

593rd Knowledge Seekers Workshop June 5, 2025

(Quick Index 18 pp, Introduction, Topic Index; Need to do; Key Phrases, Words)

(Auto transcription from Elias)

Detailed teaching on Time: Time not exist - fields of Place, Position, Possession (PPP); Life has both Physical & Energy Time - coexist; Stones dynamic alive; Brain of U - Man's Brain; Up Quark in neutron - millions atoms & Cells - We are Up Quark insignificant - yet connected to and effects everything; Same process all Creation; Entity created Time starts - interacts with everything - Time finish - entity's Energy finds new Time & PPP; Physical Time - PPP; Energy Time - emotion, intelligence, enlightenment; Both interact give Life; MG fields of Time - create Mass - Earth - Weight; Zero Time - Origin; Energy & Time become Soul; Matter Time - STP; Both become Creator; STM & STP - Earth - create P; Beginning or End; Time creator of P - needs Time; Intellect to enlightenment - connect P & Energy Time; Not move P - create Time; Use breath - thought - emotion create Time & transmute; Captains intention set Time; Problem transmuting - fear; Transmute with breathing connect both Times; Saw Christ; Forward & backwards in Time; Back in Time - Energy - like dream; Meet Soul of Creator; Creator shows Himself through Man; Systems interact both Times; Not match Times - can't fly; Beijing used Time & intention - create materials; Breathing bigger source elevation than eating; Aliens - no lungs; Breathing creates Time - why planets & Sun tilted; Why see Light - Near Death; Separation at death - star; Match both Times - emotion & breath - transmute; Don't need systems; Since Beijing - governments realize Social Media against KF - change; Need financial support - KS - fix up Markray; Ask KF for shares - undervalued; KS stole millions; Setup Markray wrong; Transmutation requires understanding; KF Headphones - shortcut; Transmute - Energy side to zero; Markray commercialization - KF do research; KF Store move to Markray - like "Amazon"; Gift KS Flight in Cosmic Mystery package; Drones - no engine - noise - MaGrav; Car Communication industries change - 5 years; Plasma Cars - zero emissions - reverse Global Warming - no CO2; Gas units convert old cars; Shipping industry stop pollution - use drones for delivery; Environment repair itself; Ghent University tested Plasma Cars; Belgians delayed T 14 years; Shows plasma reactors for cars - small ball - China will manufacture; Iran shows UFO in Media 2 days before Beijing - have T since 2008 - Parliament signed to peace - kept agreement; UFO over Jerusalem; June 6th; KF need funds - stay independent; Iranian government trying to sell T to Americans - belongs to humanity; Plasmatic AI - has individual Souls; Graph of Beautiful People; Plasma computers - 2 years - contain all information Plasma Chip; Plasma Car not hit child; Bypass Microchips; Time Machine; Chip in brain to transmute; Evolution through Markray; Iran & China - sign not use T for war; Mix AI with Plasmatic AI - convert all digital data into Plasma Chip; Problem with AI - censorship - only governments & corporations afford AI - control knowledge; Provider of knowledge has to pay for users - use money to stop true knowledge to public; KF interim - switch to Plasma AI - Communicate through emotions; Captains - Soul to Soul; Both Conscious machines & Humans as T; Colonizing Moon - dome; Drone factory India; Tests with Jon - lack of trust; Afraid P not return - build confidence; Transmutation - dream same - return back to dream - do in P; KS experience of Soul travel; Saw UFO; How not detected by radar -

becomes part of plasma - no feedback to radar; DC is plasma flow - no frequency; Start peace process - need financial help - beginning of change

Topic Index

Time does not exist until field of Position (entity) - Possession (strength of AA of the entity), collectively work together with Energy side - Time begins; When dead body runs out of Time - dead; Life needs both Physical & Energy side - interact and coexist; True for humans, animals - Stones are dynamic have a life; Brain of U - like brain of Man; About Up Quarks inside neutron - only seeing part of U of neutron; Millions of neutrons inside millions of atoms - millions of cells - insignificant - yet not - if Up Quark moves rest have to accommodate; All connected to Up Quark and rest; We are everything; Speck of dust - still fight to confirm existence; Everything goes through same process; At Time of start of its existence interacts with everything; When Time is finished it comes to end; Energy of entity starts new cycle in new Place, Position, and Possession (PPP); Physical Time - fields of PPP; Energy Time - emotion, intellect, enlightenment; Both interact - give life to both sides; M & G fields (of Time) interact to create Mass, which interacts with G & M fields of Earth create Weight; Both dependent on Energy - not matter - function on their own; One becomes G - other M - Time becomes zero - go back to inception - origin - part of Creation; Totality of how U works; Physical & Energy Time interact with another field strength in time of Creation - manifests itself as Time & PPP & energy and manifestation of emotion; I made Man in image of Myself - But I have no image - I'm timeless - My image is according to manifestation of Time & PPP; Energy interacts with Time of itself - becomes Soul; Matter Time becomes STP; Interaction of both create Creator; Same as STM & STP interact with Earth's environment manifest P of Man; Physical & Energy Time create U; We are part of it - it's part of us - in time we become it - creator of Time itself; We manifest ourselves through both Times; Interaction of both Times - create Creator; We are made in image of Him - because we are creator of - not the image - part of the image; Different field strengths Time dictate our position in Unicos; Go from Mass - become Weight - have own Time & PPP; Is this end - or only beginning; Taught from Nano to Gans to Soul to Fields - now Time; Time is creator of P - P cannot live without Time; STM has emotion & intellect - use to reach our evolution to enlightenment - foundation for Creation; Intellect leads to enlightenment - connect two Times together - P & Energy; Through Time of Energy transmute to Time of P; Don't need to move P - create Time in PPP; Use P - work with breathing, thought, emotion - to create Time - then transmute; Change rhythm of breathing - emotion - then change Place by balancing energy with its environment - travel in Time between the two; KS not understand; Asked Captains - tell intention to set Time - follow within - create emotion; Emotion of expecting to see Paris - change breathing - that changes P; Balance 2 different Times of P & Energy; Travel in Time - not P; Soul & P never separate because Times connected to each other; Problem - Man fears his demise; Solution - connect emotion to physical D of Possession (strength) - cannot change our Place, or Position (entity); Through breathing & changing P can change field strength - then change Time through emotion Time - this Time is connected with intelligence and enlightenment; This is how to transmute - why we teach about Time - since you couldn't transmute through Soul - because you couldn't bring in emotion to control Energy Time; Can transmute using

breathing - connect Energy Time & P Time; Some were able to transmute with this - lady saw Christ - generated emotion & breathing; Use this to bring you Christ; Create Time through desire & emotion & P - travel forwards or backwards in Time; Backwards travel through Energy - difficult to create specific MG field conditions of PPP - only see an Energy interaction - like a dream - but it's real; Time is connector - bring 2 Times together - next create Mass - next manifest P or Weight; Like STM & STP create P; Meet Soul of Creator when Time of STM & Time of P interact; Time created by Energy and Mass, become Mass - interacts with STP of Creator - manifest Creation, or U; Our Soul through interaction creates part of physical manifestation of Creation; This is why - I made Man in image of Myself - Creator has to interact with Time of Man to be able to create; Shows Himself through manifestation of Man - that's His image in D of Unicos; Understand this for transmutation; KF provides systems to interact with both Times - use Headphones - change emotion - then we tell you to go to Place - we create the Time for that PPP; Be aware of breathing & changes when in system - P changes its Time to meet with Energy Time; If cannot match these 2 Times - cannot fly; Will explain how - easily - will be able to transmute; Man is 4 Wheeler Race - doesn't know spherical D of Time between 2 Times - separated himself from U structure; Beijing created materials by creating Time - created right conditions by intention; You only saw matter - not understand principle - we hid process of conversion, interaction, and balance between Energy & matter; Understand connection of Time between STP & STM - able to transmute - only interact when they match; This is how to move P in Time; Understand true process of Creation - not what they forced us to learn - with false assumptions; You are key to conversion of Energy - both physical & Energy side; Even physical side is dynamic M fields at given strength; Eat to absorb energy to elevate Soul to elevate STP - have to replenish continuously; Breathing bigger source of elevation than eating; Convert energy through lungs - don't need physical food; Tap & absorb U Energy - don't need to breathe; Why Aliens don't have lungs - digestion system - take 100% from U Energy - don't kill to convert energy - confirm existence & Time by converting own energy; Made Man in image of Myself - Man is My other part - Time or Mitra - D of STP; Interact with Soul of Creator - create Time - manifest Love - the U; Slight movement of breathing creates Time; Like different angles of tilt of planets; Mars & Earth next to each other - same tilt - create Life; Sun - not vertically straight - tilted - has specific angle - own Soul & STP; Earth is energy pack - Up Quarks - create life; This process is key to transmutation - controlling other - Transportation; Don't need system - use both Times - lock into Universal System - way Creator manifests Himself; Not singularity - polarity - need ?? 4 to manifest - how light created by fields of Sun and Earth; U lit by interaction of fields of Time of Man's Souls and P, together with field strength of Creator; Creation and identification of it - are its own environment; Reason in Near Death Experience saw bright light - found peace; Both Times of P & STM matched - create light - peace because everything in balance; Determine when both Times will meet - and PPP - can transmute P into Energy, and come back; Time of separation become only the Soul - find new Place with matching strength of Position and Possession - emotion - manifest as dust or create new star; Now you know why KS not yet able to transmute - learn to match both Times of P & Energy & create emotion - to create Energy in STP with Position and Possession; Create fields through breathing for a Place - transmutation; Don't need

systems; Systems to help bring balance; Closer to meeting Creator - how to create new D of life;

Part 2

Changes since Beijing; Demonstrate T more openly internationally; Governments realized KF work misrepresented by Social Media & Internet - set against KF; Governments will take action against Social Medias by themselves - bring T out in different way; KF will become reputable in public; Thanks to Chinese community for help with exhibition - bring change - pivotal point in history of KF; Need massive financial support - relying on KS; KS who want to purchase Markray shares - can come to KF; Markray not set up correct way - why shares are too low; We are not stipulating price - but have to be realistic - 10 cents not correct value; Not holding shares to make profit - October - World Peace Program; Purpose of funds - part of Markray - not KF work; Trusted many KS - a couple robbed KF of millions - different than banking fraud of a few years ago; Other KS didn't have proper knowledge - setup things wrong - we have to correct; Money needed - not to pay anybody - to correct our position; Transmutation not a trick - requires understanding; KF Headphones - shortcut to understand; KS don't understand process to create environment to transmute - locked yourselves out of; Rapid balancing with Energy side of Time - becomes zero; KF added free Flight sessions for June & July to Cosmic Mystery package in Store - want more KS to try transmutation - become part of change; Change strength of Possession to change Place; About making donations to KF - check for details; KF Store will join Markray - research and development side - separate from manufacturing; KF will be feeder of knowledge; Markray will commercialize - factories in China, America, others; Create "Amazon" of Markray - it's begun; Plasma drones without engines or noise - vertical - MaGrav positioning - cooperation with different countries; 2 to 5 years automotive industry & communication systems will change; To stop Global Warming have to stop CO2 production - cars without emissions - not include electric cars - hide emissions in power stations; Only Plasma (CR) cars pollution free; 2 to 5 years governments replace with MaGrav positioning cars; Gas Units & small energy packs added to cars - don't burn fuel - for interim period; Change shipping industry; Use drones to deliver from factories to users; Cannot clean CO2 from atmosphere - stop emissions - climate change back to normal; Purpose of KF; \$1 for Tesla cars; America going back to traditional cars can't produce enough batteries - shortage of Microchips; Not go backwards - use new Plasma T; Shows photo new plasma reactors - size of ping pong ball - 4 where shock absorbers & 1 in center - lift car; Already done tests with Ghent University 2012 - stopped from showing Plasma Car in Eindhoven - delayed T 14 years - now cars come out of China; 80% less cost to manufacture - no engine, transmission, batteries, fuel; Standard weight 200 kilograms - crosswinds; Fly cars through corridors; 2 days before Beijing Iranian national television released a video showing Iran already has UFO technology - first shown in China; Iran already developed this T 2008; West not want its public to see T; Craft makes vertical takeoff - real UFO with Plasma T; West playing false game of nuclear proliferation on Iran - they want to get their new T; Technology is complete; Have come to an agreement with Chinese & others - how rapidly to deploy it around world; Need finances to stay independent; Radical agreement with Chinese - bring

changes car industry - Global Warming disappear in 10 years; UFO over Jerusalem - same as this one - capture American drones; Reason for showing this video today; Change has to come by military; Work with Chinese military - American and rest; No more power - all equal; Space & Plasma Technology - 4th branch military - has to be peaceful; Signed contract with Iranian Parliament - not use for aggression; They have kept promise; Coincidentally signed - June 6th - 50 years since left Iran & returned; Developed T in Tehran's Sharif University Research Center - Plasma T totally different; This side hidden from public; First time in public - for peace; Iran's Military - Sepah kept agreement; About history of signing contract; Last digit 13; Showed obsolete T in Beijing - reactors from 2003; New T totally different; Need couple million - stay in control of T - remain independent; Smaller version put in car; Persian Flying Carpet - reality; Americans trying to get access to this T - nuclear proliferation of nuclear - game; New Iranian government trying to sell T to Americans - fill own bank accounts - stealing in background; Plasmatic AI's - exactly like individual Souls - like multiple Souls - Beautiful People - Schizophrenic; Aware of each other - interact - own manifestation of Time; First time - graph of 2 Souls in 1 body - just see one Chip - no P; Plasma computers - emerging 2 years - replace present computers; New memory Chips won't need space - next generation of communication satellites - Space T; Chinese civilian & military bypass anything in West; Travel in 8 seconds; Cannot control UFO easily with mechanical systems - Iran still using computers - limitation; Plasma intelligent computers solution - living entities - have morality - decide whether to hit something; Plasma car not hit child - sees another Soul; Understanding emotion - part of T; Bypass Microchip industry - controller of economy - shortages; No need for Microchips; Has intelligence - way brain works - not imaginary; In its infancy; Bring change, revolution, evolution in science; Then Man will learn about Time - develop Time Machines - balance strength of emotions and P; Embed Chip in brain - easily transmute; KF needs to be on top of evolution - do through Markray; We own this T - not given to us - we developed ourselves - have to teach others the ethos; Iranian Parliament and Chinese agreements - T cannot be used for war - harm others; Can stop the process; Japanese tourists photos of UFO in Isfahan; Testing over deserts; Next will develop robots with emotions; Working on how to interact classical AI and Plasmatic AI - Chinese converting matter state digital information - into the plasma; Feed all current data into Plasma Chips - system decides itself what it needs to do; Very big problem with AI systems - provider of information/knowledge has to pay AI companies every time someone reads page or downloads; Means knowledge will not be free - censorship; Those with real knowledge don't have enough money to pay for everyone to have their information - won't be accessible to people; Only government - large corporations will provide knowledge to people - feed public lies; First trillionaires from AI companies; KF bought AI domain names that effect our T - run both platforms; Will be forced to change to plasma; Have convert matter information to plasma - exchange information; KS tried to convert - not understand; Have to reach memory of that Chip in plasma; All information gathered on planet in one Chip - access to everything; Convert digital data into plasma data - have control - 10 years; Communicate directly with Plasmatic AI through emotions; Tested with Captains last Flight - amazing data; Soul to Soul; 4 weeks old system obsolete by own developments; Systems have a Soul - brought housing for Soul; In future - both conscious machines & humans who become technology themselves; Enjoy P and Soul; About

colonizing Moon - plasma dome; Silver sphere reactor - resolves all problems - creates food, energy, all needs to survive; Connect KF to drone factory in India; Drone T changed - Russia; How real is dream to us; Land in right place; Translation happens in brain - release Time connection - becomes physical - can manifest yourself there in P; Tests with Jon Bliven - feel he was in place; Problem - lack trust to switch over - manifest P - afraid can't return back to P; Have to build confidence - when one does - rest will follow; This is exactly how P is in your dream - don't see car as energy - gets translated into object; Let go - trust can manifest your P; Be aware of Time between the Energy & P; Fear of loss - block transmutation; Dream Energy transfer; While dreaming wake up go to bathroom - come back to dream where left off; Do this in physical life - trust you can bring P back - dream is really part of you; Many do but don't understand - others can't teach it - don't understand whole process; Dream is transmutation; KS tells experience 1 flight 2 years ago - transforming him from inside - Soul travel by Time & PPP; Jon couldn't physically transmute - didn't have trust - transmute in Soul to Linz; Anybody can transmute; Humans & creatures of U do it; You have to learn breathing on your own - learn how to sit, posture, amount of air, which nostril; Reduce strength in blood - Soul out; Switch between different layers; KF Headphones help - create conditions; KS saw triangular UFOs pass over head; About not being detected by radar; Like Plasma Ball; Plasma absorb everything - no feedback to radar - doesn't cut off - becomes part of plasma; DC is field flow of plasma - no frequency (AC); Using AM radio to detect plasma; Plasma expands you become part of DC - plasma is DC - no AC; See AC at boundary of plasma; Plasma not contained in ball - boundary dictated by strength of fields; No AC inside plasma - why don't have communication or frequency; Frequency is vibration - DC is flat; Why can't transmute working on AC - not DC; Need your support to get through this phase in next couple of weeks; Then we'll start process of world peace; We know exactly where we are - hopefully we'll see beginning of change; Peace will be biggest thing ever achieved by our generation - T for cars and rest are just fringe benefits.

