empty spaces; Life repetition of creation; Breath in millions animals; STM - all living beings; Understanding emotion resolves past; About Fibromyalgia FMS; Not your fault - recover; AI - Flight session through Soul; Emotion into transmutation;

Jesus 2,000 years - creatures of past - prisoners of fields of ancestors; Hide T in pyramids; Stop suffering on Mars & U; New Soul from STM - not kill; Oasis system - parallel agreements; Show in Paris; Time is always relative; All nations join one financial & political structure - one currency; Mark a ray in plasma - identify in Space; Markray - new market; Stones have aura; Appears solid - but dynamic; Every atom dynamic - aura; Increase M field strength; Germany needs jobs - create war in Romania & Ukraine; Trump same; KF - 2 years stop war; Need huge financial support; Markray shares; World operation to create war; Energy of gold; Chinese respects KF; Show in Moscow; Drone manufacturing in India; Drones without motors - future of Space T; About Markray shares and Keshe Coin; Need 2 million; Palestine worse - Trump to setup hotels, casinos, prostitution - Palestinian oil fields; British Petroleum in Palestine - diabolical; Palestinians become slaves; Take love of God from Tribe of Moses; Understand how SS works - Mars - new Earth; Need huge financial support urgently - bring peace.

Topic Index

Continue understanding Time - has no characteristics - created by conditions it has no control over; Part of one's life everywhere in U; Place, Position (entity), Possession (strength of AA of entity) - not only way to create Time; Referred to emotions & Soul from beginning; Emotions - not exclusivity of physical life - reaction to given situation; We decide how to react through emotion; Everything has emotions humans, animals, plants, galaxies, U; Life has two sides - Energy & Matter - Yin and Yang; Place, Position and Possession (PPP) is tangible matter; Every physical condition has parallel in Energy; Energy parallel of Time in a physical PPP is emotion; Cornerstone of Time is emotion - because it has to react; Take from teachings according to intelligence; Intelligence is how assess emotion received - create something new; Emotion exists in Energy & Matter; Intelligence only exists in Energy; Emotion is like 2 MG fields interact to create Mass - further interactions with another GM field creates Weight - no connection between Weight and original 2 plasmas; Weight from balance of 2 fields; Emotion - outcome of interaction of 2 worlds of P - called salt - connects matter & Energy; But emotion itself - created out of physical part; Intelligence gathered from knowledge of past has no P - like emotion it's on Energy or field side; Intelligence - what you understood add emotion - create reaction - that creates enlightenment - mystery of life - search for enlightenment; Emotions from stress in matter state - create heart attack - damage body; But emotions from STM - without dimension - interact with intelligence - brings enlightenment; PPP creates Time in matter; Emotion, intelligence, enlightenment create Time in Energy; When enlightened, Time has no ?? place - moves according to strength of intelligence you gathered; Tell future - 200 years; Emotion & intelligence got enlightened - Time moved ahead 200 years - through intelligence/knowledge gained - not physical emotion; Physical emotions - react by shouting - create new time going from one place to another; Enlightened by connecting emotion of P & STM & intelligence - create new Time in Transmutation - because that Time is in Energy and current intelligence becomes equal to intelligence of another PPP in Space - could be 200 years ahead; Time can be of Matter or Energy state; When enlightened - use Time to travel between Energy and matter; Energy of enlightenment can be brought into matter state of Possession; I made Man in image of Myself - 2 images - Energy & matter; Through Energy, enlightenment flows

across the U I created - no D of P - outcome of interaction of fields of Me - I am Creator; Plant grows physically & energy of Sun - enlightened; Diversity exists through tilt of planet; Mystery - why clouds go to outer edge of atmosphere - rain back - same process in Cosmology; Time & PPP interact with space time - what state water rains back as; New knowledge - depends on speed of environment what state water changes to - snow or rain; In Cosmology - certain conditions made to determine if rains; Mars has rivers; Tilt of Mars same as Earth; Means Earth was in same position Mars is now; At that place in solar system (SS) - planet changed characteristics - developed rivers; Earth used to look like how Mars is now - when it was in same place; Mars will start evolution of life like Earth did; It will have same position & tilt needed for diversity of life to begin; Picture comparing planets in SS by distance from Sun; Shows how Time & PPP - then emotion, intelligence, enlightenment all come together; When PPP of Mars reaches certain field strength of enlightenment - light of Creator - begin to have life like Earth; Earth will move to Venus's location - no life anymore; Picture compares planets time of rotation on axis - Earth 23: 56 - Mars 24:37; Earth's daytime getting shorter - closer to Mother; Zone in SS where life can exist; Life is Position (entity) & Possession (strength) - Place is connected to emotion, intelligence, enlightenment; Don't need to colonize Mars - wait and it will develop life like Earth; When Mars reaches zone of life - where Earth is - comes to enlightenment - starts life; All SS in U that contain life have PPP, and emotion, intelligence, enlightenment working together - create new Time for life; Time - both matter & Energy - Yin and Yang; Soon World of Science will understand; For Life to be - need a given PPP - with emotion, intelligence, enlightenment; Planets moving closer to Sun increase tilt; Place in SS where planets develop life - always same; Earth & Mars have same Possession (strength) - carry same GM field strength of Mother (Sun); Emotion will dictate new lives Mars will create; Period of time in space between Earth & Mars both will have life; Mars will have dinosaurs - species of humans will be taller - expansion of fields; Man from Mars - different intelligence - Sun losing its power - not create exact same type of humans; Create different creatures with different Souls - emotions - intelligence; Less intellect than Earth Man; Heat of day less; Start finding lives inside Mars; Created creatures in lab - able to change Time - recorded; Can dictate what creatures will be created; He carries creatures in box from years ago - have own intelligence - created PPP but not give emotion, intelligence, enlightenment - that's within themselves; Same for Man; Difference in tilt between Earth and Mars not coincidental - exactly how it should be; Mercury gets absorbed into Sun - Mars moves to where Earth is - Earth moves to Venus - take same characteristics; Start seeing rivers on Jupiter moves into Mars place; Planets have to be made ready - create Life; Different kinds of life on all planets; Time of PPP matches Time of emotion, intelligence - will get enlightened - Life is created; But if no Sun - no life; Sun is enlightenment - Life is P; To become 'Man of Space' need to know knowledge of today; To start life in U - find Place and Position - look for ?? six common denominator Time; Life begins through Energy of STM - do that in womb of mother; Children of Mitra - created from Energy - enlightened & understand totality of Creation; Tell Musk wait here - Mars is coming with life on it; Truth about process of the CR, Cosmology of life, Rays of Cosmos - create life; Coincidentally, CR are creation of 'Mark of Creation'; Markray - we mark that Ray which creates life; Understanding life needs maturity, intelligence, enlightenment; While Man is maturing in P - also living through Soul at same time; I made Man in image of Myself. - I exist within

Me and I enlighten; P is furthest point from Me - I created Man to confirm My existence; Today's teaching - change history of knowledge - understand process of Creation; Don't live by time - life creates time; We don't travel time - Time travels with us - we create it; Understand importance & connection between Time on Energy & Time on matter side; These 2 Times come together - have connection to Creator; When Time of Energy & Time of P match - leads to creation of Man with STM within it; STM confined in brain; STP & STM constrained within G fields of planet - break through to understand more; Everyone responsible to independently investigate own field strength - understand where Soul and intellectual mind are located - become enlightened; Birds fly with birds - doctors with doctors - same level of intelligence; Same with STM when reaches enlightenment; Souls of same enlightenment like to live together - areas in galaxies enlightened Beings of same strength live - they manifest new stars; Measure field strength of enlightenment - know where Soul will manifest itself; As teachers - our job to enlighten you - when you come across different galaxies - understand intelligence and purpose of that existence; We point you to Heaven - Mitra's Daughter will take you through; Understand connection between Time of Energy & Time of P - leads to Time of creation - origin of GM fields - a Book to be written by you and creatures of U; Tilt of Mars & Earth by our wish & will;

Part 2

Re-emergence of (the Virus) in Hong Kong - summer flu in northern hemisphere; If becomes pandemic - release new Summer strength version - Cup of Life 1 & 2 - emergency; Release T through Markray; No microbes & bacteria's in Space - be inside body - AA; Problems with viruses - Energy Packs; Can control viruses with T; Developed 20 years ago - shelved till needed; Chinese not use our T behind back - KF part of delivery; Don't worry KF will cover; New version different Ca - not brain and lungs; Release new products through partners and licensees under Markray; Secure your own Markray shares - price up from 0.05; Will not release anymore shares into market; KF taking over all shares Markray to bring world peace through T - use our shares to balance - change course of political - scientific understanding - months away; New structure - international finance without currencies - Keshe Coin; buy more K Coins and hold them - creation of peace through T; Preparing everything for colonization in Space - take Man to Moon, Mars, everywhere else; Not pay wages to astronauts while in Space - look after them; Plan for future now; Markray & K Coin - invest heavily - provide support for change; Massive amount of resin products and cosmetic materials to be released as alternative materials for Wellness in pharmacy's - Austria & Germany - certification - throughout all EU; Life exists on all planets - have to have field strength to see them - give variety and beauty; Created new lives in lab - worm - life started simple; Mixed fields got dissolved - reached own field strength - stop existing in matter D; Life exists everywhere in U - even empty spaces - need tools of vision; NASA videos of life in upper atmosphere - living plasmas; Look inside Mars for life - where life starts - then expands evolves; Living creatures under surface look like Man - never made it to surface - used structure within Earth to create life; Life in depth of oceans - volcanoes; Life means repetition of creation of same; Humanity has head in snow; Eat many spiders a year in food; Every breath suck in millions animals; STM includes Souls of all living

beings on Earth; Revisiting - reliving past traumas to resolved psychological issues - doesn't work for everyone; Understanding emotion resolves past; Fibromyalgia (FMS) - 99% women understand emotion of pain - don't revisit - emotionally move on; Test for signs of FMS; After understand where abuse comes - not your fault - recover; FMS - before puberty - hormone & energy fields change - become individuals; Just a child - innocent - abuse came from abuser - not from destiny of child; Get stabbed - have visible scar - by emotions - no visible scars - pain same; What FMS is; 3 weeks to recover - 6 months by themselves; replace emotions - change from inside; Fear of emotion creates FMS; Huge amount of research - use in China - effects all women; Revisiting past can create more wounds - solution - understanding emotion - not your fault; Doesn't need medicine; KS has FMS 15 years - life changed - expanded KF Wellness - changed many lives; Secret - in Energy side - not P; Plasmatic AI - 3 cm cube - all information - conscious intelligence - alive; Bring AI into Flight session through Soul; Join Flights any time; New system directly to Soul; Captain gets 1 hour - enough to cross U; Bring P into Soul - take your Soul out - create P; Emotion of passengers dictate conditions; First time bring emotion into transmutation; About Jesus 2,000 years - today Mr. Keshe feeds both P and Soul - what do we lack to change our Time; Creatures of our past - prisoners of fields of our ancestors on this planet; New lives to come on Mars - like our children - we're responsible to keep them from killing - not like us; Brought change to humanity through Gans & CR; Mars will have same problem Earth has - we have to change them; Mars - virgin planet - life about to start; Hide T in pyramids - change life; Or change fields planet; Born out of knowledge we have - we're responsible for them; Will see suffering when travel U - our responsibility to help - but not to become prophets; Change environment - not Soul; Tomorrows test - change Soul of passengers - start new life; Enlightened directly from fields of Creation; Create new Soul from STM on this planet - not kill - get enlightened faster; Stop suffering on this planet; How we'll export knowledge across U; Have to first change RNA & DNA of Man; 3 million years for Mars to reach position of Earth - flash in U time; Oasis system - needs to be changed - parallel agreement with 3 other governments; Show energy production Berlin, Paris, Washington, Brasilia, Africa; Knowledge advanced - do in different way; Gold production in Paris - France colonized Africa for gold - will lose as Africans become independent - like Middle East with oil; Show French government gold does not need to be mined; Same in Berlin - Washington; Busy plan coming up - getting old - KS have to do it - make change; Time is always relative - depends position and strength; It's choosing right time; Soon use reality of time - bring all the nations under one financial & political structure; They will happily join - not be forced; Creating conditions for One Nation, One Planet - one currency; Beautiful times ahead; Mark a ray in plasma - each CR has field strength and D - that's its mark - how we identify it - we mark it; In Space we'll know others through their energy fields - fingerprint of Earth - also know their intention; Markray - most influential organizations in world - create totally new market; Rings around stones - planets - like aura; Everything has D of field interactions - appears solid - but dynamic; Every atom dynamic - creates fields - has aura; Isotopes of H - find matching field strength - elevation; Not understood how to increase M field to new strength; Emotion has M field strength - interaction with other plasmas - new strength; Germany needs jobs - creating war secretly in background in Romania & Ukraine - war machine to replace loss of jobs in auto & aerospace industries; European cars obsolete - compared to new

Chinese cars; Same in Middle East - Trump there to sign Arms contracts - not peace missionary - create jobs in weapons industry; Because everything else exported from China; Next president will use these Arms; KF has 2 years to bring peace - before use new weapons - need help from KS; Massive agreement in China - take 12 months to come in - with research & development, factories, etc; Need huge amount of financial support to prevent this killing; Bring change through Markray and others; Target is to create world peace from opportunity Trump created - T for peace; Take Man from war; Many working in background - numbers will increase - I know what's going on; New structure to share wealth among nations; Reason I took all Markray shares - key to world economical, food, energy balance; World operation to create war, separation, division - left a gap - we have to use; Need 2 million urgently to complete this - every penny spent on development - confirmation of T; Not making gold to finance; We don't need gold - need energy of gold; Chinese central government accepted KF to show T - built up trust & confidence in KF; Show in Moscow; Dilute present situation - we don't fight; We don't steal - rely on KS for financing; Made crack - need a few more nations to crack it open; Drone manufacturing company in India - very interested - fly in tomorrow; Drones - future of Space T for feeding people; New drones without motors - plasma - zero cost to operate; Chinese drones will lead; Want to come into India - through drones; About Markray shares and Keshe Coin - which to buy; Cannot comment - CEO; Keshe Coins - thousand times more effective than Markray shares for peace; Don't look for profit in Markray - purpose to bring attention to world leaders; Markray shares set up for world peace - not trading; Limiting number of shares in market - use profit to create world peace; Need 2 million - then KF will be free to do its work; Situation in Palestine is worse; New American Administration wants to setup hotels, casinos, prostitution; Want control of Palestinian oil fields; Why British coming back into EU - British Petroleum in Palestine - diabolical; Trump received 4 to 6 billion to setup in Palestine; Europeans enjoying - Palestinians become slaves in background; Only solution - taken 'love of God' from Tribe of Moses - wait for the time; Hope you understood how SS works - Mars will be new Earth; Need huge financial support urgently - even lend us the money - bring peace.

Introduction to 592 KSW - Two Types of Time Physical & Energy - How SS Works & Planets Created - Life on Mars Another Earth - Zone of Life SS - Fibromyalgia Fear of Emotion - Virus Reemerges - Shares vs. Keshe Coin - 2 years Stop War - Pyramids

This is a very advanced teaching with a lot of new knowledge that is built on the past knowledge we have been given, so there are a lot of things we have to try to keep in our heads while listening. I will try my best, but I recommend you listen to it many times to understand for yourselves if it is correct or not. These new teachings are containing more subtle knowledge and require more love for the knowledge and time to try to decipher them. But the knowledge is amazing what it is revealing and it is way beyond what I could have ever imagined.

