

New Teachings - Prepare for U Community Meeting - What is God - Energy Gel - Transmutation Introduction to 614 KSW

Note: Not checked by KF interpretation by KS of KF Brazil

Today Mr. Keshe started a new cycle of teachings to prepare us for meeting the Universal Community (UC) through the Visitors of 3I - Atlas and SWAN - R2. In this cycle of teachings we are expected to start integrating all the past teachings and start applying them in our life. We should begin to experience peace in our own lives and then radiate it out into our environment, changing it. To prepare for this planned meeting with the UC for some time in December, we as Knowledge Seekers (KS) should be able to understand what 3I & R2 are, how they function through the plasma, and the potential changes they can bring to the Earth. Unfortunately, our scientists especially in NASA and the other Space Agencies don't have a clue what's happening, because they don't accept the Energy of the Plasma as taught by KF as real. They only accept the reality of the matter state, and therefore they cannot understand what is going on. This goes for the rest of humanity as well. So, when our Visitors arrive and demonstrate their powers, there is the danger that humanity will again turn them into gods, and start worshipping them like they did in the past.

The implication is that our Friends from outer space built the pyramids through their knowledge of M fields and those who had more knowledge among the humans got lured into joining 3I on its journey through the Universe. They didn't understand that they had the same knowledge within themselves and thought the Visitors as being superior. The result was that the knowledge was not shared and Mankind stagnated for the past thousands of years. This time we are being taught the Knowledge of Creation before they arrive, so that humans will understand what powers these people have, and that they are working at the level of the physicality. Then there will be no need to make them into god's. If we can elevate ourselves before they arrive they won't treat us as an ignorant race and we won't get abused. The KF Systems were turned on today in the background and they were flooding us with the fields of the U in the hope that we will open ourselves to receive them and elevate our Souls. Again the responsibility lies with us to act upon what we know to be true.

In this new cycle of teachings we are being taught what God is and how It functions as an Energy. This should have been done 15 years ago, but Mankind was not ready for it. We discussed this many times already, that in order for society to get out from under the power of the clergy, the type of God they taught about was rejected. Intellectually it was understood that the "Old Man" in the sky was made up by humans, and in that process everything else was totally rejected, and we now came under the power of the atheistic scholars and scientists. When we talk about 'God' in plasma we don't mean the hypocritical religious concepts of God. We are talking about the Science of Creation and how the U works. From what Mr. Keshe says, it seems that most everyone in the U has

accepted that we are made out of the M fields of the Creator and we all are in the process of learning how they work. But with Mankind it is different, he is totally backwards, in that he only accepts the reality of the material world and not the Energy side, so he can never understand how Creation works, and won't be able to interact with the UC on equal terms until we come to understand about the Energy and M fields. This is where KS will help humanity to progress and be able to interact with the Visitors.

First of all, we should get this concept of God as a person clarified. According to Plasma Science of the U, God is a Plasma, an Energy Field and everything is created within Him. Whether or not we can say God is a person depends on our understanding and perspective. In general, we can say, that God is the source of Energy from which persons are created. Or we could say, a person is the manifestation in the matter state of the M fields of the Creator. When a person dies, their physicality (P) in that particular shape ends, but their Soul as an Energy continues and can manifest another P according to the new environment they will live in. Or their Soul can remain as an Energy Plasma without physical manifestation. Technically we would not call a Soul a person. As we are matter state fixated it might be better to keep the concept of a person tied to the P. Can we as an Energy Pack outlast our Creator? The knowledge that there is something beyond the Creator has only been hinted at, and requires more growth and Knowledge of the Creation.

Back to what God is. Mr. Keshe drew a circle and said, this entity or plasma is the Creator. At the very beginning there was nothing but Energy, and it was still. There was no movement at all. We could call it absolute Silence. Then the Creator made a movement, and the effect of that movement created a ripple that went across the entire plasma. It's like dropping a pebble in a still pond, the ripples go across the entire pond and when they reach the edge they bounce back on itself and start creating new interactions. It's better to use the example of the ocean, because then we can understand how waves are created. Or if you have seen a huge ship go through a narrow canal, in its aftermath it creates huge waves from them bouncing off of each other. This is exactly what happens in Creation, when the M fields start bouncing off of each other they create a pressure, that creates more and more interactions that lead first to the creation of Inertia, and then to creation of life.

It's not the M fields that create the Energy, rather it is the motion of the Energies of the U that create the M fields. Another way of thinking about it is, in the ocean we have the waves on the surface and the massive water underneath. The waves are like the M fields and the liquid of the ocean is like the plasma of the Creator. It's the interaction of the M fields that lead to creation of life. But they are always part of the Energy of the Creator. When we accept this logical way of understanding Creation, then there is no magic to it. It becomes a natural process, and when we understand it we will feel ourselves as part of Creation. And remember that God is total and complete love, but this cannot be understood intellectually, it has to be experienced directly, then there are no words.

In physics they say, 'inertia is the tendency of an object to resist changes in its state of motion.' And gravity is, 'the fundamental force of attraction between any two objects with

mass or energy.' These definitions are too isolated and limited in understanding. They have no relationship to life as plasma and how the M and G fields of a plasma interact to create and maintain life. Therefore, the matter state scientists have no way to understand 3I and R2 and what they are showing themselves to do through plasma in the Space. For example, Mr. Keshe said, when two M fields touch each other they create Inertia. If we understand part of Inertia is the desire to exist, and 3I and R2 are living beings, then when the fields of their emotions touched each other and create Inertia, then through this process they were able to make copies of themselves, or offspring's. We as KS now understand this and don't need to be afraid. It's a demonstration of how the Creator replicates Himself in His Creation. The beauty of it is we are connected and part of the Totality of Creation, and through this knowledge we become co-creators of life.

