

625th Knowledge Seekers Workshop January 15, 2026

(Transcription, Editing and Proofing done by KF Brazil)

(Auto transcription by Elias)

Cornerstone Knowledge of Creation - how a field becomes matter state; How energies & fields behave; Created from rays of Sun; Creator's Ray; Cosmic Ray (CR) - from Creator - interacts with own environment; Creator's Ray interacts with itself - become stars - center of galaxy & U - because fields originated with Creator; Energy of food part of egg & sperm; Vibration of fields become waves - interact get matter state; Original fields from Creator don't create compression - interact amalgamate; Waves of fields create compression and pressure; Example of ocean waves; Waves formed out of compression on surface - force creates own conditions & creations; Distinguish between original fields and waves from fields - when study environment; Compression use frequency - create things; STM radiates fields creates cells & organs; Waves of fields - create compression on cells, which create other cells in that environment - why liver always same cells & same position; Environment around cells decide that cell's position - compression by other cells plus wave - create frequency; Remade Naomi's brain cells; The "Virus" mimicked energy of Ca - calcification brain, lungs; Soul still radiates same fields; 2 types in U - fields of Creator & waves of fields; Creator's field - interacts with itself - dynamic spherical shaped plasma - U, atom, electron, everything; Top & bottom Earth flat - Milky Way same - transfer its wave energy to keep spherical - why hexagonal & pentagonal shapes on north and south poles & skin; They transmit field waves - entity can't hold; Use hexagonal - create any shape -planets & U - skin; 3 Nano layers Skin - Inner, Middle, Top; Inner create shape of skin - hexagonal; Create any shape UFO; Vibration and compression make walls - boundaries, size, motion; Use MG fields - pull yourself into what you create; Create G field without matter; Advanced T - centuries to understand; Central plasma of system only DC - boundary AC - matter - compression of 2 fields; System only DC inside - like star or planet; Copper bars into Earth - get current (Tesla); Creator's Field (STC) crossing everywhere; STM leaves Earth - Creator's Field; STM becomes seed - dictated by emotion at death - like wheat seed; 20% protein - perfection; Plant perfect Soul in U - purpose of teaching; Add to strength - emotion; Galaxy and U are light; Origin of colors; Change environment - compression, emotion to perfect; Teaching gives totality of knowledge; Change skin color - compress 3 layers of skin change emotion, understand languages - skin part of brain; Sun warms skin - feel emotion whole body; Full knowledge of fields in drawing - 99 attributes Koran - hundredth is drawing - transmute; Play - field strength of Creator - emotion; Don't need egg & sperm to create child - Child of Mitra; Fields have no D - create compression then wave - manifest P; Built into latest UBESU Headset can't copy - hidden knowledge; How 3I enlighten us - higher M fields; Compression of plasma fields - process of Creation have to connect to original fields; Play Enlightenment Game; First understand love to be able to give; Reach enlightenment different than animals; Peace comes when need nothing from outside - everything freely available - even greedy; Transmit through Game; Added to environment; Grow Naomi brain; Through 10,000 ONN Units; Get Energy while playing; Become part of DNA - whole planet - gather love; CR Transmission sessions; ONN make independent of food chain - free of financial restrictions; Politics irrelevant; Earn Keshe Coin (KC); 8% to your government; Reduce taxes to 10%; Need huge

financial support from KS; Transparent - no corruption; Saudi royal family rob nation 1.3 trillion - end this; Game provide everything - not force; Emotion is field strength - already know by age 2 - tantrums, etc; Emotion of Transmutation - balance all emotions; Not leave organs behind; Creator tames emotion of anger - jealous of Mitra; Mysticism of emotions; Where go after death; Soul lasts forever; Compression squeeze plasma - creates waves - gives variation life; Seasons by compression; No technique for compression - emotions Soul; Teach to analyze emotion - move body; Setup emotion - P responds; About love - pre-planned in thoughts - mature - not abuse; Not slave to love - satisfy need; About Iran - extremely bad - Israelis pay Arabs to start revolution; British and Americans - divide Iran into 5 parts; Americans moving Taiwanese soldiers into Sudan - start war with China; Delivery of Electric Gas Plasma Generator; Mr. Zarif - spread lies; Brain dictates structure of pentagon in skin; Drawing 3 layers skin - Middle layer controls color, shape, softness, hair growth, everything - change by emotions; Space gap between cells & tilt; Wrong emotion - locked - eczema, diseases; vitiligo - ancestors; Chemicals change skin color - use emotions; Hair changed in KSW; STM carries fingerprint of Earth; Frequencies don't interact - part of structure; Oceans behaves like plasma - waves; Different emotions looking at stars; Create vision of UFO - for groups; Light between hands - expand over yourself - don't teach - transmutation; Black Holes collective work - white light to others - same as star; Why Venus lost oceans - pulled; Everything comes from one source - interacts with itself - Mass and Weight; Enlightenment Game upgraded - not get bored; Difficult to fit into society; Target 1 billion playing - for an income; Don't use shortcuts - not get enlightened; Comprehend - bring lot of changes

ENGLISH TRANSCRIPTION

(:16)

K- Thank you very much. Good morning, good day to you as usual wherever and whenever you listen to this series of Knowledge Seekers program from Keshe Foundation Spaceship Institute. As usual, we welcome you back. And we hope we can add to the knowledge.

The knowledge today is extensive. What we're going to teach today I hope can be understood by most of you, and the purpose that we are using the teaching today, and allocate such a, what I call, extensive time for the teaching of today. I started this part of the teaching about last week, and in a way, I structured it... Just one second please. I'll just find us this one. Just one second please. ... (:18) Okay, so what we have and we're going to consider in today's teaching is a very cornerstone of the ?? Creation. What does this mean? This means that we are going to understand the principle of Creation. How field became part of and then how that part of became matter state, energy state. What this means is that in so many ways we reconsider position of fields. We consider the position of the energies.

We consider, as we discussed with Azar's question last week, initiated this part of the teaching. ?? ?? today, life is as it is, as we know it. We breathe, we eat, we have organs,

we live in an environment that is, in a way, we don't care about, because it's there. We are born in it. We, it was with us when we came, and it stays with us, and is a part of our life. We've been to Space, we don't see much changes. We stayed inside the atmosphere of this solar system (SS), and we still see no difference. We send satellites up, and they stay the same. We use communication units. (:20) We still communicate under the water, in the depth of the Space. But all this has a connection. All this has a principle. All this has a reason, a dimension, what we call, a position, and energy transfer. Rick, if you can give me a whiteboard that I can explain in detail.

If you listen to the last week's teaching, I explained that the rays of the Sun, they in their interaction, create conditions that is up to now unknown to us. We just consider it as a Cosmic Ray (CR). As we said in the other part of the teachings, we have a 'Creator's Ray' and we have a Cosmic Ray. Where the Cosmic Ray comes from the Creator, from interaction of its fields with its own environment, with its own effects, with its own capability and possibilities.

