

3rd Week Systems On - Many are changing - New Timeline - Change Body - Reptilians - Poison - Sun's Ancestors - Satellite Souls - U Teachers Meeting Introduction to 600 KSW

Note: Not checked by KF interpretation by KS of KF Brazil

This is the third week in a row that Mr. Keshe has kept the KF Plasma Systems running in the background during the teachings. And Knowledge Seekers (KS) are giving a lot of feedback of how they are changing both personally and the people around them like family members. The way he explains it is that we are receiving more energies that we never had before. In a way, he has 'wired us up to the Creator.' He has the knowledge of how to access Universal Fields through Cosmic Rays (CR) and is teaching the KS in KF laboratories to advance humanities knowledge. He said, the graphs showed that they were able to align the Soul of the Man (STM), the Soul of Physicality (STP), and physicality (P) of the Man in a centralized line, and they have never done that before. He didn't say what that means other than it connects us to a lot of things. Maybe it means when all three are on one line, then all 3 are making the same connections and that makes it stronger. And when we add energies then we effect the Time and create a new timeline. They have added the energy, but it is us who has to decide how to use it. Since we don't understand about the Soul, then we say, this or that happened, or I felt something subconsciously. In a way, we are denying the interaction with our Soul. Nevertheless, we are still receiving the energies and they are changing us. The energy is coming from outside and makes up part of the 80% we receive from the environment. But these fields are of a higher order and if we normally receive a 100 field strength, now we are receiving 120 or 140. This higher bandwidth is elevating our Soul and giving us greater insights into our own energy, and other things, as are being reported by testimonials from the KS.

It's a little difficult to unravel all the words and concepts being presented here. It's important for each of us to go through that struggle of trying to understand, then the learning goes deep inside us. For myself, I think about the two Times of the Physical and Energy. The Physical Time is the field strength of the Place, Position (entity), and Possession (strength of the AA of the entity), or the PPP. And the Energy or Soul Time is the emotion, intellect, and enlightenment (EIE). To change the Physical Time we go through the evolution of the PPP in the physical dimension (D), like evolving from our experiences in the body of the Man on Earth. This is a very long process and takes millions of years. The other way to evolve is through the Soul, and I believe he is trying to show us that by increasing the MG field strength of the EIE the Soul automatically evolves. As Mr. Keshe has access to the Knowledge of Creation he can build systems using the physical D of this planet to create CR and attract Universal Fields that increase our field strength and elevates our Soul in a much faster way. This is what I believe is

happening now, when 3 weeks ago he decided it was the right time to start this process of elevating our Souls. About a month or so ago he said he wouldn't turn the systems on in the KSW because it would cause too much mayhem. Something changed and now he is turning them on and keeping them on. And the wonderful part of it is, that KS are able to absorb the fields and start changing their lives. Hopefully we can keep up this momentum of growing and changing. We may have even added 20 years or more to our lifespan by being part of this process. Another interesting point is that he said, the Soul has access to these Cosmic Energies by itself, but it has not been able to convert it to a usable strength. Maybe the systems are converting these high order fields into a strength we can digest and use for elevation of our Soul.

When the Soul receives higher energies then it creates a new timeline for itself and this delays what he described before as the half-life, or the point of separation from the P, also called death. If we keep extending the half-life then we can live for eternity. We will never die because our essence is directly connected to the Universal Timeline and Energy. There are different timelines like the Earth has its timeline, and so does the solar system (SS), galaxy, and U, etc. Timelines can be changed and we can enter into other timelines, like if we transmute into another planet we would have to be accepted into their timeline. It's similar to how the plasmas function where we have one plasma inside another, and another, and so forth. Of course, then we'll have to learn the rules of how timelines are created, function, and how they can be changed. He said, during today's session we created a new timeline, so we'll have to learn more about what that means. One way we can measure changes in dimensions is through changes in the length, life and energy cycle of a brain cell. But it is not clear what this means.

If we transmute to the Moon as a Position and Possession of a Man from Earth what would happen? When we appear on the Moon it will not be in the same Position of a Man as we are on Earth. We have to understand this and overcome our false perceptions created by Sci-fi movies from Hollywood. What is not clear to me is whether the Possession, which is the strength of the AA of the Position has to be exactly the same. Or is it more complex and has a spectrum of field strengths? If the Position of being Man cannot be the same, then wouldn't the AA also have to change? This has never been clearly stated. In this example, he said, when we land on the Moon the Time and Place of being the Moon are fixed. The Position has to change to that of a Moon Being, then wouldn't the AA of that Moon Being also change the Possession? He simple said, you hold the energy to have a certain Possession. But you still carry the STM and the memories and intellect of the Man. What would that experience be like? Would we transmute to the Moon and suddenly see ourselves as a different creature, but we would still remember our life in the human body? Maybe those thoughts fade to the background, and we start to have new thoughts of being a Moon creature. The energy we receive through the Headsets would fix the enlightenment and our emotions would be locked. What does that mean? It seems to me that inside we would know ourselves as a visitor, or an alien, but our new body would match the environment and that would take some getting used to because we would still remember our life as a human body. In our minds we would know we were only visiting temporarily and we'll return to Earth. This can also be done without systems by learning how to breath and controlling our emotions.