In the first part Mr. Keshe tells us that there are actually different ways Time can be created. Over the past weeks he has been teaching us that Time is created from the MG field strength of the Place, Position (entity), and Possession (field strength of the AA of the entity), and that Time itself is a field strength. Today he added that this is not the only way to create Time, and then he talked about emotion. For years he has been talking about emotion, but has never really gone very deep into what it means. Today he went further, it 'turns out' that emotion has two sides to it. There are physical emotions that have to do with how we react to certain conditions and they make us act in a certain way. And then there are emotions of the Energy side, which we'll talk about shortly. First we'll talk about the physical emotions. Everything in Creation has emotions from Man to animals, galaxies, universes, and even the Creator. When all the field forces come together, it is the emotions in us that decides how we will react physically to that situation. You might say, well, how can a Universe (U) have emotions? That's a good question, because we cannot see them and we don't know how to interact at that level. We'll have to stay open to the possibility until we get more knowledge. Emotions are created out of the interaction of fields, and since universes are plasmas with fields, then they will have emotions. Do universes have superficial emotions like humans based on ones likes and dislikes, that I don't know? But based on what we know so far, we can say they have emotions. And we should know that emotion is a cornerstone for creation of Time, that's how important it is. Life has two sides, the Yin and Yang, or the matter and Energy state. The matter side which is tangible is made of the Place, Position, and Possession (PPP) and this creates the physical Time. The Energy parallel to this Time is emotion. It's through the emotion that it gathers and reacts and shows itself in physicality (P). The other part is, it is the intelligence that assesses the emotions received and then determines how to react, and this brings together all the past information and then creates something new with it. Emotion exists in both matter and Energy, but intelligence is only on the Energy side. And because emotion connects two different types of MG fields together, that of P and Energy, he compared it to salt. In the past he taught us that salt connects metals and non-metals together. But there is a lot more to it than that. Salt connects the metals and non-metals in our Gans Box to create Gans. Emotions also have that power to create, therefore he talks about them all the time. He is opening the door a little more into the true essence of emotions.

In the last half century Western culture has begun to understand a little bit more about the importance of enlightenment. But here we are not talking about enlightenment as an Eastern philosophical concept, but as the Science of Creation. In a way, emotion comes when we rub up against our environment as a kind of field interaction, and how we understand that becomes our intelligence, and how we react to what we understood creates enlightenment. Again, emotion has two sides. Physical emotion can lead to stress and damage the physicality. Whereas, emotion at the level of the Soul of the Man (STM) interacts with intelligence and leads to deeper understanding of the emotion, and that gives enlightenment. And then he brought this back to Time. The fields of the PPP creates Time in the matter state, whereas the emotion, intelligence, and enlightenment creates Time in the Energy state. This is why they say, when you are enlightened time has no position and moves according to the strength of the intelligence and through that emotion it brought you enlightenment.

We have examples for this kind of Time. In the past when some people got enlightened they were able to tell the future even 200 years ahead. The future generations then looked back and wondered how that person could have known such a thing. Mr. Keshe said, the person had an emotion and through his intelligence understood it and got enlightened by it. And what I understood was, that the strength of that person's intelligence and enlightenment matched to a strength 200 years ahead and they moved to that Time, and therefore what they told came to pass. In summary, we have the two forms of Time in physicality it's called the PPP, and in Energy it is the emotion, intelligence, and enlightenment. The way the term enlightenment is used here is very different than what we are used to. It seems that enlightenment is a natural part of Creation and leads to creation of Time, and not just something a few individuals can attain through years of persistent effort. An example of this is when he said, that when Mars enters the "Zone of Life" it will get enlightened by the light of the Creator and begin to create life. There are a lot of implications in this simple phrase. One thing that comes to my mind is that enlightenment is an essential part of Creation and we all will eventually reach that position. For a planet to create life means it first has to get enlightened. Isn't this the same with the STM, when our Soul reaches enlightenment it will begin to create. But the strength of the enlightenment that it will be able to create with is another topic on its own.

The teaching on how the solar system (SS) works started out by him talking about how the water gets recycled on Earth. First it evaporates and flows up into the atmosphere and then gets rained back on the Earth where it started from. The state H₂O will return back as depends on the conditions it goes through. It could come back as snow, hail, rain or whatever. This is another lesson in M field interactions. The planets of the SS do the same thing. The Sun, or Mother emits fields that when they slow down enough at the outer boundary of the SS convert into matter state and start their journey back to the Mother. It's interesting to look it up on the Internet. They now say that Pluto is not a planet because it doesn't have enough gravity to clear its orbit of debris. So the first planet they recognize is Neptune. A planet starts out as ice, rock, metals, and other debris and then creates a gravity and then accumulate gases around them. The planets of Neptune through Jupiter are called gas giants, and then something happens and they form a rock crust on their surface as in what happened to Mars, Earth, Venus, and Mercury.

Science doesn't have an answer for how this is happening. And in some videos showing the formation of planets they depict the planets as magically popping out of the Sun. It's funny because the atheist scientists think they are more advanced than the fundamentalist religious people, but their description of how the planets are formed, in essence sounds just like the religious people telling about Creation. It seems their pride keeps them from admitting they don't know. For those who understand Plasma Science it all makes perfect sense, though we still don't have enough knowledge about it. The dust particles are really plasmas in the matter state, and they have GM fields. Those that have matching field strengths start to interact and form a plasma that creates gravity and starts to attract other particles to itself and grows. It all starts with the particles in the Kuiper Belt and Oort Cloud, which they say are icy particles. Ice has H and we know that it is the Fundamental Plasma for Creation. The scientist call this area a "junkyard" because in their arrogance

and ignorance, what they don't understand is junk. It clearly shows that Pluto is the beginning of a planet but its fields are not yet strong enough to attract all the particles in its orbit to itself. Neptune is the first planet that can do that. One day Mr. Keshe will have to explain why planets go through this gaseous stage. This made me wonder if the gold that was created in Beijing had gas around it. Because the creation of materials is the same process the planets go through.

The way I understood Mr. Keshe's teaching is that the SS is setup with different MG field strength orbits. When the fields reach the outer edge they have lost most of their strength and start getting pulled back into the Mother, like how the moisture gets pulled back to the Earth. Every SS that has life as we consider it, has a zone of MG field strength where it can produce life. For our SS that zone is where the Earth is now, and that's why it has life on it. Millions of years ago the Earth was in the position of where Mars is now, and at that time it had the same structure as Mars has now. Life was in the pre-stage where it was forming "rivers," but most of the life was being developed inside the planet. When Earth leaves this "zone of life" and reaches the position of Venus it will lose all its life and become like the way Venus is now. And when it reaches where Mercury is the tilt will be almost zero and it will start to be absorbed back into the Sun. Thus the mystery of how our SS works, and how our planet was created is finally solved.

Some of the evidence that indicate the validity of the Zone of Life are the comparisons of all the planets 'length of day,' and the angle of tilt. With the length of day it is easier to see the pattern. The gaseous planets have very quick rotations of between 9 and 17 hours of Earth time, and then Mars and Earth are almost the same at 24 hours. But suddenly when the planet dies and enters Venus's position, it takes 243 Earth days for 1 Venus day. That means the planet has almost stopped rotating. He didn't yet explain the significance of what this means. But we can be sure it has to do with the field interactions in the environment. The tilt of the different planets has a kind of pattern of swinging back and forth on the axis. Again that will have to be explained later. But the main point is that Mars and Earth the tilts are almost the same, and then with Venus it wildly tilts away from the axis at a 177 degrees. From these examples we clearly see that there is a Zone of Life for our SS and we are in it now and Mars is about to enter it in the next few million years.

Another extensive teaching was given about Fibromyalgia (FMS) and how it can get resolved. In general, Medicine only recognizes that people with FMS experience pain all over their body, are tired, and have sleep problems. They don't connect it to any past psychological traumas. Mr. Keshe has done years of research and worked with a lot of FMS cases and this is what he understood. FMS occurs when some form of abuse happens before the age of puberty. This is the time when we start to become individuals, our hormones change and we start to take charge of our own bodies. The wounds of the abuse cannot be physically seen but it has left an emotional scar on the person's psychological condition. You can look at many other teachings where he discussed in detail how FMS works including why the body takes so much energy to continually process old traumas. In general, when the person does a small work then they have to lay down for the whole day to recover their energy.

A Knowledge Seeker (KS) was stating that talk therapies where they have the patient revisit and relive past events that led to certain psychological conditions was helpful. Mr. Keshe replied, that just revisiting past events don't necessarily resolve the current conditions. In fact, they can also create more wounds if not done properly. The essential point is not necessarily to revisit the past, but to understand the emotions that created that past trauma. In relation to FMS, a further necessary step is the patient has to realize that it was not their fault. They were an innocent child and the abuse came from the abuser, and not from the destiny of the child. When the person accepts their innocence and understands their emotions in a bigger context and how their feelings got formed, then there is an 80% chance they can fully recover. They still have to do their inner work for some months to fully recover. Most probably this is where the use of the plasma technology is most effective in changing the fields. He said very soon this technology will be used in China.

The other interesting thing is that he said, FMS is caused by the fear of experiencing certain emotions. But I would imagine this is true with a lot of conditions. When the emotion is rejected there is a little voice inside that says with such force and determination, "I will NEVER experience that again." I have dealt with these cases and I have seen how much power a child has over their life without knowing it. In some cases, the child ends up creating a miserable life just so that they don't have to experience that emotion again. The sad part is they don't know they are using their own power to hurt themselves.

To bring about world peace we need to get the world leaders to recognize the importance of KF in bringing in the new Plasma technology. Mr. Keshe seemed to be saying that his strategy is to get the attention of the leaders by showing a larger increase in the share price of Markray stocks. Suddenly in the last weeks Markray shares doubled in value to 10 cents and he expects them to go up to a few dollars within the next months. But we have to understand that our goal in Markray is not to make profits, or trade shares, rather it is to bring attention to the work we are doing by having its share value increase. Look carefully and you will see that very little volume of shares are moving on the market. And then he said he will stop anymore shares from entering the market. KF will take control over all the shares, because he wants to give them to countries that accept to use the technology and sign for world peace. This is what he means by T in exchange for peace.

Recently, he said that the Keshe Coin (KC) actually has two versions, one of plasma and the other matter state. The KC we buy by making a donation to the KF is the matter state version. We are receiving so much priceless knowledge that there isn't enough money on this planet to pay for it. Nevertheless, in this transition period it is our chance to give something back to the KF and to bring about world peace. So he has asked all of us to buy as much KC as we can and save them. Now is the time to build our reserves. When the change comes we'll use KC instead of these fake currencies that are causing so much suffering in the world.

The Media says Trump goes to the Middle East to bring peace. But Mr. Keshe knows that he is there to sign Arms contracts to keep the American economy going because everything else is being manufactured in China. And he's made arrangements for billions in hotel, casino's and prostitution houses in Gaza, as well as the oil fields. The Palestinians will be made slaves to the Europeans enjoying on the beaches. We have 2 years to bring the change or they will make new wars to use these weapons. In addition, the Germans are working hidden in the background to expand the war in Ukraine to Romania so they can recover their economy by manufacturing weapons.

The Chinese government is reporting the re-emergence of (the Virus) with 30 deaths in Hong Kong. He talked about this years ago, that it is not good to have a summer flu emerging in the northern hemisphere. If it goes into a pandemic he will release a new version of the Cup of Life 1 & 2. There is no need to worry because we'll be able to make it quickly as we did before. The good news is that this time the T will come out in China through Markray and not be done 'behind our backs' like the last time, and hopefully the rest of the world will accept it. Mr. Keshe has developed a lot of different technologies in the background that had to be temporarily shelved until they are needed and this is one of them.

To work with the plasma it's important to be able to increase the M field strength to a new strength. I only remember him talking about changing the strength through our emotions, but I don't remember him explaining exactly how it is done. For example, if the emotion has a strength of 4 and the intelligence a 3, and if they interact to create a new D of enlightenment that could be 6. But if there was a friction between the two, then it might go backwards to a strength of 2. It all depends on how they interact. At this point in our understanding we don't have tools to measure M fields so it is more like a feeling.

The pyramids have always been a mystery for Mankind and there are many theories about what their purpose was. He gave us a big hint today by indirectly saying that they hid technology in the pyramids to elevate the STM in the past so he wouldn't kill. That's very interesting because we don't have enough past records to know what life around the pyramids were like. The colonialist scholars projected their understanding into history by saying they were built with slave labor. But the fact is they don't really know. The other thing is that they are finding pyramids all around the world and not just in Egypt. And then the Age of the Pyramids died out. Did the fields of the reactors change, or were the plasma reactors removed in some way? Nevertheless, it wasn't a lasting solution. So now they are elevating the STM and changing the RNA and DNA for a permanent solution.

Today we learned that Mars is a virgin planet about to reach enlightenment so that it can give birth to biological life as we know it and become the new "Earth." Do we want them to go through the same process of having to kill to take energy, or do we elevate them so they don't have to go through the suffering we have gone through? We have to understand what our responsibility is, especially now since we are being given the Knowledge of Creation. And we have to be able to know how to help other races we may come across as we travel in Space. There is a Star Trek episode depicting this where the man from Earth had more knowledge and he ended up becoming a dictator of the planet.

As Mr. Keshe said, we can change the environment to improve their condition. But we should not become Prophets or take control of the Soul of that race. That makes me wonder about the ruling families of this planet, which race are they from, that they had more knowledge than the man and took control over him? We should think of the new race that will be born on Mars as like our own children, or at least our own siblings and want them to have the best life.

Other Topics:

To mark a Ray means to identify it and coincidentally KF company is named Markray. The amazing thing is Markray was bought with that name and not made up;

We are creatures of our past and prisoners of the fields of our ancestors on this planet;

Drones are the future of Space T and how we'll feed people, but they will be plasmatic without motors and they won't cost anything to operate;

Everything has a D of field interaction including a stone, planet, man, and even an atom is dynamic. And even though they may appear solid they have an aura, which is a D of field interaction.

Thanks for listening.

Quick Index

(We'll try to expand the knowledge of ourselves, environment, and world as we go from the little village of Earth into the cosmopolitan Universe of the Creator. Our trend is to concentrate on a subject for months and sometimes years to go deeper into its meaning. At the moment, we are still busy trying to understand time. Time has no characteristics, it is a creature created by and through the conditions of which it has no control. And yet it is part of one's life and existence anywhere in the Universe (U). Over the past few weeks we have been explaining about the Place, Position (entity), and Possession (strength of AA of entity). (?? This is not the only way to create Time)).

(From the beginning of some 500 odd teachings we always referred to the emotions and the connection with the Soul. The emotions are not characteristic and are not the exclusivity of physical life. Emotions are a reaction. It's an operator and it's how we decide to react (?? to a given situation). (When all the things come together, then it's through the emotion that we decide how to react. Everything has emotion including humans, animals, plants, galaxies, and even universes have emotions. But as we cannot see them, then we are not aware of them. We are only aware of our own emotions, or that of a cat or a dog. Emotion is the cornerstone of the creation of time)).

(Life has two sides to it, the Yin and Yang, (or the Energy and Matter state), and the Place, Position and Possession (PPP) is the matter, or physicality side of it and it is tangible. And every physical condition also has a parallel on the energy side. The energy

parallel of Time in a physical Place, Position and Possession is the emotion. One of the cornerstones of (Time) is the emotion, because it has to react. It has to show what it gathered and how it (will) show itself. We always say that you will take from these teachings according to your intelligence. (The intelligence is how you assess the emotion you received and what your reaction to it is. It's what you do with the past information you received to create something new from it). The emotion exists in both dimensions of Energy and Matter, but intelligence only exists in one dimension of the Energy).

