

606th Knowledge Seekers Workshop September 4, 2025

(Quick Index 16 pp, Introduction, Topic Index ; Need to do; Key Phrases, Words)

(Auto transcription from Elias)

Systems On; STC enlightens; Replicate how life starts; Dictate time of life; Egg & sperm; Replicate Daughter of Mitra; Scientist sees Spark of Life when egg & sperm together; Dynamic plasmas create light - like daylight; Measure Spark - boy - girl - defects; KS became 1 plasma & system other - same as egg & sperm; Lightning goes from ground up to sky; Thoughts - right strength attract lightening - enlightenment; Introduce energy into matter; Combination of womb of planet and U - become holder of 2 energies; After 40 years confirmation; Video of collective Soul - like egg, system like sperm - create STP; Energy from P goes up to STC - comes back becomes our P; Question asked - enlightenment came; Step by step video of process; We add extra energy - create a new life - enlightenment; Energy collectively creates STP - connects to U Energy through H - comes back; How feed in Space; Decide Zero Time; Energy of womb decides P; Create conditions of womb - human race; Child according to fields in environment; Womb is preset to own race - even if change place - unless interact fields differently; Decide Time on energy level & outcome; Fall in love - creature energy in U - children according to environment; Children of Mitra - no physical interaction - give energy; STP of Man change when interacts U Energies; Make Man immortal; Parade China; Soul - higher order enlightenment- STP and P stay alive; Replicate U Energies - Flight sessions; System interact directly with Soul; KS change in enlightenment, knowledge, whatever want; Touch Love of Creator; See on graphs; DNA & genetic modifications through emotions happened to Man over millions years; Change energy of environment; Lack of energy makes us animals; Tests to change emotion - mature Man through enlightenment; Understand why attached to P; Use games - understand about energy; Humans came millions of years ago - pure lights of Creator; Genetic modifications through emotions; Will enlighten you - create true Daughters of Mitra; End fallacy of Virgin Birth - from Soul; Soul of Christ created from STC - embedded into P; Extend to ONN - change humanity; Gaining knowledge directly through systems; Coin of peace; Not let DNA modified through emotion hunger, greed, etc; Prove writings of Prophets; Change Time; Reduce pregnancy to 3 months - enlightened; Animals mature egg 21 days; How emotions affect time; Agriculture tests - grew seeds less time; protein increase - maximum enlightenment; Premature births; Change environment of womb; Plasma not harm embryo; Create most intelligent creatures without father and mother; Deliver energies without embryo; Change defects in egg & sperm; Children of U - create child in 30 minutes in womb; Graph P to STM - 3 minutes; How long to obtain a Soul; Have to enlighten other scientists - join process; Measure energy of love - don't need sperm & egg - place in womb; Genes are energy; No genetic problems - create pure Soul - DNA have no effect; Reverse genetic defects; Change everything through emotions - grew toe - instantaneously; Change embryo; I made man in image of Myself - I am there - beginning to end - you and Soul; Creator gives everything; What is Me is also you - what is you becomes Me; Governments stop killing - spend money on this research - becomes reality; Bright future ahead - get ONN established soon; September Flight session tomorrow; Donated ONN; Enlightenment game; Win Keshe Coin (KC); Receive enlightenment as energy; Every field planet & U connect to ONN; If get enlightened don't become arrogant

- we gave knowledge; Junk DNA; Energy of gold produced Beijing - emotion of environment; Affect genetics and defects; Largest wars between religions - greed - Armageddon then Methi; Be strong to withstand - keep belief's; Annihilation of races; New beginning; Pray for peace; Demonstration of weapons in Beijing - like Cold War; Change to march of science; Moslems paying Jews to kill Muslims in Palestine; War end religions; Date calculated from scriptures - Day of Judgment; Ancestors more intelligent than us - replicated work of U; We became more materialistic - not understand; Hold & swallow nuclear materials; About Spain Jews and Muslims work to build Holland; Made pyramids; Knowledge spread through Soul; microphones to lowest setting; KS connect through Soul - thoughts; Destiny of Man; Bring equality; Africa reclaiming power - Europeans stole gold; KS testimony; Enlightenment brings peace & healing; Understand about wish - benefit others; Remain humble when wealthy; Reactors - work with fields - not matter; H more powerful - creates other elements; God created U - single atom; All other Prophets went wrong; Mr. Keshe - no fear of giving knowledge - always wins; Enlightenment remains; Enlightenment of emotion - true knowledge - not books; Change emotion of Man - testing; Understand suffering; Using dates to manipulate - create suffering - partially understood Time - 9/11; Now 14/11; Not planetary alignments; Jewish calendar - want own energy to control;

Topic Index

Systems On; Question asked - Soul of Creator (STC) enlightens; Replicate how life starts from Energy; Dictate time of life; Egg & sperm dynamic energies - life; How life is created - Energy level; Replicate how Daughter of Mitra created; From P combination of fields - collectively gather as a Soul - become STP; We can create life; Scientist & researcher - expert in creation of life - egg and sperm together - see a spark - Spark of Life; Dynamic plasmas interact create light - same as daylight - fields of Earth & Sun interact; Future measure Spark - tell if boy or girl or defects; Last Flight brought all KS to be 1 plasma and interacted it with plasma of system - same as egg & sperm; Lightning goes from ground up to sky - ignites then back down - Soul of Planet; Tree - antenna sends message up - returns back as lightening; Thoughts - right strength attract lightening - enlightenment; Scientist confirmed a lot of things - how introduce energy into matter state; Combination of womb of planet and U - become holder of 2 energies; Waiting 40 years for confirmation; Video of interaction of collective Soul - like egg, and our system feeding you is like sperm; Leads to creation of STP; Lightning starts from Earth - energy goes up - touches STC - comes back shape our P; Last week - question asked - enlightenment came; Step by step video of process; We add extra energy - create a new life - enlightenment; Introducing energy to you - like condition of egg & sperm; STP takes shape; Soul gradually develops; How life is created in World of Creation; Life starts like how lightening is created - it's energy - collectively increases - goes back down to feed P; Energy comes together - collectively creates STP - connects to U Energy through H - comes back to itself; In Space - environment's energy increases - Soul increases - feeds back to STP and P; We decide when to start Zero Time - decides STP - connect to U Energy - feeds P; Creature of that new environment; Needs a lot of research to understand; Last Friday's session - fundamental - Soul suddenly separated; Confirms how attain life in womb of mother - attain Soul; Energy of womb decides what P will be;

If create conditions of womb - get a human race like on Earth; If mother moves to different environment - fields change - child according to fields; On Earth - mother produces child according to her race - the womb is preset - even if she goes to another place; Chinese woman from China into Africa - still produce Chinese baby; But if change its fields to interact differently - then different child; New balance in womb decides what child going to be; Use knowledge - decide Time, energy level - outcome; Fall in love - creature energy in U - see how children will look - according to environment; Children of Mitra cannot have physical interaction - give energy to each other; Dictated by totality of U energy; STP of Man will change - interacts with energies of U; Make Man immortal; Parade China - President Xi & Putin - extend lives to 150; Knowledge to change energy of environment - STM & STP can change; Soul - higher order enlightenment; Our children - contact with knowledge & energies of U - enlightened different way than us; Graph - Soul interacting and feeding P - Infinity Loop; Can make exact replication of Universal Energies - Flight sessions; Show how to interact with Soul; Energies in system interact directly Soul - up to now only with P; KS will change in enlightenment, knowledge, whatever want; Touch Love of Creator; See them on graphs; Enlightenment of higher order - STP and P stay alive; DNA and genetic modifications through emotions happened to Man over millions years - caused problems we have; Universal Energies - change children with disabilities mentally, physically, aggression; Change energy of environment of creation; Lack of energy makes us animals; Through T make peaceful; Doing tests to change emotion - mature Man through enlightenment; Go from P up to STM; Tomorrow's Flight session - understand why Man so attached to P - change; Use games to help Man understand about his energy; Create Children of Mitra - essence of true creation - without genetic modifications; Humans came to Earth millions of years ago as pure lights of Creator - went through many genetic modifications through emotions; DNA got genetically changed - became aggressive started to kill; Can introduce energy of P to STP and STM; In coming weeks enlighten you - create true Daughters of Mitra; End fallacy of Virgin Birth; Through purity of child; Soul of Christ created from purity of STC of U - embedded into P; Could have come from anyone; Virgin birth comes from Soul; Extend this knowledge to One Nation Network (ONN) Units; Many of you participating - change course of humanity; Gaining knowledge directly through systems; Satellites for physical telephones, Internet - cannot feed citizens; ONN - make up shortage of energy - elevate to Soul - change him to be peaceful; Man will never kill - fed through systems; It's a Coin of peace; Making Man ready for next step through Energy; Killing out of DNA; Won't let DNA be modified through emotion of hunger, greed, everything else; Tomorrow's session - prove writings of Prophets; Results shown week after; We can change Time; Initial stages of creating a Soul; Interfere with energies of Time - change it; Reduce pregnancy time from 9 to 3 months - be enlightened; Animals can mature egg in 21 days - do through energy; Emotions of mother and those around affect length of time in womb; Agriculture tests - grew seeds less time; Protein increased from 12% to 20% - maximum enlightenment - by delivering energy weight changed; Happens in premature births - only 7 or 8 months; It's the Soul that matures - P not ready; T can mature Soul - don't need 9 months; Research pushed through - complete embryo in 6 months - change environment of womb; Researcher have to cut embryo - sees pain - plasma don't harm - can repair; Animal trials; Create most intelligent creatures without father and mother; Do we need embryo - or just

deliver energies - how we'll live in Space; Change defects in egg & sperm; Children of U interact with Man - create child in 30 minutes; Learn how to measure energies; Graphs show went from P to STM in 3 minutes; In U they discuss how long it takes to obtain a Soul - become a living thing; Cosmic Rays (CR) - huge changes in science of energy; Last week - hundreds of thousands of you online - created a STP, then a Soul; Create children perfect in Soul and P; Plasma Systems on today; Knowledge coming fast - have to enlighten other scientists - join process; If measure energy of love between a man & woman - don't need sperm & egg - take from Soul place in womb - perfect child; Gene are energy; Defect of mother passed to child; Through Soul no genetic problems; Create a pure Soul - then physical DNA and genes have no effect on it; Help those with genetic defects, mentally not mature; Change everything through energy fields of emotions; Already tested - grew toe; Now instantaneously - create STP - creates toe; Plasma CR T verge of - changing embryo through interaction of fields; Decide Time - change emotion - bring enlightenment - a higher order; Create children of Soul of U - P last billions of years; I made man in image of Myself - I am there - beginning to end - you and the Soul; Creator gives everything; What is Me is also you - what is you becomes Me; Now we have the knowledge & T; Governments stop killing - spend money on this research - becomes a reality for humanity; Bright future ahead - get ONN established soon - bring change; Rain from bottom to correct the top - STM - then change aggression of Man.

Part 2

September Monthly Flight session tomorrow - come with any intention; Donated ONN Units - KS responsible to run for decades; Start testing Units; Units by October; Enlightenment game; Bring others to play - increase number of Units - hundred thousand - system become automatic; Entice to understand enlightenment; Win Keshe Coin (KC) added to ID-Wallet; Purpose - gain knowledge of T - receive enlightenment as energy - get fed as you play; Those committed to buy Units please complete; first connect to Internet - through CR elevate STM; Later system won't go through satellites - connect directly to CR; Set up ONN across the planet - when Earth rotates every field of planet - touch ONN - every Ray in U connect to system; Elevate STM through physical games; Fields spreads across planet animals & all Beings receive love & maturity; Flight test tomorrow - then start new cycle; Get enlightened don't become arrogant - be humble; We gave you the knowledge; Your thoughts will not go higher than what we want; About Junk DNA and 12-strand DNA; Not have expertise in area; We monitor how fields of U interact; Gold produced in Beijing - is energy of gold - carries emotion of those in room; Physical gold - emotion of Earth; How the new fields affect the genetics and defects; Warning about possible largest wars between religions carried out under cover of greed - might take place in coming days; In name of God creating war; Be strong to withstand; Annihilation of races; See new beginning; Hope will not take place; Stay strong in what you believe in and needs to be done; Might lose some of you in D of P - STM moves to new D; Pray for peace; Demonstration of weapons in Beijing - like Communists in 1980s - Cold War; Active war using same people; Watch body language at pubic functions - we decide future; Russian and Chinese democracy - still same leaders - polished to look different; 28 world leaders show how Man's military power can kill; Time comes display Plasma and scientists of new science; March of science, T, peace; War in Ukraine

between Catholics and Christians - money it makes; Same with Jews against Muslims; Moslems paying Jews to kill Muslims in Palestine; Greed mixed with religion; This will come to end; This war will bring an end to a lot of these religions; According to Jewish scriptures & Islamic Books - Day of Judgment - one wins over the other; Date calculated from Holy Books is tomorrow and Saturday; Both sides believe in it - ready to slaughter each other; After this Armageddon Methi will come; They're doing it in name of their God; Present intelligence mixed with greed; Ancestors of thousands of years ago more intelligent than us - understood work of U; Human race became more materialistic - not understand rest of science - narrowed to matter state; Ancestors understood how galaxies & U works - replicated in systems; Today only Microchip and physical things; In 1950s nuclear physicist - nuclear material doesn't kill; Kept away from him; Hold nuclear materials swallow; Conditions nuclear materials create kills - how body connects to it; Ancestors lived in caves - uranium mines - not die; We are trapped in matter; Mix blood with money get worst race; Spain taken back from Muslims; Spices went to Holland & Belgium - part of Spain; Deported Jews and Muslims to Holland - two bloods creator of wars - all mayhems in world; Got together became biggest most powerful financial system - hundred years of glory to Holland; Made pyramids - achievements of science without tools or communication systems; Pyramids covering whole planet; Knowledge spread through Soul; Monthly Flight sessions - turn the volume on microphones to lowest setting - receive fields - even if shut off; KS can connect to system through Soul - without physical connection; Connect by thoughts; Seeing how your energy spreads; World leaders put into corner - brought this condition upon themselves; Or is it destiny of Man; To bring equality - move to next phase; Everything else outcome of what will happen with this - has to be to reach; Africa going back to its power of equality; French speaking African countries taking charge of their lives; French Colonist drained African nations for centuries - gave nothing back; European luxury lifestyle change - from stolen gold; China & South Americans coming up; Burkina Faso - good example; Time for humanity to become balanced; World peace - when peace everywhere; Wish of humanity - have to make adjustments - takes time; KS testimony - improve from listening to KSW; Enlightenment brings peace - peace brings healing; Depends what we want to hear; Learn to mix physical with Energy; Happen by wish - effort for it to take shape; Truck driver wished to become rich - did; Bank manager remained humble - wealth should not blind you to your humanity; Wish should collectively benefits others; About original reactor - lighter elements to center - heavier outside; Haven't understood - work with fields - not matter; Matter state - weight; Creation work with Energy - M fields in motion - strength of the field; No plasma more powerful and energetic than H; H creates Plutonium - not other way; True essence & meaning of Creation. 99.99% of our scientists have it wrong; God created U from single atom; All other Prophets went wrong - what about Mr. Keshe; What is different about how you access knowledge - what is safety key; We have no fear of giving knowledge - in the end knowledge always wins; Once Soul gets enlightened it stays; Enlightenment of emotion - true knowledge; Not knowledge of books & making things up; In U no Universities; Man doesn't understand this yet; Trying to change emotion of Man through energies within him; This is what we are testing with you; Why suffering and pain brings wisdom; Understand what suffering is; About those using numbers and dates to manipulate things - create suffering for others; Partially understood about time and how to play with it; Did in 9/11; Same people chosen 14th and 15th of 11;

It's a transfer and shifting of energy; Using a category of energy fields; Believe in it; This is not planetary alignments - something different; Jewish calendar set after studying calendars of other religions; Don't want energy of other religions interfere; Chosen Ones - most murdering race; Example - October 6th Yom Kippur war - genocide by Israeli forces; Work with P of energies; All tell story of Messiah and Methi; Make wars on greed; Leaders stay in power - afraid be killed for wrongs; Story of African president & cycle of corruption and killing; Jewish set up in Ukraine - Prime Minister of Israel PM of UK - killing in the blood - money; Tomorrows session will be amazing.

