

627th Knowledge Seekers Workshop January 29, 2026

(Transcription, Editing and Proofing done by KF Brazil)

(Auto transcription by Elias)

ENGLISH TRANSCRIPTION

(:13)

K- Thank you very much indeed. Good morning, good day to you, as usual, wherever and whenever, you listen to this series of Knowledge Seekers from Keshe Foundation Spaceship Institute. We welcome you back, and as usual we share knowledge. (:14) Some useful to us today and some useful in the future. And some setting up the, what we call, grounds for the future works of humanity, and maybe for knowledge.

As we are on our course in understanding more about the connection between us, on the Energy side, not on the physical side, to the Universe (U). And how we live a double life. When we dream, we call it as a dream, where is actually connection to the dimensions (D) of the Universal energies, and one where we carry our physical body and our whole life at this point of time, is concerned about this, that's all we care about, how to feed it, how to take it around, and what it can do for us. Where we have, you know, by law of physics, if you use a stronger one, we can do much things much easier.

In the past few weeks we concentrated on the understanding of the line of connection of Hydrogen (H) to the Universal lines and our reaction and confirmation of our existence through our Carbon 14 (C14). As I explained last week, the connection to Universal energy which feeds us, majority of it, is through dimension of Hydrogen or what it is, the lowest level at and as it comes in condition of. The interaction and reflection of this field with the plasma of the body of the Man which is connected to it in dimension of the same, creates on the Energy side, the Soul of the Man (STM), (:16) interaction of the C14 with the atmospheric condition, in the magnetic field condition, not the air and weather, but the fields of this planet, and in interaction with the Inertia of the planet, leads to manifestation of physical dimension of the Man. Which means, when the rays of the essence of the Creation interacts with the STM, in the condition of the womb of the mother, and in interaction with the condition of atmospheric condition of this planet, magnetic (M) field and the Inertia and the condition of Inertia of this Solar System (SS) leads to manifestation of the Man with two hands and two legs and the rest of it, the way it suited Man to be able to exist.

If you understand the position of transmutation and you understand this, it brings you two things forward. How can I, from this dimension of the Man, transfer myself to be a plant, transmute myself to be a plant, transmute myself to be a stone, transmute myself to be a structure in this Solar System. As we all know, the temperature on Earth varies according to how far you are from the surface, according to interaction of the Inertia and magnetic field of the planet. The atmosphere out of the Earth environment is constant, there is no temperature. (:18) We have no summers and winters in the spaces between the Earth and

the Sun and the rest of the Solar System, and the Universe and the Galaxies and the rest of it. So, we understand in transmutation, for Man, for a lot of you, and this is part of the teachings that we are concentrating on, and especially in tomorrow's session, we open a new door in that aspects for the Knowledge Seekers (KS) who are coming into the trial, to be able to understand this, that how can I, as a person in a physical dimension, can transfer my Energy, what you call the STM, to manifest itself in the dimension of a stone, in the dimension of a plant, another animal, even as my lover. How can I do this to understand?

Last week we spoke about isotopes, which means in the physical side of the life we have isotopes, isotopes of Iron, isotopes of Copper. In the dimension of the Universal field energy we speak about the magnetic field, then we speak about the effect of the magnetical and gravitational (G) upon each other, we said the boundary dictates the physical manifestation of the Man and then in interaction with its environment gives us the shape, the color and the rest of it, which is preset in interaction with ?? mind. It's just like you go to a shop and you ask for a burger. (:20) It does not matter if you are taking that burger in London, in New York, in Washington, in Beijing, in Tehran or anywhere else, burger looks the same, more or less tastes the same, and is the same, because it's preset. Does not matter what else you want to add to it locally. This is what we call genetic fingerprint. Human race fingerprint is the same. It is preset because this is what I agreed, I want my child to look Chinese because I'm Chinese, my wife is Chinese, and then if it becomes Black, the question mark, has she been playing around or has ancestors of us comes from somewhere from Africa.

In the structure of the STM you have preset atmospheric condition of the Man's life in the atmosphere of this planet, this Solar System, this galaxy, is all preset. Man only looks at the DNA of the physical Man today. When the Man starts looking at the RNA of the Man in the Universal field level, the day of another Pandora's Box of science will open. Which means what DNA do we carry in the Space, outside the dimension of this galaxy in this Universe? It changes because it still keeps the same fingerprint, but the Soul has to use a different isotope of the fields to be able to manifest, make itself visible, living or whatever in that position.

This brings us back to a knowledge which we have spoken tentatively before. Maybe we can start digging into it deeper. (:22) As we said, you look at the structure of the Man. On the line of the communication, connection, diversion, interaction, and everything else. We have a Hydrogen, which is part of our amino acid (AA), now we understand, it's not just there as an energy source, but it's the connection to the Soul of the Creator (STC). That's why amino acid of you carries the Hydrogen. And this strength of Hydrogen is unique to this planet. Because the atmosphere of the Earth battles a different way when it gets here. So now you understand your Hydrogen and your Amino Acids are a connection to your Soul of your Creator.

Now you wanted to know how. And it's within everything which exists in this Universe. Then it comes how you're receiving, how you connect back to. Where are you? You're on planet Earth. The atmospheric condition of this planet dictates C12, or structure of the

energy of the C12. Now you want to travel the dimension of the Universe. The dimension of the Universe dictates communication in this Universe at about C14. But when you go to another dimension, you go to C16. And then, if you understood what we say in the world of physics of today, which we, one of the reasons original papers ever published by Keshe Foundation in early 2000, we speak about, we showed scientists in the institute in Belgium confirmed the condition of the creation of Graphene. Which then they said, you used to use a nuclear material and you're a terrorist. (:24) And now we understand how Graphene easily created without radiation is the dimension of the energy confirmation of the matter in respect to its environment which confirms in a way C14.

And if you go back into the science of the dictating the life on this planet, they say Carbon ?? 14 fingerprint to show the age. When did the energy transferred into the Carbon that it became the energy of it and now we do Carbon testing. But there is another dimension which the Man has to extend his knowledge to understand to do the C16, C18, C24, which is the ultimate Carbon, which makes the Graphene of the Universe. Which means it holds everything in it, within the magnetic field energy and no matter. Once you as Knowledge Seekers and the scientists understand the Graphene of the Universe, or the Unicos at C14, which is directly connected to every single cell of the body of the Man, then you understand how this onion opens up. C12, matter state of the Man on this planet, C14, Energy state of Man, C16, interacts with our condition of the, what we call, Galaxy, and C18 to our Universe, C24 gets the catch of the shape, dimension, and the condition of the Unicos.

And then, if Man can extend his knowledge to understand C14 or C24, (:26) or any other combination of Carbons is the link to the source of the containment, then Man can decide where in which container he wants to manifest itself. Do not forget about the condition of the waves. If the interaction of the fields of the Carbon itself creates, or the waves of the C14. And in that process what frequency is created. These are the frequencies the Man has not even got the tools to observe, to detect. Because when the C14's interact, when the C14's travel within the atmosphere of C24, they are in soup. Where the condition of the C14 is like this skull of the Man containing it.

In a way, containment of the Unicos comes from C24 and the interaction, anything below it, as it steps down to the Universes, to the, what we call, Galaxies, to the physical matter and the rest of it, comes through the interaction, actually comes from the size of the electron and what we call the proton single cell structure, which dictates this condition. Hydrogen in the Energy state and Hydrogen in the matter state are two different things. Even though we still have Hydrogen in another Universe, it's not the same Hydrogen as a Man on this planet in respect to the space gap between the electron and the proton. This is how Universes, (:28) according to the field structure interaction of themselves, will dictate the condition of the life on every planet, every star, every galaxy, every Universe and in the Unicos. Therefore, if you want to convert yourself from a Man to a plant, you have to understand the conversion between the C14 distance between C24, and understand the full structure of the C12 in the structure physicality (P) of the Man, connected to the Hydrogen. The wave is created out of the strength of and the condition of.

