

609th Knowledge Seekers Workshop September 25, 2025

(Quick Index 16 pp, Introduction, Topic Index ; Need to do; Key Phrases, Words)

(Auto transcription from Elias)

Systems on; NASA finds - meteorites 3I - Atlas, SWAN, R2; Abnormal behavior - directional flight - lights in front & back - disappear 17 minute pulses; Intelligent systems - look like meteorites - really spaceships; Split became two; Going behind Sun; Dedicate today's teaching - find solutions & answers; KF has shown & taught what we see in Space; Knowledge Seekers (KS) know more than NASA scientists; Showed in Beijing; Analysis reports from laboratories & videos - all information; First time publicly encountering UFOs - travel 70,000 km per second - beyond our T; Using same T as KF - 1 minute to Moon; KF can communicate with spacecrafts; How Iranians captured drone - fly without detection; Living creatures - amino acids (AA) - slows down change directions; UFO - not advanced MG system - but intelligent; Creates rock structure around itself - shield - high speed travel through Space; Crafts looks like meteorite - when enters Earth - converts to regular UFO shape; 20,000 Beings inside; Came to meet humanity; Production gold from fields - July 2023 - Chinese Military; Create UFO from fields 10km long; Positioning reactors & changing M field strength; Showed in Beijing; Craft pulled in by fields of Sun; Earth use Fe - strength 56; Green color Nickel isotope N56; Continuously changes speed; Shows video - material production - same process to build UFO; Materials rain down from air - stick to UFO; White shape formed out of nothing - proves everything; UFO using SF of silver sphere reactors - KF made; Lab report Chinese military - Oxides; 3I mutates to local conditions - knowledge, intelligence, languages; Knows where it came from; Governments need KF T to communicate with crafts; 17 minutes pulses - creates emotion - learning Man's emotion; Geometrical emotional system; Replicate human intelligence; Why now - why humanity; Fleet of crafts; Nations block information - not panic; Ready to join U family; UFO people don't know transmutation - want knowledge from Man; Meeting about human race; 3I splitting to smaller craft; Governments afraid; KF building systems to communicate; One representative for Earth; Obedience from respect - not fear; Rule through emotion & physical presence; KS taught to command emotion through Soul; Human race centuries ahead of these people; Hope humanity can handle it - has no choice - start new cycle; Space - thy shall not steal; Problem - humans not peaceful; Not open to spherical; Book 2 - highest speed travel; SWAN cannot land - mother ship; Here to bring new change; Another video; How to make UFO; Crafts enter each other; Offer collaboration with Chinese government - US - NASA - use Iranian Space Agency - replicate their system and communicate; Tested 17 minute pulse May 6 - psychological effect - emotions; Means cargo carries life; See graphs; Not hostile - curious to interact with humanity; If land start new cycle; Go through North or South Pole; ONN Units out - not replicable - world peace; 3I Atlas from Wikipedia; Trajectory through SS; Images not real - orbits erratic; Trajectory calculated; No nuclear system; Green skin; R2 - nomads; Satellite disturbances - landed; Nickel is C56 - no matter Fe; O16 - replication C14 to C16 - behave like deuterium; Change M fields - pass through star; R2 shows CO2; Using U system - not teach Man - no P in reactors; Different type SF - at 90 degrees; Spherical SF; Creates shape of Earth; Don't teach everything; R2 carry millions - all races U - peacefully; Had contact with R2 - hear cry of Souls; Here to evacuate Souls from Earth;

Means disaster nuclear war - annihilation possible; KF Plasma systems on - reading graphs; KS Souls flew to join R2; R2 not prison; War Israel & Palestine & Russians; Governments can't capture 3I Beings; Military & Intelligence trying to communicate - not public; Problem - Universal peace & world peace not synchronizing; Video - gold - Chinese Military July 2023; Tests ordered by leaders; How to create protective rock shield; Rings of Saturn formed; No frequency - plasma uses field strength; Chinese academicians stole T - changed report - Government admitted; Not accept Chinese academicians anymore; Mining finished; ONN Units - pure field energy - no more illness; People trying to stop this process; Aliens freely give knowledge to Earth like Mr. Keshe does; All knowledge inventions not human - give and take; Israeli nuclear physicists giving knowledge to Iran; Space knowledge is free; Mankind will be haunted; Have to pay our own way - from contributions & sales; Alien dreams; 3 different types of dream; New materials for Monthly Flight session; Be aware - Israelis sounded horn of change - war.

Topic Index

NASA scientists call meteorites like 3I - Atlas, SWAN, R2; Really spaceships; Not behave like normal meteorites - directional flight - lights in front & back; Disappear in 17 minute pulses; Intelligent systems - look like meteorites; Pre-set to be here; Split became two; Going behind Sun; Dedicate today's teaching - this subject - find solutions & answers; Everything scientists talking about these structures have been covered in KF teachings & shown; Knowledge Seekers (KS) know more than NASA scientists; Found in transcriptions; Spoke about in Beijing conference; Analysis reports from laboratories and videos with all information; First time publicly encountering these UFOs - have tools to observe; Dynamic systems - can travel 70,000 km per second - beyond our T; Same as KF Plasma T - a minute to Moon; Trying to communicate with spacecrafts; Crafts interfered with Military satellites; Work on plasma M fields - jam electronics - camouflage; How Iranians captured drone - fly without detection; We know how lights created, why green color, large amount CO2 out back; Today's teachings go through these processes step by step; Taught over past 20 years; Crafts have living creatures - can mutate - have amino acids (AA) - create geometric dimensions & information - moving towards Sun - slows down change directions; Lights in front - create M fields to clear path obstacles - fly into vacuum; Draws how UFO works - has simple MG system - not advanced but intelligent; Creates a rock structure around itself - shield for high speed travel through Space; Primitive systems for Space travel - useful; Outer meteorite looking cover - when enters Earth - converts to regular UFO shapes - it's inside the structure; Man confused - never seen before; Clean inside earth's atmosphere - don't need cover; Most UFOs fly with stone covering; Lots of dentations around outer border - to look like meteorite; Inside - highly intelligent system - 20,000 living things inside; Having a meeting; Encounter on Earth; Reason to come here; Objects get embedded in material in protective shield; Green light in front - Nickel M field; Plan to meet humanity - Earth's first official - maybe public encounter with Aliens; Scientific data indicate; How to communicate; KF - has shown protective structure around UFO - never understood; Puzzled by Star Formation (SF) in Beijing - produced gold from fields; Humanity needs to learn how to create rock around craft; Beijing used old spinning plasma reactors -

particles formed - table; First time shows production gold July 2023 - Chinese Military; Don't manufacture UFO in Space 10 km long - create from fields - same way we showed creation of materials; UFO shape created by positioning reactors & changing M field strength; First level of producing UFO - field creation - confirms size; Second level create materials; Third level - creates shape; Craft pulled in by Sun - use M field of metal of Sun; For Earth use Fe - field strength 56; Green color of 3I - Nickel has strength of 56 - isotope N56; 3I creates field of Fe using Nickel 56 - why green; Craft changes as approaches center of Solar System (SS) - speed continuously changes - changed when entered SS; 3I is heading to Earth; How big dentitions created - same as producing materials - shows video of it; About creating right M fields - create right structures - it forms around center of craft inside; First creates dust particles - then curvatures, patterns shapes; Materials rain down from air - create protective layer around craft - they stick to it; Describes images; have C14 in them - produce what we need; Pile of material on table; Need another reactor to make it stick to UFO; Particles don't fall on floor; Mono materials forming hills, shapes; 44 minutes - white shape formed out of nothing - proves everything; Building structure from fields not difficult - how 3I was built; For sure both meteorites using SF made of same type reactors showed in Beijing - silver sphere; Discusses lab report from Chinese military - lot of Oxygen's - gold & C14; Materials to create life on Earth - creates shape of itself; When 3I and others enter atmospheric condition SS - mutate to its conditions - knowledge, intelligence, languages; Carries both local knowledge & Knowledge of U; It knows where it came from - intelligence level higher than ours; Governments need KF technology to communicate with; Disappear - 17 minutes pulses; Know from our tests - creates emotion; These Beings - learning about emotion of Man - feel, think, everything; Geometrical emotional system; Replicate human intelligence; Why now - why humanity; Fleet of crafts following after 3I; Nations blocking information - not create panic; All carry same intelligence - root structure; KF teachings - allow joining Universal Community; Ready to join family; Those using UFOs don't have knowledge of transmutation; We are giving knowledge to Man; Here to learn transmutation; One is Mother Ship; From different parts of galaxy; Maybe meeting like U Council - sort out what to do with human race; I have taught you enough to be ready; Don't be baffled how they're presenting themselves; We know how they traveling at high speeds - plasma; They travel faster outside SS - only observe when enter; Became visible when reduced speed - otherwise pass through; 3I splitting itself to smaller craft - third split - send out smaller versions of themselves - land on planets; Suddenly - information scarce - governments afraid; 3I and hundreds babies; Need KF T to communicate - convert to our language; KF now building systems; KS have knowledge to understand; Meet Universal family; One trusted representative by & through them placed on planet - spokesperson with U Community; Obedience from respect - not fear; They rule through emotion understanding - also physical presence; KS taught to command emotion through Soul; Human race centuries ahead of these people - learned transmutation; My hope - humanity has knowledge to understand - able to handle it; Human race is ready - has no choice - start new cycle; They want access to knowledge of transmutation; In space - they shall not steal - this time humanity has knowledge - upper hand as teachers; Only problem - we're not peaceful race; We taught mankind transmutation - emotion of Energy; Concerned why 3I holding its cylindrical shape - not opened to spherical; In Book 2 about highest speed travel; 3I become spherical land on Earth; SWAN cannot

land - mother ship; Meet behind Sun - not afraid of us seeing; Have bigger job - 3 reasons; Possibly they'll land; KF T understand what is happening - World of Science puzzled - they still oppose us; We showed production of materials Beijing; With different fields particles would have floated - orbit like rings of Saturn; Can create structure; Be ready for surprises and changes; Mankind will meet citizens of U - see & feel their existence; Crafts here to bring new change to us; They want emotion of transmutation from humans; Crafts - 60,000 kilometers per second; Faster speeds only see light; Men of Space - more intelligent than Man - built flight system; Hopefully soon you'll understand how to transmute; Shows another video; Add balloon of fields in center of ring - make UFO; Add second fields for materials - produce outer shape - materials will rotate - explain why rotate later; Transfer of light objects between crafts; One enters into other - crossing each other; We have offered to collaborate with Chinese government or we shift back to US and NASA - use KF plasma systems & others - Iranian Space Agency - replicate their system and communicate; KF KS have knowledge - no need for rockets - match GM fields of Sun; 17 minute pulse - we tested May 6; KF research team understands reason; Psychological effect - emotions; Means cargo carries life; See on graphs; Means dealing living entities - from another planet; We are far ahead of them; Governments ignoring; Crafts not hostile - curious to interact with humanity; If hostile - make different moves & gap - configuration; Homeless or running to mother - on excursion; Hope humanity is ready - peaceful enough to meet fellow citizens of U - together move to next level; Coincidental with what's happening in human race; If they land we'll see new cycle; Go through North or South Pole - less obstacles - stronger fields; Knowledge is in our hands; Not see a human face;

Part 2

Getting ONN Units out; Develop Microchips with consciousness - Pico materials; KF building systems - communicate with 3I - Atlas, SWAN, R2 - language of Soul; ONN Units - not replicable - cornerstone for world peace; 3I Atlas from Wikipedia; Trajectory - pass through SS; Image made up - create illusion for people - not real; Don't make perfect circular orbits - erratic - up & down - same with Sun and Earth; 3-dimensional structure - UFO passing through - see how reacts - passes Earth; 3I & R2 will cross do transfer between crafts; They are on a mission; Everything calculated before departure - don't change course - decide on every star, planet, SS they'll go through; Every trajectory is calculated; System adjusting itself many times; On excursion see things; Speed - shape of craft - confirms knowledge KF has; Getting hit by many meteorites - protective shield; Not very advanced compared to U; Newcomer to Space travel - using old system; Newer versions by more advanced citizens; Multi-layering instead of this kind of jacket over craft - donkey; Doesn't have nuclear system - laugh - we didn't use nuclear for gold in Beijing; People - green skin - traveling across galaxy; R2 - slow nomad structure - billions of years in Space; Monitoring data - know what Aliens up to; Space Agencies don't understand - don't accept what I say; Already landed on Earth - satellite disturbances; Nickel is C56 - plasma field strength - don't show matter state Fe; Fe strength 56; Lowest isotope Nickel is 56 - green light confirms; We produce N56; Replicates GM fields of Fe - goes back to Oxygen 16 - replication of C14 to C16; These isotopes behave like deuterium; Scientists narrow-minded - Fe in Energy state; Change

composition to different M fields when goes through SS or star; Deuterium shows gray silver blackish; R2 shows CO₂ - going close to Sun - using Universal system - I will not teach - Man not ready; No P in reactors - like Sun; Powerful old system - single spherical flight system - why has this shape; Star Formation (SF) on boundary - different type SF; Two ways to make SF - teach later; Another SF at 90 degrees; Creates spherical SF; 3I carries elliptical - why we see it; Other one carries unknown system - we will not teach - disaster for Man; 90 degree angle of separation - creates shape of Earth; Why I don't teach everything; Original flight systems used single reactor - used to show these UFOs in cartoons; Combination flight systems advanced - requires knowledge of Creation; R2 carry hundreds of millions from all races U; Had contact with this race; Here to interact with Earth - take passengers willing; Create spectrums & combinations of fields - able to carry different races together in peace; Puzzling why these two meeting; Many times on these crafts - we are Universal Teachers; R2 people able to understand cry of Souls - disaster about to happen on Earth - evacuate Souls; Scientists don't understand what their reports mean; Could be headed for nuclear war & annihilation; There's a secret to this - can't tell; KF Plasma systems are on - reading graphs; When told about millions on spaceship - your Souls flew to join ship - detached from D of P without knowing; See if you can transmute; Universal Community knows when disaster about to happen - rescue planets - evacuate to suitable place; R2 is evacuation craft; Been on board - not prisons; What is happening with Israel & Palestine & Russians; Or are they just passing through; Don't need to land - transfer Souls to ship; KS concerned governments might try to capture dissect Beings in 3I; Not to worry - can't be captured; Military & Intelligence trying to communicate with them - background - not public; Americans & others trying - don't understand; Opened this topic today for specific reason; These things work a totally different way; Problem is Universal peace and world peace of planet not synchronizing; Mr. Keshe not spokesperson for Earth; Shows video - gold being produced - Chinese Military July 2023; Tests ordered by top leaders - 3 Generals sent; Done on gold mine; Used old spinning reactors filled with Gans's; Gold particles rained down; How protective rock shield of 3I-Atlas created; Materials stick to spaceship - more processes; Need second field to form UFO; See gold particles in air - fall to floor - how Rings of Saturn formed; Gives 3-D structure to craft; Create third field get protective shield; No frequency - plasma uses field strength; Explained problem with Chinese Central Command - academicians stole T - changed report; Report shows all components that mean gold; Government admitted stole T; Lowest thing to call Chinese a thief - offended; Tested own samples confirmed gold; They want to make it Chinese invention; Don't accept Chinese academicians anymore - restructured; Government knows what academicians doing; Still massive progress in developing T; T stands on own merit; KF T - produce any materials - create right field in center; Mining finished; Poor people living in villages grow food organically; Others pay 3 to 10 times more; How academicians, scientists, elites - changed our lives - for money and prestige; ONN Units will deliver pure field energy - provide needs through field energy; Becoming sick, mental conditions finish; A lot of people trying to stop this process; Aliens freely give knowledge to Earth like Mr. Keshe does; Not afraid of patents; All knowledge inventions on Earth doesn't come from humanity - from outside; It's two way - share and take knowledge from Earth; No limitations in what can be done; Iran's religious leaders said - Israelis killed Iranian nuclear scientists - same time Israeli nuclear physicists and military people give

knowledge and T to Iran; In Space knowledge is free; Mankind will be haunted by what they refused from Mr. Keshe - but humanity not ready; Those who speak against us - we expose what they lack; Have to pay our own way in China - funds from contributions and sales - don't go to bank - need to get T out there; Dreaming of Aliens; 3 different types of dream - STM, STP, P; Feed P food - it feeds STM; Now T will feed Soul to feed P; Learning Soul is real; Monthly Flight session was earlier this month; Developing new material and system for next level of Monthly Flight sessions - ready in couple weeks; Be aware of what's going on - pending promise of whatever - Israelis sounded horn of change - end of 6,000 years - beginning of new cycle in Israel; Could lead to war; Hope we are all safe over the next weeks; We understand what these people are up to; I wish you all the best - be safe.