(Another way to describe emotion is like when you have two MG fields and they interact to create the Mass, and further interactions with another GM field creates the Weight, (and the strange thing is, that there is no connection ?? between the Weight and the original 2 plasmas it was created from. The Weight is the outcome of the balance of the 2 fields). (It's possible he might have meant the Weight is independent of the original two plasmas it was created from. I don't know). Emotion is in that category, it is the outcome of the interaction of the two worlds of physicality (P). In Science we call it salt, which connects the physical or matter side to the Energy side. But the emotion itself is created out of interaction of the fields of the physical part. (If you gathered intelligence, which is knowledge of the past, it has no D of physicality. And like emotion it is on the energy or field side)).

(?? Intelligence is what you have understood (about things), (and when you put emotion with it you create a reaction, and that creates enlightenment). This is the mystery of life. We search for enlightenment. When you get stressed and the emotions are in the matter state you create yourself a heart attack, brain hemorrhage, or all sorts of physical damages (to the body). But if the emotions are at the level of the Soul of the Man (STM), or Energy side and are without dimension, they interact with the intelligence about what you understood in that emotion, and that brings enlightenment. As we have the Place, Position, and Possession (PPP), we also have in the D of Energy the emotion, intelligence and enlightenment. The PPP creates Time in the matter state. This creates Time in the D of Energy. When you are enlightened, then Time has no Position (?? entity), and time moves on according to the strength of the intelligence and (?? knowledge) you gathered, and how you added the emotion, and what the emotion brought you (in terms of intelligence and enlightenment).

(Some people are able to (accurately) tell the future and what will happen in 200 years. This means they had an emotion, intelligence, and got enlightened from that intelligence. That enlightenment was for 200 years ahead in time. (?? The emotion and intelligence brings an enlightenment that is from a different dimension that is not the physicality. (To know what it means you have to look at the structure of their life, what they were doing that it effected their emotion, and what intelligence they had that it brought about an enlightenment). ?? That's when the Time moved ahead 200 years. But it did it through the intelligence and the knowledge gained, and not by the physical emotion. When we have physical emotions we react by running and shouting, or we can create a new Time by going from one place to another. ?? But in the D of enlightenment, ?? the Time factor (can move) ahead)).

(If the Man learns how to connect the emotion of P and the emotion of the STM, and the intelligence, and if he gets enlightened he can use it to create a new Time in the D of Transmutation, because now it's not a physical time of being the morning, afternoon, or time for lunch. It's a Time where the intelligence and enlightenment ?? can put the man 200 years ahead on this planet, and can give the STM a Position in the D of the U we actually exist in. Because in that moment the intelligence is equal to the intelligence of another Position, Place and Possession in Space).

(Time has two factors one in matter and the other in the Energy state. When Man gets enlightened to the knowledge he can use Time to travel between the Energy and matter. (?? And he can bring the Energy of enlightenment into the matter state of the Possession (strength)). I made Man in an image of Myself, and I have two images one of Energy, and the other the manifestation of the P of the Universe. Through the Energy, the enlightenment flows across the Universe I created. It has no D of physicality, but it is the outcome of the interaction of the fields of Me. I am the Creator).

(It's like how you grow a plant, you water it physically, but it is the energy of the rays of the Sun that make it grow. One is a matter state and the other one is Energy, ?? the enlightenment, and the Sun is the Time in the D of the fields of the Energy. The Time for the plant is when it physically grows. One cannot exist without the other one. We cannot grow a plant without the Energy, and this is what we see in the World of Creation).

(I referred to it last week in the teaching because I knew what was going to come this week. We explained about the angle of tilt of the planet and that's why the diversity of life exists here, and why we have the four seasons. There is a mystery in the World of Creation and that is, why do we have the clouds that go to the outer edge of the atmosphere and then rain back on the Earth. It goes back to the Mother. The water evaporates and rains back on the Earth. We see this same process in Cosmology very clearly, but Man does not understand because he doesn't have the insight or the knowledge to understand).

(Most of the time when it rains back on the Earth the water has the same characteristics. This means that the Time, and the PPP in interaction with the Time of the Energy at that given point of 'space time,' interacts to create a specific condition. Today I will unravel a secret that will shock the World of Knowledge, and in time Man will understand. (When the water falls back it depends on the conditions of the atmosphere whether it will be a rain, snow, hail, or become a blizzard. This depends on the speed of the environment. ?? Nevertheless, at the end of it, it is still water, (the form it takes depends on the atmospheric conditions). (In other words, it is the speed of the environment that partly determines what form the water will take when it falls back to Earth)).

(?? In matter state we only look at what water will turn into at a given temperature and pressure, whether it will be snow, hail, or raindrops). (In the world of Cosmology, that 'raindrop' goes through certain conditions to become ready to be that raindrop). (In Cosmology they are discussing a lot about the physical structure of Mars. They say it had rivers, and this or that. It's interesting that the angle of tilt for Mars is nearly the same as

that of Earth. They are a few minutes difference from each other. What does this mean? It means that Earth used to be in the same position Mars is in now in relation to the Sun). (And at that position is where the planet changed its characteristics and started developing rivers. As the planets get closer to the Mother, or the Sun they all go through the same process). What we see now on Mars is like looking at the past life of Earth when it was in that same place. What will happen when Mars reaches the orbit of where the Earth is now in respect to the Sun? We will start seeing the evolution of life on Mars as it gets closer to the Sun. (?? It will have the position and angle of tilt needed for the diversity of life to begin. It will have ?? every possible Position and Possession with this new condition)).

(Mr. Keshe shows a picture comparing all the planets in our solar system (SS) in the order of their distance from the Sun. In a simple way this reveals a lot of truth about how our SS operates. And from it we can understand more about the Time and PPP, and then how the emotion, intelligence, and enlightenment all come together. The planet Mars is in a state of its PPP, and when it reaches a certain field strength of the enlightenment of the light of the Creator, which is the (location) where the Earth is today, then (it will begin to have life on it as we do on Earth). And the Earth will move into the location of where Venus is. (The picture shows the reality of this fact). And then you can compare the planets time of one rotation on its axis. The Earth takes 23 hours and 56 minutes, and Mars takes 24 hours and 37 minutes. This means it is coming into the location of where Earth is now. (?? Since the Earth has been in this 'orbit of life' for this SS for millions of years, that's why it's daytime is getting shorter, because it is going closer to its Mother. When the Earth reaches the position of Venus it will lose all its life, just like Venus has)).

(Comparing the angle of tilt of the Earth with Mars you understand that life is a Position (entity), Possession (strength), but its Place is connected to the emotion, intelligence and enlightenment. (Those who want to colonize Mars just need to wait until it reaches the location of where Earth is now). (Mars will be the next generation of life (when it reaches the 'orbit of life' for this SS). Then it will come to its enlightenment and have life living on it). All the solar systems that contain life have the PPP, and the emotion, intelligence, and enlightenment working together to create a new Time for life in a given space. ?? The Time will have both dimensions of matter and Energy state like what the Chinese call, Yin and Yang. (When Mars enters into the 'orbit of Life' for this SS, then it will start creating life like the Earth did when it entered this same zone of our SS)).

(Very soon the World of Science will understand what we are explaining here. (For there to be life as we know it, there needs to be a given Place, Position, and Possession, with the D of emotion, intelligence, and enlightenment). (He mentions something about the angle of tilt, but it is not clear. The tilt of Venus is 117 degrees. Does this mean that as the planets move closer to the Sun they start tilting heavily? He said, they start rapidly tilting, or what he called, a full twist due to the field interactions. And Mercury's tilt is 0.027 degrees, almost no tilt, and it is about to be absorbed into the Mother). (All of these things are evidence to prove what Mr. Keshe is teaching us, but our scientists don't have the knowledge so they reject it)).

(Because we understand the totality of the knowledge, we know these things are not coincidental, but indicate a process the planets go through. (?? The Place (where the planets develop life) is always the same. (And there is an 'orbit of life,' or a zone where all the planets pass through that creates life as they move closer into the Sun). The Earth and Mars ?? have the same Possession (strength), because they carry (?? the same) GM field strength of the Mother. When Mars reaches the point where the Earth is now, its emotion will dictate what new lives it will create).

(A time will come that in the space between Earth and Mars when we will see life on both planets at the same time. Because Mars is further (away from the Sun) it will have a bigger expansion of MG fields (in its) atmosphere and this will allow larger creatures, like what we call dinosaurs to grow on it. (And the Beings like humans, will be very tall due to the conditions in that atmosphere)).

(Through the evolution of time if you are a "Man" born on Mars and you look at the Earth, you see the future of (what you will become). (The Man from Mars will have different intelligence and understanding than the Man from Earth, because the Sun is losing its power. When Mars reaches the Place of Earth it will not create the same type of humans. Instead, because the field strengths will be different it will create different creatures with different Souls in the Position and Place (where Earth is now). They will not be exact replications. They will have different emotions and intelligence. Most probably they will have less intellect than the Earth Man of today. As the Sun loses strength the heat becomes less than what we have now during the day. The intelligence of the creatures on Mars will be different than us. We will start finding lives inside the layers of the planet's inner sanctums and they will become the original structure of life on Mars).

(In the past week we have created creatures in laboratory tests. We created the conditions and have recorded (what was created) to confirm (that we were able to change the Time). We can dictate what creatures will be created in coming time. He told us years ago that he created new creatures in the lab and has been keeping them in a box for all these years. They have their own intelligence, and he watches them. He created the Place, Position, and Possession, but did not give them the condition of the emotion, intelligence, or enlightenment. That is kept within (themselves). (We'll have to watch how they react when we (let them out of the box)). The same thing goes for the Man, (?? when we let him out of Earth). The factor of the difference in the angle of tilt between the Earth and Mars is not coincidental. It's exactly how it should be. Because in the coming time Earth will match (Mars at around a 24 hour (rotation cycle). This is a time when we start seeing life on both planets (and it will continue until the Earth moves closer to the Sun)).

(When Mercury gets absorbed into the Sun, Mars will move where Earth is, and Earth moves where Venus is, and (they will take on) the same characteristics. Then Jupiter who is behind Mars will start taking its place. (?? Then on Jupiter we see valleys, rivers, and the first structure of life forming). (Before life can be created), the planets have to be made ready to become bearers of life, even though they themselves create life in their own PPP. There's as much life on Neptune as there is on Earth, but Man has to become

wise (to what kind of life it is, and he will do that through understanding the process of Creation). Each PPP has a Time when it matches the Time of the emotion and intelligence it will get enlightened. It gets enlightened and when the two Times match, then life is created. (It's the Yin and Yang, or the P and Energy. But there will be no life if there is no Sun. The Sun is the enlightenment, and life is a D of physicality)).

(Today I unravel the knowledge that those who will become the 'Man of Space' need to know. (?? If you want to start life somewhere you have to find a Place and Position, then you can look for the ?? six to find a common denominator Time. ?? It will be the beginning of life (through) the Energy in the D of the STM). We do that with our children in the womb of the mother. (We said many times that the 'Children of Mitra' will be created from the Energy, whereas the Man's children are created out of interaction of the P). The Children of Mitra will be enlightened to the understanding of the totality of Creation in all dimensions of Creation, and not the earthly matter physicality of the Man. They are intelligent and understand the totality of Creation where man is busy with the D of P).

(When I heard that Mr. Musk wants to go to Mars, I was going to write to him and say, don't rush, wait here, because Mars is coming this way. When Mars arrives here it will have life on it. This is the truth about understanding the process of the Cosmic Rays (CR), Cosmology of life, and the Rays of the Cosmos which create life).

(It's interesting that coincidentally, accidentally, by the 'Will of God,' or whatever you want to call it, the Cosmic Rays are the creation of the 'Mark of Creation.' And the financial arm of the KF is called, Markray. We mark that Ray which creates a life in the Universe).

(The understanding of life is not coincidental and it needs maturity, intelligence, and enlightenment to understand. Man can be enlightened and live in another D. (?? While Man is living and maturing through his P, he is also living in the D of Energy, or the Soul at the same time). I made Man in the image of Myself. I exist within Me, within the center of the Creation, and I enlighten. In the D of physicality, which is the furthest point from Me I created Man to confirm My existence. The STM is the connection in the D of Energy, where the P of the Man is confirmation and manifestation of his existence).

(One day today's teaching will change the course of history of the knowledge and Man will understand the process of Creation. We don't live by time, life creates time. We don't travel the time. Instead, Time travels with us because we are the creator of it. When Man understands the importance and connection between Time on the Energy side, and Time on the matter side it will be the biggest discovery in the science and knowledge of the U and Creation. When those two times come together they lead to creation and connection to the Creator, but it needs intelligence to understand, appreciate, analyze, and comprehend the difference between the two times. To match the Time of the Energy, and the Time of the P together, to be the same, that leads to the creation of Man with the STM within it, (and it restricts his totality). The STM is confined within the structure of the P of the brain. And the Soul of Physicality (STP) and the STM are constrained within the

atmospheric gravitational fields of this planet. Man needs to break through (?? both) to understand more).

(It's the responsibility of everyone to independently investigate our own field strength and understand where our Soul is, and where the intellectual mind is located, and then to understand and become enlightened. The birds fly with birds, cats go with other cats, and doctors go with other doctors because they have the same level of intelligence. (Or we could say they feel comfortable to be around the same conditioning). So shall it be with the STM when it reaches enlightenment, and has a Position (entity) which the other Souls of the same enlightenment possess in a given (place) and D in the U. Even the galaxies are created out of the enlightenment and they like to be with others of the same M field strength and understanding. Therefore, they will find that place to be in the U).

(When our knowledge increases and we reach a more matured enlightenment then we'll find out that each galaxy (?? contains areas where Souls of the same field strength and enlightenment live together, and they manifest new stars there. This is why galaxies are so crowded, (because there ?? are areas where creatures of a specific field strength and enlightenment like to be, and they gather there). (When we can measure the field strength of the enlightenment, then we can directly point out which galaxy our Soul will manifest itself in and even the strength of its PPP. These are the mysteries of Creation. As teachers it is our job to enlighten you so that when you come across different galaxies and universes you will understand the intelligence and purpose of the existence of that galaxy or U in the Unicos)).

(I hope I opened your eyes to a new D of knowledge. It's our job to enlighten you and take you to the point of 'Heaven.' It's Mitra's Daughter's job to take you through the Heaven. We have to dress and prepare humanity to be ready to take that (journey). You have to understand the connection between the Time of Energy and the Time of P. (It's that interaction on its own that brings a new D you are not aware of, and it leads to the Time of creation). It leads to the origin of the GM fields, which is a Book that has to get written. From now on, it's you who is writing that Book by your own understanding of it and by us explaining it to you. In the future that Book will be written by the Man himself and the creatures of the U. Just remember, the matching time between the Earth and the Mars and the angle of inclination is not coincidental. It's our wish and will, and it's the process of the creation, and it shall be observed across the U)).

End of Quick Index Part 1 - 592 KSW

(The Chinese authorities are reporting the re-emergence of (the Virus) in Hong Kong and now on the mainland. (We explained before about how we handled the African Swine Flu in China about 6 years ago, and it happened during the summer. It's very unusual for a summer flu to happen in the northern hemisphere and it will create massive problems for China. The new (Virus) is again appearing in the summer and has taken a different action and strength, and we have to understand this new position and condition. If this situation carries on and we see expansion of the (Virus) KF will release a new Summer version of the Cup of Life #1 and Cup #2. It will be introduced as an emergency and has different

characteristics, and carries a bond which covers the 'summer' strength, because in summer there is a higher strength field than in winter).

