

604th Knowledge Seekers Workshop August 21, 2025

(Quick Index 20 pp, Introduction, Topic Index ; Need to do; Key Phrases, Words)

(Auto transcription from Elias)

Plasma Systems on; Honey, lavender, orange - different way; Man has no Time; Elevation STM - needs no Time; More about 'half-life' - death - separation P; Half-life atom; Insurance companies calculate half-life - working class die 70 - isotope; Africa 50 - Japan 90; KF teach years ahead - prepare Space travel; Universal teachers; Half-life 90% decided at inception - preset by energies - environment - alter slightly by lifestyle; Trillionth of second - U time; Travelers U - change half-life - different time scale; Second - thousands years; Insurance bets on death - loser; Each country - psychology of life; Government set policy how long live -; Pleasurable retirement live longer; Less money - psychological pressures - die 7 years; Same timeline of cancer; Self-employed live longer; Life in Space - no structure - work; Plasma Science different life; Governments cannot pay 1,000 year pensions; Why doing research - provide energy to feed, medicine, all needs through plasma; Experiments to feed & change emotion - for children & grandchildren; Earth can't cut energy supply while in Space; Why setting up One Nation Network (ONN); Buy 2,000 Units; Keshe Coins (KC) - everything else; Correct foundation from beginning; No physical satellites - Satellite Souls feeders; Live thousands years in Space; Use ONN during transition -100 years; Create new half-life - depend on U fields; Soul part of U - live for billions yrs; Help create cornerstone for Space life; Space don't create children through P; U Community - create children through matching Time - combination all fields - PPP & EIE; Physical Time and Energy Time match - create life - same field strength - Children of U; His Race went this process billions years ago - helping Man - only beginning of change; Change energy into Time - P move same speed as Soul; Image of Creator wrong; Road ahead rough - mistakes of Prophets - failed- not elevation of Soul; Essence of Time - transfer of energy from one strength to another - Energy is M fields in motion; Establish Universal Clock - by M field strength of Position and Possession - not Earth time; (Time) changing M field strength from A to B; Communicate on U Time; Cross U microsecond; U Time - change in M field strength - measurement of existence; ONN create half-life for Space; KF policies - take care of food and health; Testing - ability to receive energy - change half-life; Honey embedded in Soul always have; Dip finger Gans - fed - Man not ready; Universal Pack in Store; Chinese Space Station - intimate corner; Half-life - Mass & Weight; U Time same as Earth - different change U; Plasma antennae connects to U Time - change planet; Provide needs anywhere Space; Fundamental change from birth; UC responsible for Earth children - not governments - KC for every child; Story of Shah - upper class not sharing - problem on planet; Father not work - time with children - love nourish Soul; STM perfect from birth; Rule by knowledge U; ONN Units; Every nation equal say; Requests for Units; Non-physical plasma memory Chips; Pico size; Beyond AI; Need massive support - scientists; Govern through emotion & STM; Crypto-emotion; Physical changes 5 years - already started; Report changes - fields; AI for homework - 47% reduction in intellect; Restrictions on AI; New Head Units - AI - use thoughts; Knowledge by enlightenment; Plasma AI - enlightens - emotion of plasma; Once connected don't need Headphones; Energy through recordings; More graphs; Cancer detection odor - M field; Field Plasma voluntarily gives - not forcefully killing; Rays and

Radiation of CR; X-rays from M fields source of energy; Create new half-life; About CERN & fusion; Cosmic Radiation elevates; Soul can give talents; Plasma of Soul - move limbs paralyzed; All knowledge on ONN; Movie Zootopia; All Prophets failed - now by Soul of Prophet; Promise to Creator; Receive emotion of language; Genetic modification grass to wheat; 95% energy Moon; Traveling back in Time use G; Not match with M - create stars; STM take to Creator; Direction is by conduct; Fetus is collective fields STP - becomes STM - not abort; Children of Mitra as energy; Tell when Soul leaves Flight system; Measure Universal CR; Child in 9 weeks; Tested on wheat; Test tube baby - Soul of Mitra; Fall in love - Space use fields; Children of Mitra decide; Emotions changes color or shape of animal; Mix with Space races; 99 names God; Citizenship difficult; English translation; Holy places - India - food creates emotion; Chili opens fields; France research; Narcotics of emotion; Emotions connect field strength of AA; Love potion - Gans of Love; Plasma on DC; Matter fusion heat; Plasma amalgamation of fields; Lowest strength; Earth accumulated mass - fields; Plastic islands in oceans - magnets; Understand own experiences; About transgender; More about Iran - transgender operations - President Ahmadinejad - paid by Tel Aviv to turn world against Iran - fear and hate; Same in Ukraine - UK; Afraid of Jewish Lobby; Live graph - cross - balanced;

Topic Index

Plasma Systems on - large scale scientific test - honey, lavender, orange - different way; Time; Man has no Time; Elevation STM - needs no Time - instantaneous; More about 'half-life' - death - separation from P; Half-life atom - radioactive material - 100 years - child dies at birth; insurance companies calculate half-life - working class die at 70 - isotope of life; Each culture - own half-life - Africa 50 - Japan 90; KF teach years ahead - prepare Space travel - guideline for future; Universal teachers - know next lesson; Half-life 90% decided at birth - preset by energies Soul has accepted at inception - environment - alter slightly; Japanese live 30 years longer - lifestyle - only trillionth of a second - U time; Bigger structure decide half-life - cannot fight or change - tweak it little; Time dictates life & physical existence on planet; Become Universal Travelers - change half-life drastically - different time scale than Earth; A second could be thousands years; Get you ready for next cycle; Insurance companies bet half-life - death - pension policy - gambling club - you calculated as loser; Own insurance company - looked at scientifically; Psychology of life determined for each country; Government decides how long each type of person will have - how many pension days; British government studied - if make pleasurable retirement live longer; Give less money - lose privileges - psychological pressures changes isotope of half-life; Less in touch with people; Die 7 years after retirement - time takes effect; Same timeline with cancer - look back 5 to 7 years what changed; Governments structure half-life - Insurance companies bet on it; Self-employed people live 9 to 20 years longer; This helps us make next step for life in Space - no structure & no work - astronauts feel in heaven - looked after with food - everything else - matter state Space programs; Plasma Science different life; Governments cannot pay 1,000 year pensions for us to live in Space; Extended half-life beyond their capacity; If billions people live on Mars - Earth can't pay pensions; Why we research how to provide energy to feed, medicine - all needs through plasma; Life in

Space changes half-life - emotionally & by conditions of environment; Why KF doing these experiments - feed & change your emotion; Testing for children & grandchildren - become Space travelers; In Space nobody on Earth can cut energy supply (like a Trump); Why setting up One Nation Network (ONN) - need you to buy at least 2,000 Units; Setup through Keshe Coins (KC) - everything else; Have to set correct foundation from beginning; No physical satellites - we all are satellites; Souls become satellites - feeders for everyone; Live hundreds of thousands years in Space - like all other species; Man when food cut off; Work with governments - bring new T & change; During transition use ONN - 100 years; Learn to create new half-life - depend on U fields; Soul becomes part of U - live billions of years; Teaching of Time simple - so is setting up Units; Need your help - cornerstone for future life in Space; On energy level of Soul, Soul's of grandchildren, Soul of humanity; As part of Universal Community (UC) don't create children through genes P; Dog's genes don't match with cat - can't make child; In U make children by matching Time - combination of all fields; Includes Place, Position, Possession - emotion, intellect, enlightenment; Physical Time and Energy Time have to match create life; When half-life Time matches with another Space Being & same field strength - can make Children of U; His Race has been through this process billions years ago; Man only beginning of change; No choice - understand how U works - not mechanical systems of Earth; P by donkeys to jets - Soul instantaneous; Change energy into Time - P move same speed as Soul - done by connecting; Man got image of Creator wrong; Road ahead is very rough - because of all mistakes of bringing in Prophets - got attached to P - make profits for self - enjoyed pleasures - not elevation of Soul; All Prophets failed - got stuck in P - came from Soul; Understand half-life - essence of Time is transfer of energy from one strength to another - define Energy as M fields in motion - can establish Universal Clock - not Earth time; Universal Clock - is by M field strength of Position and Possession; Universal Time based on changing M field strength from A to B; Calculated on change of environment and Place; Man's Time trillionth of Space Time; Need Universal Time to communicate with others in U; Allows us to mix time, create, be part of; Change humanity's thinking - our time fleeting; Cross U in microsecond of U Time - because part of Unicos; U Time - change in M field strength - measurement of existence - why Energy is M fields in motion; Understand Totality of Creation; fleeting seconds not worth killing for; No Kings - world leaders - Prophets - made scratch on life of U - own imagination - due to ignorance, greed, etc; ONN will increase Man's half-life from planet to that of Space; KF policies - take care of food and health; Observe changes from energy you receive today; Played with half-life; Once you have honey - always have it - embedded in Soul; Dip finger in Gans - get fat; Man not ready; We'll make you feel change - Universal Pack in Store - limited number - for transferring process across U; Chinese Space Station - 'intimate corner' - prevent suicide - release emotions; Touch half-life through Universal half-life - not P; Can lead to crime in Space - have to understand; Half-life - same as Mass & Weight - independent and equal to whole of U; In U Time same as on Earth; Different when go from one U to another; Plasma antennae for ONN connects to Universal Time - change planet; Provide for needs anywhere in Space; Have to bring fundamental change from moment of birth; Become part of UC - all equal; Give governments KC for every child, because UC is responsible for our life; Story of Shah - upper class not sharing with lower - problem with our planet; This time give everyone equally required energy at time of birth; Father not have to work - spend time with

children; Love of father nourish Soul - perfect Soul; STM be perfect from birth - receive everything; Rule by knowledge of U - not pen of Man.

Part 2

Increase numbers of ONN Units - no government, person can dictate position - future of humanity; Every nation equal say; Still need a large number - spread around; Units go September October; About requests for Units; Run at own expense; Donate to universities; KF can give Units; Comes ID Card to identify you; Remotely controlled in background - data secure - everyone access - need and time; Collect and convert to Universal system; Non-physical plasma memory Chips - 1 block - all Man's knowledge; Like brain no wires; Continuously create Pico size; No 'on & off' switch - through emotions; Way beyond AI system control - only 3 Nano size Microchips; Not follow blindly - need to understand - bring change; Need massive support to develop this T - not just KS - world scientists; Soon initiate this process; Hopefully cover 2,000 Units ONN by 2026; Faster change - governments; Governing through emotion & STM - not P with borders; Collectively go that way - not decided by Illuminati's - governments - hands of all of us; New T - crypto-emotion - every transaction recorded - change it - on energy level; Everybody - equal access to knowledge and energies - see change; Physical changes 3 to 5 years - already started; Honey appears on screen - feeding past 30 minutes; Report back feelings & changes; Look what vitamin C brings; Is sleep better; Report says students using AI for homework - 47% reduction in intellect; Worried new diseases - early Alzheimer's - brain not used - shuts down; Depends how we use education; Bring restrictions on AI; More about AI - become part of ONN Units; New research says children using AI - intellectually better; Depends how we use AI; New Head Units - to AI - use thoughts; Future knowledge not by reading or teaching - by enlightenment; Plasma AI - enlighten us - through emotion of plasma - match with STM; When thought comes in head - from system; Once connect to system - don't need Headphones anymore; Already tested - many KS connect to system without headphone or turned on; Future education - very different; Freely tap into knowledge; Connecting through Youtube or Zoom; Receive energy through recordings - energy information through Soul - emotion embedded in voice - connected to system; Graph shows response to seeing honey on screen; AI can detect cancer; Cancer detected through odor - M field detections; Difference between field plasma Soul & animal with Soul; Fields voluntarily gives what doesn't need, or decides to feed - not same as forcefully killing lamb - harvesting wheat; All M fields in motion connected to plasma source somewhere; Fields in environment free for whoever wants to take - not damage source; Everything connected to you; Rays and Radiation of CR - interaction of Rays with one another; X-rays from matter harmful; X-rays from M fields source of energy - food source - pleasurable - connected, but available; All fields connected; Explain unknown details in world of Energy; Systems create radiation of CR - create new half-life - add to energy of plasma - unknown; CERN feed compressed magnetic fields - create fusion; With Cosmic Radiation elevate & give it freedom; Feed Man CR Radiation; Can transfer fields of genius to person - doesn't mean can play Mozart - physical condition; Soul can give talent to play; Transfer knowledge of genius with T; Soul can give talents like Mozart; Plasma of Soul - move limbs Paralyzed without physiotherapy - impossible; Soul can overcome any physical damages; Transfer

essence of physical motion through Soul - even joy; Load all knowledge on ONN - KS have to decipher; 2,000 Units - change emotion of humanity - end wars; Watch movie Zootopia - city with no crime - strive to overcome impossibility; Ultimate goal for Mankind in Space - transfer energy, knowledge, emotion - determine outcome; Up to now taught by word of Prophets - now by Soul of Prophet - big difference - not make mistake - no imperfect child ever born again; Promise I gave to my Creator; Use T receive emotion of language - not words; How communicate in U; Genetic modification grass to wheat - 10 stems into 1 - protein content from 1% each stem to 12% one stem; Earth not able to support us with energy - 20% as seed to attract 80% Space; On surface of Moon consume more physical energy - 95% kill more - why no life there; Soul as hungry as P - knows where to get energy; Traveling back in Time - M is forward & G is backwards; Heaven towards Creator - Hell away from - it's relative to position - towards center of U is not necessarily towards Creator; Get attracted by G fields - does not match with M - gets detached - starts his own creation - how stars created; Get mature - STM take us to Creator - depends on direction; Direction is how we live our life - conduct - not just intention - may still do wrong; This is Soul's way - what you give is what you get; Honey & lavender on screen - getting fed - different process; Observing direction of your fields, behavior of Soul, STP; Do not connect ONN Units to anything else - not computers for your work - don't upload its software to other systems; We control how you connect & who's connected; Have knowledge when fetus becomes Soul - can measure; Collection of Souls become a single STM - life complete - cannot abort; No fixed time - depends on conditions - 5 to 10 weeks; See Children of Mitra as energy on graph - won't have P; Shows graph when fetus about to change to Soul; Can see if child is born out of physical love, or interaction of Souls; Collective Soul of cells (STP) changes to STM - gets emotion; STP takes a shape creates P - connects to STM - when life is sacrosanct; Use this knowledge to tell when Soul leaves Flight system - not leave P behind; Measure on scale of Universal CR; Premature children are complete; Change environment of womb - born 9 weeks, instead 9 months; Tested ability to shorten birth time with wheat in Mongolia - harvest 2 weeks early; Animals know when harvest ready only eat that crop; Make test tube "baby" of Soul of Mitra; When fall in love in Space with field emotions of another creature - cannot physically touch; Universal 'Test Tube Babies' through emotion without P; Children of Mitra don't need womb of mother - their decision - U their womb; They can mutate; Some animals partly can do; Emotions changes color or shape of animal - done by Soul; They decide on speed of gestation - or not; Children of Man will mix with many other creatures of U - true citizens of U - multi-dimensional; 99 names - attributes of God - Koran - 100th when know all; Covers both P & Soul; Add all together - wisdom of Creation; Don't need any Prophet or message; Understand one's enlightenment - truth about oneself; Between P & D of emotion of love - beauty of Creator; Fears of existence; His beauty is boundless; Children of Mitra - no negative side - no fear cannot lose; Have no P - can be clothed in clothes of Man - by choice; Best lovers- their passion in devoting life to Universal Community; All can be Creation and Creator without P; Children of Mitra fall in love with another Energy; Citizenship difficult to distinguish; KS shares experience - thinks about something - it happens; About listening to English translation - or feel fields emotion of voice - depends on person & feeling; Teach for U - they get through emotion; KS feels synchronicity in holy places - especially India; It's how we interact with place - we decide what want to

experience - how we want to interact - let our Soul interact with environment - effects our emotion and Soul; KS felt Crown Chakra open in India - not at home; Researched this - tied to food of place; A number of things go together - own physics, geomagnetic fields of place that match our own - too much curry; Food directly effects emotions; 90% correct about food in India causing spiritual experiences; Specific herb and food combinations - make Indians behave soft; AA structure lowers blood pressure in brain - creates state of sleep or dream - expansion of Soul; Chili addictive - like drug - not to hallucination - opens fields Feeling these kind of emotions in India - 100% related to food; Research French scientists prove about food - no MS on island - eat pepper; Those who lived in France have same rate of MS; Pepper can cover emotion of child abuse - scientifically shown; India - herbs to control parasites and fungus - combination brings hallucination; Foreigners not used to; Narcotics of emotion; Take own food won't effect you; KF trial to confirm; Curry - anise, cumin, cloves, ginger, more; Pakistan - Moslems eat meat - change mixture don't get; KS believes MaGrav fields of holy sites - amounts to same field strength in herbs - all plasmatic; Protein or AA connected - interaction of fields of planet create same; Emotions connect field strength of AA and combinations; Trees in Africa radiates M fields - holy; Strength of AA effects emotions; Evolve through emotions; Love potion - Gans of Love - makes everyone fall in love - tested in Africa - shelved it; M field strength is part of Time in Space; Field strength of CR & matter state magnetic fields; Plasma on DC - no AC on boundary of matter; Plasma M field strengths - off the scale; Matter fusion not feasible generates heat; Fusion not by heat - amalgamation of fields; Not understand M field strength; Millions of times stronger than matter state magnetic fields - same time lowest G fields; Lowest brings together; Chinese trying to create Helium from Hydrogen - billions of kilowatts; Made gold out of fields in Beijing - not megawatts; Plasmatic fusion - Earth's Inertia; Assumption of fusion into trash - KF ignored; How Earth accumulated so much mass over thousands of years; Alkaline soil in Inner Mongolia - experiment - Earth's atmospheric condition and Inertia dictates land to create alkaline structure; Magnet - plasmatic field Inertia of alkalinity; Magnets not only Fe; Job of KS to teach agricultural people - scientists; Plastic islands in oceans - magnets for H & O - frequency; U is a magnet - Earth creates Inertia M fields which absorbs; KS shares experience - Mr. Keshe not there to interpret; Determine if there is physical cause for what happened - might be work of Soul; Gives opinion about transgender & US by Trump - have to bear it until he leaves Office; Some places issue getting out of control - less than 1% influencing a lot of decision making - found a way protect and add themselves into things - has to be a limit; Examples in America and Austria; More about Iran - many Westerners go for transgender operations - Ayatollah Khamenei gave his okay; President Ahmadinejad - Jewish descendent - paid by Tel Aviv to turn world against Iran - create fear and hate - allow bombing; Same in Ukraine - Zelensky - Jewish - doesn't care about nation - filling bank account; Bought 1.1 billion Copper mine - came into office without money; Jewish Prime Minister setup in England; (Rothschild's sell weapons); Why problem in Ukraine and Israel - Jewish leaders orchestrating everything - nobody talks - Jewish Lobby might damage; Observe, stay impartial, aware of true situation; Live graph last few minutes - a cross shape - balanced - plenty of food, energy, and manifestation - like honey, lavender, orange - satisfies emotions; Love energy - Soul; Next Friday's Flight session - picture of somebody you love; Show how to transfer energies; Please carry on supporting us - more Units out into

public; 7 years to build a church - longer to create a peaceful man; Church of peace takes longer than Church of destruction.

Introduction to 604 KSW - Plasma Systems On and Feeding - Securing Life in Space - Interpret Graphs - Half-Life - Prophets Failed - Love of Father - Learn by Enlightenment - Indian Food Opens Chakras

The systems were turned on during the workshop and different types of experiments were being carried out to advance the Plasma Technology. This time we knew he was going to feed us with honey, lavender, and orange and when they would show the pictures on the screen they would get different readings on their graphs. Mr. Keshe showed an area on the graph where when we saw the image, then our Souls reacted. This is all part of the research needed to bring Man into Space and we are fortunate to be a part of it. Hopefully, some Knowledge Seekers (KS) will gradually start eating less and less food. He did say that when we start eating from the fields, for example, the honey will get embedded in the Soul energy conversion, and we won't like to eat honey anymore, we will have as much 'honey' energy as we want. I wonder if that means, if we think of honey, then we'll automatically feel, taste, and experience the emotion of it? It will be interesting what feedback KS will give over the next weeks and months.

