

Back to the Future - Systems On Live Graphs - Tracing Soul's Ancestors - Nothing Higher Than STM - Being Fed by Creator - Earth Regenerates - Won't be Destroyed

Introduction to 603 KSW

Note: Not checked by KF interpretation by KS of KF Brazil

This workshop has a lot of different treasures of knowledge and it will need time to go over. Mr. Keshe taught a few more very fundamental things about Time, but the main focus seems to be showing us scientifically how we are always connected to our Creator. The Plasma systems were turned on and he spent a lot of time explaining different graphs and what they mean in terms of energy, how we as plasmas of our Soul are created through interaction of Universal Fields with the local fields of Earth, and through the structure of our M fields we can trace back our origins of where we came from in the Universe (U). In this teaching he is bringing together different streams of knowledge to make a bigger river of our understanding the Totality. As we said before, it's very difficult to hold so many different pieces of knowledge together without getting overwhelmed with amazement. We'll try our best to bring out a few fragments of it. This is just a light introduction, it's up to you to dive into the depths and enlighten yourself.

In the 1980s they came out with the famous movie, "Back to the Future." At first I was confused, what do you mean by back to the future? We take our present day self and go back a few decades and manifest ourselves physically before we were born, but we are of the future. They stressed this by putting that scene of the mother falling in love with her future son. It's interesting to ponder these things, but now we can do it in the light of the Plasma Science and reality. First of all we cannot go back there physically like how the movie shows. To recreate physicality (P) requires countless field interactions and they have already changed into something else. Like they say, you can't step into the same flowing river twice. Secondly, we have to remain on the same timeline. However, the memories of the pictures still exist in the Energy level, and this is what we can replay to see what it was like. Maybe it's like playing a recorded video. In a way, we are going back to the future. We are the future of when that video was first made and it is all recorded on a magnetic field substrate. Just to reiterate how everything is in a constant state of movement and change, those magnetic recordings are also slowly dissolving and changing. We haven't learned yet what Time Travel really means. The way I understand it, is that the past is only recorded M fields. Is it a dimension that exists, or do all the field strengths have to be recreated from that recording and played in the present? This starts going down a bigger "rabbit hole." The information he was giving us, was that, what we do with changing matter to energy, and then energy to everything else, can also be done using Time. Remember we create Time through the M field strengths of the Place, Position, and Possession (PPP) and the emotion, intelligence, and enlightenment (EIE).

We remain stationary in one Place and then change the Time. But it seems that all we can get are memories and pictures, and not a physical dimension (D).

Somehow going back to the future is related to tracing where the fields of our Soul came from in the U. We were taught many times that our plasma of the Soul of the Man (STM) is connected by M fields to every other plasma in the U and to the Creator. These M fields have a much greater depth than we ever imagined, and they always remain connected and they remember everything they ever experienced. This is what we call the RNA of the Soul. And this is why we can trace where our Soul came from. The 'how' of it is more complicated. The way I understand it is, we could not survive on Earth without receiving the 80% of our energy from Space. To say the 'Space' is very general. It seems that the same fields that created us, are also feeding us, and that these fields are from our origin in the U. And we don't absorb every field from Space only the ones we are connected to. In this same line the wheat we eat comes from a specific area in the U, that allows all of us to absorb from it and that's why our population can grow to billions. In other words, we are not just absorbing random fields from the U, we have specific connections to them and maybe they are part of a bigger plan. When Earth was in the planning stage did they decide on wheat as a major feeding component? Mr. Keshe can help us develop a technology (T) that can trace the same fields that feed us back to the place we came from. This is how we are going to discover who we are and where we came from. How was the seed experiment he mentioned related to this?

They sent the same seeds around the world for different Knowledge Seekers (KS) to treat and grow them with Gans's in a certain way. They were able to reverse all the genetic modifications in the wheat seeds back to the time it was originally a grass. All the seeds coming from the same place and source is like all the fields originating from the Creator. As the fields go out into different environments they manifest different characteristics and these are all recorded in the RNA of the fields of the plasma. Every life experience that a field goes through is added to its memory. This means that our life experiences are a genetic modification to our Soul and genes, or of the Soul and P. This experiment is proof that the fields do indeed carry something we call the RNA that record the changes. Because they were able to reverse all the genetic modifications that were added to it, and bring the wheat back to when it was a grass. He said, we can reverse the genetic modification, but not the evolution. What is the evolution? Is it the overall direction an entity or species is going? Maybe it has something to do with the Creator's wish. How is this related to Time? Did the Gans's change the strength of the Possession and thus change the timeline? There is a lot to understand.