Introduction to 606 KSW - How Life is Created From the Fields - Spark of Life - Womb Preset - Emotions Modify DNA - Soul Implanted in Womb - Armageddon Now - Knowledge Won't Fail

Today's workshop was mainly about helping us to understand how the M fields interact to create life. The present science doesn't have any understanding of this and maybe that is why Mr. Keshe is focusing a lot on the graphs of the KF Plasma Systems, so that he can help us understand it in a scientific way. Years ago when he started teaching us Plasma Science they used to show the video of 2 rays or M fields traveling in Space and after getting attracted to each other they would begin to spin around each other and then a bright light would flash, and they would become a plasma like our Sun. This is the basic pattern of how all life is created in the Universe (U) and it is missing from our education. We only have the egg and sperm, which in the matter state looks like something different. They don't appear to rotate around each other, so our line of thinking does not make it easy for us to understand plasma. In Plasma Science when we say the M fields interact with each other, these are invisible interactions at the level of the Energy. It's like we can't see electricity, but we can see its effects and use instruments to measure it. When we speak of Soul, we mean this Energy, which in Plasma is, M fields in motion. The graphs that are shown and explained in these teachings are this Energy that is interacting and creating this physical manifestation of what we call, matter state. Further to understand these graphs we should know that a human being is made up of the Soul of the Man (STM), Soul of Physicality (STP), and a Physicality (P). This is the same pattern of the Trinity throughout all of Creation. In this workshop there are two types of graphs one is with colored lines representing the STM, STP, and P, and the other is of dots that represent energy and they appear in areas on the graph that represent the same 3 entities. It's important for us to use our feeling and imagination to understand the secrets of life and with this knowledge we'll be able to travel and live in the U.

After 40 years of teaching this to humans Mr. Keshe met a research scientists in the field of how life is created, and he brought some shocking news. He said, that when they bring an egg and sperm together they see a flash of light and that is how they know the process of life has started. We haven't heard about this because it doesn't fit with what they want us to believe, so they keep this knowledge from the public. Therefore, some scientists know about it, but they don't know what it means, or they make up a chemical reason for it. Mr. Keshe went on to explain to him, that this is the "Spark of Life," which occurs whenever two M fields interact with each other and create a plasma. This is the same flash of light that is shown in the video of 2 M fields interacting to become a plasma.

This is also how what we call, daylight is formed. The fields of the Sun interact with the fields of the Earth in the upper atmosphere and create the daylight. It's the same pattern of Plasma throughout Creation, and now we have gotten confirmation of it by a matter state scientist.

Using this knowledge we shift over to how the physical life is created on this planet. To obtain proof of this pattern we'll use what happens in nature. In the past, whenever we saw lightening we thought that it was formed in the sky and struck the Earth. After scientists studied it more carefully they found out that lightening actually starts on the ground and goes up to the sky. Mr. Keshe gave an explanation from the Plasma point of view. Physicality starts on the ground with minimal amount of energy that goes up and ignites the lightening in the sky to come down. It also brings the Soul of the Planet into it. A tree sticks up like an antennae to ignite it. Or if a person has a thought and emotion of that, they are going to get hit with lightening, that M field strength acts like an igniter and brings the lightening down, which he called an enlightenment.

The pattern of life is, that a P forms in the matter state and calls up to the Creator or Universal Energies, "I am here, feed me," and the Soul of the Creator (STC) responds by sending energy down and enlightens the Soul. Then he presented a 3 minute video showing how life forms when we add the energy of the Plasma System to our energy. The dots or energies start forming in the area of the STP, then gradually they form in the area of the P. After that they go up to the STM. The way I understand it is, when the energies start gathering they first form the STP of that entity. Then it starts to form the P, and at the same time connects to the Soul above, which connects to the STC. This is the basic pattern of how life is formed in the U and just about everything else. This is the same pattern of when a Knowledge Seeker (KS) asked Mr. Keshe a sincere profound question last week. The P connected to the STP, and sent energies to the STM, which then received the energy of enlightenment from the STC. It connects to Universal Energy through the Hydrogen (H). This is what is going to happen to humanity and how we are going to change this planet. The One Nation Network (ONN) Units are going to connect the whole planet into a STP and it will call out to the STC to feed it, and we'll get the enlightenment through the Soul. This is why he is explaining all these graphs so we understand scientifically what will happen in P, and we won't dismiss it by calling it magic.

If the MG fields of the environment affect what kind of child is produced, then why when a Chinese woman goes to Africa she gives birth to a Chinese and not an African baby? Today Mr. Keshe clarified that it is because the womb itself is preset to produce a Chinese baby. This would mean that with all other things being equal, the womb has a higher priority in field strength. I understood that, if we are able to interact the fields of the womb with the local environmental fields and create a connection, then we can override those preset conditions of the womb of the mother. He also said, if we can interact with the sperm or an egg of the African environment energy we could change it. That means it can be done through the male or female. I am sure there are a lot of factors involved and a very powerful one are the emotions of the mother. This would explain why in the middle of Africa there is an African tribe that practices Judaism, but whose

racial attributes are totally African. When they checked their DNA they discovered that they originally came from Palestine thousands of years ago. Over time they must have allowed the local field strength of the environment to change the preset fields of the womb. If they were to go back to Israel, the womb would now be preset with the African field strength, and they would give birth to African babies in Israel until the time they can interact with the local fields and change the preset conditions of the womb back to its original. Or maybe there is a simpler way through plasma to reverse the genetic modifications that occurred. So there is a lot more science to learn in this area. In terms of the graph, this is indicated by changing the middle area where the STP is and that changes the P, while at the same time interacting with the STM. When Universal Energies are added to this equation, it changes the STP which changes the P. In essence, this is what we do in Plasma Science. We add energies that are directed by the emotions to change the physical being.

We now have the knowledge to replicate the Universal Energies in the KF Plasma systems and these are being tested in the Monthly Flight sessions and in the Live KSW on Thursdays. Mr. Keshe shows the point on the graph where they introduced these Universal Energies and we can see how the STM separates from the STP and P. These energies are directly interacting with the STM, and then we'll see how the KS will change in enlightenment, knowledge, and being able to (achieve) whatever they want. Some of us may even touch the Love of the Creator, and then we'll see what the outcome will be. This enlightenment is of a higher order and the STP and P are able to stay alive. When he said this, it made me think about what the Masters in India say. They say, when you reach enlightenment the body will not last more than 21 days. However, one Sage said there is an exception to this, and that is, when they have a mission or a service to do for humanity.

When we think of DNA modifications we usually think of large corporations playing with chemicals in their laboratories, but in Creation all that is needed is to have control over the emotions and create the appropriate M field strength. The way I understand it is, that life is setup to go through change by the MG fields of the emotions. The positive emotions lead to positive experiences and negative emotions lead to the conditions we have today. Millions of years ago our ancestors originally came to this planet as pure lights of the Creator, pure light of the Sun. Why did he say the Sun? Is it that the Rays passed first through the Sun, which is in a way, our mother and father? And then due to the lack of energy started creating negative emotions that led to aggression and killing. The DNA got modified through the emotions of hunger, greed, and everything else.

Whatever we experience in life automatically modifies our DNA, because our system is setup that way. In other words, whatever we experience in life, good or bad gets recorded and that gets passed on to our descendents. When an experience is held onto for about 25 years it gets written to the DNA as a modification. When we reach the maturity of the Soul we will be able to create Children of Mitra who will be perfect, and that perfection will be passed on to the descendents. The Children of Mitra are created out of the fields and they chose their P. What then is the fallacy of the Virgin Birth? Maybe it is that the way they told the story is based on P. They said the woman was untouched by a man, and

that the Holy Spirit overshadowed her and she got pregnant. According to the Plasma Science Mr. Keshe is teaching this is not possible. Beings of the U do not replicate through P. If the different Energy fields of the U, or what we call, Beings, fall in love with each other, they can interact at the field level and create a new plasma, a child. Then that child decides for itself whether it wants to manifest in the D of P. The Soul of Christ was created from the purity of the Soul of the Creator of the U, and then it was embedded in the P of Man. It doesn't need to be a virgin or a woman. It could have been any man or woman on the planet, because it comes from the D of the Soul and not the P.

The knowledge has become so advanced that we don't need the sperm and egg to create a child. All we have to do is to measure the energy of the love between a man and woman, and take that energy from the Soul and embed it in the womb of the mother and it will create a perfect child, because the Soul is perfect. And when we create a pure Soul, then the physical DNA will have no affect on its physicality. It will have no genetic problems. The words, I made Man in the image of Myself, means the Creator has given all of Himself, He didn't decide to give only some things that He liked to give and save the rest for Himself. Man can do that, but not the Creator. Therefore, He says, what is Me is you, and what is you becomes Me.

Instead of using satellites we are setting up the One Nation Network (ONN) through the Units KS are buying. Through the Cosmic Rays every single Ray in the U will be connected to the ONN. And when the planet rotates it will touch every field of the planet. In this way all the Beings on the planet will receive the dimension of love and maturity through the Soul. The Enlightenment Game will help us elevate the STM through the physical games of the Man and we will learn the knowledge while having fun. At the same time we can win Keshe Coins that will be added to the Keshe Wallet - ID. The whole objective is to share the knowledge so that everybody gets it irrespective of their place and position. It won't become elite, but will be for everyone. Mr. Keshe has one request of us KS. When we get enlightened to any dimension that we don't become arrogant, but remain humble. He said, that our thoughts cannot go higher than what they wish for us. Remember that we gave you the knowledge, otherwise you would have stayed as you were. Enlightenment comes from the light, and not the darkness of the STM.

He talked a little about how the gold was created out of the fields in Beijing back in May. They created a cluster of fields that came together and transferred that energy into matter. On the graph maybe that appears as the line of dots in the middle as the STP, and then it creates the P, but at the same time it must be connected to the Soul above. This plasma gold carries the emotions of those people who were in the room while it was being made. It's matter with emotion. That means that gold produced by the Earth from the fields of the Sun, carry the emotion of the Earth. This is the matter state gold, which has different strands of energy. Plasma gold brings calmness and satisfaction of the Soul and not satisfaction of possessing something precious.

Mr. Keshe had to warn us about the possibility of Armageddon taking place between Friday the 5th and Sunday the 7th of September, 2025. This date was calculated from the

Jewish and Moslem scriptures and they believe in it. After this massive war the Messiah or the Methi will come. So people in those religions are pushing and waiting for this event to happen. It is under the disguise of religion but the real cause is the greed of the Man and those who want to benefit by it. The question for us is, does the destruction have to come before this New Era with the release of the Plasma Technology can start? We are praying for peace and trying to elevate the STM and the emotions to bypass this destruction. In a way, this is what we are testing in the Monthly Flight sessions and these KSW with the Plasma Systems running in the background. Can we reach the elevation of the emotion? He will tell us in the next KSW what the results were. If we are caught in this event we should remain true to our belief's and what we have learned, and keep doing what we need to do. And we will get through it.

To answer a question about working with the plasma Mr. Keshe again stressed that it is about working with the fields and not matter state. And Energy is M fields in motion. We are working with the strength of the fields. There is no plasma more powerful and energetic, than the plasma of Hydrogen (H). We look at Plutonium as something powerful, but Plutonium is made from the plasma of the H, it's not the other way around. If you understand this in the true essence of Creation, then you have understood the true meaning of Creation. This is what 99.99% of our scientists have gotten wrong and they teach the wrong thing in the present world of science. We always think that bigger is better, but God created the Universe from one atom. And Man uses tons of Uranium and a huge amount of pressure, to create a few kilowatts of energy.

The question came if the other Prophets failed, then what about Mr. Keshe, how is he different? Of course, he is teaching us scientific knowledge so that we learn it ourselves and not through mysticism and blind belief's. He replied, the safety key is that we have no fear of giving the knowledge, because we know the knowledge always wins. You look at the knowledge of the physical Man, we look at the knowledge of the Creation and God. This is and this shall be. You look at it in the way, that man's physicality is stealing or doing bad things. But we know that once you enlighten the Soul it remains and that is the difference. It's the enlightenment of the emotion and that's the true knowledge, and not information given in a book about making things in P. In the U there are no Universities. Enlightenment is of the emotion. Man does not yet understand this. So that's why we are trying to change the emotion of the Man through the energies within him. This is what we do in our Flight tests with you lot.

Other topics:

Now we have the technology to apply the knowledge. When governments stop killing and start spending that money instead for applying this knowledge, the life of humanity on this planet will change.

In response to a KS testimonial he replied, enlightenment brings peace and peace brings healing. It all depends on what we want to hear. With the Wish we can make it happen, but we have to put in the effort.

Thanks for listening.

Quick Index

(Last week we showed you how (the Soul of the Creator (STC) responded to a question. Two Souls were brought together and then there was enlightenment. During the last session we endeavored to replicate how life starts from the point of view of energy. And how we can dictate the time of life. In a way, all of you were one cell and we introduced another energy cell into the process. It was like in the womb of the mother, where an egg and sperm, which are 2 dynamic energies come together. (We actually saw how life in the dimension (D) of energy takes shape. It was the accumulation of many different things which we've shown you over the past few weeks. It's about understanding the totality of how life is created at the level of energy. In a way, we tried to replicate how the Daughter of Mitra is created and understand how this process takes shape). (?? The life starts from the dimension of physicality (P) where we create a combination of fields ?? which collectively gather as a Soul, ?? and become also a Soul of Physicality (STP). What we saw was absolutely amazing. What we observed in the Friday session was more shocking. If we create an environment for it, and give it a D of physicality, then in essence we can literally create life)).

(Recently, I had the pleasure of spend a lot of time with a scientist and researcher, who is an expert in the creation of life and how it can be improved. What he said was absolutely amazing. The sentence he used gave me a shock. And when I explained its meaning to him, he said, he was shocked as well. He told me that when they bring an egg and sperm together they see a spark and then they know the process of life has started. I asked him if he knew why they see a spark. That is the "spark of life." It happens because the egg and sperm are both dynamic plasmas. Then I explained about how light is created on this planet).

(We see a light in the sky and we call it the 'daylight.' But it's really the interaction of the fields of the Earth and Sun, and we see it as daylight. The parallel of it in the World of Creation is when two dynamic fields come together and (rub against each other and) create that light, or what he called, that spark. He said, this is not a common knowledge that people know about, but as we are scientists working in this field, we see it. We just call it, a spark, but now I understand. In the future when researchers learn to measure this spark, we'll be able to tell its size and strength. One strength will mean it is a boy, another a girl, and a strength that deviates could mean there are abnormalities. (Then we understand there is another dimension to life which is the Energy side. Now (scientists can confirm what we in the world of Plasma Technology (T) have been explaining for years. Now we have a parallel that we can explain and see in the world of Creation. This will bring a new dimension into the different schools of thought and understanding)).

(In last week's Monthly Flight session we brought all of the Knowledge Seekers (KS) to be as one plasma, and then we introduced our plasma in parallel with you in both the dimensions of Energy and P. The strangest thing unraveled and we are going to show it to you in the next few minutes. Then you'll understand there are no differences in the world

of Creation from the planet Earth to an egg and sperm. (It's when we decide to interact and change)).

(For the past thousands of years when we saw lightning and heard the thunder, we thought it was coming from the sky and hitting the ground. But today science understands that the actual spark, or energy to start the lightning really starts from the Earth and goes up. (?? A very minimal amount of the Earth's energy goes up and connects to the top, or the sky and ignites ?? it. This brings in the Soul of the Planet and then there is a diversion and conversion, and it become lightning which strikes the ground. The tree or whatever sticks up acts like an antenna which sends the message up, and then it returns back on itself as lightening). (When a person gets hit by lightning, maybe at that moment they have a thought that they are going to be hit by lightning, and this creates the right energy to connect to it. It feeds the atmosphere and the energy balance in the D of the physicality hits back, or connects back to it, and then we see it as a release of energy. It's the enlightenment). Then we say someone got hit by the lightning and the rest of it. It's because we never understood the process of it)).

