

Forecast for 2026 - Chinese Control Rare Earth - West Needs Plasma - Connected to Sun - Cancer Solved - C14 - Change Begins

Introduction to 623 KSW

Note: Not checked by KF interpretation by KS of KF Brazil

Much of today's workshop was a forecast for what will happen this year in 2026. The old will start to break down and give way to the new. We will see the fall of regimes politically and economically and a newer version will arise for a time. In general, humanity will start to change towards Universal values, but this will not happen over night, it will take time to establish. It will get started. Mr. Keshe laid out clearly why he thinks this will happen. Over years he has been explaining to us how the Chinese went into Africa and took an opposite policy of the West, which was to pay almost nothing for the resources and when they couldn't get anymore, they would get out and leave behind their mess of poverty and pollution. For example, in the Congo the Chinese built schools, hospitals, roads and for every Chinese employed they would train 4 Africans to be able to do the work themselves. And at that time the Chinese gave fair prices for the resources.

The motive for all of this was to eventually get control over all of the Rare Earth materials and precious metals around the world. This year they have achieved their goal and now they have started stopping the flow of raw materials to Western industries. Some months ago they stopped supplying special magnets needed for industries to operate and recently they stopped supplying silver that is needed for weapons, cars, computers and a lot of other things. If Tesla, Samsung, and other companies want to keep going they will have to move their factories to China. This will create a huge economic crisis in the West. The only option left is for the West to accept the new Plasma Technology and start to produce materials from the M fields of the Universe (U). This is why Mr. Keshe showed the production of materials like gold in Beijing last May. It was proven by the experiments done by the Chinese Military last year. This is also why scientific articles were published in the US Stock Market for the Markray Corporation. Everything has been set up to move ahead with the technology (T). The only thing needed is the acceptance by Western governments and now the Chinese are providing that opportunity in 2026. This is a basic summary of where we are right now with the release of the Plasma T on Earth. And a couple weeks ago 3I - Atlas released huge M fields at the level of the Soul of the Man (STM), or Central Energy of the Body of the Man, to elevate the whole of humanity to help us make this step forward. This is also the fulfillment of all of the prophecies written in the Holy Books of the Man, that the Age of Darkness would give way to the Light and the "lion will lie down with the lamb." This is the year for all of that to begin and it can only be fulfilled through the implementation of the Plasma T as taught by KF. This is not matter state understanding of plasma or ionization of electrons. This is plasma in terms of MG fields and how the U actually works, and is understood as the Knowledge of Creation, which everyone has access through their internal Energy.

At the moment, humanity only accepts matter based science as real and has denied the Energy side of life. This is why scientists cannot understand why light behaves both as a wave and a particle, and then, to try to explain that, they came up with the Quantum (Mechanics) Theory, but this only remains in the matter state level and is incomplete. We explained some weeks ago that the Field state or the wave is the original state, and that the fields are always emanating from the Creator as Cosmic Rays (CR), H Plasma, or whatever, and when they interact with the fields of a local environment they manifest matter state or what they call, particles. It's a very clear and simple understanding of why and how we see both waves and particles. This means that the M fields radiating from the Sun become the Earth and as the fields continue to radiate they interact with the Inertia and MG fields of the local environments on the planet they become all the different elements, or matter state manifestations. For example, the huge Cu deposits in Congo were originally created this way, and then Man dug it out of the ground, refined it and called it copper. To prove this is the reality and not a theory, Mr. Keshe demonstrated it publicly in May 2025 in Beijing when he produced gold from the interaction of plasma fields from spinning reactors. This was also tested with the Chinese Military and confirmed by their laboratories. An Article of these experiments was published in the US Stock Market. Regardless of the proof it is not being accepted for other reasons like political and economic. All this points to the fact that our current science is extremely limited in its understanding and it needs to be upgraded to include both the matter and Energy states together, which will then cause a massive advancement in Man's knowledge and technology. This is the year, 2026, that we should start to see these changes in our understanding.

An observation was made by Einstein that when one electron moved or flipped, the others started moving also. Today, Mr. Keshe added that they move somewhere else in the U. Then he said, because the cells of our body were created by the fields of the Sun, it means that they are also connected to the Sun. So a cell in our brain is connected to something in the center of the Sun. The Sun is connected to the Galaxy, the Galaxy to the U, and all the way back to the Creator. It's for us to think about what this means. If we move something here on Earth then where in the U does it move something else? This is how the changes made in the STM will effect the rest of the U. Just thinking about it locally, our relationship to the Sun is a lot more than we ever imagined. There is evidence that all the ancient cultures from the Middle East to India worshipped the Sun. Even today, religious Hindus if they are able, upon waking in the morning will bathe in a holy river and offer water to the rising Sun. Are they connecting all the cells in their body to its creator without knowing it? In a way, I like to think of the Sun as both our Mother and Father (Mata Pita).

It seems Mr. Keshe is implying that because China moved and allowed the showing of the creation of materials, that it will cause the West to move also in this area. But because it has burdened itself with accumulating most of the world's Rare Earth and other resources China won't be able to go ahead. They have to pay back the huge debt they created. Something similar happened in Africa 25 years ago when they were able to adopt the new mobile phone technology and went ahead of the Americans, who were stuck with

the burden of having to pay back the debt on installing cables, which at one time had been the new technology and got passed over. The current situation with China will allow the West, if it will embrace the new Plasma T to leap ahead by hundreds of years.