If once Man understands the basics, conversion, in Gravitational Magnetic fields, in the dimension of the control through the emotion, then Man can transfer itself to stone and still have emotion. Because you sit there, but the emotion is active. Because you became a stone to see how a stone feels. You became a dog to see how the dog feels. You became another Man in the dimension of your physical condition in traveling from one place to another with the same emotion. And then you in condition of the environment decide through your emotion what you want to feel, what you want to be, and what you want to transfer to in transmutation.

In the session tomorrow, for the first time we bring the spectrum of fields into operation. Those of you who participate in tomorrow's session will be open to unknown technology (T) to Man. (:30) We have set it up in our systems and in the session tomorrow many of you will receive transmission. But it's you who have to decide on transmutation. Which means we open a dimension of the fields of transmutation to Man through the emotion of the Man. Unknown technology, but developed and it'll be tested for the first time tomorrow. It's you who learns the flight system. It's you who decides in what shape you want to fly. You want to fly to become a dog, you want to fly to become another passenger in dimension of Universe, to become a plant. You decide to transfer in the emotion of the dimension to be a happy person. You do not need to leave the dimension of the physicality, but you are allowed, you are shown, you are given the possibility to choose on your own accord, in the dimension of, in a way we give you a helping hand, you will start walking. And through it you will decide in what dimension and what ?? you'll be.

Many of you will be enlightened to a new knowledge during this session. Do not ignore it, as you will come to understand, it becomes part of you, as this part of the knowledge is opened up to you. Enlightenment through the dimension of the transfer of, what we call, energies which opens, bring the Soul to another level of, what we call, understanding. This process, once we complete it, will be added in the future to ?? other systems, which means we can change the emotion, and we give the facility that every Man can travel the span of the Universe, according to the, what we call, the emotion of Time, Space and Place and Time, what we call, dimension. (:32)

What this means? It means we open a channel through the spectrum of the fields, in the dimension of the matter state of the brain of the Man, for Man to be able to have a better access to decide the transmutation. Makes it easier for you to transmute, but you understand the logic of it. And this is the cornerstone of the transmutation and understanding the work of the Universe. In what level you decide to change the C14 within the dimension of the emotion, dictates in what level and where you shall be. As we saw many people when they came to the systems, they became fishes, they met the Christ and everything else. Because according to the field strength we allowed through the matter state during the session in the system.

In the session tomorrow, we move away from the matter system condition into the field condition which is unknown technology to humanity. What this means? It means in the

structure of the light today you see red, green, blue, as if you looked at the Gans's especially in the book where I show the bottle with the Gans's with different colors, we open and I spoken about colors that the Man have not seen. When you see a color there is a purpose to it. Now we open the colors of the Universe into the dimension of transmutation through the transfer of technology tomorrow. Which means Man's dimension of the Soul will have access to a new field dimension of the Universal Cosmic Ray (CR) spectrum of the light.

Our Soul works with this but our skull stops this. (:34) And now for the first time we allow this barrier which is the skull of the Man, which limits the transmutation to be opened up, to be... we get access to, becomes more strengthened. In a way we are all in a football stadium but the light is not on for us to see the match. When they put a little light we see something of the ground, and then when they put a flood lights on we see the whole football ground. Now we open that light for the first time using Cosmic Ray magnetic field spectrum of ?? transportation, transmutation. Which means the skull of the Man cannot stop the process of the transmutation, as in some cases has become process, which in a way gives the dimension to the emotional side of the what we call the STM. Allows the emotional side of the Soul and the physicality to match, because the physicality emotion is contained by the skull. To ?? say it's the size and the shape of it. Now it allows to match.

And this point it comes back to the teaching of a few months ago when we explained you have to balance the transmutation emotion and the physical emotion together that you can move. Transmutation emotion is that emotion of the Soul. The emotion of the Soul when it matches has room for the expansion of the emotion of physicality to interact. This makes it easy for you to transmute. And this process it will be tested from tomorrow and in the next three month sessions. And this will bring a new dimension in understanding of the new science and technology of the Man. What does this mean? (:36) It means Man now gradually through the transfer by us flooding the environment of this planet, through the ONN systems, and other systems we open the floodlights of the energy of the Universe on this planet. And in a way what was missing in the structure of the planetary system which has created a Man with anger and war into a Man of Universe with peace. This is the purpose of it. We are not here to take you into a Space just, voila, you can go. It's for us to change what was missing.

This is the first time ever this has been tested across the Universe and with the pleasure we test it tomorrow for the first time. Which means we can with this process bring the Soul of all the living creatures and created in the Unicos, all to balance, that they all receive that dimension of the communication directly, that they can decide in dimension of the Soul. This has a lot of advantages in the future which Man does not understand in this moment of time to be explained.

If you understand this process, that we release the dimension of the field spectrums of the, what we call, Universal Energy, which through the dimension of the skull, the atmosphere of this planet, the atmosphere of this Solar System, gradually is faded, is become 'watered down,' to the level that can be of the Universal and the Unicos. Man

may be enlightened to new knowledge's and technologies, where physical technologies have nothing to match. You will soon understand, Mr. Intelligent Guy wants to put 50,000 satellites into the orbit. (:38) With this technology we have 9 billion satellites of the STM on this planet and beyond. Which means Man does not need the satellites, Man does not need the systems which is obsolete by the present knowledge which is in the hand of the Man, but Man has ignored to do it.

You see, this process is very much deeper. In the second part of this teaching, I'll explain something to you, an amazing teaching, that we have received information, and we have shared and we have requested the Iranian government to confirm and explain why, how advanced the Man is in the dimension of the Space technology. And Man should be with that in the position of the what we call, the 'spaceship,' be able to create that condition of the C24 in a much easier way once the knowledge expands to that.

One should understand that the transmutation needs understanding of the fields of the Universe and control of the emotion of the Man. If you cannot control the emotion, you cannot transmute. Because you have to understand there is a barrier between the emotion of the Soul and emotion of the physicality which rings the bell, "Danger, I cannot carry, we have to do it together, otherwise I fail and the whole thing fails." You build a beautiful rocket, you build a beautiful fuel structure, but you have a problem in electronic control. And this is where the Man will fail. This is why we introduced the new dimension, the new structure of the Universal Cosmic Ray spectrum of light, that we allow the STM in the dimension of physicality, in the Soul of what we call, (:40) emotion of the Man in the dimension of physicality to merge together, to become one, that there is no failure. And you will find out that many of you Knowledge Seekers will become transmuters in a very, very easy way and at the same time it will bring an end to many of the problems which Man has in the dimension of physicality and physical life.

I hope as Knowledge Seekers you understood the teaching and I hope you understand what is opened up to Man from today on. We are not here to be benefited by it, we are here to change the humanity, benefits from the knowledge of the Universe, understands the process and as we add the ONN (One Nation Network) into the system in the coming weeks and months and we increase the numbers, gradually your Souls become part of this structure. Because you become in the soup, in the soup of the creation of the C24. And this is the dimension which Man has never known. You see your auras in the dimension of the reflection of what your Soul interacts with your physicality, that it manifests itself in the outside fields. Now you can see the aura of the STM in interaction with the fields of the Universe. I made Man in the image of Myself, but Myself has many images. It depends how I interact and who I interact with.

