

Time Ends for Every Entity Even Creator - Half-Life & Death Same - Training for Factories - Hypocrisy of Vegetarians - New System Transmutation - Why Israel Attacked

Introduction to 595 KSW

Note: Not checked by KF interpretation by KS of KF Brazil

Today's teaching goes further into understanding Time and it's a continuation of the past several workshops. The opening statement makes it clear that every life in Creation is subject to Time and each entity will eventually come to an end, even the Creator. This might be a little shocking for us to hear, as we might be expecting to live forever. It all depends on what 'forever' means, and that's why we need the background of the past teachings to understand what is being said today. It's confusing because we were only taught about time as the number and speed of rotations of the Earth around itself and then the Sun. These are physical entities that were created out of the interaction of the fields and they have a beginning and an end. It is my understanding that any entity created out of the interaction of MG fields has a beginning and an end. However, Mr. Keshe taught us to define Time as the interaction of the MG fields of the Place, Position (entity), and Possession (MG field strength of the AA of the entity). They interact to create Time. And the other part of their creation is the emotion, intelligence, and enlightenment.

The Creator was created out of MG fields that we don't know about yet, therefore, as an entity He is time bound, even if it is trillions of years. So what is eternal then? The Essence of the energy from which everything comes and is not effected by what manifests. The Sages talked about this as, "I Am That." But the mind cannot even think about what "That" is. Our problem is that we are identified with the physicality (P), or what we call the Ego, and that doesn't want to die, and the other problem is that it is not even aware of itself. So we have a hard time to understand Time, Plasma, and that we are both the physical body and the Energy, or what we call the Soul of the Man (STM). And it can be uncomfortable when Mr. Keshe says, that the death of the body and the half-life of nuclear material of every element are the same process. With this background we can start to discuss the meaning of the half-life of elements in matter state.

We'll start by looking up what scientists call half-life. They say theoretically all the elements have a half-life, but they specifically only talk about isotopes and radioactive elements, and their half-life is when they decay into something else. For example, the famous C14 used in Carbon dating has a half-life of 5,730 years at which time it decays into the isotope of N14. For simplicity we'll say the half-life is when an atom splits into 2 new atoms and they each have a new half-life time for their existence. This is really what they call nuclear fission.

At the age of around 10 years old Mr. Keshe realized that this is exactly what happens to us, but we call it death. At a given time the Man splits into the STM and the Soul of Physicality (STP) and P. We are assuming that you have been following the teachings and you understand that the STM through its behavior with the P while on Earth gathers M field strength that will determine where it ends up in the Universe (U) when it separates from the P and STP. But why does he say it is the same as the half-life of a radioactive element? Because the atom splits into two new atoms, and we split into the P and STM and both become new entities. We explained already that at the time of separation from P, the STM through interaction of the fields starts a new cycle of life, which thus creates a new Time at a new Place, Position, and Possession (PPP). That's the same as when one of the atoms splits and creates a new half-life of an isotope of another atom. And with the P or the body, we can see it dissolve and its energy transforms and feeds other Beings or plasmas. When the body dies it is buried in the ground and the worms and animals eat it and it becomes part of the energy of their Souls. We saw the body die, but did it really die? Didn't it become part of other lives on Earth? The problem is not with life, rather it's with how we were taught to understand life, and then what we identify with. The fear comes when we solely identify ourselves as the physical body and that causes us to fear any change that occurs with it. If for example, we identified ourselves as the Creator, then we would feel that all other energy in Creation are part of ourselves and there would be no sense of loss. The fear would transform into the joy of appreciating the beauty of all life as ourselves.

This is again showing that Creation follows the same pattern in its different dimensions. When we understand that pattern, is that what he calls, the Totality of the Knowledge? The scientists have figured out how to measure the half-life of radioactive materials. They use a Geiger counter to measure the amounts of fields a radioactive substance emits over time. Well, couldn't we do the same with the STM? But first we have to learn how to measure its M field strength, and then what the Soul emits out of the body is what we call the Aura. This will tell us the half-life of the STM or when it is expected to go through "death," meaning it will separate from the P and create a new half-life somewhere else in the U. There is a way to test this. He said, if for example, we know the half-life of a substance is 10 seconds, then we could inject it into the body and observe it change into something else. The main point here is not the time of the half-life, but the fact that it changes into something else. And if we can understand how it interacts with the fields of the environment then we can control the half-life. Then if we can control the life span of an element, we can also control the half-life of the STM in relation to our life in the body. If we think further about it, it means our half-life was decided at the time of our inception. Then we'll find out that our life really does have a purpose, and we are part of the "big picture" of the life of the Creator.

