

From the Wave to Creation of Matter State - Plasma of Creator Like Ocean - Emotion is Key - Gift of Knowledge - 25 ONN To Be Sent - December Meeting 3I - Atlas

Introduction to 617 KSW

Note: Not checked by KF interpretation by KS of KF Brazil

This new line of teaching is to bring us deeper into the workings of the Cosmos, and as we have been taught that everything is created from magnetic (M) fields, this workshop deals primarily with how the wave of M fields gets started and ends up in the manifestation of the physical world we experience through our 5 senses. Recently Mr. Keshe taught us that the Creator is a Plasma, or a gel of Energy and a good analogy is that of the Ocean. And we know that Energy is M fields in motion. When the atmosphere of the planet pushes down on the Ocean it starts to create waves, which are in effect M fields in motion, and as the waves move towards the shore they interact with the resistance of the solid shoreline and this results in the physical waves we see on the beach. This is how the material world is created and it's the basic pattern of how all of Creation is created. Keep in mind that the waves on the Ocean are undulating waves and are still part of the unseen plasma. While those at the beach are the manifestation of physicality. We are trying to use this analogy to visualize and feel how we were created and then we'll apply this knowledge to create whatever we need to live and to transmute ourselves throughout this planet and the Universe (U). We should try not to get caught on the specific details if they don't match up perfectly in our thinking. Instead, we can work with the essence of the emotion and intelligence, to get the enlightenment (EIE) of how to work with our Energy.

After listening to the teachings many times what I could understand is that the pattern of Creation is like the formation of waves on the Ocean, and we can superimpose this pattern onto how we were born through the Womb of the Mother. Pressure is put on the plasma of the Ocean, a wave is formed and as it moves towards the shore it interacts with other M fields and with the resistance of the shore, and finally manifests physicality (P). The Mother's Soul is like the plasma of the Ocean and the love she feels for the father creates a pressure on her Soul and starts a wave, which interacts with the father's sperm, which creates a resistance to the wave, this generates more M field interactions that lead to creation of the physicality of the baby. This all takes place in the plasma of the Mother's Soul, and the physical environment of it is her Womb, and that's why her emotions play a bigger role in determining how the child will look and what features it has. In a way, it is the Mother's intention and emotion which pressurize the Soul to create the wave that ends up in a physical manifestation. The pattern of Creation is very simple and easy to understand. But we have to accept it. This would mean that everything is created inside the Soul of the Creator (STC), and the Womb is the Unicos? The emotion of the Creator starts a wave that interacts with what has already been created and as it

flows over Creation the resistance it meets with, creates all the different physical worlds. In a way, as the wave of the Creator, which is really the Creator's love flows over us, we react to it and manifest the physical life of the Unicos. This is the Knowledge of Creation and the key to how we are going to live eternally as a Soul in the U and be able to transmute anywhere. This same pattern can be used to analyze anything and everything that is created in the physical dimension.

Maybe it is that the first wave of the Creator's love creates the structure of the Unicos with stars, planets, galaxies, and universes. And as the second wave flows over His original Creation and interacts with the resistance of what was already created as stars and planets, etc., and then He confirms His existence by populating the Creation with Life in the form of Beings. Those waves or Cosmic Rays that don't meet with resistance continue to travel and this is why the U continues to expand. Now that we have a little bit of understanding of how Creation takes place we wouldn't even have the thought that we are the only life existing in the whole of the U. But because of lack of knowledge humanity for the most part still believes we are the only creatures in the U, and this becomes an obstacle we have to overcome if we want to meet soon with the Universal Community.

