

**3I-Atlas & SWAN-R2 Plan to Mate in SS - Start New
Race - Prophecy Fulfilled - Place of Pilgrimage
Daughter of Mitra - Totality Missing - Christ Failed Not
Love - Matter Has Emotion field Strength - Power
Corruption Woman No Solution
Introduction to 610 KSW**

Note: Not checked by KF interpretation by KS of KF Brazil

Today's teaching goes into more detail about the supposedly meteorites that have entered our solar system (SS) and what it means for us on Earth. If they were just meteorites then what would be the purpose of blacking out the News and for the Americans to call all their Admirals and Generals of the Armed Forces back to Washington? NASA and the other Space Agencies refuse to talk about it. But as we know from last weeks teaching, 3I - Atlas and SWAN - R2 are spaceships from beyond the Galaxy and they have planned to meet each other behind our Sun around the end of October 2025. That's only a few weeks away and why Mr. Keshe is dedicating this teaching for us to understand what is happening and what it means to humanity.

The biggest problem we are having at the moment is that the scientists only accept the matter state as real and know nothing about the Energy state, therefore they are totally ignorant of how the Universe works, and that what is happening in our SS with these members of the Universal Community is a natural process. When they can't admit they don't know something then they start making up fallacies based on wrong assumptions and things get worse. It's very interesting that what for them is confusion and fear, for us Knowledge Seekers (KS) is 'proof of concept' of what we have been learning about in Plasma Science and what KF has been teaching for the past 20 years and is written in our patents. We have more knowledge of this situation than all the professors and physicists put together from around the globe. Mr. Keshe has offered to use our technology (T) to communicate with them, but they refuse because they know it will lead to the end of their rule by force and ignorance. For us it is very nice, because we finally get to use our knowledge in a Live situation that will affect all of our lives on this planet. And the feeling is that we really are part of the U and it is responding to our cries for help, and the time for change is coming very close.

There are many reasons why these are not meteorites. The first is that comets have a tail blowing out the back as the ice gets melted from the Suns radiation and they are mainly composed of rock and don't have a source of power within themselves. 3I has the "tail" in the front, or we can say, a light is shining forwards. What we call UFOs are powered by plasma reactors setup in a Star Formation (SF) and they create MG fields that interact with their environment. Mr. Keshe taught us years ago that spacecrafts create fields out the front of the craft and fly into it. This acts as a protective shield from asteroids and

space debris. This is a demonstration of what we learned and the light is created by the interaction of two fields, just like how the daylight is created on this planet.

Another thing is that the data shows the crafts changing speed and adjusting their direction of motion. He added that the spacecraft makes a MG field interaction with the planets in front of them. This connection allows them to be pulled by the plasma of the object they are traveling to. Spaceships are not powered by fuel. They make a MG field connection with the star or planet they are going to and get pulled in by it. They are reported as having a green light, which in terms of M field strength points to Nickel. He said, they are using the lowest isotope of Nickel 56 which matches the strength of Fe on this planet, which is also 56. Therefore the G fields of Earth pull the M fields of the craft at very high speeds towards itself. 3I has a connection with both the Sun and the Earth and not only get pulled in, but also receive energy on that same line of connection. Mr. Keshe has his own way of getting information. He found out the American Navy has reported that the frequency of 3I matches the frequency coming from the oceans and going in the direction of the craft. In other words, when they see a shake on 3I it is mirrored by a shake in the oceans. It means they are receiving energy from Earth. This is beyond the scientists understanding, but they are measuring it with their instruments, so they have to come up with some kind of reasoning for it. Mr. Keshe said, it works similar to how lightening is created on Earth. First there is a small charge that goes from the ground up to the clouds, makes a connection, and then larger energy is released back, which we see as lightening. We should understand that spacecraft do not fly in isolation like our airplanes do in the matter state. They make field connections with the environment and the objects in the environments they travel through. I am assuming that they give and take energy, knowledge, and information. It's probably that the collective Creation supports each of us in fulfillment of our desires, just as we help those we can. This is important to understand, because then it will make sense that the Sun gave energy to 3I, just like it does to us on Earth. He hinted that the reason these crafts have a connection to our Sun is that they might come from a similar place in the U of where our Sun came from. Maybe these crafts are related to us by ancestral lineage and that's why the M field strengths match. Because we don't know where in this U our Sun comes from. He questioned us, whether the humans and animals came to Earth the same way 3I and R2 are coming now.