If you remember last week, I explained to you if this is, (I have to use a bigger line). If this is the Ray of the Creator, (:22) you have points of interaction, what we see in what we call, in the process, where these points of interaction, for example, I try to put in as a different color that you can see as a pink. These interactions come, generates through and in a way... << Mr. Keshe have problems with the whiteboard. >> (This is the most hardest way to get this thing done. It's always going backwards and so forward). So you see that you have three points of interaction of the fields of the Creator. But these rays, at the point of interaction, create a specific condition. And that is very much, depending on the strength of the field at the point of interaction, leads to creation of a stronger field. It's two lights coming together, even though it's the same light, because it's not reflected, it's a field of itself interacting with itself. So these pink spots become stars. They become point of interaction of the fields of the Creator, center of galaxies, center of universes. In so many ways, when egg and sperm come together, create the same thing, (:24) they create a light, they create a stronger field, that reflects actually the Creator, because these are the fields of the origin. Even though we ate the food, the energy of the food became part of the egg and the sperm, still follows that line, because it's embedded in it, it's part of the connection, it's what keeps everything together.

But as I explained last week, we have what we call the fields of vibration (waves). These fields vibrate as they are going from one place to another. They have and they interact and they vibrate. And the fields of vibration creates a different condition. And when these fields of vibration of one side interacts with the other one, again you get the creation of new dimension (D). Which means you get the creation of matter. With the interaction of the origin you get the Sun. With the interaction of the field of the vibration you get the matter state. But these fields, these waves, have one secret with them. Because of the rotation and dimension of the plasma rotating as original, which came from the Creator, they create compression. Where the two origin (?? fields) come together, there is no compression. It's amalgamation, it's interaction, or friction with each other, which leaves one to carry on. With the, what we call, waves, (:26) you get, you create a compression, you create pressure.

We see this, for example, on the sea, on the oceans. When the ocean is flat, there is no wind, you have flat surface. Origin, the water is still there. When you get change of dimension, wind pressure, you get the ocean to create its wave, it creates a compression which hits the wall, it hits a ship, it hits whatever. Now it's not the water anymore, it's a force. It's then it creates its own condition, its own creation. So we see, if we understand this, that the impression and the compression of the environment leads to creation of what we call, like satellites, star, or what we call, planet system. .. planetary system, what we are used, what we see. What we are considered to be a normality in the world of Creation. So when we look, when our scientists in the future look at these environments. When our scientists in the future understand the difference between the original and the ones which came from the wave, from the fields of the waves interaction in conjunction with the compression, which leads to creation of frequency. Then Man will understand how to conquer the Universe.

This is very much, if you look at it, your Soul sits in the center. (:28) And then as it radiates, with the interaction of the fields of your wave, or compression, or the condition of your cells, leads to creation of other cells in that environment. This is why you always have the liver with the same cells in the same position. It's not that that cell decides its position, it's the environment of the other cells dictate that cells always stays in that position. Because the compression from the other cells plus the wave from them, what we call creation of frequency, leads to creation of the manifestation of that cell in that position.

This is, if you understand this part, this is why we managed to remake the cells of the brain of Naomi. We didn't do anything, we just put Gans's outside, but with it we created the condition of the wave, but in that Gans there were conditions, there were materials which mimics the condition of the environment of the brain. We saw this in Corona. The energy of the virus mimicked calcium (Ca). So we see calcification in the brain. We saw calcification in the lung and the rest of it. But the Soul was still giving the same field.

So, the life in the Universe (U) consists of two waves, two fields. One is the field energy of the Creator, and one is the field energy of the wave, (:30) which is created by its environment according to the motion of the fields of the Creator in that space. This field, the original fields, what I call the 'Creator field,' itself originally comes as a singularity, which in its position and condition becomes a plasma by interaction with itself. Then it becomes a three-dimensional, in a way, a ?? across a ball, then actually a single line. That, in that process, leads to creation of dynamic spherical shape, the shape of the Universe, shape of the plasma of an atom, shape of an electron, shape of everything else.

And then, for example, we see even on Earth, the top and the bottom is not exactly the same. The planetary system in the matter state have a bit of a flat top. It's not fully circular. We see this in the shape of the Milky Way. We see this where that this divergence of the thing keeps a spherical shape, it has to transfer its energy of the wave and that's why we see hexagonal shape on the skin of the Man, or pentagon shapes on the skin of Man, north pole of planets and the south pole of the planets. This field, what we

see in the shape, is actually transmitting the field waves which the entity itself cannot hold.

In a way, in the future, very simply, you can do something very simple, and that is, create what I call a hexagonal shape, and with it, create the shape of the object, (:32) as it happens with our planetary system in all of the dimension and direction of the Universe. This is how our skin takes shape. Our skin is a combination of three Nano layers. The inner Nano layer skin, the middle, and the top. And then, the pressure of the fields, and the source of the inner layer, which is connected to the source, to the Soul of the Man (STM), in interaction with the inner field layer, leads to creation of the shape of your skin. If you look at it, it's not flat, it's hexagonal or pentagon.

Now, you can create, if you understand this, in the future of time to come, for Man to create any shape craft. You do not need to be necessarily disk shape. This is why we see, when we look at Space and say, we see UFOs, it's like a cigarette, which is a different type, or you can make any shape object. To understand this, go to the patent. This is explained in detail, how you can make walls of a building inside using creation of magnetic (M) fields where we use the vibration, we use a compression to create that wall using the origin of the fields in its development. This is how we create boundaries. (:34) This is how we create the size. This is how we create condition of the motion of an object within an environment.

If you understood this and you can go a step further, when you travel in Space you have any shape you like, you create the Magnetic Gravitational (MG) fields of the dimension into the position in confirmation of your reactors. So, you pull yourself into what you have created. Then you can live anywhere in the Space, because you create the Mother field, and you allow the compression and the wave of the fields of, to create the Gravitational field without the matter state. This is a very advanced technology, it might take Man centuries to understand it, and it might take Man a few years to understand it. But this is how you dictate, direct yourself, into a position in the empty spaces of the Universe. Using not only the magnetic fields of what we call the system, but using the fields the, what we call, the waves of the fields with their compression.

Go back to the teaching months ago we explained, (:36) we showed that you have a system which creates a central plasma and I said to you in the lab we only see AC, sorry DC, flat, and we decide the boundary of the system where we observe AC. AC is a characteristic of the matter, is where the compression of the two fields come together. Otherwise the system stays continuously on DC. In a way, the shape of a planet, a star is dictated by the DC within it. When you stick a copper (Cu) coil, bar into the earth, you work with this currency, with this current. But if you go back to understand deeper way, now you understand where you come to play. We go back to the original thing. The Soul of the Creator (STC), what I call the Creator's Field, is crossing everywhere. What do you do? Your Soul, which is nourished on this planet after its departure, it is more an interaction according to position, comes in touch with this. And this is where your Soul will create, become the seed of the next cycle of life, the next sun. It's not random. (:38) It's dictated.

And in so many ways, you can, by emotion, dictate where this Soul manifests itself. In a way, at the point of death, the emotion you carry within the Soul dictates the position where you create that compression at the point of the birth, in the Universe. Where your seed will flower, where your seed will cultivate to become the next generation of life. In a way, the STM is like that grain on a stem of a wheat. You take that grain, you take it across another part of the world, you plant it in the ground, and if the fields of the, what we call the compression of the Earth's magnetic fields, matches, it'll grow. There is no difference between the STM, separated from the physicality (P), or by emotion travel, than the seed you take from the wheat, stem of the wheat, and you plant it in another place and it grows. That seed is your Soul.