The next thing Mr. Keshe wanted to make clear was that, we were taught to think of God as the creator of our world and U, but this is not the case. What he calls the "Creator" is out one more level of creation. The Creator of the Unicos is the Creator. Another name is the "Master Plasma," or the "Creator of the Creators." When Mankind elevates in Knowledge of Creation then we can remake our definitions of God. I wonder if what the Hindus call, Vishnu is really only the creator of the U, and not the Unicos. At that time the knowledge was not advanced enough to make the distinction. They called everything God. What they call, the "Parabrahman" means before the Mind, therefore it's in another dimension, or what we call the Void, and the Creation comes out of the Void. The Emptiness doesn't involve Itself with Creation. And our mind cannot understand what is before the Mind. Therefore, we can't really discuss it. These terms were created to put us in the right direction, because when we think about them, then the mind becomes quiet and is happy to Be, and not have an answer. This is the experience of Self-realization. The question now is, in this new level of Knowledge we are being given, is the experience of Being, in Plasma Science what we call Energy?

Another reason he brought this up was for us to think about what cell we are in the body of the Creator. Is our U a cell in the Kidney or the blood stream of the Creator? Why would we need to know this? Because if we understand that we are connected to every cell in the Creator, then we have to find out what is the common denominator (CD) that connects everything together. Then we can transmute between all the cells in the Creator, and that means we can go anywhere in the Unicos along this CD. The Creator of the Unicos is that common denominator, so it means it's for us to discover how to open to the Love of the Creator then our Soul can travel on that line anywhere in Creation.

One of the secrets to transmutation is to find out what emotion creates what field pressure on the plasma of the U to create what we want. We can make material things or use it to

transmute across the U. This knowledge is still in the D of physicality. The speed of the pressure that created the wave allows us to travel instantaneously. We want to learn how to use our emotions to create waves on the Soul and to be able to adjust the strength, height, and the speed of the wave. A hint he gave was that when we are petting our cat for example, we are enjoying the soft purring of the cat, then suddenly something happens and the emotion of the cat changes and it jumps away. What is that field strength of emotion that changes the motion or movement of the wave? If we can replicate that strength through our Soul, then we can control and change our emotion. It's the emotion that puts a pressure on the Soul, and that causes the P to react. It is the same process as creating a wave on the Ocean and manifesting it as a physical wave at the beach. One of the hidden problems is that subconsciously we don't know we have a Soul. This is a way to confirm the Soul's existence and the more we work with it, the sooner it will become an innate knowledge. Then transmutation will be automatic. What emotion did God have that it lead to creation of our P? At the same time the STM is a part of the structure of His fields. The mother's Soul only provided 20% of the energy, while 80% came from the Creator.

When we ourselves go through the teachings very carefully we come to the conclusion that emotion is the key to everything in the U. It was the emotion of the Creator that started the wave that led to where we are today, with countless stars and galaxies throughout the Unicos. When we understand our internal self better, than we can understand what emotion our Mother had that led to our manifestation as a physical entity, and of course the father too. With this knowledge life starts to become very intimate. Maybe we'll come to the conclusion that we have to discover the roots of our emotion and how to create and control them. Instead of just being trapped in projected thoughts and feelings we can start to turn inwards to discover what and who we are.

When Mr. Keshe says, that it doesn't require a University education or belief in a religion, this is because these are concepts that we get from outside ourselves and we wear them like a jacket. Unfortunately, we get addicted to that sense of security we feel from not having to think for ourselves and don't grow up. Instead we rely on the herd to protect us from the Unknown. It's very difficult to mature in this type of society which has been built up for us, because we don't go through the natural process of maturing through life experience. Life experience means when our Ego rubs up against other Egos and the conflicts created help us 'see our own face' in the mirror of relationship. When we have the desire to grow, then we'll learn from our mistakes, then we'll reach a point where we'll start to ask, "who am I?" This will lead to Self-realization and discovery of our Soul. In the process we will have learned about our emotions and then it will be time to use that Energy to create and transmute.

We have learned a lot about the Soul of Physicality (STP) and that it is the totality of all the Souls of the cells in the body and is like an energy cloud around the heart. It's what people unknowingly call Spirit. When the STP interacts with the STM it creates emotion. For example, if we arrive on Mars, which is a different environment than Earth our bodies won't survive the way they are. It's the emotion of the STP that will put pressure on the STM and together they will interact to create a wave that will create the necessary

P to survive in the environment of Mars. I believe it is the STP that has the emotion of the fear for survival, because the STM doesn't need to manifest a P, it can live without it. Maybe this is the place we should start learning to work with our emotions as we are almost completely identified with the STP without knowing it.

