

619th Knowledge Seekers Workshop December 4, 2025

(Transcription, Editing and Proofing done by KF Brazil)

(Auto transcription by Elias)

Systems On; Man created from fields of Earth - not transplanted - mixed with Aliens how we got present race; Celebrate Mitra's Daughter birth - December 6th - whole U; Governments keeping December 19 secret; 3I seeded Earth; No physical children with Alien races - children through Soul - love; Mitra pure no attachment; Carry fingerprint of Earth pass to children - Create new Time with Aliens - children; 3I - 3,000 year cycle - receive elevation; Insider data from 3I - Soul - emotion - responds to data - Black Hole shielding - changes Aura - answers back same frequency; Got our Souls from 3I; 3I is biological life - mother; Biological scientific digital code - converts; Childhood education - Zoroastrian ethos ingrained; From Fire - to understanding Creator of fire; Look beyond religion - understand process of Creation; Teachings of Zoroaster & Mithraism; Fire is STM; Hidden meaning in picture; Ring of marriage - Soul to Creator; 3 layers feathers - Think, Speak, Act Good; Bottom 3 layers - mean opposite; Mysteries of own culture; Nazis twisted Swastika - symbol of Mitra; Humans first created out of M fields - pure - educated by culture, language, social conditioning; Survival engraved on Soul - living habits; Story about eating dog; Humans conditioned to believe certain things; Behavioral patterns ingrained by forefathers & environment; Subconsciously accept social conditioning; Soul on planet is conditioned by other Souls that influence like 3I - transmits field strength of emotion to humanity; Every 3,000 years changes life on planet; Same with Twin Sun; Zoroaster 3,000 years ago - before that Egyptians; 12,000 years ago was Göbekli Tepe; Next change due now; December 21 - Winter Solstice - Man comes out of his darkness; Why volcanoes erupting; Send ships to all planets; 3I - has power can interact, affect Sun - replicate itself - directly connected to Creator - biological emotions means plasma; Not robotic emotions - depends on components; Touch our Soul change within; Mix with other Space races - reunite with U Community; Marriages - emotions of love - create new Time & life; Man spread love across U; Racism - demise in U; Change Time through emotion; Joys and diseases of Space travel - increase intelligence; Salute Daughter of Mitra's birthday; Respect Mitra - mother of Creation - without her no children & no Man; Lack of knowledge caused isolation; Attachment to P isolates us: Soul cannot isolate - free bird from U Community; KF teachings - aware of Soul & P; Soul has own life; When Soul gives P true emotions - create new Time & life; Others in U have Soul; All Beings deserve to live; P of Man become irrelevant; STM created on this planet will count in Creation; Without spacesuit - embed STP in STM; Remembering Jon Bliven - transmute with Soul - not P; Man trapped within P; Cannot trap Soul - tied to Soul of planet; Fingerprint of Earth in STM - have to clean killing; Daughter of Mitra bring new generation; Christmas Packages; Monthly Flight Sessions for ONN; Latest UBESUS Headsets - if not use donate back to KF; Children of Mitra born in Zoroastrian culture; Respect women; West not respect; Every child first female - then change gender; Children of Mitra - create next generation - not male or female - emotion; All equal in Soul - behavior and understanding bring out strength of Soul; Love for Mother - manifest strong Soul; Faravahar - sign of Zoroaster Bird; Explains meaning - feathers - Ethos; White T-shirt - not forget wrongs - carry on back; Train children - meaning to life; Different types of fire - special temples; Children of different religions

together in school; Essence of belief's - same source; Give feedback how felt today; Purpose - feel transmutation - real dream; New Health systems - without doctors - emotions determine; Souls in group connected - balance each other; Common denominator is STM; Science - effects M fields; Emotions are M fields; ONN Units - balance unhealthy part of planet; Right breast cancer - betrayed; No more cancer - genetic defects - 5 years; 10% rule of plasma physics - no imperfection; Medicine Men - power to balance; Combination of fields in ONN; Machine's creator sets standard; Satellite Souls; Antennas - insulate U fields from electronics; All teachings loaded - ingrain into STM; Memory of P to ask question; Elevated Soul of rioters - worked; Systems change governing - affects everything plasmatic; Gross National Happiness Index not work - cities built to poison & control; Rebuild cities according to plasma - no problems; China to build Plasma cities; West uses fear punishment; Chinese don't give chance to do wrong; Not boring life - more time to enjoy; Comments by KS about affects fields; Massive amount of T to come; U Council celebrate Mitra's Daughter's birthday December 6th.

ENGLISH TRANSCRIPTION

(:15)

K- Yes, thank you very much. Hello, good morning, good day to you, as usual, wherever and whenever you listen to this series of Knowledge Seekers, from Keshe Foundation Spaceship Institute. Just before the broadcast, as I was talking to Rick, I said, "I don't know what's come, because we have no script." And he said, "He's chosen something." And as an Intro. And the Intro in a way was set for the teaching of today, which is in line with what we've been teaching, and in line what is to come. (:16)

In two days time, is one of the days that the world and the Universe will celebrate in coming times, the birth of Mitra. What we call birthday of Mitra, a day to us, is an instant of flash, in the life of the Universe (U), but that flash time will be cornerstones of bringing peace and what I call, equality across the Universe. As she is amongst us, already. And the celebration of the birth of Mitra will be across the Universe across many races to come. And what we listen to the introduction of today pre-sets for the next level of understanding of how Mitra's of the future will be created. We heard, we understood that life started the way it started on this planet according to the condition, the place and position, and then maybe through, and through its own structure or maybe by connection of the first Soul to another Souls of its balance across the Universe, brought the dimension of fields of the strength of a Soul, that interaction on this planet leads to the creation of the face of the Man. Which means the planet created the base for life, and then being matched, tuned to another race in the Universe, that the energy balance on this planet, lead to the manifestation of the Man, or life the way we see today.

As we see, there is a lot of pressure around the world by world governments to keep the 19th of December a silent time, (:18) in what is about to happen. But we see a lot, we understand a lot, what this day will bring. And then, if you understood the Intro, understood what I said in past few minutes, then it brings a very big question. Did life,

the way Man is with the intelligence of Man, the way it is, brought to us, due to proximity, connection, field balance, the 3I? Did we get our origin from something like this? Which is most probable. There are a number of questions, till now, in genetic modification, and test tube babies and the rest of it. And in so many ways we see men as us, two legs, two arms, cannot produce, reproduce, with another. Because the fields don't match, they move out and the field matches and the ones who couldn't have children with each other, they can have children from other partners.

But there is a very big fundamental question, is that, are some of those who came, chose to be what I call, 'refugees of Earth,' or it was a nice place we stay, are those that we cannot create children with, we fall in love with. (:20) And when this match of the fields come together allows the creation of child. Have we gone through the process that some of us as those who were initially here, created by this planet, have managed to create fields in the dimension (D) of emotion with those who are from outside that can lead to the creation of life. We have, and we become Passengers of the Universe. There is no choice. We are there. What happens when a human falls in love with an entity, fields, energy, body, structure, that in being balanced with each other, they can mix, they can share their emotion, which that emotion we call love, becomes the structure of another life, a Mitra. Pure, no attachment to physicality (P), no need to kill, no need to destroy, but becomes the beauty of manifestation of life, reflection of the Creator, what created us. We don't see Creator fighting to attain, He provides, it's us who fights because we are short of, in different shape or forms. Because we don't understand.