If we create the right combination and can connect to one field of the many fields of a plasma, then we'll be able to open up the picture of the U. This one field is how we get enlightened and receive the Knowledge of Creation. It doesn't matter who opens that field up, whether it is KF reactors or CERN's. This implies that even using matter state fields like high voltage and current we could accidentally open the plasma, and the whole of humanity would benefit by it anyway. Is that what happened with Tesla and the Philadelphia experiment in the 1940's? They accidentally opened a timeline by changing the M field strength of the Possession through high voltage. It was reported that the

bodies merged with the metal. Metal and the Gans's of the human body have different field strengths, and maybe by changing the field strength they temporarily merged.

The amino acid (AA) is the father of the creation of life on this planet. The basic structure is the COHN and then whatever gets added onto it becomes the different proteins that become the different life forms. He said, if you change a position then the AA becomes the protein of dog, and in another position it becomes the protein of a plant, and so on for all of creation on this planet. Which position is he referring to, the one on the molecular chain of the AA, or the location on the planet which has a unique field strength? Probably both and then there is the emotion of the entity and how it wants to exist here. In the matter state we started to understand a lot about the DNA structure and how it records the changes and evolution, but we don't understand about the Energy of the Souls and how the fields of the U evolve. We also don't know what DNA actually is in relation to Space and Time. To our scientists it's just a physical orientation of chemical structures that point to some characteristics. We'll need this knowledge to Time Travel using the fields of the U.

The rest of the first part of the workshop Mr. Keshe explains and draws on different graphs how we are created through the Energy of the U and always connected to the Creator. And then there is a Live video of about a minute of the Souls of everyone online. It's good to follow the recording. In a way, it is like the practical application of what we were just explaining. Each of these dots are an energy of a plasma. For example, the middle and lower part of the graphs represent the STP and P, and in P they would be equivalent to the Souls of each cell of the body. And the upper part contains all the fields we receive from the U and Creator, and it even shows the history of those fields that our ancestors collected through billions of years of different cycles. It's like the history of the STM on Earth over billions of years of evolution. That's why he said, the memories are all stored in the RNA. There is so much knowledge in these teachings we can only cover a little of it. Please try to spend more time studying this one. As I said in the Quick Index the first graph looks to me like Michelangelo's painting of God creating man, and that is actually what this graph is about, how Man is created through the fields of the U and always connected to the Creator. I made Man in the image of Myself. And now we have the first scientific proof of it, but we have to be open to understand how to interpret it.

He is saying that the first graph shows our whole history of billions of years from when the STM was first created through its connection to the Soul of the Creator (STC). It first expanded and then mixed with the fields of the Earth and the center line is the STP, and then that went down and created the cells of the body that make up the P of the Man. All the dots at the bottom are the cells in our body and they each have a Soul, which is an energy center that makes it appear as a dot. They also contain information about the origin of each cell. I understand that the straight line from the top to the bottom represents the direct connection between the STM and P and we can be given energy directly from our Soul. All the other dots around that center line give the history of the evolution of those energies and are also a connection. We can develop technologies that can use this information to manipulate the creation in ways we want. For instance, we can correct genetic defects, because we'll have access to the original energies and can trace

where they deviated. The lower half gives all the information about the physical side and eventually we'll be able to go back to the point when the Souls interacted with the fields of the Earth and the fields of the U to create the different cells. This will tell us where that energy to make that cell came from in the U. This implies that our body is a microcosm of the U and maybe the fields of our cells come from different parts of the U. Are these the connections that we'll travel the U with? It's all slowly unfolding. And then the upper half tells about the Soul and its evolution through Time in the same way as the P part. And this graph should give information about how to work with Time. We can use it to go back billions of years of the Souls evolution and how the Soul is connected to the U and the Creator. But he has to educate us more on that one.

One theme that Mr. Keshe kept repeating was that, there is nothing above the area of the STM at the top of the graph. There are different meanings and one of them is that there is nothing greater than the Soul. Does this mean that the essence of our Soul is equal to the Creator? There is nothing above it. What about the Creator of our Creator? Or is it better to say, all is one. This is where we might have trouble with the religious people. Is the Father really greater than the Son, or is that a human concept based on our limited understanding of P? The graph shows that the Energy of the STC creates the STM, which in turn creates the P. And maybe this is the point that Mr. Keshe is making, that nowhere do we see the P becoming greater than the Soul, or the Creator. This is very important actually, because it means the Ego can never conquer God. It's the Egos delusion to think he can become God, because the source of his energy is God, according to the graph. But the Ego is ignorant of that truth and always remains in the lower part of the graph. The P is not bad, it only becomes a problem when it doesn't understand Creation. It's how the Soul confirms its existence and experiences love. When there is nothing above the STM it means it has to be the end, or the ultimate point. This is the Soul of the Creator.