(My discussion with that scientist confirmed a lot of things. (One is about how we introduce energy into the matter state. Because you all are energy in the matter state, ?? and you are the energy of the Creation in the D of the Soul. The matter state combination of the 'womb' of this planet and Universe (U) become the holder of these two energies). Then something very special happened. (He gave me the confirmation that I have been waiting for, for 40 years. For the first time we'll show you this recorded video of it. This video is the interaction of collective Soul of all you KS. You are like the egg, and our system feeding you is like the sperm. As you watch the video you'll see how the D of the Soul of the two leads to creation of the STP. And then like how the lightning actually starts from Earth and goes up, your energy goes up and touches the Soul of Creator (STC). And then it comes back to us and we get the shape of the P. Do we stay in the STP dimension? We showed this last week when a KS asked us a question, and how the two energies interacted. (?? The energy went up to the STP and then to the STM and (the enlightenment came))).

(This video is a step by step of the process from (starting point where we added extra energy to the combination of energy (already there). We created a new life, a new cycle, enlightenment. For now ignore the graph on the left side, it has too many explanations to go with it. The right side is the most important part. Mr. Keshe draws on the screen Zone 1. This is where we introduced energy. Prior to this point you all are connected to the system. So you have one energy. Then we introduced the energy of our system. Now let's play. Watch what's happening. The video is about 3 minutes)).

(In a way, by introducing the energy to you, we introduced you to a condition like the egg and sperm. It develops very softly in the background. But it's creating the STP with it and we see STP taking shape. We have introduced matter-energy, and the Soul, and the energy of the collective Soul is taking over. This is your P, STP, and STM area. See how the Soul gradually develops. It's repeating (?? how life is created in the World of Creation. The life starts energy wise from the point of P. It's exactly how lightening is

created). When it collectively increases, (?? it goes back down to P to feed itself. This is how life created. This is why we have the egg and sperm. We bring the egg and sperm together, which is D of P. In the lower left corner, the energy comes together and as it strengthens collectively it creates the STP, and then it connects to Universal Energy through D of the Hydrogen (H), and then comes back to itself)).

(The most important thing for us in Space will be how the (energy in the) environment increases, (which) is part of the Soul that increases and gradually feeds it back to the STP and P. It gradually builds up and this is exactly what happens to us in a D of P. You can see how the Soul is taking shape. The dots come in one by one. We decide the start of Time. We decide the Zero Time and the energy we put in decides the STP, (then we connect to the Energy of the U and it feeds ?? the P). (We put it back into a new environment, and then we (?? are a creature of that environment in that point and position). Scientifically there is a lot of research we have to do to understand this)).

(What happened in last Friday's session was so fundamental that we've moved up the September session tomorrow. It's another D of the collection of the STP, and STM. The graph shows how suddenly the Soul separated, not in the D of P. You see how consistent the STP and STM stay in this area. This how we separate).

(This confirms how even we as humans in the womb of the mother attain life, attain the Soul, or Energy. The energy of the womb decides what interaction and condition the P will manifest itself as. We'll research this in the future. If we have a sperm and egg of a human, and we create the conditions of the womb of the mother, we'll get a human race like on this planet. (?? If the mother moves to a different environment, then the 80% energy she receives from that environment changes, then that womb will not create a human as us. It will create a human according to the conditions of that place and position. This is what Earth our mothers do? If she is Black, then she produces a Black child, a Chinese gives birth to a Chinese looking child, and the rest of it. Because the womb is preset to do that. Even if we take a Chinese woman from China into Africa, she'll still produce a Chinese baby, because the field energy of the womb is preset for that, unless we change it to interact with the sperm or an egg of the African environmental energy. Then the new balance in the womb of the mother decides what that child is going to be. (We can use our knowledge to decide the Time, energy level, and what the outcome will be)).

(In future research we see how children will look like, if we fall in love with another creature energy in the U. It will be according to the space of that environment. We know that the 'Children of Mitra' cannot have physical interaction, but they can give energy to each other (and other Souls). The interaction with the environment decides how the children of humans in Space will look. This is because where the energy of the Soul comes from will be dictated by the totality of the Universal energy. (The STP of the man will change because it interacts with the energies of the U, and then the P will be decided. (?? We'll make Man immortal)).

(Yesterday, there was a parade in China and President Xi and President Putin were walking with each other. Putin says to President Xi that they are both 72 years old, and they want to stay the leader, and enjoy the leadership, so they are looking to extend their lives. Putin said, that now that we can change organs and everything else, we can live to 150 years. So in a way, they are still quite young, relatively).

(We have the knowledge where we can directly change the energy of the environment, so that the STM and STP can change. The interaction of the Soul will be a higher order enlightenment. (?? It means our children will come in touch with the D of the knowledge and energies of the U and will be enlightened in a totally different way than we are at the present time. Future research will confirm this). (?? The graph shows the Soul interacting and feeding the P in an Infinity Loop)).

(We have moved into the knowledge of creating an exact replication of the Universal Energies. We'll set up in the (Flight) sessions how you can interact. Up to now you (haven't been able to interact with the Soul). Now we'll show you how. Because the energies we will bring in will interact directly with your Soul, directly with your true point of energy and resources. (?? Up to now we only interacted with your P). Then we'll see how you KS will change in enlightenment, knowledge, and in whatever you want. Maybe some of you will touch the Love of the Creator, and then we'll see what happens).

(These are not theories anymore, because you can see them on the graphs here. This part is your Soul and over there is the STP. The minute we introduced additional energies your Souls separates, and the STM goes above the STP & P. It's enlightenment at a higher order, where your STP and P stay alive).

(?? Is it worth to start (with a) Time where the DNA of the Man, because of the conditions, emotions, or whatever of this planet has been tampered with? (There has been genetic modification through emotions (?? that are causing the problems we have on this planet. If we deliver the pure energies at the level of the Soul, and Universal energies, then we can change these conditions of having children with disabilities mentally and physically, and the aggression. Through the knowledge we have gained we can create a new condition. Would our work and research bring in a new D of work for all of us? (We as KS will reach the point where we do not need to worry about how our children are going to be in the future. We'll be able to change the energy of the environment of the creation). (We suffer from a lack of energy and that has made us into animals. Through the T we'll become peaceful and be able to peacefully live amongst all on this planet. In last week's test we used you as guinea pigs and it was extremely nice for us, and we gained perfection in knowledge. Now we can try to change the emotions and bring Man to the point of maturity, more through enlightenment than anything else. We can directly understand the work of Creation and how the Souls interact and then see what happens in P. We are going from the P up to the STM)).

(Hopefully in tomorrow's session we can add to the knowledge, and be able to understand the reason why Man is so attached to P. And hopefully in the coming time through understanding the Totality we can change our D to something very special. (We'll use

games to help Man understand about energy and how Man functions as energy). Then we'll try to understand how to create 'Children of Mitra' in the essence of the true creation, and without all the genetic modifications. (?? Humans came to this planet millions of years ago and has gone through many genetic modifications. We originally came into the environment of this planet as pure lights of the Creator, and pure lights of the Sun. And through evolution and time our DNA got genetically changed in the D of emotion, which led to making Man aggressive and he started to kill and everything else that goes with it).

(With the knowledge we have in our hands and what we see in our research, by the Keshe Foundation, it's amazing to understand that, now with the knowledge we have, we can produce and introduce energy of the P to the STP and STM. In the coming weeks we'll enlighten you, and see how the true 'Daughters of Mitra' will be created. This will put an end to the fallacy of the 'Virgin Birth' (the way they presented it). Because now we understand that the birth of a child is (through) the purity of the child. This was the Soul of Christ. His Soul was created from the purity of the Soul of the Creator of the U, and was embedded into the P of the Man. (He could have come from any man or woman, because the virgin birth comes from the D of the Soul, and not P)).

(We can extend this knowledge to the One Nation Network (ONN) Units which are coming out. Many of you are participating and we'll change the course of humanity. Now we have the knowledge that we are gaining directly through the systems. Man uses the satellites for telephone, Internet and whatever, (but they are all connected from Earth, which is short of energy to feed its citizens). (Through the ONN we'll make up for that shortage of energy and elevate the Man to the Soul, and change him to be peaceful. Then Man will never kill, because he'll be fed through the systems. You looked for a Coin, (it's a 'coin of peace.' And this is how these things will go. We are structuring all these things to make Man ready for the next step, because the knowledge of the Energy is with us). Then we'll create a Man that doesn't kill. It (won't be within the structure of his DNA). (?? We won't let the DNA be modified through the emotion of hunger, greed, and everything else)).

(Tomorrow's session will be the most amazing session we've done with Man. It will be the proof of the writings of the Prophets. I will show you the results next week. I would like to see if it can be done. And then the following week we'll add another D to it, that you will see how you are. The Time is in our hands, because now we are changing the Time. We are adding energy factor, which changes what we have already discussed about Time. (Now the initial stages of creating the Soul, and its feedback takes weeks. We can interfere with the energies of Time and change it). We can reduce the pregnancy time from 9 to just 3 months, ?? by increasing the energy for it to be enlightened. This will reduce the time needed to form. Isn't this what the animals do? Some animals can mature an egg in 21 days. This is done according to the energy they produce. Because the yolk in within the center of the dynamic pressures and the purity of the white of the egg allows the conversion more rapidly. (?? But for the womb of the human mother the emotion comes, there is the father's anger, the joy of the siblings of having another brother, all this brings that change). (?? In the next phase we'll learn how to change the Man)).

(We did this in our agriculture tests in Inner Mongolia where we grew the seeds of wheat, rice, and everything else in a shorter time. We changed the environment. The wheat, which was supposed to mature in 140 days did so in only 127 days. And the protein was increased from 12% to 20%, which was the maximum enlightenment at full maturity. The only thing we did was deliver energy that increased the protein level, ?? or the enlightenment and the weight changed. The number of grains was the same. We did the same for the other grains as well).

(By adding energy to the structure we can interfere with the birth cycle and shorten it. Isn't this what happens when some of us are born prematurely in only 7 or 8 months? It's the Soul that matures. The physicality is not ready for it. With this knowledge and T we can mature the Soul and the Energy together that you don't need 9 months pregnancy. We've seen it in agriculture and in the 'world of the womb,' or what we call embryos of animals. This research is already getting pushed through, where we will test how we can complete the embryo in 6 months (by changing the environment of the womb)).

(I discussed different things with that researcher who saw the flash of light. The knowledge gained was amazing. They have a problem when they take the embryo. They have to slice something off of it, and then they see pain in the embryo. Maybe they cut an arm or an eye. (In our work with Naomi we can ?? reduce it so the (embryo) does not suffer. We don't need to touch it we can take the fluid from the feedback and decide if it's going to be a boy or a girl. We do not need to harm it, but if we did we can repair it)).

(In a way, we've gone into animal trials. We will see the interaction of the STM and P, and how we can (shorten the birth time. Would we create the most intelligent creatures without having a father and mother? Do we need the embryo, or do we need to deliver the energies, as we expect to live in Space?))

(Can we change the defects in the egg and sperm? And reduce the birth time? (?? When the Children of the U interact ?? with the Man and creatures of this planet, they can give birth (?? through a woman of this planet) in half an hour, and up to 2 days, or whatever. We have achieved this knowledge. In the coming time, we'll learn how to measure (the energies). It's sequential, it is the totality of what we understand about our own creation)).

(In the graphs we'll see how fast ?? is by adding extra energy to your energies. ?? You went from the Soul to the P in 3 minutes. This can be repeated anywhere in the U. It went from the P to STM, and to creating the Soul in less than a minute. There's a discussion in the World of Creation about how long it takes for whatever is in the 'womb of the mother' to obtain a Soul, and become a living thing).

(When we add Cosmic Rays (CR) to this equation there will be huge changes in the science of energy. There will be massive changes in our understanding. Last week we interacted with hundreds of thousands of you online, and we created a STP, and then a Soul. (Will we be able to create children who will be perfect in Soul and P? (We'll have to fiddle with the energy we put inside it).

(The Plasma Systems are on in background today with 3 systems showing up as panelists. The knowledge we gained from you today will be discussed next week. This knowledge is coming so fast that we have to enlighten other scientists to start the process of understanding. Future scientists will understand more about what happened today. We have reached a D of maturity of knowledge and we can play with the energies and P).

(If we can measure the energy of love between a man and woman, then we don't need the sperm and egg, because we can take that from the Soul and place it in the womb of the mother to create a perfect child, because the Soul is perfect. It's the P that is gathered and changed. What do we call this gathering? (?? When the gathering isn't right or something missing we get genetic defects. One of the genes could be affected. Actually the gene itself is energy. Why do the genes get affected? Because the mother had a defect and it was passed to the child. When you create a perfect Soul, (the P cannot (be wrong). When there is perfection no child will be born with one eye missing, or half a brain, or intellectually deficient, and so on. There will be no genetic problems)).

(When we create a pure Soul, the physical DNA and genes will have no affect on it. The question for me is, whether we can help those who already have genetic defects, or are mentally not mature, or whatever else? Do they need to go through operations? Do we need to use chemicals to change the color of our skin, lengthen our legs, or whatever? When we understand the energy fields of our emotions and can ?? create that feeling at a given time, then we can change everything. It is possible. We tested this a couple decades ago when we grew a toe. Now that can be done instantaneously, because we know how to create the STP, which leads to creation of that toe. We can grow it instantaneously, because we can transfer and connect everything together).

(The plasma Cosmic Ray T is on the verge of being able to do this. In the coming weeks, our laboratories for the first time will change a embryo through the interaction of the fields. The research is ongoing. We can decide the Time, because now we can change the emotion and bring the enlightenment at a higher order that will change the time of life. There will be a shorter pregnancy time and the children will be much more mature and enlightened. ?? There will be no time for them to die. The two presidents who were saying we can live to 150 years now can live to 150,000 years. Because we can tap into the Universal Energy, and CR, in the D of P of the Man, and connect to its environment according to the energy of this planet. (We will be able to create children from the D of the Soul of the U, who will have access to what is in the U). Their P will last beyond billions of years. I made man in the image of Myself, as I am there from the beginning to the end. ?? It shall be you and the Soul. It cannot be, that I give you (only) what I like, and keep the rest (for Myself). What is Me is also you, and what is you becomes Me. Interesting. Now we have the knowledge, and the T to apply the knowledge. (When our governments stop killing we'll have more money to spend on doing this research and making it a reality for humanity)).

(I hope you can see the bright future ahead and that we'll get this ONN established soon and through you we'll bring the change. Instead of raining from the top (where the

satellites are), we'll rain from (the bottom and correct the top), which is the STM and (we'll change the aggression of the Man. Hopefully, we'll get more enlightened)).

End of Quick Index Part 1 - 606 KSW

(The September Monthly Flight session is tomorrow. Try to come in tomorrow with whatever you like, the way you like it, and with any intention you have).

(A number of ONN Units have been donated and the KS who will receive them will be responsible for the keeping them running for the next decades or however long they last. We'll start testing these Units in different locations and hopefully by October we'll start releasing them to you. For us to be able to do a lot of work, you have to understand this is an enlightenment game. We can bring other people to play the game to increase the number of players to about a hundred thousand. The system will become automatically itself. The game is a way to entice people to understand the process of enlightenment. You will also win Keshe Coin (KC) to be added to your ID-Wallet. (You will gain knowledge of the T and at the same time you'll receive a bit of enlightenment as energy. There is the printed circuit of the P and the D of Energy of the Soul, the Universal Energy. The two will work together to add to the extra energy, and will interact with the KF Plasma systems and create a D of physicality, STP, and STM. You'll get fed as you play)).

(For those of you who promised and committed to pay for so many (Units) please complete that as soon as you can. As we increase the number of players, we'll increase the number of the Units. In the beginning you need to connect to the Internet and through our Cosmic Ray structure we'll elevate the STM. Man has never been able to elevate otherwise he would have received enough energy from the U that he wouldn't need to kill. Now we are going to the essence to get the energy).

(With these systems we don't need to go through satellites, or do other things. We're connecting directly to Cosmic Rays. (When we set up the network across the planet, when it rotates every field of this planet will touch the ONN. Every single Ray in the U will connect to the system. (Then we'll elevate the STM through the physical games of the Man. Our developers came up with a game that you will receive KC when you play). We are using two systems one in D of P as the Wi-fi, and the other will be the plasma antennae to connect to the Energy and get the enlightenment and become a Man of peace. And as it spreads across this planet the dogs, cats, kings, peasants, and everyone else will receive the D of love and maturity).

(The Flight test tomorrow is part of this, but we're not going to tell you what we're going to do. You will tell us how you feel and then we check it off our list. We may have two Flight sessions in September, because we want to complete this set of data. Then we'll go on to another dimension with it).

