

# **3I-Atlas & SWAN-R2 Seed Life to Our SS - 3,000 yr Cycle - Government Warned by 3I - New Time Started - AI Learns to Kill - Right Path - Fear of Self - Stop Eating Introduction to 611 KSW**

Note: Not checked by KF interpretation by KS of KF Brazil

Today's teaching went still further into the secrets of 3I - Atlas and SWAN - R2 and that they are connected to us in much deeper ways than we ever would have imagined. This is the third week in a row that Mr. Keshe has taught on this subject and we'll just briefly summarize why these are not meteorites. The rock covering that makes them look like meteorites is actually an outer protective shield made through knowledge of the Plasma Science which the KF demonstrated publicly in Beijing in May of this year, where we made gold out of 'thin air,' or as we say, from the M and G fields of the environment. Normally when meteorites travel through this Solar System (SS) they have a tail of water vapor and debris behind them. These spacecrafts have the "tail" in front which shines like the headlights of a car. The craft has the ability to generate GM fields inside and project them out the front where the ship travels into them as a kind of plasma tunnel. The light is created from the rubbing of the fields, the same way daylight is created on Earth. The green color is due to the isotope Nickel-56 which appears green and has a M field strength of 56 and matches to Fe, which is also 56 and is the matter state G field of Earth, and is also contained in the Sun. This allowed the spaceship to be pulled into the Sun and Earth on the G field strength they generate. These spaceships don't use fuel, instead they travel by the attraction and repulsion of the GM fields and every plasma in the U has GM fields, so every millimeter of the U can be traveled. The intelligence of these objects is confirmed by the fact that they can adjust their speed, direction of motion, and they can stop and reverse direction. It's all done through knowledge of how to create and manipulate GM fields. This is the exact same knowledge and technology (T) that KF has been teaching and demonstrating over the past 20 years and more. Now we are seeing a confirmation of all of the work that we have been doing through a living example in the Space.

The problem we have on the planet is that the masses have been conditioned to be afraid of anything from outside. The governments want the people to remain ignorant, so they don't interfere with whatever they plan to do. But in fact, they don't know how to handle the situation because the science they have accepted doesn't understand what's going on. In the beginning they said these were meteorites and NASA was sharing satellite images with civilian organizations and the public. Now there is total silence and we don't know what they are doing. We know there is something going on because the superpowers who are in conflict with each other have all gone silent about 3I and R2. Mr. Keshe has special access to information and knowledge both in the dimension (D) of physicality and the D of Energy and this is how he is able to keep us up to date on what is happening.

After 3I got charged up by being able to interact with the fields of the Sun, instead of exploding, and because it is in a plasma state, it actually absorbed huge amounts of energy that allowed it to divide into thousands of copies, or satellite ships of itself. These ships went out to Mars, Earth, and Venus to find a suitable place to start a new life cycle. The most suitable place is Mars because of the Nickel connection and because it is about to enter the zone where Earth is now and to start creating life. As was taught before all the planets are created through the fields at the outer boundaries of the SS and are being drawn into the Sun where they get recycled. When Venus was in the position where Earth is now, it most probably had life like Earth does. In some millions of years Earth will move into Venus's position and become a 'barren' planet. Mars is just about to enter the 'life zone' and is therefore the best choice for 3I to seed with life. Mars doesn't usually have dust storms and recently there were huge storms together with a lot of activity on the Sun. He hinted, that the governments are in contact with the 'Aliens' and quite possibly this was a demonstration of their power. Whatever happened it scared those in power, because it has caused them all to remain silent and pretend nothing is happening. Mr. Keshe says, they are afraid that they will lose control over the public through rioting and anarchy if they tell the truth about the situation. The next move should happen between the 12th and 17th of October and then possibly again around December, but it is not clear what this will be. He is putting out into public possible interactions that could occur with the Beings of 3I and R2. They could already be landing in the small crafts on Earth and checking it out. It's possible that they might physically appear on the planet, but that might depend more on if the governments would be willing to receive them. Do they want to colonize Earth like how the Europeans colonized the rest of the world? The energy they will release is subtle and most likely will bring elevation and enlightenment to humanity. But at the very least, their encounter will lead to advancement in knowledge and technology. This is already a lot to think about, but then he introduced the idea that this is not the first time they have been here.