So, what we come across, what we understand today, is and would the future of the Man, those who were born, carry the fingerprint of this planet, in falling in love, in a way, means sharing, with another energy pack, in any shape or form, looking like human, 10 legs, 20 arms, (:22) and the rest of it, in the Universe, cannot physically interact, because, sorry, the women don't match the man, and the man of this planet don't match the woman. The genitals doesn't exist in the other one, the only way they can do is changing emotion, which leads to Time, leads to new life. Which goes back to the teaching, past few weeks, about the Time, when you put part of your emotion and the other side put part of emotion, that emotion has found the right environment within the field of the two, a new time starts, a new life, a new dimension for a plasma to exist, then we understand more about.

We're looking in the scientific world and in the people who are in this game, to see if anything happens on the 19th of December. And funny thing with this 19th of December, which more or less falls to around the longest night and the shortest day, which more or less coincides with the birth of Mitra. It's the reason, if we adjust our calendars, dot it here, dot it there, that 3I comes on the day of the birthday of Mitra. And is that a cycle that Man receives gets new energies from this process on regular basis, it's just like we get fertilized. Fertilized, we get everything possible to elevation of next step. (:24) From the data we're getting from 3I, which is kept, and it's open to some people who are very close to different structures from different organizations, is that this object has a Soul, it has emotion, it responds. It's responding to data we send it, and it sends it back to us. It has a Black Hole characteristics inside it, it creates the dimension of shield and protection

around it, it has his own aura and it changes the aura according to it. We know this entity has emotion, especially in past 3-4 weeks, with the data we received, we send back and he answers back on a data of the same frequency strength, is giving the scientific world a twinkle, what happens.

They are waiting to see interaction. I wait to see the emotion, I wait to see the energy transfer, I wait to see how this energy elevates the Soul of the Man (STM). The interaction of this entity has a characteristics which not only interacts with the Soul of the Earth, but interacts with the STM on the Earth. And waiting very closely to watch after the event. After what comes up. To see how the origin, maybe that's where we got our Souls from, or connection of the elevation of the energy of understanding, came by interaction of the lives on systems like this. Does not mean there are millions of people living on this subject. (:26) It means it has created dimension of life. We know it has a biological life. It is, as I said to one of the space scientists in past few days, it's like a baby, or it's like the mother, that you go goo, goo, gaga, hears and answers back to us, in a different combination, gaga, goo, goo. We know this. The length of the communication with this planet, with this object, is on a biological scientific digital code. It changes it to the code we understand. In a way, I talk to you according to the intelligence.

If we look at the life, then what it is? I have a strong belief and it's ingrained in me by my childhood, by the way I was educated, the ethos of Zoroastrian. The beauty of the first cycle, where Man for the first time came to believe, not in the Fire, but in the Creator of the fields, which is the Creator of that Fire. Being taught, being brought up in the environment of the Zoroastrian high school it's ingrained in me to look beyond religion, to understand the process of Creation. You as normal people, you talk about Zoroastrianism, you talk about Mitra, we talk about everything else, but embedded in the teaching of Zoroaster, in the teaching of Mithraism, (:28) of being part of the first lot to understood beyond the fire, we come to understand, we change that fire to the STM, burns inside, stays inside, and it points to the Source.

You look at the picture of Zoroaster, the symbols we see, the man with two birds, the wings, and the circle in the middle. There is a lot of hidden things sitting in there, and in one point, Zoroaster points to the sky. And another point Zoroaster gives the, what I call, the commitment to that, a marriage by Soul. Look at the picture of the, what we call, of the Zoroastrian sign. You see the right hand up and points to the light, to the Creator. Look at the left hand, it's the first time Man follows what doesn't understand. It's the first time we see a ring on the marriage finger. It's there, it has to be there. It's a sign of love, it's a sign of commitment to this marriage between the Man and the Creator. Every single picture you see of the sign of the Zoroastrians, the wing, the bird, has a meaning. And in being in the Zoroastrian high school, we understood the essence of it, not the pictures you look at.

You see the bird, the circle, which is the sign of the Earth, and inside it is the sign of the STM. It brings a lot of things back, which means we are within the Soul of the Creator. Here, that picture you put just on, open it up and have a look at it. (:30) It carries every essence of the Creation. That ring is the commitment between the Man and the Creator.

The right hand. In the pictures we see today, they go that way. But, if you go like the temples we used to go, the schools we used to go, the picture is not like this. The picture, the right hand, shows the horizon of the sunrise. So, they changed the direction, as they build the building, it shows where the Creator is. That's the symbol of it. And then we understand from the beginning, we understood the connection between our Soul and physicality.

And if you go... if you look at this skirt, Rick just put on. You see those three layers of the skirt? And then you see the top, the bottom skirt. The part of the wing three layers is: Think Good, Do (Talk ??) Good and Act Good. And when you see the skirt, it's the badness, not to. And the rest of it. It is the opposite to the top, which is in a way what you can be and what you do. This picture is full of meanings. It's amazing if you study it, because as students we had to, we wanted to, it was a mystery of our own culture. And so we know the thing, everything about it. If you look at the sign of the, what I call, Nazis, you bring that up, that's the Iranian, and this actually originally came from the pictures of Mitra, (:32) where the river of life goes to the mountain, and then on it creates Mitra, and the light of the God. And then it comes back to the creation of Man. And then, it's the sign of... And that's why Hitler chose it. It's the sign of being Persian, being from Aryan blood, understanding the cycle of Creation. And then it just all got muddled up.

But when we look at these features, when we go back to... when our ancestors originally came, in a way, it's like we create a child and we have a canvas. It has some of its own texture, and then with education, we talk, we teach them language, our language, we teach them the way we think, and we engrave it on their condition. In the process of Man, life, our Soul gets engraved, receives information from the cycle of life. Now here, we understand automatically which roots to touch, what to eat, what not to eat. And if you are not told that, sorry, in this part of the world we don't eat dogs, doesn't mean the other side, because they eat dogs. What is wrong? The one who eating it, or the one who don't eat it?

I was a guest of the South Korean government, and while I was there, it was a lot of commotion, where we eat, where we take us, and everything else. (:34) And the Korean government decided they send with me a German educated lawyer, who was brought in Belgium, but lived in Germany, to be my translator, during the time I spend in Korea. Amazing guy, he was like a world processes of today, translator, he was translator but he couldn't transfer knowledge of the culture and the nation, because South Korea president wanted to keep me in Korea for development and everything else. And as usual with these things, they take you to fancy restaurants and everything.

And one night, we were invited to go to a very special restaurant, and I didn't notice one shop was like the other. But, the minute we approached this restaurant, he said to me, "Don't look at that way please, that's... you don't want to see." I said, "Why?" It was like a blank face restaurant. And we went to the next door restaurant, literally a wall to ?? off. I said at the restaurant, "Why did you tell me not to look? What's the reason?" He says, "I can't say." I said, "No, you have to explain to me, why?" He said, in that restaurant, they consume dogs. It's specialized, it's a very well-known restaurant. I said, so I understand.

We had food, it was the officials were there, it was a very nice evening. And coincidentally, somehow, I gathered one to one, putting things together, the dog kitchen and the not dog kitchen is the same. The same pots as the dogs cooked, the steaks are cooked. It just depends where it goes. (:36)

And that puts a very deep impression on me that we humans have adjusted ourselves to path the way we were ingrained by our fathers, by our environment, in accepting what it is and what it is not. And this goes across what we received from, what education we received, how we were brought up. And then it comes to our Soul on this planet, whose Soul touches our Souls? Systems like 3I, which is life, and it does for itself,. It is a 'one man band,' but can interact and produce itself as it is, is a process of creation on its own, and what emotion has brought with us, and what has delivered to us that has been at the strength of, he knows the strength of field of our emotion, and he transmits it.