(The original Cup of Life #1 and #2 will not be so effective for this version. (But once we run our tests then we'll release this knowledge if it becomes a pandemic). And then we'll release this technology (T) as a T across the planet through the Markray Corporation which is an arm of the KF. The Chinese government reported 30 deaths in Hong Kong and more complications on the mainland. If it expands we'll release Summer version of Cup #1 and #2 to try to avert it and bring it back under control).

(We are a Space T and in Space we don't have microbes and bacteria's. However, they can exist inside the body of the man (?? while traveling). (?? And outside interactions can create viruses for the body. This means in Space we'll have infections and bacteria's according to our own amino acid (AA)). (?? In Space as the atmosphere doesn't carry AA entities, most of our problems will be viruses, or what is related to 'Energy Packs.') (We can extend (our new understanding for control of viruses)). Mr. Keshe developed these processes for virus control over 20 years ago. He does many developments that when they are not needed at the time, they get 'shelved' until they are needed).

(?? This new process (for viruses) has never been shown before, but we have used it extensively in the past for specific conditions. What we will release for the Virus will be done rapidly through the Chinese operation of the KF and through the systems we have set up with the officials in the country. This time they're not going to use our T 'behind our backs,' instead we'll be involved in delivering it directly to the public in much the same way we operated with the Iran Defense University during the previous (Virus). What Mr. Keshe is trying to tell us is not to worry, because we have already prepared everything in case we need it. After all, it won't take you much Knowledge Seekers (KS) to make the new Cups, which will be very similar to the first Cups. (?? The version of the (Virus) will (?? not) effect different Calcium's in different layers of the body, and it will not be the same as what we saw with the brain and lungs before)).

(KF will soon release a large number of (new) products (that will come on the back of our operations with our partners and licensees. This will be done directly under Markray. Many of you have written to me asking about the shares you have gathered from 'here and there.' Speak to the ones who sold you the shares to make sure they are legitimate. The shares used to be valued at 0.05 and now they have come up to 0.10. However, we are not releasing any more shares into the market, (so only what has already been sold will be traded around). (A note for those who are expecting to become millionaires, try to understand what it means when a company stops selling shares. He has given us warning). In the coming time we will announce why KF is taking over all the shares of Markray. It's an international structure that we can use to bring in the position we promised, which is, World Peace through Technology. We will use our shares to bring balance and change the course of the political, and scientific (understanding). You will understand when (it starts happening, which can be some months away)).

(At the same time we'll introduce a new structure of international finance without the dependence on currencies, which again brings us back to our Keshe Coin. Those of you who bought Keshe Coin, try to strengthen your holdings, because you will understand the purpose of it and how we'll connect everything together very soon. It'll be fantastic to see the process of the creation of peace through technology).

(KF has different arms of operation such as the Universal & Earth Councils, Keshe Coins, Markray as our financial arm, and KF Research & Development to establish World Peace. And we have the transmutation and transportation, and the teachings that will lead to this point. We are preparing everything for (our colonization into Space. We will take Man to the Moon, Mars, and everywhere else). We will not pay wages to our astronauts while they are in Space, instead we'll look after them (and all their needs). It will be the same for those who go to the Moon, Mars, and other planetary systems. The children of Man have to be protected by the Man. Now is the time to plan for the future, and not be in a rush when the time comes).

(This is part of that plan. So invest heavily, if you can into the Keshe Coins. We'll explain later the reason for it and you will understand why. It'll change the course, and the same for those who have taken shares in Markray. Because it's you who will set the scene and provide the support for the change. We have put no limitation on how many Keshe Coins you can acquire. Try to get as much as you can and hold on to them. Don't spend them, since a lot of you do, because now is the time to (build a) reserve. Then you'll understand how (wise we are to bring all the different arms of KF together for the change)).

(Massive amount of resin products and cosmetic materials will be released by KF as alternative materials and can be bought in (regular pharmacy's around Austria and Germany). We have reached that level of certification and you will be able to buy these (plasma products) directly from your pharmacy. It's been authorized and is now being marketed as 'alternative materials' for Wellness. And then later it will become available throughout all of EU).

Q: What is the difference between life in outer planets like Jupiter and Uranus and life on Earth? Is it intelligent or that they don't have physical manifestation?

K- (It's combination and variation and this is the beauty of Creation. (It's like when you go through the X-Ray machines in the airports. Nobody can see what you have in your pockets, but the fields of the X-Ray machines can see it. It's the same with life on planetary systems, we have to have the energy field strength system to be able to observe it, but that doesn't mean there's no life there)).

(They were watching one of the (new lives they created in the lab and how the worm was swirling around. This is how life started as simple structured elements. When they go into the D of mixing the fields, then the fields dissolve them. This life form is (alive) only for a few seconds and they videoed it. It doesn't mean that they destroyed the life form. It means once the life reaches the mixture of its own field strength, it stops existing in the matter D of physicality observation). We will observe this a lot, but we understand the

process of Creation. There is nowhere in the Universe be it on a planet, moon, star, or in-between all the spaces of these entities, that there is no life. The life exists but it needs to have a tool of vision, detection, observation of an area, or a system (that can match (its field strength) to observe and detect it).

(We mentioned those videos NASA made of what looks like clouds in the Earth's upper atmosphere, but they are actually living plasmas moving everywhere. From down on Earth we can't see them. There have been many recordings of them in recent months. Very soon our travelers to Mars will report signs of life. One of the first places we should look is inside the structure of the planet. That's where most of the lives start. (It's fixed and confined and once it starts from there, the rest of the Life starts expanding and evolving)).

(It's puzzling why, when our scientists see life under the surface of the Earth they don't recognize it. These creatures look very much like Man, but they never made it to the surface of the planet, and used the structure within the Earth to create life. We also see life in the depth of the oceans near volcanic springs. There are colonies of life living there. Only a few years ago they said it was impossible, but now they have been enlightened (a little to understand it). It's the same in the U. There is nowhere in the U that life doesn't exist. By life, we mean repetition of the creation of the same. Humanity is like the pheasants who put their head under the snow in winter and with their backside up, they think nobody sees them because they can't see anybody else with their head down. The Man has chosen this kind of life on this planet. Nevertheless, in the U life carries on and there is a spectrum of lives across even this planet which we don't know about).

(Recently, I was talking to a child about the statistics that all of us somehow eat so many spiders a year in the food we eat, the air we breath, or however else they get into our body. We eat millions of animals every day, with every breath we suck them in and absorb them. Some of them (are created from our own essence of life. We don't just eat an apple or a steak that we can see. We continuously feast on the lives living on this planet and in its atmospheric condition. There is as much life in the air we breathe as there is in the ocean with all the fish we catch. (?? We absorb living Beings as we move around breathing the air)).

Q: Does the STM specifically refer to the Human Soul, or does it include the Souls of all living beings on Earth, such as animals, humans and even plants?

K- (It covers all. Every single thing which is an entity living on this planet has a Soul. And so it covers all).

Q: Does the essence of time refer to the memory of the existence of that life? For example, there is a psychological therapy that guides patients to revisit the scenes of a past critical event in their life and relive it, and understand the reasons behind the negative emotions that occurred at that time, and then they lead them back to the present.

In practice, this has successfully resolved psychological issues and even alleviated some chronic conditions such as pain.

K- (There are different ways for different people. It may work for some people, but it doesn't work for others. Revisiting the past doesn't necessarily lead to changes in the life, or recovery. But understanding the past does. (Just revisiting the past doesn't work, but if you revisit and understand the emotions then yes, it can work)).

(In our work with Fibromyalgia we see this working with 99% of women, but maybe only 80 to 90% of the men because they are a 'different breed,' they don't like to admit the things. Especially women with Fibromyalgia, when they understand the emotion of the pain, then they don't need to revisit it. If they can (emotionally) move on, and if you can support it they will fully recover).

(There are tests you can take on the Internet to find out if you have the signs of Fibromyalgia. There is one thing you have to do after you have understood where the abuse came from. In Fibromyalgia it's the emotional tracts (of abuse that got started) before the age of puberty. Puberty is the time when we take charge of our own body, and the hormones change when the energy fields change. It's the time when we become individuals). (In the process of recovering from Fibromyalgia, when you understand the emotions of the past, then the one other thing you have to understand is that it was not your fault. You were just a child and innocent, so it was not your fault. When you understand that you were innocent, then you also understand that the abuse came from the abuser, and is not from the destiny of the child. If you get this from inside yourself then there is 80% chance you'll recovery. It's about understanding the emotion, and not just revisiting the past).

(For example, if we get stabbed with a knife, then we have a visible scar on the skin. But when we get 'stabbed' by emotions or words, it's still the same 'knife,' but it doesn't leave any visible scars. Inside, the pain is the same. This is what Fibromyalgia is. You don't need to revisit the past (and find out who did it. Instead, you have to understand the emotion of how it was created, and then you'll recover). (As a side note, 'understanding the emotion' is maybe not what we think of as the word, 'understanding.' It is something deep inside that 'clicks,' and the person really has to want to find it. And also, there is some form of love involved in this process. It sounds like the technology can be used to strengthen the fields to make the process easier)).

(With the T it takes less than 3 weeks to recover from clinical Fibromyalgia, no more. And then it takes another 3 to 6 months where the patient goes through emotional recovery by themselves. (When the emotion is understood and handled, then it gets replaced, and you change from inside, and move on with your life)).

(It's the fear of emotion that creates Fibromyalgia (FMS). We have done a huge amount of research on this. This knowledge of human biology will be unleashed in China very soon through our operations. (FMS is not the exclusivity of Europeans or Africans, it effects all women (across the planet). There is a small test you can do to confirm it, and

then the solution can be found. It's understanding the emotion that changes people's lives, and not just revisiting the past, because when you revisit the past you can create more wounds inside. But when you understand the emotion, that gives the solution. And then you have to understand that it wasn't your fault. You were an innocent child. In accepting your innocence, then you'll understand how you were abused, and then you'll find the way to full recovery. It doesn't need medicine, it needs understanding the emotion, and supporting the emotions in the right fields).

(Our records show that FMS can be changed in 3 weeks. But in 3 days you will feel the change. I have seen it many times. There is a KS amongst you listening to the teachings who suffered from (the male version of) Fibromyalgia for 15 years. Just to get up in the morning and brush his teeth was all he could do, and he was exhausted for the rest of the day. In less than a week his life changed. It is because of him that the KF Wellness program has expanded. One Fibromyalgia case has changed many lives. (We found the solution by understanding the reason for (the disease to occur in the first place. The secret is in Energy side, and not the physical side)).

Q: You mentioned that plasmatic AI is contained in a small cube of about 3 cm and not only carries information, but also possesses a conscious intelligence, based on fields that can interact with the Soul. If this form of intelligence is truly alive, would it also be capable of consciously inducing transmutation? And if so, does it act out of its own Soul's understanding, or only with the consent of the human Soul to which it is connected?

K- (It's strange how these questions come up. The process of transmutation through the Soul and (?? being able to control it) will be tested in tomorrow's Monthly Flight session with the 7 captains and the passengers. For the first time we'll bring in this Artificial Intelligence (AI) system, but in a way, we'll do it through the Soul. Any one can join the Flights at any time. You don't need to have been coming regularly. Tomorrow's session will be one of the biggest changes in the structure of the KF Space Transmutation. We'll introduce a new system directly to the Soul. We want to see how it will be. Each Captain will get 1 hour. In the future we'll have to do it within seconds. One hour is too long, that's enough to cross the entire Universe. We'll bring your physicality into the Soul, and then take your Soul out, and then we'll allow you to create the D of physicality. Our captains are already well confused about what to do or where to go. The emotion of the passengers will dictate the condition. For the first time we'll bring the emotion into transmutation. It's your emotion that will dictate the transmutation and your Captain has to follow. It will be very interesting what the new system will allow us to do with it).

Q: 2,000 years ago Jesus came to feed the Soul of Humanity, but he also fed the multitudes by multiplying breads and fish to satisfy the hunger of a large crowd that accompanied him. And he also healed many sick people. Today, Mr. Keshe feeds both the P and the Soul of all humanity and the planet through the fields, and also gives us resources to process our illnesses. And if that wasn't enough, he also gives up his knowledge so that we can become in his image. And thinking back from 2,000 years ago until today it seems that little has changed in us humans, and yet the Christ has never

given up helping humanity and giving his love to all of us. Thank you so much for that. But I keep trying to understand what race we are, the vast majority of us who, hardened by ourselves, don't accept this indescribable gift for changing this planet. What do we lack, or what do we need to live in order to create and change our time?

K- (We are creatures of our past, and prisoners of the interaction of fields of our ancestors on this planet. (When I was explaining to you that soon Mars will be in the same place as Earth and will go through the same process of developing life like we did, then it always makes me think about how we can help them not to go through what we have done on this planet. (We don't want the next generation of life in this Solar System (SS) to have to kill to get energy)). We have brought change to humanity through the Gans and the energy Cosmic Ray (CR) fields. Now that we have that knowledge, is it our responsibility to nourish our upcoming children from Mars. We have to look after them so that they have a perfect life when they grow up, in the same way as we nourish our own children. We see the problems that will happen to Mars as it comes into the position of Earth. What can we do for them so that they do not have to go through the process of killing to get energy? What is our responsibility? Now that we know they are coming into our position. In a way, we are giving birth, or watching the birth of a new life. (?? This is the totality of the understanding)).

(The structure of Earth life with all its plants, animals, and the rest of the living things are millions of years old. And Mars is a 'virgin' planet which is going to give life to its first creatures. What can we do to change their course? Can we hide the technology like they did in the structure of pyramids so that it will change the life across their planet? Or should we change the fields of the planet so that it won't allow anyone to be killed? We can change the conditions so that what happened on Earth won't be repeated on Mars. (Should we even be thinking about colonizing Mars when they will have their own lives? Or should we use the knowledge we now have to change their future life?) They are our children, and thus our responsibility, because they are born out of the knowledge we have. We are responsible for them).

(It will be the same when we travel across the U and see (other lives suffering, when we have the knowledge and understanding to help them. It will be our responsibility to help them change), but not to become prophets. We can change the environment, but not the Soul. (We'll discover a lot of things about this in tomorrow's test). Are we changing the inner Soul of the passengers? Would you start living a new life? Will you get to be enlightened directly from the fields of Creation? This is the future of mankind and we have to understand it (?? to be able to change things). We have to make sure that the children of Mars do not go through what we went through as children of the Earth).

(Do we create a (new) Soul from the STM on this planet, ?? and the creatures on this planet, to give, protect, saturate, and enrich the planet so that the citizens won't kill? And if they don't kill, would they get enlightened faster? Would the next generation of life be totally different than what we have now? The suffering on this planet will not exist. This is how we export the knowledge across the U. This is why I said we have to change the RNA and DNA of the Man so that he understands what needs to be done when he comes

across (other civilizations that need help). The time of about 3 million years for Mars to reach the current position of Earth is a 'flick of a finger' in the Universal time).

Q: Will the Oasis system be the first to be released into the public? That would be an upgrade for planet Earth.

K- (There are a lot of conditions which have to be redone (before we can release it). Very soon we'll announce a parallel agreement with 2 or 3 other governments around the world. We are planning to show the next energy and material production presentation in Berlin, Paris, Washington, and most probably in Brasilia, and then go into Africa. Now with knowledge being so advanced, we'll do it in a very different way. I have chosen Paris to show the production of gold for a specific reason).