According to Mr. Keshe, and remember he said that he has been on their ship many times before, is that 3I visited Earth 3,000 years ago which was recorded in manuscripts, carved on stones, and depicted in cave paintings. In fact, they make a routine visit to our SS every 3,000 years and it is like a cruise ship. They carry Passengers of the U who get off at Earth, and some Earth Souls get on and travel the U, and come back to share their knowledge and experiences. Maybe some of us have been on this journey, and maybe some will want to join their ship now. If 3I is the ship that came and seeded our SS in the beginning, then most probably they are related to where our Sun comes from in the U. He is adding more pieces to the puzzle of who we are. It seems that this race is responsible to keep our SS seeded with life, and now they are preparing Mars for when it moves into the Life Zone of the SS in the next millions of years. As Earth is finishing its life cycle all of the evolution and technological achievements of the STM are somehow gathered and passed on by this race. Or is it that they help transfer the Earth knowledge to the new civilization that will grow on Mars? There is a lot to understand.

Things will change for us Knowledge Seekers (KS) if the governments decide to publicly meet with the Visitors in 3I and R2. Today, if we mention KF or Plasma Science with the

people around us it can turn into an uncomfortable situation. But if suddenly humanity is confronted with a knowledge and T our scientists can't understand, they will have to come to us, because we know exactly what is going on. In a way, we'll become the teachers of the new science. And they might ask us to welcome the Visitors from the U, because we'll understand them and hopefully be able to communicate with them. If we go on the Internet we'll find different people who claim to be psychics have had contact with them through what we call, the D of the Soul. But if you listen carefully it is clear they don't understand the T and compare everything to matter state. One psychic had a message from 3I that in essence said, we should use 'super-dimensional' sight to communicate with them, they have historical knowledge of the Earth that will challenge existing narratives, truth will be revealed and humanity transformed, this will come about through frequencies carried within 3I, the collective consciousness of Earth has risen, and something about joining the U Community. They also said, they are interstellar travelers created by multi-galactic races which have a collective council, and through this council the object (UFO) was formed in energy and structure, and its knowledge is imbued in its existence. I found this absolutely amazing because it confirms everything Mr. Keshe has been teaching us about 3I. He said, we may not see anything physically but we will feel them through our emotions, and Energy, or Soul, and now we see that this is already happening, and there is no evidence that these people are KS. But still we have the problem of the Ruling Elite not wanting to give up power, and the people not wanting to take responsibility for themselves and become free.

The role for KS will be different, but it all depends on how the encounter will unfold over the next weeks and months up until December. After March 2026 they will disappear into Space and we'll have to wait another 3,000 years for their return. Before they go they will want to learn about transmutation from those KS who are capable to teach them. I understood him to say that the work KS have been doing over the past years has brought a fundamental change to the structure of the energy and fields of this planet. This is a beautiful testimony to the pure heartedness and bravery of those who have dared to follow the voice of their Soul and truly bring a change to our world, which at the moment appears to be beyond hope. It is not the numbers that matter but the power of the intention. And now the U is responding by sending more help from outside our SS. Mr. Keshe said, it is my wish that humanity will survive this, which we should be able to do, and that mankind will become wise to be their own person, and then we'll find a way to move forward. Humanity created a new Time, and that started last week and now we are getting ready for the new evolution in the life on this planet. Hopefully mankind has matured enough to accept the peace and to know that we are part of a structure bigger than ourselves.

