

Systems On - Enlightenment & Knowledge Comes from STC to Humanity - Direct Connection - ONN - KF Shops - Create Nuclear from Fields - Chakras - In Pharmacies Introduction to 605 KSW

Note: Not checked by KF interpretation by KS of KF Brazil

The teachings started out today with Mr. Keshe explaining a graph where a Knowledge Seeker (KS) asked a sincere and profound question to him, and he goes through the process of how it was answered. Remember he is answering this question as a Universal Teacher. When the question was asked the system was conscious enough to know that it was a single person asking and focused only on that person, and not the hundreds of other people listening at the same time. When the question is asked there is a single spot of light by itself, and when Mr. Keshe hears it, then a thick line of dots appear above the Knowledge Seeker's dot. He compared it to the Soul of Physicality (STP) and physicality (P). That's interesting because the STP is the emotion, and a question would create an emotion.

The next part is how the answer comes. First, we should remember that Mr. Keshe likes to give us foreshadows of what is to come. In a recent KSW he showed a graph of the Earth creating a P and it calling out to the Creator, "I am here, feed me." This is the same situation but here the P is asking for knowledge. The dots start to go up to where the STM is and then above are more dots representing the Soul of the Creator (STC) giving the enlightenment. He said, it comes from above where there is nothing, it comes from the Source. Then after the enlightenment dots start forming in the middle horizontally where the STP is represented, and this means the enlightenment of one automatically becomes available to all the others, or we could say the STP of humanity. When the enlightenment is shared it becomes a common knowledge for all to access even throughout the Universe (U).

There are some very important things we can understand from this graph. One is that we are connected to the Creator and we all have equal access to the Knowledge of Creation. Therefore we don't need intermediaries like Prophets and those who claim to be speaking for the Prophets who setup institutions for themselves to be in control of the others. They ended up bringing the religions down into the level of the physicality and abused the Soul. This has created a huge problem for humanity to advance into the new technology (T). Now scientifically we see that we each have a direct link to the Knowledge, but we need to be taught how to access it. The other thing to think about is, what would the graph look like if the person answering the question were not a Universal Teacher like Mr. Keshe who knows that he is connected? What we mean is, if a normal person who is not conscious of his connection to the Creation answered the question, what would the graph look like? Perhaps the dots would only be in the lower half of the graph

representing the P. This means we can use the system to tell us what kind of teaching a person is giving. The graph would show if the person truly does have access to the Knowledge of Creation. It's not that you could give a certificate to somebody as a Universal Teacher. Because what if Mr. Keshe answers a question in the D of physicality, would the graph show the difference? Most likely the system will respond to the actual energy of the moment, and not the personality of the one answering. After all, the system has shown that it is conscious enough to make a distinction between an individual and a group. One final thing is that the graph clearly shows what, "I made Man in the image of Myself" means. The graph shows the STC on top giving energy to the STM, and then a straight line down to the P. The conclusion is that the P is a reflection of the higher energies of the STC & STM.

On Earth we spend thousands of years accumulating knowledge, studying, and trying to learn things and we go through a lot of suffering in the process. As we see from the graphs when we learn through the Soul we tap directly into the Knowledge of Creation and it is done instantaneously. And when one person gets enlightened it is automatically shared with the whole U. It doesn't take time to learn, it's more like opening up and receiving the fields and emotions. He said, the enlightenment really is a light that enters the STM from the STC. The STP is an entity residing in the heart area and it is made up of all the cell Souls in the body. The STP is also referred to as the Spirit of the Man, where the STM is a higher order entity in the middle of the head that is directly connected to the STC. The way I understand it is, the STP gets enlightened and the P becomes irrelevant, because it is a projection of energy. Then we'll live by the STM and this will make us immortal. Then wherever we travel to, we carry the two plasmas of the STM & STP and they interact with the fields of the environment and create a new P. This is what is referred to as eternal life. We still continue to evolve and play in the different dimensions of Creation until the time when we merge again with the Source of Creation.

For years Mr. Keshe has been talking about putting the Plasma Systems in satellites and changing the planet that way. But so far no government has been willing to be part of this. Now he has come up with a new plan, and that is we create our own satellite grid on the surface of the Earth instead of in the skies. This is the One Nation Network (ONN) and us Knowledge Seekers (KS) are responsible to spread these Units across the planet as fast as possible and we even want to put 1,500 Units in the depths of the Oceans to change the fish and aquatic life. First we are setting up the physical network through the computers and Internet, and then we'll connect the Plasma Antennae's and that will make it a Plasma Communication System that will connect all the KS together and eventually the whole planet. The ONN will cover everyone on the ground level and in the Oceans and all will be enlightened and fed by the network. This network will connect the STM with the Soul of the Planet and the STC. Perhaps one of the outcomes of this connection is that the STM will prevent the P from destroying the Planet. And when one person achieves a knowledge it will spread across humanity instantaneously making patents obsolete. Then humanity will start moving ahead very rapidly in advanced science and technology.

This is how we'll bring the change and when humanity becomes enlightened we will enter the Universal Community. And when we master the Knowledge of Creation, the STM will be spread throughout U teaching the others. But he made a request, that we tell our Soul not to become like the Prophets on this planet who abused the others. He said something in a specific way that made me think. He said, the Souls who became the 'Soul of the Prophet' made a mistake. We still don't know exactly how the Souls interact. Does the Soul of the Prophet replicate itself amongst the STM or the STP of the Man, or both? If the Soul became the Soul of the Prophet, it means it merged. For example, he talks about Moses as an individual, who carried the Soul of the Prophet. We understood it was the STP of Moses that made the mistakes, and not the STM. One day when we mature enough we'll have to learn how this really works.

