

Two Types of Time Physical & Energy - How SS Works & Planets Created - Life on Mars Another Earth - Zone of Life SS - Fibromyalgia Fear of Emotion - Virus Reemerges - Shares vs. Keshe Coin - 2 years Stop War - Pyramids

Introduction to 592 KSW

Note: Not checked by KF interpretation by KS of KF Brazil

This is a very advanced teaching with a lot of new knowledge that is built on the past knowledge we have been given, so there are a lot of things we have to try to keep in our heads while listening. I will try my best, but I recommend you listen to it many times to understand for yourselves if it is correct or not. These new teachings are containing more subtle knowledge and require more love for the knowledge and time to try to decipher them. But the knowledge is amazing what it is revealing and it is way beyond what I could have ever imagined.

In the first part Mr. Keshe tells us that there are actually different ways Time can be created. Over the past weeks he has been teaching us that Time is created from the MG field strength of the Place, Position (entity), and Possession (field strength of the AA of the entity), and that Time itself is a field strength. Today he added that this is not the only way to create Time, and then he talked about emotion. For years he has been talking about emotion, but has never really gone very deep into what it means. Today he went further, it 'turns out' that emotion has two sides to it. There are physical emotions that have to do with how we react to certain conditions and they make us act in a certain way. And then there are emotions of the Energy side, which we'll talk about shortly. First we'll talk about the physical emotions. Everything in Creation has emotions from Man to animals, galaxies, universes, and even the Creator. When all the field forces come together, it is the emotions in us that decides how we will react physically to that situation. You might say, well, how can a Universe (U) have emotions? That's a good question, because we cannot see them and we don't know how to interact at that level. We'll have to stay open to the possibility until we get more knowledge. Emotions are created out of the interaction of fields, and since universes are plasmas with fields, then they will have emotions. Do universes have superficial emotions like humans based on ones likes and dislikes, that I don't know? But based on what we know so far, we can say they have emotions. And we should know that emotion is a cornerstone for creation of Time, that's how important it is. Life has two sides, the Yin and Yang, or the matter and Energy state. The matter side which is tangible is made of the Place, Position, and Possession (PPP) and this creates the physical Time. The Energy parallel to this Time is emotion. It's through the emotion that it gathers and reacts and shows itself in physicality (P). The other part is, it is the intelligence that assesses the emotions received and then determines how to react, and this brings together all the past information and then creates

something new with it. Emotion exists in both matter and Energy, but intelligence is only on the Energy side. And because emotion connects two different types of MG fields together, that of P and Energy, he compared it to salt. In the past he taught us that salt connects metals and non-metals together. But there is a lot more to it than that. Salt connects the metals and non-metals in our Gans Box to create Gans. Emotions also have that power to create, therefore he talks about them all the time. He is opening the door a little more into the true essence of emotions.

In the last half century Western culture has begun to understand a little bit more about the importance of enlightenment. But here we are not talking about enlightenment as an Eastern philosophical concept, but as the Science of Creation. In a way, emotion comes when we rub up against our environment as a kind of field interaction, and how we understand that becomes our intelligence, and how we react to what we understood creates enlightenment. Again, emotion has two sides. Physical emotion can lead to stress and damage the physicality. Whereas, emotion at the level of the Soul of the Man (STM) interacts with intelligence and leads to deeper understanding of the emotion, and that gives enlightenment. And then he brought this back to Time. The fields of the PPP creates Time in the matter state, whereas the emotion, intelligence, and enlightenment creates Time in the Energy state. This is why they say, when you are enlightened time has no position and moves according to the strength of the intelligence and through that emotion it brought you enlightenment.

We have examples for this kind of Time. In the past when some people got enlightened they were able to tell the future even 200 years ahead. The future generations then looked back and wondered how that person could have known such a thing. Mr. Keshe said, the person had an emotion and through his intelligence understood it and got enlightened by it. And what I understood was, that the strength of that person's intelligence and enlightenment matched to a strength 200 years ahead and they moved to that Time, and therefore what they told came to pass. In summary, we have the two forms of Time in physicality it's called the PPP, and in Energy it is the emotion, intelligence, and enlightenment. The way the term enlightenment is used here is very different than what we are used to. It seems that enlightenment is a natural part of Creation and leads to creation of Time, and not just something a few individuals can attain through years of persistent effort. An example of this is when he said, that when Mars enters the "Zone of Life" it will get enlightened by the light of the Creator and begin to create life. There are a lot of implications in this simple phrase. One thing that comes to my mind is that enlightenment is an essential part of Creation and we all will eventually reach that position. For a planet to create life means it first has to get enlightened. Isn't this the same with the STM, when our Soul reaches enlightenment it will begin to create. But the strength of the enlightenment that it will be able to create with is another topic on its own.