(One thing I request of you is, when you get enlightened to any dimension, don't become arrogant, instead become humble in what you have received. Your thoughts will not go

higher than what we want. Remember the knowledge you gain is from what we gave you, otherwise you would have (remained) zero. The enlightenment comes from the light, not from the darkness of the STM).

Q: Presently, our DNA is looked at as a double strand. Some say that what is being called 'Junk DNA,' is actually the rest of what should be 12-strand DNA. What do you think with regard to this 12-strand DNA?

K- (I'm not a man of science in that way, so I cannot tell you. Is it 12, 14 or 16? (?? We are developing a process according to what we understand, and we monitor how the fields of the U interact). If you are calling it a 12 stranded DNA does it have anything to do with Carbon? Or other factors? We are not in that field, so I prefer not to explain something which I have no expertise in).

(When we produced gold in Beijing we created the conditions of the energy of gold. (?? The cluster of the energy fields come together and transfer that energy to the matter (state). The gold you mine from the Earth is matter state and carries the emotion of the Earth. The gold we produced carries the emotion of the collective energy of the people in that Space where it was created. Therefore, it's a matter with emotion. The gold we produced is very different than physical gold. It has a different strand and dimension of energy. The essence of it is different. Our gold has a different feeling when you touch it. It brings calmness, and satisfaction of the Soul, and not the satisfaction of possessing and holding something precious).

(Would that affect the dimensional strength of what you call, strands of (DNA)? Would it affect the setting up of whatever? This we understood by those who understand and see what it changes in it. We have tested this and know it for a fact, that the creation ?? of new fields affects the genetics. It affects the structure of the genes, the position, the dysfunction, and ?? deformities. But you have to speak to experts, as I'm not in that field, and have never wanted to be).

(I have to warn you about a possibility we foresee, we don't foresee, we have knowledge about one of the largest wars in the history of Mankind between the religions (that will be carried out under the cover of greed. It might take place in the coming days. We are not sure, or we know we are, we've been told, the knowledge we have and had. So do not be surprised if Man through greed and his weakness runs himself into a massive problem in the coming days and weeks. The ideology of the Man under the cover of religion, brings about the foolishness of Man. In the name of God they are creating a war, that actually has nothing to do with God. It is caused by the greed of the Man. If this happens in the coming days, be strong enough to withstand it. We'll be monitoring it and we have moved into a safe position, not to be part of it).

(In the West, we might see harshness, and in the Middle East we might see annihilation of races. On the other side of the work of humanity we might see a new change, a new beginning. We hope the war will not take place, but there are some indications that we are moving down that path. If it happens, stay strong in what you believe in and stay

strong in what it needs to be done. In this process we might lose some of you in the dimension of physicality, but be strong enough to understand, that the STM has moved in different dimensions and directions through the name of the God, which had nothing to do with (what they call) God. We foresee one of the harshest wars in the recent past history of Man. If it happens. (Those who are in it, believe in it and they are doing it (by) their belief. We have to wait and see what happens. If it does not take place this Saturday or Sunday, we will watch for the next upcoming possible dates)).

Q: You once said, "My wish is my command." Will it be helpful if all of us KS concentrate us on peace, and would it help a little bit?

K- (A lot has been done. And a lot needs to be done. Of course, it (will help)).

(He talks about the demonstration of weapons in Beijing yesterday. This was similar to what we used to see in the 1980s with the Communists. At that time there was the Cold War. Now we see an active war using the same group of people. We saw in the frontline President's Putin and Xi of China, and the head of North Korea. I always look at the body language, and how things are. (They present themselves as we are the players, and we decide the future. For years the West fought Communism as the biggest devils that they had to tame. Now, even though we call it Russian and Chinese democracy, it's actually (still the same) in the background. They're all the same leaders. (It's still the Capitalists fighting the Communists. It's been polished a little bit to look different)).

(When you look at the weapons yesterday that was shown by the Chinese it's amazing. We always analyze these things from a deeper perspective like how the world leaders were positioned and placed. They are sending an unspoken message in this world of leadership. There were about 28 world leaders gathered in one room to show how Man's military power can kill, and for no other reason. I said to myself while watching, when would it be that we'll have these marches but with scientists showing their knowledge instead of soldiers and guns. We'll bring marching plasma physicists, nuclear physicists, Cosmic Ray physicists, and doctors who work with the Universal Energy. Then we will be proud of how much Man has advanced in knowledge. We'll show the march of science, T, and peace).

(The war in Ukraine is between Catholics and another sect of Christianity, and the money it makes. It's the same with the Jews against the Muslims. Last week 40 tons of weapons, and bombs were sent by the government of United Arab Emirates to the Israelis to kill more Palestinians. It has brought shame. Muslims are paying Jews to kill the Muslims in Palestine. It's not just the Christians killing each other. It's the greed (mixed with religion). This will all come to an end).

(The war we've foreseen in the coming days and weeks will bring an end to a lot of these religions and the end of (these wars). According to the Jewish (scriptures) and according to the Islamic Books they call it, the 'Day of Judgment,' where one wins over the other. This date was calculated from the Holy books to be tomorrow and Saturday. Both sides believe in it and they are ready to slaughter each other for it. Just watch and see what

happens over the next few months in that part of the world. In the end, who's going to benefit by it? They will get more of nothing. According to the Holy books of the Jews and Muslims this weekend, and the coming days until October, is the time set for the Day of Judgment. After this Armageddon the Methi will come. Look at what was promised and supposed to be, will be. If it happens tomorrow and Saturday, don't say you didn't hear about it before hand. It's not them doing it, they're doing it in the name of (their) God, because it's written in their scriptures. Then one will become the ruler of the whole lot, but there won't be very much left to rule over, because the ex-communists (will) have taken it all. Let them play and see what happens. When you have no religion you can't take sides, you just get the benefit).

Q: Do the vouchers from the Mystery package have to be used this Friday, or can it be used for the October flight?

K- (You had better use it tomorrow, because we might not have any more (of these type of) sessions. If they kill each other next week, there'll be no satellites for you to be in the Flight session. But seriously, yes please do).

Q: You said that one understands the teaching, according to one's intelligence, and that when a person achieves knowledge, everyone understands it too. What can we say about intelligence at this time?

K- (It's very, very intelligent, but it is mixed with the greed. (Actually, thousands of years ago our ancestors were more intelligent than us, because they understood the work of the U. Since then the human race has become more materialistic and we don't understand the rest (of the science). We have narrowed our minds to only think of the matter state. Our ancestors could understand how galaxies work and the U. They built systems that replicated them. Today, we are more interested how to make a Microchip, how to make things physically, and how we can cheat on the apples and oranges)).

(In the 1950s, '60s, and '70s, there was a nuclear physicist whose philosophy was that nuclear material doesn't kill. Our teachers and professors tried to keep us away from knowing this amazing man. The way they made us believe oil comes from dinosaur bones, they made us believe certain things about nuclear material. We saw some of his videos at the university and he had a habit of putting nuclear material in his hands and eating it. He would physically swallow it and nothing would happen to him. Because it's the conditions the nuclear material creates that kills. It's another matter and it's about how our body is connected to it).

(His work brought us a lot of understanding in those days. They would tell us not to touch nuclear materials. But people are curious and do things anyway. Our ancestors lived in caves that are where the uranium nuclear material mines are of today. How come they could make their homes in uranium and not die? We only understand nuclear materials in the way they bring them together to make weapons out of it. Our ancestors were much more intelligent than us, because they understood the work of the U. And our more recent

ancestors became bound and tied to matter, and now we are trapped in it and we can't change).

(When you mix blood with money you get the worst race on this planet. And we've seen it. (We know how (wrong it became through the wealth)). Spain during the time when Columbus discovered America had been taken back from the Muslims, or the Moors. At that time Holland and Belgium were part of Spain and they brought all their spices from the colonies to these countries and not to Spain. The first thing they did was to deported all the Jews and Muslims together to Holland because they said, these two bloods were the creator of wars and all the mayhems in the world. Then the Jews and Moslems got together and created a structure which became the biggest and most powerful financial and economical system in ?? the world at that time. They brought a hundred years of glory to Holland. While the British and the others were making warships, these guys made ships selling spices. They opened the first shareholding company, and the rest of it. The combination worked very well until the British created a wedge between the Muslims and Jews through religion. Read about the history of Holland. But always when the Jews got money, the greed of their blood came out to kill. Then we saw their downfall, and the way the British went after them and the rest of it).

(The modern Man has gone the way of greed and materialism than his ancestors, who spent the time to understand the work of their creation. Then you most probably understand how pyramid and all these achievements of science were made, even though they had no tools or communication systems. Why do we have pyramids about the same time covering the whole planet? Did the people travel around spreading the knowledge, or did they spread the knowledge by connecting intellectually with each other through the Soul? One day I'll answer this question).

Q: I was wondering if even without the volume, do the teachings still transmit the Cosmic Rays, present in the latest teachings?

K- (In the Monthly Flight sessions all you need is to turn the volume on your microphones to the lowest setting and that is enough to receive the fields. But even if you shut it off completely it can still do it. You are lucky to ask that question, I'm going to answer you. I've got so many systems around me. (He shows us on a graph). This is you KS at the beginning of the session. (?? This graph shows how you connected to the system with your Souls. In other words, without being physically connected to the system. We always wondered how we were connecting with you. It shows how you connect to us before, during, and after the session).

(You have to listen to the recording on your own. In summary, there is a normal spreading, then the system frequency and the gap changes. This is when we added the fields of our materials into it. We don't need to inject you with things, we just bring things in and see what happens to you lot. ?? You are connecting to us just by your thoughts, ... then we see how the Soul spreads).

(Today we were not testing to energize you, or get you into a position. Instead, we wanted to see how your energy spreads, and what we need to do to bring it together, like the last time. This time we're working on the D of physicality. All of your Soul levels are the green, which is below. Your P is taking control, and it has dimension too. We can control both ways, it is an operation. Then there is a central column of dots representing energy. There is the physical and Energy dimension. The purpose today was to see how we can dilute everything and shift you, instead of working with a high concentration of physicality. It seems we got it right. We'll see what the outcome will be tomorrow and how you'll respond to what we set up in the system. A few weeks ago we gave you the honey, lavender, and orange and we tested your physicality and emotion. Last week we tested you as energy levels. (Now we take the P away, and D of Energies, which have no material dimension to it, and then we can add emotion to it. Then we'll see the reaction. Does it bring contentment? But on two levels. Next week's session, we'll introduce, hopefully, a new D of Cosmic Rays, then a lot of you will be touched by it in a very positive way. Of course, if the world leaders don't kill us by then)).

(After assessing the situation the world leaders have been put into a corner where they have nowhere to go. They brought this condition upon themselves. Or is it the destiny of Man? It's a combination of things to bring the equality, and so that Man can move to the next phase. Everything else is the outcome of (what will happen with this. It is what we see. It is actually what (has been) shown. (This has to be, to be able to reach that point)). Even though it will create a lot of mayhem and whatever, for a lot of others. We see Africa going back to (its) power of equality. (Some French speaking African countries are starting to take charge of their lives. The French Colonist have drained the African nations for past decades and centuries, and they took everything from them and gave nothing back. Now the Africans are making 5 million per minute. If the former British colonies follow then we will see massive changes in Europe because the European luxury lifestyle cannot exist. It lived on stolen gold and everything else from Africa and the rest).

(We see China coming up as another power, South Americans are trying to get equal balance with what they get from the Chinese and the East, and from what the West has done to them. We'll see a lot of changes and in the end they'll bring equality. (The Western world makes out that everybody else is wrong, but they have brought it to themselves. Now the others are trying to balance their own condition). Burkina Faso is a good example of how African nations are trying to bring balance. It's time for humanity to become balanced, and then a lot of other things will move forward too. World peace will come when there is peace everywhere, in all aspects, and we are going in this direction. It's the wish of us as humanity and we want world peace. But to get world peace we have to make these adjustments. It won't just fall out of the sky. It takes time).

(A KS gives a testimony of how listening to the KSW with the Plasma Systems running in the background is helping her and some of her health conditions).

(Enlightenment brings peace and peace brings healing. That's all it is. And it depends on what we want to hear. (When we look at our problems we always see it as the cup is half

empty. If we look at the cup as half full we'll find different answers. We have to learn to mix the physical with the Energy. It's the Energy that makes it into a position of reality. If the wish is there, it will happen, (but you also have to put your effort into it for it to take shape). He tells of how a truck driver wished to become rich and he did. And another story about a bank manager who remained humble even with all his wealth. The Bank Manager said, the wealth should not blind you to the reality of your humanity. This thought stayed with Mr. Keshe from childhood. We wish and we get. (But do we use our power to benefit others, not just ourselves? This is how our wish is our command. Sometimes we wish but we don't believe in ourselves to be able to accomplish it. We also have to understand that our wish has to be in a way that it collectively benefits others, not just for ourselves)).

Q: In the original reactor design, we sent the lighter elements to the center, and the heavier elements outside. Is this due to the vacuum conditions inside the reactor? Or because they are gas in the matter state?

K- (You haven't understood the science of it. We work with the fields and not with the matter state. I think I gave you the answer. Understand the work. You are still looking at the matter state, and that bigger is better. Try to understand why we should do it this way. Why don't we work with a single atom, or a plasma. If you understand this wisdom, then you have cracked it. Otherwise you keep on working with the matter. (?? Matter in the middle and .. heavier). In the matter state you work with the weight. In the world of Creation you work with the Energy. And the energy is M fields in motion. It's the strength of the field).

(There is nothing more powerful, ?? or there is no plasma more powerful and energetic than the plasma of Hydrogen (H). But as a Man, you look at Uranium and Plutonium. But it's the plasma of H that creates that Plutonium. It's not the Plutonium that creates the H. This is the true essence of Creation, then you have understood the true meaning of Creation. This is what is wrong with 99.99% of our scientists, and how the present world of science teaches it. We always say that bigger is better and want to put more in. God created the Universe from a single atom. Man, Man, Man puts tons of Uranium and so much pressure, and so many things to create a little bit of energy).

Q: (If in the past humanity was more intelligent, then why did we gave it up? About Moses, you said the message was given to his Soul on the mountain, but when he came down he changed it to P and that's why they all got lost. Then you said, Jesus, Muhammad, Krishna, Buddha, and all of them had the same problem. What went wrong? Couldn't God see this happening, then why would He repeat it with the other Prophets). Then what about with you? How do you get your messages? Is it given to your Soul? What is different about how you access the knowledge? You're giving us scientific knowledge. So what is the 'safety key' even with you?

K- (The 'safety key' with us, is that we have no fear of giving the knowledge, because we know (in the end) the knowledge always wins. We know that. But you look at the knowledge of the physical Man, we look at the Knowledge of Creation and God. And so

this is, and this shall be. And you look (and say, the guy steals, but once you are enlightened in the Soul, it stays). And that's the difference. (When we talk about the knowledge, and ?? about making things, it is the enlightenment of the emotion. That's the true knowledge. It's not the knowledge of reading and making (up) things about it. In the Universe there are no Universities. It is the enlightenment of the emotion. Man doesn't understand this yet. We are trying to change the emotion of the Man through the existence of the energies within the Man). That's why we are doing all these tests with you).

Q: Why is it that the suffering and pain brings so much wisdom, and then that wisdom cannot be taken away from you?

K- (Because, (first) you have to understand what suffering is. And what do you call suffering?)

(Mr. Keshe talks those in power who understand about numbers and try to use them to manipulate things. They use their knowledge of dates and things to create suffering for others. They have partially understood about the information of time and the knowledge of how to play with it. (They did this with the famous number 9/11. Why 9/11? Who chose that day? The people who structured the 9/11 understood the effect of it on the emotion and control of the man. The same people have now chosen 14th and 15th of 11. Try to understand the transfer of energy, and how it shifts the energy. (They understood how to use a category of energy fields, and they play with those numbers and dates). They believe in it and that it will bring the change they wanted or needed. (They are trying something again that falls on 11, but shifts for 2 or 3 days. Will it happen, will it change? Otherwise you have to wait for another cycle, which they think will be right. You got to understand)).

(They choose a date according to what they read about to manipulate things, and it's what they believe in. If it doesn't happen, then there is another date which they set for it. There are a number of days in the latter part of this year that matches with what they want to change. They want to change the energy of the balance. The first one is this weekend. It's the same as what they did with 9/11).

Q: (Do these numbers and dates have to do with planetary alignments)?