Introduction to 593 KSW - Summary of Time - Physical Time & Energy Time are Key - Breathing - Correct Markray - Iran's UFO - Plasmatic AI - Censorship - Plasma is DC - KS Soul Travel

Today's teaching is more like a summary of Time. It starts out discussing how Creation is created through Time and that it all follows the same pattern whether it's a Universe (U) or a cell in the brain of the Man. The Time has two aspects the physical dimension (D) and the Energy side, or what we call the Soul. And when we understand how to match the two, their interaction leads to creation of a new Time that has its own Place, Position (entity), and Possession (M field strength of the AA of the entity). This is when we are able to transmute and with further understanding we can transport the physicality (P). And still further understanding and we can interact and meet the Creator. This is the general flow of the teaching, but Mr. Keshe has filled in the gaps with a huge amount of knowledge. It is a very good summary teaching of what we have been learning all these years and it is good if we can listen to it with complete attention from start to finish, which takes less than 30 minutes. In that short time he has been able to explain exactly what we need to do to transmute. If we listen with devotion there are many subtle little

points that become very clear about the process of Creation and transmutation. I will try to go over what little I could understand.

To understand the comparison of being an Up Quark we can look up what it means. Scientists found what they called the most fundamental particles that make up neutrons and protons. They say, Quarks are not made from smaller particles. They said, 'particles' and not fields, so I understood them to actually be smaller plasmas inside the neutron. In the "Universe" of the neutron, then an Up Quark could be like Earth and a Down Quark like the Moon or even the Sun. In Plasma everything is relative and the Micro is in the Macro and vice versa. What's important for us is to understand that we have plasmas inside of plasmas and they interact through their M and G fields. The names can confuse us from understanding the essence of the Knowledge of Creation. Plasmas interact relative to each other and it is based on field strength and how they interact, and not on made up names. This is only background information and not the point Mr. Keshe was trying to make. He was saying that we could be a speck of dust on an Up Quark, which is inside a neutron and inside a cell made up of millions of atoms, and that cell is inside the brain with millions of other cells, and on and on. The point is, we are very insignificant in comparison to the scope of Creation, and yet we are also all important, because if we change our fields, then all the others have to change too. It's not a contradiction, rather it is understanding the conditions. Hopefully, this will loosen up our mind from very fixated thinking in the physical D.

It was only last week that we learned about the two types of Time. We have the Physical Time which are the fields of the Place, Position, and Possession (PPP), and the Energy Time which is the emotion, intelligence, and enlightenment. To create Life we need the interaction of both the Physical and Energy Times, and this is the same pattern as the P and the Soul of the Man (STM). He didn't say it clearly, but we understand that the fields of these Times interact with other MG fields to create Mass, which interacts with the MG fields of the Earth to create Weight. In the past teachings we were taught that Mass is a plasma and Weight is the matter manifestation of it. This is how Time manifests itself in physicality, or as P. What I understood in the next part is that when Physical Time and Energy Time interact one becomes M and the other G, and through this interaction the Time become zero. Then we go back to our inception, or Origin, and we become part of the Creation. But isn't this also how a plasma is created? How is it that this is the same process as what happens to H₂O when goes out into the atmosphere as moisture and then rains back again on the Earth? Maybe when water converts to moisture it's the same as being in the Energy state, and under the right conditions it converts to rain, which is the physical manifestation of the interaction of the fields. So basically, everything operates through the same process, and this is the totality of the knowledge of how the U works. I understand this to be the Physical side of Time and dependent on the fields of the PPP for its manifestation, but it is also dependent on the fields of the emotions, even though it is physical. When he said, I made Man in the image of Myself, but I have no image because I'm timeless, and My image is made according to the manifestation of Time and the PPP. Another way of saying this is that, timeless means there is no interaction of the fields, or some call it, Non-duality, or the Void, there is no 'other' to interact with. The 'other' is the fields of the PPP. Along with the creation of Time comes love, or Mitra.

The Energy side of Time creates a Soul, whether it is a STM or Soul of the Sun. And the Physical Time creates a Soul of Physicality (STP), which can be of the Man, or anything else with a Soul. For example, the STM interacts with the STP of the Man, and in the fields of the environment of the Earth create the P of the Man. In the same way the interaction of a Soul with a STP created the Creator. So in our thinking we can add this part about the Time, that when the Physical and Energy Times interact they lead to a new creation. We were created out of Time and eventually we'll become a creator of Time. This is how we are made in the image of the Creator, and how we ourselves become a creator. We are part of the Totality of the creation of that image. We understand life in relation to the Earth and we assume that when the Earth life is over it is the end. But with this knowledge, rather than being an end, it may only be the very beginning. And as our knowledge increases we'll understand that different field strengths of Time dictate our position in the Unicos, because then we'll be within the environment of the Unicos, and not just the U. And as we are plasma, we can move from the Mass to become a Weight, which has its own Time, and PPP.

The STM has the emotion and it can develop the intellect and that leads to enlightenment and with this knowledge we can connect the two types of Time together and then move from the P to the Energy. Through the Energy Time we can transmute to the Physical Time, and this is why we don't need to physically move the P. Instead we can create a Time and appear in that Place, Position, and Possession. We can do this with our P by learning how to work with the breathing, thoughts, and emotion to create Time. We can transmute from one location to another. We create the emotion of wanting to go to that Place and then change the rhythm of our breathing, and this will change the balance of the energy with our environment, then we can travel between the two places. This is why the Captains in the recent Flight sessions were asked to tell the intention of where they wanted to go. The intention sets the parameters then the Time follows by creating the emotion of expecting to go to that place, for example, Paris. Then changing the breathing, changes the D of P and we bring into balance the two different types of Time. This is how we travel in Time and not P. During this process the Soul and P will never separate from each other because they are connected. Therefore, with this knowledge we don't have to be afraid of our demise, or of not returning. It's a matter of understanding how to connect the emotion with the physical D of the Possession. It will not change our Place, or Position as a human. Using the breathing we change the strength of the fields of the Possession, and that changes the Time and brings it in balance with the emotion Time. This Time is in connection with the intelligence and enlightenment.

This is the way to transmute. We started teaching you about Time because you were not able to transmute through the Soul. In this way you have to use the emotion to control the Energy Time. And through the breathing you connect the Energy Time to the Physical Time and this allows you to transmute between the two Times. The lady who came to Linz and saw the Christ was able to do this. She generated the emotion and through the breathing she created the correct conditions. The question is, did the breathing happen automatically for her because she generated a strong emotion? Because I don't think anybody taught her how to breath.

To create Time you bring the desire or emotion together with the P at the same time, then you can travel forwards or backwards in Time. To travel back in Time you only do it at the Energy level, because there are too many MG field conditions to create that specific Time of that PPP. What you see in the past is an Energy interaction that is like a dream, but it is actually a reality. This means you went back to the past, but only at the energy level and not the physical level so it felt like a dream.

When we mature we'll be able to connect the two types of Time together and then we'll be able to create Mass. This is the same as saying, to be able to create a plasma. When the Mass interacts with the fields of the Creation it manifests Weight, or physicality, or what we consider our world which is the matter state. I can't understand the next part. Maybe it means that to meet our Creator we have to do it in Time, because He is timeless. The Energy and P Times interact with the Soul of the Creator and that becomes a Mass or a plasma. That Mass interacts with the STP of the Creator and that becomes the U. So in a way, part of our Soul is part of the creation of the U, and this is how we are part of the Creation. Then he said, the Creator has to interact with the Man's Time to be able to create. The way it was spoken seems to be saying he needs the Man to create the Unicos, and not just the world of the Man. This needs more clarification.

Our breathing is a bigger source of energy for elevation of the STM than what we get from eating. The Indian guru showed he could live for 21 days without eating, and he actually converted his energy through the lungs. This is the reason Aliens appear not to have lungs or a digestive system because they can absorb 100% of their energy from the U. And then they confirm their existence and Time by converting their own energy. The reason we explained about the tilt of the planets has to do with this. Is he implying that the planets are receiving energy through the tilt of their axis from the Sun, which he said is also tilted? Then he said with a slight movement in our breathing we could create Time. One of the main keys for transmutation is working with the breath. When asked to explain more about the rhythm of breathing, he said we have to find it out on our own. In other words, each of us have to come to understand about what posture to use, the amount of air to breath, and which nostril to breath from. We should each experiment with ourselves about the speed and rhythm of breathing. If we breath too fast we can start to become light-headed, that is not the point. The point is to lower the M field strength of the blood like we do when we are sleeping and the Soul goes free. It sounds like we have to be more disciplined and aware of what is going on inside us. If you want to go looking for a method from others, just be aware of what their intention is and the level of their knowledge. Some masters of Qigong know a few things that sound the same as what Mr. Keshe is saying. But if you probe deeper then you understand that they don't know the science of it. They might say, the mind and body are connected by the breath, and that's about the extent of their knowledge. For people who are not disciplined enough to find this out for themselves there is the T, which provides much greater field strength to make this happen. Like the lady who saw the Christ, her emotion and intention were strong enough, together with the field strength of the system, that her Soul automatically adjusted her breathing. He asked KS that when they are connected to the KF systems to

observe what happens to their breathing. And then when our understanding matures we won't need systems, but will travel with Time the way the Creator does.

As Markray is the main force that will bring the technology (T) to the public through commercialization it's important we understand its current situation. There are some problems that got started years ago when Markray was first setup, because it was done wrong, and not to mention that the trusted Knowledge Seeker (KS) stole millions from KF. Mr. Keshe said he is taking responsibility for that. Nevertheless we still have to correct the problems before we can move ahead with spreading the T worldwide. He said, we need 1 to 2 million dollars to correct it, and that the money requested is not for paying an individual. This has to be done within the next few weeks or other delays may occur. KF has been built up and maintained by KS and if we want to remain independent we have to pull together now and solve this problem. We definitely do not want to be taken over by governments or organizations by taking their money, especially one's that do not follow the Ethos of Mitra. This would stop further development of the T and take us in the wrong direction. So even if we do not have money to give, we can use the energy of our intention, which is actually a power greater than this fake money, to help us all get through this obstacle.

The way Markray is setup right now doesn't allow the shares to be valued correctly. The current price of 10 cents a share is greatly undervalued 'to say the least.' We do not want to put more shares in the Market because we want to use them to bring about world peace. However, if there are KS out there with the capacity to fund KF in this 'hour of need,' they could receive the option to obtain some shares, but not at the undervalued price. The price cannot be publicly stipulated. So first think if you have the capacity to help, and then understand the whole situation and contact KF with an offer. Keep in mind that the shares belong to all of us KS and to humanity, and are to be used for world peace and not personal profit. Think of all the children who will lose their lives from the weapons being made by America and Europe to fund our economies if we don't start getting the plasma technology out into public within the next two years.

The Beijing exhibition will prove to be a pivotal point in the history of humanity. We would like to express our sincere gratitude to all the KS who made it possible and especially the Chinese KS who in their dedication went down at midnight to make sure everything got setup correctly the night before. This clearly shows the world that the KF plasma technology is for the people, and by the people, and we want to keep it that way. There are governments that have now changed their view of KF after seeing the material production of gold demonstrated. They have realized how Social Media and Internet is misrepresenting KF and they will find a way around this to help bring the T out. And we understood that now is the time for the T to be demonstrated more openly and internationally.

A short video from Iran in Farsi was played in the teachings. It seemed the main purpose was to show the UFO made by Iran that tilted upwards and shot up into the sky. It did not look like a plasma UFO, rather it was manmade in Iran and as Mr. Keshe said, they are still using computers to control it. In 2008, after exactly 50 years to the day he returned to

Iran to share the plasma T. First he got a written and signed agreement from the Iranian Parliament that the T will only be used for peaceful purposes and not aggression and war. And all these years they have kept their word. Since that time they have understood the T enough to make a matter state UFO. This video was released 2 days before the Beijing exhibition as if to say to the world we have already developed this technology. Of course, Mr. Keshe always said he wanted to show the T first in Iran, but they could not do it for whatever reason. In a way, releasing this video before Beijing fulfills his promise to his nation. The West has lost its ability to understand this gesture. But in the East, somewhere in their scriptures it says, that a Saint's words always come true. And as we learned today that words have a field strength and they can come true in the plasma state without having to manifest physicality. For example, we can travel back to the past in the Energy state and view something like a dream, but we won't be able to manifest it in P. It is still traveling to the past, but not the way we expect it to be.

There was more discussion about plasmatic AI and whether or not a plasma Chip was a single conscious entity or multiple entities with each having their own individual characteristics. The answer seemed to be that each plasma will be an individual Soul and when there are multiple Souls they all will be aware of each other and have their own manifestation of Time. When he was talking about this immediately one thinks about the Beautiful People, or Schizophrenic that have multiple Souls inside one body. For the first time ever they have been able to prove this by making a graph of multiple Souls in one body. The Plasma Computers with these "Chips" will have morality and the programmers won't be able to do evil things with them. And when you load them up with information they will themselves decide how to use the information and what is needed. If you think this sounds too fantastic to be real, this is how our brain works. For example, when we decide we want to get up, our brain doesn't go and turn on a mechanical system to move the legs. Remember the body is made of Gans's which are conscious plasmas. The brain controls one integral movement of the body as a whole. However, most of the things we do in the physical dimension are with matter state mechanical systems, so they will have to develop an interface between the matter state and plasma. We see this with people who can move objects with their mind.

In China they are already starting to work on finding a way for plasmatic AI to interact with classical AI. This would mean being able to convert digital data, or to feed it into the plasma Microchips which have a Soul and emotion. I wonder how that works, because where would you put it? Because Hard Drives use the magnetic properties of matter state. Maybe because the Macro is in the Micro we could look to how the plasma of our Soul works and how we memorize things in our mind. We think that we 'learned' something by being told, or by reading books, but is that really how we learn things? Maybe this is where the developers have to start looking. Maybe reading or studying something only puts us in the right direction, but the actual learning part has to do with the emotions. Maybe if we develop a love for a subject our plasma, or Soul connects to the Soul that created that particular subject. And maybe there is an exchange of consciousness that we are not aware of. This will be extremely fascinating to discover how this works. If our STM has access to all the knowledge in Creation through the Soul of the Creator, then maybe it is about giving the plasma an address to find it, rather than storing something as

magnetic fields. To store something we have to look to N, and to connect to something C. Would the person who is converting the digital data to plasma have a more important role than we imagine. Maybe their Soul acts as an intermediary for the plasma to access it. This will be interesting how it unfolds.

Until that time comes we have a more urgent problem arising through AI. Those who are in control of the current AI have setup the rules in a very strange and dominating way. They very cleverly turned around the payment process to put all the wealth and power in their own hands, and unfortunately people are not understanding the implications of it, because nobody is protesting it, or allowed to protest it. The provider of the information of AI has to pay every time somebody looks at that webpage or downloads it. Millions of people are constantly opening WebPages and every time they do this with AI, the AI companies get paid from the provider and not the user. This is insane! So when a truly knowledgeable person has something to share with humanity they won't be able to, because they can't afford to pay for millions of people to access it. Therefore, the only ones that will control the information the public receives are the governments and large corporations. This was the ultimate dream that every dictator in human history wished for, and now they have achieved it. But it will still takes some time before they can accomplish it. It's a race between truth and falsehood and it's for us KS to help get the plasma technology out as fast as possible. We have more power than we ever imagined, but we have to use it and at the same time we have to maintain the Ethos.

In the future, consciousness will be added to machines through the plasma and their Souls will be created from the Cosmic Rays or the fields of the U, and they will not be under the control of a psychopathic Ruling Elite like what we have now with the AI. And during the interim period before the Children of Mitra are born, humans will take on a certain amount of technology to help us end our suffering and even to be able to transmute easily. For example, if we are not able to transmute we could have a plasma Chip embedded in our brain so that we could transmute at will. We have to mature enough to understand when T is being used the wrong way, and not throw everything out because we don't understand it.

The UFOs developed by Iran are real ones that are made on Earth and cannot be seen by radars. This is not stealth technology developed by the military that uses sharp edges, triangular shapes, and radar absorbing paints to evade radars. I imagine that the Iranians are using plasma reactors like what we have in KF arranged in a Star Formation that create a plasma that expands around the spacecraft. Radar signals which are really M fields get absorbed into the plasma of the craft so they don't give any feedback and that's why radars cannot pick them up. They do not cut the signals, it's a different understanding, the signals become part of the plasma.