Even though there is a News ban on these crafts, I did see a video that reported 3I as being hit by something and destroyed just before this teaching. Maybe some scientists are leaking out information to the public. Mr. Keshe explained that, that is not what happened. He said, 3I did indeed disappear from their satellites, but after some time it came back, went into a spin of itself, and then started dividing into thousands of satellites of itself. This is exactly how our cells divide in the womb of the mother. And when the nucleus gains too much energy then it divides into a proton and electron. The way I understand it is, like how the lightening forms, 3I sent a small connection field to the Sun, and it received back a huge energy that allowed it to divide into thousands of copies of itself. NASA started seeing dots of light forming around the main dot of 3I, but they didn't understand what was happening. It is "scaring them to death," so they are keeping it secret. Mr. Keshe assured us they are not hostile and pose no threat to us. It's the same

thing when a male human wants to create children, he makes thousands of copies of himself as sperm. The shocking part came when he said, 3I is the male, R2 is the female, and our SS is the womb in which they will create new life.

This really is the main point of today's teaching, that 3I and R2 came from different parts of the U, and it was planned that they should meet behind our Sun at a time when the Earth won't be able to see and have children. It might be a surprise to us, but it is the same pattern of how life is created throughout all of Creation. Now we are going to be part of the birth of a new race that will spread throughout the U and start a new cycle. This is what was spoken of in the Holy Books and now we are going to witness and be part of it. Mr. Keshe has been here for thousands of years setting everything up for this event. As he once said, the Soul of the Prophet is the same, but the physicality's (P) are different and are according to the time and place. It's my belief that the Soul of the Prophet comes directly from the STC, and that Soul made sure certain things got written into our Holy Books, but then over time the priest's changed some of it according to their own understanding and desires. The main point survived and that is, a change is going to happen that will affect the whole U. In this workshop Mr. Keshe said his P is of the structure of this planet, which is under the laws of the U, which is under the STP. But he himself is identified with the STC and not the STM. We only see that his body is like ours and don't understand the level of his Soul and how the different Souls operate.

The Man was created through the interaction of the fields, and by chance he developed a unique way of loving. Mitra discovered this beautiful "accident of the fields" and she brought it to the attention of the Creator. It's the love of the Creator for his Creation that he wants to spread the beauty of the STM throughout the whole U. All these events have been arranged to fulfill that Wish. When Mitra and the Creator fell in love with Earth they created the Daughter of Mitra. That interaction is enough to purify the Man and elevate His Soul. I think she was born on the Winter Solstice of 2021 and today he again said she is already amongst us, not necessarily as a physical entity, but definitely as a Soul. When these two members of the Universal Community create a child behind the Sun it will contain the fields of all of these entities and become a perfect Being. The new life forms will have the fields of the SS, Earth, Daughter of Mitra, and the STM contained in them. It seems that this is one of the ways the STM will be spread across the U.

It's been said many times that the Earth is a greenhouse for the U and now the STM will be collected and its beauties spread throughout the U and create the promised new cycle and our SS is the womb, which that new entity will be born through. The entities of 3I & R2 are part of this process. They have a high energy intellectual body and will bring massive intelligence to the Man. There is nothing to fear in this and it is not a hostile takeover like they put in our subconscious through all of those poor quality sci-fi TV shows and movies they showed in the 1950's and early 60's, before Hollywood changed its tone to a more benevolent interaction. Because of the ignorance the fear is still there. I am sure the Militaries first response is to figure out how to shoot them down. Mr. Keshe advised them to drop their weapons as a hostile response could lead to very bad results for the human race. Hopefully, our scientists will come to understand this is the natural

way life is spread across the U and we should welcome our Visitors to our planet. Just like people make pilgrimages to see holy people, so too, do the members of the Universal community want to come and see the Daughter of Mitra and receive Her blessing.