At first it seemed like he was saying that our food was like poison and it kills us. In a way, that could be true considering all the chemicals in it. But after studying it more carefully I think he was saying, that when we eat poison and die, we really create a new timeline. The poison released too much energy and created a new half-life that caused the STM and STP to split and create a new dimension. This is exactly what happens in a nuclear reactor, we bombard the nucleus with energy and cause it to split, and it creates a new timeline. There seems to be much more to the Possession than just the AA. The higher energy changes the Possession, which changes the Time and creates a new timeline. And if we are in a situation where everything else is fixed, like the Time, Place, and Possession, then the only thing that can change is the Position (entity). So let's say for some reason we received too much energy, and everything else was fixed, then our body would change into the shape of another Being. And if we were on the Moon, then we might suddenly look like what they call a Reptilian. Or some call them 'shape-shifters.' But now we know scientifically what has happened. They received higher energies and it caused their Position to change. But they will remember everything from their original form because all the other parameters in them have remained the same. This can also explain how mutations occur. Is this what happened when the original humans left Africa? When they left Africa they entered a new field strength and all other factors being equal, only the Position could change. So they became brown in the Middle East, and then white in northern Europe, and changed into other races according to their environmental field strengths. And with this understanding there is also a timeline, but we need more knowledge about how that works. Because when we physically spread Gans's around the planet we are changing the timeline, but also we do the same through the KF Teachings. One is through P and the other through the Soul and both work.

We all may be wondering if the U is a peaceful place, then where did all this killing come from? If we were created from the fields of the Sun then we have to look to the parents of our Sun, or the Soul that created our Sun to find out. What kind of civilization did our Sun come from? But what if the Soul of our Sun was perfect when it arrived and due to an unforeseen accident it lost fields when it interacted with the local Space fields of where that seed started? Or when it came to its balance with its environment the result was, we ended up with these characteristics of killing and destruction? He seems to be saying that there are many different possibilities for what happened, and it may not be just one cause. The main point is that we fully understand the problem and know how to remedy it so that we don't spread our disease to other parts of the U. That's why he encouraged those who are still spreading Gans Water around the planet to continue, because it is part of the solution, which is to raise the field strength so that the Beings of this planet can feed from the Universal Fields and stop killing.

The Fountain of Youth is a myth that has been around for centuries and got very popular in Europe when America was being explored. It was claimed that there was a spring whose waters would keep you from aging. In Plasma Science there are different ways to remain youthful. We can rejuvenate the life through the field strength of the emotions of the Soul and the STP. Maybe this is related to keeping the cells of the body always new. Another way is to understand about Time, and by keeping our timeline constant we

would not age. To do that he said, we can elevate the intellect and enlightenment. It was not clear how this would work. If timelines are independent of each other, then ours would remain constant and the ones around us would continue to age. How would that effect the other parameters? And how would that effect our spiritual growth, would we become stagnant? Would it be possible through the strength of our emotions to keep the Possession and Position constant? There must be other things involved, but the main point here is for us to start thinking about how we would adjust the different parameters and how they relate to each other. The emotions, intellect, and enlightenment are the higher order fields of the Soul and they can be used to manipulate the field strength of the Place, Position, and Possession to control and change the Time.

The remainder of the first part of the workshop was about different aspects of how the change is going ahead. It is the responsibility of the Universal Teachers to see that this change is carried out in the correct way, and that it actually takes place. Nevertheless, humans have to be involved in bringing the T forward. We can't just sit back and expect them to do all the work for us. We are at the verge of the change, but we need to elevate the world leaders so the governments will bring it forward. The Universal Council needs to work on elevating their Souls and we as KS can help with that through our intentions. Now that the systems are being run during the teachings more KS can join and start the process of enlightenment and this will spread across the planet. Another aspect is to get the systems onto the new Chinese satellites that are Plasma based and called Quantum, then the whole planet can be reached through the fields and every Being will have enough energy that they don't need to kill and their emotions will be satisfied. The governments cannot interfere but if they create so much resistance to block the progress, then the Messengers will have to "force feed" them the change. In Chinese Medicine the superior doctor is the one who puts his knee on the patients chest and forces them to take the medicine to get better. The Messengers are Superior Physicians. Having the "Swiss Life" means every Being on the planet will have all their basics needs of food, shelter and survival met, so there will be no need for fighting and war. Through the enlightenment the emotions will be elevated so we will love to live, and we will not be a burden on our own emotions. We will enjoy our emotions and live a satisfied life. To see this through is the job of the Universal Teachers. The implication was that very soon they will make this change, but the way he said it was, 'we'll address the shortcomings of the Man on another level.' Let's hope that this time they will be able to carry it out.