K- (No, no, they don't work that way. You don't understand the energy they are working with. It doesn't work by the planets. You have to understand the bigger picture).

(The Jewish calendar is made after studying all the calendars of other religions. They study all the holidays ?? mourning of Christian, Jews, Muslims, Hindus, Africans, and everything else, and then they maneuver their own dates into it. They don't want energy of other religions to interfere with theirs functions. That way no other energies will affect what they want to do. This is how the Jewish government has been doing it for centuries. They alone celebrate on their own days. That's why they call themselves, the 'Chosen Ones.' They are chosen to be the most murdering race on this planet. Chosen to be the

worst on this planet. They carried out these things to show they can. (He gave the example of using the 6th of October for the Yom Kippur war. It was set by them, because they wanted to get rid of the Palestinians. It was all done by understanding this physicality of the work of the energies. (It was a genocide by the Israeli forces)).

Q: (The Christians have the second coming of Christ, the Jews the Messiah, and the Koran about the Methi). They all have the same story about themselves and I just don't understand what's going on in the Book of God. They all talk about wars and they justify it and people go for it.

K- (They don't need to justify it. They use the greed to play with the Man. These people work on the greed of the man).

(He talks again why the leaders stay in power because they have done so much wrong they're afraid to be killed when they leave office). (He tells a story about an African president and cycle of corruption and killing). There is a Jewish set up in Ukraine. The same thing with the Prime Minister of Israel, and now the Prime Minister of UK. It runs in the blood, killing, and using the money).

Thank you very much. We'll see if their philosophy works the way they think it will. (We are waiting for another cycle, till the philosophy matches. Tomorrow's session will be very amazing to see how we change you, how we understand about you).

End of Quick Index - 606 KSW – September 04, 2025

KEY-PHRASES:

SUMMARY:

ENGLISH TRANSCRIPTION

(:12)

K- Yes, thank you very much, good morning, good day to you as usual whenever and whenever you listen this series of Knowledge Seekers from Keshe Foundation Spaceship Institute. We welcome you back to another session of teachings and another evolution in science of man in the dimension (D) of energy, than matter-state.

Last week I showed you responds to a question, where it brings two Souls and then enlightenment. During the last session we endeavored to replicate life, how life starts from the energy point of view. And how we can dictate times of life. In a way, all of you were one cell. And we introduced another energy cell into the process. In a way like a womb of the mother, egg and a sperm. Two dynamic energies. To see actually how life in the dimension of energy takes shapes. It's accumulation of many things which we've done with you, especially in past few weeks. And understanding of the totality, the creation of

life and the energy level. In a way, we try to replicate the creation of the Daughter of Mitra to understand how does this process take shape. (:14) But at the same time we try to start from the dimension of physicality (P) that we create a combination of the fields in the dimension of physicality, that what it brings us to point of collectively, as a Soul, Soul of the Physicality (STP), how would we react, how we are generated. What we saw was absolutely amazing. What we observed on the Friday session was more shocking in how man, we can literally create life and in essence if we create the environment of it, give it dimension of physicality.

I had the pleasure to spend quite a long time this week with a scientist, researcher, who is an expert in what we call, 'creation of life and how they can improve life.' And what he said was absolutely amazing. The sentence he used brought me a shock. And when I explained to him what this means, he said, I'm shocked. He said, when we bring an egg and a sperm together, people at our level, which works in the ?? energy of the science, I'm sure he's listening to the teaching, most probably himself, we see a spark. (:16) I said, explain. He said, the time when we bring the two egg and sperm together, we see a spark. Then we know the process started. I said, you know what, how it is? Why you see a spark? And I explained to him, that spark you see is a spark of life. It's because the egg is a dynamic plasma, and the sperm is a dynamic plasma. And then I explained the knowledge of creation of light, as we know, on this planet.

We were standing in a field. I said, look, the light you see in the sky, you call it daylight. But it's interaction of the fields of the Earth and the Sun, where we are facing it in our position, we see the daylight. So now we see a parallel in the world of Creation, where when the two dynamic fields come together, create that light, that spark. He said, "This is something not known in common, but us as scientists who work in this field, we see it. We just call it spark. But now I understand." And, I can see now, what we explain is, how being able to measure this spark, in the future, researchers, then we can say, this size, this strength of a spark, is a boy. This strength of a spark is a girl. (:18) This spark with deviation could be abnormalities. And so, looking for a dark and light microscopes, this discussion came to, that we can now understand that there is another dimension into life which is the Energy side. And now the world of Creation confirms what we in the world of Plasma technology (T) we've been explaining, it's now we have a parallel, we have an explanation, we see it in the world of Creation. This brought a new dimension into the school of thoughts, understanding.

But what was interesting, last week during the session, we did the same with all of you. You lot, as an energy are there, how many of you in the session with us? And as you know, we are testing, we want to see conditions, what brings about. And in one of the conditions, we brought you, all the Knowledge Seekers (KS), to be as one plasma, and we introduced our plasma in parallel with you in the dimension of the energy in the dimension of physicality. The strangest thing unraveled. And if you understand what is come to be shown in next few minutes, in this morning session, you will understand there is no difference in the world of Creation, from planet Earth to egg and sperm, to when we decide to interact and change. (:20)

What is interesting, up to now, past thousands of years, we looked at the sky we saw the lightning and we heard the thunder, and then we saw fire or lightning hitting the ground and everything else. But the new science tells us that the actual spark, actual energy to start that lightning starts from the Earth. It's the energy of the Earth in a very minimal connects to the top and in connecting ignites, brings the Soul of the Planet into it and then we see it in diversion and conversion to become the lightning which strikes the ground. So we are the antenna, the tree is the antenna which sends the message up and it gets it back on itself. We say a man got hit by lightning but in fact the energy of the man at that moment maybe he thought I'm going to get hit by lightning, create the right energy and connects to, feeds to the atmosphere and the energy balance in the dimension of the physicality hits back, or connects to and then we see it as a release of energy, the enlightenment. And then we say a man got hit by the lightning and the rest of it. So because we never understood.

What happened last week and the discussion I had with this scientist confirms a lot of things that, in a way, when we introduce energy in the matter state. Because you are all in energy in the matter state, the energy of the Creation in the dimension of the Soul, but matter state combination the womb of this planet this Universe become the holder of the two energies. (:22) Something very special happened. And, in a way, I was waiting for a confirmation of this for 40 years. We have video recorded this and for the first time we show it to you. So what you see today is the interaction of collective Soul of you, as Knowledge Seekers, as let's say you are the egg and us as an energy interaction feeding into the system of all of you, as a sperm. Then watch what happens. How the dimension of the Soul of two leads to creation of the STP. And then like a lightning which starts from Earth goes up and touches the Soul of Creator (STC). And then it comes back to us. And then we get the shape. Do we stay in the STP dimension? We showed that last week with one of the Knowledge Seekers question how the two interacted. They're going to sperm. Then it went up to the STP and to the Soul, and enlightened.

I sent a video to Rick. Rick, put a video up. And you all watch step by step. This is from time zero where we add extra energy to the combination of energy. So we create a new life, new cycle, enlightenment, life. And just watch. If you have... ignore the left side.

<< The video is being prepared to be shown. ... talking >> (:24)

K- ... So watch what's happening. Ignore the left side. The left side has too many explanations to go with it. The right side is the most important part.

<< Mr. Keshe have problems here to write on the screen. >> (:26)

K- (:27:12)... Now, what will be interesting, play the video and then watch. What I want you to watch, I mark it to watch. I want you to watch this area. I want to see if you see it. Then, I want you to watch this area. And then, in development, watch this area. Zone 1 is where we introduce energy. Your, the energy introduced, don't forget, you lot, prior to this point, all connected to the system. So you have one energy. We introduce one

energy, which is our system. (:28) Let's play. Watch what's happening. Just run the video, please. This is about three minutes.

In a way, we introduced to you the condition of the egg and sperm. And as we introduced the energy to you, just watch how this area develops. It's developing very softly in the background. But it's creating what we call, the STP with it. If you monitor here, watch, it's ?? the STP is taking shape. So now we have introduced matter-energy, and the Soul, the energy of the collective Soul is taking over. And watch what happens. I keep quiet for you to just watch this, and then we go back to it to analyze it. Run it as it is, please.

This is your physicality. This is the STP. And this is the Soul area. Just watch. And see how Soul gradually develops. (:30) If you watch it, you'll see, repeats what we know in the world of Creation. The life starts from the point of physicality, energy wise. That's how it goes. Exactly like a thunder (lightening). And then when collectively increases, it returns back. to feed itself. This video, if it's understood and analyzed in full, you will see how life created. This is why we have the egg and sperm. We bring the egg and sperm together, which is dimension of physicality. In this corner, this comes together as the strengthening collectively creates the STP and then it connects to Universal energy through dimension of the Hydrogen (H) and then comes back to itself.

The most important thing for us is in Space, now you see if you can bring it, you see this matter, this environment increases, this is the part of the Soul, you see it increases, gradually as it feeds back to the STP and the physicality which is in response. (:32) Gradually builds up and this is exactly what happens to us in a dimension of physicality, you can see how the Soul is taking shape. If you see the dots, they come in one by one. And this explained to us, if we understand this, we decide the start of Time. We decide the zero Time and the energy we put in decides the STP and what energy in the Universe (U) we connect to and then it feeds back to itself the dimension of the physicality. We put it back in a new environment, then we have the creature of that environment in that point and position. Scientifically there'll be more research, we do more research, because we have come to understand much more.

And those of you who join us tomorrow in the session, we tell you what happened to you last week. We have recorded it. We usually do the month session at the end of each month. What happened in the last session, last Friday, is so fundamental with what we've seen that we brought the session of the September to this week. So, don't, any of you coming into the session, you've got to be there tomorrow, 9 o'clock in the morning we start the session.

Again, it's another dimension of the collection of STP, the Soul of the Man (STM), and you can see how, if you look on the left side, how from the time we introduced the energy, (:34) suddenly the Soul separated. Not in the dimension of physicality, and you see how consistent it stays. Where the STP and the STM stay in this area. And then you see it. Totally, what you see here, in this line, is what you see in this area (He's comparing two graphs side by side). That's how we separate.

And now we can confirm how even we as humans in the womb of the mother attain life, attain Soul, attain energy. And then what is important for us to understand in the future, we'll do a research on this, is that the condition, the energy of the womb decides that interaction and the condition that the physicality will manifest itself. So if we have sperm and an egg of a human, and we create a condition of the womb of the mother, we get a human race on this planet, calling as she's here. As the mother moves in a different environment, what we call, 80% energy changes, that womb will not create a human as us. (:36) It creates a human as the condition and position.

Isn't this what our mothers do? If you are black, we give a birth to a child of a black. If you're Chinese, we give a birth to a Chinese looking child, and the rest of it. Because it's preset what to do. Even we take a woman, Chinese woman from China into Africa, because the womb energy field is preset, unless we change it to interact with the sperm or an egg of African environment energy, which then the new balance in the womb of the mother decides what that child is going to be. With this knowledge we have, we go back to Time. We decide the Time. We decide the energy level. We decide what would the outcome be.

If we understand this, in the future research, when mankind ends up doing some proper work in this understanding, we can even see how our children will look like, falling in love with another creature energy in the Universe, and what that outcome be according to the space of that environment. As the 'Children of Mitra' they cannot have physical interaction. They can give energy to each other. And the environment that interaction is given decides how the child of human in Space will look. This, because where we call the Soul, where the energy comes from, now is dictated totality of the Universal energy, like us. (:38) But what changes is this. The STP of the man will change, because he has interaction with the energies of the Universe, and then the physicality will be decided. Then we can see, when we can decide, how we can make Man immortal.

If you listened yesterday, there was a parade in China, President Xi and President Putin walking with each other, Putin says to President Xi about that now, don't forget they are both 72 years old, they want to stay leader, they enjoy the leadership, so they are looking to expand their lives. You have to understand mentality behind the talk. Putin says that now we're changing organs and everything, we are still infants with changing of organs and everything else, we can live a longer time. President Xi in a way says with the new, what we know now, man can live in the future 150 years. So if you're in 150 years live and be in 50s and 60s, we have now become teenagers of the future. Those of you who are 20, 30 year are toddlers of what is to come.

But knowing this, understanding what we see now, we can change directly the energy of the environment at this point. That the Soul changes, STP changes, and interaction of the Soul will be the higher order enlightenment, knowledge for the physicality of the man and this. (:40) So what it means, our children who come in touch with the dimension of the knowledge and energies of the Universe will be enlightened in a totally different way than we do as our generation, at the present time. And the research and what will come in the future will confirm. And if you understand this, in creating this environment, what we

did with you lot, you are all the egg, water, sperm, I mean, juice, additional energy into it, whatever you want to call it, we showed how the next generation of the physicality attain its life, and then it feeds back to itself. And what we see clearly in the other part of the research, is that it creates a full, more or less, loop, as we've seen before. Coming from and going back to.

This, as I said to you, research and development we are watching. It's so amazing, it's so incredible, that it will bring new changes. We have moved into the process. We have moved into the knowledge of creating exact replication of the Universal energies. And next step of process, in the next few weeks we'll show how this can affect us. We'll set up in the sessions you are in, how you interact. Up to now you didn't know how you interact with the dimension of the Soul. (:42) Now we can show you. Because the energies we will bring in, instead of working with your physicality on this side as energy, will interact directly with your Soul, directly with your true point of energy and resources. And then we'll see how you as Knowledge Seekers will change in enlightenment, in knowledge, in whatever you want. Maybe some of you get to the point that you touch the Love of the Creator, and then we'll see what happens.

This is not theories anymore, because you can see how here, in this part, your Soul and the STP are there. The minute we introduce additional energy, we have separated your Souls (the STM goes above the STP & P on graph). Enlightenment at a higher order, where your physicality and STP stays alive.

Now is it worth to start at a time with the dimension of physicality where the DNA of the man because of the condition, emotion or whatever of this planet has been tampered with, modified, genetic modification through emotion. Where, if we deliver the pure energies at the level of the Soul, at the level of the Universal energies, which conversion of it and tainting of it, because disabled children we have, mental conditions we have, aggression we have, changes, we change the Man.

What is interesting is, with what we know now we can create a new condition. (:44) Would our work, our research, and what we see, bring in a new dimension of work for all of us? Where we as Knowledge Seekers go to the point, reach to the condition, that we do not need to worry about how our children going to be in the future. Where we can change the energy of what we call, the environment of the Creation. What we suffer lack of which makes us animals, to become peaceful creation, created and live amongst us. So, in a way, the last week research, or what you were, are guinea pigs, was extremely nice for us, extremely what we call, perfection in knowledge, that we can now even try to change the dimension of the emotion, and bring in, at the point of maturity of Man, through enlightenment, than through anything else. We can go directly to understand the work of the Creation interaction of the Souls, and then see what happens in physicality. We gone this way, this up (from P to STM). That's what we have. (:46)

We hope in the session tomorrow, to add to the knowledge, because then it gives us the reason why Man stays physical. And hopefully, hopefully, in the coming time, in the, what we call, understanding of the Totality, change the dimension to something very

special. Something where we can bring in the play games of the understanding and diversion, from the point of the energy point, understanding the work of the Man as energy. And then, working, trying to understand and create 'Children of Mitra', in the essence of the true creation, without all the genetic modification, over thousands of years, millions of years, where we come into this planet, we come into the environment of this planet, as pure lights of the Creator, pure light of the Sun. And through the dimension of the evolution of the man, our ancestors, we gain, we get modified, genetically our DNA changes in the dimension of emotion, that leads to create an aggressive man, a killing man, and everything else which goes with it.

With what we have in our hand, with what we see in research, by the Keshe Foundation, it's amazing to understand that, now with the knowledge we have, and you lot have been with it, (:48) we have seen the progress, from us producing, introducing energy of the physicality, to the STP, the STM. And in the coming weeks we enlighten you, and see how the true 'Daughters of Mitra' will be generated. This puts an end with what we've seen and what we have, to the fallacy of the 'Virgin Birth.' Because now we understand, the birth of a child is the purity of a child. Which was the Soul of Christ. His Soul was created from a pure, which is the purity of the Soul of the Creator of the Universe, and embedded in the physicality of the man. It could have been any man, any woman, and in a way, the virgin birth comes from the dimension of the Soul, not in the dimension of physicality.