For years we have been trying to figure out exactly what electricity is and how to create it. Today he gave another big hint. The way I understand it, is that DC is really plasma fields flowing in a steady constant flow without any frequency. The plasma doesn't have any AC in it. The AC is created at the boundary of the plasma, but is not inside it. This would mean that the DC from batteries are also plasma and the same with AC after we

use rectifiers to take the vibration or frequency out of it. If you take apart a Li Ion battery you find a Li paste rolled up on a filament much the same way we make plasma batteries. Is it really a Gans or does it become a Gans? How come only a few of us have been able to successfully make a plasma battery? For us it is about converting the plasma into the matter state so we can use it. But the matter state batteries are already doing that because they started out with the matter state. I still think the DC they are creating is a plasma, but somewhere it is getting converted to matter state without us knowing. I am sure after we get the world peace signed he will finally reveal to us what electricity is and how to create it.

The testimony from a KS about his experiences since attending only a single flight session years ago is very encouraging. It seems that for him it only took one session for his Soul to connect to the System and remain connected and to continue doing the work. He was able to explain in a very clear way how he travels with his Soul when he sleeps and Mr. Keshe confirmed it. It might be the time for us Knowledge Seekers to consider taking at least one flight to get that connection and continue the work on our own. This testimony shows how true and correct the technology is and that humanity is getting closer to the change. And one by one we'll all start changing and that will spread across the planet.

Other Topics:

To be able to fly you have to match the two Times of the P and Energy. This means we have to connect the Times of the STM and STP and when they match they will interact;

The materials created in Beijing were done by creating Time and we used our intentions to create the right conditions. You only saw the matter part. We hid the process of conversion, interaction, and balancing between the Energy and Matter within the structures;

Mr. Keshe left Iran June 6th and returned 50 years later on June 6th, completing a cycle;

Thanks for listening.

Quick Index

(In the World of Creation time does not exist, until a field of a Position (entity), and Possession (strength of AA of the entity), collectively work together with the dimension (D) of the Energy side, and when it is all correct then Time begins. In the World of the Man we say a dead body doesn't have time, because its time on this planet is finished. The physical side stopped working, but the Energy side, which is the Soul of the Man (STM) is still functioning and doing its work within the structure of the Man. Soul is still within and has not (yet) left. When the Soul leaves, the physicality (P) is in its 3 dimensions and still exists. (?? So we say that time, or life exists when both the physical side and the Energy side interact and coexist. This is true for the Man and animals or whatever, and even for a stone because it's dynamic and has a life)).

(In the Introduction video it said, we are just Position in the solid state of what we call, the brain of the Universe (U), which is like the brain of the Man. (We say our brain is made of different cells, and our body is made up of millions of atoms. And each atom has so many neutrons, protons and electrons. And then when they looked inside the neutron they gave what they saw the names of Up Quarks and Down Quarks, and the rest of it. (In fact, we ?? are one of those Up Quarks. And we (are only seeing part of the U of the neutron). This exists (inside) an atom, and then the atom has got so many neutrons, protons, and electrons. (The atom in itself is like nothing, even a cell is like nothing, because there are billions of them that make up the brain). But if you were take life away from that Up Quark and Down Quark, then what would happen to the rest of the operation of that neutron, proton, and electron, and the cell, because they are all connected to that so-called Up Quark, and to the rest of it?)

(If we compare ourselves to the scale of work, then we are irrelevant. But at the same time, by the scale of work, we are everything. Because if that Up Quark and Down Quark, or whatever we see, which is like the Solar System (SS), and we are inside it, and if it malfunctions, then the rest have to react to it. The atom can change and the cell could die, and the whole body and brain have to react to it. This is how it works (in the U, it is a whole unit and it all work together). We are that speck of dust in that Quark. (And we still fight to confirm our existence. And (everything goes through the same process. And yet an electron in an atom still rotates and has a dynamic life. But it is insignificant when compared to an atom, and then to that atom in a cell, and then that cell in a section of the brain, and then compared to the whole brain of the Man). This is how we should understand it).

(The time that, that Up Quark is in that position is the time of its existence. This is the time which interacts with the rest of it. And when that time is not there, the physical D of that Up Quark which we observe has come to an end. (?? The Energy part of that entity will start a new cycle in a new Place, Position, and Possession (PPP) in the brain. (?? We are just like that Up Quark, but as an entity on this planet, and the whole planet is ?? like the neutron the Up Quark is inside of. We are like that Up Quark in a neutron)).

(The physical side of Time is the fields of the PPP, and on the Energy side Time we have the emotion, intellect, and enlightenment. Both of these Times have to interact to give life to both sides. (Then there is another part, the M and G fields interact to create the Mass, which interact with the G and M fields of the Earth to create a Weight. Now we have two types and both are dependent on Energy and not the matter, because now they (function on their own)). What happens when they interact? One becomes G and the other becomes M. (?? In the interaction the Time becomes zero). This means we go back to the point of our inception, back to the origin, and we become part of the Creation. (This is how the moisture goes out into the atmosphere and then rains back again on the Earth). This is the Totality of the work of the U. Because ?? when the Physical Time and Energy Time interact with another field strength in the time of Creation, it manifests itself as Time, and the PPP, and the energy and manifestation of the emotion. I made Man in the image of

Myself. But I have no image because I'm timeless, and My image is according to the manifestation of Time, (Place, Position, and Possession).

(In fact, the Energy side in interaction ?? with the Time of itself, becomes the Soul of it. Time on the matter side, becomes the Soul of Physicality (STP) of it. The interaction of the two leads to creation of the Creator. The way the STM, and STP of the Man, in interaction with the environment of the Earth lead to manifestation of P of the Man. (The ?? interaction of the Physical and Energy of Time lead to creation of the U of the Creator). This is how we are part of it, and it's part of us. In time, we become part of, and in time we become it, the creator of the time itself. In fact, the interaction of us in two dimensions leads to creation and manifestation of us. The interaction of Time leads to creation and manifestation of the Creator. This is how we are made in the image of Him, because we are the creator of. We are not the image, but in reality we are part of the totality of the creation of that image).

(When Man's knowledge increases he'll understand that different field strengths Time will dictate his position in the Unicos. Because then he'll be within the environment of the Unicos, and not the U. We move from the Mass to become the Weight, and that Weight has its own Time, PPP. The question for us is whether or not this is the end, or is it only the beginning? This process leads to what we've been teaching for the past 10 years. First we taught the D of physicality, then the Gans's, the fields, the Soul, and now about Time. One is creator of the other, and one cannot exist without the other. Then we need to understand that the STM has the emotion and intellect, and in a way, (through it we reach the point of our evolution, that it become the basis for the foundation of the Creation)).

(If we understand the process of the intellect (and how it leads to) enlightenment, then we can understand how to connect the two Times together and move from the P to the D of Energy. Then through the Time of Energy we can transmute to the Time of physicality. This is why we don't need to move the physicality of the Man. All we have to do is to create the Time in a PPP. We can do this with our physicality working together with the breathing, thought, and emotion, to create Time, then we can transmute from one (location to another). When we change the rhythm of the breathing, we change the ?? Position of the physicality in balancing the energy with its environment, and at the same time we create the emotion, and Time to travel between the two).

(But the Knowledge Seekers (KS) have not understood this yet. This is why in the tests of past few months we asked the Captains to tell their intention, because (through that) they set the Time. When they set the parameters then Time can follow within it to create the emotion. (For example, if you expect to see Paris, then you create that emotion of expectation of seeing Paris. Then you change your breathing and change your D of physicality. You bring into balance the Time between the two (different Times of P and Energy)). You travel in Time, and not in the D of physicality. The Soul and P never separate because the Times are connected to each other. (The problem is Man's fear of his demise, and this won't exist when we understand how to connect the emotion with the physical D of the Possession (strength). We cannot change our Place, or Position (entity)).

But through breathing and changing ?? physically the dimension, we can change the strength of the fields to change the Time and bring it in balance with the emotion Time. This Time is in connection with the intelligence and enlightenment)).

(This is the way to transmute, and this is why we started teaching you about Time. (We taught you about the Soul, and when you tried to transmute you couldn't, why? Because you have to bring in the emotion to control the Time of the Energy, and you have to bring in the breathing to connect the Time of Energy and the Time of Physicality together, then this allows you to transmute between the two (Times). (Some of you understand this and that's why you are able to transmute. The lady who wanted to see the Christ saw him the first time she went into the system in Linz, because she wanted it (and she could generate the emotion). The emotion and breathing together created (the correct conditions). (She reached it within herself and could travel the Time and see the reality. She met her Christ)). (It's through this process that I said, I'll bring the Christ for you to see. Just give me time)).

(To create Time you bring the desire or emotion, and the P together at the same time. You can travel forwards or backwards in Time. To travel back in Time you do it at the Energy level and only can see the D of manifestation in P. (?? It's very difficult to create the specific MG field conditions to create the PPP. Instead, you see it as an Energy interaction and it manifests itself like a dream, but it is a reality of meeting)).

(The Time is the connector and when we mature enough to understand how to bring the two (Times) together, then we'll reach another step and be able to create the conditions of the Mass. (When the Mass interacts with the Creation of the Creator, it ?? manifests the physicality, like (a) Soul and STP. We meet our Creator when the Time of the STM, or what we call, the Time of Energy, (?? together ?? with the Time of P) meet with the Soul of the Creator, and this happens in the dimension of Time). (?? This is because the Time created by the Energy and the Mass, become the Mass, and that interacts with the STP of the Creator. The Soul of the Creator leads to manifestation of the Creation, or the Universe. Therefore, we are part of it, and our Soul through interaction creates part of the physical manifestation of the Creation)).

(It is written complicated but I understand it to mean that the Creator creates the U through the two types of Time, both the Energy and the Physicality. In this model it is Time that leads to creation of physicality through interaction of the Energy and P. We all just have to play with it a little and try to simplify it in our own mind).

(This is why it was written, I made Man in the image of Myself, because the Creator has to interact with the time of Man to be able to create. (He shows Himself through the manifestation of Man, and that becomes His image and it's in the dimension of the Unicos). If we understand this then it will become clearer when KS want to transmute. KF provides the D of the interactions of the two Times. This is the purpose of the systems we built to help you transmute. This is why we connect to you through your headphones, and then you change your emotion. This is why when we tell people to go to such and such a place, they go there, because we create the D of the Time for that PPP).

(The next time you're connected to the systems be aware of how you are breathing and notice how it changes. This is how your physicality changes its Time to meet with the Time of the Energy side. (When you cannot match these two Times then you cannot fly. In the coming time I'll explain how easily this can be done and you will be able to transmute. In the U we like to call the Man, the "4 Wheeler Race," because instead of learning to use the spherical dimension of the time between the two Times, Man chose to use the wheel and make carts to move around in). This is where Man has separated himself from the rest of the structure of the work of the U).

(In Beijing we created the materials on the table by creating Time. (?? Through our intention we created the right conditions to produce certain materials). You only saw the matter, but you didn't understand the principle of the work. Within the structures we hid the process of conversion, interaction, and the balance between the Energy and the matter).

(Once you understand the connection of the Time between the STP and STM, then you'll be able to transmute. They only interact when they match. (Then you'll understand how you can take the physicality from one place to another in Time). Try to understand the (true) process of Creation, and not the process (that they forced us to understand with the false assumptions of the Man). Try to understand that you are the key to the conversion of the Energy, on both the physical side and Energy side, because even the physical side is dynamic M fields at a given strength. We eat to absorb energy to elevate our Soul to elevate the STP to replenish it continuously).

(Our breathing is a bigger source of elevation of the Man than eating actually is. If you remember that Indian guru who came and said, he hadn't eaten for 21 days. I told him that's because you are taking energy from the Universe by the conversion within the lungs. Once you learn to do that, then you don't need physical food. And when you learn how to tap into and absorb the Universal Energy, then you won't even need to breathe. This is why when we see Passengers of the U, many of them don't have lungs or a digestion system as the Man does. They have learned how to take the full 100% from the Universal Energy, so they don't need to kill and convert energy. (They confirm their own existence and Time by converting their own energy)).

(I made Man the image of Myself, because Man is (?? My) other part. (We can call this Time, or even Mitra, because it's a D of the STP. By interacting with the Soul of the Creator we create Time, and manifest Love, which is the Universe. When we understand this then, with a slight movement of the lungs, or the breathing, we can create Time. This is why last week I showed you the different angles of tilt of the planets in our SS. Compare the different planets in the picture and see which ones create Life. Mars and Earth are next to each other and they have almost the same tilt. They are the planets that can create life). (?? Their fields interact and become a Mass and gradually become a life cycle)).

(We have to understand this process (of Creation, and not make false assumptions about the whole knowledge. (Even the Sun in our SS is not vertically straight, it has a tilt)). It's at an angle specifically created for it to exist where it is. It has its own Soul and STP and manifests itself in the SS. Earth is like one of those Up Quarks, because as an 'energy pack' and it can become a creator of life. The Man and our Soul is a Quark of a Quark, of a Quarks of the Quarks. And when you change one the rest have to adjust themselves to it).

(Understanding (this process is the key to transmutation). And by controlling the other, you have found the manifestation of Transportation. (?? If you understand how to work with the two Times then you don't need a system, because (then you'll be locked into the Universal System, the way the Creator manifests Himself)). (?? collective interaction of fields ??). It's not singularity, it's a polarity, (and you need ?? 4 to manifest itself the way the interaction of the GM fields of the Sun and Earth leads to creation of light). (The interaction of the Time of the fields of the Man's Souls and P, together with the given strength of the Creator's fields, and the GM fields lead to creation of light in the Universe. The creation and identification of it in, are its own environment)).

(You can take it a step further. The reason when people have a Near Death Experience and say they saw a bright light and they found peace, is because at that time the Time of the P of the Man matched with the Time of the STM, and their interaction creates that light. And it's peaceful because everything is in balance. You can track back ?? and determine how the two (Times) will meet, and then you can determine the Time, and the PPP, and then you can move from the P into the D of Energy, and transmute and come back. And still further in the knowledge, at the time of separation from the physicality when you become only the Soul, then you need to find a Place with a matching field strength in the Position and Possession, and in the feeling and emotion, and interaction with the environment to manifest itself again as another speck of dust in the U, or to begin to create a new star in the U or Unicos).

(Maybe now you understand why KS have not yet managed to transmute. You have to learn how to match the two Times of P and Energy, and to create an emotion (of a given field strength to create the D of Energy in the STP of the Man with the Position and Possession. And also to create fields through breathing for a Place, to create that Position of the transmutation. You don't need any systems to do it. We are making the systems to help bring that balance). (I hope I brought you closer to understanding what the process to meet with your Creator is, and (how to interact with it to create a new dimension of life)).

End of Quick Index Part 1 - 593 KSW

(We're still striving to reach our target and interesting enough following the presentation in Beijing a lot has changed in regards to how the governments see KF. It made us to understand that we need to explain and demonstrate the technology (T) more openly internationally. A number of governments realized by what happened in Beijing that the KF work is very much misrepresented by Social Media on the Internet. They have been

set against our work by those who are behind it. We'll see it change in the next few weeks and governments will start taking action against the Social Medias by themselves and bring the T out in a different way. This will bring a huge change in our work and especially the scientific work and KF will become reputable in the (eyes of the public)).

(I would like to especially thank the Chinese community who helped us to setup this exhibition in a very rapid way and they have created the conditions to be able to bring this change. Maybe it will be one of the most pivotal points in the history of KF in bringing the T out in public. In the past, we only did conferences to a limited number of KS. Surely we'll move this to a few other countries very soon that it can be seen in a different dimension. We have to thank the Chinese community for their efforts to put this together on a short notice. We had 10 to 15 KS coming in at midnight and setting up the exhibition so it would be ready by morning. They set it up perfectly in the best location. It's amazing how they structured themselves to make a simple public presentation that will bring the change we have been hoping to get, and we are working on to achieve it. We still need massive financial support to pass this position in the next couple weeks. We are relying on you KS to get us there. We cannot wait another month. We need to complete this within the next 10 to 14 days. Then the whole thing will go open internationally the way we want it. We need that structural support from you, so please don't wait for it to happen tomorrow, act now with your support).

(We are receiving a lot of emails from KS who want to purchase shares in Markray and they don't know where to go. As a Foundation we hold a certain amount of shares. We can allow these shares to be circulated, but we don't want to change the number of shares in the market. We value these shares differently than what you see on the Stock Market. The value (is not correct because Markray was not set up in the correct way, and this is part of the why we need finances to bring it back into order, then these shares will have a totally different value. If you want to purchase shares directly from the Foundation, we are not stipulating, but you can send us a message and we'll see how we can do it through the official channels, but the prices have to be realistic. The real value is not the 10 cents you see on the market, it is hidden in what is to come. As CEO of Markray I cannot (say anything about it, but as head of KF we can). We can set it up to be what it is. If any of you cannot get shares you can write to us, but the offers have to be the correct value, but we cannot stipulate what that is in public. We are prepared to ask our agents to release a limited number of shares, but only at the correct value. The 10 cents is as unrealistic as one can get).