Introduction to 609 KSW - 3I-ATLAS & SWAN-R2 First Time UFOs Made Public - Why Has Meteorite Shell - KF Plasma T Same as Aliens - Want Transmutation - Swan to Evacuate - 17 Minute Pulse

Today's workshop is dedicated to using the Keshe Foundation (KF) teachings and knowledge of plasma to totally explain in detail about the so-called comets, of 3I-Atlas and SWAN-R2 that are converging from different sides of the Galaxy to pass each other on the back side of the Sun in late October 2025. To better understand this teaching please do some research on Internet about these two phenomenon's. We have posted some videos on the Keshe Brazil Telegram Group for your convenience. There is one in particular that nicely mirrors the teachings in this KSW whose title is '100x Bigger Object Just Arrived - and It's Targeting 3I/ATLAS.' The top scientists with all their titles from well known institutions don't know how to explain it, so they are ignoring the facts and calling them meteorites, even though they do not act like meteorites. The words of Mr. Keshe, that we Knowledge Seekers (KS) know more than the top professors is showing itself 'loud and clear,' because we can understand, explain, and show through the KF Plasma Science what and how these spacecrafts are maneuvering. It is a very interesting experience to watch these videos and hear them describing plasma in public, but at the same time it is clear that they don't understand the deeper meaning of what they are saying, or what's going on, and we do. It's unfortunate that they don't want to know.

First let's go over what is known in public about these two "meteorites." I hope I can remember correctly. Please excuse any mistakes. The 3I-Atlas was first spotted back in June and was thought to be a meteorite, except that it didn't have a 'tail,' which they are normally supposed to have. Then it started changing brightness, which the scientists didn't want to believe so they had all the stations around the world continually double checking their data. This indicated that it was probably not a meteorite. They say it has only a Nickel content, where it should have both Nickel and Fe together. And it is directly 'on course' to pass through our solar system (SS) in a specific way coming close to particular planets. This is not how random meteorites behave and there is a 1 in 500 chance that it would randomly happen this way. Therefore they consider the 3I to have intelligence and to have set a specific course. The next question is what is their reason for setting such a course? Our tendency is to want to see pictures so we can believe it. Unfortunately most of the pictures are made up and not real. So be aware of how they are

leading your mind to believe certain things. The videos don't make it clear which pictures are real and which are not. The name '3I' means it is the 3rd interstellar object they have seen enter our SS since about 2017, this means being able to track objects coming into our SS from outside is a recent development in science.

The object coming in from the opposite side is called SWAN - R2 because SWAN is the first telescope that started tracking it. They say this is a slower and larger moving object that makes slight changes in its course, which they think could indicate it has internal, what they call, plasma boosters to correct its course. That's why they don't think it is a meteorite even though both objects have a rocky outer surface. This one is having a green light shining out the front and a lot of CO2 coming out the back as exhaust. The biggest problem they have is that it is directly on course to intersect with 3I on the back side of the Sun in late October, where they cannot be seen from Earth. It's too obvious and now they know these are not meteorites, and the government is scared, so they have blacked out the satellites during the time when they are supposed to meet each other. This means no civilian organizations will be allowed to use satellites. It will all be controlled by the governments. However, many civilians across the world have joined together to share what equipment they have to keep trying to track them. In summary, there is enough information in public that those who can think for themselves, to know that what we call UFOs are rendezvousing behind our Sun in October 2025. What it all means depends on what we are able to comprehend and what we are willing to allow ourselves to imagine.

Now we can go back to the workshop and summarize how Mr. Keshe explains what is happening in terms of Plasma Science. Let's start with the fact that they look like meteorites and not spaceships. To prove this point Mr. Keshe brought out some never seen before video footage of his experiments with producing materials, or gold from the fields with the Chinese Military back in 2023. He said, they repeated this experiment 3 different times and in different places, and then again this past June in Beijing. In Beijing it was done openly in the public and we saw with our own eyes how gold manifested out of the air and formed particles on the white paper sheets and even created some clumps of gold on the tables. We might think, what does this have to do with spaceships? A lot. He even said that the Star Formations (SF) setup in Beijing was actually a spaceship. There are a few more processes to go through to manifest a physical craft. Many years ago Ali in Canada was able to begin the process of forming the fields of a spaceship, but never went to completion. We should try to fit everything into a bigger picture of M field interactions and not matter state aircraft production. It would require miraculous powers to build a spaceship 10 kilometers long. In Space there are no spaceship manufacturing companies, in fact, he said, they create these huge ships with reactors smaller than what was used in Beijing. That means the plasma reactors can fit in the palm of our hands. This is an advanced technology (T) that at the moment is way beyond what the Man will allow himself to imagine. By looking at the different videos being made on the Internet about 3I-Atlas we can see that nobody really wants to, or is allowed to bring this into the Plasma dimension (D) of what we are learning in KF. But in the background the governments know the only way they can communicate with these Visitors is through KF T. They are careful to keep the public ignorant, but they know that if they land on Earth

openly, then it will bring a change to humanity. In a way, the "cat will be out of the bag" and they won't be able to put it back in.

All the different pieces in the process of how to build a spaceship are presented in this workshop, but we have to work a little to put them together. The way I understand it is that building a spacecraft is a multiple step process that Mr. Keshe has been showing us gradually over the years. First is to be able to create the appropriate MG fields and to set them up in a Star Formation (SF) type interaction. KS have done this by using 3 plasma reactors setup in a triangle as a base, and then having one reactor on top to create a field flow. The details of this are all in the teachings and this is only one of the ways we were taught. Jon Bliven in Arizona was able to succeed in this step and he could feel the fields up to 200 meters outside the building. The fields were created but it requires more steps to be able to manifest it physically. That step is basically the same as how the body creates cancer from the fields of the emotions. Having said this, it means a plasma UFO is an entity with a Soul, a Soul of Physicality (STP), and a Physicality (P). It requires more interactions to create a basic UFO that can travel in a clean environment without rocks, meteorites and other debris in Space. When Mr. Keshe teaches he doesn't tell everything all at once, but unfolds the knowledge slowly so that we can contemplate it ourselves. The basic UFO structure cannot travel deep Space because it needs to have a protective shield. And this is what is confusing the scientists because they only see the protective shielding that is made out of rock and looks like a meteorite. This workshop is about proving to us that UFOs look like meteorites when they travel through Space, but inside them is a normal UFO we are used to seeing. When they enter a planets atmosphere like Earth, then that shields goes away. Maybe the change in MG fields cause it to dissolve and all we see is the shinny saucer shape or sphere, or even just light orbs.

So that we don't get confused, we can say that the second phase of building a UFO is to create its protective shield that makes it look like a meteorite. Mankind has to learn this if we want to travel deep Space. That's why we were taught creation of materials from the fields, because we are going to use that material to create the protective shield. The first part of this step is to create the material that rains down as particles. He did this with the Chinese Military several times and today he is showing us some of the videos and photos of it for the first time. This is all to prove to matter state scientists that a spacecraft can look like a meteorite, and that KF has the knowledge of how to do it, and we have successfully demonstrated it with major governments of the world.

In Beijing we only saw the particles of gold forming on the table. We didn't know that if he would have setup another reactor then they would have floated in the air and formed something like the Rings of Saturn. The process is being taught step by step. To prove this part he showed us the video of creating gold with the Chinese Military at a gold mine. Why a gold mine? Maybe because then the environment is saturated with the M field strength of gold. In the video we see that particles don't just appear on the table, they actually start forming in the air like rain. The next step is to get those particle to stick to the UFO and become the meteorite looking shield. By setting up a reactor to create the appropriate fields, then the particles would start forming like a rock material around the UFO. So first we would have to have the base UFO made and it would have to interact

with the particles. Then he showed another short video of a white material piling up to make a kind of triangular shape. If you pay attention carefully you see how the layers build up out of 'thin air' to create that shape. This proves that we can do the same to create a UFO covering. Now all of humanity equally shares the knowledge of the phenomenon we are seeing in Space and there is nothing to be afraid of, because we have and are able to do the same things ourselves here on Earth.

The green light comes from the Nickel field energy that radiates green. The other problem scientists have is that Nickel always has Fe in it, but this one is pure Nickel without Fe. How is it that the scientists know this? They were able to make instruments that take the light of a star they receive through a telescope and then run it through spectroscopy. The light has a spectrum of wavelengths and each chemical element has a unique "fingerprint." This is all done in the matter state and how they are able to tell what the composition of space objects are. In Plasma Science we use the energy of the M field strength and it doesn't necessarily need to manifest physicality (P). The field strength of the lowest isotope of Nickel is 56, which also happens to be the strength of Fe. So the essence of the field strength of the Fe is present there, without there needing to be matter state Fe, and that's why they only read Nickel, but the field strength of Fe is actually there. The high speeds of the craft which change is controlled by adjusting the MG field strengths. The craft is using MG fields attraction and not burning fuel and it is being pulled in by the Sun. Now if it wants to go to Earth then it has to use G field of Earth which is Fe 56. This craft is being pulled by the Earth through the Nickel - 56 as it is using plasma fields and not matter state.

NASA said, the 3I-Atlas has amino acids (AA) in its signature, and this means it has life inside. Mr. Keshe then showed a lab report analyzing the particles collected from the tests done with the Chinese Military. Those plasma reactors were able to produce a lot of oxides and all the elements needed to create life. I am assuming he was pointing to the fact that if the reactors produce what is needed for life, and if these crafts are using SF plasma technology, then they also have life inside them. Then he said when they enter the atmosphere of the SS they mutate to match what is needed locally here to exist. In addition, they pick up the intelligence, knowledge, and languages to be able to live here. They carry not only what is needed for physical manifestation, but also God's Knowledge of the U. He knows where they came from. The only way the governments can communicate with them is to use KF technology.

In the videos on Youtube I didn't come across the 17 minute pulse that Mr. Keshe speaks about. He has access to higher level information. KF has been able to create a 17 minute pulse, and found out that it creates emotions. This means whoever they are, they are learning about Man's emotions and can feel, think, and know everything about us. They are using a geometrical emotional system and can replicate human intelligence. The 17 minute gap means the cargo carries life.

Mr. Keshe offered some possibilities of what they are doing here like for example, they could be on an excursion to check out planets, and as the two spaceships are set to meet behind the Sun maybe they are meeting to decide what to do with the human race, or they

could be recharging near the Sun before going to another galaxy. But there is one thing he is pretty certain about, and that is, they want to learn the emotion of transmutation from humans. The transmutation part is strange since maybe only a few KS have learned to transmute with the Soul, but most of us cannot do it yet. Or has Mr. Keshe and the Universal Teachers already put the knowledge in our brain, and as he said, they want to 'pick your brain' for the emotion of transmutation. But at the same time he said, in the U, 'thy shall not steal,' so they cannot forcefully try to take the knowledge like humans do. They are not hostile and if they meet with us, we'll need one person to represent the whole 9 billion of us. Is there even a human so elevated that could handle such a responsibility? The 3I is capable of landing in Earth's atmosphere to meet with human leaders, but not the Swan which is more like a transport ship able to carry millions. With the Israelis blowing the horn of Moses, together with Fundamental Christians pushing in the background for Armageddon to start, and then these guys from the U showing up suddenly, something big is in the works. The question is can humanity receive a burst of Energy that could mature us enough to start a new Cycle? At the end of the first half of the teachings he said we should be ready for surprises and change.

He started the second half by partially explaining why they are seeing large amounts of CO₂ from the crafts. It's difficult to understand but it has something to do with them being advanced systems that converts C14. It only looks like CO₂ from their matter state instruments, but it really is 2 reflections from the same atom. It has something to do with C14 and O14, and it only appears as CO₂, but I maybe by wrong. This is the disadvantage of being limited to only the P part of the Knowledge of Creation.

It sounds like the One Nation Network (ONN) has grown to 10 Units around the world. I am assuming that this is only the initial infrastructure being set up, but it still impressive. Who knows, maybe even the infrastructure could change the planet. Let's hope thousands of KS will take up the obligation of saving the planet and start purchasing more Units. These Units will have the Universal Plasma Antennae and can communicate with 3I and the rest of our U Family. This system can convert human language into the language of the Soul. These Units can never be replicated because they are designed to be the cornerstone that brings world peace.

I was wondering why Mr. Keshe was stressing that when they were showing the planets orbiting the Sun in perfect circles, that these images are not real. They are made up so it is easier for people to accept what they are saying. When the planets orbit around the Sun the MG field interactions change and this causes them to be all over the place. They are not in perfect circles. In addition, they are going up and down in their flow. So it makes me wonder how they are able to predict the exact position a planet will be in for navigation of spacecraft. This is not a problem for traveling with plasma since it is done through attraction and repulsion of the MG fields. The planet automatically pulls you into its center. If the civilization doesn't know transmutation then they would have to use smaller versions of themselves as shuttle crafts to exchange things between spacecraft and on planets. Or maybe they can use plasma technology to transport objects without knowing how it works. Scientists have already seen 3I split into smaller versions of itself, without understanding what they were seeing. Will these shuttle crafts be visiting Earth?

There is more about the Swan - R2. He has had contact with this race and has been onboard their ships many times, and when he first saw their ship here his stomach fell. Because they can hear the cry of the Soul when there is trouble on planets. Their ship can carry hundreds of millions of Souls and can create a spectrum of M field strengths needed for each race to live onboard, and they do so peacefully. If this ship shows up it means there is a possibility that the planet could become uninhabitable. The situation that is happening with Israel and Palestine and then the Russians, does it mean we heading towards nuclear war and annihilation? Beings in the U through their Souls are aware of what's going on everywhere and they respond by helping. The rescue ships evacuate Souls to another suitable location in the U.

The KF Plasma Systems have been on today in the background and he shared the graph with us of what happened when he started talking about the Swan being able to carry millions of Souls. The Souls of the KS immediately separated and became detached from the STP & P, and wanted to be part of the Swan. In a way, now we are connected to the ship, so if something does happen on Earth we could easily be lifted off to safety. Interesting in the Bible it says something like, two men will be in the field, and one will be taken and the other left. Let's pray that we can bring the change. But another disturbing thing Mr. Keshe said was that, the structure of the world peace and Universal peace have to coincide. But on Earth the two are not synchronizing. In the Universe nobody harms another and life is a God given right. The intellect of each race has to be kept.

Again Mr. Keshe explained in detail his experience in China with the academicians stealing the technology. In this case they actually changed the report, but he outsmarted them. It is well known in the Chinese Government that the academicians are 'taking the nation to ransom' by not allowing the T to come out. However, now he has found a way to by-pass them and does not accept them anymore. The T is strong enough that it stands on its own. Regardless of this situation, China is advancing in the technology. He has offered to collaborate with the Chinese government to communicate with 3I, and if they don't want, he can try working with NASA and the others. In a way, this is the first time the public is encountering intelligent life from outer space. Let's hope the governments and the people will handle it in a way that will bring peace and prosperity to all of us.

Other Topics:

Not all of the knowledge humans have comes from Earth, much of it comes from outside. But at the same time it is a two-way exchange of give and take of knowledge from humanity.

Thanks for listening.

Quick Index

(Humanity has come to face with something impressive that science is giving all sorts of names to meteorites like '3I - Atlas,' and 'SWAN - R2,' which is puzzling the world of science. NASA scientists are scratching their heads because it is something new that they have never seen before. These don't behave like normal meteorites. They make directional flight, and have lights in the front and the back, and material in the front of the craft. They create a 17 minute gap between the pulses and all sorts of information is coming out. These are intelligent systems (that look like meteorites). Are they pre-set to be here? Initially there was one, and then it became two. And now according to some data, there is a whole fleet of them. They can split themselves, and now there is talk that they're both heading to the back of the Sun. We may or may not see them coming out after a long time. We are hearing all sorts of things about them).

(I dedicate the teaching of today to this subject, because I've been following this for the past few weeks and have been waiting for it to become exciting in being able to find solutions and answers. Every piece of what the scientists are talking about these structures have been covered in different teachings and conferences over the past few years. They've been referred to and shown. What you as Knowledge Seekers (KS) know is more than the scientists of NASA and the others know).

(I asked different KS who have been doing the transcriptions to find where different pieces of this information comes from in the teachings. We spoke about this subject over the past two years and also this past May in Beijing. We also have analysis reports from laboratories and videos have been recorded that gives all the information. You KS are more advanced than NASA, European Space Agencies, the Chinese, and the rest of them).

(These objects they are tracking are really UFOs and it's the first time we are publicly encountering them. It's the first time we have the tools to observe them. Because they are using dynamic systems they can travel at high speeds of 70,000 kilometers per second, which is beyond what we have on Earth. (This is what we have been saying about the Plasma Technology that we can travel to the Moon and back in a minute or two. This is what the scientists are now observing with these, what they are calling meteorites. They are trying to find a way to communicate with these structures. The ?? structures can communicate, download, and see everything).

(?? We have seen that some of these systems are communicating and interacting, because they have interfered with some Military satellites in the upper atmosphere and they don't know why. They interfere because they work on the basis of Plasma and Magnetic (M) fields. Jamming communication systems are one of the properties of plasma and being able to cover themselves up. This is the way the drone was captured by the Iranians. This is how we fly without detection. This is how the lights are created. One of the biggest puzzling points for scientists is why one of these systems has a greenish color. And the other one has a huge amount of CO2 exhaust in the back of it. It's very unusual to have such a large amount, and the rest of it. (We know exactly why they have these things and can travel at such high speeds. They wonder why there's no control ??. In today's

teachings we'll go through these processes step by step. We have covered all of them over the past 20 years)).

(Are there living creatures with these systems? How come they can mutate? How come we see amino acids (AA) in these structures? How come they can create geometric dimensions and information? (Instead of seeing a bright light in front, we see a green light). Matter state aircrafts always have the exhaust coming out the rear. With these UFOs we see lights in the front from interactions of the fields. It's because they create a M field in front (?? to eliminate obstacles in the flight path) and they create a dynamic situation, like the atmosphere. It burns up anything in the way. They always fly into the vacuum of the system).