The biggest question is why every time this thing appears, every 3,000 years or so, the cycle of life on this planet changes. We know that according to what they say, every time our 'twin sisters' (twin of Sun) come close to us, and the planetary system, pressure of magnetic field releases, he tries pressurizing it, shooting towards the, what we call, the Sun, and we see huge massive activities in, what we call, 'bits of butts' and stones and moon and earth and everything else, and we blame one of them for creation of, what we call, the extinction of dinosaurs. But the same thing is we see those physically. (:38)

But what does entities like 3I which carry emotion, understand their magnetic (M) field of the STM every 3,000 years bring us? If you go back to cycle, the time and the cycle of Zoroaster matches into one of these cycles with things like 3I. What I call the 3000 cycle. We see it and then they told us there was no civilization, Egyptians were 6,000 years ago and the Jews jumping. Now we are all our religions 5,000 we come to the 6,000 ?? done, because it fits them to be everywhere. But now we find civilization 11,000 years ago, 12,000 years ago (Göbekli Tepe). Because now we took the mask off of limitation for us to be, away. We see cycle of changes every 3,000 years and it's due now.

It's not a destruction. It is we see it now, the connection cycle is between six coincidentally Christian calendars become St. Nicholas Day, because it was chosen by birth of something to fit. And the longest night of the year (12/21) which brought Man out of the darkness. In the cycle of the time this entity needs to transmit to our Souls. In the planetary system we see meteorites and increase in activity of the Twins what we call it the star (Twin Sun). In the Soul level is this 3I that entity? (:40) Does it need to manifest this way, or because of his interactions we see changes?

There's one thing for sure, the Earth is moving internally. In a way, the field strength of the Earth has been reduced. By reduction in the fields, we see the movement of the magma much closer to the surface. This is why we see huge volcanic systems movement around the oceans, around the islands, where volcanic eruption hasn't happened for 10,000 years, 20,000 years whatever. Is this cycle brings, or bring us the elevation of our Souls both with the interaction of the field of the field strength of our Soul, and in the dimension of physicality with the Soul of this planet? Nothing might happen. But Man

every 3,000 years changes, becomes wiser, somehow elevates. Why the cycle of 3,000 years and why this entity appears every 3,000 days? And it goes like paying visit to everywhere. You know, I go home, I go to my favorite restaurants, I go there, it appears to be transmitting, transferring and moving across every planetary system (sending satellites to planets in our Solar System (SS)).

Would we see the creation of new cycle of Man with the higher intelligence, but they don't match into us because they are not from this, they are in the shape of. As I said to a friend of mine, it's Apple, but the Chip inside is different. (:42) When we understand these things, when we look at the bigger horizon and then we understand, is the actual birth of the new cycle in communication, what will come this Saturday between 3I and the Earth? The Soul of us, not in dimension of physicality. As our Soul changes, our physicality changes, as the system, because we've seen a lot of changes, this system, tiny but has amazing power, which can even stand, interact, affect and change the position and the field direction of the Sun.

This is something which a lot of us haven't understood. This thing has gone so close and to any standard he would have gone vaporized. He's so powerful inside that he can stand to the big giant (our Sun), and causes it to 'spit and spat,' change the Soul strength of the star, which in turn changes the Soul of us, and we see a change of face because of intelligence of the understanding. What would be the position of the STM in the coming time, after this interaction? Our great-great-grandchildren being on the Earth will face this giant again. Interesting thing, as I said to a scientist, does things, behaves like this, because he has managed, can replicate, understands, and has strength in the direct source to the Creator, because he can adjust, he cannot. We see it having emotion, we see it as a biological emotion. (:44) Emotion robotic is different than emotion biological. We can make as many computers as we like, we can give them all sorts of feeling, but they will not have the biological understanding, because the system, robotic, stands on the merits of its components, where biological stands interaction with every other entity, plasma in the Universe, which conditions it to its creation.

In a way, in the next few weeks we watch. We are expecting a big commotion between what would happen, what will the 3I do. But as Knowledge Seekers (KS), you've got to understand, it's on a plasmatic condition. And the beauty with it is that it will touch your Soul. The change will come within the Man, not because of it on the interaction of physicality of the Man. And this is interesting. They watch what it does, and we watch what its magnetic fields affect us as the citizens of this planet, and Man as usual will look for outcomes. And I look for what is the onset, what is the deliverance, what will bring us to be part of. And how much this entity will elevate our Souls. How much this entity brings us joy. How much elevation of the knowledge will. (:46)

And then as we approach the 6th of December, and then we approach the mother Sun which is the Man coming out of the darkness of the night. Then we see what happens to our children. What happens when your children your great grandchildren become 'Passenger of the Universe' and on this planet they are whites and have fallen in love with the Chinese, a black, and the rest of it. But this time they fall in love with another

creature in the Universe. With the mother's cry, that my child is wasted, or would the mother's joy, and that we have a reunion with the Universe. And then what happen to the children of this beautiful thing, because now the marriage is not on a physicality, but in the dimension of emotion. And as we said when the two emotions interact they create a new Time, new life, new cycle.

Man has to stay and look with open eyes. Man has to be there from now on to spread the love of the Creation across the Universe and not exclusivity of me, my race, my color, my everything else we see. Racism by race, as being a Man compared to the others will create the demise of the Man, because through emotion this time Man's Time will change. As we lost so many as we endeavored to new territories and we killed many as we brought them new diseases, (:48) as we seen in conquering new continents which now we understand it was already conquered. What would the new conquering of the Space will come to be? What joys it will bring us? What diseases will bring us? What increase in the intelligence and understanding of the Universe will come?

The birth of 'Children of Mitra' will bring Man a dimension of joy, will bring Man a dimension of understanding more about their own creation and no limitation. I salute her birthday, I love every 6th of December as I pay respect to her birth and at same time I respect the mother of the Creator, what we call the Mitra. Without her there wouldn't be Mitra, and without Mitra wouldn't be the Child of Mitra. And without it, it would not have been Man. The creation of love and not struggle. As I see, it's not a chess game, it's a game we played within the chest of the Man, within the heart of the Man, where we carry our heart. And then we understand the process of Creation.

Man, in a coming time, when the doors open scientifically and the doors open with understanding the truth, come to understand, gradually as he found out the Earth is not the center of the Universe, it comes to understand he has always been part of the Creation, and his lack of understanding of his own creation has brought him to isolate himself. In a way, our physicality has isolated us, and it could not do with our Soul as our Soul has been a 'free bird' from the Universal Community. (:50) This is part of the work of the teaching and the things we do in this, what we call, cycle of Keshe Foundation teaching. To show for you to become aware of the existence of the Soul and the physicality. Physicality does what it likes, the Soul is busy with its own life. And when one can help the other and elevate the other, gives some true emotion and creates a new Time. And this is what will be the future of the creation on this Universe. Then the sooner us as humans with two legs and maybe some of us don't have even the legs but still have a Soul, come to understand, it's not the Man from the Earth which counts anymore. The physicality of Man is irrelevant. It's the STM which created on this planet, will count in the dimension of the Creation.

As we travel into the span of the Universe, we cannot always wear the spacesuit. And as our Soul becomes in line with the dimension of the existence, then we understand we need to learn the way to bring the physicality within the dimension of the STM to be able to track it, travel it and move across the Universe.