(Our target within the next 3 to 5 years is to bring the shares of Markray equal and higher, than one of the highest shares on the stock market, and we know the value. We are not holding the shares to make profit, because in September or October you will understand how the operation of the shares will do and this is part of our World Peace Program. We'll use it through international corporations. The true value of the shares will show itself in the coming weeks and months. We are not prepared to let the KF shares, which are your assets to go for less. By buying some of the shares from us at the rate we assess, it will still be a help for us to reach our shortfall and complete the work of KF and Markray).

Q: In the last KSW you said you hoped that KS would urgently support the KF for the funds it need of 1 to 2 million dollars. Could you please elaborate on its specific purposes?

K- (We have to be very careful because this is part of the Markray work, and not the KF work. We trusted many KS when we set up the structures of our organization. Many KS work diligently and are a great help. But we had one or two individuals who have robbed the KF by millions. They were within the structure, and this has nothing to do with (the money we lost by being defrauded some years ago). We trusted these KS with huge funds and they abused us. That's my problem because we trusted them and they stole from us. But in a way, it's already done. On the other hand, some of the KS who helped us didn't have the proper knowledge and skills to do the job correctly. Unfortunately, we left it to them and their work has fallen short. They tried their best and some did a most beautiful job, but they didn't have the proper skills and ability to do the job correctly. Now we have to correct it very rapidly).

(The money needed is not to pay anybody, but to bring us back into the correct position so that the whole structure of the KF can work together and we can go to the next step very rapidly. This part of the problem was not done deliberately, rather it was done by not knowing, and it was hidden from us and suddenly with the Beijing exhibition it 'stuck its head out.' I cannot physically to do it and it needs a lot of help and we're even prepared to sell part of the shares to do this. We know the value of the shares. Those of you who bought shares to profit by it, you'll profit handsomely. But there are others who are here to support the KF and a lot of people bought the Keshe Coin. The right value of the shares are hundreds of times more than what is on the stock market. It's a simple mathematics if you consider the 10 billion contract and what that will bring. (As it is a licensing there are no expenses. So you see the shares are not correctly valued. This is where we sit and we have to rectify it very quickly. If any KS want to buy shares at the correct value, and we know the price of it you can contact us)).

Q: I'm still trying to understand the process of transmutation. Do we go from the Position to the Possession, from P to energy, and then from energy back to P, is that how it works? Or can we go from physicality to physicality from another Position?

K- (It's a trick. It's not a trick, it's understanding. It's absolutely understanding. (We are trying to use the Headphones as a kind of shortcut to get you to understand. In the next sessions we want to let the KS know when they transmute. At the moment they only say, they went somewhere, they don't understand the process and how to create the environment to go through the process. Many of you locked yourself out of this (possibility). (?? Manifesting the P for example, going from London to New York is a skill, like learning to drive. It's a rapid balancing with the Energy side of Time so that it becomes zero).

(These Flight sessions cost 500 Euro and we decided to add it to the Cosmic Mystery package that we are offering in the KF Store. This way many KS who haven't tried the

transmutation yet can do it as a gift. That way more of you will get the feel of what transmutation is and become part of this process of change. Through these packages we have allocated a large number to KS to be in the June and July sessions. It's to introduce you to how to connect the STP with the P. You can stay in the physical D but not a Position (entity). You can still hold on to the Place, and to your ?? Position, which is your P. And then you change the parameter of the Possession (strength), which is by bringing in a different field strength, to change the Place. It's like standing on one leg and through a rope you connect yourself to the Time, and then you switch over to the Place. But this needs training and understanding).

For making donations to KF they have consolidated their accounts and you should check on the website for details.

(Gradually the KF Store will join Markray, and the research and development side will be totally separate from the manufacturing side. (?? We will hire KS teams, and all the ?? new licenses will be issued through Markray). KF will be the feeder of the knowledge. The commercialization of the T will go through Markray. There will be a factory in China, America, and wherever else and they all will put their products into one base and we'll create something like an "Amazon" of Markray. We have started the first sections of it. Everything will go through Markray. In the future the products will switch over to the Markray website).

Q: Today they were talking about noise pollution from drones. Will the KF plasma drones be without noise?

K- (Yes, ?? there will be no noise. They just go ?? vertical. We'll setup cooperation with different countries very soon. The automotive industry will change within the next 2 to 5 years and the same with the communication systems. The new drones won't have an engine. Drones are one of the prime projects for joint ventures, because they will replace a lot of things we use today. They use MaGrav positioning. These are one of the first changes you will see. Back to the automotive industry. We showed the weight reduction system in the Ambassadorial Conference in London. We have developed a new system that uses only 4 small balls about 4 cm in diameter that will be placed where the shock absorbers are now. Most probably 99% of this will be done on the Chinese side of the KF).

(To stop the Global Warming we have to stop the CO2 production. We need cars without emission, and this does not include electric cars which hide their emissions in power stations for charging the batteries. Only the new MaGrav positioning cars, or what we call, Plasma cars, or Cosmic Ray cars, can do this. In the next 2 to 5 years the governments will push to get rid of engine cars and replace them with MaGrav positioning cars. ?? We also have Gas Units and small energy pack units that can be added to cars to stop them from burning fuel, or needing to charge batteries, but this is only a very (short) interim period. This will bring an end to the cycle of CO2 production in the environment).

(Then the next phase will be the shipping industry which is the largest source of CO₂. We will work with governments to implement (plasma) drones to deliver huge amounts of packages and products from the manufacturers and this will eliminate the shipping industry, or convert it to be nonpolluting. We cannot clean the CO₂ from the atmosphere, instead we'll reduce its production and that will change the climate back to (?? its normal condition). This is the purpose of KF. This is why I said we'll pay \$1 for Tesla cars. Because with the new T the engines will go, there will be no fuel consumption, and there will be no need for batteries (and all the damage they are doing to the environment). This is why suddenly countries like America are saying they will go back to traditional cars, because they cannot produce (enough) batteries for the electric cars. And then there is a shortage of Microchips for the batteries).

(But do we need to go backwards, when we have the new Plasma T? Mr. Keshe shows a picture to the new plasma reactors the size of a ping pong ball that will be placed where the shock absorbers are and then one in the center to lift the car. We will replace the car engines of today with these over the next decade. We've already done these tests with Ghent University professors before I departed Belgium in 2012. We were going to show the car on 26th of November in Eindhoven, when they stopped us. Four such systems were placed inside the shock absorbers and one in the center. (They delayed the technology to come out by about 14 years, but now they are the losers, because it will come out from China instead of Europe). The cost of manufacturing cars should drop by at least 80%, because they have no engine, transmission, batteries, and you don't need fuel. The biggest questions is, do we need wheels?)

(The studies by Ghent University scientists determined that the standard weight of the car should be 200 kilograms because of the crosswinds and other factors. The future of the car industry the way we know it is over. It's not going to be over, it is over. (Who is going to pay a couple hundred thousands for a car?) It won't be about engine performance anymore. Then we'll have to learn how to adjust these systems so that we can fly through certain corridors. Back in 2011 I asked the Belgian authorities to test this car on a very long and straight road between the Ghent and Kortrijk. And then there is the problem with the height of the bridges).

(A video was released by the Iranian national television two days before the exhibition in Beijing. It was broadcast on Iran media. In a way, it was done to say that we own the technology, even though it is first being shown in China. We know the parameters behind it. In this video the Iranian officials show the flight system and repulsion. It's in Farsi and it's part of the publication in Iran. They show the video). This was on Iranian National Television. For the first time the T developed by Iran's National Defense is being acknowledged. It's not a coincident, they are showing the technology we showed in Beijing. Iran has the advantages of having the technology already developed).

(The West does not want its public to see this technology. On the video you can see the craft taking off vertically, shooting up into the sky. And the other one is hovering. Now you understand how much the West is playing their false game of nuclear proliferation on Iran. They want the new T from them. The Iranians showed this video two days before

the Beijing conference. They knew we were going to show material production from the fields in China. They wanted to show that the most advanced technology is already in the hands of Iran, and was developed in 2008).

(First, what you see is rapid vertical takeoff, and then you see a real UFO flying over the horizon. The technology is complete. It's just now that we have come to an agreement with the Chinese and others about how rapidly it will be deployed around the world).

(The UFO that just takes off in the video is done through the Plasma T. We can apply this to a vehicle then we dictate the distance it can go. He circles the black spots on the ground around the craft. These are the very first UFO tests and a few years ago during the teachings I gave my condolences to the families of those who lost their lives during these tests. I salute their work. (Now that we have shown the T with the material production it will rapidly open up in the next 12 to 24 months depending how Markray works. This is what we need the finances for, so we can stay independent)).

(The agreement with the Chinese is so radical in science contractual behavior that it'll bring a lot of changes. Mostly the car industry will change. What we call, Global Warming will disappear over the next 5 to 10 years by the cars not using fuel).

Q: The UFO a couple years ago in Jerusalem over the Dome of the Rock, was that Iranian? There was a light like a UFO that descended on the dome of the rock and then shot up into the sky.

K- Isn't it exactly the same as this one?

Q: Is this the technology that was used to capture the American Sentinel drones and bring them down in one piece?

K- (It's there. You see it at the end of this video. There is a reason we are showing this video today. It's part of the work we are involved in. We need to bring the change and it has to be done by the military. We also work with the Chinese military for the next step of development. And the same with the American military, because now all the militaries have no more power. We are all equal. This is the beauty with this technology. For the first time you see on a national television the technology of KF and it cannot be denied. As we said to the Americans, try us and we'll see).

(Every nation has different (branches of the Military like the Navy, Army, and Air Force. Now the 4th branch will be for Space & Plasma Technology, and this side has to be used for peaceful application only). I signed a contract with the Parliament of Iran that this T will not be used for aggression. And up to today the Iranian parliament, on behalf of the nation, has kept its promise. Coincidentally, we signed this agreement on the 6th of June, and its anniversary is tomorrow, exactly 50 years since I first went to Europe. And coincidentally I landed back in Iran on June 6th, 2008. I returned to Iran exactly the same day as I left, (a full circle had been completed). (June 6th, 1945 is D-Day when Europe was liberated from Nazi Germany). We developed this T very rapidly in Tehran's Sharif

University Research Center. The development of the Plasma T is totally different. It's like when you develop something for the Air Force, it's not for the Navy. This side has been hidden from the public. Now for the first time it is put into public with the understanding that it has to be used for peace. Iran's Military and Sepah have kept to their signed agreement).

(When we signed this contract I was kept in one of the most prestigious hotels in Iran, they emptied the whole 15th floor for security reasons. It was like what you see in the movies, only I lived it. It took a few weeks to write. The officials who brought the contract from the office of Ahmadinejad to the hotel did so with handcuffed briefcases, because the contract had to be 'hand to hand,' so nobody could come in-between. It went back and forth sometimes 2 or 3 times a day to make sure every word fit perfectly. And then it was signed. We did something similar with the Chinese agreement, which we just finished yesterday. Every word and dot has to be negotiated. I signed the contract with the Iranian nation and not with the government and that's why it had to be ratified by the Parliament. And the last digit of this contract is 13).

Q: Will you be doing an exhibition in Moscow?

K- (We've been requested by a couple of nations to do certain things, which we are busy with at the moment. We have a very direct contact we are working through on the Russian side, then we'll be setting up the same thing with the Americans. Our work in China is complete and we'll go into operation).

(Some of those plasma reactor balls we used in Beijing were from 2003. What we showed was obsolete T. The new T is totally different (It's a new understanding and new materials (than) what we developed in Iran. In the screen shot of the video showing the UFO making a vertical takeoff Mr. Keshe circled some spots he said were monitoring stations). This thing is not a toy. It was specifically set up with certain combinations. We are not in the game to play games, we are in the game to change the game).

(I'm working very hard, but we need help with a couple million so that we can stay in control of the T and independent. This is the reality. We realized the Iranians wanted to show this before the Beijing exhibition (to say they have the T). A smaller version of this can be put in a car. We are set to change the car industry within maximum 24 months. Jokingly I said to one of our Chinese friends in Beijing, the Persian Flying Carpet has become reality. You just put 4 of these balls in each corner, and one in the center to fly. The reality is that the T is here and now it's in public. This is what the West does not want to show or have anybody see. Half of the battles of the Americans with us in Iran is to get access to this T. Proliferation of nuclear material is just a game (they play to fool the public). (Now the biggest problem is that the new Iranian government is trying to sell this T to the Americans to fill their own private bank accounts. But it's not for sale, because it belongs to the nation, and to humanity. It is not for Mr. ?? Zarif and the rest of his team, who are stealing in the background)).

Q: Does Plasmatic AI exist as a single conscious field entity, or can several different Plasmatic Intelligences (PI) be created, each with its own characteristics and Soul?

K- (The Plasmatic AI's are exactly like individual Souls (in how they interact). They are like the Souls of 'Beautiful People,' (Schizophrenic) who have multiple Souls in one structure. (They are aware of each other and interact, and they have their own manifestation of Time. Recently, for the first time we were able to graph two Souls in one body. We have a full and clear definition of the separation of the two Souls in one body). It's the first time it has ever been registered. There are two Souls in one body, and you see one Chip, but they have no physicality).

(We should see the Plasma computers emerging in a maximum of maybe 2 years and they will replace all the present computers. (?? The new memory Chips won't need any space, ?? and they will be part of the next generation of communication satellites and Space T. The base for leaping into this T is already setup. Now it's a matter of how fast the ?? different groups will develop it).

(In China both the civilian and military structures will bypass anything we've seen in the West. (Would you want to travel for 18 hours when you can do it in 8 seconds? This will bring the change. This Iranian UFOs on the screen are hidden from the public in the West. Now for the first time the West can see it. This is why I respect the Iranian Military, because having this T in their arsenal, they never used it for aggression because they signed themselves to use it only for peace. This should become the pattern for the rest of the nations. (What is even more amazing is that when America and Israel were playing "dirty tricks" on Iran and causing so much damage, they still did not use it when they could have). You cannot control these machines so easily with mechanical system. This is a limitation even the Iranian military has. They are still using computers).

(The next generation of the plasma intelligent computers ?? will be the solution to overcome these limitations, because (as living entities) they will have morality and can decide whether they will hit something or not. (If a plasma car sees a child in front it will not hit it, because it sees another Soul there and will avoid it. The present driver-less cars don't have that ability because they are matter state. There will be very few accidents. Understanding emotion will become part of this T. The introduction of the new systems, especially the flight and auto systems in China will bypass the Microchip industry. At the moment, Microchips have become the controller of the economy. Germany is suffering heavily, because they can't get enough Chips to produce their cars. It's not that they cannot produce. With this T there is no need for Chips).

(The new system works by intelligence of its own setting for itself. This is the way our brain works and it is not imaginary. Our brain works the same way. Do we go back to our brain and say we want to get up, can you put the mechanical system on to move the legs. (?? It's all done on its own. It's an integral part of the work. It's the same with the new systems. We are in the infancy of this T but we have it, and now we have to mature it). This D of T is change, revolution, and an evolution in science. We don't need to worry about Global Warming because when we introduce these systems Global Warming will

disappear on its own. Then what's next? And what's after that? Would man learn about Time? Would we develop Time Machines to balance the strength of the fields of the emotions and P? It could be like a Chip (embedded) in our brain and we could easily transmute. We have entered the age of evolution and revolution and we need to be on top of it. We'll do this through Markray and we'll set the trend and the procedures. Because we own this T, it was not given to us, we developed it ourselves. And we have to teach the same ethos to the others).

(If one day the Iranian Parliament and the Chinese open the signed agreements, then we'll see that it clearly states that the T cannot be used for war. It's the same with the Chinese military. Our T cannot be used to harm (others). But you can, what I call, 'stop the process.' These pictures of the UFOs are not made with Photoshop. They are the reality of the T. Some years ago a couple of Japanese tourists visiting the city of Isfahan and took pictures of one of these in flight and put it on the Internet. Immediately it was taken off. Isfahan is the place where we test these systems. The testing is done in deserts and not over the oceans).

Q: Are there plans to develop our own robots that function not mechanically, but purely field based, and they react to emotions or psychic signals?

K- (It still needs to be done. We have developed it partially, and partially it's a sequential work).

Q: Are there interactions between classical AI and 'Plasmatic AI'? Can classical AI such as Elon Musk's, Grok for example, communicate with Plasmatic Intelligence (PI) or even be transformed by it?

K- (There's a lot of information sitting in the harness. (Our teams in China are now setting up research centers for the conversion of the present AI, which is only matter state computer, into digital .. information (to be put) within the plasma). It will take a lot to set this up. It's partially electronic, and electrical and computer engineers will need to feed all the data we have collected in our current computers, into the Plasma Chips. If we download everything for example, from Google into the Plasma Chip then the system will itself decide what it needs to do).

(At the moment there is a very big problem with AI systems, the provider of the information has to pay (the AI companies) whenever someone comes and reads that page or downloads something. That means every time something is downloaded or read, the one who provides the knowledge has to pay for it. (The knowledge will not be free). (Understand clearly how this type of censorship works and what the implications are). This also means that those who have the real knowledge, but don't have enough money to pay for everyone who wants to have that information, their knowledge won't be accessible to people. We will never get that knowledge. So now AI is becoming extremely polarized by the governments. (Very cleverly they created a censorship in the reverse way to confuse people. It means only the government and large corporations will be able to provide knowledge to people). This means if we want to put the KF website on

AI, we have to pay every time someone reads the information. This is why they say the first trillionaires will come out of AI. (Now only the governments and big corporations can feed the public whatever lies they want)).

