

Importance of Understanding Time - Compile Book - Onion of Time All Connected - How to Experience Soul with CR Balls - Upside Down - Aftermath of Israel Iran War - Universal Mass - Nuclear Elevation - KS Donates Million Shares

Introduction to 596 KSW

Note: Not checked by KF interpretation by KS of KF Brazil

The teachings on Time continue to expand and today Mr. Keshe stressed the importance of understanding Time if we want to live in the Universe (U) and be able to transmute and feed ourselves. It is so important that he has requested Knowledge Seekers (KS) to compile all the recent teachings on Time into one file and make a book out of it. For us as humans we only considered time as the speed and number of rotations our planet makes around itself and the Sun, which we measure in the physical dimension (D) as seconds and all the rest. Physicality (P) Time is the lowest form of time, but it cannot exist on its own without the Time of the Soul or the Energy. As we are brought up to only consider ourselves as physical entities whenever we experience the Time of the Soul we treat it as something strange, and to not be ridiculed by others we deny it, just as we deny the existence of the Soul. We pretend to be only physical bodies, but with the emergence of the Plasma Science and Technology that is slowly changing.

It's not easy to ponder about Time without constantly wondering back to minutes and days which refers only to this planet and our body. In the U they don't even call it time. Instead, they refer to time as the confirmation of existence of the manifestation of an entity, or a life form of any shape, it's not just a physical body. And just as life exists as Matter and Energy state, so too does Time exist as both as Physical Time and Energy Time, or Time of the Soul. It is my understanding that when Physical Time manifests there has to be a Soul there also, but with the Soul it is different. A Soul can manifest only as a Soul with its own Time and dimension, it does not need to manifest physicality. This is very important to understand especially with learning transmutation. Everything in Creation follows the same pattern, you cannot transmute only a physical entity, because it cannot exist without a Soul and even a stone has a Soul. So if time is not really minutes and seconds, then what is it? As we were taught from the beginning Time is the M field strength of the Place, Position (entity), and Possession (strength of the AA of the entity), and is the emotion, intelligence, and enlightenment. That's not an easy "yes or no" answer, it requires knowledge, understanding, and comprehension. If we try to feel it, it makes more sense. All we have to do is to think about our dreams and what they are, and how could they manifest. Instead of ignoring it, we can say to ourselves, so that is what a M field interaction is. It's like a subtle energy interacting, even though we usually watch it happening, sometimes we get the feeling that we are part of that dream. Well if I am not part of it, how could it even happen? Learning Plasma Science is not like how we

were taught in school to just memorize and accept things without questioning. And in that system for sure, you don't want to actually feel what you are learning. Can you imagine saying to the teacher in class, "I can feel the consciousness of an atom." If they all didn't laugh at you, then they would want to punish you for being a disturbance.

The interesting part is that the Soul's life is existing and going ahead simultaneously with our physical life. It's like we have 2 different Beings living inside us at the same time. In a way, like Siamese Twins but at the Soul level. This is what we call a "schizophrenic" life, at the same time we are talking, walking, eating, or whatever, the Soul is living its own life in other dimensions. Please don't become frightened by hearing this. In a very short time it will become a natural part of our life and society. We already experience this in our daily life but we give it different names to deny it. One of the things we call it is premonition. We call home because we feel something is wrong, and when we call home we find out we were right. Or we can get inspiration and discover new things that help us in our work. Many times it is our Soul taking care of us and helping us develop ourselves. When we learn how to use the Time of the Soul we'll be able to create the energy we need instead of having to go to the supermarket to get it. The Soul has evolved much faster than the physical side even by billions of years. Maybe that's why they feel so different from each other and the work of the Soul seems like magic. The Soul tries to connect to the P, but after so many times it just gives up. And when it needs to do something the P has to follow, and it wonders what has happened.

Every time we create a new dimension of fields, we create a new Time and all these Times that we have created run simultaneously together. This implies that we are creating new Time periods all the time without knowing it. This needs more clarification. If we create a dimension through the M fields of our emotion it will have a starting time and a finishing time. These Time periods could overlap with each other, and if we have plasmas within plasmas we could also have Time periods within other Time periods. For example, our Soul evolves and rotates in the dynamic structure of the Soul of the Creator (STC), but it still has its own time. Likewise, the P is on Earth, which physically rotates in the Solar System (SS), which is in the Galaxy. Our Sun connects to the Galaxy but it doesn't tune directly into its cycle. I wonder what that means? It has something to do with the pressures and strength of the M fields. Because then he started talking about clusters of stars in the Galaxy that have their own Time. And when we travel in the Soul D we have to go through these clusters. The Soul can do it because it is made up of a multitude of many M field strengths, and if needed the Soul can go deeper inside and connect to the strength of the STC in the center.