(What is puzzling the scientists is something that KF has already taught in all of our public teachings. Why is this structure moving towards the Sun? Why is it slowing down and changing directions. This structure has a very simple embedded system in it. He then starts drawing on a Whiteboard. The structure has a dynamic magnetic gravitational (MG) system in it. (The interactions create light. He draws a saucer shaped UFO with circle in the center). This version is not a very advanced system, but it is intelligent. The basic structure of the system is a regular UFO, but it is able to create a rock structure around it as a shield for traveling at high speeds through Space. This is why we see it as a meteorite. In a way, it's a primitive systems of Space travel, but on the other hand, it's one of the most useful ways to travel).

(The outer meteorite looking cover of the UFO is for high speed travel through deep Space. But when it comes into a local environment like Earth it converts to those shiny disk shaped UFOs which is inside the whole structure. Man has never known about this before that's why we are confused about it. Inside the earth's atmosphere is clean and without rocks and debris so the covering is not needed. Most UFOs fly with this stone covering when traveling the U. We see a lot of dentations around the outer border of the craft so they look like meteorites. Inside the craft is a highly intelligent system. There could be as many as 20,000 living things inside these crafts, especially the big one. (They appear to be going to meet each other. Most probably we will encounter them on Earth. That's for sure. There is a reason for them to come, it's not just happening randomly. We'll look at it in a very scientific way).

(When we cross the U in a UFO we create a meteorite looking outer shell that is a protective layer for deep Space travel. If any objects hit the craft they get embedded in this material in the outer shell. They are saying it has a green light in front, and we know that is due to Nickel, which at a high level radiation transfers energy that makes a green light when it's a M field. This is why we see the green light. When the structure enters the Earth's atmosphere for sure it will lose its outer layer and we'll see the saucer UFO).

(If there is a plan for them to meet with humanity, then they're on their way. The bigger structure is call the R2. ?? This will be Earth's first (official and maybe public) encounter with what you call, Aliens. All the scientific data indicate it. But how will we communicate with each other? What is the next step in this process? We have shown you

how to build this protective structure around the UFO. You saw it, but you never understood it. You were puzzled when we setup the Star Formation (SF) in Beijing and produced the gold materials from the fields in public. In reality, that was a UFO. (In essence, this is what is inside these structures. It's how they create the rock material around themselves. Humanity needs to learn this)).

(In Beijing during the 3 day conference we showed you the production of materials from the fields using a Star Formation and old spinning plasma reactors. The materials started forming on the table and were collected in a hundred spoons and given to those who attended. This is the first time you will see this next video taken by the Chinese military at a gold mine in July of 2023 in Northern China. There was a third demonstration in Jindao by the Chinese government, military, and the rest).

(In Space they don't have UFO manufacturing companies, instead they are created from the fields the same way we showed the creation of materials. Some of these UFOs are 10 kilometers long. They are actually created by reactors that are smaller than what we showed in Beijing. You create the shape of the UFO by positioning the reactors and changing the M field strength, or by creating specific distances, and that gives you the UFO shape. (The first level of producing a UFO are creation of the fields and you confirm size of craft you need, then you change to the second level, which is what you saw in Beijing (where we created the material). Then you change the dimension (D) of the systems into the material size and it rain (particles) all over according to the fields, then with the dynamic structure of the fields inside it makes the shape of the UFO). This is how these UFOs are manufactured and developed. (The UFO is the center and then for Space travel you create a protective shell out of stone, and that's what we see as meteorites). But it actually has intelligence. (?? When you add the third parameter it allows material to form like rain. Then you make any structure you like). (I imagine the builders use their emotions to create the shape they like)).

(?? A craft that wants to go to Earth needs to have a M field of the metal of the Sun to pull it in. For Earth we need Iron (Fe). This Fe has the specific characteristics of the field strength of 56, ?? and the green color of 3I means it has Nickel, ?? which has a radiation level of 56. He calls it N56. ?? The structure that is going towards the Sun is creating a GM field of 56 and so it is traveling by being pulled into the Sun. It doesn't burn any fuel. It creates a M field (of 56) and gets pulled by the MG field of the Sun. The scientists say it is traveling at a high speed. This is because the entity, or individual, or the Soul, or whatever is in charge of it, is creating a dynamic fields of Fe, at the Nickel (?? isotope) strength of 56. This is why it's green. The craft changes as it approaches the center of the Solar System (SS). Its speed continuously changes. It changed when it entered the SS. This craft is heading for Earth).

(I'll show you how these big dentitions were created on the surface of the craft to make it look like a meteorite. It's exactly how we did it with creating the materials and we have a video of it. They show the video. We create the right M fields to create the right structures. It literally starts forming around the center of the craft inside. (?? First it creates the dust particles and then curvatures, patterns and shapes. The pictures and video

is from what was done in China in July 2023, and it was repeated a second time in 2024, and the fourth time in the Beijing conference). (The materials rain down from the air and create the structure around the craft, they stick to it and that is how we make the protective shell)).

(Mr. Keshe goes on to describe the images. Please watch it for details. The particles rained down and formed into these bigger shapes and inside them is Carbon 14 (C14). We can produce different materials according to what we need. We can see the pile of material on the table. (If we create a dynamic system in the air, then this material would stick to the dynamic structure of the fields and become the solid body of the spacecraft). It doesn't fall on the floor. (In a further step we can shape the material. These pictures have never been seen before. It looks like a solid structure. These are mono materials and they form these hills, or like a horn. It does it by itself on the surface during the process of production. This is how these meteorite looking UFOs are created)).

(At around :44 minutes a white shape is being formed on the table out of nothing. It's very interesting and proves everything Mr. Keshe has been talking about. Watch it carefully and you can see how it just starts building up layers of a shape out of the air. It's very subtle you have to pay close attention to it then you'll see it). It just builds up out of nowhere. We have a number of videos like this. It means building a structure (out of the fields) is not difficult. (This is how systems, especially like 3I were built. But inside the rock structure sits a UFO as we are used to seeing)).

(Now we are 100% sure this is they type of system inside these two meteorites. It carries a Star Formation (SF) made of the reactors we showed during the Beijing conference. Not the obsolete spinning reactors on the tables. But the silver sphere reactor with the red tubes coming out of it. He has never displayed this reactor, but he started showing us photos of it. That is the type of reactor 3I is using and they are setup in a SF).

(The NASA and other scientists tell us that these objects, and especially 3I have amino acid in them. Then Mr. Keshe shows the lab results for the Chinese Military from November 11th, 2023 that has the official stamp by the Chinese military. The results show the materials formed by the reactors contained Copper, Zinc, Iron, Selenium, Nickel, Magnesium, everything else in it. The most beautiful part is that we see all the Oxygen's, there is SNO₂, ZNO, COUO, FEO, and more interesting is the Gold and Carbon 14. This shows that system's process systematically creates the materials needed to create life. It produces (them) in a shape of itself. This is the cornerstones of life on Earth. (?? When these craft (3I and others) enter the atmospheric condition of the solar system (SS) they mutate to (its conditions). (?? It picks up the information, knowledge, intelligence, and languages needed for this SS, and at the same time it carries the 'Knowledge of the Universe.' It's extremely intelligent because it has access to the knowledge of Man, and can converse in our language, knows what we think, but it also has access to God's Knowledge of the U. It knows where it came from. For sure, the technology (T) carried by this system at an intelligence level is much higher than ours)).

(The only way citizens of Earth and our governments will be able to communicate with these structures, is if they decide to copy the work of KF. Will they decide to approach us? In the past few days the scientists are saying that structures disappear for 17 minutes, and during that time they disappear from all the radars watching the SS, U, and the rest of it. There is a reason that these crafts are using a 17 minute cycle. We know this because we did with you in one of our test. It's recorded in our data. The 17 minute cycle creates emotion. So these Beings, whoever they are, are learning about the emotion of Man, how we feel, think, and everything about us. We see a geometrical emotional system. (It's absolutely no problem for them to replicate human intelligence)).

(The question to be answered is, why now? Why at this moment and why humanity? (The satellites are showing that there are a large number of (these crafts) following after 3I, but a lot nations are blocking this information from reaching the public to not create a panic. They all carry the same intelligence and follow the same root structure. (?? Now we see that all these KF teachings are bringing Man to become part of the Universal Community). We are understanding and becoming ready to join our family. As I have said many times, (the knowledge we are teaching humanity is one step ahead of what we see in these crafts). (We said, those who are traveling in UFOs do not have the knowledge of transmutation. And we are giving this knowledge to Man now. Are they here to learn from Man how to transmute? Because for sure, they already know how to transport physically))).

(?? The UFO on the other side has the characteristics of being the mother ship. It's very possible that the two of them are from two different parts of this galaxy, or the U. Maybe there is a meeting similar to our Universal Council taking place here to sort out the human race. As I said, we are here to help Man become part of the Universal Community and I have taught you enough to be ready for that. (Some of you should be able to understand the knowledge and not be baffled by what they are and how they are presenting themselves. And we can understand how they are traveling at these kind of speeds))).

(Outside the Solar System these crafts travel at a much higher speed and that's why we never have observed them, or discovered from which point they came from. They only became visible to us when they reduced their speed to enter our SS. Otherwise they would have flown right through it. The direction of the fields of especially 3I shows it's moving towards (making a second split of itself, and there's going to be a third split, as they are sending out satellites. They send out smaller versions of themselves to most probably land on the planetary systems. We should see more splitting off of subsystems. But the scientists don't understand that these are UFOs looking like meteorites))).

(Suddenly, a lot of information has become scarce, because the governments are afraid of what is coming in. (There is a whole fleet of them, it's not just 3I anymore. It's 3I and a few hundred "babies" behind it. The purpose is very clear and through the KF technology we can communicate at their strength and convert it to the language of the Man. We are building systems for this purpose now))).

(You KS have the knowledge to understand what's going on here. Are you ready to meet your Universal family? Are our governments ready? When these people come they'll ask for one person only who is trusted, and he will be placed by and through them on this planet. That person will become the spokesperson for communication between the Universal Community and the human race. The obligation of obedience comes out of respect and not fear. They will rule through emotion understanding, but have also a physical presence. You KS have been taught how to command the emotion through the Soul. So the human race is centuries ahead of these people. They're still depending on UFOs when many of you have been able to transmute).

(My hope is that humanity understands and will have the knowledge to understand this. And that we are all able to handle this. Are our governments ready to handle this? We have seen these (crafts) jamming our computers and electronic systems, and making themselves disappear, and we know how it's done. We've seen these people traveling at speeds beyond what we know. The human race is ready for this and it has no choice (but to start this new cycle), if (we) decide to meet the men of the U. This time (?? they) are not looking for how the pyramids were made, or at anything else. They (want to know how to access the knowledge of transmutation)).

(They want to know how you KS are able to transmute and what is needed. You are the 'darlings' of Space at this moment in time. The law of the U is not like Robin Hood during the time of Queen Victoria when the poor stole from the rich to give to the poor. They work on the ethos of, "Thy shall not steal." But this time humanity has the knowledge and the upper hand in being the teachers. The only (problem we have is that we are not yet a peaceful race). (If you understand the knowledge that has been shared with you, then you are centuries ahead. We have taught mankind transmutation in the essence of the emotion of the Energy. And in this process, we have learned a lot)).

(What concerns me is why 3I is holding to its cylindrical shape. Why hasn't it opened up into a spherical shape? It's traveling at high speed because it needs to. (?? This was written in Book 2 about the highest speed travel). That's why it's doing it. It doesn't need a broad shape. When it reaches Earth it will go into a spherical shape. We'll monitor especially 3I, which is equipped to land in atmospheric conditions. The other one called, the SWAN cannot land, because it is too big and it's the mother ship. (?? The other one is one of his children). We expect the two to meet somewhere. Maybe it will be behind the Sun so we cannot see them. (If they came this far they're not scared of you seeing them anyway). Or will they rendezvous in the SS or Earth's atmosphere? Is there a plan to land on Earth? The speed has been reduced and specially and 3I reacts to intelligence and communication. It's a dynamic system that carries GM fields and has the ability to produce AA, and create your ?? without your knowing).

(It will be interesting over the next few weeks how the governments will react, and how we as KS understand this. This is the first time we can watch a UFO go right through us. From what we understand these systems should not convert. They are on a track, or going to rendezvous, or are living in the SS, or maybe releasing a couple of smaller crafts to land on Earth or Moon to explore. But they have a bigger job with 2 or 3 reasons.

Possibly they'll land. (Is their trajectory going out towards another galaxy? Is it just like refueling or exchanging something? They're not scared of us. They don't need to go to the back of the moon to change clothes. They are the beach lovers, they do everything in front of the Sun)).

(It's interesting how with the KF T we can understand what is happening, but it is a puzzle to the World of Science. (They still oppose us and don't understand our T). Because if you understand our T then you'll understand these crafts. All of you do, because you've (worked with it and made the systems). You've seen it, and some of you are part of this development. It's not just me saying something to you anymore. It's not just our thoughts. We showed you the production of the materials from the fields in Beijing. If we would have created a different combination, or set of fields, then these particles would have been floating instead of falling to the table. They wouldn't land, because of the dynamic fields, they would have floated at a given orbit, like the rings of Saturn. And you would have seen a structure they would have created).

(Be ready for a lot of surprises and changes. It's possible that for the first time mankind will come face to face with the citizens of the U. We'll see them as the passengers of these spaceships. We might feel their existence, but for sure, these crafts are here to bring a new change to us. (But at the same time with what you know as the human race, they're here to 'pick your brain' for the emotion of transmutation). Because if they would know transmutation themselves they wouldn't travel in these old out dated systems. (For NASA, American scientists, Chinese, and others it is something unbelievable. We always told you, that you can travel at the speed of light. ?? These crafts are doing 60,000 kilometers per second. If they would have gone faster we would not have seen them. ?? It would have only been a light)).

(We'll meet the men of Space. These are much more intelligent than Man, but they have managed to understand the flight system and were able to build it. (We think they came here to find out about transmutation. That's their problem. Up to now you've been following after the others in Space, now they are following after you. (Hopefully soon you'll understand how to transmute)).

(He shows another video. If you add a balloon of the fields in the center of this ring, you'll make a UFO. And if you add a second dimension of fields, as you saw the Copper, Zinc, Nickel, and everything else, you will produce it as an outer shape. It will be like hiding yourself inside it. The materials will rotate. I'll explain why they rotate in the D of P sometime in the future. And why its other partner is actually moving in a different shape and size, and they have a rendezvous. Would we see transfer of light objects from one craft to the other? Would we see amalgamation of the two, that one enters into the other? Or would we see them crossing each other, like two ships on the oceans? Either way, the fundamental knowledge of this T is in the hands of the humanity and we understand it).

(We have offered ?? the Chinese government and Military this morning, if they want to do. Or we can shift it back to the US and NASA to collaborate. ?? We'll use our plasma

systems and other agencies like the Iranian Space Agency to replicate their system and communicate with them, and the rest of it. What we showed (?? in Beijing) was impossible, now it's been seen (?? out in Space). The knowledge has to be understood and the KF Knowledge Seekers have the knowledge. There is no need for rocket propulsion. We just match the GM fields of the Sun. We don't need to burn anything. That's what these crafts are using. (The governments are scared of what they are observing and they are censoring a lot of things and data they are receiving from these crafts. ?? They are calling them meteorites. ?? Now it's been accepted)).

(This is the first time we are encountering another intelligent life form from the U. It can change (shape) and it has amino acid combination. It has intelligence because it changes position and continuously reacts. It is an interactive system, and it can only be interactive if it has intelligence and has life within it. Maybe I'm wrong, maybe I'm right, and maybe if they decide we'll have the pleasure of meeting another one of us, as created things of the Creator on this planet. We didn't know we have a bigger family and are part of a bigger structure. (It depends ?? if the 3I will land)).

(It's interesting how they disappear. There is a reason for the 17 minute pulse. We know it fully and have tested it in our systems. (We have tested the 17 second (?? minute) phenomena for a specific reason. We wanted to understand how this factor of 17 affects us and works in our system, and affects our position. There is a reason we use 17. We tested this on the 6th of May. One day I'll explain why).

(This is an internal communication within the KF research team and we understand the reason for it, and why scientists are seeing a 17 minute pulse. This is important to a lot of our work, because 17 has a significant scientific reason. It has a psychological effect and specific characteristics on the body of the Man. It does a lot of things which bring a lot of emotions into play. Later I'll show you what the 17 minute gaps mean, what it does, and its purpose. When I saw the NASA report with this 17 minute gap, I said to myself, this cargo carries life. Because this is the characteristic of life, and it's part of our knowledge. This is one of the communications of the KF. During tests we say, keep that, and now add this to physicality in five minutes plus the 17 gap. You'll see it on the graphs).

(It means we are dealing with living entities above us, and they are from another planet in another part of the U. We understand their technology. We are far ahead in every aspects of their knowledge. Unfortunately, our governments prefer to ignore it, because 'ignorance is bliss.' My feeling is that these crafts are not hostile, but curious to know how they can interact with humanity. If they were hostile, they would have made a different move and used a different gap and different configuration. It looks like they are homeless, or like someone running to see their mother. They have the characteristics of being curious, because they are releasing little (ships) to land and enjoy. It's just like going on an excursion)).