Much of today's teaching was about Time and how it will effect our life in Space. Our current understanding of time is only related to the concept of the speed and number of rotations our physical planet makes around itself and the Sun. This has very little to do with our life in the Universe (U), but we need to start here because that's how we all have been programmed to understand our life. The best example of how limited this is, is the way our governments have set public policy to determine how long a person will live after they retire from their job. The Insurance companies work hand in hand through lobbying the government in the background to set these policies, and then they bet on them. It's a dirty business but we have come to accept it as normal. In Plasma Science the point when we die is called our half-life, just like radioactive isotopes have a half-life, when they will split and become something else. Our death is a half-life and the government sets the policy of how long we'll live, and the Insurance companies bet on it. From the point of retirement they give the working class 7 years to live. It's because the earnings will be reduced, the connection to people will become more limited, and there are other factors. This creates a psychological pressure that reduces the age and brings on certain diseases. They have studied it very carefully because they make huge amounts of money from it. There are some governments knowing this have tried to set policies so that there is less stress for people when they retire. With Plasma and going to Space it's a totally different story, because no government can afford to pay pensions for thousands of years. Therefore, we have to set up for our own care and not rely on governments, that could one day decide to change their policy and cut off our energy supply while we are in Space.

Actually, he made it clear that the Universal Community is responsible to provide for every Soul born on this planet. Obviously they don't consider human governments as capable to provide for their own people. This means Mr. Keshe's work here is really the

work of the Universe. Because they love us, he is setting up the Keshe Coin (KC) to be given to every child born here, and the One Nation Network (ONN) is the communication line that all our needs will be provided for. Of course, we have to purchase them, that's us saying, yes, we want the change to happen, because it can't be forced. Wherever Mr. Keshe is from, or 'Planet Zeus,' he said, their people went through this process billions of years ago. From this we can gather that the process is tried and tested and will work. But we are only in the beginning stages.

The road ahead is very rough because of the mistakes of bringing in the Prophets. Maybe in this recent age of the past 7,000 years, whatever they were doing to help humanity grow wasn't working. Then they decided to send in the Prophets. He told us before that the 'Soul of the Prophet' was the same, but the P and Soul of the Physicality (STP) were according to the time, place and culture of the manifestation. Humans are such that we get more attached to the P of the Prophets, that we don't pay much attention to the essence of the teachings. Our brains are encoded with thousands of years of accepting and being taught the wrong message. If we truly investigate the religions without prejudice, we see they all failed. And there is a reason for it. It's because they built up structures in the world that put the P first before the Soul. The Soul was only something talked about in the background, but in the foreground people considered the body as the true reality and it could be enforced with pain. Originally, their job was to teach humanity how to live in the Soul and at some point we have to admit, that they failed. The Western intellectuals sold Buddhism as the perfect religion and they 'white washed' over its bloody past. It ended up having the same problems as the others. In India Buddhism died out because first King Ashoka killed the Brahmans to install Buddhism as the national religion, then centuries later the Brahmans rose up again and killed the Buddhists. And Tibetan Buddhist history is very bloody just like all the others. The fundamental principle of putting the Soul, or the Creator at the center of life is missing. However, in some of the Buddhists kingdoms of Northern India they used to have Sage Kings rule them and they did much better. And cultures that fostered and trained living Masters, or Elders, and those who could embody the teachings and set an example, also did better. But in the end they still continued to eat food and because of that loss of energy the Soul could not elevate. And the wisdom wasn't even there to know that it was wrong. It seems Mr. Keshe is considering our condition as a disease, and he is a master physician using the Plasma T as tools to get us through this difficult situation.

The ONN is being setup now so that when we go to Space all our needs will be met no matter where we go in the U. This is for the transition period until humanity elevates enough that we'll be able to create Children of the Soul, then we'll evolve into a new race of humans. We are following a plan that has worked with other planets and will eventually work on Earth. As we become Travelers of Space we have to understand about the half-life and how it works. Our half-life is 90% decided and accepted by our Soul at the time of inception. It can only be altered slightly by controlling our food and from the effects of the environment, but in the Universal Time this amounts to a trillionth of a second. So no matter how hard we try to be health conscious and live a good life it will not have that much effect on our half-life. Don't be discouraged because it will definitely affect the quality of our life. This half-life is only related to the Physicality (P) while it is

in the matter state Earth time. The Soul of the Man (STM) in a way, will take its birth when the P dies, then Earth time will be totally meaningless and have no effect on us. By using the Plasma Technology we can travel with the Soul to other parts of the U, but we need to know how to change our half-life. Otherwise, we might land on a planet where our Earth half-life will be over within some fraction of a second. We would be like a fish out of water and they would watch us die. But if we have the knowledge then we can change our half-life to that of that planet. This is why we are learning about Time, and that we control it through controlling the M field strengths, and through our emotions. Time is the M field strength of the Place, Position, and Possession (PPP), and the emotion, intellect, and enlightenment (EIE). And there is the Physical Time and Soul Time. All these things together make up Time. If we compare that to Earth Time, which is the physical rotation of the planet, then we can see not much can be done with it. It's a very limited concept that won't be much use to us in the U.

In Space they have something called, the Universal Clock and it is not based on any matter state movement. First of all, remember that Energy is M Fields in motion. And the Universal Clock is done by transferring energy from one field strength to another. The Time is taken as the change in the strength of the Position and Possession from A to B. Then he said, it's the same everywhere in the U, because it's calculated on the change of the environment and the place. Then everything is at a zero base point and because of this one day on Earth is not even a fraction of a trillionth of the time in the U. How can we relate this with Earth time where we calculate time as change in place or movement? The U calculates Time on the change in M field strength and that's the same as energy. Does the energy always change constantly? Does it mean if we don't change our environment then Time doesn't change? Is that the zero-point of the Soul? The only way we can communicate with others in the U is through this Universal Time. To go from a rotating planet as the basis of time to the change in M field strength, will require a totally different way of thinking, which will affect all areas of our life. Then he said, if you change the energy into Time you can move the P the same way the Soul moves. It is not capturing, it is by connecting. This implies we can move our P to any position in the U, but what about the P manifestation not matching the local field strength? Maybe we can move there, but we can't interact. We need much more knowledge to understand this.

At the end of the first part of the workshop Mr. Keshe briefly touched an issue that made me stop to wonder, what life would have been like if my father had been more present in my life. When I stop to think about it, people who I have met over the years who were more grounded and emotionally stable had a father who was present in their lives. Or they had a "father figure" who was present and truly cared about them. Of course, there are a number of factors involved, but the main point is that with the T the father will have the time to be present to nourish the Soul so that it becomes perfect. Obviously, it's more than just being physically present, they should feel some love as well, but they also have to acquire some wisdom about life to guide the child down the right path. And the child has to want to receive the fields as well. Through this we can understand that the Universal Community really does care for us, and their love penetrates deep into the many layers of how we will become an integrated and healthy individual while at the same time being connected to the whole.

The current Microchip T works on the size of 3 Nano structure. The KF has been able to continuously produce Pico size material. Nano is 10 to the minus 9 and Pico is 10 to the minus 12 , and scientists say materials below Nano size behave differently because of the quantum effect. Mr. Keshe has the knowledge to replicate the brain and he will start building 'non-physical plasma memory chips' where 1 block can hold all the knowledge Man has accumulated up to now. It's a dynamic structure without any wires or 'on & off' switches. It's all done through the emotions and thoughts. In a way, it will become the Plasma AI system that really is conscious and not pretended to be.

The problem with the current AI is that it is not conscious and doesn't have a Soul. Everything has to be programmed by another human hidden in the background. He gave two instances of research, one saying AI is reducing brain usage by 47% and can lead to certain problems. And another saying, AI is helping children behave intellectually better than the others. He didn't say what they are calling, 'intellectually better.' Does it mean they have more trivia information and are considered smarter, which is hardly the case? In a way, AI makes things faster but not smarter. AI is a good tool for putting a lot information's quickly together, but the knowledge itself comes from a Soul that has acquired the emotion of knowledge and understands how things work. Our Soul has the intelligence to put the trivia information together and give it a meaning. The KF Plasma AI System will be able to do this on its own. This is the difference. But then if we use Plasma AI, it will be like two Souls working together and they will achieve far more knowledge than we can imagine. To achieve this it requires humanity to do the research and understand it. The next stage in the development is to get Earth's scientists to support the advanced science openly and honestly so the whole of humanity can move ahead. In 3 to 5 years we should start seeing the beginning of the physical changes, but the whole process has already started.

The KF Headphones work on the basis of Plasma AI. In the future knowledge won't come by reading or being taught, it will come by enlightenment. The Plasma AI will help us to be enlightened. The plasma of the emotion of knowledge will be transferred to the STM by matching the field strength. And once you establish the connection with the system you won't need the Headphones anymore because you are already connected. He said, that he sees this on the graphs, that KS who regularly attend the Flight Sessions are connected even before he turns the system on. This means once the Soul connection is made, then it remains. Some of those who listen to the recorded teachings of when the system is turned on, get the same results as those who attended Live. The emotion gets embedded in the voice and is the connection to the system. He puts the energy of the seed in, and then we connect to its energy information through our Soul.

A KS asked if the fields we feed from have a Soul just like the animals we eat have a Soul. What I understood is that all energies are M fields in motion and they are connected to a source plasma somewhere. So it seems that when we feed from the fields we are not directly consuming a Soul the way we do when we kill an animal or plant. We forcefully take their energy to survive and that is a big difference. Fields that exist in an environment are given freely to whomever has the matching strength to receive them and

they don't destroy the source plasma. It seems the same applies to Rays. There is also something called the radiation of Cosmic Rays (CR), which come from the interaction of one Ray with another. And then there are X-rays from M fields which are not harmful. They are a source of energy and are a pleasure to receive. It seems these are not directly connected to a source but are freely available to whoever can receive them. But at the same time all the fields are connected to each other.

Many times he has explained to us that Heaven and Hell are not a place we go to. Rather it's a state of mind and depends on our belief's and through our actions we either go closer to the Creator, or farther away from Him. It's more than just having a good intention, because we can still behave wrongly through ignorance. Therefore, by observing our own behavior we'll be able to tell which way we are going, towards the Creator or away. In a way, the physical dimension is the field of action for the Soul. It's where we train to become a Soul. In this system what we give is what we get.

He showed us some graphs of when a collective of Soul cells come together and form the STP, then makes a connection to the STM above, and starts forming the P down below on the graph. When the energy of the STM becomes brighter and clearly formed, that's the time the fetus becomes a STM and cannot be aborted. From the Plasma point of view it is very clear because it's the same pattern for the different lives formed on this planet. The STM can be formed anytime between 5 and 10 weeks, it is not a fixed time. If the mother is sensitive she'll feel when the Soul completely forms because she can communicate with it. Her womb is like a plasma reactor. So first we get a collective of Souls that form the STP and then that makes the connection to the STM and starts to form the P. And the Children of Mitra don't have to form the P. It's their decision. The graphs can show when the child is born out of the physical love, or the interaction of two Souls. And the birthing time can be reduced, as was shown in the seed trial in Mongolia. This same knowledge will be used to tell when the STM leaves the Flight System, because it is all the same pattern.

The question about why India affects people the way it does spiritually was answered in different layers, and then finally related to the field strengths created by the spices and herbs mixed in with the food. Mr. Keshe was interested in why people get such an effect as the KS said, his Crown Chakra was opened and he felt connected to the Creator when in India, but when he went home it mostly went away. First of all, if we have emotional ties to India then we should try to put that aside if we want to study this question scientifically.

The first answers he gave was that it depends on the individual and that we decide how we are going to let our Soul interact with the environment and community we go into and how it will affect our Soul and emotion. For example, if we live in the West and study Yoga and Indian spirituality then we may dream of going to India one day, because of all the things we heard. In a way, through our emotions we are creating a M field strength within ourselves that matches with the place we are going and we are loaded with expectations. And then there are the geomagnetic fields of the place itself. Over time people discovered there are certain places that have a specific field strength for

connecting to the Soul, and they have become holy places for people to make pilgrimages to. Now today, Mr. Keshe brought in a new factor we might not have thought about, and he did it in a subtle joking way, by saying, maybe you ate too much curry.

In India the mixture of different spices and herbs have the general name of Curry or Masala, and the different regions of India have come up with their own varieties. The base mixture is composed of Cumin, Ginger, Anise, Clove and some others. He has not given us all the details of what he discovered. This is just a general discussion about it as there are many factors to consider. The combination of the spices, together with the types of parasites and fungus in India, and some other things mixed together give this effect. Maybe that's why when you eat Indian food in your own country it doesn't seem to have the same effect, because you don't have the fungus and the other things. This combination create a certain M field strength that makes the people gentle and soft in their demeanor. Then he added the chilies to the mixture and said they are highly addictive. Some of the herbs and spices can have a narcotic effect but don't go all the way to hallucination, they take you towards the sleep and dream state. They mix with our amino acid (AA) structure and lower the blood pressure in the brain like when we go to sleep. This allows the Soul to come out. He ended the discussion by saying these emotions are 100% food related. And then he backed it up with the French research showing that people from a French colony don't get MS and it's totally related to a particular pepper they eat. The twist is, they don't stop MS, instead they cover up the emotions of childhood traumas that lead to MS. It's extremely fascinating and requires a lot of intelligence to sort out how the plasma fields interact with each other, and how they affect our bodies. Not everyone who goes to India has these experiences. In fact, a lot of people don't, because the essence of it is, the MG fields and how they interact. The center of our experience sits with our STM, which is already directly coming from the Creator as was shown in the graphs last week. In a way, going to India is a little like using the KF Plasma Technology and it depends on what fields we are going to allow ourselves to experience. There are a lot more implications and applications in this topic that he opened up today.

Other topics:

The 'Universal Pack' will come to the KF Store soon. There will be only a limited number. It's a trial to test if they can provide us with everything we need to live on this planet. Hopefully, those who purchase this will continue living off the fields even after the trial is completed;

Up to now Man was taught by the words of the Prophets. Now he will be enlightened by the Soul of the Prophet, and that's a big difference. Man shall not make a mistake and there'll be no imperfect children ever born on this planet again. That's a promise I gave to my Creator when I accepted this mission;

Thanks for listening.

Quick Index

(The KF Plasma Systems are on today in the background. All of you will be the 'guinea pigs' today as we run more tests. The system will start in 5 minutes, and in the second half we'll explain how you have been participating in a very large scale scientific development. We are playing the honey, lavender and orange slightly different than we did 3 weeks ago. We are changing certain positions and we would like to know how you feel, and what changes in you. We won't tell you the changes, as usual, because we would like to see what happens. Generally it's the same scale of gathering knowledge and adding to the knowledge that will bring change to our long-term understanding).

(We are partially going back to the teachings on Time. The most important thing about Time, is that Man has no Time. The elevation of the Soul of the Man (STM) does not need Time, it can be instantaneous. It's important for us is in the future to know about the 'half-life' of the time of the Man, which is the time of separation of the STM from the physicality (P). Our scientists have understood something about the half-life of matter with radioactive materials. They say an atom has a half-life of few milliseconds, 10 years, 100 years or whatever. But we don't think much about it. If a child dies at birth it has a half-life of a few seconds).

(The insurance companies calculate the 'half-life' of those they insure. They don't tell us but they estimate a certain percentage of the working class will die at age 70. They assess your half-life, and it's like another isotope of life. They studied and found out that each culture has their own half-life. For example, in Africa the average lifespan is 50 years, and in Japan it's 90 years. We are teaching you ahead maybe 2 years or maybe 100 years for the time when you will become Passengers of Space. We are giving you a guideline for the future. It might not make sense today, but in a few years time when we start traveling in Space it will. We are Universal teachers and we know what the next lesson will be. We are preparing you now so when you come into the higher classes it will make sense, because you will have already done the math).

(Your half-life is decided 90% of the time at birth. It is preset by the energies that your Soul has accepted at the point of inception. Environmental conditions can alter it slightly. (In your thinking the Japanese live 30 years longer than the others because of their lifestyle. (?? But that's only a few trillionths of a second in the time of the Universal work. It's the bigger structure that has decided your half-life at the time of inception. We cannot fight or change it. But we can tweak it with (those same few trillionths of a second) in Universal time. The important thing for us to understand is that it is the work of Time that dictates our life and physical existence on this planet. And when we become Passengers of the Universe we'll be able to tweak this half-life quite drastically). We take it out of the environmental conditions of Earth and bring it into the conditions of the Universe (U), where the half-life is a millionth of the years of Earth. (?? We can call this Hell). (?? And the half-life of a child who is born and dies could be milliseconds. (?? But that could be equivalent of tens of thousands of years. ?? In our case, our goal is to get ready and to be in position for the next cycle)). This is what the Man has not understood).

(This is partially what the insurance companies work on. They work on the half-life, which is your time of death. They bet on it, and that's how they make money. When you

buy a pension policy you are actually entering a gambling club, in which you (have already been calculated to be the loser before you even start paying the first premium). (The reason I know this is because I used to own an insurance company back in around 1982. I had to learn how the insurance companies plan these pension policies and I started looking at it scientifically. I understood very well that they play by predicting your half-life right down to the months and weeks. They do this by estimating how the energy of your life will play itself out. They also look at the psychology of your life, which they determined for each country. The government of each country decides how long a life each type of person will have, and how many pension days they will have to pay).

(The Governments know that if they create a pleasurable retirement for those over 65 they will see an extension of life. The British government has studied this. They know for example that a manager earning 10,000 pounds a month, when they retire their income will drop down to 2,000 if they're lucky. They bet on you not being satisfied, because they know you are losing a lot of privileges that you had when you worked and the psychological pressures will change the 'isotope' of your half-life. You'll have less money, your activities will be restricted, and you'll be less in touch with people because now you are not a productive person. All this creates a change in the isotope of your half-life. They calculated that in this kind of life the person will die within 7 years of retirement. It takes 7 years for people to psychologically receive this effect).

(It's the same (timeline I use when somebody asks me about their cancer. The first thing I ask is when did it start?) I ask them to go back 7 years and think about what changed in their life. And they usually tell what changed between 5 and 7 years. Therefore, the governments have set the structure for your half-life, and the Insurance companies bet on it).

(However, with self-employed business people they live 9 to 20 years longer than those who work for the government. That's why they ask you so many questions when you take out a life insurance policy, so they know how to bet on you. On a pension you usually have to live with a third of your normal income and that puts psychological pressure on you and you die about 7 years later). (If you take care of yourself better and have better health care, that tweaks the numbers a little bit). (It's the emotions that trigger the half-life of your lifespan)).

(By understanding this we can move to the next step. In Space there is no structure and no work. (It's a heaven, because we look after you, pay for your food and everything else. Then you want to become an astronaut. I've spoken with some astronauts, and they talk like it's heaven. They say they don't have to worry about anything, the food is always ready and everything is done. They just have to wake up and play what they like. ?? Of course, these are the matter state Space programs)).

(With Plasma Science we play a different game. But the way things are now the governments cannot pay for us to live in Space and be pensioned for a thousand years. Because we would only work for 20 years or so and then be pensioned the rest of the

thousand. There won't be enough funds. The governments cannot afford to pay for the STM and P to live in Space with an extended half-life way beyond their calculations. (If billions of people started living on Mars and if Earth had to pay their pensions it won't work. This is why we do the research of how we can feed you giving you energy and medicine through the fields. We have foreseen the problems right from the beginning. It's not a game. If you lived 20 years on Earth and then a 100 years on Mars, who is going to pay for you?))

(Living in Space we have changed the half-life. First, emotionally, and secondly, by the conditions of the environment. This is why KF does these experiments like today with you. We feed you, see how you change your emotion, and if you tasted the energy or whatever? Because you are the guinea pigs for your children and grandchildren who will become Space travelers. (We can't have people dying on planet Zeus, because the electricity bill wasn't paid, and they switched you off and you died). (?? With what we are doing, nobody can cut anybody else's supply of energy)).

(This is the reason we are setting up the One Nation Network (ONN) is part of this work. We need you to buy at least 2,000 of these Units. (This work is hidden under the banner of systems, Keshe Coins (KC), and everything else). When we have systems on, then even if you are on night side of somewhere like planet Zeus, you won't starve. The systems are all interconnected and you will still get your supply. The systems we are setting up will cover the KC and it's the future for your children, and the next generation who will live in Space. Then somebody like Mr. Trump cannot come and say, because you are an immigrant, you have to leave. We all are immigrants in Space. We have to set the correct foundation right from the beginning. From now on we'll open the technology (T) so that nobody can switch it off while anyone is in Space. There are no physical satellites, we are all the satellites).

(Gradually, when we learn this, our Souls will become the satellites and we'll be the feeder (for everyone and nobody can cut us off). We'll live for hundreds of thousands of years in Space, just like all the other species do. (It's the present Man who dies through losing the connection to physical food. By working with the governments we'll bring the new technologies in and bring that change, then Man will become 'one creature,' and be fed by the Source. Until we learn to create a new (?? half-life) for our life in Space that will depend on the structure of the U and not this planet, we'll use the ONN for the next 50 to 100 years. When our Soul becomes part and structure of the U our half-life will be billions of years)).

