

Systems On - Monitoring If Man Can Overcome Greed - Man Can Change - Convert CR to Digital - West Against T - Armageddon Try Again - Single Field Creation T

Introduction to 607 KSW

Note: Not checked by KF interpretation by KS of KF Brazil

It has been said many times, that before Mankind can go into Space we have to be cured of this habit of killing. Today Mr. Keshe explained that the main emotion behind the killing is greed and that Man is the only animal that has this type of emotion. Other animals will eat until they are satisfied and then stop, or they can store up things for the winter, or for a time they might need food. A squirrel stores nuts for the winter and a dog hides a bone for the time of need. But Man collects and stores things without having the need for it and this leads to greed and wanting more, and never being satisfied with what he has. In Man there is the greed for power, and physically possessing a thing. For example, gold is the most possessive thing the Man has and when it is in his hands he starts to think about what he can do with it and wants more and more. This is why Mr. Keshe created the plasma energy of gold in the systems today and is feeding our Souls with it, to see what we as Knowledge Seekers (KS) will do, as we represent humanity.

The KF Systems are using Cosmic Ray (CR) technology and have been loaded with gold and are bombarding the Soul of the Man (STM) with the energy of gold. He said, they have a special way to create the conditions that we receive the full 100% of the energy we need to live from the Universe (U), that includes both the 80% of Universal Energy and the 20% of the food we eat and convert to plasma, which act as seeds to attract the energies. He knows a way to compress the energy into the Soul of Physicality (STP) by integrating both dimensions (D) of the STM and P. The KS are being tempted with the D of physicality to see whether we will choose the greed, or the Energy of the Creator. This is the essence of today's workshop and it is being explained through the graphs so we understand in a scientific way and not through the mysticisms of religion.

The first graph showed the majority of KS were sticking to the D of physicality more than the Energy. The lower left side of the graph represents the P, the middle the STP, and the upper part the STM. The dots were gathering in the middle and more towards the bottom and this means Man has a strong greed and attachment to P. The interesting part is that KS are no different than the rest of humanity. We are all part of the same structure. The Cosmic Rays through the system are giving a big energy and knowledge to the STM, but Man has chosen the P of it. People want to say that they are not like that, they think of themselves as more spiritual, but the technology (T) and the data on the graph does not lie. This then raises a very important question, and that is, would the Man go back to killing when traveling and living in Space? Would Man be able to hold on more to the STM and STP, rather than allowing his P to take him back to the habits of his life on

Earth, where he lives by the ethos of greed, wealth and knowledge accumulation, and everything else? We have to understand that if even one person starts to kill it will jeopardize the whole of humanity. Because in Space they know that the Man would start to teach the others to do the same, thinking that he is correct in his own understanding. Remember the Star Trek episode where high Beings disabled all the weapons and Captain Kirk, supposedly representing the "good guys" was arguing that they had no right to take their weapons away. And at the beginning of this episode he was shocked these people didn't have weapons, and he wanted to help them. It's interesting how over 60 years ago they introduced this idea to us about not killing, but nobody pursued it until Mr. Keshe started teaching us the Knowledge of Creation. Therefore, we as the human race have to be able to reach perfection before going into Space. This is the reason for these teachings to enlighten us and for us to understand the love of the STM and try to live in that.

Then we have the problem today of the killing aspects hiding in the religions. This is especially true of the Tribe of Moses. It is written in the Old Testament that he committed genocide and blamed it on God and as they call themselves, the Chosen Ones of God, nobody can see clearly the truth of their behavior, because they say, they are Gods Chosen people so they can't do wrong. Even though it is written, "Thy Shall Not Kill," they don't follow it. All the arguments and justifications Fundamental religious people come up with are too ridiculous for someone with a little common sense to accept. This is not anti-Semitism, it's the reality of life in Space. We can't have Jews going into Space trying to claim the whole U for their own god and then start killing for it. Mr. Keshe's biggest wish is that there will be no Jews ever in Space that will commit crimes in the name of being the Chosen Ones, as this will bring the rest of humanity to annihilation. The Jews always say they are the Children of Abraham, but Mr. Keshe is now saying they have the Blood of Mitra in them. It doesn't matter, because they still have gone the wrong way. We all are the Chosen Ones of the Creator to be perfect examples for the others to follow. And we have no right to change the half-life of another Being by killing them for whatever reason. Obviously to achieve this there needs to be elevation of the Soul and that's what today's teaching is about.

The way I understood about the next part is that, this is where the real change came. It was because he started to explain to us about what was happening and how they were tempting us with gold to see if we would let the greed take over. He showed the graphs from before, during, and after adding the energies to our Souls and we can clearly see the change. We went from mostly being in the P part to moving towards the Soul in the upper part of the graph. This was just the general flow, because then he discussed how people became afraid of having to face themselves and they switched themselves off through the Soul. It doesn't mean they switched their microphones off. Rather it's like when you talk to someone but you feel they are not really listening. They physically hear the words but their mind is somewhere else and if you ask them they don't know what you said. This makes sense and is to be expected because we live in the modern society that thrives on our denial of reality and not wanting to speak the truth, because it is too uncomfortable. Then instead of being a "Consumer Monkey" we would become responsible for our own thoughts and actions. And also because we want to believe in something that is true, and

not accept that all "truths" are relative to conditions. These are some of the reasons for switching off. But it is not a bad thing. It is helping us to become aware of who we really are, and what's going on inside us. Then we can change ourselves if we want. And if we want to get off this planet and travel the U we definitely have to deal with this greed aspect of our emotions.