As we said in the Chinese trials in Inner Mongolia, the best they can do is 12% what we call, protein. We gave it, the seed, we gave it the energy, we gave it the compression fields of the, what we call the Gans's, and it came to its perfection 20%, which filled the sack. And Man in life is there to live, to add to that, because then you go from 11 to 12 percent, to 15 percent, to 18 percent, to 20 percent, the perfection, (:40) that 20 percent is the field of the Creator. And this is what a Man strives in life to achieve, that when that seed, that grain of the stem of the life of this planet is planted in another position in Space, where it comes in touch, it becomes the central Gravitational field to interact with the fields of the Creator, creates a perfect life, 20% of protein in the wheat, perfection of the life, Man in the Universe.

And the whole purpose of teaching now, is we are trying to push you to that 20% perfection that it is full, is maximum. And if Man one day understands the teaching of today. How the field of the Creator, how the emotion of the Man in adding to the field of his own essence of Soul, comes to interaction with and connection with the vibration and with the waves of the compression of the fields of the Creator, in that Position, that Place, become where the STM will become another star. In a way you reach the point that you call on the fields of the Creator, I am here to be nourished, I am here to interact, to lead to creation on another sun, another center for life.

When our scientists, as now we are developing more and more understand we look in a different way in the depth of the Universe, (:42) we only see on our structure the Sun, so many suns in the galaxy. But when we mature enough in scientific world to see the whole spectrum of the fields, we will see within the light the life of the Creator, which means a galaxy and a universe is nothing but light. According to what strength you decide to look at that light. You are prepared to look at the origin, or you're looking at the fraction of the division of colors made of. pink and yellow. What was the origin which led to creation of pink and yellow and blue and red?

When we interact according to the strength of our Soul, what we managed to bring that perfection from 11 to a percent protein to 20 percent protein, how we manage to perfect our Soul in the process of life to its best, dictates what we create as children of the Man in the Space. Because if you are 20%, if you are 15%, they plant a 10%, 20% seed, they'll give you a 10%, 20% seed. Unless you change its environment, unless you change the

compression of it, unless you change the emotion of it, you will get the same. I made Man in the image of Myself, because in the interaction of your Soul with My fields in the dimension of the Universe, I created you. (:44) And you create from it, those who become Me as part of the collection of the field of Me, in the compression time of the life.

Now, one day the scientists will understand this teaching. One day they collectively bring the properties, the understanding, the beauties, the attributes of the whole knowledge together, that in that process and in that dimension, you as Knowledge Seekers (KS) will come to understand how you even decide the change in the color of your skin. If you understood and change the, what we call, the compression in the field of emotion which runs in this layer, you change your color. If you bring it in the two layers, not only you change the color, you change the emotion, you understand the language, you understand everything else, because the skin of the Man is connected to the brain of the Man, it's part of it.

You get the warmth of the Sun on the skin, you feel the emotion in the whole body, because you touch the Soul, you transfer this to the brain, which directly feeds the Soul, which directly spreads it across the body of the physicality of the Man. If you become that ray, on your own ?? skin, you can change everything. And that ray can be ray of knowledge, the enlightenment, can be ray of peace. (:46) It's you who decides on it, because the field strength of it is the same for everyone. If you Knowledge Seekers comprehend what is more or less in my scruffy drawings and the teachings on this board, you have understood the full knowledge of the fields. Mohammad said, if you read Koran there are 99 attributes .. written in it, if you understand all of it, you understand the 100. This is the 100. This is how you have to learn the transmutation, the transfer, the transmission that it's there. You have to understand how to create the light of Soul, not the light of the Man. In Time, in Position, in Possession, you have a say. In a way you dictate your position of your Soul in Space. Because you have decided in the Possession of it. And you put your emotion in it. And that leads to dimension of the creation of manifestation.

When Man understands the property, when the Man understand the totality of the what we call the field strength of the Creator, and can play with it, Man become another player in the Universe in the dimension of creation of every aspects of life, (:48) be it from emotion to physicality, to extending and extracting and everything else one can do with the fields. And then, you understand, in the point of transmutation, that field can be a knowledge, can be enlightenment, can be food and can be everything else.

This is not teaching you how to feed yourself. This is to teach you to understand how you were created. And once you understand this, you can create anything at any point in time and space. You do not need egg and sperm to create a child. You do with the energy fields of the STM. And then the interaction leads to creating a Child of Mitra, which is the, in a way, understanding of the Creation, the way, the interaction of the light of the Creator on their own, led to creation of the Sun. Then, that Sun, that Soul, will become

the Soul of the Children of Mitra. The children which are understood to be created on the fields, and not from the matter state of the field.

If we understand, and if extend this knowledge, Man can produce anything, Man can extract anything from the Space of the Universe. And if you understood this principle, then you understand how things work in the Universe. (:50) Just having the fields on its own has no dimension. When you create the compression, when you create the wave, when you create every dimension to it, then leads to manifestation. One day the world of science will understand.

In the systems which you will receive as UBESU, this matter, this dimension, direction, especially in the latest one, is fully built in. No one can copy it, no one can do anything with this, because it's hidden within knowledge of the development and construction. As I said, when we put the first MaGrav out, if you remember, one of these clever Knowledge Seekers thought, "Oh, I buy one, I opened it, and he put it on the ?? look, this is ?? ten times ?? ." You open the UBESU, you'll never understand the concept of its work for centuries to come by Man. And those when you buy UBESU, it says, "It's made by Keshe Foundation." You know this is what it works. Because even if it's a copy you put on, nothing happens.

Because we understand this principle, what is sitting here on the screen. So, if you understood this, then you understand how we immediately have set up structures for testing and everything else in the next 3 month sessions to, in a way, create a dimension of the interaction of the fields in a matter state of the Man, (:52) the way the 3I gave us a ?? (?? enlighten) . It transmitted, it did not transmuted. And from that transmission we are all affected and will be affected.

Understanding the whole structure of the Creation in its totality is one thing, but in its reality is another. Once we understand the work of the compression of the plasma field, we have come one step further to understand the process of the Creation. But, we can create it. Nothing will happen unless you, in a way, have come in touch with the original. The original fields, the original light, the original cascades of what has led to be the creation, the manifestation, the ?? and everything else. Even intelligence.

If you look at for example the game, which a lot of you start playing and trying to find out, in the process of this game it makes you to think. But that thinking targets that peace, it brings you enlightenment. How and which other way I can create peace? Not for the others, but first for me, inside me. I have to understand what love is, to be able to give love. (:54) I have to understand the Knowledge of the Creation within me, that I can lead to the creation of the Children of Mitra, otherwise I'm like that cow, the dog, the Man, and everything else around me. The difference between the Man, to reach that point, is enlightenment. Peace within, and peace within comes when Man needs nothing from outside, to make it think, force to do things, to get what is from outside. But when it's free, when it's available. When I don't have to fight for it, I become Man of peace. When you're hungry, you go and hunt. If that energy is given to you, you don't hunt, you don't

kill, you don't... you become Man of peace. This works even for the Man of the greed of power.