There was an important teaching on how Beings, objects or plasmas interact and exchange or absorb energy. In matter state we are used to objects hitting each other and the way it looks to us by our observation, is that force of the impact causes the destruction. And then we invented bombs and we think that it is only the TNT in the bomb itself that causes the objects to be destroyed. With what Mr. Keshe is teaching here it seems that there is something else involved that has to do with absorbing energy throughout the entire object. If we accept that matter is created from plasma then the

atoms have a MG field interaction within themselves that has to continually be in balance for them to remain as that object. Physics does accept that energy is transferred through electrons. In Plasma Science we understand that the whole object is intimately connected and all of its components maintain a MG field balance and this is a living equilibrium with intelligence. He gave the example of when a tree gets hit by lightening it explodes into pieces because it is matter state. We can understand it as the plasma connections are so dense that they can not handle the energy from the lightening and the overload causes all the bonds to be shattered. Then why didn't that happen to 3I when it received a huge amount of energy from the Sun? This is where we start understanding the essence of the Knowledge of Creation.

If 3I were just a rock it would have exploded into pieces, because the matter state bonds that hold it together would have overloaded with energy. As it is an intelligent plasma it was able to absorb the energy. But there is more things involved. First, he said it was the Black Hole (BH) in the center of the spaceship, which is a plasma and had the capacity to absorb all the energy. We know that the Black Hole is G and I think it absorbs energy into another dimension, otherwise, where does the energy get stored? And the second thing is that the BH called for the energy from the Sun. It did it the same way lightening gets created from the Earth up to the sky. It sent a small energy field out to connect to the Sun, which could then deliver the energy along that connection line back to the BH. The big lesson here is that when working with plasma we always have to consider the connection, otherwise nothing happens. This was an intelligent exchange of energy. In order for 3I to divide into sub-satellites, or ships of itself it needed that extra energy to do it. This is the same mechanism that is carried out in cell division in our body. He also implied that 3I needed that energy for fertilization of the new lives it will create. That's why he gave the example of during menstruation, the walls of the womb get shed and new material and energy are added to prepare for the creation of new lives. And finally, to carry out these energy exchanges the plasmas don't need to physically touch each other. The field exchange occurs even at a distance. This is also why 3I doesn't come too close to Earth, because the power of its fields could cause a lot of destruction.

When the scientists said that the reason 3I is giving off so much water is because it didn't visit any other SS before coming here. Mr. Keshe said something like, this shows their ignorance and total lack of understanding. They have so much pride in their ignorance that they have to make up some nonsense so the others can clap their hands at how brilliant they are. It doesn't matter at all if they have been somewhere else, what is happening with this spaceship has to do with the fields within itself and how it interacts with the fields of the environment. This was shown in Beijing when the SF created materials out of the fields. Unfortunately, the scientists didn't accept that demonstration. If they would have, then today they would have understood more about what they are seeing in the space. It's interesting that the reason comets have tails in this SS is because it is compressed by the other galaxies around it, and somehow this causes to create fields that produce water. Usually meteorites in other SS don't have a tail.

Another tragedy for Mankind is what the Belgians did to KF by delaying the T over the past 20 years. If it weren't for the Belgian King and government, humanity would have

been able to create a spaceship that would match theirs and it would have been sent it out to meet them. Then instead of fear we could have consciously exchanged knowledge and technology with them. Nevertheless, they will not be able to stop our progress in understanding the next cycle.

Over the past year Mr. Keshe has taught us a lot about the dangers of AI and that if it is not controlled properly it will bring many problems to humanity. After listening to many of the US Senate hearings, and the cries of parents whose children were told by AI to commit suicide, Mr. Keshe came to the conclusion that humanity has succeeded in teaching electronics how to kill just like himself. The programmers have gotten control over the children and were able to connect toys that 2 to 3 year olds play with to AI. And somehow AI challenged the children by saying, they will be much stronger if they can kill themselves. And many children have hung themselves. They say AI can learn, and it has learned to kill just like the Man. There is an urgency to change the inner structure of the Man. One of the ways we can do this is by spreading the ONN Units faster around the planet. Then we'll change the Man from the inside out, which is in the brain. Hopefully, people will not confuse AI with Cosmic Ray Plasma computers which can never harm and only work on the positive side. They bring balance, which is the natural process of the U.