The 3I has emotion and all cells it creates communicate with each other. This means they all know who is going to go check out Mars, Earth, or wherever. They work and communicate as a collective whole and are transparent. There is no room in their structure for lying, cheating, and doing bad things like we do in the physical D of Earth. The KF systems can communicate with them through the Soul level. He said, the communication between the UFO and us on this planet is the same way the STP communicates with the P. It's like when we dream our Soul and STP communicate through a common M field strength with each other, and the STP converts it to images our P understands.

Mr. Keshe is again calling for KS who are experts in their field of study and work to join with KF and start a new plasma Research Center. You have to be skilled in what you do, because they don't want a repeat of what happened last time when KS came to Italy but they had no skills and couldn't help bring the technology (T) forward. There is also an opportunity for those who have existing businesses to add KF products to it, and join with KF to do research and development. He explained the reason for this. It is because the World Structure came down heavy on KF when we tried a few years ago to commercialize in a massive way. Therefore he realized that it has to be done by governments, or people who want to get rich. The fact that we are not able to commercialize could be taken as a sign that humanity is not ready yet. In the meantime he is still trying to open the market up using the existing resources KS have. If you already have a business it will be easy to add a line of KF Plasma products to it. In this way, the name KF will slowly seep into the world's awareness. The KS are the core of the change, knowing that we can intensify our Wish to bring it about.

In a joking way Mr. Keshe let us know that the KS from Bangladesh took the "chalice of poison" in his place when he came to Italy some years ago. What is fascinating is that he was able to neutralize the poison through the power of his Soul. The other thing Mr. Keshe indicated is that it probably helped him to mature. It shows us that challenging situations should not be avoided, rather embraced as an opportunity to grow, mature, and to claim the power we have within ourselves. Usually when we have 'bad' experiences we make the mistake of thinking to ourselves, "I never want to experience that again." This is a big mistake, because in a way, we throw away what we have already achieved. This KS gave us a beautiful example, by not rejecting the experience and saying that, if it happens again he knows he can neutralize the poison.

Mr. Keshe wanted the world to know that a President was successfully able to make 20% physical gold from plutonium and that it is actually radioactive. There are kilos of it circulating in the Central Banks of the world. It doesn't show positive test results for radioactivity, but you can find it, because this gold will not show its place of origin. I understood the second point he was trying to make with this story, is that when plasma is converted into matter state, it carries the MG fields of the emotions in the environment of

where it was created. This means all matter state comes from plasma, and it carries an emotional field strength. This is the nature of Creation and how it works. It's the same with Cosmic Ray materials, they all have different emotions with them, depending on who, where, and how they are created. When we create Microchips that have emotion they will have their own ethics. This means they will know if they are going to be used for weapons. This kind of ethics is not the hypocritical kind created by society through power, wealth, and religions. It's part of the essence of Creation and cannot be cheated. Now we can understand why the World Structure doesn't want the plasma T to come out.

Mr. Keshe said that a lot of our KS don't understand the full concept of the work. Therefore, they are not really aware of what they are doing and they cause themselves a lot of problems because of it, and they don't see when they have partial success in what they are doing. Another way of saying this is that, we don't have the totality of the understanding of Plasma, we just have bits and pieces of years of study, but we haven't yet been able to put it all together. It is very similar to when we learn languages and this was discussed previously. We explained that there was a certain point when the language clicks and we can understand the essence of what people are saying. Before this point, we are always having to translate each word for the dictionary meaning. When the switch happens, a light comes on, and there is a feeling of knowing. Maybe this is what he calls the emotion of knowledge. I hope one day for all of us that switch will get turned on for the plasma, and that Emotion of Knowledge will arise, and there will be an inner knowing of what plasma is. Then we'll move from only being able to copy, to being co-creators.

There was a question about what it means to have the 'love of God' taken away. This is in reference to the love of God being taken from the tribe of Moses. We have discussed this different times before in detail. As a reminder, the worst punishment in the U is to be isolated. To lose the love of God is painful beyond imagination. But a person won't be able to understand what that means until they actually experience the love of God themselves, then we'll know what it really means. Generally, what we call love, is what the Ego knows as love. In other words, when I get my way, then I feel that, that is love. When we begin to be enlightened to the Souls existence then all this will change.