The teaching on how the solar system (SS) works started out by him talking about how the water gets recycled on Earth. First it evaporates and flows up into the atmosphere and then gets rained back on the Earth where it started from. The state H₂O will return back as depends on the conditions it goes through. It could come back as snow, hail, rain or whatever. This is another lesson in M field interactions. The planets of the SS do the

same thing. The Sun, or Mother emits fields that when they slow down enough at the outer boundary of the SS convert into matter state and start their journey back to the Mother. It's interesting to look it up on the Internet. They now say that Pluto is not a planet because it doesn't have enough gravity to clear its orbit of debris. So the first planet they recognize is Neptune. A planet starts out as ice, rock, metals, and other debris and then creates a gravity and then accumulate gases around them. The planets of Neptune through Jupiter are called gas giants, and then something happens and they form a rock crust on their surface as in what happened to Mars, Earth, Venus, and Mercury.

Science doesn't have an answer for how this is happening. And in some videos showing the formation of planets they depict the planets as magically popping out of the Sun. It's funny because the atheist scientists think they are more advanced than the fundamentalist religious people, but their description of how the planets are formed, in essence sounds just like the religious people telling about Creation. It seems their pride keeps them from admitting they don't know. For those who understand Plasma Science it all makes perfect sense, though we still don't have enough knowledge about it. The dust particles are really plasmas in the matter state, and they have GM fields. Those that have matching field strengths start to interact and form a plasma that creates gravity and starts to attract other particles to itself and grows. It all starts with the particles in the Kuiper Belt and Oort Cloud, which they say are icy particles. Ice has H and we know that it is the Fundamental Plasma for Creation. The scientist call this area a "junkyard" because in their arrogance and ignorance, what they don't understand is junk. It clearly shows that Pluto is the beginning of a planet but its fields are not yet strong enough to attract all the particles in its orbit to itself. Neptune is the first planet that can do that. One day Mr. Keshe will have to explain why planets go through this gaseous stage. This made me wonder if the gold that was created in Beijing had gas around it. Because the creation of materials is the same process the planets go through.

The way I understood Mr. Keshe's teaching is that the SS is setup with different MG field strength orbits. When the fields reach the outer edge they have lost most of their strength and start getting pulled back into the Mother, like how the moisture gets pulled back to the Earth. Every SS that has life as we consider it, has a zone of MG field strength where it can produce life. For our SS that zone is where the Earth is now, and that's why it has life on it. Millions of years ago the Earth was in the position of where Mars is now, and at that time it had the same structure as Mars has now. Life was in the pre-stage where it was forming "rivers," but most of the life was being developed inside the planet. When Earth leaves this "zone of life" and reaches the position of Venus it will lose all its life and become like the way Venus is now. And when it reaches where Mercury is the tilt will be almost zero and it will start to be absorbed back into the Sun. Thus the mystery of how our SS works, and how our planet was created is finally solved.

Some of the evidence that indicate the validity of the Zone of Life are the comparisons of all the planets 'length of day,' and the angle of tilt. With the length of day it is easier to see the pattern. The gaseous planets have very quick rotations of between 9 and 17 hours of Earth time, and then Mars and Earth are almost the same at 24 hours. But suddenly when the planet dies and enters Venus's position, it takes 243 Earth days for 1 Venus day.

That means the planet has almost stopped rotating. He didn't yet explain the significance of what this means. But we can be sure it has to do with the field interactions in the environment. The tilt of the different planets has a kind of pattern of swinging back and forth on the axis. Again that will have to be explained later. But the main point is that Mars and Earth the tilts are almost the same, and then with Venus it wildly tilts away from the axis at a 177 degrees. From these examples we clearly see that there is a Zone of Life for our SS and we are in it now and Mars is about to enter it in the next few million years.

Another extensive teaching was given about Fibromyalgia (FMS) and how it can get resolved. In general, Medicine only recognizes that people with FMS experience pain all over their body, are tired, and have sleep problems. They don't connect it to any past psychological traumas. Mr. Keshe has done years of research and worked with a lot of FMS cases and this is what he understood. FMS occurs when some form of abuse happens before the age of puberty. This is the time when we start to become individuals, our hormones change and we start to take charge of our own bodies. The wounds of the abuse cannot be physically seen but it has left an emotional scar on the person's psychological condition. You can look at many other teachings where he discussed in detail how FMS works including why the body takes so much energy to continually process old traumas. In general, when the person does a small work then they have to lay down for the whole day to recover their energy.

A Knowledge Seeker (KS) was stating that talk therapies where they have the patient revisit and relive past events that led to certain psychological conditions was helpful. Mr. Keshe replied, that just revisiting past events don't necessarily resolve the current conditions. In fact, they can also create more wounds if not done properly. The essential point is not necessarily to revisit the past, but to understand the emotions that created that past trauma. In relation to FMS, a further necessary step is the patient has to realize that it was not their fault. They were an innocent child and the abuse came from the abuser, and not from the destiny of the child. When the person accepts their innocence and understands their emotions in a bigger context and how their feelings got formed, then there is an 80% chance they can fully recover. They still have to do their inner work for some months to fully recover. Most probably this is where the use of the plasma technology is most effective in changing the fields. He said very soon this technology will be used in China.