One of the ways the energy will be spread across the planet is through what is called the Satellite Souls. In the past KS volunteered to become Satellites, but now with the systems turned on in the KSW, Souls will become Satellites to transmit the energy to other Souls. Perhaps the P won't even be aware of it. It's part of the KF logo, we are here to serve. It's an intimate way of serving where the essence of our Being is happy to be part of the conduit of Energy from the Creator. It's not making a donation in physicality and forgetting about it. It's part of our life and it spontaneously occurs when there is unconditional love. This was confirmed by a KS who said that since the 598th KSW she started focusing on her brothers health condition and he has been recovering and through this situation the whole family became closer. It shows that we should not underestimate

the power of our Soul and the subconscious program of being a victim is a real waste of time and energy.

Mr. Keshe explained about the graphs. In the beginning of the session there was nothing in the lower part of the graph representing the P. He said, 'my wish is my command,' and because we are all plasmas the energy gets transferred. Does he mean that he made a wish that we should receive the fields of the U? I understood that the center flat area connected the STM, STP, and P, and then the energy went from the STM to the P and more dots appeared in the area of the P showing that it was being fed. This is confirmation that the systems can be used to feed the Soul from the Universal Fields which in turn feed the P. In effect, we make up for the shortage of energy not provided by the planet under normal circumstances. All the entities on the planet with Souls will receive the energy and the emotion will be elevated, the P fed, and the killing will stop. Now we just have to get them into the satellites and change the planet. There is still some work that needs to be done to complete the systems, but it is not far away.

Mr. Keshe referred to the time when he had Pancreatic cancer some years ago and that experience was explained in detail in past teachings. The main point he is making today is that when you yourself have experienced something like cancer or a terminal illness, and if you are in a way, given a "death sentence" by doctors, and if you deeply process and understand all the emotions that go with it, then you will have a direct connection to those emotions. If someone comes to you who has cancer or in a similar situation, then your advice, or even just sharing the emotion with them, will have a greater power than someone who is just speaking words without knowing the experience or the emotions. In fact, he said, your sharing of emotion with them could change their condition, that's how powerful it is. You are transferring the energy of that emotion to them. If we think about it, maybe that's why people who write 'self-help' books on things like overcoming cancer are able to reach larger audiences. Personal experience is a very high level of knowledge, but more than that is personally having experienced the emotions in a sincere way. He called it a hidden enlightenment. And this ties into emotion, intellect, and enlightenment that can change Time and create a new timeline.

It's a little strange to imagine such high level Beings sitting around a table and having a meeting about their work. I guess we might think that they should already know everything instantaneously. I am sure they actually do, but this is how we can understand it in our physical dimension. It seems like his peers of the Unicos were not complaining, but simply wondering why it was taking so long to change the Man. Mr. Keshe said it was necessary to take time with the Man because he is like the slowest creature in the U. The most encouraging part of the conversation was that his Soul peers actually confirmed that humanity has started to change and they were encouraging Mr. Keshe to go a little faster. So it's true when Mr. Keshe teaches the whole U benefits, because this Soul said, that as humans are getting enlightened, so are they. The implication was that last time the elevation didn't work, and this time it will. And then there is the process of getting the Universal Community to accept that the Man has really changed. This was a beautiful gift because rarely do Masters share these kind of intimate details.

We are seeing the last skirmishes between religions as they destroy each other by themselves. We know the Vatican is funding the Israelis to attack Iran and help to totally conquer the Moslem World. It will be hard for the Christians to accept the Israelis destroying a Christian church with the faithful inside. But as Mr. Keshe said, the script is already written and the world leaders, or the physicality of the Man has to follow it. Then he told the story of how the Traditional Jewish families and not Zionists, who over centuries have a good relationship with Palestinians are now being brought out of Israel by them. The Palestinians are taking them through their tunnels to escape to Europe. They are mostly doing it out of love and not for money. This is the sign that there is still hope for humanity.

Other Topics:

A Chinese proverb states suffering makes a man think, thinking makes a man wise, and wisdom makes a man rich. We are giving you that wisdom so you will feel the richness, which is the essence of the elevation of the STM, and not 'money in the pocket';

Enlightenment is not just by getting knowledge. Enlightenment is by knowing oneself. This is the next step in the teachings;

Thanks for listening.