We go for a break, we come back. As if you understood, the teaching of today is extremely heavy. If you understand it, listen to it, try to look at it in the dimension of the Energy and of the matter state, and you will unravel the secrets of the Creation as usual, in a much deeper way. Rick, take us for a break and we come back. (:42)

He shows videos on Plasma Products in KF Store. (:43:40)

>> **BREAK** >> 627 KSW January 29th, 2026 ... (:51:40).

K- Thank you very much. I think you've seen these items are already priced. And they're on the website of the Keshe Foundation. (:52) The, what we call, the products have been packaged in 5 and 10 for the Gel packs and items of the resin has been left free. The important thing about this what you see on the screen, the new Pain Pens. These are made of resin and they carry a much more powerful interaction than before, because now there is no plastic covering the interaction between the person holding it and the position, so the distribution of the energy.

These Pain Pens, the new generation of it, will come out maybe in next few months. Where they internally will be connected to the system of the UBESU. Which means when you have a condition, you use these Pain Pens, instead of the what we call your mobile phone, connecting directly to the system, preset and will carry the Universal Transmission Units inside them. Which means for specific conditions in a way when you buy the Apps, these are the connection with the Apps. We are a few months away from this but the system will be embedded inside this. For any condition the Pen as a relief of pain is supplied for under license and certification will be connected to the central what we call, energy system of the Keshe Foundation across the world. Which means diabetic and cancer anything will be done diagnosis of the doctors once these documents these systems are certified, and you just need to give it at home and then you change for another condition. (:54) You have a broken bone you want to heal faster, you just use the Pen you ask you to join the App, the App will transmit changes to your Pen and voila, it's done.

There is a lot of these things coming up but we are setting the structure in the background there is a huge amount of work is going in the background the Keshe Foundation to create a new dimension and condition. And as we said this is part of it, the ONN system will support this and we gradually break up in 2026 the technology of the Keshe Foundation worldwide in a very large scale massive way which we are now working on, the team of the Keshe Foundation, the Knowledge Seekers and non-Knowledge Seekers who work with the Foundation to expand this technology beyond.

There is one point which is not available at the moment. We just tell you about it that it will be set up by, it's already set up, going through its tests this week. And that is the Keshe Foundation has set up a new page for itself. With the difference that this time the

Keshe Foundation as an association, it needs to be registered. Once we give you the link to the Keshe Foundation Association, you register yourself to become a member of the Keshe Foundation. You have to log in, you have to sign in, and you become a member there, by law, we have to have a membership, which is put at 1 Euro. You can pay anything you like. It will be set up through PayPal, which means everything has to be correct. If you want to make donations for specific projects, again you go through the same system, donation for this purpose, and the rest of it. We are giving another structure to this structure of the Keshe Foundation. (:56) In this way Keshe Foundation Holland stays the principal owner of the whole Keshe Foundation work. But a further development for this, for us, is that once we introduce the One Card Nation through the ONN, then you are all registered through it. It's part of the work which will come in, later on, step by step, and will bring a lot of freedom to us to operate internationally.

For those of you who are with us tomorrow, you need to bring with you, if you have already received your emails, must be with you. You need two headsets, as was before, two for the way they're structured on the sides and one front and the back. And then we take control, we take charge. And the session tomorrow is very, very heavy, extensively, what we call, set up to test Cosmic Rays, and what we call a spectrum of the radiation fields, which is part of the work of the STM. And it works very heavily on what we call the spectrum of the fields. We decide what to do, how to do it, and you will feel the change and you will understand the change. And then we change everything else to another dimension in the following months. Just be aware that you have to understand that in the work of the Keshe Foundation, at this moment of time, we are there to develop the technology in the spectrum of the bringing World Peace, (:58) Universal One language, Universal Government. And so, bits and bits of it is coming together. If there are any questions we try to answer and we try to see how we can share more knowledge.

Q: ... Mr. Keshe, with the problem of the Iranian currency by the manipulation of the United States, my question is would Iran change their currency to Keshe Coin or maybe Yuan or another currency that is stable?

K- At the moment, within the next 7 days, 10 days, 2 weeks, 3 weeks, we are waiting for a lot of things to happen in Iran. We got to understand a lot of people were waiting, or a lot of us were waiting for an attack by the Americans and the Israelis and the European community, which have put 170 fighter aircrafts in Amman, to attack Iran as a one wave of 500 planes at the same time that it can overload the system of Iran and they change the government. We are all fully aware of this news. The whole thing didn't happen, and again last week didn't happen. (1:00) There was a very good reason. We saw American planes in the north of Iran through what we call Azerbaijan. We saw Americans taking planes, flights into the aerospace of Iran to change the government, but it did not happen.

It had two reasons, we saw before. Iran overnight has changed its satellite communication, what we call GPO or GPS, into the Chinese version. And dismantled, disconnected the American GPS over Iran territory. American fighter planes cannot reach when they don't know where they're going. More or less we're going back to the Second World War, putting a beam, travel for 20 minutes and drop your bomb. Does not work

anymore. And this has delayed the position of the war. They are just trying to put a face on it. Secondly, in that position, Iran has achieved a three-layer defense. Chinese, the 'Q system,' the Russian '400 system,' plus ?? the Indian system.

Something very strange happened in the past few weeks in Iran. Which people didn't understand, but a warning was given to what we call the world of defense and technology, in a very ?? scuttled system. That in a program on the Iranian national television on the 15th of October of this year (2025), Iranian government released exactly how they're going to handle this, if it comes and what they might do. This goes back, we have released this document, (1:02) this video, we can release the link, you can listen to it if you know Iranian. It comes in a very simple way. On the national television, in a 2 and 1/2 hour interview, the member of the parliament of Iran gave the warnings to the Americans in a very direct and straightforward way that how it will be handled and how the world of the science and technology of today has not access to it. Most of you as Knowledge Seekers know. And this, if Iran decides...

(I have to switch over to another system. Otherwise, you get a lot of noise, background noise. Just let me see how I can do it. ..

<< Mr. Keshe change his connection.>>

K- ... I'll share with you something which might shock some of you. This is what the American forces have to face with. The gentleman is a leading member of the parliament in Iran, and announces that Iran has access in the technology, to such a technology. (1:04) And, if you remember, we released such a picture some years ago. And in the interview, he says, "This technology was brought by scientists from outside Iran, to Iran, as a gift, and Iranian scientists have developed it." This, the link I can send you, or you can if you understand Farsi to see it, explains details of the Iranian politics and how Iran will defend itself in this war. There is no match to it. And we see if they use it, because they have put it out in open as a technology, on the national television in the past few weeks.

Is the regime change will bring any change in the currency? Is the regime change will bring any benefit? We saw, we've seen hundreds of thousands of people being killed and damaged, primarily by the weapons imported by the outsiders, to make the damage maximum, ?? ... what we call it, inflicting maximum damage, that they can start a revolution, but it did not happen. This is the second time. We saw it in the 12 Day War, they hid the places for people to go on the street, people stood much firmer with the government. This time they imported weapons, into Iran, and killed many, 90% of the people killed is killed by the people who are from outside. And the latest information coming out is that, the people were paid ridiculous amounts, like 50\$ for stabbing someone, (1:06) 70\$ if they killed someone, and they found somebody, which has collected 900,000 by killing so many, and whatever, he has evidence of it. And then they're blaming the (Iranian) regime for killing.