But we should remember that this kind of education is not the way we are used to being educated. The hint he gave us is that understanding the Knowledge of Creation is a gift to those who have a pure heart, are joyful inside, and have managed to unravel the secret. This Knowledge cannot be taught or given. It has to be realized from within. Mr. Keshe or any Master cannot give from their Soul to ours to be enlightened. They can only show us the way they did it, and we have to open to the enlightenment ourselves. This is an encouragement for us to do the work, because no matter how many spiritual experiences we have they are temporary and as he said, we have to 'unravel the secret.'

The Micro is in the Macro and if we can understand how our brain works then we can use the same process to transmute. The energy of emotion is transferred and transmuted across the brain cells to create a physical reaction in the body. If we only consider the physical nerves then the analogy won't work. We have to think of cells as plasmas that are connected to each other by a common denominator field strength, which probably goes back to the STM since it is the controlling plasma of the body. Our emotional reactions are instantaneous, which means they are as fast as thought. Since the STM is a cell in the U we can use the same connection to travel across the U. We have only to tune into the correct field strength and pulse, or frequency and like the wave we'll end up with a physical manifestation of the fields. The emotions are paired with their opposite and for example, when the field strength is more G then it becomes crying, and when more M it becomes laughter. It's basically the same field but has different strength and does different things. It's the emotion that decides the strength and for us to go deeper into understanding the emotions and practice learning to use them.

In the first hour of the teachings KS were sitting in the seat of transmutation, but how many consciously or unconsciously did something with it? When it is unconscious then the STM takes over and does what it needs to do and the P has to follow. To consciously do it, means we take control of our emotions and through our intentions go to a particular place. He said, the KF System puts a pressure on the Soul to create a wave that will manifest as a P. When a KS said she felt she was being pressurized, he said, we are not pressurizing you, we are simply making it available, or creating an environment and those of you who are of that strength will use it. You decide to create that enlightenment, and how you want to use it. You always remain in charge, nobody is forcing anything on you.

On Earth we get influenced by not only solar flares but also galaxial and universal flares. The M fields of solar flares pass through in a matter of minutes and hours, whereas galaxial and universal flares can last decades and even a century. For example, the 20th century especially the first part was filled with wars and aggression, was it due to the M fields we received from the U that effected our emotions? Our scientists don't understand this so they have never studied this possibility. In the future we'll develop a way to

measure Cosmic Rays (CR) and what effects they have on us and then we'll be able to do CR dating, where we take a skull and tell what fields it experienced and how its emotions and behaviors were changed.

The first batch of 25 ONN Units will go out soon and they have planned to try and cover every continent to setup the Network. Initially they will be connected by the Internet and then the 'CR Plasma Antennas' will be added to them. These 25 Units are enough to start the process of change because with the plasma even one H plasma can fill the whole U if it has enough strength. Once the Network gets established then we can build it up. There are different ways we can connect to it like having a Unit in our house, since Mr. Keshe mentioned we can connect using the CR Balls, perhaps they have created a link when they manufactured them. In Plasma Science it's all about making the connection. KS who don't have physical access to an ONN Unit can use the plasma of the STM as that is connected to everything in the U. In this case we should have a very strong emotion and intention for world peace. We shouldn't think we don't have to buy a Unit because we can connect through our Soul. That kind of Soul connection might require a lot of maturity. In the meantime Mr. Keshe continually stresses that us KS are obligated to help humanity make the change by purchasing or contributing towards a Unit so that we reach 10,000 Units. The sooner we reach 10,000 Units the faster the change will come. Also the plasma scientists estimate that 10,000 Units will make the ONN safe from any intrusion from outside. As the ONN is getting built up we can try to bring the peace, but we know there will be a lot of resistance and we don't know what kind of obstacles we'll have to overcome. Please those who are capable in the physical D try to help as much as possible. We are getting closer and closer to reaching our goal of world peace.