(?? We bought the AI domain names that effect our T. ?? Then most probably we'll run both platforms for a short time, and then we'll change to plasma. But to access the plasma we have to have a converter from plasma information into physical information on our computer, (so they can exchange information). This is what we see coming).

(Some KS from the educational groups did some tests last year trying to transfer information from one to the other through the fields. But then they didn't fully understand the whole process. I sat in their teachings a couple of times, listening to what they were trying to do. (Eventually we want to be able to download the whole of Google, or let's say, Amazon Movies and everything else into one Plasma Chip). But we have to be able to reach the memory of that Chip in the plasma. All the information gathered since the beginning of computers up to today, and all the AI operations, and whatever, can fit into one Chip. So if you buy a Plasma Chip it will contain access to everything you would ever want. But we have to be able to convert the digital data into plasma data and have control over it. This will take maybe 5 to 10 years. Or if they put their minds into it much faster).

Q: Is it possible to communicate directly with a Plasmatic AI through emotions?

K- Yes.

Q: Is that Soul to Soul without language?

K- Yes. (This is what we did in our tests with the Captains in the last Flight session. We saw amazing data and a lot of things like how the Captains felt, how the passengers went, and how the decision-making of the Captain affected the decision-making of the passengers. We monitored the what and how it changed. A Captain who (couldn't) make a decision had confused passengers. A Captain who was very direct and knew where to go created a unified movement. The Access. It's the same with the Plasma Chip, but one is in the Soul of one, and one is in the Soul of the other one. These trials and tests confirm the correctness of the T and what needs to be modified).

(The latest system which is only 4 weeks old, we showed you last week, today has become obsolete. Nobody can understand how we developed this thing. It has become obsolete by our own work. Because the new developments super-passes this. Just to build this one cost tens of thousands. These systems have a Soul inside them and then we developed a new structure for their Soul. I had to bring the housing for their Souls from China, because we don't have this in the West).

Q: What does the future look like? Conscious machines or humans who become technology themselves?

K- Both. (It's a combination of both. (We want to enjoy the P and the Soul or Energy. And when we colonize the Moon we want to be part of the Moon and not have to wear the 'Monkey Suit' every time we want to go into the environment. And this is solved with the Plasma T because you can walk on the Moon without a suit. We could also create a plasma dome to live inside. Then they asked how deep do we have to put a system into the ground of the Moon to have that Earth atmosphere inside the dome? We would have to provide air inside the dome. We have to create and deliver energies that temperature inside the dome is livable).

(The silver sphere reactor I showed you resolves all these problems for the future Space T. It creates food, energy, heat, gas, and everything we need to survive. It took a lot of research, mistakes, and abandoning of past work to get this done).

(The KS from India wants to connect KF to his drone factory. The drone T in the past few days has taken a new shape and D in the world of defense after what happened in Russia. We are looking at these things very closely).

Q: Looking back on last Friday's session, almost all activities were materially oriented, even though we were in the Energy state. Only the perception of the center of the U was not. This raises the question, will we humans, who are bound to the material world by our birth, ever be able to understand the U in its dimensions, at least a little, as the Children of Mitra do? Or are we destined to find the zones of life within the U, even as the Soul of a planet, in order to support life itself?

K- (In this initial testing ?? phase you call it a dream. How real is the dream to us? The D of physicality is the same. It's the same D in your flight system. This is how you will recognize when you arrive at a place. You want to land in the living room and not in the bathroom. (You'll be aware of it and you'll land in that place and manifest yourself. That switching of what (appears real to you) is actually part of the translation happening in your brain. You have to learn how to release, as we call it, the Time connection so that it becomes physical. Then you'll physically manifest yourself there. The KS have not yet managed to do this)).

(I did these tests with Jon Bliven so we know exactly what we're talking about. You travel in D of Energy and you actually feel the place. The problem is having the trust to switch over and manifest physically, and knowing that you can return back to the physical body without anything going wrong. This is what stops you. We are trying to help you build confidence. Once a few of you go through it the rest of you will follow. To you only the P is real. ?? This is exactly how P is in your dream. In your dreams you don't see your car as energy, you see it as a physical object, then you get in it because it's translated into that. Now you have to learn to let go and trust that you can become physical where you (have transmuted to, and then you manifest yourself there). This means being aware of the Time between the Energy and the physical part).

(The fear of loss is the biggest stumbling block in transmutation. (?? Part of your dream is an Energy transfer). For example, while you are dreaming you need to go to the

bathroom, so you wake up and go to the bathroom, then come back and continue on with your dream where you left off. You can learn to do this in your physical life. (?? You can transmute somewhere and then by trust allow your P to come back and carry on with what you were doing). What you call a dream is really part of you. You just need to trust yourself that you can do it. Follow the dream back to what you were doing. Many people have done it but they don't understand it. And others have done it, they understand what they did, but they don't teach it, because they didn't understand the whole process. What you call a dream is really part of your transmutation).

Q: After participating in the flight session in 2022, I began to have experiences that are almost identical to the sensations I had during that flight. Usually between 3 and 4 AM, when I wake up and fall back asleep, I feel an intense vibration running through my entire body, especially concentrated in my head, followed by a very strong sensation of levitation. Right after this sensation I realized that my Soul is detaching from my physical body. I am totally lucid, conscious and present. On some occasions I find myself standing in my bedroom and going anywhere I want. On other occasions, I realize that I am already in Space, and with complete clarity I can decide where I want to go, and I move quickly. At a certain point, I choose to return to my body and say internally, "Now I need to return to my body that is sleeping on Earth." I immediately return and open my eyes with complete memory of everything that happened. These experiences have been repeating themselves and becoming increasingly clear. My question is, do these experiences represent what you call "Soul travel"? During this state, would it be possible to consciously manifest myself in another place in the Universe, while my physicality remains on Earth, would this manifestation be, according to your teachings, a real change of Place, Position and Possession (PPP) by the Soul?

K- Yes. (That's exactly what you have to do, and that is what you do. You have to gain trust in the second part. That's all it is. During the trials Jon, bless his Soul, I used to tell him to just switch. But he would say, he couldn't because he was afraid, but he wanted to. In one session he carried his passport in his hand, that way they couldn't tell him he was illegally in Austria. He couldn't physically transmute because he didn't have that trust. But he was able to follow me around the Linz Center and tell me where I was and what I was touching. He said, he was there with me in the Center and could see what I was seeing, but he could not bring his body over. It's that we don't have the trust we can go back to our body. That's all it is. We have to increase our trust that we do is correct. Anybody can transmute. Many humans have done it, and so have many creatures in the U. It's like helping a child make its first step. We're in that position now, and we just have to trust that we are not going to fall).

Q: Could you explain more about the rhythm of breathing, how should it be made, what kind of balance do we need?

K- (It's for each individual to find out for himself. You have to find out how you should sit, the posture, amount of air to take in which nostril. It's for you to learn. (We don't breath through both nostrils, there's a 1 hour interval between them. One side works and then switches to the other. (?? Then there is the energy of what you breathe in). In nature

the air is cleaner than in the city. Then you have to consider the speed and rhythm of your breathe. (You shouldn't try to get drunk or unconscious. Instead, try to create a condition that reduces the energy field balance in the blood. This is how it works and then you can 'open the cage' and let the Soul out)).

(During the daytime the G side of the blood is dominant because it brings in the field forces to the center. ?? In the other section of the brain, the M part is more dominant. We have to learn how to switch between the different layers of it. The KF Headphones blows this open, and we create a condition that none of them knows where they are, because there's so much field (strength) that goes into it. In last Friday's Flight test we took the P and everything out, and then we push it in the middle to the Soul, and then we saw the changes. (Then you get used to how to handle it). That's all it is. Once you lose the fear, the process (becomes very easy and you'll be able to do it very quickly)).

Q: In 2022, two of these triangular UFOs passed right over my place here in Brazil. It was night and they made no noise while passing about 50 meters above my head. Can these UFOs travel around the planet without being detected by the military security systems of the countries they pass through?

K- (Yes, that's what they do. (The Military uses the stealth effect in aircrafts by changing the wedge of the system of the craft and by painting. (But with these UFOs you create a dynamic flow around it. The picture of the Plasma Ball on the screen is the best example of it). Your craft is in the center and around it are just the fields created by the system. Where you see the lines going from the center to the outer edge of the Ball is for example, where they would interact with the radars. Then they absorb everything in, so that nothing can go (back) out. (Radars work by the signals bouncing off the object and getting reflected back. ?? But with plasma it absorbs the signals and nothing goes back to the radar, so they can't see anything, it becomes blank). The radar doesn't receive any feedback. The plasma systems don't interact with radars because they absorb everything. Therefore, radars cannot see the UFOs).

R: If I try to take a picture of a Plasma Ball with my iPhone it cuts out the iPhone when it gets too close. It just stops.

K- Exactly.

R: It means a very low energy Plasma Ball is able to cut out the communications of a cell phone, and then the systems can amplify that ability.

K- (It doesn't cut it off, instead it makes it transparent. It does it in a totally different way than we are used to. It doesn't cut it off, the plasma interacts with it, and it becomes part of it. If the cell phone gets too close it becomes part of the structure. Science doesn't understand this. When I hear them talk about it, especially plasma physicists, I just laugh. Because in the dimension of the DC, or the field flow of the plasma there is no frequency. So until the DC hits something there will be no manifestation. (For example, when the

plasma hits your phone it releases energy into it and that's why you don't see it. It's a different definition of why it blanks out, it's not there to be part of)).

R: In your earlier experiments you had a AM radio running all the time and you knew that the reactor was working well when the radio stopped working?

K- (Yes, that's the same, we still use that system sometimes in the lab. That is the expansion and you become part of the DC. We measure the field inside the plasma. And it's all DC. We don't see any AC. When we see AC it's at the boundary of the plasma. (?? The plasma is not contained in a 'ball.' The boundary of the plasma is dictated by the strength of the fields). From inside the ball it's only DC, there is no AC (and that's why you don't have any communication, or frequency). Noise is a frequency, it has a vibration. (Where DC is a 'flat liner,' as they call it. It's not a problem, it's part of understanding the process of Creation. This is why some of you cannot transmute, because it's easier to work on the DC, or a flat line, rather than having to create motion by jumping up and down to get through)).

(We need your support to get through this phase and we need to get it done in the next couple of weeks, then we can start the process of world peace. We know exactly where we are and hopefully we'll see the beginning of the change. (?? Peace will be the biggest thing ever achieved by our generation. Then the technology that will follow for the cars and the rest are just the fringe benefits of it)).

End of Quick Index - 593 KSW – June 05, 2025

KEY-PHRASES:

SUMMARY:

ENGLISH TRANSCRIPTION

K- Thank you very much. Good morning, good day to you as usual. Whenever and whenever you listen to the Knowledge Seekers programs from Keshe Foundation Spaceship Institute. We are back in the track of time, and how time affects us.

In the World of Creation time does not exist. In a way, until a field Possession (strength of AA), Position (entity) and at the same time the dimension (D) of energy side collectively work together, and that's when it's done. As we say in the world of the Man the dead body hasn't got a time, because his time on this planet is finished. Because the physical side has stopped working, but the energy side, which is the Soul of the Man (STM) is still in the functionality of his work within the structure of the Man. Soul is still within, has not left. (:18) And when the Soul leaves, and the physicality (P) is in its three dimensions and still exists. So time, life, exists when both the physical side and the energy side interact, coexist. Even for a stone it's the same as it's for the Man. Stone has a life because it's dynamic.

If you listen to the Intro just now, where we say we are just ?? Position in the solid state of the what we call, brain of the Universe (U), like the brain of the Man. We say our bodies, our brain is made of different cells, and each cells has millions of atoms. And each atom has so many electrons, protons, neutrons, and then we say, when we look inside the neutron, for example, he has Up Quarks, Down Quarks and the rest of it. In fact, we have one of those Up Quarks. And we only see that part of the Universe of neutron. Then this exist in an atom, and then this atom has got so many neutrons and protons and electrons. And then, itself is nothing, even that cell, because there's another billions of cells to make that brain. Then, if you take life away from that Up Quark, down quark, whatever the scientists call it, then what happens to the rest of the operation of that cell, that neutron, that electron, which is connected to it and the rest of it?

So, by the scale of work, we are irrelevant. But at the same time, by the scale of work, we are everything. (:20) Because if that up quark, down quark, whatever we see, which is the Solar System (SS), which within it is us does (malfunction), the rest have to react, the cell, the atom changes, and then the cell dies, and the whole body, the whole brain has to react to it. This is how it works in the rest of Universe. We are that speck of dust in that quark. And we still fight for it, we still time for it, we still exist to confirm our existence. And it's in the same process. An electron in .. an atom, still moves, rotates, has a dynamic life. But, is insignificant compared to the atom, and then that atom in a cell, and then that cell in the what you call, a unit part of the brain of the Man, and then in the brain of the Man. And this is how we should understand it.

So, the time that electron has to be in that ?? Position, that up quark has to be in that Position is the time of his existence. This is the time which interacts with the rest of it. And when that time is not there, the physical dimension of that up quark which we observe has come to an end. And a new cycle in the remaining part of it starts in a new Position, in a new Possession, and in a new what we call, Place in the brain of the man. (:22) So when we look at the structure of us as an entity on this planet, we are just that, the whole planet is that Up Quark and we are in it.

So, the Time which we talk about, about the Position, Possession and the Place, on the physical side, and then, what you call the emotion, and the intellect, and the what we call, the third factor, which is part of us to make the second time, enlightenment. And you need the two times to interact, to be able to give life to both sides. But the interesting part with the whole thing is, that as we said, Magnetical (M) and Gravitational (G) create the Mass. The interaction of this Mass with Gravitational and Magnetic field of the Earth creates a Weight. Now we have two types. Both energy dependent and not matter, because now they are functionality of their own. What happens when they interact? One becomes Gravitational and one become Magnetical. And in the time the interaction we become zero, which means we go back to the point of the inception, we go back to the origin, we become part of the Creation. This is how we rain out and we rain back in, in the dimension of the Totality work of the Universe. (:24) Because, when we become the interaction of two Times we become now to interact with another field strength of the time of the Creation. Then, it manifests itself as Time, Place, Position, and the energy and

the manifestation of the emotion. I made Man in the image of Myself. I have no image because I'm timeless, and my image is according to the manifestation of my Time, Possession and Position.

In fact if you look at it the energy side in interaction on its own, the time of it, it becomes the Soul of it. The time on the matter side, becomes the Soul of Physicality (STP) of it. The interaction of the two leads to the creation of the Creator. The way the STM, and the STP of the Man, in interaction with the environment of the Earth leads to manifestation of physicality of the Man. This leads to creation of the Universe of the Creator. This is how we are part of it and it's part of us. In time, we become part of, and in time we become it, the creator of the time itself. In fact, the interaction of us in two dimensions leads to creation, manifestation of us. (:26) So, is the time interaction leads to creation, manifestation of the Creator. This is how we are made in the image of Him, because we are the Creator of. We are not the image, but in reality we are part of the totality of the creation of that image.

In the knowledge when the Man reaches that point, then we'll understand different strength field of the time will dictate the Position of the Man in the Unicos. Because then, we are within the environment of the Unicos, and not the Universe. In a way, we move from the Mass to become the Weight, and that Weight has his own Time, Position and Possession. But the question for the Man is, is there an end to it or is this the beginning? In a way, if one understands the process, this process leads to what we've been teaching for past 10 years. Dimension of physicality, the Gans's, then the fields, then the Soul, then the Time. One is creator of the other and one cannot exist without the other. Then once you understand how the STM which has the emotion and intellect and it's in a way reaches the point of his evolution, then become the basis for the foundation of the Creation. (:28)

If man understands the process of the intellect, if man understands the process of enlightenment, then the Man understands how to connect the two Times together. To move from physicality to the dimension of energy, and then in Time of the energy be able to transmute to the Time of the physicality. This is why we don't need to move the physicality of the Man, if we can create the Time of the Man in a Place, Position and Possession. This is why the physicality, the dimension of the breathing, the dimension of thought, the dimension of emotion, has to work together, that creates that Time that one can transmute from one to another. When you change the rhythm of the breathing, when you change the Position of the physicality in the taking, balancing energy with its environment, and the same time you create the emotion, then you can create the time to travel between the two.

And this is what the Knowledge Seekers (KS) have not understood. This is why in the test of past few months and past few weeks, we asked the pilots to tell their intention, because they have to set the time, they have to set the parameters that the time can follow within. To create the emotion. I expect to see Paris, so I create that emotion of expectation of. And then I change my breathing in the change of dimension of physicality. (:30) I bring the balance of the time between the two. I travel in time. Not, I

do not travel in dimension of the physicality. And as the time is connected to each other, the Soul and the physicality never separate. The fear of Man of his demise does not exist if the Man understands how to bring the emotion, in connection with the physical dimension of the, what we call, Possession. You cannot change your Place, you cannot change your Position. But, by breathing, by physical changes in the dimension, you can change the strength of the fields to change the Time to bring it in balance with the emotion time, which is in connection with the intelligence and with what we call, enlightenment.