We have a tendency to think of Prophets and certain Spiritual Teachers as having all knowledge and being completely enlightened. Once Mr. Keshe said something like, only the Creator has all the knowledge of this particular Creation. Maybe because all created things are within Him, like being within a womb. But we don't know what is beyond the Creator. Many years ago it was quite shocking when one of my teachers used to say that, Christ, or Buddha, or whomever didn't know everything, there is more. If we can accept that, then it can open the door for us to learn more. Today Mr. Keshe mentioned this topic first in referring to the fact that 3I and R2 are highly intelligent in being able to achieve flight, but their knowledge might not be very high in other areas. And then he said, that the Christ was too busy enjoying the love of the Creator and wanting to share that, with we can assume certain people that only he wanted to be with. In this way the love became more personal and not directed towards humanity. He used to joke that the Christ didn't get it right and that's why he ended up on the cross.

This can be very offensive to religious people, so please try to understand we are not criticizing. Rather we are trying to find the essence of the truth to enlighten ourselves. So it means that even if you are called the Christ and you make a mistake, it is still a mistake, and humanity will have to suffer from it. Some people might say, it's the fault of the followers of Christ for failing because they don't follow his example. Now we are finding out that the Christ himself did not live up to his message, therefore his followers could not go higher than him, because they surrendered their Soul to him, thinking he was perfect. This would indicate that our Souls actually already know the truth, even if the P denies and lies to itself. In the end the True Truth cannot be fooled by the P, because it is based on M field strength, and not the empty words and beliefs of the P. In a way, when we look at the behavior of the followers of a religion, then we'll see if their Prophet was true or not. And to date on Earth, every Prophet in the current age has failed. This is why religions will end, and humanity will become enlightened to the Soul.

Mr. Keshe told many personal stories of how power corrupts even worse than money. Of course, the male gets corrupted easy, but he wanted us to understand that behind the man, especially in the political world is the wife, and she becomes the bigger part of the corruption. These are not just stories, but teachings, and if we analyze them properly we can become aware of the source of the problem and how it functions in our society. In many cases the wife sits in the background hidden from the public and she is wielding the power. There are all kinds of psychological and emotional dynamics involved. In this case the only solution is going to be elevation of the Soul.

There are some interesting observations to consider in regards to a woman's position in society. Over the past several decades the Woman's Rights movement has brought to our attention how women are oppressed by the males and have been given a kind of victim role in a Patriarchal society and there are many examples to back this up. These kind of topics are never simply 'this or that,' 'black and white,' they are multidimensional and need a lot of knowledge and awareness to understand. Years ago we talked about Bachofen and how he discovered that society started out as a Matriarchy and women ruled society and controlled the myths. Then the males forcefully took control and have suppressed women ever since. The question that arises is, did women just sit back and passively accept the situation of losing power outwardly, or did they find other ways to get their control back? One power she does have and will always keep in a society that only considers the P as real, is control over creating children and the next generation. She is the biggest force for instilling emotion and ideas into the child. She is the representative of the STP of the Earth. Do we need the umbilical cord? And Mr. Keshe said, that right away within seconds of entering the air environment the baby is forced to breast feed. In this way, it will never discover that it is already self-sufficient in energy. Does the mother teach the child that it doesn't need her love, because it already contains the STM within itself, that is connected and fed by the Creator? Therefore, the child is always dependent on the mother's love. This is a different kind of love, than unconditional love. Now imagine a male child, he is emotionally programmed to need the "mothers" love, and he is always longing to have it and this is also part of the sexual programs. With this in the background, now imagine what happens when a strong male

leaves the outside world where he is in control and crosses the 'door frame' into the house. The female now has the power over that 'mothers love' and she decides how to make the 'monkey' dance for it. It's very interesting to think about it. The play called, The Iceman Cometh, by Eugene O'Neill amazingly captures the essence of this teaching. As long as we consider ourselves to only be physical bodies, there is no solution for power and how it corrupts. But if we discover our Soul, then that is a whole different story. As Mr. Keshe said, it was unfortunate that he was raised in this world of power, wealth, and corruption.

Other Topics:

Our Visitors will be more interested in colonizing Mars because it matches the Nickel field strength and it is a planet at the start of its cycle to produce life. Whereas the Earth is already at the end of its life cycle. It will move next into the position of Venus.

Thanks for listening.