In the future, when you play the game, in the background of it, will transmit this knowledge, this field compression as part of the game, through the Cosmic Ray connections which is added to your game system which you put on. In a way, the way we increased the fields within the seed of that grain of the wheat from 13% to 20% by adding the environment. The way we added, we changed the compression around the head of Naomi which led to the creation of the cell of the brain and you don't see the difference in the brain structure, is the same. (:56) We add that through the dimension of this 10,000 Units which is going to be around through the secondary system which is getting added to. You're connected to the matter state to your Internet. We connect to the dimension of the field of ?? Universe, but we can play with it and through there, through playing games, through interaction with our system, we build the Man of peace.

You want energy without, you know, you haven't eaten for 3 weeks. Oh, I haven't done anything, I don't need anything to do to destroy, but I make things to help, to support, it becomes part of your nature. Because, in these systems, we allow the connection to the Internet, which is the physical side of it, and on the side we ?? work, we deliver, we interact with the dimension of the fields of it. In a way, your Internet connection is in and the other side is out. And the two together make it peaceful. And then, when it becomes part of the DNA, part of the structure, 24 hours, right into the system, then Man, this planet, the cat, the dog, everyone will sleep happy. Because there are no hunger that I can kill something, I don't need to go hunting. I need to gather love only.

The gathering of the Man in the future is not anymore, I'm going to gather food to live, I'm going to gather the love, the energy, the emotion, which allows me by giving to receive more, to elevate, to enlighten myself in the Knowledge of the Creation. Try to understand the teaching of today, in the essence of Creation, not in the essence of matter state. And then you'll find out you have leaped forward. (:58) Even in conjunction with a lot of other things you do in life, you see, you look at life in a different dimension and direction.

I hope you understood, I hope you understand, I hope the future of mankind understands this specific teaching. That from it, Man will make a new Man of the Universe, a new life in the Universe, a new condition of the peaceful Man in the Universe, as Man understands within us, still that Soul, as was the Sun, as we seen explained, is within me. So, I have Him in me, as part of my Soul, in every single cell of my body. How can I let Him down, by my own lack of understanding of the created knowledge by Him? We go for a break, we come back.

And I hope you understood. And I hope mankind will understand this half an hour, 45 minutes of teaching. And of course, the change of humanity in every dimension of transportation, transmutation, life, not only on this planet, but in the Universe. Rick, take us for a break. Then we come back to answer any question. (:59)

>> **BREAK** >> 625 KSW January 15th, 2026 ... (1:04).

R: And, next I'd like to show the announcements from Mr. Keshe that came out recently. And it's in regards to the Cosmic Ray Communication sessions, which we can see on the website here, on the Keshe Foundation Store. I'll put the link into our chats here, into Zoom and into Youtube. And I'll read the announcement.

K- We don't see anything Rick.

R: Oh, sorry I didn't share properly here, let me share my desktop. Thank you. So, yes, from the Keshe Foundation Store, and that's our background image today, that I picked up from the store, regarding the Cosmic Ray Transmission. I put the link in the chats. Now I'll just... there's additional information that Mr. Keshe had put out as an announcement. So let me just enunciate that announcement.

One, Cosmic Ray Communication Sessions. Keshe Foundation following the launch of peace and Enlightenment Plasma Game last week, is set to enhance the experience of the joy of playing this game, in combination with emotion of enlightenment experience, that make the participants feel the emotion of peace, and being able to open the fields dimensions, that brings a new understanding of the World of Creation, through the enlightenment this game brings forward. (1:06) We are set to expand our knowledge in transfer of emotions and enhancing the goal of the game with pleasure, knowing that collective fields of players in the near future can be utilized to bring about collective fields that can change not only them but those who are citizens of this planet. We will use what we learn from this experience for the future development in helping the Knowledge Seekers to achieve faster emotional field strength, to help them to create the fields needed to achieve rapid and fast emotional essence, to be able to achieve transmutation.

And it goes on, you can book your attendance in these sessions by using the following link. And it notes that places for these sessions will be limited due to sensitivity of tests. And I put the link into our chat here. Now, that was the first announcement, there was a second one as well... (1:08) "Valentine Day Experience Session" it says, we have tried to give a gift of love to all those who have been with us, to experience the loving emotion on the most loving day of the year. Join us to try to experience this emotion of giving and loving unconditionally, in this unique session, as it will be new grounds for us to

celebrate, the maturity of the technology, in being able to create the emotion of love and peace. You can join us in the Valentine's session, as we learn more about this emotion, and its expansion in our daily lives... <<Rick put the link of KF Store on the chat.>> This is the website from the link, and it's 500 Euro, and it's on February 14th. Couples can join for 750 Euro. Interesting image. (1:10) I think I found a background image for Valentine's Day workshop. Okay, that's about it on that Mr. Keshe. If you have anything else you'd like to say about that, or about the briefcase UFO, we'd be happy to hear. Or anything else you'd like to engage in.

K- These sessions are a vital, important part for our development, and in a way, to bring in everybody in the same position. Because once we test as usual, we do with you. And then we can add it to the, these 10,000 Units on the Cosmic Ray side, that it allows the whole humanity to achieve. In a way what we received from 3I, we transfer that every ?? body receives it 24 hours a day, but in dimension of their, what is needed for peace and transmutation. It's part of the learning curve for us and part of the structure that we need to understand, that we get it right every single time as we need it, as we, as, that need to be done at a time and a place in Space.

We are working on this system to be part of the daily life, because then it'll cover the whole of the humanity. We are trying to, Keshe Foundation itself is trying to go into actually paying for these ONN's (One Nation Network) Units to be spread across the world, that we can go a step forward faster. This is part of our objectives, that we start, literally investing it, (1:12) and the incomes of it will go to the people who receive it, ?? we'll give it to ?? universities and the rest of it, this is part of our work. And hopefully we can change the field of the emotion, what this planet did not give to us, we create it ourselves to receive it through understanding of what was lacking, what did not work for us up to ??.

As we go further into this, we allow you to understand more as needed because it has to be not only understood, it has to be implemented, that we can do it ourselves and anywhere in the Universe we can achieve it And hopefully we'll see more and more of this because this will give us many things. Not depending on food chain supply, not depending on to be given what is, and that what they decide as food, as energy. Contaminated food, contaminated energies and everything else. In allowing us to run a, what we call a system independent of financial restrictions of today.

Running a system which is not, in its vocabulary, politics doesn't exist. This is something which a lot of you Knowledge Seekers have not maybe understood what this change will bring. You're playing the Game of Peace, you're playing the Game of Enlightenment. But with it, in the background, in the other part of the system which is getting added to, by giving you independence, politics becomes irrelevant. Politicians can only exist when they can create a division of we are better than the others, (1:14) ?? and we are all better than we are together. And this is part of the structure. The, what I call, the world of elections will have no meaning. The world of policy, diplomacy has no meaning, because we are all part of it. We're not expecting anything. We are not any different than anybody else. And so we are in it all together to be part of it. And we are part of the society of us

together. And this is the beauty of it. The end of politics, the end of diplomacy, because I have, I give, I do. And what I do goes to extend to help the others.