Last few days I had the pleasure to remember Jon (Bliven) many times because I did so many things with him. We didn't lose a friend, we lost a Soul mate, Soul which was there he knew, the love of him trying to move his physicality but it was easy for him to move his Soul. And it was amazing the way he was doing it. His biggest cry was why can't I move the physicality? Where his Soul could go and he had the same eye as it was his physical dimension. (:52) And he many times brought me the understanding, Man can trap himself with a physicality, but Man can trap himself with understanding that he knows nothing about his own creation and understand more of.

I remember a session walking in the Exhibition Center. I have him on the picture because it's there, I see him, he's with a camera, and I see him lifting from the floor. He made himself like a cylinder, the way you've seen, we have it, we organize it with him that way. And he stood him in that with a passport in his hand and I see him in what you call, in America but he was telling me what I was doing in Linz. I said I don't understand I can see what you are doing there but my physicality and my passport is in my hand. He could travel with the dimension of the Soul and see and convert it in dimension of physicality telling me what he sees on the Zoom, but being with me, seeing what I do in the room, thousands of miles away. In these tests, these conditions brought me to understand very simply, it's the Man who ?? is not detached and he cannot leave the physicality. It wasn't the passport which was holding him back, it was him wanting still be taking what he made here (?? Earth), as the last package with him.

We can trap the physicality but cannot trap the Soul, it is a free bird. Even our Soul is locked, tied up its Soul to this planet. (:54) And that Soul in the span of the Universe will fall in love, will create his own Children of Mitra and with it will create dimension of peace by the fingerprint of this planet. And the biggest things we do, we're trying to clean that fingerprint of the dirt of killing. That when you put it, it reads exactly the same as the rest of the Universe. My love on my life goes to the Daughter of Mitra, to her birth than the new generation she'll bring. We go for a break and we come back. (:55).

Excerpt from ?? last KSW - describes the Christmas Package ... 12 minutes long.

>> BREAK >> 619 KSW December 4, 2025 ... (1:09).

K- Thank you very much. Going back on the, what we call, the Christmas Packages, now, all of them are going through. This is what you'll receive. Because, these are actually

packages getting delivered and Santa, got a sense of humor on it. Comes from the Santa from North Pole. (1:10) And, this is how you receive the packages. Really, it's a gift, it's a gift of love, a lot of effort was put to do this. And then, you see it, the other one it tells you the same. Special delivery (from the North Pole), and it's beautiful. You start receiving this, they are ready, they are going out. And this is how these packages were, according to which one you chose. And you can see a collection of them. It's not just, what you call, something being in there, and as the artwork goes. Because in the moment, these are physically, they are the ones we are receiving in the next few days. They are going through the postal systems, delivering and whatever it is with that. And with it, it carries every emotion. These packages, it's literally, you can set a Christmas table with it. It contains everything, from the Christmas table, lighting for the... or accessories for the Christmas tree, with all the Gans's and everything else within. I hope you enjoy it, and I hope it'll be a fantastic time for many of you.

The same goes with other products of the Keshe Foundation, which is coming out once we pass through the Christmas, as we join all the retail teams, manufacturing teams of the Keshe Foundation worldwide together, as one network, as I said last week. And many of you are asking us when the Monthly (Flight) Sessions will start again. We start Monthly Sessions when we are in progress development of the new cycle of systems, because we learned a lot, we have to transfer it, (1:12) a lot of it needs to go into the systems with the Units, which is, come, what you call it, specially built for the Keshe Coins (KC). And we go by this, according to what we understand more, and we deliver according to the structure which we set up, and we just don't do sessions for the sake of doing sessions for people to be there. We do them when we need them.

There's a special announcement. As part of the contractual agreement we had with those of you who bought the UBESUS, most of you received the first version a couple of years ago and as part of our contractual agreement was when it comes to updating and is updated you'll be replaced automatically. To this effect the Keshe Foundation on the contractual agreements which we have with you, we receive a new latest version of the what we call, portable UBESUS. You should start receiving them sometime in the next few weeks, two, three weeks, four weeks, and then please just don't put them on the shelf. Try to get people to use and lock them with our system. This is where they were built for that purpose. You lot paid a huge amount of money for these systems and somehow we don't see the interaction from your side or commitment to be there. And so as you received the last of this. Some of you received it actually in the conferences as you attended in that a couple of years ago around the world. You will receive the new up-to-date version now which is much more powerful and it's much more to that point. (1:14)

If you do not use them, send them back to us as donation. We know how to use them. We have to fulfill part of our contractual agreement with you lot. But many of you have received these UBESUS headsets, and you didn't do anything with them much, or you try to do it, we don't see something. You have to have a condition to be able to connect with it. And these cost tens of thousands of Euros to be manufactured. And those of you who bought the UBESUS Units, and then receive the Head Unit to replace it. Now it's upgraded after 3 years of research development to a very much powerful system. It's

totally different than the last one. And please, if you do not use your UBESUS system, donate it back to us, we can get somebody else to use it. We have a provisional contractual to deliver it to you. If it stays in the box, it stays on the shelf it's a waste of helping another life. We can send it to Africa, we can send it to third world nations, where we'll bring benefit and joy. We learn more from it, that we can develop where the technology is on the back. So, you, as we agreed, you receive the first batch, upgraded. You'll receive the new systems in the coming weeks. But please use it, if you don't use it, it's on the shelf, you can't find people to use it, send it back as a donation to us. It is our job to keep every system up to date and up to grade, and the same thing goes with all of you, with this system. These are very advanced technologies, send them back to us, that we can bring benefit to the others, just don't put it on the shelf, because I paid for it.

(1:16)

Coming to our system with the communication, we, our team think, are getting to the last phase of polishing it, and the first 25, I hope, when next week or so, within this week, will leave for destination across this planet. When you receive it, I hope when all the problem is ironed out, please contact us immediately, I received my package, and then our team will lock into it. Till we don't receive a message from you that you receive your package, we cannot take any steps. So, once you receive these, the first batch of 25, inform us of the receipt, and then our people, you don't need to do anything, just connect it to the power supply, and a Wi-Fi system, stable power, we cannot keep on flipping, coming and going up. And our people will lock into it, you don't need to do anything else, they load it up, everything else, and then you understand what needs to be done, and then the game comes onto it, we have to find out how we operate.

Chinese side is a different operation, they, we have to lock it in different way for you lot, and the rest of the world we want to see. Some of you sent us that you are on the, what you call, the American system, which we have any... we don't respond to you, because we just gathering more information, who... how many people have the, what you call, the 'Mr. Tesla,' I call it, systems (?? Starlink). We are not ignoring you, you have to wait that we can, we start delivering.

Once this 25 is done, we need about a month or so to iron out anything, problems as we see it. When we see it, because we did this originally, (1:18) we sent two Units out somewhere to Europe, and we had to bring them back again to China, because the things were not in it the correct way, or was not loaded at all, in part. So, the first 25 you receive, keep in touch with us, if you see anything, let us know immediately. We'll open a link for information for these Communication (ONN)Units. If there is any problem, will be linked, attached for you to tell us what problem you see, what you have, and our team will be on top of it, to notice. But, just because doesn't do anything, just ignore it. Our team in the background will do. If we see a problem with your Unit, the team will contact you, says what to do with the Unit and what it is.