The general conclusion was that after Mr. Keshe started explaining about the greed and how we need to change, then enough Knowledge Seekers started moving away from P becoming detached and moving towards the Soul. Therefore, there is still hope for Earth that Man can change. We will continue to teach the Man so he understands about the work of Creation and what he needs to do by himself.

Over the next weeks we should watch ourselves and observe how we change towards, gold, wealth, and possession and give KF some feedback. This will help us in how we'll be able to change the society, because once we stop the greed we'll stop the wars. The cornerstone of war is the greed for power, possession, and gold, and wanting to be the leader or king. See if that feeling of wanting all to be equal arises in you and with it the sense of peace. In the U there is no leadership because all are ruled by the Soul within. On Earth we deny the Soul and live in the P where everything can be hidden. And then all the negative emotions develop out of this and the major one being greed. The Man has never accepted equality amongst himself, he has always divided people according to their power or importance. He said, possession doesn't come with the physical dimension, it comes from holding, and possessing another man's destiny. It's when we force our way onto another person. We can do this by trying to enforce our thoughts over another, and we say, it's my way or no way, because we want the power of the decision. The greed and possession can hide in the subconscious, but the graphs will show it.

Recently, I came across an old film from 1957 with Sidney Poitier called, The Edge of the City, that was shockingly able to capture the essence of today's teaching on greed, possession, and killing. The actors were able to portray Man's emotion in such a way, and like a mirror, expose our hidden characteristics. The part that cut deep into my heart was when a beautiful loving Soul was helping another weak Soul to be free. Then he had to confront a man full of ignorance, greed and possession. It was when that man needlessly stabbed the beautiful Soul in the back killing him, that touched me to the core of my Being. And today's workshop clarifies the questions that arose as to why we have to be this way. It showed the disease us as the human race are trapped in. And thank God Mr. Keshe is here to show us a way towards healing and wholeness through the Plasma Technology.

Through the ONN Units we'll change the inner layers of Man's amino acid to be satisfied and not to be hungry, then he'll connect to Universal Energies and the emotion and energy fields of peace and equality will spread across the planet. And by playing the new "Enlightenment Game" with the system we'll receive the energy and knowledge directly to our Soul that will change us and make us peaceful.

KF has developed a T that can convert CR energies into analog and digital communication energy fields. The way I understand it is this is a huge gift to humanity. It means we'll be able to use the CR in the D of physicality for all our needs. So if we cannot elevate our Souls to receive the energy directly, it will still be provided for us to use through the KF systems until the next generation of humans can elevate. The strengths of the M fields will increase not by multiples, but by magnitudes of field strengths. This is why we were taught about Time because we'll change Time through it. It is so powerful a T that it will only be given to Mankind when the world Peace Treaty is signed by all the nations. The early communication systems used what was called analog format which was very physical in nature. Then they developed the digital format that uses LED screens and gives more precise numbers as digits, instead of using needles and dials. The end result is that us matter state Beings will have access to Universal Energies to help us during the time of transition however long that may take.

Counter to the narrative in the controlled Media, those who rule the Western World do not want the new Plasma T to be in the hands of the people. They will lose their power and control over their slaves, and this is an example of the greed and possession we are learning about today. Therefore, Mr. Keshe will go to the East and use organizations like BRICS, Shanghai Corporation, and China's One Belt One Road Policy. When these organizations are portrayed in the Media it usually has a negative slant to it with the purpose of making the general public afraid of them. It's the same with leaders who try to help their nation become free and independent. He especially mentioned the Ayatollah Khamenei of Iran, President of Burkina Faso, President Xi and Putin. These are the few brave leaders who are standing up against the global domination by the West, which is led and financed by Vatican. As KS we should remember these courageous Souls as we do our Intention for peace and add to their strength. They are our hope for bringing the Change and the T out and for world peace. It will be better and easier to bring the T out through peaceful means, rather than there being a desperate need for it.