(I hope humanity is ready for what is to come and we'll be peaceful enough to meet our fellow citizens of the U. Then together we can move into the next level. We are hungry

for peace and to become part of the U. The appearance of these crafts is coincidental with what's happening in the human race. Are we ready to accept the change?)

(If we add the additional system inside (that system), we can create dynamic fields of a space gap, structure, and material production. This is one of the characteristics of this system. The Mother Ship cannot land on Earth because it's too big and will affect all of us if it does. The MG fields it brings into the upper atmosphere will damage all of our communication systems. Possibly, there are smaller spaceships that can land on Earth because we've seen it already divide. The scientists don't understand it. There are pictures on the Internet showing it split. They will land on Earth, because if they pass through they might damage some satellites. We have some 15,000 satellites orbiting around the Earth. ?? If they land we'll see a new cycle).

(Most probably they'll go through the North or South Pole because there is less satellite interference. This is why we see a lot of UFOs in Argentina, and the Southern and Northern Poles, because the M fields are stronger and there are less obstacles. Let's see what comes up. We have the knowledge and understanding of the knowledge in our hands. It's how our governments will react to this amazing interaction between the Man and the Men of Space. I don't think we'll see a human face, but we'll see a face of the Universal Community).

End of Quick Index Part 1 - 609 KSW

(Mr. Keshe briefly talked about the work going on and they are trying to get these ONN Units out. They want to start developing the Microchips with consciousness using Pico materials, which will immensely change the world of computers. KF is working on systems that will be able to communicate with 3I - Atlas, SWAN, and R2, and be able to convert into the language of the Soul. We are producing materials. In regards to the ONN Units, no one ever can replicate these systems. One day we'll tell you the how and why. This is why they'll become a cornerstone for world peace)

(They show the 3I Atlas from Wikipedia and Rick tells about the image and the brightness of its coma, which they say is due to gas molecules. There is a trajectory of how it will pass through the Solar System. Mr. Keshe annotates on the image. He says, that they made up this image to create an illusion for the people to understand. It's not real. This objects don't actually orbit perfect circles, they are all over the place and secondly they flow up and down as they orbit. The Sun and Earth do also the same thing when they orbit. These pictures are made for public consumption and not reality. We are dealing here with a three-dimensional structure and the UFO is passing through it. Let's watch and see how it reacts when it passes the Earth).

(He goes further on the discussion. Is there going to be an encounter when R2 crosses? Will there be a transfer to the ship, or between the crafts when they rendezvous, like how aircraft carrier use cruisers next to each other to exchange Officers? It is not coincidental what is happening between these two crafts. We've seen 3I change course, speed, and it vanishes and comes back. They are intelligent and playing all sorts of games like they are

on a mission. I explained in past teachings that everything is calculated before traveling and they don't change course. They decide on every star, planet, and SS they'll go through. Every trajectory is calculated, adjusted, and this system is adjusting itself many times. It has intelligence and the fingerprint of AA of life. This is what is scaring the hell out of the people in NASA. They see that it has a living intelligence inside it. What's their purpose? Would one come on this side and deliver something to the planetary system? We are only humans, there are other things they will be interested to see like phenomenon of the moons of Saturn, and all the other things. They are on an excursion and would like to see as much as possible).

(Their speed and shape of craft is in line with the knowledge we have at KF and we can replicate it. I've seen some of the NASA pictures and they are getting hit by many meteorites and other things. But they have that protective shield. This is the first time we are seeing a UFO with the "clothes" of the galaxy and not just the atmosphere of this planet. It does not matter how many layers you add to the 3I system. They cannot be from a very advanced or intelligent people, compared to the rest of the knowledge in the U).

(By its behavior it looks like a newcomer to Space travel, because there are more advanced systems than this. There are newer versions of Space travel by more advanced citizens of the U and they use a totally different Space T. They use multi-layering instead of this kind of a jacket (over the craft). It's like traveling with a donkey. But even this puzzles humanity, because we haven't even managed to learn to walk yet. It doesn't have a nuclear system. When I hear the scientists talk about a high temperature nuclear material, I laugh, did we use any nuclear material in our systems to produce gold in Beijing?)

(It's not a very advanced culture but they have managed to achieve Space travel, and most probably we know them. It's very easy to confirm. There are reports of a green light in front of the craft. These people have a shiny green skin, and have intelligence. They have moved into a different dimension of intelligence. And they're traveling across the galaxy, and they added some jackets for protection. The R2 definitely shows those kind of characteristics. It's very intelligent, and a slow nomad structure. They have been in Space for billions of years. Whereas the 3I shows advanced knowledge, but it's still using an old system).

(It's like somebody taking a 1950s Chevy and taking a trip around the world. But they know what they're doing. I am monitoring the data being released by different agencies very closely. I have a good indication what these people are up to. (The Space Agencies don't understand and they don't accept what I say, and the rest of it. They might have already landed on Earth somewhere. One of the indications of it is that there have been satellite disturbances, and blackouts, which means they have entered into the atmosphere. The Military and high altitude satellites have gone blank in certain government systems)).

(The Nickel in this system is C56, which is a plasma field strength and doesn't need to show matter state Fe and the Fe plasma strength is 56. The lowest isotope of Nickel is 56, and it is in the energy form. The green light confirms it. We produce this material in our

labs. Nickel 56 replicates the GM fields of Fe, which again goes back to Oxygen 16, which is a replication of Carbon 14 to Carbon 16. I've spoken about Carbon 16 a lot in the past. (Then you see isotopes that behave like deuterium. Our scientists say they haven't seen Fe, because they don't understand and are narrow-minded. If the craft goes through a SS and through a star it can change its composition to different M fields. It would have been blackish, or gray silver blackish, which is a sign of Deuterium)).

(This is the reason the R2 shows us CO₂, because it is going to go close to the Sun. It's a Universal system. I will not teach it, because Man is not ready for it. These systems have no physical dimension in their reactors. They are the Sun themselves, and I spoke about this before. It's an extremely powerful old system with a single spherical flight system. This is why it has this shape and does these things. It has a Star Formation on its boundary, (but it's a different type of SF. There are two ways to make a SF in Space, but this is for the future when Man matures. I can easily do it here). (?? It has another SF at 90 degrees to the others, but the central gravitational point is more or less the same value. It creates a spherical SF. This is what R2 has. Our new Knowledge Seekers are not ready for this knowledge. (?? It has something to do with the combination of C14, and CO₂. They don't understand this knowledge yet)).

(The 3I carries this combination in the elliptical and that's why we see it. (?? The other one carries an unknown system, that we will not teach, because Man is not ready and it would be a disaster for Man. It sits on a specific plane in a 90 degree angle of separation, which creates the shape of Earth. Now you know why I don't teach you everything. The original flight systems used to be one single ?? reactor, they used to show them in cartoons. These combination flight system are very advanced and requires knowledge of Creation, in every shape or form. It can carry hundreds of millions of passengers from all races (of the U). I'm 99% sure, because I had contact with this race. These people are here to interact with Earth and take passengers who are willing to go. (?? They can create a combination of fields and spectrums that allows them to carry many different races of the U together in peace. This knowledge is far beyond humanity, and even the 3I race. What puzzles me is why these two are interacting with each other. Why are they meeting like this? I know because I have flown around with these systems many times). We are Universal Teachers, and we have traveled the span of the Universe).

(What bothers me with the R2 people is that they are able to understand the cry of the Souls. The scientists don't understand what they are reporting, but they don't understand what it means. (It could mean there is a disaster about to happen on Earth and they're here to collect Souls that need to be evacuated. Are we heading for a nuclear war and annihilation of the Man? They are here to help us by evacuating Souls. There's a secret to this and I know 99% is correct, but I have to stay silent. Is the human race in for a big shock and that's why they are here? The 3I does not bother me as much as the SWAN does. It's a 'black swan.' (Silence)).

(We have the KF Plasma systems on and we are reading the graphs. When I said to you that there are millions on this spaceship, you all panicked, and your Soul flew. A lot of you have detached from the dimension of physicality without knowing it. Some scientists

are trying to explain what is happening but they don't understand how the plasma works, so they can't explain it. The red arrow on the graph is when I told you this spaceship carries millions of passengers. The line for the Soul goes above the P. It means your Souls want to be with them on the spaceship. The most interesting part is how the STP moves towards the STM. You are all yearning to be part of (that ?? process). You learned transmutation, now see if you can do it).

Q: What does it mean the R2 can carry millions and they're here to collect? Collect what?

K- (I explained this before in the teachings that the Universal Community usually knows when a disaster is about to happen and they rescue planets by evacuating the citizens to somewhere else that is suitable for them to live. They know when there is a possibility of annihilation, destruction, or changes on planets that will not support life anymore. The R2 is one of those kind of spaceships. I've been on board of these spaceships and they are not prisons, they are facilities to carry Beings to somewhere else in the U that is suitable for that race to live. When I first saw the R2 here, then my heart fell, like when you can't swallow. I had that feeling. Especially knowing what is happening with Israel and Palestine and the Russians. These systems like R2 are aware of these kind of things).

(Are we about to annihilate ourselves and make this planet non-livable? This is my concern. I know why these type of spaceships move and why they would come here. Or are they just passing through? These systems do not need to land, they can transfer Souls from where they are. Landing aircrafts and things like this is the habit of the Man).

(A KS was concerned that the governments might try to capture, torture, and dissect the Beings in 3I, if they are here to make contact with humanity. Mr. Keshe said, not to worry they are more intelligent than human and can't be captured. We know that some Intelligence Services and Militaries have tried to communicate with them. There are a lot of things going on in the background that are not known to the public. A lot of effort has been made to communicate with them, especially with the Americans and the others. (They should respond soon. There has been a response. Everything is geometrical, everything is dimension. The scientist and our people at the top don't understand the structure, or how these things work)).

(I especially opened up this topic today for a specific reason and you'll understand in the coming time. I don't do things just for the sake of doing them. I never prepare for teachings, but for today I had to go and prepare things. Those who have the knowledge understand, they know what the next step will be).

(These things work a totally different way. The structure of the world peace, and Universal peace have to coincide, but the two are not synchronizing with each other).

Q: Mr. Keshe are you going to be spokesperson for Earth when they come?

K- I'm nobody. We are Universal Teachers.

(They show the video of the gold being produced from the M fields of the environment with the Chinese Military in July 2023. Please watch it on your own. I will summarize the main points. These tests were ordered to be done by the top leaders of the Chinese government and 3 Generals were sent along with Mr. Keshe to oversee the tests to create gold from the fields. It was done in northern China 10 meters from a drill hole on a mountain where they were mining for gold. In other words, the environmental fields were pretty saturated with gold. They ran the old version of the spinning plasma reactors filled with Gans's. The gold particles rained down all over the room and outside. This is in essence the same T used to create the protective rock shield of the 3I-Atlas spaceship. But to get the materials to stick to the spaceship there are more processes to do. In the video you can see the gold settling on the mirrors, floor and wherever. You can see it raining gold dust and everyone was wearing a mask).

R: Does that dust form a particular structure or shape?

K- If you create a field in the system, then it will take the shape of a UFO, yes. But we need a second field (to interact with it)).

R: Do the particles keep re-circulating or do they fall to the floor?

K- (They fall to the floor. Now we can clearly see the particles in the video as one person is blowing smoke to make them more visible. There is no wind or air circulation in the room. It's just materials being formed out of the thin air, the gold is irrelevant. If you have a second field from another system you can hold the particles at a distance, and it will form like a ring of Saturn. That gives it a three-dimensional structure of the body of the craft. If you create a third field, then you'll get what we see on this I3 and R2. It converts plasma into matter. But you've seen this in the daylight collected in Beijing. Now you see it in a physical dimension). (There is no frequency, this is plasmatic field strength)).

(Mr. Keshe explains how they ran into huge problems with Chinese Central Command, when they tried to steal the T. These tests were done on the order of the Chinese Central Command Military Center, which is headed by President Xi of China. They decided to do the tests on that place because one of the academicians in the first meeting, who is believed to be 'the god of rare Earth materials' in China, said it was impossible, and that it was all a lie and everything else. Central Command decided that he should try it anyway. They did the experiment and collected the material and sent it to be tested. Then Mr. Keshe along with 20 senior nuclear scientists, Space scientists, nuclear people, Army Generals, and others were all sitting at a long table going over the results).

(The report as seen on the screen here, showed Copper 68%, Zinc, SN, PB, Lead, Iron, Silica, Aluminum, Nickel, Fluorine, Fe_2O_3 , SiO_3 , P2, Chlorine, Chrome and everything else, 29 items in all. Then they said to Mr. Keshe, there is no gold here. The two spaces in the lower corner for gold and silver were left empty. (He understood what they were up to and he outsmarted them. He brought along his own research from the top research universities from America and London that said when you have the combination of all

these materials together then you get gold. This confirms that they made gold. Then he said, can you tell me where did your scientists stole the gold put it? Why is the box for gold grayed out? Hasn't your academician shown himself to be a fool? Are you stealing technology?)

(You can never call a Chinese a thief. This is the lowest thing you can do to a Chinese. They got offended. We asked for the samples and tested them ourselves and confirmed there was gold, which was a better quality than mined gold. He then asked to meet the Central Command and ask why they stole documents, and why they deleted gold from the list. It ended up that the academician deliberately stole the technology. And this became the backbone of the problems we had with the Chinese military. In a meeting in a back room with the most senior Central Command officers they said, we were correct and they had found traces of gold in the first test. This is why people don't trust Chinese. If you don't have a strong will and knowledge like Mr. Keshe then they'll wipe you over. The problem with the Chinese structure is because of their pride they want everything to be Chinese).

(Now we won't accept Chinese academicians anymore. We have restructured the way we work with the Chinese government. We don't accept academicians. The Chinese structure has to change and the government knows that the academicians have taken the nation to ransom. But still we see massive progress in (developing ?? the T) because the government makes the decision. The T stands on its own merit).

(With the KF T we can produce any materials we want by creating the right field in the center. This means the nations that mine like in Africa and Ukraine, and the rare Earth material shortages will be a thing of the past).

(The situation has become such that the poor people living in the villages who grow their own food naturally with cow manure and the rest, because they don't have money to buy the chemicals have the better quality food. And now the people who have more money and live in the cities have to pay 3 to 10 times more for what they call organic food, in Europe they call it, 'Bio.' This is how the academicians, scientists, and elites, have changed our lives. What was free for everybody, now we have to pay more, because somebody down the line (who controls the things) makes money and prestige from it. This is the reason we are rapidly promoting the ONN Units, because they will deliver pure field energy of what the body needs. It won't be an apple, or a banana anymore, it will be the field energy you need, which in turn produces what your body needs. Becoming sick, having deficiencies, and mental conditions will become a thing of the past. Don't forget there are a lot of people trying to stop this process).

(A KS took a lot of time telling about her dreams of Aliens and if they can do things with the environment. And Mr. Keshe replied, knowledge has always been passed on and it is given the way I teach. Space people are not afraid of patents or who copies their work. It is freely taught and is left (for others to enjoy). It could be a laser or something else. All the knowledge we see on Earth doesn't come from humanity, it comes from outside. (And at the same time those who come to share also take with them what they learn from

humanity. They take as much as they give. Anything is possible, there are no limitations in what can be done)).

(He talks about what one of Iran's religious leaders said recently. The Israelis killed a lot of Iranian nuclear scientists, but at the same time there are also a lot of Israeli nuclear physicists and military people who give us knowledge and T, or whatever. (On the one hand the government is killing, and on the other hand their own scientists are giving freely, for whatever reason, and some maybe getting paid ?? , and it's the same with the military)).

(The knowledge is free, especially when it comes to People of Space. You have never seen me asking for you to pay me to teach you. Recently, a KS said to me that I should charge 1 Euro for every teaching, then the KF will have money to run our programs. (But we don't do it that way, we never charge for sharing knowledge and T). It will come to haunt Mankind about what did Keshe teach? How much did he know? You will understand, that we know a lot, but humanity is not ready for it. (?? Those who speak against us do it because the knowledge we teach exposes (what they lack)).

(Today we showed you videos of our work in China. But what you don't know is that we had to ?? pay our own way, everything costs money. Nobody let's us stay ?? free in China. The funds comes from contributions and what we sell. We don't go to the bank. (?? But at the same time if we don't do these kind of things, then how will you know the value of the knowledge and technology, and what it does? We don't go and rob and collect money from research centers or from governments. And then when we see that government like this even steal the technology, we have to tell them that their academicians are stealing, because we saw on the report how they blanked out the box where the gold should have been)).

(Another KS wanted to tell her experience about dreaming of Aliens, because of what the other lady said. Mr. Keshe kindly and patiently said, everything is possible in Space. The only limitations are in the Man's understanding. And when we dream, there are 3 different types of dream we can have, which are through the STM, STP, and P. We exist in different dimensions and structures. We feed our P food, which then feeds the STM. And now through the T we are learning how to feed the Soul so that it will feed the P. (?? Then when we dream we say it is not real. Slowly we are learning that the Soul is real)).

(There is no Monthly Flight session tomorrow, because we already did it earlier this month. We are developing new material and a system for the next level of Monthly Flight sessions that should be ready in the next couple of weeks. We might have two sessions in October, in the same way we did it last time. You paid for one but got two).