And then once that's completed, you receive the next 100 to 200 will dispatch. And once we are fixed with that, the Antennas will start moving out, that we connect you irrespective of your ground (Internet) line. So be with us and I hope you'll enjoy the new

adventures which the Keshe Foundation is getting involved in and it's very interesting to understand. We still carry on with our work, with our, what we call, endeavors in the science and technology. Never stops with us and you are part of it because you made us to be where we are to be, to be part of. If there are any questions I try to answer and we'll see where we go.

Q: ... (1:20) Can the Children of Mitra be compared to the creation of magnetic fields then? Emotion functions as a splash to the fields generating a wave that allows the interactions to happen.

K- You mean like humans? That's how we interact. There is no difference between Children of Mitra in point of creation and interaction than the rest of the creation in the Universe. The only main thing in them is that they understand the knowledge of Universe, where Man is stuck with the knowledge of this planet, and what concerns him with this. They come from different school of thoughts, they come from different school of fields. One day I start explaining to you how to recognize the Children of Mitra. By their behavior, by their conduct, by their talk, the way they stand amongst people.

R: Does their emotion make a bigger splash to the fields, let's say?

K- In a way, yes. You see, there's a big difference when you speak about Children of Mitra, which are close to the line of the thought of the Creation, very much close to the line of Zoroastrianism. (1:22) We go back. When I look at the historical time, the way it is, and the way we set up as a woman, and how do we behave and behave towards women. If you go back to a very recent time, which the women became outright to do, but it was given to the women of Persian background, what we call the Zoroastrians. They are more in line in that way than the European historical time. Look at the world leaders, look at the world scientists in the West, how they explained women. They are nothing, they are a spare part, they don't have the intelligence. Read historically, I can dig out many of them for you. They are nothing without the men, from the world leaders, top scientists of the West.

And then go back, look at the history of the Persians with the women. They are praised for. Man to be in a way without are not complete without a woman. A house is nothing when there is not a woman in it. And when I compare the two cultures, I see the Children of Mitra will come from that culture, where they are worshipped for what they are as their creator of the peace and the home, and where they're not demeaned in the Western culture as a spare parts, no need and something which is waste time, that they're just for physical pleasure. Kurosh (Cyrus the Great) said, a woman, a Man stands tall when there is a woman next to him. (1:24)

And it's the way the culture of not just giving birth comes into it, but it comes out of respecting the, what we call, the creation of the Creator. We choose different names for it. And we have to understand the true value of a woman. Even though we all, in the first few weeks of our inception, the womb of our mother, we are all female. And suddenly somewhere we just jump to ?? change and become a man. And that key is what makes

that change. What makes that Soul to decide to move to become a male part of it. Essentially we're all brought up with care, with love, with creating the next cycle out of the fields of the Man. It's very interesting when we look at the way, we look at the inception, and then with the way we look at the way different cultures respect a woman. The Children of Mitra will cover both, are not all female, as they are the creators of the next generation. It's just carrying the Soul, which is to be there as it is.

Any other question? (1:26)

R: So the Soul of Mitra manifests as a Man at times and as a male figure and female figures at different points in time, in history?

K- It's a behavior, not a manifestation. It's the emotion. I used to joke and it used to literally bother my mom because I ?? worshipped ... You know, she was ... A woman in Iranian family, it's the center of everything. You do anything that goes, mom, she makes decision. It's not that she wears the trousers, it's the respect we have for the mother. And in a way we all come to one point of, we're all equal in Soul. It's just that which side or which strength of the Soul we want to trigger for life. And what does that bring as a fruit of emotion. And if you understand this, it answers every other question which we have. It's not a male or a female, it's what I need to be, to be the balance and the creator of peace.

In true, what I call, Iranian home, you never hear a child, especially when you grow up, (1:28) to, even you have conflicts, to go against mother. In Persian culture we kiss the foot of the mother. Not out of anything else but respect. We kiss the hand of the mother thanking her for life. We don't have us in the West, because we lost the culture. Because we see ourselves bigger, and this becomes a problem in the cycle of the Creation, in the next cycle of the Universe. You see in many, we always sit below the foot of the mother. We never put the mother for us to be on top. It's not respect, it's understanding the love. You shall be the father to stand your right, with the mother you're silent, and this comes as a part of the life.

Are there any other questions? (1:30)

<< Rick try to put the image of Zoroaster on the screen.>>

Faravahar is the sign of Zoroaster.

R: ... Okay, so, this is an image of the Faravahar. .. How do you pronounce it again Mr. Keshe?

K- Oh, it's different, we call it Faravahar, how they call it. We, in Farsi, the light, or we call the fire, for it's the love of Creation. We have a name for it, which even Persians don't understand, we call it ?? isar. Which means, it's the beginning of, where the Source come from. (1:32) It's like where everything has its own meaning, a position. This picture, every line has a meaning, even the line within the separation of the stack, and

how it is. Those two little legs, one is doing good, the front which goes forward, and the one is the one which is doing bad, then it has to be behind you.

Zoroastrians wear a white T-shirt. And it has a... if you haven't been in the community of Zoroastrians, you... 99% of you don't even know, most of the people don't know. This white T-shirt has a bag in the front and a bag in the back, like a sack. And the bag in the front is for the storing the good things. It's a psychological bag, it's a, what you call it, symbolic. And the bag in the back is for what you done wrong. A Man does so much wrong in the past, it's behind him and needs a bigger sack. And then a bag in the front, it's amazing thing, when you understand the culture of the Zoroastrian. And then, in... your bad things are never forgiven, in Zoroastrian. Whatever you do, you carry it on your back, that with it you learn, that becomes a good thing in the front. It's a very special T-shirt, it's always white, and it's got a pocket in the back of the neck, on the shoulder, and a little pocket in the front, by the heart.

And you are never forgiven for your wrongdoings. It's you to learn from it, not to do. There is no punishment. And these things is embedded in this picture. (1:34) You still carry your bad things behind you. That's part of the leg and one is the front. The leg which is the front, in the same direction of the arm, which points to the Sun, to the light, to the Creator, is that, what you call, good side. But you have never allowed to forget what you've done wrong. You're not forgiven. It's for you to remember, and to take heed from it for the future. I love the structure, understanding, to understand the Zoroastrian or Mitra, is amazing, especially when you are brought in touch with as young age, then the whole thing takes different shape. Structured life has a different meaning.

Q: ... If we look at the Faravahar as a 3D picture which you're suggesting to is the third leg or support like the base of a Star Formation and the rest of the body...

K- No, no. It is... This is the symbolic. The leg part with like a skirt is against the three layers of the wings. If you look at the wings it's got three layers original drawings. One is Do Good, Act Good, and Be Good and when it goes from one to another side it's the cycle of life. And the skirt is opposite to that. When you think bad, you do bad and you act bad. (1:36)

R: Isn't "talk" in there?

K- It's what you talk, what you think, and what you do. It's the creation of life. This is human. And that circle in the middle between the wings is partially explained to be the Earth and inside it usually you see another ring. And there is an interpretation of why you have the ring on the hand and you have the ring on the Earth, the ring on the hand is being away from the Earth is the Soul of the Creator (STC), STM. It's very interesting. I spent days in the temple and we learned from it. And you understand it.

The Zoroastrian teaching is very different than what is in public, what they teach you. Why you have fire? You know they said the people worship the fire. We used to tease our friends Zoroastrians, we used to get a match and burn, ?? the body is gone. But the

Zoroastrians believe on different type of fire. You have the fire of the kings and leaders. You have the fire of the holy men. The fire of the holy men cannot benefit the fire of kings. And the temple of the holy men is different than the temple of the kings, where the fire is kept. Then you have the fire of like who we call industrialists or people who are the traders, and then there are five I think fires in the culture of Zoroastrianism. And one cannot be mixed and the way the temple is set is there.