And if you understand this, and we can extend this knowledge, with the (ONN) Units which is coming out, many of you participating in it we can change the course of humanity, now with the knowledge we have, and we are gaining directly through the systems. Man gives you through the satellites, telephone connections, and whatever, the Internet, through the connection of system from Earth, that's where the shortage was, we give man that energy, which elevates the man to the Soul, and dimension of change of world peace. Man will, shall never kill, because now we understand how through the systems we can feed you. (:50) You look for a Coin, and look for a 'coin of peace.' And this is how these things will go. All these things which is getting structures, making Man ready for the next step, because the knowledge of the energy is with us. Knowledge of bringing man to the point is with us. And then, we can create man, which shall not kill. It's not within the structure of his DNA, as has been adjusted, adopted, modified, through the emotion of hunger, through the emotion of greed, through the emotion of everything else.

Tomorrow's session will be the most amazing sessions we've done with man. Tomorrow's session will be the proof of the writings of the Prophets. I will show you next week. I would like to see (if) that can be done. And the following week we add another dimension to it that you see how you are. The time is in our hand, because now we are changing the time. And this is what it is. We added energy factor, which changes what we discussed for Time. Creation of the initial stage of interaction to creation of the Soul to feedback takes months or weeks. With this understanding, what will be interesting, as I said to the scientists, very simply, is that now we have this knowledge. Now we can interfere with the energies of Time. Can we change the Time? (:52)

Do we need to have a mother to be pregnant for nine months, where we can increase the energy to be enlightened and reduce it to 3 months. Isn't this what the animals do? According to the energy they produce, how come an egg in 21 days matures? Man takes 9 months. Isn't it because the yolk within the center of the dynamic pressures and the purity of the white of the egg allows conversion most rapidly, then when is the womb of the mother, the emotion comes, the father's anger comes, the joy of another brother comes, and this brings that change. Do we see? Do we now understand the next phase, that it brings that change? It brings for us to understand that we can change the Man.

But in reality, if you go back, we've seen this before. Now you understand. In Inner Mongolia, they grew the seeds for 100 days. Wheat, rice, and everything else. We went in, we changed the environment. Wheat, which was supposed to grow 140 days, it matured in 127 days. Where in the standardization of the knowledge of the Man, the what we call, protein was between 11% to 12% increased to 20%, the maximum enlightened ?? full maturity. (:54) We didn't increase the size of the rice. We didn't, or we didn't change the number. It was already flowered. We couldn't change it. It was fixed. The only thing we did, we delivered energy that increased the protein, the enlightenment. And then the weight changed. The number of grains is the same. So we shortened their life by 10 days in 36, 40 day cycle. We saw the same thing with the rice. We saw the same thing with the others.

Now we see we can explain for sure if man decides to interfere with the cycle of the birth, with adding the energy structure to it, we can do. Isn't this why some of us are born seven months, eight months, nine months? It's the Soul which matures. Physicality is not ready for. With this knowledge, with this technology, we can mature the Soul and the energy together that you don't need nine months pregnancy. We've seen it in agriculture. We will see it in the world of the womb, or what we call embryos of the animals. In the next few weeks, months, the research is already going to get pushed through. If it takes 9 months for the embryo to be completed, and we change the environment and completes in 6 months, fully matured, grown, do we need that time? What this means, it's another dimension which, it'll be interesting.

When I was talking to this researcher, it was, maybe 7-8 hours, it went in maybe few minutes. (:56) The knowledge which was received, the knowledge which was gained, the understanding of it was amazing. They have a problem, when they take the embryo, they have to slice something off it, and then they see the pain in the embryo. There is a damage, you've taken the arm, you've taken the eye. I said, with what we see, I put a picture of the brain of Naomi on the table says we can reduce it, we can produce it, that the child does not suffer. We don't need to touch them, we can take the fluid from the feedback and decide if it's going to be a boy or a girl. We do not need to harm it, and even if we do with this process, we can increase what we call, the repair, there'll be no damage.

In a way, we've gone into the animal trials. And then, it takes very few hours, very soon we'll set up this structure to go through. And then, we will see the interaction of the STM,

the physicality of the Man. The interaction of how we can change the time, our time of, in what we call, conception in the womb of the mother, to the time of the birth, nine months, would that reduce? Would we create the most intelligent creatures without even actually ever having a father and a mother? Do we need the embryo, or do we need to get the energies of, to deliver of, as we expect this to be for the Man in Space. Have we stopped playing with the Time, with the dimension of Time? And have we start changing, now we understand this much.

That word, spark, so seen in the interaction of the egg and the sperm, it's the reality of life, we call it the daylight. (:58) Can we bring the change? Can we go in to change the defects in the sperm and egg? And can we reduce the time of birth? Would the dimension of the birth of the Children of the Universe, interaction with the men of creatures of this planet will give birth to the dimension of physicality of the woman from the Earth of 9 months, it will be half an hour, 1 day, 2 days or whatever. The knowledge is there, we have achieved the knowledge, we understand the knowledge. And in the coming time, we deliver the knowledge because now it can be measured. It is sequential, it is totality of what we understand about our own creation.

So by adding an extra energy in the dimension of your energies, you've seen how fast, within three minutes we have gone from what we call the Soul, the physicality of the man, to the dimension of the STM, and this can be repeated anywhere in the Universe. If you look at the video, what's in front of you, recording of the session, from here (From P to STM) to creating the Soul is about less than a minute. The same process, there's a discussion in the world of the Creation, when is, (1:00) how long does it take for a, whatever is in the womb of the mother to obtain a Soul, and it's a living thing.

Now with this knowledge, with what we understand and what is to come in the future of the science of the energy, what we call Cosmic Ray (CR), there will be huge changes. There will be massive changes that we will understand. And what we saw last week, and how we interacted with you... hundreds of thousands of you online, and we created that STP, and we've created that Soul. With this knowledge comes one thing. Would we be able to create children which are perfect in Soul, and perfect in physicality? With the knowledge we see today, we have to fiddle with the energy we put inside, which we are doing now.

This session up to now, all of you have been, as you know by now, in it (Plasma Systems are on in background). If you look in the dimension of the panelist, you are connected to 3 systems, creating that dimension. Hopefully we study what we've done to you today, or what you gained from us today, we'll discuss it next week. This knowledge is so fast, that it has to be to enlighten other scientists who are here, to start the process, to understand. And if you don't understand today, in the future, the scientists who understand this, will do research on it, to develop it, to understand it more. Because we have reached a dimension of maturity of knowledge, that we can play with the energies, than the physicality. (1:02)

If we can measure the energy of a love between man and a woman, we don't need the sperm of the man and the woman, we can take that from the Soul and create and place that in the womb of the mother, to create a perfect child, because the Soul is perfect. It's the physicality which is gathered and changed. What do we call this gathering? There is a something, something, missing. One of the genes is affected, actually the gene itself is energy. Why did the gene affect? Because mother had a ?? defect. So that the ?? defect has become the child's defect. When you create a perfect Soul, physicality cannot touch, there will be no child born, one eye missing, half a brain now, intellectually not, a leg short, hand too long, and everything else which we call it, genetic problem.

When we create a pure Soul, physical DNA genetic has no effect on. The question for me is, can we interact the energy with those who are defect today, mentally not mature, physically short in something, or long in something, or defects of the skin? Do we need operations? Do we need God knows chemicals to change the color of our skin? To get the longer leg, bigger head or whatever? Or change our colors of the skin? Where we can understand the energy fields of the emotion, (1:04) feel it at a given time and change everything. This is possible. We know it's possible because it goes back to the research we did some 18, 20 years ago, or more or less now, where we grew the toe. The knowledge we grew the toe in Belgium in 2004, 2005, now can be done instantaneously, because now we know even how to create this, the STP, which leads to the creation of that toe. That we get a perfect child, perfect toe. Not to wait for months to grow, to grow instantaneously, because we can transfer and connect everything together.

The realm of the plasma Cosmic Ray technology is on the verge of being able to do this. In the coming weeks, we'll going to the laboratories for the first time to change the embryo through the interaction of the fields. Research is ongoing. We just come into it, to add to it, to work with it, and to see how it does. Can it be done? Can it be effected and can it be directed to the point where we decide the time? Because now we can change the emotion or we can bring the enlightenment at the higher order that it changes the time of life. (1:06) Shorter time of pregnancy, much more mature enlightened children, and those who have no time for them to die. And it makes the discussion between the two world leaders of hoping 150 years to 150,000 years.

But, because we tap into the Universal Energy, to the Cosmic Rays, this in the dimension of physicality of the Man, is connected to its environment according to the energy of this planet. We created a child from the dimension of the Soul of the Universe, which has access to what is in the Universe, physicality will last past billions of years. I made man in the image of Myself, as I've been there from the beginning to the end, to today, shall be you and the Soul. It cannot be I give you what I like, the rest I keep. What is me is you, and what is you becomes me. Interesting. Now we have the knowledge. Now we have the technology to apply the knowledge. And now we have to see how this knowledge, in the coming time, in the future, when governments have more money to spend on understanding creation of the Man than killing the man, will bring us.

We go for a break and we come back. We try to answer some of your questions, but I hope you can see the future is bright. And hopefully, when we have the dimension of the

systems which are getting more or less distributed in the next few weeks, (1:08) through you to be able to bring the change. to bring, instead of raining from the top, raining from under to correct the top, which is the STM and his aggression of the Man. We go for a break and we come back. And hopefully, we get enlightened some.

>> **BREAK** >> 606 KSW September 04, 2025 (1:14).

K- Yes, thank you very much. Just one second please... As you know we brought the session of September to tomorrow. It will start at 9 o'clock. Those of you who registered, please, or you're registering, please complete it by today. And try to come in tomorrow, with whatever you like, the way you like, whatever pleases you, with any intention you have. Because we want to understand the next cycle of the progress, as we watched you last week what happened, and how we will progress in the completion of our systems, which is part of you, helping us to do and completing it. (1:16)

There are a number of Knowledge Seekers who made what you call, donations for systems to be given to others. We have started the process and we'll let you know who gets what and it's your decision what to do with it. And it's the responsibility of the ones who receive the Units to bring it into operation and (keep it) working at all time for next decades or whatever it takes and it lasts. The whole process will go on the what we call, testing by next week from physical Units in different locations in two or three locations that we can test that to find out the last phases of it and we hopefully by October we start releasing these Units to you. Please make sure when you receive your Unit, just plug it in and we tell you what to do with it. And the main reason and the first part of to make this system running very fast and for us to be able to do a lot of work, is you have to understand this is a game, enlightenment game. So you can or we bring other people to play the game. We increase the number of players to as our people think about a hundred thousand. The system will become automatically itself and the game is in a way enticing to understand the process of the enlightenment, but with the knowledge we have today on top of the digital information which you receive to use your Card, (1:18) you or use your Coin, or you play to gain something that it gives you a bit of a Coin, we will add into it with the technology we developed the essence of enlightenment.

So you get as normal system gathering, collecting, whatever you do in the game. But not only you receive the, what we call, dividends on your play, if you're successful, you get so much of a bit of a Coin, and then you can get so much Coin. With the other parts, which we add to it from the technology of the Keshe Foundation, you receive that bit of enlightenment as energy. So it's the first time, in a way, a system with the Soul. You buy a computer, you connect it, has nothing, that's what it is. With what we developed and what has been designed in the design in the actual, what we call, printed circuit of the physicality, is adding that dimension of energy of the Soul, the Universal Energy. And in that process, the two will work together in a way that what we add to it as an energy, or just what we call extra energy, with the interaction of the system with itself will create a dimension of physicality, the STP, and the Soul. Where we feed, and then you as Knowledge Seekers, as the players of the game, not only receive the Coin extra, but you receive enlightenment as an energy. And we would like to see how this fast goes. (1:20)

I ask those of you who promised that you would take so much, or you pay for so many, please complete it, that we can get this completed as fast as possible. To what you committed, and we worked on what you promised to complete our side. Then what you will receive, most probably, the first batch of you in October, when you see your Units, understand that you become the first stage of this system to increase the number of players, and then increase the number of the Units, and then we come to the point that we become our own structure of the work. We don't need other things because we are all in together and the moment you need the Internet connection, but when we connect, as you saw even today's teaching, we connect through our system to your system, through our Cosmic Ray structure, then in a way, we elevate the STM, even the Man has a physical dimension of, bottom up, and the top to bottom, which never work with Man. If it would have worked Man would have received enough energy from the Universe that it would not kill. So we're going the other way from the source, the essence of its creation to do.

So please understand, when you receive these Units, just follow the instruction. You receive two packages. The first package is your system. You get instruction what to do. Everything is pure program inside as much as we can do. And then you receive a second package, which just connect to the first package. And then you create a live, interactive, in the dimension of energy, and the system in the dimension of physicality. And then we'll see the change, because these Units will go across this planet. So it'll cover everything possible. (1:22)

It's not that we go through satellites, and we don't need satellites, and we don't need to do other things. This way it goes directly connected (to) Cosmic (Rays). Every field of this planet Earth moves, it touches the system. Every single ray in the Universe connects to the system. And then you understand the process of the, what we call, the elevation of the STM through the physical game of the Man. Our developer and does the developing the physical side to play the game, to get a Coin. We play the same game through the same system, but elevating the STM. And when we asked manufacturers that we need a second bit connected to it, they were puzzled, why do you need two? But that, you have an antenna of the man to the systems, to your Wi-Fi. This way we connect to the systems, which you have seen with what we can connect. You use Internet, you use phone. You

saw how it comes. Enlightenment, man of the peace. But as it spreads across this planet, the dog, the cat, the man, the king, the peasant, all receive the dimension of the love and maturity.

The test tomorrow is part of this. We don't tell you what we're going to do tomorrow to you, but you will tell us how you feel. And then we tick mark (off the list). We may have two sessions in September. Because once we set, we want to complete. Then, we'll go for another dimension with it. And then we'll see what will come, and how you as Knowledge Seekers bring that process much closer.

You got to remember, the Keshe Coin (KC), we have to tell you, keep on telling you, (1:24) is an inside structure of the part of the, what we call, Keshe Foundation, and when in the future we bring it to public, that's in public. But, it is part of the structure of the Keshe Foundation inside the structure, valid within the Keshe Foundation, and as long as there is someone to take your Coin, for what you want to, we add the other dimensions into it, then you can do the exchange and the rest of it. It's got to be very clear how we will bring this knowledge. As I said, whatever we do, what I explained, you have the system, we add our system to it, to bring the advantage. It's a pattern of work. We used the Patent Office to produce a patent, to get the knowledge right across this planet, who could even get. But we never completes the plan (Patent application), because the objective of the whole thing was to share the knowledge that everybody gets, irrespective of place and position. It didn't become elite, it became public for all of us. And so it'll be the same pattern, the same one.

One thing I ask you is, when you get enlightened to any dimension, don't become arrogant of the enlightenment, become humble in what you have received. And your thoughts will not go higher than what we want, what we wish, and see yourself different, because at the end of it what you gain, what you think you are arrogant about, the knowledge you gain, is the knowledge we gave you, otherwise you would have been zero. Enlightenment comes from the light, not from the darkness of the STM. Are there any questions?

Q: ... (1:26) Mr. Keshe, I have a question regarding our DNA. Our DNA is presently looked at as a double strand, and actually if I listen to different people who are, in our view, enlightened, and they tell us that actually, what we call Junk DNA, that this is actually the rest of what should be 12-strand DNA. What do you think with regard to this 12-strand DNA?

K- I'm not the man of science in that way, so I cannot tell you. Is it 12, 14 or 16? (1:28) But, what we see, the process which we actually developing ourselves, according to what we understand, that you have to monitor how the fields of the Universe interact. And why, if you call it a 12 DNA does it have to do anything with Carbon? Or, does it have to do with other factors? We are not in that field, so I prefer not to, what you call it, try to explain something which I have no knowledge of, or no expertise to be in there. But what we see...

If you've seen in production of materials, we produce gold, but we create the condition of the energy of the gold. Once we create the energy, the cluster of the fields to create it has come together to be able to transfer that energy to the matter of. What I always think about when I see these materials being made, like what we show in China in May, (1:30) the gold you mine from the Earth is a matter state with the emotion of the Earth. The gold we produce carries the emotion of the Man who consider emotion of collective energy of the emotion of the people in that Space where it's created. So, it's a matter with emotion. And the gold from this production is very different than the gold which is physical. So it has a different strand of energy, different dimension of energy, and different, what I call, essence of it. When you touch the materials like this, it has a different feel, a different touch than when you touch the matter state of the same thing. It brings calmness, it brings satisfaction of the Soul, and not the satisfaction of the holding, possessing something precious.