(Be aware of what's going on, we're still waiting for that pending promise of whatever. Some authorities have told us different things, and now we know. In the past few days the Israelis have sounded the horn of change of (?? the end of the 6,000 years, and the beginning of a new cycle in Israel). (This can be a sign of war, because during Moses' time they used to blow the horn to announce the start of a war). We'll have to watch and

see what will be the outcome of it. I hope we are all safe over the next weeks, as we've been safe during the past few weeks. But I have a different understanding of what these people are up to and what they are doing. I wish you all the best, and to be safe wherever you are). Thank you very much and see you next week.

End of Quick Index - 609 KSW – September 25, 2025

KEY-PHRASES:

SUMMARY:

ENGLISH TRANSCRIPTION

(:11)

K- Thank you very much. Good morning, good day to you as usual, wherever and whenever you listen to these series of Knowledge Seekers from Keshe Foundation Spaceship Institute. We welcome you back, and we welcome you dearly, because in the past few days and past few weeks, and past few months, humanity has come to face something impressive. Something which they have created names for it, and it's getting more and more complicated the structures, the world of science of today is dealing with, they have been given names of all sorts, as we have seen. (:12) One is called '3I,' and something else is called the 'SWAN,' because it was discovered by one of the systems, which is called the Swan, and it's called the 'R2,' and we see is puzzling the world of science.

NASA, the world, scientific world is scratching their head, this is something new they never seen. They are not astronaut, they are not meteorites. They don't behave like ones. They create direction flight, material in the front, the light in the front and the back. And we hear that there is a 17 minute gap between the pulses and all sorts of information's coming out. That is this system, intelligent system. Are these set, pre-set to be here? Initially was one, then became two. And now according to some data, there is a fleet of them. And interesting enough, they split, now the talk is that they're both heading to the back of the Sun, and then we might see them coming out after a long time, or we not see them. They might do this, and one has already split. And we hear all sorts of things about this.

I dedicate this teaching of today to this subject, because... when I've been following this for past few weeks, and waiting for it to become actually exciting, and finding solution, answers. (:14) If you as Knowledge Seekers (KS) go back over the teachings of past few years, every piece of what they are talking strange is in teaching. Everything that we hear about this structure, or these structures, it's been in teaching in different conferences, in different teachings, and in public teachings, they've been referred to, they've been shown. And it's interesting that what you as Knowledge Seekers know, through your knowledge, is amazing, possible to the world of scientists of today.

When I go through and I ask different Knowledge Seekers, who have done transcription or have access to transcriptions, to look into, find things, different one of them has come up with different pieces of information, which teaching, which section, which teaching, what time when it speaks about UFO, when it speaks about the light and the rest of it. And if you go back, if you go back to the even last two years, even go back to last May in Beijing, go back to what we showed, what's done with the Chinese scientists and we showed you what we called, the data from analysis from laboratories and then, then there are the videos which has been recorded, it gives you all the information. You, as Knowledge Seekers, are more advanced than the NASA, the European Space Agencies, the Chinese, and the rest.

But the problem is, why I brought this, is that these objects are what you call, UFOs. (:16) It's the first time we publicly are encountering them. It's the first time we have tools to observe them, and they travel at high speeds, as we all know, when you have dynamic systems, like what we produce, is there. But again, comes to one point, they talk about object we see, traveling at 70,000 kilometers per second, which is beyond our process. But it's exactly how it should. This is what we said, it takes a minute or two to the Moon and back. Now they say, this is what's going on. They explain, scientists trying to find a way to communicate. Communicating with these structures need a way they can communicate, they can download, they can see everything.

We have seen communication in defaults on some systems where these systems are interacting. Which means the upper atmosphere, very high level satellites are getting interfered with. Some military systems are getting interfered with and they don't know why. You all, as Knowledge Seekers, this is because these systems create Magnetic (M) fields. So, jamming or covering is one of them. This is the way that the drone gets captured. This is how we fly without detection. This is how the lights are created. One of the biggest puzzling points with one of these systems is that it's in greenish color. And the other one has a huge amount of CO2 exhaust in the back of it, which is very unusual in such amount, and the rest of it. But you know it, because you know exactly why. You know exactly why the color is green, you know exactly why it's traveling high speed, (:18) which is why there's no control, and step by step, when we go through this process of teaching, of past 10 years, 20 years, everything we said is there. So, our knowledge for past 20 years, now is the puzzle of the UFOs, and other things, which they have to find out.

Are the creatures with these systems? How come they mutate? How come in the structures we see amino acids (AA)? Very much to us, how come they create geometric dimensions and information? If you go back, step by step, into the teaching, for example, the structure of. We don't see the, what we call, the bright light in the front, but we see a green light. The exhaust is like being at the front then the back, as we always explained, in the aircrafts, you see the exhaust at the rear. And with the UFOs you see the lightening, what you call, interaction interfaces at the front, because you create a Magnetic field front, to eliminate, to create a dynamic situation, like the atmosphere, to burn anything (in the way). You always drive into the vacuum of the system.

The whole structure, now, what it is, puzzle, is something which we have taught. Why is this structure moving towards the Sun, the way it does? And it's slowing down, it's changing direction, because, in fact, if you look at this structure, it's very interesting. What this structure has in its embedded system, is very simple. (:20) This system has, and we see it in this structure, in a very, very simple way (draws on Whiteboard). A system has a dynamic, magnetic, gravitational system. It's creating light, it's creating a structure, dynamic, very much like this (saucer shape UFO with circle in center). It is a version of not very advanced system, but it's a version of intelligent system, where, in fact, the system sits mainly in this structure (draws second version below first). And we see, we don't see, the physical UFO shape, but we see like a rock material, which is... it's in a way, one of the primitive systems of the Space travel. But, on the other hand, it's one of the most useful ways to travel.

The reason you see this, which Man has never seen before, than the UFOs which you see shining on top of the Earth, on the Earth atmosphere, is that the shiny disks are signature of a clean environment, Earth atmosphere, we don't have rocks, we don't have things in it. In the depths of the Universe (U) most of the UFOs fly with this structure like stones on them, or like a... we see a lot of dentations on them, (:22) they look like a meteorites, which has been hit. Because this structure gives them protection. It's full of rocks (Space). If anything happens in the dimension of the Magnetic field, like Earth, like the Moon, hits this material, doesn't hit the surface (of craft), the surface underneath. Inside sits highly intelligent system. Could be as many as 10,000, 20,000 living things in these systems, especially the big one. One has entered in one direction, one has... but both are going to meet in one position. Most probably, we will encounter them on Earth. That's for sure. This thing has not happened just for the sake of doing it. And, when you look at this structure, of the, what we call, creation of structure, like this, dented, or whatever, you all have seen. Now, I give you part of an insight, what you've seen, it brings a lot of science too.

Go back to the teaching, or go back to the structure of what we showed. I'm trying to get rid of this thing, to get rid of this board of mine. Stop sharing, I got to come back in again, sorry. I deleted, every day they change this thing. (:24) As I said...

< Mr. Keshe tries to share the screen. >>

K- ... (:24:18) Okay, as I said, we see a UFO center. In the Universe when you go across galaxies your system stays the same. You need protection, so you create a body, what we see like a meteorite. Objects hit (the craft), they're embedded in this material. Interesting is, the data tells us this material is made, looks like Nickel. And Nickel, at a high level radiation, transfer of energy creates a green light when it's a Magnetic field. So, now we know why we see the green light with this object. Why we see it the way as it is. The center is where action takes place. The rotation of the material is here, the UFO sits inside. When this material, when this object enters the Earth atmosphere, we will lose 100% this (outer) structure. This will go away, and what we will see is a UFO.

According to what we have, if there is a plan in this structure to meet with humanity they're on their way. The bigger structure we see, which is coming, they call it R2 or R2, (:26) this one is coming from dimension of the old structure systems, which is the spherical system, extremely long, and extremely accessible to its own position. Again, looks like a rock, because again, the actual structure sits inside. If, and most probably it is no "if," it's a reality, you are destined to have the first encounter with what you call, Aliens. Maybe for the first time we do. All the signs of the scientific data we have indicates so.

How do we communicate? How do we reach them and how do they reach us? And what is the next step in this process? We have shown how to build the structure around this (UFO). You saw this but you never understood. You were puzzled when we put the Star Formation (SF) in Beijing and we collected the materials in public you saw. In reality, this is a UFO. And in essence this is what sits in one system, in one of these. (:28) How they create this material around it and the shape of UFO is what the humanity needs to learn.

In the next few minutes we'll show you a video, so you get a good grasp of what it is. Then we'll show you a second video that you understand how structure out of fields are made. Because you've seen it, you've done it, and everything else. And then, the papers which you all have seen, we've shown it in public, confirms why these ?? things have Amino Acid, they have a structure of life. I go back to the beginning of the talk and you will understand step by step, what was to come, what is to come, and what the what we call the Keshe Team's research, is developing that you will understand.

In Beijing, if you remember, in the three days production of material, we had a Star Formation. You saw materials on the table, which were put in hundreds of spoons and given to all of you. But, in a video we show you, which was taken by the Chinese military, in July of 2023, in Northern China, in a gold mine section, we showed, video recording we'll show you during the session today, that when the system, (:30) the systems you saw in Beijing, some of it came from the test of the year before, two years before in north of China. And another one came from the ?? Jindao demonstration for Chinese government, militaries and rest.

What we have these systems, as you saw in Beijing, materials don't come here, materials fall in here ??. In the video you'll see with, and you'll hear the sound of Chinese generals in the background, and you'll hear the words of Wang Lin and others we have released before, you will see exactly what happens. How these materials and how the shape of the UFO is made there is no aircraft manufacturing. Aircraft manufacturing is the job of the man. The whole of Space, those who (we) will come to encounter hopefully don't have factories to build the 9, 10 km Spaceship. You can imagine, you need giant man to do it.

It's actually done by smaller reactor than what we showed (in Beijing). All you do, you position your reactors and by changing the strength or distancing the position they give you the UFO shape. First is of the fields. When you confirm this is a field and the size of the craft we need, then you change to the second level, which you lot saw in Beijing.

(:32) Now we change the dimension of the systems into material size. So now the material will rain from all over according to the field, and with the dynamic structure of the field inside makes the shape of the UFO. This is how these systems are manufactured. This is how these systems are developed. And then, now we have the UFO, which is center of one of these stones, which is coming. We see it, they call it like a meteorite, but it has all the intelligence. Now you change again the parameters, you add the third parameter, which allows you to rain material. Any structure you like.

On Earth bound, magnetic field, metal of the Sun, which is the pulling point of our system, we need Iron. And this Iron has a very specific characteristics that at 56 in Iron or 56 in Nickel, both this needs radiation level. This is a metal. And this N56, sorry, is a metal. But N56, which this system is carrying, heading towards the sun, creates a Gravitational Magnetic field in the dynamic condition of the center of the Sun. (:34) It's not burning any fuel. This magnetic field created and the material around it is getting pulled by the Magnetic Gravitational field of the Sun. And they tell us, "It's traveling with a high speed." Yes, because all it does, the individual or the Soul or whatever in charge, is just playing to create the dynamic fields of the Iron. On Nickel strength, what you call, 56. So now we know why it's green, and we know why it's heading towards the Sun. And, as it approaches to the center of the Solar System they're changing. The speed changes continuously, in a way they entered the Solar System, they gathered that way, they change position, and the step shows to what we understand, this system is heading for Earth.

The big dentition we've seen on the surface of it, we can create. I'll show you how, because I've seen it, you know exactly what it is. And I'll show you some other materials, which, in a way, you lot have seen before. I come back to this picture. Rick, if you can take a picture of this, and then bring it back up, that we don't lose it, then we can, what you call it, let me just increase it.

<< Rick takes a screenshot. >> (:36)

K- ... Okay. So now, how you see this material here, and how is material there, is what you as Knowledge Seekers, have seen before. In a way if you look at it, I go back on a few pictures that you Knowledge Seekers, let me see what I want to show you, and how I want to show you. ...

<< Mr. Keshe tries to share a picture. .. you've seen it before .. >>

K- ... (:38:10) When you look at this picture, you know exactly how we go, where we go, and what is supposed to be. We showed you in the structure before, that how they build these structure. When you create the right magnetic field, when you create the right structures, in the process of the system, you can literally build anything around you. You create material, you create dust, you create curvatures, you can create a shape and patterns. (And I like to do it, I'm sorry about this, I'm just trying to change the sequences. You get the right combination. Ok. Now we come to this). This picture you all have seen. We published it before. We have produced this material, three different materials. It was

done in China in 2023, July 2023, and repeated again. And the second time, 2024, and the fourth time, you as Knowledge Seekers saw it in Beijing. So this is the material, the way it produced. Now remember that UFO I showed you, you create a dimension of the material. (:40) Now these materials rain upon you and stay on it. They make your outer structure. Now we show you how the structure is made.

Then what we do, as you've seen, this is a structure. This is literally gold as a plate getting developed. So now that you created that material, you rain the fields in, you see the dots of gold, and you see the Gold in that, inside Carbon 14. (The particles that rained down formed into these bigger shapes). So, we've seen the dust, we've seen how the material is made. What is interesting, you see more material. So, you can produce different materials according to what you need. This is the pile of the material, which is on the table. As I explained, if you create a dynamic system in air, this material would stick on the dynamic structure of the fields and become the solid body of your aircraft. It doesn't fall on the floor.

Now, let's go one step further. You can see here, we can shape the material. You see the structure? You can shape it. (I'm waiting for your pictures to change, because you have one picture behind you. Ok, you're there). (:42) You see this material has a shape. But look another ?? better picture. You see the different material shape. And now you can see. This is a very interesting part. This picture you've never seen. And it's for the first time we show. If you look at it, it looks like a solid .. it's a solid structure. But this structure is mono material, and creates like a hill, like a horn, out on its own, on the surface, during the process of production. Like these ?? do. (We have a delay on you not seeing this). What is interesting, you see this white material. Rick has a video, we show it to you, and then you see how material has made, on the, this meteorite looking UFO, which is coming to us. Rick, would you like to play the video? This is from one of the productions of materials. And you see how it just builds up. It's a recording of one of them.

<< Rick shows the video. (We see a white shape being formed on the table out of nothing). >> (:44)

It just builds up out of nowhere. We have a number of videos like this. So, building material in a structure is not difficult. Now we know what these systems, especially 3I, has built this structure, why it looks the way it does, but inside sits a UFO. Inside of it sits a very familiar system that ... (would you like to give it back to me if you can please).

<< Mr. Keshe tries to share the screen. (discussion about sharing) >> (:46)

K- ... (:46:39) Okay. Now what you see, for sure 100%, not even 99%. This is the system inside these two meteorites (He shows the sphere reactor of some months ago). It carries a Star Formation of this. And because it has a fourth dimension to it, it creates its own emotion. But the interesting is, if you go back to what we saw in Beijing, you see something very interesting. As I said, this is like the gold made. And you see the spots and dots of gold. (You are behind me. Somehow I cannot-- Ok, you are back here with

me). As you see, material is made. The dust coming around it gives it that roughage look that you see (it forms a solid piece that is like the UFO). And you saw the reactor produces it. (:48) But interesting point with this is this data.

NASA scientist and the other scientist tells us that this object, especially 3I, has amino acid. This data is 11th November, 2023, done by the Chinese military. This is the material they took from the test in Northern China. They test to see what's the composition of it. And as you see, it's Chinese. It's got a, on the corner bottom side, seal of a stamp, which is official. And what is interesting is this. Have a look. It has everything. Copper, Zinc, Iron, Selenium, Nickel, Magnesium, everything is in it. The most beautiful part of it is, in every piece, more or less, where you look, you see Oxygen, SNO₂, ZNO, COUO, FEO. And, what is more interesting is, this data. (:50) Gold, Carbon 14.

And the most important part is now we know this system on its process creates systematically materials of life. It produces in a shape of itself. If you look at it, the cornerstones of life on Earth. It has entered atmospheric condition of the solar system and it mutates to it. It picks up his intelligence, it picks up his language, it picks up his knowledge, and at the same time it carries the Knowledge of the Universe. It is extremely intelligent because he has access to not only the knowledge of the Man, he can converse in our language and knows what we think, but he has access to God's Knowledge of Universe. He knows where he came from. And for sure, the technology (T) carried by this system, is at intelligent level of us and higher. (:52)

The only way our governments, or citizens of Earth, will be able, in one way or another, to communicate with these structures, is if they decide to copy us (KF). If they decide to approach us. And we have seen in the past few days, for 17 minutes, the system disappeared. Of the radar, of the whole screen, shots across the Universe, Solar System and the rest of it. There is a reason that this craft carries a 17 minute cycle. We know this because in one of the tests we did with you, we used the, what we call, fraction of it, because it was more applicable and we done the same 17 minutes before. It's recorded in our data. The 17th second and the 17th minute creates emotion. So these people, whoever they are, they're learning about the emotion of Man. How we feel, how we think, and how everything about us. We see a geometrical emotional system. So replication of making with what we see on the table, human-like, human intelligence, is absolutely no problem for this. (:54)

The question which is to be answered is, why now? Why at this moment? And why humanity? And as we've seen with the following satellites, which is following the 3I, which is a large number of them, it's been blocked by a lot of nations, not to create panic, all carry the same intelligence, and all follow the same root and the structure. It is good to say, the teaching has brought Man to become part of the Universal Community, to understand it and be ready to become part of it. But as I said before, the knowledge humanity carries now, is one step ahead of this system. Go back to the teachings of past few weeks and months. If you recall, I said, if they are carrying or travel in UFOs, they are still behind the intelligence of transmutation. And that knowledge has been given to

the Man. I said to a scientist in past few days, "Are they here to learn how to transmute?" Because they know how for sure to transport. (:56)

All the dents and all the bits we see on the surface of these objects, the shape of it, if you just look at the shape we are looking at, they're feeding us with, it's very much a UFO inside, a elongated UFO, and it's one of those long, short flight systems, and it has reduced speed as has entered the, what we call, the solar system, and the giant one which has come from the ?? other side has characteristics of the mother, the main ship. It's very possible, extremely possible that the two of them, are from two different parts of the Universe, or this galaxy, and as part of what we call, like Universal Council there is a meeting to sort out the human race. As I said, we are here to take Man to become part of the Universal Community and to this level I have taught you enough to be ready for that. To understand the knowledge and not be baffled why they are, and how they are. And how they travel at these kind of speeds.