Even in matter state we realized that cancer is another entity within us that our body starts to feed. But now he is saying that cancer is like another sun inside us. How can we use this understanding to change our relationship with it? It's like the Black Hole which to the bandwidth of our eyes looks dark, but to the bandwidth of the U looks brighter than our Sun. This means it is relative to the MG field strength we can identify with, which again is controlled by the emotions and our ability to know our Soul. The secret to life in the U is to be able to control the M field strength within ourselves. The reason chemotherapy works is because it adds fields to the cancer and changes its field strength, and maybe it becomes an energy the body can use. But then people can die of a cold because the Chemo destroys the immune system by way of the micro channels in the bone. Mr. Keshe knew how to read X-rays as a boy and he gave an interesting analogy. Cancer appears white in an X-ray and scientists say it is because the tumor tissue is more dense and blocks the radiation. Bones also look white. He says the cancer is a source of energy, and if you hold the X-ray against the Sun it all turns white and you don't see anything. Is it because it all becomes energy? And the riddle is that the cancer has the same feature as the bone and you'll find the solution there. There is obviously a higher level of knowledge hidden in these words. But if we can think of the cancer as an energy, and its field strength as a manifestation of the interactions of the emotions of the STM and STP, then maybe we can find a connection to it through the emotions we are conscious of, and try to absorb the energy. This is really a practice for how we are going to live in the U, where everything is based on the purity of our emotions and being able to control the M field strength within ourselves. In the meantime the Plasma T is here to help us with part of the field strength.

There is a very interesting confirmation of what Mr. Keshe was saying about cancer and the bone being the same that comes from the work of Dr. Ryke Geerd Hamer, who founded German New Medicine (GNM). A KS explained to me that Dr. Hamer was an oncologist and he took a sample of a bone and a sample of bone cancer, and the other doctors were not able to tell which one was the bone and which one was the cancer. Therefore, he concluded that cancer the way they were defining it does not exist. We know that Calcium (Ca) is involved both in the bone and the cancer, and every cell has Ca in it. This KS had an MRI scan of his brain done by a GNM doctor, and she said he had cancer as child, probably in the knees. Surprisingly, he replied that he had had extreme pain in his knees when he was 13 years old, but the doctors said it was due to the bones wanting to grow more and not being able to. They never found any cancer. The GNM doctor said, that was because they didn't understand it. According to Dr. Hamer's years of research on 60,000 cases, cancer forms to resolve certain emotional conditions, and over time the so called, cancer in the knees integrated itself into the bone, but left its trace in the brain, which the MRI picked up. This is quite amazing because as far as we know Dr. Hamer never heard of Mr. Keshe or Plasma Science, he made his own theories based on his research. What's interesting to think about is that, had the doctors told the KS he had cancer, the fear and powerful emotions generated could have complicated the

body's natural healing process and led to unnecessary treatments and possible death from cancer. Luckily, they did not know, and the extra tissue we call cancer was assimilated into the bone. Left to itself, the body and the Soul were able to convert the field strength of the "cancer" into itself. And this supports what Mr. Keshe said, that the cancer has the same feature as the bone and you'll find the solution there. There is a lot we can learn from German New Medicine about how the emotions manifest themselves as matter state in the body.

KF has a technology for producing Carbon 14 (C14), which they produce heavily in the labs. He said, as a field C14 is a Cosmic Ray, but it is not clear what that means. Then he didn't answer directly whether it is part of the CR technology for producing materials from the fields. He said, it's part of the Universal work, but not part of our work. So we don't know if that is what they used to produce gold in Beijing. There is a lot of hidden knowledge in the work of the fields and he has to take time often to try and clarify it for the KS working in the KF labs. Everything in the Creation is based on the work of the interaction of the fields. And KS who have CR Balls should understand that they are living entities that "eat" or consume energy and create matter, and everything else a living entity can do. Don't be surprised if they change colors, increase or decrease in amount. If they decrease in amount don't think that you have lost something. Understand that you needed the fields it has provided to you. One day I'll explain in detail how C14 is created as it is the cornerstone of the energies of the Creator.

Coincidentally, the New Year and the KSW came together on Thursday and Mr. Keshe's teaching gave us a lot of hope for 2026. He applauded the KS for suffering so much ridicule and some were even put into mental hospitals by their families, and yet we never gave up hope and we continued to support KF and the Plasma Science all these years. Be proud that you stood solid behind KF and as this crisis develops the governments will be forced to accept the new Technology and at that time they will recognize the importance of KS and your contribution to humanity for bringing in the changes. Remain humble when they praise you, and don't try to 'get even' with those who may have injured you. He said, my love goes to all of you unconditionally as the knowledge I've given you. We are Universal Teachers and we have fulfilled our promise to our Creator. Have a wonderful 2026, but know that the change has come, and you will see it. It's the year to fulfill the promises of the past and there will be massive changes and the beginning of the World Peace. One by one the currency of the nations will collapse and the world will become unified in currencies under the banner of the Keshe Coin (KC). It will be accepted, but it still needs a lot of effort. And I still have a few more years left in me to complete the World Peace before I depart.

Thanks for listening.