The Creator is like a huge Energy gel and when it shakes and moves it creates M fields that eventually become me, you, and everything in Creation. Then he made a distinction by saying, that life that isn't localized, I think he means to a planet or solar system (SS), but connected to life of the U contains H and C. It's difficult to understand what he was trying to say. The plasma of the Creator has the sense of giving and pulling. This would be the Yin and Yang, positive and negative, and in plasma the G and M. The C14 is heavier and has the pull, so it is G, and the H would be the M. We know that H is the giver and source of Energy, but also everything is made out of the H plasma. It's interesting because all the biological life on Earth are made of organic compounds, which are chains of C and H. Then he jumped to the cell, and said, the Ca and other elements attach themselves to the cell so it can operate. Does this mean that life on this planet was planned out, and each of the different elements were created with specific functions to carry out our experiences and wishes for our life? For example, it was already decided that when Ca attaches to a cell in a particular way it will become bone, and so forth. The elements in this U are assigned particular functions, but in other universes they might be different, because they will have different field strength. And field strength is dependent on emotion and Time. And this is where Time, M fields, and Soul, become the essence of Creation. That's why we were taught that Time has two aspects Place, Position, and Possession (PPP) and emotion, intellect, and enlightenment (EIE). And then he gave a secret about the C14 having 6 sides to connect, and the seventh side to emit, and anchor to something. When we understand this no one can fool us in the U. But we have to try to figure out what this means.

We don't need to tap into the Sun for our Energy needs, we can tap directly into the dimension of the plasma of the Soul of the Creator (STC). The KF Plasma Systems that are running in the background of today's workshop are set up for this. It's for us to start absorbing it and bringing peace and change to our lives. He said, they are flooding us with Fields of the U, and they want to see what we will do with it. Will it help us to better understand the process of Creation? We should be able to understand one thing, that our Creator is not a physical body like ours. He is like an Energy Gel that is all Love, and when it moves it creates M fields, which in turn make all of Creation. What's interesting to think about is when there is resistance and more interactions the fields become the body of the Man. This resistance is the frequency. And when the plasma vibrates it becomes the matter state. Our Friends in 3I & R2 have very advance T in how to use the

M fields, but they are not as advanced as what we have taught the KS in how to use the STM. They have come here to learn that, and it's our job to teach them.

A special T was brought into the last Monthly Flight session and the KS could feel a change in the Energy during the extra hour it was connected. Mr. Keshe said, it can allow direct transmutation by connecting to Universal fields. The same is true if you want to receive the energy of an apple or a lamb. You don't need to destroy anything, instead you take from the surplus Energy of the U that is always available. In a way, you connect directly to the STC.

A KS shared his experience of when he connected to the Thursday Teachings with his headphones and he started going through the transmutation process. Then he had the idea to visit our Friends in 3I - Atlas, but as he started leaving the Earth suddenly his Soul got pulled back into his body. He asked Mr. Keshe how he could develop conscious control over the transmutation. And the answer was to practice more and learn where to make the necessary adjustments, and not to consider it as a mistake. Rather it is the process of growing until we finally achieve. If you read the Knowledge Seeker's account of what happened, it wasn't that he planned to transmute, it started happening by 'itself,' and then he was conscious enough to start working with it to try to fulfill what he wanted. This is where the practice comes in. And we have to remember that the STM is its own entity and it has its own life and desires. It goes where it wants and if our STP & P are strong enough not to be put to sleep, then we can start to participate. Fear is our biggest problem, but it is more than that, fear comes out of our attachment to P. Actually, the KS told what his attachment was, but maybe he doesn't understand it that way. In the past, those who achieved transmutation through spiritual practice followed a particular discipline and achieved their goal through very strong efforts and had a single focused mental attitude. Very few humans have achieved this. Today we have the KF Plasma Technology to help us, but we still need to make efforts. And in a very gentle way we have been encouraged to practice more. It is my understanding that the more they develop the T to find the right field strength the less effort will be required. Nevertheless, he said many times, 'there are no shortcuts.' Therefore, it might be best to use as much personal effort as possible to join with the plasma technology to achieve self-realization, which will open the door to transmutation.

He gave us another hint in that we have to understand how we are being held to the Earth through the gravity and Inertia. We have to learn how to create a field strength that is balanced with gravity and at peace with itself, and the Inertia. What does, 'at peace with itself' mean? If we know who and what we are and have detached from what is not us, would that lead to peace? These are things that have to be known within our Soul. But technically there are 3 different field strengths we have to understand, the gravity and Inertia of the planet and the field strength at the destination. Maybe through our emotion we let the Soul handle this part, and maybe the practice is learning to let go, but still have enough desire to move it forward. These are the subtle differences we'll learn as we practice more and more. But we still need to be totally dedicated and love what we are doing and want to achieve. He said, many people are achieving and there is no other choice but to practice more.

The final question about whether or not 3I seeded humans on Earth in the past was said to be no. Remember that we were taught that humans were created out of the fields of Earth. In the past, when 3I dropped off and picked up passengers, the ones that stayed here on Earth helped to advance and develop our intellect. Our development came from the influence of the higher M field strength of 3I and other Visitors. They are not our creators, nor are they our masters. They knew more on the matter state side, and that may have caused humans to give them an elevated status. Now with Mr. Keshe and the Messengers have taught humanity about the Knowledge of Creation, the 'tables have turned.' But as humanity we still have to integrate this knowledge and then share it with the rest of the U. We have to wait and see what will happen in December.

Thanks for listening.