These systems, outside Solar System, travel with much higher speed. That's why we never observed them from the point where they came. They became visualized to us as they reduced the speed to enter the solar system. (:58) Otherwise they would have flown through it. The direction of the fields of especially 3I shows moving towards direction of the center and separation of what we saw the second split, there's going to be a third split, is that they're sending satellites. They're sending the same objects as themselves in a smaller way, in a way, subsystems, most probably, to land on the planetary systems. We should see more break up, as they call it, but they don't understand these are, again, UFOs, covered in the same, they behave the same. Follow this material, follow how. A lot of information suddenly has become scarce, because governments are scared of what is coming in. It's a swamp of them. It's not 3I anymore. It's 3I and a few hundred 3I babies behind it. The purpose is very clear, what we understand in technology. And at this moment of time, we have the technology to communicate at their strength to convert it to the language of the Man. Systems are getting built for this purpose.

And so what is interesting for you, as Knowledge Seekers, is that, with you having this knowledge, (1:00) with you understanding what is on the table, are you ready to meet your family? Are our governments ready to meet our family? When these people that, when people come they'll ask for one person only which is trusted and is placed by them, through them on this planet. And that person will become the spokesman which in the Universal Community and the human race. Obligation of obedience comes out of respect, not out of fear. And they will rule through emotion understanding with a physical presence. Where as Knowledge Seekers you've been taught how to command the emotion through the Soul. So human race is centuries ahead of these people. They're still depending on aircrafts and many of you have transmuted.

My hope, my hope is that humanity understands this. My hope is that humanity will have the knowledge to understand this. And are we able to handle this? (1:02) Are our governments ready to handle this? We have seen these structures, jamming computers, electronic systems. We have seen these people disappearing themselves, which we know how it's done. We've seen these people traveling at the speeds beyond what we know.

And we need to understand that we are ready, human race has no choice, but with this cycle, if they decide to meet the men of the Universe. This time we are not looking how the pyramids (were) made, we are not looking how structures are made, we are not looking at anything else, they are looking how humanity has accessed the knowledge of transmutation.

This time, there are Knowledge Seekers, where, by what I showed you, with the production of gold, with the systems in China, and many others which you have tested, we passed that dimension of ?? see physicality. They want to know how you Knowledge Seekers transmute. And what is needed. You are the darlings of the Space at this moment of time. And by law of the Universe, this is not the Robin Hood time, and this is not the Queen Victoria time to steal and become good. (1:04) They work on the ethos of, "Thy shall not steal". And this time humanity has the knowledge and upper hand in being the teachers. The only thing we don't have is to be men of peace.

And interesting enough, interesting enough, if you as Knowledge Seekers understand what knowledge has been shared with you, you are decades ahead. You are decades ahead. You are centuries ahead. Now what I told you and I keep on telling you and I repeat myself. We have taught mankind transmutation, in the essence of the emotion of the energy. And in that process, we have learned a lot. These structures, even though UFO looking, (1:06) once they enter the atmosphere of the Earth, when they enter the atmosphere of the Moon, Mars, and our scientists be able to follow them, they will see what you've seen UFO. Up to now we always considered UFOs. Now your knowledge has extended that these people put a 'space jacket' on their system. Travel like meteorites. This is one of the reasons the world of science has never been managed to see them. We always considered that in the far distance, they're much to do with us, that's very small, and they pass. They look like a rock. But this time it's not.

What has concerned me is why 3I is holding its cylindrical shape. And why has not opened up into a spherical shape? It's traveling high speed. It needs to. If you remember book number two, it's in the highest speed travel. That's why it's doing it. It doesn't need a broad shape. And when it reaches Earth will go into the spherical shape. It will take its shape and it will change its shape to this configuration that we are used to as UFOs and we are going to watch this. We are going to monitor this, (1:08) that how, especially 3I, which is equipped to land in the atmospheric condition, the other one, the Swan, is not and cannot land, is too big to land on any surface. It's a spaceship carrier, it's a mother ship. And the one is what you call one of his prodigies one of the children of it. And we expect the two to meet somewhere. They say, "Oh, they meet behind the sun that we cannot see them." If they can be this far, they're not scared of you seeing them anyway. And, or are they going to the Earth atmosphere, rendezvous, the meeting, the solar system atmosphere rendezvous, and they go, or is there a plan to land on Earth? The speed has been reduced. The specially E3I reacts to intelligence, reacts to communication, and as it's a dynamic system, carries Gravitational Magnetic field, and it has the ability to produce amino acid, it has the ability to create your ?? without your knowing.

Next few weeks, it will be interesting how the governments will look at this, how we as Knowledge Seekers understand this, (1:10) and how for the first time, we have seen a UFO which is going right through us. To what we understand from the knowledge we have, these systems should not convert. They are on a track, rendezvous, living in the solar system, maybe releasing a couple of smaller systems to land on Earth or Moon to explore. But there is a bigger job with them. There is two or three reasons we see this. But possibly, they land. Is that the trajectory and the dimension is going out towards another galaxy. It's just like refueling. It's like exchanging something. And they're not scared of us. They don't need to go to the back of the moon to change clothes. They are the beach lovers, they do everything in front of the Sun.

And the interesting thing for us is how this technology, which we understand, is a puzzle to the world of science, and we still see opposition that, our technology is something they don't understand. Because if you understand our technology, you understand the system. All of you do, because you've done it. You've made it. You've seen it. Some of you are part of this development. It's not me saying so anymore. And it's not just because we think so. You saw the production of the materials opening for three days in Beijing. (1:12) If I would have brought a different combination or set of fields, these particles would have been floating. They wouldn't land. And because of the dynamic fields, they would have floated at a given orbit, like the ring of Saturn's. And you would have seen the structure.

So, be ready for a lot of surprises, be ready for a lot of changes. Be ready that possibly for the first time, mankind will come face to face directly with the citizens of the Universe. We'll see them as the passengers of these ships. We might feel their existence, but for sure, these systems are there to bring a new change to us. But with what you know as human race, they're here to pick up your brain. The emotion of transmutation. If they had it, they wouldn't travel in these old grotty systems. To you who looks at us, and NASA and American scientists and Chinese is something unbelievable, but we always told you, you can travel with the speed of light. This guy is not matched it yet, he's trying to do 60,000 kilometers per second. He's trying to go faster, because if he could have gone faster we would not have seen him. It would have been lighting through. (1:14)

So, we are, if you come to it, we'll meet men of Space. Not much more you are intelligent than Man, but they have managed to understand the system and build it. But now, thereafter your brain, how to transmute. And that's their problem. Up to now you've been the following, now you have followers. But you have to understand how to transmute. And hopefully, in the coming time, you will see. We have chosen a video taken in July of 2023, which shows the raining of gold from the space. And this is videoed with Chinese military, Chinese Generals, all been part of this test. And the reason we will show this video, it's getting exported to Rick, that you will see, it's not a fairytale, but we tell you, you just need to create a dynamic field of the dome. And the material will go by the magnetic field strength, will not convert to material. Most probably it show on itself, on the silver color, because it's the characteristics of that, what it shines by. (1:16) And, you were too busy watching what material goes on the spoons in Beijing, but we were invited at night to the position by the military, we had to drive 60-70 kilometers to get to the

position, as they call us, they said, "It's raining gold everywhere." And we went there, you hear the voice of Wang Li and Chinese officers, to see how does it feel to rain gold from the skies.

Once Rick receives this video, it's about five or eight minutes, ten minutes, We'll let you see it, and then you understand that, if you add a balloon of the fields in the center of this ring, you'll make the UFOs. And if you add a second dimension of fields, as you saw Copper, Zinc and Nickel and everything else, you will produce it as an outer shape. In a way, you hide yourself inside. And, what is interesting is how this material rotates. I'll explain to you sometime in the future, why this material rotates, in the dimension of physicality which is going, and why its other partner is actually moving in a different shape, different size, and they have a rendezvous. (1:18) Would we see transfer of light objects from one to another? Would we see amalgamation of the two, that one enters, that one lands inside? Or would we see them crossing each other, two ships in the oceans? Either way, whatever happens, the fundamental knowledge of this technology is in the hand of the humanity. We understand it.

We have offered the Chinese government, military this morning, if they want to do, or we shift it back to United States, to NASA to collaborate to bring the systems and other agencies like the Iranian Space Agency to be able to communicate, to replicate and the rest of it. What we showed was impossible, now it's been seen. Now the knowledge has to be understood and the Keshe Foundation Knowledge Seekers have the knowledge. No need for rocket propulsion. As the gravitational magnetic (GM) field of the sun, if you match it, also you don't need to burn it. And we see it now. They tell us more. Governments are scared of what they are observing. Government are censoring a lot of things which is coming with the system. What is our, their main concern? They tell us, they said initially, that it could be because of the proximity of the two, what we call, solar systems and the rush of meteorites, as we explained before. Now it's been accepted.

Or it is, as we see it, for the first time, encountering another intelligence, another life. (1:20) It can change, it has amino acid combination, from its structure, it has intelligence because it changes position, continuously reacts, it is an interactive system, and it can only be interactive if you have intelligence and life within you. Maybe I'm wrong, maybe I'm right, and maybe if they decide we'll have the pleasure of meeting one of us as created things of the Creator on this planet, which we didn't know. A bigger family, bigger structure. All depends how much more this I3 or 3I will release more to land.

But what is interesting is how they disappear. There is a reason for 17 minutes. We know that fully. It has been tested in our systems. And we have tested what we call 17 second phenomena with a specific reason. The reason for it is what we call. We wanted to understand how this factor of 17 affects us. Factor of 17 works in our system. (1:22) And this factor of 17, how it affects our position. There is a reason we use this 17 figure. Because the... they have to tell you, the test for the 17 was done on the 6th of May. We did a test. I show you, because we are very straightforward with a lot of things we do with you. This is for you to understand. And one day I explain why. I try to bring it for you.

This is a communication, internal communication, within a Keshe Foundation research team. And we understand the reason for this. Why scientists are seeing 17 minute pulses, and why this is important to a lot of our work, because 17 has a significant scientific reason. (1:24) And what this does to a lot of you, it has a psychological effect. And it has specific characteristics on the body of the Man. And it does a lot of things which brings a lot of emotion into play. And I have cleaned some things out that you cannot see because it's an internal research data. Later, when I show you how, what the world of science is looking for, what it means, these 17 minute gaps, and what it does, the purpose of it. When I saw the report of NASA and this 17 minute gap, I said, this cargo carries life. Because this is the characteristics, it's part of our knowledge. This is one of the communications of the Keshe Foundation. During a test, he says, keep that. Now add this to physicality in five minutes with the same and plus 17 gap. (1:26) And you see the graphs. And you can see. It's done.

For those of you who understand this, for those of you who understand the process of you as Knowledge Seekers, is that we are dealing with a living entity above us, from another planet, from another place in the Universe, where we understand their technology. We understand, and we are far ahead in every aspects of their knowledge. And unfortunately, our governments prefer to ignore it, because 'ignorance is a bliss.' My feeling is that this structure is not hostile, but curious to know how he can interact with humanity. If he was hostile, he would have made a different move. (1:28) He would have used a different gap. He would have used different configuration. It looks like a homeless, or it looks like for someone running to see the mom. And it carries the characteristics of, curiosity killed the cat, because it's releasing little babies to land and enjoy. It's just like going on an excursion, And everybody gets off the boat, you can go and come back with the mini-boats. Get off the ship.

I hope, I hope we have achieved. And I hope humanity is ready for this to come. And I hope we'll be peaceful enough to meet our fellow people of the Universe, and move into the next level. Not only we are hungry for this, but we are hungry for peace. And is the appearance of these a coincidental with what's happening in the human race? And are we ready to accept the change? (1:30) Rick, have you received the second video? Have you managed to download it?

R: Let's see I'm just checking here. I haven't received a new video yet.

K- Ok. They tell me 10 minutes. Hopefully after the break we can have a look at it. This video is important because it shows how we pull materials. And if we add the additional system inside, we can create the dynamic fields of the space gap, structure, material production. And this is one of the characteristics of this system. And the material, the behavior, the change of course, step by step, it shows if this system does not land. (It) cannot land on Earth, it's impossibility, it's too big. It will affect all of us if it does. And the Magnetical Gravitational field bringing it into upper atmosphere will damage all our communication system. Possibly, if we come to interface, will be through smaller spaceships, small units as we've seen already divided. The scientists don't understand it.

There are pictures on the Internet, you can see they're split, there's actually a UFO inside the small system, it's just like coming off it. They will land with us, because they can pass through you might see some damages to some of the satellites, because of their going through the system and having some 15,000 satellites orbiting around the Earth. (1:32) It's not easy to go through without interacting with something. And, if it does, if it happens, then we see the new cycle.

Most probably we'll see them in the North, what we call, Northern Hemisphere and the North Pole, and in Southern Hemisphere and the South Pole, because there is less of what we call, satellite interference. This is why, with they say they see a lot of, what they call, UFOs in Argentina, and the other parts, in Southern Poles, or they interact in Northern Poles, because of the field, strong Magnetic fields, and secondly, now this is mini satellites, it's less obstacle in the Poles. We see what comes up, but the knowledge of it and the understanding of the knowledge is all in our hand. It's how our governments will build. And how our governments will react to this amazing interaction between the Man and the Man of Space. I don't think we'll see a human face, but I'm sure we'll see a face of the Universal Community ?? .

We go for a break, we come back and hopefully in the second half Rick will have the video to show you how it rains. And how when we add a system inside, we will allow us to create that little silverish, goldish color which we call a UFO. (1:34) And now for the first time you understand UFOs don't travel with a bare skin in Space, but they travel the way we see with both of these Universal Units and the children which is behind them. We will go for a break and we come back. And hopefully, we'll learn a little bit more.

>> BREAK >> 609 KSW September 25, 2025 ... (1:43).

K- Not really, we've just been occupied with a lot of things as usual. Working very hard to work with the governments, work with the militaries, work with the expansion of these Units for everyone. And at the same time, trying to upload, upgrade and understand other part of the technology. (1:44) The next step for us is, we'll ask very soon to join us, is production of the, what we call, intelligent system, using Pico materials, which will change the world of the computers immensely. This is the next target for us, because everything else is getting developed. And the flight systems is partially ?? or what you

see, what we explained, or what the scientists tell us, the... SWAN system which they detected recently, what I call the R2, carries huge or exposures, huge amount of, never could be thought of, CO₂, which now we understand is a combination of interaction of the fields on this planet it has to do, and it comes because that system is more advanced. It's carrier of the Carbon 14 conversion system and it releases this CO₂ matter, the CO₂, out of interaction of the field of the Solar System, and it doesn't do it in the Space. Solar System has a habit of creating magnetic fields in the region of the Iron, which is an Oxygen 4, and it sits with the Carbon 14. In a way, if the scientists look further in they see Carbon 14, Oxygen 14, not Oxygen 16, and this is... this does not creates on Earth, we cannot do it. (1:46) But in fact, we see two reflection of the same atom. And they consider this to be a CO₂. I'll explain this one day. It's the backbone of the structure of the physicality in many, many galaxies.

But, in all we're still looking, we are looking for Knowledge Seekers to purchase more of these Units, that we can bring this system in with what we call, Universal Systems. We have received offers, and people who made commitments and they are fulfilling their commitments and we are moving forward. Four more Units, which is the part of our system, will be handed over to us next few days, which brings the total system operational to 10 around the world. And it's a control system and the rest of it. And once we do the configuration the people are involved, are happy with it, then the mass production of the first 200-250 Units we are going ahead in October. And you start receiving your Units and our other structures will supply you the systems which you will be able to communicate with these '3I'. That's one of the beauty of it. It has an antenna which interacts with Universal communication system. And if you remember this is what we told you from the beginning. And it has the capability to interact.

In a way governments can directly interact with this system, convert into the language of the Soul. And it's very easy. We are producing the material for it and we are producing the communication system for it. (1:48) And there's one thing, no one ever can replicate these systems. One day, one day we'll tell you why and how. Any system, the 10,000 Units with antennas going out of the Keshe Foundation structure can never be replicated, and no one, unless we do with a code can build such a thing. And there is a reason for it. And that becomes a cornerstone of the world peace. And the structure which goes with.