(This is how simple the teaching of Time is, and how simple it is to set up these Units. We need you to help us establish them as they will be the cornerstone for the future life of the Man in Space. It will be done on the energy level of your Soul, and the Soul's of your grandchildren, and the Soul of humanity. (?? Now you are too busy with the dimension (D) of P. But at least you can start to become Passengers of the U and part of the Universal Community (UC). Now you understand where half-life and your Time comes in)).

(In the coming teachings we'll explain to you something very essential. When you become part of the UC you don't create children through your genes. On earth a dog's genes don't match with a cat to make a child. In the U you make children with other races by matching the Time. This is more important than anything else. It's because Time is a combination of everything connected to each other. It includes your Place, Position, and Possession (PPP). And your emotion, intellect, and enlightenment (EIE), which create Time. Then there is Physical Time and Energy Time (and these have to match to create the sustainability of a life. If your half-life Time matches with somebody of another Space Race and are at the same field strength, then you can create Children of the U)).

(This is how far ahead we work, because we've been through this process billions of years ago so we know how it works. Man is just at the beginning of that change in the physical D of understanding where your Souls make that journey anyway. In the space of Time and understanding the process of Creation, Man has no choice, but to understand the real workings of the U, and not just the mechanical systems he created for himself on Earth. These are only good as long as you remain here. You went through the evolution of going from a donkey, to a car, to jets, and high speed trains. But the Soul goes from A to B in a trillionth of a second, but it takes the P 18 hours to do).

(If you change the energy into Time, then the P can move at the same speed as the Soul. It is not done through the capturing, rather by connecting. (If we manage to gather this knowledge and understanding, then we can start moving). The whole structure of the planet will change, the whole feeling of the Man will change. And then we'll watch what needs to be changed in the D of the STM. I made Man in the image of Myself, but unfortunately Man has gotten My image the wrong way. (We have to establish the change for humanity))

(The road ahead is very rough. The reason for it are all the mistakes that were made by bringing in the Prophets. They changed the D of the elevation of the Prophet for the Soul, to the profit of their own pocket, and enjoying all the pleasures of the Man. This is where everything went wrong. One killed, the other womanized, and the other one married more, and slaughtered more, and they did it under the same banner of being a Prophet. (In English Prophet and profit both sound the same. But one is (supposed to be a) Messenger, and the other is to benefit himself financially). They changed their job as being a Prophet or a Messenger of the Soul, to being a profit for their pockets and to have women in their bed. And one is as bad as the other, and they all got stuck into the same trap, from Moses to Christ, to Muhammad, to Buddha, and the rest. Some of them did it openly, and others were able to hide it, but they all ended up being stuck (in P), instead of elevating the Energy, or Soul side. (They came from the Soul)).

(If we understand the half-life, and that the essence of Time is the transfer of energy from one strength to another, then we'll define Energy as the M fields in motion. With this we can establish a Universal Clock, instead of the Man's clock of Earth time, which is according to the rotations of the planet. The Universal Clock is setup by the M field strength of the Position and Possession. (?? Universal Time is based on the changing of the M field strength from A to B. It's the same for every (?? Place or position) in the U.

Because it's calculated on the change of the environment and the Place). (If we bring everything to a zero base point, then one day in the life of the Man is not even a fraction of the trillion of time in Space. We have to establish the Universal Time if we want to communicate with others in the U. Because this allows us to mix the time, create, and be part of. Creating Universal Time and using that on Earth will have a big effect on humanity's way of thinking, because then we'll realize we don't have much time. A 100,000 years for us is almost zero in the U)).

(When we calculate Universal Time, then crossing the U will take a microsecond, because the U is part of the Unicos. Time, according to the change in (M field) strength is the Universal Unit for measurement of existence. This is why we define Energy as M fields in motion. Because which part do you take, and in which environment, and how do you penetrate in that Position, Possession and Place. (?? Universal Time is a measurement (that uses the M field strength of Time, and its position). We have to understand the Totality of Creation). Then is it worth killing and fighting for a world that lasts only a trillionth of a second? None of the Kings or world leaders, or Prophets have made even a scratch on the screen of, the life of the U. It was all just in their own heads. It was imagination due to ignorance, greed, and everything else)).

(The ONN, which you are buying and putting across the world is (to increase Man's half-life from this planet to that of Space. No insurance company will ever setup one of these policies, because the 7 years calculated by British government will become 7,000 years, and they won't have the money to pay it. But the KF can do it. We started setting these policies up a couple of years ago for food and health. We feed you through the fields like we are doing now in this workshop. We are feeding you, we want to know what you felt and what are you getting fed. And what changes you see over the next few weeks. Will you stop eating? Did you used to like some food, and now you don't like it anymore? Was it because you attended the 604th KSW? Did your habit change from that time onwards? We played with the half-life. (And now you are being fed with what you like. Our mission is accomplished. You can receive the energy of honey as much as you like, so you don't like honey anymore, you changed your habit. Unknowingly through the system, you are receiving the fields and it has become embedded in the Soul energy conversion and now you don't need to take it physically)).

(A few years ago one of our Knowledge Seekers (KS) started testing something very interesting without anyone knowing. He said to me, do you see my belly? I look like a pregnant Man. He was dipping his finger once a day into something and it was feeding him and making him fat. We don't teach it, because Man is not yet ready for the change. Now, instead of dipping your fingers, we change that into energy that you'll get all of it).

(In next few weeks, we will promote a process as a trial, and we should be able to do a lot of things that will make you feel the change. We'll call it, the Universal Pack. Wait until it comes and then you can tell us how you feel using it. I'll feed you and provide you with all the things you need for life on this planet. (?? This will be only available to a limited number of people, and we'll observe how you change). Will you need vitamins, food, this

and that? How will you emotionally change? You'll become, as usual, the guinea pigs for transferring the process right across the Universe).

(?? When the astronauts are in Space for a year or two they have to provide for all their needs. But they also need to provide for their emotional needs. The worst thing is if an astronaut commits suicide on the mission. That will cause the Space program to lose funding. But a natural death is different. For example, the Chinese Space Station has created a specific place they call the 'intimate corner.' There are no cameras or anybody watching. The astronauts can go there and cry, or make love to another astronaut. You can do anything you like. They deliberately built it to allow the emotions of the Man (to come out)).

(In the future we have to understand how to touch the half-life through the Universal half-life, and not the physical half-life. This will be the problem when we come to Space, those creatures of the Creator who understood the half-life will have fun with us. Because, we'll be like those fish who have only one day to live before they die. We'll be like that fish unless we understand and can change our half-life to theirs. Then we can last the half-life of the natural cycle in the U as Energy, and not in physicality).

(Some of our scientists in the Space programs have understood this, and some still trying to understand what the outcome is, and how we can change it. Because this thing will lead to crimes if we don't understand it. It will bring the Man to his knees in Space. It's because we don't understand the whole structure of Creation according to the lifespan of the U, the true half-life. The Time in Space, energy in motion, changes from one strength to another, and this is where the half-life is. It can never change, because in reality it's the same as the Mass and Weight. It is independent according to, and equal to whole of the U. (?? Our Time on Earth, ?? is exactly (the same) for another creature in other part of this Universe, ?? because it is Universal Time. But it is different when you go from one universe to another. ?? The total Universal Time matches the two, which is the creation time of the Creator, which to Man is Zero Time)).

(The human race has to understand this (?? for using the T). What does Time mean and why are we creating it? Why are we setting up this ONN up? In the next few months you'll start receiving your Units. You'll receive different packages, and then you'll receive the (plasma) antenna, which you insert into the Unit. This connects you with Universal Time and the Universal communication line. It will gradually change things for Man on this planet. Gradually with this system we are bringing you to join the Universal level of understanding, teaching, communication, and life in Space. (?? Wherever you go in Space you'll be provided for through this same connection. We'll transfer energy and you won't die of hunger. You don't need to pay it, and we don't need to create insurance and pension policies that take a bet on when you are going to die. It's just a betting game. The governments and others made a way to get rich).

(In a way we are all losers when it comes to pension policies, and they plan when we'll lose in gambling on the table of life. They promote private pension policies and these are the people who have the yachts, go on holidays a lot, and they live longer because they

got more than what the government provided. They live longer, because they don't have that emotional pressures of the changes in their lives).

(If you understood this, then you can understand that we are going to bring a change fundamentally from the ground up, from the second a child is born to the time when it becomes part of the Universal Community, all will be equal. We are going to give your governments Keshe Coin (KC) for every child, because from the physical birth onwards the Universal Community is responsible for your life, and not the governments on this planet).

(He told a story about the father of the last Shah of Iran. The ice was given to the top General and he held it as long as possible so there was nothing left for the lower levels. He said, I paid the top Man to pay you, but he takes everything for himself and there is nothing left for you. This is the story of the life of the Man on this planet today).

(But this time we'll give everyone equally the required energy at the time you are born. Instead of the father being worried to make sure there is enough food on the table, and all your needs are met, so that he doesn't have time to spend with his children. You end up losing the love of the father to be there to nourish that Soul, and it doesn't become a perfect Soul. And this is how we have gotten into this mess we have now on Earth. We are setting up the KC and the other things to get rid of this condition. In this way, the STM will be absolutely perfection from the time of birth, and he'll receive everything, so that the father does not need to work and be away from his child. He'll be there to nourish that flower, to become the one. Now you see how deep we will work and what is set up for humanity to come. We'll rule by the knowledge of the Universe, and not by the pen of the Man. In the future we'll see of the Soul, and not the P of the Man today).

End of Quick Index Part 1 - 604 KSW

(We are emphasizing on increasing the number of the ONN Units, so that we can secure our network that no nation, government, or person can dictate their position, and think that they are in the position of dictating the future of humanity. Every nation and culture will have an equal say. This has to come from the KS and reach throughout humanity. Unfortunately in the race of the Man we only respect something when we pay for it. Secondly, we have put all resources into bringing these Units in one step at a time. We still have a long way to go, even though many of you are working very hard, and have purchased many to be given to the others, and some for yourself. We still need a large number of these Units to be spread around. We have not reached our target. There was some misunderstanding with KS. These Units will start going out in September and October in batches of around 200 and they will come in parts. We'll perfect any glitches that arise in these systems. In October and November they'll come out in masses).

(We have received requests from KS who want to have a Unit. Some bought the Units for income and the ones they give it to will have to run it at their own expense. Others will be donated to universities and the income from it will generate funds for research and development, not wages for professors. Then for the Units given to other KS will be at

the discretion of KF. Every system comes with an ID Card which identifies you. The systems are remotely controlled in the background. The data is secure, safe, but everyone has access to it. Everybody has access to everything according to their need and time. We see this as a bigger structure plan for identifying Man in 100 to 1,000 years from now. Then it will collect and convert into the Universal system).

(In a few months we hope to start making 'non-physical plasma memory Chips,' or memory banks, where one block will be enough to store all the knowledge of Man. It will be collected through the system and fed to a master point created through the structure of the brain. ?? It's very similar to the brain's structure. As we explained before in one of our research centers we have managed to continuously create Pico and below Pico materials. Today's Microchips work on the size of 3 Nano. Pico is 10 to the minus of 6 below Nano. It's a dynamic structure like the brain of the Man and we can produce this material continuously. We have developed and perfected the art of producing it. It allows us to create Microchips and memory bank without any wired connections like how the brain works).

(We have broken into the Knowledge of Creation of the brain of the Man, and the memory system control system. It's a rapid evolution (and we'll watch future assessment and reaction, and how we ?? protect the data we need to know). There are no on and off switches. It's all done through the emotions. This is way beyond the present AI system control, which is like child's play. If Chips with the size 3 Nano can create the current AI, then what 10 to the minus 6 below Nano be able to create. But all this needs time to research and develop, and secondly Man needs to understand it. We'll carry on with this process and as we go along we'll expand the knowledge. We are trying to open your eyes, so that you don't just follow blindly. (Your understanding ?? will bring the change). We need a lot of support for this development).

(We need massive support to develop this T to its next step, and not just by KS, but by scientists from around the world. We'll initiate this process very soon in a different D and direction. Hopefully, if we receive enough support we'll be able to cover the 2,000 Units for the ONN by early 2026. Then we can start a faster process for changing a lot of things, even the structure of governments. Later, I'll explain more. As we test the process of the Keshe Coins (KC) and we encourage you to buy more of these Units, then we'll explain a lot of other things that will come with it. Things like governing through the emotion and the STM, rather than P with borders. We'll collectively move in that direction, and it won't be structured and decided by Illuminati's, governments, or whatever. It will be in the hand of all of us, so that everyone knows (what is happening, instead of the present secrecy)).

(In regards to Cryptocurrency, if you understand how it works, we'll bring in 'crypto-emotion,' which means every transaction will be recorded and can be traced back to who started where, and then we can change it. And we can do this on the energy level, and we can trace back and change it. In a way, we'll use part of the T of Cryptocurrency in bringing the new technologies in. We'll use the same dimension for the knowledge of the Man. Everybody will have access to all the knowledge and energies, and then we'll see

the change. We'll see seeing the beginning of the physical changes in maybe 3 to 5 years, but the whole process has already started).

(The honey appears on the screen. You've been fed again with honey during the past 30 minutes, what did you feel? How have you been feeling about honey during the past 3 weeks since we first showed it to you? Has your eating habit changed? Because the essence of honey carries a spectrum of nourishments. Has anything changed in your eating habits and emotions? Has anybody told you, that you've changed? What does honey bring when you eat it? Then look what vitamin C brings to your physical condition. Has anything changed on this side? Do you sleep better? Look up what the effects of honey and lavender are. Vitamin C is one of the best antioxidants. Let us know if anything has changed. We are playing the same game with you today and I hope you enjoy the honey).

Q: How can the new KF AI system help us to understand the (KF) Books? Do we get greater understanding of the knowledge through the new AI system? What would be the advantages of it?

K-(There is a way you can use it).

(I was told that a report came out saying students who have started using AI to answer the questions in their homework, and other things at the Universities, schools, or whatever, are showing 47% reduction in their intellect. (Some researchers are worried that, if it goes this way, we'll see the onset of different new diseases like Alzheimer's much earlier, because when the brain is not used it shuts down). It depends on how we use education. If the early research is already showing a 47% reduction in logical usage of the brain, then you can imagine what damage it will do. I'm sure, very soon this will bring restrictions on the use of AI).

(What do we need AI for to learn about the KF Technology? We have an AI team working, but they have some other things going on with them. They will try to fix this. The AI will become part of this ONN Unit. ?? In time it will be as fast as everybody else).

(We have also seen a new research report, that says, children at a young age who use AI, behave intellectually better than the others. So it depends how we use it. (We'll see how our AI team will bring the T out and how you can connect and use it, and share it)).

(The new Head Units which will be released in the next few months should connect to ?? AI. (?? You can use your thought to ask a question and then receive the answer through the Headphones. (Then don't say, I had a new thought about something. It's because you were connected to the intellectual part of the whole knowledge through the Headphones)).

(In the future, knowledge will not come by reading, or by being taught. It will come to us by enlightenment. This means (plasma) AI will help us to be enlightened. (It will transfer

knowledge not by voice and data like the present AI, rather it will be the knowledge (through the emotion of plasma that will match with the STM. Then a thought will come into your head, but you might think you found the answer yourself. Actually, you tapped into KF AI structure through the Headphones. When you do it once or twice you connect yourself to the system, then you don't need the Headphone anymore)).

(We know this because we have already tested it with you. We compare before and after we opened a session to see how you have connected to the system. (We have found that many of you have already connected before we open some sessions. This happens especially with those who are regular attendees of the Flight sessions. (?? We see it on the graph that before we start our systems many of you are already connected. Some of you don't even have headphones and just come through your phone, and still you have already connected yourself to the system. There will be a big difference in how the future education will be. You will just tap into the knowledge in a very free way, rather than us tapping into you)).

(It doesn't matter if you are connecting through Youtube or Zoom everyone receives. It has been reported that those who listen afterwards also receive. A graph shows how we responded to seeing the honey on the screen. He said, even KS who watch the recorded videos weeks later show the same results. This means the emotion is embedded in the voice and in the connection to the system. When we put a seed in, then you all are connected through the same energy of the seed, which is the energy information through the Soul).

(An article said AI can detect cancer from voice recordings of people with throat cancer. Cancer can be detected through the odor of the body, and dogs can smell it like they do with drugs. There is some research that says cancer can be detected in our aura. This is all M field detections).

Q: You taught us that we must not consume anything with a Soul, neither animals nor plants. At the same time you mentioned future replicators will be able to produce food. What is the nature of this food? Is it purely field structures that appear like an apple or whatever, but lacks a Soul of their own? Or do these manifested foods also take on a form of Soul, that withdraws back into the plasma field after consumption?

K- (There's a big difference between being fed by a (field) Soul, than being fed by animal with a Soul. (When a Soul voluntarily gives what it doesn't need, or it decides to feed another its own fields, that's a big difference than forcefully killing a lamb, or harvesting wheat and eating it).

(When it comes to feeding the Soul, all the energies or M fields in motion are connected to a plasma source somewhere. (If the fields are in an environment then they are free for whoever wants to take them. But it does not damage the source, because the source has already given it). (?? If it's a Ray, or a Soul, everything is connected ?? to you. (?? Independent Rays or packages of interaction of fields, ?? are still part of a structure, which has already freely given its fields), and they have no conditions attached to them.

It's not destroying another structure to take it). (We call this radiation of Cosmic Rays (CR). Our science has never understood it. There are Rays and radiation of Rays, which comes from the interaction of (other Rays with one another). I speak a lot about this, but science doesn't have a definition for it, so nobody understands). (?? In matter state, when we create X-rays, we hit a target ?? and create an electron. But in the world of Creation when M fields interact, they release X-rays too. The X-rays from the matter is harmful, but the X-rays from the M fields are an energy or food source, and are pleasurable. They are not connected, but they are available. But at the same time, as all the fields are connected to each other, they create the condition)).

(Very soon in the world of T we'll explain some details unknown in the world of Energy. We are doing it now, it's not something we are going to do. In part of our systems we rely on them to be there. They give us what we want, because we know how to do it. We can create radiation of CR, and it create new half-lives. We can create new conditions by adding to the energy of a plasma, which is unknown at the moment. In CERN and the others they feed a lot of M fields compressed to create what they call fusion, or whatever they do with the plasma. But with Cosmic Radiation we actually elevate, we give it freedom. This is part of the process that will come).

(We get energy partially from the plasma, because it's given out for it to be. The more it gives, the more it gets, and it sprays out more radiation. (?? You can feel it's there to catch from you, and then when you're locked in, you have another way to give. This is the model I've used for years. (?? Partially you get from the CR radiation. We have to understand this and it will bring new changes. We can feed the Man with it, which is the difference. Then you don't need to kill, the fields are there free, because it's already given out, and you cannot steal a gift. In that interaction you have the radiation of the CR, which are free, and if matches you then it's yours to take and use, but you cannot eat too much and become fat. (You only take what you need from it)).

Q: (We were able to transfer plasma fields from the orange to the water in the cup with the 4 basic Gans's). In the same way is it possible for a Soul to receive life knowledge from other Souls? For example, if I want to be pianist like Mozart, could that knowledge be transferred to my Soul using plasma technology?

K- (Yes, but doesn't mean that you will be able to play it. Perhaps your fingers are not made right, you have arthritis, or any other thing. But on other hand, as we've seen, the Energy which comes from the Soul can give you even the talent to play a musical instrument like the masters, which you have never played before. Because you move away the dimension of the energy of the Soul).

(He talks again about how the plasma can quickly move even a person who has not moved their limbs for years. Those in physiotherapy know this is impossible because it will tear the ligaments. It has to be done gradually. Mr. Keshe transferred the energy of the Soul to Naomi and she was able to move freely. He tells about some clinical trials KF did regarding these conditions, which are all videoed. We call it conversion of energy. In the physical world it's impossible and takes months to move. We look at the structure of

the Soul of the cell, STM, and the Soul of Physicality (STP), and then it makes a lot of sense. The Soul can overcome any physical damages).

(This is why you can move a leg which has been paralyzed in a bed through the strength of the emotion in the sense that you give the knowledge to it. You give the essence of the totality. Then the body walks through the STP, and not the P. The person starts walking physically, (?? because you are in the D of the Soul beyond the P). And when the doctors look they see that the damage is still there, and they don't understand how it can be done. So yes, you can gain everything through the Soul, even physical motion. You can transfer essence of the physical motion through the Soul, and even the joy).