So, we have to see how far this goes. We have a very advanced technology for the first time Iran has put it in public. And this is the Keshe Foundation technology and member of the Parliament announces it in the interview. You got to understand when I've entered Iran, in June of 2008, to develop this technology with Iran, I signed an agreement, took three days to negotiate with Ahmadinejad and Ayatollah Khamenei, and that this technology will not be used as a... for any other purpose, but the Space and defense of Iran. And up to Iran today, Iran has kept this technology that way. And when it comes to defense of Iran, and that agreement was signed, finally, by the Parliament of Iran, which means the Keshe Foundation has agreement with the Iranian Parliament with this technology. And as I said, the last two digits of this agreement is one three. In the future, you open up the documents of the Parliament, you'll see in July of 2008, we signed such agreement, transfer of technology, and now a member of Parliament, which signed the nation to agree with the Keshe Foundation announces the position (possession) of this technology and been brought out by scientists from outside Iran and Iranian and developed it.

\We are looking at a lot of fake news in the news and we see a lot of hype because Mr. Netanyahu has decided what he wants to do. He has moved into Greece, he is not even in Israel. The cabinet of Israel has moved into Greece and Ireland. They're hiding there. (1:08) Their positions were known. They have put their weapons in Cyprus. They brought the agreement between Israel, Cyprus and what we call Greece, that if they want to attack, the other one attacks and the Greece is part of the NATO. It brings EU in, so for that excuse they brought 170 planes into Jordan. But we have to see what happens and who does what. Would there be a regime change? And how much more they will kill? You have to understand a lot of killing in the past few weeks is done by the Israelis in Iran. They were... the first time they failed, this time they brought weapons and they paid people. In a way, you kill a child, you get 50 dollars. It's for 500,000 two ?? whatever.

And this is the ridiculous position. And outside they don't tell you what's happening, but inside it's monitored. And they have to make the Iranian regime the bad guys, but in fact all the killing, as I always said before, is done by the outside and not the inside. Even chemical weapons have been brought in, by the supporters of the Netanyahu, to say Iran uses a chemical, and then they said they use a chemical, because it's all... What you do yourself, you do ?? . This is the way they have done before, and this is the way it goes on. Hundreds of thousands of people are injured and killed, directly by non-Iranians.

And you got to understand, in defense they do, in defense they will defend the nation. But will it bring the change? Is there a need for a change of currency? We have to wait and see, hopefully it's what... China is involved extremely heavily in this, Russia is involved extremely heavily in this, (1:10) and we expect the war to break out, or the Americans putting a pressure will come out with negotiation. We've seen got a guy, the leader of one of the most powerful nations on the earth playing 'Mickey Mouse game' with people's lives. And we have to see and wait and see.

We keep very close eye on what is happening, but this is the part which affects us as Knowledge Seekers of the Keshe Foundation. And if you don't read the Farsi, it says the

showing of the weapons, of hidden weapons, secret weapons, which is in the hand of the Iran, which is UFO and plasma technology. And the name of the gentleman is member of the Parliament is underneath of it. This is on the Iranian television on the 15th of October this year. Now you understand what has come to be science, which everybody blocks, and nobody wants to have now. It has shown its face on structure of a government. It's for the peaceful application. It's for the Space application. And even though the Iranian scientists have achieved such a technology, further development comes with a much more advanced technology of this, which brings the science to be ?? irrelevant, and technology will be much more deep.

As I said, early last week and middle of the week before, Americans tried to fly planes into Iran to bomb, but their GPS got everywhere. The planes didn't know where they are. They had to get them back as much as they could before they fall out, of running out of fuel. And the international observers watched the American planes all over Iran. (1:12) They couldn't find their target because their GPS lost. And Iran has brought a system which cannot be jammed. This is what happened with the Chinese. Chinese learned very early on that what we call GPS, once it's blocked to a nation, you cannot do anything. They developed their own system, indigenous system, now it's used by Iran, by Russia and some other countries. Which means the Americans cannot block it and do whatever they like. They did it in Yugoslavia, they did it in Iraq and the rest of it. And as we saw, Iran blocked the Internet to kill the location.

And this time is not the same as last time. Tel Aviv is like a playing game on the floor, with the new Russian, what we call, Chinese system, GPS system. And Iran is blind to them. But all the targets are open to Iranian military forces, because they can see them on a different platform, on the Chinese radar location. So we have to see. And we have to see what happens, who does, if the Iranians don't get ?? off guard again, and lose many, or we see more, what we call, intelligence, tells us of the Israeli and American agents in Iran, killing more to create mayhem. They did this time, they didn't succeed, they did last time, they didn't succeed. And now we have to see, what will be the outcome. Is there a need for a change of currency? Or, we keep the nation as the most advanced scientific nation on this planet, at this moment of time, to do with the Space? And we see it on the Iranian national television. From where the Keshe Foundation signed the agreement of the Space Technology, with the Iranian Parliament, with the nation, and the leading member of the Parliament announces it, that Iran has as a surprise, (1:14) in the conflicts to come, if they decide to use it.

Any other question?

R: Okay, thank you for that. Is there anything else you wanted to say about the Iranian situation? Jay had said, for example, Trump warns Iran that time is running out for the nuclear deal as the US military builds up in the Gulf. Do you feel sorry for the American soldiers on their way out there, on board all the ships, with Donald Trump sits with his feet up, living in luxury?

K- If you understand the picture on the screen, nuclear technology for Iran is obsolete. This is why we keep on saying, "We don't need a nuclear weapon." Nuclear technology is part of the development for the Space, and understanding a deeper working of the Space. But, when you have such a technology which you see on the screen, which is announced by the Iranian Parliament member, who needs nuclear? This is why we do not prepare to negotiate, and negotiation with America is one-sided, we tell you whatever we want and you just have to say, "Yes." And a Superpower like Iran does not need to accept such obedience. But we have to see how much it breaks from inside. These kind of revolutions, these kind of change of regime, only takes place when there are spies inside the system.

If the government is strong and stands, we saw it in Venezuela, they say they took over Venezuela, but the same government, that's the Vice President has become a President, nothing changed. Americans talking a lot, but they have gotten hold of nothing. All the minerals is signed for 50 years to China, (1:16) main oil fields which is profitable, is signed to China and Russia. So, there are some fields in the middle of Venezuela, they can, if they can get them, cost billions and trillions, we've seen a lot of fake jobs with this guy. And if the new impeachment comes in, he'll be the first president, he'll be impeached and replaced by the Senate, what comes up, we'll see.

But, should not be, this is part of the religious war, where the Israelis are dictating. The West and the Rothschilds are dictating, the condition for them to access the Goldmine. You got to understand, if you are aware of what's going on in the background, they have to force war. And this has all come through a lot of mistakes by the Americans. JP Morgan has sold, pre-sold, billions of ounces of silver, which (they) cannot deliver. They've been warned, given 45 days from early this month, to come up at least with 6 million ounces, that it can bring some of the books into balance. There is no such a supply. J.P. Morgan is about to go bankrupt. We see this with the banks in Europe. So, if a war starts, it's inevitable that it'll create mayhem. Oil will go to 200 dollars in US and around the world, And what will happen is that we'll see huge problem coming up.

There is a deep understanding of the situation with silver, (1:18) because silver is needed for all the technical advanced technologies, and is limited. And as most of you know, JP Morgan has been penalty, once for 500, 600 million, and couple of years ago for 3.5 billion, for what we call insider trading in silver. Which means, the traders inside are buying for themselves and selling to keep the price fake, and now in moving into the dimension of reality, the banks don't have it. They were making money on a fake internally for themselves. And now the delivery, because there's a shortage, people are asking for their options to be paid or delivered, and they don't have it. And central, what we call, Federal Bank has to move in and take over JP Morgan, but sometime by end of February or March, if they cannot come up with these millions of ounces of silver.