There are 4 KF Shops in Austria, Germany, Switzerland, and Holland. These are KS who have existing businesses and they dedicate an area to be used solely for KF Products. From the pictures we see that they have done a very beautiful job at displaying the different products. If you want to become a reseller you can contact KF. This is part of the process for bringing KF out into public and those who are doing it are putting a lot of Soul into it. It feels very good to see the plasma coming out into public and hopefully more KS will help spread the T into their areas.

A question was asked about where the Initial Ray of Hydrogen (H) came from, and if it interacted with itself to create the environment. The answer went into a lot of different things. What I understood is that yes, the H is the Fundamental Plasma that everything is created out of. The H plasmas started adding up or amalgamating with each other to create more complex plasmas and the result is the variety of the Creation we see. It is all basically made from the H. Then he went into how the STM gets pulled by the fields of the Earth and that's why we have our legs protruding downwards. Then he asked us to think about where does the STP of the Earth manifest. If its outside the planet and interacts to create the atmosphere, which is dynamic, then the weather is an expression of the emotions of the Earth, as the STP creates emotions. Then he said, the physicality has no reality to it, it's a mirage of the fields of the U. This mirage is created through many interactions of many different fields, and many different field strengths and this creates humans, all the animals, and everything else. People read this a lot in spiritual books, that the world is not real. It's not that it's not real, rather it doesn't have an independent reality. It's like seeing reflections in a mirror. Maybe the Mind is the mirror in which the reflection appears, and maybe the power to make reflections, and the source of the reflections lie with the Source of Creation. But we are more interested here in the science of how the reflections are made through the H plasma.

The discussion turned towards the pattern that all of Creation follows, and that is of the "Trinity," the STM, STP, and P, which is the pattern of the 3 layers that has been taught many times before. It's just like the 3 layers of the skin which have the Inner layers that holds everything in, and the Middle layer which is where the Inner and Outer can interact and exchange energy. It is also of the emotions. And the Outer layer which interacts with the physical dimension of other entities and so forth. The whole Universe is based on this same pattern. And this is how all of Creation is made from the atom to the body of the

Man, to the planet, and so forth. The original field of the Sun came from the fields of Creation and interacted with the environment of itself and created our Solar System. In the future he will have KS and researchers do a test of releasing a Cosmic Ray and the energy of H into a total vacuum. Then we'll discover how a Ray turns back and interacts with itself to create its own environment.

Mr. Keshe showed this to the Belgium nuclear physicists back in around 2007 at their leading Nuclear Center of SCK. In a glass cube from a little bit of non-nuclear material, he created nuclear radiation at a very high level of Gamma Rays and beyond. It frightened them and they understood that a new knowledge and technology has come. Of course, since they didn't understand it they wanted to keep it secret. How did he do it? From what we learned today did he use his connection to the Creator and interact the H plasma with itself? Because even non-radioactive materials are made from H plasma. There was no mention of using an instrument of any sort. He was just there with his Soul. But maybe he showed them something in physicality that wasn't mentioned, so that they could hold onto something and feel safe. The graph of today shows that we all have this capability, but we have to open to it within ourselves.

It was very nice that a KS was able to independently confirm what Mr. Keshe had set up in the systems. The KS said the energy was different today and he felt it being diffused all over his body and Mr. Keshe confirmed it. Then he noticed that on the graph the dots looked like clusters of energy between the top where the STM is and the P at the bottom. The clusters represent the different organs but also the Chakras people talk a lot about. Again in today's workshop the graphs were great tools for helping us to understand a lot more knowledge.

When we eat food no physical chemicals of for example an apple, pass through the wall of the intestines and magically become a muscle cell. Through ignorance we are led to believe that the chemicals of what we eat pass through the intestinal walls and feed our cells. For simplicity we'll summarize what the scientists say about how food becomes the cells of our body. We'll just use the carbohydrates as an example. It's broken down through the digestive process and to primarily glucose, it is then transferred into the blood through the walls of the intestines and become the cells. In Plasma Science we are not talking about a different process. It's the same process with a different understanding. The food is converted into Gans, which is matter-energy state and a plasma. The MG fields are transmuted across the stomach and intestinal walls into the Lymph. In a way, we could say the Lymph is a soup of the different field strength energies of the food we ate. The conversion to cells is similar to what we do in the Gans Boxes. We have the MG fields of the blood, the electrical current of the neural system, the intelligence and control system of the brain, and the STM as the master controller, and this includes the emotions of the STM & STP. When the Lymph passes the different areas of the body and according to the need it is converted into the appropriate cells. The way I understand it is, the ONN system will transfer the plasma energy into the Lymph and it will carry out the rest of the process, and we'll feel the energy and emotion of having eaten. In this way, we'll bypass the whole food processing apparatus of the digestive system. In this way we

don't need to kill another Being and we'll live from the fields of the U. This same process will apply to all animals, plants and Beings on this planet.

Other topics:

Keshe Coins (KC) are only internal Coins for buying goods and services within the KF Store. At this moment, they are not exchangeable in the open market. That will come later;

KF has a certificate for its (?? alternative) health products that covers all of Europe. KS can request their doctors and pharmacies to order KF Products.

Thanks for listening.