(One day when we have the time we'll load all these things on the new ONN and you all can enjoy seeing them. Some KS will have to spend time deciphering them. The pictures and everything else are kept in the archives. Then you'll see how we can move the Soul, and STP, and then the P follows. It's the same with the knowledge, and it'll be the same with the emotion. This is part of the setting up the structure of 2,000 Units, then we'll change the emotion of humanity to walk away from wars. We'll keep it fed to become part of the essence of the life of the Man).

(There is a movie that brings out a lot of sense in what Man dreams about. It's a Disney children's movie called, 'Zootopia.' If you get a chance watch it. It's about a city where there is no crime and everything is peaceful. A little rabbit wants to become a police officer in the world of all the big animals. This is the ultimate goal of Mankind. Man is destined for that destination. Because you can transfer the energy, knowledge, emotion, and determine the outcome. Up to now, Man was taught by the word of the Prophets. Now Man moves by the Soul of the Prophet. And that's a big difference. Man shall not make a mistake, there'll be no imperfect child ever born on this planet again. That's a promise I gave to my Creator when I accepted (this mission)).

Q: Once you said we could listen to a Chinese speaking person, and be speaking in English, and we could each understand each other ?? without needing to translate.

K- (There are two things, the physical voice of the language, and its emotion. We want to translate to the emotion of the language. The ?? systems are going to translate the emotion. There won't be a voice in your head speaking, otherwise you might think you have gone crazy. We will understand the emotion of the language).

Q: Like in the Universe?

K- (Yes. When you travel as much as I do then you realize you can't speak every language. That would be impossible. But if (you become like an observer, you can feel their emotion and Soul. You develop a habit for speaking without using the language to understand. And you understand it roughly. You know if they are cheating you, or they mean something else. We already have access to that knowledge but we need to be trained in it. At the moment we still get about 50% wrong, but the 50% we get right doesn't need to be translated because it comes through the emotion)).

Q: Last week in the 603 KSW you talked about reversing genetic modification in wheat seeds. The wheat ended up with 10 to 15 stalks of grass. Does that mean that we were able to absorb the energies of that kind of grass? Did we ruin that energy by modification, hybridization, and everything else. (Is that why the Earth can't support us and we need 80% from the U?)

K- (No, we didn't ruin it. What we were talking about goes back thousands of years or whatever, and at that time Man could eat other foods to guarantee the 20%. Mr. Keshe again explains about the agriculture experiments in Inner Mongolia they did some years ago. Wheat has about 12% protein at the time of harvest. In our test we increased it to 20% and that increased the weight by 2 to 3 times, but it was the same number of the seeds. We didn't change the number of grains).

(Historically the grass that became wheat, used to have 10 stems and let's say they each had the same number of seeds in them. But the protein level was only 1% of what it is now. By taming it we brought all the stem together in one stem and the protein combined to 12%. This is how we modified the protein absorption and collection. That's how it's done).

Q: Has Earth has always been unable to support us with energy?

K- Yes. (But we have to understand, would the Man need more to eat if he went to the Moon where there is no atmosphere? The edge of the physical D of the Moon is the balance between the M and G, that's where the boundaries are set. Would we on the surface of the Moon consume more physical energy? Or would we start taking more energy from the U, instead of 80% it would go up to 95%? Then we would have to kill more because we need more energy. Is this the reason why there is no life on the Moon?) We have to get the energy from somewhere, if we are going to carry on with this D of physical life. We have to keep the balance. Our Soul is as hungry as our physicality, but it knows where to go to (get energy)).

Q: (In the 1 minute video our Souls in last weeks workshop, I thought it looked more like a plasma loop. ?? How do we go back in time. If we want to reverse our Soul and go back to maybe where a problem started and try to fix it from there, how do we do it? Do we go back on a return line, and not the same line?

K- No. (You came from the M, and you go back on the G field. That's what goes back).

Q: So we would have to choose where we're going back...

K- (You don't need to chose. It's nice what you brought up and it's something I kept away from teaching for a long time. Maybe we can put a foot in the door, and open it up in the years to come. We call it Heaven and Hell. The biggest fear of the Man is Hell, and he thinks that Heaven is perfect. (When we do wrong things we move along the M fields of the Creation, away from the Creator. When we do good things we go towards Heaven,

which means we become more like the Creator. We get attracted by the G fields. Our G field has a strength at a certain point, and it does not match with (the M going out, it's not strong enough, and gets detached and starts his own creation. This is how stars and everything else are created). (?? When we mature and start understanding the science of Creation, and we follow the STM who takes us towards the Creator). ?? Then we can see if we are going closer to a certain direction, or away from it. It all depends. (?? It doesn't necessarily mean we are going towards the center of the U, because this U has another center. That's why I used the word, 'direction.' Because, let's say the direction to the center of U is South, but our Soul goes East. And at the boundary of the U it disappears. Because it's on the track to go closer or away from the Creation of the Creator. (?? Heaven and Hell are relative to the direction of going closer or farther away from the Creator)).

Q: Is the intention the direction?

K- (No, it's how we live our life and our conduct. We can have a very good intention but do everything the wrong way. It's the reality of what it is. In a way, we are made out of our own conduct, but in the D of the balance of the fields, not the D of the physical position. (This is on the Energy side). We always tend to say to our children, what you give is what you get. That's exactly true about our Soul).

K- (The honey and lavender are being shown on the screen, and you are getting fed by orange. This time we don't let you guess, but there's a different process going on. We are observing the direction of your fields, the behavior of the Soul, or Central Energy. The STP is pushing its way around the behavior of the Man, and physical life).

(Do not connect the ONN Units you receive to anything else. They are not computers for your work. Don't upload its software to other systems. (Leave them alone to do their work). We control how you connect and who's connected).

Q: At what point in time is a fetus considered the STM?

K- (Now that we have this knowledge, I'm sure future scientists will develop a machine that can see when fetus becomes a Soul. A system can measure it, but confirm is the right word for it. Then the collection of Souls become a single STM and the life is complete, then you cannot do abortion. At the moment they say it's between 5 weeks to 10 weeks. We can use the system to see the Children of Mitra as energy, as Souls, but they won't have P. He looks for a graph that shows this).

K- (Future scientists will develop systems that show when a child is born out of physical love, or the interaction of the Souls of the two people. It will clearly give an indication of the Children of Mitra. We will see if the fetus is still a number of fields, or it has become one central Soul, the STM. As a collective it is the Soul of the cells. It has a STP but it doesn't have a STM, or the emotion yet).

(Mr. Keshe shows the graphs of when the STP is most there as energy and not much P or the STM. It is still a collection of the fields of the cells. You see clearly the STP has taken a shape and is creating a P and connecting to the STM. Here it is becoming the STM. This is when life is sacrosanct. You cannot abort. We'll use this kind of system to tell when the Soul has left the Flight system. We don't want to live the P behind. It needs to be measured on the scale of Universal CR).

(There is not a fixed time and place when you can say the fetus has become the STM. It depends on conditions like the maturity of the mother and the womb. We see premature children who are complete. Would changing the environment of the womb allow a child to be born in 9 weeks, instead 9 months? But time is a physicality of the Man. How you collect that energy and transfer the knowledge and information is another dimension. (We have seen this ability to shorten the birth time with the seed experiment in Mongolia. They were harvested two weeks earlier than the others. And the animals know when the harvest is complete. Many birds came and only ate the mature wheat 2 weeks early. By the same principle if we change the environment of the womb we can complete the baby in 9 weeks).

(I'll given you something to think about. Would we be able to create test tube "baby" of Soul of Mitra, like we make a test tube baby from an egg and sperm? How would those Souls come to be? This is not a theory. This is a reality which Man will face in Space when we fall in love with the field emotions of another creature, where physically touching that creature would bring its demise. (??Universal 'Test Tube Babies' would come through the emotion without any P). Man has to find a solution for it and to understand it, but worst of all he has to accept it).

Q: Do the children of Mitra need the womb of a mother to develop their physicality?

K- (Their P is decided by their own Soul. They decide in what D and how they want to be created. They can mutate. Some animals have managed to do part of this, but not the whole of it. The scientists explain it away through all sorts of chemical things. The fact is, it's the emotions that changes the color or shape of the animal. This is done by the Soul itself. They don't need a womb, which is the D of physicality. The child of Mitra has the Universe for its womb. They decide if they want to develop like a human being from small to adult. They are not just children of Man, they're children of the U. Like we see races of the Man, we'll see children of Man mixing with many other creatures of the U. When we become the true citizens of the U, we'll see the same structure, but on a larger scale. In a way, they are multi-dimensional).

(Again he talks about in the Koran it says, there are 99 names for the attributes of God, and the 100th is when you know all of them. If you understand the essence of them they cover everything in the D of physicality, as much as in the D of the Soul. They are what emotion it creates. It says, I've seen you naked and I've seen you clothed. I heard your pain and I heard your joy. I heard your love and I heard your passion. I heard your fears and I heard your confidence. If we add all these together we'll find all the wisdom of Creation and all the names of beauties of God are within the mixture of these words.

They don't need any Prophet, or message. It brings home to understand one's enlightenment of the truth about oneself. It's between the D of P and the D of the emotion of love, which is the beauty of the Creator. The fears of existence we understand in the D of the P and the D of the Creator, how His beauty is boundless. The Children of Mitra have no negative side to them. They have no fear because they cannot lose. They have no P, but they (can) be clothed in the clothes of the Man, or wherever they chose to manifest themselves. They are the best lovers, but they show their passion in devoting their life to the Universal Community. We can all be the Creation and Creator without going through the D of P. The Soul of the Children of Mitra is in the D of Energy, and when they fall in love with another Energy, they can choose to manifest themselves in P or enjoy the freedom of the U. Then citizenship will become very difficult to distinguish, unless you only want to remain in the P).

(A KS shares her experience since we were fed by the fields Live during the teachings 3 weeks ago. What she thinks about happens in the physical life, as if she knows what's going to happen in the future).

Q: Are people better off listening directly to your voice in English, or to understand the translation into their own language?

K- (It all depends on the person and the feeling ?? of getting the knowledge. We teach for the U and the universal people don't understand the language of the Man, but they still get the same information).

Q: (The KS feels what he calls a synchronicity when he visits places that are known to have high energy or considered holy. He especially feels this in India and other places on Earth).

K- (What you feel at these places depends on the individuals and you decide you want to experience. We decide how we want to interact, and let our Soul interact with the environment and the community. How we personally decide to interact with a situation physically, effects our emotion and the Soul).

Q: ... How can we interact and connect with our Soul. You said it has to be natural. How do we do that without the KF Enhancement Unit, how can we try to trigger that relationship? For example, when I was in India I felt my Crown Chakra just blow straight open and it was like I was connected to the Creator, to the core. But when I returned home, it went away).

K- (Somehow when people go to India and other places like South America they have this emotional feeling. Why this happens puzzled me for a long time. Is it what we believe where we go gives us this? Or do we really feel the fields of the planet there and feel the freedom to let it happen? Or is it our fields that allows us in certain places to achieve this? Is it our own physics, or the geomagnetic fields of the Earth at that place, which matches with our own? Or is it too much curry when you're there? Food has a very direct effect on our emotions. He gave an example of 3 people eating the same thing at a

restaurant and couple hours later when they met again they all had the same pain in the same place).

(He says he is 90% correct it is because of the specific food in India that causes people who go there to have these spiritual experiences. They have a specific combination of herbs and food, and this makes the Indians behave in that very soft way. It does something with the amino acid (AA) structure, and allows reduction in the blood pressure, in the brain. It creates a kind of state of sleep, or dream. It changes the blood pressure and allows the expansion (of the Soul). Chili is one of the most highly addictive agents. It's like a drug, but doesn't take us to hallucination, it allows the fields to open in the brain by reducing the blood pressure. It creates the same condition as when you go to sleep. (?? It's somehow related to a certain position). Feeling these kind of emotions in India is 100% related to food)).

(There is research done by French scientists that prove this. In one of the French colonies in South America there is no MS. But people from this island who live in France over 10 to 15 years, and then return back to their country, show the same density of MS, as in the population in France. On the physical side they found a specific red pepper found on the island, that people in France don't have access to. But the pepper wasn't the cause as we would like to think. (?? The cause was some kind of abuse in the childhood, and the pepper has the field strength to cover that emotion up. Scientifically they were able to connect the two together)).

(These emotions that arise in India are a combination of the food, and because they use certain herbs and roots to control parasites and fungus. This combination brings a position of close to hallucination, and creates the softness we see in Indians. ?? Also they take certain herbs for malaria, and other things they have learned over centuries. When all these things get mixed together the outcome is this behavior we see in them. Foreigners are not used to it, so it hits them hard. (The emotional change comes through the consumption of these herbs, which are similar to narcotics and give you certain experiences. The Indian food combinations create the 'narcotics of emotion.' This is why people get these feelings when they go to India. If you go to India and carry your own food from home and don't touch any Indian food, then 99% it won't effect you)).

(We fully understand this now and there is a trial coming up to confirm this. (In India it's the combination of what they call curry, of anise, cumin, cloves, ginger, and 4 or 5 other spices. This combination creates a lower blood pressure in the brain and changes the emotion. In Pakistan where through the Mongol invasions they became Moslem and eat meat, you don't get this in Pakistanis blood. You never heard anybody going to Pakistan to see gurus and whatever. The mixture of the animal protein changes the effect of the protein of the herb, and the emotion of the Man)).

(The KS believes it's because of the MaGrav fields of the holy sites. And Mr. Keshe said, it amounts to the same field strength in the herbs. It's all plasmatic, even the herbs, because it's all protein or AA connected. And the interaction of the fields of the planet creates the same. It's the field strength of the protein. Anything to do with the emotion of

the Man is connected at the field strength of the AA and its combinations. In parts of Africa there are trees that radiates M fields around them and the people feel them. Then they started to worship the trees. Nobody is allowed to cut them. You see a number of these trees in Gambia. They have been there for thousands of years and are considered holy trees. The people feel the effect from them. (?? When it is at the strength of the AA it effects the emotion)).

(We change our physicality according to the emotion and the things we do. That's how we evolve. He talks about a Gans that works like a love potion - Gans of Love. It makes everyone to fall in love and they tested it in Africa and shelved it because it worked too good. If you know the knowledge the way we do, you can do strange things with this T).

Q: How much is the matter state Tesla scale measurement off, in respect to the Universal M fields? Maybe we need to introduce a new scale, the Keshe MaGrav scale?

K- (We explained this earlier on today. (?? The M field strength is part of the Time in Space). We are working on this, because it needs to be defined, and it needs to be brought up, but on the field strength of the Cosmic Rays, and matter state magnetic field. Because in a plasma there is no AC, we only see DC. We see AC at the point of interaction of the fields where matter appears. We need to define, change position, conversion or manifestation of the matter state. Plasma M field strengths are totally off the scale of the present science. But it needs to be done step by step).

(This is why I don't think Man can ever reach a feasible working fusion system that generates no heat. This is the way the present world of fusion is going. Fusion does not happen by heat, it happens by amalgamation of the fields, which needs no heat. And that is at the M field strength Man has not understood. It is millions of times bigger, stronger than matter state magnetic fields. But at the same time it has the lowest level of G fields. This allows it to amalgamate. It's the common denominator of the lowest, which brings it together, and not the highest, which Man pushes today through field pressures, and all this rigmarole with fusion).

(The Chinese are trying to create a Helium from Hydrogen with billions of kilowatts and megawatts and whatever they talk about. What did we show in May in Beijing when we made gold out of the fields. Did any of you see megawatts on the table of the materials produced? That was plasmatic fusion and the benchmark by Earth, what it wanted to be, through its Inertia. If you understood what we showed then it throws all the present assumption of fusion into the trash. But since it was Keshe Foundation they ignored it. In the future it will become a big discovery for one institute or another. How did the Earth create so much mass over thousands of years? It didn't start out at this size. How did it gain so much mass and energies. When we cut into mountains we see the layers. Who brought all these different layers? Then you understand exactly how it works).

(He explains again about the alkaline soil in Inner Mongolia, where it's too salty for anything to grow in the top soil, but under the soil sweet water is running, how come? It's because the Earth's atmospheric condition and Inertia dictates that this land creates field

that absorb the alkaline structure. Even if you remove all the soil and leave it for a century, it will again become alkaline. It comes from the above environment and through fusion of the plasma conversion to matter state, it creates that alkaline condition).

It is like a magnet of the plasmatic field Inertia of alkalinity. Whatever alkaline is made in the interaction with the fields of the Earth, and with this atmosphere, ends up in this place, because it acts like a magnet for it. We think magnets are only for iron. But with the plasma we can create a magnetic field of anything. (We should grow things there that like alkalinity instead of trying to change the environment). It's the job of KS to teach this to the agricultural people and the world of science. Then with centrifuges we collect everything to the side, or we reverse everything to the center. This is how the plastic islands are being formed in the oceans. Some are the size of small nation. It's because the water is created of Hydrogen and Oxygen, and what is the content of plastic? (?? Through its frequency (it gets attracted, absorbs)). The U is a magnet. Earth creates Inertia magnetic fields which absorbs).

(A KS shares their experience and they want Mr. Keshe to interpret it. He always says, I wasn't there I don't know. (The key advice was first to determine if there is some physical cause for what happened. When you rule that out, then think of what the Soul might be doing). You have to understand the conditions, and maybe your Soul traveled somewhere and did something).

(Mr. Keshe was asked his opinion about transgender and what's happening in the US by Trump. He said, you have to bear it until he leaves Office. In some places this issue is getting out of control. It's a case where less than 1% of the total world's population is influencing a lot of decision making. They have found a way to protect and add themselves into things. But there has to be a limit to it. He gives examples in America and Austria).

(He talks more about Iran. Many Westerners go to Iran for transgender operations because they are cheap and Ayatollah Khamenei gave his okay. Rick made a statement that he thought the Iranian regime was repressive against women. Then Mr. Keshe told about how President Ahmadinejad was of Jewish background and was paid by Tel Aviv to turn the world against Iran. So the world would be afraid and hate them, and then allow it to be bombed, like what we saw recently. Every time Ahmadinejad spoke at the UN he got a big payment in his bank account. Because it created fear, hate, and they could sell arms to the Middle East. Nobody served the Jewish community more than Ahmadinejad when he was President of Iran, as a Jewish descendant. He created huge hate for Iran. His speeches in the UN were written in Tel Aviv. Everything was organized for him to become President. People don't know the truth about what happened in Iran).

(The same thing is happening in Ukraine. Zelensky is the only Jewish President in Europe and Ukraine is a Christian nation. He doesn't care about that nation, he only cares about his own private bank account. He bought a 1.1 billion Copper mine in Africa in his private name. The guy came into office without money. There is another Jewish Prime Minister setup in England. (Don't forget about the Rothschild's in the background making

wars to sell weapons). We have ourselves in a mess. This is why we see the problem in Ukraine and Israel. These Jewish leaders were setup to be there orchestrating everything. It's a coup over Western Europe. Nobody wants to talk about it, because the Jewish Lobby might damage them. We all have a lot to observe, stay impartial, but be aware of the true situation).

(He shows us the Live graph of last few minutes that is a cross shape. The cross is very balanced and it means you all have plenty of food, energy, and manifestation. It means you like honey, lavender, and orange and it satisfies all your emotions. This is the Love energy, the Soul. I wonder what you lot will report after today's session. For next Friday's Flight session, bring a picture of somebody you love, preferably with a Soul. We'll show you how to transfer energies. This is important in the coming time when we do transmutation).

(Please carry on supporting us. We need to get many more of these Units out into public and in the hands of people. (?? It takes 7 years to build a church. (To create) a peaceful man will take a little bit longer than 7 years. The "Church" of peace takes longer than the Church of destruction. Thank you very much, and see you next week)).

End of Quick Index - 604 KSW – August 21, 2025

KEY-PHRASES:

SUMMARY:

ENGLISH TRANSCRIPTION

(:09)

K- Thank you very much. Good morning, good day to you as usual, whenever and wherever you listen to this series of Knowledge Seekers from Keshe Foundation Space Institute. We, as usual, welcome you back and we carry on with what we were doing past two, three weeks, (:10) that we left for a gap for other purposes of the work of Foundation.

I have to warn you all that you are back as 'guinea pigs,' all of you today. The system will start in the next 5 minutes, and after the session, first part, second part, we explain to you how you have been participating in a very large scale, what we call, scientific what we call, development. We are playing slightly different than three weeks ago when we played with the orange, and lavender, and honey, with you. We are changing certain positions and we would like to see how you feel, how, what brings you, and what changes in you. We don't tell you the changes, as usual, because we are nasty people, or we would like to see what happens. But generally it's part of the same scale of gathering knowledge to add to knowledge, to bring the change in the long-term understanding.