So there is a huge possibility of the collapse of the American economy. You got to understand, if the Gulf War takes place, dollar oil will go to around about 200. Canada is cutting off the gas supplies to United States. So, we see huge problems boiling up and this President is trying to divert attention. Iran is one of the best ways he can do, because

he's bypassed the Senate. We could see a war and just for the man to be there, but we have to wait and see in the next few days. Many, many, tens of thousands of Americans will lose their lives, for sure. As much as the Iranians and the others. And most probably, as I said, the State of Israel will come on such a heavy attack, especially with Cyprus, (1:20) which they moved their military to, and then they moved to Greece. We'll see innocent people, civilians will be killed. But Israelis have killed over 100,000 Iranians in the past two weeks, by importing weapons and chemicals to start a revolution, but have not managed to do so yet. We'll have to wait and see.

We stay impartial, we stay... we are observers, But, as we said, now, where, who we signed a contract with, which is the Iranian Parliament, a member of Parliament announces the technology which is in the hand of Iran. And he says, "The secret weapon, which is already in the hand of Iran." Let's see if they can use it peacefully. And don't forget, if this goes, and if they can hold on the GPS of the territory of Iran, no planes can come in, or they come in 500, they all drop like flies. And then there is only option left, it's intercontinental missiles, which they're going to use, that's why they brought the submarines in the Strait of Hormuz, some nuclear warheads, because then they say, "We hit the nuclear power station", but they actually, they bring the (their own) warheads.

There is something which, as you know, as a nuclear physicist, we know very clearly, we can find a fingerprint of the nuclear material. If it's Iranian nuclear material, after the explosion, they create fingerprint, shows the materials from Iran or is from the American or the Israelis. This is something you public don't know. But, as nuclear scientists observers, we'll ask for the data coating of the nuclear weapon used on Iran. And if it's nuclear weapon used from outside on Iran, (1:22) then Mr. Netanyahu and Mr. Trump have to stand the Don Hague. It's a very clear, every gold can be traced back to its origin. Every atom of the nuclear material can be traced back to its origin. If it's indigenous and they hit, they say, "We hit the nuclear center, and we can prove it, it is." That's what they can claim. But if they use a nuclear warhead, because they cannot penetrate the Iranian defense, then world leaders stand criminal. Mr. Netanyahu will be in Dan Hague, it'll be made sure of, the same with Mr. Trump. Using nuclear weapon on the nation. Now you know another secret sitting waiting to bring their hands in.

Any other question?

Q: ... Great Professor Keshe, would the energy that goes to the Soul of Man at death, be the energy jump of each Hydrogen transforming into C14? Could I say that each C14 would have 6 + 8 Hydrogen, because C has 6 protons and 6... or sorry, 8 neutrons, while Hydrogen has only 1 proton? (1:24) Could I thus discover the energy jump of each Hydrogen transforming into C14? To reach the 30 Hiroshima bombs in accidental death, if this reasoning is correct. I ask, how many Hydrogen's would we have to convert, if we have 400 trillion particles in each cell in the human body, and 60 trillion cells in the body? Would each of these particles be a Hydrogen flux, since it is the Fundamental Plasma, that generates each particle... particles. Thus, would I discover how many electron volts each cell would return to the STM? If correct, is it enough to multiply, to arrive at the energy of 30 bombs?

K- There's a lot of other calculations here. The thing is we know from the research, by many, many scientists, that the out of death, we see a massive surge in Gamma ray radiation within the structure of the cells of the body. Which means the body is aware and transmitting a lot of energy which passes the matter state of the cells, brain cells. Which means the body delivers the energy at the Gamma ray level directly to the Soul. It's not electronics, it's not electrical, and then plus the Cosmic Ray fields. This we know scientifically, this has been measured, it's been assessed and the gamma ray level at the time of death in the regions of the death few hours few hours before and after is on the Gamma ray. (1:26) So, if high level energy from each cell what can be transferred and the lower level of the Soul is transmitted to Soul by the physical body through Gamma rays at the Gamma ray level and higher.

And this is part of if you understand the usable energy at the transmutation. How we calculate that energy is done approximately they say about 18 Hiroshima bomb, which is now is ??, you know you got ?? Big Mac was the currency, we could see how much it was around the world. Now we measure the energy of the STM with the Bomb which killed so many men. And so, we do not have a full data. And it's not at the proton-electron levels. Because in that spectrum, you have some conversion, because that's what we see. We see some Alpha radiation, we see some Beta radiation, we see Gamma radiation, and we see cosmic radiation. Scientists have not studied the transfer of energy as a Cosmic Ray to the Soul. We have measured, we have seen increase in Gamma ray. So the body transfers energy which can be absorbed by the Soul that cannot be stopped by the physical structure of the brain or the physicality of the Man. And due to its proximity and body of the Man being in a Gans state, but the Soul absorbs its energies in the gamma ray level.

So, our knowledge is not complete on this side, because the Cosmic Ray level is not measured, we do not know how much of it is transferred, and each cell has huge amount of Cosmic Ray energy in it. (1:28) So, it's very easy to understand why Gamma ray is used, because, as I said, the body is in a vacuum condition, and we have tested it in the laboratory test. Alpha ray, Beta ray and Gamma ray, with 11.5 cm diameter or radius, is operational to receive the energy to centralize it. If you look at the very original Keshe Foundation reactors, which were developed in Belgium, they're all around about 23 centimeters diameter. We built it that way, because we can transfer energy of the Hydrogen or a plasma, into the center within a vacuum by Inertia. We cannot do it in a physical body.

In a physical body, because of the matter state, if you're atmospheric conditioned, you cannot transfer more than a few millimeters of radiation. If you remember we used radiation from the smoke detectors, which is an alpha source, but we managed to create the vacuum and the plasma field shield, which you see on the screen, creates lift and motion. And so gamma rays in the mass body of the Man in a plasma condition of vacuum, it can transfer the energy of the cells to the Soul. This we know for fact, scientifically by now. And the next step to it is how much Cosmic Ray is transferred, and why the body releases this, because it's got... it's like a Black Hole exploding. It finds no,

nothing to contain it. And the size of the fields, it once leaves the body of the Man as energy, (1:30) it gathers together again, because it's got the central gravitational field force, brings it together, becomes one, then it finds a matching space where it is matched and finds its position in the Universe. This technology we understand fully and we have, we actually shelved it because we could not understand much more of it. It was, at that time we could not develop it any further. Because we understood more or less all of it.

Any other question?

Q: ... I have a question regarding, if you remember, if I'm correct, you said the origin of the Man started in Africa. So...

K- One of the Man, yes.

Q: Okay, so we started in Africa, we moved to Mesopotamia, and then we went to Europe, and then Asia, and then Africa. So, I mean, as a circle, we went back there. But then my question is, when you look at the past in Europe, there were a lot of, Hasan and I were talking about this, there were a lot of warmongering in Europe before the North America be discovered, between themselves, like British and France, and then the Irish and all that, the knights and all the kings. (1:32) And then when they discovered, European discovered North America, they brought that over there. But when you go back prior to that to an area of Iran, Persia, under the Kurosh, ... there are so many different bloodshed. We talk about the warmongering as the defect in DNA because of the planet Earth or amino acid. But then my question is, I don't think humans, the only conclusion I came with, because if you look at that area, there was a war and then in one part there was so much warmongering, and then North America also became the same, became the leader of the warmongering in North America. Then the question comes, I think humans are not warmongering or like to have war or in that direction, but I think there must be some infiltration of other entities on this planet and integrate with humans and they created this war mongering among humanity. Maybe I'm wrong, I don't know. What do you... what is your explanation on this?