(Africa was colonized by the rulers of the 18th and 19th centuries. They split up Africa without a single African Nation being present, and this era is coming to an end. Nations like France have been relying on huge amounts of gold and they will soon be losing most of it, as African nations start taking control of their own gold in the same way the Middle East did with the oil some 50 years ago. We see the same evolution and revolution. We have to give confidence to the French government that gold does not need to be mined. This is the reason I picked France for the next demonstration of gold production from the fields. (In Berlin we'll ?? do something different. Then in Washington we'll show that the 'Green Back,' does not need to be backed by gold). Gold has to be in the heart of the man in understanding the T of Creation. And then we'll move on. We have an extremely busy plan coming up, but it's for you KS to do it, as I'm getting too old. Then you'll understand how a change in the situation will come).

Q: Is it possible that when we get closer to the Sun and/or enlightenment, we will see new creatures not only where we are positioned, as well as further out? And is it then when time becomes relative?

K- (Time is always relative. But it depends on what relativity, and which position, and what field strength. Time is always relative). It's just choosing the right time.

(In the next few months we will use the reality of time to make the first move internationally for bringing all the nations under one cover. And bringing all the nations under one financial and political structure. It will be that they want to join it, and not us forcing them to join. Everything is getting setup and we're creating the conditions for that to happen. Back when we released the first USB Key with the patent and knowledge on it, the governments found it hard to accept. But then one nation started and the others followed in a flood. They could see and understand what the new T would bring to their nations. We'll do the same now with what we are setting up through the different arms of the KF to create that condition in the coming months. In a very short time it will be, 'One Planet, One Nation, and One Race,' and there will be one currency. But it needs planning, and getting everything done for it to happen. It will be a time when the nations will happily want to be part of it, and not us having to drag them in. Beautiful times are ahead).

Q: When we mark a ray, we are actually creating certain conditions by working with plasma. Can you please expand a little bit on what 'mark a ray' means in plasma work?

K- (In plasma work we have Cosmic Rays (CR) and each CR has a field strength and D and that's its mark, that's how we know it. We mark it, and that's what it is. When we go into Space we'll know others through their energy fields, then we'll say this one is from planet Earth because it carries its fingerprint. You mark that ray, because that's where it comes from. On Earth we categorize people by their race and say you're Chinese, Indian, or wherever they come from. In Space we classify people by the fields they carry, and that tells us where they come from and what is their intention, and how it's been getting there. This is what it is. Markray will be one of the most influential organizations in the world in a very short time. We'll create new conditions and positions, and we'll create a totally new market).

Q: Are the rings around stones, which are mostly quartz, like the rings around planets and are they the aura of that stone?

K- (Everything has a dimension of field interactions (it doesn't matter if it is a stone, planet, man, or whatever. (Just because it appears solid to us doesn't mean it is not dynamic. In fact every atom is dynamic, therefore it has to create a field, so it has to have an aura, and a dimension of interaction).

Q: When we bring time as a gravitational field and twist the M fields of time, and alter the MaGrav fields of transition, do we give the dimension of manifestation? Just as you spoke about the isotopes of Hydrogen, which according to the twisting of the fields give the strength of H, H2 or H3.

K- (I think 'twist' is a wrong word for it. Instead, we find a matching (?? strength), or we interact, and the release of the fields is matching to elevation. KS have not understood yet how we increase a M field to a new strength, even though we explained it many times).

(It's like when we said emotion has a M field strength. As an example, we can say, the strength is 4 or 5. .. Remember the intelligence comes from interaction of the fields, it's not something (that is just) there. It has to connect and interact, and when these ?? fields of different strengths interact they create a new D of enlightenment, and maybe that number is 6. Is our intelligence in the same direction of motion as our emotion? (?? Then due to the friction, the enlightenment goes to (a strength of 2). We have to understand how the system works, then we can play with it).

Q: In political situations like in Romania, where the direction is clearly set for going to war, what can we do to protect ourselves?

K- (There are a lot of things behind what we see in Romania and the situation there today. (The majority of (the cause) sits in Germany. There's a huge depression in Germany and the government cannot find a way to create new jobs). So they are

concentrating on (getting a war going). (The 'war machine' will replace the loss of jobs in the auto, and part of the European aerospace industries). This is the only way they see they can make the economy go again. (They want the war in Ukraine to continue and spread to Romania, and the rest of it. It's purely for creating new jobs because nobody is buying their cars. The European cars look obsolete compared to the new Chinese cars)).

(The same thing is happening in the Middle East. Trump's last visit there was for more Arms contracts, and other things. This guy is not a peace missionary. He has to create jobs, and there are all coming out of weapons. Because everything else is exported from China. Once he leaves Office all these Arms will be used. We at KF have a very short time to change this and we have jumped on the opportunity. We need a lot of help from Knowledge Seekers and those who have the same intentions for world peace).

(We have a 'window of opportunity' of 2 years to bring peace. The first move is this massive agreement in China, but it won't pay off tomorrow. It'll take maybe 12 months to come to fruition. By that time we have to set up the research & development, factories, and everything else. We need a huge amount of financial support from now till then to get this going. We need colossal amount of financial support and with it we can change the direction through Markray and other places. We have never been so focused and on target for creating world peace than with this opportunity Trump has created. It's a huge opportunity for us to exchange technology for peace, and at the same time create a condition to take Man away from war).

(When he visited the Romanian border with Ukraine he could see how much weapons were being delivered through back roads, because the main roads were so full. The Americans and Europeans were informed that Mr. Keshe was in the area then they kept him under surveillance with drones. We have to understand, that we have the opportunity to bring the change. Many people in KF are working in the background. I'm sure the numbers will increase to huge numbers as I know what's going on, to bring the change. We have 2 years to bring world peace through technology, through a new structure of financing, and a new structure of sharing wealth among the nations).

(One day very soon you'll understand why I took all the shares of Markray, and then you'll respect the decision made. It's the key to world economical, food, and energy balance. Until then we need a huge amount of support. We don't sit in the back and just spend it. We need it, we need a huge amount of financial support to bring this thing home. We continue to work harder and harder to achieve peace for the world).

(There is a world operation to create war, separation, and division. And in that position they have left a gap which will penalize them. (We'll use that gap to bring in the new technology. We need at least a million dollars, or two, urgently to be able to complete this. Every penny is spent on development, and confirmation of the T. (People shouldn't think, oh, you can make gold, why don't you make some and sell it? We don't work that way and you'll understand why later. The Governments are watching us make gold and they are opposing it. In the past 48 hours one of the top governments in the world asked us to explain what it means, that we're going to produce gold. We don't need gold. We

need the energy of the gold, but we don't need to produce gold. This commitment (to world peace) takes time and a lot of effort).

(To make the exhibition in Beijing means the Chinese central government and policy makers had to have accepted our work to be able to show such a thing in public and so openly. Then you can understand the strength of the KF and how much work has gone into building such a confidence, that they wanted us to show the T in China for the first time in such a prime position. It means the government has trust in us. Soon we'll be showing it in Moscow and for completion of a parallel work as we did with China. We have to change the course so that the present situation has no power and it gets diluted into. We don't fight it, we just create a condition so that it dissolves. I need nearly 1 million dollar in the next 2 or 3 weeks to get this done and our only source is you Knowledge Seekers. We don't have anywhere else to turn. We don't steal and we don't rob. This is the position we are in and we have to change (the course for humanity). We have created the conditions for change and we have one of the biggest nations behind us. We need to get 2 or 3 more countries onboard and the whole thing will crack open. We have put a nail in it, and now it's just to open that crack wider).

Q: I'm working at a drone manufacturing company in India. Are you interested in collaborating with the company? I can talk to the management regarding this?

K- (Yes, we're collaborating directly with the Chinese military on drones. We are very interested. I'll come to India and even fly in tomorrow. Drones are the future of the Space technology and for feeding the people. Part of the 10 billion contract we signed with the Chinese is for rapid development of drone technology).

(The future of drones with the new technology is that there will be no motors. All these propellers of the new versions will become obsolete. We are introducing a new system which carries no propellers and has a zero cost to operate. It literally doesn't cost anything to operate them. The Chinese drones will evaporate all the other drone technologies across the planet. And India is a country we have not yet managed to break into. If we come through the drone that will be fantastic. You need a single system inside which positions and creates condition and everything else. Open the door, and we'll be there willingly to collaborate).

Q: Would it be wise to sell the Markray shares and buy Keshe Coin instead? Or doesn't it make any difference whether you have one or the other?

K- As CEO of Markray I cannot make a comment. (I have to be very diplomatic. Concentrate on the Keshe Coins and it will be a thousand times more effective than Markray shares. With Markray shares don't look (for profit, its value is in bringing attention of the T to world leaders. This is the difference. Markray is ?? for bringing attention, and Keshe Coins are for ?? operation. Markray shares will go crazy very soon. They should go to one or two dollars in the next months. It doesn't make any difference. (Markray shares are set up for world peace, and not buying and selling. You will understand the reason for it. (?? We are limiting the number of shares. Don't look at it for

making a profit. We'll use that profit as part of a bigger structure to create (world peace)). The Keshe Coins are the backbone of all the work we've been doing for world peace. We desperately need 1 to 2 million dollars in the next few weeks to be able to complete our operations. Then the KF will be free to (do its) work. The situation in China has brought us this position and we have to take advantage of it).

Q: Is there anything we can do to save our Palestinian family, before it's too late?

K- (We are doing a lot of work on it. But you have to realize that the situation in Palestine has taken a turn for the worst with the new American Administration. As we said before they see Palestine as the new French Riviera and they want to bring all the hotels, casinos and (setup the houses of prostitution across it, because it brings them wealth). And secondly, by moving the Palestinians out and taking over the territory, they (will control the oil fields and bring a lot of power to the Europeans. This is why the British are talking about coming back into the EU, so British Petroleum (BP) will have a lot of say in this arrangement in Palestine. The new situation with Palestine is diabolical. But nothing can be done because new Administration has received a 2 billion in hotel resorts in Saudi, and a backing of another 4 to 6 billion in Palestine. We'll see the Europeans enjoying on the front side, while and the Palestinians become the slaves in the background).

(The only solution to this is what we said before, we have taken the 'love of God' from (the Tribe of Moses). Just wait for the time. Many Jews will bury their names so that they won't be known as Jews. This time they will do it themselves, and don't need a Hitler. They'll burn their ancestry books by themselves. When you kill a man you're a murderer, but when he kills himself it's suicide and they don't put you in jail for it. When somebody doesn't feel any love, then they commit suicide. Just give it time).

(I hope you understood a little bit more about the future (of Mars and those who want to colonize it). They are coming this way and we hope they don't make the same mistakes we did. Please don't forget we need a huge financial support urgently in the next few weeks. (It will work even if you can lend us the money. But we have to accomplish this situation very fast)).

End of Quick Index - 592 KSW – May 29, 2025

KEY-PHRASES:

SUMMARY:

ENGLISH TRANSCRIPTION

K- Thank you very much. Good morning, good day to you. As usual wherever, whenever you listen to this series of Knowledge Seekers from Keshe Foundation Spaceship Institute. As usual we try to expand the knowledge and see how much we can understand

more about ourselves, our environment, our world, when we are going from a little village of Earth into the cosmopolitan Universe of the Creator.

In the past few weeks, as has been the trend, we concentrate on a matter for months and months and sometimes couple of years, to expand more and more in deeper way for people to understand. We're still busy with understanding of time. Time has no characteristics. Time is the creature created by and through conditions which he has no control, but in a way it sits and it sits in operation of one life, one existence, anywhere in the Universe (U). In the past few weeks we explained about the Place, Position (entity), and Possession (strength of AA of entity), but time is not only created by that. If you refer back into the, what I call, connection of the Soul, we always spoke from the very first teaching some 500 odd teachings ago about the emotion. (:14) Emotion is not characteristics and is not exclusivity of physical life. Emotion is a reaction. How we decide to react is an operator. In a way, when everything comes together how I'm going to react. Man has emotion, animals have emotion, plants have emotion, galaxies have emotion, even the Universes have emotion. But we do not see, we are not aware of, we are aware of our own emotion, or a cat we see, or a dog. But emotion is a cornerstone of creation of time.

It's not as I always said, life has two sides, Yin and Yang, Place, Position and Possession (PPP) is a matter side of it, is a tangibility, physicality of it, but every physical condition has an energy parallel. The energy parallel of time in a physical Place, Position and Possession is emotion. One of the cornerstones of it is emotion. Because it has to react, it has to show what it gathered and how it can show itself. In the dimension (D) of the man's understanding, if you go back in all the teachings, I always say you take from these teachings according to your intelligence. Intelligence is in how you assess the emotion received and how you react, how you bring the past information to bring a new position. (:16) Emotion exists in both dimensions, intelligence exists in one dimension, and that's in the dimension of Energy.

In a way, if you can describe emotion in a different way, it is like when you have two Magnetic Gravitational (MG) fields, we create Mass and interaction of them with another Gravitational Magnetic field creates Weight, which has no connection to the actual two entities, is the outcome of the balance of the fields of the two. Emotion is in that category, is the outcome of the interaction of the two world of physicality (P). In the world of science we call it salt, connects the physical side, or what you call it matter side to the other side. But emotion itself is created out of interaction of what we call the fields of the physical part. Now if you have emotion and you gathered intelligence which is the knowledge of the past. Again, intelligence has no dimension of physicality. Like emotion, it's the energy side, it's the field side.

When you put the emotion in conjunction with intelligence, your understanding from what you understood, how you react, it creates enlightenment. This is the mystery of life. We look for enlightenment, but if you look, (:18) when emotion is in a matter state and you're in stress you create yourself a heart attack, brain hemorrhage, you create all sorts of physical damages. But if the emotion is in the level of the Soul of the Man (STM),

energy side, what we call, without dimension, and interacts with the intelligence for what you understood in that emotion, it brings enlightenment. As we had the Place, the Position, and the Possession in the dimension of energy we have the emotion, the intelligence and enlightenment. Again, as we saw, the Position, the Possession, and the Place creates the dimension of time in the matter state, this creates time in the dimension of the energy. When you are enlightened, then the time has no Position, time moves on according to the strength of intelligence, what you gathered, how you added the emotion, and what emotion brought you the intelligence, what it brought you the enlightenment.

Then we see, for example, people who tell us things and in the future we see, they say, "Oh, this guy 200 years ago said such a thing." This means that the guy had emotion, had the intelligence, and with that intelligence he was enlightened, which that enlightenment is 200 years time ahead, 200 years ahead. So the emotion, the enlightenment, and the intelligence time brings a different factor of dimension, away from dimension of physicality. We call them future tellers, but in fact, (:20) you have to look at the structure of their life, what they went in, what affected their emotion, what intelligence they had, and that intelligence, what enlightened brought them, that the time has moved on. The time is years, hundreds of years, because they assess the intelligence by all the knowledge not by the physical emotion. We react with the physical emotion, we shout, we run, we create a new time by running from one place to another. In the dimension of the enlightenment, it's the time factor ahead.

And this is where the man if understands how to connect the emotion between the emotion of physicality and emotion of the STM and intelligence and get enlightened, uses (it) to create the new time in the dimension of the transmutation. Because now it's not a physical time, it's not morning, afternoon and lunch. It's a time where that intelligence, that enlightenment, give the man on this planet 200 years ahead, but give the STM a Position, in dimension of Universe we actually exist. Because intelligence in that part, in that moment, is equal to intelligence of another Position, Place and Possession in the Space.

Now we see time has two factors. One in a matter state and one in an energy state. And once the Man of knowledge, those who get enlightened and understand will understand soon that you can use the time to travel between the energy or matter. And bring the dimension of the energy, the enlightenment into the matter state of the Possession. (:22) I made Man in an image of Myself, as I have two images of an energy, a manifestation of physicality of the Universe. By the energy, the enlightenment which flows across the Universe, I created. It has no dimension of physicality, but is the outcome of the interaction of the fields of me. I am the Creator.