In a nuclear reactor they can direct a beam of radiation at a target, and by bombarding it cause a half-life to occur. This is what they call fission. Mr. Keshe compared this to having an accidental death, where the STM takes its half-life sooner and creates a new dimension. He used the word beaming, that the man directs his fields to create the split. But an accident means we are not aware that it is going to happen. Does this mean that the STM takes over and decides to make a change, and the STP & P have to follow

unaware? Some people get premonitions of what is about to happen, maybe the STP is elevated enough it can receive the fields from the STM and relate it to the P. This is the amazing part of life when we can live more in the Energy and not just the matter state existence.

It might be difficult for religious people to hear this, but Man has made up all these different terms because he created a sense of morality. Morality is relative to social norms of a particular time and what people in power want to enforce on the others. It has nothing to do with the true science of Life. It can also not block us from taking destiny in our own hands. He made it clear several times today, that, is it we who give up our power out of fear. This does not mean we become immoral people, rather we rise above false moral concepts and live in the truth of unconditional giving, loving, and serving like the Creator does. The beautiful thing is that, it is through giving that we come to control the fields, then we would never do anything to hurt others.

He said that the Man's life is a collection of half-lives. I don't understand what that means unless throughout our lives we go through a series of deaths. I think we do that on a mental and emotional level, but I don't know about the physical level. Or did he mean the life of the STM is a collection of half-lives? That is easier to understand because we continue to experience new cycles of life, each with a new half-life. He said, that part of the STP gets embedded in the STM, this would mean the STM collects little bits of the STP of each existence it experiences. And then he said, we can elevate our Soul to become the Soul of a bird, galaxy, U, and part of the Soul of the Creator. What does this mean? Is it reincarnation of the Soul by choice after it becomes enlightened, or is it joining with different Souls to experience them for a time and then moving on? He made it clear this was not the P, and that our Soul is made from the same Source as the Soul of the Creator. I made Man in the image of Myself. And by being able to create and control our emotion we can become the different things, and we can control the half-life, or the amount of time we want to be that different entity.

There is a deeper understanding about vegetarianism. It's a hypocrisy to think that because one is a "vegetarian" then one is better than a meat-eater and is not a killer. We didn't have the understanding that every grass and every vegetable has a particular amino acid (AA) that has to match the AA of the Being that eats it, then it can be converted into flesh. This means a cow innately knows which grasses to eat so that it can convert it into meat. And then humans eat the meat of the cow. But if we bypass that step and eat the vegetable, or Vertical Beings directly, then we do the conversion of the AA to our own flesh. We skip the step of the cow, but we are still killing the vegetables and taking their energy for our own use. Then the question is who is going to eat us?

The purpose of our life is not to extend our "half-life" so we can live a little longer in P, but to increase the value of our life through unconditional giving and loving, and serving Creation. Then our Soul will find its own half-life naturally and it won't matter where we end up, because our focus will be on serving our environment and helping others. There is no Heaven or Hell, or Day of Judgment, it's us who judges ourselves and we determine if we want to live a hellish life of only serving ourselves, or a beautiful life of sharing the

love and joy of Creation and knowing that we all come from the same Source. We'll carry the satisfaction of knowing our emotion is the Emotion of the U, where they don't kill and steal others energy, because everyone lives through the fields of the U. To do this we need to understand our emotion and how to create and change field strengths, and we need to teach the P the truth about Creation and that it doesn't need to kill to survive. The atmosphere of this planet has created the cage of Time, and when the Soul elevates it will go beyond it and be able to play in the U as a member of the Universal Community.

Part of releasing the Plasma T is by commercializing it and that has started in China with different collaborations. KF itself is not going to build factories, rather we will issue licensing through Markray and those who are already experts in their fields will do that part. It's essential that the workers are trained correctly and are helped to develop a connection to their Souls and understand the Ethos. From the technical point of view much of the training can be achieved through using AI and creating a command center from which all the teachings will come out of. This way KF doesn't have to send people out to each factory to train people and Mr. Keshe can direct the training from a central location and he doesn't need to move around. This will save a lot of time and allow for faster implementation. To help those workers who are new to plasma he is calling on KS who have been studying the T for long enough to now get involved and share their knowledge and help bring the change. The KF TV was setup years ago and now it is time to bring it into operation. Ideally, it's important that the workers make a connection through their Soul to the technology and then be allowed into the factory to start making plasma products. They should not think of working for KF as a "9 to 5" job just to survive. Instead they should be happy to be part of the change and want to elevate their Soul. Because working at a KF production facility is like entering a new dimension (D) of higher field strength.