K- You got to go back to understand the circle of life on this planet. First of all, the dominant race which we see now surviving and being part of the humanity, is what we see traces from Central Africa, ?? South ?? Central Africa. The condition on Earth was favorable in other positions, (1:34) and other races were developed, the same as the one in Africa. It seems, we see a race in South America, we see, if you listen the history of the Man, they tell you one race supreme or what you call overtook the other race when they came to conflict. Central Asia, Central Africa, Central America, part of, part of Venezuela, New Zealand sorry, is, has been the favorable land for life to start. The right combination of the chemicals, the right atmosphere.

And then it goes back to the story of the, what we call, the well fish. You have water wells, you always find a fish in it. Where did it come from? Is it a condition of the transfer? Is it the same? There are two school of thoughts which are very, running very deep in the background and is not in what we call the science of today. Especially it's

getting a lot of attention in the past three to five years. And that is, the cycle of life on this planet is not the cycle. There has been generation of lives on this planet 130 years ago, 130,000 years before, and they came to an end. The condition of the planet brought. It's not that there was something like a meteorite hit. The data gives us a repetition of the cycle of lives on this planet.

And somebody has done a very interesting request from AI in past few weeks, (1:36) asking a simple question, the way the Man is going with the present knowledge, with the present technology, with the present AI and the robotic, when is the end of this cycle? Which means the Man will not be here to exist because, what you call, robots and the rest, you see them more positive than the destruction way of Man and the estimated somewhere around mid-2045. AI says Man will annihilate himself by 2045. Which means, be it a nuclear weapon, be it malfunctioning, be it whatever, all the data at the moment, AI considers is 2045. Which means we reached that point of poisoning of the atmosphere, psychological, electronics and what you call mechanical system take over the life of the Man and the rest of it.

But we have a date that says 130,000 years ago, there was a full cycle of life better than us at this moment of time. They even understood the knowledge of the Universe. There is another cycle which goes back over 500 million years, 500,000 years ago. We see scientific achievements in those days, even more advanced than us, they went on the Energy side. They don't have much tools, but we see some part of it. Man has discovered these items, but never understood what they are. Now we advance in technology, we understand more. We got to understand in part of the, what we call, geological development of the Man, and now we have items which we couldn't say, but they are 130,000 years old and are more advanced than us. (1:38) We've seen more advanced technologies 11,000 years ago. And then they tell us... Our scientists have made a lot of mistakes.

But, how does not matter what we do, Man with the structure of this planet comes to kill, to destroy itself. And now we want to stop that. You have to change the atmosphere, you have to change this poison air magnetic field on this planet. Which sees destruction as the only solution. And this is part of adding to it, what is missing in the soup, is the last ingredient. Which comes with the technology we're trying to deliver. And needs to be uprooted within, but where you cannot uproot, when you have the poison in the land. You have to change it. And the change comes through what we call, what we see. Understanding of the higher level technology, that can change the whole... That's why we put the ONN in, that's why we're testing even tomorrow, with these dimensions of new, what we call, Cosmic Ray field energies, what we call, spectrum.

And today's session (this KSW) is done in a very specific way. We have asked only one person to carry out a test for us, which we'll know after the session, which gives us a prelude to tomorrow's session, that how partially our system reacts. (1:40) One of the Knowledge Seekers already is set up for this purpose. And then we'll see how we open the dimensions in other directions. And we have to change the poison within the

atmosphere of this planet which forces killing. Need for energy and need for recognition, need for hierarchy. And then we'll see how the next step takes.

Q: Mr. Keshe, you said we move to other spaces in the Universe, our DNA will change. It's because the DNA is a structure, so our structure changes, but our RNA, our information carries the same, yes?

K- RNA is a physical dimension. We are touching the interaction between the RNA and the physical condition of the which is DNA. If the information is wrong, wherever you go, you produce that system. We are entering, interacting with the RNA to bring that change. You understand? There is a fault in the message. So that fault can be only changed in the software, not in the hardware. And this is what we are trying to do.

Q: Because the DNA is a structure, but the RNA copies the information and put it someplace else.

K- So that's why we work with the Cosmic Rays. That's why we work with the understanding of the process of the Creation, and not with the mechanical system of the Creation. (1:42)

Q: But shouldn't we think about if even one person's RNA and DNA changes, that it could be transmitted to other human being or...

K- It is, yeah, it is part of, we, we have seen that in the program today. As I told you, one of the Knowledge Seekers, only one of you there, they know who they are, we've been asked to use a specific way, and we have set up specifically our system for that single person today. And we see, we learn from it by the end of today, and then we assess how to handle the sessions tomorrow. And then the following sessions. And then we understand how to transmit these energies to make a peaceful Man, to allow the Soul to enter in the new dimension of his own freedom. We have to teach it, that many of you carry that knowledge. And it's not just done by one man. There's no time anymore. I brought the message with 10 stones or 20 stones and that's what it says. We keep, we give the message, is you who have to write, how many books you writes and how many stones you write on.

Any other question?

Q: ... Greetings Mr. Keshe, Rick and all Knowledge Seekers across the Unicos. I have a question from a friend as follows. What is your take on the heliocentric model of Earth, planet or plane of existence? (1:44) And how does that tie into your teachings about the Cosmos? I believe you have already spoken of this before, but if you don't mind answering again, please?

K- Can you go on the Google and bring that word up, and see what it explains to us? That we all understand what we are talking about.

<< Rick sees on Google about heliocentric model.>>

R: ... Well the quick answer is, a heliocentric by the dictionary, is having a rep... having or representing the Sun as the center, as in the accepted astronomical model of the Solar System... Let's look at the Wikipedia example here. (1:46) It says, heliocentrism is also known as the Helio-centric model, is a superseded astronomical model in which, at the center of the Universe, the Earth and the Planets orbit around the Sun. It's superseded geocentrism. That's where the Earth is at the center. So...

K- But if you go further, we look and create a center point. Not the Sun. It's the next step up. And when you go into that dimension, and as I said, with C24, you'll find out that the energies count and not the physicality's. Physical dimensions in the Universe are scattered in different shape and what you call it, dimensions, according to the field strength. But if you look at it, take it step into dimension of the field of the Creator. Now we're talking about the Hydrogen, this central to be the Sun is irrelevant, center is the Creator. Our Sun still receives source from somewhere else, so it cannot be the center when it receives from somewhere.

R: It's interesting, (1:48) we still say the Sun rises and sets, as if the Earth was still the center of the Universe, and the Sun's kind of rotating around the Earth, so...

K- Yeah, that's why they thought we tame it, but we actually ?? . It's very interesting, when we were considering transportation beyond the Solar System, years ago, we have to consider the interplanetary forces, and then we have to consider the galaxial forces. To us the Sun is there, it's fixed, and we all rotate around it and find our position. But the Sun itself is conditioned to another central point inside the galaxy system. Which means our Sun actually is itself, as I explained many teachings, is moving with 100,000, 10,000 kilometers an hour, and it vibrates. It's not steady. Our Sun is not sitting there in the galaxy. According to the destruction of the Solar System, according to the new life of another system, it has to move. It's a magnet.

So, what we consider that our Sun to be there in that position of galaxy, is not there. And our scientists don't want to understand this. So, it's vibration to find new position, by creation of new Magnetical fields within the Solar, within the galaxy, it makes it to vibrate. It changes its position. So, our Sun even it looks like fixed to us, but itself is moving. It's like that electron in the system. (1:50) With a ?? higher speed, it's moving to find all this is balanced in the position it is. Even though it looks like fixed to a position, yes, it's locked to a position. But it's still like a spring vibrates to adjust, otherwise it explodes. Otherwise, we all get thrown out of the Solar System when it gets squeezed. So, it adopts itself.