We'll explain in a very short while. You'll see it when it comes to the 21st of March, that whatever you earn, a thousand, 200, two Coins, a quarter of a Coin, 10% of what you play, which we give you, will be taken off you, and will be given to your government, Keshe Foundation, and the structure of the system. Which means if you earn 1,000, 100 will come off. 80% of it is allocated by designers to go to the government where you reside, where carry .. where you live. So you cannot escape going somewhere else. And secondly, you haven't escaped because we've given it to you freely. We put it in there that the governments see the change. 1% of the Coin is allocated to keeping the system going. and 1% goes to Keshe Foundation for further research and development. So in a way, by playing the game, you're financing your citizenship. (1:16)

And it's more than enough for a nation to live. If a million people play in the country, and they earn 1,000, 2,000, they give that. We give that automatically to the Keshe Foundation, through the central system to your government. They see it as is needed. They see that it's supporting it. They supported the expansion of it. 20%, 30%, 40%, 50% taxes is not reality. This is why a lot of people avoid it, and a lot of people suffer with it. 9%, 10%, and what you earn from us, it will become a norm. And then the government's accept it by itself. Because the more they encourage the people to pay, the more income they have, the more structure will give what them to do and everything else. This, what we set up, will bring many, many changes.

As I said, we still need a huge amount of finances to get to it. Somehow, when it comes, we received a huge donation. We spend it straight away when it has to go. Needs investment, needs a lot of things. But we still have to keep the daily life going. You can't have just people to play. There's nothing else happening. And we reached the point that we are financing the purchase of payments for these Units to reach the 10,000 as fast as we can. Once the system is completed, we do allow it ourselves, because Knowledge Seekers have not been there to support it fully, to get it done ?? . From every resource we have, we are setting it up now to be done. And this will bring peace. This will bring a lot of changes. This brings... it's not just not needing money. If you understand behind it, when we're all receiving everything else we need, who needs the politicians? (1:18) Who plays the politics? Who plays diplomacy? Because there's no... we are all in it. And the more we put in it, the more we gain from it, who gets what?

It becomes serving the governments and the nations. People give more of their time because it's there for it to be. And it's transparent. Any bribe is there. You can see it. A bribe has been taken or given, a contract goes. ?? We know. So all this will stop on its own automatically. It's very, very much transparent. And we shall see.

I was looking at one of the world leading politicians. When he was 40, when he was 20, he was worth nothing. He got into politics. Today he's 82, and he's holding \$10 trillion in assets. Not \$1 trillion, not \$1 billion. Pretending to serve a nation is lined him and his family with money beyond imagination. Saudi royal family has 1.3 trillion, supposedly.

You can imagine how much this Man has robbed his nation. And he still wants, because they can do. We don't need. With this system, everything is traceable. In a way, we change with the policy, with diplomacy and policy, because you are financed by your own structure, through the Keshe Coin, through the games, through everything else, through the system, through the ???. It has to be that way, it can... it cannot just be one thing, we have to bring the food on the table, as much as it's the peace on the table, the love on the table, and the financial support that it can do. (1:20) You'll see, we have started a process, and we'll allow Knowledge Seekers to support us, to bring to that point, because then there is no intention of change. And there is no intention of somebody pushing it, because it's still ??? in our favor.

Any questions?

Q: ... Thank you Rick, can you hear me?

R: Yes and thank you for the briefcase UFO video.

Q: ... Ha! That was actually... I'm surprised that... that was never intended to be really public. I didn't...

R: ... Well, it was kind of cute, I thought, so... It illustrates an interesting concept, which is creating the matter from the fields, and creating an actual craft from vapor, essentially.

Q: Yes. But, anyway. Good morning Mr. Keshe. (1:22) I had this question last week and in the course of your teaching today it came up again. I understand that, I seemed to understand that emotion is important in the control of the energies, in the control of the wave structure of the Universe and the plasma. For me though, emotion is just something that happens to me. It's not something I really control. I have understood that the more I understand, it changes my emotion in certain circumstances, in certain environments. When I have a bigger understanding of it, it changes it. But still I struggle with the control of emotion, the creation of it. Can you explain that?

K- Every emotion has a strength. And we by age of 1, 2, master most of it. Tantrums, kicking, shouting, crying, laughter. So we are well taught, we are well within the dimension of understanding our emotion. It's just that we have not taught about one emotion, as I said many things in the teachings before, there are many, (1:24) many emotions and conditions that we still are not familiar with, as we call Man of Space we'll do. And that's the emotion of transmutation. Which needs the balance collection of all the emotions. Because if the liver decides I'm not coming, you cannot take the body and go with the liver left behind. Where the emotion of the anger cannot be left behind when you're going because it brings you a lot of other conditions.

So when you come to emotion we know all of it. We ??? bring it together that allows the (assuredly), gives us guarantee that when we take, we go, we're all together. It's not that the Creator doesn't know about the emotion of anger. He knows, but He tames it. He sees it's danger. It's not that the Creator is not jealous when He sees. He's jealous of ... the

creation of Mitra. Because He wanted to be loved. And when He loved, when He created that condition of being confirmed His existence, He couldn't be a rebel, He had to be something which He loves, which loves Him. It's the mysticism in the knowledge of understanding the emotion.

So you know all the emotions, it's how you synchronize it, how you bring it to balance, that allows you to have the go... It is like an election. (1:26) You have to have 100% vote, to get to the Presidency. 99% doesn't work, that everybody accepts you. It's that emotion. You have to create, to understand, how to bring all the emotions together, that some emotions are in balance, create balance, in the dimension. And then you can transmute. And don't tell me how I control emotions. Ask your parents if there was a recording of you in the child age, born age, born too, and see how you created that mayhem of kicking, shouting, or you create the emotion of laughter, you couldn't stop. We know all the emotions. We know how to control it. But we haven't learned how to bring it all together, that it allows us to be detached, because we are in charge of, then we can transmute. So, don't ask how I can teach myself, how can I? Look at all emotions, how did you make yourself angry, just because you didn't like a soup or ball, mum put in front of you when you were one year old. And how did you run with laughter when the father opened the door? So, you know the emotions, controlling them to be in balance is the key to transmutation.

Any other question?

Q: ... (1:28) Good morning Rick, good morning Mr. Keshe...

K- Before, before you go ahead. You asked me to change and go back to writing with a pen. We don't go backwards. We try to make it ?? forward ... The time we used to put a camera and write on it in 2013, 2014 is long gone.

Q: You know the boat, the boat has a mind of its own, just keeps going the direction that you want it, you don't want it to go.

K- No, no, we control it, we try to get to where it goes. When you see the screen move, especially the new screen, it is me who moves it to create the space.

Q: Okay. Mr. Keshe, before I ask my question, can I suggest something to Ed, about controlling emotion? Do you mind if I say something?

K- .. do it privately to him, that will be better.

Q: Okay, okay, thank you. Okay, my question is this, when you, when you say at the time of death, what emotion you carry, it decides where you're going to end up in the Universe, when you go. So does it mean...

K- Strength of...

Q: The strength of the emotion. Okay, so does it mean my action on this planet is not indicative of where I land?

K- Your action, this planet, collective actions, has already ?? decided where you will go. Because, you created that balance.

Q: So, it's not only that the strength of the emotion at the time of death, it's a combination of my action and ?? strength of emotion.

K- Of course. What you've collected in the sack will decide.

Q: Okay. And then, and then in another teaching, past teaching, you said, the minute you're born, you're destined to die. You meant the physical death, not the...

K- Yeah, yeah, yeah, physical. (1:30) Because once you're created as a thing, you exist forever.