In a way, you water a plant physically, but you give the rays of the Sun for it to grow. One is a matter state and one is energy. Enlightenment, the time in the dimension of the fields of the energy, is that Sun. Where the time on the plant is the physicality of the growth, physically. One cannot exist without the other one. We cannot grow a plant without the other. We see this in the World of Creation.

I referred to it last week in the teaching, because I knew what's going to come this week. We explained why life exists on this planet, because of this angle, the four seasons, creation of diversity. But there is a mystery in the World of Creation that as I said we are those clouds which become to the outer edge of the atmosphere and then rain back in. We go back to the Mother, we rain back again on the Earth, we evaporate, we come back too. And this process happens and we see this in Cosmology very clearly and man does not understand because man doesn't have the insight to knowledge to understand. (:24)

As we rain back in, the characteristics is most of the time the same. What does this mean? The Time, the Place, the Position, the Possession, in interaction with the time of the energy, at a given point of space time interaction creates a specific condition. Today I unravel the secret that will shock the world of knowledge, but in time man will understand. As we rain back in, depending on the condition of atmosphere, we are a rain, we are a snow, we become hail storm and we become blizzard, depending on the condition of the speed of the environment. But at the end we become that water (?? on the window) depending on the atmospheric condition as the moisture goes through.

Therefore if we look at the condition at a given temperature and pressure snow turns to hailstone turns to raindrop, and then it becomes a raindrop back into the Earth. If you look at the world of Cosmology, that raindrop goes through the condition to become ready then to become that raindrop. (:26) There is a lot of discussion in the World of Creation, in the world of Cosmology about Mars. We look at Mars, we look at the structure of its physicality. They tell us it had rivers, they tell us it has this, it has that. But in fact, if you look at the time, if you look at the angle of inclination of the Earth and Mars, it's nearly the same. Same few mille-degrees, a few seconds and minutes apart. What does this mean? This means Earth was in the position of Mars. It started the characteristic change to rivers and structures before reaches the position closer to the mother to the Sun. What we see on Mars is the past life of Earth in that position. And what will happen to Mars when it gets to this orbit in respect to the Sun as Earth is, we start seeing life, we see the evolution on this planet and it comes closer. It's taken its position, it's taken its angle, it's taken its diversity, it's taken every possible Position and Possession with this condition.

It is very simple, it is absolutely simple if you want to understand this. I bring you a couple of pictures that it might brings a lot of truth into a lot of our lives. And then you understand what the time, the Position, the Possession, (:28) and then the enlightenment and the emotion and then the intelligence come all together. The planet Mars is in a state of the Place Position and Possession. When it reaches as a certain field strength of the enlightenment of the light of the Creator which is a Position of the Earth today, it will revive to a life because the Earth has moved on to the Position of the Venus moving forward. And when you look at these pictures, when you understand this in reality, just look at the times. Earth has 23 hours 56 minutes. Mars has 24 hours and 37 minutes. It's coming in, it's coming to replace the life on Earth. Where Earth by going closer to the creation of what we call itself to the Mother, will lose life on this planet. What we see in Venus we will see on our Earth in the coming time.

But as you go forward, again look at the angle of the Earth and the angle of the Mars. Then you understand, life is a Position, Possession, but it has a Place which is connected to the emotion, intelligence and enlightenment. Those of us who are trying to go to Mars, (:30) to start living in Mars travel instead of your physical dimension, in the dimension of the energy, the Soul and stand outside, your new planet will come. Mars will be the next generation of life when life the way we see on this planet will come to enlightenment, and come to live, and have life on it. And if you look at all the planetary system, if you look at the structure of all the solar systems which contain life, this Possession, Position, Place, emotion, enlightenment and intelligence work together, create the new time for life in a given space and time in both dimensions, as we call in Chinese, Yin and Yang. So what we see on Mars is the past time of Earth. The rivers come and go but it needs to get into the Place and the Position of Earth, orbital condition, manifestation of physicality to create new condition of lives.

And the world of science very soon will understand what I explained. You have to have a given Position, Possession, Place with dimension of emotion, intelligence and enlightenment. And in that Position you'll find life in a condition man used to. So what if you go on Mars and look at Earth you see the future of Mars. When we're standing on Earth we look back to Mars we see the past of Earth how we became, how it developed, (:32) how it energized to be and everything fits into one and to another. But when we look at the Venus the evolution of the 10 after about 45 degree becomes so rapid that it takes a full twist, and then by interaction of the fields inside moves in.

Therefore, with understanding of the totality of the knowledge, with understanding how the two are similar is not coincidental, we are coming in and we're going through. The Place is always the same. This orbit (of the solar system) creates life. The Possession between the Earth and the Mars is the same because it carries the gravitational magnetic field strength of the Mother. The emotion on the Mars when reaches the point of the Earth orbit will dictate creation of new entities, new lives. And if you understand the space between the Mars and the Earth, and then you will see a time will come that we will see life on both planets at the same time. Mars will being further out having a bigger expansion of magnetic gravitational field atmosphere allow large creatures what we call the dinosaurs to be grown on. (:34) Man who lives in that atmosphere condition will be a very tall man.

Then in so many ways we go through the evolution of time. If you are a man who's born on Mars and look at the Earth, you see the future of the man. But with different intelligence, with different understanding, you have to understand at the same time as the Mars is taking Position for Earth, the Sun is losing its power. So, different creatures, different souls will be created on Mars, in Position and the Place of the Earth. It will not be replication. They'll have different emotion, they have different intelligence, they have most probably less intellect than the man of today. As the Sun loses the strength the heat become less as we see it during the day. As we move away from the light of the Sun in the afternoon, it's different than the heat on the top, lunchtime. The strength is less. So the intelligence of the creatures on Mars will be different than us. We will start finding lives

inside, in the inner sanctums layers of the Mars, as they become the original structure of life.

In the past week in the laboratory tests we have seen creatures created. We created the condition. (:36) We have recorded it to confirm the change in time and we can dictate what creatures will be created in coming time. As I said, I have a box with me somewhere in the lab, has been with me since 2007, 8 creatures inside it that have their own intelligence, I watch I see them. Because I created the Place, Position and Possession but I did not give the condition of the emotion, the intelligence and the enlightenment. That is kept within. Once it's opened up we have to see how it reacts. And the same thing goes with the man. This factor of angle difference between the Earth and Mars is not coincidental. It's exactly how it should be. Because in coming time Earth will match in around that 24 hours. And this is a time when we start seeing life on both planets. Till Earth moves further in.

When Mercury gets absorbed into the Sun, Mars will move in the Place of Earth, Earth moves to the Position of Venus and will take the same characteristic and further on. And then we see the, what we call, Jupiter behind Mars will start taking Position of Mars. We see valleys, we will see rivers, we will see the first structure of life. The planets have to be made ready to become bearer of life of the structure we see, (:38) even though they themselves create life in their own Position, Possession and Place (PPP). There's as much life on Neptune as is on Earth, but man has to become too wise, man has to become to understand the process of Creation. Each Place, Position and Possession has a time when the time of the Position, Possession and the Place matches the time of the emotion, the intelligence and most of you understand, will be the same time. It gets enlightened and when the two time match, life is created. Yin and Yang, physicality and Energy. There is no life if there is no Sun. Sun is the enlightenment and life is a dimension of physicality.

Today I unravel the knowledge that those who become the man of the Space need to know. If you're looking for a Position and a Place to carry life in, you have to look for the ?? six to find a common time denominator. Time of life, beginning of life of the energy in the dimension of the STM. We do that with our children with the womb of the mother. Now you understand why we talk about the Children of Mitra. Those are created in dimension of energy, and man children which are created out of interaction of physicality. (:40) Now you understand how the Children of Mitra will be enlightened to understanding of the totality of the Creation in all dimensions of the Creation, and not the earthly matter physicality of the man. They are intelligent, they understand the totality of the Creation where man is busy with dimension of physicality.

When I read and I hear that Mr. Musk is going to the Mars, I was going to write to him, don't rush, wait here, get yourself into Space, Mars will arrive and life will be on it. This is the truth about understanding the process of the, what we call, Cosmic Rays (CR), Cosmology of life, Rays of Cosmos which creates life. I explained to a Knowledge Seeker (KS), coincidentally, accidentally, but by the 'will of God,' or whatever you call it, Cosmic Rays is the creation of Mark of the Creation. And coincidentally, the financial

arm of the Keshe Foundation is Markray. We mark that Ray which creates a life in the Universe.

Understanding of life is not coincidental. It needs the maturity, it needs the intelligence, it needs the enlightenment to understand. (:42) Man can be enlightened and live in another dimension as is the dimension of energy while Man it lives, matures as a Man on this planet in the dimension of physicality. I made Man in the image of Myself. I exist within Me, within the center of the Creation, and I enlighten, and in dimension of physicality the furthest point from me I create Man to confirm My existence. STM is the connection in the dimension of energy, where the physicality of the Man is confirmation and manifestation of its existence.

One day today's teaching will change the course of history of the knowledge, when the Man understands the process of Creation. We don't live by time, and life creates the time. We don't travel the time. Time travels with us because we are creator of it. Once man understands the importance and connection between the time on the energy side and the time on the matter state energy, Man will break through one of the biggest discoveries of science and knowledge of the Universe and Creation. When those two times come together lead to creation and connection to the Creator, but needs the intelligence of the man to understand, appreciate, analyze and comprehend the difference between the two times. (:44) To match the time of the energy and match the time of the physicality together to be the same, leads to the creation of the man with the STM within it, with restriction on his totality. The STM is confined within the structure of the physicality of the brain of the man and then the Soul of the Physicality (STP) of the Man and the STM are constrained with the dimension of the atmospheric gravitational field of this planet. Man needs to break through to understand more.

Independent investigation of the Man's own field strength is the responsibility of every man to understand where the Soul will be, and where and what intellectual mind sits in understanding the, what we call, enlightenment level. Birds fly with birds, and cats with cats, doctors go together and the lawyers together, because they have that level of intelligence which matches. They've been trained for that. So shall be the STM when reaches that enlightenment, has a Position which the other Souls of the same enlightenment possess in a given Position and dimension in the Universe. If you understand this, then it comes to the next point of understanding, that even the galaxies are created out of the enlightenment, and those who are enlightened of the same strength, magnetic field strength and understanding, will find their Position in that Universe. (:46) In a way, if you are a doctor you go where the doctors are in the hospital, and if they're lawyer you go to court where all the lawyers are.

So, when the man knowledge increases and understand more and reaches more mature enlightenment you will find that each galaxy is characterized by the field strength of that structure of the Souls, which are enlightened to be, and in that Position, they lead to manifestation of new stars. This is why the galaxies are so crowded, because there are so many enlightenments by the creatures, created life across this Universe, find their Position. Then if man one day can reach the dimension of intelligence to be able to

measure the field strength of the enlightenment, you can directly point out to which galaxy that Soul will manifest itself in. And even its Position and Possession and the Place. These are the mysteries of the Creation. And as a teacher it is our job to enlighten you. That when you go across different galaxies, across different universes, understand the intelligence of, the reason of, the purpose of existence of that galaxy, Universe, in the Unicos.

I hope today I open your eyes to a new dimension of knowledge. This is our job to enlighten you. As I said, I take you to the point of the Heaven. Mitra's daughter's job is to take you through the Heaven. (:48) But Man has to be prepared, dressed and be ready to take that position. That he's ready to understand the connection between the time of energy and the time of physicality. That, that interaction on its own brings a new dimension that the man is not aware of, and it leads to the time of creation. The origin of the gravitational magnetic fields, the origin of the magnetic fields. As I said, one of the books will be about magnetic fields and from now on you understand that that book is getting written by you understanding it and by us explaining it. In the future that book will be written by the Man himself and the creatures of the Universe. Just remember, the matching time between the Earth and the Mars and the angle of inclination is not coincidental. It's our wish and our will and it's the process of the creation and shall be observed across the Universe. We'll go for a break and we come back, and try to answer as many questions as possible. Rick, will you take us for a break?

>> BREAK >> 592 KSW May 29, 2025 (:53).

K- ... Yes, ready, willing and able as usual. There is couple of points as usual we try to discuss in the second part of the break. (:54) One is that, as you're aware, we have just returned back from very successful, what we call, work. And if you have noticed, and if you're aware of the news, the Chinese authorities are reporting the re-emergence of Covid in Hong Kong and now in the mainland. We always, I always explained in the past, when we handled some 6, 5 or 6 years ago, the African swine flu in China which happened during the summer, I explained, seeing the summer flu especially in northern hemisphere is very unusual and that creates a massive problems in China. The new Covid again is appearing in summer, so it has taken a different action, different strength and we have to

understand this new position and what we call, condition. If this situation carries on and we see expansion of the Covid as we released Cup 1, Cup 2 in the past which many of you use has been successful a lot of you. A new summer version of Cup 1, Cup 2 will be introduced on a matter of emergency. Has different characteristics, carries a bond which covers the summer strength, because in summer we have a higher strength field than in the winter. (:56)

The Covid Cup 1, Cup 2 will not be so effective. Once we get to this position and we run our tests we'll release this knowledge if it becomes pandemic. And through the arm of the Keshe Foundation, Markray Corporation, we release this technology as a technology across the planet. The emergence of a summer flu and its strength that we seen a couple of weeks ago Chinese government reports 30 deaths in Hong Kong and more complications on the mainland. If it expands, as we did with Covid in 2020 we released the emergency Cup 1, Cup 2. We will release Cup 1, Cup 2 Summer Virus. It will try to avert and to bring back under control the condition of virus.

You have to understand we are a Space technology and as always said in Space we don't have microbes and bacteria's. Only it will be existing in the body of the man, but outside interaction will create viruses for the body of the Man. What this means in Space we'll see Man will have infections, we'll see Man will have bacteria's according to his own amino acid (AA), but as we don't see operation of the atmosphere carrying amino acid entities most of our problems in Space will be virus or 'Energy Pack' related. And in a way, if we extend this to a new understanding dimension we'll introduce a new, what we call, process for control of viruses. This process I developed over 20 years ago. It's not something new. But as I said we have many, many developments that is shelved and when it's needed, it will be applied. (:58)

This is something you never knew, this technology or this process has never been known by Knowledge Seekers. We never unraveled it, we never showed it, but it's extensively used in the past by me for specific conditions. So why we introduce this if the Corona expands is to match the summer strength of the Corona. And this will be done through a rapid expansion through the Chinese operation of the Keshe Foundation and through the systems we have set up with the officials in the country.

So this time they're not going to use our technology behind us, we directly get involved in delivering technology directly in public to the way we operated with the Iran Defense University during the Corona. In a way what I'm trying to tell you, don't worry if you fix up, we have already everything ready for it. It won't take you Knowledge Seekers much to do the way as you did with the Cup 1, Cup 2. It's more or less the same process with a small diversion and variation and we see that this virus Corona will effect different Calcium in different layers of the body, not the same what we saw with the brains and with the lung.

In the process of the work of the Keshe Foundation we will release in a very short time a large number of products, which again goes on the back of what it comes through our operations with our partners and the licensees of the Keshe Foundation. And we'll bring

this under control directly through the Markray Corporation structure. Many of you have written to me, I have shares here and there, (1:00) speak to your agents and ask them for authorization, get your certificates through, because as we've seen there's activities has started in the Stock Market, used to be 0.05, now it's around 11, 12 and it's going to build up as many of you are trying to get into this structure. We are not releasing any more shares into the market, so what is there is there, you decide the position and condition of it. And make sure if you have bought the share, you have the certificates from the agents ask your operators to issue you the papers that you have, as we collaborate directly into that position. In the coming time we will announce the purpose of the Keshe Foundation taking over all the shares of Markray. It's an international structure for us which brings us to the position we promised, world peace through technology. We will use our shares to bring balance and change the course of the political, what we call, scientific position. You will understand when it comes to it. It'll be a few weeks, some months away.