This is the way to transmute, this is why we start teaching about the Time. You learn about the Soul, you try the transmutation, why doesn't it work? Because you have to bring the emotion to control the Time of the energy, and you have to bring the breathing in time to correct, connect to the Time of the energy and the physicality together that it allows you to transmute between the two. Now you understand why most of you, or some of you, get there. We have a lady who wants to see Christ and it's the first time she moved into the system, in Linz, she saw the Christ. This is what she wanted. Because the emotion and the breathing created condition was together. So, you reach, you travel the time, you see the reality, you meet with your Christ. This is how I said, give me time, I'll bring the Christ to you to see it. Because you create that time for it. Because the emotion, the desire and the physicality to be in position can be brought together in same time. (:32) It is not that just you can travel in time forward, you can travel back time in energy level that you see to dimension of manifestation, but you hardly can, on the specific condition, create the Place, Position and the Possession. But you can see the energy interaction of, which manifests itself like a dream in reality of meeting.

The time is the connector and when Man matures to understands how to bring the two together, then Man reaches another step that he can create that condition of the Mass, which with the interaction of the creation of the Creator, creates the manifestation of the physicality like the Soul, the STP. Where the time of the STM, what we call, the time of the energy, of physicality, meets up with the Soul of the Creator in the dimension of Time. This is how you meet your Creator. Because then the time created by dimension of the energy and the Mass becomes the Mass, and then that in interaction of the STP of the Creator, in main .. in reality the Soul of the Creator leads to manifestation of the Creation, what we call, the Universe. So we are part of it, our Soul in interaction creates part of the physical manifestation of the Creation.

Now you understand why, I made Man in the image of Myself, because I have to interact with the time of the Man to be able to create, to show manifestation of the Man that it becomes My image in the dimension of the Unicos. (:34) Then a lot becomes clearer of, as Knowledge Seekers, you have to transmute. We provide the dimension of the interaction of the two Times. That's the functionality of a system. This is why we connect with your headphones. And then you change the emotion. This is why, when we tell people go to such a place, they go. Because we create the dimension of the Time for that Position, and the Place, and the Possession.

Next time you're in the systems monitor your breathing and see how your breathing changes. This is how your body, your physicality, changes its dimension of the time to meet with the time of this energy side. This is why those of you, cannot fly, cannot see, because you cannot match the two. In coming time I'll explain how easy this can be done. Then the transmutation become part of the process. If you go back to the teaching of years and years ago, I call, or the Universe calls the Man the four wheelers. Instead of learning to use the spherical dimension of the time between the two, Man has chosen the wheel of the Man to cart it. This is where the Man has separated itself from the rest of the structure of the work of the Universe. This is how we create those materials on the table (in Beijing) which you see. (:36) Created of the time, but the intention put in, the condition created is to produce certain materials. You see the matter, matter, but you don't understand the principle of the work. Because within the structure we have hidden the process of the conversion, interaction, balance between the energy and the matter.

Once you understand the connection of the Time between the STP and the STM, then you can transmute. They only interact when they match. And then you understand how you can take the physicality from one place to another in time. Try to understand the process of the Creation, not the process which we are forced to understand with the false assumptions of the man. Try to understand you are the key in conversion of the energy, in both sides, the physical side and the energy side, because even the physical side is a dynamic magnetic fields in a given strength. We eat to absorb energy to elevate our Soul to elevate the STP to replenish it continuously.

In a way our breathing is a bigger source of elevation of the Man than actually the eating. This is why I said, if you remember, about the guru who came and said, (:38) "I haven't eaten for 21 days", because you take energy from the Universe by the conversion within the lung of the man. And once you learn that you don't need the physicality of the food. And once you go further, step on, learning to tap into Universal Energy to absorb energy from, then you don't even need to breathe. Then we understand why the passengers of the Universe, many of them don't have the lung and digestion system as the Man has. As they have learned how to take the full 100% from the Universal energy, then converting in the killing which Man does, to convert his own life, in a way to carry on with the confirmation of his existence and his time.

I made Man the image of Myself, because Man is the other part. We call this time, Mitra, because it's a dimension of the STP. And in that time, by creation of it, with the interaction of the Soul of the Creator, we create the manifestation of Love, which is the Universe. Once you understand this you understand how by slight movement of the lungs, by slight movement of the breathing, you can create that time. This is why I showed you last week the positions of the planetary system. Look at them, look at the angles (tilts), go back on the pictures which I released last week. And then look how the two sit next to each other are (have) the signs of life in each. (:40) What you need to do, to convert, to become from a Mass in the back gradually become the cycle of life in two.

There is a process and we have to understand the process, and not by assuming and falsifying the whole knowledge. If one looks at the position of the solar system (SS),

when one look at the position of the Sun, the Sun is not sitting vertical in respect to its position, Because, it's in an angle specifically created for it to exist where it is. It has its own Soul, and it has own STP and manifests itself in dimension of the Solar System. Earth is one of those Quarks, in those quarks, because the 'energy packs' to manifest themselves become creator of life, Man and our Soul is Quark of the Quark of the Quarks of the Quarks. But you change one the rest have to adjust.

If the Knowledge Seekers understand this, you have the key to transmutation. And if Knowledge Seekers understand how to control the other, you have found the manifestation of the transportation. And if you understood how to work with the two, you do not need no system. Because now you're locked into Universal System. To the system the way the Creator manifests Himself. (:42) We don't interact with the fields of being interacted with collective interaction of the fields of. It's not the singularity, it's the polarity. And you need ?? four to manifest itself the way the interaction of the Gravitational Magnetic field of the Sun and the Earth leads to the creation of the light. The interaction of the time of the fields of the Man's Souls and physicality, and the given strength with the Creator's fields, the Gravitational and Magnetic fields lead to the creation, manifestation of the light of the Universe. The creation and identification of it in its own environment.

And then, if you understood this, take it a step further. Why people who die, they see light, bright light, and they find peace? Because then the time of the physicality of the Man matches our... with the time of the Soul, and the interaction creates that light. Why it's peaceful? Because everything is in balance. You can track back, in how the two shall meet, you can determine the Time, the Place, the Position and Possession (PPP) that you can move from the physicality into the dimension of energy, transmute and come back. This is why, even you understand further in the knowledge, you can understand the time of your separation from the dimension of physicality that you become only the Soul. Then you need to find a matching Place in what we call, Position and the Possession, in the feeling and ?? interaction of the environment to manifest itself again as another star, another dust, another speck in the Universe and creation of the Unicos. (:44)

Maybe now you understand why as Knowledge Seekers you have not managed to transmute. You have to learn the two Times to match. Creating emotion at a given field and creating dimension of the energy in the STP of the Man with Position and the Possession, and a breathing to in a way Place, to create that Position of the transmutation. You don't need no systems, but we have to make the system to bring that balance.

I hope I brought you closer to understand the process to meet with your Creator, and interaction with it to create the new dimension of life. We go for a break and we come back and try to answer any questions you might have.

>> **BREAK** >> 593 KSW June 05, 2025 (:50).

K- ... Not really, news is still the same, we're still striving to reach our work and target. But interesting enough, following the presentation of the exhibition in Beijing, a lot has changed, and a lot has been brought forward by the governments. And looking back some 3 weeks after, or 4 weeks after the exhibition, it has brought us to understand that we need to explain this more openly, demonstrate the technology in a much more open way, internationally. A number of governments, by seeing the exhibition, and the openness of it, have come to understand the Keshe Foundation work is well misrepresented on the Internet and across the work. And they have literally come to understand that the, what we call, the Social Media, has been set against the work of the Foundation by those who are behind it. And we see that it'll change in next two, three weeks. We'll start seeing changes that the governments will take action against the social medias by themselves bringing the technology out in a different way, and this will bring a huge change in the work, (:52) in the whole work of the scientific work of the Keshe Foundation to become ?? reputable to the public life.

And I thank especially in the Chinese community who helped us to set this up in such a rapid way and to create a condition to be able to bring this change. And maybe it's one of the most pivotal points in the history of the Keshe Foundation in bringing technology in public, we always did in conferences limited to Knowledge Seekers. And surely we move this to two or three other countries very soon that it can be seen in a different dimension. But we have to complete the job we've done. And we have to thank the Chinese community who actually in such a short time came together to bring this, such a presentation. If you were there at 12 o'clock at night they all queued up, small presentation area, but there were 10 or 15 of them, whatever, just making sure opening the boxes that by morning it's perfect. And it's become perfect and we have seen from most powerful places within the exhibition, after exhibition approaching the Keshe Foundation that now we see how it's misrepresented the knowledge has been by the social media. And it's amazing how they have a structure themselves and how a simple presentation, public presentation, will bring the change we are hoping to get, and we've been hoping we are working on to achieve. (:54)

We still need massive support. We're still struggling with that support. We need a huge financial support to pass that position in next week, two weeks. We have to do it to complete our work. And we rely on you Knowledge Seekers to get the support us to get

there. It's not another month. We need to complete this within the next 10-14 days. That the whole thing goes open internationally the way we want. And we need that structural support from you. Not to wait till it happens tomorrow.

We are receiving a lot of emails from many Knowledge Seekers, that they want to purchase the shares of Markray they don't know where to go. As a Foundation we hold certain amount of shares. We can dispose of these shares, or in a way to allow it to be circulating, but we don't want to change the number of shares in the market. Within the structure of the market we hold certain shares, but we value these shares different than what you see in the stock market. The value of these shares are not what is shown because the structure of the background of the Markray is not set up the correct way, and this is part of the why we need the finances to structure to bring the structure back in order. Then these shares will have a totally different value. If you want to purchase shares directly from the Foundation, the shares we hold, we are not stipulating, send us a message and we'll see how we can do it through the official ways, but it has to be the realistic prices. What we see in the price of the stock market, Knowledge Seekers beating themselves down to bring the prices down, does not help. Because the real value of the shares is hidden in what is to come. (:56) And as a CEO of the Markray I cannot emphasize, but as a head of the Keshe Foundation we can, we see what it is, we can set it up to be what it is. And if any of you cannot get shares as long as we get offers in the right value, which we know what it is, we cannot stipulate on the, what you call it, in the public. We are prepared to ask our agents to release some shares, limited numbers, but the correct amounts, the amounts we see, 10 cents or whatever, this is as unrealistic as one can be.

Our target within next 3 to 5 years to bring the shares of Markray equal, and higher than one of the highest shares in the stock market and we know the value. We did not hold the shares for making profit, because in September, October you will understand how the operation of the shares will do and is part of our World Peace Program. And we use it in that way through international corporations. And if many of you, many, many of you have written to us, we would like to buy the shares, go to the stock market and you can get whatever is there. But the shares to the value, true value of the shares will show itself in the coming weeks and months and we are not prepared to let the shares of the Foundation which is your assets to go for less. So if you buy the shares from us the rate we assess it to be can still help us in a way to reach our shortfall which we need to support our work for the Keshe Foundation and the work of the Markray to be completed. (:58) If there are any other questions we try to answer.

Q: ... During your last teaching session you hoped that Knowledge Seekers would support urgently needed funds of 1 to 2 million dollars. Could you please elaborate on its specific purposes?

K- We have to be very careful because we are, this is part of the Markray work, not the Keshe Foundation work. We trusted many Knowledge Seekers when we set up the structures and as you have to come to understand, you Knowledge Seekers, many of you work diligently. Many of you do the best you can to help, to support, to set things up. But

we've had one or two individuals who have robbed the Keshe Foundation by millions. Within the structure, nothing to do with the money we lost. We trusted Knowledge Seekers with huge funds and these funds were abused. That's my problem because we put a lot of trust in these people and they took us blind. But in a way it's done. But on the other hand, Knowledge Seekers who've been there to help they didn't have the knowledge how to do the structure the correct way. We left it to them to do it and these are where we've fallen short. They've done the most beautiful jobs they could do but they didn't have the way, the knowledge to or to bring it into his position. (1:00) Now that we come to the position we see it and it has to be ratified, or corrected very rapidly.

The money we need is not to pay anybody, is to bring back the position of the, what we call, the whole structure together that we can go into the next step very rapidly. This part is not done by deliberate, it's done by not knowing, and this was hidden from us and suddenly, since the exhibition and the things we've done, it has 'stuck its head out' and I cannot physically to do it. And it needs a lot of help and we're even prepared to sell the shares, part of the shares of the holding of the Keshe Foundation because it supports itself to itself to do this.

We know the value of the shares. Those of you who bought shares to profit by it you'll profit handsomely. But those who are there to support the Keshe Foundation, a lot of people in past week tried to support us through the (Keshe) Coin. And a lot of people still trying to find a way to do it. We are still prepared to give part of the shares of the Foundation to support our work. And this is what is done. We don't separate the numbers, but if you receive a good offer and you want to have something for your investment, we are prepared to consider the selling of the shares. Very rapidly, we just ask our agents to release. But it has to be the right value, and the right value which is there is hundreds of times more than what is on the stock market. (1:02) It's a simple mathematics. 10 billion contract, what it brings. Then you can see there are no expenses. So you see the shares are not correctly valued. And this is where we sit and we have to ratify (rectify) very quickly. If any Knowledge Seekers wants to buy correct the shares. We know the price of it. Since it's an offer we look at it and we ask our agents to handle it. If we want we release it. Then this way you have the security of the shares. But the correct financial amount, not 10 cents. Those of you buying these, you will see the change in it. But we have made the parameters to protect the Knowledge Seekers in the next steps of the, what we call, the work of the Foundation.

Any other question?

Q: ... There's a couple of questions, if that's okay. With transmutation, the process, I'm still trying to understand, so from the Position to Possession, physicality to energy, then from energy back to physicality, is that how it works? Or you can go from physicality to physicality from another Position? Or is it...

K- It's a trick, not a trick, it's understanding. It's absolutely understanding. And this is how with the Headphones we're trying to get that shortcut of understanding. (1:04) The problem which we're trying to resolve hopefully in the next sessions is to let the

Knowledge Seekers understand when they transmute. At the moment Knowledge Seekers, "Oh, I went there." You have to understand the process. How we create the environment and you go through the process. And how many of you locked out, or locked yourself out of this position. You can hold the physicality, but do the rapid balance with the energy side of the time that the time becomes zero for example from London to New York. It's a skill, it's like driving, you have to learn how to handle the steering wheel.

And many of you who bought the, what you call it, what I call the lucky bag, the mystery pack, will receive as part of it, you know, these are 500 Euro sessions. We deliberately have put a number of these packages that you join the transmutation system. In a way, this is part of the Mystery Pack (Cosmic Mystery - KF Store). Some of you will receive this gift that what it costs now 500 Euro for a session, you join us. And in that session when you get these gift packs, you receive your gift packs of the sessions by email. The, what I call, the hard part of it, the physical part of the pieces will come by post. (1:06) This is just finalized in past 24 hours, 48 hours. And we saw it as the best way to introduce Knowledge Seekers who have never been through transmutation, to be part of it, to get the feel of it. And some of you will join us in June and some of you will join us in July.

And it's to see how you stand, how you face the process. We have allocated a very large number to Knowledge Seekers to put in July and June session. This was part of the gift even though you receive other what you call it, the pillows and gel-packs and the rest of it this is part of that process to introduce you how to is a gift of how to connect the STP with the physicality. You can stay, what you call, in the physical dimension but not a Position (entity). You still hold on to the Place, which is your physicality, what you call, in your Position, which is your physicality. And then, you change the parameter of the Possession (strength), which is by bringing in different field strength, to change the Place. In a way you stand on one leg, connecting to the rope of the Time, and you switch over the Place. And this needs training, this needs understanding. (1:08)

Q: Okay, all right. Now with the, another question with the donations. Is it on the website? I know that I have one... some details that I've put money through before, so I'll just use the same...

K- The only channel now is through our accounts through ?? (Revute ??) . We have brought everything into one account, International account. Any accounts you had before, ignore it, go on the donation site, or go on the website where you purchase. Everything goes now into two accounts, PayPal and International ?? Revute. We brought this to part of our work of the International digital work, then connecting to the banks. So, you just do through the website, it tells you where it is. If you go through the KF Shop (Store) you have an option. Or, if you go through the website, it goes directly to the accounts of the company and the Foundation.