The reason they are teaching us about time is because we can create Time and through it transmute and feed ourselves. We have to train in how to use, create, and change M fields strengths and it has to do with our expectation of the field strength. It's deeper than just saying I want to go somewhere. There must be something inside that connects to our feeling and emotion and then being sure about it. But also knowing that one is correct in their ethos and behavior. Mr. Keshe is developing the technology (T) to help us develop our own inner skills, which we already have, but are denying it to ourselves without knowing it. And it's also part of learning and growing, and that is the example of going

from a village to a town, then to a city, and eventually traveling the span of the U. It's the same body that passes through these experiences, but we learn to make a decision about how to use the M field strength. When we can bring the Energy Time and the Physicality Time together then we can create Time for transmutation.

He spoke of another way to do it where we don't need to go through the Energy Time. There is some kind of trick or method to travel through the Time itself. We can travel through what connects all the Times together, but to do that we need to tap into a higher strength field. This is a kind of 'back door' that the Soul of the Man (STM) can do by connecting to the Soul of the Physicality (STP) and P, and traveling that way. He said, this is what narcotics do, they create a higher order energy to the brain and then connect to the STM through a higher field strength and create the Time of Hallucination. But this usually leads to addiction and other problems in the physicality. We have this ability already with us so we don't need the drugs, which then become a denial of our own abilities. Every cell in the brain has its own capability and power to ?? connect to the STM. We don't need the drugs. This is what the KF Headsets do, they expand the STM and connect the lower order energy of the P to a higher order energy of the Soul and create a new Time.

He again used the analogy of the layers of an onion. The outer layers are fluffy and weak compared to the inner ones that are tight and strong. The strong inner core of the onion pushes the fields to the outer edges where they manifest P. That pushing outward allows a space to open up and the manifestation of P to occur. The implication is that the growth of the onion comes through the inner core and pushes outward. In other words, new growth comes from inside and not outside like we might think. The energy comes in through the center and pushes outward to manifest physically at the outer edges. Isn't this the way our solar system works? Then he said, this is the way our Soul works. From a physical point of view the energy of the onion just magically appears in the center. No one has been able to explain that. There is a bigger teaching here. The center is like the Creator and it has no structure, but it structures everything.

He further said, that Man sits on the outer layers of this ring structure and at the same time he is connected to the center. It's the center that the growth starts from and pushes out. This is how life is structured. Each layer has its own Time from the center to the outer layers. And each are connected through the fields with each other and to the center. This is how Time is given for all to exist, and how all the Times are connected to each other. We might think they are separate but they all come from the center and are still connected to it. The center is the original Time and because all the layers are created from it, it harmonizes all together and allows each to have its own Time. Internally, each layer can go straight to the center without having to go through all the layers in between. In this way, Time is the key to traveling to the STC where we become part of the Creator. This analogy of the onion also shows that we can travel through the Soul of the others. And as a KS said, she was able to feel herself inside another Soul and could feel what that Soul was feeling. This is how the Daughter of Mitra was created. There was no physical penetration, it was the interaction of the fields of the Souls of the highest order. At death the STM gets rid of its attachment to P and the outer layers of the onion, then it

can manifest in any of the layers. It can become a new star, or a seed for creation, or a dust.

The Time of Physicality is created out of the PPP, and the Time of Energy from the emotion, intellect, and enlightenment, and both are connected to each other. This is why we can use the breathing to create Time, and if the Energy Time and Physicality Time get connected then we will have supernatural powers, and can feed ourselves and transmute through the energy. The systems are set to help with this in tomorrow's Flight session.