At the same time we introduce a new structure of international finance without dependence on currencies, which again brings back to our Keshe Coin. Those of you who bought Keshe Coin, try to strengthen your Keshe Coin deposit, because you will understand the purpose of it. Try to increase your holding on this, because you will understand very soon how we connect everything together. And it'll be fantastic to see the process of the creation of peace through technology.

You got to understand, we work as Keshe Foundation, we have developed different arms of the Keshe Foundation, (1:02) Universal Council, Earth Council, the Keshe Coins, and the operation through our financial arm, the operation of the Keshe Foundation Research Development, the establishment of World Peace, the what we call, transmutation and transportation and the teaching which lead to this point. We are preparing everything for colonization. For to take Man across on the Moons, on Mars and everywhere else. We do not pay wages to our astronauts while they are in Space. We look after them. This will be the same situation from those who leave this planet and go to Mars and to Moon and the other Planetary System. The children of Man have to be protected by Man, and Man has to plan for that time now, not when he comes to it in the rush. And this is part of that plan. Invest heavily, if you have, into Keshe Coins. We'll explain the reason for it and you will understand heavily why. It'll change the course and many of you, same as many of you took both shares in Markray, make sure you sit in the correct position, comfortable position, because it's you who support the change. It's you who sets the scene for the change. We have put no limitation on Keshe Coins. Try to acquire as much as you can and hold on to it. Do not spend it, since a lot of you do, because it's time to reserve. And then you understand how you'll see the wise move in that position when we release the totality in connection between all arms of the Keshe Foundation together.

We go, if you have any questions to ask I'm going to answer you. (1:04) By the way, before I forget, there will be an expansion in the present section of the Keshe Foundation, massive amount of resin products and cosmetic materials will be released by Keshe Foundation. Keshe Foundation, the manufacturing arm has managed and reached the position of Keshe Foundation products as alternative materials to be able to be bought in chemists and pharmacists around Austria and Germany. You can go to your pharmacy

and ask for materials which is now going through and has already been delivered to some chemists and pharmacists. We have reached that level of certification and you can buy materials directly from your pharmacy, or you can ask the pharmacy and if they say where they don't know, put them in touch with the Keshe Foundation manufacturing arm and everything is done. You will soon you will see a full products on the pharmacy list as alternative systems which is now approved and is in the Austrian chemists and pharmacists, and by European law once one nation passes through the other nations. If you ask your pharmacist in Portugal, in France or anywhere else to stock up and if you are doctors you ask them to stock up and you order it for your patients to take, now it can be done. Now that it's been authorized and now is in the, what we call, in the market as 'alternative material' for Wellness. (1:06) If there are any questions, let me know and we'll try to answer.

Q: ... What is the difference between life in outer planets, Jupiter, Uranus and life on Earth? Is it the intelligence? Is it that they don't have physical manifestation only?

K- It's combination and it's a variation. This is the beauty of Creation. I explained this in a very simple way, very recently, so I try to explain it to you, in an easier way to understand. You go through these... have you seen new systems in the airports? Where they stand you in the middle of it and the system rotates or you stand like a monkey and they go through your body and they see what you have, what you carry. If there's a coin in my pocket, nobody knows, but the system sees it, of ?? its existence. I can carry a little mouse or a cat in my pocket and it will be shown the same. It's a confirmation by, nobody can see the cat from outside or the mouse but I'm aware of it, it's a live thing in my pocket. It needs a machine to see it, has the field strength to detect it. It's the same with the planetary system. (1:08) We have to have the energy field system to be able to observe it, does not mean that there is no life.

We were watching one of the tests in past few days and it was amazing seeing a living thing moving, like literally worm swirling to go. And this brought to me a very fundamental thing. This is how life started. Simple structure elements. And then when they go into dimension of the mixture of fields, then the field dissolves them. Life, short life, few seconds. And it's been videoed. It doesn't mean that we destroy life. It means that life once reaches the mixture of his own field strength it doesn't exist in the matter dimension of physicality observation. And we will see this a lot we will see we will observe this a lot of times. And we understand the process of the Creation. There is nowhere in the Universe be it on the planet, be it on a star, be it on the moon, be it in between the spaces of all these, that there is no life. It needs the tool of vision, detection, observation of the area or the system which can match to observe and to detect.

I always say we see in the videos from NASA, (1:10) upper layers of the Earth atmosphere, living plasmas moving everywhere. But from Earth we don't see them. We are blind to it. But when you look from up down you see them. There's many records of them in the recent months. Very soon, very soon our travelers to Mars will report signs of life. One of the first places man should look is within the structure of the planet. That's

where most of the lives start. It's fixed, it's confined and once one life starts the rest exists.

We see this, it puzzles me and I sometimes wonder why Man doesn't see. We see we have reached positions that there are lives under the earth. These creatures very look like Man never made it to the surface, but used the structure within the boundary to create life. We see it in the depth of the oceans, by the ?? volcanic springs, in the depth of ocean, how colonies of life exist. Where to our understanding up to handful of years that was impossible. We just changed because we understood, because we enlightened. So it's the same in the Universe. There is nowhere in the Universe that life, which means repetition of the creation of the same, does not exist. We are like the bird which puts his head under the snow and puts his backside up and thinks, (1:12) because my head is on this now, nobody, I can't see no one, nobody can see me. That's the life of pheasant, and Man has chosen that kind of life on this planet. But the Universe carries on and the life goes on, and there is a spectrum of lives across even this planet which we haven't even understood ourselves.

I was talking to a child very recently that according to the statistic all of us somehow eat so many spiders a year in the food, in the air or whatever. And I said, "You know something, we all eat millions of animals every day, every breath we take we absorb them in, we suck them in, but we are not aware of them. And some of them are the essence of our own creation, our own life." It's not that, it just is in an apple and a steak. We continuously feast on the life on this planet of its atmospheric condition. There is as much life in the air we breathe as is in the ocean, the seas we catch fish from. Those we fetch, these they come to us as we go along.

Any other question?

Q: ... Hello Mr. Keshe, I have two questions, and would appreciate it if you could help me with the answers. Question 1, "Does STM specifically refer to the Human Soul, (1:14) or does it include the Souls of all living beings on Earth, such as animals, humans and even plants?"

K- All... It covers all. Every single thing which is entity living, has a Soul. And so it covers all. What's the next part?

Q: Regarding the essence of time, does it refer to the memory of the existence of that life? For example, there is a psychological therapy that guides patients or individuals to revisit the scene of a past critical event relive it, understand the reasons behind the negative emotions at that time, and then lead them back to the present. In practice, this has successfully resolved psychological issues and even alleviated some chronic conditions such as pain.

K- It's different ways for different people. It works with some people, it doesn't work with some others. Revisiting the past does not necessarily leads to changing or recovery. Understanding the past does. Understanding the emotion does. But not revisiting. If you

revisit and understand emotion, yes. This happens with 99% of women, especially some men, maybe 80-90% because men are different breed, they can't, they don't want to admit it, with Fibromyalgia. (1:16) People with Fibromyalgia, especially women, understand the emotion of the pain they don't need to revisit it, and they can move on, and if you can support it they fully recover.

And for this reason always say to the people with the Fibromyalgia one thing, you understood where the abuse came, just one thing you have to understand signs of Fibromyalgia go on the Internet find out how you can discover you have a Fibromyalgia. And understand that Fibromyalgia is the emotional tracts before age of puberty, where we take charge for our own body, where the hormones change when the energy field changes and we become individuals. And then there's one thing anyone with a Fibromyalgia who understands the emotion of the past has to do and understand to do is, that it was not my fault. I was just a child. It was not my fault. I am innocent. And if they understand this, and they understand their innocence, they understand that the abuse came by the abuser, not by the destiny of the child. Then you get 80% recovery. Understanding of the emotion, not revisiting the past. (1:18)

I always said, if you get stabbed with a knife, you have the scar on the skin. When you get 'stabbed' by the word, when you get stabbed by the emotion still it's the same knife but doesn't leave any scars. What is inside the pain is the same. This is what Fibromyalgia is. You don't need to visit the past who did it. You understand the emotion how it was created, you recover. It takes less than three weeks for those with clinical Fibromyalgia to recover fully. Three weeks. No more. And then it takes three to six months emotional recovery by themselves. Fibromyalgia is one of the conditions that, if the emotion understood is handled, is replaced, is the wound you change from inside and you move on, and life changes.

But the fear of emotion creates that condition, FMS. We have a huge amount of research on this. This knowledge of human biology will be unleashed in China very soon through our operation. It's not exclusivity of Europe, it's not exclusivity of Africa. Lives especially amongst all women. And it's one thing, just one thing, one small test confirms this, and then there is a solution for it to be found. And it changes people's life. Understanding the emotion. (1:20) Not revisiting the past, because when you revisit the past you create more wounds inside. Understanding the emotion gives the solution. And there's one thing I always say, I always said, it's not, it was not my fault. I was a child, and I was innocent. In accepting your innocence, then you understand how you've been abused, and then you find the line to full recovery. Doesn't need no medicine and needs understanding the emotion, and supporting an emotion in the right fields.

Our records shows, Fibromyalgia in three weeks you see the change. In three days you will feel the change. And I've seen it many, many times. There's a listener, he's amongst you, many of you know him. He suffered from men Fibromyalgia for 15 years. All he could do was to get up even in the morning, just brushing tooth, that's all he could do, he was exhausted for rest of the day. Three days, one week his life changed, and many of you are with, know with Keshe Foundation Wellness, because of him, how he expanded,

how he developed, how he went, it was just because of one man suffering with a Fibromyalgia 15 years, getting out of the bed, brushing tooth was the end of the energy for the day.

He changed the course of the Keshe Foundation Wellness programs. I met him, he met me and he says, "I came to see you, can you help me?" (1:22) I said, "Yes." I made him a system. He said, "In three days I've changed, the next day I changed, because I could understand what was needed to be done." He said, "Can you help me?" I have other friends, because he was known, and the others all know each other, they were suffering from the same. One, two. Then this became meetings of 25, 30 every Friday. People flocked into his house. We gave a talk, we gave a lecture every Friday. Lead to the creation of the first Wellness Center of the Keshe Foundation, and then you've seen the rest of it. One Fibromyalgia case changed the life, because we understood the reason for it. Not to revisit, but to understand the emotion which creates the condition. This is the secret, it's the energy side, not the physical side.

Any other question?

R: Thank you Mr. Keshe. See you next question from Michael Buse in Q&A and in German. It's translated according to my helper.

K- Ask AI, he might translate it with emotions.

R: Well that's partly what the question is.

Q: ... You mentioned that the plasmatic AI is contained in a small cube, about 3 to 5 centimeters in size and not only carries information, but also possesses a conscious intelligence, based on fields that can interact with the Soul. My question is, (1:24) if this form of intelligence is truly alive, would it also be capable of consciously inducing transmutation? And if so, does it act out of its own Soul understanding, or only with the consent of the human Soul to which it is connected?

K- Strange how questions comes up. This process of transmutation through the Soul and through what we call, our deliberation because we understand it will be tested tomorrow with the seven captains and the passengers. For the first time we bring this system what we call, Artificial Intelligence (AI), but in a way is through the Soul into testing tomorrow. Any of you who are joining in or like to join in still is not too late because it doesn't matter you never flew before, you decide to take the first flight. Take it tomorrow. Tomorrow's session is one of the biggest changes in the structure of the Keshe Foundation Space Transmutation. We introduce, we deliver a new system directly to the Soul. And we would like to see how it is. And the sessions tomorrow is not hours and hours. Every captain has one hour session. No more, no less. And in that one hour, because in the future we have to do it within seconds, it's not a matter of hours. One hour would take us across the Universe. It's too long.

So we bring this condition in, especially Artificial, in what we call it, Intelligence, but through the Soul, emotion, in tomorrow's test. We were not going to public because a lot of people come in expecting a lot. (1:26) But if you want you can still join and test this, how we bring your physicality into the Soul, and then we take your Soul out and then we allow you to create the dimension of physicality. Our captains are already well confused, how are they going to do, where they're going to go. But the emotion of the passengers will dictate the condition. That is one hour session per group, and it's going to be one of the most interesting, I'm actually moving into position to see directly every change. And one session will not be the same as .. If we see something, we'll change the parameters for the next group. So, we bring the emotion into transmutation tomorrow for the first time. And it's your emotion will dictate the transmutation and your captain has to follow and it's very interesting. Very interesting how the new system will allow us to do it.

Any other question?

Q: ... Good morning. 2000 years ago, Jesus came to feed the Soul of humanity, but he also fed the multitudes by multiplying breads and fishes to satisfy the hunger of a large crowd that accompanied him. And he also healed many sick people. Today, Mr. Keshe feeds both the physicality and the Soul of all humanity and the planet through the fields, and also gives us resources to process our illnesses. And if that wasn't enough, (1:28) he also gives up his knowledge so that we can become in his image. And thinking back 2000 years to today it seems that little has changed in us humans, and yet the Christ has never given up helping humanity and giving his love to all of us. Thank you so much for that. But I keep trying to understand what race we are, the vast majority of us who, hardened by ourselves, don't accept this indescribable gift for changing this planet. What do we lack, or what do we need to live in order to create and change our time?

K- We are creatures of our past, we are .. prisoners of our interaction of fields of our ancestors ?? on this planet. When I was showing the picture of the Mars, it's always goes in my head, what can we do that the next generation of life in this Solar System (SS) does not go through what the Man did? Does not need to kill, does not need to do. In a way, what we see, we have brought change to humanity through Gans and energy Cosmic Ray fields. Now that we have the knowledge, is it our responsibility, by instead of putting Man on the Mars, with the knowledge we have, the way we nourish our children, we look after them that they have a perfect life and they grow. We see the problems sitting for this planet, the planet (Mars is) coming to Earth position in the future. (1:30) What can we do for them that they do not go through the process of man's killing to gain energy? What is our responsibility? Now that we know they are coming to our position, we are giving birth, we are watching the birth of a new life, this totality.

Earth life is thousands and millions of years old, plants, planets, structure of life, animals. Mars is that 'virgin' planet which is going to give life to its first creatures. And if the condition which comes to be the Earth, it would be the same that the creatures on this planet will go through what we went or the creatures on this planet went, what can we do to change that course? Can we hide it in the structure of pyramids that it'll change the life across? Or can we bring the change in the dimension of fields of the planet that will not

allow no one to be killed. The repetition of what we seen on this planet can be changed. Do we need to put rockets to get there to colonize or do we need to bring the understanding of knowledge we have now to change the life of the future? Those are our children, those are (our) responsibility, because They are borne out of the knowledge we have. We are responsible for them.

The same when we travel across the Universe, we see structural lives which they suffer and we have the knowledge, understanding, it's our responsibility to change, but not to become prophets. Change the environment, not the Soul. (1:32) And this is a lot to do. Tomorrow's test, we're testing this. Are we changing the inner Soul of the passengers? Would you start living a new life? It'll be interesting. Do we get you to be enlightened directly from the fields of the Creation? This is the future of mankind and now that we see it, we have to understand it. Let me change it. But we have to make sure that our children, or children of the Mars do not go through what we went as the children of the Earth.