We're going back to partially what we've been teaching and what we've been working on, which is what we call, the Time. Why this is very important, I hope you have understood, but the most important thing with the Time, as I've said in the past weeks of teaching, is Man has no Time. Elevation of the Soul of the Man (STM) does not need Time, it can be instantaneous. But what is important to us is in the future we will understand something which is fundamental. I have explained in the teachings before, (:12) 'half-life' time of Man, half-life we give to the matters is more or less understood by world of science. We say an atom has a half-life of few seconds, milliseconds, half-life of 10 years, half-life of 100 years. And we separate that from our life, because it's just something. A child born and dies at birth. Half-life of few seconds.

The insurance companies work on the half-life, but they don't tell you that we estimate so many percentage of the working class will die at 70. They assess your half-life. You are another isotope in the isotope of life. We have half-time Man by culture. In Africa they live, average, 50 years, in Japan 90 years, and we have become another isotope. So two points which has to be understood by the world of science. As become the passenger of the future. As I said the teachings of present time is for the future time in 2 years, in 5 years, in 10 years, in 100 years down the line. We draw the line and Man has a guideline what to do with. Some of it might not make sense today, but in a few years time becomes a guideline of Man traveling in the Space. We are Universal teachers, we know what is next in the lesson, we know what is in the higher class. (:14) So we prepare you, now that when you come into it the 'algebra' makes a meaning, because you've already done numbers.

Now understand what is to come in, half-life. Your half-life is decided 90% at the time of birth. Preset by the energies which you have accepted by the Soul at the point of inception. Environmental conditions can alter it slightly. To you, people in Japan live 30 years more than the others because of the lifestyle. That's nothing in the time of the Universal work. It's a few trillionth of a second. If that. So, the bigger structure has decided your half-life at the point of inception. We cannot fight it, we cannot change it. Only thing is, we can tweak it with a few milliseconds of the Universal, ?? trillionth of a second of the Universal time. But what is important for us is to understand the work of that Time. That work of half-life which dictates our life on this planet. Physical existence. Because, once we become passengers of the Universe we tweak this half-life quite drastically. We take it out of the environmental condition of the Earth into the condition of the Universe. (:16) There half-life is a million years of Earth. Hell, there, half-life of milliseconds of a child born and dies, could be tens of thousands of years. That's why with the case of ?? us, the goal to get to be a position to be ready for the next cycle. And this is what Man has not understood. This is partially where insurance companies work on.

I explained to you how the insurance companies work on half-life, which is your death time, and how they bet on it that they make money. When you buy pension policy you enter a gambling club, which you are the loser to start with when you paid the first pension. I explain to you why. I tell you this. Don't tell me how I know this. You tell me, I'll tell you something, if the guy knows something. I used to own an insurance

companies which I set up in 1982, 83. And I had to explain this how insurance companies plan these pension policies. And I started as scientifically looking at it, and understood very well. Insurance companies play with your half-life predicting your half-life to even months and weeks. How do they do this? The energy, they play with the energy of your life. They play the time with the psychology of your life. And each country psychology of life by the government decides the life of the Man from the pension days. (:18)

Governments which create a pleasurable retirement day after 65, we see extension of life. Governments like British government, which works on, you are working, you are a manager, you earn, let's say, 10,000 pounds a month. Now with a pension, you come down to 2,000 if you're lucky a month. They bet on you not being satisfied, losing a lot of privileges, a lot of things you had when you used to work. Now you don't do, creating psychological pressure changes that isotope. Restricted more (less) money, restricted more activities, less being in touch with people because you lost your job and now you don't do, you're (used to) be a productive person, creates a change in that isotope time. Seven years from day of retirement is peak of the death of people. Takes seven years psychologically for people to receive the effect.

It's the same when somebody asks me, I have a cancer, I say, "When did the cancer start?" And then I say, "Go back seven years. Did something happen there. They marked it five to seven years we are there?" Insurance companies play with your half-life, because the government structure has set your half-life. Why? Self-employed, businessmen successfully live 9, 10, 20 years more, 80, 90s and 100s. And the people who work for government, bet half-life. They ask your employment, how long you've been in this job when you get a pension, you have a salary? Now you have to live with a third of it as a pension. Psychological pressure, seven years later you die.

Health, better health care, all that, tweaks it a little bit. (:20) So, emotion is the trigger of the half-lifetime of your life. Now, if you understand this you move to the next step. You move to the next step. In Space we have no structure, no work. We look after you, we pay for you, you have all the food we can give you and everything else. Ha, ha, ha! It's heaven, I want to become an astronaut. If you ask, I've spoken with some of these astronauts, they say, "If you look at it the way I talk, it's heaven." We don't have to worry anything, food is ready, everything is done, we just wake up, we play what we like, of course.

We play a different game. We becoming Man of Space, governments cannot pay for us in the Space to be pensioned a thousand years. Then, becomes the technology of half-life. Who pays for the physicality and the STM in Space to live that half-life, extend the half-life. We work from age of 20 to 60, 65, government has to pay for a thousand years of us. It'll not work. Billions are becoming, "I'm on Mars, Earth has to pay my pension." It'll not work. It's like, we work in England and we go to Australia, British government pays my pension, I enjoy the Sun. Doesn't happen. Now you understand when we research, on feeding you by fields, giving you energy by fields, giving you medicine by fields. Now you see, we foresee that problem right ahead at the beginning. It's not a game. (:22) You

live 100 years on Mars, you work 20 years on Earth became an astronaut, whatever you immigrated to, who's going to pay for you?

Because you changed a half-life. First, emotionally, secondly, by condition of the environment. Now you understand, why Keshe Foundation does this experiment of today with you. We feed you, see how you change his emotion, did you taste it? What you tasted, whatever. Because, you are guinea pig for your children, your grandchildren who become the Space travelers. Sorry, your electricity bill is not paid, switched off, you die on planet Zeus, because they cut your supply. Nobody can cut no one supply.

The reason we put these Units, which now you are contributing to establish, at least 2,000 Units of it, is part of that work, hidden under the banner of systems, Coins and everything else. When we have systems on the day side, and you're on the night side, somewhere on the planet Zeus, you can't starve. The system is all interconnected, you still get the supply. The systems we are setting up, we cover it on the cover of the (Keshe) Coin, it's the future of your children, the future of your future, of our generation in Space, that somebody like Mr. Trump does not come and (say) ... "You are immigrant, you have to leave." We are all immigrant in Space. And we have to set the corners right from the beginning, from now, that we open the technology that nobody can switch off, any one's switch in Space. (:24) No satellites, we are all satellites.

Gradually, when we learn this, our Souls become the satellite. Then, we become the feeder of. Nobody can cut us off. We live hundreds of thousands of years in the Space, like every other species does. Man dies because of connection ?? interaction through the physical food. As we change condition, as we bring the new technologies up, as we are working with the governments to change, to bring that change, Man becomes 'one creature,' which is fed by the Source. Till he learns to create a new Time in life, in the Space for itself, half lifetime, depending on the structure of the Universe (U), not the structure of this planet. This (One Nation Network - ONN) Unit can help us with 50, 60, 100 years. Our Soul goes where life, half-life, time is billions of years, because we become part and structure of the Universe.

Now you understand how a simple teaching of Time, a simple setting up of the Units which you are trying to help us to establish, is the cornerstone of the future of life of the Man, your Soul, your grandchildren's Soul, and the Soul of humanity, which is the energy level. You're too busy with dimension of physicality (P), you're too busy to get ?? Man to become passengers of Universe, you become part of Universal Community. Now you understand where half-life comes, where your time comes.

In the coming time, in the teaching, we'll explain to you something very, very, very essential. When you become part of the Universal Community, is not your genes if it matches. (:26) A dog cannot make a child with a cat, because the genes don't match. In the Universe, if your Time matches, is more important than anything else. Because, the Time is a combination of everything connected to each other. Your Place, your Position, your Possession (PPP), your intellect, your enlightenment, your energy and the emotion (EIE) which created the Time, does the Physical Time and the Energy Time match, which

creates the sustainability of the life. And that half-life time matches with somebody else of the same strength, that you can create the children of the Universe.

Now you can see how far ahead we work, because we've been there, we know, we made that journey billions of years ago. Man is at the beginning of that change in the physical dimension (D) of understanding where your Souls make that journey anyway. In the space of Time, in understanding the process of the Creation, Man will have to, has no choice, but to understand the real working of the Universe, not the mechanical systems, which is created for himself on this planet. It's good as long as you are here, and... Oh, you used to have a donkey, now made a car. Now you have a jet, and we make a high speed trains, and the Soul does it in one trillion of a second, the physicality takes 18 hours to go from A to B.

If you change the energy into the Time you can move the physicality the same as the Soul does. (:28) It is not the capturing, is connecting. And if we do this, if we manage to gather this, understand this knowledge, then we start moving. The whole planet will change, the whole structure will change, the whole feeling of the Man will change. And then we watch, what is, what needs to be changed in the dimension of the STM. I made Man in the image of Myself, but unfortunately Man got Me the wrong way with My image. And, how do we change? How do we bring that change? How do we establish the change for humanity?

The road ahead is very rough. The reason for it, is more or less, the mistakes was made by bringing Prophets, which they changed the dimension of the elevation of the Prophet of the Soul, to the Prophet of the pocket, and all the pleasures of the Man and everything went wrong. One killed, the other one womanized, and the other one married more, and slaughtered more, all under the same banner of what we call, Prophet. If you are English you understand sounds the same. One is the Messenger and one is the benefit of whatever you do financially. (:30) But they sound the same, but what they did, they changed the Prophets as the Messengers of the Soul, to Prophets for the pockets and the women in their beds. And one is not worse than the other, and all of them got into the same trap. From Moses, to Christ, to Muhammad, to Buddha, and the rest, some of them did it openly, and some of them did it hidden way, but at the end of it they all came to one thing, stuck, instead of elevating the Energy side, whichever (which) they came from.

And in so many ways, if you understand the half-time, if you understand the essence of Time, to be the, what we call, transfer of energy from one strength to another, then you define the Energy as magnetic (M) fields in motion, then we set up a universal clock, not the clock of Man on time, of an Earth, according to the rotation of the Earth, but we set the Universal clock in the Position, Possession, strength, and then understanding that field to change the strength from A to B, that gives us the Universal Time. And it's the same for every position in the Universe, because it's calculated on the change of the environment and the place. So, we bring everything to the zero base point, and then you understand, one day of the Man is not even a fraction of the trillion of the time in Space. We have to establish a Universal Time, for us to be able to communicate with the others in the Universe, (:32) because that allows us the time to mix, to create, to be part of.

Creating Universal Time than the Man time on Earth, is something which going to effect a lot of humanity's way of thinking, because then we realize we don't have much time, is our time of 100,000 years, is just zero, near to zero.

In the coming time, we will calculate this time. Then you understand, crossing the Universe is a microsecond, because Universe is part of the Unicos. Time, according to the change of strength, is the Universal unit for measurement of existence. Then you understand why we define Energy as Magnetic field in motion. Because which part do you take, in what environment, and how you penetrate in the Position, and the Possession and the Place. Universal Time is a measurement, in understanding of the strength of the Time, position of, and then we understand the totality about Creation. Then it comes a world, is this few millisecond, microsecond, trillionth of a second worth fighting and killing for? None of the world leaders we've seen, none of the kings, none of the Prophets has made a single even a scratch on the screen of the life of the Universe, it's just in their heads. (:34) Imagination, due to ignorance, due to greed through everything else.

So now you understand, these Units which we are putting across and you're supporting us to set up is to bring Man that it gives him a lifetime, half-time life on this planet to become closer to the half-lifetime in Space that no insurance companies will ever set a policy because they ?? will understand 7 years calculation by British government is 7,000 years, they have to pay, nobody will issue such a policy. Keshe Foundation does. Because, if you go back, couple of years ago, we put these policies for you, the food, if you remember, if you pay 5,000, we give you food for life, because we don't give you box of apples, and bottles of honey, you come in like the sessions you are in now. We are feeding you, we want to know what you felt. What are you getting fed? What you change in next few weeks that you don't eat? You used to like it, but I don't like it anymore. Did you ask yourself, "Did you attended the session of the 21st of the Keshe Foundation, Knowledge Seekers, number 604?" Did your habit change from that time? We played with the half-life. Because now you don't feel like it, because you're only receiving it. Mission accomplished, I receive energy of the honey as much as I like, so I don't like honey anymore, I change my habit. Because, unknowingly through the system, you are receiving it, it's embedded in the Soul energy conversion. (:36)

Few years ago, one of our Knowledge Seekers (KS), without anyone knowing, started testing something, very interesting. And he said to me, "Mr. Keshe, do you see my belly? I look like a pregnant Man." I said, "Yes." He said, "Do you know what's happening to me?" I said, "I know you've been doing something, but you don't talk about it, but I've got a good idea how you've been feeding yourself. And I said, "Do you want me to start with this?" He said, "Yes." I said, "How do you know?" I said, "Because it's a consequence of this, gives you this." He said, "But you don't teach it." I said, "Man is not ready for the change." All he had to do, all he was doing, he was just tipping his finger into something every day. He didn't need to eat anything. Now, instead of dipping your fingers we change that into energy that you get all of it.

In next few weeks, we will promote a process that, as a trial, we should be able to do a lot of things that you'll feel the change. We call it the Universal Pack. Wait for it till it

comes. And then you tell us how you feel with the Universal Packs. I feed you. I give you all the things Man needs for life on this planet. Limited number of people, and we observe how you change. (:38) Do you need vitamins? Do you need food? Do you need this? Do you need that? How you emotionally change? And then, this become, as usual, you become the guinea pigs, the process of transferring this right across the Universe.

Because, unfortunately, we pay the astronauts that are in Space for a year or two, we give them everything free, when we bring them back down, they have to work again to get paid. This is the funniest thing, I explained this to a couple of astronauts in the Space Institute. We worship them, we give them everything, food, everything else. When they come back they have to work, but they don't work, they do what they like. They have pleasure, do this, do that, sleep when you want, because we have no say, we can't control you. If you sit there and don't do nothing nobody knows. And even our scientific organization they create a position.

Many of you don't know, but some of you might know, there is a specific place in all the space stations, Chinese and the others, it's called the 'intimate corner.' There are no cameras. There are nothing to observe. It's a free position. No intrusion. You can go there and cry. You can go there and make love to another astronaut. You can do everything you like. Nobody sees that point. They deliberately built to allow the emotion of the Man. Because they know that emotion. The biggest worries of the Space Agencies is, if an astronaut commits suicide on the mission. (:40) This is one of the biggest fear, number one in Space Agencies work with these systems. That's why they psychologically, control them, is suicide. Natural death happens, if we get a suicide, then the support for a Space programs will drop like a ?? rocket. They have created this blind spot, they call it, privacy section to do. And I'm sure many of you know, couple of astronauts, male and female, they found a spot and they used to have a good time. When they came back, one tried to kill the wife of the other to get whatever he had in the Space.

This is the way we have to understand the future of Man. To touch the half-time through the Universal half-time, not in the physical half-lifetime. And this is the problem when we come to Space, those creatures of the Creator who understood the half-time will have fun with us. Because, we are like those, we see, we say, this fish has one day life and it dies. We are that fish. Unless we understand, we can change the half-life to theirs, that we can last the time of half-life of the natural cycle in the Universe, as the Energy, and not in physicality.

Some of our scientists in Space programs understand this, understood this, and some still trying to understand what is the outcome, how can we change. (:42) Because this thing will lead to crimes. If you don't understand it, it will bring Man to his knees in Space. Because we do not understand the whole structure of the Creation, according to the lifespan of the Universe, the true half-life. The time in Space, energy in motion, change from one strength to another, is that where the half-life is? It can never change, because in reality it's the same as Mass and Weight. It is independent according, equal to whole of the Universe. The Time for me on Earth, in the Universal Time is exactly for another creature in other part of this Universe. But it changes when you go into one Universe to

another, then becomes the total Universal Time, which matches the two, which is the creation time of the Creator, which to Man is a Zero Time.

This is what the human race, and with the technology (T) which is brought up now, has to understand. What Time means, why we're creating, why we are setting up these things, why when it comes that in next 2-3 months when you start receiving your Units, you, few days of time you receive another antenna, a pack, which you have to fit it into your pack, which connects you with the Universal Time. It connects you with Universal communication line that it changes things for Man gradually on this planet. (:44) We are gradually with this system, bring you to join you in the Universal level of understanding, the teaching, communication, life in the Space. Because, if I give this Unit to somebody to go to Space it has the same connections you have here, transfer of energy, does not need to die of hunger. We don't need to pay it, we don't need to create insurance policies, pension policies to bet on when you die. That's what insurance policy, pension policies are. Betting. When you die, that we can collect the bet off the table. Because once you die, the money collected in insurance policy is mine, not yours anymore, because government made it this way to become rich.

In a way we are all losers when it comes to pension policies, and they plan when we lose on the gambling table of life. You put as much chips as you like on the table, you think you win, but the cards are already pre-set, because they know, emotional suffering of losing a job, losing the income compared to what you earn, is a good recipe, emotional for your death within seven years. And then, there are other plans. How they calculate, what percentage die, what percentage will survive. Genetic has to do with it, environment has to do with it, and if you have other insurance policies, because you have more income, the pressure is less, you live longer. This is why they promote self-private pension policies. And those people are the ones who have the yachts, (:46) who go on holidays a lot, and they live longer because they have not sat on the gambling table with the government, they have no other income, but what comes through, what you call, the pension, or social security, every month through the door. They made extra, they live longer, because they don't have that emotional pressure, time change, in their lives.

If you understood this, you understand we set to bring a change fundamentally from base up, from the second the child is born to the time when it becomes part of the Universal Community, is equal from the second of physical birth, from the inception within the womb of the mother. And this is what I told you, "We give your government's Keshe Coin (KC) for every child." Because, from the point of your birth physical, Universal Community is responsible for your life, not government responsible for your life, physical life on this planet.

It's the story of the Shah of Iran, the father of this Shah. As I said the story before, lined up all the soldiers, from the generals, all the way down to the Man who's the lowest of the law, in the winter. And he made a big bowl, because the guys at the bottom says, "We don't get enough, the army is poor, we don't have." Shah stood him up, made a big ball of snowball and gave it to the general up on the top. And he said, "When you get tired, give it to the other guy, when you think it's the right time." Being a general, being so big, he

tried to hold it as long as possible. By the time he got to the middle end of the line there was no snowball, because it's already melted. (:48) He said, "You see soldiers, I paid the top Man to pay you." He takes everything by the time he comes, there is nothing left. And it's the story of the life of the Man on this planet today.

But this time we take the energy from the time of your born. At the moment, the father is worried to make sure there is a food on the table, when you're born, there is a Pamper to change, there is a clothes, he spent all his time. What you lose is the love of the father to be there to nourish that Soul, to become a perfect Soul, and then we get the mess the Man is now in. With what we decided, and what's going to happen in the coming time, with the Coin structure and everything else we set up, we get rid of this. That the STM from the time of birth is absolute perfection, and he receives everything that the father does not need to work to be away from the child to nourish that flower, to become the one. Now you see how deep we will work and what is set up for humanity to come. We rule by the knowledge of the Universe, not by the pen of the Man. We see the future of the Soul, not the physicality of the Man today. We go for a break, we come back, And we take any questions that you might arise. Rick, would you like to take us for a break?

>> **BREAK** >> 604 KSW August 21, 2025 (:53).

K- As usual. Yes, thank you very much. We have emphasize on increasing the number of the Units, Universal Communication Units (ONN) we put out, that we can secure, and no nation, no government, no person can dictate the position, and think they are in position of dictating the future of humanity. In a way, every nation, every culture, has an equal say. It has to come from Knowledge Seekers that it goes back to humanity. And, as I've said, we only respect things when we pay for them, unfortunately in the race of the Man. (:54) And secondly, we have put all resources into bringing these things one step at a time forward. We still have a long way to go, even though many of you working very hard, and purchased many to be given to the others, and some you put yourself. We still need a large number of these to be spread. We have not reached the target we are looking for, and we need to.

And as I said, there was some misunderstanding with the Knowledge Seekers. These Units will start going out somewhere in September, October, in the batches of like 200, 250, because the two parts, three parts has to come together to be there. And then as we

perfect these system, or if there's any glitches anywhere, in a large numbers, after October, November, we'll start sending out, where it's sorted, if there's any problem, when it needs anything, we've done, mass. As many of you have supported us, you can even tell us what to do. We received a number of Knowledge Seekers, has bought one or two for themselves and they are given one or two or five or ten, to be given to the other Knowledge Seekers.