Any questions?

R: ... I'd like to comment or ask a couple of questions, regarding the '3I' that you introduced us to today. Just let me get up the... there's a Wikipedia image that I was showing earlier. First of all, we have this image of the brightness of it's coma, due to the gas molecules, apparently. And that was somewhat interesting, but the part I wanted to bring up, right now, is the image that we're looking at here, is the top view of the trajectory, of the 3I Atlas, through the Solar System. Now, I thought it was very, very peculiar, because first of all, this being a top view, (1:50) and the Earth and all the planets are basically on the same plane, they call it the Elliptic Plane. And, the chances of this 3I Atlas object, actually coming through on this trajectory, at the same Elliptic Plane, as all of the objects in our Solar System, even though it's known it doesn't come from our

Solar System, but it's on that same plane, the chances are 1 in 500, that it would be able to do that, they say. And so, it's very, very particular to be on that elliptic plane to start with. And it comes from beyond the Jupiter here, and as we'll see in just a minute. And let's see it start now, down below. And it comes up, it comes very, very close to Mars, like about as close as you can get without hitting it, in a way, right there. Has a look at Venus, a little bit of a look at Earth, but look how close it comes to Jupiter. It goes right beside Jupiter, like, "Hello Mama, I'm back again" or something. You were saying Mr. Keshe, that this entity seems to be... Did you say something was coming back to its source or getting... as Antonio says, "Is it going near the Sun to energize itself as it travels?"

K- Can you freeze this picture?

R: I'm not sure, let's see.

<< Rick tries to make a screenshot. >> (1:52)

K- ... (1:52:15) Again, this is the illusion of our present science. Once you look at this picture, this is how they have made these pictures and it's not correct. Because... Tell me when you can screenshot or I can write something on it.

R: Let me put up the screenshot.

K- Yes, let me see. Oh yeah, doesn't matter, let it run. I can do it without it. It's okay...

Something which you have to understand, a lot of these pictures we watch is done for the convenience of their passing the information. It's not real. This object here you see flies like this. Does not go on this orbital they show. Secondly, has, if you look at it, a third dimension, which is going in like this. So, these pictures we look at, is for conventional understanding. But, the circular motion is not. Secondly, it flows up and down in the, what you call it, atmosphere of the solar system. When they give us these details, such a thing, such a closeness, it's not exactly what they're talking about. They tell us it passes very close, (1:54) but this gap of Mars here is different than this gap of Mars from the Sun. We all do. The Sun does exactly the same. The Earth does exactly the same. They made these pictures for convenience, but then you have to understand you're dealing with a three-dimensional structure and this thing is cutting through it. They say it comes very close, it'll be there, but you just watch and see how this thing reacts. When it comes to pass Earth.

And there is a discussion which I try to bring out. Is that if you look at where the Earth is. You see about the Earth about there. Has a satellite been released to touch with Earth and join back in? Are we there for an encounter? There is another possibility which we don't see. Sometimes Earth is here by the time this crosses and R2 comes here. There is a rendezvous point. Again, three dimensional, there are millions of miles, hundreds of thousands of miles away from each other. Do we see a transfer across? Because the speed is so high. The most important thing is, would there be reduction in the speed, at this

rendezvous point? (1:56) Will it come to a halt? And both will transfer material to each other. It's like a... you got a, what you call it, aircraft carrier and a cruiser next to each other, changing Officers.

This, what we see with these two, is not coincidental. For sure, it's not coincidental. We've seen 3I changing course, we've seen 3I changing speed, we've seen it vanishing, we've seen it coming back, we've seen playing all sorts of game, it's intelligent, it's on a mission. And when you have such a system, if you go back to some of the teachings I refer to, you don't change course. Everything before you travel is calculated. Every star, every planet, you have to go through a Solar System, where do you go? Every trajectory is calculated, adjusted and they adjust, and this system is adjusting itself too many times, it has intelligence. It has fingerprints of amino acids of life. This is what is scaring the hell out of people in NASA. Which means it carries the living intelligence inside it. And this trajectory, where would it meet with "R2-D2" I call it for joke. (1:58) Where is the rendezvous? And they say it's behind us, we will not see that. But where .. what's the purpose of it? Would one come on this side and deliver to the planetary system? Don't forget we are not the only exciting part because we are just humans on it. They're interested in other phenomenon's like the moons of the Saturn and every other thing because when you go on the excursion you try to see as much as possible.

But the speed we see, the shape we see, is all in line with the what we call the knowledge we have in the Keshe Foundation, we can replicate it. And it is, it's gathering and the speed it goes, it gets hit. When I looked at some of the pictures coming out of NASA regarding this possible shape of these two objects, they've been hit by as many meteorites, because they carry that structure. And, they get hit by everything. But this is the first time we see a UFO with the clothes, or cover of galaxy, not with the clothes of what we call atmosphere of the planet. This is how they travel, we got to get used to it because it gives protection with the meteorites it gives protection. (2:00) Does not matter how much how many layers you add, multiple layering, this system, 3I, cannot be from a very advanced intelligent people, compared to the rest of the knowledge in the Universe.

The behavior looks like a newcomer's, because the more advanced systems, which is the more advanced, what you call it, life, uses a slightly different, or more advanced system than this. This is like, you remember when the man wore the first suit going into the deep sea, the metal hood and everything else? This is like this, that's why I know, I've seen this many times. Wearing that jacket of space because the new versions or more advanced citizens of the Universe use a totally different Space technology. They use a multi-layering. They don't use a jacket. This jacketing, it is intelligent, advanced intelligent, but traveling with a donkey. This is not the Rolls Royce, this is not the Jumbo Jet. And even that is puzzling humanity. Because we are still walking. We haven't even managed to learn to walk. Has no nuclear system. Does not work on nuclear system at all. Has no nuclear center. I hear, oh, high temperature nuclear material. I just go crazy. Do we have any nuclear material in our system and produce gold?

So, this is not a very advanced culture. (2:02) But it's a culture who has managed to, and most probably we know them. It's known to us who is in it, it's very easy to confirm.

And, something very interesting is... You've seen, we see reports of the green trail, or light in front of, and there's a possibility that these people bear shiny green skin, of intelligence life, very possible. They have moved into a different dimension of the intelligence. And so, they are traveling, they're traveling across the galaxy, and their protection is to add up some jackets. And the R2 definitely shows that kind of characteristics. It's a very intelligent, the R2. It's a extreme, slow, what I call, nomad structure. They are in Space for billions of years. But the 3I shows advanced knowledge, but it's still old systems.

It's like somebody taking a 1950s Chevy and going around the world trip. But they know what they're doing. The data is getting released by different agencies and I monitor very closely. Gives us a very good indication what these people are up to. But you cannot tell because when we talk they say, Oh, this guy doesn't know what you're talking about. And the rest of it. (2:04) We know and it's there, it's very... possibly they already landed on Earth somewhere. This is my assumption, so that's how they split. It's possibly landing, or already landed, and they are on the way in. 99% from what I understand, what I see, with the knowledge we have. One of the indication of it is, we have to see the disturbances in the Southern Pole. We've seen satellite disturbances, blackouts, which means they have entered. That blackout, it means they have already entered into the atmosphere. Military satellites, high altitude satellites, all have gone blank in certain government systems.

R: Mr. Keshe, what do you think about the high Nickel content of this object? They say that there's little or no Iron associated with the Nickel. And it's not... they never found that in... out in Space or in the Universe so far, that Nickel's almost always found with Iron in it.

K- Doesn't need to, because this is a Nickel, C56. You don't need to, it just... it covers both. When you get an isotope in a matter state, which is... ?? we're just from another material to another, another element to another, you don't see usually the elements of the mother side. The Iron is 56, the isotope of Nickel, the lowest we know is 56, but this is in the energy form. (2:06) So, if it is a Nickel 56, which is again, when they tell you radiates green light, which is a confirmation of it, is behaving as Iron, so you don't see Iron. It's Nickel 56, we know that it's...

I tell you why I know it and why we produce it. We actually produce this material, we produce it without... our people don't have a clue what they are producing. We have produced, I've seen these elements in the materials we have produced. Because, Nickel 56 replicates the Gravitational Magnetic fields of Iron, which again goes back to Oxygen 16, which again goes back, replication of Carbon 14 to Carbon 16. I've spoken about Carbon 16 a lot, some times ago. And then, when you have this, you have the behavior isotopes of deuterium. So, when they say they haven't seen, usually they see with Iron, because our scientists are so narrow-minded, they don't understand. When you don't see a Nickel, especially green, what you call it, fields we see from this one, because it has created Iron 56, Nickel 56, which is like Iron, you won't see Iron because you already have the Nickel, it's heading outside, not inside the star. (2:08) If this was to go through, in its (trajectory) was supposed to go through center of the Solar System to a star which many are near to

it, it will change its composition to a different composition magnetic fields. It would have been blackish color, gray silver blackish, and in it ?? being you would have seen the sign of Deuterium.

This is the reason the R2 shows us CO₂, because that guy is centered to go close to Sun. You will see where it lands, how close it'll get to the Sun. You have to understand, the system is a Universal system. We never thought about it, I will not teach it, because it's not for Man's time now. These systems have no physical dimension, in their reactors. They are the Sun themselves, and I was spoken about this before. It's extremely, extremely powerful old system. It's a single spherical, what you call, flight system. And this is why it has this shape, this is why it does this thing, and then in it, it has a Star Formation, on the boundary of it, which creates what we see, but this Star System is different. Because there are two ways of making a Star System in Space. (2:10) This is for the future, when Man becomes mature. I can do it here, because it's easier.

You have a Star System (Formation), which most of you know, we have taught, which is like this. Then, when you see a system like R2, this system doesn't say this way. This system has in its structure, another Star Formation, which is 90 degree to the others. With the central gravitational point, more or less, of the same value. So, it creates a spherical Star Formation. And that's what we see with R2. And our new Knowledge Seekers are not ready for this knowledge. And this, characteristics of this combination of C14, has to do. And then because it has a CO₂ and combination, it gives us a CO₂, a trace of CO₂, as they say they've never seen and it's more than anything, because they don't understand the knowledge.

The 3I carries this combination in the elliptical and that's why we see it. This one carries a system unknown, we will not teach it, because Man is not ready. This is disaster if you show Man what to do. It sits in a specific plane in a 90 degree angle separation, which creates the shape of Earth. (2:12) Now you know why I don't teach you everything. The original, old, old flight system used to be one single, and you remember, you had little, in cartoons you used to see that kind of thing. These combination flight system are very, very advanced, in needs and knowledge of the Creation, in every shape or form. And within it, they carry hundreds of millions of passengers. Of all races. This is when I saw this, I'm 99% sure, because I had contact with this race. These people, they're here to interact and take passengers. Those who are willing to go. Because the combination of field created amongst these systems, is there is more to it, this is not just what it is, allows a spectrum of the citizens of the Universe to live in there with peace. This knowledge is far beyond humanity. Far beyond humanity. It's not even in the direction of the 3I. This is what puzzles me, what's the interaction of these two? Why are they meeting like this? Our tools, condition, specification, everything which comes out. I know I've flown around with these systems many times. (2:14) It's very easy, you understand it, they do, and you understand 3I. 3I is a very old system, but it works.

But, because of what I showed you, data from Chinese military, it has a good... In its structure, it creates combination of fields, which, within atmospheric condition of the Solar System, is life in a amino acid level, because you've seen it, the CO₂ I explained,

which is produced, Carbon 14, then that allows it with the combination of the materials, oxidization of the plasma of the Solar System to create material. We are Universal Teachers, and we have traveled the span of the Universe.

What bothers me with the R2, these people have access to it, to understanding of the cry, we call it, the shout of the Souls. They have some knowledge with it, because I've seen what these people about report, they don't understand what they report, they just give it knowledge, and they feel like we don't understand what it means. This brings a disaster on the Earth. They're here to collect something, and I can't see, are we heading for a nuclear war? Are we heading for a new or the annihilation of the Man that they are here to support, to collect? (2:16) There's a secret in this which I think I know 90%, 99% what it is but I have to stay silent. Is human race for a big shock and that's why they are here. The 3I does not bother me as much as the SWAN does. It's a 'black swan.' (Silence).

Any other questions?

We're getting a data in the background, as you know we are watching you. And when I tell you there are millions on this ship, you all panicked, your Soul flew, (2:18) and it's been recorded. A lot of you have detached from the dimension of the physicality ?? without knowing. Let me share it with you. I have to go another system. I'm going to try it again. You see how you... I have to connect back to the Zoom, that's the problem, just give me time. Anyway, till this connects... This, what we see, what is to come, is one of the most strangest encounters, that we'll see, and the strangest thing is that our scientists don't understand. Some scientists trying to explain to understand. If you do not understand how plasma works, it's very hard for a scientist to explain this.

This is where you see the red arrow (on the graph), is when I told you this ship carries thousands of passengers. You see how you lot drop the physicality and you move with the Soul to be with them, to be part of. And the most interesting part is this. (2:20) You see how Soul of Physicality moves towards the Soul. And that's thought of the creation is still there. Then you see, our team has arrowed it. And I read you the text. The text reads, very simple, MTK has red arrow. There are millions on this ship. Yearning to be part of it. You learned transmutation, see if you can try it.

Any questions?

<< Knowledge Seeker raise hand by mistake. >> (2:22)

Q: ... Mr. Keshe, you said not the 3I, the other one that carries millions, you said they're here to collect, what does it mean to collect what?

K- Go back to the teaching of some time ago. In one of the teachings I explained that Universal Community usually knows of a disaster and empties planets, solar systems and gets from life. Because they know there is a possibility of an annihilation, destruction, change, that will not support life. It's just like us collecting animals that they don't exist in the jungles and open and we keep them in the zoos. The R2 is one of those. I've been on

board of these ships and they are not prisons, they are facility to somewhere in the universe, the race wants a place that it suits for them to move on to. (2:24) And when I saw the R2, you know when your heart falls and you can't swallow? I had that feeling. Knowing what is happening with Israel and the Palestine and the Russians, and these systems are aware of these kind of things. Are we about to annihilate ourselves? Are we about to make this planet non-existent? Or non-existent, not livable? This is my concern. I've seen these moving and I know what they move. I understand why they are there. Or is it just passing through? Don't forget these systems do not need to land, they can transfer. Landing aircrafts and things is a habit of the Man.

Q: So why the 3I are here? If because 3I they're trying to make a connection. When you said they speak through...

K- For R2 it's too big to be near. (2:26) The Gravitational Magnetic field of it will affect the Earth. It affects a lot of things. It will destroy 99% of all our satellites. We've already seen it. 3I created a field a few days ago. And a lot of military satellites were blacked for a few minutes. In the Universe nobody harms. Life is a God given right and the intellect of each race has to be kept.

Q: Mr. Keshe, you know, in the, I don't know, these are maybe stories, but I hear in the past, they say something about, from other communities, they came and the government captured them, they tortured them, they researched them, they dissected them.

K- They can say whatever they like to say.

Q: I don't know if this story is true, because you know, if these 3I is coming to try to make contact, and you said they have a... You said they have a specific person they want to talk to, but if they come and the government captures them, and bothers them, and hurt them, I don't like that, because... I mean...

K- Nobody, nobody can capture these people, don't worry. They are more, more intelligent than the way the... We know, we know the intelligence service, we know from the militaries, they have tried to communicate. There are a lot of things in the background which is not in public. There's a lot of effort has been made to communicate. They are not just going through. There's a lot of work is going on in the background, especially with the Americans and the others, are very busy trying to communicate. (2:28) Very busy. They have to response ?? soon. There has been a response. And ... everything is geometrical, everything is dimension, they don't... because they don't understand. Our people at the top don't understand the structure, how these things work, what the... how it's made.

Q: Yeah, because I rather, you know, I'd rather to die, or the planet goes away, rather than hurting other entities from other planets which are peaceful, you know.

K- This is, this is part of what it, we have to see what it is. I especially opened this topic today because there is a reason you'll understand in the coming time. I don't do things just

for the sake of doing it. And I never work on teachings. I had to go prepare things for this teaching to look for things to be. Because those who have the knowledge understand, they know what is the next step, they understand what is the next step. And it works different way. It works totally different way. And the structure of the world peace, and Universal peace has to coincide. And the two are not synchronizing. (2:30) Rick have you received the video yet?

R: Yes.

Q: Mr. Keshe you're the spokesperson for them when they come?

K- I'm nobody. We are teachers...

Can you show it and then I explain it? You can keep the voice going.