The main point of the next graph seemed to be that systems actually do feed the Soul. He set up a special auxiliary system to do this. The graph shows a thick line of dots coming from the right side and going into the top of the center line where the STM sits. This is a picture of the KF system feeding energies to our Souls. Again he said, nothing goes above the line of the Soul. The feeding line appears at the top of the graph and not the bottom, so the energies are most likely Cosmic Ray level. An interesting aspect to this is, if the Souls are strong in themselves then we won't see the feeding line. This also confirms that the plasma is conscious and responds to our needs, therefore it would never overload the energies, like what happens in matter state. The best part about it is that we can use the feeding line to enlighten the Man and we can be matured much faster than we ever thought possible.

In the short Live video of our Souls the dots start appearing on the bottom part which is the P and go upwards to the Soul, and then the Soul starts sending energy down to the P, and it keeps repeating. He said, it means that the Earth creates the P and then it calls out to the Father, 'I am here feed me.' This is the same process for all of life in the Creation. When the Earth creates the Soul of the Daughter of Mitra it calls to the Creator, here is your child feed it Your beauty. This is without the P. When the Creator feeds us directly

it makes us independent from the environment, and we don't need its fields. For example, if we go to the Moon we wouldn't need to interact with the fields of the Moon's environment to survive.

In essence it means whenever we make a sincere call to our Creator, He will feed us. Actually, He must already be feeding us but we don't recognize it and we think we need to take energy somewhere else. I had an experience of this, but only today do I understand what happened. I was in a critical situation where all my energy was drained and my life was collapsing. In that moment I completely let go, and I started saying, "God is Love," over and over. Suddenly, a gentle energy entered the top of my head, it was almost imperceptible, and like a miracle my energy came back. I wonder why I didn't say, "help me." Instead, I totally surrendered to Life as love and It immediately responded. Today's graph explains this. But why can't we live in that trust and knowing all the time? It's very hard to create that emotion when there isn't a critical need. Scientifically this graph is showing us that the love of the Creator is the reality of life.

For the first time we have scientifically seen our Creator. It's not by imagination and the 'books of the false information.' At the moment, humanity is still caught by those who believe these 'books' are the direct words of the Creator as written, and we are not allowed to think about another interpretation than theirs.

Today there were many different topics covered and we'll go over some of them. A KS was worried about how we were going to stop people with bad intentions from getting into the ONN. We have to accept that we are not going to be without difficulties, and that abuse exists in every dimension. This is difficult to accept and understand because we would like to believe there is a perfect world somewhere. Does this mean even the "Angels" can do things wrong? Didn't they write that Lucifer used to be an Angel and became an Ego maniac? If we worry about all the things that could happen, we'll be too afraid to do anything. The spirit of a good warrior is to continue to fight for good and overcome all obstacles. And he said, what goes in with a good hand, comes out with a good hand. Others have said it in a way that even bad things get turned into good. We have to keep the right attitude and not be negative, and remember there are bigger dimensions that we don't know about it.

He knows how to make a plasma that will cause humanity to fall in love with itself and everything else. Would it be a super Cosmic Ray love potion, the kind we hear about in fairytales? But, with this potion we will lose our appetite to eat other Beings like animals and plants, and we will love a chair so much we won't want to sit on it. Imagine loving others so much that you could not do anything to cause them the least discomfort. He might have to give that to us when we first go to Space so that we don't accidentally fall back into the old habit of killing on our way to the Creator. A KS complained that she will starve to death if she loves everything. He replied, why should you starve to death, learn to open and be fed by the love of the Creator. By being in our center we'll learn to give and then receive the energy without destroying the one who is giving it freely to us. Is the problem that something emotionally is blocking us from giving, or is it we just don't know how?

The way I understand it is, first the ONN gets setup with the current Internet structure. It must be similar to how a Torrent works where the Server is spread all over the Internet instead of in one place. Then when enough Units get established the sub-network becomes stable that no one can interfere with it. That's when the CR Plasma Antennas will connect all the Units together and become an invincible Plasma Communication system, but it will still be within the Internet. But if the Internet goes down the Plasma network will remain functioning because it is not the matter state. He said, we didn't come here to create separation. This is the whole problem we have right now, is that the Rulers have created a separation between us. They say, divide and rule. Our purpose is to eventually bring everyone together under one systems that will provide for all the needs of Mankind. To do that we have to go through the present system, and then through the right intention of giving and serving, we bring the others in to serve all equally.