When does the desire for the Creator become a greed? The way I understand it, is that when we consider the Creator as an object in the physical D, as something to be obtained. We are trying to grab something outside ourselves that we think will fill us. We don't know that the Creator is within us, and we are created out of His Fields. It all depends on how the words are being defined and used. If there is no desire, then there is no Creation and we remain in the Unity, or the Void. The desire to Be, to exist creates the duality of us and other. Desire becomes a "bad" thing when it is selfish and focused only on the individual. This is where the greed comes in. Mr. Keshe said, he doesn't believe in living a poverty life of suffering. He lives a comfortable life, and when his needs are met, the rest belong to the good of the Whole. In Plasma Science we don't take energy from what others need to live. We can receive what they don't need, and we give what we don't need. In this way everything comes into a balance and harmony with each other. This also means we have to have control over our minds, which can make up needs through our imagination that are not really there. This is why Enlightenment has to be part of the equation of life. Unfortunately through our ignorance we only think of enlightenment in relation to somebody that was called Buddha and sat under a tree. Enlightenment is the knowledge of knowing who we truly are, and that we are already connected and fed by

the Whole. Enlightenment is also part of the control of Time. Time includes the physical part of the Place, Position, and Possession (PPP) and the Energy part as the Emotion, Intelligence, and Enlightenment (EIE). All the teachings are coming together and this becomes our enlightenment.

All last weekend I was wondering if Armageddon had started, but there was no news. Then Mr. Keshe told us that they indeed tried to start their war, but had failed. The Iranians broke into 32 Israelis Mossad spy cells inside Iran and broke their plan. They were to use thousands of drones on the borders to start unrest and then a revolution in Iran and the Europeans, Americans, and Middle East Allies were going to invade Iran from 5 different borders and install the Shah back into power. The public doesn't know that the British brought the Ayatollahs into Iran 5 centuries ago to divide and rule. And then the Queen wanted to be the oldest Monarch in the world so she got MI-5 and the Americans to start the Iranian Revolution and install the Ayatollahs into power. Now because the Vatican wants the Iranian gold reserves, they're funding this new invasion. They are not going to stop just because they failed the first time. They are planning to repeat the invasion on Yom Kippur. If you look up the Yom Kippur War in 1973 they say it was started by a surprise attack from the Arab nations joining together. But Mr. Keshe tells a different story. He said, the Israelis planned that war in the background using certain energy patterns and dates to make a change. And that their plan was to eliminate all the Palestinians, but make it look like they were the victims. It's hard for Western people to believe this because the Media and American politics are controlled by the Jewish Lobby so the information and the truth don't match. If this deception is so huge, it is no wonder he doesn't want this race to be in Space where they will try to spread the same disease across the U. It's that same question, do we need to go through the Armageddon to bring the change, or can it be done peacefully?

Nikola Tesla was a very beautiful and enlightened Soul, then why did he spend so much time patenting his ideas? Is it because that was the only way it could be done at that time? Or did he lack the knowledge and power to make a change in that area? The strange thing is he gave many of his patents away free to his friend Westinghouse when he went broke and Tesla died penniless. Why would he trust Westinghouse who was just as bad as Edison and J.P. Morgan? I wonder what would have happened if Tesla would have opened his patents like Mr. Keshe is doing? We have to remember that at that time there wasn't yet a global communication system and Tesla's knowledge was limited to matter state.

Mr. Keshe talked about a new T they developed which is beyond anything that they have already developed. We just have to try to piece together the different bits of information he has given. He said, the World of Creation is made of two dimensions and the first dimension we achieved long ago. I wonder what he means. Could he be referring to the interaction of M and G fields to create a plasma? And the second dimension he talked a lot about, but we never understood it. The interaction of the two lead to creation of life and everything in the U. What two is he referring to? We know the M and G fields interact to create life, but maybe he is referring to something even deeper. Anyway, they have developed it into a technology and the KF systems will show amazing things to the

World of Science. Physically they can produce the second phase of the Universal Energy. It's the energy created within the fields of the fields of itself. So in other words it doesn't need to interact with a second plasma. It interacts with itself. And isn't this what the Fields of the Creator do, they turn back on themselves, interact and create life, planets, stars, universes, and all of Creation? This will change the course of humanity and life on this planet forever.

The next thing he talked about was the nervous system in the body only having a single set of vessels, and that the scientists and doctors never understood this or what it means. The blood vessels are mainly physical in nature and therefore they need to have both outgoing and incoming vessels to work. Oxygenated blood goes out and releases its energy to the cells and returns by the incoming vessels. In the matter state this is what we call, Yin and Yang, or G and M, but Mr. Keshe said it is not that. The nerves only have a single set so if the finger gets cut then how does the signal return to the brain? This is what science has ignored because they don't want to answer it. The only way it can be done is through the Energy fields. It means that the Energy can travel both ways at the same time on a single vessel. There are still two separate fields of M and G but apparently a single field can split itself into two, and not lose any information or energy. He also said it is a physical energy. As is usual with Mr. Keshe there are always new surprises and a never ending source of knowledge. This T will not be released to the public because humanity is not ready for it. But agreements have been signed with some governments to use it, and it will come out of Iran.

Other topics:

In the next two weeks we'll bring a new dimension and connect you to Universal Cosmic Rays in a very direct way. Then we'll see how we start changing;

I used the patent to share the knowledge. The knowledge is not mine because I cannot patent the knowledge which I have created;

Man should be born free, live free, and die free. If he lives by that ethos he will conquer the Universe and be one of the many creatures of the Creator;

Thanks for listening.