<< Rick shows the video while Mr. Keshe explains. >>

You've seen this system in Vienna. If you reduce the voices like this. This was done in July 2023. Three Chinese generals by the order of central command spent a week in northern China. We have pictures of these military people, so we are not (just) talking. And interesting (thing) is at the end and then what I explained to you at the beginning of the teaching. This is taken about 9 o'clock at night, where we were told to go back because the system has been running for 24 hours to see what is done. You see there are a lot of lights above. You've seen the system, as I said, in Beijing. We are not showing something I haven't seen. And you hear the army officers, the voice of Wang Lin, and other things which are happening. But the end is there, where I put this up for you to see, is the very last two or three minutes, when it thinks the material rains, and if you create a field, you create a jacket as we've seen on I3. (2:32) This technology is obsolete. So that's why we showed it in Beijing. This is about maybe 5 or 10 meters, maybe less, maybe more, from a drill hole, by the 14,000 drill holes done by the Chinese military in this mountain, confirming it's a gold area. That's why the test was done here. We ran a system in the garden of the house next door and one inside. This house was empty. Taken over by military for this test over the gold mine. You see there is a plate with the water. This confirm to us how the gold changes in the body of the man in the salt of the body. Just watch. ?? ?? confidential ?? . You see the mirror on the left hand side? (2:34)

You see the gold on the edge of the system, as you've seen in Beijing. And you see gold on the mirror, we have a video of it on the mirror, which creates that effect of the body structure. And there were four or five videos running at the same time, different angles, on this recording. So this is one of the videos, but the interesting part, you understand, is the end. As they say, this is the first day, this is a seven day trial. In the mountains north of China, one of the large gold mines of Chinese government. You see gold dust on the floor? You see gold everywhere. It's not just on the papers. (2:36) Now the system will switch off, the light switch off, and it's very exciting part starts. And then you see how material falls. It rains in, and if you create a field in those systems, You hold the material at the boundary of the fields, and that's how UFOs are created. Not in the factories and

putting pieces of aluminum and metal together. That's the job of the man. As you see there are 3 or 4 cameras running, army officers. There are no civilians here. And the data sheet I showed you, the laboratory test is from this room. The reason we are here is the first night we are here, is because the officers reported the gold is raining everywhere, outside, inside and everything else. So we had to drive back up to see what's going on and what is getting reported.

<< Video continue to be shown. >> (2:38)

You see all the Chinese officers smoke, 99% of them, so it was easy to ask who's the smoker. And then you see the results when you see the material rains from the sky. Watch what's coming up now. Watch this gold dust. You see the dust? You see it now? On the... in this area? It's raining gold.

R: Does that dust form a particular structure or shape?

K- ... If you create a field in the system, it will take shape of a UFO, yes. We need a second field.

R: Do the particles keep sort of re-circulating or do they fall to the floor?

K- They fall to the floor. They fall to the floor. Now you see, now you see very clearly in the smoke. There is no wind. There is no air circulation. It's just material coming in. Now you see, you see the dust, the gold particles. These are material, gold is irrelevant. (2:40) Don't forget, the officers in this room all wearing masks, because they could not keep on inhaling gold. So, the material comes in because of the system, and if you create a second field, you can hold them at a distance, like a ring of Saturn, and that gives the three-dimensional structure of the bodies, of the craft. If you create a third field, then you get what we see on this I3 and what we see on the R2. Here sits the craft. The green line is the shape of the aircraft and the top is the material we have there. Now you've seen the particles flying in, literally convert plasma into matter. But you've seen this in the daylight collected in Beijing. Now you see it in a physical dimension. Is it finished?

R: Yes, I was just playing back some of the frames. Do you want me to replay it or anything or?

K- No, it's just for you lot to see how material is produced. It rains. With the field you decide in the middle, decide what it rains. (2:42)

Q: Mr. Keshe, when this is happening, when the Gold, you created a field of the, Gravitational Magnetic field of the Gold, and the Gold was coming, but is there other material that is at the same frequency, and you get that with other material, just a simple Gold?

K- There is no frequency, there is not a frequency, this game does not wear any frequency, this is a plasmatic field strength.

Q: That's what I mean, I mean in terms of plasma...

K- Yes, yes, because if you looked at this material, there are a lot of videos from this, This is not just... if you let me connect, I have to connect to the Zoom with the other. It's a bad thing, this system does not allow long lasting Zoom sessions. If you, the material collected from here, this test, I'll explain to you, this is why we actually ran into a huge problem with Chinese Central Command. There were three Generals appointed to this. We were a convoy. This is not just us, this is a mountain, (there is) nothing there. It was a convoy of us, going to this place. And it was done on the order of the Chinese Central Command Military Center, which is headed by President Xi of China. And decision was made that we do this test here, because one of the academician in the first meeting, who is believed to be god of rare Earth materials in China, said this is impossible, this is all lie and everything else. And the Chinese Central Command decided, if it is, let him try, he can show it. (2:44) So we came here, we showed, they had a week we stayed in a grotty hotel, they kept us in a village, kilometers, 60, 70 kilometers away, every day took us about an hour to get there and back. And they set up the system, outside and then inside.

And then the central command said, "What happened?" One of the systems broke down, after the second day. And we immediately asked the second system flown from Europe to China within 48 hours. We set it up. They said 7 days is the duration of the test. So we ran. We ran, there is a picture I showed you before, it's in the mountains where there is a rain. That was a system outside, this is a system inside. So two were running about 10 meters away from a gold mine drill. They drilled one after 14,000. We have the list of it fully, what's an inch in drill hole. Estimated there is so much gold in this mountain. And we ran a test. We collected the material and a very interesting thing happened. There are videos of it we can show you. The officers of Central Command decided that they take most of the material with them to test. When the material, when the test came, we met in the boardroom of about 20 senior nuclear scientists, Space scientists, nuclear people, the Army Generals, they're all sitting at this long table.

And they brought out, they gave us a few days before this report. I'll show you this. They gave us, sorry. (2:46) They gave us this report. And I had a chance to study it. They said, in this report, you see everything except gold. And you're right, you see it. So they analyzed the materials, Copper 68%, Zinc, SN, PB, Lead, Iron, Silica, Aluminum, Nickel, Fluorine, Fe₂O₃, SiO₃, P₂, Chlorine, Chrome and everything else, 29 items. They said that, Mr. Keshe, there is no gold. And you see two dots empty in the corner, gray. So call the meeting. You see the stamp of the laboratory and everything else. I brought with me, in a meeting with all these officials and everything else, documents from the research from America. Documents from research from universities in London, and documents research from other universities. And what they say, you can Knowledge Seekers check, they say, wherever you see this combination of material, as it's here, confirms the existence of gold. I said, can you tell me where did your scientists stole the gold? Why those two black boxes are grayed out? (2:48) Isn't your academician shown he's a fool? And you are stealing technology?

You can never call a Chinese a thief. This is the lowest thing you can do to Chinese. They got offended. We said you still keeping the samples. Give us the samples we send it to the lab separate. We send it to the separate lab. The result came. You can see it. Confirmation of gold. Actually better than the mine. And I asked the central command for a meeting to ask, to tell us why they stole documents. Why they stole, why did they steal. They deleted gold from the list. You see the stamp on the side, certified labs. Turned up the academician deliberately has stolen technology. And this became the backbone of problems with Chinese military. Then they appointed one of the most senior central command officers to attend a meeting. We attended in the back room and they said, "You were correct. We found the traces of gold in the first test." And this is why people don't trust Chinese. If you don't have a strong will and knowledge like me, they'll wipe you over. (2:50) Those two gray spots are gold and silver. And if you look, one, two, three, four, five. One, two, three. Twenty-nine products were found in this test. Plus the three, because one of them is Carbon 14 as well. This is the problem sits with the Chinese structure, because they want to change everything to another thing, to be Chinese only. That is their pride. And this is where we clashed with the Central Command. And they lost their face. And Chinese can never lose their face. You can see on it, it's 11th of November 2023.

Q: So Mr. Keshe, they didn't arrest the scientist who lied?

K- Oh, he had academicians rule.

Q: But Mr. Keshe he lied and he's a scientist but the government...

K- There are a lot of things happening, it's not so straight forward here.

Q: But they can arrest him and they can put your knowledge in the university and it's...

K- We've done a lot of these things with academicians in China. The structure with us is that we don't accept anymore Chinese academicians. We have restructured the work with Chinese government. We don't accept academicians. (2:52) We did the same test in China Gas. Again, the same thing with the academicians. The Chinese structure has to change and the government knows that the academicians have taken the nation to ransom. But still you see massive progress in it because when the government makes the decision, the academicians have not much ?? room to run. Now there is a structure where we don't rely on academicians. Technology stands on its own merit.

Any other question?

Q: Thank you Mr. Keshe.

K- But the whole subject about this is, you produce different materials. If you produce the right field in the center, then you produce that material as you want. The mining of the nations, Ukrainian situation, we see with Earth materials, and Africa, all becomes part of the history. As one of the Knowledge Seekers says, "You know in the villages, in the

outreaches of every country, the village people grow their tomato from the manure of the cow and chickens are fed from what's on the ground. They get their apples from the tree and it costs nothing. (2:54) They put fertilizer on it, they change it and now for us to eat what the village guy we used to get to eat, we have to pay 3 to 10 times more, we call it 'Bio' (organic). This is how scientists have changed, or academicians and those elites, have changed our lives. What is free to the others to live in the cities to get, we pay more for, because somebody down the line makes money and has got prestige. This is the reason we are promoting very rapidly these Units. These Units will deliver pure field energy of ... what the body needs. It's not apple, it's not orange, it's not banana anymore, it's the field energy which you need, which in it and with it produces what your body need. Becoming sick, deficiencies, mental conditions will become a thing of the past. Don't forget that a lot of people try to stop this process.

Any other question?

Q: ... I want to ask a question, but it is not really totally question, I have to say something before that. (2:56) Mr. Keshe I had a lot of ?? dream and then and some vision too so I sometime I talk with in the North American Corona team sometimes may be very rare in Rick teaching and I teach in Bengali every week so I talk there a lot of stuff. So I will say one dream, not one dream, I had a few dreams about this kinds of stuff, spaceship and this kinds of thing. So few years ago I saw one Spaceship is I'm not going to say the total story it will take time and you don't have time and I have to leave too so I'm going to say the main point. I saw in Arizona, Arizona or Utah and Nevada, those areas, I think so it looks like Arizona. There is a spaceship in the early in the morning in winter time. It was like I saw in the dream I am ???. My condition is bad. There is a lot of ??? people, poor people. So I saw like that. And then the Spaceship came and it is near to the, closer to the earth, very, very near, very near, like it's close to my apartment building like that, very close. (2:58) I'm looking at the sky, there is a bed shape, a Spaceship, and they have few layers like the third floor at least I saw three floors maybe there is more. There is light, dim light and I felt there is the children, a lot of children in there. Those are not human but close to human but there is children and a woman man too but a lot of children. One dream, a long time ago I talked about that. And then another one, a few months ago, I forgot, but the recently third one, somebody, some close to my area in Bangladesh. There is an uncle. We always say uncle. Nobody is, we don't call anybody with name that is disrespectful. Area uncle. So he gave it to me, one gift that is a dragonfly like a toy, spaceship, small. And then he gave it to another neighbor, another spaceship. They broke the neighbor's children, they broke their Spaceship. And they came to me to get my one. And they used some kinds of beam technology. They burned my house. They burned my ??? parents. So there is war. So this is one like three weeks ago, maybe three, four weeks ago. (3:00) I remember the middle one. That one, that one was ... maybe six months ago. I don't have any home, so I have a van, and me and my husband looking for house to stay. Looking for, not house, a space for living, a living area. So, that one is Arizona too, I saw it.

K- Yeah, what is the, what are you trying to tell us please?

Q: Ah, so, these kinds of dream, these kinds of... Oh, I have to say a little bit more, so then I can ask the question. That dream, I saw something that area is getting bigger, the normal size of animal, bugs and everything getting bigger. Somebody throw something or something they put in the area. That's why the bugs and animal and everything getting bigger. So those area is a vacate. People is going out, not staying there. So right now you are talking about a few minutes ago about the Atlas and another thing. I didn't hear the whole thing, but I will listen later. There is any possibility like that, if they can leave something in our part or any area, something, so it can make, it can change the environment or like those kinds of stuff. It could happen? (3:02)

K- Knowledge has always been passed on. Knowledge is like the way I teach. Space people are not afraid of patents and who copies. Is taught and is left and is enjoyed. Could be a laser, could be something else, could be something else. All the knowledge of the Earth doesn't come from humanity, it comes from outside. And the same outside comes from humanity too, because when they come, they take. As much as they give. So, it's not that it's one way. So, anything can be done. Anything is possible. And, there is no limitation in what it is.

It's very interesting what you said, that even our Knowledge Seekers, our knowledge. I... in the past 24 hours something very interesting happened is that, one of the Iran leaders, religious leaders, in past 24 hours, 48 hours, has gone out. I'm sure many of you know, when you listen to him in Farsi, it's very interesting. Now, they killed a lot of Iranian scientists, nuclear scientists, the Israelis. But, what he says is that, we are getting our technology, our knowledge, there are a lot of Israeli nuclear physicists and military people who give us the information, and then technology, or knowledge, or whatever. What the one nation (the government) is killing or being, the scientists of that nation are giving freely, or whatever, whatever reason, whatever purpose, or getting paid to the same nation. This is the same with the military, they announced the same. (3:04)

It's just that knowledge is free, especially when it comes to the Man of the Space. You have never seen me asking, pay me for me to teach you. I even had a discussion from a Knowledge Seeker in the past few days, sitting at the table. I was told that you should charge 10 Euro for every teaching, or 1 Euro for teaching. People pay to be in, then the Foundation has money to put all the people listen. It's free, you donate, you give, if you want to, and we do what we can to do so. We never put a rate for the sharing the technology and knowledge, even today's knowledge, what we shared today. It come to haunt mankind in the coming time, that what did Keshe teach? How much he knew? You will understand, we know a lot. But humanity is not ready for it, and those who are, they call us everything possible under the sky, because it exposes them.

And when we were watching this video, the last video, you see people there, you see us there, and going to these sessions, going, staying for these sessions, all costs money. Nobody gives us free, staying in China, that time, for everything else, it comes from the contribution and the donations and what we sell. We don't go to the bank. And if we don't do these things, how do we know their value and the technology? What it does? We don't go rob and collect money from research centers or from governments that affect us.

(3:06) And when the government like this, even steals the technology, we tell them, "You are stealing." Because the other government says, "When you see this material, it means there is gold." Where is the two gold and two grey boxes are there? That academician has cleaned it out.

Q: Thank you.

K- You're welcome.

Any other questions? Or shall we call it a day?

Q: ... Amazing, a lot of hope in our hearts. For things to go right for humanity and a better life for everybody. And as she was talking, I remember a few years ago, I was Knowledge Seeker, I had dreams about extraterrestrial, person, blue, dark blue, coming near my bed. I was very afraid, I didn't know it was man or woman. And then few days after that, I dreamed of it, in the middle of the sky or cosmos or whatever, a sea land rich, a spaceship, which was like a big cigar, the same form. I knew it was very huge, maybe 150 people or something could be there. It was cruising in the sky, (3:08) and it was very shiny material, very shiny. And I was seeing that and then all of a sudden it turned towards me and he came very fast to come to my chest And I was afraid, I woke up. And I... it was 2017, something like that. I... is there anything like that, really, in the middle of the Space?

K- There's everything in Space. There is everything possible in Space. Limitation is the Man's understanding.

Q: When I think it's, when I see it's coming towards me, it's almost touching me, is it anything from me? Is it?

K- Possible. You see, (name) we, dreams as I always explain, it's got three different position. It is within the physicality of Man, it's the Soul of Physicality, and the Soul of Physicality, and the Soul of Man. And then you... this is why we say, "We feed the Soul." Up to now, we feed the physicality to feed the Soul, because we can feed the Soul, we can feed the physicality. And then you see different dimensions, then you see different structures. And then we understand more, which one is in position of one, in which one is a possession of one. Everything is not, what you dream is not what you call it, cannot be said, it's not real.

Q: Yeah, I know that I have to be ?? disponible, (3:10) I have to be ready to contact and somewhere on the other side has to be ready to contact and then this happens. So, I didn't get the message anyway. It's just a question mark.

K- Okay, let's see what happens. Thank you very much.

Q: Thank you very much.

K- It's something I have to mention before I forget, sorry. There is no Monthly Flight session tomorrow, because we brought the session to the beginning of the month. But, once our system is ready, because we're developing a system, once our material is ready, we will run most probably two sessions in, what you call, in October. We are, what material we are looking for to produce is not completely there, and we just don't want to waste them, just because we said we have a session, we might have a... We brought the session forward, we already had the October session ahead, in the beginning of the month. So, when we, our material is ready, we hope it will be ready next week or two, then we might have two sessions in October, the same way as we did last time, even though you pay it for one, it doesn't matter, we try to complete our technology by then. So, please remember, there is no session tomorrow, we already had the session at the beginning of the month.

Any other question, or shall we call it a day, it's nearly three o'clock?

R: Sure, yes, thank you Mr. Keshe.

K- Thank you very much, just be aware of what's going on, we're still waiting for that pending promise of whatever. Some authorities tells us different thing, and now we know, the Israelis have sound the horn of change of thousand years, and the beginning of a new cycle in Israel, past few days. So, that's a war, and this is what is called the sign of war, (3:12) the horn of war, because that's what they used to do during the Moses time. And we have to see what will be the outcome of it. I'm sitting and watching. I hope we are all safe, as we've been safe in past few weeks, and we will be safe next week. But I have a different concept of understanding, what these people are up to and what they are doing. And I wish you all the best, wherever you are, to be safe. Thank you very much and see you next week.

R: Thank you for your knowledge and insights

... Before we end I have a declaration from the Universal Council to read... "We, the Universal Council, declare the beginning of Peace Week, and invite you to freely unite your Souls every 3 hours, unifying them to illuminate the Souls of all leaders, and find the path to permanent peace, avoiding the suffering of physicality on this planet."

609 KSW – September 25, 2025