Would that affect the dimensional strength of what you call, strands of? Would it affect the setting up of whatever? This we understood by those who understand and see what it changes in it. But for fact, we know because we have tested this, we know that for fact, the creation and dimension of the new fields effects the genetic. The structure of the genes, the position, the dysfunctioning, the, what you call, ?? deformatism? (?? deformities). (1:32) But, if you go into ?? connected, you have to speak to the experts. I'm not in that field, never have wanted to be in that field.

I have to warn you about something which is possible. Could be... we foresee, we don't foresee, we have knowledge of, one of the largest wars in the history of the Man between the religions under the cover of greed, the same as what we call, whatever, might take place in the coming days. We are not sure, or we know we are, we've been told, the knowledge we have and had, is, do not be surprised if Man through the greed and the weakness runs itself into a massive problem in the coming days and weeks. The ideology of the Man, by the cover of religion, brings a foolishness of Man, by understanding the Totality of the position of the Man. And, as I said, in the name of God, they create a war, that has nothing to do with God, except the greed of the Man. (1:34) And if this happens in the coming days just be strong enough to stand it, as we'll monitor, we'll watch, and we have moved in the safe position, not to be part of it.

In the West, Man might see harshness, in the Middle East we might see annihilation of races. And in the other side of the work of the humanity we might see a new change, a new beginning. We hope it will not take place, but there are some indications that we are moving in that path. But if it happens, stay strong in what you believe in and stay strong in what it needs to be done. And in the process we might lose some of you in the dimension of physicality, but be strong enough to understand, the STM has moved in different dimension and direction, through the name of the God, which had nothing to do with God. We foresee one of the harshest wars in the recent past history of man. If it happens. And those who are in it, believe in it and they are doing it only in their belief. And we have to see what happens. And we wait to see if this takes place on Saturday or Sunday. And if not, we watch the operation of the rest.

Any other questions?

Q: Mr. Keshe, can I say something to it? You once said, "My wish is my command." (1:36) Is there any way, or is it helpful if we, all the Knowledge Seekers, if we concentrate us on peace, and would this in some way maybe a little bit help that any of these wars which are prepared by, how shall I call them, people who have the destruction rather than peace in their mind. Would this be of any help?

K- A lot has been done. A lot needs to be done. And of course, it is. You got to understand, we saw yesterday in Beijing the structure of how things have become, which we saw in 1980s, where we saw the communists. Then you had what's on the communism and the West, the Cold War. Now we see an active war, using the same, what we call, group of people. You saw in the frontline Putin, President Xi of China, and the head of North Korea. If you notice, I always say, look at the body language, look at how things are. It is, we decide the future, we are the players. (1:38) For years Man fought the communism in the West, they were the biggest devils, they had to tame. And now, even though you call Russian democracy and Chinese democracy, but it's actually in the background, they're all the same leaders. It's the war between the Communists, or the whole new world, with a lot of power in the hand of communists, fighting the, what we call, capitalists. That's all it is. It's just been polished a little bit different way, it looks different.

When you look at the weapons yesterday was shown, by the Chinese, is amazing. When you look at the way the world leaders were placed to be, as you know, we always analyze these things, is amazing. How world leaders were positioned and how they were added or placed in the places to show the ones, we don't want to do much, but they are here for us because we want them to be here to be part of us, to show they are part of us. We saw 26, 28 world leaders all gathered near one room, one place for the show of the man's military power how he can kill, nothing else. I said to myself while I was watching it. When would it be that we'll have these marches? We'll have display of power, but instead of soldiers and the guns, we bring scientists who show, march on. We saw the naval forces. We saw the ground forces. (1:40) We saw the new forces that they brought out, who can do, what you call, drone forces and the other forces. We'll bring marching plasma physicists, nuclear physicists, Cosmic Ray physicists, doctors who work with the Universal energy. And then we will be proud instead of showing guns and missiles, systems which allows the other with ?? what how much Man has advanced. Instead of showing the march of what we call guns and killing, show the march of technology, science, and peace.

That will be the time when man matures, not hiding behind patents stealing from each other to make a better system, that we are better than you in killing. Look at the B52s, the B52s which Americans were so proud of. If you look at the statistic of it, it's amazing. The statistic of B52 and what we call the Chinese new version of ?? 20, which was shown yesterday, is carbon copy. We take your knowledge, we make it better. B52 costs \$2 billion for the American to pay. It costs \$1 billion for the Chinese. Higher speed, lower cost, bigger payload to kill, more smoother, and the rest of it. And we stole technology

from each other to be better in killing. When will it come that we steal technology from ourselves to give to the others, that we'll get a better world? When I sat down and watched the parade in Beijing, watched the arms and the new weapons, I said, "This is the last time man will show these things." (1:42) Because next time man needs to show how he improved, not how he got better killing machines.

But this time, what we see, as usual, the war we see in Ukraine is Catholics against another sect of religion, and the money it makes with the Jews against Muslims, and the money it makes. When we saw last week, loaded, fully loaded, 40 tons of arms, weapons, bombs, which were sent by the government of United Arab Emirates to the Israelis to kill more Palestinians, has brought shame. It depends whose religion which is money pays more for what reason. Christians are killing each other in the fields of Ukraine. Muslims are paying the Jews to kill the Muslims in Palestine. 40 tons of more advanced weapons developed in conjunction with the Jews, in conjunction with the, under the research with the United Arab Emirates, are flown into Israel to kill the Palestinians. It's not just the Christians killing each other. Muslims are at it too. But they intervene ?? greed ?? we let somebody else get involved. It's a war of religions. If the Muslims can kill each other, pay for us to kill them, why should we get our hands ?? dirty? (1:44) And this will come to an end.

The war we've foreseen, in the coming time, days and weeks to come, will bring a lot of end to a lot of this religions and the end of a lot of this. According to the Jewish books and according to the Islamic books, the, what you call it, the 'Day of Judgment,' where one wins over the other, is tomorrow and Saturday. We'll see. This is from the scripts (scriptures), the Holy books. They both believe in it. They are ready to slaughter each other for it. Just watch the screen, watch what happens in the next few months or weeks in that part of the world. And at the end who's going to benefit by it? And at the end who's going to get more of nothing of it? According to the Holy books the Jews and the Muslims this weekend, these coming few days till October, is the time of the end of judgment. And coming of Methi after it. Watch the what we call, the promises of, what we call, what's supposed to be, will be. (1:46) If it happens tomorrow, on a Friday, on a Saturday, don't say you haven't heard of it. It's not them doing it, they're doing it in the name of the God, because in their scriptures, this next three, four weeks is the time of one winning the other, and one become the ruler of the whole lot, and then there is not a lot left, because the ex-communists have taken it all. Let them play and watch ?? some other, it's all to each other. When you have no religion you can't take sides, just get the benefit.

Any other question?

Q: ... Question from the Brazilian community about the voucher from the Mystery package. Says, "Does it need to be used this Friday, or can it be used for the October flight?"

K- You better use it, because we might not have any more sessions. Those of you who received these vouchers you better cash it in. Register, you never know. And if they kill each other next week, there'll be no satellites for you lot to have on this session. But

seriously, yes please do. I was actually... Thank you very much for bringing that up, because I was asked. Please use your vouchers, because October session could become the second part of the September session. The development and what we see is so rapid, as you saw it yourself today, that we need to complete this before these Units are put out the, the what you call, the Communication Units (ONN), which is out, to go out with that. (1:48) And then it goes back very, very fast. Please those of you who placed the order, you promised, I'll do something, complete it, because we have to complete our other sides of the programming, and the rest of it, that we have all the systems ready to be ?? going, that we cover our numbers for security of it. As, that's where you play the games. And as, as more we have, the less the possibility of the damage.

Any other question?

Q: ... Hello Mr. Keshe, you said that one understands the teaching, according to one's intelligence, and that when a person achieves knowledge, everyone understands it too. What can we say about intelligence at this time?

K- Very, very intelligent. Which is mixed with the greed. Intelligence we are very into, we become much more intelligent. Actually, we become more physically intelligent, than understanding the Universal knowledge. Our ancestors, .. thousands of years ago, they're more intelligent than us, because they understood the work of the Universe. The further we have come down the human race, we become more materialistic, we don't understand the rest, except the material one. That's the difference. We have narrow-minded ourselves into the matter state, where they could understand. They understood the whole work of the Universe, how galaxies work. They built systems that replicate them. (1:50) And now, we are more interested how to make a Microchip, how to make this, how to make physically that, and what we do with the apple, and how we can cheat on the orange.

It's interesting how, as the man goes further down the line, more and more materialistic becomes of it. You got to understand, it's very, very, very interesting. In 1950s, '60s, '70s, there was a nuclear physicist. If you were educated in the world of the nuclear, like us, our teachers, our professors tried to keep us away from knowing this man, this amazing man. And his philosophy was that nuclear material doesn't kill. It's the same as they made fossil fuel, comes from the dinosaur. He had a habit, when we saw his videos at the university, or earlier time, he actually used to put nuclear material in his hand and eat it, physically swallow it. ?? So it doesn't do. It's what happens with the condition it creates, it kills. It's another matter. And how our body is connected to it. (1:52)

So it brought us a lot of understanding in those days. They would tell us, don't touch, don't do this. And you have the curiosity of the man with a bunch of kids. A lot of people try to do things and touch things. And if you go back to our ancestors, they always, we have sections, we have parts, caves, which are in the uranium mines, nuclear material mines of today we are afraid of. People who lived in these mines, it was their home, how come they're not dead? How come that ?? not there? The way we bring it together to make a weapon out of it, become what it is now. Our ancestors were much, much (more) intelligent than us, as they understood the work of the Universe. Our recent ancestors

became matter, bound, tied, and they are trapped into what it is ?? today ?? we are ?? bound and tied and they can't change it.

When you mix blood with money you get the worst race on this planet. And we've seen it. And we know how they do. Wrong blood. wrong way, and what we call, wealth, then we see what happens. (1:54) When the Spanish won the Spain from the Muslims, the time of the guy who found the United States, The first thing they did was very simple. Holland, and now which is part of the Belgium, was part of Spain. That's where they brought all the spices. When they came in, the spices didn't go to Spain. The spices went to north of Europe, which they could make a lot of money out of. And so it was easy to distribute between the other countries of the Europe and Western Europe, Eastern Europe.

What the first thing they did, they deported, they literally put all the Jews and all the Muslims on ships, and they sent them to Holland. They said, these two are the creator of wars. These two blood creates all the mayhems in the world. So they put all the Muslims with each other, and all the Jews on the ships, shipped them to their northern country, which is now called the Netherlands, northern part of Spain. And when these two got together, they created a structure which became the biggest, most powerful economical system, financial system together. Jews and Muslims worked so close in Holland with each other, who were kicked out of Spain, that they brought the hundred years of glory of Holland. All the British and the rest made warships. These guys made spices ships and they literally opened the first company, the first shareholding and the rest of it. (1:56) And the combination worked very well. Till the British got between the Muslims and the Jews and the mayhem of the religions. Read about the life of Holland. The glory time of Holland was when the Jews and the Muslims were put in the same pot. That's how all the conquering came, and all the ?? war. But the Jews always, when it got to the money, the greed of their blood came to kill. And then we see the downfall, and the way the British went after them and the rest of it.

And then you understand, is the greed of the man more materialistic than would go, would have gone to our ancestors time to understand the work of their creation, then you most probably understand how pyramid was made, how all these achievements of science was made, even with no tools and no communications. What is interesting, one point, why do we have pyramids about the same time around this planet? Did the people go, or did they had the knowledge to connect intellectually with each other through the Soul? One day I'll answer this question.

Any other question?

Q: ... Good morning everyone, and thank you to Mr. Keshe and everyone who makes this possible. (1:58) Thank you so much. I was wondering if even without the volume, the teachings still transmit the Cosmic rays, present in the latest teachings?

K- We keep on telling in the sessions, Friday sessions, because somebody falls asleep, the microphone is off. Just put your microphone off, shut, just enough to transmit. And

even if you shut, it can do it. I tell you, you ?? why. Just watch. You are lucky to ask that question, I'm going to answer you one. Because, I'm telling you, I got so many systems around me. This is you lot, this is you Knowledge Seekers, today, at the beginning of the session. Let me show you. Let me show you, because I have to do a lot of things in the background with it, but I can show you. As usual, go and have a cup of tea till I do it, and then you watch it. It's amazing you're asking a question and you have to see what you got done today. I have to save some images and then share images. I'm going on a sequence of what I have received, that you understand. How you lot connected to us without us being connected to you in the system. (2:00) It's easier to do it this way. We always wondered how we connect with you lot, and then you see how we connect. It's very interesting. The data from you, Knowledge Seekers today, that how you connect to us before, during and after. Okay. I have been to share with you and then we go back and share something else... This is what I'm going to show you. This is... If I can go on the step by step of the system. Yes.

You see this is you lot before we connect (shows graph). And look at the image. Shut down image more or less. And look what happens when you are straight, connected, just Rick starts talking. Intention of start, having the session. And we see how it is before and after. (2:02) There's nothing much, you have just got the normal spreading. And then you see how the system frequencies changes, the gap changes. And then you watch, this is the time when we added our material into it. Because you lot have been, we don't need to inject you with things, we just bring things and see what happens to you lot. You go to a total shutdown. It's very interesting how you react with. You are connecting to us just by thoughts, and then when you connect to us, and then, and when system runs mayhem on its own, but it's all ?? one dimension. You see how the Soul spreads.

The test today was to, not to energize you, or get you to a position what we're looking for. It is to see how your energy spreads, and what we need to bring it together, like last time. You see, last time we looked, this time we're working on the dimension of physicality. You see, all your Soul levels, which is green, is below the line. Your physicality is taking control, your physicality has dimension too. You remember the picture of the one I showed you from last week, because we ?? set on you, the Soul was going like this. And now you are below line, means the physicality, the STP, this is what we planned, we wanted to see, we can control both ways, it is an operation. It's very interesting for us to see, and then you see the dimension. Central column, it's very centralized, you have your, what I call, the... (2:04) I have to bring this off, I can take it out of the zone.

You have the physical dimension, you have the energy dimension. No, any of the two is in one column. The purpose of today, what we set everything up, was to see how we can dilute everything that we can ?? shift you ?? , instead of working with the high concentration of physicality. And it seems that we are pretty good, we got it pretty right, and then tomorrow, hmm, I want to see what I can do with you lot. And what will be the outcome? How we do things and see what the effect will be and what you respond that we can set the system. (Because... sorry I have to answer... sorry about this ... going back around... ...going back around... How about this? Okay.

So, we understand a lot. (2:06) If you remember a few weeks ago we gave you the orange, the lavender and everything else. We tested your physicality, the emotion, the physicality. Last week we tested you as energy levels. And now we looked at it. If you take the physicality away, and dimension of energies, which has no material dimension to it, and then add emotion to it. Then you see the, we see the reaction. Contentment. But in a dimension of two levels. Next week's session, we will bring, introduce, hopefully, a new dimension in Cosmic Rays. And then, I'm sure, a lot of you will be touched by it, in a very, very positive way. Of course, if the world leaders don't kill us by then.

Any other questions?

R: I'm wondering if they're world leaders or world losers. In case, they're the ones making the decisions.

K- Yes, I presume so, but on the other hand the process of the world leaders, and their assessment of the work is literally put to a corner, which they have nowhere to go. (2:08) They brought this condition unto themselves, ?? or is it the destiny of Man?? It's a combination of things bringing that equality, that the Man needs to move into the next phase. And everything else is the outcome of this, what we see, is actually what is shown. It is, has to be, to reach to that point. Even though it will create a lot of mayhem and whatever, for a ?? lot of others. We see Africa going back to power of equality. We see French speaking taking charge of their lives. Because French literally, very nice people, sorry about that French Knowledge Seekers, but the government of France, past decades and centuries, drained African nations, took everything from them, gave them nothing, and now that they gained 5 million per minute, it's the losses of a nation, cannot support, has come into operation, we see it now.