Q: Okay. And then, you know, I... when you hear you talk, I can make an image of what you're saying in my head. But when you say compression of plasma, I just cannot have any picture of compression of plasma. What does it mean even?

K- Go to CERN and ask them, to show you how they compress an atom.

Q: Ask who?

K- People in CERN. They are very good at it, how they compress it. Compression means creating a dimension, that you allow motion of the fields in certain way. You got a balloon, you put your finger on one side, and you press it, and the other side comes out. So you create that compression on it. The air is exactly as it was in there, it doesn't change. And the wave exists, that .. It's the property of the dynamic plasma, to create waves, and to create compression. Even our seasons are created by the compression.

Q: You mean the compression of the plasma of the planet?

K- Of the planet, yeah. Without the compression of the plasmatic field there is no variation in life, there is no variety of life.

Q: So, so, so in a place that there is always the same season, and it always flowers on the trees, it means the compression is always the same.

K- More or less, you sit on the same line, there is not much to change. It's like when you go to Hawaii, you have two seasons, summer and winter, rainy day and then non-rainy day, dry season, they call it. (1:32) And in Africa you don't have that, they call it the rainy seasons and a dry seasons. Because you are near enough, direct in line with what comes from, in line from the planet or from the Sun.

Q: So how can we control this compression of plasma of ourselves, we be able to do what we can do? Is that again, connects to the emotion?

K- The ?? not ?? a technique ... You have to do it within your Soul. Within the brain actually, it's much easier. In the future we'll come to part of the teaching where we analyze the part of the emotion and which emotion in the brain of the Man creates condition of the motion of even the physicality. You just don't get up and go somewhere. You create a need to do something, so that creates a certain pressure, or compression on your brain that triggers need water, trigger needs love, trigger I want to go out. You don't get out of the house, drive halfway around the city, to go to a place called a supermarket to pick up a specific package. Because the emotion has already done, the physicality does the rest of doing what the emotion has created in the body.

Love. How do you get up in the morning, walk all the way, go to the flower shop, buy a single rose, come back home, to give to your partner, to say, "I love you"? That flower and the word of love, or impression of showing it, is all pre-planned, and by the impression I want to tell my partner I love. (1:34) So I do all the going out, shopping up, bringing up, ?? pressing the flower, everything else, and then being in that position. We don't look at things like this. We just got used to, oh, ?? there's a love. I love you. Buy you a rose it's a Valentine (day), or your birthday, whatever.

How many of you cut off your partners and tell them at least two or three, four times a day, "I love you, I love the way you do"? If they are not spoiled, if they are realistic, they take it and they add to their love to come back to you. I promise you, the last time you told your partner, "I love you", could be a century ago. We don't do, because that creates a condition. But some people abuse that love, because they say, "Oh, he needs me, that's why he says he loves me, or he says he loves me." If we learn how to control the emotion, but at the same time, we create the condition for it to be understood and appreciated, but not abused, it'll become a different world. Some people who have never been loved, if you tell them, "I love you." "Oh, oh, oh." "She needs me," or "He needs me." This is, "I can do this or that because" .. "Go take a hike." "I can love a dog too." We don't become slave to love. We become, for them to understand, is, "I give you what you need because it's part of the need, which satisfies, confirms your existence, but you cannot abuse me. (1:36)

I received a lot of notes in the background in the past few days, to make a comment about the situation in Iran. In respect to what is happening in Iran, as part of our work and policy, the situation is bad, extremely bad. And again goes back to religion and what other religions want to do to each other. I prefer to stay out of this at this moment, because it can damage the whole structure of the Keshe Foundation. In respect to what we'll announce and what will take place. We suffer with the Iranians. We suffer with the whole of humanity in conditions like this. But my Soul goes to those who have lost life. And I hope those who are sitting to be benefited by this understand that, things like this needs a lot of understanding to stay out of.

And we will see if you go back to the talk of the 1st of January in what I forecasted. I explained to you there will be a lot of regime changes. This comes out of what is about to happen. We've seen the first one, they tried to do in Venezuela. We see here and we see in other countries, but you have to be aware, when you put a 'cat in a corner, the cat bites back.' And this is a situation we have in Iran. It's the matter of survival. One's fighting to get the freedom, and one knows if they get the freedom, it will be the end of, totality of. (1:38) And we stay out of this situation.

We know it's horrendous what's happened, as I said to Knowledge Seekers, I've been through two revolutions. And we have to understand how at this moment of time we are losing lives, in huge numbers, but we have to understand these lives, majority of them. Again, even though it looks like Iran, it's not Iranians. The shots fired to the securities are mainly trained Israelis. The same as 20 Italians started a revolution in Libya, and the ones who are hitting and killing again, majority are not Iranians. If you've seen, as we received reports, how many were recruited in Arab nations in the past four or five weeks to go to war.

So we stay out of this and I wish the nation will come out of it in one piece. But the plan is to divide the nation into five or six parts, done by the British and American years ago decided. And now this is the visible part of the final Acts. ?? result. You have to understand, you put England, France, Germany and bits of other part of the European nations together, they still don't fill the land mass of Iran. Iran is huge and it's part of what it is.

But the biggest worry for me is what we received confidential reports from securities that the Americans have moved Taiwanese soldiers into Sudan area to get the Chinese to get involved and then we can see. This is the most dangerous part of what we see. (1:40) Taiwanese soldiers being brought into this area because the Chinese are there. It gives them a chance, trigger to start a war, in what we call Taiwan. This is the dangerous, most dangerous part of expansionism, and this is what is the frightening part of this episode.

Any other question?

Q: Is there any news regarding the delivery of the Electric Gas Generator?

K- Well we are setting up the structure for a delivery, hopefully this year, yes. We have things happening. As I said, we don't put things out but those who are in the Keshe Foundation, they know what's happening in the background, with setting it up. Because we had to set back with a huge loss, we had to correct, what we lost millions, as you are aware. And then we had to restructure to create the production of it. It's not just a production, it's licensing, getting certification for it, it's much more than actually producing. We have the technology. And it's just that once we go into production, mass production we cannot deliver one or two. We produce hundreds of thousands to be launched in one go. Because we have to understand one or two gets lost, but it's not done with this. These things, there is a plan, there is a structure which is going through at the moment and we don't talk about it. Because what I said in the past, we said what we do,

and we saw what happens over years. The spies of Belgium sitting in amongst us and created mayhem, everything we did suddenly go nowhere. (1:42)

And now we see. You see as I explained now we can speak about it in the open in a very different way. We saw Mr. Zarif, the guy who was the Iran head of negotiations for nuclear. And now thinking he is a chance to do and has become a new freedom for Iran against Ayatollahs. But Mr. Zarif took a recording of 2 hours and 55 minutes of lies about me given by my ex to the Iranian Cabinet trying to tell them that blah, blah, blah, and the rest of it. So we had everything we set up. It was destroyed. But now, this time, we don't talk. We finish. We soon receive most of , everything which is done.

As UBESU (Headsets), the new sets, now many of you have bought it. It is on the move. And there is one stopped in the customs, somebody is still trying to sort it out. Because they don't understand what this technology does. So, just give us a few more months, it'll be done. But we don't talk about how, where and the way it's done. Because we are more or less fulfilling for our commitments, because now we are producing, we set to produce, in mass quantities.