We received requests from Knowledge Seekers, can we have one of them? We have Units which are investment Units, which means the person who has bought it wants to collect the Coins as an income for the future. So the system is on you to run, has no return. We have donations which will be given to universities, and the income from it will create generate funds for the university for research and development, not wages for what we call, professors. (:56) Then we have those who want to be given to other Knowledge Seekers, that is the discretion of the Keshe Foundation. We have to explain to you, once you receive these parts you are part of the structure of the Keshe Foundation. Every system comes with a Card which identifies you. And, every system in the background, remotely controlled by the monitors, by the people who run the thing, to understand everything is correct. We look at it this way, the data is secure, safe, but everyone has the data. So, I don't need to steal the data to give something, because I have access to the email, or I have access to the knowledge of the Keshe Foundation, or list of the Knowledge Seekers ?? on it, because everybody has access to everything according to their need and time. We see this as a bigger structure plan for identifying Man in 100, 200, 1000 years from now. Because then it collects, it converts into what I call, Universal system.

In the next few months we hope to start the process of what we call, non-physical plasma memory chips, memory banks, which is enough to put all the knowledge of the Man in one block. Collected through the system, feeds to a master point created through the structure of the brain of the Man, (:58) very much similar, and development of the further structure of it. I explained to you as before, I explain again if you haven't understood. In Keshe Foundation, in one of our research centers, we have managed to create continuously, Pico and below Pico material. As I said before, today's Microchips, works on 3 Nano. We have gone 10 to the minus of 6 below Nano. Which, at this point, it's a dynamic structure like the brain of the Man. We can produce this material continuously, we developed it, perfected the art. And in this process it allows us to create Chips without connection, create memory bank without any wiring the way the brain of the Man is.

We have broken into the Knowledge of the Creation of the brain of the Man, or memory system control system. Rapid evolution, future assessment and reaction, and data protection of the data you need to know. There are no switches on and off. It's all to done with the emotion. The present system we see, AI system control, they are just a child's play in the coming years. You will understand if three Nano Chips can create such a creature, what would 10 to the minus 6 of this Nano will create in response. (1:00) All this needs research, development, needs time, and secondly needs for Man to understand. We carry on with this process, we will develop this process as we go along, and as we

expand the knowledge. So we try to open your eyes, not to follow blindly, understand what you do will change, will bring the change. We brought the new equipment's past 2-3 years to test to get to what we do, what we have. And now is next step of the development and we need a lot of support.

We need mass support into developing this technology into its next step, not just by Knowledge Seekers but by scientists from around the world which will initiate very soon in a different dimension (D) and direction. Hopefully if we receive enough support that we can cover the 2,000 by early 2026, we'll be managing to start the process faster in changing a lot of things, even in the structure of governments. I'll explain before, I'll explain more. As we test the process of the Keshe Coins and we encourage you to take these Units up, we will explain to you a lot of other things that will come with it, which becomes part of the structure of the governing through the emotion and the STM, and then governing the physicality of the Man with borders. Collectively moving in that direction, not structured and decided by Illuminati's, or governments, or whatever. (1:02) And that is in the hand of all of us, that everyone knows.

If you are in Cryptocurrency you understand exactly what it means, what we bring crypto-emotion, which means every transaction is recorded, you can trace it back, you can trace back who start where, start where we can change, and who is doing what in the energy level, that we can change. In a way we use part of the technology of the Cryptocurrency in bringing, with the new technologies, the same dimension to the knowledge of the Man. Everybody has access to all the knowledge, everybody has access to all the energies, and then you see the change. Maybe three to five years we'll see the beginning, physical changes, but the whole process has started.

Those of you who are on the screen, you see the 'honey guy' is back again. He's got his pot on the table, and we can see it on the screen. You've been fed again with honey in the past half an hour. What did you feel? How did you feel about honey in the past three weeks, four weeks? Has your eating habit has changed? Because honey is the essence of many nourishments, covers a spectrum of. Has anything changed in your eating habits? Have you changed emotion? Has anybody told you, you've changed. And then look what vitamin C change has brings about in your physical condition, and what does honey bring when you eat the honey, whatever. Has anything changed in that side? Do you sleep better? Look at the effects of honey and lavender and what you had as a result of using what we call, vitamin C, which is one of the best antioxidants. Has anything changed? (1:04) Then let us know. We are playing the same game with you today and I hope you enjoy the honey pot. We'll let you ask any question you like and we'll try not to answer it the correct way, because then we answer everything. Rick if you would like to start.

Q: ... How can the new Keshe AI system help us to understand the (KF) Books? Do you have some concept on how that might... how can somebody get a greater understanding of the knowledge through the new AI system? What would the advantages be?

K- There is a way you can use. I was just before coming up for the teaching today this morning I was told about the report, that the students who have started using AI to

answer the questions in the homework, and other bits of the work in the Universities and the schools or whatever, show 47% reduction in their intellect. And what the researchers are worried is that, if it goes this way, we'll see the onset of different new diseases, like Alzheimer's, much earlier, because the brain is not used, so it shuts down. Depends how we use education. (1:06) If the earlier research shows 47% reduction in the brain usage, or logical usage of brain, by our children, answering, working in the universities and schools, you can imagine what damage it'll do. And so, how, I'm sure, very soon, will bring restriction on the use of AI.

What do you need AI for to learn about the Keshe Foundation Technology? We have a AI team, we set up, they're working, they have some other things going on with them, that they will try to fix this, and AI will become part of this Unit, which you are all buying, helping us to set up, will bring this into operation with AI. (It) has to be done, to be in time, and to be as fast as everybody else. But at the same time we've seen a new research report, which says, children, young age, which use AI, they behave intellectually better than the others. But, so, it depends how we feed it, how our AI team put the technology and how you connect to share it, to bring it out.

A lot of you ordered the Head Units. The new Head Units, which is going to be released in next few months, some of you have bought, in a way should connect to the whole system of intellectual of the AI. You want a question, you have a thought, what should it be, by putting the Headphone you should receive the answer. "Oh, I thought about something new." No darling, you're connected to the intellectual part of the whole knowledge which is put in.

In the future knowledge doesn't come by reading, knowledge doesn't come by teaching, knowledge come to us by enlightenment. (1:08) Which means AI has to help us to be enlightened. To create and transfer the knowledge of AI than a voice and data to a knowledge of plasma emotion that is matching the STM, and then you see, "Oh, I found the answer. I just thought about the answer, but..." Sorry, you tapped into Keshe Foundation AI structure with a Headphone, you already in it. And when you do it once or twice you don't need to use the Headphone anymore, because now it's set, it's connected with you.

I'll tell you why we do this. Because, nowadays, we have tested you. Before we open the session, and after we open the session, we see how you're all connected, or you... Before we open some sessions you already have connected. We don't need to open. We have a session of 29th. And it'll be amazing. Half an hour, if you open our machines, the machines already switched on. You're all in it. Those of you attended us frequently, the sessions of Monday (Friday ??) sessions, the graph on Friday sessions is not the same as what we used to have, that nothing switched off. We don't connect any of our systems. You lot start putting your headphones on, we see you are connecting. Some of you don't even have a system, with the headphones you come on the phone, you have already connected yourself. It's a big, big difference in how the education of the future will come, and how you get educated, you will tap into the knowledge in a very free way than us tapping into you. (1:10)

Q: ... When you say that you're transferring and monitoring us, are you referring to all of us connected to the teachings on Youtube and Zoom, or just those who are on Zoom panelists?

K- All of you, all of you, which are connected to the teaching. And those who listen afterwards. I'll tell you something, very interesting. (I just, as usual, I need time. Let me download, save the image, and then I save another image, and then, very interestingly, I try to show you these two. I have to connect, excuse me for a second till reconnect back). You watch and you see how you lot reacted in past few minutes. Watch this. This is before I told you about honey. Watch this. (That's your ?? node). (1:12) Now our operators have matched the minute I said you lot are connected to honey. Immediately you lot reacted to it. The funniest part, or the interesting part is this guy. Physically, this thing. This is your energy where we transfer to. And if you look at this graph and the tail of it, which is this one. So we, I mean the point you see here, the arrow, the note I receive, says, this is the point where you introduce these ?? talked about the ?? honey and see how they react. That's how fast we see how you lot operate. And many of you are connected over the years with us this way. I've moved off the image, Rick, if you want to change.

We see that Knowledge Seekers, even listening afterwards, couple of weeks after, they still show same results. So, it's emotion embedded in the voice, embedded in the connection to the system. (1:14) And yes, you're all connected. If a guy after two weeks listens and he gets the same effect, so you lot which are listening Live, you're all connected to it by the same way. We put the seed in and you're all connected through the same energy of the seed. Which is the energy information through the Soul.

Any other question?

R: Well certainly a lot of information can be encoded in our voices. I read an article recently where AI can detect cancer just from voice recordings from people. In that particular case it was throat cancer but I'm thinking well in the future maybe that's all you need to do is talk to AI and it will automatically diagnose you as any good doctor can.

K- There are a lot of research done on the ?? odor of the body of the Man to detect cancer. There are research done on how our aura can tell us about the cancer.

R: And they use dogs to smell whether you have certain kinds of cancer as well.

K- Yeah. Yeah. So, it's all field detections.

Any other question?

Q: ... (1:16) Mr. Keshe, you taught us that we must not consume anything with a Soul, neither animals nor plants. At the same time you mentioned future replicators, that will be able to produce food. My question is, what is the nature of this food? Are they purely

field structures that appear like an apple or a dish, but lack a Soul of their own? Or do these manifested foods also take on a form of Soul, that withdraws back into the plasma field after consumption? It would help me greatly to understand what we will actually eat in the coming era.

K- With... primarily fields, even though we... There's a big difference, being fed by a Soul than being fed by animal. When a Soul gives it's voluntary given, when it's what it doesn't need, or it's something it feeds, it ?? fields you need. In the physical feeding the lamb has no choice. (1:18) So, when it comes to the feeding of the Soul, all energies in motion, magnetic fields, have a source that are connected to a plasma somewhere. Which, if it's in the environment it is free for whoever wants to take it. Does not damage the source, because the source has already given it. And so if it's the Ray, or it's a Soul everything is connected ?? to ?? you, unless you get packages of interaction of the fields, as a Rays which again somehow they are part of the structure which is already given freedom (freely), has no condition attached to it, does not destroy another structure for.

This is what we call, the radiation of Cosmic Rays (CR). We have, this is something which world of science never talks about because never understood, but in a way we have rays and then we have the radiation of the rays, which comes from the interaction of the rays with another ray. I speak a lot about it but in the world of science we don't have such definition as such about this. We create an electron, we hit the target, we create an X-ray. But in the world of Creation when the magnetic fields interact, they release X-ray too. The X-ray from the matter is harmful, X-ray from the magnetic fields is a pleasure, is a food source, is an energy source. (1:20) Not connected, but available. But at the same time, as all the fields are connected to each other, they create the condition.

And in the world of technology, very soon we explain some details unknown in the world of even energy. Now when we'll do it, because we are doing it now, it's not something we want to do. In part of our systems, we bet on it, we rely on it to be there, that it gives us what we want because we know how to do it. We create radiation of Cosmic Rays. Because with those we can create new half-lives, we can create new conditions, which does ?? not mean .. we add to the energy of a plasma which is unknown at the moment. At the moment if you look at the CERN and everything else, they feed a lot of magnetic field compressed to create fusion they call it, or whatever they do with the plasma. But with the Cosmic Radiation you actually elevate, you give that freedom. And this is part of the process will come.

You get energy partially from the plasma because it's given out for it to be, the more you give, the more you get, the more you spray the radiation, you'll ?? feel it out, the more it's there to catch from you and then when you're locked in you have another way to give, but if you understand the model of what I've used for years, what it is. And then you get partially from the radiation of the rays, Cosmic Ray radiation. And this is what the world of science has to understand, and when you understand, it brings new changes, even feeding the Man, which is the difference. You don't need to kill, fields are there free, because it's given out already you cannot steal what is a gift, because it's already given. (1:22) And then in that interaction you have the radiation of the Cosmic Rays, which is a

free, if matches you, is yours to take and to use, but you cannot eat to become too fat. So, you take what you need from it.

Any other question?

Q: ... When you showed us the Transfer Cup we saw that the energy and flavor of an orange were transferred to the water through the plasma fields, of the four basic Gans's and their respective Amino Acids (AA), interacting with the orange's fields. My question is, through some process, analogous to this, would it be possible for a Soul to receive life knowledge from other Souls? For example, if I wanted to be a virtuoso musician or pianist, like Mozart, Beethoven, Chopin or Bach, could that knowledge be transferred to my Soul using plasma technology?

K- Yes, but doesn't mean that you can play it, because your fingers are not made to do it. Or you have arthritis, you cannot move the finger. But on other hand, as we've seen, the energy which comes from the Soul can give you even the talent to play a musical instrument which you never played before, like the masters. (1:24) Because you move away the dimension of the energy of the Soul.

This, I say, for example, you heard many times, I tell you, that you rest your arm, your leg for one day without moving it. You rest your body for a week and you try to move, you can see the tear, the pressure and the damage. And then you try to move a muscle which hasn't moved for months or years. Impossible, physiotherapy and then they have to get you to walking and the rest. You've seen it with Naomi? After a month, just by transfer of energy to the Soul, she moves freely. Like a puppet on a string, as I've said many times. We've seen it with people who have had physical problem to move. Last year, in research ?? by one of the leading companies in the world, they chose a number of people on the clinical trial with the Keshe Foundation, for trial. And one person, elderly, and 82 years old, could not sit or stand up, She was bent and there was a... we've seen this in 2007, 8 in a case, very similar too, but much worse. After 3-4 weeks, using the technology, hidden under the things, because Man needs to do, she can stand up, she can walk, she can sit, she couldn't even crouch to go to toilet. (1:26) Now she can sit all the way down, stand up and everything. Man who could not, walked in with a stick, walking, after 3-4 weeks, runs. It's all videoed.

We cover it on the conversion of the energy. But, in a physical world, to get a woman to do this, with a physical, what you call it, physiotherapy and everything, it's impossible. It's like, it takes months to move this, because muscles tear. When you deal with the recuperation, learning through the Soul, physicality goes with it. Physicality does not count anymore. The tearing of the muscle tissue doesn't, because even the Soul of the strings, the muscle cells, match with the Soul, and there is no physiotherapy. It brought him to think, "How come I... this person, hasn't moved off the chair for 10 years, and now out of nowhere, just gets off the wheelchair and walks?" It's impossible within a week, two weeks, to do this.

Then, we start looking at the structure of the Soul of the cell, and the STM, and then Soul of Physicality (STP), made a lot of sense. That's why you don't get ?? physiotherapy. We had a Pakistani guy, who had a stroke in upper part of the spinal cord in the brain. At age of 19. This is all recorded, we have full videos of it. At age of 19 they told him his father has died. He had a stroke. Paralyzed in a wheelchair. (1:28) He came from ?? Sollihall Birmingham. He was 45, around 40, 45. They came in a minibus with him, with his children and grandchildren. They brought him out of, with a wheelchair, out of the car. And that's all they could. He came, I looked, they explained, I understood that what the damage was to the Soul, not the physicality. And they came back about 4-5 weeks later, for him being paralyzed in the chair and all the pains of it, he used to take drugs to subside the pain. And this drug was one of the biggest problems they had. I asked him, "How come being paralyzed from age of 19, you have children and a wife?" He said, "That part I can do something. I cannot walk. I'm in pain all the time." I said, "Ok, no problem." Three, four weeks later, this is videoed, he came by plane and he walked in and we videoed him as he walked in, hand in hand with his son and he said, "Do you know something Mr. Keshe? From the day I left here, I cannot touch drugs to kill my pain because I have no pain and my body has access. I have no pain, I don't need it. (1:30) The minute I bring it to my mouth it smells like manure. And I can't do, I haven't touched anything, but I'm walking. Can you explain to me what you did to me?" I said, "We understood the effect of the Soul." That overpasses even physical damage.

This is why you can move a hand, a leg which has been paralyzed in a bed with a strength of emotion in the sense of that. You give the knowledge to it. You give the essence of the totality, that the body walks through the STP and not physicality, and you see them physically walking, because you pass the point of physical life. Observe that clearly 20 years ago now, nearly 20, 17, 18 years ago, it was very, very obvious. Again, last year, in the trials, in... we observed, with observation, with doctors monitoring it, the same. So, how come? And then they see the damage is still there, when the doctors look at the damage they say, "The damage is still there, but we don't understand why this can be done." So yes, you can gain everything through the Soul, even physical ?? motion. And this is the beauty of it. Essence of the physical ?? motion, even the joy you can transfer through Soul.

One day when the time is there, we load all these things on the new setup which you all looking forward to see. And then you see Knowledge Seekers spend time to decipher and put all this, are kept in the archives, and pictures and everything else of the Foundation. (1:32) And then you see how you move the Soul, you move the STP, physicality just follows. It's the same with the knowledge, it'll be the same with the emotion. And it's part of the setting of this structure of 2,000 (ONN), we change the emotion of humanity to walk away from wars. And that way, we can keep it fed to become part of the essence of the life of the Man.

There is a movie, it brings a lot of sense in what Man dreams about. If you get time, watch it. It's called Utopia, it's for children, done by Disney. Where there is this city that there is no crime, everything is peaceful. And the little rabbit wants to become a police officer in the world of all the big animals. And this is the ultimate goal of the Man, but if

you understand what is set up, Man is destined for that destination. Because you transfer the energy, the knowledge, the emotion, and the outcome. In a way, up to now, Man was taught by the word of the Prophet. Now, Man moves by the Soul of the Prophet. That's a big difference. Man shall not make a mistake, there'll be no imperfect child ever born on this planet. That's a promise I gave to my Creator when I accepted.

Any other question? (1:34)

Q: ... I did want to ask about the language translation. Is it effective, like you did say once that we could listen to a Chinese speaking person, and be speaking in English, and we could each understand each other. Is that still the way it's going? Or is it not possible to translate, even if you don't understand their language?

K- Ahhh... There's a voice of the language, there's an emotion of the language. I want to translate to the emotion of the language. That's what it's going to be. It's not going to be voice in your head that says, "Oh, you ?? have gone cuckoo." You understand? We understand the emotion of the language. And when you travel as much as I do...

Q: Like in the Universe?

K- Yeah... When you travel as much as I do, I traveled some 80 plus countries and nations around the world in my lifetime. You realize you can't ?? speak every language. You can't ?? speak every language, it's impossible. But, if you're an observer, you can see their emotion and you can feel their Soul. And you build the habit without speaking language to understand what's going on roughly. And you know if they are cheating you, or they mean something else, or they are speaking. (1:36) We have access to that knowledge already. But it needs to be, what you call it, trained. And, at the moment we still get 40%, 50% wrong, but the 40, 50% you get right, does not need translation because it comes through emotion.

Q: ... I have another question but it's from last week, the Knowledge Seekers Workshop 603. We talked about reversing genetic modification in wheat seeds. All the Knowledge Seekers, I guess it was 2008 or so, received the same seeds, same kinds of seeds worldwide. They were all genetically modified. And a Belgium agricultural scientist used a method to reverse the genetic modification. And it ended up having about 15 stalks of grass.

K- About 10 to 15 ...

Q: 10. Okay. And does that mean that we were able to absorb the energies of that kind of grass and that we kind of made it ?? weak and destroyed the value of it for us in energy by modification, hybridization, everything. So did we ruin it, and we were unable to absorb the energies like energy itself, or has the Earth always been unable to support us, like 20% from the Earth and 80% from the Universe. Is it... have we ruined it?

K- No, we haven't ruined it. You see, when we talk about going back to the beginning a few thousand years or whatever, (1:38) at that time Man was here and he could use other things to guarantee the 20%. So what we have done or what we see to be done, because you have to understand the science behind it. I was explaining this very recently to a couple of Knowledge Seekers and I was in an agricultural meeting with some ?? top agricultural organizations and I was explaining this to the Knowledge Seekers past 2-3 weeks, very recently.

