

# **The Results of Our Encounter with 3I - Managing the Zoo of Earth - Blood Flow of U - Change Humanity Through Enlightenment Game - Progressing Through Anxiety**

## **Introduction to 622 KSW**

Note: Not checked by KF interpretation by KS of KF Brazil

The whole first part of today's teaching was about explaining the test results from the 4 days when the KF Plasmas Systems were turned on and connecting us to 3I - Atlas. Mr. Keshe specifically tuned the systems to 3I from Thursday's KSW over the 19th and 21st of December and shut them off on Monday. The 19th was when the fields from 3I reached their peak and the 21st was Mitra's Birthday and the start of a new Era for humanity. The governments kept the public from knowing anything about the event, and it was only regarded as a comet passing by. Meanwhile, the Knowledge Seekers (KS) who understand about the Plasma Science and the Knowledge of Creation were tuned in and receiving plasma fields directly from 3I through the KF systems. In a way, it can be considered the first public encounter with the Universal Community (UC) as in plasma the interaction goes both ways, therefore, we were giving to 3I as well as receiving. We were well prepared ahead of time not to expect something to happen in the dimension (D) of physicality, and so we were focusing on connecting through our Central Energy, or Soul. We will be observing what the effects will be over the next 5 to 10 years and even up to 100 years. Mr. Keshe was busy the whole time making video recordings of graphs and studying the data, which will be kept with KF until humanity is ready to analyze them and they will be given to organizations that join the KF Space development. He said, that the knowledge of the KF has become so deep, that it is frightening to reveal what we have discovered. We will go over some of the main points and try to unravel some of the mysteries of life in the Universe (U).

When 3I entered our Solar System (SS) back in the summer time Mr. Keshe started explaining to us in term of Plasma Science the different anomalies that it was displaying, and which to matter state Physics is impossible. When NASA and the others realized they could not explain its behavior and were afraid they were going to lose the narrative they simply denied the public access to the data and said it was a comet. Step by step KF has clarified these anomalies according to the plasma. If you remember, some of the things we learned were that the outer covering of the rock is to protect the inside spacecraft during high speed space travel, The reason why tail is in the front instead of the rear, why it has different composition of materials and colored lights, and what they mean, how it could go so close to the Sun and not be disintegrated, how it can split and make copies of itself, the list goes on and on. All this and more is explained by Plasma Science. But why it was visiting all the planets in our SS and its true purpose behind its 3,000 year cycle of visiting our SS is being explained today.

After deeply studying all the graphs for days and due to his knowledge of Universal fields, plasma, and how life is created, Mr. Keshe came to the conclusion that 3I is downloading passengers to Earth and picking up those who are ready to leave. Every 3,000 years or so it comes to check up on Earth and see how the development is going and at that time it can add fields to those species who need help. Earth is managed like a greenhouse nursery for Souls, and could even be considered like a zoo containing different species from the U that are being looked after. For some this might be very shocking, but for those of us who are following the teachings he has been giving us hints about this over many years. And now our level of understanding of Creation has reached to the point where we can understand and accept it and not be afraid. Once he told us if we had to wait for the fields to spontaneously come together to create our Sun, it would take so much time that it is virtually impossible. Therefore, Creation takes the help of enlightened Beings to use their knowledge to co-create all the countless varieties of creatures in the U to enjoy the love and beauty of Creation.

He was explaining the graphs and how they show these results, but it was not so easy to follow. The main point seems to be that he was watching how the energies that represent the STM, Soul of Physicality (STP), and physicality (P) were moving and he understood that they were being transmitted to Earth from the ship. They are able to take 'seeds' which are basically Energy Packages of the STP of different races of the U and transmit that Energy to the Earth. When they enter the Earth's environment they are able to create their own Soul, and then the two together create a P that expresses the emotions and desires of the Being plus the interactions of the Inertia and all the MG field energies of the local Earth environment. This is what happens in the womb of human mothers when the STP is first formed from the egg and sperm, and then the STM is added and together all the field interactions create the baby. But in this case it doesn't just have to be a human, they can manifest any being on the planet like animals, fish, plants or whatever. This opens up a huge understanding of why we have so many varieties of species. Think about the centipede and spiders that have so many legs and no arms, which planet were they seeded from? I don't think it necessarily means that this is exactly how they will look on their home planet. Because the final look will be a mixture of all the different field interactions to finally give it this look that is suitable to Earth. It's actually quite beautiful when you think about it, and if you have some knowledge then it's nothing to be afraid of.