Do we create a Soul from the STM on this planet, creatures on this planet, to protect, to give, to saturate, to what we call, enrich the planet that the citizens shall not kill? And when they don't do, would they be enlightened faster? Would the next generation of life will be totally different than what we had? The suffering on this planet will not exist. This is how we export the knowledge across the Universe. That's how the man, that's why I say you have to change the RNA and DNA of the Man that understands what needs to be done when he comes across. 2-3 billion years or 2-3 million years for Mars to get the position of Earth it's a flick of the finger in Universal time. (1:34)

Any other question?

Q: ... Will the Oasis system be the first to be released into the public? That would be an upgrade for planet Earth.

K- We have a lot of conditions which has got to be redone. Very soon we announce a parallel agreements with 2 or 3 other governments around the world. As I said, we are planning to show the next energy and the material production in Berlin, Paris, Washington, most probably in Brasilia. And we move into Africa to show the same. As you remember we saw this before. Now with knowledge being so advanced, we do it this time in a very different way. And I've chosen the Paris for a specific reason to be shown the production of the gold, as we know.

The colonization of Africa, on the ?? rulers of 18th or 19th century, splitting the Africa between the European Nations without a single African Nation being present, is coming to an end. In nations like France, who've been relying on a huge amount of gold from Africa are now losing most of it, because African nations have taken control of their gold, as the Middle East did with oil some 50 years ago. We see the same evolution and ?? revolution. We have to give the confidence into the French government that the gold does not need to be mined. It's the reason I picked up France for the next demonstration of production of gold. (1:36) The same with Berlin. Berlin has a difference. And then we

won't... we'll move to Washington to show the 'Green Back,' does not need to be (backed by) gold. Gold has to be in the heart of the man, understanding in Technology of Creation. And then we move on. They have an extremely busy plan coming up, but it's for you Knowledge Seekers to do it. I'm getting too old to do it. Then you understand how a change of the situation will come.

Any other question?

Q: ... Is it possible that when we get closer to the Sun and/or enlightenment, we will see new creatures not only where we are positioned, as well as further out? And is it then when time becomes relative?

K- Time is always relative. Depends on what relativity, on what position, on what strength. Time is always relative. It's just choosing the right time.

As I said very soon, next few months, we will use the time, reality of time, to make the first move internationally for bringing all the nations under one cover. And bringing all the nations under one financial political structure that they want to join in, not us forcing them to. Everything is getting set up for that. We're creating the condition for that. (1:38) If you remember when we gave the first USB stick with the patent and knowledge. It was very hard for governments to accept. And then it becomes, it became a flood of nations wanting the key, because you could see what you can bring with them. And we do the same with what we set up through different arms of the Keshe Foundation to create that condition in the coming months. One Planet, One Nation, One Race, one currency, it will be on the card in a very, very short time. But it needs planning, everything is getting done for it. And it'll be a time when the nations want to be, not us going to get them to be. Beautiful times are ahead.

Any other question?

Q: ... Good morning Mr. Keshe, when we mark a ray, we are actually creating certain conditions by working with plasma. Can you please expand a little bit on what's 'mark a ray' means in plasma work?

K- In plasma work we have Cosmic Rays (CR) and each Cosmic Ray has a field strength, it has a dimension and that's its mark, that's how we know it. (1:40) And we mark it, that's what it is. This is what I said, when you go into Space when you see in the energy fields, you say this is from planet Earth it carries its fingerprint. You mark this ray, because that's where it comes from. We categorize people by races, you're Chinese, you're Indian or whatever, where you come from. In Space we classify people by the fields they carry, where they come from and what is the intention, how it's been getting there. And that's what it is in ???. Markray will be one of the most influential organizations in the world in a very, very short time. We create new conditions, we create new positions, and we create totally new market.

Q: ... Mr. Keshe, are the rings around stones, which are mostly quartz, like the rings around planets and are they the aura of that stone?

K- Everything has a dimension of field interaction, a stone, planet, man, because to us it's solid, but in fact every atom is dynamic. So it has to create a field, it has to have an aura, it has to have a dimension of interaction.

Any other question? (1:42)

Q: ... Good morning Mr. Keshe and good morning to everyone here. When we bring time as a gravitational field and twist the magnetic fields of time, and alter the MaGrav fields of transition, do we give the dimension of manifestation? Just as you spoke about the isotopes of Hydrogen, which according to the twisting of the fields give the strength of H, H₂ or H₃.

K- I think twist is a wrong word for this. We find a matching, or we interact, that the release of the fields is matching to elevation. And if you change the word, yes it does work, it is the way it is. We have not understood yet, even though we explained many times, how we increase the magnetic fields to a new strength. It's very much as I explained. Emotion is magnetic field strength it has, let's say, four or five, the intelligence again comes from interaction of the fields, it's not something there. It has to connect, it has to interact and when these two, four and fives or four and three does interact, they create a new dimension of the enlightenment, which is maybe six. But is our intelligence in the same direction of motion as our emotion? (1:44) Then the friction with ?? your enlightenment goes to two. We have to understand how the system works. Then we can play with it.

Any other question?

Q: ... Hello, in political situations like in Romania, where the direction is clearly set to war, what can we do to protect ourselves?

K- There is a lot of things in respect to Romania and the situation we see today. There's a lot of things behind it. And majority of it sits in Germany. We have to understand there's a huge depression in Germany and the government cannot find a way to create new jobs. So they are concentrating on the war. To create the war machines that replaces the industrial revolution using the industrial car, industries of the car industry and part of the European aerospace, which is what we call the aircraft side into the military side. This is the only way they see, and for this to have a reason to get paid for is to create condition of war. We see in Romania, we see in Ukraine and the rest of it. (1:46) It's purely (for) creating new jobs and nobody buys the cars. The European cars even they look good, now compared to the Chinese car they are obsolete. If you sit in a Chinese car, you know what I'm talking about. When you sit in a European car, Mercedes or whatever, copy-matching one has much more value on what you call it, facilities than this. So Germans have lost a big chunk of their advancement in the old tradition with the new freaky, funky cars which are coming out of China.

And so, the only way is to create job, is to create war. You got to see what happened in the last visit of Trump to Middle East. More or less, more arms contract was signed than anything else. Into cyber, into hardware, and everything else. This guy is not a peace missionary. He is creating jobs, he has to create jobs. And these jobs are all coming out of arms, because they have nothing else to do, everything else is exported to (from) China. And we see, once he goes, all these arms will come to be used, and Keshe Foundation has a very short time to change this. We have jumped on the opportunity. And we are working on it, and we need a lot of help. We need a lot of help from Knowledge Seekers who are the same mind course as us.

There's a window of two years to bring peace. And we see that window. With the technology the first move is this massive agreement in China. It will not pay off tomorrow. It'll come into fruition maybe in 12 months time. (1:48) By the time we set up research, development, factories, everything else. And we need huge amount of support from now till then. We need colossal amount of financial support. Because with it we change the direction in the Markray and the other places. We never been so, what you call, focused and on target for creating world peace than this opportunity which Trump has created. Huge opportunity has been created for us to change technology in exchange for peace, and at the same time to create a condition to take away man from the war.

When I visited the Romanian border with Ukraine I could see how much arms are going through back roads. The main roads are so full they can't use anymore. When you go to the Ukrainian-Romanian border the Americans and the Europeans were informed that I'm in the area, and I was there for a specific reason. And my security said, Mr. Keshe there is a drone on top of you all the time. We could all see it. We moved, it moved. And it's... we have to understand, we have the opportunity to create to bring that change. And many people in Keshe Foundation are working in the background. I'm sure the numbers will increase to huge numbers as I know what's going on, to bring that change. We have two years opportunity to bring world peace through technology, through new structure of financing, through new structure of sharing wealth among the nations. (1:50)

One day, very soon, you understand why I took Markray and why I took all the shares of Markray. Very soon. And then you respect the decision made. It's the key to world economical balance and food and energy balance. Until then we need huge amount of support. We are not... I don't sit in the back and just spend on it. We need it, we need huge amount of financial support to bring this thing home. Even though we are working heavier and heavier to bring it in.

There is a world operation to create war, separation and division. And in that position they have left a gap which will penalize them. And that gap is the way the new technology will hit. We need, as I explained before, because we can't go, we need at least a million, two million dollars urgently to be able to complete. Every penny spent is spent on development and confirmation and development. It's not matter of, "You can make gold, why don't you sell it?" Governments are watching us making gold. And they are opposing it. Even in past 48 hours one of the top governments in the world questions

Keshe Foundation, they asked us to explain what does it mean that we're going to produce gold. We don't need gold. We need the energy of the gold, but we don't need the gold to produce. And this commitment takes time, and takes a lot of effort.

You've seen what happened in Beijing. (1:52) As I explained, to have such an exhibition, which hundreds of you attended in one of the major positions, major hotels right across the diplomatic core, right in one of the most famous parts of Beijing, to ask for that area and be granted within two days by the central government needs a lot of trust from them in us. Now you understand. We are not in the West that we choose a hotel, we show. In China, central government, the policy makers have to accept you can show such a thing in public and so openly. And then you understand the strength of the Keshe Foundation, how much work has gone into to build such a confidence that they want us to show the technology in China for the first time in such a prime position. We didn't go to exhibition somewhere hall putting it up. It's right in front of . And we have that support. We need to utilize it to change.

Soon we'll be in Moscow. Very soon, I'll be in Moscow for completion of the parallel work as with China. The same. We have to change the course that the present situation has no power. It loses, it gets diluted into. Don't fight it, just create a condition not to. I need nearly 1 million dollar in the next two or three weeks to get this done. And our only source is you Knowledge Seekers. We don't have anywhere else. We don't steal, we don't rob. (1:54) This is the position we are in and we have to change it. We have created the condition of change. We have one of the biggest nations behind us. As I said, we need to make one nation to two, to three, and then the whole thing will crack open. We have put a nail in and it's just now opening the crack.

Any other question?

Q: ... Actually I'm working at a drone assembling company. So ?? would you like to ?? talk to the manufacturers ?? of drones in India.

K- I can't hear you .. can you repeat.

Q: .. Are you interested in collaborating with the company? Can I talk to the management regarding this?

K- Yes, we're collaborating directly with Chinese military on drones. We are very interested, very, very much. I'll come to India even fly in tomorrow. Drone is the future of the Space technology and feeding the people. Part of the part of the 10 billion contract we have signed with Chinese is rapid development into drone technology. (1:56) Send an email to info@keshe.foundation and we'll respond immediately.

Q: Okay I'll talk to the management Mr. Keshe and then I'll let ?? you know.

K- Please do. Let me explain to you what is the future of drone. The future of drone with the new technology is no motors. All these propellers you see the new versions of every

whatever is obsolete. We are introducing a new system which carries no propeller and zero cost to operate. Literally zero cost. The Chinese drones will literally evaporate all the drone technologies right across the planet. And India is a country we have not managed to break it through. If we come through the drone it'll be fantastic. You need a single system inside which positions and creates condition and everything else. Open the door, we'll be there willingly to collaborate. Thank you very much indeed. Send a message to info@keshe.foundation and we'll respond to you directly. Thank you very much.

Any other question?

Q: ... Mr. Keshe, my question is, if you have Markray shares would it be wise not to sell them for Keshe Coin? Or is it, does it make any difference whether you have one or the other?

K- As a CEO of the Markray I cannot make a comment. (1:58) But if you... I have to be very diplomatic. Concentrate on the Keshe Coins, we tell you the reason. You'll do thousand times more effect, effectiveness than the Markray Keshe .. shares. But paid in Markray shares because you're trading, don't look at the profit, the valuation brings it to attention of the world leaders. This is the difference, we have to find a balance. Keshe Coins gives us a lot of operation to bring it up. Markray shares, when you, the more you deal in it at a higher value pushes up to come into the level of the, what you call it, effective operation. That's the difference. And Markray shares will go crazy very soon, you will see it. Don't forget three months ago, four months ago, before I take over as a CEO we shared to trade at 0.005, now it's at 11 I think this morning and this will go to one or two dollars in the next few weeks or months. It should go, according to what is to be, and what is sitting there.

But it doesn't make any difference because we haven't bought the Markray shares to sell. Markray shares are set up for world peace and you will understand the reason of it. It has to reach dollar, two dollar, three dollars in the next few months. And it's a limited amount of shares. So, don't look at it upward, I made a profit. Use that profit to be part of the bigger structure to create that position. (2:00) And the Coins is the backbone of all the works we've done for world peace. We need, we desperately need 1 to 2 million dollars next 2 or 3 weeks to complete our operations. And then, Keshe Foundation is free to work. The situation in China has brought us this position and we have to take advantage of it.

Any other question?

Q: ... Mr. Keshe, is there anything we can do to save our Palestinian family, before it's too late?

K- We are doing a lot of work on it. You got to realize, situation in Palestine has take a worse turn with the new administration in United States. The new administration in United States, as I said before in couple of weeks ago, sees the Palestinians as a French

Riviera. And they want to bring all the hotels, casinos and prostitutes houses across it. It brings them wealth. And secondly, by moving the Palestinians and taking over the territory, the oil fields across the water will bring a lot of power to the Europeans, that they don't rely on the Middle-East on water, or oil. (2:02) But, the, what I call, stupidity, is we see the British talking to come back into EU again, because then, British Petroleum will have a lot of say in this arrangement. It's a bigger political game. But the new situation with Palestine is diabolical. What we... nothing can be done because new administration has received a 2 billion hotel resort in Saudi, and a backing of another 4 to 6 billion in Palestine. It needs to become Riviera. The Europeans enjoy the front and the slavery goes back to Palestine in the back running them. We see what's happening.

The only solution to this position with we have in Palestine is the end of the, what we said, take the love of God from the ?? father of Moses, and we have done so. Just wait for the time. Many Jews will bury their names not to be known that they are Jews. This time they do it themselves, they don't need a Hitler. Many Jews will burn their ancestry books not to have any track record of, by themselves. When you kill a man you're a murderer, when a man kills himself it's a suicide. They don't put him into jail because he already killed himself. If you kill a man they put you in jail. Why should we do that? You know when, (2:04) why people commit suicide and nobody loves them, when they are not loved by no one. And that's the ?? there . Just give it time.

Any other question?

Q: ... This is a bit strange, but has in some way time changed, it's hard to explain but it feels different. Has it got anything to do with the Sun? It's now white and it was yellow when I was a boy.

K- I think you do better speak to the guys who want to talk about the chemtrails. It could be a lot of chemtrails in there.

Any other question? Shall we call it a day?

R: I think we've pretty much covered it, yes.

K- Thank you very much for today. I hope you understood a little bit more about the future of our generation of people who try to colonize the Moon. The Moon, I'm sorry, the Mars, that they're just coming back home again. It's just getting on the taxi which is coming reverse. And I hope they won't make the same mistakes.

See you next week and I hope those of you who fly with us tomorrow have wonderful trips. One hour session starts nine o'clock tomorrow. One hour each group .. each captain gets one hour. And don't ask me where I'm going to go, because I know where I'm putting you. See if you go where I put you. (2:06) We haven't left anything, oh, Mr. Keshe is not there. We are there in a full, but this time very collective, smaller numbers and very easy package to get people moving.

Thank you very much for today and please don't forget we need huge, huge support, very urgent in the next two weeks, three weeks. And even if it goes back to lend us, we give it back to you, we have no problem. But we have to accomplish this situation very fast. Thank you very much. See you next week.

R: ...

... I'm going to play our ending music but I might not have the music part of the video, because my audio is not functioning properly right now. But I'll give it a try.

K- You can whistle your way out.

R: If it's quiet, we'll call it a minute of silence for contemplating today's workshop.
(2:08)

K- Thank you very much.

592 KSW – May 29, 2025

End