The other interesting thing is that he said, FMS is caused by the fear of experiencing certain emotions. But I would imagine this is true with a lot of conditions. When the emotion is rejected there is a little voice inside that says with such force and determination, "I will NEVER experience that again." I have dealt with these cases and I have seen how much power a child has over their life without knowing it. In some cases, the child ends up creating a miserable life just so that they don't have to experience that emotion again. The sad part is they don't know they are using their own power to hurt themselves.

To bring about world peace we need to get the world leaders to recognize the importance of KF in bringing in the new Plasma technology. Mr. Keshe seemed to be saying that his strategy is to get the attention of the leaders by showing a larger increase in the share price of Markray stocks. Suddenly in the last weeks Markray shares doubled in value to 10 cents and he expects them to go up to a few dollars within the next months. But we have to understand that our goal in Markray is not to make profits, or trade shares, rather it is to bring attention to the work we are doing by having its share value increase. Look carefully and you will see that very little volume of shares are moving on the market. And then he said he will stop anymore shares from entering the market. KF will take control over all the shares, because he wants to give them to countries that accept to use the technology and sign for world peace. This is what he means by T in exchange for peace.

Recently, he said that the Keshe Coin (KC) actually has two versions, one of plasma and the other matter state. The KC we buy by making a donation to the KF is the matter state version. We are receiving so much priceless knowledge that there isn't enough money on this planet to pay for it. Nevertheless, in this transition period it is our chance to give something back to the KF and to bring about world peace. So he has asked all of us to buy as much KC as we can and save them. Now is the time to build our reserves. When the change comes we'll use KC instead of these fake currencies that are causing so much suffering in the world.

The Media says Trump goes to the Middle East to bring peace. But Mr. Keshe knows that he is there to sign Arms contracts to keep the American economy going because everything else is being manufactured in China. And he's made arrangements for billions in hotel, casino's and prostitution houses in Gaza, as well as the oil fields. The Palestinians will be made slaves to the Europeans enjoying on the beaches. We have 2 years to bring the change or they will make new wars to use these weapons. In addition, the Germans are working hidden in the background to expand the war in Ukraine to Romania so they can recover their economy by manufacturing weapons.

The Chinese government is reporting the re-emergence of (the Virus) with 30 deaths in Hong Kong. He talked about this years ago, that it is not good to have a summer flu emerging in the northern hemisphere. If it goes into a pandemic he will release a new version of the Cup of Life 1 & 2. There is no need to worry because we'll be able to make it quickly as we did before. The good news is that this time the T will come out in China through Markray and not be done 'behind our backs' like the last time, and hopefully the rest of the world will accept it. Mr. Keshe has developed a lot of different technologies in the background that had to be temporarily shelved until they are needed and this is one of them.

To work with the plasma it's important to be able to increase the M field strength to a new strength. I only remember him talking about changing the strength through our emotions, but I don't remember him explaining exactly how it is done. For example, if the emotion has a strength of 4 and the intelligence a 3, and if they interact to create a new D of enlightenment that could be 6. But if there was a friction between the two, then it

might go backwards to a strength of 2. It all depends on how they interact. At this point in our understanding we don't have tools to measure M fields so it is more like a feeling.

The pyramids have always been a mystery for Mankind and there are many theories about what their purpose was. He gave us a big hint today by indirectly saying that they hid technology in the pyramids to elevate the STM in the past so he wouldn't kill. That's very interesting because we don't have enough past records to know what life around the pyramids were like. The colonialist scholars projected their understanding into history by saying they were built with slave labor. But the fact is they don't really know. The other thing is that they are finding pyramids all around the world and not just in Egypt. And then the Age of the Pyramids died out. Did the fields of the reactors change, or were the plasma reactors removed in some way? Nevertheless, it wasn't a lasting solution. So now they are elevating the STM and changing the RNA and DNA for a permanent solution.

Today we learned that Mars is a virgin planet about to reach enlightenment so that it can give birth to biological life as we know it and become the new "Earth." Do we want them to go through the same process of having to kill to take energy, or do we elevate them so they don't have to go through the suffering we have gone through? We have to understand what our responsibility is, especially now since we are being given the Knowledge of Creation. And we have to be able to know how to help other races we may come across as we travel in Space. There is a Star Trek episode depicting this where the man from Earth had more knowledge and he ended up becoming a dictator of the planet. As Mr. Keshe said, we can change the environment to improve their condition. But we should not become Prophets or take control of the Soul of that race. That makes me wonder about the ruling families of this planet, which race are they from, that they had more knowledge than the man and took control over him? We should think of the new race that will be born on Mars as like our own children, or at least our own siblings and want them to have the best life.

Other Topics:

To mark a Ray means to identify it and coincidentally KF company is named Markray. The amazing thing is Markray was bought with that name and not made up;

We are creatures of our past and prisoners of the fields of our ancestors on this planet;

Drones are the future of Space T and how we'll feed people, but they will be plasmatic without motors and they won't cost anything to operate;

Everything has a D of field interaction including a stone, planet, man, and even an atom is dynamic. And even though they may appear solid they have an aura, which is a D of field interaction.

Thanks for listening.