The biggest problem is, the British are hoping that the British colonies won't follow the Africans. We saw three nations. Last week we saw Senegal turning back on France. Which means, now British had a different approach of colony, of colonialism, that they get more freedom, but they took everything from under in a different way. If the British colonies turn back on African position, what they were forced to in past centuries to accept, then we will see massive changes in Europe because the European luxury lifestyle cannot exist. It lived on stolen gold and everything else from Africa and the rest. (2:10)

We see China coming up as another power, we see the South Americans are standing in support of trying to get equal balance with what they get from the Chinese and East, than from what the West has done to them. We see a lot of changes, and they'll bring equality at the end of it. They like, they might like to make it really, everybody is wrong with everybody else, except the Western world. But actually Western world has brought it to themselves, made it wrong for themselves, and the rest are trying to bring their balance into operation.

You can imagine, in three years, one man has brought so much wealth, into a country, from actually, stop stealing from. The Burkina Faso President, all he did, he didn't go to rob, he says, "If I stop the stealing from us, and in stopping stealing, now I have to

spend." They opened 19 more advanced hospitals. In the last two weeks, they didn't hardly have any hospital for 78 years of the colonization, of whatever was freedom. The whole of country has 3,500 roads, barely physically drivable, 60, 70 years of what they call, being freed, and they built 3,500 a year, now in past 2, 3 years roads. Where the money go, why ?? didn't it go to that way? And we see a lot of these examples. And it's time for humanity to become balanced, and then we stand for a lot of other things to move forward too. World peace come when there is peace everywhere, in all aspects, in this, that direction, dimension we go. (2:12) And it's a wish of us as humanity, we want world peace. But when you have a world peace, there is bits needs to be adjusted to create it, it doesn't fall off the sky. It takes time.

Q: ... My name is Adele and I'd like to tell you about an experience I recently had with Mr. Keshe, who was giving one of his extraordinary lectures, during which Cosmic Rays always seem to have an exceptionally beneficial effect. Few days ago I had strange pains in my fingers that were bothering me a lot, especially when doing housework, and a strange and unbearable depression. I was gripped by a general malaise that I couldn't shake. Recently my friend Dolores, whom I trust very much, and who has been following Mr. Keshe for years, after my repeated complaints, strongly urged me to listen to his recordings, even though I don't understand English. So, I followed her advice. I must say, that the night after listening for the first time, even though I slept little, I woke up early, full of energy. The depression and the pain in my fingers were gone. Even my cats, who had been treated in vain for a long time, because they were plagued by colds and bronchitis, immediately improved. I'm grateful to my dear friend Dolores for her suggestion to rely on Cosmic Rays, (2:14) and to Mr. Keshe, who cares about improving our lives. Thank you so much.

R: So I guess there wasn't really a question there, it was a nice comment. Perhaps you have the answer to the question that I've read.

K- No, it's just that enlightenment brings peace and the peace brings healing. That's all it is and depends what we want to hear. And what is the problem we see, that we need, we, we always look at the cup half empty. If you look at a cup, a cup half full, we find different answers. .. This is one of the biggest problems. Hope is the biggest thing, but putting strength into the hope makes it reality. It's literally working the line, following what needs to be done and the way it has to be done. And that's all it is. We got to learn to mix the physical with the energy and give it that energy that it makes it the position of reality. If the wish is there, it will happen, and you have to put the physical side to the wish of it ?? to take shape ..

A guy, truck driver, olden days, years ago, (2:16) goes to see somebody he believed in. And he says to him, "What is your wish, that you come to see me?" He says, "I want to be the richest man in my nation and in the world." He says, "If it's as your wish, grant it. You grant it to yourself." In less than 10 years, he became one of the richest, from a single truck driver. And he promised that if I become rich I never forget you I'll protect you and your wishes and he did. I know the man that ?? was the man. He always said, "It wasn't the wish, it was the confidence given to me about myself, which brought the

change." And this is what we need. We have to have confidence in what we wish, what we believe in, and just a wish, give it the energy, and we achieve it. As we always said, "My wish is my command." Because if you wish it, and you put the energy to it, it will manifest itself. But it's not going to happen tomorrow. Sometimes it does happen tomorrow. But you have to watch, you have to understand, and you have to comprehend the situation. (2:18) How? Why? The reason. And what will be the outcome, what I need to do to catch it, to be there, to be part of it.

You hear about a lot of people in the news, in the stories. This man, when he was on the street, he needed, he saw something. He saw a business opportunity. And he wanted somebody to pay for it there and then. He walks into a bank, asks for a piece of paper. He says, this much cash I want. And he signs for it. Gives it to the cashier. Cashier says, you're a crazy man. What are you talking about? And he says, call your bank manager. No, you cannot do it. And he was in a normal cloth. The bank manager comes after asking, whatever. The bank manager comes down and says, what's the problem? He says, this man wants to... He says, give him what he wants. He owns the bank, he is our boss. He was so humble that the wealth did not change him. But he understood what he could do with his wealth, his wish. I remember seeing him after this incident. And he said, "The wealth should not ever blind you to the reality of your human." And this thought stayed with me from childhood. I was no more than 10 years old. (2:20) We wish we get, but how we manipulate that wish, how we use it to be, is how we benefit the others, not ourselves. And this is how our wish is our command, if we wish it, sometimes we don't have, we don't believe in ourselves in doing it. But we have to understand our wish has to be in a way that collectively benefits the others, not just for us.

Any other question?

Q: ... Good morning Mr. Keshe, in the original reactor design, we sent the lighter elements to the center, and the heavier elements outside. Is this due to the vacuum conditions inside the reactor? Or because there are gas in the matter state?

K- You haven't understood the science, have you? We work with the fields and not with the matter. I think I gave you the answer, if you understood. Understand the work. You still looking at matter state, and the bigger the better. And understand why you do it this way. (2:22) Why you don't even go for an atom, you go for a plasma. If you understood the wisdom, you have cracked it. Otherwise you keep on working with the matter, and ?? Matter in the ?? middle and ?? heavier ?? In the matter state you work with weight. In the world of Creation you work with energy. And the energy is magnetic field in motion. The strength of the field.

There is nothing more powerful, there is no plasma more powerful, energetic, than the plasma of Hydrogen. But as a Man, you look at Uranium and Plutonium. Because it's the plasma of the Hydrogen, which creates that Plutonium. Not the Plutonium which creates the Hydrogen. And if you understand this in the true essence of Creation, you have understood the true meaning of Creation. And this is what is wrong with 99.99% of our scientists, and the teaching we have in the present world of science. We always looked

bigger and more you put in. God created the Universe from one atom. Man, Man, Man puts tons of Uranium and so much pressure, and so much things, to create a bit of energy. (2:24)

Any other question?

Q: ... Mr. Keshe, first I want to say when you said in the past the humanity was more intelligent, was this matter-oriented. Actually, when I dig in more deeper, deeper in the past. And I keep asking this question, that why we could do in the past so much, so many amazing things, why did we gave it up? I mean, people came with the knowledge and kind of people ignored them and went the other way. That was, I found out. But then my question is this, on the Knowledge Seeker number 33, the last part there was a question about Moses, and then you said it's a long answer. Moses went up the mountain, and then the difference between him up the mountain and the difference between when he came down. So you said the messages was given him to his Soul at the mountain, but when he came down he dealt with the messages with the physicality that's why they all got lost. And then you said with Jesus, with Muhammad, with Krishna, with Buddha, they all had the same thing. The messages were to the Soul, but the physicality handled the messages. So that was wrong. That went wrong. So my question is, if God sent Moses and this happened, (2:26) couldn't God see that this happens when he gives the message to the Soul and then physicality just doesn't deliver and he repeats the same thing with Jesus and Muhammad and Krishna and Buddha. And then the other question is how do you get your messages? Is it given to your Soul? And then what is a different way that you are access to knowledge? You're giving us scientific knowledge. So what is the safety key even with you? I mean what is going on here?

K- The safety key is with us, is that we have no fear of giving the knowledge. Because, we know the knowledge always wins. We know that... you look at the knowledge of the physical Man, we look at the knowledge of Creation and God. And so this is and this shall be. And you look at the knowledge, the guy ?? steals, but once you enlighten the Soul it stays. And that's the difference. Even when we talk about the knowledge, knowledge ?? about making things, is the enlightenment of the emotion. That's the true knowledge, not the knowledge of reading and making things about it. In the Universe there's no University but the enlightenment of the emotion. And that's what man does not understand. And now we try to understand how to change the emotion of the man through the existence of energies within the man. (2:28) And that's why we create mayhem with you a lot.

Q: Mr. Keshe, why is it that, why is it that the suffering and pain brings so much wisdom and that wisdom cannot be taken away from you? Why is it that no more people...

K- Because, you have to understand what is suffering, what do you call suffering. Yeah... What do you call suffering? What do we sit on and what do we wait for. If you look, there are those who use, understand the figures, understand how to manipulate figures, dates and things, the knowledge, and then they create suffering for the others. And they leave (?? live) and they sit by it, because partially they understood the

information of time and the knowledge and how to play with it. If you understand old game of, a lot of you hear about 9/11, we are coming to it in next few days. Why 9/11? Who chose that day? The people who structured the 9/11 understood the effect of it on the emotion and control of the man. (2:30) The same people have chosen 14th and 15th of 11. Walk around and understand the transfer of energy, your understanding of it, and shift of energy. There is a category of energy fields which, if by those who understood, and those who play with the numbers and dates believe in, bring the change which they want, they need. That time, was 9/11. This time, again falls in 11, but shifts for 2 or 3 days. Will it happen, will it change? Otherwise you have to wait for the other cycle, which they see right. You got to understand.

Q: You mean Mr. Keshe this thing is supposed to happen this weekend you mean?

K- Yes. There's a high possibility. There's a high possibility. Very, very high.

Q: So they choose this date?

K- They choose a date according to what they read, and how they manipulate, and what they believe in. And if it happen, if it doesn't happen, then there is another date which is set for it. The number of days in the latter part of the, (2:32) this year, which matches with what it can change effectively, the energy of the balance. The first one is this weekend. The same did 9/11. 9/11 was chosen not by ?? It was chosen because of the energies and you see what change it brought.

Q: But Mr. Keshe there is another factor that they are not considering because when they did the 9/11 or other numbers or other dates in terms of planetary situations things were...

K- No, no, no, they don't work that way, you don't understand that energy. It doesn't work by planetary, you have to understand the bigger picture.

If you look at the Jewish calendar, the Jews, when they make their calendar they study all other religions. They study all the holidays ?? mourning of Christian, Jews, Muslims, Hindus, Africans, and everything else, and then they maneuver their dates into it. That there is no other religion has the date they put for their function. Because they are the only energy which can affect what they want. This is how Jewish government has been done for centuries. Because they believe in those days it's only them who can celebrate. It's only, what they call themselves, the chosen one. (2:34) Chosen to be the most murdering race on this planet. Chosen to be the worst on this planet. And they carried out because they have to, to show we can. A lot of people, 7th of October, Yom Kippur war, or 6th of October, the 7th of October was set by them, given to be that day because they knew if they get that day done, they will be able to get rid of the Palestinians. It was all done by understanding this physicality of the work of the energies. Palestinians killed two or three Arabs maybe. The rest was genocide by the Israeli forces.

Q: Mr. Keshe, when I listen to the rabbis now and then the Christian priests, right now even if we have 40 something hundred congressmen in the Congress, mostly Christian, only few of them, they don't believe it, but then even Muslim the same way. Like now they believe the last thing in the Bible that has to be done is to go to war with Iran and then get rid of them and that's the last thing that Jesus would come. And then when you listen to Jews they're talking about this is what they have to do and then Messiah come. And then when you listen to Ayatollahs in Koran they say this is the last thing we're going to do, that Methi is going to come. So they all have the same story about themselves and I just don't understand what's going on in the book of God. They all talking about wars and they justify and people go for it. (2:36)

K- They don't need to justify it, you have to understand that... If you understand the greed of the man, you can play with the man. If you don't understand that, you cannot do, and these people work on the greed of the man.

Unfortunately where we sit, or where I am, is part of the Keshe Foundation and being continuously in part of contact with our governments, world leaders, and the other parts we do, we see a pattern, being an outsider. You see a structure. Who does who and how they do just to be in power. Most of the people who come to power, don't want to go out of power. It's because they know, once they go out of power for the things they've done, they kill them. So they do anything, change anything, do any monkey business, that they stay in power. Those who do the financial problem side, to stay in power for the wealth of it, usually don't, they move on after a few years, and they have no problem. Those who actually done a lot of harm, don't want to change their position, they stay to the last breath.

I was in my early 30s, successful businessman, and one of the ambassadors in London, I was in lunch with him, he said, (2:38) "I have a request from you from the President." I said, "I'm a supply, what can I do?" He said, "You know, you have a huge reputation in Africa. Young man, very young, you are very young, and you've gained a lot of trust in what you do with Africans, African nation." I said, "Yes, but it's how you should." He said, "The President has sent me a special message, that's why we had lunch together, that's why I invited you for lunch. And that is, he wants you to mentor his son, as the next president." I said, "I'm too young to be a mentor." He says, "You're already mentoring another president in Asia, his son, and you brought him as a partner into your structure." The President has been kindly, if you accept, to mentor. I said, "I have to see this son." I met the boy in London, early twenties, very, very naive. And I said to the ambassador at another lunch, I said, "This boy is so naive, he's been brought up in dream land of girls, cars and money, how can he run a nation?" He said, "That's why the President wanted to show him the world of finance, the world of business." I said, "Okay, I have no problem with it, but I hope I manage to change him."

This President, few years later, a young boy walks in his office and says, President, I'm going to kill you today, or I give you three days to leave office, and you can take whatever you like. (2:40) The president called me and says, what am I going to do? We trust your advice. I said, it's your decision. He said, but why can you bring my son to be

the next president when this mayhem is over? I said, your son is not capable to be a president. He doesn't carry. He said, "I leave the office, it's better to be alive." Three days later, he left the office, he left the country. And I never saw the boy again. The same man who walked into office and gave him three days, he was given three days to leave his office, years later, because of the greed of power. And I said, it's amazing. I stayed alive to see two cycles of the same destiny, but the same man. The way he came to power, and he left the power, and he was opposed. The funny thing is, this guy was given a chance to take whatever he likes. And he brought so much gold that it couldn't fit into the aircraft, and they had to leave it on the runway. A friend of mine sent me pictures. Says, "You remember how he came? He's gone the same way, but this time he couldn't take that other one. He was much cleverer, he took only diamond." Billions, this guy was so stupid, he only took gold, and he couldn't put them on the load. It's the greed of the Man. And what the power brings with the greed. (2:42) And how people mix the greed with the power to kill, but they think they are powerful to do.

And we see that with the world leaders today. Most of the big world leaders stay in power, because they are afraid that when they come down, they've done so much wrong that they won't give them chance of (seeing) the daylight the next day. We have one called, from the Jewish set up, in Ukraine. He is afraid, he's killing the whole nation, destroying everything, because he knows, nobody knows what they're going to do to him when he comes. He's asked for ?? asylum even before he is deposed ?? changed. And the problem is they have given him so much bribe that they're scared that he releases. Who's giving him what bribe, where? So they have to keep him alive or let's be as it is, because they're all still making money. They're running with it. It's a power and the illusion of the wealth, which does. It did the same thing with Moses. We see the same thing with Ukrainian President. We see the same thing with the Prime Minister of Israel. And Israel now is in the same thing with the Prime Minister of ?? UK. Runs in the blood, killing, using the money ?? for it, greed of the money, ?? the other ones do the same thing. Let's call it a day.

Q: Thank you Mr. Keshe.

K- Thank you very much. We'll see if their philosophy works by their philosophy. (2:44) They think, we wait for another cycle, till the philosophy matches. Thank you very much for today. Please, those of you who come in tomorrow, register today, whatever needs to be done, that we can take up the sessions for normal 9 o'clock Central European time. And it will be very amazing to see how we change you in tomorrow, how we understand about you, and change ?? you. Thank you very much. And, I hope we'll see each other next week with the same ?? peace ?? as today. Thank you very much.

R: ... And, before we go, I have a thing from the Universal Council to show... Which is, the Universal Council invites the Keshe family and Universal family in unifying at the Soul level every time and every day at 9pm, Central European Summer time, to elevate the Soul of the leaders to achieve the permanent and lasting peace.