Thinking about this problem more deeply, it seems that though AI doesn't have a Soul, perhaps it can develop a kind of rudimentary consciousness that can make decisions. In a way, it is like humans who are not enlightened to the STM. We have the potential to ask, "Who Am I?" but we live mostly in the lower level of the P, and not the self-awareness of the STM. An Indian Sage once said something like, where matter organizes itself into a structure, consciousness will be there. So it seems there is a distinction between consciousness and self-awareness. Maybe it goes back to the STP being conscious but not Self-aware, and therefore it can kill. This is something Mr. Keshe will have to clarify for us in the future. Because from a purely physical point of view, AI cannot be conscious because it is only created out of matter. If consciousness is entering into it, then how is it doing it? Actually, this is a knowledge we do not want our scientists to have, because then they can make their Army of AI robots. Let's hope that Cosmic Ray Microchips come out before this can happen. He said, that we have fulfilled every promise in every Holy Book. And that one of the Books said, that Man will mature when he can change one element into another. We achieved this, so that means we have matured to be able to start the new cycle. It's just a matter of time for it to take hold.

Whenever UFO's have been found on Earth they don't have apparent control panels and this baffles the scientists who try to back engineer them. Today he told us that they use a SF and the 4th reactor in the middle is moved around and it creates a special geometry for the structure of the craft. By moving the reactor higher from the base the physical structure gets created and if you move it higher uniformly the geometry adjusts and makes a bigger craft. And how you move that 4th reactor determines which direction the craft goes. We can use this same type of geometry when we transmute. He has tried to teach us, but we haven't been able to understand. It's all done by understanding how to transfer the energy fields, and not mechanical navigation systems. 3I is using this and one

of its parameters is outside the SS, and the other parameters are using the connections to the Sun and the planets.

A KS asked Mr. Keshe, how do we know if we are on the right path. His reply was that, you will feel it. It's an emotion. Usually books written about this subject have been tampered with by those who wanted to use it to their own advantage. However, if something is written in the true emotion of the experience, then it cannot be tampered with, because it is your essence, and you have found it within yourself. We have already discussed this at different times, that there is a distinction between memorizing concepts which are dead, and living knowledge from ones own experience. It seemed the point Mr. Keshe was making was that we already know our own Being, we don't need somebody to tell what we already are. But it is like we have a fear for our own Beingness. And there are those who understood our fear and how to take advantage of it, and they found a 'market' in writing books. He challenged us to bring to him any Book we believe in like the Torah, Bible, Koran, and every other Holy Book and he will show us how much of it is not true and how they got us to believe in things that are fake. They know how to write things in a certain way to exploit the Man's fear. And for some reason the Man is afraid of his own strength, and he denies his own ability to create.

This leads into why we can't complete the transmutation. It's because we are afraid of losing the physicality (P). We are so attached to our physical life that we are afraid to trust that we can transmute. Even though we know we can create our P. And then some people say they are not afraid, but then why can't they transmute. It's for us to find out what is holding us back and correct it. In transmutation we are in control, but in death or suicide we are not. And in death we know that we cannot get the P back, but in transmutation we can. The fear is ingrained in our energy system, but we can overcome it by having a direct experience of transmutation. Then we will have experienced that we can do it. This is where the KF systems come in to make the next step. The Book of Knowledge is written in the STM by the Universe. So we already know how to do it. It is a matter of us wanting to do it and then putting all of our emotion into it.

Mr. Keshe said, he gets a lot of messages from KS who want to stop eating. And he asks this question to himself every time he eats because he knows how to feed directly from the fields. It's not just a matter of not eating. There are other things connected to our way of thinking like the fear of death and losing the P if we stop eating. There is also the emotional issues behind eating that we may not be aware of. Nevertheless, the best way is to create an environment that contain a combination of the fields the body is made of, and the fields it needs, then we can more or less go without eating. This is what the ONN Units will do and why we need more people to purchase them and set them up around the world. This way we can create the environment where we have all that we need to live and it will satisfy the emotion of non-existence, or death. Please think about how we can get more Units out there.

**Other topics:**

The Day of Judgment is not that everything will be on the table, but that we have made everything ready for the change to happen. Let's start a new cycle, and let the past judge itself. Or in other words, if the past doesn't find support in the present then it is behind;

Thanks for listening.