The age old question of, if everything is predetermined and we are just playing out a script then why should we elevate ourselves, was answered very nicely. Why do we have keep repeating the same things over and over? He used the story of boiling chickpeas in a pot of stew. When the chickpeas boil they kind of go around and around like in a cycle. But as they boil they mix with foods and spices and they move around the pot and they become more and more tasty. So even though they keep repeating the same things they are adding new experiences and tastes to themselves. We may think they are just repeating the same stupid things over and over again, but actually they are going deeper and gathering aspects that we don't understand. This is how tastes become more and more rich, and emotions fuller and deeper. Once some very wise people said to me, think about how many millions of Germans it took to create a genius like Johann Wolfgang Von Goethe. He gave many gifts to world in philosophy, literature, poetry, and science. And set an example of living a simple life. Before he died he said, "Ich brauche mere licht." I need more light. How did these people know that his life was like that of boiling chickpeas?

There were two separate very hopeful things Mr. Keshe talked about towards the end of the workshop. First was that we'll be joined by another race from the Universal Community who will add to our knowledge and change our understanding of Creation, and bring new emotions to humanity. And with it will comes an elevation of the STM. It won't happen tomorrow. Are these what people call the Pleiadians? He never promotes these kind of things because many people start making up huge fantasies about them. The other thing is that there is an Energy Pack on its way to our Universe that will enlighten all of us and will elevate the knowledge of life for the whole U a few steps up. We won't feel it, but suddenly we'll understand something that previously we couldn't understand.

The Eastern Scriptures talk about humans going through many ages, or what they call "yugas," and today it was said we have gone through this process of annihilation many times. What has happened is that humans get their hands on knowledge and technology (T) that gives them the power to create a heaven or destroy themselves. But it seems that we destroy ourselves before we reach the enlightenment stage and then have to start over again. Even when we destroy the planet it has the power to regenerate itself very quickly

with new life that is basically the same. Of course, there are differences but since the environment contains the same MG fields it just recreates itself. This is the same as what the body does when its kidney is taken out. It re-grows a new kidney because the same fields are still there. I guess the Soul of the Earth, and the STP or Spirit of the Earth, and/or the STC would have the emotion of wanting to manifest life again and the fields interact to fulfill that wish. He said, that the Earth creates the amino acid (AA), which is the father of life on this planet and then we add something to it and change the position and it becomes a dog, and change something else and it becomes a plant, and all of creation on this planet is created that way.

Mr. Keshe didn't want to answer directly but he did say, that he was a teacher on this planet the last time it was destroyed. In a way, he guaranteed us that it won't be destroyed this time. They left somebody in charge who started enjoying the killing too much and created most of the problems we have today. The main problem today is from the orthodox religions that came out of the Levant, and he has to work very hard to bring these changes about in the background. Nevertheless, us humans still have to make the change ourselves. The killing has become ingrained in us, and the only way to change is that we have to ourselves desire to make the change, otherwise it keeps coming back through hidden emotions that were not totally realized and opened up. The problem with humanity is that we don't know our Soul and are not aware of its purpose. His job is to find a way to make us aware of our Soul, and then we'll naturally want to be with it, because the joy, bliss, and love of it are way beyond any temporary pleasure on this Earth. This is where we are today and the plasma T is carrying us along this path.

I have run out of time but I want to say one last thing. During our life we gather a lot of experiences, so why don't we get enlightened? Maybe it's because we don't have the interest and we don't take the time to really sit down with ourselves and digest the different experiences we have had. We could harvest a lot of wisdom. But instead we tend to blindly keep repeating the same things, but never truly feeling them, nor following them to their root emotions. If we did that we would find out that we are the center of our experience, like the center of a Mandala, it doesn't turn, while the outer edge rotates, and it is like the Ego experiencing all the ups and downs of life. Then what we do to compensate and deny our selfishness, we chase after the gurus in the spiritual marketplace, who sell us beautiful ideas about ourselves. But the biggest mistake we are making is that we are looking outside for somebody else to help us, instead of going inside. All the time the truth lies within ourselves waiting for us to take interest in us. Mr. Keshe told about us being the center and that by learning the true meaning of giving we can receive and be fed by the fields of the Creator.

Other topics:

In the next 50 to 100 years when we stop killing each other, instead we'll use those energies to research the plasma and discover the field strengths of things. And we'll look for the Time, Place, Position, and the emotions of our Creator;

We'll learn to replicate the Creator in the D of the fields;

God is thirsty for love

Thanks for listening.