And we see this in the shape of the structure of the boundaries of the Solar System. We see this in the rapid increase in meteorites, or movement of the meteorites away from the central point of the Earth. It's such a dynamic soup, you cannot say it's fixed and then. The only fixed position in the whole of the World of Creation, is the position of the

Creator. He does not bend, He does not move, He's there and gives. You want to receive, you accommodate yourself within the Fields of My Love.

Any other question?

Q: ... Micah has a question about the new resin products. Are they specifically made in a new way with the Cosmic Ray technology?

K- They're made for peace and balance. They are made primarily for peace and balance. When you have balance you find peace. When you get peace you need to strengthen it. And the combination is made in a way that there is some, what you call it, the direct cubical ones, I don't know if they've released that yet. (1:52) It's like a fish tanks, those are extremely heavily done towards the peace. I don't know if you see it, it's like ducks and other things in it, with a green base. And this is... they are primarily done for the peace and the balance. There are some made in the shape of a cross, and is to be given to some nuns and priests in the coming months. And they carry the energy of the balance and peace. And we are monitoring how the nuns and the priests react, by holding these. It is... it will be spread across the European churches. We want to see what peace it brings when they hold it. What will change? And all of this is getting distributed across the churches in Europe.

Any other question?

R: Some links have come in to me from head office there, some of the new, or some of the product deals that have come up. Let me just share briefly here. We have the Gel Pack you mentioned. (1:54) 5 pieces, 75 Euro, various units of that. There was the Pain Pen, as you've mentioned, and there's the price, 129.99 Euro. And, we've got the Memory Foam Contour Pillow, 49.99 Euro. And let me see couple more items, the Memory Foam Luxury Car Neck Support Cushion at 35 Euro. Two more items.

K- They're about one-fifth of the original prices and other bits. It's just that the Keshe Foundation is getting re-structured in all dimensions. And this is part of it. We do not announce anymore what we are doing, what the Foundation is, or the structure of the Foundation is doing, because of the pre-emptive strikes we saw by having the knowledge they've been around trying to do.

And I was reading something very recently which will surprise you. I explained that I'll return back to Belgium to write the last six books of the set. When there is a change of regime, when there is no monarchy. There is a discussion if it is correct, if it's true and what's going on. Holland, Belgium and the third country, Luxembourg, (1:56) is joining to become one nation. Which means Belgium will be wiped out of the map. And they'll come with a new name. And just the monarchs have to decide how they will share this monarchy and how it's going to be. Anyway, and there's a talk that nobody accepts any other places, but they all commonly accept ?? Reida to be the new capital of the nation. If this takes shape, you will see the balance of the other books that will be published very soon. And at the moment, it's a work within the structure and the whole of the EU has

supported this move because there is a lot of problem with these country, with these nations, which is hidden and can bring problem for EU. Luxembourg, Belgium and Holland are in negotiation to bring one country, it's called the Greater Benelux or something like that. And the Monarchs have to decide and it's the disperse of their wealth because some of them are wealthier. They run themselves like the American and the three states, but one central operation. And then we'll see more, we'll get the books coming out very quick.

Any other question?

Q: ... (1:58) My question is, you talk about all the different strengths of Carbon, 12, 14, 24, 48, and I'm just seeing those as different strengths or structures of Carbon, or what we call Carbon. But what makes something a Carbon, or what we call Carbon? Is it just a multiple of the strength, Hydrogen strength?

K- It comes from the reflection of the fields of Hydrogen. You change the Magnetical into Gravitational. We get the Love of the God, of the Creator, which comes to us, we digest it, and still some of it pass through us, because we pass it on. And that interaction of what we get from it, and we send back to confirm our existence, becomes C12 and C14. The purpose of the Amino Acid is not just, as I said before earlier on, just the Hydrogen in there, the Hydrogen connection to the Soul of the Creator. Man does not understand it. It's part of the Amino Acid. And then by law of physics what you receive you have to give that you create a balanced communication.

We receive unconditionally, but we give conditionally. The condition is that I manifest myself. You have to see me. (2:00) And then that interaction, it's... As I explained this before, you have the gravity and magnetical, their interaction creates dimension, and then you have a Mass, and then the interaction of the Mass with another dimension creates Weight. And then after that, you have a molecular structure, balance of between the fields of those who create the Mass, with the original magnetic field, you create the Inertia. And then, all these interactions could manifest itself as another dimension. If you don't have Inertia, if you don't have the, what we call, the gravity magnetical field of the planet Earth, you cannot create a Mass, you cannot absorb a Mass. And then, the interaction between the two, in... creates what we call, the dimension of the Soul, and that Soul, with the Mass and the Weight, creates the dimension of the Soul of the Physicality (STP) of the Man, which has his own Mass, and his own dimension.

This is... I explained this years ago to a scientist I think. If I remember when I was giving talk to, we ?? with the professor ?? Obermier the scientist from, I can't remember where I asked this question. A bullet, outside your body weighs 10 gram. The bullet inside your body doesn't weigh 10 gram, it weighs most probably 1 or 2 grams. (2:02) But it has a dimension of the motion, what we call, the motion, the speed. Because the body of the Man dictates the new weight, not the atmosphere of the planet. The body of the Man .. inside the skin does not weigh 100 kilo. In respect to Earth, atmospheric condition is 100 kilo. That's why we have different weights in the ?? planetary ?? systems. The same is the

bullet outside, 10 gram. Inside is not 10 gram. It's most probably 1, 2 gram, maybe lower, maybe more.

If you understand this, then you understand the bigger picture of the whole structure. That's why we can jump, the body doesn't lift a hundred kilo. The body lifts a Mass of itself, which is always constant. Because our body is in a vacuum itself, not in respect. This is part of the science which we have missed, and we are ignorant to it. And if you understand this, you understand the rest of the connections of the Hydrogen to the Carbon, the combination of the Carbon, and combination of the fields of it.

In the research in Iran, it was one of the very first things we had to be sorted, we could understand very clearly, was the disposition of the Mass, and the plasma Mass, Weight, magnetic field, within the structure. That how we could play with that, or we could get the Mass moved because of it. (2:04) I explained this before, in the lab test in Iran, we went extremely well into this, to understand the weight within the plasma and weight outside the plasma. We talk about it when we talk about landing on the Moon, we have tenth of the weight, but we don't talk about it when then something enters the body, and the field it has.

If you go back to some of the teachings, early, early teachings, we had Dr Elia Kostova and doing the medical side, and she tried to go beyond the boundary, of testing at that time, Nano needles, acupuncture, on the body of her mother. And I opposed it, because the energy-gravity used, it ?? might looked at something, but you're pulling on the energies, on the other side of the body, and you can create conditions. Because the Mass carries an energy plus with itself in the plasma of the body of the Man. You contain it.

A bullet is not Nano coated, does not carry a mass confined. When you Nano coat an object and you put it in the body, you introduce a separate condition Gravitational black box, what we call, Black Hole. In the condition of the bullet which is not Nano coated, you have an object, which now is conditioned to the... It's like you send a Man to the Moon, your body is the Moon and the Man is that bullet. Weight is different. But if you Nano coat that bullet and send it into your body, it's a totally different 'ballgame.' (2:06) You release energies, you absorb energies, which can interact, even move. You, you shoot a bullet, Nano coated, in the foot of a Man, it'll affect the energy and cancer cells in the brain of the Man, because. You say, "What's it got to do with it?" Now you have a Black Hole created, which absorbs all the energies from up, down, and it gives a ?? back ?? up. This is what a lot of scientists don't understand.