KF is creating a new system to support the life on this planet so that Man does not need to kill. He can tap into the emotion and P and feed himself what is lacking in the structure of the GM fields of the Earth. We hope to start it in July. The system will also make the body transparent so that we can see the Soul inside. The silver sphere Space Reactor we showed back in May has many flaws and is in the D of P. The new system doesn't have that and is an evolution in T. It will make transmutation possible, is information in motion, and will provide all the Man's needs, and at the same time elevate the STM. We can create Time between the STM and the P, but we won't touch the physicality. We only deal with the emotions of the STM and the STP.

It was very nice to hear a KS tell her experiences working with the Cosmic Ray (CR) Balls and how Mr. Keshe answered back with important knowledge of the Soul and shared some of his personal experiences that started at a very young age. It's not a matter of just purchasing the CR Balls and expecting them to do it for us. This KS worked diligently for one and a half months trying to feel one with her Soul and using the CR as a tool. I think of the CR as very high order fields, or in a way, "virgin" Fields from the Creator. Mr. Keshe has the knowledge to access them and convert them into a technology so that we all can access them, if we develop the right inner attitude and emotion and work to fulfill it. She said, she reached a zero-point field where she could let everything go and be one with her feeling. Her question was how can she know she is in the zero-point if there is no "me"? And then on that same line how can she direct the fields?

Mr. Keshe answered in a way to direct us to think about what our consciousness is, and how it works. In the same way that the Soul and P each have their own emotions, they also have their own consciousness. And that the Soul's consciousness is far more aware than the physicality's consciousness and it understands the totality of Creation. While listening to this part over and over it occurred to me, that it is the physicality's consciousness that has the doubt about what it is experiencing, and not the Soul. In a way, we are using the wrong instrument to understand what we are experiencing. This is where a true Master like Mr. Keshe is needed to guide the student through the maze of experiences in the correct way. If the Ego is the guide then confusion and problems can develop. One of the ways we'll know that we have reached this zero-point is that we'll become detached from the P and we'll "see" it below us and it will feel as if our P is cocooned in the energy, like in the womb of the mother. And we will feel that we are part of those fields and not separate like when we submerge ourselves in water.

The KS said, that one time she felt she was in the womb and was wondering why she was upside down. He replied, that this was an indication that she really did experience this because she can describe the feeling of it. The reason the STP is upside down is because the STM is stronger and more aware so it is on the top side. And like the Yin and Yang symbol, the STP is on the bottom. And this is the way it is with the Mother on top, and the baby upside down in her womb. I wonder if the Children of Mitra will have a different feeling because they are identified with the Soul, so they wouldn't feel they are in the position of the STP, upside down in the womb. As a child Mr. Keshe used to experience being upside down when he went into the Soul D. Then he figured out on his own, that energy fields move in one direction. The implication is that if you embrace the STP, you'll become one with it. Would that mean we won't leave it behind at death, because now we are one with it? The biggest problems for us to reach this stage is having the fear of it, or not knowing what it is about or what to do.

Earlier we talked about the layers of the onion and because everything is connected to each other we can go into other Souls. This KS confirmed that she was able to enter the Soul of a little girl she physically saw on her bike in the village. Mr. Keshe never explained why it was important that she saw the girl physically. Maybe there is a difference between that, and entering a Soul completely from the Soul's own dimension without the physical dimension. Then there is the possibility of gaining access to that Soul's knowledge and emotion. But this should only be done with their permission. It is not mind reading, rather it is making a connection to that Soul. The example of meeting strangers in a café and learning from them and exchanging information is similar to how the Soul's work. At Mr. Keshe's level he has the power to actually change peoples conditions if he wants to. But he said, he doesn't interfere because he knows that, that Soul is developing and learning in a certain way. He totally respects that, and doesn't interfere even if he has to suffer from it.

This testimonial makes it very clear that humanity has already entered into a new level of evolution for its spiritual development. Now with the Plasma Technology we don't need to spend 20 to 30 years of doing vigorous spiritual practices in a silent place in the wilderness. But the problem remains of how to quickly mature to be able to integrate what we experience through the T. This KS is diligent and seems to be mature enough to know that she has to work hard to develop herself. What I understood about the past, was that the main purpose of serving a true Guru for many years was for the Ego to be humbled and give up its arrogance, so that it can receive the higher order fields. And of course, develop love and devotion for the Truth. How is the modern "eternal teenager" society going to do that? Or will it be that when one Soul "flips" the others will start flipping, and the Soul will takeover the P and force it through? I think only a Master as great and knowledgeable as Mr. Keshe is able to find a way out of humanity's dilemma. Today's teaching has given us so much hope, and now it is for us to make the move and use what is being made available. He advised the KS to practice, practice, and more practice. This was the reason they released the CR Balls and all this new T.