It's very interesting because if you go to Tehran, (1:38) you have a temple on the right side of the road and the Zoroastrian high school, and on the on the left side depends which if you come from the Russian embassy it is on the right side, if you on the left side is a church and a school for Christians, and the back of not far is a mosque, and by law this Zoroastrian school they have to teach Islamic religion principles, and they teach this Zoroastrian teaching principles too, so we have a religious hour. And the religious hour is taught by Mullah, used to be taught by Mullah with the turban because they had to bring their influence who they are, what they are. And then we get taught by the by the most of the teachers are Zoroastrians, the principles. ?? The Principle (of the school) has to be a Zoroastrian. And we learn different and then we move across the road 10 meters, it's just a road and two pavements, we have the church what is called ?? Kolush, which belong to the Christians with a church next to it as part of. The temple faces the church on the same street.

And you listen to the Muslims, you listen to the Christians, you listen to the Baha'is, you listen to the Zoroastrians, and you think you have Jews with you in the classroom, and you think, "My God, outside they're fighting, inside we're all one." And it brings a lot of joy to be part of this. We sat on the table, Christian, Muslim, a Jew, Zoroastrians, because tables were four and sometimes they chose that way to live, because they are friends. (1:40) And they would called it the 'United Nation of the faith.'

And it was amazing, the structure of the teaching. At the religious time, we split. The Christians go across the road to the church to be taught by the priests. The Muslims had a, what you call it, a Mullah the turban with the long middle Islamic dress coming to teach. And then the Zoroastrians had the teachers from the temple. It was just a door they opened up, and they come in, or they go to the temple. Actually we used to play sometimes in the garden of temples. And there they didn't say anything, because it is yours, children are respected and loved in Zoroastrian path.

And you see why outside they are fighting inside they love each other. They used to cheat doing each other's homework, they used to pass messages for the guy to get an answer right for the teacher. There was no religion difference and the minute we came out of the frame of this school, one was a Muslim, one was a Jew and there was a differences. Inside there was no difference. And I always said, once the world becomes a ?? (?? Bahai School) ?? it will do the job. The worst thing you could do in the school was talk about the religion. You'll be dismissed from the school. (1:42) It was the way we come to understand. And we could see by teachers how all the religions are literally made of one thing, with the differences. And if you put those differences, we're all the same, ?? living the same thing.

R: Would you like to take a question from Imgard?

K- ... There's something before Imgard comes on I have to explain. Many of you were touched by this system last week. And the thing is we noticed from what you tell us, many of you virtually fell into the same path which was the plan of what we thought it should be the best way to do. We would like you to report back to us how you feel today. What emotions you take. Our purpose last time was to bring you to feel the reality. To see if you see different dimensions (D) and to create dimension of physical transmutation of certain things that it becomes very real to you. (1:44) You think it is actually there. And it was the purpose of it, because I explain in a future time why we need it and how you need this knowledge in the future to bring a dimension of understanding in the Soul, not in the physicality, but you still see it, what I call the real dream, but in three dimension, which is part of the manifestation of transmutation. And please write to us how you feel next time, next week from this session, because it's very, very important to us. Carry on.

Q: ... There are several of us here in the United States and we were thinking that, that we were waiting for the next instructions, we were supposed to just wait and not do anything. I used it for myself with Dr. Kern and there are other people that I would like to have use it, but the cost is significant cost and, and that's been the hold up.

K- These things should be ironed out with this new generation, because we learned a lot, we had to do a lot of, what you call, changes and these all will be addressed with the new system.

Q: Okay so can we then count I'm getting more instruction?

K- Yes, because the new system has different... (1:46) We have to create a condition that you can do it on your own without any doctors, because the system tunes itself to what is needed. You understand? We're getting partially there and this will, in a way it takes the role of the physicians out of the system because the Soul decides. And this new system design, especially its Communication system sits on that way. We create a central dimension that it's you who decides how much to charge. You don't need the doctor. It's the emotion of the person will set what it needs.

It's... let me see... partially it looks... let me see if I can find it. Just give me a second as usual. I'm a very slow coach. I think you've seen it before, but it's much more sophisticated system than this but essentially what you receive which before was just a Headset with holding hand part, this is very much look like this. So you get the details and instruction what to use, how to use it, I hope with a small manual, or sheet. And we don't interfere, we try not to use the doctors, it's your discretion to tell us what you've done, what you do. (1:48) And we see what we need to change at the center, what we change at the center as a control will have a direct effect in how your people will use the system. We have to set up structures, multiple structures in different layers, gradually

give us a few, what you call it, as usual Keshe Foundation's few months for us to bring this about.

But the biggest thing was to build and complete this phase and the new UBESUS, what we call, portable. Two Units were made, we... but those even the ones which the two are obsolete already with the new design, they're out of date. And we try to come up with understanding more of the psychological part of this system, that does not need what we call, medicine Man, Man of the medicine. In space we don't have a Man of medicine, you have to do it.

What I think we'll see in the structure with the use of this system is what many of us will feel maybe on the 19th of December with 3I. If what we assume to take place will be correct. In a way, you tune to the Soul, and the Soul will envisage the physicality or enlighten the physicality. And what would that do in confirmation of the physicality, this is what we will see. (1:50) The eruption of the volcanic eruptions will bring a new ?? face to the planet and with the change, with this will change the face of the Man in the interaction of the elevation of the Soul. These are part of us understanding, but we have to become the observers, long term not instantly, just that day everything will change. It has to take shape, it has to bring a balance. I'm trying to find a picture of the new system. Guys in the back in the lab, do you have a picture of the latest UBESUS you can post me? I know you're listening in the background, if you have one, anything that you want I can show?

Q: I have particularly the question I mentioned this before that I have someone here I would like to work with who is alcoholic and maybe also multiple personality and is on medications and all kinds of stuff. And Dr. Kern had advised that if a person doesn't have skin in the game as he says it, no changes may happen and skin in the game means in this instance pain. So I'm a little confused as to how to proceed.

K- Put them on the new system, let's see what happens when you receive it. Because that has to be, we in a way we are not getting rid of the what we call, physicians, in a way we're leaving it to the... (1:52) I'm waiting... And between the Soul of the system and the Soul of your person using it, they decide on the balance. They decide.

But we have to, once you receive this, we have to set system in our system, in receiving your system, because all your systems are connected to our system. And then we have to see how we adjust the two. That we can, what you call, coordinate. Because you can't have a million people on this, going to the same doctor. But you can bring a balance between the million people in energy, of the Soul level, that it brings back a common denominator. Considering that there is one sick person in that condition, out of a million, the one... the 9.9999 million people, or a thousand, hundred thousand people, will affect the one which is lower, which is not correct, and so the system balances itself for the other one which is sick back to come to the balance like the other majority.

Q: And I was warned that if an alcoholic goes off of his alcohol that can be fatal if they go 'cold turkey,' versus with other drugs it is not that way. So I just want to make sure he's safe. (1:54)

K- That's the decision of the, what I call, the energy system, what you accept with it.