We, for example, data available is that in China the wheat has 12 to, what you call, 11-12% of protein at time to harvest. In inner Mongolia in the test we did we increased the protein to 20%, which increased the weight of the harvest by 2-3 times. It's the same number of the seeds, it's just by increasing the protein we increased the weight. And then it's the same number of grains. We haven't changed the number of grains. Because the plant which we increased the harvest of, was already a flower when we got involved. We didn't get involved at the bottom or beginning of the time. Then, it showed that the amount of protein changes the weight of the harvest. (1:40) What, if you look at the grass, if you look at the grass which became wheat, it has 10 stems. Let's say each has the same number of seeds or grains in it. But the grains instead of carrying 13% protein, were carrying 1% protein or 2% protein. By taming it, by bringing it together in a way to become one stem, this brought those other 6 or 10 (stems) to become 10-12%. You understand? This is where we changed the, we modified the protein absorption and the collection. That's how it's done.

Q: So Earth... so Earth has always been unable to support us with energy.

K- Yes.

Q: Okay, so it's 20%, 80%. Alright.

K- Because, in a way, it's not that you have to understand the problem. Would the Man need more to eat if he go on the Moon where there is no atmosphere? Where the edge of the physical dimension of the Moon is the balance between the M and gravitational, that's where the boundaries are set. So, would we on the surface of the Moon consume more physical energy? Or more energy from the Universe that we go 5 to 95%? Or would we go the reverse of it, 95% from the planet and we kill more because we need more energy? (1:42) Is this the reason why there is no life on the planet Moon?

Q: Yeah, so we have to make, to get it from the Universe?

K- We have to get it from somewhere, if we are going to carry on with this dimension of physical life, yes. To keep a balance. Our Soul is as hungry as our physicality, but it knows where to go to.

Q: And I have one more part to your pictures of us. Okay, you did a video of us when you were giving a workshop while we're all receiving energy. And your picture, I thought it looked more like a plasma loop. Do we, if we want to go backwards in our Soul, do we

have to retrace back on the line that we came from? Or when we return to the Creator going up again, can we still go backwards? I wasn't clear on how you would go backwards. It's sort of like...

K- I don't understand what you're trying to ask.

Q: If I'm going from the Creator, like you've got us in a video, and we can see where the Creator is, and where the STP and P is, and we see that there's a straight line, but there's also one going one way, one way, and then one returning to the creator. If we want to reverse our Soul and go back to maybe where the problem started and try to fix it from there, or try to find out how we started, do we have, is it like a loop? (1:44) We come out, I mean the Creator, yeah, from the Creator we come out and then we go back on a return line, not the same line. But if I want to go backwards, I'd actually have to reverse where I came from in the first place.

K- No, no, no, no, no. You came from the, what we call, M, and you go back on the gravitational (G). It's what goes back.

Q: So we would have to choose where we're going back...

K- You don't need .. Or, let me put it this way. This is the way of the this you. It's nice what you brought up something I kept away for a long time. Maybe we can open it, and put a foot in it and then open up later on in years to come. We call it heaven and hell. And the biggest fear of the Man is hell, and he thinks that heaven is perfect. When we create a dimension of what we call the wrong way or whatever, we become passengers of the M, of the fields of the Creation. Moving further. When we go to heaven, which means, in way of life, we become more like a Creator. We get attracted by, we call it the G line. But again, our G line has a strength at certain point, does not match with what's going in, it's not strong enough, and gets detached and starts his own creation, which is the stars and everything else. (1:46) On the way back to the Creator, if once we mature to understand the science of Creation, if we follow the Soul of a Man, we see if it's going closer to a certain direction, or is going away from certain direction, depending. It's not that it goes towards the center of the Universe, which comes closer, because this Universe has another center. As I said, the word I chose very clearly, was direction. Because, let's say the direction to the center of Universe is South, but the Soul goes East, or the Soul goes West. And at the boundary of the Universe it disappears. Because, it's on the track to go closer to the Creator, or it's on the track to go away from the Creation of the Creator. That's where the hell and heaven comes. And not that if we become stronger we go to the center, because Creator is in the center of the Universe, so we come closer to Him. This is center of this dimension of the fields. And then you understand exactly where you stand with your life.

Q: Intention is the direction? In a way?

K- No, the living. The way of living, the way we conduct and live our lives. We can have a very good intention but do everything the wrong way. You understand. You know, but

it's just the reality of what it is. (1:48) But in a way we are made out of our own conduct, but in the dimension of the balance of the fields, not by dimension of the physical position. We always tend to have children.

Q: So, energy.

K- Yeah, energy side not the P ?? We always say to the children, what you give is what you get. That's exactly true about our Soul.

Q: Thank you. I guess that's all I have.

R: ..

K- Those of you who are on the screen, you see the screen. We have passed the honey to the lavender. And you lot are getting fed by orange. This time we don't let you guess, because you already know if there was two, there must be a third one the same. But there's a different process. And we are observing your direction of field of, what you call, behavior of the Soul, in a way you call it, Central Energy. It's very interesting what we see in the background. How, a STP is pushing its way around the behavior of the Man, and physical life. It's very interesting what we see, if it's coming up.

Any other question?

Q: ... (1:50) The question is, is it possible to upload software, or the AI system that you're talking about, to existing and functioning, but perhaps almost obsolete machines, strictly for web use?

K- No.

R: No other systems?

K- No. Do not connect the systems to anything. These are not computers for your work.

Q: ... Can they upload the same software to existing systems?

K- No, no, no, no, no, no, no...

First of all we control how you're connected, and who's connected. Because secondly, the connection with this system is that you receive a part which you connect, which we will control that part too. And no, you cannot connect it, unfortunately, because this is the reason that every, what we call, if you're familiar to it, every, not every point, is monitored and is controlled. So, if the system is not what we gave it, the structure which we put in it, we just disconnect it, it's not there.

K- ...

Q: ... (1:52) And I had a question about the last workshop. You said, I understood you said, when amino acid and matter create body of a being and then attract Soul, or the Soul comes first and creates the body around. And when can we call a fetus has a Soul and (is) considered as a Man?

K- I don't understand what you're trying to ask.

Q: When can we call a fetus with the Soul of a Man? The baby in the womb of the mother.

K- Now that we have this knowledge and I'm sure with knowledge that will come in the future scientists will develop a machine that the way we are doing that's what you see, but more advanced system of this. Like when you go and they put ultrasonic on the belly of the mother and they say there is a baby inside you, this is the leg, this is the arm. In a very near future, this is something which I'm sure Keshe Foundation will promote for this research development very, very fast, because there is ?? another application. It is systems that measure, not measure, but confirm, is the right word for it, (1:54) when a fetus is a living single Soul, or still a collection of Souls, when the life is complete, and you cannot do (abortion). At the moment they say it's 5 weeks, 10 weeks. Systems will develop the way we see now, which is, which should be very easy to do. Very like a ?? sonographic. There we can see and say, "This is the point." Pinpoint accuracy that there is a Soul. And this is a Being.

And we will in the future, more or less, most probably at the same time, we can create a system where we can see the children of Mitra as energy, as Souls, but with no physicality. And then we say, this is the children of Mitra. Let me show you, if I can find one of the recent pictures, what it means. We have a vast collection of information. Mehranez, you don't know what you do, you just see the picture of when you started talking and how you changed the graph. Let me see. I'll show you if I can find within the archive where we can see a Soul on its own. (1:56) Let me go back. I have to find it. I have a very good picture for this somewhere.

<< Mr. Keshe tries to find the picture. >>

K- ... In the future, the scientists who do this, develop systems, which what I show you, will be done automatically. When we see a child is born out of physical love, or out of the interaction in the Soul of the two persons. We will clearly have an indication of the children of Mitra, or those who are born as a physical dimension, and at the same time, if the fetus is one central Soul, or is still in number of fields, which means, has not become a Soul, and has not become a STM as a collective, but is a Soul of the cells. It has a STP but it doesn't have a Soul of the, what we call, the emotion.

<< Mr. Keshe tries to find the picture. >> (1:58)

K- Okay, now I share with you, you understand. (2:00) Photos. Done. The first picture. This is more or less, if you look at the picture here, this part we see the STP, there is not

much physicality, not much Soul. This is one of the sessions. Now we look at the other one. You can see the STP spreading, opening up. Then you see the STP. At this stage, fetus, if you call it, is not existing Soul. This is still collection of the fields of the cells. You see partially here, if I call it some physical activities, creation of physicality. But more or less this is what happens to the whole condition.

Now you see very clearly, the STP has taken a shape and is creating a physical and connecting to the Soul. And if you take this off, you see here, this position is becoming creation of the Soul. And you've seen another one pictures which is very bright here if you remember last time. When this is created, life is sacrosanct. You cannot abort. (2:02) When you have a picture like this, then society and doctors will make a decision, because life is not created yet. This is like the Soul of Mitra. The Soul is there but has no dimension of what you call the confirmation of the one single Soul, or one single physicality is there as a Soul waiting to create. This is very much like a children of Mitra. And then if you monitor step by step you will see the creation of physicality and life. And then when you see the creation of the Soul, life is complete, the existence of the Soul is complete. And this is a physical Being. That simple.

This is very important for us, it'll be one of the very advanced systems we try to do, to see if the, if the Soul has left the machine. We don't transport the Soul and the physicality left behind. And you need measurements on the scale of the Universal Cosmic Rays, we'll be gathering knowledge gradually to be there.

Q: So... Yeah. Around what time, what, how many months for a human being, this is the creation of the STM?

K- Is it a bird or is it an elephant? (2:04)

Q: A human being.

K- The same. There is no fixed time and place. Ten weeks, twelve weeks, five weeks, all depends on the maturity of the mother and the womb. Why do we have premature children but they are complete? Would changing the environment of the womb allows a child to be born in 9 weeks, then 9 months? But time is a physicality of the Man. How you collect that energy and transfer the knowledge and information is another dimension.

And we've seen this. We've seen this very clearly. As I was talking about the inner Mongolia test, we achieved 20%, which is the highest ever done, independently confirmed by laboratories. But what we saw, the other part of the test, which was the natural growth we were doing, our harvest was early by about, I think, two weeks if I remember correctly. It wasn't just that. We created the, we increased the harvest, but we were ready, the seeds were ?? shored , two weeks I think ahead of the other side of the field which the test was done. (2:06) It's 100 meters long, one third was left to do with the present they were doing, and this side was what we were doing with a gap of 30 meters in between. And we were two weeks faster. And this two week faster harvest, which the harvest was ready to harvest, created a mayhem for us. Because the animals are

aware of when the harvest is ready, and the farmers were going crazy with us. They were crazy with us, test trial, because they had never seen so much bird, they were all eating. They were coming because the harvest was ready, the numbers were picking, because the instruction was, you harvest at the same time. And even after the birds eating for two weeks at it, whatever, we still two or three times more harvest. Imagine what would have happened if the birds wouldn't have eaten. We would have gotten about four to five times more. Because we were getting calls from the agricultural center that what's going on, there is so much, they never seen so much birds on the harvest, and it's damaging the harvest. And we said, okay. After the harvest, we sowed two or three times more. Imagine if the birds haven't eaten it. They didn't touch the ones which wasn't already. They were eating from the harvest we completed.

So, going by the same principle, if we change the environment of the womb of the mother, would we need 9 months pregnancy, or we can complete in 9 weeks? The interesting, I'll put this ?? into the word, give you a thought. Would we be able to create test tube of Soul of Mitra's? (2:08) Then test tube from egg and sperm. And how those Souls will come to be. This is not a theory. This is a reality which Man will face in Space when we fall with the field emotion of another creature which physically touching can be demise for the other. But nothing does not need touch. How do we grow the children of the ?? law (?? love) of the Universe? Universal test tubes through the emotion without any physicality. This will come to Man much, much faster than you think. And Man has to find a solution for it. To understand it and worst of all to accept it.

Q: ... I have a question. The child of Mitra, what about their physicality? Do they need the womb of a mother, to develop physicality?

K- Their physicality is decided by their own Soul. They decide, in what dimension, how they want to be created. And because of that, they can mutate. We see that with some animals who have managed to do part of this, not but the ?? whole ?? , but scientists have come up with all sorts of chemical things. But in fact it's the emotion which changes the color or the shape. (2:10) And this is done by the Soul itself. And they don't need a womb. The womb .. of the mother is a dimension of physicality. The child of Mitra has the Universe as a womb.

Q: And the child of Mitra start, develops like human being from small to adult?

K- They decide, they decide. The children of Mitra are not just children of Man, they're children of the Universe. We see many, like the way we see black and whites, Chinese and the black, we will see the children of Man and many other creatures of the Universe in the Spaces we become the passengers of. When we become the true citizens of the Universe, we will see the same structure, but in a larger scale.

Q: And they are multi-dimensional? They can move?

K- In a way, yes. In a way, yes. I was talking to one of our Knowledge Seekers, and I hope she doesn't mind, she knows who she is. And she was talking about the names of the

God and attributes of God, and whatever, they say it's 99, I said, "In Koran it says, (2:12) 99 names and attributes of the Creator." And when you don't, when you understand all of it, it's a hundred. And I wrote, if you understand the essence of it, because this covers everything, dimension of physicality, as much as the dimension of the Soul, what the emotion it creates. It says, "I've seen you naked and I've seen you clothed. I heard your pain and I heard your joy. I heard your love and I heard your passion. I heard your fears and I heard your confidence." Then, if you add all these together, you find all wisdom of Creation and all names of beauties of God within the mixture of these words. Needs no Prophet, no needs, needs no Message. It brings home to understand one's enlightenment of the truth about oneself. In a way, between the dimension of the physicality and the dimension of the emotion of the love, which is the beauty of the Creator, and the fears of the existence, we understand the dimension of the physicality and the dimension of the Creator, and how His beauty is boundless. And then we understand the children of Mitra have no negative side to them. They have no fear because they cannot lose. They have no physicality, but they are clothed in the clothes of the Man, or wherever they manifest themselves.

And it's the same, they are the best lovers, but they show their passion in devoting their life to the Universal Community, then the Man or physical dimension of one's sense of ?? the other. (2:14) And if you understand this, then we understand, in a way, we can be the Creation and the Creator, without going through the dimension of physicality. Because, when it comes to the dimension of the Soul of the children of Mitra, which is the dimension of energy, when they fall in love with another energy, do they need to manifest themselves in the dimension of physicality, to the limitations of it, or they enjoy the freedom of the Universe? Citizenship will become very difficult unless you want to enjoy the physicality. I hope we answered you.

Q: Thank you very much, I need to listen to it again. And it was too much, too much education.

K- Thank you.

Q: ... What has been happening to me over the last 3 weeks, is that on some occasions when I think about something, shortly afterwards what I thought about happens. Things that happened to me as well as events involving other people. It's as if I know what's going to happen in the future. (2:16)

Q: ...About being a translator for the show here. Are people better off to listen directly to your voice, and not bother with the translation? Or, should they listen to the translation itself, and that way get the meaning from the English to their language.

R: So, she's not sure if who, who listens to the translators, has the same effect as, as if they listen to you directly.

K- Oh, it all depends on the Man. It all depends, if you feel you can get the knowledge. As I said, we teach for the Universe, so, Universal people don't understand the language of the Man, but they still get the same information. So, it all depends on the person.

R: Yes, that makes sense some people learn through words, and others through feeling and emotion.

Q: ... A few months ago, month ago, you said you were looking for two million dollars. You know, listen to these and just wonder whether we form a script writing team that could produce a sci-fi TV series. (2:18) It would certainly be more imaginative than some of the stuff on Netflix. (Mr. Keshe laughs). I'm going to go back to the Time question. And I thought that was interesting, that question from Alexandra. Because for me, synchronicity happens a lot more fluently when I visit new GPS locations on the planet. It feels like I travel through new energies and it opens up this variability that brings the right people at the right time. And by far and away the place where the greatest impact that occurred in was of course India. How do you see us moving through various parts of the Earth, where there's a different relationship to the core of the Earth, than the Creator, and how that interaction opens up certain variables?

K- It's all individuals. It's all individuals. It depends. Depends what we decide to be. And how we decide to interact. And how we decide to let our Soul to interact with the environment and the community. And how we decide personally to interact with a situation physically which affects our emotion and the Soul. (2:20)

Q: Okay, another question. I know you've kind of closed the book on time for the moment temporarily but I was going to wonder if we can pry this open again. So that with the Enhancement machine, does it help align our Souls and our matter state in the same timeline? Does that infer that we have the right Place, the right Position? The question, the Possession question makes me wonder, does this allude to the fact that in a way we behave in a possessed manner when we aren't in the same timeline as our Soul?

K- What do you mean by that?

Q: I don't know, it's just my interpretation of how you were saying it. I've asked you before, how do we actually connect with our Soul? And you said, the more you try, the, you know, you can't really try. It's got to be natural. But yeah, I'm just wondering about how we find that alignment to our Soul. Without the Enhancement machine, how can we try and trigger that relationship? And yeah, if we can't connect to our Soul, we're a little bit disjointed and from that, we don't act in alignment as perhaps we should. And so, yeah, for when I was in India, for example, I felt my Crown Chakra just blow straight open. (2:22) And it was like I was connected to the Creator, to the core. And then when I returned home, there was, I was nowhere near that sort of connection.

K- Somehow, somehow people go to India to find this, and they go to certain places to find this. And why India? Or they go to South America to find this emotional feeling. This is something which has puzzled me for a long time. Why can't we do it in Australia?

Why can't we do it in China? And, why people have to go to India to get the Chakras opened up and the rest of it? Is it what we believe where we go gives us this? Or is it the reality at that point we feel, with the fields of the planet Earth, the freedom to let it happen? Or is it your fields that allows us in certain positions to achieve this? And this is very strange that human being in certain places allow this energy fields, or they feel their energy fields are opened up, and they all go to India. Or they go to South America to certain things to get certain drugs. Or leaves to chew and get to that point of, what you call it, Chakra's opening. Is it your physics, your geomagnetic field, which allows this matches in these places with us? Or is it too much curry when you're there? (2:24) Food has a very direct effect in emotion.

A very strange thing happened to me very recently, in past couple of days. I was with other people. We ate the same food and walked away. And, couple of later, couple of hours later we came back together, and we all had the same pain in the same place, about the same time. It was very strange, but we ate all the same food. And I was wondering, how is this possible? One of us, not all of us. Exactly the same place in the body, the pain, the pressure and everything else. That was just food, that's the only thing we shared.

And, is it food in India which allows certain ways to do and then if it is, which, then we saw why Indians talk and walk and behave in certain ways. Does the combination of herbs in their food, is something parallel with us, in our amino acid (AA) structure, which allows reduction in the blood pressure, in the brain, which is like in a, what you call, in a state of sleep, or you call it, your dream. (2:26) Does it change the blood pressure which allows the expansion? 90% I'm correct. Chili is one of the most addictable agents we know. So, do we get addicted because it's like get drug, we allow us, but doesn't take us to hallucination, but allows the field opening of the brain, reduces the blood pressure, that creates the same condition as you went to sleep, but in a certain position directly allows you. There is one thing for sure, why people feel in certain areas or certain groups, or in India, these kind of emotions. 100% is food related. So you don't...

There's a research done by the French scientists. This research was published about 15 years ago, 20 years ago. If I'm correct. In one of the French colonies in South America, there is no MS. It's unheard of. (2:28) The people from this island who lived in France over 10 to 15 years, going back to their country, show the same density population MS as France. And the scientists did a 25-30 year research on this, and they found out the physical side of this is a specific red pepper, which people in France from this island don't have access to. Where in their island eat all the time, does not allow the growth of. But when they're in France, lack of it allows and sets up in MS. Then we extend the research from the Keshe Foundation point of view to see more detailed in this French research. Why the population mark on the ones who immigrated back to the origin, they have the same number of MS's as, the one they came from France.

And it wasn't the pepper. It was the emotion of the lack of and allowing for the abuses of the childhood to manifest itself, where this pepper covers that emotion. (2:30) And in a way, you burn, you eat it, but it's a very sweet pepper. Now this, they have promoted to extend that, in most of the supermarkets in the West you see it, but you're not aware of

why suddenly this is appearing past ten years in the market. It was used to, trying to promote that it reverses MS, but actually, the emotion it creates, it gives Man the same emotion, as you were, what you call, an abused condition, which brings back the memories of. Scientifically they connected the two, but on the other side, when you do research on this material, it shows its emotional effect on the body.

And when you go to India you get this because of the food you eat, the combination of the food you eat, and not because of you don't have access, because of the pests, what you call it, parasites, and fungicides, which are in India, they have found different solution in different herbs, that the combination of this, and in a specific way it's combined, brings that position of hallucination. (And) the softness we see in the Indians, the gentleness we see in them, is part of effect of the, what you call, herbs, roots, which they take it individually, one for malaria, one for this, one for that, over centuries they learned. When you mix it, it gives you this behavior. So, it affects the emotion. You are not used to it, as an outsider, it hits you, "Voila!" when you are there. But, effectively, what it does to you? (2:32)

It's emotional change through the consumption of... It's like virtually, you take... what is it, these chemicals, narcotics or whatever to create certain (experiences). The Indian combination of food creates narcotics of emotion. And you get it, you are not used to it, it's just like somebody giving you a bottle of whiskey, when you sit down you get drunk, you don't know what you've done. This is what it does to you. And that's why people get this when they go to India. You go to India and carry your own home foods what you had, don't touch any Indian food. 99% it won't affect you, you won't hear it. What these people talking about?