Q: ... How do we dictate the structure of the pentagon in the skin? For example with emotion? .. and what ??

K- Your brain does. You don't do a structure, the brain does. (1:44) It's... you've got to understand the three layers of the body of the Man. The position of the cells in the middle layer has, and the strength of it, has, and it takes the color of your skin, the shape of the skin, the softness of the skin, the hair where it grows, and everything else. So you have no say. It's embedded in the fields of the middle layer. The outer layer is to keep what's outside not to go in. The inner layer is there to keep what's inside, as it is. So the only change, the only variation in the emotional change of the color, the skin, the shape of the, what you call it, the structure of the skin, all dictated by your middle skin. Even part of your emotion, because if you change that you can change everything on your skin.

So we can't dictate it. It's preset through information gathered from what we call, genetic structure for the distance of the gap. Because if you understood the principle of the colors, we see what the object does not, cannot absorb. Everything is absorbed. So if you take... give me a Whiteboard .. << Mr. Keshe opens the Whiteboard.>> (1:46)

There are a couple of things in the Nano technology (T), what you see. You have the structure of the layers, which sits very much like this. The gap distance, the gap distance here dictates the color of your skin. If the middle layer is closer to the inner layer, gap is bigger. So it absorbs... somebody says I cannot see. Okay I'll come further down that you can see. These are the cells of your body. I hope you can see now. And these are the layers, very much like in your body. They say they can't see. Rick?

R: I can see it fine. I'm not sure what the problem is here. Who is...

K- He says now we see. Okay.

So the distance gap here between the ?? seeds ?? of middle layer and the bottom layer dictates the color of your skin. The bigger gap between the outer layer and the inner layer allows more colors to be absorbed, or less colors to be absorbed. (1:48) It's a gap distance. This is why all the blacks always stay black, because this gap is so close to the inner skin. Everything is absorbed. The softness of the skin is opposite. The closer you go to out, .. with a tilt, there is a direction of tilt into this, then it makes your skin softer. That is where the Chinese skin is soft and the White skin is different soft and the Middle Eastern skin is a roughish because we absorb different, and the middle layer decides. And then there is a dimension of again positioning field strength which brings with emotion. Like the shy line of the body. There's certain points we cannot touch. We don't allow because that direction connects it to the emotion. If it's past, I have to show emotion. So I make that barrier. You touch me there, I slap you in the face. Or you touch me there, I cuddle you and I want more of. We decide how the emotion tilts this thing, this middle layer.

So the world of medicine, the world of science has not understood this, because they never do, it's just a layer, blah, blah. The position of the cells, the position, the distance between dictates everything. And then, when you have an emotion which is we call wrong, you don't like it, or whatever, which is an emotion of abuse or whatever, you see it. You lock it in its position. What you get, you get all sorts of cataracts, everything else, eczema, and the rest. (1:50) Because you locked the emotion. Because you want to show I'm suffering. I am in that.

You look at anyone's skin. On the elbow, you see eczema. On the knuckles, you see eczema. You see eczema in certain part of the body. Or dictates certain emotion. Why do we show it on the elbow? Why do we show it on the skin? Why do we have this on the heel of the foot? If you have, you get all these machines, showed how to clean your heel, the bottom of your foot. Why do we get it when we pass puberty, not before puberty? Very, very seldom, we see children with all these problems with the heel, or with the skin of the foot. Because it is ?? emotion ?? connected. And how we calculate it on emotion.

So, these Nano layers decide what shape your skin's going to be, what texture it's going to have, and how it's going to bring that into position. And because of its ?? depth, and decides if you're going to have a hair, your hair stands up, or you have no emotion, and everything. Part of it we carry from our ancestry, looks like, is the color of the skin, and partially comes through emotion and ?? reduction?? (1:52) Even you say, the face looks like a father, or the face, the lips like a mother, it all comes from emotion within that.

I have to go somewhere. Carry on. Just let me see what is something is going on. One of the Chat which should not be there. Sorry about this. The Keshe Foundation channels are not for political outlets, please. And do not use us to bring things into the Keshe Foundation. Sorry about this. Ok, back. I had to do something in the Keshe Foundation Farsi.

Any other question?

Q: ... What are your thoughts on the vitiligo ... and skin color change?

R: I believe that's, we've looked at that before, it's when, like a black skin can have a white blotches and that kind of thing.

K- It's again to do with the gap distance which is been put in there, or because of the structure that created that gap distance. (1:54)

R: Now, would that be because of emotional changes, or is it just a structural thing?

K- It's a structural which is set by emotion. Most of, you see people with the scratches (patches) are white or brown on their skin. It doesn't necessarily come from this person. It comes from the generation in the past. Because we carry that. And what is been set to be there. Because it's very, very interesting. We change the skin every 20, 30 days, or whatever. How come only that patch keeps on changing color to that? Because it's preset at the bottom. You understand? So this is the problem with this, that is preset through the emotion of the past, or the condition of the past. Or because of what? We want to do. All these chemicals they use to change the color of the skin is primarily to touch this distance gap. And they haven't understood that. Because if you ?? can do that even with emotion, you can change the color. Because you have to go to the emotion.

Any more questions?

R: And would that apply also to the color of hair? We had a Knowledge Seeker that gave a testimonial about her hair suddenly changing from gray to brown. And people noticed it and for her it was, apparently, an almost instantaneous change. (1:56) It was not the hair growing out that changed color, but all of her hair at once, kind of.

K- These are all again environmental and emotion.

R: She relates it to a workshop a few weeks ago that...

K- I've read that, but we have to look more into it, what's been in the back. We haven't heard anybody of the bald listeners saying that it's all got Afro-Hippie hair. They didn't grow hair during these sessions or change colors. You have to understand what's in the background of the environment. That specific case.

Q: ... If the STM carries characteristics of Earth, do transportation systems created by Man also have distinct characteristics, in terms of magnetic fields?

K- Yes. They carry the fingerprint, yeah. Yes, they do.

What's next?

Q: ... So from what I understand frequencies interact with Creator Rays?

K- .. Frequencies are not interaction. Frequencies are part of the structure. If you... always when it comes to understanding of the plasma, look at the behavior of the water in the oceans, not in the cup. (1:58) Because it gives you a very, very good example of... I mean it's as much as... much freedom of what can explain the whole condition. If you get hitting a wave against a wall once, it splashes and goes. But if you keep on hitting the wave one after another to the same place, it creates, it moves the wall, it changes. Gradually builds into it. And it's the same. When you have a plasma, you create certain waves. And how these waves, the two ?? are distance, gets allowed to be carrying the field for the strength of the other, dictates that position, that condition. And this is the way we... it's the easiest way to explain the work of a plasma. Look at the wave of the ocean. Because the same thing happens in plasma technology. In the Creation, in the World of Creation. Does it be it your emotion, be it the structure of the physical dimension and the rest of it. Then, how frequent that wave hits the wall. If it's one every hour, it's just another ?? shh. But if the wall gets hit one after another, one after another, it has to react. Then it becomes a frequency that the timing gap of that frequency, and the strength of the wave, then it decides. So it's not just frequency, no.

Any other questions?