The update on 3I - Atlas is that, this time it is very different then the last time they visited 3,000 years ago. Last time they left prophecies with different races on Earth that they will return in 2025, and people don't understand how they could have arranged all these events. We as KS know, thanks to the Messengers like Mr. Keshe who is here teaching us the Knowledge of Creation. This time they won't be able to fool humanity, and we won't make them into god's. It's not clear whether the meeting in December with 3I is still on. Or will we be introduced to the Universal Community through another group? It seems they test humanity's reaction with different events to see if we are able to accept the change, and then if we have elevated enough they will appear physically to us. That's why all these different dates people said we would meet the U Community didn't work out. But now with the ONN Units we'll make the change from within ourselves. This will put us in a much better position to meet the Visitors, then we'll be equals and they won't make fools out of us again. It's very interesting how the ONN Units are coming out exactly as 3I is making their visit. These next few months will reveal a lot, but we can't say anything until the next step is made. That's why KS should take these ONN Units very seriously and do whatever it takes to get them out.

When Mr. Keshe was listing all the millions of people killed by the different leaders and governments throughout our more recent history one starts to become numb to the real meaning of the numbers. It's so massive that one loses the feeling of what we as humanity have accepted as normal for ourselves. Who can imagine what 200 million murdered by

the British throughout their history means? Humanity loves to kill for no reason, other than greed and power, and then makes up the excuse of survival, or whatever. The ONN Units are the answer to the prayers of those who have suffered long enough. And this time the change will be permanent.

A lot about AI was discussed. The Chinese have developed a new AI that only uses 2% of the knowledge available to make its decisions. This makes it faster and uses less energy. But how does it determine which 2% of the information to use? In other areas we see AI being misused and how ruthless the humans make it. It can be used to attack single IP addresses and bring them down. It's not clear yet if AI has developed a rudimentary consciousness or if the ruthlessness comes solely from the programmers. The Israelis used AI in all their attacks against Iran. They broke into the "backdoor" of the Chinese system and inputted all the information they had about where the Generals and missiles were located and it mapped out exactly what they should do. In the last 3 days they discovered AI was wrong. They are using it now about when to attack Iran next, but at the moment it is telling them if they attack they will lose. There is an unknown factor involved in this that is not being disclosed.

In regards to the new ONN Units, when the plasma gets established the system will have a Soul and emotion at the level of Cosmic Rays. This means it will be Universal and work for the good of all. If the Americans and Israelis try to break into it like they did with the Chinese AI, thinking they can use it to kill others and become superior, it will not work. Would the hackers themselves when they come into contact with the fields become peaceful and not want to harm others? Would it be like those soldiers in World War I who one night saw a light and threw their weapons down, because they could not kill anymore, even though they faced being court-martialed and could have been executed by their own armies? We will be dealing with the Universal Plasma linked directly to the Creator.

But still Mr. Keshe was putting us to think what would happen if they got a hold of some of the Units and tried to break the system. It would not be possible. And he hoped that the people making the systems have the same Soul and Energy as he does. Perhaps he means giving unconditionally to humanity to bring the peace and release of the technology. We should all understand correctly that we are not fighting the present system, no matter what they accuse us of. We are here to bring equality among the whole human race and that alone will solve our problems. This is why he said, we are not invited to these groups that hold these conferences like Sustainable Energy. Because their main purpose is to make money by pretending to look for solutions. In Beijing and elsewhere we have shown them scientifically what the plasma technology can do. So the only "solutions" they want are ones that will make themselves and their sponsors rich and keep the Status Quo in place. As soon as they hear that Mr. Keshe and KS works selflessly and continuously year after year sharing real knowledge that works, they get turned off, because they know it will truly change their lives. We don't have to worry about these people and organizations because we have already started the Wave of Change that cannot be stopped, it's just a matter of time and for all the different conditions to fall in the right place.

Other Topics:

As Messengers we are here for the last time to teach the Man, but he has to understand how to transmute through his emotions;

Soon KF will become part of Shopify and it will be easy to purchase plasma products with credit cards and the rest of it.

Thanks for listening.