We be running a test now, in a very specific way, with the connection between the emotion and physical condition and blood pressure and diabetic, and the results are amazing. The what we're getting data is absolutely what we see physically people are reporting to us is amazing. And we don't need to do much. It's just that the body decides through the emotion to eliminate the emotion which causes or has caused the side effects of it. In a way we've gone for repairing, changing the break and keep on repairing the car. Then in you, in the new UBESUS, we look at it that way. If there are 10 UBESUS on the line, and one has a cancer, one has a diabetic, one has the other one, that the other nine don't have a diabetic, the other nine don't have the cancer, the other nine don't have, maybe eight of them has a blood pressure, two, two of them has a blood pressure, 8 of them, no. And then we see, does the balance come? We work through the principle of the plasma. And it's taken us a long time to get to this point.

Q: You're breaking up. I didn't hear what you said. (1:56)

K- I said, how the majority who are on the line will decide the balance for everybody else, who's unbalanced. So, what you call by the law physics of the plasma, the stronger always gives to the weaker to become balanced. And this is the principle which will come into operation, once this new UBESUS are operating the way should do.

One of the reasons we abandoned the UBESUS, the big UBESUS, and we went for this, is that running 35 motors, engines or whatever was deafening inside. We could not create silent reactors. And then the system would not hold to its capacity and then we had the structural problem. With this system now, we, instead of you, system being the surrounding, your Soul creates the surrounding itself. It's a very, very specific way the way it's done. And secondly, it brings back into operation a three-dimensional structure of the whole Soul and the brain, which is cause of 90% of the problems in physicality. Why do we become addicts? It is the, sometimes, the gene balance, sometimes the structural balance, sometimes is emotional balance. We're not born all alcoholic, emotion brings us to it.

One thing which now has been discussed a few weeks ago, the world of science is getting to understand, you cannot ignore the effect of magnetic fields, (1:58) which is emotion and everything else. It's like what Rick brought up a couple of weeks ago, that the scientists started adding a magnetic field with it. What is emotion, it is the magnetic fields? You cannot in 99% of the what you call it, Wellness bring a change if you cannot touch the emotion. Even some of the physical damages can be sorted with the emotion if you create the right feeling strength of what you call it, out to do it, you can do it.

Q: Do we still need the mobile phone to use with it?

K- We let you know. There is... how it will be done you'll be known, we'll let you know.

Q: ... Thank you so much.

K- Thank you very much. Thank you indeed.

It's a leap in science and technology which partially we try I think it can be done it'll be connected to communication and new Communication (ONN) Units when the (plasma) Antennas are brought in. The balance of the health of the planet will come into play for the ones which are in it. What I envisage is literally, as all of us don't have a cancer, those who are connected to the system with the Antennas and the rest of us which will come into operation, will bring that to balance. And the balance is not a cancer. We are 80% emotionally balanced sometimes, (2:00) and when we are not, the other 20%. This 80% will bring the others, and then stop the creation of cancer. When you have a cancer because your partner betrays you, and then you create a cancer on the right side of the breast, then the other 80% of the let's say world population and don't get betrayed by their husbands. So it's the emotion which creates that cancer. Now the other 80% are there to elevate the emotion, because it's balanced. So you lose the basis for the creation of the cancer.

And it's the same with genetic defects. When you say, in the time will come, there will be no genetic defect. When we get this system running, I think we are about 5 years away from it. It doesn't matter how much we are advancing, it's just a progressive advancement to it. When 90% of us don't have a defect on a certain genes, when you work through the plasma, you understand the work of the Soul, and the Soul of the Physicality (STP), that 10% by rule of the physics of the plasma will balance themselves. There cannot be any imperfection.

This used to be, thousands of years ago amongst Man, ?? when there was the ?? power of medicine Men, because they used to communicate without words, they understood each other's emotion. And, then you understand what the changes is about to come. It's a combination of these Headsets, combination of the, what we call, the Communication (ONN) Units coming. , partially is the Satellite people, who are there as a Soul, because they set... The machines are standard, set the standards of the fields by the machine creator. (2:02) The Satellite Souls, which are part of the Foundation work, which are set for that job, because they put their Soul in it, they bring the human balance effect into it. And gradually you will see how things work.

Any other question? ...

Q: ... Great Professor Keshe, will 10,000 Units in operation revolutionize the human world in one fell swoop? It was enough for just 100 monkeys to be educated in a group on an island, for all of them to become knowledgeable about the technique of washing potatoes before eating them in the famous 100th monkey experiment. With 10,000 Units, will it have the reverberation to influence 8 billion people?

K- When you work on the balance of the fields, should be. But I... what I ?? recommend in the coming time, using the, what you call, Universal Antennas, these Units needs to be updated, even in the structure. We have a problem, we see the problem, I've seen this problem since early 2000 with my systems. The insulating the Universal fields from matter state of the electronics is a harsh thing. (2:04) And even in our labs we have developed technologies, we have ?? developed materials, system combinations, to separate the effect of the fields and emotion of the fields. But we... your... these computers are your physical, it's like your body, we control the emotion with the Soul, with the Antennas. Then when you have so many, in connecting to each other to make one big Antenna, yes, we'll .. effect everyone, will be covered on it. Maybe you go to a hundred thousand, maybe people want to be, to be near to.

And as I was explaining to a Knowledge Seeker, at the moment when you have these (cell phone) Communication systems, you have to have these masks on top of the church you've seen, they will make a tree, hidden, hiding antennas and everything else with it. These systems, okay, some of you receiving it are on the, what you call, Himalayan level, and some of you are in the, sitting in the city of Amsterdam, 26 meter below the sea level. In that way, you all cover each other. Would it be the time that when we can't cover, we have no Units above this level, humans on the, above that at all, this level will be different than the others, because they are not benefited by it. I don't think so. It's all to come, it's all to understand, it's all to put together.

Q: ... How can you revitalize your teachings in practice, and influence all areas of knowledge with action and ?? dynamism? (2:06)

K- My... with the new Units, it's very interesting, I looked at this very recently, so, I don't need to go back anywhere with it. With these Units you'll see, most of the teachings, all the teachings, whatever is available, teachings, will go on these (hard) disks on these Units. And then, you have the Universal System, which is connected to these, it communicates, ?? you come in, other people use it, So, the teachings will be ingrained in the STM. And then those who want to use the memory of physicality. Because information when is... when you ask a question, or when you put a data in it that is moving, it's dynamic between 10,000 Units, it will have an interaction transmission through the Universal System, which interacts with the plasma energies. Which means, it'll be very effective, in that process. In transferring the emotion and everything else with it, to the person who receives it. And will have access to all the knowledge which is in all the teachings. Let us develop the (plasma) Antennas and let us, the team in the background, do all the tests, and then we'll see.

I still work as partially. I was advisor to one of the world leaders. In a very recent uprising. And what I advised the leader, I said, there was literally, you cannot fight people on the street. You have to play the tune of peace through the headphones and microphones which you threaten them, they just walk away. They don't need to listen it, to hear it. You can play the silence music through plasma, (2:08) that elevates, bring

peace to. And they battled it for weeks on the street. They tested it, one or two times, and it worked.

We got to learn, we relied too much on shouting at people, and they react physically to it. Now we teach the Soul, bring peace to the Soul, they walk away with their physicality. The governing will change, and we will govern through these systems, you will understand. These (ONN) Units are just a disguise for freedom of the Man. But, it's like if you go out with the pharmaceuticals, they go every attack. When we do it and you use it, the pharmaceutical doesn't have any market to sell. And it's the same. These Units are far much more than what you think they are.

Q: ... Which of the publicly available technologies could be influenced by the network being deployed? The Cup One, the MaGrav, or neither?

K- Everything dynamic. Everything plasmatic dynamic will be affected, because they receive, they have to react. Distance gap, MaGrav position.