This is why Bill Gates put Nano materials into the vaccines. They understand what they are doing. You just need to cluster it. How much you cluster it, you create the blood vessel clotting, and then the death. You change the DNA because now this Nano material is a Black Hole, it absorbs energy. It's not that injection of you had a vaccine.

These are part of the science Man has to understand. Our Knowledge Seekers and our scientists in the movement are playing with the ?? (toys) as I call it, you know, the big blocks of the Lego game. They haven't got those tiny ones to see how to play with it.

They have not managed the, what we call, the mobility of understanding and what we call, the knowledge of the handling. The ?? motoric has not been fixed yet.

Any other question?

Q: Could I just elaborate a little bit on. Going back to the Hydrogen and Carbon. (2:08)
So the Carbon is basically a reflection of the Hydrogen and it picks up a different structure...

K- No, no, no, no, no, no, no, no, no. It's amalgamation of the field in the interaction with the plasma. It's not amalgamation. ?? You got to understand, you understand. The thing is you interact with the center and then what comes out, it creates its own atmosphere. According to strength. It's like Earth. The gravitational magnetic field of that Soul, that cell, dictates the size of the cell. And then it's got nothing to do with the Hydrogen which came in. Hydrogen is constant. It's a constant flow.

Q: Okay, so the new Carbon structure then, what makes it... in the past you've talked about it being the communicator or part of it. It forms the structure of the Universe I think. But what makes this new Carbon entity useful in those dimensions, in the communication and structure where the Hydrogen is not?

K- It's the emotion which translates it to what it used to be. The environmental condition, I remember Rick talks about this sometimes, one atom of Hydrogen can cover the whole of the Solar System, a galaxy in the Universe. But what does it do, what is its purpose? And only dictates .. Its environment, its size is dictated by the fields around it, how much they allow it to grow. (2:10) The gravitational magnetic field of the center of this galaxy, and the central Universe of this Universe dictates the size of the electron, dictates the size of the proton, dictates the size of the neutron. Does not matter where it's produced. That's why the Mass is constant everywhere in this Universe. Because what you call Mass is the Inertia of the availability of the fields between the magnetic and gravitational. The source is Hydrogen. It's what you call that neutrino they are looking for to find. It's that neutrino. You can never get it. It's there. But it's interaction with the plasma that decides what is left. And then, the size of that balloon of the neutron is dictated by the central field forces of the Universe, not by Earth's atmospheric condition.

And if you understand this, then it goes to the next level, understanding the connection between the C12, C14, and the position, the size, and the field strength of the environment. The higher you go in the Carbon isotopes, up to C60, you'll find a crystal structure which is field force made, is not Man, or what we call matter state made. This is the reason why we see the shape of the UFO. I'll explain to you something very interesting. Let me see if I can catch on to this. (2:12) When I showed, when you've just seen past part of the teaching. You see the Iranian UFO like this. It's got a head and then it has got a body and then you've got this. What we show UFOs, to you the ?? Chinese UFOs are like this. This structure here tells me the Iranian development, what they've decided to do is on the mechanical basis of the plasma. They have structured an object and they have put a system inside it, that moves ?? this object. With the system which we

develop, we, with the field forces, we decide the shape of the object. We don't need to make the object.

This has a, what we call, aircraft hangar position, this has Universal position in size. That's why stars are so big and Universes are so big and everything else, because the field forces decides the shape and the size of the position. And this field forces decides the size of the Hydrogen within it. We are using Hydrogen from planet Earth, so our Hydrogen is pre-dictated by. If we use a Hydrogen base from another star, this will be different. This shows what I call. When you look at that picture from Iran with a member of the Parliament in front of it, it shows it's a mechanical system. It's the original Iranian system which I built in Iran. We saw this figure. So they built, they put something in. (2:14)

You saw in Beijing, where we made a system and material fell on the floor, because we did not do something else which would have given it a shape. And these are, you look at something, we look at the scientifically different way. And Man needs to understand this. And then, if you can create this condition of the Hydrogen structure atom of the galaxy, another Universe, you'll transmute to that Universe. Why does the structure of the Hydrogen in the tree is different than a Man? Man has not understood that gap is difference between the electron and protons, of that wave strength in that position. Why stones, every stone has within it structure, every single cell, which you buy as a mineral, stone, rock or whatever, has the structure of the Hydrogen in it? Manipulation of it, which makes it's an atomic structure. This has not been understood, so we still battle with aircraft hangars and the rest, and you saw in Beijing, in demonstrations. And, in some test we've done, people can put their hands in the fields, they feel it. They don't see their hand, they see their hand. Originally this was done by Ali in Canada, if you remember, a few years ago, but he didn't understand it.

Shall we call it a day? (2:16)

R: Sure, if you like Mr. Keshe we can...

K- If there are any other questions? I know there's always...

Q: ... Rick and everyone, I would like to learn more about the Children of Mitra. Could you talk about them a little, or tell me where to find this information? And why you refer to Mitra rather than the Creator? Thank you.

K- Creator is a Ray, Mitra is a converter. It's a Love of the Creator. Children of Mitra, they are those which within their grain of life, war does not exist. Killing does not, destruction doesn't exist. And they reflect the beauty of the Creator, which is a giver. One thing which a lot of you will be shocked to understand, Children of Mitra are the most selfish generation we'll ever see. The selfishness comes out of the inner emotion, that they want to decide where and how to give, to give the best. Doesn't come selfish that, "I want to hold and it's mine." I give. The Creator gives unconditionally. Children of Mitra gives condition as long as satisfies the need of the Creator. (2:18) That's the difference. It's the reflection of the Man within the STM. And this is what we'll learn in the time to

come. They all carry the beauty of attention, that we all love them, because when we see them we cannot (help falling) fall in love with them. Because they give, even in their presence, not in their physical need. You'll understand soon.

Shall we call it a day?

Q: ... Is the new Pain Pen still for personal use or can it be used by other members?

K- Yes, yes, yes.

R: It's personal?

K- Yeah, yeah. There will be a limited number of these, will be produced, are different colors, different things. but primarily the same. And if you buy two it'll be best, because you can put one on this side, and the other one transfers, they're not all the same, in construction, constitute.

R: Are different colors for different things, you mean? Or the colors don't matter?

K- They're randomly different colors. It was a little bit boring in just the blue. There is a mark on it, we know it's our product, and they cannot be copied as they try, as you see Knowledge Seekers copy everything.

There'll be a number of new resellers around the world which will be announced in the coming time with the Knowledge Seekers, that you can get your products, from the new partnerships of the Keshe Foundation around the world, that these products will be available through. (2:20) And this reseller allows the Knowledge Seekers to run a very in-depth more products based, what we call, structure.

R: And I understand the new .. resin products will be available at the Store, later today, I believe.

K- They're already there, I think. The products, there is some more getting added, it's like the, what you call it, fish tanks I call them. Originally there used to be fishes in it, but there's some more green ones, like for ducks and other things, it's just made fun, to be fun. But in fact it does the work. Try, remember, not to put any of these products on a metal container, or anywhere with the metals. Try to hang them if you can, in most places. They are made, a lot of them, if you can hang them somewhere, put them up in a wooden shelf, and that kind of thing, do not put them somewhere when there is a metal interaction.

Thank you very much, and see you next week, see you tomorrow morning. The session starts at 9 AM Central European Time. We don't know, we're going to take 3-4 hours, because it's a combination of tests going on with you. Trying to remember what happened to you, what you're going, where you're going. And anybody can still join, we haven't

closed the thing till later on today. You can all participate and join in, if you want to join in. Thank you very much and see you tomorrow, and the rest we'll see you next week.

627 KSW – January 29th, 2026