When we start to think more about this then we may wonder, was it under 3I's care millions of years ago that the seeds of the Man came to this planet from somewhere in the U? If they manage this SS, then when Earth was first formed on the outer edges like at the position of Saturn, did 3I place the seeds at that time of what was going to become our human life? And as we entered the "Zone of Life" of where we are now, we started to sprout and become humanoids? There is so much we don't know about our own history. The Beings of 3I - Atlas must contain the whole human history as it actually happened. Maybe one day soon we'll have access to it. I wonder how much 3I will become part of humanity's life when we reach the point of entering the Universal Community. Are they just the managers of this nursery, or part of its creators? He made a comment that when NASA sent a radio frequency message to 3I, which is a matter state signal they received a

mater state signal back and they got all excited about it. He said, it's like the Mother replying back to the child in a way that it can understand. Unfortunately the scientists don't want to understand that in Space they operate on plasma which is connected to every other plasma in the U. The Souls communicate by matching the field strength of the plasma. And 3I is of higher intelligence so they can convert plasma to matter state frequency that we can understand. The other thing is Mr. Keshe deliberately sent them a message from KF systems on the Universal Line of Communication, so for sure they will understand if they don't already know that a higher Being is on the planet helping us. And once this connection is made it can never be broken. The 3I is going to have a bigger role in our future then we ever thought, because all of KF systems will have this connection to 3I built into them.

The question of why certain Souls come to Earth as humans, animals, or whatever is quite interesting. He hinted that there are certain fields they can obtain from Earth what he called nourishment, and a certain kind of education. Maybe 3I is like a travel agent and they advertise stays on Earth throughout the U. He saw energies passing through the graphs which corresponded to the transfer of a Soul. It is assumed that they were going back to 3I after completing their stay here. It wasn't clear how they gave up their physical body and returned to the ship. If they could transmute the P back into Energy then why would they need a physical ship like 3I? This reminds me of an interesting case of when the Sage Ramana Maharshi left his body behind in 1950 in Southern India, people reported seeing a bright comet in the sky. For them that was only a "good omen" and now we understand the science of it.

When we transmute with the STM we first convert the P back into the energy of the STP and embed the STP inside the STM, which appears at the destination and then reverses the process to manifest an appropriate P for that environment. But in this case 3I is carrying the STP of different entities from across the U inside its spaceship. In the lower stages of evolution it seems that the P and STP are discarded and left behind as a kind of garbage. Once he said, that the U is being littered with bodies that are leftover from the process of creating the Soul. So how do we understand this process of carrying the STP around the U to start new life forms? It seems to be a lower order dimension of propagating races and for creating a variety of life forms. We know that different physical bodies cannot mate with each other to create offspring. In a way, it's like making 'test tube babies' and doing genetic modifications of species but on a Universal level. In another way, it is totally different, because human scientists are forcing the matter state on entities. In this Universal way the STP is introduced into the Earth's environment but then the entity itself decides how it wants to manifest through its emotions and interaction of the fields. I am still trying to get my head around what this means. It's not only for growing Souls, but it also seems to be a form of travel for those who are not enlightened enough to travel by transmutation of the Soul.

I just have to say that every week we seem to get hit with something new and surprising, even after 12 years. It's a way of detaching us from our fixed narrow ideas and pushing us to want to discover the essence of the Totality of Creation. When Mr. Keshe says we should understand the Totality of the Knowledge, I understand it to mean discovering the

Fundamental Pattern of how Creation works. It seems like it is an Emotion of Knowledge, or a feeling of how everything works. And once we have that feeling then whenever we look at something we connect to how its fields came together to create it, and what its purpose is, and all the other things about it. It's like being part of Life itself, rather than just memorizing other people's concepts about life. It's a different dimension of life than we are used to and Mr. Keshe embodies it. So just listening to him and allowing the knowledge as M fields to enter our own plasma is really the training and how we learn and grow. And then we reach a point we can start manifesting our knowledge as new life forms. And our Soul is being prepared for that on Earth.

Years ago he taught us that the blood knows how to find specific cells in the body and deliver specific energies to them for their maintenance and even replacement, and that this is coordinated with the brain and ultimately the STM. Then he said that what 3I was doing by feeding and nourishing us, is just like how the blood knows to find the specific cells in the liver, kidney and the whole body and keeps them nourished and functioning. Again it's an example of the Micro in the Macro and vice versa, but it is on the huge scale of the U. For some reason this struck me inside, that 3I is like a blood cell of the Creator, and even blood cells look like disk shaped spaceships and they have a lot of different structures inside them and do very complex functions. The blood has its scheduled routines to maintain all the cells, and 3I does the same by visiting us and feeding us with massive M fields. It is truly amazing and it 'pulls the carpet out' from under our human pride, thinking we are so advanced and the only ones in the U. And I feel humbled when I think of how highly intelligent they are, and they are being so careful not to disturb Earth, but at the same time wanting us to know that we are not alone, our Universal Family is caring for us, regardless of how we behave. And then we have Mr. Keshe who says he feels honored to have been able to record this historic moment in the history of humanity and one day we humans will study these graphs and increase our knowledge tremendously. Here we are at the end of 2025 and he kept his promise of bringing huge advances to human understanding, and it doesn't matter that we are not on CNN. The STM and the Consciousness of the Man has been reached even though the P is still pretending to be asleep.