KF has launched a new system that is the culmination of 20 years research and it has 2 parts that combines the Plasma Glasses and the Headsets for transmutation. The first part looks like goggles you wear over the head and has a 360 degree connection. The second part will be worn over the chest, similar to a bra. It seems the first piece connects directly to the STM and the second piece to the STP that would facilitate the two plasmas interacting to create the Free Plasma, which will allow us to transmute easier and feed ourselves among other things. It was tested with the 7 Captains some weeks ago and it elevates the STM and STP which leads to control of both emotions, and it will control the blood flow, which is responsible to keep the STM encaged in the P. It will be a very important system to train people to transmute because the emotions, love, and everything positive in us can be controlled through the system, but at the same time we will be in charge of ourselves. And they are developing a central system that these systems will connect into. It combines different technologies and uses Universal Cosmic Rays. We can tune into the emotions of animals & plants and receive their energy without eating them. Interestingly, the second part will create the emotion to be able to receive. We generally think that love is only about giving, but could it also be about receiving? In addition, the system will be able to create missing organs like kidneys. And it creates Time through the fields of PPP, and also brings the emotion, intellect, and enlightenment together. We are entering a new phase.

There was further discussion about the difference between enlightenment dreams and those of P, which has been discussed a lot in the past. But this time Mr. Keshe brought in the breathing side of it. If we observe someone dreaming we can tell which kind of dream they are having by the way their breathing changes. If we can find out what the rhythm is of someone who is dreaming and Soul traveling, and then replicate it while awake, we can Soul travel and have control over it. It's the rhythm of the breathing that dictates the dream, emotion, and the freedom of the Soul. So maybe there is a method after all. Maybe this is how some of the Masters of the East got enlightened and were able to help their students achieve the same. But the real point is that we need to learn how to control the energy going into the body and then connect to the fields of the U, then we won't need a method for breathing. Nevertheless, we should experiment and do whatever it takes to try to advance ourselves.

Recently we discussed about the different types of knowledge where one is memorizing concepts and the other is having a direct experience of the 'Emotion of Knowledge' and knowing it from inside. Today Mr. Keshe said, that when we comprehend something then we don't need to remember it. And during the years he did his human education he never remembered anything, he always understood it. It was inside him. This is very similar to what happens when you give yourself totally to studying the Plasma Science as taught by Mr. Keshe. No matter how many times I read over the transcripts or listen to the recorded teachings, right after listening I cannot remember what was said. The strange thing is that while reading it everything feels clear and correct, but I cannot put it into the memory Chip of the brain. But when I need to recall it, like writing these summaries the knowledge is there. I confirmed this with another KS. Therefore, I consider that this knowledge is living and present, and not like the 'dead words' we are forced to memorize in our education system. These teachings contain the 'Emotion of Knowledge' and are time-less, so they are always relevant though some of the manifestations will change. On this same note, he said, if we understand a Soul dream and we get enlightened to that knowledge, then we'll always have access to it.

A long and detailed discussion was given about why America and Israel attacked Iran, which you can read in the Quick Index. What is coming out of the mainstream Media doesn't match up, but if you analyze things carefully, then you can understand how Mr. Keshe is filling in a lot of missing information and the control on the Media becomes very obvious. It's more like a PSYOP (Psychological Operations) by the Military than news that wants to try to tell the truth. PSYOP is when the Military tailors the news to influence public attitudes and behaviors to support U.S. policy and military objectives.

If we keep awareness of the reasons Mr. Keshe gave us, then we'll understand why things are unfolding the way they are. The main reason he gave for why they had to attack now was because Iranian Intelligence has captured 2 truck loads of physical documents out of Israel that reveal about their 90 nuclear warheads and all the illegal activities they have been engaged in and also implicates Trump. Iranian news brought out some of the documents about Mr. Grossi of the IAEA working for Mossad to help kill scientists. The Western Media is totally ignoring these documents. If you listen carefully to the facts and

not the rhetoric it is clear that Iran has cooperated with the West allowing them to see their nuclear sites, at great risk to their own security. And senior officials in the US government admitted there is no evidence of Iran developing a nuclear weapon. Trump said, he doesn't believe his own people and went ahead and bombed anyway, in violation of international law. It's getting more and more insane and dangerous. We see the damages in Israel, but many of the same pictures are just repeated over and over again, and we get very little news from Iran. Mr. Keshe said, he was able to give the knowledge of the plasma to clean up any nuclear radiation leakages to Iran, like what was given to Fukushima, and offered to Ukraine. We hope that all KS will come together and give from their Souls that this conflict will be the end of the religions and the start of true world peace and the release of the plasma technology.

Other topics:

In this war started by Israel, Vatican has lost 30 trillion and the Americans 300 trillion in Israel. It will be explained later;

We're getting closer and closer for you to understand why we came as Messengers. We want you to understand that you are responsible for where you will go in the U and when your half-life starts;

There is a new Plasma Technology for cancer that is unbelievable and they see tumors disappearing. It will come out through Markray in cooperation with China;

When water flows over a rock it creates an emotion. Now imagine when the Soul touches the Soul of the Creator, that's the love of Mitra.

Thanks for listening.