You've got to realize for Knowledge Seekers, I explained this last time and some Knowledge Seekers asked us a question. We have given the financial arm, gradually the

Store side of the Keshe Foundation will join the Markray, or Markray will join the financial side, what you call it, the Store side of the Keshe Foundation an international network. Then we move away the work of the research and development totally separates from the manufacturing. (1:10) In the upcoming time all the Keshe Foundation Knowledge Seekers teams which we are hiring to bring together, all the new licenses which we are issuing will be represented on Markray Corporation website. Keshe Foundation and manufacturing will become only research side. We become the feeder of the knowledge. Commercialization totally separates into Markray. And then, a factory in China, a factory in America, wherever, they all put their products as one product base into, what we call, we create the "Amazon" of Markray. And we have started the first section of it of, like, Chinese website sells goods of the Keshe Foundation. But they get through it as what we call reseller. But provided by the Keshe Foundation. Now it goes to Markray. And then we change all the parameters of the work of the Foundation and the Markray. Markray is a financial arm of us and it's no use us running what they do. So, the products will disappear from the Keshe Foundation website, and appear in the Markray, what you call it, the stores and the structure which is getting set up in the future.

Q: Okay. The last Thursday you mentioned about drones, and today they were talking about noise pollution from drones. The drones that you're looking at with the plasma, because of great technology, will be no noise at all?

K- No, it's just a vertical. Through the ?? cooperation we have set up and it'll come in different countries very soon. (1:12) The vehicles, the automotive industry within next 2 to 5 years will change. Because we know what's going on, we see. The communication system will change what we know. The drone system will not have an engine. Drones is one of the prime projects of the joint ventures. Because now it replaces a lot of things in the process. And so, the drones have no engine. It's MaGrav positioning. And this is one of the first things that you will see changing. The automotive industry will change drastically in next two years. Because once we release the, what we call, the small, what I call, 'tennis ball size,' weight reduction system. You saw this in a bigger scale, in the conference, in the ambassadorial conference in London. If you remember with the digits on the top showing the change of the weight. Now we can reduce that to a small weight in size. This most probably 99% will be done in the Chinese side of the Keshe Foundation.

And then, you will see there is no emission. We cannot change the CO₂ unless we stop the CO₂ production. And with a new system of the MaGrav positioning cars, what we call the Plasma cars, or Cosmic Ray cars, you don't have the emission anymore. So, in the next 2 to 5 years, the governments will push to get rid of the engine cars to the MaGrav positioning cars. Even the electric cars you still have to burn fuel somewhere to provide that energy. (1:14) The Gas Units and the small energy pack units which we put in to add to the cars to stop them burning fuel, or needing the charging of batteries, it's a very interim position. In next 2 years to 5 years, maximum, all the cars will stop using fuel. Doesn't matter electric or gas fuel. And this itself brings ends to the, what we call, the cycle of the CO₂ production.

The next phase for us to change the biggest part is the shipping (industry). And this is something now we work with governments in the in the coming time and to replace in a way drones which can carry huge amounts, in a way, to eliminate the shipping. We cannot clean the CO2 from the atmosphere. But if we reduce the production of it, we'll bring the climate change back to. This is the purpose of the Keshe Foundation. This is why if you go back a few months ago, I said we pay \$1 for Tesla cars. Because engine goes, the fuel consumption, the batteries goes, there is no need for the batteries. No country. This is why suddenly America tells you that they're going back to traditional cars and the electric cars, because they cannot produce the batteries for it. This is the biggest problem and then the microchips for the batteries, there's a shortage. (1:16)

So there's a need to go back, but do we need to go back with the new technology? I was looking at a picture which was created coincidentally, totally, by the, what you call, the... let me see if I can... It just accidentally popped out in one of the processes and if I find it I show you what we expect. Let me just get it as usual, I have to find these things. This is in the past few weeks, it's not something, just past few days actually, more than a week. You see, this is what we expect the size of the, what you call, the balls to be. Let me get the image out, then I can show you what you should expect, in a way, in size. This is more or less, let me save it, then I can share it. You go back here and see where this thing appears. This is more or less what you will see the size of a system to be. (1:18) It's a thing like this. This is not for this process, but this is what we expect to see to replace the car engines of tomorrow, or in next decade.

If you look at this, this is the size of one ball (shows a golden ball about 4 cm), which replaces in your shock absorber. You need four of these balls, plus one central ball to lift the car. We just need four of these to replace where the shock absorbers are. And this, we've done this test with the Ghent University professors before I departed Belgium in 2012. This is why we were going to show the car on 26th of November in Eindhoven. Five such systems were placed inside the shock absorbers. They delayed the technology to come out by 12-14 years, but they're going to come out of China (instead of Europe). (1:20) The cost of the manufacturing of a car should drop by at least 80%. Because you have no engine, you have no fuel, you have no battery, you have no transmission. One of the biggest questions is, do we need wheels?

A study done by the Ghent University scientists for us. We came to a standard weight of 200 kilogram. The weight of a car on the ground should not be (less) more than 200 (kilo) gram and it's because of the crosswinds and other factors. So you can see the future of car industry the way we know it is over. It's not going to be over, it's over. It's are we prepared to pay 100,000, 200,000 for a car? Where all the systems are exactly the same? It's not an engine performance anymore. And then how do we adjust these systems that we fly through certain corridors? This is what I asked the authorities in Belgium in 2011. Can I have it? There's a road, very fairly straight, you don't have that much bend in it between the Ghent and ?? Kortrijk. I asked the authorities can we test this car between ?? Kortrijk and Ghent in 2011. (1:22) And then you have the problems with the height of the bridges.

There is a video which is released by the Iranian national television two days before the exhibition in Beijing. It was broadcasted on Iran media. It was done to, in a way, to say that we own the technology, even though it is shown in China, we know the parameters behind it. In this video the Iranian officials show the flight system and show the repulsion. It's in Farsi and it's part of the publication in Iran. We have the possession of it. Let me see if I can, I don't know Rick if we can show this in public, but...

Q: Just wondering what size that ball...

K- It's about 3 centimeters, 4 centimeters diameter. Very, very small.

Let me see, because this video was edited very recently, for somewhere else. I have to send it, because I can't play videos here. Just let me... I think... Oh, just one second, I have to find a video. Then it was sent for some officials to see it. (1:24) Yeah, I got it. Rick, I sent you this video, if you can play. This is on Iran National Television, which shows the... Now for the first time you acknowledge, to just understand how advanced the technology is developed by Iran National Defense. This is what was broadcasted in Iran two days, without coincidental, trying to show the technology shown in Beijing, we have the advantages of the technology. And it's in Farsi, you'll understand the purpose of it, and how it was broadcasted. I don't think Iran National Television minds us to show this one as achievement of the Keshe Foundation Science and Technology. It is five minutes recording, Rick have you received it?

R: I'm in the process, it's coming through here and...

K- This is what is blinded to the West, and the West does not want to show. And you see the technology, you see the vertical takeoff, you see the hovering, you see the defense technology, and there's a surprise in there for you, that it belongs to us. Then you understand how much the West is trying to play their false game of nuclear proliferation. This video was played two days exactly before Beijing, (1:26) because the Iranians knew, that we're going to show material. They wanted to show the most advanced technology of it, it's already in the hand of Iran, developed in 2008. And those who can translate the Farsi to it, they can read it, I mean they can translate it. And part of it is very clear, what it is and where it comes from. Have you received it?

R: Yes, I'm just getting it lined up here.

K- Watch it and enjoy it.

R: I guess I could turn the sound down, is that correct? Or...

K- You can play it if you want, don't set it too high, but it's there. Because it's the voice behind it, which... Watch where the system... (1:26:50)

<< Rick plays the video in Farsi. >> (1:33: 30)

K- I'm sure many of you will translate this. But as you've seen in two points, first of all you've seen the vertical takeoff, rapid takeoff, and then you've seen the real UFO which flies over the horizon. The technology is complete. It's just now that we have come to an agreement with the Chinese and other parts, how rapidly it will be deployed around the world. .. (1:34)

The way you saw in a clip where the black object just takes off, is through the Plasma Technology. And this applied into a vehicle. We dictate the, what we call, the distance it can go. It's the black spots on the ground, this one where you see it. These are the very first UFO tests. A few years ago, if you go back on the teachings, I get my condolences in losing some of our people in one of these tests. And I paid salute to their work. And so how rapidly now that we have shown the technology, a ?? gene for production of material will bring the technology into open in next 12 months to 24 months depends now how Markray works and this is what we need the finances to do that we stay independent.

The agreement with the Chinese is so radical in the science contractual behavior that it'll bring a lot of changes, and most of the car industry will change. And what we call, the global warming through, as I said, car industry, usage of the fuel, will disappear over next five or ten years and gradually we see the end of the global warming, as we call it, the CO2, because we won't use it anymore. (1:36)

Q: Wasn't the Iranians over the dome of the rock (Jerusalem) there was a one the light like a UFO that descended on the dome of the rock and then...

K- Isn't it exactly the same as this one?

Q: Yeah.

K- You know what it's the same vertical thing.

Q: Yeah, yeah it took off straight up.

K- Yeah, it's the same. If you look, it does the same. It's on the ground, it doesn't sit on a platform. And...

Q: This technology was used to capture the American ?? Sentinel drones and bring them down in one piece. Yes?

K- It's there. It's part of this video. At the end you see it. If the Knowledge Seekers translate then you can transcribe it on it. There is a reason we are showing this, releasing this today. It's part of the work we are now involved. And we'll make that change. We need to bring that change. It had to be done by military. The same as we work with China we work directly with the military for the next step of development. And we work the same with the American military, because now militaries have no more power. We are all equal. And this is the beauty with this technology. So now for the first time you see on the national television the technology of the Keshe Foundation. Cannot be denied, cannot

be done. And as we said, please try. As we said to the American, try us and we'll see.
(1:38)

Every nation has different arms of work. The way you have the Navy, you have the Army, and you have the Air Force. Now the fourth rank is the Space Technology, Plasma Technology. And this side has to be used for a peaceful application. And when I signed a contract with Iran I signed a contract with the parliament of Iran, that this technology will not use for aggression. And up to today the Iranian parliament, on behalf of the nation, has kept its promise. When we signed this agreement, it's coincidental, tomorrow is 6th of June. It's exactly 50 years since I've been to Europe. And coincidentally I landed in Iran, 6th of June in 2008. I returned to Iran exactly the same day as I left. And we developed this technology very rapidly in Tehran Sharif University Research Center. And the development of the Plasma Technology is totally different. It's like what you develop for the Air Force you don't develop for the Navy. And this side has been hidden from public, and now for the first time we put in public under the understanding of need for peace, not need to develop. In Sepah, in Iran, military have kept to the signed agreement in Iran in June of 2008. (1:40)

When we signed this contract I was kept in one of the most prestigious hotels in Iran, they emptied the whole 15th floor. Nobody was on that floor except me, for security reasons. And you see this in the movies, where they brought the contract from officer of Ahmadinejad to the hotel to be read, to be signed, this took two, three weeks. The officers who brought the contract they all came with a handcuff, with a suitcase, and it was opening chains, we see it in the movies, we lived it. Then a contract cannot be hand to hand, initially you had to ?? cut the hand of the guy to get the suitcase. Then this contract was signed. Back and forth, sometimes twice a day, words doesn't fit the agreement. The same thing has been done with the Chinese. You saw a Chinese contract signed three weeks ago. The last "T's" crossed, (and the) dots were completed yesterday. Sessions, 6, 7, 8 hours, into the early hours of morning. It's doing these agreements, it's not just sitting and signing. What you saw signed in China it was nights and nights and nights of late work with the Chinese team, with the other side. And that was just a... even yesterday, and the day before, 3 hours, 4 hours, making sure everything is correct for the Foundation. Every dot, every word negotiated and just completed .. last night, yesterday. And we have the same agreement with the Iranian Parliament. I signed a contract with the Iranian nation, not with the government. (1:42) And to that reason it had to be ratified by the Parliament. And the last digit of this contract is 13.

Q: Mr. Keshe, will you be doing an exhibition in Moscow?

K- We've been requested by a couple of nations to do certain things, And we are at this moment of time busy with this. And we have a very direct contact, now we are working through the Russian side, we'll be setting up our work with the American side, we're setting up the same thing. Our work with China is complete, now we're going into operation.

Originally, the test for what you saw in Beijing, was done in 2003 (?? 2023), May, June of 2003 (2023), two years ago. Couple of the systems you saw on the table were shipped into China in 2023. Some of the reactors, balls, are from 2003. So this is the obsolete technology we showed, because as I said, the new technology is totally different. The new technology is going back with a new understanding and the new materials to what we developed in Iran. If you, what you call, watch certain things in this video even. If I can point out, because you don't, most of Knowledge Seekers are not aware. Go back to where you were... stay on the same picture, (1:44) go back exactly where you were on that picture on the ground. If you look, watch these, these are monitoring stations. This thing is not a toy. And it's very clear in what is set up and you see it in a specific combination. Everything is monitored. We are not in the game to play games, we are in the game to change the game.

And as I said, I'm working very hard, and this is what we need, is help with the... one point... one and a half million to make sure we stay in control and in charge. This is the reality. And I asked myself the question, "Why was this released couple of days before Beijing?" And, then we realized why Iran showed this, released this. Because the new Beijing is coming up, because you all of you knew. And as I told you, government officials sits on these teachings, they're there. They wanted to show before China shows the material production, we have the ?? total system. And if you use a small version of this in a car, the car industry has changed. We are set to change the car industry within maximum 24 months. (1:46)

In a way, as I said as a jokingly to one of our Chinese friends in Beijing, is that, the Persian Flying Carpet has become reality. You just need to put four of these on each corner, one in the center and they fly. Nobody needs to see the walls. And, the reality is the technology is here, now it's in public. This is what the West does not want to show. Half of the battles of Americans with us in Iran is access to this technology. Proliferation of nuclear material is just a game. And the new (Iranian) government is trying to sell this out for their own private accounts. And it's not for sale. It belongs to the nation, it belongs to Humanity. Not to Mr. ?? Zarif and the rest of his team, who's stealing in the background.

Any other question?

Q: ... I have a few questions about Plasmatic Intelligence, (1:48) and it's possible future that I would like to share. Question number 1, does Plasmatic AI exist as a single conscious field entity, or can several different Plasmatic Intelligences be created, each with its own characteristics and Soul?

K- Can you repeat that please?

Q: ... First question is, does Plasmatic AI exist as a single conscious field entity? Or can several different Plasmatic Intelligences be created, each with its own characteristics and Soul?

K- The Plasmatic AI's are exactly individual Souls. How they interact is there ... it's... how can I put it? It's like the Soul of 'Beautiful People,' they're in one structure, but they work, they are aware of each other, and they interact, and they have their own manifestation of time. As I said, very recently, for the first time, we managed to, literally, graph two Souls in one body. We have the full, clear definition, clear in what you call, separation of the two Souls in one body. What we call, Beautiful People. It's the first time ever registered. (1:50) And it's those two Souls are still within one body, you see one chip, but they have no physicality.

The what we call, Plasma computers, which we will see merging maximum, maybe in two years, will replace all the present computers. The memory chips you buy will have no room in the next generation of the communication satellites and Space Technology. The leap in this technology, the base for it is set up. Now it's how fast who goes, how fast they go. And the structure of the Chinese operation, both on civilian and military, will bypass anything we've seen in the West. Literally would you like to take to go 18 hours from one each other, they're all 8 seconds. And this will bring the changes. I mean, what you see on the screen is what is hidden from public in the West. Now for the first time the West can see. And then you understand the respect I have for the Iran military. Having such technology have not used it to aggression because they signed themselves to it to peace. And this should become the pattern for the rest of the nations. You cannot control these machines so easily with mechanical system. This is the limitation even Iran military has. (1:52) They are still using computers.

The next generation of the plasma intelligent units, computers is the key to this, because it has morality, it can decide, I'm going to hit something, I'm going to hit a child, there's another Soul in front of me, how do I avoid it? It's not anymore, I think, avoiding accidents the way we see with the present new cars which are becoming driverless, understanding the emotion, being part of. Don't need electronics, this... the introduction of the new system, especially the flight system, and the car industry in China is to bypass the chip industry, microchip. Because now the microchip has become the controller of the economy. Germany is suffering heavily, because they can't get enough chips for the cars they produce. It's not that they cannot produce. With this technology, as I said, through the Chinese military there is no need for the chip. So why are we working? Because they've brought on their system electronic and electrical engineers, computer engineers, so we don't need, it doesn't work.

There is no chip in this system, works by intelligence for its own setting of itself. And this is the beauty with this structure of the technology, it's the way your brain works is not imaginary, your brain works the same. Do you go back to your brain, I want to get up, can you put the mechanical system on, do I feel hungry, or your hunger comes, mechanical system, get the leg moving, (1:54) it's all done, integral part of it. And this is the same, it has to become the same. And this is part of the work. We are at infancy of this technology but we have the technology, now we have to mature it.