Q: ... (2:00) Great Professor Keshe, on one occasion you informed us that the raw material of the human Soul is one thing and that the teacher sent by the Creator is another. Question 1. In the ancient Chinese astronomy, Xibi was the name of a constellation located north of Ursa Major and was considered the dwelling place of the Lord of Heaven. Is this true? Do you feel a greater force field from the Creator when you approach that area?

K- I don't know where it is. How can I? ...

R: We would have to look it up and kind of point toward the stars and whatnot.

Well, maybe I could ask a more direct question. Do you feel different fields from different stars that you look up at in the, in the, at night?

K- You get different emotions. I. Those have been around me years ago, I used to just became too boring. You look, you create all sorts of things with your hands. And how you bring the energies together. You can realign a lot of lights. I explained to, before this, how you can even create the vision of a UFO, vision of the meteorite, is how you bring, you more or less ?? not bring. (2:02) You summon the fields to create the emotion of the observation. Why only one person can see a UFO, or a collective few people see the UFO, or the same process with everything else when you want to manifest.

Anybody can create light between their hands. But who can throw the lights, who can expand the lights, so that the lights ?? become them. This part of teaching we never teach, I never teach this because it's too... the human race is too immature to get to this point. If you remember, go back years, I remember, I think it was in Trani, where we explained

how if you hold your two hands and it creates light between it, it's like a Soul. But, what about if you expand this light, that you'll become part of it, you become inside of it. Then you can do the transmutation. That needs a lot of understanding.

Q: ... Do Black Holes counterbalance the force of the expansion of the Universe? Or are they the source of this force?

K- No, they co... they work collectively. The Black Hole is from. Is black light to you, is white to the other, as we explained before. It's from the point of observation. A Black Hole is as much as a star, it has Gravitation, and it has Magnetical. Depends where you stand in respect to it.

Q: ... Is it possible with Plasma Technology, to prevent the Earth's surface from heating up, and the consequent evaporation of water, and its escape from the atmosphere, as happened on Venus, with the loss of its oceans? (2:04)

K- That loss of oceans, got to do with what's getting pulled towards the Sun, nobody can stop. Literally, no one can stop. If you could last on the million, two million, ten million years, as you go closer and the water disappears, yes. You'll see it has nothing to do with anything else.

R: What about, say on Mars, where they have water below the, below the surface and on the poles, could a plasmatic atmosphere be created to enable that to be trapped, the vapors trapped, rather than allowing them to evaporate away, to create an atmosphere in effect.

K- What purpose does it serve?

R: Well, for example, Elon Musk is planning on retiring on Mars, and one of his...

K- Probably retired in the brain, forget about it.

R: One of his ideas is to use nuclear devices to create an atmosphere on Mars. You can use non-radioactive nuclear device that could create dust and atmosphere, and allow an atmosphere to be created that was... you know, might be able to support certain gases and what not, that might be part of your life.

K- Oh, create a dome and live in it. For what do you need to do all these things?

R: You mean a plasmatic dome? Or a...

K- It's very natural, very normal.

Any other question?

Q: ... (2:06) Would there be a one original ancestor for celestial beings, another for humans, and yet another for the Creator?

K- Dream on. It's all the same. All goes to one. It's all one. If you understood the teaching this morning, you understand everything comes from one source. It depends how it interacts with itself. It's a situation of Mass and Weight and the rest of it. It's all the same, it depends on what they are interacting with.

Any other question?

Q: ... Lately, the major focus of my life has been to bring one little one back into place, if I could call it that. He went through about nine months of separation with his mother and he came back with crossed eyes. We got him back but he has crossed eyes. (2:08) Now we believe it's emotional. We've been working all together as a team to live with him to try to bring him back. And now at about 20 or 30 percent of the time he looks at you straight you ask him to look at you straight. Is there anything that KF has that can help someone with their eyes? Or should I just persist on the...

K- We don't. We don't have. But we have to understand what was the reason behind it.

Q: Yeah, I know.

K- Is this the same chap we're talking for a few years about?

Q: Yeah.

K- Ok. Write to me private. There is something which I have to speak to you, because it's something I have to ?? explain to you, something might help you with. Yeah? Contact Dr. Kern, through Dr. Kern, because something is happening for you. But it just, we have to tell you. I thought something is, it's the expansion of the... ?? technology

Q: ... There are also some behavioral issues.

K- How old is he now?

Q: 2.5. I felt it. (2:10) MTK, I felt it. There was something that was generated within him. And then he just turns into...

K- Get in touch. Contact Dr. Kern. And we'll talk about it in a different way. Set up a session with Dr. Kern. Thank you very much.

Q: Thank you.

K- Any other questions?

Q: ... Good morning Mr. Keshe. So the Michelson-Morley test validates the plasma physics that you're talking about?

R: He says a minute ago, but that was about an hour ago, when you were discussing some of the physics there. I don't know if you're familiar with the Michelson-Morley experiment?

K- No.

R: It was... Maybe we can have a very brief look at that, I suppose, to try to address the question. Let me see, I've got it here. Michael Sinmorley experiment, basically, is an attempt to measure the motion of the Earth, relative to the luminous ether, a supposed medium penetrating space, that was thought to be the carrier of light waves. And it was performed between April and July of 1887, (2:12) by Michelson and Morley. And, it's important because it kind of set things up for... they found no significant difference between the speed of light, in the direction of movement, through the presumed Ether, and the speed of light at right angles. So, it supposedly led to the idea of special relativity, of which Albert Einstein... he says, "If the Michelson-Morley experiment had not brought us into serious embarrassment, no one would have regarded the Relativity Theory as a halfway redemption." So, in other words, it led to the ideas of Albert Einstein, his theories and what not. So, I don't know if you want to get into that in any more detail, probably not, but...

K- No, no, I don't want to. I prefer to stay out of it.

R: ... We did have a question, maybe you can quickly address, that I had mentioned to you before the workshop, about... within the gaming environment of this new Enlightenment Game, will there be opportunities for people to interact in various ways in the future? Can you give any hints on how that might work? For example, we had a question from a member of the Universal Council, who is wondering how they could operate within the gaming environment, and find a way to, you know, help people, (2:14) or help the conditions that are occurring on the planet.

K- The game is at its infancy and still getting added to and what you call it, changed or whatever. And it'll go through change and added to and different factors brought into play. That all depends on the developers, how they do it. Because people get bored, they find a way to. And that's what I was saying, explained before the teaching. A couple of thousand a year, and the changes will come, but in the same purpose at the end of it. Just give us time. Let us do our ?? teaming section, which is going on now, till March. And after March, we go to the next step of ?? phasing. That's a lot of things needs to be done. At the moment it's hectic in the background, and not only with the design, the people who develop this, for us to fit this into the society is extremely hard. It's not going to be easy. And our target is that this 1 billion people to play this in the next few years, on a regular basis for an income, as I said, brings a lot of new things on. It's just getting there, doing it, I know the shortcuts, I know how can we teach each other what to do. Teaching each other what to do doesn't bring enlightenment. Actually, this game I always said, don't try

to find the shortcuts. Try to get the body, the brain, your emotion to comprehend it. It's not a game to finish and to do. And it'll be changed. Game will be changed a lot, gradually, as we develop.

Thank you very much. And see you next week. (2:16) And I hope we'll see bigger changes around us in a positive way. Thank you very much Rick and everybody else. See you next time.

625 KSW – January 15th, 2026