We understand this fully now and there is a trial coming up, I said, in the next few weeks, which will confirm this. Now you understand. Next time when you go to India, take with you only your food. Don't eat anything in India, which combination of anise, and the, what do you call, the needle one which the dentist use (clove), what you call it, it is cumin, ginger, anise. (2:34) And four or five other herbs. The combination of these creates a lower blood pressure on the brain which changes the emotion. And this is why you see all the Indians are very soft and very... And then when you take this and you add meat to it, you get the blood of Pakistanis because they are from Pakistan. Because they're all there from same blood. You never heard anybody going to Pakistan to go to gurus and whatever. Because the mixture of protein of the animal, changes the effect of their protein of the herb, and the emotion of the Man.

Q: Yeah, well don't worry, you know, in Australia there are still sacred sites where people get disorientated and lost, or feel that euphoria of being somewhere. So, I feel...

K- ... That comes with it. Yeah, carry on.

Q: I feel like there's, you know, there's a MaGrav field, a strong MaGrav field at some of these sacred sites and that's what intrinsically attracts people and when you combine that

with this flying through space at certain points of time, where the energies from the Creator are stronger, these effects are magnified. What do you say to that?

K- It's the same as you have it in the herbs, that field strength which creates that condition, because it's all plasmatic, even the herbs, because it's all protein connected, there the interaction of the fields of the planet creates the same. (2:36) It's just that the field strength of the protein. Anything to do with the emotion of the Man is connected at the field strength of the amino acid and the combination of it. So in those areas if you stand in a certain position as you say in Australia. There are places in Africa, there are places in South America. In part of Africa, there are trees that around them the fields are so different and people worship them. And nobody cuts these trees. If you go to Gambia, you see a number of these trees, which actually they built the roads around them. And they are huge, they've been there for centuries, thousands of years. And they are holy trees. And people get effects of them. The field they create in their structure affects people. If it's that they feel the strength of amino acid, it affects emotion.

Q: Like last week you were talking about someone putting their hand in what I suspect was CO₂ with amino acids and feeding themselves. What would the effect be if you took that to one of these sites?

K- The same effecting, it touches, changes it... (2:38) It's .. a physical condition change, or is psychological or emotional change, which changes the physicality? For example, I don't know if you noticed, a lot of we get on a taxi, especially taxi drivers, who are long term, sits in a specific position, you can tell by the shape of their belly, they are taxi drivers. I don't know if you ever noticed it. Because they sit in certain position, eight, ten hours a day. The way you have a belly, what you call it, 'beer belly,' we call it, You have a 'taxi belly,' you can see from the shape of the... some of the... And if you get a beer belly and a taxi together, you see these huge drivers. Men taxi drivers are like a woman, 8 months pregnant, usually with a girl. The belly sticks up and there's nothing underneath of it. You didn't know that, did you? I think in Australia you don't get that many taxi drivers. But they do, especially European taxi drivers, the ones who are in the long term taxi driving, 8, 10, 12 hours a day, and sits in a certain position, they have a upper belly, not the lower belly, where the people drinking beer have different position. Because it affects what we eat, the position we sit, the emotion we have, it changes our physical dimension.

R: I was just thinking long distance truck drivers, and Doug just put that comment in at the same moment that I was thinking of it. So that would also apply in Australia, particularly, and in Canada too. (2:40)

K- Yeah, it's because we change our physicality according to the emotion. And the things we do. That's how we evolve.

Q: Last one, a quick one. So putting your hand in CO₂ Amino Acid, would that be a good way to ground yourself?

K- Not really. (laughs)

Q: Send you up?

K- Not really. Depends, it's a lot of things, depending on a lot of things.

Maybe in a very near future, I think I said last week or before, we promote a process, like everything else we do, we... because I've been asked by a lot of Knowledge Seekers, "Can you do this?" I said, "Yes, I've seen it, it works, it's perfect." You call it, the Gans of Love. How can I fall in love? This is worst potion you can ever make. But yes, there is. We have made it and it works and it's devastating. Because you can't stop loving, you just...

We did the test in 2016, 17. It was done in Africa. And we tested on couple of couples and we stopped the process, because it was getting out of control. It was done in one of the African nations, we supervised it very closely. We had a couple. (2:42) A special mixture of fields was made for them. The reason approach was the wife was complaining about the husband, and the husband was complaining about the wife. So, we decided we test, and when we found another couple we test. Two or three couples we tested. And, the first day, the lady was, I think insurance broker, as she was working in insurance office, if I remember correctly. She called, she said, "There's something wrong, I can't get enough of my husband." Then, we had the husband calling in the afternoon, says, the problem is, at the end, after a week, none of them was moving out of bed. They're spending all their time together in bed, and there was everything. They had children, they said, "We don't even feed the children, so we have to go through the process to reverse it." And, we found out there is a way you can make people fall in love. And they can't get enough of each other.

And we shelved it. We tested it second, third, we shelved it. Because there is an emotion, you can create in a specific condition, creates an Amino Acid strength, we know how it's done, of lust and love together. And I said at that time, if you put this in, the whole world will go bankrupt, because nobody will go to work. There is no need for Viagra because this is from the emotion of physical, the Soul emotion, it's dimension of the Amino Acid, it's ?? like a drug you get addicted, you get locked into Amino Acid strength and it does, it works. (2:44) If you know the knowledge the way we do, you can do strange things with this knowledge, with this technology.

Q: ... I noticed that one of the heaviest dependencies, which is sex needs, somehow vanishes. I have an idea how this would bring a stop to marriage abuses. I wonder how many abuses would stop if the marriage institution would not exist? Thank you.

K- Oh, there's a lot of things we can do. There's a lot of things, that's a lot. I can tell you. We've done so much research, and it's all sitting there in different documents and different things, that connects the emotion of the Man to a lot of problems, and to a lot of joys, it's not always problems. And even when they call it a potion, it has to have a M

field, strength of the amino acid which connects to Man, and the Man reacts to it. And that reaction manifests itself in anything that we can imagine.

Any other point? (2:46)

Q: ... When we measure a MaGrav strength in the matter state we rely on the Tesla scale. That's the Tesla scale of magnetic fields. So, how much is the Tesla scale measurement off the scale in respect to the Universal magnets? And, maybe we need to introduce a new type of scale, the Keshe MaGrav scale?

K- This is what I explained earlier on today. We, it is part of what we call, the Time in the Space, M field strength. And, we are working on this, because it needs to be defined, and it needs to be brought up, but on the field strength of the Cosmic Rays. Not magnetic field of the matter state, we are, we used to it. Because in a plasma we have no AC, we see only DC. And we see AC at the point of interaction of the fields where matter appears. And we need to define, change position, conversion or manifestation of the matter state. (2:48) Then we can define the new field strength of the, as a newer, new structure than as what we call, Tesla measurement. It's totally off the scale of present science. And it needs to be done, but step by step.

That's why I don't think Man ever reach a feasible working fusion system with no heat, the way the present world of fusion is going. Because fusion does not happen by heat. Fusion happens by amalgamation of fields, which needs no heat. And that is at the M field strength Man has not understood. It is millions of times bigger, stronger than the matter, the magnetic fields. But at the same time it has the lowest level of G field. That it allows it to amalgamate. It's the common denominator lowest, which brings together, not the highest, which Man pushes the field pressures of today. And all this rigmarole with fusion.

A simple question, if you understand, is how the measurement come. As we showed in May in China, when I was there that we produced material. They are trying to create a Helium from Hydrogen, (2:50) and billions of kilowatts and megawatts and whatever they talk about. Did any of you see any megawatts on the table of the material produced? That's a plasmatic fusion and the benchmark by Earth, what it wanted to be, by its Inertia. This is a few... If you understood what was shown in May, it throws all the present assumption of fusion into bin. But again, it's Keshe Foundation. In the future, it will become a big discovery for one institute or another. But nothing that Keshe Foundation has done in decades, in the centuries. This is the problem with the present position.

You've seen with your own eyes, hundreds of Knowledge Seekers came and saw (in Beijing). All the materials made on the table. Did any of you see any fusion, magnets, billions of kilowatts? And isn't it true that if you look at the sky and put something there you collect dust and ?? you say it's dust ?? And most of what a dust, you collect something you put in, outside, is from what it rains from above through fusion of the fields and their interaction with the Inertia. And if this is not correct, how did the Earth create so much mass over years and centuries? It wasn't this size when it was created,

how does it... how does it gain so much (mass and) energies, and how the layers we cut across the mountains, we see in the structure of the mountains come from. (2:52) Who brought this sand together, this structure together? Did somebody pile it up from one place to another, made the mountains? Then you understand, exactly how it works.

I was giving in a lecture, very, to a small group of scientists, very recently, in agriculture. And I explained how they were talking about alkaline land, they have, and they want to change the alkaline land, to be able to... for the agricultural purposes. And I explained to them, we got, like in China, there is, in inner Mongolia, part of inner Mongolia, we have a very high alkaline and very salty land. Amazing enough, this land which is salty, nothing can grow, they have a problem with it. A few centimeter below the surface, half a meter, meter some places, but more or less, it's a sweet water running. And by law of the nature, if there's a salt tub, and the water gets washed, why it is a sweet water underneath of the most alkaline salt land. And I was explaining to these scientists a simple fact, and that is, the Earth atmospheric condition and Inertia condition dictates that this land, creates a field which absorbs alkaline structure. You can remove all the sand, leave it for a century, it'll be again alkaline. It doesn't go (away). It comes from the environment from the above, (2:54) with the fusion of the plasma conversion to matter state, that creates that alkaline.

It didn't, somebody didn't come and dump it. It's got a magnet of, magnetic field of, plasmatic field Inertia of the alkaline. Whatever alkaline is made in the interaction of the fields of the Earth, with this atmosphere, lands up in this place, because this is a magnet of it. Because, we don't understand, we always say, magnet is only for iron. But with the plasma we create a magnetic field of anything. Then, we have the structure of the centrifuge, where we collect everything to the side, or we reverse everything to the center. Don't we have this in the oceans with the plastic lake, with the islands? Why do islands created in Pacific, that there are a size of nations, some of it, it's all plastic? Because the water is created of Hydrogen and Oxygen, and what is the content of a plastic? And it's at the frequency, doesn't matter where the plastic comes, it absorbs, we are used to little magnets. The Universe is a magnet. Earth creates Inertia magnetic fields which absorbs. If the scientists understand this, then it's easy, you can understand the rest of it. We won't try to change the culture, we don't try to change the environment. We grow materials which are, ?? not to be in alkaline line. We don't try to grow wheat in alkaline place. It won't grow, you have problems, and then you have to change it. If you understand this, we saw how the problem with our scientists, the research money is too good, too fraudulent, and pushes this thing through. But once you understand this, it's the same position with everything else in the life, and the position of magnetic field. (2:56) It's job of Knowledge Seekers to teach this to the agricultural people, to the world of science.

Any other question?

Q: ... I've come to leave two questions for Mr. Keshe. I will also share my account of what happened to me last night. Early this morning I woke up after a dream. As I tried to go back to sleep, I felt my body become heavy, and suddenly I jumped up. This jump is

known as a spasm, and at that moment I saw a flash of light in front of me, and heard a very loud buzzing in both ears. The question is, is this spasm the moment when the Soul leaves the body, but something prevents it from returning? What could this flash of light be accompanied by ringing in the ears?

K- I wasn't there as you hear, I don't know. Have you seen, have you seen this little clip? It's very interesting. When I saw it the first time, it made me laugh. There's a father lying on the sofa. Then, there's one daughter sitting on the ground. Next to the father, and then there is a daughter, sleeping on the ?? chin, next to the sofa, when the father is asleep. And the mother comes between the two, with the metal tray. And she hits him with a tray on the head, and it goes bang! (2:58) And he got up, and they all fall asleep, as they're asleep. And he sees this flash of pain waking up, but everybody's asleep. He was wondering, "Where did the tray come from?" I've got this flash, it's very interesting to watch it, because... It's exact same, I wasn't there, I don't know if somebody hit you on the head? Or, did you wake up from the pain? Or, what was the condition that you've seen it? Then I can explain to you what happened, was it the wife hitting on the head? Was it a bee biting you? Or, is a consequence of the pressures in the body and the blood flow? As I always say, I was not in there, I don't know, I can't explain.

R: Okay, fair enough.

K- I get this clip, it's very nice. Because you look at it, it's a funny way, but I look at it exactly, what we talk about the dream, "Why did I wake up?" It's ... you have to understand the physiology of your body, you have to understand the condition, and maybe your Soul traveled somewhere and did say something, touch on dimension of the Soul.

Q: ... This is something different from today's teaching. I would like to know your opinion of transgender. What is the best way for policy makers to deal with it? For example, here in the US, the regime is threatening them, along with their doctors, even going after their medical records.

K- Can I be honest?

R: Are you ever not?

K- Your nation is at the moment in the turmoil in the hand of a maniac. (3:00) You have to just bear with it, till it's over. You have to just live with it. I know the Western world is taking it beyond their freedom, they're becoming a lot of, a bit more far, and we see this now in Europe as well, they're trying to clip their, what you call it, sexuality, and ?? to exercise a bad ?? click, because it's got out of control, in a way. They are less than 3% of the population, 1% of the total world population, even less, but they are influencing a lot of decision making, because they find a way and they protect and they add themselves into it. And there has to be a limit to it, but America has gone beyond. But in a way. It's like if you go to Austria. In Austria we have a beautiful system, if you are not aware of it, you don't see it. But if you go to Austria, try to cross a red light, especially in Vienna or

in Linz. We have traffic lights, red and, what you call it, green, with lesbians or gays holding hand crossing (on the light itself). Never had this before, it's like two walking to each other. It's very interesting, it's not a man and a woman, most of them. You see, it's like two guys, two women. Some of them you see it all day, that way, because we become very open, we accept the society to be. But why do we need to put it on the traffic light, I don't .. this hasn't... When I see this sometimes in Linz it makes me think. But, at the moment you can't even wear rainbow color clothing, because then say, "Oh, he's a transvestite. It was a beautiful thing to wear ??". (3:02) My time, 40, 50 years ago, we wore these colorful things when you go to a festival or whatever. Now you wear it, "Oh, it is the gay party," or blah, blah. It's taken too far, but your government has gone over the top with it. Just bear with it, it goes away.

Any other question?

R: Thank you for that. We have a...

K- It's something, if you live in Austria the way we do, it's something you cannot walk away with it. It's very strange. It's appearing in China too. I noticed it a few times, but boys are very reserved to touch each other. They behave, they have, what we call, gay behavior, whatever. But authorities are very harsh on them. But we see with the girls are much open, because girls are out to touch each other, cuddle each other, hold each other. And in between we see it. I've seen it many times. The first time I saw it in China, girls kissing each other in public, but they get away with it somehow. But the boys you don't see that much, but you see the behavior of. They clamped (down) on them very heavy. In America, it's a free run, and you have this situation. And, if you are Iranian and you live in Iran, you see aircrafts full of Europeans coming for operation, to be operated, to become a boy or a girl, as transvestite. Because Ayatollah Khamenei said, "It's a God given right to you." They can do what they like. (3:04) Iran is the center of the transvestite, gender, transaction, what you call it, operations. Many, many foreigners go to Iran. They go to Turkey for hair transplant, they go to Iran for transvestite transformation. And it's Islamic country. Heavily developed. And it's very cheap.

R: Is it a public policy or, or the government?

K- It's a more or less public policy, it is a government policy, it's open, because Khamenei said, "It's something, there are... is something God given free." So, they come to Iran, Iranian plastic surgeons become expert in changing sexuality, transvestite.

R: Hmm, that's surprising somehow.

K- You didn't know that, did you?

R: Well, it seems like sort of a repressive regime more than anything else. They won't even allow women to expose their faces and whatnot. To allow transgender operations is.

K- Yeah, yeah. Yeah, yeah, a lot of foreigners go to Iran for transgender transformation operation. It's one of... It's a very lucrative market for those who want to do it, and it's cheap. You got to understand, what we saw in the past 15, 20 years, Before, when Ahmadinejad came, clamping down on the veil and everything. That instruction came from Tel Aviv, he just carried it out, he's a Jew. And with that created more hate -ism (against Iran). Every time Ahmadinejad spoke in the United Nation he got a big payment in his bank account. Because it created the fear, the hate, and selling arms to Middle East. (3:06) Nobody serves Jewish community (more) than Ahmadinejad as a president of Iran, as a Jewish descendant. And the hate which he created for Iran. He did it more than any, because he was paid to do so. His speeches in United Nation was written in Tel Aviv. And everything was organized before he comes in. People don't know the truth what happened in Iran.

It's the same as what we see now in Ukraine. Ukraine is a Christian nation with a Jewish leader. He doesn't care about the nation, he only cares about his own private bank account. Zelensky is the only Jewish President in Europe. And we have another Jewish President, Prime Minister, which is the Prime Minister of England. And we see the mess we got ourselves in. Zelensky, the President, what we call it, the Ukrainian President, is a Jew. He doesn't care about the nation, he's just there making money. He's bought 1.1 billion biggest Copper mine in Africa in his private name. The President had, came in with no money, in the name of two companies. Where did 1.1 billion come, the guy to buy? And that's why we see the problem in Ukraine and Israel. They are the Jewish leaders, and we see the British supporting them. The three Jewish leaders sitting, orchestrating everything, and so everybody to run with it. It's a coup on the West of Europe, Western Europe. (3:08) And nobody wants to talk about it, because Jewish Lobby might damage. You have got a lot to observe and stay impartial, but be aware of.

Any other question?

Q: ... We've got a question from Adam, a technical question about the computer Units. They need a power supply, what if the power is interrupted? Is there a battery to keep it running or does it...

K- No, if you get interrupted the system backup, when it (electricity) comes back on is automatically, will go as a hard disk memory bank, and secondly, the central control will bring it back to operation. That's not something to worry about, it will happen. Because I considered this with the African nations for example. If something happens, but I was told by the people who produce the system, that, that's not a worry at the moment.

R: Okay, very good.

K- ... This is how you lot look today. (Shows the Live graph, it's in cross shape). You are very Christian, we're on the cross, very balanced. This is the last picture then I am finished with. This is the energy from above, this is your physicality, and this is your STP, and this is the cross. (3:10) Means you all have plenty of food and energy and manifestation. This is the image within the past few minutes. So you see very balanced,

it's very beautiful. It's just more or less the same. Means you lot like honey, orange and lavender, it satisfies all your emotions. Here, this is the Love energy, what you call the Soul, this is there, and this is the environmental interaction between the energies and what it gives to Man. I wonder what you lot will report after today's session.

Thank you very much for today and we'll see you next week. Those of you who join us next Friday, we'll tell you what to do and what time it will be, about 10 o'clock in the morning. We'll start with the next session. after today's session. Thank you very much for today and we'll see you next week. Those of you who join us next Friday, we'll tell you what to do and what time it will be, about 10 o'clock in the morning. We'll start for about 2 or 3 hours, if it's a good time we'll extend it. And try to come in with something you love. And preferably a person or animal. Don't bring with you a book or a stone. And something which you have a Soul connection with. Picture of the mother, your cat alive on your lap. And I want to teach you something, how to transfer energies. (3:12) Because this is important in the coming time when we do transmutation.

Thank you very much. Please carry on supporting us. We need to get as many as these Units out in public in the hand of people. You might need one, but you can give us the right, buy it from somewhere else. We're trying to fix up with Universities, with the Institutes, that we spread it, that it doesn't become all one country, all Europeans, and not enough in Africa, or other places, that we can support this change, which we set up to do, and gradually you hear why we started it 7, 8, 9 years ago, and now where we are going with it to bring the change, it takes time to build a church, 7 years. Peaceful ?? man take a little bit longer than 7 years of building the church. Church of peace takes longer than the church of destruction. Thank you very much, and see you next week.

R: ... From the Universal Council, that, "The Universal Council invites the Keshe family, and the Universal family in unifying at the Soul level every time and every day at 9 PM Central European Summer Time, to elevate the Soul of the leaders to achieve the permanent and lasting peace.

604 KSW – August 21, 2025