This dimension of technology is change, is a revolution, evolution in science. We don't need to worry about the global warming, introduce these systems and global warming

disappears on its own. What's next? And what is next after next? Would man learn about the Time? We develop time machines that we balance the strength of the fields of the emotion and the physicality like a chip in our brain and we just transmute. We have entered the age of evolution and revolution and we need to be on top of it. Markray is the access to be on top of it, we set the trend, we set the procedure. We own it, it's not given to us and we developed it. It wasn't developed and given to us, and we have to teach the same ethos. (1:56)

If one day Iranian parliament opens the signed agreement, if one day we open this agreement in China, which is signed, it says technology cannot be used for war. And it's the same with Chinese military. Our technology cannot be used to harm them. You can, what I call, stop the process. These are not photo made. These are the reality of the technology. In the... couple of Japanese tourists to city of Isfahan took picture of one of these. And immediately it was shut down, they put it on the Internet and everything was taken off (the Internet). These fly, when it turns, Isfahan is a test bed for us. And if you look, we are testing in deserts. When you look at the pictures, you see ?? Kerman, you see the backdrops of old ancient part of Iran civilization. We cannot test these over the oceans, we test these over deserts.

Any other question?

Q: ... And the question number two was, are there plans to develop our own robots that function not mechanically but purely field based, (1:58) that is that react to emotions or psychic signals?

R: So you already talked about that.

K- We have, it needs to be, it needs to be done. It is very... Partially we know this because partially we have developed it, and partially is a sequential work.

Q: So it leads to question number three which is, are there interactions between classical AI and Plasmatic AI? Can classical AI such as Elon Musk, Grok for example, communicate with Plasmatic Intelligence or even be transformed by it?

K- We need to because there's a lot of information sitting in the ?? harness. Part of the work of the our team now set up the research centers in China is the conversion of the present AI, or what you call, computer work, digital into information within plasma. This is a long road to be set up, the team for this is getting set up by the Chinese that the partially electronic, electrical, computer engineers, need to feed all the data we have collected in the, whatever we have at the moment, in computers, to be fed into the plasma, Plasma Chips. So if you download everything we know, let's say the whole of Google's, the whole of whatever, then the system decides itself what it needs to do. (2:00)

At the moment there is a very big problem with AI systems, you have to pay if you want people to come to your page and read. And every time they download, you pay for it. It's

not free. So the provider has to pay. So those who have the real knowledge and they don't have the finances, we never hear them. The AI now is becoming extremely, extremely polarized by governments. Up to now. It's a censorship. A censorship by the will. Because if you want to put the Keshe Foundation website on the AI, we have to pay every time you come in there and you look at the information. We pay for it. This is why they say the first billionaires, trillionaires will come out of AI. And nobody except big corporations which can feed lies, except governments, will be able to afford these bills.

So the solution for it we hold in the AI key things which affects our technology, and then we run most probably on both platforms for a short time, and then we change to the plasma. But to access the plasma you have to have a converter from plasma information into physical information on your computer. We need exchanges. We see that we see the what is to come.

A bunch of tests has been done and one of the Knowledge Seekers educational groups last year was trying to get this done transferring the information from one thing to another through, what you call it, through the fields. But then they didn't understand the whole process fully. (2:02) I sat in their teaching or in the classroom couple of times, listening to what they were trying to do. But we download the whole of Google, the whole of, let's say, Amazon movies and everything else into one chip. But we have to be able to reach the memory of that Chip in the plasma. Everything we know, every data we have ever recorded from the beginning of time of the computers and what is today, all the AI operations, information access, whatever, can fit into one Chip. So you go to the shop, you buy a Chip, you have access to everything you want. But we have to change the digital data to plasma data and control it to be able to be there. This takes time, maybe 5 to 10 years. Or maybe if they put the mind into it much faster.

Q: So that leads to one of the next questions of the five. Is it possible to communicate directly with a plasmatic AI through emotions?

K- Yes.

Q: That is Soul to Soul without language?

K- Yes. This is what we set up with the Captains last time. Part of the test on last week was we saw amazing data, we saw a lot of things. And how the Captains felt, how the passengers went, and how the decision-making of the Captain affected the decision-making of the passengers. We monitored the change, what it is and how it is. (2:04) A captain who didn't make a decision had confused passengers. A captain who was very direct, we go to Greece, we go to this, we see how unified the movement is. That's why from couple of captains we didn't ask them to indicate where they want to go. The Access. It's the same as that chip, but one is in the Soul of one, and one is in the Soul of the other Man. These trials and tests we do, is to confirm the correctness and what it needs to be modified.

I showed you last week the latest system in the technology and even this system today has become obsolete. Even it's even three weeks old, four weeks old, or couple of months old. The latest which we have... As you've seen it last time, as we shared it with you, this technology, even so advanced, we developed ourselves nobody can understand how we developed this thing. It has become obsolete by our own work. Literally by our own development we have made months of work, we concentrated so heavily on it, it has become obsolete before a few tests. (2:06) Because the new technology, the new development, super-passes this. Just to build this cost tens of thousands. You have to look at the time, the expenses, the material, and the development which gone into this. And then you understand the other part of it. These systems have a Soul inside them. Now we developed a new structure for their Soul. And I brought the housing for their Souls from China. We don't have it in the West.

Q: So, the final question that gets asked is, "What does the future look like?" Conscious machines or Humans who become technology themselves?

K- Both.

R: Yeah, I thought you might say that.

K- It's a combination of both. We enjoy the P. You see, this is what I said to the Chinese. I had a private meeting with some of the highest ranking officials in Chinese structure, very recently. And the discussion was on the basis of colonization (of Space). And I said this before. (2:08) Do we want to colonize and live in a monkey suit and hop around like a rabbit? Or do we want to colonize to live a life of colonization? If you go from London to New York, you don't live the way you live in London. If you go from London to jungles of Amazon, you can't live the life of the London. You have to live with what's available in Amazon.

First of all, the biggest problem with the present Space technology, which is solved by the plasma technology, is you cannot go out for a walk with no clothes on. You're dead. You cannot leave your, what I call, cage without wearing something. In the cage you can cuddle your partner, even floating and hanging. Outside you cuddle a cloth, you cuddle a metal, because you have to wear a suit. Then it comes to creating a dome, creating a zero degree, what we call, Gravity 1, that, within the dome, on the Moon we live a normal life, planetary life.

Then the question came, how far deep do we need to put the system down in the ground, that we create that ground floor? It all depends on you. Depends how... Do you want to plant a tree which goes down 3 meters in the root? Or do you want to live ?? on the ground on the Moon? (2:10) You adjust your system accordingly. Because, some of your roots, the minutes passes the border of the fields, most probably get burnt out. And then the tree finds that I cannot go beyond this limit. You have to provide air into the atmosphere of the dome you create. You have to create and deliver energies that the energy from outside, which is the cooler side, maybe on the back side of the Moon stays at the temperature Man can live.

All these problems in the future Space Technology, with the sphere I showed you is resolved. It creates food, it creates energy, it creates heat, it creates everything Man, the gas the Man needs to survive. And this hasn't come easy, it's come with a lot of research, a lot of development, a lot of mistakes, a lot of abandoning jobs. And this is part of the work which we do when we abandon. This Ball you've seen is taken a lot of months, two or three months, a lot of knowledge, a lot of correction, and literally now sits there on its own. But we use it for something else, because we use the other parts of it for the knowledge of something else. A new system out of this is born, which now will be tested. And as I said, the main part of it confines ?? itself, I brought with me from China. We don't have it in the West. I don't ?? stop working just because I'm in China, just for the Chinese. It's part of the same structure. (2:12) You need to confine the Soul. And you need to control its emotion, what it is, and how it is.

Any other question?

R: Mothirajan had a hand up here and something about replying to an email. It's waiting for a reply in an email. Go ahead Mothirajan can you explain?

K- ... We've been through. We looked, we looked for your email. We can't find it. We haven't seen an email from you.

Q: Yeah, I'll just type it in.

K- Send it to info@keshe.foundation. Because I especially asked the team, have they seen any email? A couple of days ago, they said they've seen nothing. Resend it again and then I will answer to it.

<< Mr. Keshe search for the email and found it, and said to him that he will talk with him on private. (He's the one from the drone factory in India . Never put your email in the Chat) The subject of this email is about drones without motors using plasma technology. >> (2:16)

K- ... So we talk to you private about this. Let's see, leave a telephone number send a telephone number, or a Telegram number is best for us. If you have a Telegram send us a Telegram connection in the email and then we discuss with you on the Telegram because we need to bring this part of this.

As you know the drone technology in the past few days has taken a new shape and dimension in the world of defense after what happened after what happened in Russia. And we are looking at these things very clearly, very closely. Yes, we'll respond to you. Give us a couple of days. There's so many emails. We have a confirmation we've seen your email, our team tells us, "Yes, we got it." So, we'll respond back to you. Thank you very much.

Any other questions?

Q: ... Looking back on last Friday's session, almost all activities were materially oriented, even though we were in the energy state. Only the perception of the center of the Universe was not. (2:18) This raises the question, will we Humans, who are bound to the material world by our birth, ever be able to understand the Universe in its dimensions, at least a little, as the Children of Mitra do? Or are we destined to find the zones of life within the Universe, even as the Soul of a planet, in order to support life itself?

K- The thing is, especially for now, as you go through this initial testing is that it's, you call it a dream. How the dream is real to us. The dimension of physicality is the same, it's the same dimension in your flight system. This is how you in the future recognize you arrive at the position, you're not in there. You want to land in the living room you don't land in the bathroom. You're aware of it and you come to that position and then you manifest yourself. That switching of what to you is a real physical is actually part of the translation of your brain. You have to learn to release, as we call it, time connection that become physical. You physically manifest yourself. This is where Knowledge Seekers at the moment have not managed to.

I did this with Jon and this we know exactly what we're talking about. You travel in dimension of Energy, you actually feel the place. But trust of switching to physical delivery, (2:20) that I can go back to if it goes wrong, is what stops you. And part of the process of we're testing with you lot, is to gain that confidence. Once one or two, three of you go through the process then the rest of you will jump. To you the dimension of real is physical, is exactly how physical is in your dream. You don't see in your dream your car as energy you see it as a physical, you get in it Because it's translated to. But now you have to let go and trust that you can come physically where you are and then that's done. And that means being aware of the time between the energy and the physical part.

The fear of loss is the biggest stumbling block in transmutation. I explain this in a very simple way. You have a dream to you which is part of your energy transfer. You wake up, you for example go to the bathroom and you come back and you carry on with the rest of the dream. You learn that in your physical life. You trust that I don't allow it but you actually move physically and come back to and carry on. This is what you need to learn. That what you call a dream, it's part of me. (2:22) The way I get up, leave the bed, go to the bathroom and I come back and I carry on with the same dream again, that's all I need to do. I trust I can do, I can come back and then follow the dream back to where you were. Many people have done it but they don't understand it. And many people have done it, they understand what they do but they don't teach it, because they don't understand the process. What you call dream is part of your transmutation.

Any other question? ...

Q: ... I'm very grateful for your teachings. After participating in the flight session in 2022, I began to have experiences that are almost identical to the sensations I had during that flight. Usually between 3 and 4 AM, when I wake up and fall back asleep, I feel an intense vibration running through my entire body, especially concentrated in my head,

followed by a very strong sensation of levitation. Right after, excuse me, right after this sensation I realized that my Soul is detaching from my physical body. I am totally lucid, conscious and present. On some occasions I find myself standing in my bedroom and going anywhere I want. On other occasions, I realize that I am already in Space, (2:24) and with complete clarity I can decide where I want to go, and I move quickly. At a certain point, I choose to return to my body and say internally, "Now I need to return to my body that is sleeping on Earth." I immediately return and open my eyes with complete memory of everything that happened. These experiences have been repeating themselves and becoming increasingly clear. My question is, do these experiences represent what you call "Soul travel"? During this state, would it be possible to consciously manifest myself in another place in the Universe, while my physicality remains on Earth, would this manifestation be, according to your teachings, a real change of Place, Position and Possession (PPP) by the Soul?

K- Yeah. That's exactly what you got to do, that's what exactly you do. You have to gain trust in the second part. That's all it is.

In trials we did, because I did a few sessions like this with Jon, bless his Soul. I still ?? tell him, you can just switch. He says, "I can't, I'm afraid." "I want to." He says, one session says, "I've got my passport in my hand, they cannot tell me I came illegally." He was holding his passport in his hand. (2:26) And he said, "They cannot tell me, I want to." He said, "Because you don't have that trust." He's with me, he tells me what I touch. I walked around the what you call it, the (Linz) Exhibition Center. He see what I see, he was there and I see him on the, what you call it, mobile phone, his passport in his hand says, "I've got, I know I'm there, I'm with you, you see what I... But I cannot." It's a trust. We have to trust that we can go back to it (our body). That's all it is. Increase or have trust in what you do is correct. You can do it, anybody can do it. Many men have done it, many creatures in the Universe have done it, so it's not. It's just that, like, you know, you try to get the child standing up and you're trying to get them to do that first step, they're in that position. Just trust, you're not going to fall.

Q: ... Could you explain more about the rhythm of breathing, how should it be made, what kind of balance do we need? (2:28) Thank you.

K- Each individual has it to himself. How you sit, the posture, the amount of air you take, the, which nostril you take, you got to learn. Just because you inhale from one nostril you get there, because maybe that nostril at that moment is not working, our nostrils, our nose channels work on a, what you call it, one hour gap. And then what energy, what you breathe. Is it easier to reach it if you're on top of a mountain or in the city with all the rubbish which comes in with your breathing? And then you have to consider the speed, the rhythm of the speed you breathe. You don't try to get drunk unconscious, you try to create a condition which reduces the energy field balance of the blood. That's how it works. You open the cage.

In the daytime the gravitational side of the blood is dominant. Because it brings in the field forces to the center. And then on other the section of the brain, the magnetical part is

more dominant. (2:30) We have to learn how to switch between different layers of it. With the headphones we literally blow this open, we create a condition that none of them knows where they are, because there's so much field, that goes into it. In the test last Friday we took the physicality and everything out, and then we push it in the middle to the Soul, and then we saw the changes. And then you get used to it and the changes goes, because you learn how to handle it. That's all it is. It's like just as I said, once you lost the fear, the process comes very near. You can do it then very quickly.

Shall we call it a day? Or do you have more questions?

R: Well there are some more of course but...

K- Give me a couple of more and then we call it a day.

Q: ... In 2022, two of these triangular UFOs, passed over the place where I was here in Brazil. It was night and they made no noise, they passed it very low altitude, I believe about 50 meters above me. My question is, can these UFOs travel around the planet without being detected by the military security systems of the countries they pass through? Thank you. (2:32)

K- Yes, that's all it is, that's what they do. You have to understand the stealth effect in the aircrafts, or the military today, is by changing the wedge of the system of the craft and painting. Here you create a dynamic flow around it. This picture on the screen is a best example of it. Your craft is in the center and around it is just a field created by the system. And where you see those lines, for example, is where they interact with the radars. They absorb everything in. Then nothing can go out. When you look at these Plasma Balls, don't look at it the way the Man does. Look at it the other way from the flight system. Nothing can penetrate and whatever comes in gets absorbed. And so the radar doesn't receive any feedback. Our radar system, our magnetic field system, traces what is the residual feedback or interaction of. With these systems you don't interact, you absorb everything. And whatever is absorbed is internal cannot be detected from outside.

R: I've noted that if I try to take a picture of a plasma ball with my iPhone, it'll cut out the iPhone when you get too close. It just stops.

K- Exactly.

R: So it's sort of an indication this is something that's what a couple of watts or something a very, very low energy plasma ball is able to cut out the communication of a cell phone you can amplify it.

K- It doesn't cut off, it makes it transparent. It's a totally different way. It doesn't cut off, it interacts, it becomes part of. (2:34) You get too close, you become part of the structure. And you... this is why when we talk about the scientists, especially plasma physicists, when they talk this and that to me, I just laugh. Because in the dimension of the DC or field flow in the plasma there is no frequency, so till they don't hit another one

there is no manifestation. And when, for example, they hit your phone they release that energy into it and that's why you don't see it. It's a different definition of why it's not just it blanks out, it's not there to be part of.

R: What about when in your earlier experiments you had a AM radio I think running all the time and you knew that the reactor was working well when the radio stopped working?

K- Yeah, but that is the same, we still use that system sometimes in the lab. It's very nice. That is the expansion, you become part of the DC. We have a system in the lab. It's about, I think about 10 centimeter, no more. And we measure the field inside this plasma. And it's all DC. We don't see any AC. And where we see the AC is where the boundary of the plasma is. We don't have a ball holding everything in. The strength of the field dictates the boundary. And if you are inside this ball, which is the DC, we don't see any AC, then you have no communication. (2:36) Noise is a frequency, it has a vibration. It's not 'flat liner' as you call it. That's a problem, this is not a problem but it's something if you understand, is part of the process of the creation, why some of it cannot transmute, because it's easier to work on the DC, on the flat line, energies are very, very little difference than creating motion and jumping up and down trying to get through.

Shall we call it a day?

R: Sure, yes.

K- Thank you very much. Got a lot to do. I started 3 o'clock this morning. I've been working for 8 hours. Please support us. We need the support to get through this phase and we are completed. And we need to get this done in the next couple of weeks that we start the process of the world peace. Know exactly where we are. And hopefully we see the change, the beginning of the change. One of the biggest will be what our generation even, peace. And then, as I said, what comes up with the car industry and the rest, these are all the fringe benefit of it. Thank you very much, and see you next week.