The completion of the latest version of the UBESU (Universal Body Enhancement Spaceship Unit) before the end of 2025 is significant. It's a symbol for how the KF Plasma Technology has advanced in knowledge and technology. If we think back to the time when the first version of these huge egg shaped units were unveiled and how loud they were with 35 plasma reactor motors spinning in them. We have come a long way in a short time. Now they are a convenient sized Headset and their connection is totally through the plasma of the Soul. And as with all of these advanced KF Systems we can do everything with them, but we still have to be able to connect with the Soul and that should be easier now after years of experimenting and finding the right M field strength to achieve elevation of the emotion and the Soul. Since it is plasmatic the connection is available 24 hours a day, but it is still suggested that you inform them ahead of time so they can make necessary adjustments. This system feeds the STM, which changes the conditions to what we want to experience.

Another gift to all of us as we finish 2025 is the launching of the Enlightenment Game. This game will become the backbone of bringing enlightenment, change, and peace to humanity. At the moment, it is in the trial phase and is being operated on the Browser of our computers. Everyone can sign up on [getplasma.org](http://getplasma.org). Later this will be run from the One Nation Network (ONN) when it achieves the plasma condition, then no one can interfere with it. Instead of killing and stealing this game teaches about the Plasma Science and brings enlightenment and peace. It will foster cooperation instead of competition and in the future we will be able to make a living at it. We'll be able to earn Keshe Coin (KC) by playing the game. It sounds like when this system gets up and running, all the things we do now on the Internet, we'll be able to do on the ONN Plasma network. This is the beginning of the One Nation, One Planet, and One Race. Try to bring in as many people as you can to participate in this so that they can correct all the mistakes and release the first version to the public on March 21st, 2026. It's been promised in the Holy Books that 2026 will be the year all people will live together in peace on Earth and no one will go hungry. It's our job to spread this Game and teach people how to play the Game of Enlightenment.

Some KS asked why they were feeling anxious while receiving the fields from 3I, as they were expecting that they only should feel something they thought of as good. The answer was surprising and in different parts. It seems that it has been a pattern that when 3I charges up the Earth with higher M fields it can lead to war and destruction. It's because they transmit energies that are on the line that create anxiety. This was surprising to hear, since he has always maintained that the U is a peaceful place. If 3I is helping us to grow, why would the effects of their field boosts create war on our planet? It requires much more maturity to understand. He mentioned that because humans have been getting charged with 5G and different kinds of radiations to the brain that perhaps 3I miscalculated what the effects would be, and instead of creating war it elevated humanity. We are now better able to handle different frequencies than we were in the past. He said, they clearly know what they are doing and deliberately send a diffusion of fields that are on the level of the STP and the amino acid (AA) of all the Beings on Earth and it changes the RNA which then changes our genes. This is the RNA in terms of plasma and not matter state. The RNA of the Man holds the records of everything done and achieved by the STM and from that it converts the information into the physical manifestation which is the DNA. He set up the system to receive every Cosmic Ray 3I sent to us. He has the knowledge to create a direct Line of Communication to the Creator. Let's hope that 3I is elevated enough that it does not intentionally create war on Earth. Instead, the war may be an outcome of how the Man receives the higher fields and doesn't know how to integrate them into the Soul, therefore it can come out as aggression. Maybe it's like how, when too much energy reaches the brain, and if the STM cannot absorb it, it becomes an epileptic attack and other diseases.

The second part of Mr. Keshe's answer was that when too much energy enters the Soul, it creates uncertainty in its structure and that can lead to feeling anxious. And as we adjust to it we become wiser. In a way, we receive the higher fields that are unsettling but they lead to more enlightenment. It's like we received something from the "Father." But he is not saying who the Father is.

In spiritual practice when we have these kind of feelings of anxiety, panic, depression or what we consider negative emotions, it's actually a positive sign, and a sign of progress on the spiritual path. This is not something that can be forced, rather it comes out of the sincere desire and longing to find the Truth within ourselves. When I first met my 'spiritual friends' one of the first things they said to me was, 'don't get too comfortable.' One of the ways of making progress on the path is to break through the safety feeling we get from our identities, but these identities are subconscious. For example, as a child we get very used having our parents take of things for us and when the time comes that we have to take care of ourselves, we can go through that anxiety or even panic of having to make our own decisions. It's like Life is a series of death's, but it is the death of one idea giving birth to a bigger idea, and we go along progressing up the ladder to Self-Realization. In terms of Plasma we can say we keep expanding to be able to handle higher field strengths. Looking back over 2025 it was a year of radical changes for Mankind and as KS we all got to be part of it. We look forward to even bigger realizations in 2026. Happy New Year to all!

Thanks for listening.