Any other question? (2:10)

Q: ... I would like to define a control, what he says, a control volume in a community or an entire small town to conduct research and determine the gross national happiness index, similar to what is done in the kingdom of Bhutan. After the initial survey, would the inhabitants learn the technology of the Cup 1 or MaGrav, or would the investigation be conducted using headphones? Then periodically the research would be repeated to measure the evolution of the index. How can this work be made as scientific as possible, to serve as a model for later replication?

K- You cannot do it in the present structures, because of all the bits which are in it. You have to build cities for it. And in part of our work with one of the major governments, is building the first cities this way. You can't be camel bird, and that says, "I'm a bird", and then say, "I'm a camel." You have to create the environment for it, then you can. The environment of our cities are... they are very much poisoned, they're toxic. There are people who encourage this toxicity to be. to their benefit, because both sides benefit from it.

You walk the cities of the streets of today, you just look how much negativity, how much pressure, how much dislike, how much misunderstanding and how much, much, much, much, very, very many things are there simply, (2:12) simply by the physical structure of the buildings, the road plates, the road map, the lighting. They just put there because he had to be somebody drew it. When you go between the two lights, (if) it's very late, till the next light you have to (walk under) the dark patches, because there's not a light balanced light, that brings you fear. What happens to you especially if you are a woman or you think somebody will attack you. You're always and one thing is just one of the examples.

When you create a city which does has no light to you by your emotion you create a light around you which gives you the emotion of safety. It's a big difference. We have to restructure our lives, and then we'll see the benefit from everything else. China is building such a city. No lights, will be no hospitals, very little, no supermarket, and no police station, no courts, no prison for this city. This takes time. And then you see you create a condition that there is no fear, there is no hunger, there is no need to be worried for whatever. And then you'll see how Man's mentality changes with the rest of it. Once you create a piece of Soul, you create a piece of mind, you create a piece of physicality. Man do a lot of things out of fear. And it's the job of the people who are in position building the new cities, take all these elements of fear and the conditions which create that fear away. (2:14)

The Chinese government does a beautiful thing, and I always loved the way they work. They don't go out (to create) punishment, they go out to create a condition that you can do (no) wrong to get punished by. It's the philosophy of the way they do. A lot of things in China works that way. And then if you actually go and do something wrong with everything set up, then you get a back of it. Because you break the law of it. But every effort is made that you cannot do wrong, or you know what's the consequence of what you do wrong. You walk the streets of Beijing, never see dirt. Very hard, if it is something, it gets cleaned right away. You walk the streets of Beijing, you don't lock your bag. You're not afraid of theft. Because, government has brought enough cameras, enough other forces, that gives you that security, nobody... you can't walk away much with it. In the West you see, let's say, a hair band or something nice on the floor, somebody picks it and goes. In China you just pass it two days, the darn thing is still there, because the owner didn't come and pick it up. Because if you lost it, you backtrack it, you could come back to it.

Governments have to create that condition. In the West, it's done by punishment and fear. In China, it's done by making conditions that you don't do wrong, get punished for. But if you do it, you know the consequences of it. (2:16) This is the future cities. Thinking deep, thinking management by managing it, deep thinking in how creating conditions, environment that things cannot go wrong. And now with the technology like this, saturating it with enough connections around with everything else that it always stays balanced. It won't be a boring life, it won't be a boring thing, it'll just be more time to enjoy.

Q: Can the Units be purchased by several people and installed in the house of one of them?

K- Yeah, why not? This connects to the point.

Q: ... What is the result if you buy this way?

K- Nothing, it's just how you share the income from it. That's what... We now setting up, it's just through connections and the structures now, we're setting up with some of the Knowledge Seekers who donate, quantities 10, 20 Units and they say they don't want

income of it, or whatever, with the government, that we put ten Units to a government, to a university in the governing. I'm talking to many ambassadors for implementation of how many... But they say, how do you choose the person? I says, it's not my job, it's the guy who donated it. If he doesn't want, then we decide in another way. But it gets people involved in sharing knowledge, finding respect and love for each other.

Many Units will go to educational institutes, that the money from the income, which is 2.4 Coins a year, which is 24,000, (2:18) feeds about... Any student in Africa needs about 100 dollars, if that's 40 dollars, 50 dollars a month to live. They don't even have that. Then you can see, what (one) Unit can educate 5 or 6 people at highest level in universities. Not by an empty stomach, but with the food in the stomach. It's another way of doing it. We have to find the ways around it that makes it possible.

Shall we call it a day?

R: Maybe I can give a couple of reports from today's session that's in the chat here, so that you have that for your data. Monica says, "Today during the first half at some point I seemed to fall asleep. The entire lecture flew by and I couldn't remember parts of it. I felt the energy and opening of my chest, and also felt my forehead. Now I feel a sense of balance." Cristiano mentions, "Today I felt my Soul expand and leave my body. When I got up from my chair, I felt dizzy as if I were off balance, off the ground." Doug mentions, "Since the last Knowledge Seekers Workshop, my lifelong cigarette habit or addiction has diminished significantly, 75 to 80%. The emotion of this habit has changed. I've given up in the past but always resume. This feels different and permanent. There doesn't feel aversion or disgust, just a growing indifference, a lessening, a lessening desire." (2:20)

K- We have a Knowledge Seeker here, we have four or five of them this week. I don't say, if they want they can come and explain, because I found this fascinating, it's amazing. They wrote about the dogs, and I have other people writing about themselves and the children, what happened since last week, or their mother, who was there or wasn't there. This specific Knowledge Seeker had a very strange experience with her dog. And I read it with such a joy, the joy was there that the technology works, the joy was there that it brings peace of mind, presence of Soul. And we're getting a lot of you writing how things change in perception. And this is the whole part of the teaching, that's why we do these things in the background. And it'll be nice to see it, to be able to visualize it, to be able to feel it, more than anything else. And it's the purpose of these .. works because it tells us how to tune our system. There's a lot more to come. Massive amount more to come. We're just not, as I said, having got the first steps of this technology.

R: Mr. Keshe, before you go, I just wanted to mention about the Universal Council has an invitation to everyone to a celebration of Mitra's daughter's birthday, (2:22) coming up on Saturday, December 6th at 2 PM. And it's at the same Zoom number that we're currently at. Not sure if they're going to broadcast to Youtube or not, it might be just on Zoom. But it's same Zoom channel again, December 6th at 2 PM Central European Time. Mitra's daughter's birthday celebration. And that's with, again, with the members of the

Universal Council, who are putting that presentation together. Probably be about an hour and a half program, I understand. And I'll be there hosting as well. Let me see, is there anything else before we go Mr. Keshe?

K- Not really, thank you very much for being with us. I hope we understood more than learned about the Creation. And sometimes it needs to be understood and I think today was a reflection of understanding, trying to understand the process of Creation and how we will... and actually learning something with it, which is a different thing. We see you next week and hopefully we move to the next step in the whole process. Thank you very much.

R: Thank you Mr. Keshe, thank you. We have a message from the Universal Council that I'm to show as well, which is somewhat regarding the presentation, but it says, "We, the Universal Council, invite the Keshe and Universal family, present at the Earth, to unifying at the Soul level, every time, every day at 9 PM Central European Time, and every 3 hours, (2:24) to give through our Souls to all Souls in existence to elevate in level of understanding the Ethos of Mitra, Universal Love, living life as a peaceful Being, respecting all life and living equal."

619 KSW – December 4, 2025