The war started by Israel and America and 19 other nations against Iran ended after 12 days. If we only listen to the controlled mainstream Media it will be very hard to

understand what really happened. Mr. Keshe gave a detailed explanation about it that will be hard for Westerners to accept. He also said, that the Militaries involved and others are online listening to this teaching to find out what actually happened. From past teachings we learned that Vatican is secretly financing the weapons supplied by America to Israel and the Middle East, with the understanding that they will get the gold in Iran's Central Bank. But more than this, it was a war of religions to see who is superior and the orders to start it were given by Vatican.

The reason it started when it did was because Iran's State Security was able to get 2 truck loads of physical documents out of Israel that exposed their entire government and defense system along with their 90 nuclear warheads. The documents exposed the corruption of Netanyahu with implications to Trump. Israel made a surprise attack together with executing officials and scientist trying to start an internal revolution to change the regime. If we analyze the news carefully we see that Iran's counter attack was very specifically controlled and calculated, as if they really did have detailed information. We'll just give a brief summary of Mr. Keshe's explanation. The intent of the Iranians was to show that for every attack by the Israelis, their response would be a hundred times worse. Iran was able to destroy the nuclear bases they put under Military Hospitals with thousands of military scientists, nuclear physicists, and others responsible for making weapons. They hit Mossad headquarters, Military Port of Haifa along with the refinery, Microsoft headquarters, Biological Weapons lab, and many more. Israel lost 40% of their military scientists, which we hope will result in peace for the region. The devastation is beyond imagination and 3 more days the country would have been totally destroyed. However, you will never hear about this in the Media. When all these devastations were occurring, Trump decided to 'Carpet Bomb' Iran with thousands of tons of bombs like they did in Vietnam. This was totally against International Law, and even his own officials said they have no proof of Iran having nuclear weapons. See the Quick Index for more details. Wiping out the world's center for Biological Weapons lab with 1,500 scientists, who are in a way, 'doctors of death,' was a gift to humanity. But why didn't Iran use the plasma technology? That question remains to be answered.

Mr. Keshe laid out a new system of collecting a 10% sales tax on items that use plasma technology, that would be paid to the inventors. In the same way we pay royalties for music played, we'll pay scientists for their knowledge and helping humanity progress. This will put an end to patents, which the Europeans devised as a way to get access to others knowledge. If the invention doesn't work nobody will buy it and no taxes will be collected. So it will only effect true scientific inventions that improve peoples lives. There are different approaches to it that will be worked out in the future. At the moment, all contracts signed with Markray will have this 10% Intellectual Rights tax to be collected at the point of sale. The funds collected will support scientists and advance research and improve life on Earth.

There were some important plasma teachings we'll briefly summarize. The reason the Mass is a constant everywhere in this U is because it is dictated by the central field forces of the U. Each U has its own Mass. For example, if Cu is 9 in this U, it might be 20 in another. He clarified that there is not a Black Hole in the center of our U, instead it is like

an elongated ray going in a specific direction based on the field interactions with the Unicos. Because our U is moving inside the Unicos its central field forces are stretched out and this causes the U to be elliptical, or like a flatten shape of a UFO and not spherical.

Our scientists only have half of the understanding about the nucleus. They think there is only nuclear decay where the atom loses energy and splits into two new atoms of a lower order. They don't know that the nucleus can also receive energy and become 'Nuclear Elevation.' For example, Cu can increase and become a gold which is a higher order. Nuclear Elevation is not what they call, fusion. Fusion does not exist. Nuclear Elevation can come from Cosmic Radiation, which is different than Cosmic Rays. Energy that is released in the nucleus can also be used for Nuclear Elevation. You can see details in teaching and more will have to be explained in the future.

Other Topics:

If you bring the Time and energy into the D of the Time and physicality, you will see the features of the Creator;

A large number of Markray shares have been reserved for those KS who served the KF over the years. They have kept a list and will give a gift of gratitude;

A Knowledge Seeker offers KF 1 million in Markray shares (about \$120,000) to help solve the current situation;

Thanks for listening.
